

# **431st Knowledge Seekers Workshop**; May 5, 2022

(Quick Index done 5p; Part 1- proofed, Part2 - transcript mostly done,; Key Words, Phrases Quick Index ) (Elias Auto Transcription ) Creation part 3, and AA becomes a Cell, excerpts

## **Short Index**

AA is plasma put in vacuum becomes a cell in body; Nuclear decay is really cell division - Fundamental Plasma - Creator - process of creation; Who created fields of Creator; Without this knowledge is physicality a mirage; Is the Creator within me? Or am I within the Creator? Universes also reject what don't need - like electron; Clouds reject excess energy feed life above;

Med-Beds are Hollywood Sci-fi terminology; Why word "plasma" was chosen; AA is 3D ball in body reorganize with current; When fetus becomes a soul - sets up order; 3 generations for man to change to new cycle of Children of Mitra; A lot about Cancer - brain tumor - doctors using T - his pancreas cancer- tumor has a soul interact with it; Universal Council will start growing; We are a collection of viruses and souls; Don't need spirit guides; Body can separate limb to survive - grow back

## **Quick Index**

Amino acid (AA) is a plasma,

Put AA in vacuum becomes a cell of the man - has emotion; Control center of AA is the soul of it;

A cell is an interactive entity, a Fundamental Plasma, a neutron, is the beginning of another cycle of life; It's same process of division whether cell, solar system, galaxy or U; For plasma to gather energies has to be a common denominator center, then there is a gathering of M fields, they reach a point of gathering fields, then they need to reposition themselves in respect to M and G, this is like a rejection of an electron from an atom - same process repeats itself;

Where did the fields of the Creator come from?

What led to the creation of this Unicose, this universe? How was it created?

Or is it the physicality of the man, the physicality of the universe, a mirage? Because if we cannot find the essence, the origin of the fields, we have no reality to the functionality of the Creator, and the created;

The fields of everything originally came from the Creator, the Fundamental Plasma; How much strength is in the Creator's fields that we still see the continued expansion of it today?

Nuclear physicists call it "nuclear decay," but nothing really decays or rots; It transmutes and converts to something else, a new life cycle;

The process of division occurs through the M fields inside the entity, they build up until they reach a point that they are rejected, or ejected from the atom to start a new creation; The same processes happens in universes, where scientists see fields or galaxies rotating in opposite directions, they are getting ready to be ejected like electrons to start a new cycle; We also call that MaGrav positioning;

Soon the flight EU (FEU) will be unveiled, the process of flight through interaction with the STM has never been seen on this planet before; When you enter the FEU it will be empty;

Having the ability to reach the strength of the fields of the emotion of the Creator, if man decides to be as pure as the Creator, detached. Where physicality and the wealth of this planet has no meaning. Where the wealth of the knowledge of the universe, where the wealth of understanding the process of the creation, is sacrosanct.

Is the Creator within me? Or am I within the Creator?

Once the plasma fields get created in the systems they continue to work even when the electric current is shut off;

The body goes to sleep, but the soul, and the fields are still active. The same as when you go to sleep, but everything still goes on, and you call it a dream. How can we use these positions? Or do we learn from them, that in the future, we switch off the physicality, and we let the fields of the Soul of Man, the body of the man, the cell of the man to take, what I call the freefall. Take the path, that is allowed by the strength it has gathered, to find its (new) position.

Isn't this what happens to us when we die? But now, through understanding of the system, we do not need to die. But we can be day to enjoy the fields of emotion of these fields within the system.

Now, the science of creation goes back to the Fundamental Plasma, be it a neutron in a atom, be it a proton in atom, be it an electron within an atom

I always objected to the term "nuclear decay," the proton and electron decay also if you call it that. They are all made of the same.

Scientists only count the number of protons and electrons, but through transmutation they could be different protons and electrons, not the same ones;

The teachings don't stop with the KS online, many advanced scientists, universities and institutes are developing the KF knowledge in the background - they will bring the changes.

Theologists are also studying every word of these teachings Vatican and Islamic clergies of Iran.

Now, while man is walking the streets, his soul is working with the other souls in the background, living a schizophrenic life of the physicality, and the fields of the universe. With the new EU we'll bring the position, that man is continuously aware of both, which

one is enjoyable, and which one he wants to work with, and how to coexist, that the use of the matter state of the man by killing to consume will come to an end.

Can see the Christ in EU with own eyes; Would the Pope have any position when he stands in front of what he preached to be his master? But he lied in his name, and he betrayed in his name, and he killed in his name. I promised you years ago, I will return the stones of Vatican back to Coliseum, where they came from.

Not only man eats and rejects, Universes and galaxies do the same thing - like an electron;

Clouds are another way the planet rejects excess energy it doesn't need to the solar system; Feed AA above the clouds;

When we launch the FEU - other groups will also start releasing new T, not only KF; Fields that led to Creator - still dividing after billions years

## **Break part 2**

Med Beds are a term made up by Hollywood Sci-fi, KF T is totally different; EU and FEU this T has never been seen before - not in public;

Ukraine peace negotiations; KF knows what is going in the background - public doesn't - only knows propaganda of West and America, and Russia - we see in the neutral position; Doesn't go well when leaders are comedians or actors, etc, don't understand politics; Foreign mercenaries paid for by Vatican are trapped underground tunnels from Nazi time;

Fields of Creator don't go through decay - different mindset - wrong way to look at it - divides converts to different strengths; Nothing decays or rots;

Nuclear decay says some fields radiate out and heat the water;

You don't eat the proton or the electron, you use the fields, which are released by them, that they don't need; In the space would the body carry lymph;

Another explanation of AA and vacuum condition; During Gans making AA changes according to the environmental fields - we never paid attention; AA can be forming inside the water instead of on top; Plasma gets created in reactors - continue to work after shut off electric current - can damage equipment and micro chips; Because a plasma is created without you knowing it;

One of the reasons we chose the word "plasma" is because you see it in the chamber - but it is like an illusion;

When you work with plasma reactors the AA can get formed in the chamber during the vacuuming out process - then it's free to take shape as it wants - it can inadvertently damage the equipment - Nano coat the microchips- like Nano coating the wires of your house with a MaGrav;

This is exactly what happens in our body. The AA due to the salinity and the vacuum condition of the body has the ability to take shape, to become the cell of the skin, middle layer, or top layer, or bottom, or become cell of the bone or whatever;

AA are not stacked flat like a sandwich on top of each other; In a vacuum they act like a 3D ball and line up on top of each other, but organized. This is why we tell you to connect voltmeter to plate during the Nano making - the battery in volt meter puts an order to the balls; The body organizes the plasma through electric currents which pass through the body; Why the veins are tapered and get thinner farther away;

Blood transfusions can also pass emotions and effects, but our body has an adaptor to adjust the blood to what it needs; Human body cannot adjust to animal blood; With this knowledge can help with transplants by understanding the new soul and how to change it;

The body of the man is a very complicated, but very simple system, if you understand the way it works.

Discusses cancers and using KF T.

Brain tumors occur to emotions, a hit to the brain, or evolution; Sometime creates a point of gravity for the cells to start changing - need to understand cause to help; Doctors are using and testing Gans's on own cancer - but medical community not ready to accept; Understand the interaction of the STP and the STM -then they'll find a solution for it;

KF would have had a massive development in treating humanities diseases, but stopped by criminal nation of Belgium; We could have relieved a lot of your suffering by now;

Mr. Keshe had cancer of pancreas, used T to process himself, and is still successful. Tumors have a soul - if you know how can interact immediately with it. Can change evolutionary cancers;

6th of June will test flight EU; no media coverage - we do it on our own; Will create big changes; Even if we don't find a pilot to operate FEU with soul, we'll still test;

When does life start or the Soul; The fetus has all the fields ready but no structure to it, all the genetic information's are there; It becomes a soul, "when the whole interaction starts setting up its order."

Children of Mitra will be born with soul first and than the physicality gets set up; It will be brought gradually to mankind over 2 or 3 generations; New man will not kill; Through the process of the childhood, we'll change the process;

You have to adapt the soul to become the receiver, and not the physicality. But the physicality man has been in charge for billions of years. It will not give up its chain of command. So we create a new cycle of the children of man; I may sound far fetched to

you, but it's the way it's going to happen. You have no choice. The choice is made and it will be done. And it has already started.

We'll teach you how to conceive children through the soul; Gradually the soul will give more to the child, then he'll take less from the physical; Society will be more happy and balanced; We have Mitra with us, she cannot make a mistake, she understands the mayhem of the human race; It has to be ingrained within our structure, otherwise it's just a fashion;

Talks about new language members will start joining the Universal Council;

Many world leaders have cancer; Putin knows about the KF technology;  
Artists will do workshops in Linz adding the Gans's to their work;

Soul is made from the soul's of the mother and father, it's an amalgamation of the memories of both sides. You're not a soul, as a soul on its own. You are the beginning of that structure. The beginning of the making of a star, the seedling of that process; You inherit more than the RNA and DNA of the man. You will remember the process of the creation within the STM. It's a different dimensions.

The children of Mitra will speak about things - the parents will think they are crazy; We'll have a huge cultural problem with the children of Mitra. Many of our doctors will call them schizophrenic, or there's something wrong with them. But in fact, it's us not understanding, that man has evolved. It's evolution in the STM, and the physicality will follow. Even the process of conceiving will change.

Mitra is a mother and knows the problems of the man, she will not make a mistake. The change has to come through the culture and society. Man will create the soul first, and from it the child in the physical D, and then feed it through the same process, and gradually we'll change. It has to be ingrained within our structure, otherwise it's just a fashion

Q: We as a physicality or soul, made of a collection of cells, viruses, bacteria, and their souls? How much of this body, or soul, of the formed community are we?

K- All of it, we are part of it. We made it, and it has made us. So we're all in it.

Q: When we say, "we", we are referring to the viruses, bacteria's, and everything we carry along with us?

K- Yes. You would not have been here, if some viruses are not in your body.

The new generation of man will carry the memory of these viruses and things in the RNA and DNA. We are part of each others pain and suffering. But we can handle it through the new T;

Hand signs made to Obama - those who understood the meaning; Communication with Universal Community will be through the Soul; They manifest themselves if they want to; Mr. Keshe communicates through the soul with his children - he knows when they

need something; If we felt all the pain when we walked down the street we would never get anywhere - we can block certain fields;

But gradually as we evolve, these things will be resolved. We need to create a new generation of man, and that process has already started.

About spirit guides; We are not that kind of organization. You have to understand how the fields within the body of the man works, by understanding science of creation, then we don't need prophets and guides.

Now instead of you physically working to get something you want, you have learned to engage your soul, and if it's good for me, then I can have. Then we say, we have a spiritual guide who helped us. No, we have learned to trust in ourselves.

The body has a mechanism in it to separate a limb if needed to survive. We had it since the time we were more or less reptiles. Like lizards that can grow their tail back. When man was a mammal hiding in holes from the dinosaur, if his arm got trapped he could separate it to survive. It's ingrained within our physical D. We have the same with our soul and emotion. Learn how to communicate with the STM and STP.

End 431 KSW quick index

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

Part 1 proofed

(:06). Video from Spanish group, How does plasma science work.

K- ... This recording he has done a lot of work in the background ... he has made many programs .. is appropriate for the teaching of today. In a way, elevating his soul. He brought so much to the Spanish group so much dedication to the work perfection to the work ... (:08). Starts video ..

(:10) .

(:11).

**Put AA in vacuum and get Cell of the Man** (:11:40 to :43:28)

K- Yes. Thank you very much for playing that intro. And I'm sure a lot of us have seen a lot of these pictures many times, we read the books, we read the papers, we made the

Gans's, but how far do we know? What do we know? And how much have we thought about this, (:12). or it's just what appears on the screen, or page. When you look at the one of these pictures, it comes down, that even an amino acid (AA) is a plasma (PI). So all of us in the Keshe Foundation (KF), the way we look at our amino acid is something oily, flat on top of the Gans's, we make.

But what happens if we turn this plasma, into a vacuum condition? How would the amino acid, then look as a plasma, is it truly 3 dimensional. Then when you look at it, then, if you can turn again the amino acid of the CuO, ZnO, CO<sub>2</sub>, CH<sub>3</sub>, or other materials which you make, put them in a vacuum condition. Appropriate for it to take its optimum shape, and what we call, emotion, what would we get? For sure, we get the shape of a cell of a man. For sure for the first time we will see that structure.

When who work in a correct vacuum condition as the body of the man, you see things in a different way, things behave different way. And then we can see how, we can replication of the man by the fields, by the plasma of it. Then by the essence of the center of it what we call, (:14). the operation center of the amino acid, or what we call, the soul of it.

But there is one thing more fundamental than all this, when we put it in 3 dimension. In a way, that cell as an interactive entity, is a fundamental plasma, is a neutron, is the beginning of a cycle for another cycle.

In the books, and in all the teaching, we continuously speak about fundamental plasma, which is by its nature, the initial, the beginning, the what we call, the what we see in the outset of the work, of what we call, movement, motion, of what we see as M fields, in different direction, in different strength, in different sizes. But in totality, as they have one common denominator in the center, they behave, they are connected to, and they interact with each other.

You only can bring plasma together, when you have common denominator base function, in respect to the environment, which they exist. One Plasma might not exist on Earth, but that fundamental PI exists on the moon, which we are not aware of, we don't have awareness of it, we don't have education of it, we haven't been there.

A fundamental PI on another planetary system, another solar system, another galaxy is different, but an essential understanding, they behave in the same manner. What has happened with this fundamental PI? We talk about division of it, (:16). when the fundamental plasma goes through a cycle of division, and creates and releases, what we call, nuclear decay. How does this nuclear decay takes place? How does this nuclear decay starts, that it reaches this point?

This nuclear decay is caused by the interaction of these fields inside, and become gradually stronger, that its internal central field force, in respect to the internal field force of the original plasma has to show a reaction, MaGrav positioning. And what it does, when the field strength in this plasma reaches in force, equal, or in line of interaction,

similar to the original, then it takes its position. In taking position, it shows as the plasma has divided, what we call, nucleus decay.

So, in a way, electron, you call it, the Soul of Man you call it, or the start of the creation of any entity, as a plasma starts this way. You call this fundamental plasma, where by strength interaction of the fields within it, has, goes through a nuclear decay. But what is the other understanding of this technology, this plasma? You call this one nuclear decay. (:17:50)

### **Fundamental Plasma - the Creator**

You have another fundamental plasma, we call it, the Creator. Where through the attraction of its fields, (:18). through interaction of the fields of itself. Going through a decay has created the Creator and Mitra, or the soul of the Creator, and the rest of the creation. (:18:12).

But still, within this structure carries the same. We have chosen different names for the same process, fundamental plasma, the original, the Creator, is the same. The original, where through decays, and decays, of frequent developments, and interactions of other fields, has led to creation of many galaxies, universes and the rest. Where in this process, you become another elements as we know in the cycle of the knowledge of man.

So, when we talk about the fundamental plasma, and we talk about the Creator, there can be no difference. But the fundamental question to ask, in fundamental plasma of neutron, we guess, we know what fields could be there, and how they came, because they came from another process.

What about the fields, which led to the creation of the Creator which led to creation of the plasma of the Creator, that in its division (audio dropped ) .. this forces, lead to this. (R: Sorry, Mr. Keshe, we missed about the last sentence. K- I can't ?? remember )

K- We know that the fundamental plasma comes through what we call, the evolution, division, interaction of the fields of the Creator. (:20). So we see step down process. We see interaction of the fundamental plasmas, in with each other, or together, or amalgamating together leads to creation of new cycles of life. We call it, a cell of the man, we call it the body of the man, we call it a tree. So, what happened to the division of the fields of the Creator, which instead of the man or the tree, became galaxies, became universes, and the rest.

Now, we understand, now we can go a step further, to be able to comprehend the process of creation. To understand what, and how, and where we came, what we were created out of. And in a way to find, comprehend, to walk the path, the reverse way to the Creator. Or, in a way, become part of the fundamental plasma, which led to the creation of totality.

But there is a huge question. Where did the fields of the Creator come from? What led to the creation of this Unicose, this universe? How was it created? Or is it the physicality of the man, the physicality of the universe, a mirage? Because if we cannot find the essence, the origin of the fields, we have no reality to the functionality of the Creator, and the created. (:22). Where did the fields of the universe come from? Where did the fields of the Creator come from, that led to the creation of the Unicose, the universe, the man and the rest?

The question is very deep, but understanding of it brings man to one point. The powerlessness to understand the totality of the creation, at this moment of time. No medication and no meditation will bring man to understand the process, the structure of the creation.

But fundamentally, the fields of the Gans's, of the amino acids, of us. The other animals, once upon a time, was part of the fields of the Creator. Once upon a time, was part of the process of what we call, Fundamental Plasma. But how much plasma, how much fields was within that original creation and the Creators plasma, that now we still see the expansion of it, we still see the division of it, we still see the nuclear decay in a larger scale, than an atom, what we call, nuclear decay of the universe, nuclear decay of the plasma.

In cosmology, we have seen this, if you look at, and in some of the papers and book, I referred to this, (:24). that, in some parts of the universe, cosmology sees fields, collection of galaxies, which are rotating in the opposite direction to the environment. And most of these are created by the interaction of the fields of the other universes, but some of these are those electrons, which are ready to depart.

So, even we live in this universe, and what are scientists observe, what our scientists tell us, we see these patches. Which one of them indicates the interaction with another universe, and which one of them will indicate, this is the new electron, the new universe to be propelled out of this universe, to start a new cycle.

But when this U reaches its destiny, or destination, or what I call MaGrav positioning, in respect to the other universes, would it stay the same size, or when take fields, what is free within the environment of the Unicose and expand itself to bigger U, that it can be equal, and it can be tolerated, and could be balanced M and G, in respect to the other universes.

In reality, man has just put a toe into the ocean of the knowledge of the creation. We still got to feel the warmth of it, and then we have to trust it, and then jump in it, and that jump in takes a lot of knowledge. How to survive in this ocean of the knowledge, and the reality of the creation and the Creator. (:26).

To what extent our scientists have ever understood this process? We just look at galaxies, we look at stars, they are there, they hit each other, they are in that position, we see the same star in the same position for thousands of years. But where did this all came from?

Where did this come to be part of? When the fields, which the interaction, and what I call, amalgamation led to the creation of the plasma of the Creator.

And if this is correct, which it has to be, because we see it in the image of the nuclear decay. When it comes, where did the fields of the Creator, come from? Is there another dimension above? Or forever we go to God, to God, to God, to God, and the gods, which is the father of the God, the father of the God, of the father. Then we are back in the same cycle.

But essentially, when did the first M fields, which led to the creation of the present universes and Unicose, come from? (:28). As I have always said, if we cannot understand it, and we cannot explain it, and we cannot physically, tangibly, lead our knowledge to understand it, then everything we have around us is nothing but a mirage and a façade.

And then it comes to the point, was it the fields of the strength of the emotion, which led to the creation of the Creator, or did the Creator have as field interaction created his own emotion? In the Koran, blessed Mohammad says, He has 100 attributes, and that's only in the matter state, not in the plasma state. The attributes of the Creator is incalculable, we cannot even talk about it. We just talk about what we understand emotionally, in the dimension of the fields of the matter state of this planet.

Then it comes, that if with our knowledge, that if with our understanding, we could find the fields of emotion of the Creator, would we be able to interact with it, that emotion transfers our connection? Even the field emotions of the Creator has a strength, otherwise it cannot interact. It's an effect of its, (:30). existence, and to be there, to interact, it has to have a dimension (D). Then can we in the new processes come to understand this? Can we in these processes, go through the condition of understanding the totality of the motion in the universe?

Many of you will be shocked when you will see the flight enhancement units (FEU) process of flight and interaction with the Soul of the Man (STM). (It's) never been seen at all. It's a technology, which has been hidden from man. It's understanding the process of the creation through the soul of the system, system be it the aircraft, be it the flight system, be it the Creator, be it another person.

The new flight system, which you will see, will be unveiled in a very short time, you will see something is never been seen before, never been comprehended, that man can reach this level of understanding, that he does not even need to move his physical body, where he can transmute his soul, and manifest himself, himself even within the soul of the Creator. If the man understands the strength of the transmutation and transportation of the fields of universe (U).

In the new Enhancement Unit for flight, you will be baffled when you walk in. You'll walk in within the fields of the universe, you will walk in with the understanding of the creation of the condition of the universe, then, if your soul finds its strength within the strength of the system, (:32). it'll find its position in the fields of the universe.

They'll be one of the most amazing flight systems men has ever seen. And its simplicity will baffle the scientists for centuries to come. You got to understand, to be able to travel, within the oceans of this planet, you need, it took man years to create submarines, to be able to hide, and be inside the cocoon, we call it the submarine, to be able to move like a fish.

Now we have brought the knowledge of the "submarine" floating within the fields of the universe. Having the ability to reach the strength of the fields of the emotion of the Creator, if man decides to be as pure as the Creator, detached. Where physicality and the wealth of this planet has no meaning. Where the wealth of the knowledge of the universe, where the wealth of understanding the process of the creation, is sacrosanct.

Then, you become that circle, then you become that fields within embodiment of the field of the Creator. And one day when your strength reaches the strength in power of time, you'll become another U, another attribute embedded with the fields of the Creator.

Then the question comes, is the Creator within me? Or am I within the Creator? (:34). The motion of the fields of the cell of the man, the amino acid (AA) of the body of the man, is another connection in line of the Totality of the existence of the complete ??. And we're still in that process of being created as a cell, to further on, to create a new dimension. And then for that, again to become part of the new D.

Then as I've said many times, if this process exists, that we go from the soul of the Creator, to creation of the Unicoise, then there must be an environment, that this Unicoise is born into. Then the question is, what is this? Where we as a creator, meeting, and we pray to, and be seen as the omnipotent, itself, is part of another structure.

You cannot blow a balloon in a room, if the balloon has no room to grow. The universe as we see, cannot expand with 1 million kilometers an hour, if the room for it to expand doesn't exist, but where is that room? What is that room? What is the limitation of the understanding of the man, in respect to the present knowledge of humanity.

Would Man lose himself, when he reaches to that level of understanding, or would man become satisfied and matured, once (he) understands this understanding. All the wealth on this planet worth nothing, compared to the fraction of the knowledge of the Creator and creation, from man's understanding. (:36).

#### **AA Gans put in vacuum :36:05 to :38:20**

Then you need to understand more about what you do in these Gans Boxes. You just made a Gans, you're still in the dimension of the what we call, field strength of this planet. What about when you put this Gans in a vacuum. In the near future, many of you in the Institutes of Keshe Foundation will do this, because it's the only way you will see the reality of the interaction of the fields. Where we can take one Gans, and change the environment of it, and see it the size of a football, then see the interactions with it.

If any of you have worked as much as I've done, and many of you in the laboratories, where we work at minus 11, minus 12 in a vacuum condition, you see the beauty of the creation. You see how things take shape. You see creation within the vacuum chambers. We see the energy they release after we shut down, after when they ?? release. When we did these tests in Bruges, in Belgium, in the Ukrainian made, special space vacuum systems. When we shut down our reactors, when we shut down everything, then the fields used to play. Then we several times, could not control these fields, and they went through the channels of the fields of the man, and they burned the system (out) after we left. What I call fields transportation, transmutation, where they cannot find a space and they travel, because there is no limitation with a matter of state of the man (matter cannot block the fields). (:38).

Then, can we become part of that field? Then, can we become part of that, what we call, non-tangible fields, and travel the embodiment of the body of the Man, or within the environment. (:38:20)

In the production of the new systems for flight, again, in the lab, in production, our people saw the same thing, after they switched the system off, time later, the merger of the plasma fields, with no electric connection, has melted the boards, because the fields are still in existence.

The body goes to sleep, but the soul, and the fields are still active. The same as when you go to sleep, but everything still goes on, and you call it a dream. How can we use these positions? Or do we learn from them, that in the future? We switch off the physicality, and we let the fields of the Soul of Man, the body of the man, the cell of the man to take, what I call the freefall. Take the path, that is allowed by the strength it's gathered, to find its position.

Isn't this what happened to us when we die? But now, through understanding of the system, we do not need to die. But we can be day to enjoy the fields of emotion of these fields within the system. Be it interaction with the mother, the dog, or feeling how the furniture feels when I jump on it. Everything has an emotion, everything has a feeling, because it's made of the dynamic fields. (:40).

Now, the science of creation goes back to the Fundamental Plasma, be it a neutron in a atom, be it a proton in atom, be it an electron within an atom.

### **Nuclear Decay - really a conversion Proton Electron Decay**

In the present nuclear technology, which I always objected to the nuclear scientists, we always speak about nuclear decay. But in fact, we have proton decay, we have electron decay, which means when the fields inside builds another dimension within them, and then not holding, they go through the process. Our nuclear physicists always have made this limitation, that a neutron decays. God forbid. A proton came from the neutron, has the same attributes, has the same properties, has the same expansion and extension on the fields and interaction.

When our scientists come to understand the process of the proton decay, electron decay, then we will move more in understanding the dimension of the creation. Then, we understand, that when we go through a division of an atom, it's not only, that the one neutron changed, or neutrons repositioned themselves, we have to see which electrons have changed as well, which protons have changed again, ?? gained ?? Just because we see the numbers, does not mean it's the same proton, doesn't mean it's the same electron, it doesn't mean same neutron. (:42).

Then if we understand this process, we go back to the fundamental process of the decay, fundamental decay, and the fundamental elements of the universe, which goes back to the process of the division of the fields of the Creator.

As a nuclear physicist, this misunderstanding, this words of only neutron decay, has bothered me for decades, but you cannot speak about it, because they don't understand it. Even our own nuclear physicists, cannot, never been taught, could never comprehend, what is good for a goose, is good for a gander too. If it is good for the goose, it's the same thing as for the gander. If it can eat the same grass, it does the same thing in the body as the other.

This is the part of the knowledge that you as Knowledge Seekers (KS) now have to react, interact, understand to be able to go to the next step of the fundamental process of the creation of the elements, movement of the fields, energy transmutation, and transportation and transmutation in energy, or matter state, and the field states, which is part of the universal process of creation.

(Creation excerpt : 43:28)

The reason I brought this topic up is, that when you see the new FEU, you will wonder what does it do, till you get in it. But when you are in it, what can I do? The process is for Knowledge Seekers to understand interaction of the fields of the plasma (Pl). (:44). Many times, many times I have said this, stop looking at the matter State, look at the fields, interaction of the fields, and the behavior of the fields.

With the new flight system, you have no choice. You bound to, you have to be able to understand it. There is no control panel. There is no nothing when you walk in. You walk into an empty room. It goes back to the box we showed in Einhooven, the "empty box of the energies of the universe." You walk into that box, your soul becomes part of that box. You're another stick hanging on the wall, of the cap of that box.

But It goes back. What do we take from the fields of the universe, and what we give to the fields of the U, to keep our emotion, and our soul in respect to the emotion we have, intact. That, at the end of the process, we put in a chicken, we get out the chicken, we don't put in a chicken and get a turkey on the other side.

**Beyond KS - Advanced Space Scientists - take T further**

It's fundamental for those of you who are playing with this knowledge to understand. Many of you might think, we talk to you as a Knowledge Seekers, you worked at Keshe Foundation. KF teaching are listened to by many scientists in the advance research laboratories around the world. Many of them work, once they understand, to develop a new dimension in technology. (:46). These type of teaching is for them, especially in the space level and beyond.

Our Knowledge Seekers, what we call, those who understand and look after the depth of the knowledge, does not finish with you who are online today. The scientists from leading universities, private Institute's, and religious organizations, which listen to every word of the teachings, to see what they can grasp in their field of expertise. And how they can expand the knowledge.

The understanding of the expansion of the energies of the Soul of Man covers both those universities and the structures, which are theologians, and the scientific together. We have this in Vatican, as much as we have it in the Islamic Republic of Iran in universities, with trained clergies, and teach them to be a doctor, teach them to be a physicist, and teach them to be the others. Where they try to understand on the ethos of theology, the understanding of the true essence of the creation. And these scientists will expand the knowledge of man in a much deeper way, than our Knowledge Seekers, who just make Gans's.

It's the time to understand the process of interaction of the theology and science together, that all of you become an expert in understanding and the responsibility of the emotion of Soul of Man in respect to the physicality of the man. The new Enhancement Unit flight system will force us to that position. (:48).

We throwing man in the deep oceans of the knowledge of the universe, by releasing the new flight Enhancement Unit. We hope none of you will get drown in that knowledge. But you understand it, you process it, and with it, you create the new dimensions of existence for mankind. The 4 flight systems, which are now getting ready to be tested in June, will bring a new dimension to the flight of the Man, what I call, the flight of fancy. In a way, what you want, you will achieve. And when you come back, "I've been there, since we haven't seen you, you haven't been there." I've seen the mother, and the mother says we have to do this, but the mother died 14 years ago.

But with an understanding of the new structure, you have not ?? grabbed, you have created the fields, that already had a connection with the mother, to enhance, to see the mother in the dimension of the Soul, but to the image of understanding of the fields of the eye, is the mother.

**Is what we see a mirage** (:49:08 to :51:04).

Then it brings one fundamental question to all of us. Is what we see a mirage, that through the conversion of the information in our eyes, become a mother. If we can make

that in the dimension of the sleep, how come we have not made it in the D of what we call, awake-ness?

Then is the reality to the dimension, of the physicality of existence? Or is it always a mirage? Or with the new technology, with the new understanding, we create a condition to be able to travel between the two. (:50). The space scientists, the scientists of cosmology, and the scientists of what I call, theology, would release of the new enhancement flight system, will have a big dilemma, how to work it.

Many of you walk in and you say, it doesn't work. And many of you walk in and you tell a lot. And then who do we understand, and who do we comprehend in about the talk, and who, which one of you is not ready, has not understood, so cannot reach that point of interaction. The new enhancement units for flight is one of the simplest, but more comprehensive ways to teach man the first step about the motion, about interaction, about transmutation within the fields of the U. (:51:04).

This week, I was in the lab, and when I saw the structures next to each other, it brought me to teach more, for you to understand, in the near future, even these structures will be non-tangible, than the physical way you see, in the present EU.

We tap into the energies of the universe, and we give to the Soul of the Man, what it needs from it, to elevate itself, and than transmute itself through the same process, to reach the dimension of the Soul of the others, to create a dimension of the reality of the existence, in the dimension of the Soul of the Man, not in the dimension, physicality of the man. (:52).

### **Soul is working in background**

Where the man now walks the street, but the soul is working with the other souls in the background, living a schizophrenic life of the physicality, and the fields of the universe. With the new EU we bring that position, that man continuously is aware of the both, which one is enjoyable, and which one he wants to work with, and how to coexist, that the use of the matter state of the man by killing to consume will come to an end.

Try to understand the teaching of today, try to understand exactly what is talked about. Try to work in the D of the fields, understanding the strength field division, and then try to understand how these are interconnected with the Soul of Man, Soul of Physicality of the man, the physicality of the man, and the physicality of the environment, and the soul of the environment, that brings you to that point

### **Stones of Vatican back to Coliseum**

Then, is man ready to see the Christ with his own eyes in the EU. I promised you this years and years ago. Would the Pope have any position when he stands in front of what he preached to be his master? But he lied in his name, and he betrayed in his name, and he killed in his name. I promise you if you go back years ago, I will return the stones of Vatican back to Coliseum, (:54). where it came from.

Because the man has to understand the process of the theology, the creation, and the state of the matter state, that one cannot abuse the other. When man dismantles the Vatican by his own hand, he will not even return it to Coliseum, where the man abused the physicality of the Man, but in Vatican, they abused the STM in the name of the Creator.

Then men becomes knowledgeable to see, man will put the frock of the religion, and what I call, abuse of the Soul of the Man on the doors of the churches, the mosques, and the rest. We all walk the same. Where there shall be no king, as we all understand the kingdom comes from the understanding and knowledge of the Creator, and not with the frock of the man, and abusive behavior of the others physicality of the man.

We reach, we are in that process, to launch the flight system, and then to expand it, for more people to be able to see, to be able to reach, to be able to understand. Most of the time you're not aware of it, even when you walk in the exhibition in Linz. When you pass one of the units, just be aware, the unit is alive, it's still getting fat, it's still putting weight on, and its the same as you, but it's there not to eat you, but to consume the energy fields of its environment ?? for its existence. (:56).

The new flight system, which will be released in the coming time, will teach the man to fly in the dimension of the Soul of the Man, and not the physicality, and then man decides where, in what shape or form to manifest is the dimension of physicality. As we say, in English, "I would like to be the fly on the wall to see what happens in that room." Now, you have an opportunity, that you go in as the STM, and you become fly on that wall to see what the man says about the man. Because now you are in charge of it, you understand the process of it, and with it you gather the knowledge of the creation, and not the wealth of the man.

Try to understand the work of the Fundamental Plasma, the creation of it, the process of its existence, without these hullabaloo of the Quarks, and Anti-quarks, and everything else. Look at it as a dimension of a planetary system. Look at it as the interaction of the fields of the cell of the man. Look at it as the interaction of galaxies in a bigger dimension as orbits. Then you will see, and you'll understand the process.

### **Universes eat and reject**

As I taught some times ago to one of the KS, you think, that you are the only being, that you can eat and reject. (:58). The same thing happens in the universal, in the galaxy state, when the field energies absorbed are not needed, are gathered in one place, and in balance of the fields, rejected. As what we call, maybe an electron. It's the same process. It doesn't mean that every field entered, or in entry, and then conversion is needed by a cell, by a galaxy, by a universe. They are gathered in one place. And then in time when they gather strength, they are rejected.

We see these in the oceans of the man, with the plastic ocean, what they call, islands. (Huge accumulations of plastic pollution in the oceans). They come from all over the

planet, they gather in the heaps in the oceans. And they create a D. Then what happens to them? How do you reject them, it's the same as an electron. How it's going to be rejected?

### **Clouds reject excess energies out to space**

We see these in the clouds above the skies. Not all the clouds are just what you see as the wind blows, but they are amalgamation of the field energies, which the planet cannot hold on to. It gathers together, breaks it up, and creates a new dimension of the fields, which some of it, a fraction of it, comes towards Earth. The rest moves outside the planetary system. When you see and hear the thunder, it's not that what happens under, where you are, the fields which the planet cannot hold on to, which are gathered in the upper atmosphere are rejected out of this planet. Otherwise this planet would be heaped, with dumps of the fields of the solar system.

Part of the process of the clouds, (1:00). and interaction of the fields, in the planetary system like Earth, is rejection of the fields, which cannot be absorbed. And at the same time, rejection of the fields for the creatures, which are above the clouds. As we've seen in videos and confirmation by NASA, and the space scientists. We think we get everything, but they need the energy systems of this planetary system, because they are part of it.

Then you open your eyes in a new dimension. What does the Soul of me needs and holds onto, and what does the soul of me, gives out, that it can give opportunity to the other souls to live ?? physicality's to live.

Go back to one of the talks after a long time, where I explained about why the grandparents love and enjoy their grandchildren. They use the energy, which they carry, it gives them strength, new dimension, what they don't need, but it's what is needed by the old man. We do that in a young age, but we forget about the process, because the hugging and the emotion is much more, than the truth in what actually the emotion is, and what it does.

### **Launch FEU - others will also release T**

This is the process of understanding the fields interaction of the U, and mankind has no choice, no alternative, but understand it in a very short time, as new technologies in space are released, not only by Keshe Foundation. In a very short time, once we launch these systems, others will develop parallel, (1:02). equal, better systems than us, because they understand part of the knowledge, that we were not interested in.

The race to space truly starts now, that the mankind as a whole with the free teaching of Keshe Foundation, has allowed the totality of the Knowledge Seekers of this planet, to start racing to be able to expand, to use, and everything else. The interest will not be in how much harvest will increase, it will be how much happier we can make the harvest to be, that while it's there, it enjoys existence, because we don't need to eat it. It's not there for us to kill.

The process of the technology is finished. All those Knowledge Seekers, who were leading as Knowledge Seekers with just making Gans's and Nano plates, and whatever, is over. We respect and value the knowledge they brought, but it's time for the whole of Keshe Foundation Knowledge Seekers to move up to higher level, to understand more, to understand the interaction of the fields, as the matter the state of the condition of the use, is over. Even though we keep you busy, because the new KS ?? have with it.

Those of you who were the original Knowledge Seekers and you've got stuck, that "I'm a leading Nano plate maker and the science of plasma Gans making," you got stuck in last century's game. Move up, move to the new understanding and create the new levels of education for our Knowledge Seekers to come. We still teach people how to Nano coat, how to make Gans's, because through that, they feel the fields of the Gans. (1:04). They understand there is something more, and then they develop to the next step.

But those of you who understand in a higher level of education, universities and scientists who work around the work of Keshe Foundation, step up. As the English say, "if you don't want to be a tomato, you'd better catch up." It's time to move on. It's time to understand the process of the interaction of the fields of the condition.

Fundamental Plasma, as you all talk about it, and it's decay, change the Fundamental Plasma, to Creator, and then understand, how much you still need to understand about the whole process. As I've always said, when you read the books, the three books, depending on the understanding, depending on the comprehension, you will see it fits into another dimension. It's very generic. It's written in the language of a nursery, in the language of the professor. It depends on what level your understanding is. If you are still gaga and going, in the nursery, or you speak about the creation and totality of understanding in universities.

### **Fields that led to Creator - still dividing after billions years (1:05:42 to 1:07:01)**

Interpretation comes by knowledge, but the book is the same, and the understanding is the same, and the process is the same in all levels of the creation. But there's one point of mystery, which man cannot understand at this moment, (1:06). and he's not mature enough to understand. As I said, where did the fields came, that it led to the creation of the Creator, and it's so powerful that it can split, after billions of years, still create man and still carry on creating new dimensions. How strength, and compact are the fields of the Creator, that in what I call, division and separation across the universe, still have a long way to go, to fill the full space given to them by the Unicose, to grow into the dimension of its existence. Then who made that limitation of the room of our Unicose? Then that comes to another point of understanding of it. (1:07:01)

Thank you very much for today. I hope I opened your eyes in the old teaching, but with a new eye, and new understanding of totality of what's to come.

**Proofed to here >>> continue on**

(1:08).

### **Med Beds made up by Hollywood**

Q: ... Recently, I found information about a new technology, that is about to expand on Earth. They call it well, .. but I think she means "med beds," which are quantum beds made of plasma. There are experiences of people who go to dimensions eight and 12, in the in the etheric. Have you heard of this type of technology? (1:16).

K- Yeah, Med Beds is a term came in sci-fi TV programs, as we've said before. The people who use or have come up with this technology is partially from our Knowledge Seekers in the background. Who have tried to implement, they use quantum, they use the word quantum from it. It is partially the work of the Keshe Foundation, we know one of our KS who was very close to us, broke off with the Russians trying to promote this, but stays in the background not to be known. That is what the call is scientific, but not a scientific term, but it's a film, what a call, came from Hollywood words, of what we call, a space, or what we call, programs, or movies.

The technology, the Med Beds, what you call, it is totally different. And it's money in quantum physics. We know a couple of our Knowledge Seekers are working in the background with a group of scientists to come with this, what we call, a Med Bed theory, and the work of the others. But you will see the Keshe Foundation Enhancement Unit and what we call, flight system (FS) has never been seen before. It's not a knowledge that is in public, and it doesn't bear any similarities to, what you call, these systems.

It's a space level, highly plasma space level. (1:18). and it's totally different, different game.

here >>>

We do not work on the understanding of personal understanding of what we see with these technologies. When you create a dynamic system, even recently, the Italians and some Germans made these kinds of things. And so with Dr. In Germany, and we saw Dr.

Roderick was made some systems with cancers and rotating balls and many of you have made those coils double coils and angular Wonderwall. When you enter the fields created by man, and this systems, you always get the reaction and depends how if he's in tune with your body or not. And I started this very closely in trials in China, where we did with some systems without people knowing thinking what they thought they were doing, but in fact, I was working in another dimension in the US or the system. They were interested in one way and we were interested in how the soul will decide enough on the physicality size to change. And we see it meant but it is a fancy name from the television, sidebar movies. But if you create dynamic fields, you will have interaction with the body automatic because it's against this magnetic field dynamic itself. How you feel onward is different but how you targeted Is there

Any other question?

Q: Salomea .. Could the ninth of May be the date of peace negotiation, (in Ukraine) and not a new stage of the conflict? Let's send this wish in the souls of all decision makers. What do you think? Do you think the 9th of May could the start or date of start a peace negotiations?

K- What does that mean?

R; Do you think 9th of May .. start of peace negotiations. About the Ukrainian and Russian situation.

K- Ukrainian Russian situation it's very clear what's happening. It's, I think, I tried to keep out of this situation, because we know more than you do, and we understand what's happening in the background. You will see the new movement, new actions, new interactions, it's.. You have to understand how this thing is developing. And how the West is propaganda, the way the Americans wants you to see. And the propaganda from the Russians, what they want you to see, and somewhere in between, you see it with a neutral position.

You have to understand whenever we gave the work to actors, and comedians, and footballers, we always run into relation, (1:22). with bankruptcy and problems. We saw Reagan, and now we see Ukrainian president, which is a comedian. He is actually a comedian. He thinks the life of people in Ukraine is a comedy. He wants to make you laugh out of it. He never understood the power of politic, what it is, means and he just plays the game of what I call, cartoons with his nation.

A comedian should never become a politician. Especially leading a nation. We saw the same thing happen in Liberia. A footballer became the head of a nation, and the nation is going bankrupt. He doesn't know which end of the table is the head of the table, or the bottom of the table. We've seen the same thing with a cricketer Imran Khan in Pakistan. He had to be kicked out of the office, because he married a rich English aristocratic family and he managed to buy himself presidential, the Prime Minister ship. Brought the nation to his knees.

HERE >>

Ukraine came out of what I call, comedian become very deadly. And they play with him and he played his niche. It's all there was on stage. Making jokes or at least seems to make two jokes with the Russians. good about that is a portrait blocks, deep Jewish background. This is the question which is posing now. And leadership around the world. How such a deep Christian nation has a Jewish state. Not that there's something wrong with it. But how was he put in opposition? A lot of question marks about what is happening in Ukraine. Now we see in the background with our latest things coming up. Multiple has accepted the defeat in Ukraine we might see the next step which is a submission you go to see the defeat of course to see the the word boy very curious, which was from the sea on a different disguises Pope in Moscow very soon. Remember, he went to the embassy. And now even though a lot of angles to this, to this situation, Ukraine is not just one and we're seeing deliberate destruction 50% by the Russians of 50%, by Ukrainian themselves because they're not Ukrainian, you have to understand where we see the intensive fighting. They are the mercenaries, which reporting estimated 10 to 15,000. mercenaries are in Ukraine that getting paid to shoot and are getting paid in advance if they kill. So they don't care who they should. This MARPOL situation is about 1600 of them trapped in there. from Albania from so called Far East, dark from North Africa. It's a business game, but they don't tell us on that. There is another nine to 11,000 of them on the west side waiting ready to get engaged with the Russians. This module situation you will see going step by step is trained missionaries, mercenaries that come to earn money doesn't matter what happened to the nation and are blowing everything up. And just been given ammunition towards you like

**MT Keshe 1:26:31**

this Ukrainian situation is is not what they made us to see. In the West, it's much more deeper. It's got everything now involved in that testing the latest systems. The Americans are benefiting more than anybody else by it with the testing that they haven't had time for a few years, testing the new things and failing we had we had a bunch of the new what you call rolls backfire to themselves and killed more Ukrainian than anybody else. And then they blame the Russians for it. Because Ukrainian got all the faulty systems which they wanted to get rid of all these gets paid by Vatican so that as the

**MT Keshe 1:27:22**

peace in Ukraine, it's a long way from our What do you call it, call it a piece. This will come and pour sides with the feet of Vatican indisposition as a financier every bullet every mercenary rageous is underwritten by that

**Rick Crammond 1:27:49**

you're so surprised one time to see that the Vatican blesses the weapons that they send out and just seem like such a contradiction.

**MT Keshe 1:28:03**

See, we've seen this religious fanatic Wars is worse than to religious ones, you know, with Israelis and Arabs, you know what they're talking about the depth right to the same

ball. But the Christians fighting Christians, not what it can come in between. There's something that happens.

**Rick Crammond 1:28:27**

I see that there is a news item in the last two days that the Pope is wanting to visit Putin. What do you think about

**MT Keshe 1:28:39**

I've seen this headline but our sources in Vatican tell us has already been arranged. They have to talk to be able to do it. You got to understand new have cornered the West things have cornered Russia. But we in the West will pay heavily for this job with our lifestyles. We've seen gases has gone up by seven times in this scenario. The Americans are trying to find the new gas resources coming to agreement in the background with Iran with a gas resource in the Persian Gulf, the putting pressure on Amana, the tar to export more of the material. They want to ban the Europeans Russian oil but the factor is this is a blessing for the other part of the world which they cannot buy oils. Which of the what do you call it? The Russian base material they have to change the filters and is in general. The winner in this war is what I call the Americans and the Russians, both are benefiting by it. And the rest in the middle they're paying for the shortage of food shortage will be up in next two years, we will see. We will be headed by a colossal price increases in food due to Ukraine, Russia. And the Russians have gone for the ports. This is something which a lot of you have no understanding of, because you don't look at the dimensions we do. These ports are the signers are the bread baskets up many middle eastern and southern to Western Europe. Resources and Russians went for it. The price here is not the land is the product of the land. And 1000s and 1000s of tons of grain has changed hand under Russian occupation. And it's become a Russian asset. Russia has already been paid for the patient. And that's why they went for these ports. All the grades are moved to the post to be shipped out. And they went and they took. And that's why they're fighting in what he called the port areas. Because they were they can handle everything else. But railways are on the hit and to stop them guns and bullets moving the ports are there because all the grains have been moved to sitting in in Ukraine is a breadbasket of oil and rain for many, many nations. And they got their hands on. And doesn't mean it's going to be shortage. It's just that there's another boss in the office but the same grain is sold in the accounts. And they'll never come back. It's become national assets at a rush. And as we hear now, even the farmers are encouraged to farm in the field. battlefields in the big cities we see they want to show their life in other parts cases normal and Peter works on whatever it is the machinery normal days to harvest the land. We don't see all of it we just see a few pictures they chose us to see in the rest

**MT Keshe 1:32:47**

and this port, this port which has been used as a long history into second war as all of us it has many Underground's comes up kilometres out of thin steel industry. All this mercenaries come and go through these tunnels and Russians owning these properties for years they know all the articles. This this is still packed we was used for resistance against Nazis. The Ukrainians when they were fighting Nazis, and is well known this has got as somebody said this but more hidden underground stuff in the tunnels in London,

where the battle is not just hitting a steel worker is a rat ball of mercenaries which came in to come up to it but they got trapped into it. And some went in there to save other lives and they got trapped into it.

HERE >>

Any other question

### **Fields of Creator don't go through decay - converts to new levels**

Q: ... (1:34). regarding today's teaching. Is the field of the Creator also going through a decaying process? If yes, then what to

K- It doesn't decay, does not decay. Even in nuclear technology we call it decay, it's the wrong word. It converts to new levels. Decay we have the mindset, that it gets destroyed and rots, and blah, blah, no. It just gets divided into different strength.

They still have the principal in the center, you still have the transition, and what we see outside, ingoing and outgoing, what we call, MaGrav fields. Decay is the wrong way, because it doesn't actually decay, it doesn't reduce in its strength. It's the collection of the newer strengths, which can interact with the environment. Some of the fields, which are not useful to both new entities, when it converts, becomes the fields, which they ?? decays. That's why when we speak to you ?? about nuclear conversion, we say when the neutron splits into electron atom, a proton. it's not just. We always show some fields radiated (out), that in the terminology we use, to heat up the water, or whatever. These are the energies, which are of no use to both parties of a division. But they become absorbed, they become a food. This is what we're trying to encourage Knowledge Seekers to understand this process, that you don't eat the proton, you don't need the electron. (1:36). You use the fields, which are released by them, which are no use to them.

If man understands that position, you'll create a condition, and it's in the structure of the Enhancement Unit, the FEU, this is what we do. We keep on telling you, we don't feed you, but we create a condition of the fields in transmutation, that your body can accept as food, as energy, that it can survive. The design of the new space units, is we are we tap into the universal energy every second. We develop the technology to tap into Universal energy every second, and feedback what we don't need, that's why you don't have a toilet.

This is to understand the process. Nothing decays or rots, or disappears, it just becomes amalgamation of new field packages, and what is not needed as a field ?? ?? once you're in the new technology, we rely on these fields, which are not needed by an electron and a proton, in what we call, nuclear reaction. We absorb it in the water, we boil the water. But now with knowledge we have, we don't need to absorb it in the water, to boil water. We are absorbing the water, which is in the body of the man, and then it's used in the lymph's by ??

But the question comes in, when you go to space would our body carry lymph? Would our body carry water? Or would the composition of the elements of the body of the man, (1:38). get rid of what we call, matter states, or what we call, the liquid states of the replication, as we call, lymph.

We don't have water in the space, so it has to change to a new dimensions, and new ways of adapting into the environment. Many changes will come over time as the man stays longer and longer in the space.

## **AA and the Vacuum Condition**

R: Mr. Keshe, you mentioned earlier in their workshop today, about the amino acid and what would happen in a vacuum condition, and you mentioned the vacuum of the body and so on. But it reminded me of the early days let's say, of the Keshe Plasma Reactor Group, which was originally based on the vacuum condition reactors, that you were working on at that time. One of the first things that you taught us in working with such technology, and when you mentioned the minus 10 minus, 11 vacuum condition, and so on that, that you wore gloves, like surgical type gloves, when handling the equipment, that would be in that vacuum condition, and it had to be squeaky clean basically, (1:40). because the oils on our skin would evaporate in that vacuum condition and contaminate the experiment, basically, or could have could, you know, introduce side issues and so on.

I wonder if you could talk about that a bit, it kind of struck me when you said that was the amino acids like are, they're normally flat in our, CO<sub>2</sub>, or especially the Fe kits, that we put together, but the CO<sub>2</sub> kits, other kits that form the amino acids. They're like you say, a two dimensional layer, but in a vacuum condition, they'll open up. And it opens up to the imagination, what could happen there. It seems to, like you're saying also about in the vacuum condition, lots of interesting things happen, especially the more vacuum cleaners, but yet there still has to be something there for the fields to kind of work with as well. Could you talk about that a little more, and about that idea of that amino acid opening up in the vacuum condition?

(1:41:18 to 1:53:00)

K- In a way, what we see as the amino acid on the top layer of the water, is the M field pressure difference between the Gans water below, and the atmospheric condition above. If you happen, maybe some of you noticed, maybe some of you always blamed it on something else. Some days, you create a lot of amino acids, and some days, you don't. Some days, you see the water murky, but some days the water is clear. But some equipments you make, (1:42). make a lot of Gans's, and some don't make a lot of Gans's. But one thing which you have not noticed, look at the pressure gauge. Look at the condition of M fields in that day, in that equipment. How strong is the field of the Gans, that maybe you get the amino acid above the surface, or the reverse, you connected the other way around, and your amino acids actually, you're making it, but it's in the water.

When you work with the vacuum systems, not the normal vacuum systems, what I call, chamber vacuum systems, where you see the Totality. You see what can be done, then you understand the dimension of the plasma. Sometimes we worked on the high, what do you call it, condensed fields.

The process is very simple. You have a chamber maybe about 20 liters, and you run the chamber for sometimes, until you extract most of the matter state materials out of the chamber. So you have a what I call, (1:44). as much as possible, matter free but field, field flow tank. When we used to run the .. flight system, we don't run the chamber while we're trying to vacuum the system, because the ratio of the chamber to the system is where, it's a huge difference, it's a 100 times more. So what we do, we go reach to the level we want, and then we switch the system off. We hold the chamber, then through the lines which are connected, we connect our chamber, to the big chamber, and it sucks all the material out.

If it's the first time you run, okay you have some gases you filled in to get, but sometimes when you are going for a second, or third test, or whatever, there is a plasma created inside the chamber. So, when you vacuum, and ?? hopefully you have a chamber, not only of a vacuum of the material, but you have a chamber of fields, there is nowhere in the universe, which is field free. So, if your system in the process of testing, created the fields, which matches the chamber, which happens most of the time, you move that plasma into the big chamber as well. And then you see, because these chambers are glass front. We see, like three dimensional, what do you call it. It's a fields, it's an entity, it's a plasma, I call it. (1:46).

One of the reasons we chose the word "plasma" and we developed it this way, is because you see it. If you can hold it, if you don't turn on your chamber to vacuum again, these fields as a plasma you created in a small chamber, now in a bigger chamber, in some cases, they gather together. And you see, it's like illusion. It exists. And if we don't allow to empty the chamber, and we run the chamber to vacuum while this is in, we always damage our systems. Because the energy of this plasma, this three dimensional entity, now has found a path through to what we call, the system.

This is how we know when we talk about these things, that because we see it. And sometime when energy we created, because you have to understand in tests, we used a combination of gases. It's in some of the teachings, what gases we use. And we used some of these gases for a specific job, we create radiation through gases in 2 or 3 layers, not in one layer. And secondly, in our chambers, we have nuclear base materials already embedded. (1:48). So we create a very strong dynamic plasma nuclear fields. And because of the material we used to create these fields, we have a combination of the elements, and fields energy, as what is on the chips, on the microchips of the vacuum system.

So when we release it, or we try to pump it out, while the fields are still in the bigger chamber, they go through the electric channels to the chipboard, Mother chip boards, and they damage them ?? . They are there, we don't see any burning, but they get

plasmatically, Nano coated. When we take them out, we see them, they're perfect, the chip is perfect. We X-ray them, we don't see anything. But when we start cutting into some of the chips, you see the what we call, plasmatic Nano what he call, layering. The system is perfect, but now it's Nano coated, they become resistor to the condition of electric current.

I've spoken about this many times before, even when you use your MaGrav system, I speak about the Plasmatic Nano coating the wires in the houses, you use the MaGrav system more or more. This is how it comes about, because the system creates fields, and it's because it's Cu, it matches with your wires, and it goes through it.

This is part of understanding how we can put amino acid, (1:50). and then if it's transferred into the chamber, you'll see it. Now he has a freedom to take shape.

This is exactly what happens in our body. The AA due to the salinity and the vacuum body of the man, has the ability to take shape, to become the cell of the skin, middle layer, or top layer, or bottom, or become cell of the bone or whatever.

Our amino acids are not stacked like a sandwich on top of each other. They are in a vacuum, they are like a ball, they stack like when we go to the children's playgrounds, they have these huge cages with a lot of balls in it, and children jump on it, that's how your body is. It's a bunch of these balls on top of each other, but organized. This is why when you will make Nano coating, I tell you put, just for one second, put a wire to a power supply, or battery, or whatever, that you reorganize (the plasmas), our body reorganizes through electric currents within the body of the man, and a heartbeat. What sits on the stack on the other.

The body of the man is that just by, happened to be amino acids, and stacked like what I call, you know you go to the Kebab shops, they put flat layers of meat on top of each other. We are not created that way. We are not flat meats put on top to make ?? , but we are M G exposed environment in a vacuum of the body of the man, and we are like balls, depends how much current it passes, how much fields comes from the immune system, how much fields comes from the blood, and how much goes out, that it gives a dimension, a cycle of the fields. (1:52).

Look at your body and look at the size of the veins, and spread of the veins in your physical body. The upper body bigger veins, takes more information, as it comes to your extremities, fingers, or everything it reduces, because you don't need to make those big cells, you don't need to confirm, that kind of the things.

It's not just that Gans's, everything has to match to create that condition, that it becomes a cell in a specific position. When you transfer AA in the vacuum condition, which is in the body of the man, it takes its shape, it's a ball shape, it's 3 dimensional, not flat. If you understand this, there's a lot of applications for this, huge applications. (1:53:00)

Q: ... Brazil. In our blood, are all our records, emotions, magnetic fields and behaviors. So the question is, why are so many people needing a blood donation? And what happens to the person who donated the blood, and to the person who received the blood? How can these records interfere in the life of the donor, and the person who received the blood?

K- Surely when you receive blood, what you received carries emotions and effects. But our body has an adaptor, it adjusts that blood to what it needs, the way it needs. And if it fits, it keeps it, that's why you have different blood .. types, (1:54). and one doesn't fit the other. Because the body cannot decipher, cannot transfer energies ?? up to.

When you see blood, the body immediately, through its ?/ immune process, .. adapts or adjusts the blood into your consumption, in what you can use. And if it cannot do that, it becomes a foreign body, and it can kill you. That's why you can't inject animal blood into your blood sometimes, because it doesn't fit, doesn't transmute the information, and the body cannot adjust it.

If you understand this, you can (make) a lot of .. transplants without any problem, because you change the position of the interface, ?? with a new interface, the understanding of the new soul, the new body, and then you see how much it changes. The body of the man is a very complicated, but very simple system, if you understand the way it works.

### **Brain tumors emotion**

Q: Can you explain in a simple way? Why do brain tumors occur?

K- Same as everything else, you have to find out what has been, what has created that gravity. Where? If you look at some of the brain tumors, you can connect it to emotion.

### **Doctors using Gans's on their own cancer**

When you go to a doctor nowadays, they say, "Oh, you got a brain tumor." But go and study how, and what that position of the brain, where the original tumor is, or was, or was created. (1:56). To what emotion is connected. And then, if you go back to the patient and talk about them, about that emotion, you will see the cause of the cancer. Unless you get it by being hit accidentally, which is 10 20% of the cancers.

Then because they can analyze it, they can understand it. You find out, "oh the tumor has disappeared," or reduced, but it's still there, they can't solve it.

At the moment, we are working with a couple of doctors who they are, are .. medical doctors, and they have cancer, and they are monitoring their cancer, and we advise them what to do. And watching them how they change, and how things are changing, how the tumor growing, or how the tumors are reducing, what effects they make, and they're monitoring their own cancer. And we are learning a lot, especially from one of them, he is a doctor in cancer.

He talked to me a few weeks ago, doctors are puzzled that I'm still alive. And they don't want to accept that the Gans technology works. With his cancer, he should have been dead, a year, or two years ago. But with using the Gans's. But he's monitoring himself, he's doing everything, and he is an amazing doctor. He says, according to the present medical books, I should have been dead a long time ago.

But we still see, suddenly the cancer grows, and suddenly it stops. And then we look at another angle of what we missed in the process of what should have been done. It's amazing how we are learning from doctors about ?? (1:58). and their behavior of cancer. They literally made themselves volunteer to test these things on themselves and they have access to everything. They do their own blood test every week, they do their own X rays, and whatever they need to do. We see, oh it might have grown by one millimeter, but if we ?? were not, they would have grown by 30 millimeters.

### **KF Technology for Cancers**

So we're still controlling what it is, what it is. Brain cancer as primarily, if it's not due to what we call, evolution, or to an accident, that you've been hit and it compresses a point, that becomes the seed for the cancer. If it is emotionally based, you have to find out what that emotion, wherever that emotion, that brain tumor is. Understand it and then understand the interaction of the STP and the STM, and then they'll find a solution. They find a solution for it.

If you understand the prostate cancer, you can resolve, you can delay, you can stop, you can live with it. Knowing that understanding the technology of the what we have, and how cancer works. You can do a lot. But unfortunately, we cannot teach these anymore, due to the situation we have with the, what I call, demented nation of Belgium. We stopped all these processes, and many of you are suffering because of it. And we are watching it, because we cannot get involved. I can help many of you to talk away from many diseases.

I was diagnosed with a cancer of the pancreas. (2:00). And many of you if you remember, ?? ??? larger image due to that. But over the past 10 - 12 years it's fully managed, I don't even think about it is there. It has been through the process of, and it went till recently, I could not eat certain things, because of my pancreas would collapse, and you see this when there is a pancreas liver condition. You know it straight away with your excrement, your critical, whatever, the color of it tells you. So I even passed those points over time, using the right process of the Gans's, for myself. I walk away with it.

But the medical application of the Gans technology is so huge, and we can help many people. But unfortunately, we have this, what we call, criminal nation, and ?/ the way these leaders work. But they stopped it, they stopped the world to benefit by the technology, which is many, many people benefited by it.

You can literally, instantaneously, now we have the knowledge to interact with the tumors, anywhere in the body.

You have to understand even the tumors have a soul. That's how they gathered, if you can interact with it, you can ?? move it. But while it's there, "I am not changing, till the guy changes his habit." He changes the state of his son, I am not moving from .. prostate. .It has to be understood, it's not a ?? ??

The medical application, and the health application of technology, (2:02). would have been world renown with the things we've done. We rebuilt the brain, we brought the blind girl back to sight, and anything else you've seen. But its the criminality in the eye of pedophile king, and his entourage. The father, the same as the son.

We should have been able to help many of you, with the technology we ?/ know. Many of you write to me, my son, my daughter, my child, my husband, my wife. I can guide you, the way I guided Giovanni to build a system for his daughter, to build a brain, which has never been done in history of man. You can all do it at home. But as long as we are free, we can teach, and God knows how these people will die, and their agents ??

There is no reason, if you understand the fundamental cause of the cancer, that you can interact with it through the technology. Even through technology to your emotions. Even the knowledge is deep enough, that you can change the what we call, "evolution cancers." Evolution cancers can be interacted, you delay their motion, or you speed up their motion, to pass that pain, that the body can ?? cooperate. Both ways can work, but it's always better to go forwards, (2:04). then going backwards.

While we are on this subject about the technology, as we said last week, and the week before, Keshe Foundation has started a teaching for those of you who are beginners, who want to make the perfect Gans's, or how to make Gans's, and how to use the plasma Technology. We have a started workshops in Keshe Foundation Linz, and it will be once a month, at the moment till we add other parts to it. The first workshop starts on the 11th of June, maximum capacity is about 20 people. One of the well known KS in the production of Gans's, he's there, and he will leave the workshop.

HERE >>

and if you want The Keshe Foundation website is already there, you can book yourself while the workshop is a Saturday from 10 to six on the 11th of June. We're hoping the following week after that, we'll announce it next week. It'll be for those who do the pottery, and a week after maybe for the painting and sculpture, and one of our long term Knowledge Seekers will recall around us will teach these things with you. And we can make their own pots and everything else will, pressure or, or, or the call sugar, or the restaurant or other things you want to test. And Rick, ensure link on the private chat, you can put that up. That's the link you need to go to book your race. If you go on the private chat to communicate with your apostle link, we can go to the Keshe Foundation shop. And from the link of the workshops and register. And if it has the number will be put to the next month watch. Have you seen it?

**Rick Crammond** 2:06:20

Yeah, I'll put that up now.

**MT Keshe** 2:06:24

There is a what we call a fee of 350 euro for the day. And we supply you with the material which you need in the workshop to do and the reason with a pottery, they're almost certain the place and everything else will be provided. And if you need to buy any additional material that you know that whatever we've done, we're hoping to have one of our Knowledge Seekers future how to do the body lucky crochet knitting, making dolls and things that are embedded with dancers for different feelings and emotions. You will see this on sale on the Keshe Foundation shop in the next few weeks. That is a new product line and person who makes them on a workshop everyone at workshops for those of you who want to learn how to do it, you can register for it. And we try to bring more technical features on this site. I have to explain again, the Keshe Foundation in the coming time will release the name of one of the leading agencies hopefully, for employment, to work with Keshe Foundation around the success we're setting up that were you this agency the hopefully once we complete our work with them, will be the sole way to be employed in the Keshe Foundation is around. Doesn't matter which country you're in, to be employed. If you're a Knowledge Seekers or not, or whatever, you have to go to this agency and they do all the checking and everything needs to be done before you're employed by the Keshe Foundation. So, if you want to start learning and going to the workshop, Keshe Foundation lens this is the face and nobody else anywhere on says we teach one is in vain so other just ignore it is not done. It's done by our Knowledge Seekers. So we did not have it Yes, but this is the way we control mystery should be done the way we do it. We're trying to expand the application of technology that hopefully once you learn it, teach it don't come to these classes that you just come to be in one workshop try to share the technology and knowledge without question.

**Rick Crammond** 2:09:04

And that's good, too good to hear Mr. Kesh. And it's interesting the pottery painting and sculpture classes. These are traditionally sort of the in the arts and category more than science, and so no, as well as bringing science to the soul or to spiritual science to spirituality or science to religion. You bring his science to the arts community as well.

**MT Keshe** 2:09:41

Sorry, carry on.

**Rick Crammond** 2:09:43

Now, go ahead and feel something. Sorry. I was thinking I'd like to see an extension of that into the building materials industry. For example, concrete is one of the materials that uses very large percent of the world's energy and pollution. From the whole process, there's a new process, what they call bio ceramic, concrete or bio ceramic materials to be used for building. And it seems like that ties into the pottery, which is a ceramic type material, you have these connections with the pottery, people in China and so on. And it seems like a perfect match to branch out into building materials which are stronger than

concrete last longer don't have mold and other issues. And you can embed the GANS technology right into the building materials into the building itself. And it seems like a perfect structure. With that combination of the bioceramic, which is a different basis than the normal concrete.

#### **MT Keshe 2:11:05**

We are in the background, so Knowledge Seekers with us now they know who they are and what they're talking about. Keshe Foundation is getting involved and is involved in this field. And we have people who have developed new technologies, which actually come into the Marine Corps, lens Exhibition Center in a very, very near future, where we actually get involved in applying the technology in this field of construction. And I'm sure, very soon, we cannot hide it, and months left before he comes out. We don't mention where and how but some of the knowledge sits in the background know what's happening, and we ask for please to keep quiet it goes public, where it is what it is, Keshe Foundation have been appointed as a honorary member of the board of the committee, which will building four new cities in one of the leading Western Europe nations. We've been asked, we've been appointed as honorary members to advise in the newest based on what technology in hopefully every aspects of the construction of the music. I'll be attending the one day conference and operation of the beginning of this work as the representative of the Keshe Foundation, and our technology is considered to be acceptable by the people who had this to be in every part of the building, construction of the formula cities, which is a brainchild of a man then is to see the support of the government. And in some ways Cashman, he can support the part of the development of this technology, we are getting involved in that kind of things, very slowly, we are now going to people, people are seeing the advantage what it can do, they're coming to us to do it, and the tiles and ceramics and concrete and everything else. This part of the work has been around a long time allocation of vision. And we know the facts, you have the strength, the brings the changes in the environment as that ocean of the CO2 in the house, how it changes the emotion, and how we can use it for heating facilities. You're all getting involved in a very silent way. But part of what you supported us in the past two weeks and we are still asking for proper support. We are not finished on actual listening support for some more. And the process is that way, we are getting involved by the by word up now. As I was told very recently, somebody from NASA leading scientists from NASA, has recommended by the scientist to look and work with the Keshe Foundation, they want to join the Keshe Foundation. These are leading scientists from American Space Agency, that are recommended by NASA scientists to study the Keshe Foundation because that this is a next step in the space technology. And obviously, when I heard about the email, and how they want to come to collaborate with Kf, it's interesting, but they're holding back we have to be very prudent and be very careful how we do these things. And we still we went out to you two to two weeks ago, for financial support, Keshe Foundation prototyping to become poor out of and get this program completed. And we still need that support. We have not finished and as I said many of you support us with small Some big loans. And that allowed us to be able to take us to the next step to complete. And hopefully once it's done, you will see new dimension, Keshe Foundation of tactile Knowledge Seekers have been around and supporting the student. Some of you gave us the wrong feeling you just wanted back when the foundation completed this

process, and some of you gave us 1000 And we wanted three or 4000 back for it. And some of you will give us 1000 said, Give me a 2000 back, we all because it's part of us your take on the foundation would be you have Knowledge Seekers give us 1000 ISO 4000 back, Hungary so compact, because it has to be that for all of us we achieve that kind of ethos, we keep our ways and then you have your donated 5000 10,000 US alone to be returned. Oh condition. We're expecting this needs to be done if you buy into the next Oh.

Any other question?

### **When life or the Soul starts**

Q: Mehranez ... Yes, thank you, Rick. Thank you. Good morning. Everybody. Thank you for yet another disclosure of another aspect of obvious years of knowledge should give to all us humans and everybody else. Thank you. And if I what you were talking today, we were talking injuries. Interesting program yesterday, about this universal force in the universe intention force, that when we create something, we can use that a college universal law, I think you call it universal order. And everything is just so organized by this give and take. I had a question today, because when you were teaching, I was walking, maybe you said it, I didn't get it, at that just talk about I see. I see the affinity law in everything like the original fields, two original fields, they come together one is ready to give and other ready to get. And they create the whole thing and plasma.

(2:18). I feel like kind of, can we say if there is any instinct for survival wish for creation in this ?? smaller unity and, or fields? The second question is, does emotion exist without the souls? Or it absolutely has to go where there's a soul?

K- What do you mean by that?

Q: I feel like a duality, and this duality looks like the harmony, instinct of harmony? Or is it just by chance by accident? And second question ..

K- I don't understand your first question. What do you mean by that?

Q: Like everything has the same pattern, from very small to very big. So these are so much like a man who looks for a woman, and woman looks for a man. So they feel there's a giver and taker, and they adapt to each other, and they become other things. And for me, it's just one law, one order, just the whole thing is working its part in this whole scene of universe. And then there's a question. Is there a feeling? Is there an instinct, if there is no soul yet, because I think that the fields .. (2:20).

K- This is a debate, maybe I can put your question in a different way, if I understood it correctly. There is debate in the theology, and the debate in the world of medicine, when a fetus is a fetus and when it's complete as a life. It's that position, when it's a fields, and when it's actually a cycle of life. And when is the soul, is created for it to become a fetus. It's just no structure to it, but all the orders are sitting inside it.

Or what's going to be a hand, what's going to be a foot, what's going to be a memory, what's going to be the inherited things, that you don't do when you're born. When the

teeth are going to grow, and everything else. It's still within that structure, doesn't matter, as a fetus. But when does it become a soul? When the whole interaction starts setting up its order.

### **New Children of Man - of Mitra not kill**

This is what we said now, the change of position, where we put the Soul, and the physicality (P) matches it. The children of Mitra will be born that way. These will be looked after, they'll be brought up gradually, in a different way, than the present race of man. They're not, as they're not man, they are the same. But through the process of the childhood, we'll change the process.

You cannot do what most of you as KS start just thinking Gans, and that I don't do. You have to adopt the soul, (2:22). to become the receiver, not the physicality. But the physicality man has been in charge for billions of years. It will not give up its chain of command, as I call it. So we look at the new cycle of creation of the children of ?? ?? Maybe to you it's far fetched, but it's the way it's going to happen. You have no choice. The choice is made and it will be done. And it has already started.

Because the old way, kept on killing, will not stop killing. Because it doesn't know any other way to feed itself, to grow itself, to sustain the existence of ?? The children of Mitra will carry the knowledge, the option, and gradually become a totality, where they shall not kill. Where they feed thorough the soul, the physicality, not through the physicality, feeding the soul.

This process, you have no choice, you have already started. But it takes time. It needs the process to be fit in. And in the coming time we'll teach you how to do it. In the coming time we'll teach you how to conceive children like this. It's not that I do this, and I give them Gans's, and I do this and that - no. You have to understand from conception to the maturity, the process of creation of the soul compressed.

Then in the process, because the physicality takes over, (2:24). it's got a mother as replication, will enforce, trying to enforce that habit of the man to do, but gradually we teach the soul to reach out. We encourage the soul to reach out, to give more that the child takes less from what we call, the physical damage.

Maybe in 2 or 3 generations, the children of the man, will be of the race, which will never kill, will be of the race, that when a fly comes to you, you don't need to kill it. It knows you have nothing to do, it passes you. These are not dreams this process has already started in the race of man.

Then you replicate, you enjoy, you learn. The child learns, it's like going to a nursery, the way a child shows another child how to play with this toy, or didn't know how to play with that toy. The new generation of the man, coming in touch with other children, through the dimension of the Soul, teaches this other child how not to.

The parents will take the children, you will hear this in immense way, to the doctors, "my child doesn't eat potatoes ?? , he doesn't need it. My child doesn't drink. Is he dying? He is still playing, so. Then gradually we'll get used to. In over 2 - 3 generations we'll get used to, and the grandparents watch getting to eat, and the grandchildren watch, they take from environment without killing.

We have to go through this transition for man to mature, and it has started, you have no choice. We brought this dimension into existence. We taught for years this is going to happen. (2:26). But it's not going to happen overnight. The child who doesn't eat anything, and becomes a cartoon ?? It has to become, it has to be taught, it has to be nurtured in the society of the man, and gradually will become part of. Then the next generation, and then the next generation, we uproot the killing within the structure of the thought of the man, because he does not need to.

You'll find a much happier society, you'll find a society which is in balance, you'll find a society which there is no greed, because we're through that process of taking what they need from environment. They learn to take what they need from the place, and when they don't need it, they go. It's like what is happening in some, or many of our cities, people leave the clothes they need on the hanger outside, if anybody needs, they get. It started in Saudi Arabia people put their freezer outside, I have too much if you need, take it, but don't take everything in the freezer. At the beginning there may be a mayhem, but this process has started.

The beauty of it is, we have Mitra with us, and she will never make a mistake. She is a mother cares, a mother who understands, and has seen the mayhem in the race of the man. She's been there long enough, and knows how to be done. When it's done through the culture and understanding, man will create the soul first, and from it will create the child in the physical dimension, and then he feeds it through the same process, and gradually it will change. It has to be ingrained within our structure. (2:28). Otherwise it's just a fashion.

Any other question

Q: .. Persian poetry through translator ... I've done a translation it might be kind of rough let's say let me just I have to redo it here because it's

K- Put it on the screen as it is.

( goes on and on .. here )

R: But isn't it? Shouldn't the student be first and then the master replies? I thought he was talking about you as the master buddies saying,  
I don't understand this.

Here >>

Reads Persian poetry

R: Here's the students question. What journeys have we taken to smell the scent of Nastaran Flowers? What dangers have we taken to drink the desert brines, to suffer this love story we have suffered. The Masters says, What trips have we made to ask the name of the unknown flower? What dangers have we taken to kiss the ashes? We have suffered for Iran to become a good home?

K- I don't understand it. It's poetry .

### **Talks about UC members - new members coming in**

K- It's interesting, it's very interesting that how things are taking shape in many directions. There are many languages, that are coming into the Keshe Foundation. (2:32). It's amazing, I look at some 30 plus languages, in Keshe Foundation Knowledge Groups. Some of them are very active, and some of them are very interactive, and some of them very inactive. But gradually, we see groups building up, Russians are building up, the Portuguese have been heading it, the Iranians are the same. And the French and the Germans, gradually building up in Knowledge Seekers, finding a home to share knowledge, and to enjoy each other's knowledge.

It's very hard, as I always say, unless you understand the emotion of the language, we just read the newspaper. It's very, very hard, especially when I look at these things. I haven't read Farsi for over 40 years. To me, I can join that alphabet, but even to read these things (poetry), you have to understand the present emotion of the nation, which we are not in it.

As I said, I went to Iran some 14 years ago. I am a foreigner in my own country. I speak the language, but the culture has changed, the emotion has changed, what we used to be is not. It's the same that as I said to Rick just started teaching, you will see a large number of new Universal Council members, and UC support members added to UC group. Those who apply to be, and that's why we even brought cultures, or what you call, languages per nation, per culture, English, American English. (2:34). You will see new German speaking Swiss, where we always had ?? Talon as a German speaking, for the German community, because they understand German, different mentality, than the Germans and Austrians.

We see this evolution, members of Universal Council, who are English speaking Canada, or English speaking UK. Because we read, but the emotion is different. Because it's different part of the world, it has a different understanding and different .. comprehension of the language. We'll see this, you will see starting, a number of new Universal Council members coming in and those who have been inactive, will be the in a way, moved, for the new ones who are active to bring in. To do even though, we rely on the soul of, these people came for other reasons, and they said their times, and they're not there to support, and we ask them to relinquish their place, or they are not there, even to ask. So we will

leave it open. We will see new members for Netherlands, from the Dutch speaking, joining the group. There are a large number of them will be added, the Universal Council will be strengthened, especially now, that we are going through this transition time. I was told this morning by Lisa, that the Universal Council members would like to meet the Earth Council members in the very near future, for what is to come and what needs to be planned. This is the first time more or less, as a way, that the two (councils) meet, to bring a new dimension to the work of the Keshe Foundation, as one as these two groups will run the Keshe Foundation in the coming time. (2:36).

Any other question.

### **Many world leaders have cancer**

Q: Salomea .. My question is related to your ?? and our wish to have Knowledge Seekers and Universal Council to help now, Mr. Putin, because he has cancer, and maybe we can help at the soul level to recover. And the condition will be to sign the peace treaty. And not only he, but also Crimean's, and all other nations. Maybe it will be a crucial opportunity. Today, these days, as far as I understood, he will go in the hospital for some treatment of cancer. And we know that the reason for his maladies, they are emotions. And if he will change emotions and will send him good emotions. Hopefully he will recover, and we will start a new era of peace. Mitra will enlighten his soul and the soul of all dissidents. What is your opinion, feelings, Mr. Keshe.

K- It is not a feeling, you have to realize most of, (2:38). a lot of world leaders suffer from one disease or another. We have three or four world leaders who got cancer, not known publicly. We have princes and princesses who have medical condition. We have presidents, we have kings who have medical conditions, that is not curable, to the present knowledge. This does not make them any change, they still stay on the path of, the way they were. Maybe by elevating their soul, they will do.

In respect to Putin, Putin knows about the Keshe Foundation clearly, as I said in the talks very recently. Putin sent the peace treaty of Keshe Foundation to DOMA (Russian Parliament) in 2015 - 16. But it was never followed by the Keshe Foundation KS who were there to do it. To appointed to be responsible for it, and work with it.

We have the Iranian president with the cancer, Ayatollah K of Iran has had a cancer for a long time, years. The position they have, allows them to have the edge of science and the latest things is for them to be. Turkish president and his wife suffer from the deep cancer. The two or three African presidents are in the same boat. It's not unusual, they're all human in different stages.

They have to handle their own emotion in what, and how they got to where they are. It's amazing how medical conditions of the world leaders are hidden from public. But they all have a problem, it's not just Putin. German, ex-German Chancellor, we, it was known for a long time, (2:40). suffers from A very bad kind of disease of Parkinson, and when it became public, she stepped down. We have the same in the Chinese leadership. We have

the same in a couple of South Asian, Central Asia countries, the presidents and leaders have cancers. They have choose how they serve, not us. They have to decide how they. We can elevate their souls, we can reach to them, it doesn't mean that it will change in the way and the path. They are in what they believe in. Some people die, because of their belief's. The world leaders are not different.

The whole humanity, and the whole world leadership needs elevation of the what you call, the soul. We have received the same thing around, half of these world leaders, you are not aware of their operations, and damages, and what they do. ?? ?? operations and we know the condition of your president. They all suffer, one way or another, or their families. But their mission is different, than the P, they don't see the connection to, one to another.

Any other questions.

Q: Thank you very much. I think that you sent is good opportunity to send our love to all leaders. (2:42) If they will get ?? they'll create a healthy environment and healthy conditions for peace outside, if they have peace inside. Let's send sent from our heart to them and our soul.

Any other questions?

Q: Will the workshops you mention in Austria be recorded and available online saying  
K- No, no workshops.

### **June 6th Test Flight - no media**

Q: On the June 6 event, will there be a media gathering, or is this to be a test only?

K- It's a test only at the moment. We test. The systems are more or less ready in two weeks time. Hopefully. The tests will be done, and we'll see how far and the way we go, and we need, we go out those who want to be volunteered to be the best testers. The first what we call pilots, and the rest of it. We just gradually work to it, and we'll come to test it, with or without.

At the moment, we try to keep everything in order to complete. You got to understand there's a huge pressure on the Keshe Foundation side, where we are forever evolving and developing. And even in the process of building the new reactors for a space, we are still developing new technologies in it, and everything, sets back things for a few days, for a few hours, for a couple of weeks, because he will not stop. (2:44). This is the evolution of understanding the science and technology. We are getting ready for the sixth of June. Four units has been envisaged, and four reactors are, for flight system, in the process of ... assembly and ?? of manufacturing.

### **Soul is made of mother and Father**

Q: .. Why can't we remember, what and where our soul was, before coming to be created in this physicality and experience life on Earth?

K- Your soul is in two parts, part from your mother's side, and part from your father's side. So you're amalgamation of the memories of the two. You're not a soul as a soul on its own. You are the beginning of that structure. At the beginning of the making of a star, the seedling of that process.

So, when you create a soul within a womb of the mother, it needs to be. In the human race you bring the .. sperm and egg together. Now you bring the two souls, that relation, that creates the new soul, which is your soul. Then you inherit more than, RNA and DNA of the man. You will remember the process of the creation within the STM. It's a different dimensions.

You'll hear children of Mitra will speak about things, that us as parents, that our child is crazy. (2:46). But no, the way you remember inherently through your genes, this color of fruit you don't touch. She knows, he knows, what is the consequence of whatever is there, through the souls. You're walking and he just pulls your hand back, and you jump, he says, mom look, there is a snake there, you didn't see it. But he saw the soul of the snake. Your physicality was blind to it. We'll have a huge cultural problem with the children of Mitra, the new generation of the man. That many of our doctors will call them schizophrenic, or there's something wrong with them. But in fact, it's us not understanding, man has evolved. It's evolution in the STM, and the physicality is to follow. And even the process of conceiving will change.

Any other question?

Q: ... Are we as a physicality or soul, are made of a collection of cells, viruses, bacteria, and their souls? How much of this body, or soul, of the formed community are we?

K- All of it, we are part of it. We made it, and it has made us. So we're all in it.

R: So, when we say, "we", we are referring to the viruses, bacteria's, and everything we carry along with us, basically. (2:48).

K- Yeap. You would not have been here, if some viruses are not in your body. You see, we have, there is something, which is in the background of the Keshe Foundation work, where soon we will release.

Many of you suffer from migraines, many of you suffer from hay fever, many of you suffer from menstrual pain, especially the women that cannot even walk. Many of you suffer from seasonal aches. Many of you suffer from depression of time. In Keshe Foundation, we have the solution for all of it.

Tomorrow we can market a product, that women with menstrual pain, within one minute will not have a pain. Do you know how many women suffer every month with this, for two or three days. We see this process of releasing technologies in the new era for the Keshe Foundation. We allow new technologies to come in, to eradicate the pains, and whatever suffering was before, with the new technology.

But one question which I always ask is, would the new generation of man, will suffer with any of these? Or all this was something we had before. It doesn't there. So what it is, (2:50). will stay in the memory of us, in the memory of our DNA, or RNA, and viruses, and infections, but is there something we had, we know, and we don't need. But it makes us, is part of us, is part of the structure of us for the future. This will carry on. This will not stop. It's us, and we are them, we don't understand. Without us they can't show, what I call, their work,

We are part of each other, pain, suffering, and this has been part of the life of the man. Now with the new technology can be changed. How come many of you suffer from hay fever? I did and I still sometimes do, but I know exactly one drop, and it's gone.

But how does it come about? Why did I react this way? Years ago, if you remember, this time of the year, I'm always sniffing and snuffling. But now with the technology, if it comes, it takes 1 minute and it's done. But it's part of me. Why I react to this situation.

What would bring in the next generation? Would the children of the Soul of Man will have it. Why do we create so much conditions with our health, without us knowing?

So it will be very interesting to see, (2:52). with the next generation of the man, that are created through the soul, need to wear winter clothes, or summer clothes, because through the Soul, with their body they can walk in, as long it's summer ?? they decide. Because now you work differently. Because you have to do ?? other positions, when the soul travels, the temperatures are beyond, what we know we can hold our Gans's in our body temperature to ?? Some of it will come in shape and forms of viruses, or energy packs, which we call, viruses. We have to open our eyes Rick, we are heading for massive changes and it's massive. We are learning, and we are teaching, and we are developing that stage, step up.

Any other question?

Q: ... How to how to recognize other members of the Universal Community, if they're not looking like us, and how to start interacting with them, like at the time you talked in the Knowledge Seekers Workshop, with the hand signs to Obama, and others.

K- That was a specific, and it was for a deliberate communication, because they understand. In so many ways, once you elevate to the next level, you communicate with the STM, they manifests themselves if they want to. (2:54). You'll feel it, if you have that position, that you recognize the need of the soul, the need of the things, and how you happy will be, and how it brings you the position of understanding. You don't need to communicate.

You do that with your children. How many times you pick the phone up and says, "I feel you are unhappy." And he says, no Papa everything's okay. The they tell you what the problem is. It's much deeper and you feel it. I have this with my son, my two older sons.

Most of the time I don't need for them to call. I call them and he says, Papa, what's wrong. He says, Papa how do you know when to call? Because we feel their soul, we don't wait for that telephone call, we already made at the soul level, because we have that kind of connection. This needs to be expanded to more and more, and understanding of the man.

We can block, we can open, we can allow it to extend to everything. But if you walk on the street and every man has a pain and suffering, and something. Can you imagine what you're going to face? Give a handkerchief to that one, give a water to that one, you never get to your destination. So we have created that, ?/ even through our soul. We want to, we can see the souls, but we can help the soul, or otherwise we'll never get anywhere, But gradually as we evolve, these things will be resolved. We need to create a new generation of man. (2:56). And that process has already started.

As I always said, I am servant to her beauty and her knowledge, the knowledge of the things, and beauty, is the beauty of the Creator. ?? ?? We have no choice, if we're going to leave this habit of the present time.

### **Spirits Guides better to work with own soul**

Q: ... How does working with plasma, raise your spiritual vibration and make it easier to work with your spirit guides?

K- We are not that kind of organization. We have to understand. You have to understand how the fields within the body of the man works.

R: But what are. People talk about spirit guides, or spiritual guides, angelic guides, and other guides, not in the physical realm, but as a some kind of visual image they have, or sometimes they might have a physical manifestation, or whatever. But it's generally not physical, their spirit guides are of the spirit world. What are those? How are they? (2:58). Are they simply aspects of ourselves, of our own essential self, that essentially, that the messages are from our own soul, to our STP. The STP just interprets it in a physicality way? How do you how do you read spirit guides? Is that something, that is an illusion? In fact, you've talked about everything being illusion. That's the first part of your talk anyway. But what part of the illusion, is the spirit guides I suppose, it might be a question?

K- ... I said, when you have the understanding of the science of the creation, we don't need no prophets, we don't need no guides. We don't need to be soul guides, or we are there. We have to understand it, and interpret it, and see what it meant, what it is. Maybe we have some of us, not maybe 100%, has evolved to a position of being able to understand the feeling, the emotion, and the work of the Soul of Man.

You understand? So we don't need guides. Ask yourself, what did you ask? What was .. You see? There is a very big problem. (3:00). And many of us face it now, especially Knowledge Seekers, who are becoming more and more aware of these things.

You wish something, or you want something, and you get it. Because instead of you physically working to do it, now you have learned to get your soul engaged, if it's good for me, then I, can I have. Then we say we have a spiritual guide, or somebody to guide us, or something on the other side. No, we have to learn to trust in ourselves

In a body of the Man, even today, we have a mechanism, that if you wish, a part of your body to be separated, you can do it. You can literally, ?? track your own hand, your feet. We had to have it. In the olden days, in the time of when we were, what I call, more or less reptiles, like the animals we have today. If our if the tail gets trapped between the door, then they let the tail go, and they walk off, and they build another one. This is within us too. We have this power to do.

Man used to do, when we were mammals hiding in the holes, if we got trapped with the arm we used to chop it off, by pressure of the need, not to be dead, and not to be damaged, or eaten, or whatever. We have these capabilities with us. It's ingrained in our physical dimension. So, it's the same with the soul. It's the same with a emotion. (3:02). We have powers to, but we keep on saying somebody else done, somebody else to. I have a guide, who guides me. Your guides have become what we call, the conscious. You know what needs to be done. You have learned how to communicate with the soul, and Soul of Physicality.

These are the things, which we have gradually to. Now we know the knowledge, to understand the knowledge, and then how it is used. How or how, what it means. We should be able to decipher. There is no, what, whatever you are talking about. If you understand the science of the interaction of the Soul of the Creator of the man, or the controller, man, and the man itself.

Instead of you going and seeing what will be the condition if I go to the moon, this comes back ?? ?? since this is not, ?? because you already ?? the soul is in touch with the soul of whatever, for you to have the information. You have no GPS, or no weather forecast. It's the trust one's knowledge of the soul, and its creation.

Any other question of shall we call it a day.

R: I was just going to add, that you always used to say, you like to cut out the middleman and go directly to the source, basically.

K- Either way, or you make your middleman up yourself, for yourself. This is what these agents are.

R: Who needs a spirit guide when you go to number one, you know. (3:04).

K- Yeah but some people make up a spirit guide of their own, that they have something to do.

K- It's been dead long. Please. We will keep you fully informed of our progress in what we asked you. We still need the help. It has not finished, we passed one stage of it, and be there to support us. It's the future of the KF.

At the same time, remember the these classes, if you are getting into the process of Gans production or whatever, how to do things the correct way, and you want to add to the knowledge. These workshops are coming in. We're trying to teach you to use the technology in everyday use. In the near future, we'll do the cooking classes with the Gans's, what we call, other things with the Gans's. We put these classes that you start learning how to apply it for everyday use.

Thank you very much for today ..

431 KSW May 5, 2022
