

# **446th Knowledge Seekers Workshop; August 18, 2022**

(Quick Index 25 p, topic Index ; Transcription, Proofing done ; Key Phrases, Words)  
(Auto Transcription by Elias )

New offer of Combined Gas and Plasma Energy Units; You can loose STP; Knowledge to Man - gift of Mitra; Earth - unique way to love; Creator has a Creator;

## **Topic Index**

The organization to promote KF, invested millions - likely to follow through; Remember Gans is a Gas in Nano State; Body is collection of Gans's; Gas and energy conversion from Gans's - new units; Glands do transmutation of elements - uranium; Lymph passes near glands for conversion; Detailed process how you are transmuted; KF send 20 people to Moon and Mars - invited NASA; Travel to other galaxies by 2024 - 25; True space program travels on energies of Universe; Other life forms on Moon - missing Armstrong audio; Moon is base camp for UC; Open colony on Moon; Shape of man different on Moon; received coordinates of Apollo landing site; Inertia of body is called "Spirit"; Spirit only involved with physicality; Different Inertias create different elements H, O ; Blowfish bone structure is Star Formation ; UFO lights tourists to earth; 2023 fulfillment of promises of past - new cycle will start; End of religions - by increase in knowledge; Families not miss us when travel space - always stay connected; Creation is clusters of plasmas inside other plasmas - detailed discussion - Center point is Creator - I made Man in image of Myself; Organs are like planetary systems; Spirit is STP; STM not allowed to burst balloon of STP - take new shape; Cannot "go back to future" because the souls of the cells, of STP are spread amongst countless beings - cannot bring them all back together - impossible; New offer of Combined Gas and Plasma Energy Units - 10 kilowatts; 70 people loyal to KF; 100 Euros royalty per year for 20 years; Christ only had insight into plasma knowledge - not an understanding of it; Same soul in all prophets - same soul speaks to you today; UC will learn from Man; Collection of Gans's called "man and woman" has biggest effect - change life; Gas Units in farming; KS having problems with families accepting them; Elevation of Soul comes from fields of U; Man gifted knowledge of Creation - jump trillions of years of evolution to close to the center of Plasma Spiral; Races with UFO's only slightly more advanced than man; Love and falling in love - Where you give everything to lover - uniqueness of Earth - what attracted Mitra to bring Creator to Earth; How a weak STP encages strong STM - spreading out of dynamic fields like fisherman's net; Break into Soul through breathing and digestion; Why "falling in love" only last 3 to 5 years - have to renew; When people come back from Moon - we'll see elevation of STM; Plasma solution for autism - cannot speak because of American Lobby; KS who cheated KF - demanding rights; Jewish community didn't cheat each other - thought KS would do same - wrong; When you leave you take physicality with you; You can loose the STP; Memory of different existences remains intact; Other peoples experiences available to you; Saturn's structure perfect teaching example of how plasmas work; World crisis part of bigger plan - accept T out of fear of demise; Soul has to want to receive elevation; Ancestor who saw Christ gave exact description - according to soul of Mr. Keshe; Is descended from both Moses and

Mohammad; DNA carries STP; Using Gas bubble technology to save races whose planets going to be destroyed - moving the souls, not P; Race in space who rescue beings in trouble; Cu -59 Inertia - 49 is plasma fields; Plasma light is instantaneous - matter state light is different - ?? - Using plasma for addictions - not fight with drug cartels - or end of KS; More on addictions; Suicide not allowed - Soul fails to mature for independence; Like murder - keeping a soul from maturing; Divine punishment - using fear to control; Converting fields to stone; Even Creator has a Creator ; Creation cycle ends with us becoming part of it;

## **Quick Index**

First discusses about the company or organization that KF paid millions to do something for KF internationally. It looks like they will follow through with their agreement, but we are still waiting;

What does the introduction of the Gas Units have to do with the transmutation flight System? Remember, when we speak about the Gans, it means a Gas in a Nano State.

The body of the Man is made of Gans's, it's a collection of Gans's, (there is a conversion of Gans's going on in our bodies all the time. We have to understand the operation and structure of making of Gans's from the fields. Otherwise, we cannot produce Gans's. We have shown Gans's as gases and energy conversion, (through the systems we are building.)

This is the cornerstone of understanding the whole structure (of the knowledge). We do not need plutonium, uranium, or to carry different materials with us. Very simply, you just need one element. This is what is done in your Thalamus and your Thymus. Everything arrives as a lymph, and these two glands work in combination with each other, and they decide how this lymph, which is a mono-energetic, (will be transmuted to other things the body needs.)

The white clear transparent liquid, that you see on your skin when you cut yourself is from hydrogen. It also has the capability to become plutonium, uranium, and other materials, which are unknown to man. (The lymph enters the vicinity of the two glands, which are working together in a very specific way, and then it takes orientation. It can become a calcium, potassium, or whatever else is needed, even uranium in your body.)

## **How we Transmute You**

(In the process of transmutation we have to understand that it is the behavior energy, and not the matter state energy. In the Enhancement Unit (EU), we make (you) into one plasma. This is your soul. The structure of the ingredients within it, is your physicality, and the Soul of the Physicality (STP). The STP is that nucleus. The interaction of the totality creates the dimension of the gas, the dimension of the Gans, the dimension (D) of the Soul.)

We don't look at the proton, electron, or neutron, we look what effects they create, in the D of the Creation, as a field. So, now you understand how we will transmute you.

(The different processes of transmutation progressed from the original test flight, to the Mobile transmutation, and then the transmutation from one system to the other, which will start in September.) We open the true space T to the man.

Sometime from the beginning of the January of next year, we'll offer you 2 flight systems, that will land one on the Moon, and the other on Mars. I have invited the head of NASA's "2030 Mission to Mars" to join the Keshe Foundation, and bring the whole process into unison. The first person to be transmuted has already been chosen. He'll come from a continent other than Europe.

We will only do 20 people each, for both the Moon and Mars mission. We will take you from the Enhancement Center (EC) in Linz, and land you on a location on the Moon. We will transfer two people at the same time, so that we have evidence of how the persons will change. The other person will see it.

We allocate up to three days for this process. However, the landing and return process will only take a few seconds. (But the main process will be to see how you behave, and how your appearance has changed.) You will not look as a human on the platform of the Moon.

(After we get enough information and understanding from the 20 transmutations to the Moon), then we'll go to Mars. Mars is important for us, because the Moon has characteristics of the Earth, whereas Mars is an unknown energy pack, even though we know it.

Sometime in 2024 - 2025, we'll choose another Solar System in our galaxy, and from there on we'll go to other galaxies. This process is unstoppable. We cannot stop this process, because the knowledge is gathering, and the position has been created.

In the first 20 people to land on the Moon, we prefer there to be a couple, or people who know each other. The cost is 25,000 Euro for Moon and 50,000 for Mars. Don't forget the future relies on what we establish today.

The Moon and Mars process comes as a donation to the KF, as we'll be using different locations and research positions of the KF. (The offering for the Moon and Mars will be closed within the next few days). I know many of you would like to do this. After we receive the applications and donations we'll decide who goes, and which one comes first, second, third, and fourth.

As you know we always remember who the first man on the Moon was, Armstrong. But we don't usually remember much who was second, third, and the others. The 25,000 is set to take you to Moon. Don't forget, with the other space agencies you pay a quarter

million to \$1 million for just a few seconds in the upper atmosphere, and they use rockets.

(These tests will be important for us, because we want to see how our bone structure will change. And we want to see how the STP, STM, and the Soul of the Moon will create a new feature for us. We go in pairs, and maybe four's, to witness each other and see how we change). This operation of transportation and transmutation (T&T) to the Moon, will start early next year.

But we have to understand first, that those of you who come with us to the Moon, you will come back as a different person, because you will see the world of Creation through the transmutation. You will become mature to understanding of the soul of the Creator. You will come to understand, that you are different.

In a way, traveling the depths of the universe makes you become a new being, with a new understanding, and a new comprehension for totality of the knowledge of the Creation. (Many of you came to the Linz center and were touched by (discovering) how your soul was, you felt the change, and (learned) how your soul can travel. This is the reason why we came to the KF Spaceship Institute). In 2023, we'll become a true space program on the levels of the energies of the universe.

(We will sign a contract with you about the flight pattern, which means we will decide (?? where you will go). You might land on the Moon or Mars and decide that the life there is so peaceful and beautiful, that you do not want to come back. The decision is yours.

(Since the missing 2 minutes of audio from Armstrong's communication with Cape Canaveral during the Apollo mission to Moon, there has been a controversy about whether or not there are other creatures on the Moon. The claim is that Armstrong reported seeing other creatures on the Moon, that he encountered other life styles, and it was removed, because they did not want it to be heard by the public.)

(It doesn't matter whether he or not he encountered other life forms), we as the KS will see the true form of (all life forms). There is no corner in the universe, which is not inhabited. There is no corner in the universe where a kind of lifestyle doesn't exist.

(When people go to conquer Mt. Everest, they first go to a base camp, before they make the final ascent to the peak. Many people of the universe, who want to see the beauty of the Earth, use the Moon for this purpose. The Moon is their base camp to plan and position themselves before entering earth. Because the life on earth is so physical, everything is observed and can be seen. So the Moon has been used by visitors of the Universal Community, before they launch to earth. They come to see where Mitra was, and how Mitra felt (about the earth).

Soon these lights will increase more as we start going to the Moon. They'll come to see the children of Mitra, and the new generation (from) the daughter of Mitra, and life on

this planet. The mystery about the missing two minutes of Armstrong's voice will become clear to us.

But the most important thing for us will be, that it is the first time we travel through the dimension of the STM. Would we see the soul of the creatures of the universe, or would see the physicality of the men of the universe? This is not anymore what we thought, or assumed, or guessed, it's the reality. The first 20 people going to the Moon will bring us back (the experience). And they all will feel the same thing, that they are created from the structure of the interaction of the fields of the STM, the STP of the Man, and the Soul of the Moon.

The important thing for us when we bring you back is, how you will interact with the society here on earth. How will you have changed? How will your emotions and physicality have changed? If when you left earth you were riddled with cancer, how will the cancer have changed when you come back? If you were a scientist in the knowledge of the physiology, when you come back would you have the knowledge of physiology of the universe? Because now you've become a person, or a being of the Universal Community.

The first 20 people will be for us an enigma. (But our understanding have to come through the Soul of the structure of the Creation of the universe. I will be (filming ??). But to you, you will be on your own. ?? I'll be there to observe, to see, to understand how you as humans learn, how you bring the knowledge back, how much you become the true humans.

As of today KF has truly entered the Space Technology. We have tested the engines, we have tested the passengers, we have brought you to become the Mojhans, "the brother of love." And with it, we have brought the total understanding of the Creation.

I will close the offering for the Moon and Mars landing sessions within the next few days. It doesn't matter how much wealth you carry, we choose those who have sincerely come as souls to serve. You have to understand, this could be a one way ticket. Not that you will die, but that you will be born in the dimension of the Soul of the Creation in the universe. You might decide to come back in time, and visit. You might come back to us, and bring us the knowledge and the technology. You might come back and bring us the love of the Creator.

The Moon and the Mars transmission of flights, will be exactly like when the man went to the Moon. I watched it on my roof, wondering what man will do, and what he sees. Some 55 years later, I'll be there on the Moon, to see what actually man will become. How he will behave. Would he still kill. Would he behave correctly with the Universal Community that are on the Moon? (Is the Moon flight a test to convince the Universal Community that Man can be changed of his killing habit?)

Those of you who go to the Moon and come back, will not be the same as before. You'll be knowledgeable to the knowledge of the universe, where the matter state becomes irrelevant.

By mid, or end of next year, we'll open a colony of man on the Moon. Because then it will be easy for us. Then we'll understand more. From the Moon we'll go to Mars, and then the next, and still further on.

(The KF website will not offer a sales item for the Moon and Mars mission. You make a donation to the KF directly, and then ask to be on the flight system list for Moon or Mars.)

It will be interesting for us to have a couple, a brother and a sister, friends, and to see how they react. It'll be important for us if you can make a, what we call, "visualization of the information," when you come back. Not recorded on camera. It'll be in a different dimension and direction. And we will see how the technology will bring a new dimension to all of us.

This way, for the first time man will become a true member of the Universal Community. The Moon mission starting from beginning of 2023, is what we call, the opening of new knowledge and new understanding.

What will be interesting to us is, how you automatically have all knowledge you need to live on the Moon or Mars. You know what you have to do to live, what to eat, where to go, and how to absorb the energies of that planet.

In a way, from 2023, we will truly join the Universal Community. The most interesting part will be, how you graduate into the knowledge of the universe. The first people who come back will have access (to the knowledge, will have the knowledge) to become the true teachers, to understand, to be able to elevate the Soul of the others with the knowledge. They will not become prophets, rather just a normal being. (You will teach and transfer the knowledge) not only to the human race, but other races of the universe as well, to understand the process of the creation the way we have taught you.

We will carry on teaching, and in that process, create a condition of the common knowledge for all of us. In a way, from the humans, to the stones, animals, trees, and to everything which exists on this planet, to become knowledgeable about life and the Creation.

The space missions of the KF in 2023, will be the beginning of what we call, the cycle of change. We will see the establishment of the world peace. We will see the establishment of One Planet, One Nation, One Race. When we can transmute you to any position in the universe, it will be the end of religions. We'll see the end of governments, and we'll see the end of what we call, injustices, on the name of the governments. The process will become so transparent, that none of us will dare to bring a separation. We will see the end of the racism, as we all unite to become the conqueror of the peace in the universe.

Man will become united to be one soul for the universe. It does not matter what race, or position we've been born into on this planet, we'll strive to change the condition. Man will not be known as an animal any longer. But all of us will change by ourselves to become the banner of peace, banner of knowledge, and to be proud to be from blood of Mitra, where the Creator came from. Then the process will become beautiful for all of us.

It's hard to start a new structure, new religion, new country, or new dimension. But when you give, and people by themselves come, they will change themselves. The whole of the humanity has to change to accept the peace, then we will become peaceful. This will be engraved in the structure of the life and the STM.

(How will man look on the Moon and Mars and in the U? Instead of different colors, would he appear as a silvery grey light? Then those of you who were racist by the color of the skin, and those of you who tried to change your color, because of so much abuse, now you all will be equal.) These are not fairy tales, but realities, which many of you who have gone through the Linz transmutation system have experienced.)

Book your ticket and join us in 2023, to travel to Moon, Mars and beyond.

(We received the coordinates of the Apollo Moon landing from a KS, who said it came from someone who was there, and worked with NASA. If that person has more information to share, contact us and let's take it further.)

At a young age just prior to going to university, I met one of the most beautiful, serene women in the world called, Mary Hardy. She was part of NASA's mission to the Moon. She was one of the key members of the Apollo landing. I came to know her well, and shared a lot of knowledge with her. She lived in England in Oxford shire. I spent a lot of time with her, to understand how the Americans got it wrong, (and what actually happened. The little knowledge she could give, showed me, that even with all the (big minds of NASA,) they still have not understood the Totality.)

Mankind still has come to understand the totality. The human race under the banner of KF Spaceship Institute, as One Nation, One Race, One Planet, will leave the village of Earth and enter (the immensity of space. Not in the physical dimension of the physicality of today, wearing a "monkey suit," but with the suit of the Creation, which is the knowledge of the U.)

Join me for the excursions to the Moon and Mars and become the first ambassador of Man to the U Community. The citizens of universe will envy how you super-passed them. Being from such a tiny village, in a small corner of this universe, and yet you have access to the Knowledge of the Creation. They have dreamed and worked to achieve this for billions of years.

Join me in Linz, and my soul will travel with your soul, to make sure that you're safe, and you come back safe. We come with you and hold your hand, until you learn how to live in the M fields of the ocean of the universe.

The time for man to enter a Universal Community has come. We don't look to see if it's the first of January by any calendar, such as the Islamic, Jewish, or any other calendar. The time and point of the maturity of man has come. But as I said, the whole race has to be a part of it, to see and feel the change, and to become One Nation.

When you come to Linz for the flight, don't expect that (after 1 or 2 times) you'll be on the Moon. We have to put you through the system and structure it, until you settle directly into the transmission and transmutation. The most interesting part will be, how anxiously we citizens of the Earth, will wait for your return.

I wonder if the Americans left a camera on the Moon, that when (one of our KS who goes to the Moon and finds it, and somehow switches it on, will transmit how the man looks on the Moon back to (Cape Canaveral). Would the same thing happen on Mars, where one of the systems gets retriggered and sends images back to Earth, how the Man looks on Mars.)

(We have shown in the teachings how simple the process of transmutation is. Even in the Intro we showed at the beginning of the teachings of today), that we confirmed, that we have shown the understanding of the plasma, where the fields of the totality of the electron, proton, and neutron, as a energy pack is noticed.

When we send you to the Moon, from the Earth, you will not feel much difference, except when you enter the atmospheric condition, and field forces of the two planets. We don't travel in dimension of the physicality, we travel in the dimension of field forces. When we send you to Mars, how would you feel? I'll tell you exactly how you will feel. You'll enter a plasmatic M field, of the atom of the earth.

The audio dropped out for most of the following teaching, but nobody asked about it. It seems to be about crossing over the different plasmas of the earth and Moon.

The astrophysicist who are working on the present mission to Mars have had glimpses, (of entering plasma fields) and they see the changes, but they don't understand, that actually they are entering the plasma fields of the totality.

(The structure of our Solar System (SS), has the Sun in the center, and different planets, including Mars, and the different moons. When you enter the SS (from outside ??), you enter (a series of zones). These are zones of the fields. (So first you enter the zone of the SS, then that of the planet, or the moon of that planet. This entry and exit is important, and will be vital to understanding the transmutation of the elements.)

When I create the man in his own dimension, I expand your soul, and you become a bubble. It's the same (process), and it does not matter what's inside. (It's the Totality, which creates dimension within the plasma.)

Now, you understand, why we went through the enhancement technology, and through every other aspects, to bring us to this point. (How we will change when we enter a plasma, to whatever position inside the plasma or even to its center.)

In the past teachings, we taught about the gravitational magnetic fields of the planet, Inertia, and about the STM, which are gravitational magnetic (GM) fields of the Totality. But what is this elusive Inertia? We have made another word for it. We call Inertia as the interaction of the matter state field strength.

Inertia in the body of the man, is called, the spirit. When the soul interacts with the totality of the fields of the universe ?? ) (Whereas Spirit, or Inertia, is only involved with the structure of the physicality of the existence, of the planet or the (physical) body.)

When you travel to another dimension, with another GM field, the soul will still stay the same, (but the spirit of the man, or the Inertia of the internal field forces of the man, has to deal with the Inertial field forces of the planet. And this will give the new shape to the man. (The man will change shape that fits the dimension of the existence of the planet, and position he travels to.) How would the fields interact? Would you become like a fish in the oceans of the liquid of the planet, or a bird that flies in the skies of it, or would you become a man on the ground of the planet.)

Now, you understand the isotopes and how to look at the plasma interactions. Man has chosen many words for the same thing. We call it inertia in the world of physics, and spirit in the dimension of the life of the man.

Mankind will become wise to understanding the totality, and knowing how he will behave. Different Inertias have created different elements like gold, oxygen, and the rest. (How would your Inertia manifest in the dimension of the plasmatic condition of the Moon. Will it create a new you?) Would you be the structure of the gold or the hydrogen?

The Totality of the knowledge sits within the structure the Enhancement Units in Linz. We have created the fields (of the systems) from everything in which the man is made of. Do you need a bone structure on the Moon, or in another dimension in the U. Or would you stay, to become new structures we have never known before, (which are a combination of the totality of that place). (We are just bones stuck to each other, to create the shape of the man.)

Have you looked at the structure of the bone of the blow fish? Isn't it made of connection of the star bones? As he blows himself up, the structure becomes loosely connected. So, the man will change in that dimension and direction.

(If we go to a planet) where the field the strength of our STP, cannot support the body structure, will man become like that of a worm? Would we dig into the ground of the planet, or would we become a flying worm? Would the interaction of the fields of this flying worm, create a light with the environment of the planet?

(When we don't have a skeleton to support our structure, would we become a ball of light, like the cigarette shaped lights we see floating in the sky. It has intelligence and knows where it's going.)

(These lights in the sky or UFOs are going fast to another place.) After visiting Niagara Falls he wants to go see the pyramids of Egypt. The light is his aura, it's the interaction of the STP, and the STM, with the fields of the gases of this planet.

There are different life structures beneath us, within the sphere and layers of this planetary system. There are cavities within the structure of every planet. They only contain fields, in which new life has been created. These life forms live by what is available to it, at the time, place, and position. There's even life within the center of the Sun. It cannot be any different, (then the fields in different strengths, that leads to the creation of the man. Higher order interaction of the fields has to create the condition of life. It has to create condition of the maturity of understanding of the time, place, and the position.)

We gradually open your eyes to the truth, that when you land on the Moon, a flying light does not become a prophet to you, if he shows you something. You just take it as another sign of the creation, another beauty of the Creator. "I made an image of Myself." But the beauty of it is, that I have many images, as I interact in different fields, in different strengths. I made life in the image of Myself, and not only that, life exists in every dimension in the U. It's the interaction of the spirit of the man, or creature, with its environment, which decides the shape of the being, and the essence of its intelligence.

I made the U the image of myself, as a light, as a soul, as a sun. And the physicality comes from interaction of the sun with its environment, to manifest itself as planets and moons, or as a man, and all the creatures on the planet.

In 2023, the fulfillment of the promise of the past will be completed, not by us, but by you as the passenger of the U. A new cycle will start for the man, a new understanding. It will be like the first flights by the Wright brothers (and we see how it has developed over the years up to the space lab.)

In the next few weeks, I'll make man so busy with new knowledge in, that he will not have time to go to war. Man will see no essence in conflict, but in Unity. We'll bring the end of the religions, as men becomes aware of the soul and STP, and that he does not need an interpreter, nor an abuser. Religions will unite to withstand this new knowledge, as it brings and end to them. But they'll be no match, to what is to be delivered. By elevating the soul, we'll walk away from religion, as we become religious ourselves, in understanding the work of the Creator, with no interpreter needed.

This time it's not the Americans, or the Russians who go to space. This time it's me who goes to space. It's me who decides. It's me who is the ambassador of the Man, and it's me who has to be the best.

(When you go to the Moon it will be Armstrong, the Wright brothers, and all the rest together in one go. Then we'll see how you land, and how you'll behave. There is one thing different, you will not be sworn to secrecy, but on the contrary, when you come back you have to teach, and share the understand of the totality.)

Join me on the Moon and Mars and then the universe is yours. Because once I teach you to walk and talk, you will understand how to connect to the rest of the Universal Community without any curtains, without any intermediaries. Where you become the man of peace, you will become the ambassador of man in the U.

For those of you who go on these excursions to the Moon and into the space, your families will never miss you. This is because you will establish a connection through the soul with them. They will feel your presence at all times. It's very different from the D of physicality, where you have to go and see, or be with the person all the time. This sense of missing or being missed, goes out of the window. The essence of everlasting omnipotent presence, becomes the what I call, "the lifestyle of the man who goes into this change."

(When we understand this, the restrictions of physicality, that you need to physically be with somebody all the time, doesn't apply anymore. We are not bound by time and place. We can have the connection even with those we have lost in the past. (We can again be with the soul of the son, brother, mother, or friend who passed away years ago). As we live in the dimension of the space and time of the universe, and not the physicality of man, which is restricted by his position and time.

Welcome to my world, and where I came from. (Welcome to the life of the man as a soul, and as part of the Universal Community.) Join me in Linz to take the first man into space, and join us in the space, that we understand the totality of the work of the Universe. The true race, for human race, to become part of the Universal Community has started.

We will keep you in the essence of the STP of the Man, as long as you wish on this planet. Beyond this planet, it belongs to you, and your soul. You become the captain of your life. Would you like to come back to the life and pain on this planet? Or would you like to be free from everything, and be part of the Universal Community and travel the span of the U. Because once you've learned, you cannot forget it.

### **End of part 1 Quick Index 446 KSW**

A question was asked regarding the Brazilian group listening to the Mobile Transmutation Flight Simulation lead by Mr. Keshe during Rick's Plasma Reactor Group. Many of them had different and interesting experiences, while listening to the recording

with their headphones. The KS experienced being in deep space, dark with billions of points of light. She asked about her experience.

K- I don't know, I haven't been there.

(It's what you see and how you interpret it from your point in time and position, and then you tell what you are feeling about it.) (In the Linz flight tests, what I said in the beginning, that we accept whatever people tell us they see and experience. Some people will exaggerate, some will make some things up.)

(When people come out, sometimes we ask them very deep question. Some of the Knowledge Seekers go through very emotional experiences, that they don't even want to talk when they come out. Because the emotions are touched so much, and they want to understand their experience. They want to mature to what they have been through in the system, and how they came in touch with their own soul. So, whatever you see, you have to explain to us, because we were not there.)

Q: We have a Sun in our Solar System, which the planets rotate around, and the moons rotate around the planets. Then we have a sun in the center of our galaxy, that our solar systems rotate around. There is sun in the center of the Universe, and there are other galaxies, which go around that. The universe is part of a cluster of universes in the Unicose, I think you said it was between 6 and 9 universes that make up a cluster. That cluster is one of many clusters of universes. Do these clusters rotate around a sun in the center of the Unicose?

K- (If you understood the Totality, planets, moons, and whatever rotate around a sun. (This is the pattern.) So the Unicose also rotates around a sun, which is the Creator, the Soul of the Creator, where all the energy comes from. In the drawing of the Unicose in the back of Book #3, the center point is the Creator. The rest are on their own, their own clusters of their own clusters, of their own clusters.

If you compare it to the STM and its creation, your body, (then your own brain, kidneys, heart, and all the others have their own soul.) Then within them are other sections, and compartments of different field strength for doing different tasks, for example to clean up excess zinc in the body. Or let's say your kidney has a part in it to clean up extra vitamin D's. Then the (part that cleans up the) vitamin D's, becomes like little galaxies.

Then within (these) galaxies you have different tissues, and cells, and they become like these direct planetary systems, and whatever, and whatever. (The body is beginning to look like a mini cosmos, or a copy of the cosmos.) (But the important thing is, that the essence of life of this cell in the kidney, is that it is connected to the soul in the center of (the kidney ??). (So it is the same throughout the creation. The whole Unicose evolves and is fed by the Soul of the Creator in the center. All those Universes and galaxies we see in the heavens, are like those clusters of cells in the kidneys.)

Q: This really does give more comprehension to, "I made man in the image of Myself."

Q: How does using the Flight System differ from that of using the STM?

K- What do you mean by that, explain yourself?

Q: Well, with the reduction of the STP, and the correct conduct, and activating your C14, and doing certain practices, people are able to fly around this universe, and possibly other universes. Humans are able to do this, just by using their STM, because of the reduction of the STP, and their conduct, they can fly around space. Is there any difference between this, and using the flight system in Linz?

K- The system built Linz allows you to be shown the beauty of your own Soul, to yourself, and nobody else, and to teach you how to reach it. It's a tool, (to help you to find your own Soul and learn how to operate it. We don't do anything else. We call it a Flight System, but in fact, it's really an expansion of the Soul system. It's a key to unlock the STM from the prison of the physicality of the man.

(The Spirit, or the STP has imprisoned the STM. It's like at Tokomak, where they use one plasma to hold another plasma. To contain a plasma, you need to have one plasma to contain the other. So, your Spirit has created a net around your Soul, by field energy, and nothing else.

Q: Could you just explain what do you refer to as Spirit?

K- The STP is the Spirit. In a cultural or religious context, you call it, the Spirit, or "Holy Spirit." The Holy Spirit is your STP.

In the Enhancement Unit, we dilute the STP around the body, and this allows the STM to expand beyond. But the STM has a limitation as to how far it can expand. (In places where the STP is weaker, the STM bulges out.)

(It's like a balloon, if you put pressure around it, then it starts bulging out in places. These little bubbles are created by the field pressure. In the world of Plasma Technology (T), we don't put a pressure on it, we dilute the strength of the fields of the Spirit, or the STP. Now the STM can decide where it wants to go). If it wants to visit the brother or mother in another position in the galaxy. There's no difference.

(The STM is not allowed to burst the balloon, instead it reduces it to a new shape. But now, the STP is diluted inside. In the coming time, when man matures in more in the detail of the knowledge, you will see your physicality (take a totally different shape). Now, the Man appears in the physical dimension, in the way we see him today. But when we become mature, and we'll look at our Spirit, we will not see this shape we see today). No way. We will see a field transition.

(It's like when you try to balance yourself on a rope, the arms and legs go up and down and continually change position to keep the balance on the rope). But your physical shape doesn't change.

It's the same as what we'll see with the STP in the dimension of energy. We see everything as compact. In physicality, you move a hand or a leg to balance yourself. In the world of plasma, you create balance with your other systems in the environment. When you understand this, it will be clear to you, what the job of the Enhancement Units (EU) are. It's like we gave you a Rolls Royce. It's beautiful, and full of everything the

man dreamed of as perfection. We gave you the knowledge of the Creator. Now you know you have a soul in it. But the only difference is, that Rolls Royce is on the street, and it doesn't belong to you, unless we give you the key for it.

It's the same with your Soul, like the Rolls Royce, the beauty of your soul is there. Now with the Enhancement Unit, we give you the key. The richness, the luxury of understanding the knowledge of the creation. That's all it is. It's the key to the knowledge of the Universe.

It's not a magic box. It's understanding the work of the Universe, what it is, and how we can create the condition we need. I don't decide where you go, or how part of physicality will manifest itself in that dimension.

(People who went to see someone who died years ago and met with them, but they couldn't bring anything back, because they were in the in dimension of the energies, because the person already gave up the physicality. That person has exchanged the maturity of the STP, and the Spirit is gone.)

(When you travel with the flight system the Spirit and the soul are together. When you physically die, you leave the Spirit of the Totality behind. That's why you cannot (recreate the physicality, because all of the bodies cells, which have souls, or souls of physicality, have all been dispersed and are being used somewhere else. They have become part of other creatures, and therefore, are not allowed to come back.)

(Mistakenly, people believe they can "come back to the future," but it's impossible, because all the cell souls have become part of other beings. Are you going to bring a piece of a worm back, or a piece of a lizard or a fly. The pieces have gone everywhere. Other beings have eaten those souls of physicality, or children that were created from them. So you would have to gather all those souls since the time of your death until today. It's impossible.)

But in the dimension of the Soul, you don't have the Spirit with you. You have the energy of the Soul with you. That's why I said, if Man knew what happens to him after death, (he would have a different attitude). (Because he doesn't have the dimension of (this same) physicality of the earth.) When this soul takes position in another dimension in the universe, (it decides how it will manifest itself according to the conditions created by the interaction (of his energy) with the fields of the Inertia of the environment of where he goes to. At that position he will create his own physicality through the Inertia. A new Spirit or STP will be created. Because he has to slow down, and in that slowing down, (everything) changes.

It's the same with the Soul of the Creator, when He comes down, He reduces in field strength and becomes the man. But in essence, (He is still) the fields of His (own) creation.

Mr. Keshe presents the new 10 kilowatt power generator combined with the Gas Unit, as

"absolutely wonderful." It will be offered for 60,000 Euros. It's a hybrid, combining both systems, and has never been done before. You are self-sufficient for energy for life. Production will begin with only one to 2,000 units.

There are still about 70 people who remained loyal to KF, when they bought the original MaGrav generator. Arrangements will be made for them to get this new unit instead.

Don't forget, that gases are the essence of the creation of the Gans's, which are the essence of the energy the body of the man, (how it) works. With the electric power, we create the condition of the physicality energy. With the gases we create the condition of the Gans energy.

All these systems have 100 Euro of royalty fees per year to the KF, for next 20 years. Hopefully, we'll add the other supplemental units for food, water, and other needs. KF wants to transfer this T rapidly to Africa. I think very soon, in the western world in next couple of years, these units becomes compulsory when you build a new house.

Q: How was this same knowledge passed at the time of Jesus Christ, since Man's knowledge of the universe at that time was very small?

K- (Christ had only an insight of this knowledge, but not an understanding of it. That's a big difference.) The soul of the Christ is the same soul as Moses, Muhammad, and the rest. A man in different outfits, but it's the same man. The same man speaks to you today. It's not the position, it's understanding to be able to share in time, place and the space.

These teachings are not just for the Man, they are for the totality of the creation. The Universal Community, which is the totality of the universe, and will learn from the man. It's just how you understand it. It's the same Soul, it's the same man in different clothes. But, the STP is aware of the knowledge of the Soul, but it's not able to share, because it's not there. People are not ready, beings are not ready for it.

Q: Can the fields of the Gans of Zn and CO<sub>2</sub> change the morphology of the uvula, and thereby change our emotions in the brain?

K- Every time you come in touch with any plasmatic field, or collection of plasmatic fields, it will effect you. When you come in contact with the Gans's it will touch your emotions.

The biggest effect happens when you come in touch with a collection of Gans's, what we call, "a man and a woman," and we fall in love. (It changes our emotion, because the field strength received and given is so much. (We don't have to physically interact with the one we fall in love with, and still it can change our life.)

(He tells the story of the ex-president of Kazakhstan, falling in love with a News anchor, just by seeing her on television.) (The biggest effect on us are the collection of Gans's, of another being, be it a dog, cat, man, or woman. Emotions through interaction of the fields.)

It doesn't matter which EU you buy, they are the extension of the same technology, the same system. They all are working on the soul level.

The CO2 gas is plasmatic, and it carries a conversion of energy of the Gans, which means it gives life, connects to giving life. We can put two people in the same room with a fire and use a CO2 plasmatic gas, and one will die and the other will survive. The soul which survives still wants to be here. While the other soul uses the energies of the CO2 with connection to the environment, to elevate the Soul to leave the physicality. It's the point of death, (by elevating the soul.)

You might find a husband and wife in the bed in a fire. The wife lives, because of the love for the grandchild, but the husband let's go, because he had enough of the pains of this life with the cancer and the rest. It's the soul which decides.

All technologies we delivery, are a combination of elevation of the soul, feeding, and the rest of it. (The T is evolving rapidly.)

(When you use the Gas Units in farming, you convert the expansion of the fields in harvest, into expansion of the STM. Then you can see what it does, (how the people and environment start changing.) This creates mayhem with the West. This is also why many of you Knowledge Seekers have a problem with your families. Because you've been touched by the Gans's, and you've been touched by elevation of the Soul. The physicality is only there, because you have to deal with it. When your soul has been elevated, then you see the light and understand the knowledge.

How many of the Knowledge Seekers have had, or are having problems with their family? Because, they say, that if the technology is correct, why don't you do this or that (meaning using it for their personal benefit.) But the technology had to be brought to the point of the maturity. You're satisfied inside, with the energies of the elevation of the soul. Now it's time to bring that change of physicality. The new systems are set to do that.

When we show the first transmutation, (then you will see the changes we have been talking about for the world will happen.) When we show the electricity and power production, we put everything beyond question. The biggest problem the Western world has with Keshe Foundation is, how to handle this, and how we can bring the change, and how we can literally forget about what is being pushed and written.

The elevation of the soul comes from the fields of the Universe. The stronger fields are closer to the center of the spiral. The stronger soul you have, the closer you will be to the center and the more powerful existence you become. People who have a lot more knowledge than we do, generally come from the more inner circles of the Creation, deeper inside the plasma spiral.

(Man is of the strength at beginning of spiral, the ones who have the UFOs they are a little bit deeper in the spiral. They have reached this limit, but they can still go deeper.

Because they have a little bit more knowledge, when we interact with them, we think they are gods. It's not true, they are still elevating their souls with the knowledge of the creation.)

(With today's teaching we have brought man very close to center of the spiral. If man understands it, then he has not much left to reach the essence of the Creation. This is where the people in the UFOs are envious of the man), in how he has jumped the gap. This is the gift of Mitra, being the lover of the Creator.

When you fall in love you give everything. It doesn't matter if you haven't eaten for a long time and feel hungry, or you have no clothes. (You will give to your lover whatever you have. It took trillions of years of evolving and expanding the spiral of the plasma, to get to where the man is today. And now he has jumped it by one love. This is what our Creator has brought to the man.) Then you understand the power of the emotion.

I think the Creator has even surprised Himself, with what He has done to Himself. This is why Mitra fell (in love with the earth.) She understood the essence of the love within the creation on this planet. With all of the problems we have, loving in the man's level is one of the most beautiful things the universe knows. Unconditional giving of everything, to be able to elevate (the others).

Q: How has the weaker STP been able to enslave the STM, which is more powerful?  
K- (It's like the fisherman's net, when it is folded up it has no strength. But when you unfold the net, and spread it out, then you catch the biggest fish on this planet. It's the same. The spread of the mesh of the fields, engages a lot of fields of the soul.)

(As I always explained before, in places where the STP is weaker it balloons out, and the STM gets out, and you say you had a dream. You didn't have a dream, you had a soul travel. When you keep the STP tight, then you keep the STM inside.)

(If you look at the new fusion reactors at Tokomak or CERN, they create a powerful center of a huge plasma by M fields (and huge amounts of electricity). Then what they say, is they compress the fields of the central plasma to create fusion. (While in the body of the man, we use a very weak dynamic system (through the blood flow), that engages all the fields. That's all it does, (it connects to all the fields, and you spread it so much, that it contains the plasma of the STM. The STM is a very powerful plasma in the center. The dynamic blood flow spreads it around and connects it to all these links. That's why when you elevate part of it, it changes.)

I've been through this many times.

(The only way we manage to break into this Soul is through the breathing and digestive systems. (Because our nose is positioned such that, the air and food pass close to the STM. The STM is continually being elevated by the food and air. This is why when we eat, emotionally we change. This is why different foods effects our emotions and physicality. Because this net (of the fields of the STP around our body), gets effected.

This is why when you fall in love, it only lasts 3 to 5 years. After that you have to renew the love. That's why you keep telling your lover, "I love you," and you want to cuddle, kiss, and make love to be confirmed, and to reconfirm the love. Because you create a new love, and new understanding with your lover.

The way you love your wife after 30 years of marriage, is different today, than it was at the beginning when you first fell in love. If you kept the strength of that love going, then you still love her the same. The love that you created (was from a different combination of fields. Because during these last 30 years you have eaten different kinds of foods (with different field strengths of energy), and the same thing with the air you've been breathing, and everything else.) So, the energy of what you fell in love with, has changed.

It's the same time frame with the cancer. You begin seeing the signs of cancer 5 to 7 years from the time you start wishing to die. Over time you consume different energies, and that energy brings an elevation. Now we understand this more or less fully in the dimension of physicality.

Someone asked if it was okay to listen to the "Mobile Transmutation" flight simulation that Mr. Keshe lead on Rick's program. He said, You can listen to it every minute, but what do you get out of it? That's what counts. Does it bring a change in you? How does it elevate your soul, and the strength of your soul? That's what counts.

(When we bring back the people from the Moon and the Mars, you will see the elevation of the STM, and Man will change. It's not just that we send people to go the Moon. We go to the Moon to bring that change. They become the "Messengers of understanding the new world of creation." We are not making you into celebrities. We are not making a new cult.)

Before, we had a guy from the Core Team forcing himself, saying, "I am on the core team, I have to ... " No, (that's not the way. You are being elevated, so you can help others to elevate. It's how you can elevate the energies of yourself and the others. It's what you can give from yourself, for them to elevate their souls.)

Q: (Is there a solution for autism using the plasma technology? Are there Gans to eliminate mercury?)

K- I don't go into this because it opens a big Pandora's Box, especially with Americans (Pharmaceuticals), with autism and everything else. But there is a way to overcome the autism through the technology, and in a very rapid way. With it, we'll bring a new dimension to life.

We will run tests in the new units, for Autism, because it's a very tricky game. It's very, very tricky in how to create it. In the reports now given to the US Senate, it confirms the connection of the substances to the immunizations, what you call, the injections we received (as children). So, we know this. But you have to be very careful with this, because the lobbyist's are very strong and they can do all sorts of things (to you).

But in general, autism can be changed very, very rapidly. It's very much like a blindness. There is a solution. There is a pattern with it. You have to build a system for it. Autism is 100% reversal.

More discussion on problems with Belgium blocking the T and other things. KF has a certificate of Homeopathy to make health systems.

Someone tried to get Mr. Keshe to reveal the T used in the new systems. He replied, the T is for KF and we don't let it out. (We learned from the past when you cheated us. You betrayed us. We have seen that you're incompetent to bring the T out. So, we'll carry on doing it, the way we should.)

Discusses how the Italians cheated the KF. The guy from 11.11 lied to the staff in Linz, and then attacked the KF.

You cheated yourselves, not us. Us as a Foundation we did. I learned this very much from the Italians. Someone from Iran said, "It's our right to have the T." The reply was, your right is the animal right, not the universal right. You behave like animals, and you live like animals, and you expect to have everything, to become a more powerful animal to do more damage. It'll not be done. This time we do it ourselves. We learned from what we experienced in the past. We'll go back to work with governments, and through them everybody will have the same (access to the systems).

(When I first set up the KF I trusted the KS to be like the Jewish people, that I had always dealt with in my business world. In the Jewish community they don't betray each other, more or less, but accidents can happen. It brings solidarity to your work. I never lost a cent in 20 years of working with the Jewish community. If something happened, then it was corrected. In the beginning, I believed the Knowledge Seekers will come from that kind of mentality. That they would be correct people. But I found out, that the most dishonest people under the cover of being a KS, come to KF to deceive and steal. So, my attitudes in past two or three years, has totally changed.)

We treat you exactly the way it was before. For the people we trust, we work with and help them to expand. The rest will be governments. That's the best way to do it. Because then everybody gets the benefit of it.

Q: If I take the trip to another galaxy and find the planet I wish to stay at. What happens to my physicality here on earth, when I want to stay there?

K- You take it with you. You're still connected. But it goes with you.

Because on Earth everything is of the same field strength wise, you can manifest yourself in 2 dimensions. When you go into a different field strength, it's a different ball game altogether. If you don't understand what to do.

You can loose the STP.

These are the things man will learn accordingly. In time you'll learn, what you can do and what you cannot do. (You will learn by experience. If you hurt yourself badly, you won't do it the second time.)

Q: When traveling to different places through the dimension of the Soul, will my memory of the site I previously went to, remain intact?

K- Yes, of course. (Even the memory of other peoples experiences becomes available to you, because the memories become part of the universal knowledge.) That's why you can speak the languages, that you don't know. We see this in the EU in Linz, when people can speak other languages they don't know.

Q: You once said, the best place I can take the man to learn how to travel in space is Saturn. Is that still exist in the plan of the Foundation?

K- You can go anywhere. You see, Saturn has many moons, and many conditions, and conditions between conditions. You look at the moons of Saturn, we look at how these moons interact, and what they create. When you look at Saturn with its moons you see a beautiful atomic structure. I am sure I released a paper on the Structure of Saturn. Saturn has a very composite structure, where it's superimposed. Then you have the ring of the Saturn, which is sitting outside. And you have all the moons, and the rest of it. Then you have the ice rings, which are confirmation, are layers.

The different layers connect to the different rings. This Hydrogen, helium, potassium, or whatever. They are different Inertia field forces. The moons of Saturn are not just moons. (They (are made) from the interaction of the fields between each other, and with the center.)

(Saturn teaches you a lot before you go into space, because it's a good model of what I call, "molecular structure of the plasmas" and the field control. With 11 or 12 moons, or electrons, you get a very good diversity of the fields.)

(By looking at any gaseous planet, you see the rings. Those rings confirm to you what Gans's, are being made, creating the different Inertias. That's why you see different size ice blocks in the rings of Saturn.) This is how your electrons work in that structure. Your electrons in the outer boundary have a different energy system and interactions, then the inner ones have. It's because of the field forces they carry, nothing else.

The hexagonal shape on the top of the north pole of Saturn is due to the interaction of the 3 layers of Gans's, which brings a stability. It's the same as the hexagonal shapes on your skin, from its 3 layers. It's in one of the medical teachings. The outer layer of the skin is a mirage of the interaction of the fields. Each layer, creates two of the sides of the hexagonal, to make 6 sides total.

These layers are moving with different speeds and sometimes different directions. This creates the interaction of the fields. The totality creates the shape of the hexagonal on top of the planet. We understood this long time ago.

You create this in your reactors when you put 3 different Gans layers in the rotating ball. You make it dynamic, then you will see a field hexagonal on top of it. It's the balance of the fields. When you have more layers, you see more complex fields.

Q: (The crisis situation around the world with drought, lack of energy, war, etc. Is the device you showed today the beginning of the solution?

K- In so many ways, man has created part of this himself. In so many ways, as I say it's part of the bigger plan. I always said, man will accept this technology not out of the beauty of it, but out of the fear of his own demise. We're getting to that point, we're getting to that point. Everybody tries to make money out of these crisis's.

These are the problem we have, but in time we'll change. We are in the right place, right time. The pressure on the Keshe Foundation is beyond imagination.

Q: I wish that they would open another kind of account, that we can elevate their souls.

K- We'll see, we shall.

Jalal, join us in the group of 20 people to the Moon. You have the rights.

Q: I will be there Mr. Keshe.

Every being on this planet gets elevated together from the trees, shrubs, animals, and stones. All will get the same elevation. It's not exclusivity of man. That's why we brought it up this way.

R: We have another question from Brazil. Brazil has been quite popular today.

K- Very active. They don't stop. We have a guy called Rafael, he doesn't stop working, they don't stop.

To a question about using the Gans to feed people, Mr. Keshe replied, "you can take a horse to water, but you cannot make him drink." You can create the dynamic structure of the food. (But if the soul doesn't want to receive it, you can make as many food systems as you want.)

Haven't we done that with the man? Haven't we sent so many Messengers to elevate the STM? How many have listened, and (added to their strength?) (Only those who wanted to elevate, accepted it). Otherwise, for the rest, maybe it hasn't been a waste of time, but it's a slower process.

R: Did the story of Christ feeding the masses with a single loaf of bread and 1 fish, have anything to do with the Cup of Food, or some sort technique?

K- It's just that, the man puts a name on it. But in essence it's the love and energy of loving and giving.

Q: When we move to connect through the souls of our ancestors to find the truth about the crucifixion of Christ, do we see through the eyes of our ancestors, or do we witness history like we were present?

K- It's a combination of both.

He tells about lady who saw the Christ in the EU. She was able to describe the color of the skin, hair, dress, and how he walked. She could explain to us fully about Christ. It fits into what we always said about him.

I went through the soul dimension, and (saw that) her ancestral line was indeed present during the time of the crucifixion of Christ. There were several people who connected to Christ. But not the manifestations as a physical dimension.

We'll see people whose ancestors came in contact with Christ, without a doubt. Because he lived for 30 odd years, and came in contact with hundreds, if not thousands of people. They've seen him, lived with him, or known him. Some shared bread with him. All the souls which came in contact with Christ have had children, (and their descendents have spread out.)

(It's just like, (when the brain) keeps the memory of where the cell of your kidney will be.) That memory of the talks, and his presence are within them. It's in the RNA side, the energy pack, not the DNA side. The memory goes back to the (beginning) time of creation. If some of us reach that point, as I said, you can even see the Soul of the Creator and understand His language. All the descendants of those people who met the Christ carry the exact memory of what he looked like.)

We carry the DNA, which is a copy of our parents, up to 500 generation backwards, which actually (starts) from the beginning of time. Because otherwise, some of us wouldn't have a kidney, or an eye, or whatever. Everything is recorded and added.

I carry the background of a Cohen (descendants of Moses), through my mother. And on the other side (of my mother) I carry the blood of Muhammad. (So, I have both religions present, but it's the same soul. I've been brought up amongst "Sayyid", which means the direct blood of Muhammad. (Both Jewish and Islamic line comes from the mother's side.) So, it must be understood, that we carry this with us, we've been present.

R: Can we also pick up the lineages of Christ and Muhammad through physical artifacts?

K- We don't have anything that actually belongs to Christ. But we have more or less most of the clothes, especially the later part of the life, of bless His name Muhammad. Every few years these clothes are displayed somewhere around the world by the Saudi royal family.

The DNA also carries the STP, so it had a connection to their Soul. In China, they can choose the color of the eyes, hair, and everything of the children they are going to have. So, if they can interfere with it, (then we can also rebuild it backwards.)

Q: If any of the Universal Community asks us for help in the future, will the intervention be justified?

K- It depends on what the purpose is and how it will be done. Yes, many times races of the U have asked for help, and many times they have received it. different cultures and societies, which have been pure in their work, and have lived a perfect life (have received help.) When it comes to for example, that their environment or planetary system is or is about to collapse, Then when the souls of that community ask for help, the Universal Community (UC) responds. It has been done many times, and they still do it. In fact, right at this moment around the U, there are a few (rescue operations) going on.

Physicality forces, what we call, accidents for things to take shape. There is a society, or a race in the UC, whose job it is to respond to SOS, calls for help. They are there to rescue the souls. They never carry the physicality, only the souls. Well hardly ever. It's not an easy job.

We hardly have ever lost a civilizations by accident. They have always been preserved, in one way or the another. The galaxies you see blowing up to pieces, they literally blow up, empty of living soul life. The majority of these explosions are empty. (Because we see that they are going to crash into each other billions of years ahead of time. The facilities and knowledge for moving souls is there to respond. There's a specific race, that has achieved the knowledge of creation, who does this. It's a privilege for them to do this.

Q: The Cu as 59, but you consider it 49. This difference between the numbers, the Inertia?

K- The 59 is the Inertia fields forces, and the 49 is the plasma field forces.

Q; Is it due to the conditions, or is this how the matter state appears?

K- Yes, it's due to conditions. It's due to the Inertia of the Earth. It's the difference between Mass and Weight., 59 is if you look at it from the plasmatic world, is the Weight, and 50, 49 is the Mass.

Q: In regarding the Spirit, in this condition?

K- It's the same. Condition to the position. Condition to the position.

(Q: We know in plasma when we see stars the light arrives instantaneously, and doesn't take the time of so many light years to travel to earth.)

K- You see, (the light as) the field strength in a matter state. We see the (the light as) field strength in the plasma state. It's (instantaneous in the plasma state. Not (in the) matter state. Do you understand? (Does he mean the light of the stars we see in the matter state, actually do travel hundreds of lights years? This should be clarified.)

J: How can we distinguish between these 2 states?

(This question was not answered directly.)

K- When you go in the system, when you go into the Gans, what you call, the Enhancement System. This is where we don't allow any films to be taken from the Enhancement room. But it's amazing, (because I am 20 centimeters from the people, and

they don't see me. They say it is blurred. But they say they can hear me. I tell them to go to the Moon. They say, we heard it. But in fact, it's my soul, which gets in touch, with their soul, and says, "go to the Moon." Physicality is just a translator. It's as simple as that. When you don't give them instructions, they just sit there for hours and nothing happens. It's because they're waiting for the flight to Vienna" to be announced, as I call it.

I instructed the soul, through the soul, but used the voice of the man. The physicality is inside the soul. They hear it and they do what was asked. Because, it goes back to the same point, trying to give, to please.

Q: Is it because the people who are going to the EU, expect to receive? Is that what the difference is?

K- Very, very much so. We have this problem with the KS who come to Linz. They sit there and they get nowhere. Because of the expectations. They say, "I just came here to give." But what is underlying? What is there? What does the soul not want you to see?

(I always take only what is needed, and till it's not needed, the time will not be there for it (to happen.) . I've shown this to the KS who are around me. When things don't happen, I tell them, it's because it's not time yet for it. (They have trouble to accept it. But we have to understand there's a bigger purpose behind (the things we do.) It's not just what we want. We have to consider the whole structure.)

The teaching mentioned last week where Mr. Keshe taught years ago about how to do transmutation on your own, is in the private teaching of the 18th of November 2015.

(The teachings haven't changed over the past 10 years, they are still the same. We just expand on the same thing.) It's like that with the new power generator. You lot will kick yourself, how you couldn't get your MaGravs working.

To Jalal, "you are welcome to join me, especially for the next year flight. There's a reason for it."

Q: What is KF going to do about drug problems on this planet, because they are destroying the true purpose of people's lives?

K- We have the knowledge (and have tested that it works.) But when you elevate the soul through (the process of the systems we are releasing, drugs will become irrelevant. And we are (right on) that track.

Q: Do you have a timeframe?

K- Not really. We did it nearly 10 years ago, the addictions changed in minutes.

Q: If addictions can be changed in minutes, why doesn't the Keshe Foundation implement it right now on a global scale?

K- Very simple. We have addictions of different kinds. It's like the guy told me, if you can make gold, why do you ask for donations. Make as much gold as you can and sell it. Man has to go through this process themselves.

Our factory in Tijuana, Mexico is in the center of drug trafficking. Last week there was a big clash between different gangs, where they were burning places and killing each other. We don't get involved, it's not part of us. It's part of the work of the elevation of the soul. (It has to be done through the soul, then it's done in totality.)

We are born to be addicted, and then we are rewarded by it. Our sexual behavior is one of the addictions we are rewarded by, falling in love with that. Which addiction do you want me to eradicate? Power and wealth and the other ones. (You think it is only cocaine, or whatever drugs.) All addictions are part of the same (process).

(The solution for it) only comes when the STM passes over the STP, and then there will be no addictions. (This is why when you see the stars, you just see the light, you don't see if it is the soul of a king, or a peasant.)

(In time, and after the changes, the drug won't be there.)

If we announced tomorrow, that we have a solution for addictions and drugs, and that the drug barons cannot sell, what do you think would happen to KF? (None of you will continue to exist in the physical D. So we do it in the correct way. This is part of the process.)

Q: You have said, that when one human murders another human, they go back to the beginning of creation. Am I correct in saying that?

K- In a way yes.

Q: You also said, that suicide is not allowed. What happens to people who commit suicide?

K- Suicide is not allowed, because the soul hasn't reached its maturity. (It's like committing a crime. You see, every minute of your life is needed for your Soul to reach its maturity to overcome the imprisonment of the STP. So you cannot commit suicide even 1 minute before that time.

Once the STM is freed it has no dimension, until it chooses one by itself, and its own strength. It's like cutting a flower before it blooms. What was the purpose of planting the flower? Suicide is forbidden. You cannot prevent a soul from reaching maturity. This is why killing is such a heinous crime. You don't allow the soul to reach its maturity to serve in the other dimension. That's all. We cannot steal.

Q: What actually happens to you when you murder someone? You go back to the beginning?

K- You have to compensate for what you've taken. That's all.

The concept of Divine Punishment doesn't exist. It's a lot of rubbish. There is no divine punishment. The divine punishment is that, you know you cannot do wrong, and you pay for it. And you pay with your ?? (When people can't understand something, they put the terminology of "divine punishment" on it. )

The Day of Judgment, is the day of the balancing the books of your own life and soul, and nobody else's. With soon to be 8 billion people on this planet, and millions dying every year, can you imagine the queue of people waiting for the Day of Judgment? Can it even exist? It's just made up for people to be afraid of. The reality is, you're the captain of your own ship, you decide where to anchor it. That's the divine part, once you understand the responsibility of it.

Q: How do you explain the wife in the story of Sodom and Gomorra, in the Old Testament, that she turned to stone?

K- (You mean what is the meaning of it? If you take the Soul, STP and convert it into energy, you can become a stone. That's all, as simple as that. If you develop the energy of the STP, reaches the level of the energy of a stone in Inertia, you become a stone.

You body does this when it creates a tooth or bone. That's why the bones and teeth are only thing left when you die in the physical dimension. It is as simple as that. (Becoming a stone is instantaneous.)

The Mayan people didn't vanish. You have to understand the process. There were people in the human cycle, that they could manage to turn themselves to stone, and back to a living thing. If you carry the soul inside. It's the same as you can become Chinese looking when you go to China, and you become African looking in Africa. It's just understanding the chameleon of the soul, not chameleon of the physicality.

(The KS had a problem with saying, "I am a creator." Mr. Keshe said, a mother is a creator of a child. Even if you don't have children you can create a new emotion of love in that child. It was said, that there is only one God.

K- Yes, there are many Gods

When Mr. Keshe says, "my wish is my command" it means, that it is my decision, and that's the way it will be. I decide and that will be it.

Q: But can I say that also?

K- Yes. You decide to go to the shop to buy the clothes, it's your command. You decided to go. The clothes doesn't come from the shop to you, does it?

Q: Yeah. But it's not instantaneous.

K- One is in the dimension of the soul, and one is in the dimension of the physicality.

Q: Please. You just said, there are many gods? Would you expand on that?

K- The god is us. Translation of the god as a creator. Not translation of God as the big Creator of everything.

There is a philosophy, which we will (teach), when man matures.

Even our Creator has a Creator. Otherwise, how was He created?

Q: But where does that chain (of creator and creation) stop? Does it stop?

K- It becomes us, it comes back to us to become them. It becomes us as one.

Q: Kind of like with the technology, where you are feeding it back into yourself.

K- Yes.

Thank you very much for today.

Please join us in the Moon and Mars excursions to bring in a new dimension. We'll leave it amongst you to decide, who will be the first to go through this process.

There is a reason for it. I'll explain it in time. So, those of you who join us to become the first group to take man into space, the true way, not with the suit of the monkey, but through the strength of the STM. You have to decide, because many of you have to support that soul, with your soul. It's a payback time, as I call it. It becomes a collective effort of the human race, to adventure to that space and time, and then open the universe to man with the knowledge of the Creator, not the knowledge of the man with the monkey suit.

As I said with the generators, we have given you the biggest gift, that it makes man independent from everything else.

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:16).

K- Yes, good morning, good day to you as usual. Wherever, whenever you listen to these series of Knowledge Seekers up to Keshe Foundation, Spaceship Institute, in one corner of this universe in a spot of plasma of the earth. We come back to a full circle of teaching again, and again, and every time an Intro decided, brings back what was supposed to be taught. In the next couple of hours of sharing knowledge, we bring back a lot of new understanding, new ways things is done, and to be done.

As usual, at the beginning of the Keshe Foundation teachings, if there are any matters, we bring forward. As I explained to you last week, at the back of last week, we have a problem, (:18). regarding the finances of the Keshe Foundation in respect to a group. And since then, at the back of last week, we're going to expose. The organization is trying to find a way to sort it out, hopefully in the next week or two. We'll come to some conclusion with this matter.

It was important that you know, that we work openly, the way we open our patents, and the way we share knowledge. We bring the problems of the Keshe Foundation directly to

the Knowledge Seekers (KS), that we all know, and we share, and we take steps, that these things does not happen.

Yes, it brought harm to many of us, and it has brought a lot of hardship to many of Knowledge Seekers, this, what I call, intrusion in our, what I call, the discretion, acts of us trying to expand the Keshe Foundation, and abuse, or whatever happened.

I thank you, for you. And many of you're asking what it is. You will understand in the coming years what we have done. But it was important for us, after months of work, and investing millions into it from the KF, and support of you Knowledge Seekers, some of it, to bring this to an end, as it was dragging on every week, to next week, and the next week. We brought this as we ?? like, but in fact, it was, we were in the hands of the people who are supposed to know what they are doing. And so we waited, a couple of more days or so. We were told, they will try to fix it. Hopefully, we'll start a new era with the Keshe Foundation from now.

Going back to the teachings, and going back to what we said, up to now, in the what I call, the horizon of the teaching.

First of all, today, we are in a new location, you might hear noises, or whatever, which has nothing to do with our work. It's a background noises we are in a public place. You'll hear a lot of cars, and people passing, or whatever.

One of the parts of the teaching, (:20). what is important, it's been important to many of us in past few weeks, has been the transmutation systems, the flight system (FS) in Linz. And then the introduction of the gases, as the Units. Many of you might think, what does this have to do with the other, energy and a gas, because don't forget are important. When you speak about the Gans, is a Gans, is a Gas in a Nano State.

So, the body of the Man is the conversion of the GANS, because we our body is made of Gans's, it's a collection of Gans's. So, we have to understand the structure of operation, and making of Gans's from the fields. Otherwise, we cannot produce what we call, Gans's. And you have seen it, we showed it as gases and as energy conversion.

This is very fundamental. This is part of what I call, cornerstones of understanding the whole structure. We do not need plutonium. We do not need uranium. We do not need to carry different materials. As was the Intro very simply, you just need one element. This is what is done in your Thalamus and your thymus. Everything arrives as a lymph, and then in these two glands, in combination of work with each other, they decide how this lymph, which is a mono energetic.

When you cut yourself, you see that white liquid, clear transparent liquid, that is from hydrogen. It has the capability to plutonium, uranium, and other materials, which are unknown to man. What happens, it enters the environment, (:22). enters the vicinity of the two glands working together, in a very specific condition, and then it takes

orientation. It comes to be a calcium, and it becomes to be a potassium, it becomes to anything else, even uranium in your body.

>>

So, it's the behavior energy, not matter energy state. In this process, we have to understand it, why? Because now in the process of the Enhancement Unit (EU), we make it into one plasma. This is your soul. And then the ingredient of the structure within it, which is your physicality, and the Soul of the Physicality (STP). The soul of physicality is very simple, the STP is that nucleus. The interaction of the totality creates the dimension of the gas, the dimension (D) of the Gans, the dimension of the Soul.

We don't look at the proton, and the electron, or the neutron, we look what effects they create, in the dimension of the Creation, as a field. So, now you understand how we will transmute you.

Going to the transmutation. Many of you came and are still registering to come in to test flight. You come into to test simulation. Some of you have now signed, to become Mobile Transmutation. Some of you are coming in to Keshe Foundation Center to be transmuted from one system to another. This (the test flight) took us six years, six weeks, eight weeks, and we are still in progress. This (Mobile) is still to come by around October, November, (:24). if everything goes correct. And this (transmuting from one system to other) starts in September. We know where we are going. We have developed the technology. Our system is set even today. Today, for the first time we opened the door the door to man, in true space T.

Sometime from the beginning of the January of next year. We offer you 2 flight systems. We land you on the Moon, or we land you on Mars.

I have a invited the head of NASA Mars 2030 operation to join the Keshe Foundation, to bring the whole process into unison. What does this mean? Once we can transmute you and test you in September, many of you have registered, then we bring you in.

The first person to be transmuted has already been chosen. He'll come from another continent, into Europe. Those of you who need to come in, and still carry on for transmutation from system one, to system two, and three to four, will go into September, October. Here (flight tests) we have passed over 100, and we're still getting people registered. Mobile transmutation, we're still getting registered. The same with what we call, transmutation within the enhancement enter.

We'll only accept 20, and 20 people for Moon and Mars mission. What does this mean? It means we take you from the Enhancement Center (EC), (:26). and we land you on the location on Moon. We transfer two people at the same time. To have evidence of what we change, and how we change, that the other one can see us. We allocate up to three days for this process. For landing you there will take us a few seconds. For bringing you back,

it takes us a few seconds, but the process is to see how you behave, and how you look. You will not look as a human on the platform of the Moon.

Sometime after, when we qualify enough, to understand this out of the 20 transmutations to Moon, we'll go to Mars. Mars is important for us because Moon has characteristics of the Earth. Mars is unknown energy pack, even though we know it.

Sometime in 2024 - 2025, we'll choose another Solar System in this galaxy, and there on, other galaxies. The process is unstoppable. We cannot stop this process, because the knowledge is gathering, and the position has been created.

So from now, I'll accept the first 20 people who want to land on the Moon, preferred to be a couple, preferred to be people who know each other. We have put a cost of 25,000 Euro for this process. We have put a cost of 50,000 for Mars. Don't forget the future relies on what we establish today.

The Moon and Mars comes as a donation to the foundation, (:28). as we'll use different locations and research positions of the Keshe Foundation to complete this process. I close the Moon and Mars gap, within the next few days. I know many of you would like to do this. But then after applications we receive, donations we receive, we decide which one goes, and which one comes first, second, third, and fourth.

As you remember, when it came to the first man, was Armstrong, and we always remember. We don't remember much who has been in the second, third, and other ?? ?? So 25,000 is what is set, for to take you to Moon. Don't forget the pay quarter million, 1 million, to be a few seconds in the air, to the other space agencies, which use rockets.

This position for us is important. Because we want to see how our bone structure will change. We want to see how the Soul of the Physicality, and the Soul of the Man, and the Soul of the Moon will create a new feature for us. And why we do in two's. and maybe four's, is to witness, to see the other, to see how we will come. This operation of the Moon, transportation and transmutation (T&T) will start early next year.

But we have to understand this. Those of you who come with us to Moon, you will come back as a different person, because you will see the world of Creation through the transmutation. You will become mature to understanding of the soul of the Creator. You'll become to understand you are different.

In a way, traveling the depths of the universe makes you to become a new being. (:30). A new understanding, a new comprehension for Totality of the knowledge of the Creation. Those of you who came to Keshe Foundation, those of you who came to Linz center and felt the change, touched by how your soul was, and how your soul can travel. Now, it's what we came here as Keshe Foundation Spaceship Institute. As of 2023, we become a truly space program on the levels of the energies of the universe.

We will sign a contract with you on the flight pattern, which means we decide, and how we decide is our decision. You might land on the Moon, you might land on the Mars, and you decide life is so peaceful, is so beautiful, that you do not want to come back, the decision is yours.

There has been a controversy about if there are other creatures on the Moon. We heard, we listened, for past years, there is always a talk a two minute session missing from Armstrong's, and communication of the Apollo, to what we call, Cape Canaveral, to the American Space Center. The controversy has been, that Armstrong reported seeing other creatures across the great. The claim that he has encountered other life style, and it cannot, it could not be heard by the world of public.

If he did, or if he did not, we, as the Knowledge Seekers (KS) will see the true form of them. There is no corner of the universe, (:32). which is not habited. There is no corner of the universe were a kind of lifestyle doesn't exist.

You know, when people go to conquer Everest, they go to the camp, and they go to the final camp, before the final onset. Many people of the universe, to see the beauty of the Earth, use the Moon for that purpose. The final planning, the final position. Because the life on this planet is so physical, everything is observed and can be seen. So the Moon has been used by Universal Community who come, as what I call, the final landing, before the launch to earth. To come and see where Mitra was, how Mitra felt.

And soon these lights will increase as we go to the Moon, to come and see the children of Mitra. The new generation, the daughter of Mitra, and life on this planet. So if, and what has been a mystery about Armstrong's two minutes silence, and missing of the voice communication, will be clear to us.

But the most important thing for us will be, for the first time as we travel through the dimension of the Soul of the Man (STM). Would we see the soul of the creatures of the universe, or would see the physicality of the men of the universe? This is not anymore to what we assumed, what we thought, what we guessed. It's the reality, the first 20 people on the Moon will bring us back. They all will feel the same. (:34). They all will feel as they are created from the structure of the interaction of the fields of the STM, the Soul of the Physicality (STP) of the Man, and the Soul of the Moon.

The important thing for us when we bring you back is, how you will interact with the society here. How you will change, how your emotions, how your physicality change. Would you be riddled with cancer when you go, and how would that cancer be when you come back? If you were a scientist in a knowledge of the physiology, would you come back with a knowledge of the physiology of the universe? Because now you've become a Universal Community person, being.

The first 20 People will be for us an enigma. We have to understand, through the Soul of the structure of the Creation of the universe. I will be videoed. To you, you'll be on your own. But to you I'll be video. I'll be there to observe, to see, to understand how you as

humans learn, how you bring the knowledge back, how much you become the true humans.

Keshe Foundation has truly entered the Space Technology as of today. We have tested the engines, we have tested the passengers, we have brought you to become the Mojhans, "the brother of love." And with it, we have brought the total understanding of the Creation. (:36).

I will close the Moon and Mars landing sessions within the next few days. It does not matter what wealth you carry, we choose those who have sincerely came as a souls, to serve. You have to understand, this could be a one way ticket. Not to die, but to be born in the dimension of the Soul of the Creation in the universe. You might decide to come back in time, and visit. You might come back with us, and bring us the knowledge and the technology. You might come back and bring us the love of the Creator.

The Moon and the Mars transmission of flights, will be the same time, exactly like when the man went to the Moon. I watched it on the roof, wondering what man will do, and what he sees. Some 55 years later, I'll be there on the Moon, to see what actually man become. What he will behave. Would he still kill. Would he behave correct, with the Universal Community on the Moon?

Those of you who went to the Moon and come back, will not be the same as before. You'll be knowledgeable to knowledge of the universe, (:38). where the matter state becomes irrelevant.

By mid end of next year, we'll open a colony of man on the Moon. Because then it's easy for us. Then we understand more, and then from there to Mars, and then the next, and further on. There is no position on the Keshe Foundation, what I call, sales point, to fly for the Moon and Mars mission. You make a donation to the Keshe Foundation direct, and ask to be on the flight system list.

It will be interesting for us to have a couple. It will be interest for us to have a brother and a sister. It'll be interesting to us to have friends. It'll be interesting to see how they react. It'll be important for us if, what we call, visualization of the information, when you come back is visualized, not recorded on camera. It'll be in a different dimension and direction. And we will see how the technology will bring a new dimension to all of us.

This way, for the first time man becomes a true member of the Universal Community. (:40). The Moon mission starting from beginning of 2023, is what we call, the opening of new knowledge. Opening of new understanding.

What will be interesting to us is, once you reach the Moon, how come you have all knowledge needed to live on the Moon. When you land on the Mars, how come you have all the knowledge, you know what you have to do. You know what to eat, you know where to go, you know how to absorb the energies of this planet. It'll be interesting how the Knowledge Seekers watch, and learn, and understand the new space technology.

In a way, from 2023, we truly join the Universal Community. Because we go to universe, we leave the village of Earth, and where we learn how to educate ourselves with the knowledge of ?? tomorrow. The most interesting part will be, how you come back. How you will be graduate into the knowledge of the universe. And then the first people who come back, they'll have access, they'll have the knowledge to become the true teachers, to understand, to be able to elevate the Soul of the others with the knowledge. Not prophets, nobody else. But as a normal being, (:42). how you transfer knowledge, how you teach, and how you bring, not only the human race, but other races of the universe, to understand the process of the Creation, and the way we have taught you.

We will, we will teach, we carry on teaching. And in that process, we'll create a condition of the common knowledge for all of us. In a way, from the humans, to the stone, to the animal, to the trees. To everything, which exists on this planet, to become knowledgeable about the life and Creation. 2023 the space missions of Keshe Foundation, it'll be the beginning of what we call, the cycle of change.

We will see the establishment of the world peace. We will see the establishment of One Planet, One Nation, One Race. We see in that process, when we can transmute you to any position in the universe, the end of religions. We'll see the end of governments, and we'll see the end of what we call, injustices, on the name of the governments.

Because the process will come so transparent, that none of us will dare to bring a separation. We will see the end of the racism, as we all unite to become the conqueror of the peace in the universe. It becomes like a football match, (:44). in a country. When they see national games, from one ball club to another, we fight, which team, which side? When they come to the national level, and international level. We stand for our nations, we don't care which team we supported. Because it is us.

Then now man comes united to be one soul for the universe. It does not matter what race, what position on this planet we've been born. We'll strive to change the condition, where man will not be known as an animal. But all of us will change by ourselves to become the banner of peace, banner of knowledge, and to be proud to be from blood of Mitra, where the Creator came from. Then the process will become beautiful for all of us.

As I said, always it's hard to find to start a new structure, new religion, new country, new dimension. But when you give, and people come themselves, they will change themselves. I always said, the whole of the humanity has to change to accept peace, we will become peaceful. We'll become that followers of "One Nation" football team, irrespective of our color, and race, and which position in that nation we come from.

This will be engraved in the structure of the life and the STM. Now you understand what we write as One Planet, One Nation, One Race, as ?? true, transmutation & transportation of the Man to U. (:46). Man will change, we become One Nation, One Planet, One Race to the citizens of the universe.

It will be interesting, when we put a black man, a Chinese, a white man, and a yellow man, or other color of the man, short, tall, different color of eyes into these systems. How would they look on Moon and Mars and in the U. Would the black man, become white on the Moon, and the white man become black on the Moon. Or all will appear as a grey silverish light. Then those of you who were racist by the color, and those of you who tried to change your color, and saw abuse, because of the color, all become equal. Would the people of the universe sees us as different color, or we are all silvery colored men of the planet earth. Then it'll be interesting to see when a black man comes back into Linz, and when a white man comes back to Linz.

These are not fairy tales, these are realities which you have, and some of you have already started going through it, through going to Linz, and going through the operation to transmutation and transportation in Linz. Book your ticket from the flight, from wherever you are on this corner of this planet, (:48). to join us in 2023, to travel to different destinations to Moon and Mars and beyond.

It was interesting, one of the Knowledge Seekers in past few weeks has sent us the coordinates of the landing on the Moon. Saying that somebody who was there, worked with NASA, gave the coordinates. If your guy who works with what we call, Apollo system, and has more information for us, let us share. Contact us and let's take it further.

At a young age of just prior to going to university, I met one of the most beautiful, serene women in the world called, Mary Hardy. She was part of the NASA mission to Apollo. She was one of the key members of the Apollo landing. I came to know her well, and shared a lot of knowledge, with her beauty. She lived in England in Oxford shire. I made a lot of time to see her, to understand how the Americans got it wrong, and how what was. Little, or whatever knowledge she could give me, compared to what I had, showed me with all the minds of what we call, NASA, they still have not understood the Totality.

In this process, mankind has become to understand the totality. It's not anymore NASA mission. It's not any more Russian Space Agency, or the Iranian Space Agency, (:50). it's the human race on the banner of Keshe Foundation Spaceship Institute, as One Nation, One Race, One Planet, we will enter, and we will leave the village of Earth. Not in the physical dimension (D) of the physicality of today. Not with what I call, the "monkey suit," but with the suit of the Creation, with the suit of the knowledge of the U.

Join me with the excursion to the Moon, to start with, and if you decide you want to do the Mars and the Moon, it will be all the same. Develop with us, to deliver man into space, man into the Universal Community, and become the first ambassador of man, where the man goes to universe, from the human race. Not man goes to space as a monkey suit, as a man.

The citizens of universe will envy you, that how you super-passed them. Being such a small village, in a very corner of this universe. You have access to the Knowledge of the Creation, and what they dreamt about for billions of years to achieve.

Join me in Linz, and my soul will travel with your soul, to make sure that you're safe, and you come back safe. In a way, we don't drop you into the ocean. (:52). We'll come to you. We'll come with you, we hold your hands to learn how to live in ocean of the universe, magnetic fields.

The time for man to enter a Universal Community has come, We don't look at it, if it's the first of January. It's Islamic calendar, or Jewish calendar, or whatever calendar. The time comes when the man matures, and the point of maturity has come to be. But as I said, the whole race has to see, the whole race has to do, and the whole race has to feel, to become One Nation.

As I said once, to one of my children, what happened when we teach the other citizens of the universe to play football? Will they all become the supporters of the Earth souls, playing the game? Then we have no nations and nationalities. Would it be nice to introduce the game of football, the beautiful game, which actually the ball is the essence, the ?? side, the way the universe looks and moves. Would we kick it with physicality, or we would bring the motion of the ball of the universe with our knowledge, how we own it, how we change it. And in the game the ball becomes the universe and the Unicose.

Here we use the physicality to create the motion. There we create the knowledge of creation to sustain and play football, (:54). with Universal Community. Join me in Linz, we might bring you back to Linz a couple of times prior to the final test, to bring, to put everything in position. Do not expect that you come into the system, and the next time you're on the Moon. We have to structure, we have to put you through the system, till you settle directly for that transmission and transmutation. The most interesting part will be, how anxiously we citizens of the Earth, wait for your return.

I wonder if the Americans left a camera, that when the man of Earth goes in front of it, and switches it on, and powers it somehow, will transmit back to what we call, Earth to show how the man looks. What happens when the systems on Mars are retriggered, and the power supply is established, the communication line set, what and how citizens of the Earth, will see the citizen of man on Mars and Moon.

The process of understanding the transmutation is very simple. In the past, even with the teaching, the earlier Intro of today, we confirmed, we have shown the understanding of the plasma, (:56), where the fields of the totality of the electron, proton, and neutron, as a energy pack is noticed.

One thing which many of you will understand, because we haven't been through it yet, is that when we send you to the Moon, from the Earth, you will not feel much difference except when you enter the atmospheric condition, field forces of the two planets. But what will be interesting, which will come to us, because we don't travel in dimension of the physicality, we traveled in the dimension of field forces, when we send you to Mars, how would you feel? I'll tell you exactly how you will feel. You'll enter a plasmatic M field, of the atom of the earth.

Here you cross into the plasma of .. Earth condition, including the Moon, and then when you enter the Earth, you'll have atmospheric condition of the Moon. (audio drop ..) (:58).

.. of the Earth, when you work with plasmas.

The present what we call, Astrophysicist, the present missions to Mars have never, they have seen glimpses, they see changes but they don't understand, that they actually enter the plasma fields of the totality.

This we know in Solar System (SS), with the Sun in the center, and different Mars, and moons, we have the same structure which we call, the SS. When you enter the Solar System, you enter the zone, then you enter the zone of the fields, and then you enter the zone of the planet, or the moon of the planet. This entry and exit is important, and will be vital to understanding of the transmutation of the elements. If you look at it, when I create the man in what I call, in his own dimension, and I expand your soul, and you become a bubble. It's the same, it does not matter how, and what's inside, (1:00). the Totality, which creates dimension within the plasma.

Now, you understand, why we went this way, why we went through the enhancement technology, why we went through every other aspects. What will bring us to this point? How we will change when we enter this plasma, into this position, or to this position, or even to the center.

In the teaching of the past, for some of you who have not understood, or in some teachings, none of you have understood, is that we speak about the planet, we speak about the gravitational magnetic field of the planet. We speak about Inertia. In the world of the science of the Creation of the man, we speak about the STM, which is gravitational magnetic fields of the Totality. (1:02).

**Proofed to here >>**

But, what is that elusive Inertia, which we have chosen another word for it. We call Inertia as the interaction of the matter state field strength. We call Inertia in the body of the man, the spirit. When the soul interacts with the Totality of the fields of the universe, where the Spirit, or Inertia, involved only with the structure of the physicality of the existence, of the planet or the ?? body.

When you travel to another dimension, with another gravitational magnetic field, the soul will still stay the same. But now, the spirits of the man. The Inertia of the internal field forces of the man, has to deal with the Inertial field forces of the planet. And this will give the new shape of the man, as the man will be different, and the shape of the man will become of the dimension of the existence, of the planet, position, and the place. How you interact, how the fields interact? Would you become like a fish, in the oceans of the liquid of the planet, you become the bird in the skies of it, or you become a man on the ground of it. (1:04).

Now, you understand the isotopes and how look at the plasma interaction. As I said, Man has chosen many words for the same thing. We call it inertia in the world of physics. We call it, the spirit in the dimension of the life of the man.

Then mankind becomes wise to understanding the totality, and knowing how he will behave. Different Inertias have created gold, oxygen, and the rest. What would your Inertia in the dimension of the plasmatic condition with Moon, will create a new you. Would you be the structure of the gold or the hydrogen?

The Totality of the knowledge sits within the structure the Enhancement Units within Linz. From everything which the man is made of, we have created the fields. Do you need a bone structure on the Moon. Do you need a bone structure in another dimension in the U. Or would you stay, to become new structures we have never known. A combination of, a totality of. A way that allows us to be. In the D of the physical man, (1:06). we are just as it is, bone stuck to each other, to create the .... the shape of the man.

When you look at the structure of the fish, some fish have that bone structure, which we are familiar with. Have you looked at the structure of the bone of the blow fish? Isn't it made of connection of the star bones? As he blows himself up, the structure of position becomes loosely connected. So, man will change in that dimension and direction.

If the field the strength of our STP in a condition of another planet cannot support the structure, will become the same as the worm. But would us, as a structure, dig into the ground of the planet, or shall we be a flying worm. The interaction of the fields of this flying worm, would it create a light with the environment of the planet?

What many of us have seen as a cigarette light shape floating. Would the structure of us, (1:08). not support a skeleton, and we become the ball of lights, many of us have seen. With intelligence, knowing where it goes.

Now, we have now even brought you to understand what do you see as a cigarette lights in the sky, or a ball flying around, is a being with intelligence, knowing where he is going. He is going fast to another place. He has seen the Niagara Falls, he wants to go see the pyramids of Egypt. This is his aura, it's interaction of the STP, and the STM, with interaction with the fields of the gases of this planet.

Then you understand there is life beneath us, within the sphere ?? different life structures and layers of this planetary system.

There are cavities within the structure of every planet, that does not contain anything, but fields, and new life in these fields has been created. A life that lives by what is available to it the time, place, and position. As I said many times, there's even life within the center of the Sun. It cannot be any different, because if the fields in different strength lead to the Creation of the man, the fields in a higher order interaction, it has to create condition of

life. It has to create condition of the maturity of understanding of the time, place, and the position

As I said, we gradually open your eyes to the truth, that when you land on the Moon, (1:10). a flying light does not become a prophet to you, if he shows you something. You just take it as another sign of the Creation, another beauty of the Creator. I made an image of Myself, but the beauty of it is, that I have many images, as I interact in different fields, in different strengths. I made life in the image of myself, and not only that, life exists in every dimension of the U. It's the interaction of the spirit of the man, or creature, with its environment, which decides the shape of the being, and ?? the essence of the intelligence of the being.

I made the U the image of myself, as a light, as a soul, as a sun. And the physicality comes from interaction of the Sun with its environment, to manifest itself as planets, and the moons, or as a man, and the creatures on the planet.

In 2023, the fulfillment of the promise of the past will be completed, not by us, but by you as the passenger of the U. (1:12). A new cycle will start for the man, a new understanding. It will be like the first flights by the Wright brothers. And now we see where the flight system has taken us, from jumbo jets to Airbus 380, to rocket propulsion, and what we call, "other labs."

I'll make men so busy with the new knowledge in the next few weeks, that man will not have time to go to war. Man will see no essence in conflict, but in Unity. We'll bring the end of the religions, as men becomes aware of the soul and STP, and does not need no interpreter, and no abuser. Religions will unite to fore stand this new knowledge, as it brings and end to them. But they'll find no match, to what is to be delivered. By elevating the soul, we'll walk away from religion, as we become religious ourselves, in understanding the work of the Creator, with no interpreter needed.

This time it's not the Americans, or the Russians to go to space. This time it's me who goes to space. It's me who decides is me who is the ambassador of the man, and it's me who has to be the best.

In so many ways, you'll become the same, you'll become the first Armstrong and Wright brothers, and the rest all together in one go. (1:14). And then we'll see how you will land, how you will behave, and then you then you come back. And there is one thing, we have not sworn you to secrecy. As you have to teach. You have to share and to understand the totality.

Join me on the Moon and Mars and then the universe is yours. Because once I teach you to walk and talk you will understand how to connect to the rest of the Universal Community without any curtains, without any intermediaries. Where you become the man of peace, you will become the ambassador of man, in the U.

Something which those of you who go to these excursions, onto the Moon, and onto the other planetary systems, and into the space, will be that your families will never miss you, because you will establish a connection through the soul. They will feel your presence at all times. Where in a dimension of the physicality you have to go to see, or to be with, here you are with all the time. This sense of missing, goes out of the window. The essence of everlasting omnipotent and presence, becomes the what I call, "the lifestyle of the man who goes into this change."

Then we understand we just don't need the connection to physicality of us, we're alive, (1:16). we make connection with those who we have lost, or have not seen, or have been in the past, in our lives. Where now there is no restriction of the time, position, and the space. The soul of the son, the soul of the brother, the soul of the mother, soul of the friend who passed in one condition or another, years ago. As we live in the dimension of the space and time of the universe, and not the physicality of man, which is restricted by his position and time.

Welcome to my world, and where I came from, and welcome to the life of the man in ?? spirit, as part of the Universal Community. join me in Linz, to become, to take the first man into space, and join us in the space, that we understand the Totality of the work of the Universe. The true race, for human race, to become part of the Universal Community has started.

We keep you in the essence of the STP of the Man, as long as you wish on this planet. Beyond this planet is yours, and your soul, you become the captain of your life. Would you like to come back to the life and pains on this planet? Or would you like to be free from everything, and be part of the Universal Community and travel the span of the U. Because once you've learned, you cannot forget it.

Let's have a break when we come back. (1:18). And then the answer questions that might be asked. In the second part I'll give to you a new development in the Keshe Foundation in respect to the Energy and Gas Units.  
(Shows part 2 of Intro video .. )

**<<< BREAK >>>** 446 KSW Aug 18,2022 (1:27 )

This is the second half of our show. (1:28). And Mr. Keshe usually takes questions during this time. Or has something else you'd like to say first, how would you like to begin Mr. Keshe?

K- We'll have some questions to answer if there is, and then we'll come back, and everything else?

Q: ... Last Monday during the discussions about the technology that we do every Monday, in our Brazilian group, we listened to the recording of the plasma Reactor Group, where you made the transmutation test with the Knowledge Seekers at Rick's teaching. Many of us in our group had different and interesting experiences, while listening to the recording of this teaching with our headphones. My experience was a being in a place that I call, deep space. This place was all dark with billions of points of light. So I would like to know what this place is, or is it irrelevant to think about it, and what would these points of light be?

K- I haven't been there, I don't know. It's what we see, and what you understand from the timer and position, (1:30). and then you explained. This is what I said, if you remember at the beginning of the trials before we started in Linz. That we accept, we have to accept what is sent, and what people see. Some people will exaggerate, some people will make some things up. But, in fact, if you've been to Linz, and you've been through the process, and when you come out, we always ask questions, sometimes very deep question sometimes, some of the Knowledge Seekers go through such emotional condition, that they don't even want to talk. We've had two or three cases which the Knowledge Seekers just want to leave. And they say, we come back and give you a recording. Because the emotions so touched, and what they've seen, and who they want to, to understand. They want to mature to what they have been through in the system, how they came in touch with their own soul, experiences they do. So, what do you see? We have? You have to explain to us, because we were not there.

Q: ... My first question is related to the Unicose. .. We have a Sun in our Solar System, which the planets rotate around, the moons rotate around the planets. We have a Sun in our galaxy, and our solar systems rotate around that. We have a Sun in, in the center of a universe, and the other galaxies go around that. (1:32). The universe is part of a cluster of universes in the Unicose, I believe off the top of my head, you said it was between six and nine universes that make a cluster. That cluster is one of many clusters of universes. Do these clusters rotate around a Unicose Sun? This is my first question. Thank you.

K- As many planets, and moons, and whatever rotate around the Sun, if you understood the Totality. So, the Unicose rotates around one Sun, which is the Creator, the Soul of the Creator, where all the energy comes from. When you look at the drawing of the Unicose, especially in the back of the third book, that center point is the Creator. The rest are on their own, their own clusters of their own clusters, of their own cluster.

If you compare it to the Soul of the Man your own brain has its own Soul. Your kidney has its own Soul. Your heart has its own Soul. Then within it, there are other sections, compartments of the fields of the strength to clean up the zinc, let's say in your kidney, and another part to clean any vitamins D's. The vitamin D's become little galaxies.

Then within the galaxies you have different tissues, and the cells, and they become these direct planetary systems, and whatever, whatever. But in fact, the essence of life of this cell in the kidney (1:34). which does certain job, is connected to the soul, which has been there ?? in the center of. And that's the same. The whole Unicoise evolves and fed by the Soul of the Creator within the center. All these Universes are those clusters of kidneys, and whatever, different galaxies of it.

Q: .. That really does give more comprehension to, "I made man in the image of myself." That's beautiful. I'm very grateful. My second question is related to the technology that you are releasing. The Flight Systems, the Transmutation Systems. More towards the Flight System. How does the Flight System that the Keshe Foundation has built, how does it differ from using the Flight System of the Soul of the Man? What are the differences there, please?

K- What do you mean by that, explain yourself?

Q: Well, with the reduction of the STP, and the correct conduct, activating your Carbon 14. Well depending on the person, I guess, certain practices, people are able to fly around this universe, possibly other universes. Humans are able to do this, just using their soul, their STM, (1:36). because of the reduction of the STP, and their conduct, they can fly around space. How does, for instance, is there any difference in that flight between a human using their STM, and the flight system that has been built and it's been tested in Linz?

K- The system built Linz gives you the opportunity,.. to show the beauty of your Soul to yourself, and nobody else, and to teach you how to reach it. It's a tool for you to get to know how to operate. Where your soul is. We don't do anything else. The flight. We call it a Flight System, but in fact, in reality, it's an expansion system of the Soul. In a way, it's the key to unlock the STM from the prison of the physicality of the man.

When we go back to a lot of teachings. When we talk about from the beginning, that the STM, what you call the Spirit, or you call the STP has imprisoned the STM. If you learn the other parts of the teaching, where like a Tokomak in a plasma condition, you cannot hold the plasma (1:38). unless you have another plasma, which can contain it. So, your spirit has created a net around your soul, by field energy, nothing else.

Q: Could you just explain what do you refer to as spirit?

K- STP. In a cultural, in a religious, you call it, the Spirit, Holy Spirit. The Holy Spirit is your STP.

In the work of the Enhancement Unit, when we put you in it, we in a way, dilute this (the STP around the body). That allows the STM to expand beyond. But still, this (the STM) has a limitation to what it expands to. Where it gets out (draws long shaped bulging of the STM through the weak points of the STP around the body).

If you have a balloon. Then you force this balloon, you fill it with air, and then you force it, you put pressure on it. What does it do? You see a little bubbles sticking out. Because

now the field pressure creates this. In the world of Plasma Technology, we don't put a pressure on it, we dilute the strength of the fields of the spirit, the STP, (1:40). and then the soul decides to go to brother, mother, another position in the galaxy. There's no difference.

We don't let this to blow up and the balloon to explode. We allow to reduce that, that this becomes the new shape. Now, the spirit or the STP is diluted inside. It will be very interesting in the coming time, when man matures in more detail in the knowledge, you will see your physicality totally different. Now, we look at the physicality of the Man in a physical dimension this way. But when we become mature and we look at our spirit, or the STP, we will not see this shape (normal shape of man on earth). No way. We will see a field transition.

You know, the best way I can explain it, and I usually explain it this way when teaching children. Is you go on a rope, yeah? You go on a rope, and this is your body, and you try to balance on this rope. You move your arm up, you move an arm down, you put a leg up, you pull the leg down, and you find your balance to stay on the rope. But your shape doesn't change.

It's very much the same as we'll see in the STP in the dimension of energy. We see everything in a compact. In physicality, you move a hand and a leg to balance yourself. (1:42). In the world of plasma, you create balance with your other systems in the environment.

One day when you understand this, this becomes very clear, you understand how, what the job of the Enhancement Units (EU) are. As I always said, we give you a Rolls Royce. It's beautiful. It's full of everything which a man has dreamed of, ?? ?? of perfection ??. In the knowledge of the man, we give you the knowledge of the Creator. It's that Rolls Royce. Now you know, you have a Soul in it. But the only difference is, that Rolls Royce is on the street, it doesn't belong to you. Unless we give you the key for it.

It's the same with your Soul. The Rolls Royce, the beauty of your soul is there. Now with the Enhancement Unit, we give you the key. The richness, the luxury of understanding the knowledge of the creation. That's all it is. Here, in a way, the key to the knowledge of the Universe. Here you have a key for the physical matter to say you have reached ?? ?? . With the Enhancement Unit, we give the key to be able to enter to the knowledge of the Universe. That's all it is.

It's not a magic box. It's understanding the work of the Universe. Understanding what it is, and how we create that condition. I don't decide where you go. I don't decide, how part of physicality manifests itself in that dimension. (1:44). I've asked many people who've been through the system. I said, you know, did you have a drink with your father or your brother, or whatever who died years ago? Yes. Could you bring it back? No. Because you're in dimension of the energies.

If you go in the dimension of physicality, and you went to New York, and saw your brother and he shared a glass of wine with you. You can still have ?? the glass in your hand, because you're in the dimension of the ?? (the brother is still alive so he is our D).

But in the dimension of the, ?? when your grandfather (already) died, when you met, you are in the dimension of the Soul, because there is (he has) no physicality. Because he has lost, he has exchanged the maturity of the STP, the Spirit is gone, as you call it.

It's a difference when we travel you with the system. The spirit and the soul are together. When you die, you leave the spirit of the Totality behind. That's why you cannot come back to create it. Because the, what I call, the composition of the physicality to become another part of other creatures, does not allow it to come back. Because if we going to bring all the pieces of the spirit of the man into creation, to come "back to the future," as you call it, you'll be a piece in the worm, and God knows, the lizard, and the fly and everything else. The spirit of whatever they ate, and whatever children that were created from them, during the time of your death on this day. So it's impossible.

But the dimension of the soul you don't have the spirit with you. You have the soul, the energy of the soul. That's why I said, if man knew what happens to him after death, he has no dimension of physicality, and when this soul takes position in another dimension in the universe. Then in that position, if it decides, if the conditions created in interaction with the fields of the Inertia of the environment. (1:46). Then you will create its own physicality through the Inertia. Or what we call, "the new spirit will be created." Because he has to slow down, and in that slow down, it changes. It's the same with the Soul of the Creator, when it comes down, it (He) reduces (in strength), and becomes the man. But in essence, the fields of His creation.

Are there any other question?

Before we go to another question, there is something important. Absolutely beautiful, what is going to be announced by the Keshe Foundation. In the past few days, and past few weeks, and years, we have promoted the generator by the Keshe Foundation. In the past few weeks, we have brought you the Gas production unit and what we call, the Plasma Power Unit. Where the two kilowatts we have put for 10k (Euros), and the 10 kilowatt we have taught for 60k.

Keshe Foundation in this (Plasma Unit) we produce electric power, in this (Gas Unit) we produce gases. We have and we will introduce in the next short time, maybe by next week, a new 10,000, what we call 10 kilowatt Energy unit at a cost of 10,000 Euro. Where the beauty is, this power unit is and will supply (1:48). you the energy to 10 kilowatts, and as part of it, a Gas Production. Where what we will do is, at your system you have your (own) generator for your electricity, and you have a gas production for your heating and cooking or whatever you want. The hybrid, a combined bred. Never been done before.

So what we do, we feed the gas production out for you. Do you want to burn, you want to cook and we feed the same gas to what we call a gas generator. A 10 kilowatt gas generator now is on the cards for 10,000 Euros. You've got to understand. You go and buy a gas generator for 600, 800, 2,000 (Euros), whatever. But you have to keep on buying fuel for it. This technology, this way you don't need (to buy fuel for it). It's forever lasting.

There'll be some elements you need to continuously to add, which costs (almost) nothing. But in essence, what we call, a combined unit of electricity and gas as an energy source is on offer from the Keshe Foundation for 10,000 Euro.

We will market it, we'll just working on it for the next week or two. Then you will see one system. On one side you have what we call, the pipe to add to your house, and one side the pipe will fit into a standard generator, a gas generator. So, the hybrid system allows, the combined system, allows us now to see the full energy demand of our house. We try to limit this to maybe 1,000 or 2,000 to begin with. Because it's a complicated system, we have, to purchase the other parts. (1:50). We're not getting involved in the power generation side (you buy your own standard gas generator). But this is today's (offer), if you buy the energy Enhancement Unit for the power, you only get the electricity, and it's two kilowatt.

We are not changing. Those of you who bought one, and ask, "can I change it to one." We'll try to help you to do it. But from next couple of weeks, we allow this to come into operation. There is a discussion that about 72, maybe 73 people who trusted the Keshe Foundation 4 or 5 years ago, and bought the MaGrav generators, at around about 2,000 Euro.

There's a discussion in the Keshe Foundation. These units for your loyalty to us, will be given to you by very, very little change of cost. As long as we cover our cost. You trusted us, you stayed with us. We try, even if it means, we try to give it to you, as the cost of what you paid for the Foundation for it, we'll try to do this. It's only 70 People left, originally there were hundreds. We refunded all of you. Those who stayed with us, with what we call MaGrav generators, this unit is available, will be available to those. We have a list of it, we know who you are. There'll be an offering, we leave it your discretion to pay the balance, or a little bit more, whatever, to cover our costs. But you'll have the combination of the gas and what we call, the new system, that allows us to come to the next generation of the work.

Because what it is, it's very simple. Your gas is in plasmatic state, your energy unit, electricity, even it ?? lights you, is in plasmatic condition. With another plasma condition system, which we'll market very soon, you'll have your food, you have your whatever you need for, your processing of whatever. (1:52) So, the system as a whole, will become a feeder, will create generation of water, and will get you what you need.

So, the new, what we call, combination, Enhancement Unit for energy and for gas, will come to it. Don't forget, gases are the essence of the Creation of the Gans's, which are the essence of the energy the body of the man works.

With the electric power, we create the condition of the physicality energy. With the gases we create the condition of the Gans's energy. So, with the two, you will understand soon, we'll market the feed, the health, what we call, the processing, and everything else that you need in the house.

You can make a donation for this in the Keshe Foundation, and internally we transfer it to a sale when we market it. But it will be limited, because it depends how much and how we can bring the gas generators for you. In a way, you don't need to pay the fuel, and it's a lifetime system.

But all these systems has 100 Euro per annum, what we call, royalty fees to the Foundation. So, for next 20 years, you pay 100 Euro per year for all the gas, energy and electric bills you have. Then hopefully with the other parts added to it, the water and the food will come to it, which is nothing.

So, if you were waiting for when the Keshe Foundation would reach that completion point. Now, we have brought the system in, we're working on it. Maybe next week or two, we will release it. (1:54). Those of you who bought the gas unit, or you bought the energy unit, you have to top it up to the figure it is 10,000 Euros plus the shipping. So, even some of you who bought the, what you call, the system from Iran, which is built for what we call, power enhancement, like reducing the cost of the electricity. If you want to top it up, to change it, we can do so. So, you have a full generator and a gas supply together in one, what we call it, system. This makes it very easy for us to operate. In a way, we have brought a new era in the world of science and technology. Where you don't need to buy supplies anymore. You create it yourself. You have the electric, and you have the heating, and the cooking and whatever you like to do with it.

If you don't want to use the energy side, you can tank it as a gas and run a gas car operated and have the energy in the house for your electricity. 10 kilowatts is a very good, what you call it, level of consumption, it can meet all the demands of the house more or less. Unless you put 10 cookers on and 20 water heaters, and 10 heating ovens, and you live in a castle. But then you need about 10 of them. For ordinary man, 10 kilowatts it's absolutely perfect. It meets all the demands.

As I said, hopefully, we'll have come to understanding with one of the world leading nations. The proposals has been done, it's just to be signed in next few days. Then it'll be announced by the government, hopefully in through contractual agreements. That is and it will be allocated to one of the most leading nations in the world. Then we'll see how the others follow. (1:56).

In a way, in the western world, in Germany, they do not need to see the reduction (in production). The factory can buy two or three of these, and can run the factory, or in

combination of the higher generator, the gas generator, and take the supply. No company, no factory needs to be shut down, because of the shortage of energy. As this will meet the whole demand of the economy of the world.

As I said to one of our close allies and what we call, companies we collaborate with. To .. transfer this technology very rapidly into Africa in the next few weeks. Keshe Foundation collaborates with many organizations around the world. This allows us to in fact, to bring the power supply of both. To bring the change, to bring that needed change. Africa power production has reached limitation, they cannot buy gases and there were other things. Especially with the rise in the price of the fuel.

Now, every village, every town in Africa has the same opportunity and position as with the rest of the world. Where the Keshe Foundation will back, as part of its ?? profits of its corporations to expand this. We have reached collaboration with some of the major corporations to be able to expand this very rapid. On the back of this will come the what I call, the Enhancement Body Units, which are totally, totally revolutionized in the new system and structure.

So, for those of you who wanted to buy the generator. We can even allow you to buy. Go to the website of the Keshe Foundation, buy the two kilowatt and put in the text, (1:58). for the new integrated system, for the new, what you call, gas and energy, and we will take it that way. If you want to purchase one, don't go to the one which is a 10 kilowatt for 60,000 Euros. Go to the one, which says two kilowatts power. But in the notes put, "for the new combination system gas and energy." Then you'll get the full set, you don't need to change.

But when in time, in the next couple of weeks, we will change that. But you have this. And then we take all. If you just want a generator, you buy a generator. If you want a gas unit, you still keep your gas unit. If you want the combination to meet all the demands of the house, it's there. But this combination of the gas and energy unit, will come with a supplementary units very soon, where you can just add into the house, and generate all the clean water you need. You can add in the house and get all the energies you need for feeding the household, and everything else. Even your dog will not need to be fed. It's the beauty of it. It will come very nice. You will see it very soon.

It took us a long time to deliver it, but this combined system, which satisfies all the needs of the energy of demand of any household. As you understand, I think very soon, in the western world in next couple of years, these units becomes compulsory. When you build the house you have to have this unit in it. Which means the government does not have to connect to you. Doesn't need to put that cable lines down. Doesn't need to put what you call, gas pipes in. It'll save billions for them, and it creates a new condition of independence.

So, in a way you're welcome to the combined system of the energy, all you need, gas and electricity. (2:00) It's available in a good amount. 10 kilowatt is a fair amount for any household. 2 kilowatt there was ?? about three kilowatt. As I said, we had 70 odd people

who stayed with us, they committed themselves, and stayed with the Keshe Foundation. We'll find a solution to cover our costs. A little bit here and there, and we'll find a way to be able to deliver those to you. Then you'll be contacted through the email by the Keshe Foundation, in next few couple of two or three weeks. As we've been discussing in the Foundation, how to support those who supported us and stayed with us.

Any other questions?

R: Thank you. Mr. Keshe, there was a couple of comments there about the microphone being, people having a hard time with it. I find the audio is actually very good right now. But they're asking to move the microphone.

K- I think they've got excited with the news.

R: A little bit away from your mouth, perhaps? There is a suggestion to try a different microphone.

K- We are not going through that, playing we've been...

R: We are not going through that, no. Thank you for the suggestion. You wouldn't believe what we've already gone through to get to the point...

K- Even had Rick resigning from the noise, "I cannot work with this, get a new one."

R: In one point it was just too much.

K- No. iPhone headphones is perfect for us.

R: Sometimes it might get a little close or sometimes your voice is just naturally more deeper. You know, it is just the way it is sometimes.

K- It's just the way it works sometimes, it goes too deep.

Q: ... (2:02). All this knowledge that you have been passing on for 8 to 10 years based on science and universal knowledge. And we are now reaching the level of transmutation. My question is, how was this same knowledge passed at the time of Jesus Christ, since the knowledge of the physical body, the planet and the universe at that time, was very small and different from what we have today? Thank you.

K- Christ didn't have the understanding of it. But he had an insight of. It's a big difference. But you've got to remember one thing. You talk when you speak about Christ, you talk at the level of the ?? soul of his character. The soul of the Christ is the same as Moses, and Muhammad, and the rest. A man in different outlets, but it's the same man, and the same man speaks to you today. It's not the position, it's understanding to be able to share in time, place and the space.

The teaching is not just for man, the teaching is for the totality of the creation. As I said, when you talk about the Universal Community, then it's not just the village of the man, it's the totality of the universe which learns from the man. (2:04). So, it's just how you understand it. It's the same Soul, it's the same man in different clothes. But, the STP is aware of the knowledge of the Soul, but it's not able to share, because it's not there. People are not ready, beings are not ready for it.

Q: ... I am studying the Health teaching on the uvula held in 2014. You said that the uvula is the Twinity of the thalamus. With this knowledge, can we change the

morphology of the uvula through the contact with the fields of the Gans's of Zn and CO<sub>2</sub>, and thereby change our emotions in the brain?

K- Can you explain?

Q: Let me just reread the last part of the question, I think, can we change the morphology or the shape I guess, and use of the uvula through the contact with the fields of the Gans's of Zinc and CO<sub>2</sub>, thereby change our emotions in the brain? (2:06).

K- Every time you come in touch with any plasmatic field, or collection of plasmatic fields, it will ?? effect you. The best sign, the best way to understand. If you come in touch with the plasma of a Zn or CO<sub>2</sub> you might go through, because it's Gans's, some changes. But we all know when we come in touch with Gans's, it touches our emotion.

The biggest one is when you come in touch with a collection of Gans's, we call it, "a man and a woman," and we fall in love. We change. Because now it's change of emotion. Because the field strength received and given is so much. So, we don't interact. We might never seen, never touched, or come physically in touch with the person, but we fall in love with, and we change our life with it.

The best example of this is the ex-president of Kazakhstan, Nazarbayev. In 90s, usually the presidents of the Eastern Blocs, or Communist Blocs, whatever. Make sure always there is a news about them at the beginning. The first news is always about the presidents, or the government. They watch, because they want to see what they say, how they propagandize. I know this, because I used to work with the family of Nazarbayev, personally. Nazarbayev sitting, he is not a president anymore, he moved a couple of years ago now. Sitting, watching to the night news to see what the propaganda is. There is a news broadcaster for the first time on, and Nazarbayev fell in love with this woman on television, on the screen. (2:08). The woman never saw the outside world for a long time. She was just picked up from the television station, taken to the palace. They have a child from each other. I think a couple of children up to now.

It's just, a world leader fell in love with a woman on the screen, the touch of the fields. She changed his life. Nazarbayev changed with this love affair, by just receiving the fields. We've seen this many times. Do we need the Gans's to change our emotions? Do we need Gans's to be there? With the combination Gans's of what we call, the fields of life, makes us to fall in love, makes us to understand, make us to change feeling.

So yes, it touches emotion. Because we look at the Gans of copper and zinc. But the biggest punch to this, the biggest collection of Gans's is another being, be it a dog, be it a cat, be it a man or woman, that's all it is. Emotions through interaction of the fields.

Any other question?

Q: ... You didn't talk much about the power Enhancement Unit, which several of us have purchased. (2:10). It was my understanding that the power Enhancement Unit helped the power of course, but then it also had many other effects, such as helping you at the soul level as well, the environment of your house and stuff like that. Do these new units ...

K- It's the extension of the same, it's the extension of the same system.

Q: Okay, so it will accomplish the same things at the soul level and for use of energy production?

K- Yes, because. Go back to what we said about the CO2 Gas Unit. That the CO2 gas unit is not the gas in the (matter state) level of what we use the CO2 for, let's say, drinking, or for putting a fire out. It does that. But it carries a conversion of energy of the Gans, which means gives life, connects to giving life.

It's very interesting. We can put two people in the same room with a fire and use a Gans CO2 based structure. One will die and one will survive. The soul which survives still wants to be here. The soul which will find the physicality, uses the energies of the CO2 with connection to the environment, to elevate the Soul to leave the physicality. Point of death. But elevated the soul.

You might find a husband and wife in the bed in a fire. The wife lives, because of the love of the grandchild. (2:12). The husband let's go, because he had enough of the pains of this life with the cancer and the rest. It's the soul which decides.

The units which come out is the extension to that. If you buy the Enhancement Unit, that's what it does, it has. But if you go for the other one, all technologies we delivery, is a combination of elevation of the soul, and the food, and the rest of it. You will see what you bought. But as the technology evolves, we showed you three weeks ago, we showed you the gas power production. We showed you the power generator, the week before that. Now we see a combination, but the energy it produces, is a Plasmatic energy in the house. The gas you burn is a Plasmatic, it's not just a matter state gas.

That's the beauty of it. You'll feel the change. It's like when you put Gans's around the house, or bottles, or you fed a tree. Going back to our friend in Australia, Antonio, which is always around with this thing. If you, as we said last time, if you put a CO2 unit, or a Gas unit in the center. This is your fields. Now makes it much easier for you. Because if you have the Energy units, like light bulbs around the field, you'll create that condition. The light shine all the way through to the roots, to the top of the ?? heart. (2:14). These are extensions to the present knowledge that we add to.

There is no need for fertilizers anymore, if you understand how to work this thing. How to produce the gases, that is in combination with the lighting, or the fields and itself. No harvesting, you don't have to worry about how many times you water it. As you go back, go back into the documents about the growth of the harvests in the Mongolia. We did with the Chinese authorities. We were mature, two or three weeks before their harvest, a week before their harvest. In those times, the birds came and ate a lot of it, they were getting fed up. They've never seen so many birds eating. Even after the birds, all the complaints we had, that the birds were still eating, we still had, if I am correct, 72 kilogram they produce and we used 240 odd kilos. Can you imagine how much the birds have eaten in those two, three weeks when the harvest was already ready.

While we're waiting for the fertilizer (used), harvest to be ready. This was only 27, more 56 days of experiment with the rice and 27 days with the wheat. We were 49 kilogram in a wheat. In those 27 days we added, I think, if I remember was about 132 kilos. (2:16). So, it's the essence of the elevation of the soul of the plant. It's not just a plant fertilizer. It's a different world.

You convert this expansion of the fields in harvest, into expansion of the Soul of the Man. Then you can see what it does. Creates mayhem with the West. This is why many of you Knowledge Seekers have a problem with your families. Because you've been touched by the Gans's, you've been touched by elevation of the Soul. The physicality is there, because you have to deal with it. But they see it, "Oh, everything is wrong." But they don't seem two ?? horns, and two things and you don't eat. But when your soul has been elevated. Then you see the light, you see the understanding of knowledge.

How many of the Knowledge Seekers have had, or have problems with your family? Because if the technology is correct, why don't you do this, why don't you do that. But the technology had to be brought to the point of the maturity, that everything is ??. Meanwhile, you receive so much energies from the Gans's you made or whatever.

You're satisfied inside, with the energies of the elevation of the soul. Now it's time to bring that change of physicality. The systems are set to do that, the new systems. When we show the first transmutation, you will see the change in the world about what ?? we talk. When we put the knowledge beyond other points. The way we showed you with the gases and the air. Electricity now with a power production, we put everything beyond question. The biggest problem the Western world has with Keshe Foundation is, how to handle this, and how we can bring the change, and how we can literally forget about what is being pushed and written. (2:18).

You see, the elevation of the soul comes from the fields of the Universe. If you are closer to the center, then stronger field you'll see. Then more stronger soul you will have. The more powerful existence you become. Most of the people we see, we say, they have a lot more of knowledge than we do. They come from the more inner circles of the Creation (deeper inside the plasma spiral), but because they can go to the other dimension, we see them.

Man is on this strength (at beginning of spiral), the ones who have the UFOs and ?? things, they come from this strength (a little bit deeper in the spiral). This is the limit they have reached, but they still can go lower. When they come to us, we think they are god. No, are still elevating their souls with the knowledge of the creation.

But, with today's teaching with the man, we have brought man to this point (very close to center of spiral). If man understands it. He has not much left to reach the essence of the Creation. This is where these people are envious about the man, how he has jumped the gap. And that is the gift of Mitra, being the lover of the Creator.

When you fall in love you give everything. Doesn't matter if you're hungry, if you haven't eaten, you have clothes. This is what our Creator, with His own creation, has brought man to. All trillions of years for all this to expand, to get to the man today has been jumped by one love. Then you understand the power of the emotion. (2:20).

I think he has even surprised the Creator Himself, what He has done to Himself. This is why Mitra fell, understood the essence of the love within the creation on this planet. With all of the problems we had, loving in the man's level is one of the most beautiful things the universe knows. Unconditional giving of everything, to be able to elevate.

Any other question

Q: .. I had another question of a different subject. Concerning the soul and the STP. I've always considered the soul to be the most powerful of the two. How is it that the STP is able to enslave the soul, if the soul is more powerful?

K- Have you seen the fisherman? The net on its own (folded up) has no strength. But when you spread the net, you catch the biggest fish on this planet. It's the same. The spread of the mesh of the fields, engages a lot of fields of the soul. That's why I always explain, you know, just explain with a balloon. The balloons out, when it's weaker, and he comes back and says, I had a dream. You didn't have a dream, you had a soul travel. When you keep it tight, you keep it in. (2:22).

Look at the Tokomaks. Look at the new fusion .. reactors they do. Look at the CERN. We have a very powerful center, but a very weak dynamic system engages all the fields, that's all it does. When you look at the tokomak system, when you have this huge plasma created by the magnetic fields. Then you create a compress, to create a central plasma to create fusion, they call it.

It's a very powerful system in the center. But with, plasma it's a connection of fields. When you spread it so much, you contain it. That's all it is. The STM is in the center. The dynamic blood flow contains it, spreads around it. It connects to all these links. That's why when you elevate part of it, it changes. I've been through this many times.

This is how when we eat emotionally we change. Because our nose is positioned to pass directly beyond the .. breathing, and the digestion system in the mouth. The two continuously elevate. That's the only way we manage to break into this soul.

That's why different foods effects our emotion and physicality. Because this net, gets effected. This is why if you go back to the teaching of years ago, I used to say, when you fall in love, it last three to five years. After that you have to renew the love. Why do you keep on telling to your lover, I love you, I cuddle you, and kiss, or whatever. You make love to reconfirm and be confirmed. (2:24).

Because you create a new love, new understanding. The way you love your wife today after 30 years of marriage, is different than the way you when you fell in love with her 30

years ago. If you kept that love of strength going, you still her love the same. That love you created, it brought in a different combination. But during the time of 30 years you have eaten different foods, you've been breathing different air, and everything else. So, the energy of what you fell in love with, is changed.

It takes three to five years. It's the same with the cancer. When you have a wish to die within five to seven years, we see the sign of a cancer. It's the same with the food, with the falling in love. You use, you consume different energies, and that energy, brings an elevation. So, we understand this. Now we understand it more or less fully in the dimension of physicality.

Any other question?

Q: Mr. Keshe, could we listen every day with our headphones to the Plasma Reactor Group recording, where you made the remote transmutation tests with the Knowledge Seekers?

K- You can listen every hour, every minute, what do you get out of it? That's what it counts. (2:26). What does it bring you? What does it change in you? How does it elevate your soul? How does it elevate the ?? strength of your soul? That's all it counts.

In the coming time, when we bring back the people from the Moon and the Mars, you will see the Soul of the Man's elevation will change. It's not just that we send people to go, we bring the changes, to bring that change. The Messengers of understanding the new world of creation. We are not making you celebrities. We are not making a new cult. We had a guy from the Core Team forcing himself, "I am the core team, I have to." No, it's the elevation of who you can elevate. How you can elevate the energies and whatever. Of yourself and the others, what you can give for them to elevate their soul. So it's irrelevant.

Any other question?

Q: We've seen many new Knowledge Seekers coming into the group from Brazil looking for a solution through plasma technology for autism, and they want to learn how to make Gans to eliminate mercury. (2:28). Can you enlighten us on this topic? What do Knowledge Seekers need to understand in order to bring balance and understanding into their lives?

K- I don't go into this because it opens a big Pandora's Box, especially with Americans, with autism and everything else. But there is a way to overcome the autism through the technology, and in a very rapid way. With it we bring a new dimension to life.

We will test this with the new units for Autism. Autism is a very tricky game. Very, very tricky, how to create it. In the reports to (US) Senate, now, whatever it comes, confirms the connection of the substances to the immunizations, what you call, the injections we

received. So, we know this. You have to be very careful with this. These lobbyists are very strong and they can do all sorts of things.

But in general, autism can be changed very rapidly, very, very raptly. It's very much like a blindness. There is a solution. There is a pattern with it. They have to have a system with it. Autism is reversal, 100%.

As I said, till last week we were strained by the, what we call, restrictions by the fake court in Belgium, 7<sup>th</sup> of August, past. (2:30) But now we are very much involved in a very direct way, with a high level scientific world and the public, in changing and bringing a new dimension into the .. health application, and what I call, improving the life.

We have a certificate from the Naturopathic of the Belgium to produce the systems. We put it directly to you doctors. How to do it and the way to do it. Autism is as easy to change as you drink a glass of water. But you have to understand how and the way it is. But anything to do with other space of, elements, taking of the elements, Alzheimer and that kind of thing, Parkinson's, has already fast track to do.

I don't know if you've seen it, but we did it in China. In China, what we did to get the guy literally running after five days, and wanting to drive. We've seen that many times. It's the same process. There is a solution for all this Autism, ADHD, Fibromyalgia, Alzheimer's, Parkinson's, and the rest of it. It's not a big problem. It's not only the problem of Brazil. In Brazil you can talk about it. The other sites they kill you for it.

We saw Peter in Belgium, when he exposed these things, (2:32). even took the thing to the Parliament, to say the guy is insane, and put him in a mental institution. These ?? lobby's are very, very powerful. We have the same thing here in Austria. We have one woman doctor who's very well paid by the lobbyists, and she causes most of the problem for the Keshe Foundation. In a way, she is a prostitute in her, what I call, PhD to get paid to stop the Keshe Foundation. We have this directly in Austria now with one woman.

We had the same thing with Belgium. When I came back from Iran, I was requested to go to the office of the Prime Minister of Belgium ?? with Dirk. A woman came in and she was, what we call, ?? windmills ?? and she had to stop everything the Keshe Foundation (was doing), because she was getting well paid as a lobbyist, as a member of the Cabinet Advisory to push her way.

But the new generator plasma unit we launched today, will put an end in all this, because there is no mystery. When you can produce 10 kilowatt, and you can gas the house. There's nothing to question. In the, what I call, the Health processing system of the Keshe Foundation is very direct, we elevate the Soul. There is no sign of physicality. We've seen it. Many people who've been through the Enhancement Unit, they tell us what change has brought them.

Any other question?

Q: (2:34). .. What elements do we have to add to the combined gas power generator from time to time? I would like to know more about making plasma gases.

K- That's a part of the technology of the Keshe Foundation, we do not let it ?? out. You cheated us. You betrayed us. We see you're incompetent to do it. So, we carry on doing it in the way we should ?? You cheated yourselves, not us. Us as a Foundation we did. I learned this very much from the Italians.

Then we learned from the Italians again. We had a visitor from Italy to Keshe Foundation, the 11.11 guy. He wanted to do whatever he wanted to do. He lied to us. He came in to video, and then he didn't get his way. He went to destroy the Keshe Foundation, another Italian, what I scam job. So, we learned from experience, not to let things go, till we have a full control and we can bring the full change back.

A guy wrote to me from Iran, you have to tell us how you make the gases, it's our right. It's our right. You're right is animal right, not the Universal right. You behave like animal, and you live like animals, and you expect to have everything to become a more powerful animal to do more damage. It'll not be done, this time we do it. We learned from what we experienced, of the past. We go back to governments, we work through governments to have, everybody has the same. We learned a lot from Italy.

We learned how, we have found out recently how Italian factory was handed over to the Italians. The warehouse manager slept with the closest person in the Keshe Foundation. Now you know how we lost it. (2:36). Were told how to do it, and the way to do it in bed. So, we learned with how we share, who we share our bed with. These are the things we're learning.

I came, I set up the Keshe Foundation in a very clear way. I trusted that the Keshe Foundation people will be like the Jewish people, I always dealt with in my business world. In the Jewish community when you work, nobody betrays no one, more or less. Accidents can happen. But it brings solidarity, it's your work. I never lost a cent in the Jewish community, 20 years of work. If it happened, it was looked after as a mistake and it was corrected.

When I set up the Keshe Foundation I believed the Knowledge Seekers will come from that kind of mentality. They would be correct people. But I found out the most dishonest people come on the cover of the Keshe Foundation, to deceive, steal and do everything else, as Knowledge Seekers. So, my attitudes in past two or three years, totally has changed.

We treat you exactly the way it was before. People we trust enough we work with them, and we expand with them. The rest have to be dealt with, what I call, governments. That's the best way to do it. Because then everybody gets the benefit of it. It's irrelevant. We won't teach, we do not put technologies out for you all to go and try to ?? disguise it up,

and damage the others, and try to damage the Foundation. (2:38). You made us wise. You want us to see what you're capable of. So, we protect the rest.

Any other question?

Q: If I take the trip to another galaxy and find the planet I wish to stay at there. What happens to my physicality here when I want to stay there?

K- You take it with you. You're still connected. But it goes with you. In a way you can, in a way you have to understand. You can transmute. On Earth, because everything is the same field strength wise, you can manifest yourself in 2 dimension. When you go into a different strength it's a different game play, if you don't understand what to do.

You can loose the STP. These are the things man will learn accordingly.

In time you'll learn, what you can do and what you cannot do. As I said, you become that ?? child when you pick up the hot coal and you put it in your mouth. You know ?? it's burning. You don't do it the second time. (2:40).

Any other question?

Q: .. When traveling to different places through the dimension of the Soul, will my memory of the site I previously went to, remain intact?

K- Yes, of course. You will find out, in the coming time when you do it the correct way. Memory of the others (travels or experiences ??) becomes your memory in the universe. That's why you (can) speak the language.

We have this with the two Brazilians who came on the 2nd of August to the Keshe Foundation Center. We had many, we had English people coming in and going and we tried to speak English with them. I wasn't there, I was told by the people who were looking after these two. If they are in the panel they can talk themselves.

Apparently one of them explained he doesn't speak very good English, but he was speaking of fluent rapid English. Till he was questioned, and then he stopped back to (his poor English). We learn languages, we don't learn, we connect to languages, through the enhancement structure. We learn through. The enhancement is the universe. It's a replication (of it). So if we can go into a system. We've seen this with many people who come to Linz. Go in with a (broken ) spoken English, and they come back and they speak, (a very good English and) they can explain themselves.

Because they tap into as we said, the language. When you go from England to China, and you go through the transportation system, (2:42). you will have to have somebody to explain to you. You need a translator. But if you go through the transmutation system, I wonder if you need one. Unless you decide to. We've seen it with the Brazilian couple who came to us on the second of August. If they're on the line, bring them and let them

explain to us. We tap into the language (with this). That's why we say, we need as many people (as possible) from around the world. That's why on the translation it says, American English, New Zealand/ Australian English, or English UK. Each one carries different essence. One is a pavement, one is a sidewalk, or a sidewalk, whatever you call it. Yes, it does.

Any other question?

Q: Jalal ... First question. In the past teaching you said, the best place I can take the man to learn how to travel the space is, Saturn. Is that still exist in the plan of the Foundation?

K- You can go anywhere. You see, Saturn has many moons, and many conditions and the conditions between the conditions. You look at the moons of Saturn, we look at how these moons interact, what they create. When you look at the Saturn with its moons you see a beautiful atomic structure. (2:44). I am sure released the paper on the Structure of the Saturn. Saturn has a very composite structure, where it's superimposed. Then you have the ring of the Saturn, which sitting outside. Then you have the moons of it, and the rest of it. Then you have the ice rings. These ice rings are confirmation, are layers.

This layer connects to this ring, for example. This layer connects to the ring. This is of the Hydrogen, this is of the Helium, this is potassium, or whatever. Different Inertia field forces. So, when you have the moons here of Saturn, it's not just a moon. It's what's the interaction between the fields are there ?? of it. Then the interaction with the center.

So, with 11, 12 electrons you get a very good, what you call it, diversity of the fields. It teaches you a lot before you go into space. It's, what I call, molecular structure of the plasmas and the field control.

When you look at any gaseous planet, you see the rings. Those rings confirm to you what Gans's, what ?? are sitting, creating different Inertias. That's why you see in the rings of Saturn different size, (2:46). what you call it, ice blocks. This is how your electrons work in that structure. Your electrons in the outer boundary has different energy system, and the interaction, then the ones in the ?? inner one. It's just because of the field forces they carry, nothing else.

Q: And the hexagonal shape of it?

K- On the top, on the north pole, you mean?

Q: Yes.

K- That is, I explained it in the same paper. I've explained this before. Go back into the Medical Teaching, I think it's in there somewhere. The hexagonal shape of the top layer, or what you call it, the North pole of the Saturn is very simple. You created it with your skin.

You look at your skin. Your skin has this shape (hexagonal) if you look it very close. This shape comes from interaction of the different layers of Gans's, or Nano materials.

When you look at the inner skin, the second skin, or whatever, then you create the hexagonal shape of the skin. The outer skin is a mirage of interaction or fields. Each one layer, creates two of the sides of the pressure. If you understand it. Look at your skin to see it.

So, when you look at the poles. (2:48). On Earth we have it as well. The north pole of the Earth, we have a very small hexagonal shape. Because we have a very loose combination of it. The interaction of the fields of three layers, Gans's layers, and the structure of inside creates this hexagonal shape, which brings the stability. It's in the Gans's state.

These layers are moving with different speeds and different, sometimes directions. This creates the interaction of the fields. Totality creates the shape of the hexagonal on top of the planet. We understood this long time ago. It's been explained in teachings. I think it is in one of the books maybe.

But the hexagonal shape of the field. You create, you put a reactor with the three layers, with different Gans's, dynamic, you will see a field hexagonal on top of it. It's the balance of the fields. When you have more layers, you see more complex fields.

Q: Second question. We see the situation now around the world with drought, and lack of energy use, and all of that. Is that device what you're showing today, is the beginning of the solution for them?

K- In so many ways, (2:50). man has created part of this. In so many ways, as I say it's in the bigger plan. I always said, man will accept this technology not out of the beauty of it, but out of the fear of his own demise. We're getting to that point, we're getting to that point. Everybody looks at it as an economical way to make money, to earn money, and the rest of it.

It's very interesting, very, very interesting. I received a report video of the Parliament of Iran. The discussion in the Parliament, a member of the Parliament asks, how come the minister, who was the guy who wrote the paper against the vaccination, now has become a member of the cabinet, he is in favor of the vaccination. What has changed? As somebody wrote very simply, the bank account. You understand?

Q: Yeah, this is the problem we...

K- This is the problem we have. But in time we change. We are in the right place, right time. The pressure on the Keshe Foundation is beyond. They are trying. But on the other hand we see them, they come to us begging for their lives. They bark like a dog, but when it comes to them with a cancer, they are as tame as a snake.

Q: I wish they open another account that we can elevate their souls.

K- We'll see, we shall.

K- Thank you very much. Jalal, join us in the group 20 people.

Q: Keep it a secret.

K- Don't keep it a secret. (2:52). Join us in the 20 people. You have the rights.

Q:: I will be there Mr. Keshe.

Q: .. With the elevation through the Gas Units, if all souls have access to both physical and soul dimensions what will happen to the trees physically through elevation?

K- What you mean?

Q: Well, he is saying that the elevation through the, I guess the CO2 gas units, if all souls have access to both the physical and soul dimensions, what will happen to essentially the trees physically?

K- They all get. The trees, and the shrubs, and the animals, and the stones will get the same elevation. (2:54). It's not exclusivity of man. That's why we brought it up this way.

R: Will they change physically? I guess would be the question.

K- Yes. Yes, of course they do.

R: So trees might hover on over the Earth instead of being having their roots?

K- No, not really. It's all a point of balance isn't it. Not really, ?? have they uprooted, no. In that level of work it's totally different dimensions.

R: We have a question from Jefferson, again from Brazil. Brazil has been quite popular today.

K- Very active, hum. They don't stop. We have a guy called Rafael, he doesn't stop, they don't stop.

Q: ... I would like to help reduce or eliminate hunger in the world. If I use the Gans produced by the cup of food, which you explained in the 358<sup>th</sup> Knowledge Seekers Workshop, in a stellar configuration made with dynamic reactors, will I be able to feed the people close to the structure?

K- You can feed anyone through the structure. The beauty with the understanding is, if you understand it in a way is, we say in English you can take a horse to water, but you cannot make it to drink. You can create the dynamic structure of the food. (2:56). But if the soul is not there to receive it, you can make as many food systems as you want.

Haven't we done that with the man? Haven't we sent so many Messengers to elevate the soul of the man? How many have listened, and how many have the ?? strength. Those who chose. Those who wanted the elevation. Otherwise it is said, the rest has been, maybe, not a waste of time, but another slower process.

Any other question?

R: I'm wondering if the story of Christ and the bread and fish, feeding the masses, had something to do with the Cup of Food, of some sort technique. Do you have any inside information on that?

K- It's just a man puts a name on to it, as that. Call it the bread and wine and the rest of it. But in essence is the love and energy of loving and giving. But that's what people understood at that time. So that's what it came to be, what we know today.

Q: Okay, along those lines, we have a question from Trevor. He says, I also want to know, when we move to connect through the souls of our ancestors, to find the truth about the crucifixion of Christ, will it be like those people are there to witness what those souls saw with their own eyes? (2:58). Or will we be witness to history like we were present?

K- It's a combination of both. It's a combination of both. Who's been present? Who hasn't?

As I explained to you, we had a lady, we had two people. We had a lady, I have explained this before. She spent all her life trying to see Christ, to be connected to him. When she went through the Enhancement Unit, she came out, and she refused. She says, I don't want to be recorded, I do not want even to write it. Her husband was with us, he said, she refuses to.

Because he was aware of her emotion. She explained to us the color of the skin, the hair, the dress, the walking. She could explain to us fully about Christ. We have a good description of it. It fits into, what I call, what we always said, Where he came from, would he be any different?

But the communication with him. So, you can now explain a lot. She was of the, what I call, demeanor structure of Middle East mixture, at the time of Christ. It was very interesting. She is not a white Italian, as you call it. It was very interesting.

So, I went through the soul dimension. Her ancestral line was present during the time of Christ. ?? time of crucifixion. The communication lines was, in the line as it was. It was very interesting going into this. (3:00). We had people who came through the system, and they felt the presence of the Soul of Christ. We have two or three people who did this.

But not the manifestations as a physical dimension. We'll see this. Without a doubt Christ lived for 30, 30 old years, he came across hundreds thousands of people who spoke. They've seen him, they know him. Some lived with him, some shared bread with him, as you call it. These people, all of them had children. The souls which have been in touch with. The same as the memory of where the cell of your kidney will be. That memory of the talks, and his presence is within them.

It's in, what you call, the RNA side, not the DNS side, the energy pack. The memory goes back to the time of the creation.

If some of us reach that point, as I said, you can even see the Soul of the Creator to understand His language.

So, people who have seen, what do you call it, Christ, during his time in Palestine, as maybe children, they've seen him crossing. They, made him a frock, they sold a bread to him, they followed him. All these people still created children. Those children carry the exact memory of what he looked like. We carry the DNA, and we copy our parents, as they say, up to 500 generation backwards, which actually to, from the beginning of the time. Because otherwise, some of us won't have a kidney and some of us won't have an eyes, or whatever. So, everything is recorded and added.

So, they carry it. And yes. (3:02). If you have a descendant who came through Palestine, at the time of Christ, and you were there when it happened. Don't forget the population of the Palestine wasn't that big at that time, and where he was, or in Jerusalem. Few tens of thousands and more or less it was like village, compared today. Everybody knew one thing or the other.

So, we all have, if you come from that ?? kind of background. I carry a Cohen, which means through my mother, I'm connected back to the generation. So, in presence it's very simple. Those of coming from that position, that direction are the carriers here. And on the other side they come from the blood of Muhammad. So, the presence is both. But the same soul.

I've been brought up amongst "Saheds" , which means the direct blood of Muhammad. ?? both from ?? ?? same line. And both from the mother's side. So, it must be understood, that we carry this with us, we've been present.

Any other question?

R: Can we also pick up those lineages, or those entities the Christ and Muhammad? (3:04). Can others pick that up through artifacts, or other connections with the past of the physicality type things?

K- I think most of us know, if you don't know. We don't have anything, which is actually belongs to Christ. But we have more or less most of the clothes, especially the later part of the life, of bless His name Muhammad. Every few years these clothes are displayed somewhere around the world by the Saudi royal family. I think very recently, three, four, or five years ago, they showed the cloths which Muhammad wore during his lifetime. They're treasured, they are kept by the, what we call, religious part of the Saudis.

So we can even, I haven't watched it. We can even go back to the DNA, and recreate many of the people even who touched it, touched the clothes, came in touch with (the clothes). Then with the present science and technology find the bloodline ??. In the Iran Shia ?? side, which is connected directly to the blood of Muhammad, many of what they call, ?? Imam, his descendants, great, great grandchildren, which some of the clothing, and parts have been kept, and people have touched. We can go back to the DNA.

This is a present science, it's not science ?? fiction. (It's) .. science that can fully support this. (3:06). It's not a fiction. So, yes, if you can find what Christ wore, even if you can find the cross he was put on, you can bring part ?? of it back.

R: Okay, that makes a lot of sense with the DNA, and so on. So, are our human bodies, or human sensors, sensitive enough to pick up on that DNA, and actually, perhaps to get that information? Even on a Nano level from a few ?? pieces of clothes. ?

K- Yes, possibly yes. Don't forget, the DNA carries the STP, so it had a connection to their Soul. It's not impossible, because now we understand the science. Unless you're a hypocrite, we can. Unless you are totally denying everything, which exist in the scientific world, we can do.

Don't forget, you go to China and you can choose the color of the eye of your child, the hair, and everything else. So, if they can interfere with it, they can rebuild it backwards too.

Q: .. If any of the Universal Community asked for help in the future, (3:08). will the intervention be justified?

K- It depends how it is, and what is the purpose, yes. Many times they asked for help, many times they received. It's not the first time. Cultures, societies, which have been pure in their work, and they lived a perfect life, in a way. When it comes to for example, their planetary system, or the environment system collapses, or is about to collapse, or when the soul of the community asks for help. The Universal Community responds. Done many times. And still do. There are a few going on at the moment around the universe.

Physicality forces, what we call, accidents for things to take shape. There is a society of ?? for this ?? , what I call, community in the universal work, that the job is like what you call, SOS. They are there to rescue the souls. They never carry the physicality, hardly ever. But carry those souls in all the same ?? It's not an easy job.

We hardly have lost civilizations by accident. They've always been preserved, in one way or the another. When you see the galaxies blowing up to pieces, they literally blow up, empty of living Soul life. (3:10). Majority is emptied. Because it's done ?? completely, what we call, billions of years, about to crash. We see it all the time. So, the facilities for moving is there. The knowledge is there to do.

It's a specific race, that has achieved the knowledge of the creation, who does this. It's a privilege.

Any other question?

Q: ... The Cu 59, and you consider it 49. This difference in-between the numbers, is it the Inertia, in a way?

K- The first one is Inertia fields forces. The other one is a plasma field forces.

Q: Is it due to the condition, or this is what, this matter state appears?

K- Yes, it's due to condition. It's due to the Inertia of the Earth. It's the difference between Mass and Weight., 59 is if you look at it from the plasmatic world, is the Weight. (3:12). 50, 49 is the Mass.

Q: In regarding the spirit, in this condition?

K- It's the same. Condition to the position. Condition to the position.

Q: Okay. What you have of idea about this James Webb ?? telescope? And you know, we know in the Plasmatic way, there is no such a distance.

K- About what?

Q: This James Webb Telescope, the recent pictures.

K- I have no idea what you are talking about. I don't have time to look at these things.

J: Yeah, they showed the new pictures of the deep space. And they say this is from billions, and the beginning of the creation. And we know in the Plasmatic technology, there is no such a thing, whatever you see is there in the same time. It is only the distance in our Solar System, or our galaxy which it makes this time...

K- You see, you see the field strength in a matter state, we see the field strength in the plasma state. It's a Plasmatic ?? you are there. Not a matter state ?? you are there. You understand?

J: How can we distinguish this is Mr. Keshe?

K- When you go in the system, when you go into the Gans, what you call, the Enhancement System. This is where we don't allow any films to be taken from the Enhancement room. (3:14). But it's amazing. I've said this before, people tell you, we heard you, we hear a voice telling us. But we don't see, it is blur. I'm just about 20 centimeters away from them.

I tell them to go to the Moon. They say, we heard it. But in fact, it's my soul, which gets in touch, with their soul and says, go to the Moon. Physicality is just to translator. As simple as that.

I've had many, many people who went through the Enhancement Unit this. We heard the instruction. I instructed the soul, through the soul. But used the voice of the man, and the physicality is inside the soul. They hear it and they do it. Because, it goes back to the same point. Trying to give, to please.

When you don't give them instruction, they sit there for hours. Nothing happens, because they're just waiting for the flight to be ?? Vienna, as I call it.

Any other question?

Q: It's that because the people who is going there, they expect to receive? That's why, that is the difference?

K- Very much so. ... Very, very much so. We have this problem with the very Knowledge Seekers who come in. They sit there and they get nowhere. Because of the expectations.

They say, "I just came here to give." But what is underlying? What is there? What does the soul doesn't want you to see? (3:16).

Q: This is always like this. It's also in the beginning of your teaching when Rick and others built this ball. And you told them, just there and see what happen. And after a while you said, you went there to receive, but you didn't want there to give. So, try now to give and see what will happen.

K- It's a condition. It's I always, I always said, if you learn it. I always take what is needed, and till it's not needed, the time will not be there for it. I've shown this to the Knowledge Seekers who were around me. When things happen, I tell them, because it's not there, it's not time. They say, "oh this whatever." No, because we have to understand there's a bigger purpose behind it, not just what we want. That's the whole structure.

Q: One addition Mr. Keshe. Last week you asked about a past teaching for the Knowledge Seekers, I think if the Knowledge Seekers go to the private teaching in the 17th, or 18th of November 2015. No it's 18th of November 2015, in the private teaching. I think they will find what you asked last week, and transmute, and the filtering, and everything. They will be benefited from it.

K- What you mean by that? (3:18).

Q: The connection, which we targeted, what we want, and how we connect, even with the soul. I know you don't remember yesterday, what you eat for dinner.

...

J: ... No, it is only for the Knowledge Seekers, because they have questions about where to find all teachings, what you mentioned. It's happened that in November 2015, 18th, it has a lot of this answering, of their questions. If they go there and see... (3:20).

K- You see, nothing has changed over the past 10 years. We just expand on the same thing. Then when you go back to the passage that it was there, we just built upon the more information to be there.

Q: The way you said it Mr. Keshe, and before about the 400th Knowledge Seekers Workshop you said, we will start teaching, and then you realized the knowledge was there, but you didn't connect to it. Then in a way, you will kick yourself, why you didn't see it?

K- I mean, it's like the new power generator. You lot will kick yourself, how you couldn't get your MaGravs working.

J: Don't mention my name.

K- By the way, how's your secret society going? Have you managed to do it?

J: Mr. Keshe, we are in what we call, vacation. I think we will start next week to join together. I think we will make the connection next week. I hope all. Of them is here but, you know...

K- I see them .. I see your team. I see the musketeers as I call it, in the background. I know how you working with it?

J: But as you said, we are working good.

K- You're getting there. I've seen your equipments on the table.

J: By the way, thank you Mr. Keshe.

K- You are welcome. .. Join me, especially for the next year flight. (3:22). There's a reason for it.

Someone says, "hi, can I join the secret society?" No, they're very secret. I only know of them, because I monitor them on the Zoom. Not monitor, I've just been invited to be. When I found out about the secret society they...

J: Just ask them how much they will pay, no problem.

K- Thank you very much Jalal.

Any other question? ... we are going to nearly to about 3 and a half hours.

R: Is that group still accessible through the private students .. group?

K- No, no, this is a very secret society. So, you don't want to get involved with them. How many of you are there, four or five? I think is in the group. They work very good.

J: We have one, we have one of them, but he never joined. You know, and he's in the background. In a way, sometimes he claps his hands, sometimes he laughs at us, you know, but he never joined.

K- Who's that one?

J: I will not tell his name.

K- Any other question? Shall we call it the day?

Q: .. Mr. Keshe, my question to you is, how, and what (3:24). is the Keshe Foundation going to do about drugs on this planet? Because they destroy the true purpose of people's lives. Thank you.

K- We have the knowledge. We have shown using it. But when you elevate the soul, and we are going through that process, this becomes irrelevant. We are in that track.

Q: Do you have a timeframe?

K- Not really. Because we've done it nearly 10 years ago. We can change addictions in minutes. And...

Q: If addictions can be changed in minutes, why does the Keshe Foundation not implement that now on a global scale?

K- Very simple. We have addiction of different kinds. It's like the guy told me, if you make gold, why you ask for donation. Make as much gold as you can and sell it. Man has to go through this process themselves.

Our factory in Tijuana, in Mexico is in the center of drug trafficking. Last week there was a big clash between different gangs, and killing each other, and burning places. We don't

get involved, it's not part of us. It's part of the work of the elevation of the soul. (3:26). It has to be done, then when it's done, and when it's done, it will be done in totality.

We are born to be addicted, and we are rewarded by it, our sexual behavior is one. Falling in love with that. Which addiction do you want me to eradicate?

Q: Is that a question?

K- Yes, power is another one. And wealth is another one. It's all part of addiction. You look at it at cocaine, or whatever drugs. All addictions are part of the same.

(The solution ) it only comes when the STM passes the STP, and then there is no addiction. This is why, when you listen to some of the Intros, when you look at it from outside, you just see stars. We don't see if the star is the soul of a king, or a peasant.

In time it will be sorted, in time it will not be there to be done.

We put out tomorrow, that we have a solution for addiction, and ?? (drug) barons cannot sell. Do you know what happens to Keshe Foundation? None of you will exist, you all will (makes a sound like ... being killed). So we do it in the correct way. ... This is part of the process.

What's your next question?

Q: .. My next question is actually (3:28). in relation to, it's about suicide. Now, you have mentioned, that when a human murders another human, they go back to the beginning, the beginning of creation. Am I correct in saying that?

K- In a way yes.

Q: You've also said, that suicide is not allowed. For people that have committed suicide. (what happens?)

K- Suicide is not allowed, because the soul hasn't reached its maturity. It's like when people commit a crime. You see, you can die, in the next minute, the minute before you cannot commit suicide. Because that minute of time is needed for the soul to reach its maturity of departure. That it can overcome the imprisonment of the STP.

Once the Soul of the Man, freed. It has no dimension, till it chooses, by his own strength, and by his own soul. It's like cutting a flower before it blooms. What was the purpose of planting the flower? It's forbidden, it's not there, it's just. You cannot leave a soul, not to mature to its point. This is why killing is such a heinous crime. (3:30). You don't allow the soul to reach its maturity to serve in the other dimension. That's all. We cannot steal.

Any other question?

Q: What actually happens? You've said that if someone murders another person, they go back to the beginning.

K- You have to compensate for what you've taken. That's all. You have less, once you ?? .

Any other question?

Q: Mehranez ... With a lot of joy, I listened to the advancements. Now that we are in the mysteries of life, I permitted myself to ask about what they call about, they talk about the punishment, divine punishment, of a lots of people who did wrong by certain values. Now with your teachings, we can come out of these mysteries and say, okay, maybe the Creation of all these ?? at the time, created the anger of the Earth, the emotion of the Earth, (3:32). or maybe the beings over the sky. Or the destructive way of life they had taken, but it takes some time before they can destroy themselves. So, how was this thing called, divine punishment happened?

K- A lot of rubbish. There is no divine punishment. The divine punishment is that, you know you cannot do wrong, and you pay for it. And you pay with your ?? It's something people can't understand. So, they put that divine punishment.

The Day of Judgment is the day of the balancing of the book of your own soul, nobody else's. You've got to remember, there's 7 billion people on this planet, 8 billion soon. And all the time millions die. Every year, two years if you add it up, every ?? collectively. So, there is a collection of hundreds of millions from the time when life for man started. forget about the animals, the trees and everything.

Can you imagine the queue of people now queued up for the Day of Judgment? Can it exist? The divine punishment is you knowing, that when you're done, you have less to go with. That's all. That's divine, that's the secret. How do you want to do it? Do you want to punishment? Do you want ??, whatever you want to call it? It's just made up for people to be afraid of. (3:34). Reality, you're the captain of the ship, you decide where to anchor the ship. That's divine, and once you understand that responsibility.

Q: It's written that the ?? Lute people (Sodom and Gomorra) were doing wrong, some actions which is not good. And they didn't know it. They think it's fascinating, it's good. And God sent a prophet to say to Lot, this good guy, to the prophet, leave the city tonight and let those who were there, don't look back, and they will be destroyed. Just don't look back. And his wife looked back and she became a stone. So, how do you explain this.

K- What you have to see, what is the true about it. What it means. If you take the Soul STP and convert it in energy, you can become a stone. That's all, as simple as that. If you develop the energy of the STP, reaches the level of the energy of a stone in Inertia, you become a stone. That happens in your body, you call it tooth, you call it bone. That's why bones and teeth are only thing left when you die in the physical dimension. It is as simple as that. It's a knowledge, now we understand it. So, it's totally irrelevant.

Q: It takes time to become a stone?

K- It is instantaneous. (3:36)...

Q: Is it like the Mayan people? Some people you said get destroyed, they got vanished? Is it the same?

K- They didn't vanish, it's just that. You've got to understand the process. There were people in the human cycle, that they could manage themselves to stone, and back to a living thing. If you carry the soul inside. It's the same as you can become Chinese looking when you go to China, and you become African looking in Africa. It's just understanding the chameleon of the soul, not chameleon of the physicality.

Q: .. When you say, My wish is my command. We are creator. Some people say that, because, that's what you kind of. I have problem with this word, I'm creator. Because...

K- Have you had children?

M: In a way, yes.

K- Did you gave birth to any children?

M: Give birth, no.

K- So, you are a creator. When you're a mother, you're a creator of that child. But you can be no mother, but create the love for a child, and still create of a new emotion in that child.

M: Yes, I accept that. ?? I am big ??

K- No, who says?

M: Creator is kind of power.

K- No. If you create a statue, do you have a power, or a statue? Move, sit, left, right. We don't have that. It's what we envisage, (3:38). it's what suits us to, it fit us, and to fit our emotions.

M: Yeah, because we say there is only one God.

K- Yes, there are many Gods.

M: And when you say my command is my, my wish is my command?

K- It's my decision, it's my decision, and that will be it. I decide and that will be it.

M: But can I say that also?

K- Yes. You decide to go to the shop to buy the clothes, it's your command. You decided to go. If you see, the clothes doesn't come from the shop to you, does it?

M: Yeah. But it's not instantaneous.

K- One is in the dimension of the soul, and one is in the dimension of the physicality.

M: That's it.

Q: Please. You just said, there are many gods? Would you, do you want to wait until next week to expand on that?

K- The god is us. Translation of the god as a creator. Not translation of God as the big Creator of everything.

You understand? There is a philosophy, which we come into when man matures. Even our Creator has a Creator. Otherwise, how was He created? You understand?

Q: But where does that chain stop? Does it stop?

K- It becomes us, it comes back to us to become them. It becomes us as one. (3:40).

Q: Kind like, with the technology when you're feeding it back into yourself.

K- Yep. Thank you very much for today. Thank you for everything. Don't forget, please join us in the Moon and Mars excursion, as I call it. To bring in a new dimension. When you join us, we will not choose who will be the first. We'll leave it amongst you to decide, who will be the first to go through this process.

We'll introduce you in a way, for you, like in the Universal Council members, when there are too many to do, to become. We allow them to decide, who become the universal language member of the council. We'll do the same hopefully, with those who be the first group to become the people who take the excursion to the Moon or to Mars. We leave it to the group to decide who will be the first.

There is a reason for it. I'll explain it in time. So, those of you who join us to become the first group to take man into space, the true way, not with the suit of the monkey, through the strength of the STM. You have to decide. Because many of you have to support that soul, with your soul. It's a callback (payback) time, as I call it. Then we understand. So, it becomes a collective effort of the human race, to adventure to that space and time, and then open the universe to man with the knowledge of the Creator, not the knowledge of the man with the monkey suit.

On another hand, (3:42). as I said with the generators, we have given you the biggest gift, that it makes man independent from everything else. If you want to go for it, just go through the system as 2 kilowatt generator and put in there, what do you have put in, and what do you want. Which one do you want.

Thank you very much for today. And hopefully we meet each other next week. Thank you Rick and everybody in background supporting the work.
