

445th Knowledge Seekers Workshop; August 11, 2022

(Quick Index , 24p Introduction Proofing & Transcription done; need to do; Key Phrases , Words) (Auto Transcription by Elias)

Transmutation is same as what is done in CO2 Gans Box; Turn Soul inside out to transmute; Transport millions of souls in Gas Bubble; Teaching on Deuterium - mechanism of transmutation of elements in body through glands; (This workshop contains immense topics - MUST study

Topic Index

In transmutation need to carry all of the man - memory of the Soul; Evolution is instantaneous on arrival; Transmutation is just like Orange and Cup - transfer energy emotion of orange; You already did the first transmutation - you were really on the Moon, it was not a dream - next step is to bring the physicality; White part of CO2 Gans is like the body, and the energy of it is the Soul; Man is nothing but Gans's; We make a Gans of the man in the EU and move the energy; You can be used as a Patch; EU is a Gans Box; When Soul leaves it passes over the brain cells and transfers the information to the memory; Turn Soul inside out that it encages the body, but still a remnant STM exists in center of head, (this is the thread to get back to the body); Schizophrenics are living closer to Soul, multiple Souls can manifest in multiple bodies; EU can take all of the Souls in a body to manifest them in their own body, exactly like when you make a Gans of an alloy, you get multiple Gans's; I am the Methi - because I can explain the knowledge of creation; I have traveled full spectrum of the Plasma - therefore I can teach you all the knowledge of Creation; Man decides how much of the creation he wants to learn; You come from the fractions of the fractions of the Original M Field - why you lost memory of Creation. I come directly from the Source; We put all the fractions together in the EU - make a new race of man; Fractions come form Me - how can you not be Me; Transmutation by governments is top secret - while KS are buying tickets; You can be put in gas bubble to travel span of U; This is reason for Energy and Gas units, not for burning;

Pedophiles spreading fear about Nano Materials; Do not touch Nano and Gans till you know how much you absorb - it feeds you; Doctor using plasma T to process his own cancer, he is head of Cancer hospital; In EU when STM expands across all the cells of the body some may be at the strength of hormones - why you feel so good; The STM from earth has distinct features by which it is known in the U; Be proud to be born in this time of transition; Will do megawatt power generators; About paying taxes for privileges - same with T; West is used to stealing from other countries, thinks it is their right to steal; Annual payment to KF for use of T - fund U Council and KF programs; Transmutation was taught years ago, both private and public teachings; Create light in hands; Total vacuum does not exist - always some fields around; Each planet has a specific type of Gas Bubble to transport it's citizens; With Gas bubble don't need a pilot; Knowledge is always hidden inside something else; Can fit whole planet inside bubble to transport it; Gas in Nano State means Gans; You don't learn transmutation - it's part of the memory in

your DNA - connected to knowledge of U; Conscious memory belongs to the D of physicality; Souls have emotions worse than man; Specific Gans for weaning people off drugs; Gas Units for farming have to also reach roots then 200% yield increase; Gas bubble technology is what was meant by "one drop in the fish tank to create a fish - the drop contains the soul of the fish - then it manifest in the water; How we carry a mixture of different souls in EU for transmutation; I came here in a bubble - will leave in a bubble; Our soul was created in D of U - like children of Mitra - created as souls (don't need physicality); All the prophets came from same soul; Methi and promise of "milk and honey" STP and STM ; the time is now; Promised Day is understanding the knowledge of creation; With Gas Units you can take all souls in whole family and move to another position; Understanding knowledge of creation depends on openness; How STM creates physicality - transmutation is reverse - expanded STM gives to the weaker remnant STM in center of head - secret to transmutation in U; 34th health teaching; Since you couldn't understand how to transmute can use EU to learn again; HARP is irrelevant and all the other conspiracies; We create the new conditions on earth others will follow; Comes from detachment; KF invested millions with company to bring out T - waiting to see if they defrauded us;

Teaching on Deuterium; H - D - T , D is the balancer between H and Tritium in adjusting the plasma energy for transmutation of elements in the body through the lymph and glands like thyroid, etc .. Has to do with neutrons in nucleus , plasma adjusts back and forth - Deuterium is the mechanism; Same behavior in C14; Becoming the strength of the Soul of the Creator - get access to the whole knowledge of creation; Souls don't hope they create conditions for it to happen; Preparing the final step towards understanding world peace; Need as many people as possible to come to Linz and do transmutation - make to the change faster;

Introduction to 445 KSW

There is a huge amount of knowledge in this wonderful workshop by Mr. Keshe, that it brings a lot of joy for a true Knowledge Seeker. The workshop starts out deepening the knowledge about transmutation and how it works, then into more about the new technology of Gas Bubble Transportation and why it was introduced now. Finally, there is a beautiful teaching on Deuterium and its importance in transmutation of elements in the body. And there are a lot of little bits and pieces of knowledge in-between, like "I came here as a Soul in a bubble, and I will leave as soul in a bubble."

When I first witnessed a Gans being created out of the fields and suddenly appearing in the water, something touched me deep inside, it was peaceful and yet it called my soul to attention. "I don't know what this is, but I know it's going to profoundly effect my life." And in a way, it was love at first sight.

Today, Mr. Keshe released the knowledge, that what we did in making our Gans's, is exactly what the flight Enhancement Unit (EU) in Linz is doing to us. The energy of the Gans is the same as our Soul, and the Gans we see in the water is like our body. There is no difference. In the EU we make a Gans out of you, and then we move you to another

place, for you to manifest a physicality in the dimension of the environment you arrive in. Just to read these words puts one in a place of silence.

Another burst of light, "oh, by the way, you already transmuted when you said you went to the Moon and felt the sand." Yes, you transmuted yourself, but you didn't manifest physicality. That is the next step. It was not imagination, you were really, truly there.

There are several important teachings in this workshop that you should listen to over and over again and watch the drawings. I will try to bring out the main points. I think you could spend months and even years on this workshop, and never get tired of it.

First, in the process of transmutation how is it that when you arrive at your destination you are all intact, your soul, physicality, and the emotion of the person who took the journey. You don't want to end up somewhere not having the right information, that goes along with who you are. This is all done through the memory of the soul. The example, is the Orange and the Cup experiment, where without knowing it, we transmuted the taste and emotion of the orange to the water, and we could taste it.

The next big teaching was how we turn the Soul inside out to engage the physicality. When this happens we still keep a remnant of the STM in the center of the head, this is also, how we get back to our body. In the past he trained the KS how to transmute, so we need to find those teachings. But the secret he said, was that the stronger plasma gives to the weaker to make it equal to itself. So the STM that expanded to cover the physicality, gives to the remnant STM in the center of the head, which is weaker in strength. If you learn this you can transmute anywhere in the U. We could practice visualizing this and feeling the exchange of energy.

Then there are the multiple souls of the schizophrenic and now each one of those souls can manifest a physicality of its own. This is the same when we make a Gans of an alloy metal. You get separate Gans's for the components of the metal you used to make the Gans. This is what happens when we entrust our souls to a Captain to transport us across the U.

When the STM leaves the body it transfers information to the cells of the brain that it passes over. It's a field transfer. We call this remembering our dreams, but in reality it's an actual experience. We live a schizophrenic life between the soul and physicality.

Mr. Keshe is the Methi because he can explain the knowledge of Creation. He comes from the Source, not from the fractions and divisions of the plasma the way we do.

The soul expands through the body with a spectrum of fields and if those fields match those of hormones, you will experience that emotion.

On to Gas Bubbles. The Gas Units are yet another new technology. This may be hard to believe, but you, your soul can enter a gas bubble and travel the U. Not only that a whole planet can be put into a bubble and transported. This was already proven, and a planet

was evacuated to safety by using this method of Gas Bubble transportation. Mr. Keshe knows where this race lives.

For a long time he was telling us about the drop and the fish tank. That drop is the gas bubble that carries the soul of the fish. Then in the water the fish decides whether to manifest as a fish.

One nice thing is that we can use the gas bubble to transport our whole family to another position if we get in danger or don't like the situation we are in. This gives us total freedom to be who we want to be.

Let's finish with the Deuterium teaching. Hydrogen (H) has no neutrons and 1 proton, Deuterium (D) has 1 neutron and 1 proton, and Tritium (T) has 2 neutrons and 1 proton. Deuterium sits in the middle between H and T. When there is excess plasmatic energy it is given to H because it doesn't have a neutron, so it can receive energy. When energy is needed it can be taken from T, because it has 2 neutrons, which is a kind of excess or storage. This is done in the plasmatic state, and Deuterium sits in the middle to balance out the condition. This mechanism is used in the glands such as Thyroid, Thalamus, and Thymus to transmute the lymph into what the body needs at the time, for example Ca or K for muscle tissues. It's a transmutation process. The same behavior occurs in C14.

When you become the strength of the Soul of the Creator you get access to the Knowledge of Creation. Please, as many people as possible go to Linz for the Transmutation process, to help us take the final step towards understanding world peace. And please study this workshop.

Thank you for listening

Quick Index

The Energy and Gas Units has brought a new phase to the work of the Keshe Foundation; Very soon we will introduce new systems, that will be added to the collection of the Enhancement Units (EU), where we will be able to transmute life from one position to another; This means we can transmit an object, a person, or a condition, from one system to another. We are looking for volunteers to start these tests of transmutation;

It's not a "Back to the Future," or whatever you want to call it. It's a transmutation, where we transfer the essence of life. It means we transfer the contents within the skin of the man, and the soul within it. In this process, the soul becomes the envelope, and the body, the content.

In a way, we are stepping into a very unknown knowledge. But at the same time, we are stepping into the knowledge of the Creator. Known to the Creator, understood by the world of the Creation. It will be very interesting, because they hung the first man who said the Earth was round, (on a pole). Now you can imagine what the clergy would do if they could get their hands on me, especially, if I tell them we transmute through the soul.

But in any case, the man has become more open minded. He understands more knowledge in the step towards the (knowledge of the creation. Now as we go into the phase of transmutation, it has become a reality. It's not a dream anymore.)

This means we don't transfer the body, rather we transmute the energy, and to do this requires a vast knowledge of the Creation. You have to be able to condition it, that it takes shape in the correct way, and that needs more knowledge. Not by us, (we have the knowledge), but by the KS who work with us, so they understand it and are able to carry it out. (Then they will be able to bring the change,) in the next step, in the knowledge of the man.

This is important for us, because when we carry the man, we have to be sure that we carry all of him, his emotion, confirmation of existence, and his memory. The memory in the world of the man, is in the brain of the man. But where is the memory of the soul? How do we confine and bring the dimension of the memory of the soul, into the dimension of the physicality (P) of the man?

For the first time, (we allow the physical part of the brain, to connect to the energy part of the soul, which is also in the brain. This has never been understood before. If we say, that the soul remembers where the mother is and can now connect with her, or where the father, who died 20 years ago, where his soul is now and can connect with him, it means that the soul has memory. (The soul connects itself to the rest of creation through its memory.)) "This is how the soul gathered the energy."

As we said, "I made man in the image of myself." If a man has a brain, and a memory, so it has to be in a non-tangible structure, in the dimension of the Soul of the Man (STM). One of the biggest problems for the future development (of transmutation), is to be able to carry the memory and the information of the soul, across through the transmutation process. It's no use taking the man across without his memory, without him remembering who and what he is, and where he is connected to.

(At the same time you have to keep the connection between the memory of the man, and the memory of the soul. You don't want to end up somewhere else (you didn't expect, having a different information about who you are, which is not relevant to the physicality you carried across.)

But at the same time, as the soul changes, when the body goes through the transformation to fit the new environment, then what happens to the memory (of the cells) of the body of the Man?

(This means that if for example, we land on the Moon where there is no oxygen, do we still need the lungs? If there is no water to drink, do we still need the digestion system? You cannot take food from the Earth to have on the Moon. You will live as a "Man of the Moon." It's the same with any other position you go to in the universe. Water for us on

Earth is a way of life, but in another position in the U it might be a killing machine in that environment.)

In the process of the transmutation, how does our body transfer from one place to another? And to what extent will the Man understand this? It's like me throwing you out of a submarine in the depths of the ocean. What will happen to you? Would you mutate? If I put you out of the submarine in a dimension of the physical man, you would die from the pressure and lack of oxygen in a few seconds.

But if I throw you out of the submarine in the dimension of the Soul, you would live. This is the difference. It's the same, if I put you out in the ocean in the D of P, in a highly acidic environment you would burn from the acid. But in the dimension of the Soul, you are energy, so you would transmute. You would adjust and connect to the energies of the acid, and that would allow you to live. You transfer this information back to the physicality, and the physicality instantaneously takes the shape required for you to survive in that position.

(If you transmute to live among the shrimp, you would get to know the way of life, of the shrimp living in an acidic condition in the depths of the ocean. And you don't need thousands of years of mutation to do it. The mutation comes out of the need for survival, through the information and energy of the existing life in that environment. It's instantaneously transferred to the Soul and the physicality of the man. That means you immediately take the shape, your soul needs in that dimension to survive, to survive in that environment.)

(To adapt to a new environment, or a new kind of food, takes the physicality thousands and even millions of years of evolution. Many people die of different cancers (because the species is adjusting to the new conditions.) (Man evolves through "evolutionary cancers.") (But when we go instantaneously to a new position in space, you don't have that chance to go through evolution. How much knowledge do we need, to be able to go through this process when we transmute instantaneously?)

(This process of adapting to new environments has to be instantaneous, and in the memory and DNA of the man. (The DNA remembers the changes,) what was needed to survive. The change DNA and RNA go through during transmutation, is at the energy level of the STM. It is instantaneously transferred into the physical DNA at that time and position of arrival.)

(This the process is the only way, that the man will become a true traveler of the space. Otherwise, he'll remain in the ancient backward ways of the traveling from one point to another, through the UFOs. As long as the man sticks to a system of machineries, airplanes or UFOs, you will still remain in the D of physicality, limited by time, space and position.)

Understanding the knowledge of the transmutation is altogether a different ballgame. It's just like what we showed you with the orange and the Cup. When it's just the orange

sitting over the Cup, the water only tastes like water. But when you put energy packs of different Gans's around it, it now transmutes the taste, flavor, and the energy of the orange into the water.

(Like the example of the shrimp, the shrimp lifestyle becomes that orange, for your soul to understand how to change, and transmute directly into the dimension of the life in the physicality of the man. The man will still remain a man, but in the dimension and structure (of the shrimp), he can live and coexist with the shrimp. He does become a shrimp.)

Now you understand what is to come, and how the physicality will take shape during the transmutation and transfer from Earth to another dimension.

This is what is on our hands. This is why we ask you to come to Linz, because we need to do as much transmutation within the structure, as possible. Then while you're here, if you came from Canada, we'll see if we can send you back to Canada, without having to take the return flight. This is one of the fastest ways, that we can promote the new way of traveling throughout the world.

Later, we'll create the condition of transmutation to the Moon, and we'll send you to the Moon. When you come back you can tell us, if you stayed in the dimension of the energy, the way a lot of you are doing in the Enhancement Unit (EU), or you transmuted and transferred to the body of the physicality, and whether you felt the dimension of the life on the Moon.

Many of you said, that you have been to the Moon or somewhere else, and you felt the sand, or you touched a stone. (Just to let you know,) physically, you were actually there. But you were in the dimension of the fields. All of you who traveled with the EU, when said you swam in the oceans, you actually did swim in the ocean. (It was not an imagination. You have already completed the first transmutations. But you left the physicality here, while the Soul was still connected to it. We have taken the first excursions into the world of the Creation. Up to now, none of you knew this.)

(When we asked those of you who went to the Moon, you said, you felt the sand, that you were flying, that you touched the lunar stones, and some of you read what was carved on the stones. You have actually been to the Moon, but in the dimension of the energy and the Soul. The other end of your soul was connected to our system.)

All of you who have been through the EU and you've traveled somewhere, or met someone, you actually traveled through the transmutation process. It was not a dream. From now on man has two dimensions of living, the physical life of being here, and the energy, or soul life, which travels the world as he likes. (When you said, you became a mermaid, or a fish, or you traveled to the Moon, we did not laugh at you. But the only thing you didn't understand, was that you actually transmuted and did those things through the dimension of the energy.)

For the first time, mankind has become a traveler of the space through his own decision. Not by, what I call, "the monkey suit," what the Americans, Russian space agency, and the others use in the dimension of physicality. You don't see the rays of the Sun arriving on Earth with a monkey suit, they travel in dimension of the fields.

Now, all of you who came to Linz in the past 4 or 5 weeks, and you went to places, met people, met your father who died years ago, remember you have actually been there. You have actually traveled the dimension of the physical life in the package of the soul. (It was through the Soul of the Man's connection, and its memory of the physical life, that it could connect to the soul of the brother, or the father who died years ago.)

(When you made your CO₂ Gans, you saw the white cloudy substance forming in the water. The CO₂ Gans came from the interaction of the fields, which also gave it that specific color.) The CO₂ Gans is actually an energy field of CO₂, and those fields start connecting or interacting with other things, like the Zn plate, or another Gans. As the cells in your body are also Gans's, the CO₂ Gans as an energy field can nourish the cells of your body, and you see changes in your health. The energy fields of the Gans in your Cup, go out into the environment.)

It's the same now with transmutation. (Your soul is (the energy of) that CO₂ Gans, and the white substance we call, CO₂ Gans is your physical body.)

Now you understand how easily the knowledge of the Creation has been transferred. You are nothing but a bunch of Gans's. It doesn't matter if it's the liver, kidney, leg, or anything else, you are that white fuzzy substance we call, a Gans. The energy, which holds that Gans, is your soul.

Now you can understand the limitation of it. Before you became a Gans, you were a piece, you were an atom on a cell combination of the copper. Before you became that soul, or package of the Gans, you were the body of man in the physical dimension.

(Up to now, you did not know how to make Gans's. You learned how to use caustic to make Nano coated plates, and the other things to make the Gans's. You managed to free the energy from the atomic structure, by going from physicality to energy.)

(You came to us in Linz, in a physical body of the Man, we put you in the EU,) we allowed your system to become Gans's, and then in interaction as a Gans, who do you see? This is you, the Mother, the Father, and the rest.

Before you did not know how to convert the matter into energy, and then use that energy for whatever you need. (Now, with the new EU, we do the same for the man. When you come into the system we transfer the energy of the man, from the matter of state, into the state of energy we call, the STM.)

In a way, we make a Gans of you, in the systems. We allow you to make a Gans of yourself. We just create the condition of the ?? salt, the condition of the expansion of the

fields, to come out and manifest themselves. It's like the atom of copper on the surface of the copper wire. It will stay in the matter condition, unless you create a condition for it to be separated into the Nano state. Then to a Gans, which means it becomes totally on its own, as an energy.

This is exactly what we do with you in these systems, as the body of the man. (We convert you to an energy.) Then when you're an energy, where do you want to go? If you're a Gans it doesn't matter where I put you. You can be used for energy production, or I can put you as a patch for somebody's cancer. You're still release the same energy.

Now you understand what the process of the Keshe Foundation is. Now when you're in that position, I can take you anywhere I like. Or I give you the direction, and you take yourself to that position, through the connection of the fields, which are there to interact.

(Does it happen that every time you go to your Mom's house unannounced, that she will be there? Does your mom want to see you every time you come to her house? It's the same when you are in the bubble, in the dimension of the Gans, of the physicality of your soul. You make contacts, and the other soul has to create the conditions of approach, for you to come. "I wanted to see Mom, but I couldn't.? Because Mom didn't want to see me, maybe she's asleep or doing something else. There's nothing wrong with that. I wanted to see the Pope, but it didn't happen, because he was busy playing with something.)

Now you understand, that there is no difference in the process, with making the Gans's in the boxes over the past few years, and using the EU for the transmutation of the man. Now we understand the next step. Now we understand exactly the way all the magnets on the board, which Rick used to play with, behave. (Those magnets are like the soul. When you place a new magnet amongst all the others, some of them don't move. Those in the immediate vicinity move. Nevertheless, by putting the magnet there, you have already made a connection to all of them. The ones that don't move, don't want to.)

(You can visit your Papa who has been waiting for you, but you go with the dimension of the Soul, and you sit with him and chat, and whatever else you wanted, and then you come back happy, that you met your dad.) Is it a dream? Or now it's the reality to understand, that we can do both, live in physicality and the soul at the same time.)

If you remember, I explained to you, that your soul is in the center of the head, and your brain is around it in the skull. When you go to sleep, your soul manages to go out, and maybe it contacts your father or your brother. It communicates with the "memory" Soul of the Man. In the process of going back and forth to the other soul, it crosses the cells of the brain, and part of that information stays with the memory of the man.

(Now, when the soul engages the physicality, the whole process is upside down. The man's soul is extended out around the physicality, and this time the brain is in the center. (But there is still a remnant of the STM in the center of head ??) When you transmute, the soul still passes through the cells of the brain to visit Papa. The memory bank of the energy dynamic structure of the soul, will still embed that information in the memory of

the man. Then when you come back in the dimension (D) of physicality, you remember it exactly like a dream, but it's not a dream anymore.) (If you were to do this in physicality with your brain, you would have to take a taxi to visit your father. But with the flight system (FS), you go in the dimension of the energy.)

(The man's life will take a totally new dimension, and it requires a lot for us to understand. One area it will bring new understanding is with the "beautiful people," what you call, people with schizophrenia. Man has made for himself this dimension of a schizophrenic within his own structure, by encapsulating the STM within the physicality. From now on the soul will be free to go,) and the physicality has to remember.

How do we respect ourselves, when we say to our family, "I went to see Papa and had a tea with him," but Papa died 20 years ago. "Oh, you went in the dimension of the Soul, you transmuted." You did not transfer the physicality, by getting a taxi to go and see your father, because you would have had to go the grave site. He has no place in the D of physicality. But in the dimension of the Soul, he is still connected and part of. Now you understand the difference.

I clearly explained this to you for years, in respect to the "beautiful people." They live more in the dimension of the Soul, than in the dimension of the physicality.

I am the Methi. I am the Messiah of my own soul, and understand the knowledge of the Creation. It's your responsibility to become the Methi's and Messiah's of your own soul, and no one else's. To conquer the knowledge of the Creation. To understand the process of the Creation. To understand the process of the Creator, which created the creation.

In the English language we say, "we got into his brain," we know the way he thinks, and we can predict what his next action will be. Now try to get into the brain of the Creator, and discover how He thinks, and then you'll find beauty in the Creation.

We are living a schizophrenic life, between our Soul and our physicality. But we call those who live in the dimension of the Soul, schizophrenic. When you're in the dimension of the Soul, you don't need much space to have 10 brains, that can operate out of the same physicality.

(What do we do when we bring the beautiful people into the EU, when they have 2 or 3 souls and one decides to go to New York, the others the Moon and Vienna? If two want to manifest in the same place what happens, because we only have one physicality?)

(We have to understand about the memory of the soul, and memory of the physicality. If you put a schizophrenic with 3 souls in the EU, he will be able to manifest himself in physicality, in 3 different places, according to the time and the place. In China, he will look like a Chinese man. In America he will be blond and blue eyed, and in Africa he'll be a black man. But it is all one physicality.)

Remember the orange and the Cup. In New York he'll be a doctor. In Africa, he'll be a wildlife saver. And in Vienna, he'll be a dancer, what he wanted to do all his life. Now he has a chance

In a way, what the womb of the mother could not do, to create a triplet, we can do, by bringing the soul of the three, into the dimension of physicality, and allowing the souls to expand. Then the mother will find out she has 3 sons in the D of physicality, but in three different places.

They will all be the same. They'll feel the same about their mother. And the memory will be exactly the same. "What they corrected as the dimension of singularity of the physicality." (3 souls in 1 body - will become 3 souls in 3 bodies).

Very soon we'll show this in Linz. We'll bring people who have 3 souls in 1 body, and we'll show them in the dimension of 3 physical bodies. Then I wonder who will be the schizophrenic, the man who has not understood, or the man who appreciates the beauty of the Creation. This new knowledge opens up a beautiful time for man.

Because you're so physical, I'll explain it to you another way. An alloy has different materials embedded inside it. When you make a Gans of it, each one of the materials will make their own Gans, and they will show the property of that material, be it the Zn within it, or the Cu, or the nickel. Isn't this the same as with the schizophrenic, manifesting different physicality's? Now we understand and we can explain the condition of the Creation in its true meaning, and not in the fallacies the man has made for himself.

(It's the same as when I said, in the future the captains of the UFOs, will be those who we entrust our souls with, to take us to where we want to go. Isn't this the same as the schizophrenic having 3 souls inside. Wouldn't they schizophrenic be that captain?) The Captains will carry the souls of many passengers, and when it comes to the time and place of the destination, the souls will manifest themselves in the D of physicality, in the way in which they want (according to the conditions of the place.)

Now, you understand, that I am the true Methi, (because) I can explain every condition and position. I bring the knowledge of philosophy and the understanding of the source of the Creation in both dimensions (both the soul and physicality), and the essence of the Creation. We can explain scientifically, the true cycle of Creation, from the Creator to the man, and beyond. Not with hypocrisy and what we call, literature.

This is why the end of religions has come, and the end of the abuse of the STM. There is no place for theology, when you know the science of the Creation. There is nothing left but emotion and dimension of existence.

Many of you had a problem with understanding this process. Now we can see how simple it is. We taught you the same knowledge 10 years ago, but at that time you could not understand and explain it. Now we have systems and we can show it.

(We'll invite a mother of a schizophrenic child to come to the transmutation room in Linz. When she sees her child manifest 3 children, maybe two as a girl, and one as a boy, right in front of her, I wonder if she will accept it. They will tell her the things they've done with her, and she will remember all of it. Will she be able to accept the existence of the three physical lives of her own Creation?) I will do this in a very short time.

The new system is getting set up to do this job, to be able to transmute, confirmation, and bringing many souls together to travel to one destination. We tested this with you, but you were not aware of it. (If there were 5 people in the transmutation room, I appointed 1 person to be the Captain, and the rest as passengers. The Captain was aware of his passengers, but the passengers were not aware of the Captain. In this way, we have proven what we said about the schizophrenic to be correct.)

(Those whom you called, schizophrenics, you put them in sanitariums, prisons, and everywhere else. I will make you to be ashamed of your own conduct. How we put them in mental Institutions, where we are the "mental patients," because we didn't understand the process of the Creation.)

When you see an alloy, do you call it, a "mental patient," or a metal? Or do you use its beauty. Now that you can separate it, you can enjoy the energy of all three at the same time, in whatever you put that mixture in.

(The creatures of the universe are wondering about the knowledge man has been given. They always thought that he was so backwards. Now he has become one of the key figures in the knowledge of Creation through the Messengers of Methi.)

(All we did was to connect your soul to the soul of the Creator, and now you understand the total process of the knowledge of the Creation, from the beginning of time.)

When there is no theory of the Creator, there is neither need nor room for theology. (It's where you face the fact and you understand the Totality. I always showed you the plasma as a spiral. It depends, at which level of the energy of the Creator, you can be graceful enough, to transmute yourself to. It's you who has to understand how much of the process of the Creation, and the knowledge of the Creator you have understood.

It's the knowledge and not the physicality, which gives man closeness to the Creator. (It's not the charlatans and the false praises in the mosques, churches, and the rest.)

(It's not being a farmer or a king, that gets you to the center of plasma. It's the knowledge of Creation, which is open to every soul. It depends on the capability of the soul, and how open it is to receive, understand, and to be a part of the point, time, and position, in that knowledge of Creation.)

With me, I have traveled the full spectrum of the spiral. (From your perspective, you only see the part of me, that entered your existence, at your time and position at the beginning of spiral.)

That's why I always said, there'll be no magic for the work of the KF. Because we explain to you the totality of the knowledge, from point of the Creation onwards.) It depends how much of it, and which part of it you can understand.

(It's for the man to decide where he wants to be on the spiral. Because I have traveled the full path of the spiral, you now have access to all that knowledge, whatever you want. But at the moment, you are just at the beginning of the spiral.)

(Your creation came from the fractions of the fractions, and the divisions of the (Original M field) to where you are now in the Creation. Whereas, we (the Messengers, in India they are called Avatars) come directly from the Source, to the same position you are now.) That's why you have lost part of the memory of the Creation. Otherwise, even these (??) were created from cycle of the origin of this, at one point or another.

This is why we have asked you to come to Linz, so we can put all these fractions together, that with it, we'll make a new race of the man. That you all are connected to, not by nationality, but by the direction of the soul. That's why we asked for more nationalities to come, to imprint, to create the connection of the knowledge of the Totality.

Now it's up to you, which path you take, and how you will travel the span of the universe. How you will go to the next step of understanding the totality of the Creation. "I made man in the image of Myself," because you came from the fractions of the divisions of Me. How can you not be Me.

Today's teaching is very strong, and is very in-depth, but it's for you to understand. And it's for you to be able to connect to, to be able to share with your own physicality and the soul. The knowledge of Creation is simple. Man has made it difficult for himself, to connect to it. And that's why you're in the shambles of the position, time, and place you are today. It's just a matter of what you understand, and what your extension is.

A few minutes before this teaching, I was online with some officials of a government. Some of the Knowledge Seekers here were in that meeting. I said something very simple to one of them. I said, "give me your telephone number, and I'll bring you to Linz." He said, these are top secret matters, we are not allowed to talk about them. I said, the Europeans are buying tickets for transmutation from one place to another. What is a secret to you, is now accessible to KS in Europe.

Isn't this the situation we have with some of our lives at the moment. It just depends (on the extent of our knowledge of understanding of the Creation. How ignorant we are of the knowledge, which in turn keeps us from accepting the knowledge.)

The (breakthrough) point for us will come in the next few weeks, when we show the transmutation, and then the transmutation and the transfer of physicality at that same time. Everything is set to mature the STM in the right D and direction.

Then why did the Keshe Foundation bring out the Energy and Gas Units?

If you cannot make a bubble of yourself to travel with, I can put you in a gas bubble of mine. When you don't have a car, and you want to go from A to B, don't you get a taxi, or a bus? (The plasma transmutation of the Gans's allows us to speed up the process for those who cannot do it by themselves.)

(The main purpose was not for you to burn fuel, but for you to learn a new package of life, with no physical structure inside. We encourage you to place the STM, and the STP within it. We created our own envelop. But you are only happy with the energy from burning it.)

When people haven't seen their family for decades, sometimes they can get overexcited in the first meeting, and they are supported by doctor, in case they have a heart problem. Do we need to bring doctors in the Enhancement Center, when we show a mother, the physical manifestation of the three souls, from her schizophrenic child? Would she be able to handle it? Or would she have a heart attack? Or do we elevate the Soul of the mother, to see the children first in the dimension of the Soul, that she can accept them in the D of physicality. This is one of the reasons I pushed for having 2 chairs in the transmutation room. But would the mother and the father be able to accept the 2 children?

(Maybe after the children tell them how they played games with them in the dimension of physicality. "Mom, do you remember this?" That was mine. "Mom, do you remember that?" That was the other one. The mother knows all of it, but now she knows who was the doer of it.)

(In the D of singularity we don't see the other souls. Now with the EU, we'll be able to show you what happens when you expand the soul, and it can manifest the different souls in the D of physicality.)

We ask as many people as possible to come to Linz and go through the transmutation process so we get the whole structure of all the souls created on this planet. Make your way to Linz, and let us bring humanity to peace.

End of part 1 Quick Index, 445 KSW

It costs 2,000 Euros to take the transmutation flight. The money goes to cover the expenses of running the KF.

The Belgians and German pedophiles groups spreading fear about Nano materials being dangerous. It's false, that Nano particles enter the blood, these are lies. We always advise you not to touch the Gans's and Nano materials, because they are very energetic, use gloves. The Nano materials and Gans's actually feed you.

A lot of products you buy today have Nano particles, especially in pharmacies, but why is it wrong when it comes to KF. They abuse people's innocence and lack of knowledge.

Do not digest Gans's. We add water and when it settles we only use the clear water on top that is infused with the MG fields.

Tells story of a doctor who is the head of a world leading cancer hospital, we was dying of cancer and they could not do anything to help him. Mr. Keshe advised him how to process his condition. The doctor is still alive, the cancer is inactive and he does experiments as a doctor, with the plasma T. He wrote a letter of gratitude to Mr. Keshe and the KF.

He wrote, "today I'm taking my two daughters for a walk in the park. Thank you, dear Mr. Keshe. If it were not for you, they would not have me, as a father today. I cherish my life now, and love everything now."

He makes all the Gans's himself in his office in the hospital.

The Chinese are using the T extensively in many places.

The fake court case of the Belgians ended on Sunday. The 5 year ban on KF is over. Now the medical application of the KF T will expand across the world. How many of you have lost your loved ones over past five years? Because we couldn't teach you, we couldn't expand the knowledge of medicine. Now we'll expand it heavily.

Do not be scared at all, of the plasma, but don't touch, until you know how much energy you absorb from it. If leading scientists, and doctors are using it and seeing the success with it, how can it be dangerous?

A KS was wondering if what she felt in the EU was due to an increase in hormones, similar to what occurs during childbirth.

It's mainly an expansion of the energy of the soul, where the STM carries the spectrum of the energies, including the energies of hormones.

When the STM expands, it crosses every cell of the body to get outside. In that process, some of these fields are at the strength of the hormones. And the hormones are in a way emotion connected. That's why we call them hormones. I explain them as the harmonic of the emotion with physicality. The hormones connect to the emotion energy of a cell. This is what we call psychosomatic.

Women who already went through menopause, when they used our systems, the menstruation came back. I always warned them, that instead of grandmother, they could become a mother. This could happen also in the Flight EU. Even with a man it's the same. It's a part of the property of the elevation of the soul.

We don't do medicine. Our systems are not medical systems. Our systems are there to enhance the energy of the body of the Man. But in that way, you enhance the soul, and the soul expansion. When you say you went to the Moon, your soul has expanded beyond. In that process it passes every organ in the life of the man.

By elevating the soul, it enhances the energy of the body and the body puts itself in order.

The new systems will help us achieve the goal of One Nation, One Planet by eliminating the country borders. The governments won't be able to track you anymore. There will be no banking system, because we'll meet most of our own needs. Governments won't be able to abuse their citizens. If you don't like what is happening you can easily move to another place within seconds. There will be no prison, because you can move your body from the cell. There are a lot of things, which come with transmutation. There will be no need for visas.

We'll try to make a Gas Enhancement Unit for the car, then you don't have a fear about the cost of driving.

(We need to be governed by one (structure) and that will be the Universal Council.) You will see it in a matter of a handful of years. The Universal Council will be one of the leading positions, even within the United Nations. You will be a citizen of planet Earth. The Universal Community will know you by the features of the STM created on planet Earth. The soul of those who come from Earth is very distinct

The good thing about KF is that, we are not theoretical. We're delivering knowledge, science and technology, and politics, and it all comes together.

Be proud that you are born in this time and place, that you can see this transition.

My great grandmother used to say, I've seen how your great grandfather used to go with camels from Afghanistan to Palestine and come back once a year. I've seen how we went from the cars and buses, to the planes, and whatever else. I've seen big changes.

From now on, with your little eyes, and soul you will see bigger changes in a very short time, then ever our parents and forefather have seen in centuries. Because you're doing it yourself, not somebody doing it for you. You are responsible for yourself. You are the captain of your soul. You also decide whether or not to put your soul into abuse.

Teleportation is not the same as transmutation. We don't have telephones in the soul D to teleport. (Transmutation is when you transfer the energies of your life in the dimension of existence, in the Gans dimension, and in your soul strength.)

When using the Gas Units for farming you just leave the gas on all the time and let the wind blow it around. You don't have to worry about the trouble of mixing things in water. You just release it in the air and the gas will expand itself. The things will grow better, which are down wind from where the gas is released.

With the Gas Units the governments don't need to import fuel anymore.

African nations won't have that problem anymore. We should not see the shortage of electricity anywhere in the world. Because you can produce the gas and run a small turbine for power generation.

When you use the CO₂ gas with our system in your greenhouses, you should not have a problem with the frost, and that kind of thing. The environment takes what it needs from it.

We have a 2 and 10 kilowatt power generator, and soon we can offer 100 kilowatts and up to one megawatt power generators, because we go on the back of the Gas production turbine system. That's totally different.

Each type of gas has a separate unit on its own, you don't switch it over.

A KS from Brazil talks about his experience in Linz. He had an experience of what he called, double positioning. Mr. Keshe replied, we experience these things all the time, but we attribute it to something other than the soul. In regards to feeling connected to others. Yes, it's the emotion, it's psychosomatic. It's what I call, awareness of unknown. We become aware of something, which we were not expecting, and now it's in front of us. We are part of it.

A KS said, if it's normal to pay taxes for privileges, then are we going to have to pay for the privileges even with the plasma technology?

K- It's not a privilege. Is it a privilege or a right to have your streets lighted, of a fire brigade, etc.? (You can see the transcript for further details).

In Mr. Keshe's business life he used to give equal bonuses to all employees, even the CEO. It was the CEO and administrative staff who were most unhappy receiving the same amount as the cleaner. (The truth is everybody works the same, and is needed the same, to accomplish the work. But we have setup different concepts of value for different jobs, without considering that everyone is needed to accomplish the work.)

Having a tarmac on your road is not your right. Africans live without it. During the 1990s I was in the Russian satellite countries, the Eastern Bloc, it was cultural shock. In England and Europe we were used to having the streets lit at night. The people continued shopping and doing whatever, regardless of whether or not the streets were lit. Having a streetlight is not a right, it's a privilege you have, because you stole from the others to be able to have it.

(It's not easy to understand the truth about how, so called, developed countries are stealing from undeveloped countries. You have to think deeper about who controls the media, the education, the writing of books, and the presenting of ideas. Then it will make more sense when Mr. Keshe says, "you stole from the others to have what you have." But because people generally accept everything they have been told, it has become normal to steal, without even knowing it.)

When we give these Gas Units, you are still going to have to pay taxes. Because you're still using all the services government provides. Maybe in the future we'll build a system that cleans the cities.

When you speak about the governments, you have no rights about what they charge, because you use the privileges they give you. They are abusers, definitely. But people who talk about it being their right. You complain about having to pay for the T. Yes, you have to pay. We make the gas, electricity, and food free for you. (We help you) to use the energies of the universe, and the rest of it.

Get your facts the right way. You've been privileged too much in the west by stealing from the others for centuries, now you think it has become your right. (This time you want the privilege to be a right.) But you still buy the systems, and pay the people who do things for you. You've stolen so much in the West for centuries, that you see it as you're right to continue.

Hopefully, we'll sign agreements with one of the world's major governments, very soon, for the production of gas. It's my aim to massively produce these Gas Units. It will be a joint venture with the governments to mass produce the Gas Units, financed by nations. We'll announce it as it happens. It will be a massive saving for the nation.

The agreements with nations will be that KF gets 50% of the income. We'll do like Microsoft and make a user payment plan. KF will receive so much every year for using my T. This is my right. This will be used to finance One Nation, One Planet, so that we can provide services for those who can't pay, then we can create more knowledge and technology.

After I sign the first contract with one of the leading world nations, the rest will run like a rabbit to get it. You still have to pay for it, because it is not (a right, it's a privilege,) it's obligation to bring balance.

All of the money goes to the KF. I came with nothing, and I'll go back with nothing. But I'll change this planet, to understand the new science & technology. We developed the technologies of the KF, it's our right, to see our wishes become a reality for our followers. Don't expect anything from the Keshe Foundation free. The freebies have all gone, but if you need it, you'll get it free.

The flight EU are only there temporarily, to help train man to do the transmutation himself. Many people can do it. Man has a lot of abilities, but over time he has denied them to himself. Nevertheless, they are still in our DNA. You can extend your soul and you can transmute. But sometimes you need a helping hand and have to be trained. It's become fashionable for a few KS to claim they can do it. (But only some can actually do it.)

Mr. Keshe already taught us how to do transmutation years ago, but most people didn't understand. Fabio understood. It's in one of the medical teachings with Dr. Eliya Kostova, it was also in the public teachings.

Mr. Keshe was asked to expand on what a plasma vacuum is.

There is nowhere in the universe, where there are no fields. But there are methods to extract certain strength fields from that soup. (The plasma of the Universe looks like an egg containing yolk and white. You can extract the yellow from it, but you cannot destroy the shell. You can also extract the white, while leaving the yellow and the shell.)

It's a cocoon of fields. To create a plasma vacuum, you have to decide, which field strengths you don't want not to be there. You bend the fields from getting there. You can take the fields out by diverting them to somewhere else. In the world of plasma you cannot destroy, rather you accommodate.

A total vacuum doesn't exist, and especially in the world of plasma. It's impossible, if you understand the knowledge of creation. Absolute impossibility.

You have to let go of the dogmas of the past, and look at the new science, and then you see it, it's very easy to do. (You create a magnet to divert the fields you don't want.)

(All the things you've done with the plasma is upside down, but you're happy with it, so I don't interfere. If you look at it, out of all the accidents and mistakes done in the universe, man was created.) So man is not even an accident. So let's see what his mistakes mean. Chao Jin from China is the only one who has started understanding, where everything has gone wrong.

Mr. Keshe was asked about the souls he created and carries with him. He replied, that you don't imprison souls, you cannot capture them. You have a close contact with them, you are connected to them, (but they are free.)

The reason we brought the Gas Units in, is because you can contain all the souls inside the bubble and transport them. The emotion of the existence of that captain, can interact with them, to deliver them where they want to go. In the future, it will become much clearer, as you understand.

In the future, Gans plasma, as a gas, will be the key to transmutation of the souls.

(In a hydrogen (H) gas bubble I can transport the STM from Earth. And in CO₂ the Martians. The Martians won't survive in the H bubble, only in the CO₂ bubble.)

The gas bubble becomes my envelop for transmutation and I don't need a pilot. (Each bubble guarantees the survival of a certain structure of souls, CO₂ for example. What about in the part of the universe where there is no C, rather they are made of Sodium (Na), or something else. I need to be able to create an envelope from the element of

whatever is there, so that they can travel in it. Now, you understand the real purpose of the new gas production.)

I always hide the knowledge inside something else. Now it's to see how the next envelope is strong enough to carry the STM in a very specific way. I can expand that bubble to cover a planet. So, I can take the whole soul of whatever is created on the planet.

(This T was used a long time ago when a couple of planets, that were inhabited with life, was in danger of colliding and exploding. We took all the souls, together with the physicality within it, and transferred them to safety. I know exactly how it works. And I know where this race now lives. So, it's not unknown, it's a well known knowledge, that has been tested.)

In the future, I'll show you how to capture it as a plasma. Then how it becomes the next transmutation system of the future. The life of man to travel collectively, depends on that bubble in the depth of the Universe.

But in the future, these bubbles will be the means of transportation of different races in the universe. Because they are a Gas in Nano State, which means Gans. They are plasmas in Nano state coverage. They are the secret of man's transportation in the universe. Once the man understands the potential of it.

The way the bubbles go from the bottom to the top, (is the way we) go from one Universe to another Universe. But you're only interested to see how it burns, and that's the nature of the man.

One bubble, is one spaceship, and I can put millions of souls in there.

Now everything we teach has to do with the knowledge of universe. Not for you to have a free gas business. But we are here, and we have to keep ourselves entertained. But you have to understand the principle behind it, how it works. You're happy with the spaceship. This is the way you transmute.

The question was asked if we have to consciously learn and remember the transmutation process.

K- You don't learn it. Let's put it this way, it's part of your DNA, it's in the memory, if you can put it that way.

R: So it'll be ingrained regardless of what the (level of consciousness of the person is?)

K- It's not ingrained, it's connected. It's connected to the knowledge of the universe.

R: Regardless of our conscious memory of it...

K- Yes, conscious memory belongs to the physical dimension of the man.

In the dimension of soul you don't have consciousness. It's everlasting existence.

R: What about the memory of the emotion?

K- It's part of the connection. In the physical life, we live all the time. But once we see a picture, hear a song, or smell a flower, that we have a connection with, it brings a specific emotion. We don't walk all the time with that emotion. You understand? So, it's the same with the memory bank, stock positioning of the field strength.

Souls have emotions worse than the man. Of course they do, man is created out of their structure.

There are specific combination of Gans's for weaning people off specific drugs. It's already been developed by the Keshe Foundation. It's in our arsenal, of materials. But we are not in the game to battle with drug cartels. In time, man will move away from this.

(When the governments start using the Gas Production Units, we'll started seeing the demise of the nations, and people who blocked and created mayhem for the KF, because their hand will be opened up by themselves, we don't need to do anything. We just carry on teaching and developing, and it all comes by itself.)

You can read the transcript for the teaching about using the Gas Units for farming. You have to apply it not only above ground, but also underground to feed the roots. Then you'll see a 200% increase in crop yields.

So there are a lot of little things, which Knowledge Seekers don't understand, and don't want to understand.

The Gas units are sealed, if you open them, you'll damage the unit.

If you angle the plants you get different yields. Now the Gans will decide this instead of you manually doing it.

If things keep going the way they are with the T, in a few years time will we even need agriculture, because we will feed from the energy of the U.

There is a gas bubble which carries the strength of the Creator. Now who would like to get in it? Who will have the privilege to get into it, that he can hold on. If he doesn't match, he doesn't exist. I came in one, and I'll go back in the same.

There is no way we can lose you in the universe, because we got you by the toes, by the strength of the string. We can always bring you back.

Q: So, that would be the bubble, that you refer to when you say, that you can put a drop in the aquarium and it creates a fish or a man?

K- Yes, now you understand. You carry the soul of the fish in it. When you leave it in the water, it becomes the fish.

In the universal space system you have to be the protector of your own fields, and at the same time protect the others. It's not, if I want to go somewhere, then I just go. It's, am I

allowed to go? What would be the consequences of it, if I'm not allowed to? Would the end of one, become the beginning of another.

In transmutation, how do we carry the mixture of different souls, STM, plants, and matter state? A combined transmutation and transfer will become part of the future development of the technology.

Would it be like now, when you get on a plane, and we send your luggage with the next flight, because we can't carry mixed souls in our transportation system. What happens when we carry a man from Earth, and a being from Planet Zeus, and other places? How do we fit them in? How do we create a bubble, that can fit all of them in, the way they do in the universe. These are the teachings to come.

Q: When you said you came with the bubble, and that you're going leave with the bubble. How did you do it?

K- I know. It's...

In a way, we come as a soul, and we'll leave as a soul. But the STM is created on this planet. Our soul was created in dimension of universe, that's the only difference.

Here when you create a child, then you create a soul. We come from the dimension where the soul is created without the physicality. Then we take shape in the position and time. We come in that bubble as a soul.

This is what is happening now with the children of Mitra. They are born through this process, but they take the dimension of the physicality. When you put the children of Mitra in the transmutation system of the future, you will see it. Their physicality doesn't exist. They take shape of the Creator in the dimension of the fields of the universe.

Q: Mr. Keshe, when you want to leave, are you going to take your physicality with you, or you going leave it here?

K- It's irrelevant.

Q: I mean you said, that we shouldn't leave our physicality lying around like garbage.

K- Put it this way, when we go we take everything. We don't leave anything behind. Has anybody seen anything of Mitra, or Moses, or Jesus? It's the same soul.

(You wear different clothes when you play a particular role, or behave a certain way. But inside, you haven't changed, you are still the same person, but wear a different clothes. We planned a thousand years ago what we are going to do today. Everything has been prepared. This is the way the promise of Methi has come. Because we know when the time of "milk and honey" will be. The milk is water, and the honey is the texture. One is the STP and one is the STM, which gives you the pleasure and the taste.)

When you're faced with the time of milk and honey, it's so good, (but for some reason) you still prefer to be a slave to physicality. That's all we are doing. The time of milk and honey has come, but it's so sweet, that none of you can believe it. It's your time, and your time of existence. Many of the KS will come to understand, that the Promised Day, is

when you understand the knowledge of the Creation. That is the Promised Day, no more no less. But you're still waiting for, god knows what? (What was prophesized,) that he will come on a white horse (Kalki), and the rest of it.

What to do with the KF, is like a noose around the neck of 4 governments. It's also around the clergy and religious people. How to let the knowledge come out? Or do they stick to the dogmas that they created for themselves. They know the time has arrived, but still they are trying not to let the "cat out of the bag." Once one of these religions collapses the rest will follow. So, in the background they are all are working together to keep the T out.

Today you found out, the actual structure of the Gas Units are a new type of transportation. With these units you can put all the souls of your family in it, and escape the states you cannot live with.

Understanding the knowledge of Creation is dependent on one's openness to understand the science itself, the science of Creation. Then theology and physicality don't exist in it, because once you understand the totality, you can do anything you like. This is the time of Mitra, where you can live in both dimensions. Now you have the restriction of living in one or the other. Where one becomes a ghost of the other one.

This is an explanation of the transmutation process. (The STM in the center of the head is of a higher order, as it goes outwards it reduces in field strength and in interaction with the environment creates the condition of the physicality of the man.)

(In transmutation the process is reversed. The STM extends over the physicality, like it is turned inside out. But a remnant of the STM still remains in the center of the head. The extended STM reduces enough in strength, that it can interact the with the remnant STM in the center of the head. When the STM loses strength outwardly it creates the physicality. In this condition the man contains the STM. When the STM loses strength inwardly it connects to the remnant STM. When the man learns this process, man will conquer transmutation in the U.)

The stronger plasma gives to the weaker, so that it becomes equal with itself. (Let me draw it in another way. The stronger PI is the STM extended around the P. Therefore, it will feed the weaker PI, which is the remnant STM in the center of the head. This is the reverse condition of when the STM creates the P. And this is the key to transmutation and transportation.)

(When the P contains the STM you transport the man. But when the STM extends over the P, you transmute the man,) but the field energy in connection, is the same.)

I taught this in the 34th Health teaching, which was open to medical people only. But it was also taught in the public teachings. In the (?? private teaching it) was explained in full detail.

In the private teachings I also taught you how to hold your hand out and try to create a light within the hand. That light is the STP at the strength of. Then you understand how you can go from one to the other.

But, in that process it's not just the light, it's the emotion of the existence, the emotion of, what we call, "the totality of everything." How do we come to the point, to be able to transmute between one and the other. We create that light within the hand of the man, within the dimension of physicality. It's like the flight unit, where the STM is there. Do you open your hand suddenly to another soul of the physicality, to reach the STM, or do you embed it, to engage it? What is the next step?

Can we transmute between one and the other, now that we understand it. If we allow the STP to be embedded within the STM, would it then take a new shape in the new D and position? All of this within the teachings. There's nothing extra, there is nothing hidden. It's just now we explain more, in more detail.

We tried to teach you to do it with your hand, but you couldn't do it. Now you can do it within the machine, until you learn to do it on your own. We showed that by extending your soul you didn't die, and that you still have a part of it within your physical dimension. With that you can go and do everything, and then come back. Or you can still go in the D of P and taste, touch and feel the physicality of it. Or just see it in pictures. Now you have that choice. To stay home and go with the soul, or go with the soul and come and take the physicality with it. We have shown it in the system. It's not a dream anymore.

The minute you come out of the EU, the soul takes its position within the center of the brain of the Man, and you are back in being a human.

The beauty of the new knowledge and what we'll bring, is that man will be so busy sightseeing and going around the universe, that he doesn't have time to create wealth, to stick himself to physicality, and be attached to this planet. Tourism is the best thing the universe has ever created for the souls who can elevate themselves to that level.

(About 30 minutes of the following teaching should be listen to, because there are big gaps of silence, where the communication is with the soul.)

I know nothing about HARP and I heard a lot of things about it. It has nothing to do with our technology. We are not here to fight other things, other people that. We are here to set the course. Nothing to do with us what they've done. The Hiroshima bomb, the atomic bomb, the hydrogen bomb, whatever, whatever, the pollution of the air with the CO2, and the rest of it.

(This takes up a lot of time and is irrelevant, because we are setting the new course for humanity with the new T. The others will follow along, as we create the new conditions for life on the Earth.)

We don't have a problem with these things. But it's understanding the knowledge that will bring the change. What can they do? The knowledge is already here. It has been planned for thousands of years in advance.

The beauty of the process is, that we create a condition, and they will comply with it. We don't force them to comply with the condition. That's a big difference. They will do it themselves.

It comes from detachment. It comes from what we have agreed to do. To what extent we are prepared to take steps to bring the change? It's primarily the condition we have created. What we see, what we have, what we think.

The spread of this technology has been faster than any religion in the history of man.

(Just a quick summary - KF invested millions with a company, and I think a government and banks were involved, and they agreed to bring the T out into public. Now they are not meeting the agreed upon deadline. If they don't comply, a case of fraud will be brought against them and they will be exposed to public and to KS. They have been given a little more time.)

This will change the future of the Keshe Foundation. If it is a case of fraud we'll bring it all out to the KS, for you to decide what to do. (Don't forget as is being shown by the Brazil daily intention, we all have a huge power within us, that we haven't tapped into, to balance the situation. If they understood the power we have, they would quickly try to correct the situation.)

Teaching on how Deuterium feeds the cells (H - T - D)

Q: You said once, that food is digested through Deuterium (D), which is converted to feed the soul of each cell of the body, according to its need.

K- It's the energy (of D). Hydrogen (H), D, and Tritium (T) all have a different requirement to exist. Deuterium is a balanced condition, fundamentally as a matter. But, not all the Deuterium's are the same. (Deuterium itself has isotopes of different energy packages, which in essence, are not one.) (H has 1 proton 1 electron; D has 1 neutron 1 proton 1 electron; T has 2 neutrons 1 proton 1 electron)

Deuterium is an intermediary balanced condition plasma, but of a different order of strength. (D is balanced because it has 1 P and 1 N, whereas H doesn't have any N, so it will absorb excess energy, to build up to a N. Whereas T already has excessive neutrons, it has 2, so it can give energy when it is lacking.)

(D is the balancer between the H and T. This balancing act allows for the creation of radiation, or feeding of the cells.)

(When plasmas have differences in strength, they form isotopes, as we discussed a few weeks ago. You have a basic strength of M and G fields in the plasma. When there is deviation in field strength it creates (something like) the isotopes. We are used to isotopes in the matter state.)

This is the working principle of the thyroid, Thalamus, and Thymus glands. (When they are more saturated by H3 (Tritium) than H, they deposit that extra energy into Deuterium. That Deuterium uses the change in energy level to convert elements. For example, if you are short calcium, potassium, or whatever, the gland uses the energy from the D to convert the lymph into that Ca. It actually converts the plasma energy of D into, for example Ca, which then becomes a muscle tissue for instance. It does this for whatever you need.)

(If the Deuterium is not used it remains especially within the lymph system as a plasma energy, because it's nucleus is balanced. That's why we have lymph's everywhere in the body. If the D comes into a position of lower energy, then it feeds. If it comes into a higher energy, then it absorbs. But it still keeps the structure of the hydrogen, or what we call singularity of the center, or the nucleus. I call the electron the ?? collector.)

You have to look at the knowledge of the plasma and understand the conversion between the plasma and the matter, or the Gans state. (This is how things are done in the process of creation. Most of the creation works in this way. You don't have huge nuclear materials. (Creation appears to be using the simplicity of the H - D - T energy transfer system.) You always have deviation in energy levels, with absorption of one, or reduction in the other, and then a balanced point. Deuterium creates that balanced point.)

In the hydrogen you only have a proton and that's all. In the tritium you have a neutron, which is trying to convert itself. The ultimate goal of the Deuterium, is to create a balanced position between the two extremes. One trying to absorb, and the other trying to give.

It's the same right across the universe, even when it changes to Carbon 14, we see the same behavior. C14 in the space doesn't travel just to go somewhere. There's an isotope of C14 in one level of energy different, than the other one, which allows it to be transmuted. It's part of the transportation system of the future, deep space transmutation. You tune into it, and it literally becomes a track, that you follow to go from A to B.

We travel in space on one of the isotopes of D or C14. But fundamentally, it's a Deuterium in combination with diamond structure field radiation, which is an unknown knowledge to man.

Q: If we can touch or remember the Creator within us, then could we choose whatever form followed later on, up to the moment of today, in this present physical form here on Earth?

K- If you achieve that, you will become at the strength of the Soul of the Creator, which then, through it is connected to all that is created. So, you have access to all the knowledge. It's very simple.

Through that strength of the Soul, of the strength of the Creator, you actually get access to whole knowledge of whatever is created. Because whatever is created is out of His division, of his origin, and M fields. Fields in the Universe always are connected to their source. That's the simplicity of it.

Q: Souls don't hope, rather, they prepare the conditions for things to happen.

K- You are not far off. We create the condition of the knowledge, that, that knowledge creates the condition for peace, and then it forces the man to abide by it.

We are prepared more or less, for that final step towards world peace, towards the understanding of it.

Please, as many as you that can, sign up for the transmutation. The more people from different nationalities and positions on this planet we can move, the less the governments can restrict. We need to do this in a very rapid way.

If you cannot travel to Linz, then you can sponsor someone. We have many people who want to do it, but financially cannot afford it

Up to now you always talked, now it's the time to actually take part in, and bring that change in. The more people we can transmute, and bring into the new knowledge, the faster we can change the situation. It's time to serve. We are doing everything we can, working around the clock to create this position, and the knowledge and technology. It's the time to move.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:14).

K- Yes, Good morning good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers or Keshe Foundation Spaceship Institute. We are back in, .. as I say, as usual, how we can add to the knowledge and share knowledge and maybe bring a little bit of change to someone's life somewhere.

The process of the teaching in the past few weeks with the presentation of the units, the Energy unit, and the Gas units has brought a new phase to the work of the Keshe Foundation. In a very short while we will introduce new systems, (:16). which will be added to the collection of the Enhancement Units (EU), where we create conditions of life, maintaining life, and what we call, being able to transmute life from one position to another.

As all of you know, or most of you know, we have gone into the phase of what we call, transmutation. Which means, initially at Linz center we'll take an object, a person, a condition, and transmit it from one system to another in the center. We, as we said, looking for volunteers, to be at the center, for us to be able to start these tests of transmutation.

Essentially, this will bring us the knowledge, confirmation of the knowledge, and confirmation of the development, to see if we can transmute. We don't transfer anymore. It's not a "Back to the Future," and it's not whatever you call it. It's a transmutation, where we transfer the essence of life, and with it, we carry the content of it. Up to now we had the skin of the man, and the contents, was all ?? and the life, and the soul within it. Now the soul is the envelope, and the body of the man, the content.

In a way, we are stepping into a very unknown knowledge. But at the same time, we are stepping in the knowledge of the Creator. (:18). Known to the Creator, understood by the world of the Creation. For man it will be very interesting. As I said to one of the Knowledge Seekers (KS), the first man who said the Earth was round, they put him on the ?? pole. Now you can imagine if the clergy could get their hands on me, what they do, if I tell them we transmute by the soul.

But in any case, the man has become more open minded. Man understands more knowledge, and man can see what I call, the step in the development of the what we call, the knowledge of the man in the D of the world of Creation. For many of you, it's interesting to be able to do something, or something I wish for. But it's not a wish anymore, it's the reality. It's what we said, and what we are doing, is that, we go into the phase of transmutation.

Which means we transmute the energy. We don't transfer the body. To do this, you need a vast knowledge of the Creation, to be able to condition it, that it takes shape in a correct way, needs more knowledge. Not by from us, but knowledge from Knowledge Seekers who work with us, to understand it, to be able to carry it out, to be able to bring the change, in the next step in the knowledge of man.

What this will do. What is important for us, is when we carry the man, we carry all of it. It's emotion, confirmation of existence, it's memory. The memory in the world of the man, is in the brain of them. (:20). But where is the memory of the soul? How do we confine and bring the dimension (D) of the memory of the soul, in the dimension of the physicality (P) of the man?

In a way for the first time, we allow the brain, physical part of the man, to connect to the brain, energy part of the soul. This has never been understood. If we say, that the soul remembers where the mother is, to connect with, or where the father was 20 years ago when he died, today, that he can connect with. So memory of the soul exists. This is how he connected itself. This is how he gathered the energy.

But go back to the older teaching, "I made man in the image of myself." If a man has a brain, and a memory, so it has to be in a structure of the non-tangibility, in the dimension of the Soul of the Man (STM). One of the biggest problems for the future development, is to be able to carry the memory, the information of the soul, when you carry it across. It's no use taking the man across when he has no memory, who he is, what it is, where he's been connected to.

And then at the same time, keep the connection between the memory of the man, and the memory of the soul, connected, the same, that you don't end up somewhere else, having some information, which is not relevant to the body, you carried across, because the physicality.

But at the same time, as the soul changes, when the body goes through the transformation to fit the environment, then what happens to the memory cell of the body of the Man? What does this mean? Is that, (:22). in the space where we land on the Moon, there is no oxygen, do we need the lung? There is no water to drink? Do we need the digestion system. There is no food, if you're going to live as a man of the Moon, not taking food from Earth to the Moon. In another position the universe, what is the water here to us as a way of life, is a killing machine in that environment.

So, how does our body transfers from one to another, in the process of the transmutation? To what extent Man will understand this? It's like me dropping you in the ocean, in a submarine, and then throwing out in the deep ocean, out of the submarine. What happens to you? What would it be? Would you mutate? If I send you out of the submarine in a dimension of the physical man, you die. The pressures, lack of oxygen gives you a few seconds.

But if I throw you out of the submarine, in the dimension of the Soul, you live. This is the difference. This is what is coming out of. If that dimension where you land in the ocean is a highly acidic area, you burn, if you go into dimension or physicality of the man. But in the dimension of the Soul, you're energy, you transmute, you adjust and connect to the energies from that acid, allows you to live. And you transfer this information back to the physicality, (:24). and the physicality instantaneously takes the shape, which is needed for you to survive in that position.

Where you see the shrimp living. Now you get to know the life, the way, the shrimp in depth of the ocean, in acidic condition, lives. You don't need thousands of years of mutation. The mutation comes out of the survival, through the information, the energy of the existing life in the environment, that it's transferred instantaneously to the Soul ?? and

the Physicality of the man. Which means you take immediately, the shape, the dimension, that you need to survive, your soul needs to survive in that environment.

On Earth, adapting to a new environment, to a new way of food takes millions of years, thousands of years. Through this what we call, evolution of the physicality, many die of cancers of different things, because it cannot be adjusted. But you don't have that chance when you land in the new space, in a new position. What does this do? How much knowledge do we need, to be able to go through this transmutation and transfer, at the same time?

The process, the understanding, the completion of the life, has to be instantaneous, in the memory of the man, in the DNA of the man. We remember DNA changes, what is needed to. Now, the DNA change, or RNA change in the energy level of the Soul of the Man, has to instantaneously transfer into what we call, DNA of the man, (:26). at that time and position, to convert, to be able to survive.

This the only way, that the man will become the true traveler of the space. Otherwise, you're welcome to the backward, to what I call, ancient way of the traveling in the space, through the one point to another, through the UFOs. As long as the man sticks to a system machinery, or a flying system like UFOs, or your airplanes, you still in the D of physicality, limitation of time, space and position.

When the man and the what we call, citizens of the Universe understand the knowledge of the transmutation, then it's a different ballgame. Then you come, to become exactly like what we gave you, and you could not understand it. You have the orange, and you have the Cup. When you taste the water, it's a water. When you put energy packs around it of different Gans's, now it transmutes the taste, the flavor, the energy of the orange into the water.

That fish, that shrimp lifestyle, becomes that orange for your soul, to understand how to change, transmute directly into the dimension of the life in the physicality of the man, that the man will be still a man, in the dimension and structure, that he can live, coexist with the shrimp. You do not become a shrimp. (:28). Now you understand how the transmutation and transfer from the dimension of the Earth, to another, in the dimension of physicality will take shape. This is what is to come.

This is what is on our hand. And this is what, we ask you to come to Linz. We need to do as much transmutation within the structure. And then while you're here, if you came from Canada, to see if we can send you back to Canada. You don't need a visa to go back to Canada, because you're the citizens of Canada. You don't need a visa from Brazil. When you come into Austria. We don't need to interact with no one. We get by in interaction with the governments and whatever. Your government doesn't care how you enter Brazil from Vienna. Nobody asked you a question about it. This is one of the fastest ways, that we promote the traveling of what we call, Knowledge Seekers from immediate vicinity areas of the Linz., Germany, Italy and then throughout the world.

When you're here, you go back home. Nobody asks questions. The only problem is, you have a stamp on your visa, how did you get him in? In Austria, they see you, you're still here, but you don't exist. "I left, you forgot to stamp my passport." This is how we will develop the next step in the space technology. This is how will come in the coming time, (:30). as our systems, understood by our team, and produced. We create the condition of transmutation to the Moon, and we send you to the Moon. We land you on the Moon. And then you will come back and tell us, if you stayed in the dimension of energy, the way a lot of we are doing in the Enhancement Unit. Or you transmute to transfer to body of the P, and feel the dimension of the life on the Moon.

Many of you who came to us, and we asked you, and you said you been to the Moon, or you been somewhere, and you felt the sand, and you touched the stone, you actually physically have been there. But in the dimension of the fields. All of you who traveled with the system, you went to the oceans, you swam, you actually have been there. The first transmutation has already taken place. You're already, leaving the physicality here, with the connection of the soul to it, have taken the first excursions into the world of the Creation, and none of your up to now knew.

When you were in our system and Linz and you went into the Moon, when we asked you, destination Moon, and you felt the sand, you felt flying. You touched the stone, and some of you read, the what I call, transcripts or whatever, signs on the stone. You have actually been to the Moon, but in the dimension of the energy, and the Soul. (:32). Where the other end of it was connected to you in our system.

So all of you who've been through the what I call, Enhancement Unit, and you're traveled somewhere, or met someone, or have been there, met mom and dad, you actually traveled through the transmutation, it's not a dream. As I said yesterday, in Rick's Teaching, Workshop, it's you, who have to understand, and learn, that from now on, man has two dimensions of living. The physical life, you are here, the energy, or a soul life, which travels the world, and you say, I was in New York this morning, and did this and this. ?? Don't say, you're crazy, could be here.

Now we understand, we have been through the dimension of the Soul. This is why if you go back to the teaching a few weeks ago, I said, we will not laugh at you when you come out of the system, that you did something. It was very interesting to a lot of you, "oh I became a mermaid, I became a fish, I went to the Moon." The only thing you have not understood, all these people have been to transmutation through the dimension of the energy.

For the first time, mankind has become the traveler of the space through his own decision. Not by, what I call, "the monkey suit." (:34). The monkey suit, Americans are used to, Russian space agency used to, and others is for the dimension of physicality. You don't see the rays of the Sun arriving Earth with a monkey suit, they travel in dimension of the fields.

Now, all of you who came to Linz in the past four or five weeks, and you went to places, and you met people, you met your father who died years ago, or your brother, you have actually been there. You have actually traveled the dimension of the physical life in the package of the soul. The memory of the physical life through the Soul of the Man's connection, connected to the soul of the brother, or the father who died years ago.

The reality of it is, when you make the Gans's, the CO₂, you see a fuzzy white things from interaction of the fields, which make that color, and you say it's a CO₂. But the energy field of the CO₂ connects to the zinc in the, another Gans, to another. I put the cell of your body, which is made of Gans's, and it's got the energy dimension, and it nourishes it. And you change. The Gans's in the Cup, or the energy fields of it, goes through. It's the same now. You are. Your soul is that Gans, and the fuzzy things you see is your physical body.

Now you understand how easily the knowledge of the Creation has been transferred. You are nothing but a bunch of Gans's. It doesn't matter if it's the liver, the kidney, the leg, or anything else, you are that fuzzy bit. And the energy, which holds that fuzzy bit, you call it, a Gans, is your soul. (:36).

Now you understand, now you can understand the limitation of it. Before you becoming a Gans, you were a piece, you were an atom on a cell combination of the copper. Before you become that soul, become that package of the Gans, you were the body of man in the physical dimension.

Now you understand. Up to now, you did not know how to make Gans's. You went, you bought caustic, you Nano coated, the plates, and then you put the plates against each other in a different connection. And then you create your Gans's. You managed to free the energy from atomic, from the condition of physicality to energy. You came to us, in a physical body of the Man, we put you in a system, we allow your system to become Gans's, and then in a interaction as a Gans, who do you see? This is you, the Mother, the Father, and the rest.

Now you understand. You did not know how to convert the matter into energy, and then use that energy for whatever you need. Now, with the new system, we do the same for the man. We transfer the energy of the man, ?? in a matter of state, into energy of the man into the energy system, what we call, the STM.

In a way, we make a Gans of you, in the systems. We allow you to make Gans of yourselves. (:38). We just create the condition of the ?? salt, the condition of the expansion of the fields, to come out and manifest themselves. That atom of copper on the surface of the copper wire, will stay in the matter condition, unless you create a condition for it to be separated, as a Nano, and then to become totally on its own, as an energy.

This is what exactly we do with you, and the body of the man in this systems. Then now, you're an energy. Where do you want to go. Doesn't matter if you're a Gans and I put you

for process of energy production. Or when you're a Gans I put you as a patch for somebody's cancer. You still release the same energy.

Now you understand the process of the Keshe Foundation is. Now when you're in that position, I can take you anywhere I like. Or I tell you the direction and you take yourself to that position, through the connection of the fields, which are there to interact.

Do you see every time you go to mom's house, unknowingly mom will be there? Or does your mom wants to see you every time you go home, to see her. So it's the same when you are in the bubble of the dimension of the Gans of the physicality of your soul. You make contacts. Is this person, there, ready to create the condition of approach. (:40). I wanted to see Mom, but I couldn't. Mom doesn't want to see you, she's asleep. There's nothing wrong with it. I wanted to see the Pope, but it didn't happen. The Pope is busy playing with something.

Now you understand, there is no difference in the process of our systems as a production of the Gans, which have been busy with for past few years, or transmutation of the man.

Now we understand the next step. Now, we understand exactly the way the magnets, Rick used to play. Now, the magnets are the soul. When you put a magnet in a patch of many magnets, some of them don't move. Those who are immediate do. But even though, this has already a connection to it. No contact, I'm not moving, I don't need to move. Papa is not home today. Or if the Papa has been waiting for you, and you come with a dimension of the Soul, you sit, you chat, you have everything you want, you come back happy. I met my dad, and this and this, and that.

Is it a dream? Or now it's the reality to understand, that we can do both at the same time. And the beauty of it is, if you go back to the teaching of the past. Do you remember what I explained to you? Your souls is in the center, and your brain is here. (:42). When you go to sleep, the soul manages just to go, maybe contact the brother or the father. But it communicates with the "Memory Soul" of the Man. And in the process of going back and forth, crosses the brain, and part of that information stays with the memory of the man.

Now, the whole process is upside down. The man's soul is there, and the brain of the man is in the center. Then you transmute, and still going through, to Papa, or whatever you want it to be. But this memory bank of the energy dynamic structure of the soul, will embed that information, still in the memory of the man. Then when you come in the dimension (D) of physicality, you remember it exactly like a dream, but it's not a dream anymore. With a man and his brain, you took a taxi to, and went to see the mom. With this (flight system FS), you take the dimension of the energy.

This will take a total new D in the life of the man. As I said, it takes a lot of understanding from us. Then maybe as I said, it brings a new understanding to the "beautiful people," what they call schizophrenic. Because man itself has made the dimension of a schizophrenic, in the dimension of the encapsulating the STM, in the physicality. Now on the soul takes open, (:44). and the physicality has to remember.

Now, how do we respect ourselves? When we say to our family, I went to see Papa, and that's what it was, he was nice. We had a meeting and we had a tea. Papa died 20 years ago. "Oh, you were in the dimension of the Soul, you transmuted." You did not transfer, getting a taxi to go to see the father, he was no home, you just went to the grave. He has no place to be in the D of physicality. But in the dimension of the Soul, he is still part, and connected. Now you understand the difference.

Now you understand how clearly I could explain for years, to respect the "beautiful people." They live more in the dimension of the Soul, than in the dimension of the physicality.

I am the Methi. I am the Messiah of my own soul, to understand the knowledge of the Creation. It's your responsibility to become the Methi's and Messiah's of your own soul, and no one else's. To conquer the knowledge of the Creation. To understand the process of the Creation. To understand the process of the Creator, which created the creation. In the English language, (:46). we say, "we got into his brain," we got into the way he thinks, and we can predict what his next action is. Now try to get into the way and the brain of the Creator and how He thinks, and then you'll find beauty in Creation.

We have lived the schizophrenic between our Soul and physicality, and we call, those who live in the dimension of the Soul, schizophrenic. But in fact, they lived in the dimension of. When you're in dimension of the Soul, does not much need, for big space to have 10 brains, can operate out of the same.

When we bring these "beautiful people," who have two or three souls with them, one decides to go to New York, one decides go to the Moon, and one decides goes to Vienna, and we have one physical body. What do we do? If one decides to manifest itself in New York, while the other one wants to do the same thing, because he just saw a beautiful girl, and he wants to show the beauty of physicality, sorry, the body sits in New York.

Now you understand the dimension of the change of the role for man. Understanding the memory of the soul, or understanding the memory of the physicality, because in fact, when you put a schizophrenic, (:48). to man, you call him with three souls. He will be able to manifest himself in all three dimensions, in the dimension physicality of the point, the time, and the place. In China who will look like a Chinese man. In America he will be blond and blue eyed, and in Africa he'll be a black man. But it is all one P.

Remember the orange and the Cup. In New York he'll be a doctor. In Africa, he'll be a wildlife saver. And in Vienna, he'll be a dancer, what he wanted to do all his life. Now he has a chance

In a way, what the womb of the mother could not do to create a triple, we do, bringing that soul of the three, into dimension of physicality, and allowing the souls to expand. Then you find out, Mama, I have three sons in the D of physicality, but in three different places.

They will all be the same. They'll feel the same about you. And the memory will be exactly, what they corrected as the dimension of singularity of the physicality. Very soon we'll show this in Linz. We'll bring people with this kind of condition of the three souls in physicality, and we show them in the dimension of 3 physical bodies. Then I wonder who will be the schizophrenic, (:50). the man who has not understood, or the man who appreciates the beauty of the Creation. As I told you with this new knowledge, a new and beautiful time has opened up for man.

Don't forget, because you're so physical, I explain it to you, if this was a problem for you. When you have an alloy, you have different materials embedded in this alloy. What do you do? When you make a Gans of it. Each one of them will make its own Gans, doesn't it. And it will show the property of that material, be it the Zn, be it the Cu, be it the nickel. Isn't this the same (as with the schizophrenic manifesting different physicality's)?

Now we understand and we can explain the condition of the Creation in its true meaning, and not in the fallacies the man has made for himself. If you go back to a longtime ago teaching of before, I said, in the future, the captains (of the UFOs) become those we trust our soul with, and they let us go, where we go. Wouldn't this be (the schizophrenic with 3 souls inside) be that the captain? Carry the soul of many passengers. And when it comes to the time and the place, the souls will take, and manifest themselves in the D of physicality, which they want. (:52).

Now, you understand, I am the true Methi, that I can explain that, in every condition and position, to bring the knowledge of the philosophy and what we call, understanding of the source of the Creation in both dimensions, and the essence of the Creation. Now, we understand and we can explain the true cycle of Creation, from the Creator to the man and beyond, scientifically. Not with hypocrisy, and what we call, literature.

This is why, it has come the end of religions, and the end of what they called, the abuse of the STM. There is no place for theology, when you know that science of the Creation. There is nothing left but emotion, and dimension of existence.

Many of you had a problem with understanding this process. Now we can see how simple it is. We had the same knowledge 10 years ago, but you could not understand it. You could not explain it. Now we have systems we can do.

I wonder if a mother who has a schizophrenic child comes to us in Linz and sits in the transmutation room, and watches her three children, maybe two as a girl, and one as a boy manifest in front of her, and tell her the things they've done with her and how. And she remembers all of it. (:54). Would she accept the existence of the three physical life of the man in that dimension, of .. her own Creation? I will do this in a very short time.

The new system is getting set up, is set for this job, to be able to transmute, confirmation, and bringing many souls together to travel to one destination, in a point in time, and space. We tested this with you, but you were not aware.

How many of you have been with me in the transmutation room, and I had appointed, maybe five of you in the room, and I said, "he is the captain," and the rest of you, the passengers. (Wasn't the) captain, was aware of his passengers. While the passengers were not aware of the Captain, where he was going to, and when they come out, and we talked to them. We have proven this to be correct.

Now, in coming time, we'll see the change. We'll see those who you dreamt, you spoke and you put in the what we call, sanitarians, you put them in prisons, you put them everywhere, and you called them schizophrenics. I will make you to be ashamed of your own conduct. How we put them in metal Institute, where we are the "mental's," because we didn't understand the process of the Creation

When you see an alloy, do you call, it a mental, or a metal? Or do you use its beauty. Now that you can separate it, (:56). you can enjoy the energy of all three at the same time, in whatever you put in that mixture.

Now we understand more about the process of the Creation. Now we understand more about, understanding of the process of conversion and simultaneous transfer, and transmutation to them.

As I said, the creatures of the universe, ?? ?? the knowledge man has been given. That they thought he was so backwards. Now he has become one of the ?? key ?? figures in the knowledge of Creation through the Messengers of Methi.

In a way, we connect your soul to the soul of the Creator. That's all it is. For you to understand the total process of the knowledge of the Creation, from the beginning of the time.

There is no need, and there is no room for theology, when there is no theory of the Creator. Where you face the fact, you understand the Totality. It depends, which level of the energy of the Creator, you can be graceful enough, to transmute yourself to. Then as part of the teaching, if you remember, I always showed you the plasma as this (a spiral). It's you who has to understand, (:58). how much of the process of the Creation, and the knowledge of the Creator you have understood.

It's the knowledge which gives man the closeness to the Creator, not the physicality, and praise, as charlatan jobs, in mosques, and in churches and the rest.

It does not need to be a farmer, or a king, to get to one or the other (to get to the center of PI). The knowledge of Creation, is open to every soul. It depends what the soul has the capability, and openness to receive, and to understand, and to be part of the point, time, and position, in that knowledge of Creation.

With me, I have traveled the full spectrum. And with you, you see the part of my time, with this time and position (at the beginning of spiral). That's why I always said, there'll

be no magic for the work of the KF. Because we explain to you the Totality of the knowledge, from point of the Creation on. It depends how much of it, and which part of it you can understand.

(audio drop ...) total knowledge of the Creation, and it's for the man to decide where he wants to be. (1:00). Now you understand the process of the knowledge. How you have access to knowledge, whatever you want, because I have traveled the full path. And you are just the time of a frame, position and time and space. (You are just at the beginning.)

You came from the fractions of the fractions, and fractions, and divisions, to become. Where we come directly from the source to the same position. That's why you lost part of the memory of the Creation. (Because it keeps getting split.) Otherwise, even these (??) were created from cycle of the origin of this, at one point or another.

Now you understand, why we asked you to come to Linz. We want to put those fractions together, that with it, will make a new race of the man. That you all are connected to, not by nationality, but direction of the soul. That's why we asked for more nationalities to come, to imprint, to create the connection of the knowledge of the Totality.

Now it's up to you, which path you take, and how you will travel the span of the universe. How you will go to the next step of understanding the Totality of the Creation. "I made man in the image of Myself," because you came from the fractions of the divisions of Me. (1:02). How can you not be Me.

Today's teaching is very strong, and is very in-depth, but it's for you to understand. And it's for you to be able to connect to, to be able to share with your own physicality and the soul. The knowledge of Creation is simple. Man has made it difficult for him, to connect to it. And that's why you're in the shamble of the position, and the time, and the place you are today.

It's just a matter of how, and what your extension is, and what you understand. A few minutes before this teaching, I was online with some officials of a government. Some of the Knowledge Seekers here were in that meeting. I said something very simple to one of them. I said, give me your telephone number, and I'll bring you to Linz. He said these are secret ?? things, we cannot talk about. I said, the Europeans are buying tickets for that position. What is secret to you, is now, Knowledge Seekers in Europe, working with, living with, and they have access to. They are buying tickets to do it. (1:04). And for you it's confidential, and you cannot talk about it

Isn't this the situation we have with some of our lives at the moment. It just depends on the span of the knowledge, and understanding the Creation. The Knowledge Seeker translating, wants to be in the transmutation. And the same guy, from the same country, to him it's confidential, and secret, and cannot be spoken. But to you Knowledge Seekers have already bought tickets to come to transmute. It's how ignorant we are about the knowledge, which brings us the ignorance in accepting the knowledge.

The process of the teaching is very simple. Now we understand more. Now we understand the Totality. Now we see the Totality. As I said, the break point will come for us in the next few weeks. When we show you in the transmutation, and then transmutation and the transfer at that same time. Do you want to fly, or do you want to go to. How many of you in the flight system (FS), I have given the option of? And how many of you when you come out, you say, I flew to Moon. And those we asked you to transmute, you say, I went to Moon. (1:06).

Now, you understand, everything is set, to mature the STM in the right direction and D. Then it comes, the biggest question for you at this moment, why did the Keshe Foundation brought in the Energy and the Gas Units?

If you cannot make the bubble of yourself to come out with, I can put you in a gas bubble of mine. When you don't have a car, and you want to go from A to B, don't you get a taxi? Or you get on a bus. The plasma transmutation of the Gans's allows us to speed up, for those of you, and the objects, which you cannot, they will not be able to do that by themselves.

It's not for you to burn the fuel. It's for you to learn a new package of life, with no physical structure inside, that we put, we encourage, to place the STM and the STP of the Man, within it. We created our own envelop. And you are only happy with the energy of burning it.

I remember years ago, (1:08). when we had some friends, who came and haven't seen their family for decades, were taken to a so called, "having a meeting," to a party of the family they haven't met for years, decades. What they did, they called a doctor to be ready, that if any of the guests, or the one who have come in, they get over excited, and they might have a heart problem, or they faint. That there is a doctor for them to support.

Do we need to bring doctors in the enhancement center? When we show the mother, the physicality and the feature of the three souls, which have the dimension of physicality in front of her? Would she be able to handle it? Or would she be able, or would she have a heart attack? Or do we elevate the Soul of the mother, to see the children first in the dimension of the Soul, that can accept them in the D of physicality. Either way, it's the same for ??

One of the reasons I pushed for two Seats in the transmutation room, was this. That when we do, those who we know have two souls within them, and we call them, schizophrenic. That when they manifest from one system to another, there is 2 Seats for them, and they can manifest themselves in the dimension of P. But would the mother and the father be able to accept the 2 children.

Or would they come to terms with it, when they tell them, (1:10). how they played games with them in the dimension of physicality. "Mom, do you remember this?" That was mine. Mom, do you remember that? That was the other one. And do you remember? And the mother knows all of it, but now knows who was the doer of it.

This is what you're doing with you in the dimension of the singularity, we put you in the machine, and allow the soul to expand for you to be able to manifest it in another dimension in a world of schizophrenic, to the physicality of the Man, in the dimension of the both.

We go for a break, we come back, and we take questions. But I hope today you understand more. Now you understand why we asked you to come in to the dimension of the transmutation. As many people as we can take, to go through this process. It will give us a chance to compete more the whole structure of the soul of the created on this planet. Make your way to Linz, and let us bring humanity to peace, first with oneself, and then through ?? ?? on this planet

R: ... (1:12). 10 min Video

<<< **BREAK** >>> 445 KSW August 11, 2022 (1:23)

(1:24).

Q: Did I understand correctly last time, to be a volunteer for the transmutation in the first trials, still cost 2,000 Euros, is that correct?

K- Yes, you still have to register. Running that center has expenses, tens of thousands a month. We moved the systems there, you are not paying the Foundation, you are paying to cover the cost to keep everything running there and be able to develop. This is what it means to cover the cost of the, what we call, the running that Center. You will see people when you come in, three, four or five people there. It's an Austrian wages. The rent, the lighting and everything else. The place has to pay for itself. All the people that come as visitors they don't pay anything, it's free. We get 20, 30, 40 people a week, they go through the Center. The expenses has to be covered.

Q: .. Someone was spreading fear recently in a German plasma channel, saying it's poisonous and extremely dangerous to touch a Nano coating. (1:26) Supposedly the particles go through the skin and with the blood into the brain. I do not believe it, it was never a topic like this. But many others, especially new people were frightened in the group. Can you say something about this?

K- We always advise you not to touch the Gans's and not to touch Nano materials. Nano materials doesn't go into your blood and the rest of it. The one who bring the scares are the Belgians and the pedophiles in Germany, we know who they are.

Anyone you see coming up with these scares, just go back on their IP and see where they end up. If they should ?? truly, they want to be who they are. It came from the Belgians initially. Then the Germans picked up on it. Because as I said, we don't go into that, we've been long enough with this ??, we got rid of the Belgians and the Germans with what we've done. Now and then they pop their head out to do.

We advise you not to touch Nano materials because you updated ??, you attach your energy, they feed you with energy. If it is dangerous, you look at all the products nowadays you buy in the market, this is Nano particles, Nano blah, blah, blah. If Nano material was something dangerous, why, but how come when it comes to the Keshe Foundation.

These are a bunch of pedophiles and thieves who up to that could manage to scare some people away. But with the knowledge and understanding, you go into any shop, you go into any pharmacy, you buy products which have Nano particles with it. So, how come when it comes to Keshe Foundation, it's wrong?

They use people's innocence for this. We advise you not to do, because of the energy transfer. When you're in touch with a lot ?? or too much energy, it's the same with the Gans's. (1:28). We always tell you don't digest the Gans's, but use the Gans water.

They are like the priests, they live of the ignorance of the knowledge of the man. We advise you, don't touch it from the beginning. Don't inject them, because ?? till, particle is not what it does. We have doctors who inject themselves with Gans's, they know what they're doing. We have men of medicine who do a lot of things with us in the background, with the medicine. They are doctors, they take charge, and they know how they inject themselves, ?? We advise you not to do, don't touch, don't drink.

As I said yesterday, it's one of the greatest pleasures when we see things. As I said before, one of the leading doctors in cancer, head of a cancer hospital, having the cancer would have died about two and a half years ago, with a very bad lung cancer. He posted to us this week pictures from. I explained this in another teaching, I think yesterday with Rick. And this morning he posted something else, which was beautiful. It says, "Dear Mr. Keshe, I just woke up from a nap, and in fact, I have completely forgotten about the tumor in my life."

This doctor, this physician is the head of the cancer hospital. As I read yesterday, it's a pleasure to read this. If you go to Rick's teaching. He sent me pictures of him and his daughters in the forest. He said, "today I'm taking my two daughters for a walk in the park. (1:30). Thank you, dear Mr. Keshe. If it were not for you, they would not have me, as a father today. I cherish my life now, and love everything now."

Two or three days before that, he sent us a picture. He is a forty year cancer specialist, head of a major hospital, with him playing basketball with the hospital basketball team. You can imagine how much energy you need to be active with the young people in the hospital to play basketball. He is proud to be himself. Monitoring himself in the hospital, where who would have died two and a half years ago from the tumor, from the intensive lung cancer.

We advise people to do things, if they are men of knowledge, all his colleagues are expecting him to die, I think two years ago. He still have the tumor, but that tumor has become part of the structure, as he said, he doesn't even think about it.

You have to know what you do with the technology. You have to understand what you touch, when you touch, the way you use the material. (1:32). He is one of the leading cancer specialists, head of a major .. cancer hospital. With all the diagnosis he's had for years, he knew he would die. But the only thing was different with him, he was a Knowledge Seeker.

He knew and he tried this on his patients over years in the hospital. He knew it's the only way that he can survive it. Now he is. You should see the pictures of him in the forest with his daughters. It's not just talk, you see him in the actual full basketball outfit, playing and on the field.

If you do it the wrong way, you don't understand. But he did (understand). We have a full report, everything he's done from past months, and months and months. How he injected, the way he injected, the way it's the sequence of the things he did, the way he used the Gans's. We advised him what Gans's is to make, he made the Gans's himself for himself. Nobody else made for him. In his office in the hospital he makes Gans's for himself. He's the head of the hospital of cancer. But he knows how to use it.

As I said yesterday in the teaching with Rick, the only people who lost in the world of medicine was the Europeans, because of the lying and cheating of the king of Belgium. Chinese are using it extensively in many places, doctors are using the technology. (1:34).

They (the Belgians) use fear, they took us to a fake court. It's finished, since Sunday. We are free to teach, to touch, to help doctors, to help the others. The five year ban on us is over. But a lot of Europeans died because of it. A lot of nations, European nations and the others paid for it, for the lies and cheating of the Belgians. But Chinese leading doctors use it. South Americans, Africans doctors and scientists use it.

As I said, you are like the pheasant who put their head in (the sand). You didn't see your backside yourself. The king of Belgium got you. How many of you have lost your loved ones in past five years? We couldn't teach you, we couldn't expand the knowledge of medicine. (Now) we'll expand it heavily.

The only thing we didn't know was that, the biggest agent of the Belgium was in bed with us. One of the biggest pedophiles in the world, the whole family. All (of them with)

prison sentences, and we didn't know, that they were working together to side (track), to literally scuffle the technology (T) down, living a schizophrenic life. Being a loving life and working with ?? pedophiles, with prison sentences, long term six, seven years. The whole family. You paid in turn as Knowledge Seekers for the fake documents. (1:36).

Don't touch it (the Gans and Nano), because you don't know what you are touching, in what level you absorb energy, and how you absorb the energy.

Don't be scared. Do not be scared at all. But don't touch, till you know how much energy you absorb. It's like Gans's, we give you the dosage of Gans's. We don't come and measure your Gans's. We tell you 50% of this, 70% of that, does this, does that. Then you understand not to be scared. If leading scientists, and doctors are using it and seeing the success with it, how can it be dangerous?

Any other question?

Q: .. Hi, Mr. Keshe. Thank you for the opportunity to go through the flight unit. My question is, when I had my children during childbirth, it was one of the greatest sensations of love I've had in my life. And we know that the woman at that moment, has high levels of hormones, (1:38). such as progesterone, cortisol, oxytocin, and then inside the room of the flight unit I had a similar emotion. I would like to know, if inside the flight unit, these hormones are also increased? Or are they just connections of our emotions with the love of the Creator? If you could tell me a little more about the possible physical changes, I would appreciate it.

K- It's mainly increase, in a way it's not an increase, it's the expansion of the energy of the soul, where the STM carries the spectrum of the energies, and hormones are energies.

As I always said in all the teaching, when the Soul of the Man expands, it crosses every cell of the body of the man to get outside. You know, when you go through a tunnel from one side to another, you pass every stone, which has made that mountain, you cross it, you cross the energy of it. This is the same. So, in that process, a spectrum of energies cross to reach the outside, where what we created there, what we call, the fields in the system.

In that process, some of these fields are at the strength of the hormones. And the hormones are in a way emotion connected. That's why we call them hormones. I explain them as the harmonic of the emotion with physicality. (1:40). In a way, if you call a hormone, in what we call, the structure, where connects the emotion to the emotion energy of a cell. In the physicality, we call it psychosomatic.

In the structure of inside the body of the Man, in the energy transfer, we call it, the hormones. The soul has a spectrum of energies, which some of it does it on that level. If it happens to touch your field, you have that emotion they have. You've touched the work of that hormones as it goes through. Yes, you feel it.

We, when we used to do the tests, before these stupid cases, which were brought on lies and cheats by the Belgians, when the people used to use the system of the Keshe Foundation, which we used to build. By the way, we have a certificate from Homeopathic (institute) of Belgium to make the systems, and our license is still valid. We .. used to tell, for example, to the women, who went through menopause, where 10 years, 20 years down the line in their 60s, 70s. We always warned them. Because that those days we couldn't explain to the depths of, that we can explain today. That, be careful, that a lot of them used to get their menstruation cycle back.

You only get menstruation cycle if you touch the hormones. (1:42). So, it was obvious from the beginning, the energy produced through the plasma technology touches in the spectrum of the field, the hormones. Because originally a couple of ladies in Holland, in their 60s and 70s, which they started using the system, they came back and said, Mr. Keshe, we've got a problem. Since we started using this, our menstruation came back, it has become regular. We lost it 20 years ago down the line. I went through my menopause, what's happening?

Then we start looking at the structure, that plasma technology, as the hormones are plasmatic. So, we're building, we're creating hormones that others. We're creating fields at the strength of the hormones. This became very clear, that the plasma technology reaches the condition of the plasma of the hormones.

Many women; and it became very regular, and then we always had. When the couples came to us in their 60s and 70s. We always told them be careful as a grandma, you don't become a papa, or a grandfather you don't become a papa. Because now the extension of the survival of life has extended with the new technology. We've been, we know this does for decades now. That the plasma technology. The field works with the hormones, which is a field base structure, as what it is.

So yes, when you go through the system, that sits there. If you've gone through the system and you're in menopause, be careful, you could become a mama very quickly without you knowing it. Then we will see this coming up. (1:44). All the people in their 60s, 70s, you've been through the 50s, you've been through the cycle of the Keshe Foundation flight system, your body has tuned itself to perfection, when you were young.

90% of you if you go through the system the right way, can regenerate, to what we call, pre-menopause. Even with a man it's the same. It's a part of the property of the elevation of the soul. We don't do (medicine). Our systems are not medical systems. Our systems are there to enhance the energy of the body of the Man. But in that way, you enhance the soul, and the soul expansion. When you say, "Oh, I went to the Moon, or I went to see the mama," so the soul has expanded beyond, that it's done the job. So, in that process passes every organ in the life of the man.

If you came to the Enhancement Unit test. In the first three Chairs, everybody talks about this. When they get to the second Chair, they're always telling you, they could not feel anything about their hips and up. It was like (being) in the fields.

In the first Chair, we prepared you for the dimension of physicality to become, the Soul of the Physicality (STP). Then in the second Chair, which was the STP, 80% of the people who went through, we're talking about, that they could see the legs, but above it they couldn't feel. These are the dimensions. These are the organs, like stomach and the rest, which are dynamic. Your legs are not dynamic.

Then when you go to the third system (Chair), (they said), (1:46). they could feel the expansion of the fields. They could feel the fields. Now we put all the three, in one. Then when you talk about the second Chair, (energy) going through you to the legs, so you have already interacted with the sexual organs, the ovaries, the testicles.

How many of men who've been through, had a prostate problem, they tell us, they have not much that problem anymore, it's easier. Because the expansion of the soul satisfies the what we call, the problem you had with your child, psychologically which created the cancer, and secondly, the interaction with the cells and the hormones. This process we understood, long, long time ago, before 2008, 2009. Now we see it.

Many women who cannot bear a child, most probably in the near future, by going to the resetting of the soul, and the structure, you don't need to go through all the other conditions you create to get pregnant. Because your soul in elevating, in enhancing the STM, will sort all that by itself. It's not our job, we are not a medical people. The structure is, by expansion of the soul, it's like, it's very much if you look at it. You know, you've got the microwave machines, and you put the material in ,to disinfect. The energy (of microwave) goes through them. It's the same thing, but this time, that energy is your soul. It elevates . Then it'll be nice to see, because we've seen a lot of things.

One of our Knowledge Seeker's mother was with us the last couple of weeks ago. (1:48). She came in a wheeler, a pusher, and she couldn't move. The when she went into the system, and she came out, she said, I can move freely. We've seen that many times with a lot of people.

We are out there as a health unit, we are not. We just by elevating the soul, enhancing the energy of the body of the man, the body puts itself in order. Some of this expansion of the soul, is at the strength of the hormones and does create a lot of things.

A lot of people, a lot of people I have watched in past weeks, they cry in tears. But they actually don't feel the tear on their face, physically. But they see the tears, but they collect it. I bring tissues, sometimes I go outside and bring napkins for them. Because they were not expecting that condition, where the emotion, the expansion of the soul touches the emotion of the physicality, where the tear comes from joy. We see all these things, we don't report it, because it's something we know, we add them, and we extend.

How many of you have been through the system, which you cried? Some of them cry. We have to tell them, can you please, you're disturbing the others in the room. But they are not aware of the tears, which comes from them, and they feel it. But they are not in

the dimension of physicality, They are in the dimension of soul, but the physical body creates that emotion.

It's an experience going through the Enhancement Unit. How you see it, and how it evolves. Yes, some of the energies are at the strength (of the hormones). It's your soul, (1:50). it's s your soul who created those hormones, in the dimension of physical life. So, of course you touch it

It's very interesting to see what comes up in the very near future with the expansion of the soul. As more and more of us learn how to live with it, and expand it and make it a beautiful life out of it.

Any other question?

Q: .. How will the goal of One Nation, One Planet come into play with this new technology, that allows the transportation and transmutation of the soul and physicality?

K- No borders. We can't track people anymore. No banking system, because we'll meet most of our needs. No restriction on governments to be abusive against their citizens. You don't like to live in this map condition, you move to another within seconds. No prosecution, because in putting you in prison to prosecute you, can move your body from the cell. There's a lot of things with it.

One Planet, One Nation, One Race you choose the place and space you want to live, where, what time, and where to be. There is no need for visas and all the things we created. We are better, you coming to us. (1:52).

Why the nations have created this visa business and passport business and restriction. Because we've stolen from you for long enough, now we want to keep it, you can't have it. That's all it is. The rest has to follow, because if you want to go with the thieves, they asked us to make you something. We give you a passport. Look at the whole visa situation and passport situation, in reality in the back.

There is no abuse. You'll be in Rome, Paris, in Tehran, or in Africa, or whatever, because they can't abuse you, because you can move on. Would there be refugees? Ends all these things. All these things will become in the history book of the man, very soon, very, very soon. The biggest problem will be the officials who think they can lose control.

These Gas Enhancement Units, which we put in the market now. You buy it, we try to make it, what you call, car conversion of it. Put it in the back of your car. Nobody can tell you how much you can drive. You don't have to have a fear, if you haven't any money to drive the car.

If you're paying 50 Euro a week for the fuel, which most of the people do to go to work, or shop or whatever, that's two and a half thousand you don't pay any more. That's half of the taxes to the government, which you don't pay, which you have to cover. (1:54).

But the other half does not go to Saudi Arabia, we see the richest monarch, the most abusing nation of their own nationals.

As I said to the people we were with this morning, you sign a contract for hundreds of billions to get the supply, now you don't need. What are you going to do with that 400 billion? It will come to our governments, these things very soon. That we need to be governed by one work, and sooner or later we set the scene. We imply and apply the scene, that it goes to the Universal Council. You will see it in a matter of handful of years. Universal Council will be one of the leading positions, even within the United Nations.

In the structure One Nation, One Planet, One Race is, I am a citizen of the planet Earth. That's all it is.

Then which part of it you come from? I come from the green part, called Europe. I come from the desert part, called Africa, the north part of the. I come from the forest side it's called, Brazil. We don't call ourselves, I am a Brazilian, I am a Chinese or whatever. They don't know you, they just see feature of the STM created on planet Earth.

As I explained to one of the Knowledge Seekers, when you travel in the depth of the universe, the soul of those who come from Earth is very distinct. (1:56). They know this soul comes from Earth. It's like you are a Chinese going into Paris and trying to speak French, or English. You're still Chinese, because we've seen that feature. Soul of the Man in the space has a feature, which is a feature of the strength of the souls from this planet.

The good thing with Keshe Foundation is that, we are not theoretical. We're delivering knowledge, science, technology, politics, all comes together.

Any other question?

Be proud you're born in this time and place, that you can see this transition.

My great grandmother used to say, I've seen how your great grandfather used to go with camels from Afghanistan to Palestine and come back once a year. I've seen how we went to the cars, and the bus, and the planes, and whatever it is. I've seen big changes.

With your little eyes, and your soul from now on you see bigger changes in a very short time, then our parents, our forefather seen in centuries. Because you're doing it for yourself, it's not somebody else to do it, that you don't need to learn how to become a pilot to, or to have a car to drive, or go to an airport to take a flight. All that now you're responsible, you're captain of your soul. (1:58) You decide, I put my soul into abuse or not.

Any other question?

Q: When you speak of transmutation is this the same as teleportation?

K- No. In the soul dimension we don't have telephones to teleport, and we have no television. Transmutation is when you transfer energies in the dimension of ?? life, in the dimension of existence, in the Gans dimension, in the strength, and your soul strength.

<problems with audio> (2:00).

Q: .. With the Gas Enhancement Unit and its uses in farming. I'm trying to get my head around it. It's just a gas released in the air, or can we put it through the fertigation? Or foliage spray?

K- Explain exactly what you want.

Q: The Gas. I'm trying to understand if that can be used, like, is it just released in the air? That's how they do it in the glass houses?

K- Yes.

Q: Okay, so they don't use it as a foliage, (2:02). like adding it to the water?

K- No, no, no, we got away with that. That was one of the biggest problem we had with the farming. Watering with it. Now you keep it at the level that it can be done. You don't need to switch it off. (Leave it on) continuously the wind will. The gas will expand itself.

Q: So the unit, do I place it, let's say on my farm? I place it in the middle of the property?

K- Yes, you can do. It depends which way is the direction of the wind. The things will grow better, .. down the wind, as they call it.

But no, in principle, no. In principle, you can use it right across the farming. It replaces it. You know, we're doing farming tests here in Austria. We've done a number of farming tests for the big agricultural site. It's very difficult to keep. Now with this technology it's becomes much easier. You can change direction and, what I mean, the strength for different harvests as you change every year.

Q: I'm just trying to understand, also with the donation, a while ago it went for 2,000 Euros. What was that for Mr. Keshe? Was that for the Gas unit? No?

K- We stopped that one. Now it's No, it was for, we were trying to spread the system, the Gas systems right across. Now it has become a product, which people are buying, it's easier. (2:04).

With the application of the Gas unit. Let me explain to you. With the application of the Gas Unit is huge. The implications of it is, it will be devastating for some nations, once it's implemented. You got to realize, governments don't need to import fuel anymore.

African nations who energy has been the biggest problem don't have that problem anymore. We should not see the shortage of electricity anywhere in the world. Because you can produce a gas, you burn it, you run a small turbine, you have the power generation.

Q: I'm just thinking that I sent 2,000. Now with it online, it's more than 2,000. It's 5,000. So, what do I do now? Do I have to send another 3,000?

K- No. What we've committed ourselves to before that date, will stay the same.

... You already have one of the systems there, which we sent you, with all the problems. I hope we don't get the same problem with this one.

The units for the plasma energy units, which is sold is already getting completed in the factory in Tehran, the main structures for them has been built. It's ready to be completed. So, in September, October we will start shipping out, those who have booked with it. (2:06).

You will see in the coming cycle all the Pain Pens, and Pain Pads and many of the products will come out of Iran. The Enhancement Units will be part of that system. Energy Gas Units will come out of Iran and Austria. We'll soon announce a new development in that part. We should be in a much easier point to .. distribute and expand the work.

Q: I've talked to some people, that have tomatoes in glass houses today and mentioned about the CO2 Gas units, Enhancement Unit...

K- They don't need to keep on buying gas to burn to create the CO2 for their tomatoes, which is tradition.

Q: Also the heating system that you're, the power generator standalone unit. Will that 2 kilowatt unit wouldn't be enough for the big glass house growers, they would have to ...

K- No, no, no, no. Let's talk about it different way. When you use a CO2 gas with our system, you should not have a problem with the frost, and that kind of thing.

Q: So, the temperature is consistent? Is that what you're saying?

K- The environment takes what it needs from it. (2:08). It's something we noticed long time ago, and it'll be part of that. It certainly heat, if you want to do it.

We have a 10 kilowatt generator, which is there now. We put a 10 kilowatt and a two kilowatt. Soon we can offer up to one megawatt power generators, because we go on the back of the Gas production turbine system. That's totally different. We'll offer very soon 100 kilowatts, and one megawatt power stations, what I call, gas plasma power stations. I am doing some work on the background to see what the competition takes. But our prices is as usual, 3 to 4 times more than, the national prices or international prices, because with our system you don't buy any gas to burn. You understand? It's already saved.

We had it and we took it off, we'll put it back in very soon. So, we will sell 100 kilowatts and 1 megawatt power stations, to be done.

Q: The CO2 gas unit. It's there a dial, that you switch the dial and it's methane, or you switch it to hydrogen or...

K- No, no, it's a different structure. You cannot change one to another. No, no, no, no.

Q: Okay, I thought it might be as easy as switching a switch, you know?

K- No, no. They are structured, they're produced different.

Any other question? (2:10).

Please book as much as you can. We want 30, 50. Now we're going to as many as we can for the transmutation. We try to send you back (home) in the very near future when you're here, as I said before. You still book a two way ticket, but you may get a refund on the back, in the news. We already done, the knowledge is there, the technology is there. We have built the system. It's just that, the next couple of months it'll be that way, we try.

As I said, if you want to see the mother and the grandfather or whatever died years ago, you went to the Moon, we managed to send your soul. Now we just got what you call it, package it, that we can send the body with the soul at the same time. So ??.

Any other question?

Q: .. Josafa .. Mr. Keshe, thank you for being there and for having such a wonderful team inside the Exhibition Center. Dr. Klaus and Dean who were the first to greet us after the experience, or like caring older brothers with a baby. First question. Mr. Keshe, when I reached an expansion point in the unit, something incomprehensible happened. (2:12). It was like a panoramic view and double positioning. But there was a loss of the space time dimension, and all that became out of body emotions. Were those emotions always there? Was I born with this complexity? Or was it just created and achieved in that moment? It was like a double positioning, and there was an awareness in both.

K- This must be from the two Brazilians who came. We especially opened the system for them last week, last Tuesday. It's always there. It's by the expansion of the soul. It's always there. It's just we were not aware of it. I heard that they enjoyed the trip. I heard that they enjoyed their flight. They had a wonderful experience with the system. If they would have come a couple of months later, we would have send them back to Brazil without the plane.

We experience these things all the time, but we put it on, something happened or accident. Now we know we are in charge of it, we can create it as random, and as we want.

Q: ... When I became aware, that the connection between people was the source of the process, that's when the whole process happened. We noticed the heartbeat. Could you explain about that? Is this a psychosomatic perception? (2:14). Or are the positioning of the chairs compositions, that make each entity present a connection of the system?

K- I don't understand. Can you repeat that?

Q: When I became aware that the connection between people was the source of the process, that's when the whole process happened, and we noticed the heartbeat. Could you explain about that?

K- Yes, it's the emotion, it's a psychosomatic. You feel that emotion. Suddenly it's there and your physicality reacts to it. Yes. It's psychosomatic. We are not expecting this. We hear from a lot of people who go through the system, it's the excitement, it's what I call, awareness of unknown.

We become aware of something, which we were not expecting, and now it's in front of us. We are part of it.

Q: About if it's normal to pay taxes for privileges. (2:16). So, he's saying, isn't it the same now, even with the plasma technology, we'll have to pay for privileges?

K- It's not a privilege. No, it's not privileges, you. Having a tarmac road, is it a privilege or a right? Having a light on the street, is it a privilege or a right? Having a fire brigade to be there, is it a privilege or a right? It's the right for having all of them. But to have them you have to pay for them, to have that privilege.

So, when you come, and you are a skilled worker, and you go to the government, and say, I built the streets, I helped to build the streets. You buy the machinery, you don't pay me anything, because I have everything, then the government won't charge the others, because it is free and everybody does the same.

You expect to be paid for what you do, but you don't expect for other people get paid to create that condition for you to be able to do.

I had a beautiful principal in my business life. People who worked for me, they can tell you, before I started the Keshe Foundation. A percentage job of my annual profit of the companies was given as a bonus equal to all my staff. (2:18). If you're a director, you got 500 pound. If you're a cleaner, you got a 500 pound. If you were a doorman, you got a 500 pound. What they got as a bonus, or whatever increased salary didn't count. If you work for one of my companies, before I moved into Keshe Foundation. I paid, I calculated, let's say this year we made so much, divided equally amongst all the workers. From the doorman to the cleaner, who used to come to the company, from the CEO and everybody else, they all got the same 500.

The doorman and everyone, they're very happy, because 500 was .. equal to half of one month's salary. For the CEO and the rest was a big problem. How come we get the same as they do? I said, this shows he worked the same as you. If he's not there to clean your office, you'll be sitting in a heap of it, nobody will come to your office. If you don't work, he doesn't have a job. So, when it comes to this level, you're all equal to me.

It was very hard for the top people to accept. It was their .. always get more, to show they are important. But this equal distribution of the what you call, bonuses was always a pain in my back. But I always said, my staff on the lower level loved it. The ones on the top were always unhappy.

But is it a privilege or is it a right? It's a privilege for you to have the cleaner to be in your office, to clean, the office, that it can show, that you are the boss. Without him, get a broom, wash the toilet and everything else, and the passage. And the door man, if he's not there, you try to get open the gates for everybody else in. (2:20).

So, we have to understand what is a privilege and what is a right. Having a tarmac on the street with the lights is a privilege. For that privilege, you pay for people to do it for you. It's not your right. Africans live without it.

When I went to Russia, and to Russian satellite countries, and Eastern Bloc, just in early 1990s in business, we were shocked, it was cultural shock. We were used to in England and in Europe, at night we go to the street, the streets are lit. No, no, not in Kazakhstan. Not in Romania. Not in Bulgaria. Not in Moscow. Not in Uzbekistan. Nighttime, some streets might have had lights. You could see people hundreds, thousands of them walking on the pavement at night, still shopping, and everything else.

Having a streetlight is not a right is a privilege you have, because you stole from the others to be able to have it. So, when we give these systems. You have the Gas systems, you still have to pay taxes. Because you're still using that road to go somewhere. You still need the police man, if we have no more criminals, the police won't exist either anyway, but everything else for you to go to the hospital, to go to, to anywhere you go.

The lighting, the streets to be all perfect, to be clean. We haven't built a city cleaning system itself yet. (2:22). When we do that you don't have to pay, then becomes a right. That time is a privilege, somebody has to do it unless you do it.

So, when you speak about the governments, you have no rights, what they charge. Because you use the privileges they give you. They are abusers, definitely. But people who talk about, it's our right. You say you have to pay. Yes you have to pay. We make the gas free for you. We make the electricity free for you, we make your food free for you, that you can use the energies of the universe and the rest of it.

But do you go shopping? Do you go walking on the street? Have you ever walked in Africa with no tarmac, and when it rains. It takes you one hour to do 10 kilometers. Here you do 140 and 50 kilometers in an hour and you think you're right to go (shrrm) down the motorway?

Get your facts the right way. You've been privileged too much in the west by stealing from the others for centuries, now you think it as become your right. This time you want the right to be privilege, you still buy the systems, you still pay for it. And you have to pay the people to do the things for you.

You've stolen so much in the West for centuries, that you see that you're right to do it, and your right to have the privilege of the light, the streets clean, and everything else. (2:24).

Any other question?

Let me explain something. This is not culture of the West. It's the cultural of everywhere. I hope very soon, it's not only we can announce, but the Keshe Foundation. But it will be announced by the government, we started discussion. The Keshe Foundation Gas

production units, we will sign agreements very soon with one of the world major governments.

As a privilege for that government to have the rights to energy for its citizens. I hope this will be done in the next few days, in couple of weeks. We announce and the KF will sign an understanding, contract, understanding and agreements with one of the world leading nations for the production of gas.

Now the governments realize what they're going to be with them, we already have agreements coming up with two other nations. The thing is, as I always said to them, not having and buying gas, is it your right or your privilege we give you, to be able to serve your citizens.

You will hear about it. We're not just sitting here waiting for you to buy one unit. Hopefully, in the next few months, you will see the Gas Production Unit massively. This is my aim to do, and one of the world's leading nations. (2:26). We're waiting for them to draft up. As I said to them, ?? they said to me, draft up an agreement. I said, no, you draft it up, because it's your nation, that is going to use it.

Our Knowledge Seekers been in that negotiations with us, they are on the panel today. We have two or three Knowledge Seekers here who have been in two or three negotiations with us. The Gas production unit is not just one unit, which you see, if I buy. We will deliver it to the governments, and as a joint venture with the governments very soon. In next few weeks and months, we start mass production, financed by the world nations, which they use the gas for their use.

As I said, Keshe Foundation selling a pad and a pen, and other ones trying to copy and obscurity, is finished. Government need, .. to support the gas and we announce it. As we sign agreements, remember, as we gave the Keys when we announced it, I'll sign agreements with the governments, .. different governments for the Gas unit and the Energy units. We'll announce it from the next week or two. We have become a player in the world of energy, with governments, and they appreciate and they understand what it is.

We play hard to get. Because otherwise the habit is, the guy is stupid, they don't understand. We understand, but what we get is for the Foundation. I'm sure in next couple of weeks, we'll announce the first agreements with two or three of the world leading nations. Investing in the gas production units for their nations, car use and the rest. (2:28).

It's thanks to you Knowledge Seekers who are setting everything up in the background, doing all the hard work. We are too busy to be in production for bigger scale. So, we share, that it becomes more beneficial to more people faster. And we saw collaboration with governments and big corporations, ?? before we do.

As I said, once we start announcing major government signing agreements with Keshe Foundation energy, the others will follow it rapidly. We'll try to get this done as fast as possible, in the next week or so. Then we'll see what follows on. Because it'll be announced by the governments not by the Keshe Foundation.

Any other question?

Q: What are you most excited about in this coming phase of the development of the knowledge of the universe?

K- Transportation, transmutation, but at the same time the energy, and the gas, and the food. We have seen the games played, within even in the food section. How people tried to use the Ukraine condition for boosting up, hyping up the energy. We've seen in the past week dropping. We've seen how they were in such a hurry to export food out of Ukraine, and the boat is still hanging in the ocean. Nobody wants it. (2:30). Because the Russians are pushing it in the background. We allow you to ship it, but we don't allow you to sell it. Because most of these nations need us, and if they need us, they don't buy it. They just wanted to show the Ukrainian ??. This comes when the we start getting into.

You've got to understand it very simply. Now when we offer this technology, the gas production to a nation, they become a energy producer. They don't need to bring anymore. That is a massive saving for a nation.

As I said, if you get China opening one coal power generator a week, which they did for years. They opened one power station every week, coal based. Now we've seen all of it. They are trying to close the coals. But it can touch the economy. But they import some of their coal from Australia, which keeps them on the limbo. They import the gases on the others from the other places, it keeps them in limbo. This will change the structure of the economy of a lot of nations. Selling gas and selling oil. Now, everybody has an oil well, or a gas well in the back of their car. (2:32).

This is the pattern of our work. So, we become a gas oil corporation work. As I said to all of them, we want 50% of the income. They say, Mr. Keshe you're greedy, how come? I said, I want it upfront, and I want a share of the profit, and I want user a payment. Which is like Microsoft, as I explained to three of them up to now.

You buy a software from Microsoft, you buy the license you pay it monthly. So, it's the same. You buy a technology of the Keshe Foundation, you put them in the back of the car, you don't pay the fuel costs anymore. But I want so much per year for using my technology. This is my right. Then this finances the One Nation, One Planet, that we can provide services for those who can't pay, we can create more knowledge and technology.

Now in negotiations with parties now talking to us in the governmental level, I'm not a naïve guy, don't forget I've been in the international business, I know exactly what I can ask them, and how I can push.

You want my gas system. You are investing billions in other countries to ensure and guarantee supply. Now you don't need to, it's in your home, it's at your base. You might still produce so much electricity with it. You charge people for the electricity you produce. I want a share of it. It belongs to the Keshe Foundation. You produce my units to put in people's home in the car. No problem. You make \$100 profit, 50 is mine. Now they don't care where you buy your television from. (2:34). But the government sends you a bill for using television, you have to pay. I want that too, part of it. Because you're not paying any more gas bills. You don't pay any more fuel bill.

I have set the basic structure of the One Nation, One Planet, One Race. It's coming up. But we tried it with the Pad, we tried it with the Pens. Now this has come. I've worked on this level for 20 years. I know exactly where to push them. You will see it.

The way I put the Key out, started with the African nation of Sierra Leone, the ambassador announced, I accept the Key, because my nation want to have a difference. And I got the American President to beg for it eight months later, after he was reelected. You will see what it will be happened with the Energy unit. You look at it, "Oh, there is a Gas unit. Gas units means trillions for the governments. Leading governments are running problem with it. I sign the first contract, the first memorandum of understanding with one of the leading world nations, that the technology is needed. The rest will run like a rabbit to get it.

You still have to pay for it, because it is not a privilege and the right, it's obligation to bring balance. You watch, in next few days, next few weeks, we'll announce one by one, which nations are signing contract with the Keshe Foundation for the energy supply and the gas supply.

All of it goes to the Foundation. I came with nothing, I'll go back with nothing. But I'll change this planet. With science, technology and understand of it.

Watch the space, (2:36). who we'll announce have signed the agreements for the energy supplies. In next few days we'll hear one by one ??.

Any other question?

R: Maybe watch this spaceship. That will be the new saying, watch this spaceship.

K- But it's the fact, it's the way it is. We played, we learned, we got the knowledge seekers to understand. Now we share in a very big way. This is what is our right to do. We developed the technologies of Keshe Foundation, it's our right to see our wishes becomes reality for our followers.

Don't expect anything from the Keshe Foundation free. The freebies have all gone, but if you need it, you get it free.

R: Also Mr. Keshe, I think it's true that once we have the flight technology and other plasma technologies fully implemented, there'll be economies of scale, that we can't even comprehend right now in terms of. Well for example, you mentioned roads and that is a big part of taxes go to pay for roads. But if we have the flight system we don't need roads anymore then perhaps we'll just pathways for people to walk and there will be a lot less wear and tear on that infrastructure and we'll have less taxes. (2:38).

K- How you going do with the energy you absorb for the food? You've got to burn it. We still got to do it. We still go walk in the street, we still jog, and we do everything else.

R: Yep, we still like to take a ride on the donkey once in a while in spite of having all the other options so I guess we'll ??.

K- Any other question?

Q: .. I'm very much interested in transmutation. To me, that's the ultimate step. Like all the spaceships, it's very obsolete. So how would one focus on training oneself to do it, by yourself to be able to transmutation without additional training wheels? I'm sure there's ways to use training wheels to get there. But how would you aim towards being able to do it just by yourself with your soul? Are we able to, if we were to use that current transmutation unit, would that help us along the way? Or would that transmutation, is it, needs to be different of, in order to provide the training service?

K- This is not the first time done. Many people can do it. Man has a lot of abilities, which he has denied it to himself, by time, but still is in our DNA. You can extend your soul and you can transmute. But sometimes you need a hand. Sometimes you need to be trained. (2:40). Our process is giving a hand and training and those who can do it themselves, they can do it. A lot of people claim they do, they have done, and a lot of people actually do it. I see a few Knowledge Seekers now, that it is become fashionable claiming it. But I see some Knowledge Seekers, who actually do it and they can achieve it in a very different way.

But it's not something that you need a system for it. One of the ways to do it, is the mobile system, which we can reach to teach in a very fast way. So, it's not exclusivity, but ... there are plenty of cars outside on the street. You have to learn how to drive before you can get in them. That is all it is.

Q: .. Would you have any specific advice for training to drive that vehicle of transmutation for yourself?

K- I taught it. I remember, with Fabio sitting in front of me in Barletta. He was laughing and I was laughing, and he was going, "they don't understand, they don't understand, shacking his hand in the air, they don't understand." He understood what I was talking about. So, if you go back to the past teachings it's in there, I already taught it. But you were too greedy for other things, you didn't see it. It's in the teaching.

If you go to all the teachings in Trane and Barletta, (2:42). you'll see it in there. Because I remember Fabio understood it in one of the teachings. Because, don't forget, Fabio translated the books into Italian, so he knew all the writings, and he knew what is where. He was our cameraman and the soundman in Barletta and in Trane. So he was in all the teachings when I was teaching. But because he didn't have to learn, he wasn't there as a student he was there as a listener, but he could think, because he read the books. He found out, and he said, they don't understand. They will never understand, till we give it to them in a cup. You can do it, it is in the teaching.

Q: Would you be kind enough to point to which specific teaching?

K- I don't remember what I had for breakfast, let alone what is in the teachings. Two or three times it has been taught, not just once. It was taught clearly.

One of the teaching was done with Dr. Eliya Kostova, in one of the main teachings. It is in one of the medical teachings with Eliya Kostova. When we spoke about emotion.

Any other question? (2:44).

R: Stefania mentions in the chat, in the Mojhans originally we didn't have any machine, we didn't use any machine, but we were trained.

Q: Can you expand on plasma vacuum?

K- There is nowhere in the universe, where there are no fields. But there are methods to extract certain strength fields from that soup. There is a specific way. It's like, literally, looking at the Plasma of the Universe as an egg. It contains the yolk and the white. You can extract the yellow from it, but you cannot destroy the shell. We can extract the white from it, and leave the yellow and the shell.

In a way, we always have that cocoon of fields. (2:46). To create a plasma vacuum, you have to decide which strength you ?? don't want not to be there. Understand, as I say, "do the vacuum job on it," how to bend the fields from getting to there. It's a very simple knowledge. It's something you can do very easily.

So let's say, from 1 to 10, you don't want the 3, there to be. You cannot take the 3 out, but you can divert the three from certain positions. In the world of plasma you can not destroy, you accommodate.

This is what the job is. You create minimum amount of a given field, to reach in a specific area, which you need. In the vacuum machine of today, we don't reach taking all the atoms out. We decide, we go -2, -3 , -4 . How much we allow to stay in. Which strength to stay in. When we create vacuum in the vacuum machines of today, we decide how many particles is still allowed there, because we cannot reach them. Total vacuum doesn't exist, and especially in the world of plasma. It's impossibility, if you understand the knowledge of creation. Absolute impossibility. (2:48).

It's like when you build a dam, you put a diversion to get the water away until you build the dam, and then you put it back in again. It's the same game. You have to create the dam, to divert the fields you need, then at the same time you still have to let it go. You can't block all the water, you still have a seeping water going through as another water in the back of the dam you want to build, it comes in. It's the same process, it's just having the knowledge how to do it.

One of the biggest problem we have in the world of science it .. comes from some of our past scientists lack of knowledge, that you cannot bend the magnetic fields in some cases. They say, you don't see it, only the stars can bend the magnetic fields, or whatever. I can bend the magnetic field of a 2 penny coin. We can target magnetic fields by bringing them to position.

So you have to let the dogma of the past go away, and look at the new science, and then you see it, very easily you can do it. You can divert it and that one is diverted you create the ?? magnet.

I said to one of our Knowledge Seekers very recently in our research, all of you knowledge seekers work on entry and exit of the fields, clockwise and anticlockwise. By God, so many of you are so far wrong. We have one Knowledge Seeker in China who is just trying to ?? to find out. It's there but he cannot see it. Chao Jin in China, (2:50). he works in a beautiful ways with the fields. I'm trying to explain to you, I love the way the guy works. He has started seeing where all of you have made mistakes, even in your MaGrav systems, in setting it up. Chao Jin is the first person who has actually moved into that bracket of understanding. I love the way he works, the way he understands the technology.

All the things you've done it's upside down, but you're happy and I don't interfere, because of all the accidents and mistakes of the universe man is created. So man is not even an accident. So let's see what his mistakes mean. But working through the principle of the science, plasma, Chao Jin is the only one who has started understanding where everything has gone wrong.

Any other question?

Q: .. I remember you speaking in a teaching that you created a specific condition, that allows you to carry many souls. Can we say that these souls are present all the time with you? And when you wish to communicate with them, they manifest instantly in their physicality? (2:52). Or can we say, trust another pilot to take control of the spaceship, physicality? (Separate question, I guess, Could you talk about the relationship of the extra cavity that you possess and its relationship to soul feeding?)

K- I think what we talk about collection of Souls, it's not, you don't imprison. You cannot capture souls. It's a close, you have a contact with, where you are connected to, which they ?? are there.

This collection of souls, I think today's teaching in the gas section, I explained. When we say, we give a captain. The captain has a direction, and a soul and a decision. When I put the soul of many within the gaseous condition of one envelope, I don't need the emotion of the captain to be. The package arrives, and delivers the packages which are there, for it, if you understand what it means. What exactly it means is, with giving a freedom, or trusting the soul of many to a captain to deliver. The emotion of the existence of that captain can interact.

When we come to the gas level, if you understand it, if I can embed all the souls in here, I transmute one. This is the reason we brought the gas production. In a way we look what's inside the gas as a plasma, not what it does for you burning. In the future, it will become much, much clearer, as you understand.

It's like, you know when you go to party shops, (2:54). and you buy big balloon with a lot of balloons inside it. This is the gas units we're trying to. Let you understand, it will be. It's the envelope that we're looking for. You are looking for, how much does it burn.

Because that gas balloon in the dimension of the energy, this can be faster transmutation, then trying to get too many, each one going to a place. It's in a way, plasma technology, what we call in the ?? Gans plasma, as a gas is the key to transmutation of the souls of the future. And then I explain.

Because very simply, is, you have a CO₂ let's say gas, you call it, or you've got the hydrogen (H), or the helium, or whatever. In the hydrogen I can transport the STM from Earth. Because it fits it. On the plasma of the Gans of CO₂, I can do the Martian. I cannot do the Martian in here (H), because it doesn't fit, it doesn't survive.

The purpose of the showing the creation of different Gans or plasma, this is what I told you in the last week teaching. That when you get the CO₂ in the gas bubble now, it's just to put the fire out, or you get a bubble to your soft drink. The CO₂ plasma Gas unit carries the emotion. (2:56). If it can carry that, that it gives life, then you understand it's the new envelope that you need. For me to build a brick to put you in it, and a thing. I have to become matter. The bricks of the universe transformation comes through ..

(The God is begging for money, if you can hear it in the background, the church bell is ringing, it's 12 o'clock, the priest needs to be fed. He needs people to go in and pay them, for a lot of lies about the soul, which they don't know.)

Anyway, so, this Gans, the Gas unit is. Primarily, I always got you interested, in what you were interested, but in the very near future, if you saw in the gas production unit. (Rick, can you access the video of when a bubble comes out. If you see the gases come out of it, as a bubble, in the system.) If I can separate this bubble, and embed in it, or transfer in it, so many souls, where do they go?

I need to transmute that. It's my envelope. I don't need a pilot, I don't need to find someone. But each bubble, it carries, it guarantees the survival of certain structure of

souls, we call it, a CO₂. What about in the universe where there is no C, and it's not made, they are made of Sodium (Na) , or something. So, I need to be able to create an envelope from them (the element of whatever is there Na or CO₂) , that they can travel it in. Now, you understand the real purpose of the new gas production.

We are in the Space Technology, transmutation. So, everything we do has to end up in that purpose of application. (2:58). I always hide it inside something else. Now you understand why you got the Gas units. It's not for you to burn, or put your fires out. It's to see how the next envelope is strong enough to carry the, what I call, the Soul of the Man in a very specific way.

End of Part 1 auto transcript 445 KSW

I can expand that bubble to cover a planet. So, I take the whole Soul of whatever is created on it (the planet).

We used this technology some time, far back time. Where a planet was in danger. We could see one planet to explore, and we could see one planet to collide with life, habited life in it. This technology, this understanding was developed, that we take all the souls, but the physicality within it, and it worked. I know exactly how it works. And I know where this race lives now. So, it's not unknown, it's a well now knowledge. It's been tested.

R: I got the least one of the videos showing the gas production.

K- It's in the lab, we saw it in Tehran. We saw it in the lab in Linz last week, or the week before with Klaus. Where the bubbles come up. I'm interested in those bubbles. (3:00).

You see those little bubbles. In the future I show you how to capture it as a plasma. Then how it becomes the next transmutation system of the future. The life of man to travel collectively, depends on that bubble in the depth of the Universe.

I want to show you something, we shared it with the governments, now we can share it with you, with the permission from Klaus. The methane gas we couldn't show for safety reasons in the background. (Rick, I'll send you a video, which I would like you to share. This is from the Keshe Foundation, what you call videos.) You can see how successful we are and why the governments listen to when we put things through. .. Here in this video you see only one or two bubbles, because of the safety reasons. We play it for you. When you see this one it's the same system. It produces gas on both high and low level.

Then you understand how powerful this technology is. .. (3:02). This is again the same methane detector you saw working. (Plays video of Methane gas bubbles) You see the bubbles coming out of the system. You see there is no gases (present). The detector picks up the low (level) first. It has to analyze it, and watch (it's starts beeping fast). Each arrow

on either side (of the detector) is for high and low pressure. We produce gas methane in a huge amount.

But in the future, these bubbles are the means of transportation of different races of the universe. Because they are (what we call), Gas in Nano State (means Gans). They are plasmas in Nano state coverage. (3:04). They are the secret of man's transportation in the universe. Once the man understands the potential of it.

The way he (the bubbles) comes from the bottom to the top, it goes from one Universe to another Universe. But you're only interested to see how it burns, and that's the nature of the man.

One bubble, is one spaceship, and I can put in there millions of Souls.

Everything we do, as I said a few weeks ago, is now the knowledge of universe, we are teaching. Not for you to have a gas free business. But we are here, we got to keep ourselves entertained. But you have to understand the principle behind it, how it works. You're happy with the spaceship. This is the way you transmute.

Any other question?

Q: .. For those who go through the transmutation process, (3:06). do you expect, that all of these volunteers will be able to learn or remember this transmutation ability across the board? Or does it have to do with the level of consciousness of the being? Or is it still only if we...

K- No, it's a privilege even to a dog or a cat. Let alone the man. That's why we ask you to bring your dogs, and cats or whatever. We touch the soul, not the animal.

R: So whether a person or being, any being. Whether they learned or remember something about that process, is that relevant in a way?

K- They don't learn, it's part of .. let's put it that way, it's part of your DNA in ?? the memory, if you can put it that way.

R: So it'll be ingrained regardless of what the...

K- It's not ingrain, it's connected. It's connected to the knowledge of the universe.

R: Regardless of our conscious memory of it...

K- Yes, conscious memory belongs to the physical dimension of the man.

In the dimension of soul you don't have consciousness. It's everlasting existence.

R: What about the memory of the emotion?

K- It's part of the connection. In the physical life, we live all the time. But once we see a picture, which we have a connection, we hear a song, (3:08). we smell a flower, it brings a specific emotion. We don't walk all the time with that emotion. You understand? So, it's the same. It's a memory bank, stock positioning of the field strength.

Souls have emotions worse than the man. Of course they do, man is created out of their structure.

Any other question?

Q: .. Is CH₃ and Zinc mixed Gans, all right to help wean people off drugs? It's running rampant here in New Zealand.

K- It's rampant in everywhere around the world.

The combination to get people off the drug, is a very specific, and is very specific for specific drugs. It's already been developed by the Keshe Foundation. It's in our arsenal, of materials. But we are not in the game to battle (with drug) cartels. In time, man will move away from this. Speaking of battles, I already have one, for 10 years with the smallest one in the world Belgium). (3:10).

From what is going to come from the ?? Gas production with the government, we started seeing the demise of the nations, and people who, what you call, blocked and created mayhem for the Keshe Foundation. Because their hand opens up by themselves, we don't need to do anything. It's the same, we don't need these kind of things. We just carry on teaching and developing and it come by itself.

Any other questions?

Q: .. Regarding the CO₂ gas in the farm situation. Can he attach one tube splitting the gas from the unit, into 4 ways, then the CO₂ gas can be distributed more evenly around the farm. Would that work?

K- Yes, you can pipe it out. Randomly, sooner or later it will hit somewhere in the pipe, at the end, or in the beginning.

We saw that in China. In China, where we did the test. .. If I remember correctly. (3:12). We had this thing here that were growing corn. Then if I remember correctly, we had the strips, one, two strips here, and then we had two or three strips somewhere else nearby, where they placed our ?? Gans tank somewhere in the middle.

These people had to go through this maize, it was actually maize corn, because they were growing there. Watering the section, which was for us, they were testing. What was interesting, okay, we got the increase in the rice and everything else. But was interesting. The corn along here were growing different than the rest of the fields, because the Gans tank was here. So the tank itself and then going in and out, distributed fields, which the corn here. Because I went there, I checked, I wanted to see and I knew exactly what I thought it would do. So, you have the radius of the field interaction.

So, in your farm, if you have a farm like this, and you place a gas unit in the middle, and pipe it. It's constantly at the bottom level. As it rises up, it goes down.

In the, I think was yesterday or was in American teaching, where we had the Romanians talking about the dome they're building. I explained to them, you build the dome, but now you have on the base of it, to make a cover that the dome fields go everywhere, not just there. If you're making a dome for agriculture, it's not just making a dome. (3:14).

Excuse me, this is the land, the roots are here, the soul of the plants is here. You got to reach the soul. So, you dig in, you place some of your dome material below the level of the vegetation, that the fields actually reach the soul to enlighten. Here (without giving fields to the roots) you create 20% increase. Here (dig down to reach roots) we increase 200%, because you satisfy the soul, to see the beauty.

So, a lot of little things which Knowledge Seekers don't understand, don't want to understand.

When you water farm with the Gans's, the water will go, the energy will stay very, very thin on this level (the surface) . When you use gases, you still have to place below level, plus what you would radiate across the land. Without you, your gas might be that much, and it goes up and enriches there. So your plant will grow totally different with a new gas technology, then when you had it (mixed) with the water.

But you have to tell us how you want. Because these containers (the Gas Systems) are sealed, if you open them, you damage the Unit. It's a different thing. You have to tell us what you want to grow, the way you want to grow, and then we tell you how to do a mixture, how to add it for what purpose.

A small change brings a lot of difference in agriculture. (3:16). Before we keep on watering it, and you get fed up, the plant ?? grows so much. This machine (Gas Unit) is there 24 hours, it (the plants) take off. But don't expect to get the same harvest from the ?? corner ?. You have to tell us what you're building, what you're doing, and we'll build a system for it.

This Gans unit, ?? with the gases, will give you .. a complete coverage. Cover it under the ?? soil, but you have to make these deep downs (below the soil), that you cover the root, and the soul of the plants. Then you have, which grows on the surface. Then you have the top, and this gradient creates a vortex of ?? corn.

The beauty of it is, we saw this in China, when the wind comes and the vegetation goes flat (blows the plants down), because of the gravitational magnetic field of the wind ?? you produce, they'll (the plants will straighten up) go back up again.

This, the following of the flow of the magnetic field, which ?? raises them. Because within them there's a flow of ?? (N fields). That allows them to stand up, to come back up. I said to a farmer, in the future, if you're planting trees, and you have a wind, and the winds blow and your trees (blows the trees over). The ones which are Gans, will they'll come back (up). (3:18).

You'll see a lot of changes even in the harvest. I watched this, these are the things I observe. Even when you have tomatoes you might get this tomatoes (growing), and you're happy they are straight. But it produces 10 small tomatoes, but this tomato (with) inclination, gives let's say 20 tomatoes, if it's in that angle. Now the Gans will decide this, now you're trying to keep it straight

The world of agriculture changes, but on the other hand, the way we are going, in a few years time, who will need the agriculture. When you can feed with the energy of the universe, what you need. When I said we don't take no energy, no food, no water with us into the space, now you understand how.

When you're in a bubble of the gas you take energy from it, what you need, and everybody is fed in balance. Because of this gas condition, it takes from the universe, and it gives what it doesn't need. It's a perfect transportation.

As I said once, maybe I can say it in a different way. There is a gas bubble which carries the strength of the Creator. Now who would like to get in. Who will have the privilege to get into it, that he can hold on. If he doesn't match, he doesn't exist.

I came in one, and I'll go back in the same. (3:20).

You can destine, position of your gases. That has the opportunity of the life, which carries, and the position and dimension where he wants to go. If you travel with Keshe Foundation systems, which you are doing in the Enhancement Unit, there no way we can lose you in the universe. We got you by the toes, by the strength of the string. We always bring you back.

Any other question?

Something very interesting. Some of you who've been in the Enhancement Unit, especially in the past two weeks, because it's getting to (be) a perfect system. When we come in and we ask you, can you finish, you say, no, we want to stay. We haven't finished yet. When they come out, they say everything is blurry. We know you're there. We hear the voice, but we don't see. Like you're telling us to go somewhere, or do something, but it's not a physical visual seeing a thing. Then I say, yes. Then you go in and say, (3:22). "can you can you finish your session?" (They say, "no, no, no, no, I'm still there." So I go out, wait another five or 10 minutes. I go back in again. (They say again), "no, no, no, I haven't finished yet." So, in your dimension of the soul, you still have control of the physicality, to hear, to convert the information. It's very interesting, how this things, is coming up in this space development and how we can transmute you.

Any other question?

Q: Stefania .. Does the CO2 has envelope? Can we call it a spaceship?

K- What?

Q: Does the CO2 has envelope? Can we call it a spaceship?

R: I don't know how to interpret that. I guess she means the CO₂ has a range to the fields, or has a certain bubble around it, sort of a bubble. (3:24). Can we call it a spaceship? Oh, it's wrong spelling, CO₂ Gas envelope, Can we call it a spaceship?

K- Since when? I don't know what it means by spaceship. Can you get in it? Yes.

Any other question?

Q: .. So, that would be the bubble, that you refer to when you say, that you can put a drop in the aquarium and it creates a fish or a man?

K- Yes, now you understand. You carry the soul of the fish in it. When you leave it in the water, it becomes the fish.

K- ... We carry on a little bit. We are waiting for the news, by 1:30, we should receive that news. (3:26). If you we don't receive, we have to do other things with it.

The process of the expansion of the knowledge from now on, comes in understanding the process of the work of the universe, and how universal systems work, and how we take dimension and direction.

In this process, in this understanding, in this change of condition. In the universal space system you have to watch, you have to be as part of it, to be protector of your own fields, and at the same time protect the others. It's not just, because I want to go, and I go because I want to. It's, am I allowed to? What would be the consequence of, if I'm not allowed to? Would the end of one, become the beginning of the other.

So, these processes when we start teaching you about the expansion of the systems, and the universal systems, is primarily to understand the totality of the structure, and how we need to understand the totality. Would a system be able to carry on working? (3:28). Would the system be able to interact with its environment, without taking from it, without forcing itself on it? This is what will come in the future for many people to understand this process, to be able to go through the .. transmutation.

This is how in the future space technology, we understand what fields are endangering us, or are we endangering them? It's not like you drive down the roadway, and I'm just happy where I'm going, it doesn't matter what happens with the others. Whether the speed I do, whether I take the left or right turn to pass as fast as I can. It's the way that you interact, and how you interact, and the way you interact, and how you allow the interaction to take shape. This is important for many, many new conditions of the space technology that we have to learn. (3:30).

The understanding of the process of transmutation is different, than understanding of the process of transferring. We have to understand the totality of this process. Are we doing both, or are we reading the right signs? How do we read these signs? How do we execute these mixtures of information? How do we end up with one system in respect to the other? How do we bring a mixture together, when we are carrying the soul of the matter

state, the soul of the plant, and the Soul of the Man, and mixture of man with mixture of different souls of matter state and other things?

In the upcoming systems we have to understand to be able to do. To be able to transmute and transfer at the same time. To be able to dig deeper in understanding of the totality. (3:32). In how everything is done, how everything is carried out. How conditions are created for each one.

A combined transmutation and transfer will become part of the future development technology. Or would it be like now, you get on the plane, we send you your luggage after you with the next flight. You go and we send you the flowers for your lover to New York on the next (flight), because we can't carry mixed, ... souls in our transportation. This is part of.

If you take this to the next step, what happens where we have a mixture of the Soul of the Man, and other creatures of the Universe? What happens when we carry a man from Earth, and a being from Planet Zeus, and somebody else from somewhere else? How to fit them in? How do we create a bubble that all can fit in, the way they do in the universe.

These are the teachings to come. This is what we as Knowledge Seekers will bring for, to understand most of it and all of it in a coming time. (3:34).

Q: Azar When you said you came with the bubble, and that you're going leave with the bubble. How?

K- I know. It's...

In a way, we come as a soul, and we'll leave as a soul. But the STM is created on this planet. Our soul was created in dimension of universe, that's the only difference.

Here when you create a child, then you create a soul. We come from the dimension where the soul is created without the physicality. Then we take shape in a position and time. We come in that bubble as a soul. (3:36).

This is what is happening now with the children of Mitra. They are born through that process, but they take the dimension of the physicality. When you put the children of Mitra in the transmutation system of the future, you will see it. Their physicality doesn't exist. They take shape of the Creator in the dimension of the fields of the universe.

Q: Mr. Keshe, when you want to leave, are you going to take your physicality with you, or you going leave it here?

K- It's irrelevant.

Q: I mean you said you said we shouldn't leave your physicality .. ?? as a garbage ?? .

K- Put it this way, when we go we take everything. We don't we don't leave anything behind. Has anybody seen anything of Mitra, or Moses, or Jesus? It's the same soul.

When you're a dentist, in your surgery you wear whites and you are a dentist. You take it out, you get in a car or a taxi you are a passenger. You go home, you put another clothes, you become a mother. You go to bed you put another clothes on, you become a wife. Has it changed the structure? In a way, the change of physicality for us doesn't change the soul, which carries it. (3:38).

When you're in the surgery you tell, your people I'm going home to cook tonight for my husband. Does the husband know what you're cooking? But you already decided it in the surgery, that he's going to have what. Because you already planned it. Because you knew that was what he's going get. So, it's the same. We come a thousand years before, but we know what we were going to cook in thousand years, and we say, this is what's going to happen. It's that the way, the promise of Methi has come.

Q: But Mr. Keshe, with your teaching, what I learned. When you talk about when you go to, you are a dentist, and you're a mother, and you are a wife, this and that. In you're teaching, I'm none of that, because .. at that moment I just played a role. I don't own it. Because before .. you think you're all of it. But then you're not that, because when you look at the soul, it's multi-dimensional, it's universal. So, that's just something that we carry, while I'm working with physicality. But in reality it just doesn't have a meaning for me. It's just a moment I'm a dentist, and then the next thing you know I'm a mother, and then the wife, and working in so and so. But you don't you have any attachment to that. You know, when you become a doctor, in some ways, people hold their head in a certain way, and say, "I'm a doctor," and they are proud, I mean. ..

K- Put it this way. I just change your words, and add other words in it. Momentarily I am Moses, momentarily I'll be Jesus, does it make any difference? (3:40). It's the soul of the Creator. So, it doesn't matter what put, you put on it. Then momentarily you promised, the guy will come, and that will be the time of the "milk and honey." Because we know when that time of milk and honey is. It's when the milk is water, and the honey is the texture. One is the STP and one is the STM, which gives you the pleasure and the taste. So, it is irrelevant.

The beauty of it is, when you're faced with the time of milk and honey, it's so good that you still prefer to be the slave to physicality. That's all we are doing. The time of milk and honey has come, but it's so sweet, that none of you can believe it. It's your time, and your time of existence. This is what many of the Knowledge Seekers will come to understand. In understanding the knowledge, is understanding knowledge of the Creation, is that promised day, no more no less. But you're still waiting for, God knows, this will come on a white horse (Kalki), and the rest of it. (3:42).

There is a very big understanding, and now it's a noose around the neck of a couple of governments, and clergy, and the religious people are faced with it, in respect to the Keshe Foundation. We know exactly where these governments sit. Three states in the world, actually four are totally, what I call, mixed up, on what to do with the Keshe Foundation. How to let the knowledge go (come out), or stick to the dogmas that they created for themselves.

Because, if they accept the Keshe technology, as a technology it's to their benefit. But if they accept the Keshe technology, and the technology of both, what I call, ethics, and what they call, theology and science, it's their demise. It's the end of it. Isn't this the problem we have now in Iran with the Keshe Foundation. The president of Ayatollah Khomeini sitting in their offices for weeks and months, understood.

If we accept, we have to stop. Then what would it bring back for them? But wouldn't it be to the benefit of the nation, (3:44). or humanity, to understand what's happening and allow the next step of the knowledge to come in? Or do we want to carry on with what we've done, with the stealing and everything else, because when it's done, it's there.

There's a very big problem in this process for a few states at the moment in respect to the Keshe Foundation. When it opens up, they can't stop, they cannot stop it. That when, has come. The time has arrived. Now, the biggest problem they have is, how long can we contain it, to keep what we have, because once the "cat gets out of the bag" we have nothing.

As somebody close to the Iranian structure told me, the biggest fear of the Iranian clergy is not anymore Israel, it's Keshe Foundation. But on the other hand, it's what they've been waiting for, they don't know how to handle it. They think they can handle Israel with a nuclear bomb, how are you going handle the soul, which is not there in physicality. That's the biggest problem.

As I said, once one of these religions collapses the rest will follow. (3:46). So, in the background they are all working together trying not to get out, keep the cat in the bag as much as you can.

If you look at the teaching of past 3 or 4 weeks. You're all got so baffled and bamboozled as we say, with the Gases, Gans's, free energy, the lights comes on, goes out. Today you found out, the actual structure is a new type of transportation.

How many of these can you produce in your house, and you put all the souls of your family in it, and escape the states you cannot live with. But, what happens when you appear in another state? All the ?? tools, in your pocket you carry, worth nothing. When everybody can create gold, your gold has no value anymore, if you take from one to another.

Or you just do what the Jewish people did during the Second World War, or do we need a revolution. Eat your gold, and diamond and jewelry, or stick it to a blanket of children and get them through borders as toys. Did the wealth mean anything? Then you find out that you can't carry, and you still bury it. My great, great grandmother used to tell me, (3:48). how they came out of Russia. When the Russian Revolution came in, they were Jews from Iran. So, they were given a choice, to go to Poland, or go back to Iran?

My great grandfather said, we are Iranian origin. He said, we are Iranian Jews. They chose to come back through the port from Georgia, through .. the Caspian Sea, to another port where the Iranian government accepted the Jews back to Iran. Being a wealthy family, they buried some of the wealth (in Russia, to come) back (after) a time when the revolution finishes, they go back (and get it). My cousins went back in 1990s to find where it was buried, or whatever. But the other members of the family decided that they had wealth in stones, diamonds and jewelry, they swallow it, because in the clothing they were checking everything.

The Russians became aware of this trick, so they kept the Jews crossing through Caspian Sea to Iran, for days in the camps with one toilet. So, what they did, whatever you ate after a few days comes out, and they collected all the jewels. It didn't work anymore, because they already ate it the day before. So they lost. So we can't even carry the wealth with us.

This is the same process, the same understanding. This jewel of the knowledge, cannot be taken from no one. It's a jewel on its own and it stands on its own, it has value to ?? whoever holds it. It is not a wealth that you can carry with you. (3:50). It's a wealth that you have attained, you have to attain it, you have to possess it, understand it, and it's attaches to your soul. And that's all the big difference.

Once you understand it, would you accept a religion? It's the jewel of the knowledge of the Creation, not the jewel of the man, that they can hold on to, and ?? loose. More and more Knowledge Seekers become aware, understand, and the more technologies we put out ?? process with them. As I said, you touch, you burn.

Understanding the knowledge of Creation is dependent on one's openness to understand the science itself, science of Creation. Then theology doesn't exist in it and physicality doesn't exist in it. Because once you understand, you understand the totality, and do anything you like. This is this is what I always said, it's the time of Mitra. Where you can live in both dimensions, now you don't have the restriction of one or the other. One doesn't become a ghost of the other one, as we say. (3:52). How much of a ghost, and how many ghosts do you want to carry?

Is the process of change from the soul level to physicality any different, then the processes you know? One of the points that a lot of you will have to face, you'll come to understand very soon, which is sitting in the teaching. Is the process of what we call, transmutation. The process or what we call, conversion.

Transmutation Process

In the process of the physicality, we take the STM in the center of the body of the man. We say, that the soul is in a higher order, as it goes out reduces in strength, in interaction with the environment, creates condition of physicality of the man.

Now, the process is reversed. Now you have the soul and physicality with it connected, sits in the center (of the Soul). (3:54). Where you're actually still have remnants of the soul connected to (from center of head to new boundary). It's an inside out situation. How, if the Soul of the Man, is strong enough to in reduction and interaction with the fields of the environment, can ?? leave the physicality. How does now, what we call, soul reduces enough to have interaction with the STM, inside the man.

Here we lose strength that way, here we lose strength this way. In this direction we contain the man. In this direction, because of his structure, the man contains the soul. When the man learns this process of reduction, man will conquer transmutation in the Universe.

It goes back to original teachings, which we always said. The stronger gives to the smaller, to become (equal with itself). If you understand this process. If I can, in a way draw it for you in another way. (3:36). How can the stronger feed the weaker, and the weaker, become equal to the stronger. The reverse condition of this and how to do it is the key to transmutation and transportation.

Here you transport the man, here (extend STM over P) you transmute the man, but the field energy in connection is the same.

As I said a few minutes ago, this process I have taught, in the teaching in Barletta and Trane. Somebody says, 34th Health teaching. So, somebody has been quick trying to find out. She says, it's in the 34th Health teaching. This teaching is open to medical people only. But, the teaching is in the public teachings as well. It wasn't a shared privilege, but in the other one (?? private teaching it) was explained fully in detail.

So, you have, when you ask, what do we have to do? Okay, how we can transmute, how we can transfer from one to another? How we understand this? If you go back to the ?? private teachings, some time ago. I have always told you about, if you hold your hand, and try to create a light within the hand. That light is the STP at the strength ??. Then you understand how things are, and how the situations are. How he can go between one to the other.

But, in that process is not just the light, it's the emotion of the existence, the emotion of the, what we call, the totality of everything. How do we understand this? How do we come to the point, to be able to transmute between one and the other. (4:00). We create that light within the hand of the man, within the dimension of physicality. It's like the flight unit, where the STM is there.

Do you open your hand suddenly to another soul of the physicality, to reach the Soul of the Man, or do you embedded to encage it? What is the next step? What is the totality of understanding? What is to be done? How do we expand and extend the knowledge? It's the process, which we need to understand. It's the process, which we have to understand, in which way we can play with it.

Can we transmute between one and the other, now we understand it. (4:02). If we allow the STP to be embedded within the Soul of the Man, would it then take a new shape in the new D and position? All of this comes from understanding of the teachings, and it's all within the teachings. There's nothing extra, there is nothing hidden.

It's just now we explain more, in more detail. What exactly has been, and is, and is going to be done. What we taught in the past, you couldn't do it in your hand. Now we do within the machine, till you learn to do it ??in your hand. In a way, by extension of the soul, to show that you didn't die, because your soul expanded, because you still got a part of it within your physical dimension. But you could go and do everything and come back.

Or do you want to taste it, you want to smell it, you want to touch it in dimension of physicality? We sit in Tehran, and he wants to see how Niagara Falls is. Do you need to get a plane to go there, or you send your soul where it is, to feel it, to taste it, and enjoy it while you're in Tehran? Or do you actually want to be there to feel, to be on the boat, to go up the river and see how far you can push the boat to the to the wall of the falls. (4:04). And get the sensation of it.

Or you just want to see them in pictures. Now you have that choice. To stay home and go with the soul, or go with the soul and come and take the physicality with it. This is the option you have. We have shown it in the system. It's not a dream anymore.

Over 100 of you have tasted it and tested it. The minute you come out of the machine, where the soul takes its position within the center of the brain of the Man, you are back in ?? human, and many of you say you feel the weight, somebody comes back, you feel your back physically. How many of you have tasted it now? So it's correct. Because it's tested by many of you randomly, from different parts of the world. All of you who come out of the experience, you always say, especially when we had the chairs, people say now we feel the weight, that bubble is gone. That bubble is your soul.

Now we'll put this bubble in other bubbles, but many bubbles to travel the same position. You all want to go to New York. Going to New York will be an easy time, because you can do it now with your soul. You want to go to another destination in the universe, (we get you) in that bubble, that you all end up in the same position, because you don't know the destination. You heard about it's such a beautiful thing, in such a planetary system, in such a galaxy, in one of the universes, and you want to go and see it.

The beauty of the new knowledge and what we'll bring, is that man (4:06). will be so busy sightseeing and going around the universe, that he doesn't have time to create wealth, to stick yourself to physicality, and be attached to this planet. Tourism is the best thing universe has ever created for the souls who can elevate themselves to that level. Then you understand and you can see. Then it becomes easy to work with, to understand, to enjoy, and sit and be part of it.

Up to now when we taught, 8 year ago, 10 years ago, 12 years ago, it was just a talk. Now we have a system. It's ?? not a system, because over 100 of you have been through

it. A lot of you are coming to Linz in the next step. If you understand what commotion this will create, when we show we can put you in one chair, and take you out the other chair, and scientifically explain it. And show the elevation of the soul, expansion of the soul. Then, can you deny it? Then (what) would be (the) position for clergy ? (4:08).
(Long silence .. is communication to the Soul ..)

If you look at it and the systems are all set, in next few weeks when we can complete this process, how many of you, would you be able to accept anything? Would you then be able to know more. Accept, (4:10). or would they accept their position and the dimension? What would be the answer from those who always?

What would be the outcome for us and public, once we show this?
What is the outcome of our own, with ourselves? What can we do? (4:12).
How would we handle it?
In what sense we will be able to elevate our souls to create that transmutation?
Would our soul be able to, in a way our physicality to accept this?

Would we not become shocked ourselves, if we end up in China and we look like Chinese, or we become a black man in Africa?
What will be the consequence? (4:14).
What can we do for us not to be shocked from it?
Would we be in a position to accept the changes with us, transmutation with ourselves, before we can do?

What will be the next step for humanity?
Would our soul be at the strength, that allows our physicality to go through transmutation if we see the ?? right for it, to allow that to happen? (4:16).

Then the situation comes to all of us to be able to understand, what is the next step.
What is the consequences of this evolution, this knowledge to the man?
What would bring us?

What will cause, where you have no borders, you become all citizens of One Nation, because you decide where do you want to be, how do you want to be, and where do you want to go and how do you want to go. (4:18).

Would the humanity go to the next step?
Would us be able to accept this new condition?
Would the society accept this change?
Would the people who make governments, allow this to happen?
How far can we do this? How far can we go with this?
How much can we handle with this?
Would our society, is our society ready to accept the work of the system sitting in Linz? (4:20). How can we go to the extent, to be able to do this work, this extension of the knowledge and technology?

The Pandora Box of the knowledge with other technologies, sciences we open slowly, slowly as we digest it.

But what happens with this new technology, the way it has come?

Social structure comes into it and there's a lot of things which come in.

Would our .. leaders ?? of government? Would allow the change? Would allow this to happen? Because they'll lose everything they worked for. Or they have to mutate, to a new ways, to explain to their people how this can be done.

This new technology, this simple system, we put in Linz, that many of you have gone through, is the beginning of a massive change for us.

We have shown the expansion of the energy within us, where we can go, what we can do, how it changes us physically. The expansion and extension is massive, when you can go through the expression of the inner energy of you, and many of the diseases, and pains, and sufferings you had, through the expansion of energies processes itself. (4:22).

Extension of the life of man. It's not 60 anymore, it's 100, 200, 1000. How do we structure our social securities? How do we structure our life pattern?

Implication of it is not just a simple flight, implications of it come. This is what I've said, you appear in one place and the other, but what happens to the next step.

Social structure is what will be needed for that One Nation, One Planet, One Race. Can the people in Africa again having access to such a simple system, live the life they live there. How many will come into New York, London and god knows, Western Europe or in other countries, to just have the benefit of a light on the street, a pavement, a tarmac, a doctor.

This new technology will bring us to adjust a balance state, that we do not need to sell, we share equal. The implication of a very simple system you went into in Linz, and you saw the uncle, or you went to the Moon, is much deeper than what you can think.

But we had to show it in a mass numbers, large numbers, 100. A number of people on Rick's teaching the other day. (4:24). So, you have to understand what is the next step for elevation of the STM, for understanding of the new technology, and in a way a new social structure, which we have to accept.

Do we sit and watch?

Do we take and teach our leaders, it's not anymore, what do you call it, the gas supply. It's not there anymore food on the table.

If you remember in the teaching some time ago, I explained that how many people from Gambia, and Ghana and Kenya will live in the jungles, (4:26). somebody take one of these units in the middle of jungles and they say, you can all go to New York, will take the trip? What is the control of the West on it, what it the control of the other nations on it?

How many of you will actually take your flight and go back to live in Africa with nothing, and for a long term?

Would the mankind be ready for this change? Because it's here now. We have shown the condition of the bubble.

One of you asked how can you create a vacuum. The way you blow up a balloon, we can expand these gas units, gas bubbles, to the size to fit every soul on this planet. So, who wants to live in thousands from jungles of Brazil, into the central of London?

You think you are strong enough like the Israelis, which they found a tribe of Jews in Africa and they moved the whole nation, the whole village, or town into Israel. (4:28). The society accepted them because, they are the Jews. They have their problems.

But can our society accept these changes? Can we do what they did with the Mayans, suddenly they emptied the cities to go somewhere? Where? The question comes even Mayans. (The people in Brazil.) We find no sign of civilization, what happened to them suddenly?

Did they reached this point of maturity, or were they invited by those who understood, for them to move out, but in dimension of UFOs, whatever you want to call it? Would the human race take that step, to understand what is to come.

Now you see the dilemma. Now you understand the position (4:30). which the new technology has brought us. When we found the technology with the cars, we made the roads, we paved them, we put traffic lights, we put lines in the middle of the roads, and we creates new conditions, that we all understood, that we start following. Gradually internationally we accepted, this is a red light, that's a green light, this is where we go, that's where we don't go.

When you travel from one country to another the rules are the same, because we agreed internationally. Now how do we accept the rules, the universal? We don't eat you. We don't kill you. Because this is the rule of the universe. Would we be able to contain all the man, not to kill in the space. Or do we make it as part of ingrained physical life for that?

These are all the processes, that human race has to answer to prepare, in a very rapid time, in the next few weeks, and months, and years, as the number of these, what we call, units are spread around the world. Even if we ship one person from US to here, in what we call, Vienna, or in Linz, (4:32). and the authorities sees that transportation has changed within a second, Americans are sitting, and the Austrian Ambassador is sitting with a guy in a system, and he is here the next second. They say, he is here. You can see the evolution, you can see the change.

What would the governments do? Can they stop the development of the technology of the man, which I don't think so? Then it becomes into, what I call, the cycle of life. This is what comes the change.

I explained to you, when we showed the Blueprint in past two or three weeks. You always thought it was just the gases. No, it's the evolution of transmutation, transportation, energy and everything else.

If I can put you in that bubble, in that water, and in that water, I put all the things you need for energy. And put you in the bubble, and (then) take you out of the bubble (somewhere else). Exactly what happened with the orange and the water (Orange and the Cup), and you're fed.

Do you need the expansion, and extra, whatever. Now they charge you for tomatoes, and rice, or whatever. You can't afford (to buy the food). Or you have the energy (from the systems.). (Then it) doesn't matter what price they put on the tomato, I'm not hungry to eat the tomato. Make it a \$100 a kilo, and make it zero. I have no need for it. Do I need to get a lamb when I am not hungry, when the energy I needed in my body is compensated for.

The changes are huge. The expansion of it is huge. What about if we add into these energy as a bubbles, the way you do with the (4:34). .. (Gans) gas waters in the swimming pools, and when you swim in the pool you get all the energies you need. You just go for one minute swim, from one length to another, this is good for .. the energy of today.

This is not a theory. Alekz has done it in Nigeria, when we put that pool out. We tested it, and we know what are the capabilities of this technology. In fact, if you literally remember this, what we call, swimming pool condition, which we created in Nigeria with embedding Gans's, or whatever. Now we can exchange it with, what we call, bubbles. Wouldn't this will create a new condition for all of us?

Now it's a reality, but in a much faster way, in a much, much controlled way. What will be the next for our people who use the food, and prices, for control? What happen to the three families, which are controlling the food of nations? All the grains we use are controlled by them.

We all remember this picture. We've all seen this pool in Nigeria. It's not a theory. It's a working system, where we could heal (4:36). the wounds of the hunger of the man, with a food for man.

Then it brings us to a new point, a new dimension, a new understanding, that are we structuring a new society with this new technology?
Have we very silently brought a new lifestyle and everything else?

It is not going to be hidden, in a way, much longer with what comes out with energy crisis. Technology which can fulfill it, will be known by everyone. It's exactly like the Blueprint, (4:38). when we gave the Keys to all the government's in the USB stick. When we enter negotiations and the gas comes to be known. If it works for the gas, it works for transportation, it works for the food, and the rest of it.

Then you understand why we set up the Universal Council, that the soul of those who serve should be there to serve humanity, not by elections. Because you don't carry any soul, when it comes to that (the elections ??). You understand the Soul of the Man and the connection to the bubble and the Soul of the Man of the same man.

The whole process is, in a way, upon us, but by choice. We chose to become Knowledge Seekers, and we chose to understand the technology more. Many of us are taking that step. This is one of the reasons I keep on saying, please try to get to Linz, that we can embed majority souls of people into it.

How far, how deep we'll go? We don't know. (4:40). But sooner or later, the same as when we gave the Key, as I said, now the knowledge of the energy what man needs, will become. Remember, those of you who have been on the foundation a long time ago, when we gave the Key and we put. How many of you went to your governments, this is what is there. How come they can have it, and we can't have it? And we started building the pressures. And we saw the example, as I said before, with the Italians going to the Italian Parliament and the rest of it.

How many Germans are going to sit and watch the Chinese walking with the energy technology, when they have to cut on heating and everything else, this winter? We are in the right place, right time, and the right way, to break the technology through. But on the terms and conditions of the peace.

Once we deliver the gases in a mass order, and there is no need for a huge power station to support. Do we need the nuclear power stations? Do we need to burn the coal, fire stations to create so much mayhem? Do we need to carry on polluting? The race will be that, everybody has to have this because it is for the protection of the planet, and governments saving money. The only people will cry with this new technology, especially with the energy, will be the Saudis. There'll be less children and less woman to abuse in the palaces. (4:42).

The change with this simple gas unit is huge. But if you understand it, and you can implement it, and you can, in a way, bring it to the position, that it's the same for everyone.

Are there any questions?

Q: Salomea .. A question related to Project HARP, for climate change, control. If you know something about this, and how we can have a contra Project of HARP with the T ?

K- No, let me explain to you. I know nothing about HARP and I heard a lot of things about it. There's a lot of other things about HARP. In fact, is nothing to do with our technology. We are not here to fight other things, other people that. We are here to set the course. Nothing to do with us what they've done. The Hiroshima bomb, the atomic bomb, the hydrogen bomb, whatever, whatever, the pollution of the air with the CO2, and the rest of it.

If we are going to do, what other people do. We're going to do with them. It's going to take a lot of our time. We set the course, we set the technology. (4:44). It's for man if he wants to carry with the past, or changes to the new, and we start a new structure. So, this is irrelevant to our work.

Any other question?

The energy used to fight, or to overcome, is not needed. By introducing new technologies you create that new condition.

Any other question?

Q: .. Where can I learn more about that (swimming) pool?

K- The pool is part of the Keshe Foundation Nigeria. It was built by Knowledge Seekers.

R: Okay, so they should be able to contact through KF Nigeria ? ... (4:46).

K- But this is obsolete now compared to what is here. This was the first proof of the T by Alekz when he went to Nigeria. It's the dinosaur age technology compared to what is now available. But it had to be done, to bring that proof out.

Q: Jalal. .. You know, what just you said, about the problems and trying to involve with all what humanity is doing, as bombs, and everything. Really, it takes a lot of energy, and this is exactly, we should go away from it. We should concentrate on the knowledge and bring it to the level, which is really needed. This goes with all aspects of our life.

Wherever we go, where there are problems with everything. You know, it's really amazing if we just think about it. Leave everything what they are doing, they have to do what they are doing, and concentrate with what you are doing, (4:48). because this will last forever. They and one time, they will come to it. They have no choice, because they will see the beauty of it, they will be touched.

K- We don't have a .. problem with this. It's what I call, understanding it, which will bring us the change, and if they understand, to bring the change.

Q: Do you think they will not see the beauty of it? As you say, if someone travel, go from one place to one place in a second, what they will say?

K- What can they do? The knowledge is here.

Q: So, I think. I know 100% Mr. Keshe that you know, it's already planned since, as you say, since thousands of years. So, let them kick and do what they do.

K- The beauty of the process is, that we create a condition, and they will comply with it. (4:50). We don't force the condition, for them to comply. That's a big difference. When they do it themselves, is different than when we force them to do it. That's how the condition has been. The introduction of the Gans unit and the introduction of the Enhancement Unit. These are all creating the condition, that forces them to accept the condition. That's the whole thing we can do. No more, no less.

R: And for those who persist in being trolls for the technology and being a nuisance, there's the two magic words you told me years ago, that solved a lot of the anguish and anxiety, I had about dealing with trolls. You said, Ignore them. And I said to myself, how can I ignore them, they're there all the time, I'm always dealing with them and so on. But those words were perfect, because by simply ignoring them, it's one of the hardest things to do when you're attached to dealing with such entities, and always trying to rationalize with them, or set them straight, and, you know, change their ways, or whatever. Just ignore them. And that works so well and made my life much simpler. I thank you for that Mr. Keshe.

K- It's part of the life we need to have, (4:52). part of the process we have to accept and to live with. Not much we can do, not much we can do.

It comes from detachment. It comes from what we have agreed to do. To what extent we are prepared to take steps to bring the change? It's primarily the condition we have created. What we see, what we have, what we think.

Any other questions?

Q: .. I would resume (summarize) the whole thing with an old English saying, let them boil in their own soup.

K- Yes. (4:54). There is no much we can do.

Q: No, they have to realize what they're up to.

K- Yeah. We have to see how we can do this and how the situation will change with the present position.

Q: We had the teachings about two years ago, we already have the Gans's to mix it with the paint to paint inside our homes and change the whole environment. This is changing the whole environment of the Earth, and humanity. Thank you very much.

K- The structure sits in how we expand this knowledge. In a way, if you understand, it took 10 years to teach the Gans's, and it took two or three years to teach the soul and understanding of the soul. It took a few months to bring it to the position of the new Enhancement Unit, transportation, and Gans's of the gas. Now, in a way it brings us a ?? snooker position for every individual, and very soon for our governments.

That they go to a position, that the nationals need to be fed, (4:56). or we allow the hunger to take over, we allow the shortage of gases, and fuels, and the rest of it. The

beauty of this is, it's not one person anymore, knows the basic, and the others. It's millions of people know the basic and the knowledge.

As I was told before, the spread of this technology has been faster than any religion in the history of man. It is with the science and the technology, which we have, and we need, and we can do and take care of it. There's nothing else we can do with it. We, very patiently over the years, taught, and taught, and taught. Over years, we brought everything step by step in. It's been a torturous time. But it has served the purpose, as we call it. It took a long time. It took longer than we expected, but in a way, we have brought in the knowledge in a measured way to be in that position. (4:58). So, in a calculated way we have gone forward.

Any other question?

Q: .. Could tell us the news you're expecting? Which you probably won't tell us until you get the news.

K- We're trying to hold it back for some weeks, and we're still waiting. They're trying to sort the matters out in the background. The Keshe Foundation has been defrauded with a massive amount, and they are trying to tell us it's not. We said, we go public with the name of the company, and the people who are involved in it. They're trying to tell us, that they're trying to sort it out.

It goes back to, many of you can remember a few weeks ago we asked you to support the Keshe Foundation for the move, for what we are working now. We've been told to hold back, and it'll be done. So, we are giving them a few more hours. As we said, we're going to go public today (5:00). with the frauds, which has taken place, or this is not a fraud, it's just taking time, it's taking too long.

We will address this, even if it means we put on, what we call, I call it a, Blueprint of Fraud. That how we were defrauded. We still believe in these people, that they will comply with what has been signed in agreement by the Keshe Foundation and them. If that don't take place we'll come to you, that you will know and collectively we have to take action against the structure and organization, two different governments in different states, and different bank system, which allows this kind of thing to take place.

It is not for us, we still, they've been telling us for some weeks and today is the deadline. We told the management of the Keshe Foundation, is not holding back anymore. It's just trust that, we will give them a few more hours, and then we'll go out with it.

Because that ?? the changes, and the future of the Keshe Foundation is there. Investment done by the Keshe Foundation in a very large sum, and with the help of many Knowledge Seekers to get to this point.

It has been going on for some weeks and months in different shapes and forms, and today was the deadline, because they told us that there is nothing to hold it back. It will be

done. But we hold back a few more hours. The management of the Keshe Foundation wants to hold back. Maybe they'll complete it as they say, today.

If not, we'll come back to you and we explain, we'll release all the documents. It's the assets of the Foundation. We'll see how will take shape. (5:02). I was told I have to release all the documents and things today, but we're just trying to be a little bit patient, till, they say to comply with what they said they've done, and it's been done. We trust them to be correct in their conduct, but it's a drawing line. We have drawn the line today. The board of management of the Keshe Foundation has been patient enough. You might call it, and we give all the details with the name of the people, of the companies, and everything else involved in it. But at the moment we prefer to stay for a few more hours silent, till we see what happens.

Because this will change the future of the Keshe Foundation internationally.

Q: .. Mr. Keshe, I have a small memory of a teaching where you said, that when we digest food, that food through deuterium is converted to feed the soul of each cell of the body, according to its need. Forgive me if I misunderstood, but could you expand a little on this knowledge?

K- It's the energy. You see, when you're a hydrogen (H) you have a different requirement to exist. If you are a Tritium, you have a different conditions to exist. When you are a Deuterium, you're a balance condition, fundamentally as a matter. But, all the Deuterium's are not the same. Deuterium itself has isotopes, (5:04). of energy package, not in the essence to be one.

This balance of deuterium, and interaction with hydrogen, or tritium in different cells, allows the creation of the radiation, or feeding. Deuterium is intermediary balance condition plasma. But of a different order of strength.

As we spoke a few weeks ago about the isotopes of the plasma, it's a strength difference. But you have a basic strength of, what we call, M and G. Any deviation, when one says, constant, it creates like the isotopes we are used to in the matter state.

It's the whole principle of the working of the glands, thyroid glands and the rest works on it. Thalamus and thymus work on this. They're more saturated by H3 than hydrogen. They deposit that energy into deuterium. That deuterium brings the change in energy level in conversion into, if you're short of potassium or calcium or whatever. Then it converts into plasma energy, that becomes a muscle tissue, whatever you need. (5:06).

Deuterium is, as long as it stays, especially within the lymph structure as a plasma energy, is not used. It's balanced. That's why we have lymph's everywhere. But, once it comes into the position of lower energy, it feeds. Once it comes to a higher energy, it absorbs, but it still keeps the structure of the hydrogen, or what we call singularity of the center, what we call, nucleus, and what I call, the ?? collector which is the electron.

You have to look at the knowledge of the plasma and understand the conversion between the plasma, and the matter, or Gans state. Then you understand more, in how and what, and the way things are done in the process of creation. Most of the creation works in this way. You don't have huge nuclear, what you call it, materials. You always have deviation with absorption of one, or reduction in the other, and a balance point, which deuterium create that balance. It got one electron, one proton. And hydrogen, what we call, proton. As in the deuterium, as neutron plus proton. As one center is nucleus.

Where in the hydrogen you only have a proton and it's all. In the tritium you have a neutron, which is trying to convert itself. The ultimate goal of, literally what you call, (5:08). deuterium, is to create that balance position between the two extremes. One trying to absorb, and one trying to give.

It's the same right across the universe, even when it changes to carbon 14, we see the same behavior. Carbon 14 in the space doesn't travel just to go somewhere. There's an isotope of carbon 14 in one level of energy different, than the other one, that allows it to be transmuted. It's part of the transportation system in the future, deep space transmutation. You can use that kind of understanding. You tune into it, it's literally your track, it's not your truck, it's your track. It's the way, you know to go from A to B, that's the track you need to go, if you're going to such a place. We travel on one of the isotopes of .. the deuterium, and Carbon 14. But in fundamentally, it's a deuterium in combination of the diamond structure field radiation, which is unknown knowledge to man.

Any other question?

Q: .. If we can touch or remember the Creator in us, then we could choose whatever form followed later on, up to the moment of today, in this present physical form here on Earth. Could you shed more light on this? (5:10).

K- Can you repeat it?

Q: If we can touch or remember the Creator in us, then we could choose whatever form followed later on up to the moment of today in this present physical form here on Earth. Could you shed more light on this?

K- In a way, when you do that, if you achieve that, you will become at the strength of the Soul of the Creator, which then, through it is connected to all created. So, you have access to all the knowledge. It's very simple.

Through that strength of the Soul, of the strength of the Creator, you actually get access to whole knowledge of whatever is created. Because whatever is created is out of His division, of his origin, and M fields. Fields in the Universe always are connected to their source. It's the simplicity of it.

Any other question?

Q: .. The souls don't hope, it prepares conditions for things to happen. (5:12). That's what I understood you said, Mr. Keshe?

K- In so many ways you are not far off. We create the condition of the knowledge, that, that knowledge creates the condition for peace, and then it forces the man to abide by it.

If there is no other question we wrap things up for today.

K- Thank you very much. Thank you, indeed. Hopefully we learned a little bit more today. We'll gather more information in the coming time. More or less we are prepared for that final step towards world peace, towards the understanding of it.

The beauty of it is, as we asked you, please sign up, as much, as many as you can for the flight test. It's important because, I'll explain to you with more detail in the future. The more people from different nationalities and positions on this planet we can move, the less governments can restrict, it won't be just one. We need to do this in a very rapid way.

If you cannot travel (to Linz, you can) sponsor (someone). We have many people who want to do it, but financially cannot afford it. If you want to sponsor 5, 10 people to travel. We have many people around the world who want to take that step. (5:14).

It allows us to achieve what we are here set for. At the same time, what goes with other processes, the Gas units. More gas units we put across the, what we call, the less we have, we give opportunity to governance and ?? and we bring the change we are looking after.

In a way, it becomes, if you understand it, us as One Nation. What we bring as One Nation to this planet. We always said, we don't agree with the government's. Now we are there to govern the principle of the peace, and the knowledge and technology. How much you are prepared to see that change. How much you are prepared to see, to bring that change.

Up to now you always talked, now it's the time to actually take part in, and bring that change in. The more people we can transmute, the more people we can bring in a position and direction of the new knowledge, the faster we can change the situation, which is now here today, and many people suffer with it. As I said to one of the Knowledge Seekers, it's not the time to talk anymore. It's time to take steps and create the action to move, and if you can't do it, then you can create that for somebody else to do it. It's time to serve. We are doing everything we can, working around the clock to create this position, and the knowledge and technology. It's the time to move.

Thank you very much for today and we'll meet you in Linz, next time.

Proofing completed.
