

447th Knowledge Seekers Workshop; August 25, 2022

(Quick Index 20p - done, Proofed, Transcription done ; Need to do Key Phrases, Words,) (Auto transcription from Elias)

Creating a "tornado" of fields in the EU, and between the STM and STP - change world leaders; Tornado of fields; Interact with world leaders through Souls of KS in KSW, When plasmas have frequency; Soul expands and elevates - body rotates;

Topic Index

"Man of color" have gone through FS in Linz - system became complete; Transmute man within the envelope of his own energy; NASA going back to Moon - KS open café on Moon; UC negotiated place for man to land outside Solar System; M fields - Light bend; galaxies are curved; "Tornado" of fields in EU - and within the man between STP and STM; STM behaves same as Soul of Creator; During KSW we'll interact with world leaders through the soul of KF KS - need to mature; Collective transmutation of the fields of the human race; UC will take man different parts of galaxy; Transmute as a cat or stone to see how feels; KF not a cult; KF offered to help IAEA contain potential nuclear accident in Ukraine - this time openly not like Fukushima; Plutonium like stones, has a soul; Man gifted Knowledge of Creation - respected by UC; Mario Trane a teacher of KF passed away - Flower of Life; Detailed explanation about Mitra - love of the Creator - not a religion; All religions came from Mitra - Love of Creator; Only Messenger who wrote in own handwriting was Bahuala - writings unchanged; Chinese understand parts but lot of mysticism - not deep understanding of Knowledge of Creation; Blowfish bone structure is Star Formation (SF); Rib cage of man limits his intelligence; Flower of Life contains 2 SF that are opposite to each other, they keep creating new SF out of itself, continues to expand and grow out of itself - symbol of Creation; STM most advanced spaceship; Make tornado of fields within yourself; Only took single Soul of the Creator to create whole U; Jesus tried and got close to tornado but frightened of power; Cannot take another Soul unless they are willing; Spherical plasmas also turn back fields onto self; Whether or not you see your hands and feet it's up to you and your understanding; Vertical beings can multiple without seeds - out of the fields; Stopped smoking after 40 years - difficult to clean but can change lungs; Don't loose desire of addiction - satisfy need; How Thalamus and glands create plutonium - plasma state; Give birth at age 300; Lymph passes in vicinity of glands transfers fields; Mitra is not feminine energies - love of Creator; French president talking about soul - harsh times coming; Gas generators left with leaders to decide; Leaders want crisis to rule; KS take coming crisis serious - make food Gans's now; Warmer temperatures because coming closer to Sun - only a little from burning; Earth gains mass from fields of Sun; Plasmas don't have frequencies of themselves - but do when they interact with each other; Touch soul of cell - change it; Customer service on Telegram; Walk right away after 10 years in bed ; Body rocks and rotates when higher fields - tornado - shows T is correct; Souls expands and elevates creates tornados - body rocks and rotates;

Quick Index:

Maybe sooner than we think, we'll have teachers and knowledge sharers from across the U here on planet earth. The steps are getting faster and the approach to the final goal of (joining) the Universal Community is getting much, much closer. We have started testing the different aspects of transmutation and transportation, and the expansion of the energy fields of the man, and the envelope of the soul of the life. We will be able to transmute man within the envelope of his own energy.

This week we had Knowledge Seekers (KS) from Mexico, United States, Iran, Austria, and other nations on this planet. We had the first what we call, "man of color" come to leave the fingerprint of Africa on the system. We are getting closer to the point of understanding the Totality.

This week, 3 KS went to the position of wanting and knowing they could move from one system to the other. (This system was preset, but not yet connected, so they could not cross.) Hopefully, we'll reach that point soon.

(We have made agreements for the first international transmutation with one of our KS within the next few weeks or so. For those of you participating in the upcoming transmutations to the Moon and Mars, and the Mobile transmutation, you need to send us a notarized letter of consent, which means you give us the consent unconditionally, and you accept all responsibilities to be part of this experiment and excursion.)

Our human friends at NASA are going back on Monday, to the "monkey business" of shooting up rockets to again go around the Moon and come back in two weeks. We wish them all the best. We wish them success in their endeavors. As their what we call, cycle of knowledge has to complete part of the knowledge of the Man. We hope they learn more in 2024 or 2025, as they try again to land on the Moon.

By then I hope many of you KS will have opened a cafe and restaurant, on the Moon, so you can invite the men of the NASA to come and stay with you while they're visiting the Moon, and Mars.

The development of the technology is so rapid, (that it takes our own team (time) to understand it, so that we can implement it. When our human friends from NASA come to the Moon, they will encounter you, as the passengers of the Keshe Foundation Spaceship Institute. They might not recognize you as a human, because you will have taken the shape and form, according to what is required by the conditions to live on the Moon. But carry your passport with you, and show them what your name on Earth is. Try to understand more, that we have to accept all knowledge's, and all sciences, and we cannot be arrogant in having achieved more. Maybe by then, NASA might abandon this probe.)

The technology of transmutation and transportation is starting to expand the knowledge beyond. We are adding systems in the background, that can land you in different parts of this galaxy, without our own production team knowing it.

We have negotiated with Universal Community (UC) for a place in the U, that man can land. We will release these positions in due time. It is expected, that Man will land out of his own Solar System by 2024 - 2025. We will be able to transmute you back to Earth. (Even though you will manifest yourself in a different dimension, you will still be recognized as citizens of Earth.)

We will achieve through trial and error, and by understanding more. Then we'll be able to transmute everything as an energy pack, including your suitcase, or even the paper in your pocket. (We'll convert it to a Gans of itself, and to whatever it might look at your destination.)

These are the knowledge's that has to be gathered, understood, and extended. (Production of our new space transportation systems has started yesterday.) (For transmutation we'll go back to using the Vertical Unit, because we can do much more and it's more compact. In a short while you will see many of these Vertical Units around, which look like a telephone kiosk, where people will go in to transmute, (to wherever they like).

Carry your passport with you, because we have to inform the authorities in Austria and the country you go to, that you are in position to transmute (into their land. If they accept you, then we'll transmute you.)

The whole structure of the change is, understanding more about the fields and the reality, and moving away from a lot of dogmas created in a world of science, because we did not understand the Totality. With these dogmas we have created more of a mess.

The present world of physics has a big problem with the magnetic (M) fields. They say they see fields bending near stars when there are huge magnetic fields. Otherwise the magnetic fields, or light, which is another shape or form of it, moves in a straight line. This is absolute hypocrisy. (From the very the beginning they got muddled up with this hypocrisy. On the other hand, we draw our galaxies like a spiral. We see our galaxies as flat fields. How is it that our Solar System has an oval shape? Where do the fields bend? Where does the light of the fields bend?)

We accept part of the knowledge, but when it comes to other parts, then we deny it, because it suited those who came up with the idea, and they want to hold on to the misunderstanding. This part of the what I call, "bending like Beckham" (from 2004 movie about curving a soccer ball). (Bending M fields in a way that the fields will create interaction,) is a cornerstone of the Creation. When you create a stronger field interacting with a weaker field in any direction, you create the what we call, deviation.

(When you come into the present EU, you enter a space, which is held by materials. We hold on to the reactors. But the stars, planetary systems and moons do not have a framework holding them up. Therefore, the next step for us, (is to create a dimension of field rotation, that the rotation of these fields will create the physical condition. Then you don't need to walk into a Vertical or Horizontal EU). (It will all be done only by the fields.)

In the next year or two, when you travel by transmutation, you will not enter a box, nor a system. Rather, you will create the fields of creation, then within it, create the dimension of your soul, which will interact with those fields and create the transmutation.

In the next few years, the next step of the growth of the science and technology with the KF will be to create a dynamic field flow, through the interaction of the fields of your own soul, with the Soul of the Physicality (STP). This is the elusive part of understanding the science and knowledge of Creation. In a way, you enter into a "tornado" of your own fields, to release the fields that are entangling your soul. Then with the emotion of the Soul, you transmute yourself to any position in the U.

We usually talk about things years ahead. For instance, regarding today's teaching, you say in a few years time, 'oh, in the teaching of 447, he already taught us this.' Because this is the next step in understanding the knowledge.

(To show this, in Linz we'll add 2 more units to the Flight Zone area, so there will be 4 units around the center. This will allow us to create that tornado of fields in the center of the reactors.) Which means, that you will not enter into the systems, rather you'll enter the field forces, ... And then you see the expansion of the soul. You will enter the room, and the tornado will be created through the fields of your own soul, and the STP. This will release your Soul to be free from the shackles of physicality, and then will you travel.

In a very short time there will be no need to use a system to transmute. Once you learn how to walk, you can run, and then dance throughout the whole U through the D of the Soul. You learn how to bend the fields of the universe into where you want to be.

Transportation through interaction of the fields of the body of the man is one of the most powerful systems of travel. When you land in one Solar System (SS), you will become part of that SS, and when you land in another one, you become part of that one. It's the same as with the fields of the Soul of the Creator, as He expands and enters the atmosphere, the Milky Way and the Solar System, and then the planetary Earth, He creates the life of man.

(In a way, the STM will come to behave the same as the Soul of the Creator. But this time, as the STM you will have the decision. You become the captain of your own Soul. In Linz, in the next few weeks, as the new systems are getting developed, you won't need a Vertical or Horizontal EU, you will create that tornado of fields through your own soul.)

In a very soon, sooner than you think. (During the teachings themselves we'll collectively bring you as the Knowledge Seekers to interact with the soul of the World Leaders. It will be like what we did a few weeks ago in Rick's teaching, when we tested the Mobile Transmutation. We will come to you through some of the teachings, and collectively we'll interact with the soul of our leaders to abandon wars and elevate the souls. Some

years ago we left it to the Universal Council, Earth Council, and the Core Team to elevate the soul of the world leaders. But now we'll all do it collectively together.)

(We'll go through a process of, the "transmutation of the fields of the human race," (as a collective of the human race). Knowledge Seekers who are peaceful, will bring peace to our world leaders. Collectively, we will put an end to war, if you understand the purpose and the position of this technology, the way we have delivered it.)

We were planning to do this today, but for some reasons, we will let it go for a while. But in a very short time, in some of the teachings, we'll call upon you to join us as "One Soul," to elevate the soul of our world leaders, to walk away from every conflict, and prepare man for the next step to become the "Man of Universe," and to become a member of the Universal Community.

The reason I abandoned it today, is because the soul of many of our KS are not yet ready for this transmutation and elevation. Collectively , we have to be the same.

In a way, we are ready to change the mankind. Collectively, we've seen it with those who go into the system in Linz. Some felt like they wanted to go to the other system, (like a transmutation.) Some wanted to go to the Moon, and they went there. A gentleman felt the fields of emotion of seeing the Christ. (If you are able to fulfill your desires, and it changes you, then it's time to change the rest (of the humanity)).

(Through the knowledge and technology we have, we can bring our collective desire (to fulfillment. (As our KS are positioned around the world, together we cross the souls of the world leaders from Australia to China, from South America to United States, Canada, northern Europe, Iran, and the rest.) We become that envelope of love. We bring the change through understanding, that the fields of the universe can be bent, and be elevated. (We know) that the Light of the Creator does not travel in the straight line, rather it bends in every direction, to create a just and beautiful Creation. The man's physics has made a (huge) mistake by denying the truth about its own Creator.

The teachings in the coming time, will not be about showing you how to do things or to make systems, but we'll show how it's done. Because these systems are not needed to be understood. The fundamental principle of transmutation and transportation needs to be comprehended by the STP of the man. (This understanding allows the creation of what we call, the "tornado," and where it takes off from, to where it lands, and how it moves.)

(Now we start creating the motion and conditions for the desire of the human race to be peaceful. Before, to create that condition, you were throwing your Gans's in the rivers, oceans, on the fields and in the trees. The collective soul of the Knowledge Seekers becomes that Gans, that field, that elevates the soul of the mankind.)

This is why we asked as many as you can, to Linz. This week we had people coming from all around the world from Australia, Asia, Africa, Brazil and North America. (The

collective net of the revolution, of creating the life of a peaceful man on this planet, this week became complete.)

(It was interesting to have both an Australian, and a black man, at the same time in the (flight room). Because the black man began in Africa and ended up in Australia. The two dimensions of the expansion of the physicality of the Man started from Central Africa, and the last points ended in Australia and America. They both went through the same process on the same day.)

In a way, we brought an end to the completion of the all the travels of the man in the physical dimension. Now it's time to bring the soul of these physicality's to the dimension of travel in the depths of the space and time.

(We have already tested how souls will interact collectively, some weeks ago when we invited the Italians to have a party on the Moon.)

Soon you won't need to go into the system. The system will allow you to create the "tornado" within the system and within the structure of your soul. These systems are not all equal. We set them up to create a rotation of the field dimension.

(The way our systems interact with your soul, now your soul within this room will interact with the fields.) You'll become part of the field, your soul becomes part of the feeder, and part of the condition. And then you will transmute much, much easier. Very soon we'll do a collective transmutation of a group of 4 to 10 souls.

From those who do the Mobile Transmutation we'll need your GPS to position you, and your exact altitude. Don't guess your altitude, or you might end up two meters off the ground. If we can't land you precisely on the ground, then we'll settle for 50 centimeters above.

For those who go beyond Earth, we'll use the knowledge from the Universal Community to take you to different positions in the Galaxies. The UC will guide you to where they've been, and how you get there, even though they do not have the knowledge for transportation of souls of physicality.

The knowledge is growing rapid, we cannot, and will not stop. We still carry on with developing the man's needs for today with the gas, electricity, food, and the rest.

(Many people are making orders at the KF Store, but are then just leaving it unfinished.) If you do not complete your order, after 3 days it will be cancelled. This goes for the Moon landing and the other flight system programs. It will be the same for the generators and EU.

(When you take part in this process of change it should not be temperamental, or just a surge of the emotion for the moment. It should be a conscious decision to be part of the change of humanity.)

In the coming weeks, when we are able to complete the process of transmutation, we will be able to transmute you in any level, any shape, or any creatures you like to come back as. Maybe, you always wanted to feel how a cat lives. The systems will be able to do that. You can live that level of life, to see what wrongs you have done to them, from their eyes. You will also be able to discover what gives them pleasure and makes them happy.

You can see how a stone in the river feels, or how a fish travels in the oceans. Now the transmutation is not just for you as a man, (you can choose what you would like to experience. The only limitation is your own desire.)

The you landed on Moon, and became the man of the Moon. Now through the essence of the STP, you can become the animal you love, to see how you have treated them. You do not become a cat, but you come to see the life and the desire of a cat. It's the same as if you go to China, but you don't look or speak Chinese. Now, with transmutation you will look and speak Chinese, but inside your STP, you know that you are English and you speak English. But, "how come my words coming out as Chinese, and I understand everything in Chinese."

In the same way we'll change the totality of the life on this planet, (and correct what we've done wrong, and bring the changes in a good way for the Totality. It's the responsibility of the man to give this planet a safe and correct (life). And it's the responsibility of the STM to understand the soul of the life on this planet. For up to now, we were not aware of it. But now that we are aware of it, and we become responsible for it. We will elevate our animals not to fight or kill each other.

What's the use of changing our leaders, when Mr. Putin will still see the lion killing another animal. (We have to eliminate the "totality of destruction" and war from all levels of physicality on this planet. It's the responsibility of the human race. It's the responsibility of you as Knowledge Seekers, now that you know about it, you have to change it. It's your responsibility. We are not a cult, we understand the process of Creation.

In the past few days, many people have said, "my family says I've joined a cult." Yes, you joined the cult to be human. You joined the cult to become perfect in everything and in every matter. (If that is what it means to be a cult.) This is not a cult. It's a scientific understanding of the creation. We were born to be able to understand, that we are responsible for what we do, (what actions we take, and how we use our mind.) Those who say you are part of a cult, tell them, the problem is, (that (everyone) is already part of a cult. That cult is - greed, stealing, and everything else.) (But they don't want to change their cult.)

(If you call this a cult, it's where nobody steals, or does anything wrong, because we understand the science of creation. We understand the technology and with it we can produce everything that we need to live, and we treat everybody equal.)

We are a scientific organization and not a cult. The cult of stealing, thieving, and killing has been the norm for the man, and it stops (everyone) from elevating their souls. Now we elevate our own soul to understand the science of creation, (and to understand the purpose and how life works.)

From now on the steps through the development are going to be so fast, that if "you don't want to be a tomato, you had better ketchup," with the knowledge we share. With the knowledge we dispense to you, in a very soft way, that could be understood from the layman on the street, to a professor of physics, in MIT. Even though, what I call, a farmer in Africa, understands more than the professor. Because there are no limitations and barriers of arrogance in this knowledge, and the gaining of the knowledge.

(We have changed our course of teaching, instead of telling you connect this to that), now we create a condition that, through the work of it, you understand what needs to be done through the soul. We stopped teaching about the physical condition of making the MaGravs. Now we create a condition of teaching your soul, which is much easier, and much more profound. In that way, I'm sorry, there are no MaGravs to make for the brain, because your brain is already a MaGrav itself. You have to understand how (the fields) work and interact. We have no choice, but to rapidly extend the knowledge.

This week, we have offered the same knowledge to leading world governments and organizations to bring the next step forward. If you remember, that we opened our factories during the time of disaster in Italy, and we became part of the civil defense organization of Italy.

In the same manner, this week, we have offered the KF knowledge and technology to IAEA, the atomic energy authorities in Vienna, for use in Ukraine, if one of the nuclear reactors goes rogue, and we see a disaster coming. KF disposed itself to the IAEA for any eventualities, if we see Fukushima conditions. Mr. Grossi as the head of IAEA organization, is fully aware and in communications (with us,) that the technology is available. We have no patents, we don't support any patents, but our knowledge will go to, what I call, the "man of understanding of the nuclear technology." (We have offered) to become part of the (rescue) if needed. As we did the last time, in the background, (during Fukushima) with TEPCO of Japan.

If something goes to wrong during the war in Ukraine, KF will support in containing the radiation.

(It does not matter, (what) condemnation (we might receive), as long (we contain the radiation, by holding or suppressing nuclear reactors until they are in a safe condition.)

This is how it should be when time of trouble comes for the rest of humanity. KF is not just opening its patents, but also it's factories, scientists, and KS to be there, to help and give the guarantees, that the knowledge is there to support.

For those of you who take after me, as my, what I call, "followers of the knowledge," and leaders of the KF, this should be your attitude, and the way of doing things. In time of need, KF (puts itself at the disposal of the nation in need, to safeguard its purpose.)

We have to understand, that a nuclear reactor is very much the same as one of our systems in Linz. We can tame and bring it under full control. Understand that we can even use its properties for other interactions, and safe purposes.

We are able to understand, that we can bend the M fields and change them into what we call, "the operation of the system." In the future, many of you will become the decision makers on behalf of the Soul of the KF, and you have to behave the same. You're there to serve, and not to be served. It does not matter the time, place, and position.

For many of you, especially those who are on the border countries with Ukraine and are worried. We give you the surety that KF has completed the process, and we carry on with it, with the IAEA to safeguard the position, and if anything goes wrong with the nuclear reactors in Ukraine.

(We understand the process of how we can create a tornado of the (fields of the) "soul of the reactor", that it brings (its fields), back to itself. We have the ability to bring the fields back to the source.) The way we do with the STM.

Go back to the writings of Bahualala and understand that, even a stone has a soul, let alone a collection of stones called, plutonium and uranium. It's understanding of the knowledge of the Creation, which is the responsibility of every soul (to do). It does not matter in which dimension and direction, or anywhere across the Unicoise and U.

In the coming time, we'll teach you more. Step by step, we'll bring more knowledge, so you can open your eyes to understand more of the totality of the knowledge of the creation.

Transmutation and transportation is not exclusivity of the STM, or the STP of the man. It's inclusive to every being, and all living things across the U. And man has to learn to respect it as a package of energy, which confirms life in one position or another. As a single field, (what you call, an atom), or as a collection of fields, like the human body, a galaxy, or the universe, all has to be respected.

Once we comprehend this, then we'll understand most of the knowledge of the creation and the Creator. We showed you how to make MaGravs. and now we create a condition for you to be able to understand the power of your own soul, its composition, condition, and how it shall be.

Understand the technology in its true sense, and not by its dimension of physicality, then we'll be (able to) elevate the souls created by the Soul of the Creator, irrespective of the time, place, and position.

Then you understand why the Universal Community envies the knowledge, which has been gifted to the man. The earth now has become the center of the knowledge of the Universe and the Unicose. One day you will understand. One day your children and grandchildren across the universe, will understand the respect the Universal Community has for the race of the Man, that the love of the Creator shines through the love of Mitra, on His children.

Let's see how we stand the challenge, and how many of you will go through the process of the transmutation of the soul, and then the physicality. I hope in the last few sentences of this teaching, you understood the totality of the knowledge of the Creation. Sometimes through the lack of knowledge and hypocrisy of the man, he knows, (but then) he bends it to suit himself.

End Part 1 Quick Index 447 KSW

KF expresses much regret and condolences to the family of Mario Trane, one of our teachers, who passed away this week. I'm sure he brought a lot of joy and new understanding and comprehension of the science of the plasma Technology. Hopefully, he'll find his elevation, in what I call, position, in the dimension of the Creator in the Universe. Mario taught a lot about the Flower of Life, and he appears in the 60th KSW.

Mitra and the Love of the Creator

Q: Chinese people are unfamiliar with this name, Mitra. We're most familiar with Buddha, Jesus, Mohammed, Confucius, and Lao Tzu. Please explain in the detail about Mitra?

K- Mitra is the essence of the "love of the Creator," and it's not a religion. Mitra is not a beginning of (something like a religion.) Mithraism, was created by those who understood the love, that the Creator has for another created thing.

She is not a religion, not a path. Do you call a religion, the love you give to someone. It's a path of emotion of understanding? Mitra is what the Creator, loved to show love to. It means, the essence of interaction of His own dimension of emotion.

Mitra is the essence of the love and devotion for the Creator, in understanding how creation can love each other. With it, He fell in love with all of the created things. When the essence of the soul of Mitra, interacted with the dimension of the soul of this planet, he fell in love with it.

It's like if you go to a football stadium filled 100,000 people, and you don't fall in love with any of them. But when you walk outside the stadium, and right there, (out of nowhere), you see someone, and you just fall in love with them. You just lose your life to them. It's the same.

(The soul of the love of the Creator, by interacting with the soul of the planet Earth), He fell in love with its beauty and its diversity. Mitra is the love of the Creator in giving unconditionally to His creation.

It's like loving your own child. (Even though you are holding its physicality, you also created the soul. The true love comes between the soul of the mother and the soul of the child. The dimension of Physicality will fall apart, both bodies will die), but the love stays. This is what Mitra is. It's not a religion. (In Mithraism you think good about what you lover, talk good, and act good about it, because otherwise, you can hurt the lover. That's all it is.)

(The religion came by those who wrote about it, converted this condition into a path for others who wanted to follow it. They traveled about and people explained it to others, what the true condition of love is.) Then would I merge from it.

(Some carried the ideas from the land of Persia, to India where the Buddha was, and later Tibet. The Buddha fell in love with the understanding of the love of the Creator. Then it developed into Buddhism. It was the same with Christianity, Judaism and the rest.)

(Those (prophets) did not travel, but they understood the essence of the love of the Creator for His created things, which is Mitra. Everything else came from it. When you call it Jesus, Moses, or Muhammad, they are all replication of each other, as they came through the time of each other. Jesus was a Jew, (and he was touched by further understanding of the love of the Creator.)

(Mitra never wrote anything. Jesus also never wrote a single sentence, but people wrote in his name, and made Bibles of it. In a way, if you look at it, Jesus was illiterate in writing. The Bible was written by his disciples, and over the years so much has been written about him. But he, himself, never put a word down.)

Mohammed traveled to Palestine, where he saw, that the people there (believed in God, a Creator. Whereas his people, the Saudi's, were only worshiping statues. He too never wrote anything. It was written as he spoke. The only prophet or Messenger we know of, who wrote in his own handwriting, was Bahauallah, bless his name. There was no change in his writings. Nobody could interfere and interpret his writing in their own thinking.)

What we read about Moses, was written hundreds of years later. It can be anybody's imagination. The Torah is nothing but, what I call, a bunch of people's writing put together, as it suited them according to the time and place.

Mitra never wrote anything. Mitra is the emotion of the feeling of the Soul of the Creator, and nothing else. It's not a religion. It's like when you fall in love with someone, and then you write something about him or her. (You write it through your own eyes and understanding. It could be totally different, from what he or she intended). (Or the true understanding of their life.)

So, when you talk about Mitra, we talk about the love, devotion, detachment, and what I call, the embodiment of the true essence of the Creator to his created, what we call, Mitra. Don't count it as a religion. If love to you is a religion, so Mitra is to God.

Mr. Keshe said, he lived in China for 3 years, and you never can satisfy the Chinese by your answers. But they understand. He was invited many times to meet Taoists, and others. Some of them have ideas about our teaching, and who they think we are, and whatever. You understand that the whole structure of the culture of the Chinese is so beautiful, but is embedded in a lot of mysticism, and a lot of understanding of their own translation of the knowledge. (Perhaps mysticism means, the Chinese have words and concepts about how life works, but they don't have the deep understanding of the knowledge of Creation, to explain it scientifically. It ends up being a lot of their own ideas about things. No matter how profound the experience is, there is a limitation, when you don't have the complete Knowledge of Creation.)

Wang Lin added, that Mr. Keshe told her, it doesn't matter what the people said 2,000 years ago or today, if they are talking the truth, the truth is the same regardless of the time.

Mr. Keshe was asked, in honor of Mario's passing to teach something about the Flower of Life.

K- What do you call the flower of life? You have to understand the structure. They put a design of a Flower of Life on the screen. If you look at this design. (Initially in Mario's work on the Flower of Life, he was very correct, because he understood the essence of the fields. He went back over many of the teachings about it, and he talked a lot about it, but never understood it. In a way, he came to understand (about the line of creation, and (?? what the) transportation and transmutation is).

Mario drew a number of diagrams, showing his understanding of how the Octave works. He discussed it at length in the 56th and 60th KSW. Mr. Keshe draws 3 dots and 1 in the center on the pattern of the flower of life. This is a Star Formation (SF). Mario understood what a lot of KS missed. It's the essence of the motion of magnetic (M) fields. He drew 3 more dots, which formed another Star Formation, but this one was in the opposite direction.

The combination of the 2 Star Formations share the same center point. This creates the dynamic motion between all, which is the essence of the Creation. This is why this is called, Flower of Life. It is life, because in itself it creates interaction. And within itself, it has a common point with the other points, to create another cycle of life. (From this single structure it expands and spreads out creating new SF from within itself. It reminds me of when you watch the films showing the cell divisions suddenly occurring as an embryo developing. It grows from within itself.)

This is why it's called a flower of life, which means, through its dynamism, through its dynamic structure of the Star Formation it creates life. And it can expand into a bigger dimension as it interacts with more points.

The blowfish or puffer fish works on this basis of the SF, but they never understood it. Go and look at the puffer fish (Blow Fish). The skeleton of the puffer fish, has a very loose SF structure, that is like the flower of life. That's why it can expand and contract itself.

It's like a cycle of life. You can expand it to any dimension, it has no limitation. These kind of physical structures can be created out of the fields of this planet, or the Universe. The fish uses the muscle tissue to hold and contain the flower of life.

It's amazing how Creation adapts itself into these conditions and positions. (By looking at the skeleton structure and how it is positioned, you see a lot of similarities with the expansion of the Universe by what we call, the flower of life structure. It's a combination of loose bones in a star formation, that allows it to expand. Because life is not constant, it's not fixed. It's like the Blowfish, it expands.

To have that expansion you have to have certain physical structure field forces, other than what we have as ribs. Our ribs limit the expansion of our chest, and that expansion of the chest, limits our way of thinking, limits the way we take energies, grow, and shape ourselves.

The rib cage has brought limitation in man's intelligence, emotion, and everything else. When you have a rib cage, structured like a flower of life in the Blowfish, then it's a different understanding, you absorb differently. If Man's rib cage would have been like the Blowfish, then we would have had totally different emotions and understanding of life.

The bone structure is loosely connected, but it is always connected to the next cycle of energy. It's very much like a star formation, which means expansion. Star formation energy fields, are expansion fields.

I hope I answered your question. The tree of life is the same. The base of the tree, as an extension to understanding more. In the Persian culture, we make carpets called, "the tree of life." And you always put the tree from the point of entrance to a building, into a hall, or a house. As you walk in, you become part of the tree of the life of the family. That is why it is called, the tree of life.

A KS was commenting on what a beautiful soul Mario was and that he interacted with him.

K- A bit stubborn. (laughs) He was a little bit stubborn, he was very much set in his own ways and his own way of thinking.

Q: (Before you clearly stated about the "soul of awareness of the truth." Now, everybody's talking about STM, the STP, and the physicality. Where do we put the "Soul of awareness of the truth," into that magnetosphere?)

K- Explain yourself, what you're expecting. What are you looking for?

Q: (I had experiences of flying around space, after reducing STP, and being feed by the STM through interactions with other human beings, and activating the carbon 14, and allowing my STM to take care of the Totality of souls within my magnetosphere. When you go into space using the STM, it's a primitive spaceship, a perfect full sphere. I felt puffed up, really fat. I felt like a blowfish. When the spaceship of the STM goes into space, you have another Soul in there, besides the STM. That other Soul is a passenger, an onlooker, it's an observer. The STM will do whatever it wishes to do, and you literally observe that. In many ways, that's the basis of schizophrenia, but at an elevated level, that's in line with the universe. ..

K- Let me tell you two things. First of all, the STM it's not a primitive spaceship. It's one of the most advanced systems ever created. (If you call it primitive, that's compared to the Creator.) It's one of the most advanced systems, that ever existed. It doesn't need containment, and carries all the emotion. It doesn't need to be encaged, but it encages itself to the dimension, what we call, like the STP.

On the other hand, we have not yet understood the power of Soul. Man has not even entered to that dimension, to understand about the power, the unlimited power which he possesses. Let alone, how he can use it. Even in the teachings of today, about creating a "tornado of transmutation," is very hard for you to understand.

Your Soul is dynamic, and your STP is dynamic through the interaction of the fields of the blood, and the rest. If you can control the field strength of it through the emotion of the Soul, and bring it to interact with the field strength of the STP, then you do not need the shape of the man. By using the fields of the existence of the man, through the essence of the Soul, and the STP, you can create that tornado.

I explained this before, that if you put your hands out, and create a light, and then the emotion between the light in your hands and the Soul, can feed you, and you can create anything.

If you slightly change the strength of the Soul, that it releases more energies, then in interaction with the STP strength, you can create that tornado. Remember, that a tornado is created by the vast change between the dimension on the surface of the Earth, and that, at the cloud level.

It's the same process with you, only you create little tornado of the magnetic fields of the STM and the STP. There is a lot for Man to understand about himself. We have just started showing you how you can open up your Soul. You still do not know what you can do with it.

You're happy just to reach the Soul of a leader to change them. But you can create hurricanes in the Soul of the World leaders, that they will elevate so fast and receive so much energy, that they'll want to forget about - if even they want to be a human.

You haven't understood. When we say, that you need one soul to change everything, this is what it comes to. (It only took the single Soul of the Creator to create the whole universe), can you imagine what one soul on this planet can do? A Soul that is embedded in the Soul of the Creator, which is the soul of Mitra, and it's children, which is the creation of the love of the Creator.

This is why we need to understand this knowledge. (We already spoke today about creating a condition using the STM, and not needing a system.) This is where the teachings are going. How do you go in the depth of the elevation of the fields, that by humbleness in the dimension of the strength of the STP, you create that condition (of transmutation without a system). You don't need the physicality.

Whatever a tornado touches, it crashes it to pieces. You see the cows and buildings being thrown around in small pieces. But in the tornado of the physicality of the man, (you open up all the fields of the man, the STP and STM). You don't need to have hands or legs.

We know Jesus tried this once, but he got frightened by it. He was the only one. He was young and fearless in these things. He saw it, he understood when he gave life, when he brought the dead back to life, as he understood it. He tried (to see if he could create a condition, that it becomes a tornado of life. But the fact of it frightened him, and he allowed it to go (away)).

Now we teach it, for you to understand it. You will be in awe, that every created things, which has a STP, STM, or Soul of the existence, will be able to do everything you can ever imagine.

It's coming. As I said this morning, up to recently we taught you about the physicality. Now we'll teach you about the knowledge of the universe. This school is very tough, very, very tough. Especially if you're attached to the world of the physicality. But you don't have a choice, sooner or later, it will become fashionable like the mobile phone. Some people may lie about it, that they have a beautiful phone, but really it's a patched up one. While others really do have a beautiful phone, which is their Soul, and they all become the same.

Q: When you activate the STM, by reversing its jacket, so to speak, then the Soul of the Man is taking care of the totality of Souls. Can it receive other souls, and take them into space as well, like a spaceship?

K- You cannot take another soul , if it doesn't want to go. We've seen this in the flight system. Where a couple went on a trip, but then one decided not to go the whole way, and

went somewhere else for part of the trip. You can (take other souls), but they have to accept it. You cannot force someone, just because you can.

The consent form for travel into space has to be notarized, because it's legal. You travel on your own responsibility. All these NASA astronauts do the same.

I just had a little note from our development team, it says, they're currently assembling the control system. We will see how things will come up.

Q: The spaceship with the flat bottom, where the fields turn back in on themselves, is it more advanced than the STM, which is a full sphere?

K- In spherical plasmas we have the same. The fields turn in on themselves, as much as they link into it. They create that shield, or what you call, the surface of the planet or sphere. We have wrong physical pictures in our head, that all the fields goes in through the south, and go out through the north. In fact, the fields come from all dimensions and all directions right across the whole surface of the planet, or a sphere when it is in the shape of a plasma like Earth.

They tell us you cannot bend the light. But in fact, if you cannot bend the light, you cannot bend any M field. We have understood everything through the world of Creation.

A KS said, that while he was traveling with his STM, he could only feel his arms up to elbows and not his hands. Likewise, only the legs up to the knees and not the feet. But people in the EU could feel there hands and feet. Is that because the flight enhancement system is incorporating more of the STP?

K- The Enhancement Unit is a complete understanding of the structure. On the other hand, what people feel on the Moon with their hands and feet, is an extension of the connection of themselves with their Souls. It has nothing to do with the system. It's how they want to perceive, (and translate what they experience.) It's like the way you translate a dream. (If for example, your dream comes from your grandmother in your head, but you don't see that there is somebody else standing behind your grandmother. You could only see your grandmother). (This is due to how you translate the experience.) This is not because of the system. It's the interaction of the translation of the information by your own STP inside the STM. You call it, vision blindness.

Q: Let's just say my STM went to the Moon. Do you think I would feel my feet and hands?

K- It depends on you, that's all. It depends on you and what you want to accept between your STP and the STM, which imprints the interaction on your memory disks. That's all it is. It has nothing to do with anything else. Who can tell you what to remember?

It's like background noise. (We have a lot of background noise going on all the time), but we choose not to hear it. It's the same. This is an individual process, nothing to do with Totality.

There is a discussion about the control system of the reactors and STM. It was recommended to go back to the Blueprint teaching in 2015.
The control of a system comes through the emotion.

Q: Can vertical beings create multiples souls independent of seeds?

K- Yes. Actually, it's the cornerstones of diversity, in the vertical beings. We have the first man and woman created, and there after we have the diversity. Or the "first life," and then we have the diversity of life as fish, lions, mouse, Man, and the rest of it.

(The plants or vertical people all started from one interaction of the fields, then further interactions of those fields with the other fields, created the diversity. The seed is the confirmation and repetition of the same process.)

(Nowadays, they do tree grafting, where they take the skin from one tree, and put it on another one, this is how they diversify the fruit. If you can do this with just the skin, then you can also do it with the MG fields of the plant. All the vegetation you see on this planet started with one interaction of fields, and all the varieties of vertical beings, comes from the interaction of those fields, with the diversity of (the fields of the) environment.)

(A KS told her experience, that by just listening to a recording of the Mobile transmutation from Rick's program, she was able to quit smoking after 40 years. She wanted to know if it is possible for the lungs to be cleansed, even after 40 years of smoking?)

K- (It will take years to get rid of the nicotine embedded in the lungs. It's not something that will happen overnight. Many people coming out of the EU, say their lung problems get better, they can breathe easier.)

Cleaning the lungs depends on what fields you can replace in them, and how much of those fields you can use. Don't forget the lungs are the closest thing to the STM in the expansion and interaction with the central fields of the STP, in which massive amounts of it, are always in the dimension of motion in the heart. You might not be able to clean it, but you can bring a lot of change to it.

It's nice to hear that you had such impressions (from the transmutation recording).

Q: What about loosing the desire to smoke, eat or other addictions?

K- It's not a desire. We open up a field strength, which feeds, or satisfies that need. That means we get it from the environment of life, or the surroundings. That's all it is. We satisfy a desire with the same field strength, then you don't need to smoke. When you are satisfied by the fields of water and food, you don't need to drink or eat.

You have to understand, nothing is magic. You have to understand the principle behind it and what gets satisfied. (You satisfy the fields of certain emotions, then you don't need them.)

Your journey just begins when you enter the EU in Linz. After we open up the STM, the rest of the U is ours.

(The rest of this Quick Index will be very brief, but you to study further on your own.)

Transmutation process in Thalamus and Thymus how do they create radioactive materials like Uranium and plutonium.

K- Oh my God. We need about 20 sessions of teaching for this. But principally, the one, the gland, is a conversion of the fields into dimension of physicality of a Gans, and the other one, just provides the information and the strength of where it's needed.

(The one in the head converts according to the need of the emotion, and provides the physical strength of it. .. It passes that information to the gland, and the gland creates a specific strength field, which allows a specific point in that organ, for example, the prostate, to become cancerous.)

With our technology women can still give birth at the age of 200 or 300 year old.

The Lymph passes in the vicinity of the glands and receives the fields, much like the machines that sterilize tomatoes, by passing them in front of microwaves. It tunes into the strengths it needs. This one may need 20 hydrogen's (to create) plutonium, and another one needs 20 hydrogen's to make calcium. It's very, very intriguing how the system works.

Q: Would Mitra be like the interaction of the primordial masculine and feminine energies in action?

K- No, it's wrong. Mitra is the essence of the emotion of the giving of the Creator, in loving Itself. People were asking about how they can interact with Mitra. Mitra is part of the way we live. (Our conscience, (the sense of right and wrong), which is embedded within us, that is Mitra. Something in us knows what is a good or bad action. We know when we are thinking good, speaking good, and acting good). It's us who chooses to go the wrong way.

Q: The President of France said, that very harsh situation is about to happen, and he asked for the power of the Soul of the people to change this situation. How are the negotiations with the European countries regarding the KF Gas and Generator units coming along?

K- It's left with them. You've got to realize, a lot of European leaders would like to see (this kind of crisis) with people, and to see the people and the governments to hit head on.

The burden of the government's expenditure is beyond what they can accept. We'll see some governments push for unrest and conflict.

(The KF technology is on the table with the governments, it's the same with the IAEA regarding the potential nuclear (situation). (Regardless, the KF is going to have to, have its own development, and its own structure of work for (the release of the T.) There is a very big problem that sits, especially in Europe, and other structures, as there is a bigger plan behind it. (Increasing prices only serves the people who want to increase their own control).

I foresee once we start putting these (Generators and Gas) units out, the government's will make it public, and people will start producing. We are prepared for that. Now we're negotiating with the government's for transfer of technology. We have to change it.

The KF Gas Unit prices have been increased to 10,000 Euros, as of yesterday. And the combined Unit has increased to 15,000 Euros. Plus we brought the 10 kilowatts unit down to 5 kilowatts. Because we want to be able to meet the demand, and control the supply and demand. As we are an NGO, whatever we make goes back into the company. It's good for the spread of the technology when people can look to the plasma technology for feeding and warming themselves.

All government's are thinking about it, but by the time they decide it might be too late.

Q: The French President said, that we need to focus on the Soul level in our prayers. How can we as KS can help in this process with our soul and prayers?

K- We are already doing it. In a way, by understanding the work of the Soul we can do a lot. We hear a lot of world leaders starting to talk about the soul, because they can't do anything else, and to them it's a mystery. People don't know what it is. So, (the leaders) lead them to believe the soul will feed them and create electricity. It's a way of shortcutting their own shortcomings. (In other words they are talking about the soul, as a way of escaping their self-made problems.)

Mr. Keshe urges KS to take this crisis serious and to use the knowledge they have learned from the KF to save themselves. He asked us to make Gans's of the different foods we eat. Do it now while you still can get the food in the market. Later, when the crisis is upon us, it will be much harder. Make Gans's of meat, chicken, lamb, potatoes, and all that you need. Start getting ready for what is to come. These Gans's will last for centuries.

(Souls are constantly in communication with each other. It's like the air we breath. There is no place on earth you can go, where there is no air to breath. It's always present). It's the same with the Soul, (it's always present.)

Mario's brother was shocked to find out through KF, that his brother died in Bangkok. He asked for help from KS for more information.

The high temperatures, hurricanes and other forces of nature are a natural process. It's been happening over centuries. Greenhouse gases have little to do with it. It has more to do with the Earth being pulled into the Sun. We're getting closer to the Sun, so we're getting warmer. We are also moving closer to the center of the galaxy, by millions of kilometers, every hour, and that creates a higher temperature, higher field interaction.

What Rick found on Internet was a bunch of conflicting information, and scientists saying, that the Earth is moving away from the Sun.

There's a bigger discussion on this. Mr. Keshe clarifies the true situation from the point of knowledge of plasma and creation, which modern science does not have. It is all muddled up. These things have been tested and proven by using plasma reactors, and observing how they behave, because they are the same as the sun. The temperature in center of sun stays constant, it's not billions of degrees Fahrenheit. The heat on surface of sun is from interaction of MG fields with the Inertia Mass of the sun.

The buildup of the layers and mass on the earth comes from interaction of the fields with the sun. It constantly rains down particles, the mass increases from the conversion of fields.

Plasmas themselves don't have frequencies. But when plasmas are compared to other plasmatic fields, the conversion of fields does have a frequency. The frequency comes when you want to penetrate a dimension. Between the plasmas we have a frequency, we create that frequency, as a weaker PI is trying to penetrate the stronger one (??), in the field strength dimension.

But within the plasma, there is no frequency. Because there is no resistance, it's a continuous expansion of flow through the same. Unless you have bits, which gather, they become like clusters, and then the field has to interact with it. Then that creates a frequency in that part, in that specific position.

It's because plasmas are DC. If they interact with another plasma, and create friction, we call it a frequency. Otherwise, the plasma will just go through it.

If you touch the soul of a cell in the body of the man, then you change it.

People who have been in bed for 5 to 10 years, when they are processed with plasma, they start walking within two days. Physiotherapist and doctor can't understand it and they say it's a fake. It's because you enhance the soul of the cell, and that changes the physicality, and people walk.

If you have problems with orders, now you can reach customer service, on Telegram (@customerservicekf).

Q: Is it normal to feel this "tornado" of fields in both directions? With the Cup of Man, I felt it both in the clockwise and counterclockwise direction. And by listening to the

Mobile Transmutation recording I felt like my body was swinging. Do we control these fields through the STP or the STM to initiate flight?

K- We see this rocking forward, backwards, clockwise and anti-clockwise with many KS who go into the system, especially with the recent changes we've made to the last systems we put up.

When you settle down and understand the work of the Soul and the STP, you will get this. (It's not just talk, we are seeing these field tornados with many people. The systems are set to do this. The new reactors will create more of these kind of interactions). The two new flight systems, which are getting added to are totally different, they are an amalgamation of the knowledge, to do this.

This is what we call, a "tornado," or (feeling like you are rotating clockwise and anti-clockwise.) We've seen this, especially in past 3 weeks of flight sessions. I can say 50% of the people who go through the system, say they were rocking clockwise and anti-clockwise.

This shows that the technology is very correct. Because of the new setup, we allow the STP and the STM to expand, and the expansion in different strengths, creates that kind of interaction, where it feel like a "tornado," and (people start) rocking. The physicality is too weak to withstand such strong fields, so, it goes with the wind. You become part of it and you rotate. (It's like the Jewish rabbis banging their head against the Wall, and rocking back and forth.)

This shows, that the Soul, and the STP have been elevated so much, that you feel this rotation and rocking. What we teach is what you will see in reality, as it comes. This is one of the signs that shows us the systems are well tuned, well set to meet the demand of the man in a coming time, for everything.

(The Soul gives more, that the higher strength appears. The more you empty your cup, the more you receive in the cup. It's actually the Soul giving more. It doesn't need to be an expansion of the Soul. The more you give from the end, (it creates a space, that a higher order (field) can fill it. So, you receive a higher order. You operate on a higher order strength. In a way, what you give, comes back to you. So, it increases the strength. The container is the same, (meaning it doesn't have to expand), it's the man who changes the strength of it, through his conduct.

(For those of you who have already been through the system, you have started a process. You are more ready for the next step, (the transmutation.) It makes it easier for us and for you too, to go through the (next) journey, and allows us to complete the cycle.)

End Quick Index 447 KSW

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:10).

K- Yes, Good morning, Good day to you, as usual. Wherever and whenever you listen to this series of Knowledge Seekers, Keshe Foundation Spaceship Institute, sharing knowledge with each other, and amongst each other, and maybe sooner than we think. Today, we are used to participants from us, from different parts of this planet. In a most probably repetition of the same number of teaching, will have teachers and knowledge sharers (from) across the universe.

The steps are getting faster, the approach to the final goal to bring to Universal Community is getting much, much closer. As many of you are aware, we are testing, we have started testing in the different aspects of the transmutation and transportation, expansion of the energy fields of the man, the envelope of the soul of the life, that we can transmute man within the envelope, his own energy not by ?? ?? .

We have had the pleasure of going back into the test table, going back on having Knowledge Seekers (KS) who come from right across the planet, to be here for a very short time. This week, we had people from Mexico, we had people from the United States, we had Azar, from Iran, and we had from Austria, other nations on this planet. (:12). We had the first what we call, "man of color" from United States, who came for one day, just to leave the fingerprint of Africa on the system.

We getting closer to the point, that we'll come to understand the Totality. This week, as we are setting the systems up, getting ready for the next step. Three of our Knowledge Seekers who went through the process of, expansion of the energy fields of the Soul of the Man (STM). As our systems are already set, there need to be more, or less fine tuned, and control system completed. When to the position of wanting, knowing they could move from one unit to another. This was .. already preset in the system, but it's not what you call, connected, but it could not cross. Hopefully, within the coming days, within the coming weeks, we'll reach that point.

We started the transmutation and transportation. We have agreed for the first international transmutation. One of our Knowledge Seekers within the next few weeks, few days, as we pretest. For those of you who come to Linz, and those of you who have signed in for Mobile transmutation, and those of you who have signed in for what we call, "landing on the Moon and Mars," you need to bring with you a letter of consent. You need to send us a letter of consent, and notarized, which means you give us the consent unconditionally, and you accept all responsibilities to be part of this experiment. (:14). To be part of this, what we call, excursion.

As we know, our human friends are going back to the "monkey business" on Monday of shooting up the rocket again, into a space to go around the Moon, and come back in two

weeks. We wish them all the best. We wish them success in their endeavors, as their what we call, cycle of knowledge has to complete part of the knowledge of the Man.

We wish the NASA corporation, and all their team success with their launch on Monday. We hope they learn more, and in 2024, what they hope for 2025, will be there to land again (on the Moon). By then I hope many of you and Knowledge Seekers will open a cafe and a restaurant, and a what we call, "a place for the men of the NASA" to come in and stay with you while you're on the Moon, and on Mars.

The development of the technology is rapid. The development of technology is so rapid that in a way, it takes our own teams to understand it, that we can implement it. So what we see in 2025, or 2024, our human friends from Earth come to Moon, and they encounter with you, as the passengers of the Keshe Foundation Spaceship Institute. They might not recognize you as a human, because you have taken a shape and a form to live on the Moon. But carry your passport with you, and tell them on Earth this is my name, this is my passport. Try to understand more, that we have to accept all knowledge's, and all sciences, and we cannot be arrogant in what we've achieved more. Maybe even by then, NASA might abandon the, what we call, this probe. (:16).

The reality with going further with this technology (T), or transmutation and transportation, is that we can, we have seen, and we start expanding the knowledge beyond. What does this mean? While we are teaching you, while we are testing on the systems for Moon and Mars, we are adding systems in the background, even without the knowledge of our own, what we call, production team, systems to land you in different part of this galaxy.

We have negotiated with Universal Community (UC), and we have agreed where man can land. In a way, we will release the positions, that man will land out of his own Solar System, expected by 2024 -2025. Which means, we'll be able to transmute you back, which means we will be able to bring you back to Earth. But at the same time as you manifest yourself in a different dimension and direction, you will be recognized as citizens of this planet.

We have set out to achieve this, and it will take us what we call, by trial and error, by understanding more, to be able to transmute energy packs, and to transmute everything as an energy pack. Even the paper you carry in your pocket, the suitcase, will be carried as an energy pack, as a Gans of itself to convert to whatever it might look and stand on the position that you're at.

These are the knowledge's that has to be gathered, has to be understood, has to be extended. Many of you by the time you come in for the what we call, Mobile Transmutation, (:18). you will see landing in a new space, and new systems, and our transportation system has gone into operation of the production, as of yesterday.

In a way, what you saw as a Vertical Unit, now is getting to be, take shape in reality, then we do not need the systems which we have, and you are testing in for transmutation.

We'll go back into the Vertical System. But in these systems, it gives us an ability and possibility to do much more. It's a more compact. In a way, we have turned, if you look at it, the present system, which sits in a horizontal way, into a vertical way.

So, when you come into the next system of the what we call, the Keshe Foundation testing, you might not even get to go into the present systems. You will be transmuted through the new Vertical system which is getting built on and getting done. The beauty with this is, that allows us more capability. We came from the big units, and then to this. In a short while you will see many of these, like a telephone kiosks, around the place, people go in to transmute.

As I said to one of our Knowledge Seekers in past few hours, please bring your passport. Carry it with you, that when you land, we have to authorize. We have to inform the authorities in Austria and the country you go to, you are in position to transmute. If they accept you, for us to transmute. We cannot break the law. And please those of you who signed to be on the Mobile Transmutation, those of you who come from the system to be done, transmutation in the Linz center. (:20). and those of you who have signed for the Moon and Mars mission, please carry a letter of consent, and a passport with you. We need that, otherwise we will not do it. It has to be notarized, that it's not by somebody just written.

The whole structure of the change is understanding more about the fields, understanding the reality. And in a way, moving away from a lot of dogmas, which we have created in a world of science for ourselves. And by not understanding the Totality, we have created more mess with this.

One of the things which we as a Knowledge Seekers looking and understanding more better than most of the physicists around the world, is that, in what we call, we go forward with the next step, in what we want to do, what we want to add, and how we want to add things in.

What does this mean? This means that at the present time, the present world of physics has a big problem with magnetic (M) fields. We say we see fields bending near stars when there is a huge magnetic fields. Otherwise the magnetic fields, or light, which is another shape or form of it, moves on a straight line. This is absolute hypocrisy. Because it will come to you to understand, from the beginning of it, how we got muddled up with this hypocrisy, (:22). is that we draw our galaxies like this (a spiral). We see our galaxies as a flat fields. How do they become like? How does our Solar System has an oval shape? Where does the fields bend? Where does the light of the fields bend?

We accept part of the knowledge. And when it comes to other parts, we deny it, because it's suited for those who came up with it, to hold on to what we call, misunderstanding. This part of the what I call, bending like "Beckham" or bending it the way the fields will create interaction, is a cornerstone of the Creation. When you create a stronger field interacting with a weaker field in any direction, you create the what we call, deviation.

Once we understand this, once we can comprehend this process fully, those of you who were looking at what I call, these systems, will come to understand something very different. Even in our present in Enhancement Unit (EU). In the present EU, which you come and travel. When you come in, you enter the space which is hold by materials. We hold on to the reactors.

But if we look at the stars, we look at the moons, we look at the planetary system, (:24). there is no frame of work with them. So the next step for us, instead of what you enter into the Vertical or Horizontal, is creation of the field dimension rotation, that this field dimension rotation, creates this physical condition.

So in the next year or two, when you travel, when you enter, when you transmute. you'll transmute not in a box, not going into the framework, not going into the system, but creating the fields of the creation and then within it, create the dimension of your soul, to be in interaction with it, that it creates this transmutation.

So in the next few years, the next step of the growth of the science and technology with the Keshe Foundation, is not to build more Vertical, or Horizontal, or different system, but to create a dynamic field flow, through the interaction of the field of your own soul, with the Soul of the Physicality (STP), this dynamic, this, what I call, elusive part of understanding the knowledge, the science of Creation.

In a way, you entered the tornado of your own fields, to be able to release the fields, which entangled your soul, and with it, with the emotion of the Soul, to transmute yourself to any position. As I said before, and in the past, we talk about things years ahead. But when you come to it, in a few months time, in a few years time, you'll say, "oh, in the teaching of 446, or 7, he said about this." (:26). Because this is the next step of the knowledge, this is the next step of understanding.

What we have done, what we set you up to do, is when you come to the what we call, Linz flight zone, flight center, at the moment, you have two systems here in here. We have a stand in the middle with some chairs. We asked some people if they want to be. The old, what I call, dinosaur system, historical chairs are still there. But what we'll add to it, in the coming time, there'll be two systems here, which this will allow us to create that tornado (of fields in the center of the reactors).

Which means you do not need to enter the systems, you enter the field forces, that your body now goes into the enhancement system, and you sit on the what I call, the helmet flight system, which there are these in these corners. And then you see the expansion (of the soul).

In a new way, in the way that we are developing, that slowly everybody understands the process, you enter the room, and the creation of the tornado of the fields of your own soul, and the soul of physicality, will release your soul to be free from the shackles of physicality, and then you travel.

In a way in a very short time, in a very, very short time. There is no need for these systems (original EU). And once you learn how to walk, you can run, you can dance, and you can dance the whole of the universe through the D of the Soul, understanding the bending of the fields of the universe, into where you want to be.

Transportation though interaction of the fields of the body of the man is one of the most powerful systems, (:28). that man will come to understand and do. Then what happens to this soul when it travels? When you land in one Solar System, you will become part of one, when you land in another, you become another. It's the same as the fields of the Soul of the Creator, as He expands, as He enters the atmosphere, the condition of the Milky Way, and the Solar System, and then the planetary Earth, it creates the life of man.

What happened in the same rain, goes through the same galaxy, to the same Solar System, but this time on Mars, what would the life be. In a way, the STM will be here, will become to behave the same as the Soul of the Creator. But this time, as a Soul of the Man you have the decision. You become the captain of your own Soul. So, when you come to us in Linz, in the next few weeks, as these new systems are getting developed, they are totally very much the same, but totally different in a structure of the fields. We are preparing you for understanding, for the ?? rise ?? of that tornado. You do not need a Vertical system. You do not need the Horizontal system. You do not need to do much.

In a very soon, sooner than you think. We'll bring you as the Knowledge Seekers, to collectively, to interact during the teachings, with the soul of the World Leaders, the way I did a few weeks ago, going through the teaching of Rick's. This time, we come to you through some of the teachings, and collectively we interact with the soul of our leaders to abandon wars, to elevate the souls, as we did before and we left it to the Universal Council and the Earth Council, and what we call, (:30). the Core Team to elevate the soul of the world leaders. Now we will do it collectively.

In a way collectively, we will interact understanding the what we call, transmutation of the fields of a collective human race, the peaceful Knowledge Seekers will bring peace to our world leaders. We will bring collectively an end to war. If you understand the purpose and the position of this technology, the way we have delivered.

We were planning to do this today, but for some reasons, we will let it go for a while. But in a very short time, in some of the teachings, we'll call upon you to join as one soul to elevate the Soul of our world leaders, and walk away from every conflict, and prepare man for the next step to become man of Universe, to become a member of Universal Community.

The reason I abandoned it today, is because the soul of many of our Knowledge Seekers are not ready for that transportation, that transmutation. For that elevation, as we have to collectively, to be the same.

In a way, we are ready to change the mankind. In a way, collectively, as we've seen those who came to the system, and they felt they wanted to go to the other system, then they

want to go to the Moon, and they've been there. We had a gentleman yesterday, who wanted, his purpose was to see the Christ, and he felt the fields of emotion. We had another person for another desire. So if your desires are there, and are met, and changes you. Now it's time to change the rest.

Then becomes our collective desire to bring that. It becomes through the knowledge and technology we have, (:32). the collective desire. As many of you around the world are together, we cross the souls of the world leaders from Australia to China, from South America to United States and Canada and northern Europe, in Iran and the rest. In a way, we become that envelope of love. In a way, we bring that change through, by understanding, that the fields of the universe can be bend, and elevated, and the Light of the Creator does not travel on the straight line. It bends in every direction, to create a just and beautiful Creation. So even man's physics has made a bigger mistake by denying the truth about its own Creator.

In the teaching of coming time, we do not show you how to make systems, and how to do things, but we show how it's done. Because these systems are not needed to be understood. The fundamental principle of transportation and transmutation needs to be comprehended by the what I call, the STP of the man, that allows the creation of that tornado, allows the creation of that motion to be where that tornado lands, and where that tornado will take off.

It's the desire of the human race to be peaceful. But now we start creating that motion, that condition. You throw Gans's in the rivers, and the oceans, and the fields, and the trees. Now, collective soul of the Knowledge Seekers becomes that Gans, that field, that elevates the soul of the mankind.

This is why we asked you to come in (to Linz), as many as you can. (:34). We had this week, a man from Australia. We have people from Asia, we had people from Africa, we reached people from Brazil and North America. And so the collective net of the revolution, of the what we call, creating the life of the peaceful man on this planet, for us, this week became complete.

It was interesting to have an Australian, and man in the color of the skin of the black to be at the same time, in the ?? in the same room. In the beginning where he came, and end, where he ended in Australia. The two dimensions of the expansion of the physicality of the Man started from Central Africa, to the end last points of Australia and America. The same day, same time going through the same process.

In a way, we brought an end to the completion of the all, what we call, travels of the physical dimension of the man. And now it's time to bring the soul of these physicality's to the dimension of travel to the depths of the space and time.

In the next few weeks, we have tested this before, if you remember, when we had the Italians with us. We told them to sit in the middle, though, when you come out of the

system, and they came and they had a party. That was a prelude to see how we interact with souls collectively.

Now, the next step is when the Italians or the Germans, or whoever comes in. In a very short time, we do not need to go into the system. But the system allows to create that what I call, the tornado within the system, within the structure of your soul. These systems are not all equal. (:36). And the way they set up, they will create a rotation of dimension.

And in a way, the way in the units we interact with your soul with our system, now your soul within this room, will interact with the fields. In a way you'll become part of the field, your soul become part of the feeder, and part of the condition. And then you will transmute much, much easier.

Now you understand why we set up the EU in Linz, the way we have done. Now you understand what is the next step? Very soon we announce the collective transmutation as a group. Let's say you're in Tehran, 4 or 10 of you. We transmute you directly into Linz 4 or 10.

In a short time, we will ask for you for 3 things, as our system is getting set up. Those of you who go from transmutation by the Mobile system, we need your GPS, and we need your altitude, precisely. Don't guess your altitude, because you might end up two meters away from the ground, it's a long way to fall. You want the space about 50 centimeter from the ground level. That when you fall, the fall is land, is soft. If we don't stand up on your position.

GPS for us is important to be able to position you the way it is. The condition for those who go beyond Earth, this will be set up directly through the understanding of the interaction of the fields to start with. And then we use the knowledge from the Universal Community to take you to different positions in ?? Galaxies. This is where the interaction of the fields of the work, (:38). and the knowledge of the man, will come in contact and development of what we call, Universal Community. How to guide you to where they've been, and how you can go. Even though they do not have the knowledge for transportation of souls of physicality.

As I said, the knowledge is growing rapid, we cannot stop, we will not stop, we still carry on with developing the man's need today with the gas, electricity, the food, and the rest. But on the other hand, as a well multiple multifaceted organization, the space technology will still carry on in a very rapid way.

Those of you who have signed in for any of the systems, for Mobile, for Moon, for Mars we'll soon offer you inter Galaxy, what we call, another position in this galaxy to travel. We will go through the same process, the same understanding, the same what we call, transmutation and transportation (T&T).

Many of you have just signed in. Three days if you have not completed your signing, your order will be cancelled. So we see a lot of people just making orders, "oh, I made an order." Your order within three days is cancelled, if you do not confirm and complete it. The same is with the Moon landing. The same is with a Mars landing. The same is with all your orders for your generators. Three days, if it is not paid. "I'll pay when I come and collect," has no meaning for us. It has to be complete, that we can complete our process.

Everything has to be, that we understand it is not temperamental of the moment, but is a conscious decision of the change.

In the coming weeks, (:40). when we understand, and when we bring you the position of the transmutation, we will be able to transmute you in any level, in any shape, or creatures you like to come back into. You always wanted to see how a cat lives. Now, with the systems to be brought up, you can live that level of life. To see what you do wrong in their eyes. To see how man has been doing wrong to them and what gives them pleasure.

You want to see how the stone feels in the river, and how a fish travels in the oceans. Now the transmutation is not just you as a man, the same, the transportation you can choose, as anything. It's the limitation of your own desire.

The way you took off, and you landed on Moon, and became the man of Moon. Now through the essence of the Soul of the Physicality we can do it, you become the animal that you love, to see what you've done with it. You do not become the cat, but you come to see the life and the desire. The same as you go to China and never spoke Chinese, don't look Chinese. Now you look Chinese, speak Chinese, but inside your Soul of Physicality, you know, I am English, I speak English, but how come my words coming out as Chinese, and I understand everything.

It's the same way, then this way we understand how to change the Totality of the life on this planet. What we've done wrong. What we have not understood, and how much we can bring, to bring the changes the good way for Totality. It's the responsibility of the man to give this planet a safe and correct. It's the responsibility of the Soul of the Man to understand the soul of the life on this planet too. For up to now, we were not aware of it. As I always say, (:42). now we are aware of it, we are responsible for it. We have to be, the way we can elevate our animals not to kill, not to fight.

What's the use when we change our leaders, and Mr. Putin stands and sees the lion killing a cat, another animal. The elimination of the war. The elimination of what we call, Totality of the destruction has to be from all levels of the physicality on this planet. It's the responsibility of the human race. It's the responsibility of you as Knowledge Seekers, now that you know it, you have to change it. It's your responsibility. We are not a cult, we understand the process of Creation.

In past few days, many people say, my family say, I've joined a cult. Yes, you joined the cult to be human. You joined the cult to become perfect in everything and every matter.

And if this is a cult, this is a scientific understanding of the creation, and not a cult. We are responsible. We are made. We're born to understand, we are responsible for what we do. Those who call you, you are a cult, tell them. This is the problem, you are already part of the cult, you think everybody else is like you - greed, stealing, and everything else.

You don't want to change your cult, because in this cult, nobody steals. Nobody does, because we understand the science. We understand the technology, that we can produce everything as we need, and treats the others the same. We are a scientific organization and not a cult. The cult of stealing, and thieving, and killing has been the manner of the man, to stop others to elevate. Now we elevate our own soul to understanding of the science of it, that, that will not happen to the others.

In so many ways, from now on. (:44). The steps are so fast, that as I always say, if you as Knowledge Seekers, you don't want to be a tomato. You had better catch up, with the knowledge we share. With the knowledge we dispense to you, in a very soft way, that could be understood from the layman on the street, to a professor of physics, in what I call, MIT. Even though, what I call, a farmer in Africa, understands more than a professor. Because there are no barriers of limitation of arrogance in this knowledge, and gaining the knowledge.

In the process of the teaching of and what I call, development, we have changed our course, that we do not sit here and tell you connect this or this. We create a condition that through the work of it, you understand, this is what needs to be done through the soul. We stopped teaching of the physical condition of making the MaGravs, connect this, correct that. Now we create a condition of the teaching your soul, which is much easier, and much more profound. And in that way, I'm sorry, there are no MaGravs for the brain for you to make, because your brain is already a MaGrav itself.

You have to understand how it works. You have to understand how it interacts. In this process, we have to, we have no choice, but to rapidly extend the knowledge. This week, we have offered of the same knowledge to world leading governments and organizations to bring that next step forward. We have opened, as we did during the crisis in Italy, we opened the factory of Keshe Foundation and the Knowledge Seekers to help with the disaster in Italy. (:46). As many of you remember. We became part of the organization of what we call, civil defense of Italy.

In the same manner, in the same way, this week, we have offered the Keshe Foundation knowledge and technology, to the IAEA, atomic energy authorities in Vienna, that our technology can be used effectively, and all our systems, and KS available to support, if one of the reactors in Ukraine goes rogue, and we see a disaster.

In a way, as of beginning of this week, Keshe Foundation has become as what I call, disposed to the IAEA for any eventualities, if we see Fukushima condition. This is how the Keshe Foundation works. Mr. Grossi and the head of IAEA organization, are fully aware in communications, that the technology is there it to be. We have no patents, we

don't support any patents, but our knowledge is at the hand, and will go to, what I call, man of understanding of the nuclear technology, that we become part of, if need be. This time openly. The last time we did, what I call, in background with TEPCO (Fukushima).

So if anything happens, most of you who have worries across Romania, Bulgaria, and the rest. What happens if something goes to wrong in the war in Ukraine, that Keshe Foundation in that part of its operation, containing the radiation, and anything that might happen, at the disposal of IAEA and the world governments, to implement and deliver.

It does not matter, condemnation, as long as it is containing. Does not matter, (:48). holding and suppressing nuclear reactors, the condition of what we call, safe, what we call, process.

This is how it should be. When it comes to time of trouble for the rest of humanity. Keshe Foundation knowledge is not just by opening patents, but it's opening its factories, it scientists, Knowledge Seekers, to be there at disposal, to help to be there. To give the guarantees, that knowledge is there to support.

We thank the office of his Excellency, Mr. Grossi, in collaboration, and understanding the work, and hopefully, if we see any more what I call, wrongdoing in Ukraine regarding nuclear reactors, Keshe Foundation facilities, knowledge, technology as was available to TEPCO, is available to IAEA and the world governments to implement, to contain the contamination. That it does not harm more people, than what we think should not be.

This is, those of you who take after me, as my, what I call, followers of the knowledge, and you lead this foundation, as should be your attitude, and the way. In time of need, Keshe Foundation becomes an ?? NGO, or property of a nation, a continent, humanity to safeguard its purpose.

We have to understand, that a nuclear reactor is very much the same as one of our systems in Linz. We can tame it. We can control it. We can bring it under full control, to understand, that even use its properties for other purposes. For other interactions, other safe ?? (:50).

In being able to understand that we can bend the fields and change them into what we call, the operation of the system. In the future, many of you will come to this point. Many of you will become the decision makers on behalf of the Soul of the KF, and you have to behave the same. You're there to serve, does not matter ?? time, place, and position, and not there to be served.

For this purpose, many of you especially who are worried in border countries with Ukraine, we give you the surety that Keshe Foundation has completed, and we carry on with the process, with IAEA to safeguard the position, and if anything goes wrong with the nuclear reactors in Ukraine. Understanding this technology. Understanding and applying, and implementing the technology in a correct way.

In understanding of the process of what I call, how we can create a tornado of the soul of the reactor, that it brings back itself, to itself. We will not be constructed, but we have the ability to connect to bring back the fields, back to the source. The way we do with the STM.

Go back to understanding, in the writings of Bahua, .. even a stone has a soul, let alone collection of stones called, plutonium and uranium. Is the understanding of the knowledge of the Creation, which is the responsibility of every soul. It does not matter in which dimension and direction, anywhere across the Unico and U.

In the coming time, we'll teach you more. We'll bring more knowledge, to understand more and open your eyes, (:52). to the totality of the knowledge of the creation, step by step. As they say in Iranian, " ?? ", slowly, slowly we'll bring you to that point. We'll bring you to understanding of the knowledge, and transformation and transmutation.

Transmutation and transportation is not exclusivity of the STM, or the STP of the man. It's inclusive to every being, and every living things across the U. And man has to learn to respect it as a package of energy, which confirms life in one position or another. As a single field, as an ?? atom you call it. As a collective of fields, human body, or galaxy, or the universe, all has to be respected.

Once we understand this, once we comprehend this, then we come to the point, that we'll understand most of the knowledge of the creation and the Creator. As a Knowledge Seekers we showed you, as I said, how to make MaGravs. As Knowledge Seekers now we create a condition for you to be able to understand the power of your own soul, the composition and condition of it. And how it shall be.

Understand the technology in its true sense, and not by its D of Physicality, and then we'll be at a point, at a position, then we'll be in the condition to elevate the Soul of the, what I call, the souls created by the Soul of the Creator, irrespective of the time, place, and position.

Then you understand why the Universal Community envies, the knowledge of man, which has been gifted to him. This is the time, (:54). and the place, as now earth has become the center of the knowledge of the universe and the Unico. One day you will understand. One day your children and grandchildren across the universe will understand the respect of Universal Community for the race of the man, that the love of the Creator shines, through the love of Mitra, His children.

Let's see what we come up with, and how we stand the challenge. And let's see how many of you will go through that process of the transmutation of the soul, then the physicality. We'll go through a break, and we come back. And I hope in the very few sentences in the teaching, in the past few minutes, you understood the Totality of the knowledge of the Creation, and sometimes the hypocrisy of man, by the lack of knowledge he knows and how he bends it to suit himself. (:55).

<< **BREAK** >>> 447 KSW August 25, 2022 (1:00).

K- .. Yes, yes, I'm back. .. There is a notice from the Keshe Foundation and that is, with much regret and condolences to the family of Mario Trane, who was one of our teachers, passed away this week. And the Keshe Foundation, will run a memorial, as we usually do for our people. Hopefully next week, we do for all our teachers, and all his students. And we carry a good memory with us, as he was one of those teachers who had his own way of teaching, his own way of sharing knowledge. And I'm sure has brought a lot of joy, and a lot of what I call, new understanding and comprehension of the science of the plasma Technology.

As usual, we all age, and we all have a time lapse on this planet. (1:02). And some of us chooses their own time as the soul matures. Hopefully, he'll find his elevation, in what I call, position, in the dimension of the Creator in the Universe.

Are there any questions

R: I thought maybe we could have one minute of silence in the memory of the being of Mario, who affected many of us Knowledge Seekers in a strong way. He had a strong way about him that required you to be strong in order to handle his energy in a way, and set...

K- As a guitarist I think he had that. He could play the strings, and he thought the human race was a string, and when I push it , it will make a noise.

R: Many of his friends consider him to be the greatest, or one of the best guitarist in his ability. So, yeah .. dearly missed.

And he was also very much into the flower of life. That was our background image in today's workshop, it's one of Mario's drawings, many drawings of the flower of life, as he tried in earnest to get the Knowledge Seekers to understand what he understood about the flower of life, and about the frequencies and interactions of the harmonics, mostly, of that, were the basis of life that Mario believed in.

K- .. In a way, he understood it his way. As you said before at the start of the program, we have an interaction with him in the 60th Knowledge Seekers Workshop KSW), (1:04). that you understand the way he thinks, and the way things are with him. As you

said, we'll take a minute of silence for the memory of his knowledge and his beautiful Soul.

R: Okay, we'll take one minute starting now.

<< One Minute of Silence >>

R: Okay, we can carry on with the workshop now Mr. Keshe. Thank you.

K- Are there any questions? Do we have any questions?

Q: WL .. (1:06). I have a question from a Chinese Knowledge Seekers to ask about Mitra. He said, you often mentioned about Mitra in your teaching, but Chinese people are relatively unfamiliar with this name. We're most familiar with Buddha, followed by Jesus, and Mohammed, in addition to local ancient sages, such as Confucius, and Lao Tzu. So, I want to know more about Mitra. I checked it on " name " , the most popular search site in China, and it said that, Mitra was a god in a very old Aryan religious system, and there was a religion called, Mithraism. So, when you talk about Mitra a lot it feels like you're reviving an ancient religion. Pardon for my direct feeling, I personally am not a big fan of religion, but I understand that the source of religious knowledge, is (from) enlightened people, who have nothing to do with the religious system. My request is, can you tell me more about Mitra? What she is? Where she lives? What is his relationship with men? Why did Mithraism emerge? What's the difference between Mitra with Shakyamuni Buddha, and Jesus? Please explain the details. Thank you

K- Mitra is the essence of the "love of the Creator," it's not a religion. Mitra is not a, what we call, beginning of. (1:08). Those who understood the love of the Creator for another created thing, they brought, they created the understanding of the love of the Creator to a path of life, they call it, Mithraism.

She is not a religion. She is not a path. Does your lover, somebody you love, the love you give to someone a religion? Or it's a path of emotion of understanding? Mitra is what Creator loved to show love to. It means, the essence of interaction of His own dimension of emotion.

So, when we talk about Mitra, Mitra is the essence of the love, the devotion of the Creator in understanding how creation can love each other. And with it, He fell in love with the whole created things. Mitra as the essence of the soul, when it interacted with the dimension of the soul of this planet, he fell in love with it.

As I said, many times, you go to the football stadium that 100,000 people in there. You don't fall in love with none of them. You walk out, and there is somebody outside of the football stadium and you just lose your life to it, and you fall in love with it. It's the same.

The soul of the love of the Creator in interaction with the soul of the Planet Earth, He fell in love with it. Its beauty, it's dimension of diversity. So, Mitra is not a religion. Mitra is

the love of the Creator in giving, in being unconditionally in love, by the creation of it's own creator. (1:10).

It's like, in a way, the child of you. You created that Soul, you hold its Physicality. But the true love comes between the soul of the mother and the soul of the child. Dimension of Physicality will fall apart, mother dies, the child dies, but the love stays. This is what Mitra is. It's not a religion.

Those who try to explain the devotion of the Creator to his created things, created the Mithraism. The way, the path to love, unconditional, to talk good about it, to think good about it, and act good about it. Because if you do (don't), you can hurt the lover. That's all it is.

Then those who wrote, converted this condition, then they came to have others who followed it, and in traveled to see it. And people who traveled, they explained to him, or to them, what this condition of love is, and then would I merge from it.

From someone who went from the land of Persia, to Tibet, or wherever the Buddha was, and Buddha fell in love with the understanding of the love of the Creator. Then you have the Buddhism. The same with Christianity, Judaism and the rest.

These people did not travel. But in essence of the Creation, they understood the love of the Creator for His created things, which is Mitra. Then everything else comes from it. When you call Jesus, Jesus, or Moses, or Muhammad, they're all replication of each other, as they came through the time of each other. Jesus was a Jew. Touched by the further understanding of the love of the, what we call, the Creator. (1:12).

He never wrote a single sentence. But people have made Bibles of it. Mitra never wrote anything, people made in the name of it. In a way, if you look at it, Jesus was illiterate in writing. But all this Bible, everything you believe in, is written by his, so called, disciples. He never put a word down.

Even the Mohammed, who traveled to Palestine, and saw that these people have a God, Creator, and us in Saudi, we worship statues. He never wrote anything. It was written as he spoke. The only prophet, the only messengers we know his own handwriting is Bahaullah, bless his name. That, there is no change, nobody can interfere (nobody interpreted, or changed his writing).

What we read about Moses, is written hundreds of years (later), (it can be) anybody's imagination. Torah is nothing but, what I call, a bunch of people's writing put together, as it suited them in the time and place.

Mitra never wrote, they didn't .. Mitra is the emotion of the feeling of the Soul of the Creator, and nothing else. It's not a religion. It's like when you fall in love with someone, what you write about him or her. It could be totally not what he or her is, but it's into your eyes, to your understanding of what is. So, when you talk about Mitra, we talk about the

love, the devotion, the detachment, and what I call, embodiment of the true essence of the Creator to his created, what we call, Mitra. (1:14). So, don't count it as a religion. If love to you is a religion, so Mitra is to God.

Any other question?

R: That satisfies your questions Lin?

K- You never satisfy Chinese. I tried for three years living there, it doesn't work .. But they understand. Lin is there, what do you call her. We have been to many meetings with Taoist people, and with the others, they invited us to other places. Some of them have some ideas about our teaching, and who we are, and whatever. You understand that the whole structure of the culture of the Chinese is so beautiful, but is embedded in a lot of mysticism, and a lot of understanding of your own translation of the knowledge.

If Wang Lin wants to add to it, she can explain what they talk about us, what the Chinese Taoist and the others think of the Keshe Foundation and our work, or the return of Buddha as, what do you call it, there is a word for it. (Maitrea). Are you there Lin, do you want to add anything to it?

Q: Yeah, you want talk about what?

K- When you talk about the Buddha, how do you see the Buddha and the, what I call, mysticism of the Buddha?

Q: Mysticism about what?

K- Buddha, or Taoism.

Q: Yeah, for me, (1:16). I think no matter which kind of religion, or the sages, they all try to explain the truth about the creation, about the whole world. Just from their different point of view, or their experience.

So, I think just because of different people, and different location, different culture, and for that time, their expression. But, as what you said before, I think I asked you one question. I said, Oh, when I read something about Taoism, I think it's the same as what you teach. And you told me that, you said, no matter the people 2,000 years ago, or right now, if they are talking the truth, the truth has no different (the Truth is the same.)

K- You've got to understand that Lynn is .. spent time in Buddhist temples, and she's a true, what you call, teacher in Buddhism, or understands a lot of it. Anything else?

Any other questions?

Q: Salomea .. your teaching for today about peace, and what is our noble mission. You touched my heart, you touched my soul.... (1:18). For Mario, what is his name? I know him. I'd like today to ask kindly you, to try to elevate ourselves, and together to elevate the soul of him, by enlightening us about the link between our technology, Nano technology in the seed, flower or Tree of Life. Thank you very much, much love to you.

K- What do you call the flower of life? You have to understand the structure. Rick, can you bring up what she talks about? A lot of people don't understand what is a Flower of Life. if you go to encyclopedia, you can dig it out.

If you look at this design. If you look at the , and in a way I understood Mario, but he, initially in his work, and he was very correct. Because he understood the essence of the fields, which in many teachings we went back on to, and a lot of you talk about it, but never understood it. But, he came to understand it, the way, the line of creation and transportation and transmutation is. Can you just show the picture of it? And if you want to read it what it says, and we can expand on it.

R: (1:20). So, they call it instead of Flower of Life, overlapping circles grid. It's a geometric pattern of repeating overlapping circles with an equal radius in two dimensional space. Commonly designs are based on circle centered on triangles, with the simple two circle form named, Vesica Pisces. We've seen that before, around the square lattice pattern of points. Let's see, if we can just have a look here at the traditional pattern, it might be something like this.

So, Mario drew a number of diagrams that were similar to this. Showing the way the Octave works actually. If we go back to both, the 56th KSW, where another Knowledge Seeker was talking about the Octave built into this pattern, and also the 60th KSW, as Mr. Keshe mentioned, where Mario and Mr. Keshe discuss it at length for about an hour, over an hour.

K- If you look at something very straightforward with this picture, Mario understood it and a lot of Knowledge Seekers have a problem to understand it. (1:22). Look at the points here, (Mr. Keshe adds 3 blue dots that form a triangle) ... Then you'll understand what Mario understood, and a lot of you have a problem, or a lot of people have a problem, about this Flower of Life.

If you look at it, it's a Star Formation (SF). It's the essence of the motion of magnetic (M) fields. When you have a combination of the two of these (2 triangles one pointed up and one pointed down), which if you understand it, or you can see it, is these two points with the same center.

This creates the dynamic motion between all, which is the essence of the Creation. This is why this Flower of Life, is life, because in itself it creates interaction. And within itself, it has a common point with the other points, to create another cycle of life.

That's why it's called a flower of life, which means, through its dynamism, through its dynamic structure of the Star Formation it creates life. And it can expand into a bigger dimension as interacts with more points.

We have an animal which works on this basis, but they never understood it. Go and look at the buffer fish (Blow Fish). (1:24). Rick, if you can go to Wikipedia and bring the skeleton of the buffer fish, what we call it, Blow fish. Buffer fish has a very much loose,

but very much contained structure of the, what you call, a flower of life. That is why it can expand. It can blow itself up and reduce itself.

It's like a cycle of life. You can expand it to any dimension, and has no limitation. When you look at these structures physically, then you look, that if, these lives are of this planet, or out of the creation of the fields of the universe.

If you can reduce this picture and bring the picture of the skeleton of the buffer fish, you'll see it. It's a very interesting understanding of the work of the star formation. In loose connection in the field structure, the fish uses the muscle tissue to hold, to contain the flower of life.

It's amazing how Creation adapts itself into these conditions, and to these positions. ... That is the one. If you look at its skeleton structure, you understand. It still got a skeleton. And how it is positioned. Then you see a lot of similarities. Then, in a way, you can see the expansion of the Universe by, what we call, flower of life. This is a flower of life in the universe, not to physicality in dimension of the man. (1:26). Can you show it's bone structure? You have to go to a buffer fish.

Do you know the blowfish, the one if you eat part of its structure it can kill you. The Japanese are good at it?

<<Rick search for buffer Fish Picture ... >>

Some refer to it as a buffer fish. But if you look at its skeleton, in places it has this ability. The structure is very much loose like the, what do you call, flower of life. It is the same shape. It's a combination of the loose bones in a star formation. It will give you a lot of understanding of the totality of.

If you can't find it, I can send it to you as an image, Rick. (1:28). ...

We see the same kind of structure. When you talk about the flower of life, it allows to structure, to expand. Because life is not constant, life is not fixed. It's like the buffer fish, it expands. And to have that expansion you have to have certain physical structure field forces, then what we have ribs. Our ribs limits our expansion of our chest, and that expansion of the chest, limits our thinking way. The way we take energies. The way we grow. The way we shape ourselves.

The rib cage has brings limitation in man's intelligence, emotion, and everything else. When you have a rib cage like this, like a flower of life, then it's a different understanding, you absorb differently. If the rib cage of man was like this, like the buffer fish, we would have had totally different emotions, totally different understanding of life.

If you open this picture and look at the dimensions of the bone structure, then you understand more of it. Loosely connected, but always connected to the next cycle of energy. So, when we talk about this is, it's more or less, if you look at this bone structure,

is very much a star formation, which means the expansion. (1:30). So, star formation, energy fields, are expansion fields.

I hope I answered your question. And the tree of life is the same. It's the extension to understanding of the more, but ?? to the base, what we call, the base of the tree. In the Persian culture, we make carpets called, "the tree of life." And you always put the tree from the point of entrance to a building, into a hall, into a house. As you walk in, and you become part of the life of the tree of the family. That is what is called, the tree of life.

Any other question?

Q: Dimitri .. Firstly, I'd just like to say with regards to Mario, what a beautiful soul he was, I interacted with him many times in the private teachings years ago.

K- A bit stubborn. (laughs) He was a little bit stubborn, he was very much set in his own ways and his way of thinking.

Q: Right. It's interesting what he used to teach. But a lot of the stuff, that he shared with the group, I comprehended to a certain level, and was able to continue the conversation, and have a to and a throw (back and forth) with him. Because he. Literally, because I comprehended it. (1:32). I liked what he taught. I really did. Big, a beautiful Soul. I'm sure many of us are looking forward to interacting with that soul again in space, in the future.

So, I have a few questions. They're very small questions, they won't take up much of your time. My first question is related to a discussion we were having in One Nation, One Planet, One Race this week. Now, as we know, we have STM, the STP, and the physicality (P). I know and remember, from a long time ago, from having a discussion with you, in regards to flight in space and the reduction of, at that time, what I called, the "soul of consciousness." And you clearly stated, it's actually the "soul of awareness of the truth." Now, everybody's talking about STM, the STP, and the physicality. Where do we put the "Soul of awareness of the truth," into that magnetosphere?

K- Explain yourself. .. Explain yourself, what you're expecting. What are you looking for?

Q: Well, a long time ago, in I believe it was actually public, a normal public workshop, I was having a discussion with you with regards to experiences I had, (1:34). which was flying around space, reduction of the STP and the feeding of the STM through interaction with other human beings, activating carbon 14, and allowing my STM to take care of the Totality of souls within the magnetosphere, my magnetosphere.

I clearly remember you stating that the, what I called, "Soul of consciousness." Because when you go into space using the Soul, there is more than one Soul in that spaceship, a primitive spaceship, the full sphere. Perfect full sphere. When that sphere is manifested in this dimension, you can feel it. I felt like the "Michelin Man," the "Stay Puffed

Marshmallow Man," I felt really fat and big. Really. I felt like a blowfish. How synchronistic is that! That we've spoken about that today.

When the primitive spaceship of the Soul of the Man activates, you feel like a blowfish, alright? When that spaceship goes into space, you have the STM, and you have another Soul in there. That other Soul in there is a passenger. (1:36). It's an onlooker, it's an observer. The STM will do whatever it wishes to do, and you literally observe that.

In many ways, that's the basis of schizophrenia, but at an elevated level, that's in line with the universe. So, the discussion that we had in, and also, you know, the STM, that primitive spaceship, it will, when it does things, it will talk to you. But it's not verbal talk, its interaction from Soul to Soul. That emotion from the STM, the primitive spaceship.

K- Let me tell you two things. First of all, the STM it's not a primitive spaceship. It's one of the most advanced systems ever created. You call it .. yes, primitive in its condition compared to the Creator.

But in understanding, is one of the most advanced systems ever existed. Doesn't need containment, but carries all the emotion. Doesn't need, what you call, to be engaged, but it engages itself to the dimension, what we call, like the STP.

On the other hand, we have not understood the power of Soul yet. Man has not even entered to the dimension, to understand the power, the unlimited power which he possesses, and how we can use it. Even in teachings of today, as I said, to you is very hard to understand, to create that tornado, (1:38). as I call it, tornado of the transmutation.

But, if you understand that your Soul is a dynamic Soul. Your STP is dynamic through the interaction of the field of your blood, and the rest. Then you understand. If you can control .. through the emotion of the Soul, the field strength of it, and bring it into interact with the field strength of the STP, you do not need the shape of the man. As you use the fields of the existence of the man, in essence of their Soul, and the STP. You can create that tornado.

It's like when we, in some of the teachings I always explained, if you put your hand out, and create a light, and then the emotion between the light, in your hand and the Soul, will feed you. You can create anything.

But, if you change this strength slightly, and strength releases more energies of the Soul, in interaction with the, what I call, the STP strength, you create that tornado. How is a tornado, is created? The change, the vast change between two dimensions on the surface of the Earth, and at the cloud level.

This is the same, but you create that little tornado of the fields, magnetic fields of the STM and the STP. Then man understands, there is a lot for him to understand about

himself. We have just shown you how you can open up your Soul. You do not know what you can do with your Soul.

You're happy with maybe, reaching the Soul of a leader to change. (1:40). You can create hurricanes in the Soul of the World leaders, that they elevate so fast, they receive so much energy, that they don't even, they want to forget about even they want to be a human.

You haven't understood. It's just that, when we say you need one soul to change everything, that's what it comes to. It took the Soul of the Creator to create the whole of the universe. You can imagine what one soul can do on this planet, which is embedded in the Soul of the Creator, which is the soul of Mitra, and it's children, which is the creation of the love of the Creator.

This is what we need to understand this knowledge, when we spoke today about the STM and how you can create a condition without the system. Now maybe you get an insight what is to come in the teachings in the coming time. How do you go in the depth of the elevation of the fields, that by humbleness in the dimension of the strength of the STP you create that condition. You don't need the physicality.

When you get a tornado, whatever the tornado touches, it crashes to pieces, and you see the cows, and the buildings get thrown around in small pieces. But in the tornado of the physicality of the man, the STP of the Man, and the STM you open up all the fields, you open up all the fields of the man. You don't need the hand, you don't need the leg.

We know Jesus tried it once, and he got frightened by it. He was the only one. He was young and he was very, what do you call it, fearless in these things. (1:42). He saw it, he understood when he gave life, brought the dead to life, as he understood it. He tried this to see if he can create that condition, that it becomes a tornado of life. But the fact of it frightened him, and he allowed it to go.

Now we teach it, now you understand it. You will be (in aw,) that every created things, which have the STP, and the STM, and Soul of the existence, will be able to do everything you can ever imagine.

It's to come, as I said this morning, up to now we taught you about the physicality till recently. Now we tell you about the knowledge of the universe. This school is very tough. Very, very tough. Especially if you're attached to, what you call it, to the world of the physicality. And you don't have a choice, sooner or later, it becomes like a mobile phone. It becomes fashionable, and then some people lie about it, they have a beautiful phone and they have a thing .. patched up, and some people have a beautiful ?? phone, which is their Soul. And they all become the same.

Q: When you activate the STM, (1:44). and you reverse the jacket and the Soul of the Man is in taking care of the totality of Souls. When that magnetosphere, very advanced

spaceship, not primitive, goes into space, can that magnetosphere receive other Souls, and take them into space as well, like an airplane, for instance?

K- What I always said is, you cannot take, you can give, that if that Soul wants to go. This is part of what we are trying to, and we've shown in the flight system. Where a couple go in the system, and one decides to go part of the trip, not all of the trip. And one decides to do a full trip together. You can, but it has to be accepted. You cannot force it because you can.

Any other question

Q: Mr. Keshe, the consent for the Mobile system, is there a form that the Keshe website has or can my friends sign as a witness?

K- It has to be notarized. (1:46). Because this is a legal paper. We are crossing borders. We are crossing borders and there are all eventualities. One of our Knowledge Seekers has written a beautiful one. We'll try to go through it to see, correct it legally and then we put it out for those who want to do it. But it has to be.

You're traveling on (your own) responsibility. All these NASA astronauts you see, they all sign these things, for any eventualities as part of the trial test, and it has to be done, it has to be. We are entering a science, okay, that looks different, but in fact is the same. It's a transmutation, taking somebody from one place to another. When you buy a ticket from an airline you consent to whatever happens, till they get you there. It's part of your ticket, if you read the condition of the ticket purchase. So, it's the same, but this time you stand responsible for it especially during the trial time. It's very interesting what is coming up how you will see it.

I just had a little note from our development team, it says, they're assembling it currently, the control system. We will see how things will come up.

Q: Dimitri .. Mr Keshe, may I just ask you another quick question? Sorry for jumping in here. I'm going back to this whole primitive spaceship thing, because I remember. (1:48). You see, the STM is a full sphere, a full, a bubble if you wish. .. Many other spaceships, they have the fields turned back in, on themselves, creating a flat bottom, creating a stability to fly. Many, many Souls are learning to do this, to create that stability.

So, you know, that's more of, in terms of, I don't want to use the word physicality, because it's got nothing to do with it, but I'm just going go with it anyway. In terms of physicality, a spaceship that has the fields turned back in on itself, is more advanced than a complete sphere, yeah?

K- In a sphere Plasmas we have the same. Fields turn in as much as they link in. They create that shield, we call it, this surface of the, what do you call it, the planet or the sphere. We have a wrong physical pictures in our head, that we have a south pole and a north pole, all the fields goes up through the south, goes in through into the south, and comes out through the north.

In fact, the fields come from all dimensions and all directions right across the whole surface of the planet, or a sphere when it is in the shape of plasma like Earth. So, that's what I said, .. they tell us you cannot bend the light, (1:50). But in fact if you cannot bend the light you cannot bend any M field. This is, what we put, this miss explanation aside, then we understand everything in the world of Creation is possible. And is, as we see it.

Q: Okay, thank you. One last question, I'm really sorry. When you've had these beautiful Souls that have gone for flights, in the flight enhancement system, many of them, they could feel in a different dimension, that they had hands, and they had feet, etc. Why when using the STM, when I was in space, why could I only feel my arms up to my elbows, and my legs up to my knees? Why could I not feel hands or feet? Is that because the flight enhancement system is incorporating more of the STP?

K- The Enhancement Unit is a complete understanding of the structure. On the other hand, what they feel on the Moon with their hands, or walking with their feet, is the extension of the connection of themselves with their Souls, nothing to do with the system. It's how they want to perceive, translate. It's like the way you translate the dream, when it comes from your grandmother in your head and you don't see there's somebody else's standing behind grandmother, but in fact there is somebody else, but you only see the grandmother. Do you understand? (1:52).

This is this is not of the system, it's the interaction of the translation of the information by your own STP inside the Soul of the Man, what we call it, vision blindness, if you want to ?? see.

Q: Okay, so if using the STM, I went to another dimension with other entities there. Not that. Let's just say my Soul of the Man went to the Moon. Do you think I would feel my feet and my hands?

K- It depends on you, that's all, it depends on you and what you want to accept between your STP and the Soul of the Man, which gets imprinted on your memory disks of the interaction. That's all it is. It has nothing to do with anything else, who can tell you what to remember.

It's like background noise, we have a lot of background noise, but there's a lot of noise there, we choose not to (hear it). It's the same. This is an individual process, nothing to do with Totality. It's ?? all it is. Thank you very much.

Are there any questions, Rick?

Q: Jalal, .. (1:54). My really, my deepest condolences for all the KS. But we are not. He's not lost, I'm speaking about Mario. Whatever he have put out, it's already there. And he will going to be benefit from what he left. We always elevate his soul. He tried hard to

teach and as you said Mr. Keshe, he was really stubborn. But in a good way. He made his blueprint of his thoughts and ideas. So...

K- You had many hot discussions with him.

Q: Just now, he brought a smile to my face, because I was always in conflict.

K- I think he thought of you as a rebel, sometimes.

Q: Yeah. Yeah. Anyway. What we're trying, is adding to the knowledge in all aspects, and it is for the Knowledge Seekers to take from it. As we say, there is no right and wrong, it's always a learning process. Mr. Keshe, can I teach one minute here?

K- Yes, I'll go for a break.

Q: No, not so fast. What was your learning? What you learned in the university? It was system control, yes?

K- Yes, it was something called a nuclear reactor. I was supposed to, but I never learned it.

Q: Okay. It is always about system control. (1:56). When we have a system, we need to control it. And when we control it, we advance in that. So it's about the system control. You opened up this teaching in the blueprint back in 2015. I think you tried very hard, very hard to bring the KS only to this point. But maybe the Knowledge Seekers missed it, in a way. And, really, I would like the Knowledge Seekers to go to the blueprint in 2015. And especially go to the system control, if you understand it, then you can go to your system, and try to, in a way, control it.

We are doing it all the time. But we do not know the understanding of it. It's amazing what you just said before, Dimitri asked, that background they are working with the system control. It's all about system control, my dear friends. How you add, how you take to make a condition, for this condition to be a magnet. To be a bubble, to be a ray, to be whatever you want.

How much love, how much all other emotions. It's all energies, in respect to gravitational or magnetical, to give or take, or whatever. (1:58). MaGrav positioning in the small understanding. So, if you want to start to really understand it, go to the Blueprint. Make it in the matter state, we always say, and you say Mr. Keshe, we will bring the matter state to understand the higher position, the plasma, and then we will understand our position, and our physicality, and how we interact the Soul of the Man and Soul of the Physicality to make MaGrav position. So, there is no question Mr. Keshe, today. Dimitri, I think he took everything in the questions. So, thank you very much. Come back Mr. Keshe, your minutes is finished.

R: I think we're feeling empty without your question there Jalal, questions.

R: We were waiting for the punch line.

K- It didn't come. It's okay.

Q: Maybe, maybe I will jump in.

R: That's good. That's the old Jalal we need.

K- We saw a part of the understanding, and progressive understanding of what comes up, and what it is, not the totality. How we want to proceed to suit us.

Any other question?

Q: ... Can a vertical beings create multiples souls independent of seeds? (2:00). We appreciate your guidance.

K- What does that mean?

R: Well, I guess he's asking if the vertical beings, which are plants and trees, can they recreate, or create another soul without seeds?

K- Yes, and is actually, is the cornerstones of diversity, in the vertical (beings). One thing which you got to remember, it's very simple. We talk about the first man, the first woman, and then we have the diversity. Or the first life, and we have the diversity as a fish, as a lion, as a man, as a mouse, and the rest of it.

The same thing exists in the world of creation of vertical people. They all start from one interaction of the fields. And the interaction of those fields with the other fields created the diversity. Then the seed was the confirmation of the same, repeat of the same. Nowadays is, what do you call it, they take the skin from one tree, and they put in another one, and they diversify the fruit. If a skin can do, so can the field of the plant. All the vegetation you see on this planet started with one interaction of the fields, which led to creation of the vertical. And the rest comes from interaction of fields and diversity of environment. (2:02).

Any other question?

Q: .. A few days ago, we listened to the Plasma Reactor Group recording when you did the Mobile transmutation test with the Knowledge Seekers who were present. After listening to this recording and having an intense experiences, despite being a smoker for 40 years, I immediately lost the desire to smoke. I feel that my body is clean. I would like to know if it is possible for the lung to be cleansed, even after all this time of being a smoker?

K- What do you mean by cleanse? To get rid of the nicotine inside, embedded? It will take years, it will take years. It's not something will happen overnight. You know, you take your car for a carwash, you take your lung for a wash and see how much they can take it out, and would you feel the same?

We had an experience yesterday with one of the Knowledge Seekers who came in. We usually don't ask questions, because all it is, we want to see if we can create the envelope of the transmutation. When he came out, he said, I had two Coronas, and the last one, the funny one, which came, and is supposed to be very dangerous. He said, I have like asthma conditions, he couldn't breathe. (2:04). He said, I went into the system as a dead man and I came back as a live man rejuvenated. He said, I can breathe now, I can breathe easy.

In a way, the breathing or cleaning of the, what you call, the lung is very much, it's on condition of what fields you can replace in it, and how much of those fields you can use.

Many people who go through the Enhancement Unit with the breathing problems come out without it. We understand why. It is part of the. Don't forget the lung is the closest thing to the Soul of the Man in the expansion and interaction with the central fields of the, what we call, the Soul of the Physicality, which massive amount of it is always in dimension of motion in the heart of the man.

So, there's a lot of things can be done. But, essentially you might not be able to clean it, but we can bring a lot of change to it. It's nice to see that you had such impression. Many people have this impression when they go through the Enhancement Unit with the breathing. We saw one yesterday clearly.

R: What about that loss of desire to smoke, and some people lose the desire to eat and other things.

K- It's not a desire. We open up a field strength, which feeds, or satisfies that need. That means we get it from the, what we call, the environment of life, or the surrounding. (2:06) That's all it is. We satisfy a desire with the same field strength. So, you don't need to smoke. It's like that desire of hunger. When you're satisfied with the fields from the water, you don't need to drink or eat.

You have to understand, nothing is magic. You have to understand the principle behind it and what does satisfy that. It's the urge to smoke, it's the urge, the addiction to a cigarette, which gets satisfied. So you don't need. We've seen this for years with this technology, with the people with smoking. Many, many, many people have given up. Because in some certain fields within the system or emotion, you're satisfied, you don't need it. It's not the first time. I've seen this with many people.

As I said to all the Knowledge Seekers, most of the Knowledge Seekers who have come to Linz, your journey just begins in the system. It's just that like, we take you from Vienna to New York, and we let you loose in New York, and then the rest of United States is yours, where you go and what do you. So it is with the rest of the universe. This is a journey that we open up to the Soul of the Man. It's beautiful if people understand what opportunity, what condition has been created.

Q: .. My question is about transmutation and the process, that the body goes through. (2:08). In the 446 KSW, you talk initially, Rick, about the fact that the body can produce even nuclear energy, through the thalamus and the thymus. I would really like to understand this better, since when we study the thalamus we learned that it functions as a transmission center for afferent and efferent nerve impulses, transmitting and integrating various motor and sensory impulses. And the thymus is a gland that doesn't produce lymph, since the small intestine and the liver produce lymph. So, how exactly would this conversion of energy for the formation of the body capable of producing nuclear material, such as uranium and plutonium be? And how would hydrogen make these twists within these two systems, the thalamus, which I believe is not a gland, and thymus, which is a gland? It's not really clear to me. Thank you very much.

K- Oh my God. We need about 20 sessions of teaching for this. But principally, the one, the gland, is a conversion of the fields into dimension of physicality of a Gans, and the other one just provides the information and the strength of where it's needed.

If you read your own question, the first part about the one in the head, which is control physical dimension of fields, and one in the body, which is a converter, and it decides how to do and according to the need of the emotion, provides the physical strength of it. (2:10). When in your part of your emotion in your head, you want to get rid of the one who created you so much anger. Someone takes a knife and kills the guy. The father, by emotion, kills his, what we call it, prostate which lead to creation of, or part of the creation of the child who brought him so much pain.

It passes that information to the gland, and the gland creates a specific strength fields, which allows a specific point in that organ, which is called prostate, to become cancerous. Not to produce, stop producing, I don't want to create another like this. You've got to remember women stopped becoming fertile with the present time, not with our technology. But when you understand our technology you still can give birth, 200, 300 year old woman. By the present time of the condition of life, women become infertile around about 40, 45 or so, some earlier, some later. We call it menopause.

Man don't have that option. Man can create children till they are 200 to 300 years old. So the only thing is, which haven't gone through the evolution, is they want to stop what it causes, allows that sperm to go out to create that child. So, they want to put a block into it, you want to stop the process. So you give yourself a cancer, or you put a dam in and the dam grows, and you get a lot of things behind it, and then you call it a prostate cancer.

So, we see the emotion on the top gland, to dimension of physicality, how they control, and they interact to lead to generation, and condition and creation of physical man. That's how it is. Then when they do that, they need an element, which you call, the lymph, it is a passage. It's like, you know, when you put a, you've seen these tomatoes going through a machine, (2:12). and you've got a microwave to sterilize them, that's more or less how it is.

As the lymph passes the vicinity of the gland, the physical gland, it gets tuned to the strengths it needs, and it goes through to the next one. This one we need 20 of hydrogen, plutonium, and 20 hydrogen for calcium. Then this particle to this one, and that part goes to the other one. It's very, very intriguing how the system works.

Any other questions?

Q: .. So, Mitra would be like the interaction of the primordial masculine and feminine energies in action? Would this be the understanding of Mitra?

K- No, it's wrong. Mitra is the essence of the emotion of the giving of the Creator, in loving itself, in a way. Something sent to me by, I think I explained it before. People are asking about, how we can interact with Mitra. Mitra is part of the way we live. The way

Mitra is, is our conscience, embedded within us. We know what's good, what is bad. We know what good thing is to do, and we know what good thing is to think and talk. It's us who chooses the wrong way.

Any other question? (2:14).

Q: .. The President of France, he told some days ago, that very harsh situation is about to happen, and he asked for the power of the Soul of the people to change this situation. So, regarding to this Alexandre would like to know about the units of gas and electricity. How is the negotiation with the European countries regarding this?

K- It's left with them. You've got to realize. I was talking with someone past couple of days. A lot of European leaders like to see this thing to come to head on, with people and the governments. The burden of the expenditure is beyond what they can accept. Actually what we see is some governments will push for unrest and conflict, due to these things. (2:16).

But the whole thing is on the table with the governments and they have to ?? ascertain, we have the same, as I said with the IAEA regarding the nuclear. But, Keshe Foundation is going to have its own development, and its own structure of work for these things.

There is a very big, big problem sits, especially in Europe and other structures, as there is a bigger plan behind it. The Ukrainians fought for getting the ports opened up to export grain. Now that is opened up, nobody's buying the grain, or grains are bought in black market from the Russians. What happened to all this cry, "we can't export." Who is behind it? The prices increase, it serves the people who are just out to increase the control.

I was talking to one of the Knowledge Seekers last night, the fuel, electricity prices in England was told 17, 18 cents, and now is 80 odd cents in past six months. Five or six times more. The same in Italy, we were told it was 9 cents, now it's 50 odd cents. But, has the gas changed? Is it a different combination, is it a different material, is it something new? It's the same one, it's just profiteering, and how to use it. It's mainly used by governments for these things. But the situation in Europe is dying, it's a dire condition, it's going to be. At the moment, it's a nice time. Watch Christmas and New Year, into February and beyond.

I foresee once we start putting these units out, the government's will make it public, that people will start producing. (2:18). We'll see that. We are prepared for that, as now we're in negotiating with the government's for transfer of technology. We have to change it.

If you look at the, what do you call it, the Gas Units we put out. The Gas Unit prices has been increased to 10,000 Euro as of yesterday. The Energy Enhancement Unit Gas unit, combined unit, has been increased to 15,000 Euros. Plus we brought it from 10 kilowatts down to 5 kilowatts. Because to be able to meet the demand, and control the supply and

demand. I can see, and this is the reason done It's not that we are making profit. Whatever we make it we are an NGO, and it goes back in (to the company).

But, we see that the manufacturers will not be able to supply the demand, which will create in coming weeks. It is on the card, it's not our talk. As you said, president of France, French minister warned about this 4 weeks ago. Germans are expecting a huge unrest in Germany. They enjoyed the time when the fuel was cheap from Russia.

Now they did not look outside and, what I call, the nuclear lobby was strong enough to, what they call it, not to build any more nuclear reactors. They walked their nation into a cul-de-sac, now they're stuck in it. We have a nuclear reactor which is built, it's operating, but at zero power production, in Austria. Now they're talking about opening up the reactor to meet the demand. Nuclear lobbyists, "no, we don't want it. (2:20). Let's see in the winter when you have no food to eat, what you want.

Europe has walked itself into a very, very tight situation. The same will come with the food and grain, with the rest of the world. We are in for a big change, and in that change will come with understanding a lot of things in different way. It's good for the technology, it's good for the spread of the technology when people can look at the plasma technology, and how they can feed themselves and how they can warm themselves.

As I said, maybe in the next few days we show you the new combined system of the gas and electricity. Then we'll see how the reaction is. Governments are watching it. It's not that they don't know. We have communicated with the German government, we have communicated with the European Community directly. They all know, they're thinking about it, if there's going to be, and when it is going to be. But, it's going to be too late by the time they think.

Q: ... (2:22). Once Macron said that we need to focus on the Soul level in our prayers, on the Soul level. How we as Knowledge Seekers can help in this process with our soul, with our prayers?

K- We are already doing it. In a way, by understanding the work of the Soul we can do a lot. We hear a lot of world leaders, now they start talking about the soul, and then. Because they can't do anything else and to them is a mystery, people don't know what it is. So, we lead them to believe the soul will feed us, the soul will create electricity, and the gas for us. It's a way of shortcutting their own shortcomings.

From what is coming out of the European Community, especially the European leaders, except Norway, Holland, and one which is partially, if you call, British. The rest are talking about the shortage of energy and the crisis to come. They expect unrest, they expect huge unrest. So, a lot of you will see shortages, or increase in the price of food, and the rest of it. (2:24). Then you'll see crisis with the rest of what comes with these kind of conditions.

Go back to your teaching. Go back to the knowledge you have. Go back into understanding how things are going to be. Very, very soon you'll see three, four days electricity to each area, than the seven days you're used to. If it goes that way. Then it goes back what happens to your freezers, you stashed it away (food), (so) .. you could have something in the bad time. It's all going to melt, if they're going to be there.

So, go back to the teaching, how you learned to use the Orange and the Water. Start preparing yourself for making Gans's of these things, that next time there is no orange in the market. You can't afford the orange, which is 4 Euro a piece, or 10 Euro a piece. You have made a Gans of orange, you have it ready, then that becomes your supply.

It might look funny to the others, but when you put the orange, Gans of orange next to a water, and you drink orange, you feel the orange, you taste it and you get the emotion of it. That's what it counts, and not what other people say. The same with all the nourishments, the meat, the chicken, the lamb, the potato.

Start adding up, start making Gans's of these and jar it, like you do, like a jam. These become your future food stock. Our parents, our forefathers and most of us, we jam it, we jar it and we keep it. Now, it won't be there, the prices that are there, cannot be afforded. We've seen it today in European markets. Last year, we used to buy a tomato for 99 cents, this year we've seen it at 7.99 and 8.99. The same tomato, from the same plant, from the same farm. (2:26). It becomes beyond the reach.

You buy a tomato, make a Gans of it, you buy bread make a Gans of it, and you will receive the energy of it. This jar will last for centuries. You don't have to say, "oh, we used to have bread," you already ?? have it. Start getting ready for what is to come, as they say. If it doesn't come, one day you're short of bread, you have it in the jar. This situation in Western Europe is extremely serious. Do not take it as a joke.

People will go to people's homes to take (steal) food. But they don't know what's a jar of Gans, let it be on the shelf. They won't touch it. But it's your food. You've been taught enough, you are well ?? versed, it is summer time. Buy the peaches, the apples, the pears, the meat, and prepare yourself for that change. With it you can give to the others, to be.

Always go back in Alekz's talk. He wanted an orange in the morning. He wanted a what do you call it, at night. Then he wanted to get drunk, and he did all three of them in one day, he was drunk for two days, from the same water.

Get prepared. You're in for a very, very harsh time in Europe, if this thing carries on and goes through. (2:28). If we gets further situation in Ukraine with the energy supply, then Ukraine was a supplier of energy into Eastern Bloc countries, which are the breadbaskets of the Western Europe. You're going to run in a bigger problem. France is the backbone of the electricity generation though their power stations. They run out, the rest of the Europe will sneeze very bad.

Any other question?

Q: Dean .. I'd like to just say something for Mario, because I was in the Private Teachings and Mario, as Dimitri said, did touch some flower life ley lines. I look at this interaction on the screen at the moment and it's full of holes, full of space gaps. Mario seemed to be able to connect some of the soul interactions that actually led to, some very big interactions that happened in my experiences. So, bless your soul Mario. I know you're still present with us in each and every moment, as all Souls are. So, I'd just like to say a big thank you to Mario for all his teachings and all that he did within the Foundation. (2:30). As you said, nothing is right and nothing is wrong. So, every interaction that Mario had, had a direct effect on many, many different Souls, in many different ways, in many fields strength that some of us will never comprehend and maybe not directly sense or feel. However, they are present in each and every moment. Thank you Mario. If you are able to transmute and be part of this interaction, in these very moments, please receive from my Soul to your Soul. Thank you for the beauty of your shining star.

Mr. Keshe transmutation, cannot be at any moment in any point in time. You spoke about the heartbeat of the planet, and you speak about the pulse. Is that pulse between ourselves and our Soul at such a speed, that the physicality is slightly unaware, in this moment?

K- What you mean, and what you're talking about?

Q: So, what I'm talking about is the direct communication between the physical body and the Soul. We have the heartbeat of the planet, we have the heartbeat of ourselves, we have a pulse, that pulse in that. For me, it's like the communication between what we see physically all around us in this very moment, and the Soul aspect. Is this constant? Does it turns on and off so quickly, that the physical body is unaware of it. Is it a direct communication? Like a pulse, but it's so fast that we're unaware of it? That'll be my question. (2:32).

K- I don't still understand. What is so fast?

Q: So, is the interaction of the communication between the Soul aspect of. You say the Souls have another life, they're there, they're constantly in communication, and they're constantly consciously aware of each other, in each and every moment they're interacting, and guiding us, guiding the physicality. So, is that communication, is it constant? Is it always present in each and every moment, but so fast that we're unaware of it in our physical bodies in the slowed down fields?

K- It is there. It's like the air you breathe. Is there a position that you can't, there is no air to breathe? You go in the basement, you go in the loft, you go in the tunnel, you go inside the Earth. It's always there. They don't inject ?? it. It is the same way. It's always present.

You're talking about Mario. There is a message, which has come through the chat to us. I don't know how much it will help you. Apparently something might, some of you can help with it. It's been posted by our Knowledge Seeker. It says, "hello, everyone. I was shocked to find out my brother Mario Trane passed away. My family and I are in shock.

In case some of you do not know, this Mario real name was Mario ?? , his brother all live in Florida, Georgia, and North Carolina, USA. (2:34). The cousins and other family live in Canada. I'll be flying over Bangkok to make arrangements for him. I have been in touch with the Canadian Embassy. If anyone can help us get the number or email address of the Canadian Condo association where he lived. Please help with any knowledge where they brought Mario to. Would help us great. And to thank you all in advance for the help you have given us. My name is John."

It's his brother. If any of you Knowledge Seekers know where he used to be, where he lived and where condo, wherever he is, that we can help the family to at least get the knowledge of the brother. If any of your Knowledge Seekers had contact with him in Bangkok. I'm sure one of our Knowledge Seekers in Thailand can help. Get in touch with me, or somehow we can get the brother to. Maybe he would like to take the body of the brother back home. If you have any knowledge of this , his place and time over, he's over, ?? he was, or where he lived. They apparently lost contact and they're trying to. A brother trying to find a brother.

Q: Thank you Mr. Keshe. That's as you just said that a brother. A brother to all of us. We're all brothers and sisters. And it's a wonderful thing when, when humanity becomes one, becomes brothers and sisters again, and understands the divinity within inside themselves. Mario's picture here, and his teachings shared a lot of knowledge and his family deserve. (2:36). Like all family members do. The beauty of his knowledge, this universal condition to be spread evenly and continuously in this moment, so that everybody receives the field strength, and Mario's loving attention, the care that he gave.

Yes, there were some moments where, like we all do, we have other thoughts and interactions. As you've rightly said many times Mr. Keshe, nothing is right and nothing is wrong, and every interaction is a field strength, is a plasma, that resonates and comes back, it flips, it changes its position. Sometimes we need that interaction, to see the other side of the plasma, to see the other aspect and to feel that strength, to feel the emotion. And then let it drift on by, and again the emotional experience from that interaction, to gently guide us and give us the new interaction, a new field strength, that will enable us to understand more. As you said, this technology is ever expanding. We are just touching the very tip of the very first step. And so it is unlimited. Mario's beautiful teachings and the drawings that he did explain this, to his understanding. From his understanding, many of us learned some very deep, knowledgeable concepts of the universal flow and energies. I have one of his devices that he spoke about, actually made this tool. I put some, some of the knowledge that Mario taught, and it was inverted, (3:38). inverted triangles, pyramids, however you want to describe it. And on the end of it, I put some, some of the plasma waters in certain points, like we see the points on this flower life grid that Mario drew out when he came to his position where he, just by interacting with the fields, the universe spoke to him and shown him many, many diverse and beautiful interactions that he took within himself, and then expanded upon, and drew physically and spoke about with words and intentions. That's the ethos of the Foundation. So, some of the interactions, whether they are, however they were. They all have a beauty. And we all experienced and learn from it, each and every single one of us in this very moment.

And thank you, Mario, thank you. Thank you for the beautiful family of Mario, for bringing forward and for the Soul of Mario. It's the Soul of all of us, within each and every single one of us. Part of the Creation, part of the Creator. Thank you Mr. Keshe. Thank you.

K- Thank you very much.

Any other questions?

Q: Another question from Chinese. His question is about, recently, China Yangtze river region has suffered from very high temperatures. Also we heard a lot of reports, the same in Europe in past two years. (2:40). Also China has like some hail stones and tornadoes in last several years. So, he's asking is this because of greenhouse effect, or because of the Solar System is going to the higher energy of the universe, or some other reasons? Is this relate to the evolution of human and our planet?

K- This is a natural process. We just see part of it, as I said before, because of the present communication systems we have, we think it's exclusively, we just have. These odd things has happened for centuries and thousands of years. Part of it, we effect, because of the way we have abused this planet, and part of it is, we reposition some of the, what we call, resources of this planet. Now we are in this problem with it.

So, get it in China, in Europe, we get it sometime in South America, we get it in Africa. If you go some 20, 30 years ago, Ethiopia was drought, and we had all these Ethiopians children with nothing but the skin and bone. It's something we always been. Nobody knew, because of the lack of communication across (the planet), but now it's there, and it's continuous. It's not exclusivity of China or Europe. We had a huge floods in Iran two or three weeks, where thousands of people have died, thousands and thousands of videos we see.

We see in different parts of the world, the climate change, it's partially. We are entering, we are moving one level lower, into nearness to the Sun. (2:42). But this drop of, maybe, a few centimeters will create a lot of changes for the ice, and the temperature of this planet.

This planet will become inhabitable in coming time, the way we know it. We have a expansion, to a contraction. We have a pull at the same time. We are on the edge of the galaxy, we are getting pulled further in. So, our Solar System shell is getting under bigger pressure. Very, very small, we don't feel it, but it takes millions of years. Now that creates a new condition of life inside, which we are part of it.

Then we have the evolution of the dropping in (getting closer to sun), because as we lose the strength in the Solar System, as we rotate so much, with the rotation of the day and night of this planet, and the annual circle and other dimensions of motion inside it. Is, it cannot be compensated by it. Partially, it's the loss of the gravity, or the strength field in

the center, we're getting pulled to the center of the Sun, at the same time. So, all combined together creates the new condition.

Has burning of the most CO₂ gases, global warming has created this condition. When it move to a new position, the way creation of CO₂ led to creation of sustainability of life, billions of years ago. Now we see the reverse of it, and so we see the condition.

Do you want to blame it on the heating, what heating, burning of the gases? (2:44). Maybe a little bit, but not much. Evolution of the planet, life is bringing a new condition.

We're getting closer to the Sun, so we're getting warmer. Doesn't matter how we want to end it. We are moving into the center of the galaxy, closer by millions of kilometers, every day, every hour. So, that creates a higher temperature, higher field interaction. We are not just burning the fuel on this side. We've got the pressures of the fields from the Solar System, and from outside the Solar System on us.

The closer you get, the hotter it gets. We dropped in by, just go, nowadays they measure it. See how much. Rick, can you check it, you can see it? How much in the last century we come closer to the Sun, past decades. People measured the distance between the Sun and the Earth. How many centimeters have we come closer in past 20 years. I think all of you know how to Google. Ask Google, what's the distance, difference between a hundred years ago and now. And that distance means higher temperature field, higher strength field from the Sun. So, they melt the ice. It's very easy. Rick, can you just check?

How much the Moon has gotten closer to us in the past 50 years? There's a critical point, a certain point if you move on, you change. (2:46). Global warming was a very good Dutch game to sell a lot of trees, which had never got planted, to make money.

R: It seems that most of the consensus is that this Earth is moving away from the Sun, but very slowly.

K- It's moving into the Sun, the gravity of the Sun is pulling it. .. We don't see a planetary system falling out of the Solar System. They get generated, and they get pulled into. If we were moving out the ice should have grown, you get cooler.

R: I think they're talking about the loss of mass of the Sun, causes the Earth to go away from the Sun, rather than closer to it, because there'll be less gravity effect. Is the idea.

K- The gravity comes from the center of the planet, not from outside mass. Comes from the fields from the inside.

R: What about the force between the Sun and the Earth?

K- It comes by the strength of the Solar System Sun. (2:48). The field strength of the Sun compared to Earth is a huge difference.

R: So, if the fields strength of the Sun is decreasing, then wouldn't the earth ...

K- No, it cannot decrease, it cannot decrease, no. The field strength inside cannot decrease. The gravity of the Sun doesn't change as such. Whether it changes, it transfers right across through.

It is like when they say, the temperature inside the Sun is so many billions, it cannot be, it's interaction of the fields. The heat of the Sun we see on top, is because of this interaction of its gravitational field and its Inertia mass. It has no relevance to what's inside.

We know this, because we've done tests. We have carried out tests now physically, we know this. It's not just a guess and a theory. Reactors, condition of the reactors show constant temperature in the center of the reactors.

This global warming with the burning of the fuel is, it's what they call it. If there's something else which doesn't add up, we look at the Earth, (2:50). in geological sense, we see layers on top of layers, which means the mass of the Earth is increasing by the compression of the field of the Sun hitting it or touching it. That has with the Earth, external diameter has grown by extensive amount. Due to the fallout of the interaction of the fields of its gravity with the Sun's gravity.

This air we breathe is continuously added to and converted to. It's not constant, it's not a closed capsule. So, the mass on it. If you look at Earth. Sun is losing a mass. Earth is gaining a mass, so it gets heavier. You've got to understand the Sun as a total is interacting with the fields of the universe, which they add to its mass, the same as Earth does. We are speck of dust compared to this Sun.

The Sun interacts with. Our atmosphere interacting with the Sun creates these layers of the soil we see on top of the Earth. The Solar System interacts with the environment of the Galaxy, and is continuously adding to its mass, not losing the mass. But, the addition there is in a Plasmatic conversion.

The physics, especially cosmic, and cosmos physics, and astrophysics, is so muddled up, they only take what they want to promote. They don't look at the totality of the. Because they never understood the totality of the knowledge.

R: That seems to be true, and me trying to look this up. (2:52). There's a number of conflicting ideas and theories. One of the latest ones is that, it's increasing the distance between the Earth and Sun. I mean, there's regular changes, that we know about that, between the Earth and Sun. But as far as the sort of yearly increase or decrease, they're talking about one micrometer, or a millionth of a meter is the yearly increase in the distance between the Earth and Sun. That's from Cornell University, at least.

So, I don't know, I think I'll trust what you say, rather than what's on the Internet right now. No one's out there with a tape measure, measuring it to the nearest micrometer, I am sure.

K- Yeah, but it's a dynamic surface, it's not a solid surface between the Earth and this Moon. We have a solid surface, we fix it. We've seen that thing, the guy goes out every day measuring the distance between the Moon and the Earth, the left the system with Apollo. They measure, this guy's job is just to measure every day the distance, if it's changed.

R: They put a mirror on the Moon, and they use a laser, to time the laser to find the distance, I think.

K- For the Sun, we have a dynamic. It's a dynamic ?? clothing system.

Any other question?

Q: .. We know plasma has no frequency, but I would like to know if, frequencies create plasma, and if plasma creates frequencies. (2:54). And if so, how can we relate plasma frequencies Soul, STP and physicality?

K- There are two or three things to consider, first of all, in plasma, we don't have frequencies. But in plasma compared to the other plasmatic fields, as it converts itself to one, they have a frequency. The field. The frequency comes when you want to penetrate, as I explained all the time, a dimension.

Between the plasmas we have a frequency, we create that frequency, as a stronger is trying to penetrate, or the weaker is trying to penetrate the stronger, either way you look at it, on the field strength dimension.

But within the plasma, there is no frequency. Because there is no resistance, it's a continuous expansion of flow through the same. Unless you have bits, which gather, they become like clusters, and then the field has to interact with it. Then that creates, that frequency in that part, in that specific position.

It's very, because plasmas are DC. If they interact with another plasma, the friction and penetration strength, we call it, a frequency, exists, otherwise they will just go through it.

This you see in the Enhancement Units, a lot of people come to the Enhancement Units, and then when they come out, they say, "oh, my pain is gone. I couldn't walk, I can walk." For you to change that in one hour, by the world of the medicines it is impossibilities. (2:56).

But if you touch the soul of the cell, then you change it. This is what a lot of Knowledge Seekers, they have not comprehended this. When we have a person who has been in bed for five years, ten years, four years, whatever, or in a wheelchair, and they start walking

within two days. You show that to any physiotherapist, and doctor they'll say, this is a fake. Because now, if you have an arm injured in a plaster for six weeks, eight weeks, the arm freezes, and you have to get the joints moving, to get it going. You can't just, if you've got a broken joints and you locked it for six weeks, and as they take the plaster, just open in one go. It doesn't happen. Especially if it's frozen for years and operations (were) done on it.

How come that, we as Knowledge Seekers go through this systems and within a minute we come out of the room, or out of the system, we walk? This is what you think, "oh it helped." Because with the expansion of the Soul, with the enhancement of the soul of the cell, or the body, is the Soul which moves, and the physicality follows.

None of you can explain to me how we got the guy, which has been in bed for years, walking after two weeks, and they walk as if they've never been. Physiotherapist don't accept it, it's impossibility. But it does.

Because again, you enhance the soul of the cell, that changes the physicality, and people walk. People have no pain, they were locked on their own. Because we work with Gans's, and with the structure of the cell of the same strength as the body of the man. (2:58). This is how, they say, "oh, it's all gimmick, or this is a fake." You show me a fake, because I've faced this, many times. Even people don't remember it themselves, they are moving it.

Any other question?

Q: Hello. Mr. Keshe, I'm from Poland. I was already talked with you like two months ago on the Zoom. My question is, now the spaceship is for sale, yes? For 1 million Euro. Yes?

K- .. Yes, it's for 25 million. Yes. And only to governments.

Q: Because you know, I asked about this, you know, another healing machines what you have. But nobody answers from the (KF) Sales department you know? In Poland, there are many people sick, you know. Hospitals here is not so good. I think if there are a couple of machines, even one would be, went to Poland. So, there will be many clinics who wants to buy it. (3:00). Because the people don't know this kind of machine exists, even.

K- The systems are, if you talk about the space systems is 25 million. If you talk about the Enhancement Unit, we put at 1 million. We start putting these out, now that the other development is completed. We only deal with people who have a medical background operation.

Q: The problem is that the people, that they have the money, and they have this medical things, they don't know that this exists, you know, so I asked...

K- It's your job to do it.

Q: Exactly. But, you know, I write to the Sales department, you know, it's like already two weeks ago and nobody answers.

K- Yes, it's the summer holidays, give them a chance. Everybody is somewhere. Sales usually try to. We get this. Some of the sales go to the wrong place. Some of the links are closed, but people still send things, but they are not attended.

But, there is, they opened a much easier way recently, which if you're asking any question. If you go to Telegram at customer service KF, you usually get faster results, answers, than going to the emails, and whatever. It's called @customerservicekf.

Q: Because you know, that people don't want to wait. Okay, I will order first, and after I will get the answer, okay. They will want to come look at it first, how this looks, how it works. (3:02). Because the people don't believe that you said. I even, you know, I was using last month this kind of system with the make people in Poland, you know, I have a small system at home, but the, I use it the bigger system because I have problem with the arm after operation. And even my family was laughing, you know, you go in there, they don't help you, you know. Then after five hours (using the T), you know, around five hours, you know, I can drive a car without any problem, you know. I can lift my hand, you know, my arm and there is more flexibility, you know. So, the system, I know myself, is working, you know, even I using the machines, what they was made from the people what they just learned, you know, from the Foundation, you know.

K- That are a lot of people do these things, a lot of people put. This is why we opened the patents. We lead the Science, we lead the technology in the different ways and the Knowledge Seekers follow or add to it. We had a lady from Poland yesterday in the Enhancement Unit, and when she came out she says, "oh, I came to know the technology and I helped some Knowledge Seekers in London, and they don't even take a day off work." They keep on building and selling these technologies. Then she showed me what they sell and what they do. These are Knowledge Seekers, one of them is somebody who used to work in our lab. He learned, and he is gone, and part of what he had, he added to, and he's busy with it. That's why we opened the patents for people to add. The way we do research is totally different than the others. That's why we don't open the Enhancement Unit and other things to public.

Q: And I have another question, if it's not a secret. Some of the machine is already in Poland, or still not?

K- No, no, nothing is Poland. (3:04). Whoever tells you is KF (@), is trying to fake it, as we call it.

Q: So, by the way, I sent you my invitation on the Linked. So, if you want to, you can accept it. I am using ..

K- We don't usually respond. Thank you very much.

Any other question?

Q: ... I've got an image that we can have a look at here first. The question is, a seeker made this star formation with CO2 reactors. It feels very nice, subtle. The sensation is of being in the clouds, and super relaxed. It may be that a ship, trip has been made, or by

being reactors are you pulling your energy? It's probably a loose translation there or something. I'm not quite clear on.

K- What? these are bottles of Gans's under a table, or something, am I correct?

R: Yeah, it says they made a star formation with the CO2 reactors. So, we see there's 1, 2, 3, 4, looks like 5 of them underneath the bed here. So, they seem to say that, it produces a sensation of being in clouds and super relaxed. (3:06). I'm not sure what the question actually is.

K- We had a Knowledge Seeker, he said, he has MaGravs, he has everything, he says that he doesn't feel any of the fields. He said, my friends come and say, "wow, what an energy, what a thing in this house, blah, blah, blah."

He says, but I don't feel any of it. I said, because you're so physical and you want to be in control of everything. If you accept to receive, you're not in control of, you only control what you want, and you don't want to receive.

A lot of people make these systems around the house, and it has an effect. It actually interacts with the body of the people. It changes people, we've seen change in behavior. So, it depends what level of fields you are, and what it creates in you. It's nice to see things like this.

Next time, I presume this is a dinner table, maybe a working table, from what we see it, could be, with the table, with long, with the legs or whatever. I wonder if you put a water on top, and drink it. Will you still need food? You still sit at the table to eat, but you can be fed already from the system.

These will come in the future very soon. You know the old story with the Jewish guy. I translate into the Gans, if you understand it. The Jewish guy, you made a bottle of butter, a bottle of cheese, and honey, and then puts it in the locker. It was a glass locker room, and then locked it. Every morning he opened up the locker, (3:08). and gave a piece of bread to the children, and they rubbed it on the glass, and he said, "oh, you can have honey, and cheese, or honey and butter." That was their food.

Then one day he comes home, he was 2 days from synagogue, and he saw the children rubbing the bread on the locker. He said, "can't you go to school hungry one day? Do you always have to wait for me to open, to rub the glass."

In a way, if you put jars or Gans's of honey, and cheese and butter, that's how you will be feeding yourself. Very soon, it will become as common as ABC when the crisis comes. So, jars like this are, ?? not just for the CO2, add other things to them, then see if it satisfies the other part of the need of the physical life.

Any other question?

Q: .. Is it normal to feel this tornado in both directions? I had two experiences somewhat similar to this tornado. First was an interaction with the Cup of Man, where it felt like a clockwise and counterclockwise rotation. And it felt like my body was swinging. The other time I felt this rotation was the week we replicated the flight tests by phone here in Brazil. So the question is, do we control these fields through the STP or the STM to initiate flight? (3:10). ... Still there Mr. Keshe? Your microphones are off.

K- My microphone was off by mistake. What I was trying, talking to myself was that. We see this rocking forward, and backwards, and clockwise, and anti-clockwise with many Knowledge Seekers that goes to the system, especially in the last systems we put up, we hear a lot about it.

R: Stefania talked about her experience of spinning, it was a pretty dramatic.

K- Yeah. This is the beginning of what I was explaining to you, when your system, when you settle down, you understand the work of the Soul and the STP, you will get this.

So, it's not talking just about the tornado and the way, that you create that system for yourself. We have already seen it. The systems are set to do this. The new reactors will create more of this condition of the interaction. The two new flight system, which are getting added to, getting ready for the transmutation, Mobile transmutation and, the what I call, the flights, are totally different, or amalgamation of the knowledge, to do this.

This is what you call, "tornado," or rotation clockwise, anti-clockwise. We've seen this, especially in past two, three weeks sessions with many Knowledge Seekers. I can say 50% of the people in the system, they talk about it when they come out, as they were rocking on like a clockwise and anti-clockwise. Yesterday we had about four people doing this. (3:12).

But, this shows that the technology is very correct. Because of the new setup, we allow the STP to expand, we allow the STM to expand, and the expansion in different strength create that interaction, and tornado, and rocking. And the physicality is too weak to stand such a, what you call it, strong fields. So, it goes with the wind. You become part of it and you rotate. If there are any Knowledge Seekers from yesterday, they can tell you the feeling they had. It is like rocking, and motion is there. I said as a joke, if you're like the Jewish rabbis banging their head against the wall, you know the rock back and forth.

But this shows, that the Soul has been elevated so much. Both, the Soul of the Physicality and Soul of the Man, that you feel this turning, this rotation, this rocking. What we teach is what you will see in reality, as it comes. This is one of the signs to show us that the systems are well tuned, well set to meet the demand of the man in a coming time, for everything.

Any other question?

Q: .. In what you were just saying, a question popped into my mind. (3:14). Is elevation of the Soul, is it an adding to the Soul? Or is it giving the Soul more space to expand?

K- It's a combination of both. But you don't need expansion to increase the Soul strength, for the use of the strength of the Soul.

Q: So, it's an actual giving more to the Soul?

K- It's actually Soul giving more, that the higher strength appears. The more you empty the cup, the more you're receive the cup.

Q: So, it's an expansion then?

K- It doesn't need to be expansion.

Q: Okay. Okay. I think I ..

K- It doesn't need to be expansion.

Q: The more you give, the more you receive?

K- The more you give, you give from the end. So, there is an end increases, to be a higher order, than where it was before. So, you receive a higher order. You operate on a higher order strength. What you give, in a way, ends backwards towards you, comes back to you. So, increases the strength. Container is the same, it's the man who changes the strength of it, through his conduct.

Please, those of you who are, (3:16). what you call it, booking for the Enhancement Unit flight simulation, especially for Moon and Mars, please complete your form as fast as possible. Because we might bring you in, in next few weeks for a pre-test. Or, we might run a pre-test video to prepare for the, what you call it, final assault, for the flight system.

Because we noticed with the other Knowledge Seekers, those who have been with us in the first, two, three weeks and they come back, They have started a process. So, we would like to start that process with you, that it's ready for the next step. It makes it easier for us and for you too, to go through the journey, and allows us to complete the cycle.

So, if you were, you have filled in the form, or you submitted it, but you haven't completed it. Please complete it as fast as possible. We bring you on different days then the Tuesdays, Wednesdays to, in a way, put you through the process of the training, or we train you online, till we have you ready for, what we call, the final takeoff.

Thank you very much for today. Hopefully we'll see how we can do, how we can contribute. Those of you who are going for the, what I call, the combined gas and electric units, please realize we will go on the order received for delivery. Because people are placing orders. As it's produced, as it's completed from January onwards, we deliver on a first come (first serve) basis.

Thank you very much. Hopefully we see you next week. (3:18).
proofing completed
