

419th Knowledge Seekers Workshop; February 10, 2022

(Quick Index completed proofed 21 pages; Transcription & proofing 1time completed , need to do -- Key Phrase, Words,)

Adding M field energy through emotions to interact in matter state; Stopping motor with intention; Gans is transmutation of Matter into Energy; Time is created by mind and heart; Soul of flight system will not crash protects from wrong intentions; M field strength loading - prioritizing intentions; Transmutation of elements through adding electrons - energy packs -adding M fields through intention; Future T will not harm people - cannot create viruses to kill; Asked to return to 5+1 negotiations - sharing KF T basis; Plasma explosions never harm; Life without a brain to filter emotions between STP and STM; Body works like solar system; Souls inside of souls inside of souls >> satisfy all; Make powerful radiation fields from glass water; Buildings out of PI fields; Positioning 1 element STM creates emotion; Use MaGrav & Cups to find your soul; 22nd February; Planets rotate like radar ; Have to hit center PI to explode it; Earth not perfect circular orbit; Living entities as M field, not to kill; You are your own devil; PI that responds is a soul; Stones soul feeling; Vegetarians accept killing thousands of rice souls; Planet's soul includes all souls it created; Ancestors recorded in RNA; Babies dream of relatives from RNA; Inertia dictates everything on planet; Detail explanation of Methi - we all are; Declare through soul; UC a gift to humanity central soul of change; Ayatollahs have billions; Austrian Chancellor fully vaccinated still getting virus;

Introduction to Quick Index:

It's time for us to learn about our emotions, what they are, how they are created, and to train ourselves to be able to use and control them. By stopping the motor with his intention, he showed us, that we can interact with the matter state, through the fields of our emotions, which, are in fact, nothing other than M fields. By understanding that everything is made from the fields - this is the totality of the knowledge. The teachings are constantly bringing us back to this lesson, and once we get this, the whole of our life and world will change.

We already do this in our body without knowing it, when we transmute parts of our body into cancer cells through our emotions. This is how we are going to travel through the U by controlling the space reactors with our emotions. We do this in our Cups of Life when we transmute Cu into Zn. Today he taught us that, this is the same process, of how, when you add electrons to elements you transmute them into other elements. By redefining electrons as plasmas or energy packs, we are simply adding plasmas to change the elements. The beautiful twist is, that this is really M field energy, which we can add through our emotions. This is beyond our wildest dreams - "you mean I can turn anything into anything, just by the power of my desire, the power to give?" So we have been alchemists all the time, without knowing it. Now we can easily understand how the girl was able to grow her fingers longer, because she wanted to play the harp so badly. Instead of getting more complicated the teachings are actually getting more simple - but we have to spend the time pondering them and opening ourselves up to what it means.

This workshop is about us training ourselves to find our soul, and through the soul our emotions and how to use them. The MaGravs are the best universal field generators to use for this training, but there are others also. The interactions between the STM and STP create emotions, with the brain as the matter state intermediary. In the future we'll be able to experience emotions direct without the brain, but for now we can start training to feel and create emotions in our brain with the MaGrav. By practicing and repeating the process we'll gain control over our emotions. This is all preparation for being able to use the upcoming flight EU.

This may sound too good to be true. But the trick is the ethos, "think good, speak good, and do good." Now that we have become aware of how limited and painful life is without the soul, we turn our full attention to elevating our souls and that of the others. KF is providing so many tools through the technology to help in this process. Just giving your energy and time to study these teaching in itself will elevate the soul.

There is a lot in this teaching. We made a separate excerpt of the MaGrav teaching, which so amazingly brings everything together making it easy to apply. Then there is, why plasmas or planets, etc, rotate. Not for the sake of rotating, but through M fields we communicate with our environment and this is how we find our place and positioning where all the other plasmas have to agree. There can be no slavery in this system. We have to agreed to the positioning. He explained that the Devil is what keeps you away from understanding the truth about your own creation.

There is a big teaching on the meaning of Methi and the 22nd of February, and how we all are the Methi of our own soul and we are here to serve. That, it's our job as KS to be that Carbon, that makes the connection through the UC to build the structure of peace through the STM and not the individual man. In Brazil, we are doing this very nicely by meeting everyday and sharing our intention for world peace. We become the gel that holds everything together. The world leaders are being reached and soon the American leaders will sign the peace treaty. We have to continue our work. And lastly about the vaccines that the situation is running its course. The fully vaccinated Austrian Chancellor still got the Covid, so what is the purpose? And we need to continue expanding our knowledge of viruses. He asked us all to expand and evolve the knowledge not just copy.

There is one thing to add. If you continue to increase the plasma condition, but do not allow the plasma to rotate, when it reaches the point to interact with, I think he said, the earth's Inertia fields, you will get lift and motion, or sinking. This is related to what happened with a KS when they were being taught how to fly with their soul in the MOZHANS. The KS said, they felt their body becoming lighter, starting to lift, but then a fear entered the mind, and they started to rotate. Did the plasma through the emotion of fear convert to physical rotation? Something to ponder over.

Thank you

Quick Index:

Some of you are listening with computers or telephones, and some are receiving the message by soul; We have been touching on some technical information, not much considered by Knowledge Seekers (KS);

Years ago we stopped running reactors with our thoughts; The important thing was not stopping the reactor, but how we interfered by creating a field strength of emotion; How did the line of thought, strength become mechanical, to be able to stop the motor?;

Did we create a field force that was strong enough to put a break in the motor, to keep it from turning? No we did not. What actually happened is we created an additional force, that was over the limit of the motor, and it could not interact anymore. It moved to a different level of energy production in the matter state, or you could say it moved from matter state.

This means we went beyond the current understanding in the world of physics about magnetic fields; We were able to interact and add (energy) to the M fields through our emotions; We brought together the interaction of the emotions and the matter state; (Through the soul and emotion of our intention, we created fields of our emotion, and were able to interfere with the motor). The mechanical system was what we call, the physicality (P) of the emotion; This is how we will control position, speed and direction of flight in our space reactors;

You decide to extend the dimension (D) of your soul to the motor, that it becomes part of the intention of the emotion, and through our thoughts we create a physical interaction; He did not stop the motors in Canada or Germany, but only in the room where he was present. What's important is that he was able to bring a change in the conditions of the reactors by extending his soul through his understanding and desire;

The reason we say, we are ready for 6th of June, is because we have already tested the flight system, we know they work, we are just making the final preparation, and then we allow the things to happen;

In the next generation of space systems we probably won't even have a physical structure, because then you have to protect it from the change of M field strength of the environment you are traveling in. If you don't, then if you are traveling through an area, that suddenly dilutes your field strength, your cabin would disappear. Suddenly your seat would become like a Gans, energy fields. This is what it means to understand the totality of the knowledge;

All of you as KS for past decades have produced so many Gans's. Fundamentally, what does a Gans mean? You transmuted matter state into energy. One minute it was solid Cu in the matter state, and the next it became a greenish color CuO Gans - which is a useable state of energy. Housewives producing Cup 1 Gans in their kitchens, now know more than professors at MIT, NASA, or even Russian Space Agency; Because you have

managed to achieve the transmutation of elements, as was promised in the writings of the prophets;

The knowledge of deep space is not the knowledge of matter state, it's about the plasma and the movement of M fields; Understand that time, position and place do not exist - until we create it; What we call "zero time" is in the intellect and emotion of the man; (In other words, time is not real, we create it with our heart and mind;

(Through our emotions we create our physical position.) For example, if you feel scared you run, because you have converted the emotion to physicality (P); Or if you feel love, you hug your lover and convert that emotion to physical touch;

We wanted to stop a motor, and we brought it to a halt. Did the motor stop through the physical intention? Or did we give so much intention, we created so much emotion, that we saturated the man's M fields, so there could be no interaction (of the fields) for the motor to rotate physically? We showed this 8 years ago, but at that time you didn't understand;

We have no control over nuclear based plasma (PI) reactors when they pass 2,400 to 2,700 rpm; Because the saturation of the fields in the environmental passes that of the matter state, and matter state fields being weak, they just get absorbed into it, and the PI takes over;

KF has released videos where you can see when the PI takes over it supersedes in the strength of the matter state, and like a radar absorbs it, so there is no physical interaction in the motor; We showed some cases where the inner reactor of a system came to a halt, and reversed direction. This happens because the PI in the center of the reactor, now becomes the soul, and it decides it has to be in balance with the outside; If we would stop the rotation, but keep increasing the PI condition, then we'll reach a point where the fields of the system will come out of the boundary of the physicality of the reactor, through interaction with the earth's MG field, will create lift and motion, or could also be sinking down and motion;

This is what is happening in Linz with one of the EU, that is gaining weight. It means the central PI field of the system has managed to interact with the fields of the planetary system, with certain strength of it; (:34). If we picked it up today, it might be 2 tons, or it could even be 500 kg, because now it's in a different position and environment, and it interacts with the new environment;

But there is one overriding factor, and it's the same factor that occurred in stopping the motor; When we stopped the motor we also had to satisfy the need of the other 3 motors in the Star Formation (SF), then the soul of the system, allows that reactor to satisfy our intention;

The same may occur if you want to travel to the moon, but then you find out, that you are not able to arrive there. It doesn't matter what the intention of the pilot is, if at the time

and place you have chosen to land, the system sees you as in danger, or the possibility of something bad to happen, then it will not fly there. It could be that the mixture of the fields in that position, does not interact properly, or it is not good for the strength of the STM. Even the Moon cannot commit a crime. This is an entirely different way of relating to life, that we will have to understand, as we make the next step in the space T;

The new spaceships coming out of China in the next weeks, will never have the possibility of colliding or crashing, because the soul of the driver is aware not to hurt. The game of the whole structure of life changes;

The soul of the Earth is made from the individual souls of its living things, and it is responsible for what it does. The flight control systems will be an intriguing game man will play for centuries to come, because he will be looking for how the system preempts his intention. The soul of the MaGrav system protects you, not only from your own wrong intentions, but from harmful environmental conditions. It will not allow you to hit other souls, or have accidents. It's like when you put a magnet among other magnets and everything moves to find its position;

We will have to learn what is called, "M field strength" loading, which is the prioritizing of the adding and extracting of M fields according to our intention, for harmonizing the motion of the M fields. This is a way of structuring the intention of the travel. Whereas, when you just combine the M fields together, then you can go anywhere. This is why we choose captains for the flights. But later no captains will be needed, because we will create the soul of the flight system (FS) within the system itself, and that soul will interact with the decisions of the passengers;

It will take mankind centuries to be able to live equally in both dimensions, and for some people never; Some KS will understand very fast, while others will pretend to, like the cheating we saw in Romania recently; Some of you will come to understand the totality of the structure and will walk away from physical matter state, because what you have achieved is much bigger and more beautiful; In the future, would we talk to our children, or would we simply understand the emotion of each others need;

The reactors will have to be built with a correct soul, that first gets accepted by the other reactors, to interact and operate with each other. Peaceful reactors will fly in the D of the soul of the system, and not the fuel of the system; Many of you will be baffled by it, because you want to see it, but the system doesn't work, because the intention of the soul, is not correct - not as you see it, but as it is, in the game of the knowledge that is used;

We shall not see the abuse of technology as we do today, where they create viruses with the ability to kill, or create conditions to damage others. They will not be able to create conditions, that put the existence of another soul in danger, of not being able to hold onto the integrity of its fields; When we say, the time has come that there shall be no killing, is because the structure of the life, and the movement of totality, works on the D of the soul and not physicality; We as holders of the intention, will be not able to create mayhem, and then to disguise and cover it up, under whatever names;

We have seen the new structure and how it works through the creation of the Universal Council (UC) and its dedication to peace, dedication to bring a unifying position. It has shown, and will show again and again its power;

An example, is the success in the 5plus1 talks for creating peace. KF has been asked, to return and enter into the negotiations directly, as the KF technology is one of the bargaining chips for peace among nations. All the nations will have equal access to the T. We brought these conditions through the emotion of creating peace, and the interaction of the soul of the UC has brought this condition forward. How it will take shape, I do not know, but I said to myself, "I wonder if one of the wishes of the UC members, has matched our wish." The request has come from the aggressive nations, not the peaceful ones; I said to the officials, "it will be one of my greatest pleasures."

"Not to negotiate for peace, but to use the T to create conditions of peace."

Much of the job done here has come through the soul of the KS and their intention to create peace, then the physicality just walks into it. This is the same way the motor was stopped, the emotion of the soul interacts with the D of physicality. We are not very far from understanding the structure and interactions of the plasmas. We are part of the interaction of the plasmas;

Mr. Keshe wanted to explain about how you get different substances by the addition of an electron. Coincidentally Rick put a picture up on the screen that expressed this, it's interesting how the souls know.

It never could be understood before how an atom, with the addition of an electron, becomes a different thing. Now it can be understood through the plasma science. When you add an electron, or a proton, or 20 electrons and protons and maybe a few neutrons you get a different material. (This is transmutation of elements by adding plasmas.)

In a way, all these electrons, protons and neutrons are just energy packs, and how they position themselves collectively in respect to each other, creates the mirage of the effect of for example, a Cu turning itself into a Zn. It's actually done by adding a few more plasma energy interactions, rather than electrons, because the electrons are not even part of the structure, it's the electron's energy, that is part of the structure, and what they emit. It's what they give, that changes the physical structure from a Cu to Zn. We see the color change from yellow to grey. Why does the interaction of a few extra elements create the reflection of a color, and then it manifests itself in a different dimension.

Now you understand why I started this teaching speaking about stopping the reactor. We don't change anything, we simply add or take the energy of another electron or proton into the system in the dimension of the STM. The dimension of transmutation, is the acceptance of the field. This means we add the field, that creates that separation.

We add the field, that brings that connection, or attraction. We now have to learn about how the fields of intention can be loaded on to each other, that it creates the condition to satisfy the intention; This is important, because in the space T of tomorrow, you do not want to land on Mars, when your intention was the Moon. You do not want to get lost in the deep depth of space, because you chose the wrong fields, which were very similar to Moon, but because it was a near match, you ended up in another galaxy or U. Controlling flight through the STM means it has to be in balance with the environmental conditions, and the acceptance by all the souls involved, their energy and intention.

The results from the Vision EU we gave to KS to test, will help in developing the next generation of flight systems, so that we can override information given, that is from a false intention.

We have to understand the different aspects that make up mankind. We have the (man), the STM, the intention of the man, the physical emotion of the man, and the collection of the emotions of the man. All of these are like a stack of cards, and each one is an individual, which sits in its own position in respect to the others. In this pack of cards, each card has its own strength, its own GM field, it's own losses and gains in respect to the card above and below it, and further, the ones above and the ones below those. It's a collective work, a collective interaction. When you want to change just one of the cards from 1 to 2, you don't change that card, you add onto it, so that the rest of the cards can keep their positions, but at the same time accept the new condition.

Basically, the new spaceships will be controlled in principle by the interaction of the fields of the STM, with the soul of the system. If you enter it with the right intention, you receive everything from it, but if you enter with the wrong intention nothing will happen. Some of you will be exhilarated by some of the emotions you'll be able to create. You don't interact with these flight systems by pushing buttons, but by what we always said, "thinking good, doing good and acting good," and coming to the principle of understanding.

Why does a star enter into explosion, and what fields are radiated from it, and which part of the fields radiated from it are in line with the evolution, promotion, and strengthening of the soul of the created things in that environment? In the world of physicality, when we enter an explosion, we expect to be hit and become part of the shrapnel. This kind of thing doesn't exist when we interact with the explosion of plasma fields. If you receive the right fields your soul gets elevated, or maybe your soul is there to serve by becoming part of another structure to elevate it.

We will not die in the depth of the space from a heart attack, or a brain hemorrhage, that's the D of the physicality of the man on earth. We will survive and live everlasting life, because we understand the interaction of the emotions, the fields, and the fields of the need, for the time, place, and position.

KS need to understand what fields you are creating, and for what reason, and what will be the outcome, and is that outcome perfect for everyone involved. As we desire, so we

receive. When we think about our wants and needs, do we think, "by satisfying this desire, will it be for the betterment of the others?" When we reach this point, then we will understand the totality.

Whether or not mankind will become part of the physical life structure of another time and position, is the decision of the STM, and not the physicality of the man.

Those KS who are trying to understand the PI, ask yourself, "what can I give you, that it helps you in your life," not how much I give you, that I satisfy my own need. Understand the soul structure, which is the interaction of the fields of all the coils in the system, with the intention, and then you will see the result of the satisfaction of the emotion. If you are waiting for 100 megawatts, you'll get 200 megawatts.

Find a way to access to the knowledge of the U, and the field interactions in the universal environment. Understanding the knowledge of creation, means being able to share that knowledge with your own soul, and the emotion of the P, then you do not need the brain.

He told a story of traveling through M fields of the U, that could cause the brain to dissolve, and upon manifesting at the destination, the body was made without a brain, but still the man would be able to physically move and interact with its environment. The STM will be able to work in the new environment without the need for a brain. It accommodates the interactions through the field strength of P. We don't see any brain between the earth and the sun. Nevertheless, there is a brain structure between the earth and the sun, but it is a plasmatic M field, that is field strength dependent.

Go beyond the science man made for himself and understand the science of creation. The science of man is matter state physical condition, but at a lower strength. Nevertheless, man has the key to jump up, become part of totality through his soul, through understanding, that the center of his creation is within himself, within the center of his brain.

Allow that understanding to develop, and then see the big picture of how you can add another energy to it, to change the physicality into energy, but the P is still there. Like when you changed the Cu to the Gans, the Cu is still there in the same containment.

By understanding of the structure of the physical D of the STM (basically means our body), you can understand the process of change through adding or reducing the strength of the field, and how they "stack" or connect to each other.

If you want to understand how the soul and P react, look at it from a different D. Look at the structure within your own solar system (SS), and see how stars interact and are positioned in relation to each other, and then how the planetary system interact. What knowledge do the planetary systems get from the sun, that causes them to position themselves where they are.

The body of the man works the same way the SS works. We are inside a soul, inside of another soul. We observe and watch what he is doing, but we never really understood (the bigger picture). It's the same with new FEU, (we are a soul within a soul), but this time we work in the D of the soul of the U, that's why it's called the universal flight system. We travel in the U, not just the SS, even though the SS is part of the U.

It will be interesting to see how the new generation of the children of the man born through the soul, will interact, because they are inside, and within each other, and they are aware of the emotion of their P, and soul at the same time.

Mankind has to understand his own existence and life through the D of the fields of the U, and not his P in the U. Then we'll see progressive development in understanding the truth about the creation and the Creator. Otherwise, we remain in the same way of thinking and doing, where we feel we have to demise the others to show we are better, and where we'll destroy the culture of life, in acceptance of the emotion (a feeling of security by dominating the others), just trying to say, that we are correct and the others are wrong.

We want to promote the understanding and comprehension of addition, division, and collusion of all the fields of the U. How do they collide, and when they collide, how do they collaborate, and what is the outcome of the collision and collaboration?

Transmutation from one element to another like mercury to gold, or Cu to Zn, or Zn to Cu, or silver to gold, occurs by adding more energy to the strength of the fields of the electron or proton. Simply by adding to its fields strength we change how an element is detected, or appears to us.

This was clearly shown in Fukushima, where by adding one little element we changed mercury into atomic gold in the Gans state. We did not make bars of gold, rather we added atomic energy, or what we call M field energy to its structure. The same thing happens when you add atomic field energy to a Cu, it becomes a Zn, that's all we've done. It's understanding how to create the field forces and make that connection. Then you can learn how to use it in the D of the fields.

Creation and conversion of different matter into the nuclear plasma fields will allow us to create rapid division and conversion, and be able to produce the conditions for flight. The governments will have a problem with KF on this point. But the body does the same thing when it converts elements, through B12, B9 and B6 in the different glands.

I can make one of the most powerful radiation fields from just a glass of ordinary water. But at the moment we have to be with what we call, restriction and understanding of governments, that such a thing is possible. We can create nuclear plasma within seconds from something that has no substance. This allows us to be able to divide, load, and amalgamate fields in a different way, that gives the desired effect.

We will start teaching the new plasma nuclear T, which is the beginning of understanding the process of division, addition, and coexistence, and how you transmute fields to create an effect. Mutation of elements is a far superior knowledge of understanding how the fields interact. It's beyond creating matter state mixtures such as alloys.

Through developing this T, the way we construct buildings will change, we won't use manmade matters, like bricks or concrete. We'll create barriers through the D of field strength of the PI, for sound, vision, or any other barrier you choose. It will be transparent, but allows light through, and sound proof, but allows the frequencies you choose to enter. You can actually, already do this now, with the present knowledge of Gans T you have. But none of you have endeavored to do it, because you are too busy doing something else. For you proving that you can produce 100 watts, is more important than learning how you can travel the depth of the space. Scientifically there is not much to it.

The reality is, man has to understand, that it is within his knowledge to be able to transfer, reduce, and increase M field strength. How can we change things by our intention and the fields of our emotions? How do we create the condition of the illusion of completion and achievement. How do we accept the truth about us, not being able to understand, the what I call, the reality? When we accept, then how do we convert this into the understanding of totality? How do we go into the depth of the knowledge?

How do we create Gans's, that are of the strength, or near strength of the fields of the STM? Our body already does this in our brain. It creates one element, and with different positioning of this element, creates emotion, and understanding between the STP and the STM.

We were not born as physicians, scientists, a baker, or whatever we took time to learn the skill. So too, we must learn the new knowledge of PI. We are in the process of learning, understanding and feeling it. I am trying to find a way to open your eyes to understand. How can you get in touch with, or work without the interference between the STP and STM, of the matter state brain? How do we come to understand our own creation?

The only way for us to be able to start this process is try to understand the field strengths within us, which creates our emotions. It's not to do it physically. But try through the strength of the fields, to create and replicate emotions. Repeat it again and again until you get good at it. Develop and build it up so that you can repeat it, then slowly to go from one emotion to another. Understand how you can interact with the emotions and use them, then learn to be a giver, and not a taker.

When you start this process of understanding your emotions, always remember that in your MaGrav systems, and with your emotions, you have to start from one level higher, and build your emotions from the lower level. Learn how to handle these interactions. It will take time for many of you to breakthrough to that point in time.

The following MaGrav teachings have been summarized in "MaGrav: How to find your soul" I will give a short summary here.

The only place you'll find the interaction of these fields is by using your MaGrav systems. Try to understand the fields they create, how you have made your MaGrav, what fields your MaGrav produces and the connection to the different field strengths. The MaGrav becomes your "true generator" for elevation and interaction of the souls, between you, your STP, and the STM.

You do not have to sit on your MaGrav, rather it's to understand how to extend it's fields to interact with the right emotion. This is the purpose of the MaGrav systems. We gave you the cake, but you looked for the crumbs. Now maybe it's time for you to find the cake, and the beauty to understand it.

Most of you put your MaGravs (MG), vertically, but you can try different positions. You can turn the MG sideways and face yourself between the coils. Then if your pet is on the other side, through the soul of giving, "I love you so much," see if the animal comes to you without a word.

You can create a Star Formation (SF) with your MG and your soul. You looked for what comes out of the wire, but I gave you what comes out of the U.

Do you need to connect your MG to an earthly matter state power supply? What about if you connect to a plasmatic power supply, which carries the emotion of all, then you'll see the breakthrough in what you were looking for. But still the intention and understanding has to be correct. Are you looking for interaction of the souls, or the fields of energies, we call souls, or are you looking for interaction of P of the soul, or are you looking for interaction of the P? With the interaction of the P, you might create yourself new materials.

In the universal Cups, where the top of the stacker is the soul, this is the same as the 3 coil windings of the MG. The systems were set from the beginning to reach you with the knowledge, but you have missed it. However, the present coils have not been made the right way, and you have to learn a new way to make your coils. The big factor is, what is your intention when you make the coils. The soul of mankind was not ready to go through that phase of teaching. The evolution comes from understanding and intellect, not from copying and replicating.

Get yourself a pair of stereo headphones and put 2 MaGravs on either side of your ears. The fields will intersect at the point of the STM. Try to listen to the sounds with your soul and not your ears.

Now many of you will move very fast, and a large number of KS will join the Universal Community by understanding the process of the working of the soul. The MaGrav is set to elevate the STM. But I promise you, you still have not got it, because you'll not reach that point, because part of the knowledge is missing, because you did not receive it from

the beginning. Use the same MG system, and see if you can transfer the emotion, through the same system to the point of the soul.

I am the Creator. I am the Messenger and the Methi. I teach you where to go, but with science, not with the false information. Those who told you to destroy your Cups, are what you in your language call, the true children of the Devil. Those who did not want to see the progress of man. Those who sell their own children into the child abuse - their own blood. Because in teaching you the reality, and how to do it, they can not abuse you anymore. They abused your soul and P for thousands of years. Now you have the freedom. Now you understand.

Every teaching we've done is set, step by step to teach you the knowledge of the U, but you have to understand it, and not just follow it because you were told.

The dot in the center of the brain that shows up on the MRI means nothing to the doctors, but to us it's the "black hole" of the life, the existence, the essence of the creation, the position and the existence of the place of the STM. Understand the true essence of the knowledge in the D of the fields, and not in the D of P.

Those of you who stuck yourself with the Devil, you paid, and you'll pay for it, and you'll soon understand how. The Devils are those who keep man from learning to become free. They ask you to destroy your systems, because systems are the key to your freedom. Now you understand why.

The 3 universal Stacker Units that were in the Linz EC, were precisely made, except for one point, they were too low. Those who were tall enough to reach the top Cup, which is the STM, they may have felt something.

Our teaching is a progressive teaching, you understand step by step. You have spent enough time in the lab to learn, now move on. It's the time for the manifestation of the Methi, for clarification, that your own soul is the Methi, your own understanding of the creation, and nothing else. We are universal teachers, and we teach through the soul with the voice of the man. Now go and destroy your Cups and we'll see how much you have destroyed the knowledge of understanding the world of creation. Sleep with the Devil, you pay the devilish way.

I ask you please, try to understand what you have created, and not just jump into it and make coils and Cups. Try to feel and be a part of what you are doing. Your soul will not allow (you to go wrong), and is aware of the knowledge and what you are doing. Enter these environments with the pure sincerity and intention to serve, and not to be selfish, thinking what you can gain from it, and you will see the elevation of the soul.

We are at the crucial point in research and development, and we need the soul, and understanding of the souls of the knowledge, and nothing more and nothing less. We have to create the conditions, that we can become aware.

Understand the first part of today's teaching, the transmutation and observation of Cu to Zn, by the addition of just more plasma fields, nothing else. Then you'll understand how you transform the STP to the STM, with nothing but your MaGrav systems. Understand the totality of the teaching of all the Cups of Life's, all 5 of them. Don't just copy them, but study them and you'll develop new ways to understand the process of the creation.

You have to be clear enough and understand this knowledge through clarity, so that you become part of it, and it becomes part of you, then it's not a magic show. You just need to interact with the fields of your MaGravs.

Understand the fields of the MaGrav, and what are the fields of the souls, and what are the fields of Inertia, and where you want to be manifested in the matter state. It's you, who are in the essence of the fields, which creates the fields of Inertia or manifestation. Nobody else. It's you who decides, if you want to manifest yourself as a fish, or as a man or a stone.

I hope today we brought all of the 419 teachings together, for you to be ready for manifestation and declaration of Methi on February 22, and then you'll find out where the man shall go.

The fields of the MaGrav were going in just one direction, with its feet in the earth. In the Cups of Universe, each stacker Cup was more advanced than the next one. Each one with his own knowledge, with his own T, depending on what you wanted to elevate.

Understanding the knowledge of M field movement is one of the cornerstones of the future life.

He explained the meaning of the 9 books what they mean and how they are intertwined in teaching you the Knowledge of the U. But remember one thing, what is in Micro is in Macro. Mankind will be busy for centuries to come to understand this simple structure.

When you reach the point where your soul works with the soul of the others, to create effects in the dimension of physicality, then we don't need the MaGrav, Stacker systems or any other physical system. This only comes out of servitude, of serving the others, and nothing else.

>>> End of part 1>> 419 KSW Quick index

Q: What is the force that causes the planets to rotate?

K- The spin is totally due to the balancing of the field forces, to always create a condition of equal GM fields. To take as much as you give. Not to create a condition that one is greater than the other.

The rotation changes according to place, position, and time, and according to field strength of positioning in respect to the others. Position is dictated by what you carry as a field. It's like a radar system, if you don't send a signal out, and you don't get a signal back, then you have no radar. It has to be a dynamic field, with fields constantly sending and receiving so you can track an object.

A dynamic plasma system, for example a planet, is just like a radar, it continuously sends out fields to find its position in respect to the other fields and plasmas. All this information dictates a condition of normality for the PI to be able to hold all its fields together.

"Then you have a mixture of fields, which have in the strength reduced, which move into the Inertia matter state, then you have a stability of the conversion. You have cocooned the fields within more or less, like the brain of the man, which cocoons the soul, the center of the planet earth with the matter state around it, cocoons that, keeps that constant."

If we take layers off the top of the earth, the speed and position will change. When a planet gets hit by a meteorite, as long as it can keep its PI together it will reposition itself and recover. But if the meteorite penetrates to the center and opens the PI up, then if the PI is a star it will explode. The same thing occurs in the body of the man. We have central energy points, that if for example, you get hit by a bullet that opens up the PI, then you would die. But if you don't hit the center of the PI, you continue to live. The heart can take many bullets as long as you don't hit the central PI.

It's the same with the brain, you can shoot as many bullets as you like through a brain, and nothing will happen, except you'll lose your memory, or whatever part is structurally damaged. However, if you put a bullet in the STM, it will disintegrate. You open a hole in the PI and it explodes. (We can't see it), but our PI is in a condition of rotation.

If any condition rapidly changes outside our solar system (SS) in our galaxy, and if the field layers of the shielding of our SS open up, then our SS will disappear. It will be extruded and extracted into another position and D. For it to keep its position, it has to have a dynamism, to continuously give and take from all positions and fields, which allows it to be in that position. It doesn't rotate just for the sake of rotating. The rotation is there as a kind of radar system, so that the PI remains in touch with all the elements around it to protect itself and keep its integrity.

You do the same thing when you drive down the motorway, you constantly keep your eyes on all the cars and environment, so that you can keep your motion. The fields of the planetary systems are plasmatic, and it's their job to be constantly observant of what is

going on around them, and therefore to position themselves, they have to rotate. As the earth moves closer to the center of the SS, our speed of rotation around the sun will change, and that will effect all the other planets as well. Every time one of the planets gets absorbed into the center of the sun, all other planetary systems have to adjust themselves.

As a planetary system is a Pl, its M fields are responsible for it to keep its position and speed constant. It does this by interacting its fields with objects in the space it's traveling through, and sending that information back to the center. They are like the arms and legs of the Pl. They have to let everybody know their coming, and make sure everybody is happy with them to be there. It's a kind of beacon of its life, telling the others, that I'm here, and I am prepared to give this and that, but I am not moving my position. All plasmas have the same system and they have to accommodate each other.

The earth does not rotate around the sun in a perfect circle. It has a very irregular pattern with wide changes in its distance between planets. Each of the planets accommodate these changes.

If we for example lost Saturn, by a massive meteorite, or whatever coming in from the U or our galaxy, be it in the D of the matter or in the Pl state, for sure earth will move away from the sun, backwards, because these giant planetary systems, put a special force field to keep their position, that everything is in position.

Plasmas divide and amalgamate their fields as a way to position themselves and to be aware of everything going on around them, so that they can confirm their existence. You look at the earth and the sun as objects, but they are really entities. They have emotion and feeling, the same as the cell in your body does. This is very hard for man to understand.

Living entities or amino acids (AA) in the upper atmosphere are created out of the interaction of the fields of the earth and the SS. Some of these AA have been here since the beginning of this planet. Some are newly born, just like when humans have children. They do not convert into the Inertia field strength of the planet, they remain in their own field strength.

Life also exists between the planetary systems, but we don't have the knowledge of them. Now that our knowledge of the M fields is increasing, instead of killing them without knowing, we will be able avoid them. Just like we avoid hitting a building, because people are living in them, we will avoid these M field zones, because they contain living entities. Life is not the exclusivity of the ground of this planet with man walking on it. As we have life beneath us, in the oceans and in the center of this planet, we have life above us.

It's our responsibility to develop our senses, and be able to detect these centers of living entities, because we are responsible for them if we kill them by accident. We'll pay for it through the soul. We are responsible for what we do and where we go. "I didn't know,

sorry," doesn't exist, because we attract their fields. If we look carefully some of these entities would be considered a virus.

Some of these entities can convert through Inertia of the planet to O or H. We could breath them in or drink them in water. Some could be converted into gold or silver.

Q: Regarding the Creators plan to create paradise on earth. Humanity was a puppet in the hands of the impious deities, demons, fallen angels, black and red dragons, and even the wayward son of Zeus, wrecked havoc on the land, by loosing control of the chariot of fire. ... Will the Creator do the same with these evils of the heavens now? Or has he converted them for good, or has he already taken them out of command by trapping them somewhere in space. Anyway will they no longer interfere with the Creators plans to create paradise on earth?

K- You see, what we call the Devil, is that, which keeps you away from reaching the ultimate goal. By you accepting certain conditions and positions, you take yourself away from understanding your own creation. You are your own devil. The people who encourage these kind of things, do it because it is part of their structure (to control). We cannot change (it).

When you want to destroy a nation and a culture, destroy its belief in its own beauty. He was given a video about a Mullah teaching people against their own Iranian culture. When I saw this, the thought came to me, that the end of Islam has come. If the man of the robe denies the beauty and respect of the (cultural) thoughts, and the beauty of existence, he has already demised himself. All the Mullahs in Iran, which destroyed Iranian culture have no Iranian blood.

We see how certain people camouflaged themselves and reached the center of the KF, and when they had gathered a few people around them, they started denying everything about the work of the KF. Because now they thought they could serve their masters. And there were KS who followed them, because they are of the same essence.

Have we ever taught you to kill, destroy, or to damage, in any of our teachings? We have taught nothing but love and expansion of what we call, serving, and then you saw the people who told you to destroy things. Those of you who listened to them, but walked away, you understood the purpose and the position.

Then you ask why are these people like this? But if you go into their history, you find they have been like this from the time of birth. We will open the books on these people, and then you'll understand, how many of you supported and went close to be with them? How many of you are going to loose your children, wives, or your husbands to them.

They are the most active pedophile families and blood in western Europe, not by talk, but by actual prison sentences. When we got their master, Alan Sterling, and he was put in jail, all the opposition to KF started. He physically abuse the children of man, and these people are of the same. The whole family has had prison sentences. We open this door and you'll see, and then you decide, if you really slept with the Devil. They came to

penetrate the KF, to get access, and then to abuse. When we became aware of it, we kicked them out.

You have to understand, it's you who decides to sleep with the Devil. It's you who walked away from the understanding of the creation. I warned many of the KS, especially in Brazil who worked around these people, and in Holland, Belgium, and Germany, be careful with your wives and children. Just be careful with your children. I lost my son to them, I hope you don't lose yours, then you understand what the Devil is. The devils work together, and the good men of God work together. We will open this very soon for you to understand.

This is a test for you, and not for us.

We gave nothing but love and care, but you have to be able to understand it.

Q: About balancing the M and G fields. Does it mean you take energy from one side and add it to the other?

K- You are the intermediary. You don't take. You are just a tool of how much you can add to, or what you can take from, so that the others can stay in their position.

(We just talked about how a PI rotates, so it can send out its M fields to keep the balance in its environment. So that everyone remains happy and agrees to the balance.)

Historically there has been a discussion about where are the M fields, and where are the G fields. But in fact, as we now know, it's the same field, and it depends on the point of observer. When you are in-between plasmas, then you satisfy both, how much of this you want, and how much of this I can give you, for both to be in the right position. That's all it is.

It's actually just like being a mediator between our children, and we have to be correct. We have to make sure all are happy and can carry on with their existence. It's the same, but this time it is done in the D of the interaction of the fields, or what we call a soul.

A plasma that responds is called a soul, and nothing else.

A plasma with emotion is a soul, because it has feeling.

If you are a stone in a river, you feel the water above you, and you feel when the man steps on you. This is why in the writings it says, even a stone has a soul. Our collective soul is there to accommodate the balance between all, because we, ourselves, are accommodated by the others to be in balance. That's all it is.

Q: Now I know exactly how much I can give, and how much I can receive from the others, or I can give to myself to take?

K- No, if you put a measure on it, you already lost. When you say I know how much, by that "how much," you have already put a measure on it. Next time when your child does something wrong, instead of shouting at him, go and give him a kiss. Do it in a different way. It's us who makes that decision.

Q: Because of the need?

K- Ego's satisfaction.

Q: Confirmation of existence, is always there.

K- Yes, but confirmation of existence to what it feel I like to be.

You can love both the same. It comes to the judgment, especially when it comes to your children. You have to give enough, that both children feel the same, so you are continuously juggling in-between. Then it comes your own judgment, did I do right for this one, and wrong to the other one? If you manage to get on a path, that you can do what is right to both, equally, then you'll understand. If you can be always correct and balanced in every judgment, then you'll understand.

Q; Are we there yet?

K- We are getting there, partially. As we mature, yes. We've come very far, we have matured, in so many ways. We look at the bigger structure, while you look at the smaller one. I look at the political structure and the balances of the place and time. Before it was fashionable to create war and kill as much as you can, to make the best tools to kill as many as you can. Now that has come to a stop, we stopped killing each other. We have seen it in Europe today, with every president going to Ukraine and Russia to stop these countries from going to war. We are maturing to understand mass killing and war is not the solution. Local wars will finish in the next 2 - 3 years.

Once we stop fighting as nations, then we'll stop fighting with each other as individuals, and then we'll stop killing animals, because we find other solutions to it. Vegetarians think that by eating vegetables they are not killing, because they don't consider the plants as having souls. It was never comprehensible to me how killing a thousand souls of rice is some how better than killing one cow. But this is the life, and we are maturing. With the elevation of the soul, and making T available, man will take energy without killing, then he will mature and become peaceful.

Through the Pl T and interaction of the dynamic fields of the U, if you are cold, you'll be warmed by the fields, if you are hungry, the same fields will satisfy your hunger. So what are you fighting for? Is it a problem to be given everything freely? Are we afraid to be given everything freely, free resources from the U, and not having to commit a crime through killing?

We'll be taught the process of creation. Where every cell of the man has a soul, and the collective soul of every cell, in interaction and work, creates the STM in the center. This center makes sure, that everything is in its right place.

In the same way, the soul of this planet is made of the collection of the STM, and the souls from every living entity on it, at the strength of the G field of this planet. It has to be correct with all of them. There was a imbalance in the soul of this planet, but now we are correcting it through new understanding and technologies.

The soul of this planet, is part of the structure of the soul of another cell in another body. Like the SS is in the galaxy which is in the U. We are inherently part of each other in the D of the Pl, and in the D of the fields, which created us. If we understand this, then you can go one step higher to understand the next one. This is what "elevation of the soul"

means, understanding the world of creation and nothing else. The true world of creation, not what Darwin made up.

How is it that newborn babies dream of uncles that they never met, or have died? Are they creating their own dream, which they have no experience of? We transfer RNA and DNA to our children, with all the information of our emotional experiences and interactions of our soul. Are the babies dreaming of the uncles and cousins, which they know through RNA, who they'll play with, when they are born.

If I find one of you, whose ancestors have been present at the time of crucifixion of Christ, who actually saw it, then you carry that knowledge, then you'll tell us how and the way it was done.

A man was hypnotized in London and knew how canons were fired centuries ago. Historians didn't know, but when they checked the records and tested it, his story was correct. It doesn't come by the soul, we carry it in part of the RNA. So it's possible, that this guy when he was a baby in the womb of the mother had a dream about the great grandfather, that actually fired that canon and explained how it works. We just don't carry the color of the eye of our parents and grandparents, we carry the whole information from the time of inception of the man. Now you can understand how deep the STM and RNA of the man records everything.

Q; What effects do the emotions have on the PI fields and planets?

K- It's a collective emotion. When it comes to the planetary systems, or animals, trees, or to souls which converted to the matter state, like stones or whatever, it's a collective soul, a collective decision of the fields of the created.

Inertia is not just the Inertia state, it's part of the structure of the soul of this planet. Inertia dictates its position, composition, manifestation, and it's beauty. It decides where to be a hill, where to be the mortar between bricks, or the grass, that to the eye of the man is beautiful. It decides where and what to be.

This planet at the time of its creation, could not provide a constant supply of fields to its citizens, or to what it gave life to, at its Inertia surface level. We do not see in the upper atmosphere of this planet, nor in the U, structures that eat each other. They always find their position in respect to each other. The whole thing has gone wrong, when it comes to the matter state, and the semi-matter state, which is the PI state of the body. This half matter and half PI state, is what has created these dimensions of pain and suffering.

When we satisfy this lack of fields, will our planet move in a slightly to a different position in the SS? Will our seasons change? We can change global warming, by converting the gases into Gans's as an energy, and then feeding it back to the planet. Just like when we put Gans patches of different strengths on either side of the body to transfer pain, cancer, or whatever out of the body. We can do the same thing by positioning CO2 centers around the planet. We can put 2 CO2 centers in the Northern Hemisphere and 1 in the southern, that way we create a field flow. Then the center of the planet will receive

enough fields, that the man will not feel hungry. Man will not kill or eat again. This is possible, and we have started this experiment in Tehran.

New KS tells experience with working with healing energies, and his search for his soul. Mr. Keshe replied, "you have reached the point of understanding, part of it, but there is more to it."

The creation is a complex structure. In the past when you spoke to the majority of people about the soul, they'd have a certain mindset, because of what the priest, or Church said, (or what they read in books). But now you can understand scientifically what the soul actually is, and you can learn how to access and use it, because it uses you.

Most people have what I call, a blockage, because they read a book and then talk about psychosomatic diseases. However, if you speak to them about the psycho, as being part of the emotion, which is the interaction of the physicality and the soul, then it cannot be, because it's not in the book, (also because the soul is denied).

What happens in micro, also happens in macro. What is acceptable and applicable to the STM, is also applicable to the soul of the planet. You are not far wrong in understanding the operation of the soul. You do not need to be a KS to understand the soul, man has been doing it for centuries, but the difference is, that you apply it for the benefit of others, and not just for yourself.

Q: What is the single element, that if we had, we could access our soul?

K- I think you got to go back into the teachings. Some thought is was Iodine.

The essence of the STM is a composite of the all the elements of the creation, those known to man on this planet, and those unknown beyond this planet.

We are universal creatures, we cannot have only the composition of the matter or gaseous state of this planet. Even our amino acid (AA) has fields from the galaxy and U embedded in it. We just see the earthly elements, because that's the extent of our knowledge.

We are not individual cells in the body of the U, we are connected to all the cells in the U. Later I will teach you how you can observe these different fields from the galaxy and U in the AA of the man. We are not earth AA. We are universal AA, because we have other fields of the U with us. If we increase some of them, maybe we'll see them as viruses. We may call them a new virus, but really they're universal energy connected to our creation.

Q: You announced a week ago in 418 KSW, yourself 3 times as the Methi, the Messiah, and made clear, that everyone is his or her own Messiah. But I did not yet see yet this as breaking news (in the media). Do we have to wait until the 22nd of February, or how can the UC, Earth Council, Core Group, and we as KS be of service to the present religious leaders to proclaim this news to their followers?

K- We don't proclaim to be a news, we work through the soul, elevation of the souls.

In the past few days, out of nowhere I was requested to join, back into the 5plus1 negotiations. This is what we call the influence of the soul of all of us. We the people are the creators of peace.

We are all Methi. Methi is not helping the others (the way we think), it's elevating the soul of ourselves, so that we become a source, to help the others. When we understand this, we are steps ahead. The governments and religious leaders when they become wise to it, are elevated and understand the functions of their souls, and their P, and they will see the message.

The job of us is to be that Carbon, which creates that connection, through the UC to be there, Earth Council, and the Core Team. We have built a structure through the STM and not through the individual man. We are the gel, that gels everything together. We are very clear about what we mean, when we say we are Methi. We are a Methi of our own soul. If I can be honored to extend my gift to the whole of humanity as a soul, then I have served as a servant to Methi, which means for all of our souls to be elevated, to understand the beauty of the Creator, and end of all the rigmaroles man has carried through his time and position.

It does not need CNN, we have already reached the soul of the leaders, a long time ago. Putin sent the peace treaty to Duma (Russian Parliament), and Obama signed the peace treaty as an individual, not on behalf of his nation. Soon the American leaders will sign the peace treaty, as part of the nations committed to peace. I have a very good idea when it will happen, because we are working on that process. All the 5plus1 nations have to sign themselves into the peace treaty, if they want to have the space T. They have no choice, they have to commit their nations to peace. Maybe that's why they called us to come in now.

The negotiations have moved forward with Iran, releasing some 29 billion dollars of Iranian assets held by Trump. These assets are mainly private assets of the Iranian leaders, and not for the nation. Trump froze the total assets of the Ayatollah K of Iran outside Iran, which runs into billions, and the others. They negotiated to free their own assets, not the assets of the nation.

Now we are going into the phase of releasing the assets of the nation, then we go to the next step of sharing knowledge, T in exchange for peace amongst the 5plus1, and with it, is the responsibility of giving.

We are giving the knowledge away, we are not bargaining, that you give us this, and we give you that. We are giving the knowledge in totality. We are showing the 5plus1 nations how to make 100% nuclear purified plutonium, uranium within seconds from very little. In the long run, and in the background, the nuclear negotiations will become space negotiations. We have received a green light from the American administration.

Literally our biggest problem is how much we can cut into the greed of the Iranian leadership. Another problem we have is that we cannot take KF new T into America, because it is Iranian.

In essence we are all the Methi by our action, to create the conditions of peace. So when we say, we are Methi, it means, collectively as KF, all of us have brought it to this condition. I didn't walk in the desert on my own and claim something to the cats and dogs. We collectively as the soul of Methi have achieved this, by sharing knowledge, by spreading the word of peace, and giving from our soul, to create that elevation of the soul of humanity, that there is no more war, ever.

They blocked us from developing our T, but if we had been given the chance, there would have been no more hunger on the planet by now. We would not see starvation, like what is going again in Eritrea. We could create Pl domes within minutes of arriving, and the people wouldn't need to eat, because they would absorb enough energy from the environment to survive. All these losses of life and pain comes from those who stopped the developing of the T. Why are we behind? Why are we kept away from media by a king, who has got a pedophilia file bigger than the nation, along with his son, and his citizens. We saw one of his citizens in KF, which has got more record of pedophilia, than any family in the world, which was never disclosed to KF until now. Now we know, and we have the records.

We thank the Dutch citizens and their government for allowing KF to continue, they could have blocked us years ago, but they allowed us to move, to grow, and now we see the beauty of what we can share.

So when you say we are Methi, as a soul, we as KS are here to serve, and that's the purpose of it. We are a collective soul, and not individual souls. When you serve, you become Methi. When you create a condition of delivering the knowledge, then the others can survive, not only on earth, but anywhere in the U.

Please do not take me into the subject of Covid, because we don't want our teachings to be banned. Now most of the European nations have removed the lockdown, and everything else. I think gradually the whole world is coming to its senses, but we learned a lot. We have been introduced to a new kind of energy, called a virus, and it forces us to look at the viruses in a new way. KF for past 10 years has put a new understanding to viruses, what they are and how they operate, because we have to handle it in the space. Sooner or later, I am sure scientists will come up with different names and ways, but collectively we'll come to the point, that forces us to understand about the operation of energy packs, what we call viruses.

It's no use fighting with one track government mindsets, where they tell you what you have to do. They say you have to have all 4 vaccinations, but you still have to do the tests, because all the people who are vaccinated, get infected, so what's the purpose of vaccination? Do you understand? The Austrian Chancellor had all 4 injections and the booster, and still he ended up getting the Corona. So what's the purpose of it. This is

something in the near future, when all the bribery and everything with it is sorted, whatever, then as a race we'll look at it, and what we learned from it, and what it will bring us.

We use injections for different viruses, we vaccinate our children from the first or second month of their birth, right across western Europe, and most of them work. We have stopped a lot of future problems for our children and future generations. But the problem is they drew a line, and stopped expanding the knowledge to understand more. If we expand our knowledge, then we won't have the problems of today, and then, we can't be abused.

I hope I opened a new channel as I promised you in the past few weeks, that we start teaching in a new way, a new side of the T, which had not been disclosed before. For KS I hope you all don't now put the MaGrav sideways, or do this or that, because it was said. Rather, understand the T, don't just copy it, because then you have not added anything to it. Try to evolve the knowledge. The only way we loose is when we don't share the knowledge freely with each other.

419 KSW Quick Index

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:18).

K- ... some with computers, telephones, and some receive the message by soul. In the teachings of past couple of weeks we touched on some technical information, but not on much considered by Knowledge Seekers (KS). In the last week teaching, we touched on application of what we call, 3 sets of reactors in Germany, Canada, and in Italy. How we stopped the reactors, but the most important point, is not stopping a reactor, is not in bringing the structure to a halt, it's not that we transferred or we decided to choose a reactor that it came to a halt.

This most important thing is how did we interfere, how did we create an emotion strength, the line of thought strength, (:20). to become mechanical, to interfere, that system can be stopped. Is the stopping of a system **creating additional force, that is over the limit of the motor, and the motor has no interaction anymore**. It moves into a different level of energy production in the matter state, or moves from matter state. Or is it that we create a field forces, to actually bring a break into it? The first is the right way of thinking, the first is actually what happened.

What does this mean. This means and if we understand it, a breakthrough in the world of science (WOS) and T, a break from the current understanding of what we call, knowledge physics, of what we call M fields. How on the same fields we can add to. How on the same fields we can bring interaction with, how on the same fields we can bring conditions of interaction in the emotions, and the matter state together. In a way, ... then the fields of our emotion, was the soul of the intention, and the emotion of intention. The mechanical system was what we call, the physicality (P) of the emotion. This is how in the coming time the space reactors will develop, and are getting developed, will come to control the position and the speed and the direction of flight. (:22).

Stopping a motor was to show, that emotionally through thoughts, we can create physical interaction. You decide to extend the dimension (D) of the soul to the motor, that it becomes part of the intention of the emotion. The big question that should have been asked, why didn't you stop one of the motors in Canada, or why not in one of the systems in Germany? The reality was and as we said, I was present in the room (in Italy). It's the extension of the soul, extension of the understanding and a desire to stop, to bring, to condition, to change. This is what counts.

I did not stop a reactor in Germany, .. in Canada, I stopped the reactor in the room where I was present. Where we were monitoring, which means I managed to extend the D of the whole parameters, I managed to bring into position, a condition that does not go with the totality of what, commonly is known.

In a way, I brought the STM with the extension of the intention, beyond the physical condition of that reactor. A finger, an extension of a toe. What we talk about today, (:24). in the new space reactor, in the new control without panel, using the .. the new space control systems, is physically shown years ago, it is not a new knowledge. It's just that we did not understand what the knowledge was, now we understand. Intention to an action, what about an action to intention? You're on moon, suddenly a meteorite enters the atmosphere and you want to escape, an action forces emotion and an action forces movement. Because you have created a condition of atmospheric condition, that can do this.

We done the same thing right across the teaching, we have brought the knowledge so refined, so commonly presented, that mankind, KS have missed the totality of the work of the system. What does this do, what can we do? Why when you say we are ready for 6th of June, we are ready already in our developments for delivery of system for flight, because it's has been tested, we are just making the final preparation, .. decisions, the final pieces, that allows things to happen.

The next generation of the .. space systems, most probably will not even have .. physical structure. When we carry a physical structure, (:26). we have to protect it, not from the wind, .. meteorites, .. maybe something hits or comes. We have to protect it from the change of M field strength of the environment they are traveling in, that the field will not dilute their strength, and suddenly you have no cabin. Suddenly, the strength of a field in a given condition matches the seat you are sitting in, and you have no seat to sit in,

because now it has become like Gans's. You have the matter in your hand, now it's energy. Now you see the understanding of the T. Now you understand what it means to understand the totality.

All of you as KS for past decades, have produced some many Gans's for you it is there, now it's a Gans. But what does fundamentally this mean? It means you have managed to change the state of matter, in your kitchen, and you produced energy construction from it. You are sitting in a kitchen, as I have seen many ladies are doing now, are producing Gans's in their kitchen of the CO₂ or ... Covid, Gans Cup 1 and 2. But you see you produce this material, .. greenish material, this greenish material, seconds before was in the matter state, now it's in an energy state. Now you become more advanced in the knowledge of transmutation, than the professors, the scientists at MIT, NASA, Russian Space Agency, and the others. (:28).

Because you have managed to convert, to achieve, what was promised, transmutation of elements. In the space T, that we cannot handle. In the spaceship T we have to handle, because we travel without borders, .. not country borders, we are talking about containment borders. Have you seen a sun to be in a glass container? Have you managed to put a net around the sun, and if you do, can you capture it as a plasma, it will go through any net. This is where the space T of today has positioned man, and this is where the spaceship T has brought man to understand.

How do we interact, .. preempt a change in the condition. I want a Zn plate to still stay Zn, and I still want to have my Zn fields, that I can use it. The knowledge of deep space is not the knowledge of matter state, .. is the knowledge of Pl, it's a knowledge of movement of M fields, .. of understanding time, position and place does not exist, till the time we create the time, position and space.

The zero time is in the hand of the man. (:30). The zero-time is in the intellect, emotion of the man, then if mankind understand this, he can travel in any position in the depth of the U. Interaction of creation of emotion to physical position. You feel scared you run, because you have converted the emotion to physicality (P). You feel love you hug your lover and convert that emotion to physical touch. We wanted to stop a reactor, we brought it to a halt. Did the motor stand through the physical intention, or did we create so much, we gave so much intention, that ?? frees us, that we saturated the man's M fields, that there was no interaction to rotate physically. Go back to the teachings, long back maybe 8 or 7 years ago, listen to some of the teachings, and you'll hear the same thing, but at that time you didn't understand.

We talk about running nuclear based plasma (Pl) reactors, where after 2,400 to 2,700 rpm, we have no control. Field environmental saturation passes the matter state, and matter state fields being weak, it just gets absorbed into it, and the Pl takes over. (:32).

If you go and listen to come of the videos which we released, you have heard the same, where the Pl takes over, where the Pl supersedes in the strength of the matter state, and like a radar absorbs it, so there is no physical interaction. Listen to some of the teachings,

where we tell you that the inner reactor of a system comes to a halt, and going from clockwise, changes to anticlockwise. How did this happen? Because the PI of the center of the reactor, now becomes the soul, it decides, it has to be a balance with outside. If we could keep further pushing, increasing the PI condition, and not allowing the rotation, we'll reach a point where the fields of the system will come out of the boundary of the P of the reactor, interacts with the earth's MG field, and creates lifts and motion, both sinking and motion.

This is why in the teaching of last week, we explained, that one of the EU in Linz is gaining weight, which means it is the central PI field in the system has managed to interact with the fields of the planetary system, with certain strength of it. (:34). We might pick it up from the place today, and it might be 2 ton, or it could be 500 kg. Now it is in a different position, now it's a different environment, now it has to interact with the new environment, but there is one overriding factor, that overriding factor is the same as, the overriding factor stopping the motor on a MaGrav system.

When we stopped the reactor #2 in the Inzano years ago, we could not only react with that motor, we had to satisfy the need of the other 3 in the Star Formation (SF), that the soul of the system allows, that reactor to satisfy our intention. You might want to travel to the moon, you'll find out you will not arrive, does not matter what the intention of the pilot has been, because the place chosen, the time you have to land, there is the possibility of something to happen and it sees you as a danger, or the mixture of the fields in that position does not mix or apply, or interact, or be good for the strength of the Soul the Man (STM). Even the Moon cannot commit a crime. This is the way we'll understand, .. the next step in the space T will come into play.

In the next coming weeks as the, what we call, (:36). the spaceships are moving out of China, and locating around the world, how much, and what would be the possibility of any of these systems, ever colliding in the space with each other in the space. What's the possibility of one of the systems ever crashes , what is the possibility that one of these systems will come into earth ground level, but will not land. There is a possibility of earthquake, .. of whatever, there could be possibility of a train running into it. Then you understand, the game of the whole structure of life changes. It's not that train will hit, the soul of the driver is aware of not to hurt.

When you create the soul of the Earth, from the individual souls of its living things, it's responsible for what it receives, .. what it does. Understanding the next step of what we call, "system control in flight," will be an intriguing game for man of earth for centuries to come. Because man will look how the system is preempting our intention, where the system is protecting you from the wrong intention, not yours, but the environment, physically, conditionally, or anything else, this is why in the teaching of the last time I said, (:38). it's impossible, that since we're using MaGrav T, which is not the MaGrav as you look at it, when we talk, as a MaGrav system as a flight driving, we talk about the soul of the MaGrav system. In a way, interaction of it with its environment will not allow accidents, .. to hit another soul, will change to ?? dimension (D) to create a position, like when you put a magnet among other magnets and everything moves.

The understanding of adding to the M fields, creating extraction from the M fields in the strength, in .. to harmonize the motion of M fields that while you are carrying the intention, I carry the field, that allows the motor to know we want to stop, we don't want any interaction. In a way, we have learned, we have to learn what we call, M field strength loading. In a way, we load one another, we don't combine them, combining it, is to go anywhere, when you load it you structure it to have a priority over, to have position over, that this is the priority I want.

This is why we choose captains for the flights. In the coming time there will no captains within the cockpits or the flight system (FS), because we will create the soul of the FS within the system, and that soul of the system. (:40). will interact with the decisions of the passengers, and with the decision, what has been given to it, over loaded it, on top of it, to go from London to NY by the people who gave to it, to give that pleasure.

The work of the new space T is the understanding knowledge of Pl, and in the field interaction, and not in the matter interaction. It will take mankind centuries, and for some never, to become what we chameleon, to be able to live in both D, equal. Some of the Knowledge Seekers (KS) will move very fast, some of the KS will find a way to say they understand and are doing it, as we've seen in Romania in the recent time, to cheat. Some of you will come to understand the totality of the structure, .. will walk away from physical state matter, because what you have achieved is much bigger, more beautiful, than the matter state control. In the future of mankind, man will be kind to himself to understand. how kind of man he wants to be, what way and how you want to interact. I wanted to stop the soul of a motor, you wanted to show your love to your partner, .. to the child you have created, you've been the cause of creation of the soul of. (:42).

Would we talk to our children in the future, or would they by emotion understand our need. Would mankind move in the next step, understanding of interaction of the fields of the emotion, that interaction of the fields of matter state. How much as human race will develop this, how much as what we call our interaction, understanding with our soul allows us to go deeper in the understanding of what we call, the knowledge of creation.

The problem for .. the scientists of the KF in the coming time, is not building the reactors. It's to build reactors, that their soul is correct, that it gets accepted by the other reactors, to operate and interact with. Peaceful reactors, reactors which will fly in the D of the soul of the system, and not the fuel of the system.

Systems which in the coming time, many of you will be baffled by it. You want to see it, but the system doesn't work, because the intention of the soul action, is not correct. Not correct as you see it, not correct in the game of the knowledge to be used.

We shall not see the abuse of T, as we see today, creating viruses with ability to kill, creating conditions to damage others, (:44). Creating a conditions, that can put existence of a soul in danger to hold onto its integrity of ?? fields.

In a way, when we say, when the time comes there shall be no killing, because the structure of the life, the movement of totality works on the D of the soul, and not on D of P. On the D, which we as holders of the intention, will be not able to create mayhem, and then to disguise, and then to cover it, under whatever. We have seen the new structure, we have seen the way this structure works. Creation of Universal Council (UC) and its dedication to peace, dedication to bring unifying position, has shown, and will show again and again its power.

Creation of the peace, success in the 5plus1 talks, which we see, and coincidentally, KF has been asked to enter into negotiations directly, very soon, as the T of the KF is ?? ?? as one of the bargaining chips of the nations amongst each other, as they are all equally have access to each other. The condition of what we brought through the emotion of creating peace, through the interaction of the soul of the UC, has brought, (:46). that condition forward.

As I informed some of our leading KS, which are close to us, we've been requested to return back to negotiations, to bring the knowledge of the KF, the space T, the environment of the nuclear Pl science, as part of the bargaining chip for all the nations, and not exclusivity to Iran. How this will take shape I do not know. How the soul of the UC has brought this condition forward, we understand, but is the mankind, which has to be. When I was asked to be in that position in past few days, I say, I wonder what has been the one of the wishes of the UC members, which matches our wish.

It comes from the aggressive nations, and not from the peaceful nations. It comes in a way, in the knowledge of the spaceship T, becomes part of the bargaining power, of how peaceful we'll become, using the T. As I said to the officials, it will be one of the greatest pleasures.

Not to negotiate for peace, but use the T to create condition of peace. And a lot of the job is done by KS, the soul of the KS, the intention of creation of peace, where the P walks into it. The same in the intention of stopping the motor, where the emotion of the soul interacts with the D of P. (:48).

We are not very remote, from understanding the structure of the Pl. We are not very remote from comprehending the interactions of the plasmas. We are part of the interaction of the plasmas.

I was talking to a KS in past few days about this, and then this morning Rick puts this picture on the screen. I said to him, this is what I wanted to explain. Our KS is a scientist and understanding that, how an atom with 1 additional electron (E) becomes different thing, could not be understood before, but now we can understand. How you add 1 proton (P) and 1 E, you get a different substance. How you add 20 different E and 20 P of the same and a few neutrons, you get different material.

In a way, these are all energy packs. How they position each other, and how they position themselves collectively in respect to the others, creates the mirage of the effect of a Cu

into a Zn. In a way, by adding a few much more Pl energy interaction, because the electrons are not even part of the structure, the energy is part of the structure, what they emit, what they give, changes the structure from a Cu to Zn. (:50). from yellow to whatever color we see, grey. Why does the interaction of a few extra elements, creates the reflection of a color, and then manifests itself in a different D.

So you understand why I started this teaching in speaking about the reactor in the Inzano. We don't change anything, we add or take the energy of another E, the energy of another P into the system, but in the D of the STM, in the D of transmutation acceptance of the field. What does this mean? It means we add the field that creates that separation. We add the field that brings that connection, attraction. In a way, we now have to learn about how the fields of the intention, can be loaded on the others, that creates the condition to satisfy the intention.

This is important, because in the space T of tomorrow, you do not want to land on Mars, where your intention was Moon. You do not want to get lost in the deep depth of the space, where you chose the wrong fields, which were very similar to Moon, but ended you up in another galaxy, another U, because it was a near match to it. (:52). In the D of the STM, we have to understand, the control is with the STM in balance, with the condition of the environment, acceptance of the souls energy and intention, in a way, position and condition. Zero time place, position.

The new vision system, which we gave to KS to test, brought a very few results, which I was looking for. This few results, gave us what I was looking for, the next generation of systems, which brought the extension of the vision, and emotion, and the false information and what we call, intention, to understand how to override this, in the systems for the flight. I don't read every .. testimonial about the vision units, but the ones which are important to me, just out of nowhere popped out, and said this was the information that we need.

We have to understand that mankind, the STM, the intention of the man, the physical emotion of the man, the collection of the emotion of the man, is like a stack of cards, each one is individual, and each one sits in its own position in respect to the other. This pack of cards, each card has its own strength, (:54). its own GM field, it's own losses and gains in respect to the card above and below, and the ones above and the ones below them. So it's a collective work, .. interaction. You just want to change one of the cards from 1 to 2, you don't change the card, you add onto, that the rest stay in their positions, but the new condition is accepted.

The new space ship, the new controlling systems of the spaceships, which you will see in the next few weeks, coming out of the KF, is in principle, interaction of the fields of the STM, with the soul of the system. You come into it with the wrong intention, nothing will happen. You come into it, with the right intention, you get everything from it. Some of you come in and say, nothing happened, and some of you come in and be exhilarated, and do not know how to handle the emotion created in the ones you could create.

The interaction of the systems is not anymore by pushing a button, the interaction is coming with what we said, thinking good, doing good and acting good, and coming to the principle of understanding. The time of what we call, progress in understanding the ?? emotion of the fields, (:56). is not a better iPhone or Samsung, is not a better jumbo jet or whatever, is understanding the interaction of the fields. It's the time of the maturity to understand, the process of the creation, the process of the interaction of the fields in the creation, and the position and reaction of the system.

In one of the points of nuclear PI T, we have to understand a lot, we have to understand the position, time and space travel. Why does a star enters into an explosion, and what fields are radiated from it, which part of the field radiated from it, is in line with the evolution of the promotion, or strengthening of the soul of the created things in that environment, or us when we enter it? In the world of P, when we enter an explosion we expect to be exploded, and if we get hit we become part of the shrapnel.

In interaction with explosion of the PI field such a thing doesn't exist. If in position you can receive the right fields, you get elevated from what we supposed to be the demise of man, in the D of P. (:58). In the same position your soul can become part of another structure, because it needs it to elevate it. You become there to serve.

We will not die in the depth of the space from a heart attack, or from the brain hemorrhage, that's the D of the P of the man on earth. We will survive, we will live everlasting life, because we understand the interaction of the emotions, we understand the interaction of the fields, .. of the fields of the need, in the time, place, and position. KS need to move away from this .. physical interaction and creation of the fields, they need to move in the D of the understanding of the creation, and interaction of the fields. What field you are creating, for what reason, and what will be the outcome, and is that outcome perfect for everyone involved.

As we desire, we receive, as we think, need, want, that this demand will satisfy the betterment of the others, will become to understand the totality. Will the mankind become part of the structure, of the physical life, of another time and position, is the decision of the STM, (1:00). and not the P of the man.

Those KS who are working on the D of the PI, are trying to understand the PI, have to understand ... see what you want to see, ask yourself a question, what can I give you that it satisfies your term. Not how much power I can put you, how much tons I can give you, how many positions of the Gans's I can place on you, that you satisfy my need. Understand the soul structure, which is the interaction of the fields of all the coils in the system, with the intention, and then you will see the result of the satisfaction of the emotion. If you are waiting for 100 megawatts, you get 200 megawatts. You don't even know what to do with it. If the understanding and intention is in the field strength, and not in the matter state. Then try to understand more. The KS who work and start understanding the .. promotion and interaction of the fields, in the coming time will have a "field day" when the new knowledge, the new understanding, the new position they have in the knowledge of creation.

Find a way. Access to the knowledge of the U (KOU), (1:02). and understand how you can add to the soul, how you can physically change the D of the interaction. Try to understand the totality, try to understand the totality in the D of the fields interaction, not field interaction in the matter state, but field interaction in the universal environment.

Many of you will have a huge problem to move on, as long as you look in the D of physical interaction. Many of you will have bigger problem, with understanding the work of your own creation, because you have not understood what you have actually created.

Understanding the KOC, means being able to share that knowledge, with your own soul, of the emotion, of the P, then you do not need the brain. As I said, many times, if I put man in a craft, and moving with the massive change in the speed of travel, from A to B, and in that process, create a field condition, (1:04). that is equal to the amino acid (AA) of the brain of the man, I will arrive in the destination, but there will be no brain in the body of the man. Because as a field strength it has dissolved, and it has interacted with a field of it. I get a body with no brain, but still would that man physically move? Would that man be able to interact with its environment? Would the STM in the center of the brain of the man, be there, to work in the new environment, where there is no need for the brain, but interactions through the field strength are accommodated by the STM of P. We don't see any brain between the earth and the sun. But even though, there is a structure of a brain between the earth and the sun in a plasma M field, that is field strength dependent.

Evolution in the world of Pl, is evolution in understanding of the science of the creation, and not the science, which man has created for himself. The science of man is matter state physical condition, and at the lower strength, but man has the key to jump up, become part of totality through his soul, through understanding the center of his creation is within him, within the center of his brain. Then allow it to develop, (1:06). and then understanding as we see the big picture, how to add another energy for it, that the P changes, even though it's still there. You changed the Cu to the Gans, but it is still there in the same containment.

The process of change, or the interaction or reduction to addition to the strength of the field, or what you call, the stacking, or connecting to each other, is part of the understanding of the structure of the physical D of the STM. If you want to understand how the soul reacts. If you want to see how P reacts, start from a different D. Look at your own solar system (SS), look at the structure within the SS, and see how stars are positioned, how are stars are interacting, and then how are the planetary system are interacting. What knowledge do they get from the sun, that they have positioned themselves where they are.

The working of a SS, is the working of the body of the man. We are inside a soul, inside of another soul. We are monitoring, we say, in the way, we watch he is doing, but we never understood. In the new FEU it's the same, but this time we work in the D of the soul of the U, (1:08). that's why it's called the universal flight system. Where in the U we want to be, not where in the SS we want to be. Even though the SS is part of that U.

One of the interesting things with the new generation of the children of the man, which are born through the soul, is how they interact inside, and within each other. Because they are aware of the emotion of their P and soul at the same time. Mankind has to enter the D of understanding his own life, his own existence through the D of the fields of the U, not in the D of his P in the U. Then we see a progressive development, .. in understanding the truth about the creation and the Creator. Otherwise, we are still in the same bent, and the same .. dilemma. Then we have to demise one, to show we are better, and we are different. We destroy our culture of life, in acceptance of the emotion, just trying to say, we are correct and the others are wrong.

You got to understand how we can promote the understanding, (1:10). the comprehension of addition, division, collusion of all the fields of the U. How do they collide, and when they collided how do they collaborate, and what is the outcome of the collision and collaboration? By adding more energy, the strength of the field of an electron or proton will change the manifestation of the visualization and detection, from a Cu to Zn, or Zn to Cu, or from gold to silver, from Mercury to gold.

If you look in the process of the Fukushima, I showed this very clearly. How by adding one little element we changed mercury to the .. atomic gold, in the Gans state. If you noticed we did not make bars of gold, we created atomic structure, because we added atomic energy, what we call, M field energy to the ?? substance. It's like when I add atomic field energy to a Cu, to become Zn, that's all we done. This is understanding how to create that connection, understanding how you can bring field forces to be, but your biggest dilemma is, what am I going to do with it, when it is, I cannot bar it to sell it in the market, but it is all as a dust of gold. Because you haven't understood the preferences, the uses of it, in the D of the fields. (1:12).

One of the biggest problems which now we'll face, with the governments, with the KF, is creation and conversion of the matters into the nuclear plasma fields, which allows us to create a rapid division and conversion, the same as B12, B9 and B6 does in the body of the man, to be able to produce conditions of the flight. As I said to one of our directors yesterday, I can make one of the most powerful radiation fields from just a glass of water, from just ordinary water. But at the moment we have to be with what we call, restriction and understanding of governments, such a thing is possible. How can we bring a, what we call, something which has no substance into seconds of creating nuclear plasma, which allows us to be able to divide, to load, to amalgamate fields in a different way, that gives the desired effect.

The new Pl nuclear T, which is the beginning of understanding of the process of division, addition, and coexistence, is the new knowledge, that we start teaching. How you transmute the fields to create an effect. You don't change materials, (1:14). or add materials to get an effect. Mutation, understanding of the fields interaction, becomes much more superior in the knowledge, then alloys creating mixture of matter state, because at the end of it you want to have that effect of.

In the upcoming time in the new structures of the buildings, which will come through the development of this T, as we said before, there won't be any brick, there won't be any concrete. These are manmade matter states. By placing a D of the field strengths you create that barrier of the sound barrier, vision barrier, and every other barrier when you choose to be it. To be transparent but sound proof, to be letting the light through, but certain frequencies, that you create.

You can now do this with the present knowledge you have in the Gans T. But none of you have endeavored to do it, because you are too busy, to do something else, for you to prove that you can produce 100 watts is more important, than understanding you can travel the depth of the space.

(MaGrav video 1:15:37 to 1:54:10)

Scientifically there is not much to it. The reality is, man has to understand in the new system, man has to understand the totality of the (1:16). whole process. What did it come to us to understand, is to be able to have the knowledge to transfer, to reduce, to increase M field strength within our knowledge.

How we can change things by intention, by the fields of emotion. What do we feel, how do we feel, and how we can create that condition, to be able to do it, that it creates the illusion of completion, achievement.

How do we accept the truth about us, not being able to understand, the what I call, the reality. Then how do we (1:18). convert this into understanding of totality? How do we go into the depth of the knowledge?

How do we create Gans's, which in the strength of the fields, or near the strength of the fields of the STM. Our body does that in our brain, creates one element, and with different positioning of this element, creates emotion, understanding between the STP and the STM.

We understand how much, and to what extent we can evolve in understanding of the knowledge of the creation, that allows us to come to that point. We were not born as physicians, as scientists, or as a baker, or whatever. We took time, (1:20). we learned, we took time in understanding. Now with the new knowledge of PI, we are in that process, we have to learn it, we have to understand it, we have to feel it.

I am trying to find a way to open your eyes in a way, your understanding. In a way, how can you get in touch, or how can you work without the interference of the matter state of the brain, between the STP and STM? How do we extend the knowledge of our own understanding, of our own creation.

The only way, the first steps for us to be able to start this process, is try inside us, (1:22). to understand the fields strength, which creates the emotions. And try to see, not physically, but in the strength of the fields, we can replicate or create that emotion again,

and how good we become in creating this emotion. Build it up, and develop it, that we can repeat it, and slowly to go from one to another, and understand how we can interact it, and then how we learn to be a giver, and not a taker.

When you start this process always understand in your systems, in your emotions, you have to go one level higher, that you build from the lower, and understand how to handle these interactions. It takes time for many of you to breakthrough that point, (1:24). to breakthrough that time.

The only place you'll find this interaction of the fields, is by use of the MaGrav systems, by understanding the fields they create, how you have made your MaGrav, what is the connection of different strengths of the fields, which the MaGrav produces, and then now, becomes your true generator for elevation of the soul, for interaction of the souls, between you, your STP, and the STM.

It is not to sit on the MaGrav, it's understand how to extend the fields of it, to interact with the right emotion. Very much you'll come to the point, that many of you, for the first time will start understanding the purpose of the MaGrav systems, which we gave you, we taught you. (1:26).

As I said, we gave you the cake you looked for the crumbs. Now maybe it's time for you to find the cake, the beauty of it, to understand it. How would it work, if you position your MaGrav in certain positions. I've seen from the beginning of creation of MaGravs (MG), you all put your MG vertically. You are interacting the 3 fields, what I have not seen from any of you, is what you have the MG in this position, where your coils are positioned this way (vertically). What happens when you position yourself between these 2 (1st and 2nd coils), and .. between these 2 (2nd and 3rd coils)? The greed of the man to get the maximum to see something, was easy to give.

What happens when you have an animal sitting on the other side of the MG, and you move to his position, and by the soul of giving, "I love you so much," that the animal comes to you without a word. You move to this position and you tell the animal, you put something there, you are in danger, and he moves his position, because of the love you have given from the danger. (1:28).

If you create your MG coils in a different strength, that in a way, you create your Star Formation (SF) with your soul. Now you understand the beauty of the T I gave you. You looked, what comes out of the wire, I gave you what comes out of the U.

The biggest question is, do you need to connect your MG to a power supply, to the earthly matter state power supply? Because then the intention of ?? ours, will become different. What about if you connect to the plasmatic power supply, which carries the emotion of all, then you'll see the breakthrough in what you were looking for. But still the intention has to be correct. The understanding has to be correct. Are you looking for interaction of the souls, or the fields of energies, we call souls, or are you looking for interaction of P of the soul, or are you looking for interaction of the P?

If you look for interaction of the P, (1:30). you might create yourself new materials. This is what the true MG system has been given to you for, from the beginning. This is what has been set for, to understand.

Many of you created what we call, the MG systems, and you put them in .. SF and sometimes you got something. Some of you moved inside it, and said, "oh I feel this or oh I feel that." Now maybe I explain to you exactly what you have done to yourself. This is you as a soul (in middle of SF), forget about the rest of your P, blond, blue, white doesn't matter. But look at how you interacted with different layers, different fields.

If you are in the base, you have a contact in the same, and then what about the one above you? You have to deal with totality. You looked for the fields of what is, the fields are actually between the layers of the coils. You've seen these and you created these, we've seen in the intro (video), (1:32). We see Dr. Klaus and with Caroline Prilla in the machine with those coils, but you never understood the reality of it.

You went for facing the coils, where the field sits in position of the field of the coils. If by accident the height of the chair, the position of the MG system, .. coil, .. of the dynamic system was right with the soul, you got something, but then you can't repeat again, because you never understood the principle behind it. But still many of you will try this because now I have given you a new game, but you'll not succeed, because you have not understood what is behind this. This is understanding the totality of the knowledge.

If you understood from the beginning, if some of you understood when we taught you about the universal Cups, where the top of the stacker is the soul, do you have anything but 3 coil winding. The systems were set from the beginning to reach, but you have missed it.

But your present coils will not do that, because you have not done it the right way. Now you have to learn how to make your coils. I'm sure many of you, each position, (1:34). every single of your MG systems, and the rest of it, but what have you done, .. created, what did you put in that you can bring that synchronization?

Then you'll understand a big, big factor, the intention of the making, gives you the intention of baking. Now you understand, when I tell you, you took the crumb. You literally took the crumb and you missed the cake. Now you tell me, why couldn't I teach you this 5 - 7 years ago? Because you were not ready. The soul of mankind was not ready to go through that phase. The evolution comes from understanding and intellect, not from copying and replicating.

I promise you a lot of you are just moving in there, I am going to move my SF, I am going to do this, I am going to find my soul, I've got to do this. Go back to one of the very first teachings, then you understand my teachings have had, always fundamental basis set out from the beginning, (1:36). you missed it.

Go back to one of the first teachings. I told you very simply, this is your head, this is your two ears. Get yourself a headphone and find where you hear the music in the soul, and not with the ear. This is how in a very early teachings, I explained this and nobody understood. Now maybe you understand the game (put 2 MG on each side of ear). Checkmate! Now you understand how you went for the crumbs, even if you understood what a cake I have given you.

Now many of you will move very fast, and a large number of KS will join the Universal Community by understanding the process of the soul working. We'll still be building the MG, but in a different way, (1:38). with a different light, with a different understanding. A stereo system was your physical D, MG is set to elevate to the STM.

But I promise you, you still have not got it, because you'll not reach that point, because part of the knowledge is missing, because you did not receive from the beginning. Now you see how the teachings have been set over 10 - 20 years to bring you to understand, little bits by little bits. Buy yourself a stereo system and find where you hear the noise inside you, not from the D of P of your ears. Then use the same MG system, and see if you can transfer the emotion, through the same system at the point of the soul.

I am the Creator. I am the Messenger and the Methi. I teach you where man, to know where to go. But with science, not with hellavlu, not with the false information, with exactly why everything has been put.

When I taught you to make the Cup of Universe, have a look at Cups of U, and understanding which level you want to interact your soul with. And you listened to what I call, enemies of the man to destroy your Cups, because they didn't want you to get this knowledge. They knew they would loose control, and once they loose, (1:40). they cannot abuse your children, they cannot abuse the children of the man. Those who told you to destroy your Cups, are what you in your language call, the true children of the Devil. Those who did not want to see the progress of man. Those who sell their own children into the child abuse. Their own blood. Because in teaching you the reality and how to do it, they could not abuse you. They abused your soul and P for thousands of years. Now you have the freedom. Now you understand.

Go back to Cup of U, the Cup of Man and whatever. What did I give you? 3 coils, is that any different? And how here you are connected to the matter state where we open you to the liquid, near enough to the PI, that how fast you could reach that point. To understand the emotions, to be able to elevate the man from direction of what we call elevation of the soul.

You have to understand, every teaching we've done, step by step, is according to teaching of the U, according to the knowledge, which is there to promote the STM, .. the knowledge of the man, but for man to understand it, and not to accept it, just because.

New KS have access to all the teachings in the background. Go and find the teaching about the soul, .. about the stereo system, (1:42). when I taught you years ago. That was

for you to find the position of the soul. This is how I even explained the position of the soul of Naomi from the MRI which we presented.

To doctors it is nothing, it is just a dot. To us it's that black hole of the life, the existence. The essence of the creation, the position and the existence of the place of the STM. We cannot melt the ice and drink it, if you are using frozen water. You have to understand the knowledge, .. and the true essence of the knowledge in the D of the fields, and not in D of P.

You have to understand, when I told you in past years, I gave you the cake, and you took the crumbs for a few volts. I wonder what you KS will come up with the new understanding. I wonder how of many of you will come with the new totality of the condition, of comprehending the knowledge of creation in the upcoming times.

Those of you who stuck yourself with the Devil, you paid, and you'll pay for it, and you'll soon understand how. The Devil are those who keep man from learning to become free. They ask you to destroy your systems, because systems are the key to your freedom. (1:44). Now you understand why.

The key to understanding how to elevate the STM, which man moves away from the D of P. If you understood, in a very simple way, when we gave you the Cup #1, in the Stacker Unit, we gave you the key, we gave you the opening to the secret of the interaction of the STM, and the elevation of the STM. Why do you need to make a Cup of Soul, when you have no use for it.

I stood in the design center in Linz and our dearest friend, KS, Herbert, made a Stacker Unit, with 3 universal units, with all the 5 sets, with everything precisely done. Some people felt something, and some people didn't feel something, because his stand was too low. If your height managed to reach the level of the soul Cups, you might have felt something, and the others, you just went in and out, you might have felt something, with what we call, D of P.

Our teaching is a progressive teaching that you understand step by step, (1:46). and you spend enough time in the lab to learn. Now it is the time to move on, because it is the time for manifestation of the Methi. It's time for clarification of the Methi to be the soul of you, and your understanding of the creation, and nothing else. We are universal teachers, and we teach through the soul with the voice of the man. Now go and destroy your Cups and we'll see how much you have destroyed the knowledge of understanding the world of creation. Sleep with the Devil, you pay the devilish way.

Try to understand and I ask you please, try to understand what you created. And not just jump into bring and make coils and Cups, try to see and fit in what I feel. Your soul will not allow it, and is aware of the knowledge and what you are doing. Enter these environments with a pure sincerity to serve, and not to be selfish, what I gain from it, and you will see the elevation.

As I wrote to one of our KS yesterday, we are at the crucial point in research and development, and our research needs the soul, of the soul and understanding of the souls of the knowledge, and nothing more and nothing less, but we have to create these conditions, that we can become aware. (1:48).

What we teach you here, you have seen it in the construction of the flight system, we have done nothing else, just we know how to manipulate the fields, how to manipulate the existence of the fields for what purpose? Create the right system, and ask your friends and family to watch you to be in the center of it, and you wish the promise, or the wish that I am going to be able to give all the pleasures of life. And ask them to see if they see, and how they see it, and in what colors they observe, then you understand you have managed to achieve the understanding of the interaction of the STP and the STM.

Try to understand the first part of the teaching of today, the exchange of the matter state observation from Cu to Zn, by addition of just some more plasma fields, nothing else, then you'll understand how you transform from the STP, in interaction to the STM, and nothing else but your MG systems, and understanding the totality of the teaching, of the Cups of Life's, all 5 of them. Study them, just don't copy them. You copied them, you see nothing, (1:50). study them, you develop new ways to understand the process of the creation.

You have to be clear enough and understand this knowledge in clarity, that you become part of it, and it becomes part of you, then it doesn't become magic, but it becomes the process of understanding. You just need to interact with the fields of your MaGravs. Understand the fields of the MaGrav, and understand the fields of, what is the fields of the souls, and what is the fields of Inertia, where you want to be manifested in the matter state of the manifestation. It's you in the essence of the fields, which creates the fields of Inertia or manifestation. Nobody else. It's you who decides, if you want to manifest yourself as a fish, or as a man or a stone.

I hope today's teaching has brought parts of the teachings of 419 times, in a way, together, for you to be ready for manifestation and declaration of Methi on February 22, and then you'll find out where the man shall go. The man will see where the man will dictate the position and the place, (1:52). of the man to be.

Now you understand, and I repeat again, if you look at it, and I looked at this many times, and I said to myself, shall I tell them, or shall I not tell them. I gave you a beautiful cake, and I even cut it for you, and you went for the box of the cake, which was hollow, just the fields in one direction, where, it had its feet, the earth. Now understand this cake, and you decide how you want to cut it, and what you expect from it. Then understand how much you missed, and how stupidly you destroyed your Cups of Universe, where each one was one stacker, more advanced. (1:54). Each one with his own knowledge, with his own T, depending on what you wanted to elevate.

Understanding the knowledge of M field movement is one of the cornerstones of the future life. In the teachings, as I explained to another KS recently, I gave you this

(draws 9 boxes) This one was Book #1, matter state, the conversion of it by light, to Book #3, in the PI state and matter state. Book #9 is the book of the soul. Book #8 we always said, was the origin of M fields. (1:56). Book #4 is about structure of the Solar System the PI of, how the energy of a PI works, you call it a neutron, or solar system. Book #5 is nuclear reactor PI T, how to make PI, how to make systems within the physical D to the D of .. P or above. Here (book 7) we come to the D of the STP, and (book 6) transition from one to the other, it depends which system you need.

With the Book 1 to 9, all systems you reach to understand the soul of creation, where here (B 1 to 3) you understood the STM. These books especially #4 are fully written, number 5 is totally done, the 8, I explained will be done in the time, when the times come, the maturity of the man, and part of this teaching was started last week. This (Book 7) is how you manifest yourself in D of P of the soul, because otherwise you can manifest yourself in D of STP and matter state of ?? matter.

But remember one thing as you see on the book 1. (1:58). What is in Micro is in Macro. You have to understand the totality, in all D in the STP, or the STM, or STC and the way he manifests himself in what D. In what systems he uses (5 & 6) and which direction (from 1 to 9). Now you know why we said and we write 9 books.

The MaGrav systems and the universal systems, stackers units, are one on this side (after 6) and one of the other (5 and below). It's for you to decide. How would the STC manifest itself in the D of the ?? you use this reactors (5&6) or what we call the conditions of the U, and you'll get enlightened, or you'll get the creation of the STM.

Mankind will be busy for centuries to come to understand this simple structure. It has taken us 419 weekly teachings adding up to about maybe 3 - 4,000 hours of teaching, (2:00). to just make you come from here (1 to 3) to here, with a little bit of this (5 - 3).

When you can make a system, where your soul works with the soul of the others, to create effects in D, then we don't need the MaGrav , Stacker systems and any other physical system, which the man needs for his flight and everything else. It only comes out of servitude and nothing else.

Thank you .. I hope .. we open a new D in teaching, that speed of understanding of knowledge in KS and how to work, and how the systems taught to you over years, has been there, you've been too busy with the crumbs. Let's see what ?? we see from you in the time to come, and let's see what we understand from this new disclosure, which has actually been there, you were too busy. go for a break ... (2:02).

>>> **PROOFED to here** >>>

>>> **BREAK** >>> 419 KSW Feb 10 , 2022 (2:07).

Q: (2:08). .. What is the force that moves planets. .. like you were talking about, you have the earth the sun , galaxy and so on. We have different velocities, speeds happening in different systems .. we are rotating at

but the whole SS is traveling 828K kmh, and so on. So everything is spinning around each other and finds its position and so on. But what is it that is the actually creates the spin .. why does everything spin around central positions. What

K- The spin comes, is totally due to balancing of the field forces, to always create a condition of equal GM field, is take as much, and give as much to be, not to be in touch or .. to create that condition, to be independent. So the rotation comes and changes according to place position and time, according to field strength of positioning in respect to the others, (2:10). and what you as a field carry, that dictates that positioning.

In a way, if you look at the radar system, if you don't send a signal out, and you don't get a signal back, you have no radar, the machine sits there. It has to be a dynamic fields, sending to come back, that you know if it is an object, is moving or not.

In the dynamic PI system, it's the same kind of radar system. Sending continuous fields to find a position in respect to the others, other fields, which then, that dictates a condition of .. normality to be able to hold all the fields together to create that PI. Then you have a mixture of fields, which have in the strength reduced, which move into the Inertia matter state, then you have a stability of the conversion. You have cocooned the fields within more or less, like the brain of the man, which cocoons the soul, the center of the planet earth with the matter state around it, cocoons that, keeps that constant.

If we take layers off the top of the earth, the speed and position will change, because if we can penetrate into the center we can add to it, or subtract from it, then it leads to a new cycle, a new position for the planet. We see this in many planetary systems.

When a planet gets hit by a meteorite, as long as it can keep its central position, gases, or what we call plasma together, (2:12). it can always reposition itself and recover. If the meteorite penetrates to the center, than it opens the star or a PI up. We see the same thing in the body of the man, we have central energy points. If you shoot with a bullet to your hand or arm, you don't die, because the central energies are not disintegrated, they are not destroyed. But if you get a bullet at the point of the center of energy, you die. You can shoot at the heart many bullets and you still survive, but if shoot at the point of the center of the energy, the soul of the heart you destroy it, you die. It's the same with the brain, you can shoot as many bullets as you like through a brain, nothing will happen, you'll loose your memory, part of whatever structurally damaged. But if you put a bullet in the STM, in the brain, you disintegrate it, you open a hole in it and it explodes, because we create a condition of rotation, condition to the space, time, place, position, and strength.

If any condition rapidly changes outside our SS in our galaxy, the layers of the shields of the fields of the SS opens up, our SS is gone, it will be extruded and extracted into another position and D. For it to keep that position, where it is, (2:24). it has to have a dynamism to continuously give and take from all positions and the fields, which allows it to be in that position. The rotation is not there, just because it is there to rotate, the rotation comes to be in touch with all the elements, that it can protect its integrity. In a way, it's a radar system for it.

What do you do when you are traveling down the motorway, you keep your eyes on the cars, on everything, that it can keep your motion, you can be moved. In the condition of the planetary system, and Pl system, the fields, that's what their job is to be able to be continuously be observant of what is happening around them, to position themselves, they have to rotate. They create that condition, and then by field forces conditions, they adjust themselves to keep that constantly speed, because they find their balance of the fields, at that constant speed, at that position to be the best.

As the earth moves into the center of the SS our speed will change. We are, the speed we rotate around the sun, and the other planetary system will move. Every time one of the planetary system gets absorbed into the center of the system (sun), all other planetary systems will adjust themselves. When the closest planet gets pulled into the sun, in the coming time, Jupiter and Saturn will change their .. rotation boundary and their fields, to accommodate for this position. (2:16). This is how rotation, it's in a way, of observation and control in respect to the other fields.

In the very near future, I was going to teach this one a couple of weeks ago, but I didn't think KS are there yet, to comprehend, it will be another "talk." Is when you have a system, when the field comes from it, how this field knows to interact with this object, and does the return comes this way, how much of it, where does this go, to what, and how many fields are created and divided to keep this entity (planet) in its position?

This is the secret of rotation, being vigilant and keeping time, place and position in respect to, give and take. I take a little bit more from this, but I give a little bit more to that, but I keep my position. This is, if you look at it, M fields are the arms and the legs of the Pl, and how it decides to keep. I want to run at 10 kmh constantly, so I make sure that no obstacles to stop me from that. (2:18), I make sure everybody knows I am coming, and everybody is happy with me to be there, they cover themselves.

The rotation of the Pl is a radar system for the existence of the Pl. In a way, it's the beacon of its life, that I'm here, I am prepared to give this and that, but I am not moving my position. But in accommodation of that, the others have the same, that's why if you look at our Pl system of the SS, we have the sun.

We don't go, as I said many times, around the sun this way (in a perfect circle). The earth has a peculiar path in its SS, and every time, every position is, in respect let's say, to Saturn or Jupiter, they move their position to accommodate the sun and the earth's M fields, because this says, "guy I am here, and I want to keep my position in respect to the

center." I move, you move, but I want to do it, this is how it is on the balance of the fields ?? center.

If any of these bigger size, if we loose by accident 100%, the entity of the Saturn, by massive meteorite or whatever, coming in from the U, or .. our galaxy, be it in the D of the matter or in the PI state, for sure earth will move. (2:20). For sure earth will move away from the sun, backwards, because these giant planetary systems put a special force field to keep their position, that everything is in position. When you take the cap off, the water flows out of the pump ?? ?? just like a bottled gas.

So when you say ?? ?? they are amalgamation of fields and the way to position, created condition of the position, and to be aware that everything else is constantly monitored to be there, that they can confirm their existence.

You got to remember, you look at the earth and the sun as an object, but they are really an entity. They have emotion, they have feeling, the same as the cell in your body. This is very hard for man to understand.

Any other question. (2:22).

Q: .. In a very previous workshop you told us about the living entities (AA) for us invisible, in the very upper atmosphere. When one dies it is sinking to the soil and we nourish ourselves from this energy, how does it come that we do this? Please can you give more information about these entities, for example, are they part from the beginning of the creation of earth, or are they created as the humans appeared. What is the background of them?

K- They are created out of the interaction of the fields of the earth and the SS. Some through their structural life, ... existence, became from the beginning of the time of this planet, because they live in an environment that balanced fields exist and they accommodate them. Some are new, just like all of us, we have children born today, and man who have been here 100 years. It's the same process, but they have not converted into the Inertia field strength of the planet. They are at the strength that they can stay.

It's not the exclusivity of, these kinds of life of this planet only. They exist between the planetary systems too, because we don't have the knowledge of them, (2:24). we don't look for them. But now that we are increasing the knowledge of the fields, and the M fields, we will avoid them.

Will come the time, the way we avoid hitting a city, or a building, because of people living in them, we don't want to kill them, we will avoid these M field zones, because they are living. They are living entities. Life is not the exclusivity of the ground of this planet with man walking on it. As we have life beneath us, in the oceans and in the center of this planet, we have life above us.

It's our own ignorance who has kept us to this, now by wisdom of understanding this structure of the creation it is us, who is responsible for it. To make sure we don't hit a

building, killing people, just because we didn't know the building was there. We have to develop T, we have to understand the process of creation, that we see the building. We observe it, not just because it's not there with bricks and mortar.

It's our responsibility to develop our senses, to detect these centers, detect these positions of lives. It's no use saying, it's not my fault, they have to watch, and I didn't know I did. You'll pay for it with the condition of your soul. The crime does not stop, by not doing on this planet to another man, or another animal. The crime does not stop in the whole of the U. You are responsible for what you do and where you go. "I didn't know, (2:26). sorry," doesn't exist, because you attract their fields, and which virus would you like to call them.

How would you like to come out of a car with 200 kmh hitting a concrete block of a building. You think you come out all in one piece. It's the same with D and direction of the life in the Pl condition above or below the strength of the observation of the man. We are responsible. We become responsible people with our fields, and this is what we realize gradually, slowly mankind will come to realize.

It's not that there are people above us, there are living things above us, the same, the Pl of the O or H was created in the upper atmosphere, and by interaction of, with what we call, Inertia mass of the planet, converts into a mass, to entity we can physically attract. They are there the same, but they are of the field strength, that they can never come in the time of their existence, in contact or in the position of the Inertia, but if they loose their D or loose their Pl field through any condition, then by splitting the Pl, and coming .. in the weaker strength, being absorbed by the Pl of the .. Inertia of the earth, they can even be converted to the O, and you just breath, it could be part of theirs. The water you drank could be part of theirs. Even the CO2, (2:28). that you absorbed could be part of their life, which just disintegrated, and as a smaller Pl, become what it is. Maybe some of the gold's and silver we carry is from that conversion. So it's not the exclusivity, life of man on this planet, is the inclusivity of life all over the U. This is what we have to understand. That is why we need the understanding and observation of the understanding of the soul, position of the fields, not matter state.

Any other question.

Q: .. regarding Creators plan to create paradise on earth. .. Humanity was a puppet in the hands of the impious deities until then, demons, fallen angels, black and red dragons and even the wayward son of Zeus, wrecked havoc on the land, by loosing control of the chariot of fire. The later he was punished with the death ray, due to the clamor of humanity. Will the Creator do the same with these evils of the heavens now? Or has he converted them for good, or has he already taken them out of command by trapping them somewhere in space. Anyway will they no longer interfere with the Creators plans to create paradise on earth?

K- You see, (2:30). what we call the Devil, is what keeps you away from reaching the ultimate goal. So in a way, it's you by accepting the condition and the position, which takes you away from the understanding of your own creation, it's your own devil.

The people who encourage these things to be, is part of their structure. We cannot change. I was sent a beautiful video ... a mullah which is supposed to be a priest, a preacher, says the true "eid" the true celebration is the certain "eid" in the Islamic calendar and not the Iranian "eid," which is the beginning of the spring where the cows start eating fresh grass.

I thought, when you want to destroy a nation and a culture, destroy its belief in its beauty. This to me brought, that the end of Islam has come. If the man of robe deny the beauty and respect of the thoughts, and beauty of existence, he has already demised himself. It's a very interesting tape to listen to, where he tries to, this is what they did in the beginning of .. when they brought Islam to Iran, diminish, destroy, and dig into until we get all of them not to believe in being Iranian, or any culture. Japanese done that with the Chinese. The Mongols did it in other cultures. (2:32). It was very interesting to hear this, and he comes most probably from Arab states, they are not Iranian blood. All the Mullahs in Iran, which destroyed Iranian culture have no Iranian blood.

We have tow of them in the ?? of Iran, they were 2 brothers, they are from Iraq, and they came to sit in power to destroy the culture of Iranian culture, and they allow them. Celebrating any "eid", was a crime, where we came from it. Listening to this, it is us who has to accept, is this guy real? Is this guy here to serve others, then in elevating the soul of totality. We teach .. freely and it's for you to test and try.

We see how what I call, these people camouflaged themselves and reached the center of the KF, and then they think they gathered a few people around them, then they start denying everything about the .. work of the KF. Because they think now they can serve their masters. And we have people who are KS who follow them, because they are of the same essence.

Have we ever taught you to kill, .. destroy, .. in any of the teaching to damage? We have taught nothing but love and expansion of what we call, serving, and then you see the people who tell you to destroy things. We should have kicked on you straight away. Why do they want us to destroy? (2:34). The minute they kicked out, because they are the true, those who listen to them, "the devils."

Those of you who hear and walk away, you understood the purpose and the position. And now today, with the teaching of today, you understand why those teachings past 8 - 10 years, today came part of it together, if you understood it. It's for you to find a way to elevate your understanding, .. of the creation not the physical matter.

Then you ask why? But if you go to the history of these people, they have been like this from the time of birth. As I said many times, even last week, we open the books of these people, and then you understand, how many of you went close, supported them, to be with them, and how many of you are going to loose your children, and your wives, and your husbands. As many of the KF people have seen it, when they see the record of these people.

They are the most active pedophile families and blood in western Europe, active, prison sentences, not talk. Then you understand, they saw a chance to take the KF and KS, and they shared the data of the children and whatever, across, the way we got Alan Sterling, their master. All the opposition to us started when we put Alan Sterling away, because he abused, physically the children of man, and these are of the same. (2:36). The whole family prison sentences. We open this door and you'll see, and then you decide, you really slept with the Devil.

They came to penetrate, to get access, and then to abuse, and we became aware of it. And then they got a kick out of it. We couldn't see it, till, how it changed position, and then these is what you call the evils, devils and the rest of it. Don't listen to me, just go and look at that the data in the newspapers, which will give you the courts and the prison sentences.

You have to understand, it's you who decides to sleep with the Devil. It's you who walked away from understanding of the creation. I warned many of the KS, especially in Brazil who work around these people, and in Holland and in Belgium, and Germany, be careful with your wives and your children. Just be careful with your children. I lost my son to them, I hope you don't lose yours, then you understand what the Devil is.

Trying to cover the life, they tried to destroy the others, that you don't see what they are, But it was very clear to us. What we say, the devils work together, (2:38). and the good men of God work together, and we see them working together, they came to destroy the KF, and together, because they all ?? help each other.

We will open this very soon for you to understand, and this the test for you, not for us. We gave nothing but love and care, it's you who have to understand it.

Any other question.

Q: Jalal ... it makes me happy to listen to you all the time. ... Regarding what you asked about the teachings of the stereo it is in the private teaching 2015, November 10th, AM session starts from 2 hours and 30 minutes. And regarding your first teaching, it's also in the private teaching, it's, (2:40). 2015 May 12 AM session.

K- The one in the .. Trani.

Q: I need to understand one thing. We speak always about giving energy and taking energy. Can you please draw a balancer. You know like when we put banana on one side, and piece of iron on the other side to make a balancer. Now if this is one entity, a Pl entity on the left side. in this entity we know we have a G and M field, and the MG positioning of this entity. Is it always due to what I take from eh right side and give to the left side, for example? What I take from the right side to give to the left side. That means taking energy from one side to add it to other side?

K- You are intermediary. You don't take. You are just a tool of how much you can add to what you take, that they stay in their position. This is what we never understood about the

rotation of M fields. (2:42). They said, where does the field changes from M to G? If you remember, go back in the historical books, where they always discussion was, where are the M fields and where are the G fields. In fact as we said, it's the same field, it depends on the point of observer. When you are in-between a system, in a way you satisfy both, how much of this you want, and how much of this I can give you, for both to be in the right position. That's all it is.

It's actually being mediator between our children, and we got to be correct. We have 2 of our children sitting on the table, and they both want the same piece of meat, what do we do? Okay, let's cut it, that you both are happy, and you both have and can carry on with your existence.

It's the same position, but his time it is done in the D of the fields interaction, what we call the soul. A plasma with response is called a soul, nothing else. A plasma with emotion is a soul, because it feels it.

If you are a stone in a river you feel, the water above you, you feel the man steps on you. This is why in the writings it says, even a stone has a soul. Our collective soul is there to accommodate the balance between all, because us, ourselves are accommodated by the others to be in balance. That's all it is. (2:44).

Q: Now I know exactly how much I can give, I receive from the others, or I can give to myself to take?

K- No, if you put a measure to it, you already lost. When you say I know how much, that how much, I can give and take, you already put a measure on it. Next time when your child does something wrong, instead of shouting at him, go and give him a kiss. .. it can be done a different way. Next time he does something right, shout at him and see how he reacts. It's us who makes that decision.

Q: Do to the need?

K- Ego's satisfaction.

Q: It's always there is ego satisfaction

K- Ego satisfaction

Q: Confirmation of existence, it's always there.

K- Yes, but confirmation of existence to what it feel I like to be. It's very interesting when you sit at a table, and a person talks to you with anger, and turns around to other people at the table, very normal.

Q: mysteries and the light .

K- You can love both the same. It comes to the judgment, especially when it comes to your children. When you have 1 child, is everything is put it. When it comes to 2 children you have to decide, (2:46). even though you give unconditionally, when it comes to them in respect to each other, sometimes you have to come in, and do you know who loses all the time? In most of the families it's the first child, and the majority of families it's the second child, and then you start seeing the abusive behavior, and all attention seeking and the rest of it. We cannot compare how we are until, we have two to compare with.

Otherwise it is all one way. Otherwise you know when we have 1 child everything gets in there, he is god, he is everything he wants. When you have a second child. You have to

give enough that both feel the same, so you are continuously juggling in-between. Then it comes your own judgment, did I do right for this one, and wrong to the other one? If you get a path that you do right to both, the same, then you'll understand. If you can be always correct and balanced in every judgment, then you understand.

Q; Are we there yet?

K- We are, partially we are getting there, as we mature, yes. We've come very far, we have matured, in so many ways, I explained to you. We look at the bigger structure, then you, look at the smaller structure. I look at the political structure, balances of the place and time, and place now, and the smaller one. What was fashionable to create war and kill as much as you can, to make the best tools to kill as many, now has come to stop creating and killing each other.

We have seen today, what is happening in Europe. Everybody, every president, every man in the politics is running around, (2:48). into Ukraine and Russia, to stop these 2 countries, might, enter into taking over each other, not a war, because it's not a war. It's the most imbalanced way to go. Russia decides to go to Ukraine, it's overnight gone. But we want to keep things, but we are not prepared to give others. They are bringing all might of the military against each other but they don't want to get into the war. Because they learned it don't bring, it won't do. Unless something happens, as happened with the .. in America the last slaughter of the .. red Indians. Somebody, nobody knows how, shot a bullet and the whole hell broke loose, but nobody knew who was, because it wasn't supposed to happen.

We are maturing to understand killing and the war is not the solution, of mass killing of each other. Local wars, little guys trying to say who is the boss, very soon, in the next 2 - 3 years will finish, because the top guys will not allow it, and secondly people because people ?? down the road will say, that you cannot go with it.

Then it comes how to deal with each other? How do we break barriers of being correct with each other? We stop killing each other. Now we stop fighting with each others nations, we stop fighting with each other as individuals, and we stop killing animals, because we find other solutions to it.

It's very interesting, the vegetarians, now we found protein from the atmosphere, which does not kill an animal, we still can have your burger. The question mark is, have we miniaturized the soul from the cow to a cell, (2:50). or we haven't understood that yet? We are happy we are not killing a cow, we become vegetarian, now we become those who can use protein from atmosphere. Once you become a protein from the atmosphere you still have a soul, but you still want to kill that one, because we miniaturized it, it's acceptable to us. Like vegetarians who can eat a thousand seeds in a pot, they are a thousand souls, but we don't want to kill an animal, which is one. To me never been comprehensible.

But this is the life, we are maturing, and with elevation of the soul, we have been making T available, that man can take energy without killing, the way like the EU are, and the rest, then man will mature into understanding and ?? become a peaceful man.

You got to understand if you work through the PI T, understanding it, now the KF PI as interaction of the dynamic fields in the U. If you are cold, you'll be moved to fields in position, or fields will be given, that you'll feel warm. If you are hungry, it's the same. So what are you fighting for? To be given everything freely, is that a problem? We are afraid to be given everything freely, free resources from the U, not committing, the elevation of our souls by killing.

You got to understand, we got to be taught the understanding of the operation of the PI, then we don't look at souls, we don't look at anything else, we understand the process of the creation. (2:52). Because as I said very recently every cell of the man has a soul, and the collective soul of every cell in interaction and work, creates the STM in the center, that everybody is correct, every finger is in the right place.

The same way the collection of the STM, from living entities at the strength of the G field of this planet, makes the soul of this planet, and it has to be correct with all of them. There was an imbalance, now we are balancing through new understanding and technologies. But the soul of this planet, is part of the structure of the soul of another cell in another body.

Which local center of it, this is the liver of it, is our solar system (SS), but this liver itself has a soul, which is part of the soul of the galaxy, and the same with the U. We are inherently part of each other in the D of the PI, in D of fields, which created us. If we understand this, then you can go one step higher to understand the next one. This is what the elevation of the soul means, understanding the world of creation and nothing else. The true world of creation, not Darwin way. Any other question

Q: So our presence here due to the ?? , (2:54). which we accepted as humans to transfer form one point to another point, we need to adding to what we accepted, or changing what we already accepted?

K- Depends on what position we want to take. I asked this question very recently, and I put it to you. I know the answer, but I want to put it to KS. In the new born babies before they understand or talk, or whatever, we see them in their sleep, .. during their waking time, they smile, they get frightened, they cry. In their sleep we see them change their eyes, face, whatever, which shows they are dreaming, we call it, but there is one fundamental question to ask. When you grow up you dream of a man or woman being your grandfather, or friend of your father, or mother whatever, and you tell your father or mother, you know there was an uncle like this who died, and you never seen, but you see them, you visualize them in your dream, or as part of your sleep.

The question to ask is, what do these children, in the womb of the mother dream of? Are they still dreaming of the uncle, (2:56). ?? and getting frightened by them, or are they

creating their own dream, which has no D, they have no experience of? If we carry RNA and DNA to our children, are we carrying all the information of, .. our emotional experiences of the emotional interactions of our souls to our children too, that they are dreaming of the uncle, and playing with the cousins, which they know when they come they'll play with.

What is our understanding, what is the reality? Do we carry the physical, and part of this memory of the RNA to our children, or will they carry on dreaming what we dream, but in essence they understand through the transfer of the DNA, or RNA. Then we understand how man is, because we just came to understand about the hard disk, and software, and now we have to extend to understand the totality of the hardware and software, how they work, not the way we thought.

Then maybe it answers your question, is our RNA DNA limited to our physical transfer of the information and beauty, and manifestation, or do we carry and do we give all our memories of grandfathers, and great grandfathers to them too. If you listen to the teaching in the past, I think you already know the answer. If I find one of you that has been present at the time of crucifixion of Christ, who saw it, through the eye of your ancestor you carry that knowledge. (2:58). You'll tell us how and the way it's done.

I go back, give you an example of, you can go and check it if you can get to it. In 1970s and 80s .. for those of you, who are new, there was a program on one of the London radio stations ... they brought a guy who could hypnotize, and the guy who he hypnotized said, about, he was a sailor in such a place and everybody thought it was a joke. ?? the city couldn't test, somebody because they could get in touch with live online. He said, if you were a sailor, he was a man of navy, he said, we do not know how to fire these canons, it's still a mystery to us. How did you used to fire canons in that time, because then we'd know if it was a joke or not. The guy explained how the canon was fired to the .. They went to the national history museum in London ... and they pulled one of these canons out and they tested it, and it worked.

That time, and there are many other cases like this. We understand that these people are connected to the man who actually used the canon. It doesn't come by soul. It's part of that RNA we carry, so it's possible, that this guy when he was a baby in the womb of the mother had a dream about the great grandfather, somewhere, that actually fired that canon and explained how it works.

So in coming time, whatever, (3:00) some of you KS especially Palestinian side, especially from Jerusalem or whatever, who have been there generation after generation will tell us what happened to Christ, and through him, because one of you will touch that point. Some of you will tell us the atrocities, which Moses committed, because you were next to him. Your ancestors had the knowledge, and it has come down through RNA and DNA.

We just don't carry the color of the eye of our parents and grandparents, we carry the whole kapuddle from the time of inception of the man. Now you can understand how

deep the STM and RNA of the man records everything. We have a beautiful saying in Farsi ... don't look at how tiny the pepper is, break it and see how hot it is, how much energy it carries. It's us which is the center of the soul of the cell, that creates that, carries that, all emotion.

Q: ... ?? the one of the number of the one. It's exactly that hot pepper when you cut it in 4 pieces gives you more energy than 1. (3:02).

K- ??? will come

Any other question.

Q; Mark, Dutchman this is the first time attend your very interesting teaching, understanding how planet PI works with other planets to keep itself in check. My question is, can you explain which effect emotions have on these fields ... fields of emotions. .

K- Repeat .. you mean emotion on what?

R: The planet PI works with other plasmas to keep itself in check, there is this positioning . How can the fields of the emotions effect those planets?

K- It's a collective emotion, when it comes to the planetary system, it's a collective soul, collective decision of the fields of the created, be it the planet, .. animals, .. trees, .. souls which converted to the matter state, stones, whatever.

Inertia is not just the Inertia state, it's part of the structure of the soul of this planet. (3:04). It dictates its position, .. its composition, .. its manifestation, it's beauty, where to be the hill, where to be the mortar, .. grass that it comes beautiful to the eye of the man, where to be whatever. So when you come to the collective positions of the souls, than collective souls of the planet this time.

This is one of the problems with this planet, it did not provide, at the time of its creation, and its position, it could not provide a constant supply of fields to its citizens, to what it gave life to, at on the level of its surface, its Inertia surface level. We do not see the structures in the upper atmosphere or in the U, eating each other. They always find position, look at the videos from NASA, NASA released 2 or 3 videos very odd, which shows clearly the life of these entities (AA in upper atmosphere). We have spoken about it ... many times.

The whole thing has gone wrong when it comes to the matter state, semi-matter state, which is the PI state, which is the body .. what we call, half matter, half PI, that has created these D of pain and suffering. What would happen when we satisfy this .. change, to satisfy this lack of the fields, and would our planet move in a slightly different position in the SS. Would our planet change seasons.

We are talking about the global warming, which means most of us, (3:06). move away from the extreme cold and move to the extreme hot, or at the end we become a balanced position, but can we use the benefits of what we call, global warming by converting the gases into Gans's as an energy, and feed it back to the planet, because it will go through,

we've seen it, when we put 1 patch on one side of the body, and put a weaker one on the other side we transfer the pain out, we transfer cancer, and tumors out and the rest of it.

Would we as a human race position reactors, position CO2 centers, that we absorb the CO2, we convert it into energy and feed it to, we just dump it into the ground, dump it into ocean. We do double CO2 units on the Northern Hemisphere, than on the S hemisphere, that we create a flow, that the center in this planet will receive enough of to create the fields, that the man will not feel hungry, .. not eat again, not kill again. This is possible. We have started this experiment.

KF of Iran has submitted the first plan, for the first CO2 .. comprehensive capture of the CO2, and its position of energy, to the mayor of Tehran last week. We will go through with this, we'll extract thousands of tons. The same proposal in the next few weeks will be submitted to the Beijing mayor. The same thing we have to do in the Southern hemisphere, in Brazil, in Nigeria, (3:08). to create these flows, that the fields of the same, to cross the center of the earth ?? .

Can we do that, can we use what is the menace to humanity, to the benefit of the humanity, to extend the energy fields within the center of the planet, that it creates energies, that we stop eating, we stop going for feel of hunger, because this is what is missing, in the structure of this planet.

The planet through its structure has not managed to create fields, that its inhabitants can sustain life without killing. We have seen it through KS in China, especially, it can be done, they stop eating. We have to understand, to what is .. the biggest problem, global warming to us, can it be used to enhance the soul, the energy of the soul of the planet, that all of us don't need to eat anymore. It is possible, we showed it is possible, it just has to be scaled up.

KF is on verge of doing such a thing .. we are on the verge of a major breakthrough. I thank Yosef and the KF Iran for submission of the CO2 capture plan for Tehran city, starting in the next few weeks. Then we show it in Los Angeles, Beijing, London. But how much of it can we convert and what transfer of fields we get? Would it bring a new attitude, behavior in man?

You don't want to kill anymore, you go to vegetarian, you kill more souls of the seeds, (3:10). as they create the next cycle of life, and call yourselves vegetarian. What about the KF is setting out to put centers across everywhere, that you can walk through these centers and you receive all the energy you need.

This is what we are doing in the FEU, in the FEU you don't need to eat, we just got to increase the numbers. We are not theoretical, we are actually building the production of these systems, increasing, we are employing more and more people in KF in the manufacturing side to meet the demand. Then teach the other organization companies to do. We have to understand, not our own need, but the need of the planet that it serves its

citizens. That comes not by dogma, but by understanding the real science of the Pl, .. of the creation. We are at that point.

Any other question.

Q: .. I have been in the aerospace industry for about 30 years, I am an electronics engineer, (3:12). and now ..

K- Would you like to join us in Linz in our space T

Q: Thank you this is so interesting. I have been doing something else for the past couple of years. I am in health and I have learned how to touch or contact the soul of a person or the higher self, and then I can ask any question, and I get an answer. This way what we do, we are selling supplements and I have been to many trade shows and I have been testing thousands of people on their vitamin and mineral deficiencies. I can pinpoint their status. I have also tested organs on emotional, on the Mind body soul, levels. I have 8 levels I test and I can see the stress on an organ, and mostly it's mental and emotional stress which over the years comes down onto the physical level. Sometimes there are energy and spiritual stress which comes from reincarnations. This has fascinated me so much that I said, well, and I can de-block things, stress, energies, and I find out the reasons for this stress, it is mostly in the childhood, and the problems with their parents and family members. Now what I am doing since the Corona, I am setting up a webinar program for consciousness. (3:14). I am trying to teach people to change themselves. I understood life at 64 finally, my whole life I read a lot of books, and I am also feeling my soul. Sometimes I have these amazing love vibrations coming out to help people who need this. I am switching from ego to soul, this is a process. .. This is what I am trying to teach people to follow the same road.

Now as I understand your One Cup One Life system helps this process, which makes me very happy, because this is the only way to transform this planet, on an individual basis.

So my question is , understanding now what you told me about the planets, who interact with each other, we as human beings are doing exactly the same thing, on lets say our soul level. Be it negative or positive emotions or I say life depleting or giving emotions. That's what I am trying to teach people to be aware of what their emotions are.

SO if this is the case for the planets, it's also the case, that's my question, for each human being, and the human beings among each other. Is that right or not right? (3:16).

K- In a way you have reached the point of understanding, part of it.

Q; Yes

K- But there is more to it.

Q: Yes, I see that.

K- The creation is a complex structure, and it's not what happened in the past when you were speaking to the majority of the people about the soul, they have certain mindset, because the priest said that, the church said, mosque said, whatever. But when you come to understand scientifically what the soul is, then you can work your way around it, to understand its attributes, and how you can access it, how you can use it, because it uses you.

Because this is the way most of the people have what I call a blockage. They read a book and they talk about psychosomatic diseases, but when you speak about the psycho to be part of the emotion, interaction of the P and the soul, then it cannot be, because it is not in the book.

So in a way, what happens in micro, it happens in macro. We as a race decided we had enough of war. What we call Universal Council over years ago when it was setup, decided we want to see an end to the war in line of nation. If you look at the KF UC it's on the line of language. It doesn't matter if you are a Dutch and live in Germany, or a Dutch in South Africa, you still have the same right, in understanding it. It's us who created that border. It's us who has, (3:18). created that border according to our intelligence, and what we have been taught, and what we can accept.

So what is acceptable, what is applicable to the STM, is applicable to the soul of the planet. It's us who have to understand what it is, how it is, and the way it is. You are not far wrong in understanding the operation of the soul. You do not need to be a KS to do, has been done for centuries, but understanding how to apply it for the benefit of the others, not just for myself. That's where the difference is.

Q: Yes I understand that. (interrupts) Because what I see is, when I see when I can give these amazing emotions to others, to help them I feel elevated, tremendously elevated.

K- Go to the front page of the KF, you read one thing, that says, belief in our work, we are here to serve and not to be served. There is always pleasure in serving, because you can give, you see the elevation in the others. Doesn't matter you are a waiter, you put a beautiful food in front of someone and you see they enjoy it. Could be a child you give love to, you see the way they thank you with their eyes without the word, or you serve a man on the street with pain of foot.

Q: .. This is amazing ..

K- The limitations are all understanding and nothing else. Maybe it comes out of being a Dutch you understand much easier. KF is a Stichting Dutch organization so we have that in common. (3:20).

Thank you. Anyway if you are a man in the space T in electronics, we need quite a few, as the T is developing, join us or talk to our team. We are looking for experts in the knowledge, we start recruiting and we need this, urgently, as we reach the next steps, even the electronic doesn't work much, but the knowledge how to do the others will help us a lot. Maybe we need electronics and the soul, and you fit perfect into the work of the KF space T.

Q: Okay I will write you a little letter

K- Write to info@kesehfoundation ...

What's the other question.

Q: Kay, .. the depths of enlightenment is becoming so far reaching for someone like us, or like me. But we keep at it. I have a question regarding 1 element you referred to which has access to our soul, which is in our brain, .. if that element was, if we had control of that element is it Fe or Phosphorus? (3:22).

K- I think you got to go back into the teaching I am sure Jalal can help you to find which teachings. Some KS ... thought it was Iodine, then we had other KS who thought it was something else. But the essence of the STM is a composite of the all the elements of the creation. Those who are know to man on this planet, and beyond.

We are universal creatures we cannot have only composition of the matter or gaseous state of this planet. Even in our amino acid (AA) are fields from the galaxy and the U, embedded in it. We just see the .. earthly elements in it, because that's all the extent of our knowledge.

In the future when man's knowledge extends, then we'll see other elements within the AA, which are the energy fields of the U, which allows this cell to be created at this point and position in the U. We are not individual cells in the body of the U, we are connected to all the cells in the U.

I am sure if I teach you something today, a lot of you will do stupid things with it, but one day when you become more maturity I'll teach you. You can observe and see energy fields, which are part of the AA of body the man, and without it, the AA cannot exist. These fields are not in essence, from planetary system. Some come from our SS, (3:24). which allows the manifestation, and some come from the galaxy and U. It's very easy to identify, but the knowledge has not been gathered enough for us, to open that door yet. Maybe in next 2 - 3 - 5 years I open this door.

We are not composite elements of AA, that our soul would only be composition of the AA combination of different salts or whatever, that creates the STM. We have other elements, which have lead to the creation of the SS, which dictate its position and strength, which at the same time interacts, and is part of our life, the same with the galaxy and the U. But as we extend our knowledge, we see then.

We are not earth AA. We are universal AA, because we bring other fields of the U with us, if we increase some of them, maybe we'll some of them as viruses, then we'll call them a new virus, but in a way it's universal energy connected to our creation.

Q: .. you are emphasizing if we know about that particular element and if we were to enhance that element ..

K- It's not an element, it's elements. It is, and fields, energy fields, which have not converted to the GM field of this planet to a matter state. But they are part of our DNA, part of our RNA, .. AA. When we become knowledgeable to the Knowledge of the U, we will see those elements. You'll say, oh its been with us, all of us, part of us, all the time. (3:26). Lack of the knowledge is the cause of the problem. Once we become knowledgeable, that we are a universal entity, not a planetary entity, because the planet is

connected to the U and galaxies, and the rest, and it's controlling on the bottom up, in a way, inner to out of the Pl. We'll see the position in time.

Q: .. you announced a week ago in 418 KSW, yourself 3 times as the Methi, the Messiah, and made clear, that everyone is his or her own Messiah, as well as we all are, by way of our soul directly connected to the Creator. But I did not see yet this, as breaking news. Do we have to wait until the 22nd of February, or how can we, the UC, Earth Council, Core Group, and we as KS be of service to the present religious leaders to proclaim this news to their followers?

K- We don't proclaim to be a news, we work through the soul, elevation of the souls. As I said very recently, in the past few days, out of nowhere I was requested to join, back onto the 5plus1, we left after the 15 of December, after we interfered with negotiations directly, which brought the new change. (3:28). That's they see it, has to be it as part of the negotiations.

This is what we call the influence of the soul of us, as people who are the creator of peace. In Methi, we are all Methi. Methi is not to be helping the others, is elevating the soul of ourselves, to become a source for the help to others. When we understand this, we are steps ahead. The governments and religious leaders when they become wise to it, they are elevated to understand the functions of their souls and their P, and they will see the message.

The job of us is to be that Carbon, which creates that connection, through the UC to be there, Earth Council or the Core Team. We have built a structure through the STM and not through the individual man. We are the gel, the only gel, that gels everything together. When we say we are Methi, it's very clear, because I know Yosef had this background in Iranian religious groups. If, that we are a Methi of our own soul. If I can be, .. gifted, .. honored to extend my gift to the whole of humanity as a soul, then I have served as a servant to Methi, which means for all of our souls to be elevated, to understand the beauty of the Creator, and end of all the rigmaroles man has carried through his time and position.

Does not need CNN, we have already reached the soul of the leaders, a long time ago. (3:30). Go back to Trani (Italy), Putin, we appointed people from the KF to work with Putin, and he sent the peace treaty to Duma (Russian Parliament), because we ?? Obama signed the peace treaty as an individual, he never signed it on behalf of his nation. Soon the American leaders will sign the peace treaty, as part of the nations committed to peace. I have a very good idea when it happens, because we are on the process of working that. In the negotiations in transfer of T of the space T, that we rapidly brought into it, the condition is the nations of 5plus1 have to sign themselves into the peace treaty. They have to, there is no choice. They have to commit their nations to peace. Maybe that's why we are called to go in now.

The negotiations with Iran .. we moved step forward, as we showed what the problem was before. Now it's the time of the knowledge to come. Released some 29 billion dollars of Iranian assets held by Trump. These assets are mainly private assets of the Iranian

leaders, was not for the nation. Trump froze the total assets of the Ayatollah K of Iran outside Iran, which runs into billions, and the others. They negotiated to free their assets, not the assets of the nation.

Now we are going into the phase of releasing the assets of the nation. In that process, (3:32). we go to the next step of sharing knowledge, T in exchange for peace amongst the 5plus1, and with it is the responsibility of giving.

We are giving the knowledge away, we are not bargaining, you give us, we give you. We are giving the knowledge in totality. We are showing the 5plus1 how to make 100% nuclear purified plutonium, uranium within seconds from very little. That the nuclear negotiations becomes a space negotiation, in the long run, in the background will take place. We have received a green light from the American administration.

How we implement it in the next few months, is how much we can cut into the greed of the Iranian leadership. Literally this is our biggest problem. Every proposal Iran put on the table was rejected from the beginning, till we showed the other way, and then, a new way has reached, and now we see 29 billion reduction in what we call, sanctions, which is totally private assets of the Iranian leaders who was blocked, and it was a few national companies.

Now we have to go into the next step, T in exchange for peace, and commitment of the world nations to use of the PI T for peace, in exchange for science. This is what president Biden has shouted from the beginning of his election, new T, need for bringing new T.

You cannot take KF new T into America, because it is Iranian, this is one of the biggest problems we have. But, when the KF is there to share with all, we all benefit by it. We'll see how it comes out. But in essence we are Methi by our action, (3:34). to create condition of peace, and we have the knowledge and T, and know-how, and now the place for it to do it.

So when we call, we are Methi, KF is collectively all of us who has brought it to this condition. I didn't walk in the desert on my own and claim something to the cats and dogs. We collectively as the soul of Methi have achieved this. By sharing knowledge, by spreading the word of peace, and giving from our soul, to create that elevation of the soul of humanity, that there is no war anymore. A few scimmages, which is only a few village people trying to earn some money. But you've seen it, they are pushing it, every effort to start a war, everybody fighting to not have anymore war, because you can't even do it.

You got to remember, as I explained to one of the American military people, when an American soldier shoots any soldier around the present time, would he stand to see him die, or once he shot him, he is there to help him to live. What happens if the soldier or the victim has Corona? Haven't they shared the truth of the life with each other. Would one give life for the other, but the same time gives his own life. There is no meaning to wars anymore. This is what, when we call ourselves Methi, is unifying the STM to reach that

point of break, of no war and working to create a condition of peace, a condition of, not plenty, but having when you need it, but not creating a position.

In the past few days we hear of massive problem in ?? Eritrea, (3:36). again what we saw in ?? Belfa, conditions coming in. Last time we lost quarter of million people with hunger. If we had a chance, and we were allowed by now to develop the T we have, within minutes of arriving we could create the domes, where the people don't need to eat, but they have enough to absorb the energy from the environment to survive.

All this losses of life, the pain comes from their. Why are we behind. Why are we kept away from media by the owner of the, a king who has got a pedophilia file bigger than the nation, with his son, with his citizens. We saw one of his citizens in KF, which has got more record of pedophilia than any family in the world, which was not disclosed to KF. Now we know we have.

So what was the purpose of this delay in sharing knowledge, that today with the knowledge we have, the KS from China could fly into Africa and deliver the T, with peanuts, and save thousands of people from hunger, people on literally dying from lack of food. We have so much T with the Gans T, we can just spray, we can just provide water with all the energy in it. A drop or 2 drops a day give enough for a man not to die. I always said, we just happen to have a Dutch gentleman with us. The beauty of the KF and the beauty we have is, because we are a Dutch structure. Freedom to be able to share. (3:38). Mentality of the nation allowed the KF to be where it is. We thank the Dutch citizens and the government. They could have blocked us years ago, but they allowed us to move, .. to grow, and we see the beauty of what we can share.

So when you say we are Methi, as a soul, we as KS we are there to serve and that's the purpose of it. We are a collective soul, and not individual soul. When you serve you become Methi. When you create a condition of delivering the knowledge that the others can survive, it does not matter the time place, anywhere in the U.

Any other question.

Q: Thomas, .. regarding the present situation of the Covid, we ...

K- Do not take me there please, because we don't want our teachings to be banned. Don't take us into Covid, because we already know where we are, we see breaking up. Now most of the European nations have removed the lockdown, and everything else. In Austria we are free on Saturday to go out and shopping. (3:40). I think gradually the whole world is coming to its senses, but we learned a lot.

Q: I don't want to bring you there, but I hope we can at a later date to talk about it because there are enormous question marks , ...

K- We have to wait until this thing goes away, as now we can talk about it afterwards. At the moment ... the restriction put by governments in different shapes or forms, has introduced to a new kind of energy, called a virus, and it forces us to look at the viruses in a new way. KF for past 10 years has put a new understanding to viruses, what they are and how they operate, because we have to handle it in the space. Sooner or later I am sure

scientists will come up with different names and ways, but collectively we'll come to it, that forces us to understand about the operation of energy packs, what we call viruses.

It's no use fighting one track government sets, that you have to do it. We see they tell you, you have to have all the vaccinations, 1st, 2nd, 3rd, 4th, but you still have to the tests, because all the people who are vaccinated are infected, so what's the purpose of vaccination? You understand? (3:42).

We had it with the Canadian PM, with the Austrian Chancellor, we had it with other world leaders. Austrian Chancellor had 4 injections and the booster, and he ended up getting the Corona. So what's the purpose of it. This is something in the near future, when all the bribery and everything with it is sorted, whatever, then as a race we look at it, and what we learned from it and what it will bring us.

We keep away from this discussion clearly, because I know they are sitting and watching us too, then come out and .. The KF has released a Covid 2020 June ?? (report) to western governments, they have it, we know they are in possession of it. We know we are not the only organization in possession of the knowledge. If you understand the work of the plants ?? and how plants can be used in the right way as a Gans, you'll find a solution. It's not magic, it's just at the moment we are putting our things in the hand of people who want bigger bank accounts.

Q: It's not about me personally ... when we can go into details of the Covid injections

...

K- .. You see we use injections for different viruses, we vaccinate our children from the first second month of their birth .. right across western Europe. And most of them work. We have stopped a lot of problems, (3:44). future problems for our children and our generations.

But we have to understand more, and that's a problem. We have stopped, we drew a line, we don't want to go anymore further, but we have to extend our knowledge to understand more, then we don't have the problems of today, and we can't be abused. But today with the political solution we have to .. carry on teaching and using the T, and in the future combination of the KF scientist and other scientists around the world, in different form or shape we'll find new solutions to viruses. We are not, it would be arrogant of us to say, we have found the solution, we are the only one. We are part of the collective knowledge, and I am sure with other scientists, we'll find a better way to handle the viruses as energies, and maybe in the coming time we'll learn more about things around the world then at the moment. But politically we have to stay out of it till, I have got the KF in enough political hot water, this is the last one I want to get you into, you'll burn this time. So I have been burned enough.

Q: .. the virus is not the topic, it's the people ..

K- What we accept is the topic. To what extent we allow people to tell us what the ?? .. Thank you .. (3:46).

I hope I opened a new channel as I promised you, past few weeks, we start teaching a new way, a new side of the T, which was not disclosed. For KS I hope not now to put the

MaGrav sideways and put the universal systems in here and there. Understand the T, don't copy the T, because then we have not added anything, and understand how to evolve it. How to change things, to mature it, and share it, in a way none of us will lose. The only way we lose is when we don't share the knowledge freely with each other.

R: ... please the information of private teachings ...

K- We will announce, we are waiting for decisions of establishment of KFSSI. Bring your researches to KF.

In next two weeks we'll go into this ..

(3:48). .. physical research centers ..

We will create a condition of open space research centers. ...

It's not research like in present universities where everyone closes door and no one knows what you research ..

.. we won't become billionaires with it anymore. The ethos of the KF open door ..

..

(3:50).

(3:52).

.. some of you will be paid by the KF .. but have to take it back to your nations to share it ..
