

# **441st Knowledge Seekers Workshop;** July 14, 2022

(Quick Index ; Proofed, Transcriptions Done ; Need to do Key Phrases, Words, )  
(Auto transcription from Elias)

## **Topic Index:**

Releases 100 Energy Gas units - make H gas from atmosphere; Later will come how to make gasoline; Will start transmutation with the soul of a stone from one unit to another; Will add a feeding unit on to this one; Gasoline price across the planet at 30 cents a liter; Will release how to make fertilizers; Repair neurological damage of paraplegics; 90% illnesses psychosomatic - psychological changes weaken specific organs lead to illness; Changes salinity in cells - solidification and cancer; Visit your own organ ask it what have I done wrong to you; When soul expands out it is like a nuclear bomb - powerful energy to energize organs bring balance; T doesn't interfere with soul's plan facilitates process; Doctors hands like Pain Pens; Does a soul want to be elevated - this is the problem; We do not belong to corporations; Taxes are because collectively we accepted to have certain things; Have to stop Black Budgets - creates secret war machines without any controls; World leaders already sell themselves to get that position - they have because of the costs to get elected; 3,000 units to connect to MaGrav to create Peace Dome; Don't need egg and sperm to replicate - through the souls; New spreading of Corona in Fall 2022 - new injections; Corrupt governments spent pensions so need to eliminate old people because they don't have money to pay; 50 to 100 years to see full understanding of T; Now is transition time of T; How hypocrisy works; KF supports potential world leaders; KS are takers don't support work; In Fukushima what matters is we saved millions of lives - not that they hid T; Is cancer a way of balancing life

## **Quick Index**

Simulation Flight Enhancement Unit is continually getting developed and upgraded. Instead of first going through Chair 1 Physicality - Chair 2 STP - Chair 3 STM ; they are all combined into a single Chair in the Flight EU itself; But you still have option to sit in each of the 3 Chairs if you want to; Could not go to Katmandu because nobody from Katmandu has yet been in the system - need to have the linkage and information; You will also know the language; Nobody from China has yet been in the system;

Next week we will start transmutation in the Flight System (FS) - need to sign a separate agreement; No worries you travel as a Soul - like an envelop - you are inside the envelop - you re-manifest physicality at the destination; Mojhan means unconditional love like a brother; STM is brother to STP - they love each other; First time handed over running of the FS to a leading doctor of KF - more and more KS will takeover the operation of the FS; KF team has hands in too many projects;

Communicate through the soul, don't need mobile; Brain of man is biggest microchip; We bring the change to the STM and physical condition and the 2 will merge; KF has invitation card for the UC to invite ambassadors to Linz;

In 2012 a KS personally delivered the World Peace Treaty directly to the White House. He got response back from President Obama. Then, in December 2012 the 5+1 negotiations started. Last time the Italians broke rank and took the Patent Key on the USB stick, and started the ball rolling; Once we start the transmutation process the governments have to know, that people will start showing up in their countries.

We need to engage the governments to understand what is to come. Creation of One Nation, One Planet, is on the table. This time it's not my responsibility, I did my work. You all are responsible for what is to come, (and to make it happen.)

Belgium's will not be allowed in. We do not want the systems to link into the pedophiles, or our children will not be safe in space; Even my own blood will not be allowed, unless they change and it is accepted by the world community - to allow them back in; The world leaders have to plan for immigration and how they are going to sort out the injustices on this planet.

Bahauulla of the Bahai faith said, even a stone has a soul. We'll start transmutation of a stone from one unit to another. It's not just talk anymore, we have systems that can deliver the T. Wealth will be worth nothing, because now we can create gold out of air.

For people with cancer, the only way you can help yourself is to go through the system, expand and extend the soul and feel that cancer, and the tumor, and do something about it. Because you're the only physician who knows how you created it. World leaders cannot stop the T, because they need it for their own cancer; Now you understand how we put the world leaders on the banner of demise. No man can stop this technology anymore, because now it's not a talk, it's a system. It can be replicated and it can be understood, and once you learn the extension of your soul, do you need a system.

This is the first step to unification of the human race;

(There is a crisis looming over Europe since the invasion of Ukraine. There is especially a crisis in many countries with fuel and fertilizers. The Euro is collapsing, and for the first time it is on parity with the US dollar. Russia is controlling the destiny of Western Europe. European nations are preparing for social unrest in coming months as the shortages and price hikes become more evident.)

(KF responds to the crisis in a very simple way. We have already released the Enhanced Plasma Energy units, last week. Now we will release reactors that can create gases like H out of the atmosphere.) These were developed as part of the space flight systems, because we cannot come back to earth for fuel. The space systems are self-sufficient.

I release my knowledge to humanity, otherwise 375 million people will suffer in the next few months. The French Minister has stated, that they expect riots with the shortages. It's my responsibility that no human life suffers, especially when we have the technology. It's

your responsibility to inform your governments in Western Europe and other places, that we have systems to produce Methane and Hydrogen gas in mass quantity.

This will change the power play, the energy supply play, and it puts my life at risk. But I've done one thing, I have protected myself and the Knowledge Seekers trusted by us have been given the technology to be released, if anything happens to me.

We release 100 of the (Energy Gas) Units in next few weeks to those who donate to the KF for saving Man. We are not selling you gas units. We are giving it to you through knowledge, to make it available to everyone across this planet, so that no nation will suffer.

By November, December, I'll release the production of gases (?? liquid fuel such as gasoline).

(The plasma energy EU we released last week is different, it requires a 12 volt battery to operate. With this Energy Gas Unit you can use the gas, to separately run a small generator to supply all your needs at home.)

(Only 100 of these Energy Gas Units will be put out today by donation, which means you become volunteers to test these units, and become our ambassadors, and to keep it from being stopped.) The production of the gas is continuous. You become the trustees of the knowledge. Never open it. Never touch it. Just follow the instructions. You'll have a gas supply for decades, centuries to come.

Those of you who are Iranian, you know what I'm talking about when I say, if you touch it, you lose it. In Iran we had a bath, which was lit by a single candle for centuries. Then the British came and wanted to know how this candle worked, and they silenced it, and it could never be started again. This is the candle of the knowledge for man in the dimension of the physicality to be sorted.

It cost less than one cent to produce one liter of gas.

(This gas is created using advanced space technology, which back in the beginning of this year, I gave a report to IAEA showing how the Israelis lied to the Americans and the rest, saying, that this space reactor was a nuclear bomb. I knew before I built it, that I needed to have the fuel first, and it had to be pure. We need 100% pure Tritium, Uranium and Plutonium. Proliferation is done through the space technology of Keshe Foundation. It has to be pure otherwise you can end up in another place. For example, if your fuel is only 99% pure, the other 1% might match the fields of Mars instead of Moon, where you want to go. So instead you would end up on Mars.)

I want to see donations of over 2,000 Euro for the 100 units. I don't put the price on it, but I want to cover the expenses of the KF. Those who donate more will receive it first. I will close the offer today. We are not selling a unit, and we don't stand for any legal standing for it. You make a donation, you receive a gift. A gift of energy from the source. (With

the Energy Gas Unit you need to have your own generator to burn the fuel to get the electricity.)

It's your responsibility to protect this unit with your life, and to share it, and to show it to your governments. It's a black box, that supplies gas for the rest of the time of humanity.

(It's the same when you go into the flight system, if you decide to see the mother, you go and see the mother. Now you don't need to dig oil wells to get to the gas. You become that gas field. This is a freedom of man from shackles of control by finances.)

You asked, and we responded, first with the Plasma Energy EU, and now with the Energy Gas Unit. Very soon the KS at the top of KF, will be told how to make the gasoline. It should not cost more than a cent to produce a liter of gasoline. The same as it doesn't cost more than a cent to create a gram of gold.

We'll make sure you receive it, so that you make sure the knowledge cannot be hidden, and the scientists cannot be paid by the Belgium's, who sit in the same bed with us, or who live with us, to kill us.

The next system, that we will add to this one, will feed you for eternity.

I have already given the knowledge to one of our close Knowledge Seekers on how to make the feeding system. It's his responsibility to finish in the next 2 to 3 months and return it back to the Foundation.

(We can add anything, any kind of additional units to this system, so that from birth to the end of your stay, you will have all of what you need to live comfortably. I promised you a few weeks ago, that we will start to govern, and to govern, we have to be able to support the nation of Earth.)

The knowledge is released as of now. There should be no power cuts across this planet, no borders, so that man can travel (freely). We govern through the heart, the knowledge, and the STM. Let them govern through controlling the gas, food and the rest, which will soon become not important anymore.

The size of the unit is about 0.5 by 0.5 meters. Everything is set, you don't need to do anything with it. You'll be given instructions how to trigger it, and how to collect the gas. (If it produces H gas you'll have to convert your car to H gas. But it sounds like the creation of gasoline, that is used now in most cars will come later. In addition, another system can be added to feed yourself.)

Now we are giving you systems to expand the STM and support the physicality through energy needs. We are supporting the STM and the P at the same time. When the two become peaceful, we'll achieve world peace. Otherwise, it's just a talk.

If you donate 100,000 to KF for the first generator to land in your country, you'll receive it. I cannot live in Europe and see the European nations suffering. In Germany, the traffic lights are to be switched off, stadiums to be controlled, heating to be reduced, and the children's school programs to be stopped, because Russians have cut the gas.

My dearest friends, fuel should not become a commodity to control. It should be a commodity to bring joy.

We are here to put it back the price of gas to be where it should be, at 30 cents a liter. It should be a balanced, and constant price of 30 cents at the fuel stations. Because the source of the gas is produced right at the gas station and not piped in. There'll be no fluctuation in the price, because the machine makes it from the atmosphere.

This game of oil industry from today is wiped out. Now all of humanity has a fair chance to exist. The 85 million barrels of oil produced daily at different prices is finished. This will damage the revenue for many nations, but I've shared the knowledge, it cannot be stopped.

You asked for help and it is given. I gave you the wealth of the knowledge of humanity, and the knowledge of the Creator, now play with it. Invite your ambassadors to come to Linz and see the new units.

(In the past 7 days, we had an example of how One Nation will work. The Americans were online telling the Iranian scientists of the KF what they wanted to see, to prove the unit works. Shows pictures of 2 setups. On the left a refrigerator with only a standard 12 volt battery to power it. On the right was the same setup, but the only difference was, that the new plasma energy EU was inserted after the battery, and the refrigerator was plugged into it. They started the 2 setups together. The side with only the battery stopped after about 30 minutes, (this is the current level of technology we have). The side with the plasma energy EU continued to run for 1 to 2 hours or longer. This was done three times with the supervision of one of what we call, the richest man in the US, online, telling the Iranian scientists what to do. The result was that they proved that Iran has access to new technology. Since then have you heard from the Americans? No.) (The stand alone generator is on its way, getting developed.)

Do not use Paypal to make the donation to Keshe Foundation. Use direct deposit to the account in Holland. We are not selling. You sign a nondisclosure agreement. You sign an agreement that this box will not be touched. You sign, that (the knowledge gained) can be used, shared.

I used to be in the oil business. I know the heads of Trans-Naft, and Lukoil. I've got contracts in a personal name with them. I'm one of the very few people, if any, that except for the Saudi royal family, which carries a contract name in oil and the others - 30 years ago. I know what it means to play with these people. I know what it means, what it brings, but the risk is worth taking. Gas should be at a fixed rate, that all nations can afford. The game of control of energy with OPEC is finished.

You as KS hold this knowledge, and we give it to you to be the treasurers of it, until the government's understand that the technologies are spread. It's the same with the transportation through the Enhancement Unit. Until we can balance everything out.

It might take six months of pressure, but knowing that the knowledge is in the hands of you KS, the governments will have to find a way (to release it).

It's your responsibility to make sure, that the light stays on irrespective of the condition. The life goes on. Fuel has to be at a price affordable by all the nations. The Shah of Iran created this mess, and he deserved to be opposed, deposed, and removed. He raised the price of oil in 1972, and that raise has not stopped. Now it stops by another Iranian, because I love my nation, and I love the humanity.

I could be assassinated at any time by releasing this technology. I take the chance, I take the risk, I take the responsibility of it. But the knowledge is now shared amongst KS. If anything happens to me, on my death, the knowledge is to be released immediately in mass across this planet.

If we (release it now, maybe we create a bigger mayhem. Therefore, we'll do it in stages, so that the governments can adjust the taxes. The governments will have access to the money that was previously used for military, which won't be needed now. The money for military comes from the taxes you pay on petrol. We need this time gap to reach a comprehensive understanding of the peace process.)

I could have sold this knowledge for billions and then shelved it. Like what happened when I showed the space technology to Lockheed Martin in 2004 in London, at Oxford. They offered me 4 billion, to shelve the T. I said, it's not mine. I could have taken 4 billion pounds and walked, and none of you would have had this knowledge today.

In next 3 to 5 years, if you Knowledge Seekers work with us the way we ask, we won't have this mayhem of oil crisis, and controlling the pipeline. Three days ago, Russia closed one of the main gas pipeline to Germany, "for repair." The same thing happened last month. At the moment, Germany is not receiving the fuel it needs to fill its reserve tanks to be ready for winter. Now you know what Russia is doing.

Keshe Foundation makes sure in September, Germany will have enough technology, enough material, that it can say to Mr. Putin, "good morning sir, you can keep your gas." With this T you don't need to pipe the gas. You produce right at the gas station. This is not something new. We discussed this with the Chinese years ago. The proposal was to build a 1,000 units at fuel stations across northern China. Now the Western world knows about it three years later.

When you burn CH<sub>4</sub> or methane gas you creates two things, CO<sub>2</sub> and clean water. So you also solve the water problem. (We would produce a system that can be installed in every home, to be self-sufficient.

This system can be used anywhere in the Universe. If you're a human, and you decide to have a barbecue on planet Mars, I have a system that even produces the fields of meat, and no animal will be killed.

Now you understand, we have to move in this direction, we have no choice. The biggest dilemma for me for years was, how to hit at the all oil cartel, and today I have done it. In a few week's time, (I'll release the knowledge to produce gasoline. I have already shared it with KS, so it doesn't make any difference.

You become a trustee, of one of these 100 units, not an abuser, nor a controller, you receive it with the Soul of the Ethos of the Keshe Foundation. You are custodial to this trust, that with it, we force nations to understand, that the technology is already in the country. Therefore, they can say to themselves, if we don't do it, the others will.

Soon we'll release the knowledge to cover the shortage of fertilizers, which has been created through Belarus, Russia, and Ukraine war. Ukraine was the source of fertilizers for most of the West, and now because of the war, it cannot be exported. It's used more than the gas. It's not Gans's that you spray, that's the dinosaur knowledge, compared to what is to come.

You place a system on the roof of your house, or apartment blocks, and you feed every plant in your area, and in your nation, and it won't feel any shortage of fertilizers. Now you understand why I said, I want 3,000 generators to be spread across this planet.

We are Messengers of the Universe and we know how to do our work. Now you know why I am Messiah. I feed your Soul and I feed the physicality. This is why we said, the Messengers of the God are the scientists, as well as the Prophets.

At the beginning of the teaching of today, I showed you how I move your Soul and create the perfect move, perfect Soul, for the perfect body, now I feed your physicality.

No system should enter the territory of Belgium. If any of you break this rule, I take, I handle it through the Soul. Part of our negotiations with the European Community for energy and supply, is the end of the Kingdom of Belgium. Or they have to change it to a democracy by vote. Through it we can stop the work of the pedophiles, which are ingrained and embedded in this nation through their kingship.

Work with us to bring the change. Those of you who understand, know what risk I have taken today to release this knowledge. For much less, many have been killed. I have kept my promise, I have delivered my promise, both for the soul and the physicality of the Man in one lesson. I hope you understand it.

## **End of part 1 441 KSW Quick Index**

Q: I'm a quadriplegic due to a traffic accident, can I enter the flight unit and get cured?

K- These machines are not curing machines. These are flight systems. We are not providing health or wellness facilities. Even though we see people that come in, experience changes.

A guy came in only to see his grandmother, but it happened that his knee problem went away.

Accidents that result in cut nerves it all depends, if the cut is straight or if the nerves got all mashed up together. With straight cuts the nerve lines can find each other again.

We have developed a technology for realigning the neurological system, which is taught to the doctors. It doesn't come under the space technology, rather the health applications of the knowledge. KF has a Naturopathic license (to develop health technologies.)

We started handing over to doctors the running of the flight system, so they will know how to use them. I won't even need to be there, as we train them more.

Q: There are medical systems, such as "Germanic Medicine," that say that all diseases are psychosomatic. For example, when I have a problem with my eyes, they say it means, that I don't want to see some problems with my life. (How does the Gans technology help in this regard?)

K: First of all, we don't treat. Secondly, you have to understand the psychosomatic, hasn't been understood just by Germans. It's understood by the whole of the medical world. (We create 80% to 90% of our illnesses ourselves through psychological changes. It's not that we actually put it there. We weaken the condition of our specific organs, or whatever, that allows other conditions to move in. This is how, what most of psychosomatic illnesses work.)

(Psychological pressures creates a condition, that changes the salinity of certain cells, causing them to solidify and become what we know as cancer. So, we are the creator of it.) We can't do much with accidents. (These things have been understood thousands of years ago by the first man. They knew that we create some of the illnesses. So it's not just Germanic.)

(We had a guy who could actually feel his own organ. It's not the touch feel, it's an energy feel. It's the same with the system, you go and you visit your grandmother, now you go and visit your own organ. You ask it, "what have I done wrong to you? What energy do you need, to change, so that I don't have the pain anymore?")

We had another guy, who said the pain moved to the other arm. I said, of course, now it is balancing what you were suffering from the other side. This side has to come. He said, but now they both work.

You'll find a solution, within the strength of the Soul. Our machines are not medical systems. We elevate the Soul.

(When the Soul expands out over the physicality, it's like when you see a nuclear bomb explode in the movies. It spreads out everywhere. That's your Soul. Your Soul is in the center of a nuclear bomb explosion, and its fields expand out like that, with tremendous power. In the case of the bomb, the destruction comes, because it over energizes anything that is in its way.)

(Now you learn how your Soul, energizes your own organs. It's no different. It's you who triggers that bomb. It's you who releases the Soul, causes it to spread out. You have the energy to bring everything into balance, and it's so fast.)

(When people learn to be less anxious in the systems, then they will allow the energies to expand slowly, and we'll see that any kind of imbalance will become balanced.

Q: Does your technology interfere in some way with the soul's plan? If the soul wants to experience in a sick human body, why heal the body?

K: No, (we don't interfere,) we are facilitators (in the process).

Talks about how doctors are givers and trained to save lives. (When doctors are givers, their fingers can become like Pain Pens. Their touch has already changed the patients condition. The prescription is just a physical thing, for the patient to think that they've received something.)

Q: Can the people in the flight system see, those who have committed suicide and help raise that Soul?

K: You have the capability to raise any soul. But the point is, does their soul want to receive that elevation? This is your biggest problem, (if they can receive what you are giving.)

(Beggars in China were very rich, because they always received cash, which is untraceable. Now they give you their bank account number and you transfer the money through WeChat. Now the government taxes their income.) This is how the system should be.

Someone asked about being a sovereign living being or belonging to a corporation, with the birth certificate as the Bill of Sale.

K- I don't know who started these things. (This has been going around on the internet, and a lot of people have bought into it. It doesn't make sense. It's a fantasy world they live in, something to believe in. Nobody is part of the property of anything. If I understood correctly. The people spreading this produce a lot of papers to confirm that it is correct. There's also a lot of nonsense with it too. As much as I understood, we are not subjects, we are not bought at birth, our birth certificate is not our slavery, and the rest of it.

It is very much like the tree planting project for CO2 and global warming, that a Dutch guy started. And everybody bought into it.

The KS got upset at Mr. Keshe's answer. He said, "Are you kidding? You do not differentiate between owner, and holder, and beneficiary. (Mr. Keshe laughs) So, you do not have a passport? Do you pay taxes, and tell me it's normal to be happy that you work, but now to be a slave, to be taken by your corporation? YOU SAY IT'S NORMAL?

K: It's not normal...

I understand. (The truth about all this is that you have the benefit of living in a country with a lot of facilities, and you pay for it through the taxes. People don't like to pay taxes, but they like to have the bus service, hospitals, clean streets, police force. You have to pay taxes for the ambulance to be there. They only look at their own pocket. So, what can you tell to the people like this? How can we explain it? It's all part of what you get in the western world. Go and live in Africa, you don't pay taxes, you don't have the roads, you walk on the dirt, etc. You pay for it, you take it. It's just the way things are.)

Collectively we have accepted to have all these things. And if you see as a control, don't get out of the bed, don't switch anything on, and stay in the same bed, see how long you will last. We pay for it. It is a collective life.

R: Okay, Mr. Keshe, what about the challenging idea of governments that Alex is bringing up in the chat here, that governments are not in integrity, and have not been for a very long time. They're spending far more than they take in, on taxes on things, none of us have agreed to things like war, bio weapons labs and other such things. Humanity has not agreed to this. So why would they pay taxes to governments, that have been spending on things that we don't really want?

K: Which country is he from?

R: .. he's living in Canada.

K: To be a superior power, and leading western nation, is usually done by terrorizing, and not by developing. It goes by, those who have bigger armies and can kill better, nowadays have more respect. Everything else, which goes with Canada, America and the rest of it, costs money. You elected them to preserve your way of life as a leading nation. They spend it on these things, so that you will feel powerful enough to be a leading nation.

R: Yeah, but the thing is, we didn't really, elect the government that's in right now, the government that is in right now got 33% of the vote, which is only six, which is less than. It's only about 16% of the actual population of the country. So less than 1 in 5 people.

K: Do you know what's happening in Sri Lanka today? Just go on the news. People have gone to the house of the president and Prime Minister and they're literally swimming in their pools, and watching the televisions, and taking over their homes, until they go.

(The problem is what's called the "black budgets". We need to ask our governments to open the black budgets. The Americans are really good at it. They use the black budgets

to do whatever they like. They borrow money for it, but it is we who have to pay for it. With the black budgets they try to make the most advanced killing machines, and all the other things they do in secret. They do these things completely independent of any elected officials.)

(You have to get your parliaments to change the black budgets. There should be no black budget financing. The same goes for the military. Somehow it has become ingrained in the work of a government, that they need to be stronger and more powerful.)

(With the new technology, we won't need this kind of thing anymore.)

Iran allows Keshe Space Company to be registered as a private space company. We can bring in the new T under this banner. Now we officially can start doing space testing, because we are registered to do this.

We have no black budgets. Our budget goes on what we receive, we sell, and what donations we receive.

Our black budget was a black box we showed you, so you can produce your own gas. If we don't manage to break the oil cartel, then you fail miserably.

This is how it should be. Do we have a budget? We don't have black budget. We use everything, everywhere possible. We asked you for help about six weeks ago for a project, which changes the position for KF. We're still trying to complete it, we are short another piece, but we're not coming to you to help us again. But when it is sorted, it's no black budget. It's spent directly in the lines, how it is, how it goes, and how we planned it to go.

We are a major shareholder in Markray, which we'll use to benefit all of you, when we start moving. We'll use it like a treasury of the Keshe Foundation. You will understand when it comes and starts operating.

We use the structure of the Universal Council, Earth Council, and the KF as a governing body. To govern through the Soul and backup so that we can deliver it.

Would there be a black budget? No. Would you be allowed to create weapons? Why should we need it, when everybody is the same? A lot of people come and claim a lot. I work through all of you as Knowledge Seekers, and you are responsible for how it goes and what (we can achieve.)

We don't want to go to governments for help, otherwise they will dictate terms for KF. (If we have 100 units out there in the public it makes it easier to approach the governments, because they can see it is something real and it's already in society.)

The Keshe Foundation team is working relentlessly in the background to make sure that what you wanted, what you asked for gets done. But as I call it, you are "side walkers,"

you just wait there for everything to be delivered. Then when the things don't get done you blame it on the Foundation.

What have you done? What are you doing? Nothing. Most of you are watchers. When it happens, "oh, we went with the Foundation, this and that, and we were with the Foundation and the others. " You only participate if there is something in it for you.

(A farmer received a CO2 capture unit and said it was set up for the Cup of Life. He asked if that was correct. Mr. Keshe replied, you received the best. Remember to collect the AA, wash the Gans and put back the AA.)

The expenses on the Keshe Foundation are huge. We don't get support from people. Very few people support the Keshe Foundation. Stealing is in the habit of the man.

(We gave the USB Patent Key to the governments you cried that, we betrayed you. When we gave you the T you did nothing with it. Now we are doing it ourselves.)

He talks about what the different countries are doing. South America is extremely active. Europe is dynamic. (you can read the rest in transcript)

People are nostalgic about leaders like Roosevelt and JFK, but what did they really do? Talks about all the corruption and problems with world leaders. All of them have sold themselves to get to that position, because it costs huge amounts of money to get elected. Some have become multi-billionaires.

KF Supports candidates for world leadership - if they carry the Ethos of KF

We have meeting today with the oil and gas industry of Western Europe.

I am the European member of the Earth Council, it's my responsibility. The continent of Europe is my responsibility to cover for these kinds of things. And that's why we've taken these steps.

Q: Are the 3,000 new plasma enhancement system set up as pure givers, to find position with all of the MaGrav systems, which can act as the receivers of this energy in order to create the dome across the planet?

K- More or less that's what it is. Because there's another back into it. We work, not with satellites. We work with fields and when we understand the work of the fields. It's a big difference

You can't be a pure giver, you need to receive to make the connection and flow.

A KS talks about what he thinks of the problems with the mafia and the underworld. Mr. Keshe tries to change the position. You can read the transcript, I will try to highlight some areas.

You see, the whole situation comes out of need. All the positions, all the things we have now, politically, groups, mafias, whatever. Whatever agenda you put it on, comes out of the need. And this is where our major problem has been sitting, need. Where we change this position of need, then we can talk about it.

Q: .. the injections, people received is not by choice, it's a weapon, and it's a death injection. They'll become infertile.

K- Yes, yes I know, I understand these things.

Teaching of Mitra - you do not need an egg and sperm to create life  
So, the injections don't count. They can inject you with anything. If you understand you can tune, you can develop, the structure, the way the children of Mitra are born, to be born by you. You don't need. Let them inject as much as they like. Let them do ..

Q: The side effects of this injection to the people is creating suffering, which is absolutely out of this world.

K- I understand, I know people, out of 4 friends, 3 have died because of injections.

### **Corona coming - Fall 2022 - bigger than last year**

The thing is now, it's coming back again. You will see this winter, this autumn, the Corona mayhem will start with the razzmatazz. Bigger than last year?

Q: Yes, but people know that this is the normal flu. ..

K- It doesn't matter what we call it. .. There is a way they will control.

(Talking about the older generation now who are on pensions. Mr. Keshe said, our parents worked their whole life paying into the pensions, that we got the fruit of now. This is in Europe and the western world. They built the nation.)

(Our governments, and others, wasted the money. Some of them went for, bribery, military, and other wrong things. But the money didn't go for the pensions, which we and our parents paid into. Now the government's has a huge expense to pay for all the pensions now, and those who are about to become pensioners. All they can say is, "sorry, there is no money left in the pension, it's empty." They have two choices, not to pay, or to make sure that there is nobody there to collect.)

(The thing about pensions is, once the person dies, all the money that was accumulated over 30 to 40 years, is not needed, so it stays with the ones who collected the pension. The officials were tempted by huge sums of money, and nobody to watch over it.)

(From the point of view of the government, the older people who are on pensions are at the weakest point, health wise in their lives. If you find a way to end the term, meaning the terms of the pension, it's a huge saving for the nation. The minute you take your last breath, then the government doesn't have to pay, and keeps the money.)

(We will become part of the government structure to spread the T.)

Obama said, this is the most disruptive technology ever known, but we need it. Man has never had an opportunity like this before, where you get the whole T in one cycle. What more do you want?

I understand our work very clearly, and the policy of the Keshe Foundation. I continuously remind the people around us, that we cannot fight the past, (and what happened with the financial system and mafia's, etc .) We are here to setup a new way and change the future. This is how it is, how it shall be, and how it will be made to be.

The only thing Keshe Foundation is not, it is not on the public television, and the rest. (But I was told, that underneath, the growth of the Keshe Foundation has reached more or less, a half billion people, either have heard of KF or been to the website.)

It took Christ 300 years to become less than a million. We're only been in public for about 15 years. (That's pretty good considering all the restrictions they put on us. No technology, ever in the world of man has discovered so much. The structures and institutions, and the mafias have never worked so hard to try stop a technology, but still we grow.)

This technology is going to bring the change. (But right now we are in a transition time, it doesn't happen by a flick of the finger.

(In 50 to 100 years, most probably you and I will not be here to see when the power of this technology is fully understood and applied. But it will take its shape, and it will take its time, to take that shape.)

(I'm holding back a big part of the teaching of this technology, for a time to come. When I release this knowledge, no politician and no financial organization will be able to stop it. There is no financial organization that can stop it. What kind of shock would it bring to the system? Would it be like another Christ, or another magician, making a dead man to walk?)

Let me explain to you how hypocrisy works, and how everybody cries to see something, (but when you show it, then they just forget about it.) Through the scientific process I rebuilt Naomi's brain structure. That was a major breakthrough to rebuild part of the brain that was missing and for her to walk again.) Christ couldn't do that.

(I have accepted that it needs time, and I accommodate for it.) I have to take my time, till my time comes.

So, it doesn't matter what mafias, Illuminati's, Masons, Japanese terrorists and the rest of it, come and go. (You have to have the patience to do what I am doing,) build it slowly, slowly. Then, if you expect just because you baked a cake, everyone is going eat it today, sorry, (they can't do it.) This cake takes a long time to bake, (and little by little people have to eat from it.)

So, we can't change the past. But we have to push forward, and bring new technologies, new understanding, and change the condition by the new technologies. We will show you, that you don't need passports, like the way we are doing now in the flight EU, and show you that you don't need energy, and everything else. Let's see what's next.

Shortly, I will be sitting with one of the leading governmental European oil corporations and government officials from number of countries to discuss how to solve the gas problem facing Western Europe today. Why do they sit with Keshe Foundation? Why when we organize an ambassadorial meeting, the ambassadors show up? They have a full dossier on us.

(This is a time of transition of the knowledge and technology. On one side what the man by himself, on another side through the knowledge being taught in the teachings and the other things, and yet another side by what I call, "the love of the Creator." They have always been there.)

The political life is part of the structure of what we're bringing. I've been bombed, shot at, betrayed in every shape or form, poisoned, but have I stopped? Do they stop? No. Would they stop? No. Because they still have the wife, or that mistress, and then there is that game for the child to be brought. The money has to come from somewhere.

Mr. Keshe reads from a letter from a person who wants to become president of a nation and is seeking help from the KF. The letter says, "when I'm with the parliamentary, then I can start up for the presidency. ... I've written this to you, that we need your support to gain a political strength. As we know you have brought in our nation." He comes to KF, because he knows we have influence in political directions.

In regards to a comment about his meeting with people from German oil industry. Let me tell you exactly what happened to us in China, it will repeat itself in the West. They take the technology, they change the name to a German, Austrian or a French company, so that it will not show, that it is T from the Keshe Foundation. Didn't this happen to us in Iran, China, and even in Fukushima?

Q: But how do we get to the point where (they recognize us.)

K: No, no, no, no, no.

The point is, how many people got benefited by what we did in Fukushima? Millions. That's what it counts. Don't expect to receive, we're here to serve, you have not even understood the work I do.

(Anybody else would have taken the Japanese Prime Minister and government (to court, especially with all the documentation we have. We can prove how we gave everything to them, matching it to the time sequence of events in Fukushima. It would have changed (a lot of things.)

Q: Don't you think that now after 10 years, we have many more people in the world who know about KF it would make a difference?

K: It doesn't matter ... Tomorrow they'll forget, and next year nobody will remember. Nobody. Who speaks about Fukushima today? It's just a history. But everyday Keshe Foundation Gans technology is used in (Fukushima power plant). And, where did we receive all the threats from? How everything was curtailed to the benefit of the Japanese. But now that Japanese Prime Minister is in a coffin.

(No one did more damage to the KF than that Prime Minister of Japan, at the time of Fukushima. If you understand Japanese culture, he was killed in the most shameful way. It would have come out, that an Iranian nuclear physicist solved the problem of Fukushima.) Do you know what changes it would have brought to us internationally? The rest of the technology would have been accepted. Recently, we found out that one of our inner most people, was working for them, but we couldn't see it.

So, it's irrelevant. The point is, the technology saved a lot of lives, a lot fathers and mothers, who were exposed to radiation are alive. A lot of farmers in Japan have managed to control the damage, and they are still farming. That's what we are here for. Not to count how much good we did.)

I wonder how many of you Knowledge Seekers will be part of this change we asked for today. I promise you, none of you will do it. But if I put the Gans unit for sale for 5,000, all of you would buy it. And, this is the problem with you Knowledge Seekers.

Do you really want to get rid of that cancer? Or is that cancer a way of you balancing your life? And then don't ask the system to adjust, for your own conduct. But if you're there to see the change, to bring the change for the next cycle, it is there to do.

END Quick Index 441 KSW; July 14 2022

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

Proofed complete  
(:22).

K-

(:23). K: Yes, as usual, wherever, whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute, across this planet and beyond. We welcome you back. And we welcome you to a very .. magnificent teaching today.

Teaching of today is mainly on the structure of what we've done in the past, and what we've been done. As many of you know, we invited you around the world to come in to join in, in the simulation flight. We explained to you in the teachings of the past couple of weeks, that we are in for a surprise, with the new enhancement simulation unit, which was added to our test this week.

If you remember, when we started the process of the enhancement flight simulation, we had a process of two units, where we had two passengers on each, we accommodate 2. We allowed you to sit in chairs one by one, get prepared and join any of the flight units, in either way. As we said to you, the evolution in the knowledge, and understanding and testing. It was interesting for us, it was important for us to understand the work of each Seat (Chair), Physicality (P), Soul of the Physicality (STP), and the Soul of the Man (STM). And, as we understood, confirm, we understood correctly. Many of the people who went through this and you heard it in the testimonials, they talked about the Seat 1, Seat 2, Seat 3, and then how they felt, and when they went into the system. (:25).

In evolution of knowledge and technology and development, in the past weeks, we have eliminated a lot. But we kept one side of the system, the original way, and one side the new way. And, amazing enough the response, the condition we have seen in the new system in the past in the testing of two days. It did not surprised us, it confirmed the correctness of our decision, our technology, our understanding, and the beauty of it is that now, in this system, we have replicated literally, instead of three parts, elevation of the Soul of the Man, Physicality of the man, and Soul of the Physicality of the man, in one go.

But the beauty with it is, it's like you get yourself prepared and go to the airport, and you wait till your flight gate is announced, and then you say, "oh, that flight, that gate is where I'm going." But the interesting part has been, when we sit people in this, the new system, they go to the airport, they sit in the machine, very few moves to do anything, because they are there, it's just you know, I have a drink, I have a coffee, I go to the Sweet Shop, see what's for sale in the telephone shop. They just hang around, and we watch them hanging around. (:27).

Then we tell them, gate number two is open, you can go and see the grandma. And strangely enough, they go and see the grandma. They talk to grandma, they hold the grandma. They talk to their mother, they talk to their father, and they enjoy it. Then if you ask them, or we inform them, you can now take the grandma for a walk, or take grandma's somewhere to go to. They take the grandma to go somewhere.

If we have a couple sitting in the two positions, and we ask the couple, we did it yesterday, go to Paris. Both couples together go to Paris, and they tell us what they saw. We get another person and we tell them go to Paris, they go.

We asked one to go to Katmandu. I couldn't go to Katmandu. How come? In the essence of the system. We had the French couple a couple of weeks ago, the soul of the language of the mother language is imprinted. Even they're Germans, they are connected. We had

no one from Katmandu. So, our people can't go there. We have no one from China, no one can go (to China). The understanding of the language comes in, and then we see the process is completed. Make your way to the exhibition center, go through the process, (:29). and bring that change for humanity.

Next week, for the first time, we'll try to transmute. Those of you who come and volunteer to be transmuted for us to try, you sign a separate agreement. You accept the responsibility of the transmutation.

Don't worry, we try not to leave a leg behind or an arm, behind because when you're in this system, there is no legs and arms. You have converted yourself in a packages of your soul and energy. All we do, we pass the envelope. We do not care what's in the envelope. Is it coin, is it a check, is it a love letter, is it a sad letter. You carry it. The systems are ready for this transmutation.

From next week, we go to the next phase of transmutation and transportation, showing the man can travel in the dimension of the STM. Would we succeed? We hope so. Would we not succeed? It means we have to go back and learn more where we missed, where we dropped the package, and collect it and bring it.

It means, we create the first cycle of the MOJHANS transmutation, man of love for existence. The one you will love most which is the physicality of the man, loved by the soul, and the STM loved by the physicality of the man, like a brother. (:31). This is what it is, what MOJHAN means, MOJHAN means brotherhood, MOJHAN means loving, unconditional love from one brother to another. Soul of the Man is the brother of the Soul of the Physicality of the man. No questions asked, not subordinate, but they're lovers. And understanding this, we transfer the two from one to another.

The process of understanding this technology for many is a lot. Yesterday for the first time, in the process of the development, I handed over the running, the monitoring, the operation of this system to one of our leading doctors. At the beginning we taught, and then it was left to him. So, the teaching of the doctors to monitor has started.

The next generation of what we call the Knowledge Seekers (KS) of the Keshe Foundation to take over the realm has started. Those of you who were in the center yesterday have seen it. One of our leading doctors has taken over the operation of the transmutation and transportation, first for himself, he had to feel it, he had to understand it. You will not see me much when you come, as more and more Knowledge Seekers of the Keshe Foundation will take over the operation, as we go for the next stage of development, and development of many other things. (:33).

In the past few weeks, we have understood more and we develop more. In the next maybe, as usual Keshe Foundation is got too many fingers in too many pies. The Vertical transportation and transmutation system will be shown in the exhibition, where you can walk in and where you can transport yourself to.

This transportation and transmutation testing, will be ready, depends on our team, they have too much in their hands. But, now as of yesterday, has gone on to what we call Planning Board, maybe next four to six weeks will be ready. This is what I promised you when I showed you the Exhibition Center, I'll take you from one position of the bridge to the other. Now the knowledge is there to do.

Is there a need for a mobile phone? Or is the understanding there that when I feel my brother talking to me, I distinguish, is it him as a soul, he passed away long ago? Or is it a soul being in the New York, is talking to me and I can talk back to him at the soul level, (:35). annoying, telling the physicality, "oh, he's arriving tomorrow we better make dinner."

The present communication system of mobile systems has become obsolete. Even though we look for the different folding pages, and different colors on it. Do you need to somebody else, to eavesdrop on the pictures and information your brother, or your lover shares with you? Or, you know how to do it, and you can access it?

Do you need a Chip on a computer, or a mobile phone, to download everything into a chip. Where the biggest chip, which is the brain of the man is already there for you to add to. Now you understand the changes we are bringing in. We strive to bring the change on the level of the Soul of the Man. But at the same time you strive to bring in the physical condition of today, that the two sooner or later merge in.

Today later on, Keshe Foundation will release an invitation card for you Universal Council members, for you Universal Council Support members, for you followers of the Keshe Foundation, to write in, to invite in the ambassadors in your country. You are in Bangladesh, you are in China, you send the invitation to come to Linz to your ambassadors in your country, the ambassador of other nations, you invite them back. They have to bring with themselves, or book with us, the confirmation of the visit, (:37). not everybody else can use the card.

This invitation we release is for all the Keshe Foundation Knowledge Seekers, to take the invitation to your world leaders, to your ministers, to the heads of state and to the key men in the country you are, the head of NASA, to the head of Chinese space agency, to the head of Communications, Microsoft and the rest. We are ready, we are confident, that we deliver, that they will change the position and the understanding. The invitation will be put on the pages of the Keshe Foundation for you to download to fill in the name of the person and send an invitation.

One of the Knowledge Seekers in Washington did this a few years ago. He took the World Peace Treaty directly to the White House. And he delivered it to the White House, and he got response back for it from President Obama. Then, we saw the rest of the work which we did, which brought the 5+1 negotiations in December 2012, in Brussels.

Take these invitations, which will be put on the Keshe Foundation website. And every ambassador in your country is invited, every world leader in your country is invited,

every member of your parliament in your country is invited, every key position people around the world are invited to come in. (:39). There'll be a link to the website where they have to register when they are coming in, when we accommodate them.

Be aware that in the past, (when) we invited ambassadors of the country, in one country where we were to come in, and we saw the mayhem the Belgium's and the German pedophile group created by flooding the embassies of that nation. Now we go to every embassy, in every country, that does not allow any more these hooligans and pedophiles, try to do their work. Keep them busy, because there's something more is coming for them.

It's your responsibility. I don't wait somebody else might send it, line in hundreds, thousands of invitations to your members of the parliament. Italians did this last time and we saw how Italy broke rank from the pressures of United States, and European community and accepted the Key (USB) of the knowledge. This time we give the key of man transmutation and transportation.

It's your responsibility. Last time I did, this time you as Knowledge Seekers hand over the key of the freedom of the man to our governments. The reason we do this is very simple. Once we start transmutation, "sorry, no one knows if you're in Sri Lanka, and you end up in center of New York and the police is, how did you come?" Oh, I came with Keshe Foundation transmutation system. If you don't like it, I can go to Washington, I can go somewhere else you won't see me. (:41).

We need to engage the governments to understand what is to come. Creation of One Nation, creation of one planet, creation of one race is on the table, it's your responsibility and not mine. I provide the flight system, you are the agencies who have to sell the ticket. Every single one of you is an agent of peace, every single one of you is responsible for what is to come. Organize yourself as groups, individuals, every ambassador, the governors of every city you live in, the mayors, invite them to come to see.

You are Austrian, flood your president, don't wait for somebody else, and don't stop with one card. The next week again, the week after again. Till you get a response, till you see we publish which world leaders, which ambassadors has been, or is coming in or whatever.

The only person would not be allowed is the ambassador of the nation of Belgium, and the state of Belgium.

The way you saw the French person going into the system two weeks ago, two of the most beautiful Knowledge Seekers of the Keshe Foundation from France came in, husband and wife, yesterday we could tell people to go to France and they went. If we allow this condemned nation of Belgium to come in, we link into the pedophiles, and our children in space are not safe anymore. (:43) And you will understand the reason why.

No Belgium's, born or bred will be allowed, even my own blood, into the system. Unless they change. Then it's the responsibility of the world community to accept the change in their souls, to allow them back in.

It's the responsibility of you to bring every ambassador every world leaders into Linz to go through the system to understand, to feel, to see the wind of change, as we heard in the intro. (:44). Then they plan, how they're going to sort out the immigration, how they're going to sort out the injustices on this planet and the rest of it.

We have and we are delivering the technology. The mobile system transmutation will be tested in the next two weeks, we were targeting for November and December. We will test to transport a stone from one to another. Because Bahalla, bless his name, said, even the stone has a soul, and if he can expand the soul of the stone, we can transport the stone. The stone, or you to go from London to New York is getting to the airport, checking in, flight, landing, customs, getting out, get your suitcase, hello, 10 hours on the way. For those who travel with the dimension of the Soul, home to home, New York to London instantaneous.

Would you like to get on a jetliner, create a CO2, which you cry so much about global warming? Or, would you do the warm of the heart of your loved ones and be in both places at the same time? Now you understand, the change has come, the change is there, it's with us and the technology's there.

As I said yesterday, and before, up to now you could dream the mother who died 20 years ago. (:46). Now you decide and see the mother. Up to now, it was all theology and talk, now is technology and walk. We have systems who can deliver, so it has become part of the knowledge structure of the humanity.

As I said to one of the richest women in the world in the past few days. I said, keep your wealth, it's worth nothing. She got offended. Mr. Keshe, I wanted to write something to you, but. I said, you have nothing to do, I can walk into the central bank of any nation now, and carry bars of gold with me outside. The wealth of the nation is mine.

Would gold have any more value when all of you, the way the British did in Khartoum, walk into the central bank of Libya, emptied and take it to the kingdom of United Kingdom, and create the whole mayhem of kicking England out of the European community for stealing gold. Now, you all have access to the gold, if you understand what it means. When we send you to the Moon to pick up a stone, we can send you to any central bank and pick up the gold. Gold, wealth has lost its meaning for the humanity as of now.

### **You are only physician who knows how you created the cancer**

The beauty of it is you cannot stop this technology. Because, Mr. President, you have cancer. (:48). No one can help you. The only way you can help yourself is to go through the system, expand and extend the soul and feel that cancer tumor, and do something

about it, because you're the only physician who knows how you created it. You will stop this technology, you guarantee your own death.

Now you understand how we put the world leaders on the banner of demise. No man can stop this technology anymore, because now it's not a talk, it's a system. It can be replicated and it can be understood, and once you learn the extension of your soul, do you need a system.

Now, we start the process of what are call, unification of man, human race. This is the first step. We still need to look after you on the physical side, which as you've seen in the Keshe Foundation in past three or four weeks, has started releasing technologies, the generator, and we told you the generator is what we call plasma Enhancement Unit, part of the bigger system. It has a back and a front to it.

The power generator plasma Enhancement Unit needs to be enhanced, energized for it to work, and it needs to be able to support. That's the purpose of it.

In the past few months, by the invasion of Ukraine, we have seen (:50). the crisis which is looming in Western Europe, and in many countries. Energy crisis, .. especially to the nation of Austria, Germany, France. We have seen in the past 24 hours for the first time parity in US dollars and Euro, as Euro is collapsing. Knowing that it will not receive energy from Russia, and it puts Russia in the control of the destiny of the Western Europe, till they get what they want. Suffering, as the French minister said, we are preparing for unrest in European nations in coming months, as we cannot supply the energy. The prices of the fuel has doubled. The prices of the fertilizers has gone nonexistence, because they cannot get hold of it, and it's gone up.

Keshe Foundation responds to this in a very simple way, which many of you should have understood the way I worked. I stand by the flag of my nation. In the background of this flag, you see two things, the first two space reactor, about the same time as now, developed in 2008, in Tehran, for the flight, for the test of the flight, for the test of everything else that could be done. (:52).

But you know, I work one way, my ethos has been the way I always explained to you, when we go to space, if you need to build the building on the Moon, you can't come back to Earth to get the Aluminum, double glazing and the rest of it, and the bricks. You have to build it according to where you are, produce the Aluminum, which can stand the environment of the Moon, where you are.

If you look at these reactors of the Keshe Foundation, two on the right hand side built in Iran, some 14 years ago, and you work by my ethos of work. How can I have these reactors, if I cannot fuel them in the space? These two reactors are built to work on Helium, on Hydrogen, on other gases, which is in patents.

**Create Gases out of space - to fuel reactors**

Something which was hidden from the Keshe Foundation and the world leaders up to today, this minute, it's for me to fuel these reactors, I had to create the gases in the space on its own. Which means, it keeps my system self sufficient.

I could not come back to Earth and find Hydrogen, I could not come back to Earth and find Helium to take back to feed this flight system. As part of my work which you have seen, I always create a self sustaining system. In 2004, 2006, I developed the Creation of the gas from the fields of the Universe (U), that my flight systems when they are ready, I don't need to have a gas tank. (:54).

Today I release that knowledge to humanity. The western world needs the production of the gas at the service stations, at the power stations to be able to keep the economy of the West running. Otherwise 375 million people will suffer in next few months. Riots as are on the cards, as the French Minister has stated. The national government of Germany, France, Italy and other nations are preparing how to handle the shortage of gases from Russia into Western Europe.

The KF have prepared the systems and are ongoing to deliver these systems to the government of Germany, and guarantee, a gas ride pipeline, at the point of demand to every power generation, every fuel stations across Europe, with the next three to six months.

It's your responsibility as you invite your ambassadors to come to Linz, it's your responsibility to invite and inform your governments, the technology to replace the Russian gas line is available by Keshe Foundation in Austria. I developed this technology 20 years ago.

And, as I said, it's my responsibility that no human life suffers, especially when we have the technology. It's your responsibility to inform your governments in Western Europe and other places that system to produce Methane gas, to produce Hydrogen in a mass quantity is ready to be delivered to their nation. (:56).

This will change the power play, the energy supply play, and it puts my life at risk. But I've done one thing, I have protected myself and the Knowledge Seekers trusted by us have been given the technology to release if anything happens to me.

And to this effect, today, and now, we release 100 units of these in next few weeks to those who donate for the saving of man to the Keshe F. We are not selling gas unit, we are giving it to you through knowledge to be available across this planet to everyone, that no nation will suffer, and you do not need to come to Linz to see the energy gas supply. But it's here in Italy, in France, in Germany, across European states, across the nations who are now suffering with the escalating prices of the fuel. By November, December, I'll release the production of gases.

The units we release you can keep it at home, feed your home, heat your home, gas tank it into your car, you become energy self-sufficient in one direction. And as we said, that

has been the ethos of the work of the KF. You all will understand why we released the energy power supply last time. The energy supply system needs a battery operator to start with, to charge for it to run. (:58). Now we give you the gas unit, heat it, burn it, run it, the small gas generator, you have power for the house and everything else.

We only want to put 100 of these units out today, no more. And it's done by donation, which means the Keshe Foundation, you become volunteers to test these, to become our ambassadors to keep it that cannot be stopped, cannot be brought down, and you receive the unit, use it by instruction, create the gases, use it to run the heating, share it with the others because the production is continuous, it cannot stop.

We put these 300 unit across the world, and only 100 unit will be supplied. You are the ambassadors. You got to get access to it. Keep it, secure it, use it and be there to carry the knowledge, you become the trustees of the knowledge, that your nation in time cannot support. Never open it. Never touch it. Just follow the instruction. You have a gas supply for decades, centuries to come.

Those of you who are Iranian, you know what I'm talking about. You touch it, you lose it. In Iran we had a bath ??, which was lit for centuries with one candle, (1:00). and then the British came and wanted to know how this candle works, and they silenced it, and never could it be started again. This is the candle of the knowledge for man in the dimension of the physicality to be sorted.

Negotiation with the governments of the Western Europe is by Keshe Foundation. It's for you to inform them to do the job. It cost less than one cent to produce one liter of gas. Today in Austria, one liter of gas is one euro, 30 cents.

This is advance space technology to guarantee the supply of gases into the ... space motion reactors, the reactors which, Iran was claimed to be nuclear bomb. When I built the Iranian space reactors, when I built the initial reactors, I knew I have the fuel first and I can produce the fuel and the purity I like. This is what was said in the report to IAEA in the beginning of this year, when we showed the Israelis lied to the Americans and the rest. We need pure, 100% pure Tritium, we need 100% Uranium and Plutonium. proliferation is done through the space technology of Keshe Foundation, to be able to guarantee to deliver you to Moon, not to Mars or another place, because sorry, the fuel was 99% perfect. (1:02). The 1% matched the space of Mars, oops.

The 100 units, which now will be delivered. We are manufacturing it to be delivered. I want to see donations over 2000 Euro for the 100 units. I don't put the price on it, I want to cover the expenses of the Keshe Foundation.

A hundred units, those who donate more receive it first. I close it today, whatever order comes in, we take as donation and it has to go to Keshe Foundation Holland. As donation, as a charity. It's there where the knowledge is set. We are not selling a unit, and we don't stand any legal standing for it. You make a donation, you receive a gift. A gift of

energy from the source. You cannot have electricity if you don't burn. If you don't have the generator. Now you have the gift of the source.

Those of you who donate to receive it. It's your responsibility to protect this with your life. It's your responsibility to share it, to show it to your governments. It's a black box, which supplies gas for the rest of the time of humanity.

The way, when you go into the system, and you decide to see the mother, and you see the mother, now you don't need to dig oil wells to get to the gas line, to get gases. (1:04). You become that gas field. This is a freedom of man from shackles of control of finances. You asked, we responded with an energy power supply, now with a gas line supply. Very soon the Knowledge Seekers at top of the Keshe Foundation been told how to make the gasoline.

It should not cost more than a cent to produce a liter of gasoline. The same as it doesn't cost more than a cent to create a gram of gold.

This 100 units has to be allocated today and only by donation. We cover the cost, we cover our expenses, we make sure you receive it, that you make sure the knowledge cannot be hidden, and the scientists cannot be paid by the Belgium's, who sit in the same bed with us, or who live with us, to kill us.

Now it's 100 people, and those of you who bought the generators, the Enhancement System, with this one you guarantee power supply forever. (1:06). It's your responsibility, we are gifting this and it's for you to take it. You will never need to worry for the energy heating, electric, or whatever. The next system we will add to this will feed you for eternity.

I have already given the knowledge to one of our close Knowledge Seekers how to make the feeding system. It's his responsibility to finish in the next two to three months and return it back to the Foundation. It will not be seen outside, and I told him the trust. In the Keshe Foundation with you, it stays as a trust.

Then we can add anything to this, that from the birth to the end you have the whole lot. As I promised you a few weeks ago. We start to govern, and to govern we have to be able to support the nation of Earth.

There should not be power cuts in any factory, or any place on this planet, when this knowledge it is released, and it's released now. There should not be no borders, that no man can travel on this ?? way of. We govern through the heart, and the knowledge and the Soul of the Man, and let them govern through controlling the gas, the food and the rest, which will become not important. (1:08).

The unit you receive is the size of a , half a meter by half a meter, or just about that size. Maybe more, a meter by meter. Everything is set, you don't need to do anything with it. You're given the instruction, how to trigger it, and how to collect it. Use, change your

cars to a gas running system, than the fuel, fill up the tank, put it in the car, you never need to pay for the fuel. When you are not filling the tank for the car, connect it to charge up the batteries, and to run your Enhancement Unit and the generator.

Then when you're doing that, add a third system to it, and feed yourself, that you don't need to kill anymore, you don't need to do anything anymore. The beauty of it is, what comes out of this, will feed this to guarantee a full cycle.

### **When P and STM become at peace - we achieve world peace**

Now you understand, we just don't give you the travel system, we don't just give you the Enhancement Unit to be able to expand the Soul. Now we have given you both, we are supporting the Soul and the Physicality at the same time, that when the two become at peace, we achieve world peace, otherwise, it's a talk. (1:10).

You donate 100,000 to Keshe Foundation for the first generator to land in your country, you receive it. It's our work to do. It's my job to make sure the 2 run parallel. I cannot live in Europe and see the nations of European nation suffering. The traffic lights are to be switched off in Germany, the stadiums to be controlled, the heating to be reduced, the school children program to be banned, because Russians have cut the gas.

My dearest friends, fuel should not become a commodity to control. It should be a commodity to bring joy. We see in the Western Europe today families with a limited income. Big percentage of their cost now has gone on the fuel and extension of the food. Fuel used to be 1 Euro 12 months ago, today is 2 Euros and 20. A family which uses 20 liter, 30 liter of the fuel to go to work, now it's short by 150 Euro per month. The food extension another two hundred, if you earn 2,000 a month, if you do that, 30%, 20% of your income has gone.

We are there to put it back. We are there to make sure from now on you don't pay even 1 Euro. Thirty cents should be a balanced, continuous price of the fuel at the fuel stations. Because it's not piped in, it's produced at the point. There is no fluctuation in the price, because the machine makes it from the atmosphere.

This game of oil industry from today is wiped out. (1:12). Fair chance for the humanity to exist. Fair chance for 85 million barrels of oil, which goes out everyday at different prices, is finished. This will damage the revenue for many nations, but I've shared the knowledge, it cannot be stopped.

You asked, how can I help? We have responded. I gave you the wealth of the knowledge of humanity, and the knowledge of the Creator, now play with it. Invite your ambassadors to come to Linz and see the gas production unit. Invite your ambassadors to come and see the Enhancement Generator unit.

### **Americans test new energy system in Tehran**

I want to show you something to see how serious we are. In the past seven days, we worked with the Americans in Teheran, which is very unusual. Americans online telling the Iranian scientists of the Keshe Foundation what they want. I want to show you something very, very serious. This is on the left. The standard system, on the right is the new plasma Enhancement Unit of the Keshe Foundation. This was done three times with the supervision of one of the what we call, richest man in US, online, telling the Iranian scientists what to do.

I thank the Teheran team, Especially Josef, (1:14). and his team for even staying on during the holidays, national holidays to prove to the Americans, that Iran has access to technology.

Have a look. This time the Americans comes up with a clever idea, leave the two fridges open, that the system comes balanced. For one hour, the fridges were left open at the heat of 38 degrees in Tehran. You see them running. 30 minutes later the standard system collapses on the left. Again double the time into triple time. We keep the system running on the right. Have you heard from the Americans? No, Keshe Foundation has access to double the energy, triple the energy cycle. This was done by the supervision of the Americans online.

We made One Nation out of the Americans and the Iranians. While there is a cut on the nuclear, on the plasma technology we work. The Iranian team worked to 3 or 4 o'clock in the morning. They stayed in the compound, in the factory, that the next day they could bring what the Americans, were asking, more to be precise. And this is a game they came up with. And that's how we started. (1:16).

We are in a serious power production, reduction in power, and delivery of the gas and technology. No nations. All One Nation, and we work, we allowed our team to be tested, and the generator is on its way.

Do not use the Paypal account of the Keshe Foundation to pay for these orders. Pay directly into the ?? (Holland) account. Donations for the gas production has to go as a donation for the knowledge to the Keshe Foundation in Holland. Do not pay, we return the funds, we want nothing to do with it. We are not selling. You sign a nondisclosure. You sign an agreement that this box will not be touched. You sign, that this can be used, shared. And then we bring the pressures on the Western Europe, down.

No child in Munich, in Paris, or in Rome should sleep hungry, because the father paid for the fuel extra. There is no food to eat. I have a meeting after the teaching of today with key gas suppliers into Western Europe. That closes the shortage of the gas coming from Russia.

You have to understand one thing, (1:18). I used to be in the oil business. I know the heads of Trans-Naft, I know the heads of Lukoil. I've got contracts in a personal name with them. I'm one of the very few people, if any, that except the Saudi royal family, which carries a contract name in oil and the others - 30 years ago. I know what it means

to play with these people. I know what it means, what it brings, but the risk is worth taking.

Gas fuel, diesel fuel should be at the fixed rate, that all the nations can afford, being African, being Asian, being European, or American. The game of control of energy with OPEC is finished. And you're responsible for it, to hold this treasure, to hold this knowledge as Knowledge Seekers. As we give it to you to be the treasurers, to be holders of this, till the government's understand the technologies are spread, the same as the transportation through the Enhancement Unit. We can balance everything out.

We might take six months of pressure, but knowing the knowledge is in the hands of you Knowledge Seekers, governments have to find a way. My advice will come to you, what to do with these units after you will receive it, and collectively together. You become the treasurers of the knowledge of the Keshe Foundation for your nation.

It's your responsibility to make sure, that the light stays on irrespective of the condition. The life goes on. (1:20). Fuel has to have a price affordable by all the nations. The Shah of Iran created this mess, and he deserved to be deposed, and opposed, and removed. He created a raise in price of oil in 1972. And that raise has not stopped, and it stops by another Iranian, because I love my nation, and I love the humanity.

The price of gas has to be fixed across this planet at 30 cents. Where the government taxation takes part of it, no more. You don't need to cross countries to get the cheaper fuel. You'll cross this planet, with the knowledge of the Keshe Foundation at the same price where you can afford it.

The oil industry, the play with the energy policy is over, and you are responsible for it, to see it to go through today. Not ?? , I could be assassinated any time by releasing this technology. I take the chance, I take the risk, I take the responsibility of it. But the knowledge now is shared amongst Knowledge Seekers, which on my death happens, are there to release the knowledge immediately in mass.

If we do it now, we create a bigger mayhem. We have to do it in a stage, that the government's adjust the taxes. The government adjust the control, cuts from military cut. Armies don't need to be done, because the military money comes from the petrol's you pay taxes on. All to be done. We need this gap. We need this time space, (1:22). to reach a comprehensive understanding of the what we call, peace process.

I could sell this knowledge for billions and shelve it. The way, when I showed the space technology to Lockheed Martin in 2004 in London, in Oxford, they offered me 4 billion, Mr. Keshe shelve it. I said, it's not mine. 20 years ago, I could take 4 billion pounds and walk, and none of you would have had this knowledge.

In next three to five years, if you Knowledge Seekers work with us the way we ask, we won't have this mayhem of oil crisis, controlling the pipeline. Three days ago, Russia closed the gas pipe to Germany, one of the main lines, for repair. We have the same thing

last month. Today, at the moment, Germany is not receiving the fuel, which needs to go to reserve tanks ready for winter. Now you know what Russia is doing.

Keshe Foundation makes sure in September, Germany will have enough technology, enough material, that it can say to Mr. Putin, good morning Sir, you can keep your gas. Gases do not need to be piped with this technology, you produce the gas at the gas station. This is not a new talk. Wang Lin is on the line. We were discussing with the Chinese government to place 1,000 to work with them to build a 1,000 fuel stations, that we will tank at the point anywhere in northern China. (1:24). So, this is not a new revelation, that suddenly Keshe Foundation has come up with. I said to Wang Lin, I said to the Chinese, we produce gasoline, we produce diesel, we produce gas all in the petrol station. Now the Western world knows three years later, than the Chinese.

Gas, fuel, water, energy is the right of every man. Clean water is the right of every man. When we tell you in a simple way, that when I produce you the Methane gas, you burn it to produce the electricity, or whatever, run a small turbine, cook it, heat it, whatever. When you burn  $\text{CH}_4$  within, creates two things,  $\text{CO}_2$  and clean water.

When I feed this into your food, feed line, you can see how the system is self-sufficient. This system should be in the house of every man. This system can be anywhere in the Universe, anywhere in the world. If you're a human, and you decide to have a barbecue on planet Mars, I have my system even to produce fields of meat, that I can produce the meat I want. (1:26). We know nowadays, they have burgers with protein, but no animal killed.

Now you understand, we have to move in this direction, we have no choice. The biggest dilemma for me for years was, to hit at the all oil cartel, and today I have. This is where, by the biggest mistake of the Shah of Iran, we created this mess in 1972, and now it's the time to stop.

In a few week's time I release the production of these, it's already shared with the Knowledge Seekers, so it doesn't make any difference. We released the knowledge to produce gasoline.

These 100 units, whatever you donate for it, when you receive it, you become a trustee, not the abuser, not the controller, you receive it with the Soul of the Ethos of the Keshe Foundation. You are custodial to this trust, that with it we force nations to understand, the technologies in the country, if we don't do it, the others will do it, then they'll adjust the system.

In a few days, maybe next few weeks, we release the knowledge to cover the shortage of fertilizers, which has been created through Belarus, Russia, and Ukraine war. (1:28). Most of the fertilizers in the West has come to the end, because they cannot be exported, it's used worse (more) than that fuel. Maybe in next few days, we release systems, it's not Gans's that you spray, that's the dinosaur knowledge, compared to what is to come.

Every one of you using this technology, which now we offer today, you place a system on the roof of your house, (apartment) blocks, wherever you live, and you feed every plant in your area, in your nation, that the shortage of fertilizer would not be responded. We publicly release this technology into the .. structure. Now you understand why I said, I want 3,000 generators to be across this planet.

You were worried that, what's going to happen. With this, what we released today, you don't need to wait for my generator to come, because now you generate the gases, which can run the system without battery.

I received a message from Wang Lin this morning. Are we going to have a good news today? I said, yes. And I hope you received your good news.

Pure water, clean water, energy is the right of every man at any point on this planet, as long as you live the physical life. (1:30). That with it, in conjunction with the rest, you don't need to kill, you don't need to starve, you don't need to live in the dark.

We are Messengers of the Universe and we know how to do our work. Now you know why I am Messiah. I feed your Soul and I feed the physicality, as I said, in the papers of the Messengers of the God are the scientists, as well as the, what we call, the Prophets. Now you understand why.

At the beginning of the teaching of today, I showed how I move your Soul and create the perfect move, perfect Soul, for the perfect body, now I feed your physicality.

Respond to the 100 unit, because you're responsible for it, and it's by donation, no expectation, but you become custodial of the knowledge. It's not for you to make a unit might work, we give you a unit that works.

We say to the Western nations on the ransom of the Russian Government, we give you the freedom.

No system should enter the territory of Belgium. Any of you break, I take, I handle through the Soul. Part of our negotiations with the European Community for energy and supply is, the end of the Kingdom of Belgium, or change of the rules to democracy by vote, by election, by presidency. (1:32). That through it we can stop the work of the pedophiles, which are ingrained and embedded in this nation through the kingdom, and their kingship.

Work with us to bring the change. Those of you who understand, knows what risk I have taken today to release this knowledge. For much less, many have been killed.

30 cents should be the right price for gasoline, 30 cents should be the right price for diesel, 30 cents should be the right price for gas. This will bring a regeneration in the industrial revolution, in investing more for the government's in the hand of their nations,

and bringing the evolution and the much needed .. stagnation, which came after Corona by many, many nations.

I kept my promise, I delivered my promise, both for the soul and the physicality of the Man in one lesson. I hope you understand it.

Rick if you like to go to the second part of this and stop it when the chapter starts, where I finish, then stop it, please. Go ahead, and know we take a break and when we come back we answer your questions (1:34).

**Proofing done >>**

Plays Video ... (1:48).

**<<< BREAK >>** 441 KSW 7. 14. 2022 (1:54).

K- ... Some people are donating to the Keshe Foundation Paypal for this unit. Please donate to the Keshe Foundation headquarters in Holland, not through the Paypal, because we are not selling anything, and it stays as the donation. It has to go to Foundation, which received donation.

Any other question? Or shall we start with a question?

Q: (1:56). ... I'm a quadriplegic due to a traffic accident, can I enter the flight unit and get cured?

K- These machines are not curing machines. These are flight systems. We are not providing health or wellness facilities. Even though we see people with, they come to test the flight system, they see some changes.

Yesterday we had a guy from Germany, his aim wasn't to fly. He wanted to see the grandmother, which was precious to him. And he went through the system. We didn't know that. It's just we don't ask questions from people, what you want, what you're expecting. They write it in a sealed documents and leave it on the table before they go in. When he came out, I said what happened? Did you do anything? He said, yes, I went to see my grandmother. That's why he came here for. My wish to see my grandma. But before I go in, I had a problem with my knee, I could not move my knee, freely. And now it's gone. he was sitting on the sofa, twisting and turning his leg.

I said, you came here to understand the elevation of the soul, and how we can do what it is. And so gaining, and we've seen this a lot. We saw this with the new system, with four people, five people this week. (1:58). But they don't tell us what they have, why they've come. And they have what you call it, go through the system, and when they come out they tell us. We had yesterday, a volunteer, which he wanted himself becomes here every day, he wants to fly, and he goes through the flight system. He is blind in one eye, and yesterday he said, for the first time. Don't forget last week, he could see red. This week he sees blue. He feels for the first time pain in his eyes. I said to him, you want to carry on testing, when your soul is ready to bring the vision of ?? flight to you. We are here to service. He doesn't pay for any of the services. He doesn't do. He has paid once when he came. Because he's there, he wants to, the desire to see, we are not there to stop. But we are not here to what do you call it, provide health, or whatever facilities.

This is a pure flight simulation. That's what I said to you, from what you tell us, we understand what we need to change, what needs to be added. The 3 Chairs on one side has been, is not being used anymore. So the process is. There's a very big problem, paraplegic with accidents. It's a cut nerve, or a crushed nerve. If the nerve is crushed, everything is mashed up. If it's a straight cut nerve, lines usually find each other. (2:00).

We have developed a technology for realigning the neuro system, which is taught to the doctors, and it's for them to apply it. You can connect, if it's a crushed nerve it's very difficult, in a way, you get a banana, and you squish it together, not the things stands in line, and you just, that's how the nerves are.

In the world of present science, there is no development to be able to realign it. Nerves is still some jump, and you get what we call, phantom pains. If it's a cut you, you cut a finger you can do the nerve, because they can connect up. You crush a nerve it's very difficult to find the matching, maybe a few centimeter down to do it.

We have developed the technology for doing it, it's not within the space technology, it's within the knowledge of the health applications of the technology, which is taught only to doctors, and now we are preparing doctors for the use of the new systems. That's how it should be, we are we are technicians, we are researchers, we are developers, and once we develop the system, we hand it over to those who are going to use it.

This is what the Naturopathic license of Keshe Foundation says. We develop the technologies and we ?? doctors to be used, and we keep it that way. That's why we start handing over everything to doctors as of yesterday. We had till two o'clock or so, one of the doctors of Keshe Foundation, (2:02). medical people, people who understand and educated in the world of medicine, to be there to take over, and literally the last sessions I don't even go in, because he knows what to do, he understand and we just try to train. Because they'll be the first people who received the first units, and they need to know how to use it, and then we have to train people for the other ??

Paraplegic, you have to know how it's happened. Then there is a way to realign even the crushed nerves, but that is outside the Keshe Foundation work, it's with the medical side. We have developed that technology fully. It needs to be taught to the doctors, who take over the running the KF medical side in the time to come.

Any other question?

### **How are Psychosomatic illnesses treated with Gans's**

Q: ... There are concepts that say that all diseases are psychosomatic, such as "Germanic Medicine" says so, when I have a problem with my eyes, eyesight, for example, it means that I don't want to see some problems with my life. How does the technology of using GANS help or support treatment taking into account German medicine?

K: First of all, we don't treat. Secondly, you have to understand the psychosomatic, hasn't been understood not just by Germans. (2:04). It's ?? understood by the whole of the medical world. We create 80% of our illnesses, 90% of our illnesses ourselves through psychological changes. It's not that we actually put it there. We weaken the condition of our specific organs, or whatever, that allows other conditions to move in. This is how, what most of psychosomatic is.

When you go through the psychological pressure of your son, the change in wanting not to create reduces or creates a condition, that changes the salinity of the certain cells that they solidify and then we call it a cancer. So, we are a creator of it. Accidents, we cannot do much. But, it's not Germanic. It is understood thousands of years ago by the first man. We create, some of it.

It's amazing how, in the system as I was talking earlier, we say, we go to the airport and see the sign, you wait till the sign comes up. We see this in system. Yesterday, or the day before we had a guy who had, who could actually feel the organ. It's not the touch feel, it's an energy feel. This is what we said in the past will happen. The same as in the system, you go and you visit your grandmother, now you go and you visit your own organ. (2:06). What I've done wrong to you? What energy you need to change that I don't have the pain anymore?

We had a guy, came three weeks ago or so, and he could not move his hand, he came out he could shake his hand anywhere. He came in yesterday. Now he says that the pain is on the other side. I said, of course, now it is balancing what you were suffering from the other side. This side has to come. He says, but now they both work.

### **Soul is like nuclear bomb explosion - fields spread out huge energy**

You find a solution, within the strength of the Soul. Our machines are not a medical systems. We elevate the Soul, and the Soul is like. You see in the movies when a bomb explodes and the way it goes all the way out? That's your Soul, central of a nuclear bomb

is the Soul, and the fields of it, is when it expands. It has so much power, that the case of the nuclear bomb, it destroys, because it's over energizes the system, .. anything on its way.

Now it's your Soul, energizes your own organs. It's no difference. It's you who triggers that bomb. It's you who releases that Soul, and triggers that way, you have ?? energy and everything has to come to a balance, and it's so fast. Once people become less anxious when they're in the system, and allow the energies to expand slowly, then we'll see that any kind of .. imbalance will be balanced. (2:08).

K: Any other question?

### **Does this T interfere with the Soul's plan - No - we are facilitators**

Q: .. Does your technology interfere in some way with the soul's plan? If the soul wants to experience in a sick human body, why heal the body?

K: Can you repeat that?

Q: Yes. Does your technology interfere in some way with the souls plan? If the soul wants to experience in a sick human body, why heal the body?

K: No, we are facilitators. I had two doctors in the systems yesterday, and I spent nearly an hour and a half, plus, two hours with them. I put the two doctors in two different systems, one on the left and one on the right. I took them through a process to show as doctors, how much they are controllers.

We have a system built in, that we can adjust, and I got them, the two doctors together, to move different things in the system, or touch different things. Every time they went, our system switched on, every time they move, after a few seconds, they switched off. So, we were watching the expansion of the soul. Which meant, when we could. It's very interesting, it's amazing when you have very beautiful doctors, who as medical people, they sit and they tell you a lot of things. I spent a lot of time with these two. This is the second time they're coming, so they were familiar with the system. (2:10). The first time they came they went through the ?? chairs, this time there was a direct, one of them went direct, one of them went through the three, two chairs.

So we wanted the medical side to understand a lot of things. It was amazing how parallel the two were. They just knew each other, there was no relationship between them, or any friendship, or whatever. They just knew each other as Knowledge seekers, they came to know each other.

Interesting is that we have a special system in the structure, that they could, at certain points both of them trigger, and triggering this would allow their soul to expand beyond their physical body.

We played with it, we played, they were more than willing to experiments, because they are doctors, they are the medical people, and they see different alternative, solutions, or

whatever. And we spent a lot of time with these two doctors in the system, understanding the transfer, the expansion the ?? of the Soul within the structure.

### **Heal with touch - than don't need medicine**

Interesting is how, as they are givers, as they are doctors, they have trained to save lives, to give from them. Then we go to the middle and sitting and we just check marking the feelings and everything, and how this happens. It is amazing how people of the medical profession, who are there really to help their patients, become givers, and they take so much to give. (2:12).

As I said one to of them, you go and touch the arm, the patient says this is where it hurts. You're such a giver, you're such like ?? me. Your finger is like a pain pen, pain pad we sell. Your touch has already changed. The prescription is just a .. physical thing to think that you're taking (something). The other doctor said, yes, this happens a lot with my patients. I said, but this is what it is. We are the healers of the old time.

When a patient said this hurts and you sit across the table, this is a prescription. When a doctor touches it, he has become that Pain Pen, prescription not needed. But you want to take something to say it's done. The process of the healing by the doctor has already started with the touch, and they both could confirm to patients they touch, there's a healing with them. Because both of them do acupuncture, and another things as alternatives for their patients. This is the way the structure works.

Our system with it, we could ask them the expansion of their souls, how much they expanded, and they tell us beautiful things. Then we have a facility in the system, that we can drain it, we drain their energy and then we see (Mr. Keshe make a noise with his mouth), if the system works, goes like nothing, and then they stops, because they have to be in control, they have to be in charge.

We saw the same thing, we had yesterday with the banker. She has to be in charge, because money controls everything. (2:14). I said, this is what happens with you in the machine, control.

Any other question?

### **Helping elevate Souls that did suicide - will they accept elevation**

Q: .. Many thanks for the love, knowledge and service to the universe. Can the people in the flight system see who has committed suicide and help raise that Soul?

K: You have the capability to raise any Soul. But the point is, does their Soul wants to receive that elevation? This is your biggest problem. Your biggest problem is not giving. If what you give is accepted.

You know when you walk on the streets of China in Beijing, beggars are not there .. anymore with their hands out to collect coins, as is tradition in the West. Nowadays the beggars who want money, they put a WeChat number on the floor, (to you), you just give it into their accounts. Even when the government gets taxation on the begging. There is no change of money, no one carries a money, it's just do it with the WeChat.

Up to now beggars were rich, because nobody knew where they were. Now the government knows what the bagger takes. This is how the system should be. (2:16). You can give with nobody knowing, but you can give with everybody knowing exactly what is, to get the tax of it. It's very much, very much, it doesn't matter how much you give. Is the Soul you want to give it to, ready to receive?

Any other question.

You know, it is very much like when you feed the baby, you fill a spoon up, but the baby locks the mouth. Nothing goes in. I decide what you put in my mouth. I decide what I receive. Have you ever had that experience? One or two spoons, yes, I don't like the taste, I shut the gate. That's it. You can have it, I'm not touching it. You hold it, you cooked it, you eat it. It's not to my taste, it's not what I am looking for. And, it's exactly that way.

Any other question? (2:18).

R: There's a question in the chat here. It says Mr. Keshe, this is Alexander from project...

K: Yes, I'm reading it. That will be answered by the Foundatoin.

Q: . There was a question previously in the YouTube from Brett regarding what kind of gas. He says he's a licensed gas fitter. But he says that his question has been answered now. But, he was asking, will it be like CNG, or can it be liquefied to LPG, meaning natural gas or propane? But you were talking about methane gas, I believe as. Can you clarify, there's methane gas, but also you mentioned gasoline production?

K: Actually, we call it a diesel, and petrol fuel, as a liquid. We talk about gas as methane gas, and we talk about gasoline. You Americans call it gasoline, we call it a fuel, in the petrol and diesel. (2:20). We are talking about petrol and diesel in the coming time.

Q: Hey, everybody, this is Alex from Vancouver, Canada. Been following the knowledge for a little while now and very grateful.

R: Oh, you're the one with the question in the chat, correct?

K- We'll respond to you back through the email you sent.

Q: Okay, thanks so much Mr. Keshe, wonderful to meet you finally in this incarnation.

K- The answer to your question is yes, but they have to sort it out inside, what it is and how it is.

Q: .. How do you see the difference between the sovereign living being, and that of a natural person commercial good, admiralty law, belonging to the corporation, former state? (2:22).

K- I don't know who started these things. A lot people have bought into it, it doesn't make sense. Nobody is part of the property of anything. This is something that is going on around on the internet, and a lot of people. It's a fantasy world live in, to believe in it. If I understood correctly. They produce so much papers to confirm it is, what it is, and there's a lot of nonsense, too. Those of you who know what it is, for us as much as I understood. We are not subjects, we are not bought at birth, our birth certificate is not our slavery and the rest of it.

It is very much like a CO2 program, which the Dutch guy started selling trees for it. Because Dutch were fantastic in agriculture, plants and flowers, they change it to the CO2 and global ... global warming, and everybody bought into it. Do you understand what I am talking about, I hope.

R: I understand, because I worked for many years for the largest reforestation tree planting company in Canada, and which was run by a Dutch man by the name of Brinkman. So I can understand that. He is trying to plant the planet, and you know, reduce the CO2 and so on.

K: You have to create the condition for it. You know, how much, a few years ago, used to put, exchange your air miles with how many trees, if you remember? For the jet fuel, we used? (2:24).

R: Carbon credits now are similarly used.

Q: How much diesel or petrol is produced daily?

K- Where, with what?

R: I guess, with the new gasoline producing units.

K: That we will announce when it's done. We'll announce that when it's done. This is what ?? We were just talking about the gas. The prime problem in Western Europe is gas production, what you call liquid gas.

Any other question?

R: Oh, Dan seems to be upset about your answer here, and he says, "Are you kidding? You do not differentiate between owner, and holder, and beneficiary. (Mr. Keshe laughs) So, you do not have a passport? Do you pay taxes, and tell me as normal to be happy that you work, but now to be a slave, to be taken by your corporation? YOU SAY IT'S NORMAL? (Dan wrote here in the chat in capital letters)

K: It's not normal...

R: He says he's not upset. But when you use capitals, Dan, that means you're yelling, basically, do you say, it's normal, you're upset.

K: I understand. The truth about this work is, (2:26). you live in a country, you have the benefit of it, you pay the taxes of it, you pay them, but we call, what is due. People don't like to pay taxes, but they like to have the bus service, they would like to have the hospital service, they would like to have a cleaner street. They would like to have police

force, that they can do things for them, the ambulance to be there. They only look at their own pocket. So, what can you tell to the people like this? How can we explain it?

Of course, we pay taxes, of course, you drive a car, you have to pay for the roads. Otherwise, do you like to bumpy your roads, when you hit a hole in the road, you curse the whole world, government is not doing for it. But to do it, needs to pay someone. Unfortunately, the mayor is not a laborer to fill in the holes, you didn't pay him for that. So it's part of what you get in the Western world.

Go and live in Africa, you don't pay taxes, you don't have the roads, you walk on the dirt. Hospital, if somebody paid for it, it's 100, 200 kilometers away. Ambulances just don't exist, as such, in rural areas. You pay for it, you take it. It's just the way things are.

But collectively, we accepted that we have the roads clean, that we can walk, we have the lights at night, we can do, and so we pay for it. People like this, only look at their pocket. (2:28). What I give. Hello, what did you take? Did you get on the bus? Did you get on a train? Who pays for that bus? Do you think your two cents will do, or 10 cents, or one pound will pay for that bus driver, the diesel, the repairs and everything running? Doesn't work that way.

And if you see as a control, don't get out of the bed, don't switch anything on, and stay in the same bed, see how long you will last.

We live in a society, which we have accepted collective service. And some of us are part of that, some of us clean up the floors, some of us deliver the food to the hospitals, some are nurses. Who pays for these things?

We collectively accept the responsibility of our children. That's why we see more liberated women, because now instead of one father making sure there's a food on the table, there's a house, the government does it, and us, is all the men and women work to pay that government, to make sure that child born has a free education, and free hospital, and free everything else. We have become collective society for our children. But we leave it in the hands of that one mother, to raise that one single child.

The head of Keshe Foundation yesterday was talking about, if we could, with the Enhancement Unit, go and take all the abused children from the world we have, we can ?? switch the souls. Then she sent the message that, so, where are we going to put them? Where we're going to find? (2:30). The wish is beautiful to have, but who is going to make it responsible, to look after them, now that we have the Enhancement Unit?

The wish is there, but the practicality of it, has to be there as well. We, especially in the Western world, and gradually across the world, we become collectively responsible even for the children. A mother who is unemployed, and a child goes to school receives a free education, free hospital, all the injections are done free, clothing provided with a Social Security backing up, keep paying the mother to do.

Now we are collectively the father of that child, doesn't matter if it is a man, or a woman, or a young, we work, we pay for taxes to ensure that child grown up, that he might become a doctor, he might become a scientist, or become nobody. But it's our responsibility that child is born. And where does it come from? We pay towards it. It is a collective life.

In November we become 8 billion of us. We passed the 7 billion mark. According to United Nations, by the end of the century pass 9.6 billion, sorry, 11.5 billion, I think. China will be about 1.3 billion population and India will be 1.6 plus billion people. India will take over China in the next 20 years. Because China has a population control, India has no population control. And, still is part of the different ways, the children in India, in China and in the rest of the world grow. Poverty or ?? (2:32).

R: Okay, Mr. Keshe, what about the challenging idea of governments that Alex is bringing up in the chat here, that governments are not in integrity, and have not been for a very long time. They're spending far more than they take in, on taxes on things, none of us have agreed to like war, bio weapons labs and other such things. Humanity's not agreed to this. So why would they pay taxes to governments, that have been spending on things that we don't really want?

K: Which country is he from?

R: I mentioned that is in Canada, Vancouver. I am not sure if he's from Canada but, that's where he's living.

K: To be a superior power, to be a Western leading nation, usually is done by terrorizing not by developing, who has more armies, better to kill nowadays has more respect. Everything else, which goes with Canada, America and the rest of it, costs money. You elected them, to preserve for you to be a leading nation, and they spend it, to have these things, that you feel powerful enough to be a leading nation. So...

R: Yeah, but the thing is, we didn't really, we, the people didn't really elect the government that's in right now, the government that is in right now got 33% of the vote, which is only six, which is less than. It's only about 16% of the actual population of the country. So less than 1 in 5 people .. (2:34).

K: Do you know what's happening in Sri Lanka today? Just go on the news. People have gone to the house of the president, people have gone to the house of the Prime Minister and they're literally swimming in their pools, and watching the television, and playing board games in their homes, until they go. I think that one of them, through fireworks brunt the building down in the prime minister or something.

R: Yes, I think I read about that, too.

K: So, do we want that way to change in democracy? Or we ask for our government to open the black boxes, "black budgets," they call it, Americans are really good at it. Black budgets are, we do whatever we like, we borrow, and you pay for it. And we try to make the most advanced killing machines, and then we'll see what happens.

Because we want to be superior, we want to be whatever. That black budget is one of the ways, that the government does not answer what it does, and most of these projects are hiding inside it. You have to get your parliament and change the black budget. There should be no black budget financing.

Then it goes the same with the military. We've seen it, and it's somehow has been ingrained in the work of a government. We have to do, to be stronger, to be bigger, to move all powerful, that we can receive whatever. And, with the new technology, do we need to?

### **Coming riots in Europe - foreseen**

We saw last week, the way things have turned up in two or three Western countries. (2:36). The Americans are happy, that the dollar is in parity, and they can do a lot of things with the Euro. But, what's the next step? Would we see a lot of refugees out of Europe into America, or other parts of the world, when the riots and burning down starts, as they suspect, that it might do.

It's funny, when you look at it. We were testing in Tehran, on Saturday, Sunday with the Americans and everything else. One of the world's leading oil nations has to have a power cut one day a week, because they don't have the fuel to run the generators. All that was shut down. I mean, we had the power generation backup, but there's no electricity.

And this is how things are going to turn up. And the funny thing is, many of them, crypto-currency miners have moved into Iran, because electricity is cheap, and the create a crisis, by trying to make money out of crypto, has brought the nation to the point of shortage. But, what can be done, what's the next step?

This is a very strange system, we see it, for at least what we know, as I said before, governments allowing new styles of work to come. New ways of work to come in. (2:38). For the first time, we always as I said, in past 14 years, and before Keshe Foundation worked, passed (on) knowledge, developed technologies, through the structure of the Iranian government, which ended up with different applications.

For the first time in the history of Iran, an independent private space company has been registered, has been allowed to be registered, that bring the new space technology in. It is a major breakthrough in Iran. Keshe Space Company, as a space company now is registered in Tehran, in Iran, and we start operating under that banner. Which means the government now allows one of the leading space institutes in the world, with the new technology to openly, like Elon Musk and the rest, to operate in Iran, to bring in the new space technology. We are a registered company.

Space has been exclusivity of the government and SEPAH. So, we can start launching Spaceflights, space teachings as base development in Iran. This is how we look at it, we

don't look at the budget from the government to hide technologies. But now we officially can start doing space testing, because we are registered to this.

We have no black budgets. Our budget goes on what we receive, we sell, and we receive the donations. But, officially now as a space, registered Keshe Space Company, we start space development. (2:40). Americans will test their rocket propulsion, we test the new flights, as you seen the gas productions, and new Enhancement Unit.

We have no black budget, and then we operate in a way, that knowledge which is in Iran is in Austria, is in the United States, is in China. We have registered the Space Institute in US, already operating, are ?? sitting to go through. Chinese is there to go. So, now government's fight who has more advanced. We saw the fight between NASA and the Chinese in the past couple of weeks. A structure like us now shares the most advanced technology freely amongst us.

Governments allowing, even the controlling governments, allowing such an Institute to operate is amazing. You Knowledge Seekers do not understand what has been achieved, what has been done. You just look at one MaGrav and the rest. But, the amount of work we are doing, the amount of knowledge sharing we're doing, governments are allowing even in Iran, which is fully controlled, on the space side. Where an independent private space, which is a major corporation and major changes in Iran, especially on the military side and defense side to operate now freely in the market. And, is owned by an Iranian nuclear physicist.

We have no black budget. (2:42). Our black budget was a black box we told you, you want the Gans production to go, the gas production to go, and we'll see how you as Knowledge Seekers will build it up. We fail, you fail. We don't manage to break the cartel, on the oil. You will fail miserably, because we brought you the knowledge, it's for you to be able to receive it.

When I told you that the systems will be delivered by the end of July, we are not going to, it's already been built, it's already getting tested for different application, and be release. This is how we see the structure will take shape.

This is how you should. Do we have a budget? We don't have black budget. We use everything, everywhere possible. We asked you for help six weeks ago whatever, for a project which changes position or the KF, and we're still trying to complete that, that we can go ahead with it. We found out that there was another piece, which was not calculated, short in the structure, we are trying to sort it out. We're not coming to you or to help us again. (2:44). But when that is sorted, it's no black budget. It's spent directly in the lines, how it is, how it goes, and how we planned it to go.

### **Markray used as a treasury - when the time comes**

We are a major shareholder in Markray, and we use that to benefit all of you when we start moving. We use it like a treasury of the Keshe Foundation. You will understand

when it comes and starts operating. And, we use the structure of the Universal Council, the Earth Council, and the Keshe Foundation as a governing body. Govern through the Soul and backup what we can deliver it.

Would there be a black budget? No. Would you allow to create weapons? Why should we need it, when everybody is the same? A lot of people come and claim a lot. I work through all of you as Knowledge Seekers, and you are responsible for what comes, in how it goes, in what it leaves, and how the extension comes.

We need to have 100 unit to across this planet, paid for to be. Because otherwise, I have to go and do different things with different governments and things, and they dictate how the technology is released. When I tell the gas companies, and the government of Germany, already 100 units committed, it's out, are with people, the talk is different than, oh, it's just a scientific organization come here to do something with us. (2:46).

That's why we need 100 units out. You're responsible for bringing that peace condition, not me. I've done my work, we are researchers. You want government's not control, for you are in charge, you're in control, you have to do it, not me. I did it for 15 years, I put my life on it. You have to bring that change. Everything we've done has gone for the Keshe Foundation.

I've just received this, which I'm going to share with you. This is the invitation card for your world leaders. You fill in the name, you fill in everything, which is there and you send it to them. They have to register, booking at [booking@at.kfexhibition.center](mailto:booking@at.kfexhibition.center). You book it for them, but they have to come. Now you see how we work. This is a invitation card, you can take a copy. The same goes to Universal Council, and Universal Council Support teams and every one of you. It sits with you to bring that change, not with us.

We are doing all our work we can. Keshe Foundation team is working relentlessly in the background to make sure that what you wanted, what you asked for gets done. (2:48). But, as I call it, you are "side walkers," you just wait there for everything to be delivered. Everything else that is not done, it's the Foundation fault.

What have you done? What are you doing? Nothing. Most of you are watchers. When it happens, "oh, we went with the Foundation, this and that, and we were with the Foundation and the others. " You only participate if there is something in it for you.

Any other question?

Q: Australia ... Just a question on the, which was really exciting for me as a farmer, the system that, so you don't have to use fertilizer. Is there a distance to that, from say, my property? Or is it to do with my own soul? That it can expand out further, and further, and further? (2:50). And also, I do have another question, but just on based on that, the energy system that, you don't have to use fertilizer.

K- What do you mean by that?

Q: You announced that there's a system, that you won't need fertilizer? How does it work? Like, is there a distance from (your neighbors)? Or does it only apply to your own property?

K- You can extend it to a city. You can extend it to a cross section of a country.

Q: Right? Okay. And when it comes to, the fuel costs and that. Say, for example, diesel, when all the farmers are paying double now for diesel. I would be able to help everyone here, and the transport companies, in a big way, but probably need a license, for that as well. I'm not sure what the situation would be there? Or would you need to own a petrol station. That's another thing, that we'd have to look at. So I'm interested in all that, what I can do to help others.

K- What. It is the progressive development of the technology and the knowledge, and we are limited in what, and how much we can do? And now we put a lot of resources in the Enhancement Unit with our resources in the power Enhancement Unit. A lot of resources going into this, and fuel of gas. (2:52). So it takes a lot, and we don't receive that much to do. More or less every cent, hand to hand, is getting a spent now.

The next step comes when we go through the next phase. This technology already exists, we have it, It just has to be redirected to these resources. I think part of it you would have understood in the Enhancement Unit in Linz. When we speak about ... then you understand, it's not something which we don't have, or it's something.

If you go back to the teaching of last couple of weeks, when we say we have people in the middle. Yeah? The fields from these two (reactors on the side), creates the fields here (in the middle). But the fields we create in a specific way. We cannot do it in a normal way. So now this is one post on your farm, and this is the other post on your farm. You grow wheat this year, and you grow maize, and something else in the other half, next year. It's no use having a fertilizer for wheat, when you are growing corn.

It's a knowledge, which we gained, we have, and expands to the use. It has to be delivered. It's not a normal knowledge. Normally it cannot be done, in any way.

Q: I have this CO<sub>2</sub> capture unit from the Keshe Foundation. (2:54). What I've received is more the one Cup of Life system. Is that okay for farming, or should I be using just CO<sub>2</sub>?

K- That's the best you received?

Q; Oh yeah.

K- That's why it was sent to you. It's the one with the big frame? It's like a box with trays on it. Yeah. Am I correct? with the buckets in it.

Q: Yeah.

K- That is one of the best you have. But you have to remember to use the amino acid (AA) on the top of the cups, before you drain your Gans's, and then add it after the wash.

Q: Yeah, I collected everything, the amino acid and everything into one container. But you're saying you should separate the amino acid, and then add that later? Is that what you are saying?

K- Yes, yes. Because when you wash it, you get rid of the AA usually. It's on top of the water and you wash it out. You collect the AA, you wash the Gans, and then you add amino acid (back) to it.

Usually that amino acid which you collect, brings the right balance salt for the plants, and the things. We sent that unit to you. I remember because there was some delays with the shipping to Australia, and the rest of it. We had a lot of problems with yours. That's what you received, the way you received it.

Q: .. Look waiting is not a problem for me and understand sometimes ..

K- No, your situation was difficult. It was costing us more to ship, than what you paid for it.

Q: It's okay, I'll donate. I've given you some donations, so I'll make it up to you.

K- Yes, I know, because at that time I remember this. Because the shipping, they wouldn't ship. I said what's the reason. It costs. I said find a way to get it done, (2:56). because it doesn't matter, it's our problem. It's been solved. Meanwhile there was some, in the time it took, there was some upgrades and updates, so you receive the upgrades and updates before it was left (shipped).

Q: I'll pay you back anyway, it doesn't matter.

K- It doesn't matter. It doesn't go, because I remember your case, about a year ago or so. It was sitting there, because every time I pass the thing, it was sitting there. I (asked), why doesn't this go to Australia? Why is it sitting here? They said, there's a problem. So okay, I said, now pack it, and then they there was something that had to be sorted out.

Q: Something is happening, because the people that comment on the produce that I (sell them). The fruit, stone fruit, and vegetables, watermelons and pumpkins and whatever, tomatoes. They all always comment on how tasty my produce is. So, I would say that the plasma is doing something. Also, you know, I use other things like the biodynamic methods as well, inputs. But I'm using the plasma in conjunction with everything I do now. You know, I am experimenting?

K- Let us know. I think you work with Jim and Lisa as well. .. We learning more on the farming.

At the moment, all the concentration is going on the dynamic side, or what we call the Enhancement Unit. In time we'll come back to agriculture, because we see if we complete this side, the agriculture side, will be more or less resolved. Because people will not rely that much on it. We eat out of pleasure of maybe eating something. That's our target. (2:58). But at the moment a lot of energy and effort is going into.

We have a production. We have a research side and a production side. And everything for us, I explained before, (would) take six months to produce something, because the research had to be done. Now .. everything is lined up, we have different teams, and different people who are responsible for it. So like we changed the head units in the EU yesterday, which was changed on Monday. (Before) it would have taken us 3 - 4 months to do it. It was done within a week. The new Enhancement Unit, Head (units) for the other one, which just changed. It will be there next week.

These all cost money, these are wages pay. The expenses on the Keshe Foundation are huge. We don't get support from people. Very few people support the Keshe Foundation. By sell of the products, by developing new .. structures. We try to keep up. KS are worse Jews I've ever seen, most of them. They like to have it, but they don't put anything in it. If I make the Knowledge Seekers teaching on Thursdays, you pay 5 Euro to come in, there'll be 2,000 to 10,000, (if) we earn 50,000, (then) we can spend that 50,000. (But the money) is not there. Millions (being spent), nothing comes in.

Stealing is in the habit of the man.

Q: In the past Mr. Keshe I used to do some PowerPoint presentations, and when I charged \$5 not many came. When I charged \$20 more people came. So sometimes .

K- What do you mean? (3:00).

Q: So it seems like they thought, they would get better value, if they paid more.

K- I don't know. It's just a way it is. It's just the way it is, it works. We'll see what comes up, we'll see what we can do. We'll see how things take shape.

Q: It takes a leap of faith, Mr. Keshe, it takes a leap of faith for many people. And I think if they feel what I feel and understand, maybe they would give more.

K- Hello .. I lost you for a few seconds.

Q: Yeah, I just said it takes a leap of faith, you know, and, you know, people would give more if they, you know, understood what you're saying and the technology, then they would give as much as they could possibly give, without worrying too much about, you know ..

K We're working on black budget business. We have to serve the technologies to the others, who control, and then we go back into what we call, what's next. You understand? And then people say, "Oh, Keshe Foundation .." You know, the way we did with what you call it, "with giving the Key to the government," If you remember, in 2012 hundreds, thousands of the Keshe Foundation followers, when more or less I call it, "rioting", writing (to us), "you betrayed as," you gave the Key to the government, and the rest of it. Then when we gave it to them, they did nothing with it. What are you crying for? (3:02). You understand? And this is the way it is, the way it sits around the Keshe Foundation.

### **Summary of what different countries are doing with the T**

Q; Which countries Mr. Keshe are the most responsive to the technology today, Austria or are there other countries that .. ?

K- Each one works in different way? Now we have I think about 32 Keshe Foundation knowledge groups. We don't have the Chinese, we don't have the Japanese, those two are not set up. But I think it's about 32. I have a list of. The Arab nations are busy with their business. We don't see hardly any activity in the Middle East Arab nations.

We see extremely active South America. We see a limited number of activities groups or whatever in North America. Europe has always been very, .. dynamic. Europe is one of the most dynamic ... structures. We see activities very heavy in Russia. But Russian groups are extremely active for themselves, and it's like they become gang groups. Different groups are working for themselves, but very active.

In Middle East we see Iran. The Turkish Keshe Foundation have, are very active, but they commercialize most of the Keshe Foundation technology for themselves. (3:04). We see them operating companies and different things, and they copy whatever we do. Africa is sporadic. There is hardly any activity compared to the area.

Then we see China. Chinese Keshe Foundation is extremely active inside for themselves. People are making a lot of things in China selling them, on the name of the KF. Some of them change the name to "Quantum," and when couple of the guys who changed the name to Quantum, to defraud, were arrested by the Chinese authorities few years ago and that went ?? with it. But a lot of them work on plasma, on the Keshe Foundation.

Australia is you lot. Japan is extremely active, but in the background. Japanese were pressurized heavily in some parts, especially after Fukushima, by the government of the ... this is Prime Minister of Japan. He did a lot of harm to the Keshe Foundation, as I explained. He was the one who was assassinated. He went outright to steal from the Keshe Foundation. But he belongs to one of the most radical criminal organizations in Japan. He is not what he is seen on face. We know how he operated, because we had to deal with him.

Q: Are there any good leaders in the world .. today?

K- I don't know, it depends what you call good, to each side.

Q: Well, you know, I look at people like Franklin Roosevelt, and JFK, and I think, where are these people? We don't see them anyway?

K- But were they good? Ask yourself a question. What we do not know, that they. What did Roosevelt bring in? (3:06). which now.

Q: In my research, Roosevelt to me was, tried to do the right thing, but he died, you know. I think that given the chance, and even JFK, you know, no one's perfect, like in a sense. But to me, there was a quality of, that I like.

K- We have been nostalgic, you know. You have this, you know, young Prime in Canada. Everybody thought, but he turned out to be worse, than the old ones. How in such a young life, he has learned to be such a backward, what do you call it, gangster, and god knows. You heard Rick voicing.

We see the position now in most of Western Europe. Presidents are losing positions, and times, and another one with the same thing, with the same group comes up. We saw how Prime Minister of England now is gone. But some of his activities are no ??? . We say, the ex-Prime Minister of England, they only become prime minister to line up their own pocket. What was his name? The Prime Minister of England he's one of the top richest

man in the world now. He put together 18 billion plus, on bribery while he was the Prime Minister.

Q: Boris (Johnson) are you talking about?

K- No the other ones, behind it. Both John Major made a fortune out of being a prime minister. And other one behind him, after Mrs. Thatcher. His wife being a ... lawyer. (3:08). She wrote all the private contracts. He has put 18 billion, (that's) known. We don't know about unknown, into different funds and organization of himself.

R: The name Tony Blair has come up several times in the chat, while you're talking as well.

K- Yes, his wife stashed away 18 billion in ?? legal contracts. Iranian leaders did the same. All the Iranian leaders, Rafsanjani and the rest, they wiped out, bribery was nothing.

So are there any good ones? It depends what was good for what reasons, to whom?

Q: Well, the good ones never get in. Like I saw one in America, who went, put his hand up to be president, but never made it. Dennis Kucinich, and he was a man of, for me, great integrity.

K- We don't know who they are sold their soul.

You see, if you been where we've been, what we see, what we sometimes get involved in. These people come to an agreement, who finances them, to become leaders. So any world leader you see today, is already pre-sold. Any, any world leader.

The budget to campaign is so extensive, and so expensive, that needs somebody to back, or syndicate of people to back. These people don't back for the love of the nation. They back for the love of their bank accounts, what they'll get from it. (3:10).

### **KF Supports candidates for world leadership - if carry Ethos**

We see, I see this on a regular basis every 2, 3, 4 years people who approach Keshe Foundation, that they want to be a candidate in the parliament, or standing for presidential, will the Foundation support. We meet with them. We interact with them, because if they carry the ethos of the KF we can do certain things.

In the recent past, the heads of Keshe Foundation have been with me, when we negotiate with the world leaders. They sit on the same table with me. Because they have to learn how to do it. We negotiate. If we put, support a person to become a leader. We want to see the ethos of the Keshe Foundation. Where we want to see, and how we want to see it. We're not just doing it for them to be. We are there to carry on. As I said, in the .. recent past, some of the Keshe Foundation top people, who have been with me, when we sit with these people, we negotiate with governments

Q: Should be a criteria that every world leader should enter the flight system,

K- .. Yeah it should be that way.

But they cannot do. The campaign costs money. You see the poster on the wall with the name. Somebody had to design it, somebody had to pay for it. Someone had to pay for it

to stick on there. Somebody had to pay for that, because they would have put somebody else's picture on it. And they would have made another advertising from somewhere else. (3:12). And again, that kind of thing.

I'll read you something very interesting. This arrived past. ... There is a message here some people got the idea, send the message, that they get the what do you call it, the Enhancement (plasma energy) Unit for 100 Euro. There is no such a thing. ... The Gas unit is minimum 2,000 donation to the Keshe Foundation, for you to be considered. Not with 100 euro. Nobody gets anything for 100 Euro. Secondly, when we. I just got another message from the Keshe Foundation team, that the invitation we put out on card, is only for world leaders and ambassadors, not for you, just have an invitation, and I can come in.

Read it, it says, it's for government officials. It's got a writing at the bottom of it. We are not letting nobody in. You have to follow for the Enhancement Unit, the procedure is. This is an invitation card to world leaders to see, to know what (is coming). Some people says, now I have this, I can come in. .. We are very clear about it. The change of the position to come to Enhancement Unit has not changed. This is an invitation, which we give for you, for the world leaders (to come to Linz) they have to come. We have to confirm their credentials, their position politically, and diplomatically, before they are even booked to come in. (3:14). Not just, I have a ticket, I write my name in and I come in.

I was going to show you something. I get messages from everywhere. I lost the track of my mail while ?? we were talking. Carry on because I forgot what I was going to show you. ...

R: Well, it started with the donation of 100 euros and that's not going to work. Then you mentioned 2000 euros and then something after that,

K- Before that, I was going to show you something with, it doesn't matter. It means you're not ready for it. We'll come to it because the messages are coming from the Keshe Foundation team in the ??? that is going on.

Q: I hope you remain safe, I am a bit worried, you know, with what you've released, what you've done, may you be protected ..

K- We have meeting today with the oil and gas industry of Western Europe. I'll be finishing in the next few minutes. This meeting has to take place. We do not know the outcome. We have worked, approached, and trying to especially Germany has been hit very badly. (3:16). To sort something with the German government, to support the German nation. It's our responsibility, because the Euro is backed by the German industry. And it's a major corporation in the whole structure. And ... destabilizing Germany, destabilizes the whole of Western Europe.

We are part of it. I am the European member of the Earth Council, it's my responsibility. The continent of Europe is my responsibility to cover for these kinds of things. And that's

why we've taken these steps. It's not just waiting for something happen. I look at it as part of the European continent, which I stand for as UC member, Earth council member, is my responsibility to see, to be sorted.

Q: .. How does the power energy unit for the home work, and how does the Mobile unit work?

K- What do you mean, power energy unit?

R: I guess the home energy unit is ..

K- The Enhancement Unit which is out. This connects to the house and we have proven now with the Americans, coming up with all the ?? declination of it, the testing of it. (3:18). It should reduce between 30 to 50% of the electricity bill. Once we feed in the generator. The generator is a battery based charging. And with the new what we call, the gas line, we can take that part out of the equation, that it needs to be, to be recharged, because now we back it with the generator, with the system of the house unit to be there.

There are a lot of things, it's a new developments, a lot of things getting added to it, and it is working, and we put it that way. But you can't add that Gas unit to your car. You need to convert the gas into energy, which is done in Europe, in western Europe and most of the world, you fill up the gas tank. It more or less completes a whole energy cycle for us, and both electrical and energy ?? But the majority, the reason for this, it has to come from what we call, production unit, of basic energies, which are set up to be done.

### **3,000 plasma units to connect with MaGrav - the givers to create Dome**

Q: Are the 3,000 new plasma enhancement system set up as pure givers, to find position with all of the MaGrav systems, which can act as the receivers of this energy in order to create the dome across the planet?

K- More or less that's what it is. Because there's another back into it. We work, not with satellites. We work with fields and when we understand the work of the fields. It's a big difference

R: I guess they can't be a pure giver. Is that true? (3:20). There's always some take with the giving sort of?

K- There has to be something in there, to energize it to, to put it in the position of ?? going (giving).

Those of you who are a member of Universal Council, and U Council Support team, we have posted the invitation to the officials to your site. So you can work with your officials. We welcome the officials from the Iranian government, as much as we will welcome to the Hebrew language, and see if we can do both of them at the same time in there. And the same goes for the American and the Chinese. The English language speaking is responsible for all the English language speaking of, unless you're the only ?? the U Council member for United States English, which is a different.

Q: Thomas .. It's very interesting to hear all what you told us this morning. But I think we have three enormous problems in Europe and around the world. One is social, one is political, and one is financial. We have this ?? war, on the on the information side going

on, where America and NATO tries to poke Russia to start a war. We have our so called, Khazarian Mafia, ..

K- Oh, we don't have all these things. They have been there for centuries. (3:22).

Q: Yes, Mr. Keshe. But what I try to ask you is, how are we going about these three things? Because socially, we are at the brink of a revolution, financially, we are at the brink of a full collapse of this credit system, because since 100 years, we don't have a sound money system, we have a credit system. And then we have a social problem where our politicians try to introduce in Europe, and America a credit system, ..

K- Move to Africa (laughing)

Q: No, No Mr. Keshe I don't want to move anywhere. Because we are all in this.

K- No, I'm just. I was trying to change the position.

You see, the whole situation comes out of need. All the positions, all the things we have now, politically, groups, mafias, whatever. Whatever agenda you put it on, comes out of the need. And this is where our major problem has been sitting, need. Where we change this position of need, then we can talk about it.

Q: I think the need, you're absolutely right. But the problem here is, that since the 60s, when we had Brezinski as the man who told the Americans, what the goal of the west and three hundreds, (3:24). and the Foreign Relations Committee is, that is a population reduction. And they're presently absolutely on their way to go to the situation, where the population is going to be very, very under pressure, because it's going to be reduced in Europe and America, and then we're landing in a sort of 3rd ?? world country.

K- Let me, the way I look at it. In the West, we have taken charge, control in different ways, for different reasons. That's all. The life style is changed. We prefer to have one child and spend everything on it, to be a perfect child. We tried to spend more on ourselves, and why do I give live to another life, I have to look after, and the expense of life. It has brought us in a position of, most of our youngsters don't want to have children. So, we brought the population control. It's done by choice.

Q: .. the injections, people received is not by choice, it's a weapon, and it's a death injection.

K- Yes, yes I know, I understand these things.

Q: They'll be infertile ...

### **Teaching of Mitra - you do not need egg and sperm to create life**

K- Let me put it this way, let me put it this way. The way if you. If I can explain it. The way we see the KF technology for the space work, (3:26). and if you understood the teaching about the soul of Mitra. You do not need egg and sperm to create a life. You use the soul of a man and a woman to create that child in dimension of.

So, the injections don't count. They can inject you with anything. If you understand you can tune, you can develop, the structure, the way the children of Mitra are born, to be born by you. You don't need. Let them inject as much as they like. Let them do ..

Q: .. the side effects of this injection to the people is creating the suffering, which is absolutely out of this world. ..

K- I understand, I know people out of 4 friends, 3 have died because of injections.

### **Corona coming - Fall 2022 - bigger than last year**

The thing is now, it's coming back again. You will see this winter, this autumn, the Corona mayhem will start with the razzmatazz. Bigger than last year?

Q: Yes, but people know that this is the normal flu. ..

K- It doesn't matter what we call it. .. There is a way they will control. There is a way. (3:28).

### **Governments wasted pensions - need to eliminate older people - can't pay**

Let me explain to you something very simple. You and I got the fruits of the people who were pensioners before us. Yeah, they worked. They worked to build the nations. They worked to build. Our parent's worked their life and they paid for what we call pensions, in Europe, in western world. Yeah. And our government, as we heard from the others, wasted the money. Some of them went for the bribery. Some of them went for the wrong things. Some of them went for military, but it didn't go for the pensions, which our parents paid for it. And what you and I paid for. You understand. And now the government's have to pay your parents, and me and you, in coming into pension.

Sorry, the kitty is empty. The kitty is totally empty. We have two choices. We don't pay, or make sure you're not to pay. Ensure the pension policy in the West is the most amazing structure, that we have accepted, till, because when we die, it doesn't matter anymore. But in fact, if you look at it, you are putting all your money, huge amounts of money into the pension. It's there, it makes an accumulative increase of what ever, during the time you start from 20 to 60 every 7 years, every five years it's doubled. (3:30). But when it comes to you, there is nothing to take. Even though for 40 years you paid for it.

So the government has two choices when you're an age of pension and above you are at the weakest point. Find a way, to term end, because the minute you take the last breath, that pension is a saving for the nation. And we don't have to pay.

Q: That is not absolutely the pensions. Everything is an illusion for ...

K-Let me explain to you, why you are in the talk about ..

Q: Mr. Keshe for ?? a 100 years, we have a credit system .

K- It has helped to generate finances.

Q: That is the people ..

K- It doesn't matter ..

Q: The people and everybody will have to use ...

K- Let me explain to you something. We are a we are a scientific structure. We are a space scientific structure, but with it, due to our technology, we get involved, we are part, and they become a structure of the government, in one way or another, in affecting the energy, affecting the health, affecting the agriculture.

Obama said is the most disruptive technology ever known, but we need it. So it's for us to change the last 100 years. It's for us to change 1,000 years. Man has never had an opportunity like this. In dribs and drabs. Now you're getting everything in one cycle, what do you want? What else do you want?

Q: .. I'm absolutely with you, what your inventions, what your techniques are, (3:32). what your things are, they are the solution to the problem

K- We are not all the solution. we are part.

Q: Governments are not participating in it. a problem because of the finances ..

K- Listen let me, let me explain to you something. Governments are part of the Keshe Foundation development. We hear from Australia, the guy is making agriculture. We hear from in Iran or China, people are making Gans's, doing things making money. They're paying taxes or not paying taxes, but they are generating into it.

### **We cannot fight past - setting new way - Change future**

Our work, our way is, I have a very clear understanding and policy in the Keshe Foundation. I continuously remind the people around. We cannot fight the past. But by setting a new way, we can change the future. This is how it is, how it shall be, how it will be made to be. We cannot change. We are not in dribs and drabs.

The only thing Keshe Foundation is not, is not on the public television and the rest. But underneath. I was told. I was explaining this past few days ago. I was informed, that because we keep a track of the growth and the shape of the Keshe Foundation ?? hours (visitors to website ??) , we passed more or less half a billion people work, been around, heard, or done, or been around the Keshe Foundation.

It took Christ 300 years to become less than a million. We're only 15 years, Yeah. With all the restrictions they put on us. No technology, (3:34). never in the world of man, a technology combined, has discovered so much, by a collection of governments. When you don't hear any news in Austria, or Switzerland, or whatever, you don't hear the rest. The institutions, the structure, the mafias has have never worked so hard to stop a T. But we grow.

Q: I don't think that they can stop the technology.

K: But, this technology is going to bring the change.

Q: Right but in the mean time, we...

K: There is always a transition time, it's not a flick of a finger.

Q: No, absolutely I'm fully with you. The problem I see is that there is still an enormous amount of people who is absolutely not informed on anything.

K: We cannot be informed, because they don't care.

Q: Mr. Keshe, I don't mean that they're not informed on...

K: I'm not going into this discussion, because we can go for months, and months with this. Let me explain to you something very simple.

### **I won't see T fully understood in 50 to 100 years**

When the power of this technology is fully understood and applied, most probably you and I will not be here to see it, in 50 years, 100 years. But, it will take its shape, it will take its time.

### **Holding back part of T till later - bring such a shock to system**

There is a big part of the technology teaching, which I'm holding back for years, to come in. When I release that knowledge, (3:36). there'll be no politician who can stop it. There is no financial organization that can stop it. But, what would it bring as a shock into the system? It'll will be another magician. It'll be another Christ making a dead man to walk.

Let me explain to you how hypocrisy works. And how everybody cries for something, which, if we all seen it, we know what it is. If you can do what I've done, in the past years, with the whole structure, with Naomi. It's a major, major thing to build the brain, which is missing, to go to walk. Where is it? Christ couldn't do that.

Let me explain to you, I have accepted that, it needs time. When you accept something needs time, you accommodate for it. Just you know, in the airport, you're waiting for the flight, so you have to do something. I'm that man in the airport, waiting for the man to take your flight to understand his life. Doesn't matter if a plane crashes in the airport, if a president comes with the next plane, or whatever. I have to take my time, till my time comes.

So, it doesn't matter what mafias, (3:38). Illuminati's, Masons, Japanese terrorists and the rest of it, come and go. You have to have the patience to do what I did, and you have to have the patience to build it slowly, slowly, slowly. And then, if you expect just because you bake the cake you have to eat it today. Sorry about that. This cake takes a long time to bake, and bits, and bits, and bits, and bits of people have to take it.

So, we can't change the past. We have to push forward, bring new technologies bring new understanding, change the condition by new technologies show you don't need passports the way we are doing now in the EU, show you don't need the energy now, which will do the gas and everything else, and let's see what's next.

In an hour and a half, in two hours, I'm sitting with one of the leading governmental European oil corporations and government officials from number of countries how to solve the gas problem with the Western Europe today. Why do they sit with Keshe

Foundation? You walk into somewhere and do it. Why when we organize the ambassador meeting, ambassadors turn up? They have a full dossier on us.

We are in the transition of the knowledge and technology one side by the man himself, and one side by the knowledge which is coming up through the teachings and the other things, what I call, by the love of the Creator. Don't expect, they have always been there. (3:40). If we're going to waste our time on it, better don't do anything.

Political life is part of the structure of what we're bringing. I've been bombed, I've been shot at, I've been betrayed in every shape or form, I've been poisoned, have I stopped? Do they stop? No. Would they stop? No. Because there is still that wife, that mistress, that game for the child to be brought, and it has to come from somewhere.

I know what I was going to show you, tell you. Just one second. I remember now what I wanted to tell you. This is from somebody who wants to become a president of a nation. It's a message from WhatsApp. It says, when I'm with the parliamentary, then I can start up for the presidency. And it says, I've written this to you, that we need your support to gain a political strength. As we know you have brought in our nation. This is from somebody who's going to be a world leader in the coming time, and has come to KF because he knows we have influence in political directions. I can just put the screenshot of it out, and delete his name.

Q: Mr. Keshe, I am a very positive thinking person, what I do hope... (3:42).

K: I don't need positive thinking, we have no choice. ?? negative ?? do it

Q: I think the outcome will be positive. What I do hope for your conversations and for your talks with these gas people from Germany, that this company whoever it is, will be the first domino to fall, where you can come to ...

K: It's not a fall..

Q: Mr. Keshe, let me say, that you with them, can come to the point, where they see your possibilities are such, that, Yes, Mr. Keshe, and the Keshe Foundation will bring Germany all the gas it needs. That would be the Domino, which will then go around the world, because Germany would be strong enough to remain Germany ...

### **German's will change the name - Not to show KF**

K: Let me tell you exactly what happened to us in China, it will repeat itself in the West. They take the technology, they change the name to it to the German, or Austrian or a French company, that will not show it's the Keshe Foundation technology. Didn't this happen to us in Iran? Didn't this happen to us in China? Didn't this happen in Fukushima?

Q: But how do we get to the point where...

K: The point is... No, no, no, no, no.

### **Millions of lives were saved - that's what matters - not showing T as KF**

The point is, how many people got benefited with what we did in Fukushima? Millions. And that's what it counts. Don't expect to receive, we're here to serve, you have not even understood the work I do. (3:44). If it was anybody else, .. would have taken the Japanese Prime Minister, Japanese government with all the documents we have, how we gave everything to them, the sequence of times, and it would have changed.

Q: Don't you think that we are now 10 years later, we have so many more people in the world, which would take, which will see what the KF (is doing).

K: It doesn't matter...

Q: Oh, I think that it would matter. If the ?? Germany ..

K- Tomorrow they forget, next year nobody will remember. Nobody. Who speaks about Fukushima? Now it's history. But everyday Keshe Foundation GANS technology is used in the station. And, where did we receive all the threats from? How everything was curtailed to the benefit of the Japanese. The Prime Minister now he's in a coffin.

If you understand Japanese culture. Do you know what a shameful way he has died? That's why he was killed that way? I said, I wrote into one of the communications of the Keshe Foundation. No one did more harm to Keshe Foundation than him. Do you know, when the technology come out, that the technology is there. It comes from an Iran nuclear physicist, have solved the problem with Fukushima? Do you know what changes it would have brought to us internationally? The rest of the technology would have been accepted. Recently, we found out that one of our inner most people with us, was working with them. We couldn't see it. (3:46).

So, it's irrelevant. The point is, the technology saved a lot of lives, a lot fathers and mothers with the radiation are alive. A lot of farmers in Japan have managed to control it, they are doing the farming. That's what we are there for. Not to count how much good we did, and what it's our next step. This is what it is.

I wonder how many of you Knowledge Seekers will be part of this change we asked for today. I promise you, none of you will do it. But if I put the GANS unit for sale for 5,000, all of you will buy it. And, this is the problem with you Knowledge Seekers.

Q: Mr. Keshe, I ...

K: I would like to finish this discussion, please. Thank you very much.

R: I just muted him, if you want to end this discussion now...

K: Yeah, we are nearly about one o'clock, I have a meeting in a hour. Thank you very much for today. We leave the structure as it is, you can invite your world leaders to go through the process of the Enhancement Unit. And we set up the scene for the next step, to see what it is, and how it is, and how the structure of the work, works, and we'll see how everything will come together.

We hope we have success with ... the gas people of Western Europe, in the coming hours and days. We hope the Knowledge Seekers understand what is to come. (3:48). Thank you very much for today. We'll meet hopefully, very soon, by next week or so.

And, as I said to Rick before... We do so much tests in the Keshe Foundation at the moment, that we put the Testimonials to be .. from flights on every second Monday of third month, which gives us a lot of freedom, not to put so much pressure on trying to show. We put the testimonials also in the beginning, you've seen it, and you'll see more and more what happens if. As I said, we have to make every one of you to understand, for most of you to realize, this system is a live system in Linz, and carries the information and knowledge of humanity in one way or another.

It's for you to do it. We've done enough, we shared enough. We carry on doing enough. If I have to entice you by, if you come in your cancer will go, if you come in you'll see your grandpa, and if you do this and that. This is something that you have to decide, not us. Do you really want to get rid of that cancer? Or that cancer is a way of you balancing your life? And then don't ask the system to adjust, for your own conduct. But if you're there to see the change, to bring the change for the next cycle, it is there to do.

Thank you very much for today. (3:50). I'm sure we'll see, .. those of you who support the foundation for the .. energy unit, the new gas unit, which we put out, and the rest of it is all with you to do. We do our part. We are doing our part in the best of our abilities.

Thank you very much Rick, and we'll see you shortly, hopefully by next week.

**Part 2 is proofed finish part 1**

441 KSW; July 14 2022

END
