

428th Knowledge Seekers Workshop; April 14, 2022

(Quick index 13p; Proofed whole; Transcription ; Key Phrase, Words)

Topic Index

Easter - Crucifixion - Resurrection is transmutation; Personal stories age 12 leaves body travels U; Detachment; Practice like marathon runner to know STM; Getting ready for change ; We have to tap into STC; Suddenly you understand KOC; Vatican retires priests at 65 doesn't pay till 70; Learning to listen to STM; UK instigating wars change government; Ukraine opportunity for T to come out; Christ taught how to transmute Last Supper; loved 2 women; Born again Christians made up - soul is same; MaGravs not matter state ; FEU given in central location KS come in to do research; 6th June; Europe drops 15% below China; Reptilian; Sumerians past civilizations had parts of plasma T, couldn't take forward; South America - couldn't make water - abandoned cities; Teaching on neutrons

About number of neutrons in element - source of energy ??

Quick Index

Direct translation on Telegram; April 14 day of Mozhan; Number 270 KSW started teaching about soul; Process of teaching like marathon runner - train gradually; By teaching you perfect your own knowledge;

Personal stories of Mr. Keshe; Leave body travel U at age 12; Go outside physicality (P) can see own P - perfected the art of leaving body; Explored depths of U; Understanding M field movements of U; What I teach you is not theoretical - it's what I have been through; Requires Detachment; Decision made by the souls I just read script; I don't live a hermit life - that was how it was understood in past; It's same as Book 1, 2, 3; Teach in D of soul - no one to fool you - no one to translate knowledge and change it; To live by the soul you have to go through training like a marathon runner does - the hardships and sacrifices;

Understand the true meaning of Easter - crucifixion of Christ; Convert physicality to Soul, to the light - then return from the soul back to a new physicality; Same as going from Book 1 to Book 3; Christ came down off cross with new physicality (means Mary Magdalene could not recognize Jesus at the tomb because he manifested a different body), and traveled to Northern Spain and France; Crucifixion taught as a mysticism by religions - now we teach as a science everyone can do; Have the Pope and priests lied to us because they never understood about transmutation; We resurrect ourselves using the Enhancement Units (EU) until we learn it ourselves; If KS would have understood the soul teachings which started at 270 KSW they could have done what Christ did; We travel to moon and live the life of a man from moon - however they manifest themselves; Resurrection in Islam became the return of Methi - the soul of Mohammad;

The completion of the knowledge for man is when he understands transmutation of elements - but in the new understanding it's the transmutation of the M fields - that in their motion they become energy and from the energy they can become anything;

The totality of the teaching comes to one point. We all come from the same sun, like mirrors we reflect the beauty of that sun, but we do not become the sun. We are part of it because we are made out - but we never become it, we never become the totality of it;

Today's teaching is about understanding the truth about resurrection - what we celebrate as Easter and finish with the dogma of lighting a candle in the church at a certain time. We are not looking to become magicians, but to understand the process of the creation and become citizens of the U. You transmute your physicality into the strength of the STM, then travel across the U, and whether you land on planet Zeus, or somewhere else, you resurrect yourself back into the dimension (D) of physicality at place;

We already do this when we dream, but we have denied it, because we couldn't understand it. We dream we are in the presence of our mother, or friends, or someone we never met before. We allow the soul, which is in the D of the STM to travel, and it goes to parties, gets into accidents, and all sees all kinds of things.

You manifest yourself there (in the dream) in a D of physicality. How come you call it a dream, when it's a reality of life. We do the transmutation, we understand the process, but we never accepted, that we have the capability to do it.

I want really bad to see my brother for example. So I make the connection and open the "cage", the soul flies to my brother, where I sit down with him and have a cup of coffee and a chat. The next day you call him and ask if he had the feeling you were with him yesterday. He says, yes and you learned something.

It's about understanding the elevation of the soul and how to bring the energies, the fields of the universe to become connected to the STM. This is what we do in flight Enhancement Units (FEU).). In some cases it will happen that you go into the FEU, travel through your soul, but the unit never moves. But still you do the trip through your soul. You allow the elevation, the transmutation, to occur. There is a reduction in the fields of what we call, the spirit, or the STP, which allows the STM to be free to take any D;

If you can target the strength and devotion of the Christ, you can meet with him. Because now, the cage of physicality is not buried somewhere. The freedom of the soul, is free to be in touch with, and to be part of, as part of the universal life. (What did he mean? That the Christ's body is not buried somewhere and is free to be part of the Universal Community).

Over the past few months I have been doing a lot of hackling to get everything sorted, that we raise enough capital and create the conditions, that every man in every part of the world has the opportunity to be free. I'm here to serve. I will beg and borrow and do

whatever needs to be done for the freedom of the man. Because man is physical (and this is the way he) needs it to be done. Otherwise we could produce tons of gold. It's a test for the man to understand the process. It's a test for the soul. We test the man with gold, that his soul learns to be detached from it, then he can become a creature of the U.

Many of you who get tested come to the point where you discover - "oh, that's what he meant, now it is clear to me." Now you understand what needs to be done.

I understand this, because as a nuclear physicist, we have to understand how to change energy to matter state. The secret was there in the hidden fields inside the atom, within the electron. Because you can become anything, you can become any number, as long as you stay in the state of plasma (PI). Then you decide to become gold, or a cell in the body of the man, or to become wood.

When you understand the process of how the emotions work, then you can go from the emotion of P to the emotion of the soul. They are directly connected to each other, and you learn how to transmute between the two. You learn how one can benefit the other, how to be part of the totality, and that you are there to serve;

In the past 6 months, KF has gone through a huge burden and taken a huge step (forward). We tested and took to the limit those who are loyal to the name of their soul. We did this so that what we are working for can be achieved for the whole human race. Step by step, we bring the totality of the knowledge to the man to understand, to elevate, and to change. Because when we change one, the others need to change also. But we have to have the resources, that it can be done, and that we are strong enough to bring the change.

I carry the Soul of the Creator (STC), and it's strong enough to do. But you have to be able to tap into my soul, to receive it, to elevate, to understand, and become the passengers of the Universe, the (same) way we are (in the Universe).

Then we all reach the state (together), so that we understand the strength of the love of the Creator and no more. This love is the condition of giving. We don't ask you to go and burn candles, or do whatever, (like the religions). Instead we ask you to understand the knowledge of the creation, as much as what we can teach you, to develop the new T in the coming times.

We are the Messengers. We are those who bring the message of science and ethics together. And in that process as universal Messengers. We understand the totality from A to Z, as we are part of the Soul of the Creator, we understand our position, as we are also part of the STP of the man, so we understand that position too.

Instead of bringing the knowledge in pieces, we can go directly to the Knowledge of Creation for both man and the rest of the Universal Community. We can transmute. We do not need to go through all the different systems man has been going through for billions of years.

We have brought a unification to the science of the creation and the Creator. What was the knowledge of the Creator, now has become the knowledge of Universal Community. (Does this mean that the Knowledge of the Creator has now been given to the whole of the U, whereas as before it was not? Each individual was left to discover it as much as he could muster up his devotion to the Creator).

Each village, satellite, or planet, (throughout the U) has developed their own knowledge of existence, and they live by it. Some have understood and jumped further then others, and some got stuck in the matter state with UFOs.

It comes to the point how much and how badly do you want to learn how to transmute your soul. How much are you willing to sacrifice to learn? How much are you willing to give to the others, that it allows them to reach elevation? How much are you willing to let go of, that the freedom of the Soul of Humanity becomes more important you're your own individuality and what you want for yourself?

It goes back to Abraham in the Old Testament, where God asked him to sacrifice his only son. A son for understanding the beauty of the Creator.

I sacrificed a son, and I don't expect much.

Those who have shackled the man to this planet in the name of religion, These shackles had to be broken, to be opened up so that the man can be free. Sacrificing a son is worth more than this, to free the man, because I know one day my son will be with me. But that will be at the right time, not the time I choose.

We come here to understand the pitfalls of the man by experiencing the pain, crucifixion, martyrdom, and whatever. Then we understand to find a solution for it. Till we don't understand it, by feeling the emotion of it, we cannot find a solution for man to be free from the shackles of abuse. It's for you to achieve it and find elevation. It's not for us.

You shall not find temples and churches at the KF. Instead, you'll find Institutes that teach and elevate, and gradually you'll learn more and more. One day, you'll pick a Cup made from KF T, you drink from it, and suddenly it triggers you to understand the process of creation. That's why we keep on developing and doing everything else in the KF, elevating the STM, and putting back, what this planet did not provide at a point of inception.

Through (the earth's) M and G fields, and through its Inertia, there is a misconduct of the work of the fields, and this has made the man to kill and destroy. It's not as simple as just telling you what you have to do, you, yourself have to learn it. If you believe in it, in such a way, then you'll do anything and everything to get to it. When you see the change it brings to you, then you'll bring it to the others. And without knowing it, just by drinking the waters, you elevate both the STP and STM. Then somewhere down the line, out of nowhere, you come to the point of understanding the enrichment, transmutation, and the

creation and the Creator. It can happen anywhere on this planet, in the deserts of Africa, or the most luxurious buildings in New York, but you need to start in yourself.

Gives an example in Ghana when the people found out about the power of the plasma water to process diseases like diabetes, then came running in droves. They even came inside the nuclear facility, the guards who were also suffering let them in, which is unheard of, allowing civilians to walk close to a nuclear reactor. (You see, when the people find out it is here, they will do anything to get it).

The learned Iranian clergy believe that the coming of the Methi is the time of the maturity of the man to understand the process of transmutation, and not the manifestation of a man, or an object. This will be the day of the judgment for their own souls, and nothing else. Then they'll put their turbines down, and bow to the knowledge of the Creator, not to the Keshe Foundation, not to Keshe, and not to any other, but to their own soul;

We do everything we can for you to come to the next step in the process. KS worldwide are spraying at noon every Sunday to bring the synchronicity of the fields for the planet, to bring the elevation of all the souls, and this is part of the process.

We can't just sit down and die, we have to do everything we can to bring this about. We make the EC and everything else. In reality, there is no age limit when you have to stop working. Retirement at age 65 is a joke. This is when most of the man's maturity of knowledge has come, and society puts you on the bed of death. There should be no age limit when the man has to stop contributing to the extension of the physical life, or the soul.

The Vatican does the same, it retires priests at age of 65, but they don't start paying the pittance of their pension, until age 70, that leaves them 5 years with nothing. they abuse their souls, to abuse the others, and than in addition abuse their physicality. At 65 they are put on the street, because they did not abuse enough souls. We know because some priests to KF begging for financial support.

Maybe today, during this Easter you give from your soul, for the clergy and religious people of the world, that they become aware of the D of their own existence, that they don't need to wait for somebody to call themselves Messiah, or Methi, or whatever. That they come to understand, the strength of their own soul, that they become the Messiah of their own soul.

We are just Messengers, we spend time, give our message, and make sure the guidelines are observed. Since the man wants to see that the physical life finishes, so we manifest death in your eyes. But the Soul, the same soul carries from Moses, to Christ, to Mohammad, to the others, and to you, and to wherever it goes to the next step.

It's from the same knowledge, that feeds the soul, it also feeds the man. It's the same science and the same message. All of you have to understand it and bring the change in.

We'll bring that change into process this year. We are without a shadow of a doubt. Then it's how much we can change the situation.

Keshe Foundation has directly approached the Israeli authorities to start peace negotiation with Iran - because we are taking the knowledge of the Spaceship into Tehran - Iranian forces can land in the center of the Tell Aviv without them knowing. So we are giving the knowledge to both sides;

In the background we elevate the souls of our enemies, even without them knowing, that they become those who work to develop and bring the knowledge to the others;

I can (easily) wipe out the state of Belgium in one stroke, with the power and knowledge I have. But do we need to do that? As they are another part of the human race, they also have to be elevated to understand. Otherwise, we could just demolish them, but it's the love and care we have for them, no matter what they do; We don't bash the problem children in the head, like some around the world do to their children. Instead, we give love and care, because that is what our teaching is about. This way we bring man to the point, that he understands what not to do. Gradually, the child comes to understand, that he is damaging himself and nobody else;

We've done everything we can to teach you, now it's your responsibility to understand. We carry on teaching in different ways until we get through and you find your freedom.

I don't live like a hermit, but I am a hermit, one that gives love and knowledge to humanity, to elevate itself to understand the creation and the Creator. I have been that hermit for thousands of years on this planet, my mission is over, because now we have managed to bring the man to see and understand for himself. Some might understand today, or next week, or next year, and some in a thousand years.

We have started the process, and in time through the knowledge of the STP we'll finish the job for the human race, that you'll become messengers of the universe for the others.

I hope those of you who are believers in the resurrection of Christ, understand that you have the same capability, as the soul of Christ did. You can resurrect yourself and move in both dimensions. It's you, who brings you to that point and not a MaGrav, or a donation, or burning a candle in a church, waiting for somebody to appear in whatever name, to do the job for you. Maybe it's the time for you to contemplate and create that change in yourself;

Break

Q: From 425 KSW about the emotions of STP and STM, and how the heart translates the emotions of the STM. A we have both souls they have to decide together. How do we discern if the emotion from the STM is pure, and affirms the truth, or if it is from the STP, which may still have errors and confusion, because of existence on this planet? How to perceive this difference?

K- By experience. Man up to now, has always listened to the emotion of physicality, 99% of the time. Because he is physical, he can understand it and respond to it.

But every now and then, an emotional (connection) from the STM comes to us, but then we say, "it was by accident." Something happened that we cannot explain, because it wasn't part of the emotion of the physicality. Whenever you say, "Oh, this happened coincidentally," or you, it just a fluke. Go back and see if you had asked that question from your soul. Then you'll start opening up to understanding which one, is which. Would all become the same?

This is the only way you can (train yourself. Every time you say, "oh this just happened by accident," go back and analyze it and see if there is a connection to the soul. This way you develop it and become more and more reliant on the soul.

There are no accidents, you're put in that position by your soul, and by the conduct of the fields of your life. Then you go to the next step, to be able to understand more the process of the creation.

Why do you sneeze, what is the process? We talked about this very recently. Where does the energy go, from the nose directly to where, where does it pass and what faster reaction you can get. Some in theology understood this, but the doctors explain it through how the nerves work.

How come suddenly you stop and say, "no I won't do that"? Something stops you from doing something. How come out of nowhere, you start doing something, which is opposite to what you've done all your life? Because the soul has taken over the decision, that there is something for you to see (to learn).

It's for you have to develop and understand it, then you learn which one is from the emotion of the physicality, and which ones from the emotion of the Soul. Gradually, you leave everything to the dimension of the soul. You go on testing and testing, then you learn.

Recently it happened that a UC member became aware of what KF was doing in the background through the soul. The soul is aware of the function of the UC, as a soul, and has accepted the responsibility for its language and its nation.

You build trust in your soul and then you learn to live by it, (no matter how it looks or what others may say. You come to the point where you know when your soul is guiding you).

An example of this, is what KF went through in the past 6 months, the harshness. At the right time it will complete itself. It was a beautiful time for the KF, even though people got tested along the way. But only one or two people close to me know about it. We've done everything to bring the change. It's all by trusting in the soul, and trusting that what we do is for the betterment of humanity, and not for us personally. My job is to

support, to be the instigator, to be the initiator, and to be the developer of the right conditions to bring the change in, at this moment in time.

The Israelis are on the throat of the Iranians. And to the Iranian clergy Israel is their biggest enemy. But when we elevate their souls, they will eat on the same table very soon.

When it doesn't happen, it means it's not the time for it yet. So there's no restless in your life. Mankind is not ready for it. But we know he's getting ready for it, he's just coming to the last leg of it.

A lot of KS are standing fast, they are suffering with it, but they are aware, they know it's just about to come, be it in China, US, Mexico, Brazil, Austria, or Iran. We know when it comes, it will bring the change.

So many opportunities for the new technology have been created by the war in Ukraine. You're not aware of it, because you just listen to the propaganda that comes from the western media. If you watch the way we do, many opportunities in different directions has risen by Ukraine position. I look at it as a positive step, but I also know some people are suffering from it.

(It's a battle between religions, that will end religions. There are a lot of hidden things being done, and then the side that is hidden is blaming the other side for it). And it's not going to stop. The change in administration in the United Kingdom is necessary for world peace, because the ?? privy Council, and the British government as a kingdom of Britain, is the instigator of many wars. The change has to come from inside, and that process has started. This will bring the end of kingship, or one person being higher than another. It's the time of cleaning up, (and exposing those who are working secretly in the background to create wars). We trust it to the soul, which always is there and it cannot make a mistake. If we don't clean it up now in Ukraine it will get worse later on.

I pray for the soul of the leaders of Vatican, that they come to their senses. And the same with the Church in Moscow. This praying will elevate their souls, that they will announce the end of Christianity. It all had to happen it's the time of the maturity of the man.

We don't want them to just change their names to new process, but than continue carrying on with the abuse. We want them to close the Church doors, so that nobody goes in to be abused anymore, and to leave the mess they have created over centuries, behind those closed doors.

This was seen in the Church of England when it was returned back to Vatican. When they sold off the Churches, the buyers were prevented from demolishing the buildings. The Church brought in their own people, so all the bodies of the children buried underneath the churches would not be discovered by the public. This time it was the shame of the Protestants. They managed to keep it off the records, but it is still there.

(When you need to make a judgment about something, and you listen to the STM or the STP, still you need to understand the bigger picture. You don't just take from someone, you need to ask and have their consent). If the consent is given, then you have done no wrong. Even though it might not be to the benefit of the others, (where they may consider themselves the losers in this situation. Nevertheless it is part of a bigger development, that we may not fully see and understand).

We have not understood, that the STP is to protect you in the physical dimension, while the STM protects you in a dimension of the universe.

Resurrection continued ..

The sooner mankind understands this he will be free, and will understand how to position one in respect to the other. He will become mature to the process of transmutation, or what you call, resurrection.

Christ could have walked away from the cross, but he knew he had the power to do what he wanted to do. So he let them do to him, what they wanted.

I went up the cross with the Christ, I know exactly what happened. I know how the transmutation took place. The body never went missing. Christ went through the dimension of the STP and the STM. Because he knew how to do it, because he was taught.

He was taught knowledge (of transmutation) just prior to the Last Supper. The knowledge was not given to him until the last minute, because he was a very joyful chap, and he always thought he would get away with it. The knowledge of how to do the resurrection was given to him and he was told that he could use it.

The real meaning of the last Supper was the last time he ate as a prophet, not the last time he ate with his people. You always give something a definition so that it has a meaning for you. (He went up the cross as a prophet, but when he came down from the cross he was just a man, and manifested a new body). Then he went on his own path.

Now maybe for the first time you understand what the Last Supper means in the dimension of Christianity. Nothing more, nothing less. The rest of it, is what you like to talk about. It was the last time he ate as a prophet of God. He was fully aware of what he was walking into (meaning the crucifixion). He bargained for it, because he loved two women. It was given to him, for the love he had.

He accepted it, because he knew the dimension of what he'd done, was beyond the dimension of acceptance, by his soul. He didn't go through the path, which Moses went, by starting all kinds of wars and killing. He decided he'd done enough, he brought the change he wanted, and it was time for him to live. He transmuted from one (body) to the another body. He listened to his Soul, and the STP, and he went through the transmutation, or what you call resurrection.

Q: I assume that "born again" Christians have had an experience of their own souls, but many attribute it to another soul, such as the Christ, or Krishna, and others. What are your thoughts on these experiences?

K- I never understood what a reborn Christians is. Who came up with this terminology? Because then you can have reborn Jews, Muslims, or any religion. As we know, people say what they want to say. But what does it actually mean? Not the physical process but the soul process, because the soul doesn't get reborn, it's always the same soul.

Somebody has an accident or experience and realizes that he could have died, and then realizes that he has not loved his wife or his family. He goes home and becomes the best husband or father. Then they say, he has been reborn. Was he really reborn, or did he need that experience to realize what he had done wrong? Then you put whatever name you want on it.

These things never had any meaning to me. It's us who have chosen to put whatever names we want on it. Why does it only happen to Christians? Or is it a very good way for the church to get more money, because now you have to go and pay again. It's a business world when it comes to these things, but it has no meaning. I don't understand it. You got out of an accident and now you're going to be a good father, because you might not be there tomorrow, it's fear of fear.

Q: Long question about physically connecting MaGravs with humans to make a Star Formation?

K- .. He hasn't understood the purpose of MaGravs. It's half energy and half matter, and because of not understanding, you are looking for an answer from us.

Do you need a wire to connect MaGravs? Do you need wire to connect magnets on a table? Do you understand the true purpose of the MaGrav system, then I think you'll get your answer.

MaGravs are not matter state connection, they are field state connection. There is no matter state condition to them, and this is the beauty of it. There's a difference between matter state fields, and a plasma state field. We have converted with the MaGravs, the matter state field into the plasma state field. None of the KS understand this no matter how much we push it.

When you have a Nano coated material you have moved into the cosmic direction fields, and a matter together. When you go into the Gans state, you're in a totally plasmatic condition, in universal condition, but on the influence of the Inertia of the fields of the planetary system. KS have not understood this, especially creation of the Gans's.

Those from universities and KS will open up the scientific world to the plasma in a massive way. People find it easier to accept published papers from universities and PhDs, rather than trusting their own intelligence, and understanding.

KF will find a central location for many EU to be setup for testing. Then KS and people from universities can come in and do tests on the machines. Similar to what they do in CERN. When they start showing results then their universities and governments can get a unit. This way KS have to collaborate and share the knowledge, not keep it for single researchers.

Test flights for 6th of June with the FEU is still on.

Will the 6th of June flight be visible for people to see? You have to wait and see.

FEU seats are getting manufactured, need to be non-metallic.

FEU for June 6th it has no control system. We finalized the control system between the soul, and the system, and the craft. We might succeed, we might not succeed, but the whole thing is getting up to that position.

Belgians creating many problems with the Central Bank, working 6 months to correct. You can't imagine how much mayhem they have created for KF. They threatened to take control of the KF. Keshe Foundation is owned by you, as public. I am just a servant. I just provide the services, that it becomes an industry. But the amount of damage has been created by them, especially the Belgians, the ones will be kicked out, is enormous.

They have corrected the things with Central Bank of Europe, had to read through hundreds of pages of submitted reports. If you don't comply they lock down your company. But the beauty with it is, that now we have the banks behind us, we have governments behind us and now you will see the changes.

European economy dripped 15% compared to Chinese currency.

It all depends on how we push these things through over the next week or two, and then we bring it out (the T).

Pilots will be chosen by their soul, just like the UC, no advertising, their soul decides to serve humanity.

In Brazil they published this on Facebook, "Mr. Keshe is a Reptilian. And I know it, because I speak to his wife, and she told me he's a reptilian. His ex-wife, and we are getting all the information that, Mr. Keshe changes, and his eyes changes, and he becomes reptilian." We thank the group of KS of Brazil and the hard work you're doing, but I promise you, that if I am a Reptilian, I would have shown myself by now.

Q: Did the past civilizations like the Sumerians have advanced technology, as what you are bringing to us today?

Partially they understood the work of the fields of the universe, even though they didn't have magnets. Some tribes understood the work of the plasma. Some through contact with the patterns of the universe, learned some things, but they didn't have the intelligence, so they copied part of it.

It's not that the race of the man never touched, the understanding of the field motions of plasma. But they went on a material side, and could not take it further. Or for a limited time, they used it. And then when it became opposite to the interests of the rulers, they was silenced, or were taken off, and they were taken out of the equation.

We see part of these technologies in a sporadic way across a different parts of the planet. Some learned by the man himself, some was given to man, but man never understood it, but they copied it.

The knowledge we give in the KF covers the totality of the knowledge of the creation, it's a total package, you'll understand every part of it, what to do.

When the man sits alone (in the silence), he thinks and becomes wise, and starts to understand the work of the cosmos. We see a lot of development by the Egyptians. They became very religious and gained insight into the work of their body and the Universe. We see a huge amount of understanding in the Iranian culture, in the scientific world of the past times, the Sufis and the rest. We see the same in China

In South America, they understood Nano materials of burning wood to get ash, and changed barren lands into fertile lands. But they didn't understand how to make water, so they ended up abandoning there cities.

Big discussion on European Union how it is united and peaceful when not influenced by America or UK.

Teaching on Neutrons

Q: Question about the field strength reduction when going from matter to plasma state, for example Cu goes from 63 to 59, an 8% reduction, and FE reduces 25% in plasma state. Is there a relation with the number of neutrons that are free in the nucleus, from the difference in the atomic number? Does it lock in the fuel? Some elements have many more neutrons available in the nucleus. Is there any correlation with this availability of neutrons? For instance, silver has 107. What would be the field strength reduction when we Nano coat silver?

K - ... It's a beautiful question. There is no reduction.

There are two points to understand, that goes back to the fundamental understanding of the creation of the original plasma. On earth the amount of the energy in the plasma, or in the plasmatic condition, is created in the upper atmosphere. How much of the plasma of one element, that stays active, and how much remains inactive, will be dictated by its interaction with the earth's Inertia field strength, which happens in the upper atmosphere. Inactive means linking up, that they do not participate in the total energy (of the) plasma. "Or that's in the matter of state."

But in Gans state we look at how the fields are shared with the others. There is a minimum amount of energy that is needed. Like in an isotope of an element. In Gans

production and conversion, the energy field effect from the matter state to a Gans, will result sometimes in a 30%, reduction field strength, but it's still the same material.

Try to understand the field interactions. (Isotopes in the matter state have neutrons, and electrons), or you can have an increasing number of the neutrons in the seed (nucleus). This shows that there is something absorbing energy from the environment, or releasing energy to the environment. (A release of energy) does not allow the holding on to the field energy of neutrons to create the nucleus.

In the present knowledge, neutrons are in a state of balanced fields. Neutrons are also connectors of the fields. When you don't have an extra neutron, it means the protons are strong enough to hold on to each other, so you don't need the neutrons to be the balancer. We see this process in some of the isotopes, they decay faster, because the ultimate goal is to bring stability.

>>>

need to edit .>>

In the nuclear industry in the matter of state, we talk about neutrons. In the new plasma nuclear technology, we speak about the energies, and those energies don't convert into isotopes without the presence of Inertia. In a way, a reference point. When you get a composite material, like in a bar, you have a 56 - 54 - 58 Fe, whatever 60, is because the Inertia at a point where, I was created, had the composite plasma, in its presence, and we converted it into matter state. It's not that there was a shortage of energy.

(This answer opens up a lot about the neutrons ,, need to work more with it)

(:20).

K-

Good morning. As usual, wherever, and whenever you listen to this series of Knowledge Seekers, series of Keshe Foundation from KFSSI. We welcome, you back. And we try to, as usual share knowledge, understand why and to try to develop more understanding of the science of the universe, than the science that the man has. We have perfected more or less than knowledge of the matter of state, and now we have entered a nursery of understanding the knowledge of the creation and the universe.

Before we start teaching, there's a number of things has to be said. As of today, if you're especially, Portuguese, you have a direct translation on the Telegram in the background, and from next week, we'll have the other languages, (:22). if you are appointed by your organizations or by groups, the language to be there. You have to get in touch with the Keshe Foundation, and this becomes more automatic. Rick can explain that in more detail.

This gives us a new facilities that you get simultaneous translation, directly on the teaching, and gets recorded, and then you can add it, to it, or they can transcribe to it. We try to expand this, as the organization like telegram make these facilities available for us, to be able to use, to be able to reach more people in an easier way, and simultaneously.

On the other hand, today is the 14th of April, the day of Mozhan. And coincidentally happens to be on a Thursday. We celebrate this day, as the day of Mozhan, and it's part of the important part of the Keshe Foundation program in this space technology.

We have extended the knowledge and understanding in a vast way over years. If you listen to this intro this morning, and just look at the first title, the first images, it says Knowledge Seekers, number 270, multiplied by two, that's 400 and whatever, 540. So we're in 440 and something. It goes back 200, more than four years ago. We started teaching, bringing the knowledge of the soul, the existence of the soul, and how we are, how we can work with it. And we have developed it step by step over years.

This is part of the separation, (:24). between the past and the future for mankind, stay the citizens of this planet, or become members of Universal Community, by UFOs, or by understanding, the what they call, the hidden energies, the hidden source, within the man to achieve this.

Many people go back into understanding more and more, through the process of interaction. It's like becoming a marathon runner. You're not born a marathon runner, you understand what can bring you, and what you want to achieve? Then you train for it. One kilometer for a few weeks, for a few months, then two, then three. Then one day the training in the process of development, of developing the right muscles, the right breathing technique, the right whatever, with the right coach to train you how to consume

energy, and release energy in different part of the race. You do your first marathon, and then you get that, what I call immense joy, that you achieve did, what was to be the man, to you important.

It could be anything, not just a marathon. Achieving, you want, you have worked for to achieve, be it the head of a company, you worked with 20 to 30 years to get to that point. Being, owning your own business, you develop the position, that you know everything, that when you achieve that point, you know how to manage.

Mr. Keshe able to leave body age 12 travel U (25:57 to 30:00)

The understanding of the work of the Soul of the Man (STM) is the same. (:26). It doesn't come just by teaching, you have to understand how to, the way it needs to be done, the way you have the understanding of doing it. Then be able to be humble enough, when you understood, is the achievement you made. Then you teach others and you perfect the process yourself.

How I can go out of my dimension (D) of the physicality, where I still can see the physicality. I'm aware of it, but I am free. I could do this at the age of 10, 11, 12 years old. By age of 12 or 13, I perfected the art, I can leave. I could see the physicality on the bed, I could see my physicality sitting on the chair. But it was there, I'm going for a trip, I'm going to come back. Exploring the depth of the Universe (U), trying to understand the position of the galaxies, trying to understand the movement of the fields, trying to see the hidden part which is not visual. This became an occupation, this became part of the life to understand the process.

What I teach you is not theoretical, is what I have been through. And I know a number of Knowledge Seekers (KS) who have achieved it, but they cannot take it further. When you are detached, when you sit above and you see your physicality. And you can do it day in day out. You can do it daytime, and you can do at nighttime. Just to see, to perfect, whatever happened this time. "Oh, one day, I nearly fell down through the, back into the physicality," where I didn't want to go, (:28). because I wanted to go somewhere else.

This is not theoretical teaching. This is understanding there's another tool. I used to wake up in the morning, and my father says, you got to go to school. How can I tell my father that, I already know, why am I going to school for. I got into the car and I went to the school. He dropped me off. I learned the knowledge of the man. Through the dimension of the souls, and what to be, I knew at the age of 12 or 13, I need to do, to be, what I was brought to me, for the knowledge of energy fields, nuclear. And if you meet anybody who knew me at that age, I always said, I want to become a nuclear physicist, because I knew, that's the way to break through.

They used to laugh, at the young boy, now it's finished, and I made it, I became, because my soul set me up that way, and when I look at the progress. The decision was made by the souls, I just followed, I just read the script.

We all have that capability. It's just understanding the detachment. Understanding, I, detachment is not, that I'm going to live like a hermit to be detached. No, detachment, the way it's done before, you go into exile, living on a stone for weeks, and going through hunger is over. That was the way people could understand. You can live the most luxurious life, you can be the most educated man, you can be the professor's, you can be the doorman. Understanding the work of the soul does not carry human paper certificate, and job description. It's you who has to educate. (:30).

And I always said, I never lived a poverty life. I don't live a poverty life. I live according to what it suits for me to be in the society, where we can influence. You cannot go to be the head of Keshe Foundation, where the old banger (beat up old car), with the jeans and torn trousers, and try to tell the professor's, they just laugh, they become a lunatic in that. When you go dress as they are, more educated than they are, this is when they listen to you. This is the fear of what I call, educated, especially in the scientific world, because now they understand have no education compared to what you carry as a knowledge, in Gans's, in evolution of the science of the fields.

And how we can extend it, and how we can bring this to what we call, to the front. You let the others do what they want to, but if you're part, if your core, what I call, ambition and target is, to achieve that point, then you can travel with the dimension of the aircraft's, to get you the dimension of spaceship, or the soul, it's you who makes that decision. That decision made by you, will frame you to the life of physicality, in that position, until you are, till you become, till you are aware of the work of the fields of the universe.

I am told many times Mr. Keshe, you do this, and you do that. But I don't do. Whatever I have taught, (:32). I have done. Whatever has happened, is the way it was set to learn. As I said many times, we come to earth to learn the ways of the life of physicality, that we do not fall when we go to another dimension with the soul, in the dimension of physicality. We know what the fire does, we know how to transfer materials. So you cannot live in the dimension of soul, and say that's it. You have to understand what's the other end of the equation. If the soul energy goes in the dimension of the physicality, and then you become the holder of the life of the soul.

It's the same as the book number one, book number two, and the book number three, man has read the book number two. Now we are teaching book number three, and how you transmute between it. You cannot go from one to the other, if you don't have the knowledge. Man has gained enough knowledge from dimension physicality, from what we call, the spirit, the soul of the physicality (STP).

Now we have taught and we teach the dimension of the soul. This way, between your soul and STP, which is that ?? (line for) transportation, there is no messengers. There is no one to fool you. There is no one to take a message and translate it, and change it the way they want. With the new understanding, with the new dimension of understanding the operation of the Soul of Man (STM) and Soul of Physicality, which you live every

day by it, which you don't realize, (:34). you have never realized, how close your Soul of Physicality, and the soul of your body works together in everyday existence.

Then there can't be any Mullahs, there can't be any Rabbis, there can't be any priest or any intermediary, because the only intermediary is you within yourself. This is where the Day of Promise has come, promise of the freedom of the man from the shackles of abuse in the dimension of physicality, poverty, hardship, or abuse in the name of religion, because now you can live in both dimensions. You are in charge you are responsible for it, and you cannot blame no one.

But you have to go through that training, to become a marathon runner. Once you get addicted to become a marathon runner, it's very hard to stop. Some people lose their lives in the training, because they don't get it right, they push it too far. They somehow cut the lines, formation, and reality, and the fact of, ?? The beauty of it is we watch the marathon runners, New York, London, wherever. And we watch for two and a half hours, maybe three hours, seeing them struggling, seeing them joining, rejoicing to be the first to get to the end of the line, or the second or whatever. Well, at least I managed to finish the London Marathon or New York Marathon or whatever.

But what we don't see, is the day before, the week before, the month before, the year before, what that marathon runner went through, (:36). to get to this point. The training, the self confidence, the things which are put in front of him, the injuries, that he has to overcome, the failures that he has to, the things he has to sacrifice himself. Instead of going for a dinner party, tomorrow I have to run a marathon. Forget about a dinner party, that every family and everybody else is.

Easter - Crucifixion Christ (36:26 to 50:26)

This weekend, we remember the crucifixion of Christ and Easter in the Catholic Church, and the following week in Orthodox Church. What is the meaning of this process, that you just look at it, buy an egg, pull a tree, and some chickens and chicks under the tree, and put some eggs in the garden for children to find, or in Orthodox Christianity, boil some eggs and meet each other, and see which one cracks another head, on another egg to win.

But what is the real truth, which is lost in this process of Christianity, the story of the crucifixion of man. The conversion of the physical to the dimension of the Soul, and return of the soul back to physicality. Christ as a man went on the cross. He separated in that D on the cross, to the dimension of the Soul. He went from Book One to Book Three, using the transformation of the life of the man. And then he transformed back to a man, coming off the cross and walked away.

Man has taken it literally by word, but in fact, it's a teaching, what you have in book one, two and three, which way do you want to go? He completed the cycle in one day, (:38). and then he wasn't there. Then he saw through. Why wasn't he there? Because the Soul of

Man took the dimension of P and became a man, and traveled across to North Africa into northern France and Spain. Sorry Northern Spain and France.

So, up to now, you learned it through mysticism. Now you learn it through the science and understanding and technology, that you can become that Christ. You can become the man, who can move to the state of the soul, to go from dimension of state of P, and from D of the soul, come to physicality.

This is what we say, the man with the knowledge we have given, has reached the status of the prophets of the past, because you can do scientifically, what was done as a magician, and became a magic, and now we celebrate it, and we do everything else. Tomorrow is Good Friday, and what happens by Monday, or by Sunday?

Or where have our priests, Pope's have lied to us, because they never understood. They never understood the point of transmutation. The crucifixion of Christ, the resurrection is exactly what you have in book one, two and three. Now you have the capability to do it scientific. You will have the Enhancement Units (EU) is being built. You have the teaching of the use of the MaGrav energy plasma direction. Everything has been given to the man. (:40).

So, in a way, if any of you Knowledge Seekers (KS) understood that teaching from 270, Knowledge Seekers program till now, which is 447 - 48, you could have done what Christ did. He understood how to go within the inner self, that the energy of the inner, which is the Soul of the Man is more powerful. The ?? (STM) can take the physicality of the man within it, and then become the light, and then return it back into it, and then become another man.

The man, the way you go from Earth, from now to moon, in a monkey suit, and then you still have to be in the monkey suit. Or you learn to go from Earth to the Moon, and walk the way, in the real physical life will be on moon, with the dimension of restriction of it, and live a life as a man of the moon, as a person who lives in the dimension of it. This is exactly what Christ did.

In a way, Keshe Foundation teachings is the teaching of what you like, as Christian to call, resurrection. In the world of Islam, you call it the return of Methi, which is a return of the soul of Mohammad. We had this teaching in physicality, we had the soul. And now, the Promised One is a collection of the return the Soul of Mohammad, BHN.

Not something else will come. The teaching of him will be, for you as man to understand the transmutation. (:42). In the teachings says, that man will have a complete understanding of everything, when you understand the transmutation of elements, as we said many times, but in new understanding and completion of knowledge of the man. Is when the man understands the transmutation of fields, magnetic fields, that in their motion, they become energy, and from energy they can become anything. We get a copper, we create Zn and gold from it. In a way, we do what happened to Christ, we take nothing, we give the Soul of the Creator (STC), and we make a gold out of it, which is

the soul of the Christ. The same with Mohammad, and the same with the soul of Moses, but not the man as Moses

Then we come to understand, that the totality of the teaching comes to one point. We all come from the same sun, we reflect like a mirror, the beauty of that sun, but we do not become the sun, because we are made up of it, we are part of it, but we never become of it, become totality of it.

The teaching of today as it's Easter, what we call, weekend, is to understand the truth about the resurrection. And to finish with the dogma of lighting a candle in the church at a certain time, in Jerusalem, (:44). or somewhere, or as something else, or whatever.

We are not looking to be magicians. We are looking to understand the process of the creation. That we become citizens of the U. You transmute your physicality into the strength of the Soul of the Man, travel across the U, and on planet Zeus, on Mars, or wherever, you return back to D of physicality, at the point and place. You resurrect yourself.

In a way, we are familiar with this, but we have denied it, because we couldn't understand it. You call it a dream. In dream you are in presence of your Mother, presence of your friend, presence of somebody else who never met, you see accidents, you see gatherings, but how come? You allow the soul, which is in the dimension of the Soul of the Man to travel, and then get into parties, or get into accidents, or see what's happening. Then you manifest yourself there in a dimension of physicality.

How come you call it a dream, when it's a reality of life. We do the transmutation, we understand the process, but we never accepted it, that we have the capability of it. We need to be the marathon runner to be. What can I do? I want to see my brother in Washington, where I am in Tehran. (:46).

I want that, what I call, transmutation. I make that trip, because I want to, the desire to see my brother is so strong. I made that connection. I open the cage. I go to my brother, I sit down and have a coffee with him. Have a chat with him. Call him the next day. Did you have a feeling I was with you? Because, we interacted in the D of the soul. He says yes, I felt something, or no. Then you know the first yes, you have learned something. You desire to be rich, you work at it. You desire to understand the work of your soul, you work at it, but don't lie to each other, or to your soul.

It's not making a map. It's understanding the elevation of the soul, how to bring the energies, the fields of the universe to become connected to the STM. This is what we do in flight Enhancement Units (FEU). In some cases, many of you will go into the Enhancement Unit, your travel where you want to be, but the Enhancement Unit never moves from the ground, but you do the trip, because we allow, that elevation, that what I call, transmutation, reduction in the fields, of the what we call, the spirit, or Soul of Physicality (STP), that the STM is free to take this dimension. (:48).

In a way, if you look at the, what I call, the teachings of a few weeks ago, when I explained to you in the Linz Exhibition Center (EC), we'll send one of you, one person from this side, an object from this side of the bridge, to the other side. We're not ?? magicians, but what we are teaching. It's the evolution of the time for us, as some of us would like to be, but we cannot understand it.

But we become the tool for the others to achieve, what we have not managed to understand, that one day, from one time, from their experience, we receive the elevation to understand. We're here to serve, not to be served.

In a way, this weekend, or next weekend, if you understood, you have reached the station of understanding of the knowledge of the Creator, in the name of Christ, resurrection, the evolution, the transmutation. You call it in the name of theology - resurrection. We call it in the name of science - transmutation. No difference. Man has chosen many names for the same process, and this is another one of them.

If you can reach in the dimension of understanding, The way you transmute and you reach the process of seeing your mother, seeing your father, (:50). who passed years ago. You can target the strength, the devotion of the Christ, bless his name, and meet with him. Because now, the cage of physicality is not buried somewhere. The freedom of the soul, is free to be in touch with, and to be part of, as part of the universal life.

Preparing to release T worldwide - funds

I do a lot, I hackle a lot in the past few months. Those have been very close to me, they know how we've been hackling to get everything sorted, that we create the condition, that we raise enough capital, that every man in every part of the world, has that opportunity to be free. I'm here to serve, does not matter what name people put on it. For freedom of the man, I'll beg and borrow, because man is physical and needs to be done.

Otherwise, we just put the transmutation system on, and we just chuck out tons of gold. We don't need you. It's the test of the understanding of the process. That's what I said many times, how much Knowledge Seekers, many of you in the background know, have offered properties, buildings, land, God knows what to the Foundation and I have refused. But when a need comes, I go to the Knowledge Seekers, and say, this is the need for what it is today. We haven't taken a property, that we sell today to be able to do something tomorrow, because it's a test for the soul. It's a test for the man, or for me to understand. I have to go through the physical condition to understand what the operation is, of the totality.

Many of you will come to the point, (:52). that it's it, "oh, this is what he meant." Now we understand, but at that time it wasn't clear, because you understand the need, the necessity for that to be done. Goes of the writing of prophet, we'll test the fire with gold (gold with fire). How much is the heat of the fire, that can melt the gold, We test the man with that gold. How much that gold was attachment, that will melt the STM to be

detached from it, to become part of the understanding, and become the wealth of the, what we call, the universe and the man as a creature.

This weekend, if you are in the western world, and most of the ... dimension of Islamic world might hear a little bit of it. On the Jewish, you cannot escape from it, in Jerusalem and the rest of it. The resurrection. In the later teachings it becomes by Muhammad, and the others - transmutation. The same word, the same understanding, but both for the freedom of the STM.

But now we understand what's the energy and the strength field of the STP, what we call the spirit. What we know, what is the STM. Then we can transmute between one to the other. Manifest here, and manifest there. We don't need to get in the car, we get in the D and manifest in energy and soul. (:54).

In a way, I understand this, because that's a nuclear physicist, I have to understand how we can change energy to matter state. The secret was, the hidden fields within the atom, within the electron. Because you can become anything, you can become any number, as long as you stay in the state of plasma (Pl). Then you decide to be gold, to be a cell of the man, to be a wood.

Then you understand the process of what we call, the emotion of the man. Then you go into the process of understanding that the emotion of physicality has a direct connection to the emotion of the soul. Then you have to be able, how to transmute between the two. And how to benefit from one to another. And how to be part of the totality, where you're there to serve.

The Keshe Foundation in past six months has gone through a huge burden, has taken a huge step, and we tested those who are loyal to the name of their soul, to the limit, that we can get this achieved for the whole of the human race, that we can, step by step bring the totality of the man to ?? to understand, to elevate, to change. Because when we change one, the others need to change. (:56). But we have to have the resources, that it can be done, and is strong enough to do, to bring that change.

I carry the Soul of the Creator (STC), and it's strong enough to do. But you have to be there to tap into my soul, to receive it, to elevate, to understand, and become the passengers of the U, the way we are.

Then we all reach the state, that we can understand the strength of the love of the Creator and no more. Which the love is the condition of giving. We don't ask you to go and burn candles, and do this, and the rest of it. Go and understand the knowledge of the creation, as much as we can teach, and you can understand, as we develop new T in the coming times.

We are the Messengers. We are those who bring the message of science and ethics together. And in that process as universal Messengers. We understand the totality from A

to Z, as we are part of the Soul of the Creator, we understand our position, as we are part of the Soul of Physicality of the man, we understand that position too.

But we can transmute, we can bring knowledge in pieces, that man, and the other citizens of the U, when they come to the point of creation of existence, can go to it directly, and do not need to go through all the rigmarole the man has been through for billions of years.

In a way, we have brought a unification to the science of the creation and the Creator. What was the knowledge of the Creator, now has become the knowledge of Universal Community. Even though each village, each satellite, each planet, (:58). has created, developed their own knowledge of existence and live by it. Some jumped further, some jumped less, some understood, used part of it and still got stuck with it, but they never went to the next step. They got stuck in the UFOs, they got stuck in the ships, cars or, whatever.

Then we come to one point. How much in the past teachings of the dimension of physicality, in the dimension of the energy fields of the U, you have educated yourself. How much you have understood, that can go to that point of transmutation? How much you can sacrifice, how much you can give, that allows the others to reach elevation? How much you have to let go, that it comes to the point, that the totality, what we call, the freedom of the man's soul, that it becomes more important than individuality.

And that goes back to Abraham, and the sheep, and the sacrifice. The son for the ?? theme of understanding the beauty of the Creator. I sacrificed a son, (1:00). and don't expect much. But I know the freedom of the man to be able to be released from the shackles of what we call, those who have shackled man to this planet in the name of religion, had to be broken, had to be opened up. Sacrificing a son was worth more than it. Because I know he will be with me one day. But that day is the day when it is right, when it is time for it to be, not when I choose.

As I told you, we come here to understand the pitfalls of the man. The pain, the crucifixion, with the martyrdom, with whatever. Then we understand what the solution to it should be. It's the same for every level, till we don't understand it, till we don't feel the emotion of it, we cannot find a solution for man to be freedom, to be freed from the shackles of abuse. Then you understand, what is there for you to achieve, what is there for you to find elevation, not for us.

As I said many times, (1:02). you shall not find what I call, temples, and churches of the KF. You'll find Institute's of the KF to teach, to elevate. You find the technologies of the Keshe Foundation, that you can use to understand more and more. One day you pick a cup, you drink from it, which is made by the Keshe Foundation technology, and that triggers you to understand the process of creation. That's why we do everything else, while we are developing, elevating the STM, by putting back what this planet did not provide at a point of inception.

Through its M and G fields, through its Inertia, there is a misconduct of the work of the fields, and has made the man to kill, has made man to destroy. We cannot come tomorrow and tell you, that this is what you have to do, you have to learn it yourself. You have to believe in it, and you do anything to get to it. Because that elevation, when you see the change, when you see what it brings, then you bring the others into it, and then without knowing, by drinking the waters, you elevate the STP, and the STM, and then somewhere down the line, out of nowhere, you come to the point of understanding the enrichment, and understanding the Creator and creation, and transmutation. It can be in the deserts of Africa, or in the most luxurious buildings in New York. You need to ?? start.

I remember when we opened the Keshe Foundation in Ghana, in nuclear center in Ghana Atomic, and when you start producing the waters, (1:04). plasmatic, whatever, whatever, whatever, and people start by word of the mouth to understand, that these waters can help with diabetic, can help with this, and can help with that. They tested and they worked, and they came to buy it. And the soldiers in the nuclear center, they became aware of it, because they used it. Most of them have diabetes, and they saw everything (all symptoms) goes. What happened, nowhere in the world, you can walk next to the nuclear reactor, in a security zone of any nation. The soldiers of Ghana Atomic opened the doors, and we could see a man, and a woman walking like an ants line, to the center, to buy a bottle, to buy a Gans of whatever, to go back, and then there was more coming.

We had to do that in Ghana. We do that now, in the exhibition center in Linz. We have opened the doors for the knowledge and we have knowledgeable people. Maria is there, Herbert is joining in to do. To transfer the knowledge to you, to understand the totality, not bits of everywhere. When you go to one or two hours of the, what I call, the exhibition understanding, you'll understand the totality of the meaning of the knowledge of the Keshe Foundation. Does not matter who you are. Then you understand the time for change has come. And then you understand the next step is to come.

The coming of the Methi, as is believed by the, what I call the learned Iranian clergy, (1:06). will be the maturity of the man to understand the process of the transmutation, not the manifestation of the man or an object. When the Ayatollah K of Iran., when the clergy of Iran, to understand this comes, that will be the day of the judgment for their souls, and nothing else. Then they'll put their turbines down, and bow to the knowledge of the Creator, not to the Keshe Foundation, not to Keshe, and not to any other, but to their own soul.

The maturity of the understanding brings the peace, brings the next process. And we do everything, for you to do that. You Knowledge Seekers every Sunday, spray, paint, whatever you do at 12 o'clock, lunchtime and Six o'clock dinner time, that you bring that synchronicity, that you bring all the elevation of all the souls. And this is part of the same process.

We make the enhancement centers (EC), we make everything else. We have to do, we can't sit down to die, one day you're going be dying. There is no time limit when you

cannot work. Age of 60 - 65 retirement is a joke. This is where the most of the maturity of the knowledge has come, and you put men on the bed of death. There should be no limit when the man stops contributing to extension of the physical life, or the soul.

It's the same with Vatican. Vatican retires the priests at age of 65. Don't pay them anything, and the pension starts at 70. Where do these poor priests, Vatican, going to find life for the five years, till they get pittance from Vatican. (1:08). Abuse their soul, to abuse the others, than abuse their physicality. Then if these priests understand the process, what we call, most of the clergy in Vatican, are in the same dilemma. By age of 65, or when they are exempted, they are put on the street, because they did not abuse enough souls.

We know members of the what we call, Vatican, who are in that position. They come to the Keshe Foundation begging for financial support. Because they have decided to put them on the street. What do you do with a man who has served for five years, while is from the 65 to 70. The abuse is not just by the physicality, they abuse their own soul, within the what I call, the frame of Vatican.

This is the whole process to understand. Maybe today, this weekend, give from your soul, for the clergy, for the religious people of the world, to become aware of their own, dimension of their own existence, that they do not need to wait for somebody to call themselves Methi, or Messiah, or whatever. But they become to understand, the strength of the Soul of themselves that they become the Messiah of their own soul.

The beauty of it is, (1:10). we are just messengers. We spend time, we give our message, we make sure the guidelines are observed. And then man wants to see, that the cycle of physical life finishes. So we die, in your eye, but the soul, the same soul carries from Moses, to Christ, to Mohammad, to the others, and to you. And to wherever it goes to the next step.

So, we understand one thing, on this weekend, we had this discussion before, for Easter. Maybe now you understand more, use the science and technology, as they said, in the intro, we have published a paper, that the station of the scientist and the prophets, it's the same, as one. It's explaining the connection between the fields of the universe and the man you call it the soul, the ethics. One which does on the matter of state, but increase your energy, and creates you water, and makes you the food you eat. But in essence, now the two are the same. The feeder of the soul, and the feeder of the man is the same knowledge, is the same science, it's the same message.

It's you're who has to understand it, and bring that change in. We'll bring that change into process this year. We are without a shadow of a doubt. Then it's how much we can change the situation. How much it is.

Keshe Foundation has directly approached the Israeli authorities to start peace negotiation with Iran with a full knowledge of the Israeli government, (1:12). and Israeli .. organization and with the knowledge of the Iranian authorities. Because we are taking

the knowledge of the Spaceship into Tehran. Iran .. Iranian forces can land in the center of the Tell Aviv without them knowing.

We are, they say against the regime, but we support Judaism. But where do you find those who make the framework of the Government of Israel, unless we give the knowledge to both sides, that they can bring a point of understanding. There is no need we have the same knowledge, the same technology, the same understanding of transmutation. So what do we do?

This position has become easy for us, due to 5plus1 talks, that we have managed to break through. But our job is to be peacemakers by understanding of the technology, not by giving technology to somebody better than the other. When the Americans, the Iranians, the Russians, they all know. They all can be across anywhere else. You can transmute all your what we call, dust to gold. What are we fighting for? Do we need a situation of Ukraine? Do we need the situation, what we have in Palestine? Do we need to have the hungry people of Africa? Or do we change the tools of war by understanding the transmutation of the elements, what Christ went through as, what I call his sacrifice. (1:14).

In a way, its theology behind it. So crucifixion, and a manifestation, to feed the soul, to feed the physicality of the man, in the hunger driven society in Africa, or South America, or on the streets of New York, when they clean the bottom of the rubbish bins to find scraps that they can eat.

With the knowledge man has today, with what we see created, and developed, and encouraged, by those who abuse the man of physicality. There should not be such a position. The Keshe Foundation shall endeavor to bring that situation to an end. We do everything in the background, even with our enemies not knowing, we elevate their souls, that they become those who work to develop, to bring, knowledge to the others.

Within my power and knowledge, I can wipe out the state of Belgium in one pen, but do we need to, have we done? Because they have to be elevated understand. They are another part of the human race, be it the king, be it his servants, be it those police officers who do all the wrong things, be the agent who lived in the same bed with us. We just elevate their souls. Otherwise we can demolish, what we have from them. It' the love and the care we have for them. (1:16). It does not matter what they do. What do you do when you have a child, when you take her out in the shop, cries and kicks, and destroys things in the shop, like a bull in a China shop. You take her out, and talk to her, and then see what damage you've (she has) done, what it needs to be done, how much I have to do to repair the damage, you've done.

We do that out of the love, because I can bash your head in, as a father did, we see it in most of the Italian places. The children are not that, what I call, punching bag, that the Italians do to the children. And the rest of the world do with them. Our teaching is about love and care, to bring man to the point, he understands not what to do. Doesn't matter

how much the child kicks, and shouts, and breaks, gradually, it comes to understand he is damaging himself and nobody else.

I hope many of you managed to reach the point of resurrection. Maybe in theology it has been put on the December (April) Sunday, and the strangest (thing), it always falls on a Sunday. And then we understand, if man managed to control everything ?? we believe, on a Sunday, that it happens, then can manage to move, that day, to be the Sunday for his soul.

I hope, I hope today, I could bring you to understand, a part of what is your responsibility to do. Not ours. Because we've done everything. (1:18). We taught as much as we can. We carry on teaching in different ways, till we get through, and you find the freedom.

I don't live like a hermit. But I'm hermit, that gives love and knowledge to humanity, to take, to elevate itself to the position of the understanding of the creation and the Creator. I have been that hermit for thousands of years on this planet, my mission is over. Because now we have managed to bring men to see. You might see some today, and some next year, and some next week, and some in thousand years.

But we have started the process, and in time the knowledgeable man on earth through the knowledge of the Soul of Physicality, we'll finish the job for human race, and become messengers of the universe for the others.

Thank you very much for today. And I hope those of you who are believers in resurrection of Christ, understand you have the same capability, that soul of Christ did. You can resurrect and move in both dimensions. It's you who brings, you to that point and not a MaGrav, and not a donation, and not burning a candle, and not waiting for somebody to appear in whatever name, that they can for you for the next job.

I hope those of you who are believers in the path of Christ, a very peaceful, and wonderful Easter holidays, and maybe it comes the time for you to contemplate, to create that change for yourself. (1:20).

Thank you very much. If you would like to go to a break and we come back, we carry

Proofed to here >>> continues on

>> BREAK >>>>> 428 KSW April 14, 2022 (1:27).

This is the second half where we have a q&a questions for Mr. Keshe.

(1:28).

K- Yep. Yep, we can bring it down, though. I lower my hand. My Soul asked the question and got the answer. Anyway, let's see where we come and what we do?

Q; .. In the 425th KSW, a Knowledge Seeker ask question about the emotions of the Soul of Man, and the Soul of Physicality (STP), and how the heart translates the emotions of the Soul of the Man. But we have both souls and they need to decide together. So my question is, how can we discern if this emotion is pure from the Soul of Man, like a communication affirming the truth, or from the Soul of Physicality, where it may still have errors and confusion, because of existence on this planet? How to perceive this difference?

K- Experience. By experience. Man up to now has always listened 99% of the time to emotion of physicality. Because he can respond to it, he can live with it, he can understand it. Every now and then the emotional, of what we call, the soul come in, and done something, and then we call it, "by accident." Something happened, because that we cannot explain, (1:30). because it wasn't part of the emotion of the P.

Wherever you say, "Oh, this happened coincidentally," or you, just by fluke. Go back to it, and see if you asked that question from your soul. Then you'll start opening up to understanding, which one, is which. Would all become the same?

This is the only way you can do it. Every time you say, "oh this something happened by accident," go back and analyze it. Where, how, and then you see the connection to it, then this must be the soul's job. Then you become more and more reliant, and the more and more you develop it.

There is no accidents, you're put in a position and in a way, by your soul, by the conduct of the fields of your life. Then you have to live with it, or you have to understand it, to go to the next step, to be able to understand more the process of creation.

Many times, one of the processes, that we talked about this very recently, why do you sneeze? Where does the energy directly go from the nose, passes where, and what faster reaction you can get. Some ?? theologist's understood this, but you go to the doctors and they try to explain to you, and everything, how the nerves work.

How come suddenly you stop and say, no? Something stops you from doing something. How come out of nowhere, you start doing something, (1:32). which is opposite to what you've done your life, or what you do? Because the soul has taken over the decision, that's for you to see.

You have to understand it, and then develop it. And then you understand, which one is from the emotion of the physicality, and which ones from the emotion of the Soul. Gradually, you leave everything to the dimension of the soul. Everything to D of the soul, and you go by testing and testing.

We go through the same process. Then you understand how souls work, how things come. We had an occasion this week. Within one hour, one of the members of Universal Council (UC) was aware of the action of the Keshe Foundation, what we did in the background. We said, this is amazing, in less than an hour ago, we did such a thing, and you come out of nowhere. Because the soul is aware of the function of the Universal Council, as a soul, has taken its dimension to accept responsibility for its language, and for its nation.

Then you live that way. You go by it, and things, just building a trust. What Keshe Foundation has gone through in past six months, eight months, if I would have been the way, that I used to run, in the business time, 20 - 30 years ago, we has a ?? harsh track at that time. But no, I learned through the structure, that's what the soul, when the time comes at the right moment, it will complete.

The people who get tested along this way. It's been a harsh time, but a beautiful time for the Keshe Foundation. (1:34). But only one or two people who are close know. We done everything to bring that change. It's all by trusting in the soul, trusting in what we do is for betterment of humanity, not for us.

You rely on it, you understanding it. This is, "I'm here, I have a physical life, " but my job is what I have to do. To support, to be the instigator, to be the initiator, to be the developer of that condition, to bring in, at this moment in time. The Israelis, are on the throat of the Iranians. You mention Iran to the Israelis authorities, that's the end of the world. You speak to any of the Iranian clergy, whoever, about Israel, this is the end, you give our biggest enemy.

But when you elevate their soul, they will eat on the same table very soon, because they came from the same table, power and money, and what we can do, has separated man. Soon they'll become wise to it, and they walk away from it.

But those who are, and they see, in the middle, it's their responsibility to make that initial step, to bring that change, even though it may look so harsh. It's one way of working and trusting in what you do.

When it happens, so it's not time for it. So there's no restless life, it's not for me to put another something in the bank, or get something else. It's not time for mankind, he is not ready for it. (1:36). But we know he's getting ready for it, he's just coming to the last leg of it.

And a lot of Knowledge Seekers are standing fast, they are aware it, they are suffering with it. But ?? this time, because they know it's just about to come. Be it in China, be it in US, be it in Mexico, be it in Brazil, be it in Austria, or Iran, we all who run and work for it, are standing fast. Because we know when it comes, it brings that change.

There's so many opportunities has been created by the war in Ukraine. You're not aware of it, because you just see and listen to what propaganda comes from the western world. But if you watch the way we do, there is so much, so many opportunities in different directions, has risen by Ukraine position. I look at it as a positive step. I know of some people are suffering, some people are getting whatever.

But in a way, it's the end of the battles of the religions, within one religion. And again, has brought what we see, hidden ways of doing whatever it is, blaming the others to do whatever. And it's not going to stop. The change in administration in the Kingdom, United Kingdom is necessary for world peace. Because the ?? privy Council, and the British government as a kingdom of Britain, is instigator of many wars. But it has to be done from inside. And it has to be done. The way they step back on. And it's in the process, has started, as we know a long time ago.

We have to understand what this position brings us, end of kingship, (1:38). the end of anybody being higher than other. You be Putin, you do wrong, you are committed to, what is to be right by the places ?? ?? the instigators in the White House, that underneath you burn the ?? fire. All has to come up. It's the time of cleaning up. And then we'll see the positive things, which will come out of the Ukraine situation. Amazing things, especially the way we work, and we've seen it. But I always say, we trust it to the soul, that always is there, because it cannot make a mistake.

To a lot of us the situation is, don't. And it's there, something of what these guys, if they (?? don't) clean up, where it's getting cleaned up in Ukraine. We'll have more and more of this in a few years time. Battles of who is more, who is less.

I pray for the soul of the what I call, the leaders of Vatican, that they come to their senses. And the same with the Church in Moscow. But that praying, does elevating their soul, has to bring them to announce, what I call, the end of Christianity. We'll see it. End of Ukraine situation will bring Christian wall to that point. You will understand very soon why.

The same as ?? ??? Methi it all has happened, had to happen within the frame of time, that they all come to the same position. That's the time of the maturity of the man.

We don't want, by process of trusting the Soul of the Man, to overnight, to declare, and just change their name to another, (1:40). and carry on with the abuse. We want them to close to church doors, that nobody goes in to be abused, and leave the mess they created over centuries behind those doors.

The way we saw when the Church of England start selling the churches. The physical abuse of the man, which came forward was unbelievable. I was in it, we were the first people in frontline with it. Buying a church, and they don't let you to do, to demolish it, till their own people demolish it, that the number of children's bodies buried within the church, cannot be shown, that how much abuse was done.

We were in the front line, we saw how Church of England had to change position, not knowing, that this is what's going to happen to them. As they didn't care anymore, because Church of England was returned back to Vatican, that was the shame of what we call, the Protestants, not the Catholics. They managed to somehow, keep it off the record, but it's still there. And the same will come with the other things, and how it is.

We cannot go on abusing the Soul of the Man in one way, and the STP in the other. It has come to a point of change and there'll be ?? no more from this side. The only way become, when mankind understands, which soul to listen to, and why, the reasons.

When you're hear you have to do something, then you judge it, and you understand why. We are all part of the same process. But learn one thing, if you listen to Soul of Man or the Soul of Physicality, always ask, because you have to ?? develop the consent of the others. (1:42). If the consent is given, you have done no wrong. Even though it might not be to the benefit of the others, because they are the ones through their own process might see themselves as the losers, but the same part of the process of the development.

Even you want to ask, ?? you ask, then you understand you always work in the right way, the right ?? .

Resurrection Continued how Christ did it (1:42:37 to 1:46:54)

You have to learn, it's the process we all learn slowly, slowly and become to understand it, and you trust the soul. Sometimes the STP, because it knows physical D and sometimes the STM ?? and the position of the totality of the physicality, ?? structure of the bigger structure.

This is what we have not understood. The Soul of Physicality is to protect you in the physical dimension. The Soul of Man is to protect you in a dimension of the universe. The sooner we understand this, the sooner mankind, will be free and understand how to position one in respective to the other, in what position, and what condition, and when, then we will become mature, in the process of what we call, transmutation, or what you call, resurrection.

Christ could have walked away from the cross, but he knew he had the power, so let them do what they like, because I know what I am going to do. I went up the cross with the Christ, I know exactly what happened. I know how the transmutation took place, and how and where, how the things ?? touched. (:1:44). The body never went missing. Christ went through the D of the STP and the STM. Because he knew, he was taught.

He became of that knowledge just prior, what you call, the last supper. The knowledge was not given to him, till the last minute, more or less, because he was a very joyful chap, and he always thought he would get away with it. But when it came to the point of what we call, the resurrection, or the call it a transition. The knowledge was given to him and was told he can use it ?? balls.

The last time, the last Supper, if you understand it, is the last time he ate as a prophet. That's what the Last Supper is, not the last time he ate with his people. You always put it to a definition of something else, because then it has a meaning. Because it was a time when he left the body of the man, the last meal as a man, as a prophet. And when he came down, he became a man, and he took his ?? path.

Now maybe for the first time you understand what the Last Supper means in the D of Christianity. Nothing more, nothing less. The rest of it is, what you like to talk about? It was the last time he ate as a prophet of God, and that was it, it was the last supper he had, and he walked into it, and he was fully aware. He bargained for it, because he loved two women. (1:46). It was given for the love he had.

Maybe now you understand all these hullabaloo about the last Supper. He accepted it, because he knew the dimension of what he'd done, was beyond the dimension of acceptance, by his soul. He didn't go through the path, which Moses went, and start all sorts of wars and killing. He decided he'd done enough, he brought the change he wanted, and it's time to live, and transmute from one to the other. He listened to his soul, and the Soul of Physicality, and he took that transmutation. What do you call, whatever in any language. (1:46:54)

Any other question.

Q: ... My question today refers to the "born again" Christians, who I assume have an experience of their own souls, but many attribute it to another soul, such as the Christ, or Krishna, and others. What are your thoughts on these experiences?

K- I never understood what the reborn Christians are. Who came up with this terminology? Then we have a reborn Jews, (1:48). we have reborn Muslims. If you can be reborn in one religion, you can be born in any one. And as we know, they do what they want to say. But what does that mean? What is actually, not the physical process, the soul process of it is? The soul doesn't get reborn, it's the same soul.

Somebody because of an experience with, realizes in an accident, that he can die, and he hasn't said, or loved his wife, or his child, and he comes home, because of the accident, he becomes the best father, the best husband in the world. Isn't that a reborn husband, or a reborn father. Or he needed that experience to realize what he'd done wrong? And what name do you put out?

How many of you have been through that process? I am going to go home and enjoy my family, and say whatever, whatever, because tomorrow might not be there. What name do you , in the name of the religion, become a reborn Christian, or in name of your wife, you become a new reborn lover, or in the name of your child, a new reborn father.

It's us who have chosen, whatever you like to do it. It has no meaning to me, it never had. It's just that you go for the second time to be baptized. Why does that happen only to Christians? Or is it a very good way to get some more money to the church, because now you go and you pay again. It's a business world, (1:50). when it comes to these things,

but it has no meaning. I don't understand it, I never understood it how you can be reborn. You already just, because he experienced something, you become a reborn husband. Because he didn't know, you become a reborn father, because you jumped an accident. Are you going to be a good father, that might not be there tomorrow, fear of fear.

Any other questions?

Q: When I was a teenager, I used to get together with two or three cousins to make objects move, and answer questions through those movements. For this, we used a table, a glass, letters and numbers arranged in a circle on this table. Before we started, everyone would hold hands with each other, and do a minute of meditation. Then we started the experiment. It was as if we were talking to a soul, and that soul responded by moving the glass. Based on this experience and considering that every human being is a MaGrav, and what we were doing was connecting these MaGravs in a stellar configuration.

My question is, one, if we make three MaGravs and connect these MaGravs in series, the M terminal of the first connected to the G terminal of the second, the M terminal the second connected to the G terminal of the third, and the remaining terminals G of the first and the M on the third, hold each one with one hand, thus forming a stellar configuration. (1:52). Will I be able to create these forces, or will I be able to integrate my soul with the soul's of the MaGrav, and travel through the universe through the soul, or through physicality with this system?

R: It's pretty long question, I don't know if you got it ..

K- Oh, it's a very simple question. He hasn't understood the purpose of MaGravs. Very simple. That's why it's half energy and half matter, and because of not understanding, looking for an answer from us.

Do you need a wire to connect MaGravs? Do you need wire to connect magnets on a table. What happens if you put three magnets on the table, and one magnet in your hand? Move the magnets outside, and see what happens the magnet in your hand. Or move the magnet in your hand and see what happens to the magnets outside. Do you need the wire connection? Do you understand the true purpose of the MaGrav system, then I think you'll get your answer.

R: I've got a perfect little video, that I found the other day, that I made, that I forgot about. Let me share it here that might illustrate what you're talking about with magnets, actually. (1:54).

K- You used to do a lot of these magnet things.

R: This one is with, as you can see here, it's a series of flat magnets, and 4 of them in a group to form sort of MaGrav shape with the three on the outside, and one in the middle. And there's four groups of these, and one of them is in the center. So I'll just play the video and we'll see how it goes here.

(Shows the video ..)

So that's it basically it, there's a couple of different things going on. As you can see the first configuration with the magnets in the center, is like the MaGrav configuration in

many ways. And it's like the free plasma in the center, you could say, or looking at it as four different points of the tetrahedron, depending on how you look at it. But in any case, you can see the positive positioning of the of the way the configuration holds that center in place there. And but then, if there's enough agitation that goes in, it releases that configuration into a lower energy configuration, with the four units all on the same spacing, (1:56). and they maintain that position, and that gets agitated even more, then ends up going back to a an even more lower energy example as the tube, or the lowest form of its energy, you could say.

K- Yeah, it depends how you, you see this is still matter state connection. MaGravs are not matters state connection, they are field state connection. There is no matter state condition to them. And this is the beauty of it. And this is what is important for us to understand. There's a difference between matter state fields, and a plasma state field. We have converted with the MaGravs, the matter state field into the plasma state field. We have seen that, none of the Knowledge Seekers understand this. It doesn't matter how much we push it.

And this is the problem, part of the problem of the understanding of the T. Once you have a matter state, matter, when you have a Nano coated, you have moved into the cosmic direction fields, and a matter together. When you go into the Gans state, you're in totally plasmatic condition, in universal condition, but on the influence of the Inertia of the fields of the planetary system. (1:58). Knowledge Seekers have not understood this, especially creation of the Gans's.

I am sure in the coming time, scientific world and KS who come from the world of universities, and the others, in a very short time, will open this in a massive way. Because when they publish a scientific paper about it, then because it's written by a doctor, or a professor, and somebody who has got a PhD out of it. We can accept it. But they don't trust their own intelligence, and understanding.

Something I have to say here, to our KS. Our KS in Finland and Germany and other number of places around the world, have contacted the Keshe Foundation in respect to what we do, and what we are. What we can do with your groups of Knowledge Seekers scientists. Keshe Foundation has looked into these structures, we are still looking into these structures. And soon we'll announce what we're going to do with this kind of bunch of scientists, who are sitting grouped together, and they are developing different, or they want to do different type of developments in different aspects of technology.

You have a big group in Romania, you have other groups in US, and Mexico, and Brazil. We'll bring you together in a very specific way. We are discussing it recently with some of the key members of the Keshe Foundation, that how we can, or how we see to bring you Knowledge Seekers together, (2:00). to work, but still be independent of their own nation or language. We have a position now we, because we are analyzing step by step, or whatever can happen, or what can happen. We can send you MaGrav, or EU, or flight EU to your country, and then you have to find universities, or whatever, and bring in the

scientists in to do, and then what will happen to this system, sitting somewhere till somebody makes a decision.

We are looking at the possibilities of opening our Institute's, part of it to the nation, by national language, by nation, to be part of, to do the research collectively, in one place. Scientists from Denmark, scientists from Germany, scientists from Brazil, will be given opportunity, will be given a unit each, and then, it's for them to collaborate development with others outside. They can come and go, like CERN, You can come and spend a weekend, or two days, three days you are there, to complete in what as a group, you decide to do and share it with others.

This way, you will still have the independence of knowledge, you can go to your scientists, I'm going to Austria, or I'm going to Brazil, I'm going to Arizona, there's a unit there belongs to us, and then we can share, we can take or what we see. And then we make it a place, that every unit gets used, .. integrated together. And even on the background of it, if you have a Knowledge Seekers, who are that good at it, we can some sort of help you to do, that .. transporting, coming ?? alive, and going ?? forth or whatever, till we see ?? (what you are doing).

This way, the Knowledge Seekers in one place, will share the knowledge, even though they work in independent direction, (2:02). We have a collection of 10 or 20 Enhancement Unit in one place, where the knowledge can be shared freely. Till when your government, or ?? officials of your universities come to accept it, then we can take the unit back to your countries, and the rest of it.

But this way, we allow the process of the development be by the Knowledge Seekers, and other scientists from universities to come into to share. We are considering this position, and this is one of the fastest ways of sending a unit, that somebody will accept it, the investment. We'll still carry on with the government. But your units, yeah, they can come and see, they can analyze it, and whatever it is. They want some more units, or one unit, it will be done.

But this way, Knowledge Seekers and the scientists work together to achieve, what you call it, ?? this plasma. We are now developing, we are in the final phase of developing the reactors for the spaceflight for the EU. This process most probably will complete within the next few weeks. And then there'll be placed in the what we call, flight systems, in April, May to be ready for the first flights in June. Part of this work is to bring the Knowledge Seekers from world institute's, and the KF KS to work in this manner.

I hope our teams will put the last touches to the flight system in the next few weeks, then it will be what you call, placed and shipped. Then we will do the next phase of the flight testing for the 6th of June as we promised. And this process we will carry on, will be developed, and we'll see to what extent, (2:04). we can manage to what we call, push the KS to work with the universities, and institutes inside the Keshe Foundation Institutes. This way, we'll see a rapid development and extension to it.

We have offered the same process with what we call, state of Israel. We have offered the same thing to China, and to Iran. In so many ways, neutralization of the science and technology in the hand of .. all the Knowledge Seekers, concentrated in one place. We think it will be a ring a bigger, faster results, than what we see, a lot of you Knowledge Seekers are scattering, you're trying to find somebody, somewhere in a university, or government to accept it.

As we are working as One Nation, we establish these centers. We put your reactor from your nation, your Enhancement Unit, fight system in that position. Come in, you can work weekends on it, or three weeks holidays you take from work to complete the process, and whatever else. Is the freedom of you KS as a group. We don't allow one person, "I want to come and do this." It has to be collectively. We know there are a number of groups around the world who like to do this. But this way, KS share the totality of the knowledge, and then it becomes as One Nation, and not sitting somewhere dusting. These things cost a huge amount of money to sit somewhere for somebody to decide.

This way the Knowledge Seekers will start by nation, or whatever, by district, and the governments will join in, and scientists from the other places, as you publish your papers and show how things work.

Just give us a few more days, and we'll make an announcement. (2:06). This means Foundation has to find huge premises, that these things can be carried out. It's not just that, tomorrow we can do, and finding places in population centers to the sizes of these testing is not very easy. Then you have to find the rest of it, to put it together. But this we see as a rapid evolution of scientists to come and go, and develop, and extend the knowledge together.

Please there is something we've seen a lot. A lot of KS just walk into the exhibition center (EC), they travel from different countries, or whatever to be in Exhibition Center, when it's not allocated time. Please contact the Keshe Foundation when you can do the booking, before your time. Because it's not somebody, can come and just look and go. We have people there, who take two or three hours to explain, to show the connection, the science, and everything, that brings everything together for you.

We cannot handle more than 10 to 15 people at a time. As you go through the process, and Keshe Foundation now is moving to, we are considering, we'll know more in the next day or two, this next week, that we already have two sessions a day, for three days. We're extending it to five sessions, five days a week, two sessions a day. And then we are expanding, because a lot of Knowledge Seekers cannot come in during the week, they're working. One or two weekends a month, we open on Saturday, for KS who come from around the world to see to be part of the exhibition.

This way allows a lot of you to be, (2:08). and to come to see. We ask you to please make a reservation, get in touch with the exhibition center, and .. get to know what is happening, and when you can come in. Because then you, it's not a Zoo to come and see

and go. It has to be understood, and people who are there to explain to you what it is. And we're getting a lot of Germans and Austrians, and the others coming in. But please make sure you book your time coming in. Then we'll see how much we can extend, and it cannot be more than one group at a time, maybe if they push it to 2 groups at a time, but they seem to be interfering between the two.

This is a knowledge scientific, what we call, tour, not something to just come and see and go. Get in touch with the exhibition center the people who organize it and book your time. And just don't jump in, "I'm going to the Linz EC " We had this occasion, a couple of times. We still respect it, they are asked to come back for the afternoon session, or the morning session the next day. But try to help us, to be able to translate the knowledge, or transfer the knowledge completely, from us to you.

Any other question.

Q: ... My question Mr. Keshe is, what if you take a Cu wire and wind it around a quartz crystal, to turn it into an Argonne quartz crystal, and stick it in a 50 millimeter tube of Gans CO₂ and ZnO and COHN (2:10). What will this do?

K- I think a lot of people did that. Do you remember when we started talking about the crystals?

R: Yeah, it does sound quite familiar, actually. You were showing crystals, Geez, that was few years ago, five years, five years ago or four years ago, something like that.

K- These things have been done, I think you have to go into the archives and see what was left as information, by the people who did it.

R: Yes, that would be good. ... I would suggest, he seems the person seems to have a pretty good understanding about what they want to do. Well, he should simply do it. See what happens.

K- Yeah, but tell us back what happened?

R: Yes, exactly.

K- We see some responses in Golden Age of Gans, still appearing, some people doing things, in some places, but you have the testimonials, bring it to the testimonials, and explain it all, disclose it?

R: Yes, they can bring it into the Keshe Plasma Reactor Group as well, we can discuss it there, it's a good place for that kind of thing. And the testimonials workshop, which is every second Monday of every month.

Q: ... (2:12). what is the update on this spaceship launch.

K- We are still going to test on the 6th of June, but the systems are built, and we are developing the last phases of the space reactors. Even I was in the lab yesterday. It's something totally different, than what you're seeing in public. We have changed the reactors altogether, as space reactors, and all sorts,

You will see it most probably, it will be disclosed in June, and then we'll go for ?? It's the prototypes, is getting set up, and done. Testing, getting done, we're still waiting for some of the chairs to be concluded, we have placed order, if they can do, tell us they can do

that, for us. It comes from Iran, and hopefully they can deliver on time, in next two or three weeks, or whatever, that we can place them. It is beautifully done by the Iranian people, who showed us, we have given the order for 400 seats, for the first 100 units flight systems. They have to adjust something, a couple of pieces need to be removed. If they can achieve that, and the backbone to ?? are built, and hopefully, if they deliver to us, what is supposed to be. It will be beautifully done, I hope that what we call, the Iranian team can deliver to us on time, because we have to look for something without any metals to it. (2:14). But at the same time to be in line with what the Foundation is looking for.

This is the picture of the seats, flight seats. The controllers are slightly different. And we hope Joseph can get this sorted everything is what we call, technically, by the team in Iran is ready to go. These are the chairs, you will see. It is in line with what we want. And in a way, you can see the mass production on them, is there to be done. And this there is no metal use in these chairs. We have a couple of technical pieces to do and you will see it

Any other questions?

Q: ... When the flight system is shown, will it be visible? From my understanding is, it cannot be detected, and therefore, can it be proven to those who need to see it, or to follow its movement with our instruments of today?

K - Wait and see it, but.

R; Wait and see, if we see, if we can see it, or not?

K- if you can see it. It is very interesting, we just designed into it, (2:16). what do you call it, ... an addition to it. You got to understand, our manufacturing side is progressive development, and you cannot put all the information in one go, on the table.

So, step by step, as understood more, the what do you call it, we add to it, that they understand the next step. Now the space reactors has reached more or less, its final position. Then a couple of things needs to be done, and then we'll see results, in effect.

The factory is set up beautifully I was there yesterday, and you'll have a production and you have assembly line and they are doing the two. There is no Knowledge Seekers on any of the production lines. It just common man, and they are producing the systems, and the what we call, the first head units has been prepared, to leave for AZ in the coming days. You will see it in the .. mass production in the coming days. We will come to see, you will see the .. Vision units, which carry the Keshe Foundation what we call, knowledge behind them, and in a very, very sophisticated, but beautiful way.

R: - .. Just to clarify for people, (2:28). because there's still a question from say Saseed who's thanking you Professor Keshe for bringing freedom and hope to the world. My question, what are we waiting for on June 6th?

K- June 6, we try to test the first flight system. And it's a very abnormal system, it has no control. We finalized the control system between the soul, and the system, and the craft. Yesterday it was explained how it works, to our team to be able to put it together, and to

be assembled. It's a very unusual control system. And we hopefully should be able to see it working, before June, and then in June, we'll try to create the first FS.

We might succeed, we might not succeed, but the whole thing is getting up to that position. And it's a matter of getting the units for Arizona, and getting the units for NASA in America, and the one in Iran, all coming together at the same time. And there's a lot happening in the background. There's a lot happening in the background.

Checking and Financing from Central Bank Europe

We have various experiences. ... The problem we have is not, it's, there's a lot of problems that's been created by the, what we call, the people who we kicked out of the Keshe Foundation. And it's taken us nearly six months to sort that problem. And it's taking so much energy and effort for us to be able to do this. Those will be kicked up very recently in the last couple of years I'll talk to Keshe Foundation have created mayhem, with lying, cheating and everything. And it's taken us to prove to the governments, and to the banking system, how much lies have been put in. (2:20).

And in a way, it's good, because now they turned towards us. That effort took a lot of energy in respect to development and expansion. But it's over now, hopefully we have come to an end of it. But this what is. You hear us trying to fly but you cannot imagine how much has been created outside deliberately. To create mayhem, to create.

In a way, they said, they'll take control of the Keshe Foundation. The whole aim was that I (the lady) become the owner and boss or to Keshe Foundation. Keshe Foundation is owned by you, as public. I am just a servant. I just provide the services, that it becomes an industry. But the amount of damage has been created by them, especially the Belgians, the ones will be kicked out, is enormous.

But we have managed, we've proven to the government, to the banks that, and the beauty of it is, now they want to know more. It allowed them to open their eyes, that what we (they) missed. And as one guy told me, Mr. Keshe, nobody served you better you're your enemies. Now you understand what we have to do, and what is about to come. Then we can plan for it, bank wise, financially, in the European Central Bank and the rest.

It's amazing how, how much energy we spent in past six months, a year, to innovate, not to prove, but to show, and to explain. That energy took a lot out of us, especially time we have to do. And now it is over, we are reaching the point, (2:22). that we can go to the next step. And the developments and spread of knowledge and technology will take a new course.

They had to sit and read hundreds of pages, which was submitted and understand it. To do these documents is not easy, to sit and explain. You receive instructions from World Bank, from European Central Bank, you don't oblige, you don't comply completely, word by word of it, they lock you down. Same with the government's they lock your companies down. We had to go through it. I had to spend time, and god knows so much energy with

the Keshe Foundation team in the background, without them knowing or knowingly have done a lot to do this.

But the beauty with it, is now that we have the banks behind us, we have governments behind us and now, you will see the changes. These changes should have come maybe six months, a year ago, but we will not ready for it. Now we are ready for it and now we have the support. And this takes time we should have the scientists from different agencies on the table weeks, and months ago.

Now it should be. We are not defending, we are explaining, because we did nothing wrong. We brought a new technology, it's for them to understand, and they are understanding it very well. Thanks to a number of top management's of the Keshe Foundation in different countries we held everything together, to go through this time. And it's over. You will see the benefit of it in the coming months and years, how it was done. And it created. (2:24). it forced the central European banks, a number of the governments in Europe to look at the Keshe Foundation with a new eye, and to understand what is to come.

Especially, especially with a situation in Ukraine, what we have put on the front with, and what we see will become is damaging. We were looking at it with our Chinese team this morning. Six months ago, even three months ago, we're changing around about 7.8 to 8.2 RMB to one euro. Today 6.9. European economy has collapsed 15% in a few weeks. The strength of exchange shows what is happening to us in the West. Keshe Foundation has a lot of solutions, and the government start looking at it, because it's an option to bring employment bring back a lot of conditions. We still get problems, we still have to prove the technology in different ways.

But it is you as Knowledge Seekers who keep everything in the front, and you're doing it. We see a lot of work done in different European countries by Knowledge Seekers. Now you get the support of the Keshe Foundation, you're in that position, hopefully, to move on and bring that credibility, which you look at it as an institute, as a structure, as a scientific organization, which can back it. This is part of our, what is a part of Keshe Foundation ?? space unit are there. Everything else to produce the backing of it is there. But we have, we have overcome a lot of problems. (2:26).

And if it would have been, like two years ago, with people with us (Belgians in KF), everything would have been ?? released. They called the heads of Keshe Foundation, and them, "we're going to take over and be the new owners." KF has no owners ?? except you KS. They wanted to be the owners of the Keshe Foundation. They thought they had the biggest spy, mole, or whatever you call it, inside the house, and they get it.

We can give the writings of what has been said, but it belongs to you. And the knowledge has been done, we've done our work. We still carry on doing. And we see a lot, a lot of benefits, a lot of positive things can come out of Ukraine for the Keshe Foundation, for humanity, in a way of bringing things out, and changing things.

It all depends on how from the next week or two, we push these things through, and we bring it out. We took a lot of pressure. And what I call ?? the full trust of the top people in Keshe Foundation, brought us through that change.

We believe, we are committed to work. This was why Keshe Foundation was going from post to pole, for years, because inside they were preempting our moves. Now there is nobody to preempt. It's done by Knowledge Seekers solid, pipe, and it's going forward very much. We were betrayed for years from inside, and now it's not there. And you saw the mayhem for two years on this ??. It brought a lot of benefit to us, (2:28). and it took a lot of energy. But now you're back on track, and hopefully ?? on the sixth of June, we test. Before sixth of July we test our flight systems (FS).

Pilots for 6th June - people through their soul

We are not looking for pilots. We are looking for those who have a clear soul understanding to become the pilots. We are not advertising, it's the same as Universal Council members. We are not asking anyone to become a UC members, it's your soul who has to make the call, to serve the man, and the pilots we'll do the same. We'll see, we'll take it step by step.

I thank especially the Austrian team, and the team in Arizona (AZ), and Chinese team, the team in Iran and Brazil, and Nigeria, and Australia who stood firm behind, and pushed things through, and carried on, and hopefully we are out of it, altogether. But we'll see ?? ??.

Sixth of June is our target to make the first flight. But we still try before. Everything is in hand, .. getting done. It's an amazing control system, amazing flight system. We show you the way, if it fails, then it's for you as Knowledge Seekers to perfect the job. We have no hesitation to test, because it's there to be tested, it's been developed to be tested. And if it fails, we have to find out where, and how, and what has to be added.

The 6th of June is our time. Because we can do it the next year, and the next year. But at least 6th of June, we'll see our weaknesses. We see if it does, and how it does, what conditions it creates. (2:30). What can we interfere with, or can we interfere at all? Can we create that lift and motion? We have evolved the technology beyond what you see in the exhibition center, is not even what the technology is about anymore. Scientifically, it's a 100 years ahead.

But it's not in public, there's nothing in public. That's one of the reasons we decided we keep the station centralized, then we don't allow others to break into, and trying to see to. They steal from us. The unit was shipped from Greece to Keshe Foundation headquarters, which had the small, actually very basic technology in it, and they stole, we received an empty envelop. The Austrian post they tell us, this is how we received it. It's the same as they did with our what we call, servers, shipping from Holland to Italy, they destroyed it, and they gave us a destroyed box, if you remember.

The enemies of the Foundation are very big because we touch everything. They steal our post, they empty our post, to see what's in the post.

Any other question?

Q: .. Alexandra Brazil. Mr. Keshe, I have no words to express how my heart feels at this moment. The only way I can express myself is in tears, eternal gratitude. Your love is infinite. (2:32). Thank you for not giving up on us.

K- Thank you very much.

K- I want to tell you something very interesting from Brazil. You who are from Brazil, you know exactly what I'm talking about. They published an article on the Facebook, that the ?? gentleman, we have copies of it, that it says, "Mr. Keshe is a Reptilian. And I know it, because I speak to his wife, and she told me he's a reptilian. His ex-wife, and we are getting all the information that, Mr. Keshe changes, and his eyes changes, and he becomes reptilian." It's very interesting, that in Brazil, because the Keshe Foundation has grown so rapidly, how they have made a reptilian out of me. The guy who published the Facebook page on it, says I speak to his ex-wife, and I know, because she told me.

It's very interesting. And then you understand how, they still carry on, in what we call, damaging, or trying to spread, open up the solid background, of what is the truth in teaching in what you call, Brazil. Because it's growing so rapidly, with the work of Knowledge Seekers. So we thank you, the group of Knowledge Seekers of Brazil and the hard work you're doing, but I promise you, that if I am a Reptilian, I would have shown myself by now. (2:34).

Q: (Raphael) .. So he would like to know about the past civilizations, if the technology of the Sumerians, was so advanced as this technology, which you're trying to bring to us today?

K- What is interesting is, the knowledge, the understanding, partially understanding the work of the fields of the universe, even though they didn't have magnets, was understood by different tribes, or those who could see, understand the work of the plasma. Some, (2:36). in contact with the patterns of the universe, learned something, but they didn't have the intelligence, so they copied part of it.

It's not that the race of the man never touched, understanding of the field motions, of what we call, plasma. But they went on a material side, and those tribes, or groups who understood it could not take it further. Or for a limited time, they used it. And then when it became opposite to the interests of the rulers, they was silenced, or were taken off, and they were taken out of the equation.

We see part of these technologies in a sporadic way across a different part of the planet. Some learned by the man himself, some was given to man, but man never understood it, but they copied it. So it's not that one race did something whatever. You got to realize one point.

The knowledge we give in the Keshe Foundation covers the totality of the knowledge of the creation, in ways as you call it, medicine, food, energy, transmutation, transportation, structures of the materials, how to transmute. It's the totality of the package. And you'll understand every part of it, what to do.

When you look at the EU, FEU, in it, you have a flight system, like a ?? Earth moves. In it, you have a feeding station, which gives you the food. In it has a system, which takes what you don't need, it's there. In it, there is a system, if you need to produce material, you can switch into it. So in it, we have the energy system, that we absorb energy from the U. We have made a mini cosmic structure. (2:38).

In the other times, you might see, "oh, this tribe could do this." So they had, maybe a group came to understand, but they cover a very small part of the knowledge, but we see it. It's not that man has been ignorant to the knowledge. Those who understood it, the part they understood, maybe a small piece of agriculture, a small piece of something, they've given it or left behind, or they could not ?? go further, because the knowledge and intellect was not there to carry it down.

But now it is. As much as we say, the knowledge is not exclusivity of Universal Community and man was kept out. It's the same with the human race. Different races have achieved a certain amount of knowledge gain, but in a very small field, or maybe a couple of fields. And this is the problem. We see it. We cannot say man has been ignorant to everything of it. You look into part of the .. South American knowledge, how they used to live. And where you got the knowledge from. How in part of Australia we see part of the universal knowledge.

Because when the man sits alone, he thinks, he becomes wise. If he tries to understand the work of the cosmos. You don't need to be Galileo or somebody else.

This is part of the problem, it's not exclusivity of one, somebody yes, they might have found a solution to understanding the work of, maybe in a different way, of how, (2:40). something works, but we don't see totality, to cover everything, where the man can become independent, man can become peaceful.

This is what you'll receive in the packages of the knowledge we give, because then you decide, which one you have. You want to use the energy side of it, you want to use the food side of it, you want to use the transportation of it. All the knowledge is given for one man to do everything. You don't need to go somewhere, because you can educate yourself, you can test yourself.

This is, we see it, in partially, yes. We see a lot of development in the Egypt. Egyptians part of it, then they became very, very religious, very insight into it, to understand the work of their body, they understood the work of the Universe. And we see some of the work in their structures. In their writings.

We see a lot of it, a huge amount of it, in the Iranian culture, in the scientific world of the past times, understanding, Sufis and the rest. We see the same in China, because when you're concentrate, and try to understand, and unravel, you understand more, and you can tap into. But then you have to see how you can connect it to everything else.

You have because, (you're) Knowledge Seekers access to all that gift. Even some of the knowledge you received about ?? was not available to Christ, or Moses, or Mohammad. You've been given that much more. The knowledge you're given at the moment, is equal to the knowledge of the U, it's you have to decipher, what you put in there. (2:42).

I said, 270, the first time we brought that structure. Now you know, 200 ?? odd, something, and 70 something, teachings, down, you learned a little bit more of what was said in 270 Knowledge Seekers program. It's not an exclusivity. Do we repeat part of it, as it is totality, yes, as you receive some of the work of, maybe a tribe here, and a tribe there, but they were all individuality.

If you look at in South America. Why they understood and they changed their lands with, what was totally nothing in it, to a fertile agricultural land, by burning the wood, creating Nano materials, then with it, with the presence of the salt, the ash they made, they created Gans's, and they could cultivate in a black land, the best beautiful vegetation, because it wasn't Nano material, it was the salt and ash which created the Nano material.

Now you understand with the composite materials in the wood, the Cu, and Zn, or whatever, created Gans's, energy fields, that the plants could grow, where they couldn't grow before. I did that in Italy, in the house (yard). We had a part (of land) that nothing grew. I kept on putting the ashes in the right way. And we start seeing vegetation growing, where nothing could grow (before). I just wanted to prove, that I understood how the people in South America created life. But they could see, but they couldn't understand the knowledge. But now we can integrate. Did they have a knowledge of nanotechnology and Gans production? Or by observation, they understood, it does something, and they followed it.

The only thing they couldn't follow in a way, is the creation of water, that's why they will moved out, (2:44). of their positions, because they could not. They mastered a lot of things, but they couldn't master how to feed themselves, or how to create water. When the water finished we see empty cities.

Now if you look at the new programs which are coming up, how they're mapping out the Amazons, and finding the campsites, and how they went back to bushes, all came down to that process of lack of water, at certain time, they could not reach. Maybe just for a decade and then moved out. We don't find the skeletons. We find empty cities, which means the knowledge was there, but they couldn't carry on.

Any other question.

Q; Farsi translator .. (2:46).

K- I'll try translate

Q: (2:48).

Let me translate you, this is what I said. In the past, the gentleman has been with his wife to the Linz, EC, yesterday out of nowhere, the day before. They expected to see me, to tell them what to do, and how the problem will be. They were expecting to come to Linz, to see me, that they can get a medical advice.

Keshe Foundation and I, do not give medical advice in Austria, or anywhere else. We have doctors, which are appointed by Keshe Foundation and we work through them, that we advise doctors they understand it, and then they translate to a medical system. And I advised the gentleman there is no way I can help him or advise him. This goes back to our doctor in Iran, Dr. ?? who they have to go through, to get advice what to do.

Keshe Foundation in Linz or anywhere else, which we work out of the factories or whatever, we do not get involved in medical practices. We made that very sure. We learned, that how they can use it against us, from the what I call, villains, and hooligans of Belgium, from the king down.

So, do not come to Linz and hope, that you will see maybe me, or somebody else, and you maybe can use the system. The systems in Linz are not set to be used by anyone. And secondly, there is no training for it, unless we run trials, which is done by the supervision of the doctors. This gentleman, I told you, they just walk in, (2:50). and they expect something to be done. We do not do, the team, especially in the exhibition center, are not equipped or trained to use, or do something. And even if we are in, we never get involved in what you call, medical practice. We have doctors in West, we have doctors in Iran and other places that we consult, and they advise.

Thus, what I explained to you earlier on, people just walk in. This cannot be, because we're still making, we start making these temple jobs, and people come in to see whatever. And coincidentally, I just left the building when this gentleman turned up. I received a telephone call, there are people here, we do not get involved in these kinds of things anymore. We tried to help and we saw what they did. We learned, that they have gone through the scientific world with the doctors and we train them.

Thank you very much. What's next?

Q: Salomea ... I have a question related to European Union, because we are a part of European Union. And exactly what do you think about problems of European Union in the future? And how we can solve it, after this conflict, or during this conflict? What exactly are these problems? Energetic crisis, economic crisis? Sanitary, I don't know. What do you mean, exactly. Thank you very much. (2:52).

K- We learn a lot, actually. We got to learn from European Community without the influence of the British and Americans in it. European community as a community of some 29 - 30 nation, works beautifully. It's the ideal structure of independence for collective work. You Romanians have been benefited by it, immensely.

You've been given a 1 billion budget for part of the central computer ?? the IT section of the EU very recently, in the past your or two. Or to share I think, the Czech Republic, or one of the other nations. European Union works perfectly, has worked perfectly. Till it's used as a tool, by the British, or by the Americans.

This is one of the reasons the rebel has been put out, the British were kicked out of it. Because now we see it. You got to live in Europe to understand the beauty of the European Community. We drive from Portugal all the way, to let's say Ukraine, and two borders with Russian, with some of the ex-Eastern Bloc. We have no borders, mainly use one currency. We don't see armies. We don't see all sorts of other things, we see when you go in Africa, from one nation to another.

Before Corona there was more freedom, (2:54). now they stop people, for Corona, to check if you have a Corona certificate, or whatever. Nowhere in the world we can do this. There's a lot to learn from the European Union, thanks to the French, and the Germans, and the Italians, who instigated it in the beginning.

But when you have these kinds of conditions, centralization has brought some pitfalls. And it's very hard to keep such a big family in what they call it, in order, in every direction. We see the present, there's a huge problem, huge problems with the Ukrainian, has arisen for Europe, and Europe will learn from it.

We are going to be short of food, because Russia and Ukraine were one of the biggest producers of what was needed for food production, unknownly, one of the major producers. We're going to be short of gases. We're going to be short of specific gases, which is needed for certain parts of the industry. So we're going to see huge problems in the what we call, in the West.

As I said to some of our top management in the KF in the past 24 hours, this has given an opportunity for Keshe Foundation to arise. What is become a shortage, is what is in our hand to show, and receive massive investments to be able to, replace, to bring in, and we are working on.

The biggest peace nation, as one nation, is the European state. If we can achieve this in Asia, if we can achieve one that's been achieved in Europe, as one continent, One Nation. (2:56). Call it the European Community. The same in Africa, or in South America. We have this, as a United State, we have 50 nations speak one language with different accents, or different combinations of nationalities.

The process is not bad. It has worked, because methodologically, step by step, has been brought in. When a new member has been brought in, they just didn't bring in new

members, when it. Because I was involved with this. The members of the European Committee for Greece, for a while, as part of the Keshe Foundation, in the European Parliament and understanding it, we became very wise how, how it's done the German way, I call it.

They just don't bring a nation to be a member of the EU. They analyze the weaknesses in the structure of the country, economically, politically, financially, infrastructure, and a committee and committees will work on this. Romanian wants to come into EU, the roads, the health system, the other bits, and how it needs to be financed, and how much finance you can bring other countries to be able, who's participating, and what will this will bring to the community. They saw a strength in the communication computers, IT is part of the EU, we saw with Romania. So they boosted it. Romania is now one of the leading IT countries in EU. They cannot do the car manufacturing, because the German is covering that. So they don't create a competition for themselves.

But they allow a specialty in each group, that is become integrated part of everything. It's a beautiful situation. (2:58). But what we learned from Ukraine side, is a lot of things, weaknesses in the structure of development. We saw the shortage of what do you call, Micro Chips. German car manufacturers without Corona being in it, went into part time production, because they cannot take, they cannot get enough Chips from outside. Now they're looking at to produce chips themselves. That will take 15 years before system come together.

We saw Clinton invested 6 billion in Blu-ray to bring it forward. And they invested in the Chip manufacturing, and Europeans who fell into this security, that we always get it, and now they don't get it. German economy is suffering heavily, because for a time, even now Mercedes, BMW, ?? Volkswagen, and Audi and them lot are suffering heavily, they're affecting the economy of the EU because they don't have microchips. Each machine uses 20 - 30 microchips and then you have to get it, and there is no, and it's controlled by the Chinese and the Russians. So they're controlling the West. West has to.

But this gives a new opportunity for the new technology to come in. If you understand it, when I tell you, it's time to, for us if you understand, if you understand the way, now we develop the system control, and the flight system. We don't have, we don't need, we can get by with, if a Chip. So we can give a replacement. The same on the agricultural side, but as I said, (3:00). the time wasn't right for it. But now the time is right, things are getting set, it will be done.

But overall, we will suffer for maybe 10 years. And if the Ukrainian situation, as the Americans said, they are waiting to see a war there for years to come, then there'll be years of shortages in Europe. On the food, we saw in Germany, was it last weekend, the weekend before they announced, on Sunday, that from next Monday, the prices will go up between 20 and 50% in supermarkets. How much of it will be carried out, how much will be filtered through next, buying food, and grocery in Europe, is becoming for some people unaffordable. These pressures we'll see.

But maybe it is the time to introduce the other part of the technology into this system. We have good connections within the governments in Europe in different ways. And we start exploring it, now that we have hope. We sorted out the problems, which was created unknowingly. You will see it. The changes are there, with a Corona, with the shutdowns, everything else.

It showed the weaknesses within the structure, and Germans and the French are excellent. Especially Germans, in when they see a weakness, not to jump in, sit down and analyze, and see how they can do it. How they can prevent part of the energy control, which was done by a Russian. They took control of their Russian investments in gas ?? price, and the rest. The talk of nationalizing it, will be done, or it's getting done, that they protect their nation. The Germans are very good at it. (3:02).

Americans jump in, and then they think. Germans think, and then they jump in. Europeans, and Europe is pretty safe and just the Germans and the French, in a few months they find a lot of solutions to a lot of these. There'll be some hardship in Europe, without a shadow of a doubt. We'll see shortage of food shortages, .. of some raw material, but it's expected. As long as we don't get massive diseases spread in Europe in the next 12 months, two years, ?? it should be ?? fine.

But Europe is a perfect application of what the Keshe Foundation should achieve ?? worldwide. Creating, because 1990s , 1980s when I used to travel from Holland to France, going to Belgium, or going to Italy, all these border checks, armies and the rest, it's all gone. Because then with it, how many soldiers have gone, much reduction in police, or the military forces have come down. It's gone so low that Europe cannot put together an effective military force, because it has no borders to protect for themselves. Skirmishes are for soldiers around the Europe in different borders. We don't have anymore full time armies as the numbers we used to see 20 years ago. That has created a condition of finding a solution peacefully. The generals are ?? planners for future, and working at it received in the background. (3:04).

Any other question?

Q: ... Jefferson ... I want to clarify one doubt, that I was talking to a friend is not related to the you're a wonderful teaching today. But when we are talking about the field strength from the matter state to the plasma, or to the Nano state ... You use it for instance, for Cu from 63 to 59, it's around 8% reduction for plasma. The Fe it's around 25%, (3:06). As I understood so far. We were wondering if there is a relation with the number of neutrons, that are free from the difference of the atomic number, that the locks fuel, the same amount of neutrons, and there are some materials, that we have the many more available. Is there any correlation with this availability of neutrons, free neutrons or any kind of proportion? For instance, if you go to silver, that we have 107. What would be the reduction when we Nano coated it, to create two different fields, so we can create another field from the element that we wish. If you can try to clarify this proportion of reduction? If I made myself clear in this question.

K - ... It's a beautiful question. There is no reduction. No, there is no reduction. There are two points to understand, and it goes back to the fundamental understanding of the creation of the original plasma. The plasma, or the amount of the energy in the plasma, in the plasmatic condition, which is on earth, is created in the upper atmosphere. (3:08). When it comes in touch with the Inertia field strength, will dictate how much of the plasma of one element stays active, and some stays inactive. When we talk about inactive in means linking up, that they do not participate in the total energy plasma.

Or that's in the matter of state, but in Gans state we look at the, how the fields are shared with the others, that the minimum amount of energy, as is needed, as like an isotope of an element is needed. But, if you look at the Gans production and conversion, energy field effect from the matter state, to a Gans you'll find 30%, sometimes reduction in the field strength, but the same material.

This comes to understanding of field interaction. When you have neutrons in matter state as an isotope, because you have the electrons, or you have increasing number of the neutrons in the seed. It shows that, there is something absorbing energy from the environment, or something releasing energy to the environment. And that release does not allow, (3:10). the holding on to the field energy of neutrons to create the nucleus.

Neutrons are what we call, in a state of balanced fields, in the present knowledge. But neutrons are connectors of the fields. When you don't have an extra neutron, means the protons are strong enough to hold on to, so you don't need the neutron to be the balancer. We see some isotopes because of this process, become what we call, decay faster, because the ultimate goal is to, to bring the stability.

In the nuclear industry in the matter of state, we talk about neutrons. In the new plasma nuclear technology, we speak about the energies, and those energies don't convert into isotopes without the presence of Inertia. In a way, a reference point. When you get a composite material, like in a bar, you have a 56 - 54 - 58 Fe, whatever 60, is because the Inertia at a point where, I was created, had the composite plasma, in its presence, and we converted it into matter state. It's not that there was a shortage of energy.

In a way manifestation, which is M, is all the same, but the G is a slightly different. (3:12). So we get the presence of Fe as matter isotopes, but different G field, within the side, has kept the what we call, plasma at bay, and then transformation into matter state as isotopes.

We look at the isotopes, totally different in the plasma technology, field strength combination. One is field, and one is the interaction of two fields, when the matter state is completed.

You don't need to have always the same neutron, because Inertia itself is a composite of different fields. So it changes some of it. It's like you cannot for example, let's say find Fe 40. But in other places in the U you can find Fe 40, because the Inertia at that point is M field strength allows to create a matter, which has the behavior of Fe, but carries not

enough, even protons and electrons in it to make the 50. It's a field manifestation, because it's deeper inside than outside. You're much stronger, you're much closer to center of the plasma, then you're outside, depending on the D of the ?? M fields.

This is part of understanding, of creating composites, first as a plasma, and then changing them to matter state. We have achieved that, (3:14). and we spoke about it 4 weeks ago, about agriculture, where the fields in a field can grow corn, wheat, and rice, and each one receives its own field strength. In a way we create a composite, and a C-H bond, and the amino acids (AA) connection bond with the C-H, to allow ?? any configuration for the protein of the ?? sleep.

You got to understand the totality. And I can talk about this, and teach you for years to come, creation of composites and isotopes, without even having a single neutron in the nucleus. The example of it is hydrogen itself, you have no neutron, ?? ? ?? You're not in a Tritium, you're not in Deuterium, H₂O. How come, where is the neutron ?? , because the environment of Earth allows the behavior of water, but doesn't allow the behavior, and manifestation of another water, unless the condition is right for hydrogen to link up with the oxygen.

You look at the plasma first, and then you look at the Inertia interaction, creation of matter state ??. You can create plasma strength of the gold without a single neutron when you convert it into matter state, (3:16). other things. If you manage to increase the strength of the protons to hold, to that the structure of the gold, it has different dimension, and that's the only way we see ?? ?? we know this knowledge, in the H, Deuterium, and Tritium. You don't need nitrogen, ?? or neutron to create matter entity condition. You should have seen that in production of CO₂ in Gans boxes, we create the condition of the Gans, without any Gans's by interaction of the fields. You don't create the material, you create the condition of it, in the strength that it absorbs, then it changes.

It's literally, if you understand it, it's like a moisturizer, .. absorbing moisture from the room, when you buy the machine. You don't feel any moisture in the room, but you see water gathering in the pot. Dehumidifiers. it's the same process, you create that condition for the for the moisture, as a vapor, or as a gas in the room to convert into the matter state, you create that condition of it, in the system. You just blow it through, and the cold convert it, or the right temperature of it. You can do the same thing in the world of the Plasma.

We are the presence of Mitra.

Any other question (3:18).

Q: ... it's a question about the MaGrav unit or sorry the Universal Body Enhancement Unit being available in Australia. They're wondering if there might be some date, or place that we accept in Australia.

K- We have one doctor who tried to do it outside Australia, he's still struggling with it. As far as we know. Or he is trying to get it in, some sort of, sorting it out. Nothing at the moment, with the present government in Australia. We tried to keep as much as possible away till, the situation is much sorted out. We have a plan, yes. We'd like to put MaGrav systems in the boundary nations around Australia, but not in Australia. This is the discussion and the plan by the Australian KS, and the people, that are there, they know exactly what I'm talking about. These discussions are going for 2 years.

Q: ... How can we start to use your, calls it, a depuration system of water, that I think you have just proposed to the Italian state. Does that ring a bell, so maybe a water decontamination systems.

K- Yes. (3:20). This is a technology we have offered, and tested. In this time, Italians have to find a solution around it. The report has been given, and we are working in the background, we might get something in the next few weeks, month. But you got to understand, that it's not just Italy. The problem is worldwide, the contamination. Till if you understand the Gans production, some of the process of the Gans production can create decontamination, actually desalination more than anything else. But you have to understand what you're doing, and then decontamination, and absorption, and extraction of all sorts of things from the water.

Shall we call it a day.

.. Today, and hopefully, we meet again, in another time and place, and hopefully we'll find a solution for a lot of things. We've got to Keshe Foundation knowledge and see you hopefully medicine
