

448th Knowledge Seekers Workshop; September 1, 2022

(Quick Index 17p , Transcription Proofing done, Need to do; Key Phrases, Words)
(Auto Transcription by Elias)

Mikhail Gorbachev; Satellite Souls; Russia targeting Germany Central bank of Europe - Hitler failed - Banks succeeded; Summary of transmutation process - must read; New version of Corona - plasma solution - emotions suicide; ;

Topic Index

Mikhail Gorbachev biggest supporter KF - greatest man of peace; Transmutation system being fine tuned for September; Soul Expansion - people cannot see, but they feel and hear and carry out instruction; Held Soul condition outside of system - room became system; Husband & wife met as Souls - first time; T is 100% correct - have elevated and expanded STM; Need 20 KS to become "Satellite Souls" placed around the planet to transmute other Souls to them; Satellite souls will lead to One Planet; Proved the Third Eye is STM; Couple met as Souls in there home - could talk to each other during flight; Urgent development of T - ready for massive energy shortage in Europe as Russia cuts gas pipelines; US using 5Plus1 to get oil from Iran; North African presidents have to pay bribe to Vatican to be in power; Take Souls as refugees to warmer climate during crisis; KS responsible for Souls who suffer; Third World War is silent economic war; Food shortage in Europe next Fall; More on Gorbachev and fall of Berlin Wall; Can't use system to get away from what you have done wrong; Can't lie to Soul; American Globalists and Germany; Russia targeting Germany because Central Bank of Berlin controls gold of all Europe and Vatican; How Hitler took all Central Banks with the gun - now they surrendered willingly assets to Germany - to be under control of Germany; Microchips limiting economic growth of Europe by China and BRICS; Hidden power of communists - through liberalism; We know everything because it all comes through the top; Five Stackers use of Gans; Possible Blueprint Day next Thursday on combined Gas and Plasma Energy units; New version of Corona - higher strength of emotions - depression and suicide - Plasma solution comes through Iran - soon; RNA is plasma while DNA is matter state manifestation; RNA is like a CD holds information to replicate; Flower of Life is only a symbol for understanding - no meaning in Creation; Each planet has specific emotion - planets just like lifecycle of man; Not everybody will want the T - but will be freely available; KF preparing to receive visitors from the Universe; Visitors come to enjoy physicality, rather than just experiencing fields; We have to mature so we can receive knowledge from other creatures of U; Now many body implants can go through the EU - check with KF; Summary of progressive developments with transmutation process - must read; Transmute each of the souls one at a time P, STP, and STM; Started with hovering chair in 2011; Had to get Belgians out of system to be where we are today; smallest nation battled with Creator - lost; State of Israel will fund T - land of Mohammad - Jesus- Moses; Prerequisite to save Germany - dismantle Belgium; U Community already interacting with earth - and governments - many of you are born out of field interactions - why you know the knowledge;

Introduction to Quick Index 448 KSW

After about 4 months of testing KF is getting very close to being able to complete the first transmutation in physicality. Mr. Keshe summarized the progressive developments that the KS have been experiencing and what they mean. I would like to go over it again because it is so important that we understand what is happening, and not think we are witnessing a magic show.

Some months ago he taught us that the Physicality (P), STP, and STM are separate beings, who need to have respect and love for each other. This was very strange for us to hear, since we consider ourselves only as a body and a mind. To transmute and transport a physical body from one place to another, means that all 3 Souls have to be transmuted separately. No parts can be left out. In this process, first we transmute the STM to the new location, and then the STP. When the STP is happy with the new position, only then is the P transmuted to that position. For humans when we can see the body move, then we consider the process complete and successful. This is where we are at in the development.

Many of us were wondering why we had to sit in 3 Chairs, which connected to our P, STP, and STM. We went through this process to learn to feel and become aware of the different parts of our being. The P was felt mainly in the lower part of the body, the STP around the chest area, which makes sense because of the cloud of field strength from the "souls" of the cells, gathering around the heart, and finally the easiest to understand is the STM in the center of the head, which has now been proven to be the same as the "Third Eye."

This amazing, beautiful, and transcendent knowledge, which the Belgians tried to keep from humanity, is the key to our independence and freedom, as Souls of the Universal Community. If we could deeply and gently ponder what this knowledge means to us in a personal way, then eventually we'll be able to transmute ourselves without a system. This is actually what we are doing in our daily Intention in the KF of Brazil.

Another important stage in this process is the "Satellite Souls." Souls that decide out of the love they have for humanity to participate will be connected to the system in Linz via the "Mobile Transmutation" system, that was already tested in Rick's program some weeks ago. It means that the boundaries of the Flight System (FS) in Linz will be expanded to cover the entire Earth. The beauty of it is, we all will be covered by the system and thus we can transmute ourselves anywhere on the planet. The reason this part of the T is being advanced so rapidly, is that we will be able to help people caught in the massive energy shortage planned for this winter in Europe. The Mobile system is for us personally, while the Satellite system is for helping humanity.

There are a lot of important knowledge in this workshop such as a tribute to Gorbachev as greatest man of peace, Combined Gas and Plasma Energy Unit Blueprint next week, Third World War is silent economic war, How American Globalist and Vatican have

taken over Europe through Central Banks, Russia targeting Germany as they succeeded where Hitler failed; New version of Corona - plasma solution, we are preparing to receive visitors from U; Israel will fund the T, and many of us are from UC. Please study this workshop carefully.

Thank you for listening.

Quick Index

Mr. Keshe started the workshop with a 20 minute tribute to the passing of Mikhail Gorbachev, as the biggest supporter of KF and the worlds greatest man of peace. Mr. Keshe was very emotional and said this news brought him a lot of pain. Please listen to the original recordings.

The transportation and transmutation (T&T) systems are being fine tuned to be ready for September. Not everyone who goes into the system will reach the same (experience ??). Somewhere between a 100 to 150 people have been through the system, but we need more. Do not stop coming in to Linz and adding to the knowledge. Your Soul decides for you to come here and add to the knowledge of humanity for what is to come. (It's important to have the attitude of "coming to add to the knowledge.") Every single one of you who came in, has added to our knowledge.

Last Monday the NASA launch failed, because a "little value" malfunctioned. We are launching humanity into deep space, into a new dimensions. We cannot fail, because we have already failed anyway, for millions of years as the human race.

(When people are in the flight system, they say they cannot see Mr. Keshe, but they hear his voice and follow his instructions. Even though he is very near to them they cannot see him. They hear who comes in and leaves the room).

In 10 - 20% of people who come for the first time say they have no reaction and nothing happens. But after the second or third time, their Soul opens up. This delay is because they want to control the physicality. They want to know what's happening and to remember everything. (They increase the blood flow so the physicality remains in charge and engages the Soul tighter, and this stops them from taking the trip).

(We realized that the ones who don't go anywhere is because they don't trust the Soul to be in charge of the physicality. Their physicality wants to see, remember everything, and to remain in charge.)

(In this next part I will try to summarize what Mr. Keshe is trying to convey. The STM expands to engage the P, and I believe this is why they could not see him, even though he was physically next to them, but they could hear him and follow his instruction. This is the confirmation that the STM has expanded. It's like when you dream, your STM is in charge, you remember hearing voices, and the Soul has taken you places. In the flight

system we are going to be able to take both the Soul and the P, as a package, or a balloon and move them to a new location.)

In the transmutation process we are going to transfer your energy from one system to another. (It's important for us to completely understand how Soul expansion works. Soul expansion is when you cannot see us in physicality, but your Soul hears us and follows our instructions. It's very important for us conclude this understanding to be able to move to the transmutation.)

(A special test was done this week with 2 couples, the 4 of them being friends. He was holding them in certain positions and doing specific tests. He had them all sit together in the center of the systems. What was interesting is that they could not see each other, when they were sitting in the center, but they could hear each other).

The husband said, that he could feel and hear his wife, he knew it was her. The significance of this is, that it's the first time, a couple has met as souls, and both were aware of the each others existence. It's what you call, "soul mates."

This experience confirms that the T is 100% correct. (We achieved to expand the STM. This is how it will be in space, where you don't physically see each other, instead you feel each other.) This is the jewel in the crown of the testing over these past 3 - 4 months. We managed to carry 4 souls together, but not yet in the dimension of physicality.

We managed to create a flight system inside the whole room, rather than only inside the system. Because when they walked out of the system, the field strength of the Soul should have left them, and they would have been able to see each other. (But since they couldn't see each other, it means they were still in the strength of the Soul.)

For the first time we can completely confirm, that we have managed to elevate the STM, and to free it. Whereas instead of needing your eyes to see someone, you feel them with your Soul, and recognize them exactly the same way you do in your dream. (The Soul listens and acts.)

(The tests have confirmed the encaging of the P by the STM. This will have a lot of implications and applications in the coming weeks and months for the KF. It means, that if we encircle field energies around this planet on a satellite scale, then anybody can move anywhere, at any time, as they wish). It will be the freedom of One Nation, and openness to everything, and understanding the technology of the Creation.

I need 10 volunteers today, for a special test. It doesn't matter if you've (already been to Linz or not). Go on the KF website and sign yourself in and put "a special" on the form. We know the Souls, which will do this. This is another kind of test like the one we did on Rick's program some weeks ago. It's a special Mobile flight test. We'll be able to show you what's going to happen.

Yesterday's test brought us such an advancement in technology (T), that we should be able to bring transmutation before Christmas. The speed (of our advancement from now on) depends on the participation of the Knowledge Seekers around the world, who join with us, not on daily basis, but on hourly basis. Now, it's all of us who have to push this T through, and the implication of this is huge.

Completing and applying this phase of the T within the next week is paramount to the work of our flight system, for the next few months. We'll call upon you and your soul to join us for the change. We want to increase (from the 4 in the flight room, to between 10 to 20 people (joining via Mobile) from around the world within the next few days).

We want to complete this process rapidly, because after next week we want to install a new system. We would like to be able to establish the first "Satellite Souls," which will behave like these systems. (We want to use the Souls as satellites to create a structure around the world. In a way, make a house out of this planet. Let's see how successfully we can do it.)

We will call upon 10 to 20 of you to be present during the testing, which means we'll extend our system (through your souls) beyond the present boundary of the flight system in Linz. You as your souls, become that satellite system.

You do not need to go anywhere, or be transmuted (yet), but we'll start the process. We'll guide you through it. In a way, you'll become part of the Universal Community, and you'll be connected to the Universal Council. Now we will get Universal Council supporters through their soul. This is important to see if we can use the STM of those who choose to be, as part of this system.

(Just as Man launches satellites into space to spread communication linking this planet together, so too, the Universal Community uses the energy of the fields of the soul to do the same.)

Yesterday's test was an amazing achievement. If you remember, I said, when you meet another creature from the universe, you won't see them, instead you'll feel them and their colors. The information they give you is on the level of the Soul. (They tell you if they are friendly, or if you are going to be food, or if you are going to receive energy from them. You'll know through the feeling if you are in danger, or to be given knowledge, and everything else. It will not come through the vision.)

For the first time we've proven what you call, the "Third Eye." The third eye is the STM, the working of the STM. (With what we've seen yesterday in the center, we can expand it.)

We tested an extremely beautiful couple from Austria on Tuesday. It was amazing how this couple was connected to each other. (I asked them to talk to each other to decide where they wanted to go. The lady decided to go to their own home, and the man

followed. It was a unique experience for them to meet in their home at the level of the Soul, and they both enjoyed it immensely.)

(The important part of this test for us was, that we can send people together on a flight, and they can talk to each other. It's the same as we do with aircrafts. It is done through the agreement of the souls. Now you can travel together. I put them in the same system, one in the front and the other in the back, so they were separated, but still in the same system.)

(Families can decide to go on a holiday together to a destination. All will go together, and they will enjoy it. If they, together as a family decide to manifest in the dimension of physicality, they can. With this, the true universal space travel in the dimension of Soul has been established.) It's an amazing development in the technology.

It's the same with the 4 people who were together in the system yesterday. They could not see each other physically, but they could feel and be with each other at the level of the Soul. (They said it was so beautiful and peaceful. The lady spoke of the headache, because she could not get (what had happened, around her head).

(Now, we want to get as many of you as possible to become, "Satellite Souls" across this planet. The more we establish in the next day or two, the better we'll be able to connect. We'll take two days of your life to do these tests before we test for transmutation.)

(These progressive developments are what we collectively as a race will achieve, and to collectively do the work.)

Let me explain why we are suddenly pushing for this very rapidly. If you read the news, then you know Russia will completely cut off the Northern gas line to Germany as of this week. It's like cutting the gas to your home in the middle of winter and asking you to survive. If the cut off comes in March next year, the storage tanks will be empty.

(The US is using the (5plus1) negotiations with Iran to squeeze as much gas out of them as they can. The US president refused to speak with Israeli Prime Minister this week. But Iran is a close ally of Russia. There will be a shortage of power and energy in the West. It's similar to how the British planned the "Spring Uprising," in the Arab world, and they started it with only 20 Italians in North Africa. In Europe it will be known as the "Winter Uprising" due to lack of energy, and food. The leaders in North Africa who remained in power, it was only because they paid the bribe to the Vatican. To be the president in these countries they have to pay the Vatican. Europeans will become like the Syrian refugees.)

If the gas lines are not opened, the mayhem will be very deep, and KF can only produce several 100, or maybe a few thousand power generators.

(But we can make your Souls to be refugees, and send them to places that are warm in the wintertime. Immigration by the STM, is now an option.)

Register your soul to be the Satellite Soul in this work, so we can finish the transmutation system before the mayhem breaks out. You will open a passage for millions of European Knowledge Seekers who understood the technology, that they can take refuge in other countries.

This is not a fear mongering. We have heard the foreign ministers and ministers of France, Germany, and some other states, give warning to their citizens in public. As One Nation, One Planet, One Race it's our responsibility to look after our German friends. The Germans have heavily and devotedly supported this project. Because the German Race is aware of the hardship to come.

I hope we do not get to this point. But as a scientific organization we should be able to transmute millions of souls out of harm. Now you understand the importance of yesterday's test in the Linz Center.

The more Satellite Souls register as a "special soul, " the better. Do it today, not tomorrow. Do it now, not next week. Don't say, "I'll think about it." (The faster we can bring these Satellite Souls into position, the faster we can transmute.)

We are pushing to bring in the new dimension, because we have the technology to do it. As I always said, mankind will accept my technology, the technology of the Creation and the Creator, not out of love for it, but out of the fear of his own demise. Even if you live in parts of the world that are not effected by the gas from Russia, you're still responsible for the souls of those who will be effected.

Every member of the KF team will receive a generator and gas supply unit directly and freely from the Foundation. It's our obligation to our team. I will not let a single soul to suffer. It's your responsibility to decide what is going to happen.

It will come to two points, (either we use our Gas and Plasma Energy Units, or we go through the transmutation, and jump altogether, the limitations of the dimension of physicality.)

Those of you who understand the immensity of what is on top of us, will understand we have entered the "Third World War," the Silent Way, through economical war, without firing a bullet. The leadership of Russia already knew this will come, when they set it up. The beauty of it is, you cannot bomb Russia to open their gas, because you will be bombing your own pipelines, and the destruction would be worse. (Russia will turn the screws tighter and tighter, because the Central Bank of Europe in Berlin, controls and hold the assets of the Vatican. Now you understand.)

We need you to be part of this. Maybe that's why you became Knowledge Seekers. We need this to be ready so we can lift millions of Europeans on the soul level to other locations, that they will not suffer. This is exactly what Gorbachev did. (The comfort and power of being a president was not worth the lost of a single life.)

Everything is coming into the right place and time. It's a war without bullets. It's an economical war. The food control is the worst part. KS have to do what Schindler did by saving thousands of Jews with fake passports during the Second World War. I hope we don't see more hardship. I hope we see resolution of this matter. But if not, we have to be ready.

But I sincerely don't see a resolution. Because I know the time for change has come, and it had to come this way. It had to come through technology, which is not theology, but works through man understanding the strength of his Soul, and the purpose of his creation.

Maybe those of you who couldn't come to Austria, now you understand why. You have to stay where you are. And maybe that soul is there to create that change. That change for all of us. It's vital, it's paramount for all of us to be able to complete this process.

We've seen men for centuries going from one nation as a refugee to another. Now we will see refugees of souls. And then it depends, if they want to manifest themselves, and become part of the society, and not remain as energies. This is the reality of the time, and place in it's what we kept.

In a way, the passing of Gorbachev could not be more timely, a man of peace, who tried to keep his nation away from the destruction of itself, as we see now in Ukraine. But this will come to us as a humanity, as some of us, with the taste for power, would like to prove they are more powerful.

In the dimension of the division of the fields of this planet, we have the knowledge to create these Satellite positions with all of you, who are within the structure of the Keshe Foundation. It's your responsibility. Maybe that's why you became KS.

End of Part 1 Quick Index 448 KSW

There were some comments about Mikail Gorbachev, "he is a hero to me and many others, a man who served his people and the world." "We lift the soul of Mikhail Gorbachev and we thank you for your fight for peace and harmony."

Mr. Keshe went on to speak more about Gorbachev to help KS understand the beauty of his work. It was because of the decision of one man to not kill, that we saw the Berlin Wall come down, and the changes throughout the Eastern Bloc countries. The generals were against him because they lost their jobs because of him.

He brought up about Hitler killing every male creature in a village in Holland, including dogs, cats and humans, to set an example, because a man in the village killed a German officer. Interestingly, he said, that Hitler was following what his ancestors did centuries ago, by killing every male creature in a community. (The only thing I could come up with, was Moses in the old Testament, where he committed genocide, and then blamed it

on God. We know from DNA tests the Hitler had a lot of Jewish blood, and the first thing he did when he crossed the Austrian border was to destroy his birth records.)

Mr. Keshe traded goods, mainly food out of the Eastern Bloc, for luxury items such as Levi's 501 and toiletries, of the West. They also used to take smashed up Porches and BMW's back to the East where they would fix them and sell them to the rich. This is how he came to know of Gorbachev's work.

Gorbachev reversed Lenin's system without firing a single bullet. What we see in Ukraine, is what Gorbachev walked away from.

Dimitri only gets to ask 2 questions, "we don't want it to become a one man show."

Dimitri was saying he wanted to be a Satellite Soul, but he doesn't have any money to pay the registration. He wanted to find out if he could participate on his own.

K- No, no, no, no, it's got nothing to do with the money. (We have to have a system for people to register and participate, otherwise we get thousands of people, who are just "time wasters." We had a guy who tried to force his way into the Linz center and factories saying, it was his right. So go on the website and go through the process.)

We have a reason, that we do it this way. We have to have a structure. (The Satellite Soul program has nothing to do with the money.)

We are monitoring a lot of things. (It's not just that you say, "I want to be a Satellite. Your soul decides. If you don't agree with what we are doing, we refund your money. It's being able to do the job, the way we want to do it, and achieve what we have to achieve.)

Q: (Will the STM transmute irregular physical conditions), such as abnormal muscle growth due to injuries that were never attended to)?

K- That depends totally on the Soul itself, not on us. Why did you get these injuries? What was the purpose? Why did the Soul accept such a position?

(Are you wanting to use the system to get away from what you've done wrong?) You've got to understand, you can cheat every system, but not this one. Because your Soul is a witness.

Q: The injury came from weight training,

K- It doesn't matter, that's irrelevant. You have to (understand) it yourself.

Q: (You must be aware that it is not Russia's fault that Germany is short of gas. It's the German government under instruction from the America Globalists, who are boycotting the Russian gas. ...)

K- (Let me answer in a very simple way. Ukraine is the reason for this position, and Germany wants to be seen standing on the side of "Free Europe." They bypassed a lot of things to quickly allow Ukraine to join the EU. It's partially correct what you said about

(American Globalists). But, partially, Germany could have easily said, "we'll pay in Rubles." It's a power play. You've got to realize, that your understanding of the world conditions are very different than ours. The understanding we work on, is of a totally different global condition.)

(Maybe he is referring to the fact that the Globalists almost completely control the information we get about the world situation. Therefore, our understanding and emotion is controlled from outside. It is very hard for us to understand what is truly happening. The Messengers understand the situation through a different channel, and are very clear about the direction things are shaping towards. They try to help us understand from that perspective.)

(You have to understand, that the Central Bank of Europe sits in Berlin. If Berlin sneezes, the whole of Europe catches cold. That's why Russia has targeted Germany. As Europeans, you decided to transfer all of your gold reserves to Berlin, prior to the year 2000, to create the EU currency, as Euro. The Germans are targeted because they are the central position of Europe.)

(During the Second World War, Germany by force of arms, took control of Europe. When that failed, they decided to set up the EU, European Union. To take control of Europe, Hitler went directly for the Central Banks of all the countries he invaded. He drove straight to the Central Bank of Holland, then Brussels, and then to Paris. Isn't this what the British did in North Africa a few years ago. They went right for the Central Bank of Libya.)

(Hitler took all of the European nations reserves back to Switzerland, to finance the war machine. But in the end the "gun policy" didn't work. This time they used an "economical policy," and this time the European nations willingly gave their gold reserves to Berlin. This is no different than what Hitler did.)

This is exactly how it was in the 1940's, the Central Bank in Berlin made all the decision. Now, again, the Germans are making the decisions.

(On the other side of the coin, why is Russia pushing to be paid in Rubles? Because it's being put under pressure by BRICS, with mainly China sitting behind it. It's a multitude of positions. You may say the central operation of the EU is in Brussels. But Brussels has no teeth, if Berlin doesn't pay out any money.)

I hope you understand, the Russians are targeting the heart of the operation of Europe. Secondly, it would have come anyway, Ukraine was just an excuse. They would have found another way to come in. But as the Vatican pushed in Ukraine, (along with the America billionaires), now it has come this way.

Look at the situation globally, and not just the German situation. We respect you as Germans, and admire the way you work. But, now you have to see, how you've been targeted. Another way is through the microchips. Your biggest industry is the auto

industry, which makes up the majority of your income. Without enough microchips, companies like Mercedes, BMW, Volkswagen, Audi and the rest, are limited in production. And they are not receiving enough microchips through China, and Taiwan, and the rest of it. Taiwanese cannot produce the chips, if the Chinese don't supply the raw materials.

(This is an attempt to bring out BRICS to replace the Dollar and Euro.)

The German government has no teeth to bite, because it doesn't have its own raw materials.

In a way, it's the hidden power of the communists. It's a "liberal" way is pushing its muscle.

When we offered this alternative gas production to the Germans, and Austrians, and the rest, they are not interested, because they know it's too late. They can't patch it up. But the real story comes, what's going happen after Christmas, when there's a massive shortage of energy.

Mr. Keshe goes on to explain about his experience with the oil companies and more. The gas prices in Iran are only 1 cent or so.

It's not blaming, rather it's understanding and having the knowledge. The next pressure point will be food shortage in Western Europe. That will come next September.

R: It's kind of ironic, that half the world is trying to get rid of the CO₂, while the other half is burning gas to get CO₂ to grow its plants.

K- (One of the world leaders once said to me, people ask us, how is it that we know about everything. He said, because I'm on the top, everything comes through here and I have to see and learn about it. Otherwise, I cannot make a decision. It's the same with the Keshe Foundation, everything gets tested here and we see it, so we have a very broad spectrum of knowledge about everything.)

He talks more about his experience with oil companies, Transnaf and Lukoil. He used to buy oil in his own name. Usually it's bought through a company's name.

Cosmologically, we consider anything beyond our Solar System and the Milky Way as deep space. The distance is far enough

Q: What should we do with the Gans's from the Five Cups and Cup of Universe? Should they be harvested to produce plasma waters? You said, that the Five Cups, if placed in a hospital would end almost all diseases, and that the Cup of the Universe would also be the Cup of Youth. Should we make dynamic reactors? What would be the effects?

K- Yes, you can do any combination, anything you'd like to do. That's not a problem. You decide what you want to add to it. The Five Cups, the Cup of Universe is a

combination of understanding the Totality of the Creation, it's not just a cup you put something in.

The Five Cup Stacker is the man itself. What do you want to do with the man? People who came to the original Exhibition (Design) Center in Linz, had the chance to stand among a set of 3, of the Five Stackers and feel the fields of it. But it wasn't done the way it should have been done. Nevertheless, people used to go in the center of them and they could feel it. Because you created a dynamic flow between you and the Stacker. (The Stackers were connected by wires.)

Two Vertical units have been commissioned, and are under construction now. (It's a more compact and powerful way to set them up. We create a dynamic flow of the different stacks of fields. It depends how you understand and use it. It's the same with the Gans's. It depends how you apply it.)

(We might have a Blueprint Day next Thursday for the release of the combined Gas and Plasma Energy unit. It was supposed to be January, but we are bringing it forward. It will be a 5 kilowatt unit for the house. We are bringing it out as fast as possible, so it can go into mass production by September, or October.)

Q: Some Chinese are asking if this 5G signal will activate the grapheme inside the vaccine and cause illness for people?

K- I have no clue about this. I can't tell you anything about it. There is a lot of talk about these things. But we have no data, and we don't get involved in it.

You have to understand, the vaccine in China is produced by authorization of the Chinese government and majority of it is homemade. So, it's implication and application of the technology by your government, if there is such a thing.

We have had reports by many Knowledge Seekers, that they have been hit by the new version of Corona. They are reporting depression, suicidal condition, and all sort of things. We have seen the same pattern in Iran, China, Brazil, and Europe. The new version of the Covid touches the emotion and can bring you to insanity. There is an increase in the level of the fields, that approaches the emotion level, which is higher than the physical condition. We have guided KS through it.

In Brazil there was a mother with a child of six year old, and other KS were asking for pictures of the child. This is nonsense. Under no circumstance should you give pictures of your children to anyone. Even if they say they are from the Universal Council. Never give the picture of your children to anyone, period.

(We helped the 6 year child and it responded immediately. It's a very simple process. KF handling of the new version will come through Dr. Barapour from Iran.) We're waiting to see if it gets much deeper, so that we have more exact knowledge of how to handle things.)

(KF is supposed to meet again with the Italians next week, who want to start applying the plasma medical application in health centers. Originally it was supposed to be only one center. Now they have brought in a new backer with many centers. We have to see what will come up with it. They work under the license and ownership of a bigger chain of companies. But it is primarily for Fibromyalgia and other diseases.)

Q: Can you as a genius, help humanity to restructure the DNA of the history, to bring eternal peace? And what is the relation between the Flower of Life, and the DNA and RNA?

K- Flower of Life is manmade. But the energy transformation in DNA and RNA is (how the reality works.) In some cases, field interactions create new conditions and then we can try to relate it to a structure. It's balancing of the fields.

When we speak about DNA, it's about the conversion of energy to a tangible condition. In the case of RNA, it's about the fields of that structure. When the mankind understands this, we'll see the change in the understanding of the knowledge of the Creation, and technology.

(The DNA is how the fields structure themselves, and how the field strengths will look as a physicality or a body of the man. Through our desire we create a structure that will serve that particular purpose. The fields for creating that structure need to be maintained, and preserved, and they need to be able to be replicated.) (As in, cell replication through DNA.)

You cannot put every single cell of the Man into an egg and sperm, that it replicates it. (Instead, you put all the information in the RNA. It's like a music CD, one CD has all the information and music, which you record from.)

In a way, DNA and RNA, are the same thing, but one is in the matter of state, and the other in the plasma or energy state. By the reduction (of the field strength) it becomes matter state. (The RNA plasma information, manifests itself in the matter state, what we know as DNA.) (The structure of how this occurs is through the Star Formation. It creates a base of 3, and 1 to control, and share everything together.)

The Flower of Life has no meaning in the world of the Creation. It's a manmade concept to explain a physical observation. We don't see our skin or the stars in the shape of a flower of life. (It takes a dynamic position. We try to relate a physical manifestation into something that we can understand.) But it's not a permanent shape. (It's not how the universe works on it. We don't see everything circulating as a star formation in the universe. Everything takes its position, they're in transition to reach a stable condition.)

The KF Spaceship Institute is a broad based structure, which works not only on space technology at the soul level, but also on Gas and Plasma Energy Units. We work on space technology at the physical level, with flying system like UFOs and the rest. What you see

in Linz is the ultimate knowledge. But, we still have a structure and work in physical movement, physical motion of materials, and people.

Our technology will satisfy all needs of the Man, and the Universal Community. There are many technologies, which will come to us through our encounters with other creatures of the Creation. The magic has just started.

Q: Does each planet have its own specific emotion?

K- What do you mean by that? A Planet is like any being, of course he has his own structure.

R: .. (Certain emotions have been identified with certain gods and goddesses, and these have been attached to different planets. The goddess of love is attached to Venus, for example. Are there any particular emotions that you see attached to any particular planets?)

K- Yes, they do create their own attraction. A planet is like a human being. He has his own emotion. He has his own anger. He has his own clouds and whatever. He attracts certain type of fields with it. That's why they behave in a specific way.

(If you look at the pattern from Saturn, and Jupiter, then Earth (with physical life forms), and then to (barren) Venus and Mars, it's like each one is going through a different state of emotion as they move closer and closer to join the Mother in the center, the Sun.)

Saturn and Jupiter are like the young ones in the back, they gather everything to themselves, and create many moons. We always see the young as very active, they create a lot of mayhem and everything else. On Saturn and Jupiter we see huge explosions on the planets. As the planets get older, they get closer to the final destination, and they become like Earth. Then they calm down and have nothing, they become barren like Mars, and then they go back into the Sun.

There's no difference between the Solar System structure and the life of the man. There are a lot of similarities, like wanting to own and control, and have everything. As we get older, we give up everything, and we go closer to the final position.

We develop the T, but it doesn't mean everybody will want to use it. But we give the freedom and have it available to whoever wants to use it.

People from the Universe who come to Earth and convert their Souls to the physicality of the Earth, they do so to be able to experience eating, chewing, and enjoying the pleasures of this planet.

What happens when you come in touch for the first time with the Soul of your partner, or the Soul of a planet, or a star, or an environment that you want to enjoy by manifesting in the physical dimension? Then you need to be able to transfer yourself to that dimension, and you need the facilities to be able to exist according to the strength of your Soul. Either we can provide that facility, or you can provide it for yourself, if you know how to do it. So, excursion and conversion will be everlasting.

What is the use of coming here and taking the shape of the man, if you can't enjoy biting into an apple, or enjoying the smell and beauty of a flower. The job of the KF is to provide the technology and knowledge for both for the man to go out and explore the U, and for those who come here to enjoy the life of the Man.

The Totality of understanding the process, is completion of the process, in every dimension and every direction.

The problems start when we become short sighted and only think of our own thing, alone.

(We do not go out of our way to create a condition, that is half cooked, or half done. One that is not mature. At the same time we have to create a condition, that is not only beneficial to the human race. The systems we build have to be useful and applicable to all races of the Creation.)

When visitors of the U come to us, we don't want them to go through the hardships that Man has gone through. We want to prepare everything nicely for them. It's like when you invite a guest. You don't feed them only what you like, but rather you find out what they like to eat, and prepare that for them. We prepare for them the best of the best. This is what we're trying to do at KF. When we do this, we have to understand exactly what we are doing, the way we are doing it, and the reason we are doing.

(At the same time we are preparing the Man, we are also preparing for the guests of the U to receive the introduction of the new technologies. We want to get Man and the other races of the U at the same level of understanding as soon as possible.)

It's no use bringing people here from different parts of U to share knowledge with man, when he can't understand. Then it only becomes a magic. This is why when we started this process, we told you, that when you come out of the system, we'll listen to everything you say and respect it. Because it's you who has been there, not us. It's you who experienced the expanding of your Soul into that dimension, and that understanding. (It's up to us to decide if we also want to expand to that same dimension to learn.)

We are preparing not only to go into the U, but also to receive guests from the U. We are here to serve, not to be served. This is our motto. We are here to serve the creatures of the Creation, and not just man, or just to help him get out of his own manmade disasters.

(Many body implants are now allowed into the system, because we have gained the knowledge needed. But check with KF before you apply. The former restrictions were there to help us gain the knowledge. Now that we have gathered that knowledge, we can handle a lot of the implants.)

(As far as the Mobile transmutation goes, if we can reach you by phone, then we can transmute you.)

The Mobile test is different than the Satellite test. Mobile is for you, Satellite is for humanity.

We need the Satellite test to be completed urgently, before we go into transmutation. We don't want to bring part of you here, we want to bring all of you here.

Summary of the Transmutation Process

Mr. Keshe goes over the progressive development of the Flight Simulation systems that are leading up to the transmutation process. You can listen to the original. I will try to summarize a little of it here.

We started out with you sitting in 3 Chairs one for physicality (P), STP, and STM, and we watched the interactions you had with them, and have been continually adjusting and updating the flight system ever since. In Chair 1, people could feel the energy in their bodies a lot in the lower part signaling the P part. Then Chair 2 they felt more in the upper part of the body representing the STP, and Chair 3 mostly in the head for the STM. After this, people went for flights to Moon and other places and visited family members who passed away years ago. This was all done at the level of the Soul. On the Moon they could touch the sand and feel the coldness. These are all indications of traveling by the Soul, as we do in our dreams, only in the system we could control it. Then with the knowledge gained, the 3 Chairs were combined into one.

The important part of this process was to be able to expand the STM to encage the P, in this way you can transmute the P to a new location and manifest it there. The expansion of the Soul was shown by more than just traveling to the Moon, they had to be able to feel and interact with the destination environment. One lady could even smell the place she was at. Another proof of the Soul expansion is the fact that, when the P is inside the Soul, the people report that they cannot physically see Mr. Keshe, even though he is standing next to them, but they can hear his voice and carry out his instructions. They also can hear other people coming and going from the FR.

Further developments went on between the 2 flight systems in the Flight Room (FR), to prepare for transmuting the P from one system to the other. Between the systems they worked on developing different combinations of interactions with the P, STP, and STM. For instance, a big understanding came this week when a couple were put in the FS, one in the front and one in the back, they were separated by a distance but still in the same system. They were able to meet each other in a destination, that both souls agreed upon, and they could interact with each other. They could also communicate with each other during the flight to decide on a location.

Mr. Keshe wanted to test if he could keep the Souls in what he called, a holding pattern, like they do with airplanes waiting for a runway to open up, they keep them in flight. He brought the couple outside the systems into the center of the FR, and they still could not see each other, but they could feel and know each other. This means they remained in the

condition of the Soul even outside the system, and the whole FR became the system. This has huge implications that will be revealed later.

The next step in the transmutation process, is for the STM to be transmuted to the other system. There are special systems setup in the structure to do this. After the expansion of the STM, then it is transmuted to the other system. Once they are satisfied that the STM has transmuted, then they will transmute the STP with "virtual systems" they have built for this purpose. Then when the STP is willing to take this position, they go for the ultimate goal, transmuting the P to the other system. Then you will see the P disappearing from one system and appearing in the other. Because the conditions of the environment are still the same, it will be easier than transmuting to another location, where the fields of the environment are different.

You don't just transmute the P in one go. First you transmute the STM, then the STP, and finally the P. Each stage of this process has its own strength, and also its own technology. It's taken me 40 years to develop this. There is so many "Universal systems" hidden inside this system.

I will briefly summarize about the new "Satellite Soul" system, which uses the Mobile system but is different from it. For example, if we want to setup a Satellite in Australia, we would need a person there whose Soul is in agreement with the process prior to traveling. Then we open up a Mobile communication with them. When their Soul confirms that they are feeling the person in Linz, who wants to travel to Australia, and the person in Linz confirms feeling the other one in Australia, it means we have a Soul link between the two positions. When there is an agreement of the Soul's then we can transfer the Physicality. Then we transfer the P back to Linz.

This process was already confirmed when we tested it with you in Rick's program some weeks ago. Even though you may not have known, that is what we were doing. So we are moving very quickly into the final transmutation process.

Another interesting thing, which was not totally clear to me, but I think what was conveyed, was, that in the process, the people in Linz and Australia will not only feel each other, but they will first be able to see each other, before they transfer the P to Australia. Then the FR in Linz will be empty, and the P will manifest in Australia.

When this gets completed, and if a disaster comes, we'll be able to move as many Souls as needed to safety using this system. Now you understand the crucial point of wanting and asking for Satellite - Mobile transmutation to be completed quickly. The Mobile is for you, and the Satellite is for humanity.

For those of you who came to Linz, you actually, physically saw, what I call, the "satellite dish" on top of the FS, but, many of you are not aware of it.

We are using the same knowledge as what we did in Chairs 1, 2, 3, or P, STP, and STM respectively. First you went through P, STP, and STM, and then when you finished the

flight you reversed the process, STM, STP, and P. This is exactly the same process we are doing here with this transmutation, we move you step by step. Now you understand why we had you sit in the Chairs. The same knowledge of the Chairs is used to transfer you back into the STM, STP, and P. In the future, all these steps will be done automatically. All this was planned 10 years ago.

Interestingly, we showed the first flight system as "hovering chair," back in 2011 in Hanover, Germany. Now we are in 2022, 11 years later. But first, we had to get rid of the Belgians from our system, to be able for you to get to this point. For 10 - 11 years, I tried to bring this out, but every time the Belgians stopped it. They had their "mole" inside the bedroom, the betrayer. Now you see the change.

When we opened the first Linz center the lady was calling everywhere to block it. Then she gave 2 terabytes of information to Iranian government to get me executed. They did that so you, as humanity would not be able to reach to this knowledge. Now you understand why so much was done to stop this technology. Now you see the devil, the prostitute, the betrayer. Now you understand, you could have had this knowledge years ago.

The smallest nation in the world went to battle with the Creator, and they lost.

One of the prerequisites for saving Germany is dismantling of the state of Belgium. You will see, we'll achieve it, whatever we said we'll achieve, we'll achieve it. There should be no more abusing humanity and causing so much suffering, by a king, and an empire.

Keshe Foundation will grow out of the state of Israel's funding, because it's the place where Muhammad became a Prophet, where Jesus came from, and where Moses appeared. If we deny the truth about our own existence and path of belief, what do we have left to believe in?

The technology that we see here, will bring man to the point of glory in the universe, (and not the demise, and abuse we've seen with the state of Belgium.) Now, you understand, why we are so adamant.

We are very clear and this process is continuous, step by step. It's not a talk anymore, it's a technology, the knowledge of Creation has been translated to the Totality of the knowledge, and this will bring us new dimensions. This will bring us to understanding more, and being able to communicate with everything, which we need to know and do.

The whole structure has to be systematic.

Understand the system, the reason for the system.

The process of Creation, how life exists, how energy in life is created.

How we create energy in our body.

How we convert energy of the plasma, to energy for heating our body.

The process, the mechanism that the body of the man has chosen for this process.

If I teach you this, you'll throw all biology and chemistry books of the man in the bin.
This is the way we will transmute and transfer.
This is the way we will understand this process.

The transmutation has to be confirmed, and then converted into transportation. This is (where we need you to be at the point of the maturity.) We transmute you to the dimension of the Soul, but it's you who has to transfer the physicality. That's why we call it transmutation and transportation.

It's you who transfers and transports your own STP to the dimension of physicality, (but you do it through the interaction with the environment of the destination.) That's why it's easy for us to do it in our own system, because we are in the same environment. We showed you this yesterday, when the people met in the center of the systems, (and they could not see each other, but they could feel each other with the Soul.)

Hopefully next week we'll start to do the Soul transmutation to outside the flight room.

We have to understand the condition and the process (to complete it.) We had to find people who could understand the knowledge to be able to transfer the technology into mechanical systems. It needs a lot of understanding to translate it into the physical dimension.

There was a comment, that with your contribution to the humanity in energy, transportation, etc. It is beyond me, that Mr. Keshe hasn't been recognized as the greatest scientist of all time.

Not all the Souls are the same, therefore we chose to use 4 Souls, because they form a Star Formation. But we don't look at the position of the seats, we look at the structure of the field dimension.

Q: Will we see in our lifetimes, the universal family openly visiting and interacting with humans within the dimension of Blue Planet Earth?

K- They've been here in the lifetime of your forefathers, you've been blind to it.

Q: But in terms of the Totality of humanity, there's not been.

K- In Totality, there has been a lot of interactions on a daily basis. Some governments are fully aware of these interactions. This information is kept hidden from the public. It's like the guy said, why is KF not known? They let you know what they want you to know.

The UC is amongst us. Some of you listeners are part of them, (born out of the interactions of their fields. It's partially there in you. You know the knowledge, and you are visitors.)

(The visitors of the U are amongst us and so much a part of us that we don't notice them.)

When you speak this way, it means you haven't understood. Earth is not isolated. It's a common ground for the rest of the life of the universe, where the people come and go, and enjoy its beauty. It's us who has been ignorant to the truth. We chose to be ignorant.

Please go and register as a Satellite Soul. We need it, to do the process in the coming weeks. If somebody wants to go to Australia, then we need a Soul in Australia to receive them. It'll be a busy time for your Soul. Even you might not be aware of it in the physical dimension.

I pay my tribute to His Excellency President Gorbachev. We hope, but we know your Soul has found a new dimension, higher than the Pope (John Paul), who brought you down. Even though he (the Pope) is still a cleaner in the bottom of the pits of the universe.

Thank you very much for today, and thank you for being with us to share knowledge.

SUMMARY:

ENGLISH TRANSCRIPTION

(:12).

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever, and whenever you listen to this is of Knowledge Seekers, obligation Foundation, Spaceship Institute, 448 sessions of, and hopefully we will make it a little bit longer a few more years. Thank you for being with us. And thank you for being part of this development. We had some wonderful trials and tribulations in past few days.

Before we start, as last time, we (acknowledge) the passing one of our beloved teachers. (:14). Many of you don't know, but we lost more than the biggest supporters of the Keshe Foundation (KF) this week, (Mikhail Gorbachev). Of hearing of his passing brought me a lot of pain. He supported the Keshe Foundation in a hidden way. He believed in the peace message of the technology. And in many of the teachings, a few times I always praised his way, his work.

Four or five years ago, he invited me personally to Rome, to a private conference he was giving. I went a couple of Knowledge Seekers to the conference, to meet him. On arriving he sent a private message through his secretary at the conference, due to illness, he could not take up the conference. And he apologized to me. In his way, I told Knowledge Seekers who were with me that, it was a sad occasions. When he was on

location, he met with CIA, and exchanging some information, because they knew I would be there.

He understood the message of peace, and he is a man who walked away from conflict. He saw presidential position, not worth if one person is being killed. He always in his messages, and support of the Keshe Foundation, in a very direct way, carried the change has to come through peace and knowledge. (:16). He brought to many of us today what we see in Ukraine as a result of, he brought to millions the freedom of the Eastern Europe. What do you call yourself Romania, Bulgarians, Ukrainian, Armenian, and the rest, is through his wisdom. He was the true man of peace. He was the emblem of, power has no meaning if one loses his life. He tried everything for his nation, but the elements of the work outside, was much bigger than him told.

In calling the Western world, to help with Chernobyl, brought his demise. The Russian saw him, as that, the Russians had to do it themselves, but he knew he does not have the knowledge and technology, and the backing, and the mayhem, which was in 1986, which most of us didn't hear.

If Keshe Foundation looks for a president, who lives by the word of the peace, by the man who put everything ahead of himself, we need to look. We have to look the life of the Russian president. (:18).

In many times, in many occasions, I have praised his work, the way he walked away, from one of the most powerful seats on this planet. The point of accepting and negotiating with the Americans to disarm the nuclear weapon technology. Gorbachev was the true man of peace.

He negotiated from a point of strength, and he negotiated to see the change in position. My condolences goes to his family, I worked with some of them in a very close quarters in the past, and to the nation of Russia. I'm sure his Soul has found its place, and passing an age of 91 this week. He brought the change on every one of us living on this planet today. No man has ever. His action effected the humanity in the 20th century than his, not even Hitler. He was one of the most gentle, peaceful man, and he was the true man of peace. If it was anybody else, but him, we would have seen much of the ?? across Western Europe, and Eastern Europe during the life of ... the Russian president, (:20). his Excellency (Mikhail Gorbachev).

Maybe the present world leaders learn from him. Maybe the present Russian head of state, and the American head of state learn from his lifestyle, that no power involved, worth more than one life to be ?? crushed, He stepped down from the Russian President with a lot of grace, within the structure of the soul of the humanity.

I would like to ask for a minute of silence for respect and honor for his life.

(Minute of silence ..) (:22).

Thank you very much, I hope a lot of you understand, one day humanity will realize what the actions of Gorbachev meant to a lot of us. And what is now the situation in Ukraine. If it was him, in his time, he would have had to keep the 15 satellite countries, and Russia together as one state, as USSR. The bloodshed we see in Ukraine today, would have happened inside Russia during his time. As the West was pushing by choosing a fake Pope, John Paul, Polish, to put pressure on him, to create a war situation, to split the nation.

He decided he would split the nation without killing. What we see in Ukraine, he foresaw, but in 15 states, and he decided, he would walk away from it. He did not let one single person to die, because of his pride, to be the president. To stay as the head of the most powerful nation on Earth at the time. (:24).

You got to realize the wisdom of this man, and understand the true man. I had the pleasure to work during communist time, with his regime. And after that with Yeltsin. And whenever I paid a visit to Moscow, to our offices there, or into Amati, I always said, I wish we would have kept Gorbachev. He should have stayed through the time of transition, but at least another 5 or 10 years, and brought the power change. A correct change, not the mayhem we saw.

Many of you don't understand this. You haven't lived there. I lived right through the separation of the USSR. Worked in some of its states, and understand, and especially in past few months, whenever I see the situation, the news from Ukraine, I always said, this is what Gorbachev walked away from.

He did not want to see the bloodshed, destruction of a nation, which he and his predecessors built. You've got to understand. Every building, every success, every agricultural success you see in Ukraine today, is because of the time of the USSR. It was a breadbasket of the Russia. And now it's become the breadbasket of the world. And he was not prepared to see, not a single Ukrainian to die. As he called it, always the greater Russia.

Now you understand how beautiful this man was. (:26). In many occasions, we came across his work. I always, I always said, the greatest man on Earth ever, is him.

He literally lived a life of exile, in his life. I followed him through, after the Russian, what we call, division. On many occasions worked in the background, met on ?? occasions, with his path, his way of work. I worked with the Russia structure when he was in power in 1980s, extensively, with the Russian army. He wanted the best, and we gave him the best. What we could get from West to have, during the Russian time of his presidency.

I saw how Yeltsin destroyed the nation, how he literally stole every piece. We had the offices near the "White House," in Moscow. And a few times I went there, I wish, I would have, I said this many times, never seen this position. If humanity ever builds a statue of peace, a man who walks away from the most powerful seat, not an ordinary

president, a nuclear power, a superpower, to become an ordinary man, not to see a bloodshed in his country. The true Nobel Prize peace is symbolic. But the true man of peace, is real, which is Gorbachev.

I hope the new generation one day will understand what he did. And what you see today, how the West deviously planned, (:28). by choosing a fake Pope, a man of no integrity, as John Paul, to become, to put pressure through Poland, on Russia, to bring the church fake, ?? that did not exist that ?? much , to become to the point where he left the position as head of state.

One day humanity will know what the West did. And in all that, as we used to be cooperating and working during the communist time, and after communist time. Many times I discussed this with the, as a very young boy in my early, late, mid 20s. I asked the Russian generals, where we had an office in ?? Poland, why doesn't he do something? Why doesn't he hold on? Doesn't he know, we are all going to be without jobs. And they became all without jobs. Most of the Russian generals under him lost their jobs. Because when he went, everything else went with him.

But symbol of peace has to be the face of Gorbachev. Hopefully, many of us as KS give from our soul to him, as I know he has achieved what he set out. The biggest gift we can give, is elevation of his soul. I hope humanity will realize one of the biggest man, of the race of the man has gone ?? ?? physical D. (:30).

Teaching starts here

The teaching of today is very much interesting, as many of you know, we are working on the transportation and transmutation (T&T). And we were targeting to start the first transmutation sometime in September and onwards. So we are coming into the testing of the what we call, the fine tuning.

It's not that everyone who goes into the system will be the same, reach the same, and do the same. We put people in the framework of the what we call, the flight zone, for different testing, for different purposes, for understanding more in what we really want to do with the situation. How and what we achieved from one to the other.

If you remember, and you go back on the past teachings I always, if you remember, if you have you been with us, over 100 people now been through the process. (:32). Somewhere between a 100 to 150 people, and we need more. Do not stop coming in to add to the knowledge. NASA and other corporations choose and select. It's your soul who has to select you to be there, to add to the knowledge of humanity for what is to come.

It's not just I'm coming there to see something, what happened. I am coming there to add to the knowledge. And every single one of you who came in, has added to our knowledge. In a way, NASA failed last Monday in launching, because of the little value. We are launching humanity into deep space, into a new dimensions. And we cannot fail, because we have already failed as a human race for millions of years, anyway.

Many of you who have been in this room, and went through the system, in one way or another, while you were in the system, or while you were around the system, have had, have explained to us, what happened to you. Did anything happen to you? At the beginning, you're all interested in chairs. What happens in Chair 1, 2, 3, became "musical chairs," who jumps in the next chair, to the next chair. You jump in there and see what comes up? Am I winning the prize.

But in fact, in over past three months of testing, we got rid of these chairs. We haven't got rid of them, they're still there. But still we use them for confirmation of the work, with these seats inside.

Many of you who've been in the system, you were asked, while you're in the system, if you want to go to the Moon, if you want to go to see your family, or uncle, your cousin, your mother, you can do so. And people, as I said, (:34). sitting there, like in the airport waiting for a flight instruction, which gate to go to.

All the time when we talk to people, when they're sitting in their Seats, they hear us. They listen to us, and they say, "yeah, can I go.." They talk to you. But when they come out, we speak to them, (we say,) "can you see us?" They say, no, but we heard you, and we followed. They hear who comes in the room and goes.

In 10 - 20% the first time they say, no reaction, nothing happens to me. But after the second, or third time, the Soul opens up. Because they want to control the physicality. I'm here, but I want to know what's happening. I want to remember everything. So the soul is not there. I'm still in charge, I increase the blood flow, and I engage it tighter.

And 20%, which is now reduced to about 5%, is those who come in, and they want to see what's happening. So in fact, the more blood is going to see the consciousness, and unconsciousness, that stops them from the trip.

So we realize that in the earlier stages, who is actually not going anywhere, are the people who want to be in control, in charge, and they want to see the physicality. They don't trust the Soul to be in charge. I want to see. I want to remember. I want to be there. And zoom, there is no way the soul is going to go (for a trip). If we were shackled with one chain, now you're shackled with 4 chains, it's not going to go anywhere. You put a dog watch, and 4 dogs on top of it.

We come to the point, that when we talk to most of the people, they listen, we ask them to go to the other unit, they move, they go to the other unit. They do all sorts of things, move everywhere. But when we ask them, says, when we give them instruction. (:36). But in a very few cases, we ask them, did you see us? They say, no, we don't see you. We just hear the instruction, we follow.

What happens in reality is that, the Soul of the Man (STM) has grown to position of engaging the physicality (P) of the man. The way you dream, you say, and then you

remember the dream, because you heard a voice, you did what it said, your physicality of you. You took where you went, whatever.

Now, the physicality hears, but it's got a leg of the soul with it. So it acts, it moves the whole caboodle of the Soul and the P with it, to the next place. In a way, you're in a balloon, but your legs are there on the floor, you walk it, but the balloon has engaged the Soul.

This was important for us to know, because in the point of the transmutation, and the process of the next few weeks. We have been very open. We show people in some cases, what has happened, what it is.

The transmutation systems are already setup to transfer you from one to another. I take them in, and I say, this is the transmutation system. But we have to understand more. What we actually do with you, is we poke you from the system into your soul. And then we transfer the energy across. For us, this effect of this balloon, this Soul expansion, that you hear us, you act, you behave, (:38). was very important to conclude and to understand.

And today, this week's testing on Tuesday, Wednesday, we targeted this. The target was to see what happens to the soul. It was me, and then we talking in the system. What we did this week, we run it a special test. Especially, the last test was that, we got these 4 people into the system at the same time. Four friends, 2 couples, and we maneuvered them, but kept 2 solid in position. We do not let 2 move. But we moved different positions in this data point.

And they were kept in the system for about an hour and a half, together. Then what we did, we asked them to take a chair, sit wherever they like. They sat, and they started talking. I said, please do not talk, very little, but just be together. Then, in a way to hold. You know like you hold the aircrafts in the air, until they are ready to land. After a few minutes, 10 or 15 minutes sitting there, they chat a bit. I could hear them in the control room, they're chatting with each other. I asked them to move to a different seat.

In a way, to hold. I put one in the STP, and one in STM, and in that formation. In a way, I kept them in the fields of the room. And then, (:40). we start, what I call, the extraction, to get them out. And to understand one by one, what is happening, and ask them when they were out, who they choose out of the three, that were left, and the two left to come out next. This was a reason we wanted to see what is happening.

When they came out, we individually spoke with them, when they came out. But if the first one was alone, the second one was with the first one, sitting next to each other. They all explained what they did, what happened, what failed, whatever. As I said, I'm not interested in your ?? , in your talks, or who you saw on the plane, or whatever, as a flight. I'm interested, how did the jet perform? How was the performance of the aircraft? In its flight time?

They could not see each other - but they could feel - proof of elevation of STM

In this process, we asked every single one of them at the end of the discussion with each one. As there were 4 of them sitting together, did you see each other? Sitting in the center. Or did you feel each other. Or did you hear each other? The answer was clear, "we did not see each other." The husband says, I could feel my wife, I hear my wife, but I knew it's her. So in a first time, a couple has met as a soul. But both be aware of the existence. What you call, a soul mate?

The beauty with this is, this was the confirmation, that the technology of the space travel is 100% correct. (:42). That we expand the STM, and how man will see in the space. This was more or less the beauty, the crown, the jewel in the crown of the testing of past three, four months you've been with us. The beauty of how the two on this side behave, in respect to the two on this side. And concluding, confirming the beauty, the what I call, absolute perfection in the whole structure, that we managed to carry 4 souls together. But not in the dimension (D) of physicality.

This is important for us, that what was interesting, is that the environment of the flight room is what it's supposed to be. We have managed to create a flight system inside the room, not inside the system. Because when they walked out of the system, they should have lost that, what I call, the strength of the field of the soul, and they should have seen each other, (because) they were in an open room.

When you go for lunch, or a dinner, or meeting, or see your family, you see each other. You don't sit in a capsule. But this condition, this situation confirmed to the Keshe Foundation and our research team, that for the first time we can completely confirm, (:44). that we have managed to elevate the STM, to free the STM, that man feels the other, recognizes the other, exactly the way you do in your dream. And he, with it acts, a listens, and does.

So the encagement of the physicality for us, and to the whole structure of the testing, is confirmed. This will have a lot of implications and application in the coming weeks and months for the Keshe Foundation. It means, if we can do this in a satellite scale, anybody can move anywhere, at any time, as they wish. Once we encircle the field energies of this planet. Freedom of One Nation, openness into everything, and understanding the technology of the Creation

I need 10 volunteers today. It doesn't matter if you've been there. For a special test to come in. Go on the website and sign yourself in and put "a special." We know the Souls, which will do this. Doesn't matter if you've been there before or not. This is another test the way we did with Rick some weeks ago. Go on the website, now, (:46). any of you, and book in for the flight, special flight test. It's a Mobile test.

Then we'll show you what this means. We'll show you what is going to happen. The test yesterday, and Tuesday has brought us such an advancement in the technology, that we

should be able to bring transmutation, if everything understood completely before Christmas.

In understanding this, we can bring a lot of changes. The speed, from now on the way we go, depends on the participation of the Knowledge Seekers around the world with us. Not on daily basis, on hourly basis. It's now all of us, who has to push this through, and the implication of this is huge.

The application and completion of this phase within next week is paramount to the work of our flight system, in next few months. (:48). We'll call upon you and your soul to join us for the change. We want to increase this 4 in this room, to 10 people, to 20 people around the world within the next few days.

We want to complete this rapidly. Because after next week a new system will be installed. And before we install that, we want to complete this process. Maybe even by Friday. Maybe even by Monday. We will like to be able to establish the first "Satellite Souls," which will behave like these systems for us in the structure. We want to, not to bring you in, we want to structure, the structure of the satellites through the Souls. In a way, make a house out of this planet, and see how we successfully do.

Next week work of the Keshe Foundation is the final week before we go into flight mode. We call you 10 or 20 people to be present during the testing, which means, (:50). we extend our system beyond the what we call, the boundaries of the flight system. You as your souls, become that satellite system.

You will not need to move. You will not be transmuted. But you'll start. We'll tell you what to do. And when you put in a special system. In a way you become part of the Universal Community. In a way you'll be connected to Universal Council. Because this is the extension as part of. Today, we have Universal Council supporters who work as a supporter to Peter. Now we get the Universal Council supporters by the soul. This is important to me. It's important to the structure, to see, we can use the Soul of the Man who chosen to be, to be as part of this system.

Man launches satellites into space to spread the communication. The work of the Universal Community uses the soul, the energy of the fields of what we call, the structures.

Yesterday test was an amazing achievement, it was amazing to understand it, and to see it. When I told you, go back into the teaching. When you meet another creature from the universe, you don't see them, you feel them, their colors, the information they give you in the level of the Soul, tells you if it is the wife, or the friend. If I am food, or have I received the food, I was thinking as a human. Am I in danger? Am I given knowledge? (:52). Am I given everything else? I do not see?

For the first time we've proven. You call it, the third eye? The third is the STM, the working of the STM. Would you be able to expand this, in what we've seen yesterday and this week in the center.

On Tuesday, the last test was again a couple. An extremely beautiful, a couple from Austria. And it was amazing how this couple were connected. We asked them, where would you like to go? She said, I want to go to Barcelona. I said to the man, where do you want to go? He said, I want to go, I want to go to New York. We let them loose in the two machines. I changed them from one to another, as part of the same test, because it's part of the process.

When they went, whatever they wanted to do, still in the machines. I usually don't speak open to them. I said to them, talk to each other while you're in that system and decide where both of you want to go. And I left the room. When they came out, I asked normal questions for understanding the expansion of the soul. And both explain what happened to them, what journey they took. I asked them what happened, (:54). When I told you, you can talk to each other and decide where you want to go. She said I wanted to go home, and I asked him to come home with me. And they both experience to go home together. They both went to the house and they enjoyed the house.

It was very strange for them, that they met in their home in the level of the Soul. And they enjoyed it immensely, both of them. The important part of this test for us was, even during the flight, you can talk to each other. We can send people together, as we do with the aircrafts. Now with the agreement of the soul. And strange enough, he didn't go with her to Barcelona. And strange enough, she didn't go with him to New York, because I asked them, they can travel together. I put them on the same system, back end and in the front, and I put them in separately.

The important thing for us was that, the both couple were in the system, and at the time. In a way, if, as a family, you decide to go on a holiday, to a destination, you all will go together, and you all will enjoy it. And then if you totally decide as a family, to manifest the dimension of physicality, you will manifest in D of P. (:56).

The true universal space travel in the dimension of Soul has been established. There's no doubt it's going to be there. The pleasure the couple had on their face, that they went home together. Because she decided, and he agreed to go, is an amazing experience and development in technology.

The same with the 4 people who went through the system yesterday, that they could feel each other in the level of the Soul. And they could be with each other in the level of the soul, and not see each other's P. And when I asked the couple on Tuesday, did you see each other? They said no, you're so beautiful, it was so peaceful. The lady spoke of the headache, because she would not get this round her head.

Now, what we want to do, is to get as many of you into become, that satellite beam, or point, for all of you across this planet. The more we establish in the next day or two, the

better we should be able to connect. But be prepared to be available next Tuesday, Wednesday between 10 and six o'clock in the afternoon. 10 in the morning till six o'clock in Central European time.

We take two days of your life. But we expand, we test, before we test for transmutation. In a way, (:58). you are on a test seat for 12 or 14 hours next week. Then we want to understand. We mark you on the map, and we want to understand, who, in which way we can satellite in different directions and D.

You've got to realize the progressive development today, is what we collectively as a race will achieve, and collectively what we do together, in Totality with each other and we see how, we collectively work.

I just received a message from Keshe Foundation team, preparing this for next week. I'll read it to you, very simple. It says, we are at the system at Uno, now to prepare the cables for new control, that you will become part of. Our team, our development team in Uno, now installing this system. Our development team has understood the concept of the technology, and is amazing. (1:00). One is KS, 2 is a Knowledge Seekers of the old time, and the rest are ordinary men from different corners of this planet. It's not us. It's all of us irrespective of color, race, and religion who is developing it.

It is part of what we can support. Let me explain to you why we suddenly stopped pushing for this very rapidly. Read the news, by order of his Excellency, the Russian president, Mr. Putin, the Northern line gas to Germany is fully cut off, as of this week. It's like cutting a gas to your home in the winter, and ask you to survive. No cooking gas, no electricity. You look at the bills, which are received in the western world by the homeowners and the businesses. Increase up to 5 to 7 times by Christmas. But this will not solve the problem. If the cut off comes to March next year, the tanks will be empty.

The negotiation with Iran is pushing faster, trying to get as much gas out of Iran, by bending every direction. To the extent that, for the first time the President of United States refuses to speak to Israeli Prime Minister this week. (1:02). Trying to get the West out of the mess, which is done.

But one thing which I see and I have explained, is that Iran is a close ally of Russia. You got to understand a 5th of the states of Russia, till early last century, was Iranian. That's why we have a close tie. Tajikistan, Uzbekistan, Tokistan, - "Stan," means state of Iran, it does not exist in the Russian language. The Iran has close ties with Russia, culturally, blood wise and the rest. Iran will not break the syndicate. Iran ?? just plays. But what's it going to bring, is very simple. Shortage of power, energy in the West.

As I explained to one of our nearest Knowledge Seekers yesterday while we were waiting for the tests, is a few years ago, we saw the "Spring Uprising," which was planned by the British and carried out in, and started with 20 Italians in North Africa. And then we saw how Syria, and the rest got involved with it. Or the Kings gave the kingdom, control of, to the west. And they stayed as presidents, and a king.

Every president you see in Northern Africa, (1:04). still in the position and the kingdom, they paid the bribe to the Vatican. They're not there just because. Otherwise, they would have had the same destination, and destiny as Syria, and what we saw with the other state. You thought a spring uprising was just in two nations, the rest pay the bribe, what that Vatican asked, and they paid. Kings, and kingdoms, and presidents in other states of Northern Africa, now they pay a ransom to Vatican to stay in power. The Spring Uprising of the what we call, North Africa will become the "Winter Uprising" in Europe with a shortage of gases, and energy, and the prices of the food.

We had refugees from these countries. How many of you have seen the Syrians and others, across, past two decades into Europe? Now the Europeans become refugees, as they'll find the immigrants as a point of weakness to blame for, and then, themselves. And if the gas lines are not opened, the mayhem will be very deep. Keshe Foundation can produce several 100 maybe a few thousand power generators.

But we can make your souls to become refugees and other positions, which is warm, (1:06). during the wintertime. Immigration by the STM, now is an option. And then, would the other ?? nation accept it. I am not a dreamer, I am realistic? And it's a card on the table. And we have to explore every possibility.

How would we accommodate the refugees who came to Europe, to refuge now the Europeans, due to lack of the energy, see them as the enemy. And then, them, themselves running out of the energy of themselves.

It will take five to 10 years to replace any supply from Russia, and other points. Escalation in the prices will get worse. Saudis have bent backwards to stop Iran, to bring a power supply for them, to push the prices higher, that they can control. They have befriended Qatar, who is the sharer of the Iran gas reserves in the Persian Gulf.

Proofed to HERE >>

The politics and geopolitics will play mayehm on us, if we do not finish this transmutation system, that you registered your soul to be in the work. You register your soul to be the satellite. You will pass, you open a passage for millions of European Knowledge Seekers who understood the technology, and take refuge in New Zealand, in Australia, and America, to run away from the mayhem in Europe to come.

This is not a fear mongering. (1:08). This is what the foreign ministers, the ministers of the national security in France, in Germany, and some other states, have already warned us in public. As one nation One Planet, One Race it's our responsibility to look after our German friends. Germans have been devotedly, and heavily supported this project, and the reason for it is very simple. The race is aware of the hardship to come.

I hope we do not get to that point. But as a scientific organization we should be able to transmute millions of souls out of harm. Be it the refugees, who again have to move,

become refugees somewhere else, that no one knows where. Or are the Europeans who have no food, no heating, and what do they say to their children. Now you understand the importance of the test yesterday in Enhancement Center.

The more Satellite Souls register as a "special soul." Do it today, not tomorrow. Do it now, not next week, I'll think about it. The faster we can bring this satellite position. We tested the satellite position through Rick's teaching a few weeks ago. Then we can transmute. We can test to bring this about. Europeans have not been refugees since the Second World War, and a lot of the rich ones are already buying their tickets to the other countries for winter holidays away from the energy crisis, which might come up in Europe and will not be there. (1:10). What about the rest?

We got used to Corona, working from home. What do we do when the home is not heated, and it's got the Corona of the energy. And if Corona hits us, the way we have seen it in the past two years, the combination will be literally hot.

So now you understand why we are doing this test. Now you understand why I'm asking you to join us today. Not, tomorrow. I might take up the position tomorrow or Friday. And test we do. When you make that registration. Make sure you put a "special case," which means your soul has chosen you, to be the satellite connection. The same, the machines are in the room. The space of the room has become, where the souls see each other, but the physicality is not there.

We are pushed to the new dimension. And we have the technology. As I always said, mankind will accept my technology, the technology of the Creation and the Creator, not out of the love, but out of the demise of itself.

You got to understand, if you live in different parts of the world, where the gas from Russia has no effect. You're responsible for the souls of those who will be effected by this. As a scientist, I will have everything in my home. I am comfortable, thank you very much. (1:12).

As the Keshe Foundation team, as it hits us, every member of the Keshe Foundation working team will receive generator and gas supply directly, freely from the foundation. It's our obligation to our team. I will not let, not a single to suffer. It's the responsibility of you to decide, in what is going to happen. If you are a German. If you are French, if you are New Zealander, or if you're Australian or you're a Chinese, you have to understand, the time has come for man, through his own mistakes, to move by force, to the next level of peace and understanding.

We are not used to refugees from Europe, except the Jews in the Second World War. Now we have to accept this situation of economical, gas, refugees, which is on us. It's not, it's going to happen. 2 more gas lines into the West go dismantled. West does not have the energy to burn.

It will come to two points, the production of the Gas units, the way we are introducing, will become obligatory by demand, by need. As I said, nationalize it, the technology belongs to everyone. Or we go through the transmutation, we jump the physicality dimension of limitation

Those of you who understand the immensity of what is on top of us, (1:14). will understand we have entered the "Third World War," the Silent Way, through economical war, without a bullet to be shot. You got to understand the leadership of Russia already knew this will come, when they set it up.

The beauty of it is, you cannot bomb Russia to open their gas, because you bomb your own pipelines. The destruction will be worse. As I said the bending of the church in Moscow, is the same as Mrs. Thatcher said, women are not for bending, or turning. Russia will not turn. And the screw will be tighter and tighter, because the Central Bank of Europe in Berlin, controls the assets, and hold the assets of the Vatican. Now you understand.

We need you to be. We need to be part of, and that's why maybe, you became Knowledge Seekers. Assessment of the Totality. Assessment of reality is, what is with us. We need this to be done. We need this to be ready. If it comes, when it comes, to be able to lift millions of Europeans into other destination, even on the soul level, that they do not suffer. Exactly what Gorbachev did. (1:16).

Presidential being in the point of comfort in Australia, or New Zealand, or in South America, or in US, is not worth the suffering of one person in Western Europe. And we have the technology. We have tested technology. Now you understand why everything is coming to, in the right time, and the right place. A war without a bullet is this. And the economical war and the food control is the worst part.

Keshe Foundation and where we all live in Austria, 20 odd of us, and others we are safe. We'll hand over the systems to our Knowledge Seekers to be safe, no shortage. But the biggest problem is, 80% of us, are immigrants in Austria. Now you can see this game. You have seen the price rises in gas, and energy supply, and the fuel, and the food. And the others are playing a bigger game with many people's lives.

I remember Dr. Ellya Kastova saying, when it comes to save this planet, you have to take all the souls. She was aware of our power and what we do. She said many times, you can't leave the children behind, you have to take everything. And I said, no one will be left to suffer. (1:18). The immigration of the man is not from this planet. Immigration of Man's soul, is from the man himself, on this planet.

In next seven days, it'll be hectic for Knowledge Seekers, those of you who have offered us, on a special basis, to use the strength of your soul for transmutation, and understanding how we can work it, to create that passage. In a way, I said to the Knowledge Seekers, Knowledge Seekers who come to this point, they become like Schindler, who created a passage for the Jews, thousands of them, through fake passports.

Now you do it as Schindler did, through their own dimension of soul strength ?? I hope we don't see more hardship. I hope we see resolution to this matter. But if not, we have to be ready. And to be sincere, I don't see resolution. Because I know the time for change has come, and it had to come this way.

It had to come through technology, which is not on theology, but in fact of working for man to understand the strength of his Soul, and the purpose of his creation.

In the next week tests in the center, you as Knowledge Seekers will be with us throughout the tests. Those of you who go through the special registration today, or tomorrow. The systems are set for transmutation. Hopefully, as our team says, they're installing it. (1:20). Everything by will of the decision of the soul, and understanding of the humanity, is getting ready for that test, for that change.

Maybe those of you who couldn't come to Austria, now you understand why. You have to stay where you are. And maybe that soul is there to create that change. That change for all of us. It's vital, it's paramount for all of us to be able to complete this process.

We've seen men for centuries going from one nation as a refugee to another. Now we will see that refugees of souls. And then it depends, if they want to manifest themselves, and become part of the society, and not the energies. This is the reality of the time, and place in it's what we kept.

In a way, the passing of Gorbachev could not be more timely, a man of peace, who tried to keep his nation, in a way, away from the destruction of itself, as we see now in Ukraine. But this will come to us as a humanity, as some of us, with a taste of power will like to prove we are more powerful.

In the dimension of understanding. In the D of the division of the fields of this planet, we have the knowledge, and in the coming weeks, as we add to it, we create this Satellite position with all of you who are within the structure of the Keshe Foundation. (1:22). It's your responsibility. Maybe that's why you became KS.

We'll go for a break and we come back, and we'll answer any of your questions, but today you understood the change. You have the Knowledge Seekers, who've been through it, to see the change. I hope, I hope we're on time to do what we want to do, before mayhem hits many of us to come.

As one of the Knowledge Seekers sent me an electricity bill, and as you see in the British way, every month, they're going to increase your gas prices, higher and higher. By January the choice is the heat to freeze, or the food to eat, for me, for you, and for every child in the house? As an ice cream man said in Italy, last year I was paying 900, this year I'm paying 3,000. Where am I going sell the ice cream? There is no electricity to hold it together. I cannot pay for it.

Let's see if we can pay for us as a human race, to bring that change. As I said, my technology will be accepted out of the fear of demise, not out of its beauty. But when it does, its beautiful will show itself. Rick take a short break and come back and we'll see what we can do. (1:24).

<< **BREAK** >>> 448 KSW September 1, 2022 (1:29).

R: Here we are back again at the 448 Knowledge Seekers Workshop here on Thursday, September 1 2022. First, I can begin by saying there's a number of comments as tributes to Mikhail Gorbachev. Antonio says, "he is a hero to me and many others, a man who served his people and the world." And there is another couple of comments in the YouTube as well. Truly 777 Paulina says, "truly a great man of peace, God bless Mikhail Gorbachev." And Jefferson says, (1:30). good morning, everyone. Good evening. We lift the soul of Mr. Mikhail Gorbachev and we thank you for your fight for peace and harmony and so on. So just want to say that before we begin here

K- Yes, we are ready, willing and able, I hope. It's a beauty of understanding the work of Gorbachev. I, like many people in my age bracket were touched and lived through this change. When you saw the Berlin Wall coming down, when East Germany opened up, when the other countries opened up. Everything was because of decision of one man. Germany is united today because of his decision, not to fight, not to open a bullet.

And all the people who did that, all the generals were against him. I remember clearly, we had an office in northern Holland at that time in 1980's. Those of you who are Dutch know exactly where this little village is, this little town is. (1:32). Our offices were in the beautiful place, it was like in a small village center square in the "Dog" statue is Dutch. Because we frequently went there to our offices once or twice a week, sometimes. We got to know the locals. I was told that, what this village is known for. This village, somebody in the village killed one of Hitler's officers. And the rest of the village was not prepared to divulge who this man was, because they were there to get rid of the Germans. They knew a man has carried out this atrocity, or they assumed that it was done by a man.

Hitler, doing what his ancestors background did centuries ago. He killed every male creature in this community, man, dog, cat. To set an example, to force the villagers to tell who it was, because many, killed, all the man, children, boys, all were killed. To set an example.

The strangest thing is, in this offices we worked, we worked with the Russian channels, the Russian military, with Eastern Bloc military. (1:34). Our counterparts were Romanian, Bulgarians, Russians, powerful generals, where we supplied the western goods on the barter basis to the Eastern Bloc. Some of my work is, I always said we took a big risks. What we did, we, the Russians, and the Bulgarians and the Eastern Bloc team working with us, wanted to. There was a time when Russians were asking for, especially elite Russians wanted western goods. Russia would not pay, there was no currency, but they had food. We used to take 330,000 jars of jam, and other things, per week out of Russia and Eastern Bloc, and give them what was the luxury items in the West.

That time was Levi's 501, toiletries, toilet seats, bathroom luxuries, which we had in the West. Special things which they wanted to give. You can imagine, 11 containers a week in the old Eastern trucks. If you remember trucks going from the East, they were pumping and puffing, all the way into England, and taking back, what was agreed to be given back. (1:36). Electrical goods, luxury items. So, I worked very closely. European operation was through my companies. I came very close with this structure of the Communist.

I could see when the turning point came. How the generals and military people we worked with were disappointed. They saw it as that, the Gorbachev sold them out. But Gorbachev had a wisdom, of not seeing what happen in Ukraine today, 30 years ago. I went through the change, I went to the poverty stricken, Russian satellites countries. The trucks, and things, and the carpets, which rolled out of Europe into Russia, Romania, Bulgaria, all the broken cars, damaged cars, which was not worth running, were getting trucked back into East, to give them the car, because they have no car.

Today, in Austria, when we look at the Ukrainians who are coming here as refugees, we see the most latest cars, Porsches, BMWs, Mercedes, ?? and the rest. Half a million, quarter million (dollar) cars. That time, they used to buy the cars for 200 - 300 (currency) crashed up, burned up. No insurance company allowed it to be (means the car was totaled out - no good). They took it back to Ukraine and the others to weld it, to mend it, to glue it together, that they could have something as similar as was the West. Now they ?? reached that ??.

We see the change. As my great grandmother used to say, (1:38). "with my little eyes, I've seen big things." We were pulled into bringing goods, anything from the East communist countries to be able to put things back, food back into the West, into the East countries. Hundreds of thousands of buckets, changing tanks to pianos, and the rest of it. It was part of this work. Part of the work of Gorbachev.

I can write a history book of the change of revolution from ?? to industrialists. As a businessman who was part of this change. I walked on the human shopping streets in Moscow, in Romania, in Kazakhstan, and Uzbekistan. Where people used to hold one pair of shoes, one shirt on a hanger, whole day, on the streets. Hundreds and thousands of them next to each other, that somebody might buy that shoe, or somebody might buy that shirt. They could give it back to the wholesaler, to have something to eat.

We used to call it "human shop." They had no money to. I walked through the change of the time. In Bucharest I walked into a shoe shop. I witnessed a woman walking in with a shoebox full of money to give to the shopkeeper to buy a pair of shoes. Shoebox of papers, ?? instead of shoebox of a pair of shoes.

It all came because of Gorbachev. Lenin brought a new system, Gorbachev reversed the system. But, Lenin brought with a lot of hardship. (1:40). But Gorbachev brought with not a single bullet shot.

I respected him. In many of the talks I give internationally, I always saluted his courage. I was in Moscow when the Yeltsin, put the tank bullet into the parliament, into the "White House." I've seen the bullets through the hotel room and the mayhem which went in Moscow for the power. But in essence what we see, the problem of today with the gas, what we see with the Ukraine, is what Gorbachev walked away from.

We go back to questions, if there are any questions, please.

Q: Dimitri .. I've got a list of questions. But many of them, if not all of them, can be answered with a yes or no answer, to get through them quickly to allow other people to ask questions, or for you to share any more knowledge, if that's okay. (1:42).

R: Well, we usually restrict about two questions. But it's up to Mr. Keshe, whether he wants to do with that.

K- We answer the same two questions, don't go any further. Otherwise it will be all a one man show.

Q: Two questions. Just bear with me one second. All right, I'll ask the first question. I'll ask the others another time. The first question is related to what you've been discussing this morning. So the question is, can a Knowledge Seekers participate in being .. to help humanity with.

K- In being what? In being what?

Q: In being a Satellite, as you mentioned earlier, in this workshop?

K- Yes, that's why we are asking you. Go there, and register and do it.

Q: But the question is, is it possible for Knowledge Seekers to participate and be a Satellite, even if we don't have any money? I understand the Keshe Foundation needs money.

K- No, no, no, no, it's got nothing to do with the money. We put it up for people to register through it. We get thousands of people just "time wasters." We had a guy who actually came two weeks ago to Linz, forcing us, trying to force us to let him in, because he's a Knowledge Seekers into our factories, and the rest. And it's his right. We had to even tell the hotel people to put him out. He cannot .. Get the police of Austria involved with maybe. We have a reason we do it this way. You have to understand, we have a structure, we structured things in certain way. (1:44). It's nothing to do with the financial way.

Q: Okay. So with that in mind, can I, I briefly looked on the link that was put up. And at the bottom of that page, it has a fee to pay. So even if I don't have that money to pay, can I register to be a Satellite to help with what's coming?

K- Yes, but we look at everything as it is. We are going to get thousands of people wanting to be Satellites.

The reason we are doing it is a special reason. We're going to link you up with telephone lines. It's not going to be. We're going to get a thousand people to want to be the Satellite. We are doing it especially for a special purpose.

We have a lot of time wasters. We have a bunch of crooks in Belgium and the rest of the Europe. We are monitoring a lot of things, you understand? It's not just, I want to be a satellite, and the rest of it. Even if you pay we refund you, if we don't agree with it. You understand? So, it's nothing to do with that side. It's something we want to manage to control and test. It's not economical, it's being able to do the job, the way we want to do it, and achieved what we have achieved.

Q: Yes, I understand. Thank you very much for that.

K- Thank you very much, thank you very much.

Q: I'll be reading my last question. My second question is, one elevated and taking care of the Totality within its magnetosphere?

K- Pardon, can you repeat?

Q: Yes. Once elevated and (1:46). taking care of the Totality within its magnetosphere, will the STM process and transmute irregular physicality conditions, (i.e. abnormal muscle growth due to injuries that were never attended to)?

K- That depends totally on the Soul itself, not on us. Why did you, what was the purpose? Why did it happen, injuries, or illness or whatever? Why did the Soul accept such a position?

And (do) you want to go to the system, and get away from what you've done wrong? You've got to understand, you can cheat every system, but not this one. Because your Soul is a witness.

Q: The injury came from weight training,

K- It doesn't (matter). It's irrelevant. That is irrelevant. You have to do it yourself.

Q: Alright, thank you very much for answering my questions today.

Q: .. Mr. Keshe, you must be aware that is not Russia and Gas ?? that it's not delivering, it's our government in Germany boycotting the Russian gas, driving prices into insanity. And as always, the Globalists in America profit, as we are now even buying American fracking gas for insane prices. (1:48). And that is supposed to be a green government we have. I mean, it's obvious the real problem is the general suppression of new technologies. But, it is not right, if you keep saying that Russia is responsible for

Germany not having gas. It's our own government moved like puppets on strings following an American Globalist agenda, without regard for the suffering of their own people.

K- Let me. I comment on that in a very simple way. Absolutely simple way. Ukraine is the reason for this position, and Germany wants to stand on the "Free, what we call, Europe." The speed that Ukraine was allowed to join EU, and become part of it in the past few months. Bypassing a lot of other things, and a couple of other Western Blocs, Western countries.

It's partially what you say is correct. But, partially you have to understand, that it's not much for, what you call it, for Germany to turn back and say, "no, we don't do." We'll pay in rubles. It's a power play. You've got to realize, you work on different understanding of different things. We work on understanding of, a totally different global condition. It was not.

The Central Bank of Europe sits in Berlin. Berlin sneezes, the whole of Europe catches cold. That's why Russia has targeted Germany. (1:50). You decided to transfer all your gold reserves, as Europeans, as an EU currency, into Berlin in 2000, prior to 2000. Germans are targeted because they are the central position of Europe. Nothing to do with you.

Germany went through the Second World War, to take control of Europe. When it failed, they set up the EU, European Community. If you look at the Second World War, as Germans, what did Hitler do? Directly went from one Central Bank to another. He drove all the way to Amsterdam, Amsterdam to Brussels, Brussels to Paris, into the Central Banks. Exactly what the British did in North Africa, a few years ago.

When depleting the reserves of the European nations, which Hitler took, taking all of it back into Switzerland, making guns and the rest of it. It didn't work with the gun policy. Now, economical policy, which was the main reason, was there.

And what's the position with EU? If you accept Euro as a currency? In 1990's, you transferred your gold reserve to Berlin, exactly what Hitler did. But this time you did willingly.

So, when you look, it's nothing to do with your government. It has everything to do with the German government. You took over Europe, (1:52). made the EU, and made the Central Bank in Berlin, exactly how it was in 1940's. Now you are the decision makers.

The other side of the coin is, why Russia is pushing to be paid in Rubles. Because now the BRICS is putting pressure on it, it's not just Russia, China is sitting behind it. It's a multitude of positions, and German government, over work in past 40 years, has ?? spoke themselves as a central government, to win that position. You say the central operation of the EU is Brussels. Brussels has no teeth, if Berlin doesn't pay any money out.

I hope you understand exactly what I'm talking about. It's nothing to do. It's targeting the heart of the operation by the Russians. Secondly, it came, it would've come. In a way, Ukraine is an excuse. They would have found another way to come in. Vatican pushed with it and ?? now it has come.

Look at the situation globally, not just the German situation. You as Germans, we always respected you, we always admired the way you work. But, now you have to see how you've been targeted. Microchips, all the Chips in your cars, now they control the economy of the biggest industry, which is majority of your income. Mercedes, BMW, Volkswagen, Audi and the rest, are limited in production, because they're not receiving enough Chips through the Chinese operation, Taiwan and the rest of it. (1:54). Taiwanese cannot produce the chips, if the Chinese don't supply it.

It's not just oil or gas, which are under pressure. Growth of Western Europe has come to a stagnation, clamping down, to bring down the BRICS and dollars.

In a way, hidden power of communists, in a liberal way is pushing its muscle.

Look at the whole structure. German government has no, what I call, teeth to bite, because you don't have the raw materials. You are a big industrial country, in Western Europe, with all the natural resources sitting outside the continent. Now they're using that natural resource base on their strength, to bring pressure on the whole of Europe. Europe is only .. 10%, less, than world population.

When we offer this alternative gas production to the Germans, and the Austrians, and the rest, they are not interested, because they know it's too late. You can't patch it up. The story comes, what's going happen after Christmas, when there's a shortage of energy. (1:56). Massive shortage of energy.

As I said, I'm Iranian. I get a flight, I land in Tehran, how much gas do you want me? Go on the internet, we were just checking in because of the gas prices, the units we are putting out. The price of a gas, I think, it's less than one cent in Tehran, you can buy.

It's the structure we set up. You've got to realize. I was just sent by one of our Knowledge Seekers, that the Americans have taken over the Russian oil, and a little one says, the head of Lukoil was found, thrown out of the window in the hospital today.

I worked with Lukoil, I worked with Transneft, I know exactly how they operate. I know the top management of the Lukoil and Transneft, I worked with these people. I know their mentality. I know what they plan. The global condition to be superpower has not stopped these people. Before was nuclear, now it's oil and gas.

We'll see the resolution to Iranian situation in next few days. Everything is agreed. But, would that solve the problem. Where do the gas tankers come to take all the gases? Where does rest comes from? (1:58). You see, everybody is befriending everybody to benefit by themselves, in one way or another. How do we see, how do we understand it.

It's not telling you Germans, no. You decided to become the head of what we call, European market, in political and the others. Now you stand at the head, to take, as Nixon said, "the buck stops here." Buck stops with Germany and how you will respond. You are going to be much more cuts will come to Germany. It's not just this, your chips ?? , They planned it for you before. Why Mercedes went to two days working last year? There's not enough chips. If you go to any car company in Europe, before you used to rent a car for two or three months, they won't let you rent a car for more than a month. Because they're not getting enough cars from the car manufacturers in Europe, and they try to give the Japanese cars. Because Europe cannot, manufacturers cannot produce enough cars, they don't have enough chips.

Through economical restrictions and sanctions you shut out the Russian gas, see what they are doing with you, with the rare earth materials, and chemicals, and the pharmaceuticals, which is coming one after another. Europe has been put under pressure, because the Americans is ?? quick.

It's not that you buy gas from Americans at the same price, (2:00) everybody's trying, everybody's getting benefits by this war. Amazingly they're getting benefited, there's a lot of profit in it for those, for these few bullets, few tanks in Ukraine, has a bigger plan behind it for superpowers. You ask our Chinese, have the prices of food tripled, quadrupled in China. As the food has reached beyond the reach of the Chinese. Maybe few luxury items, but the rest, no. China absorbs it.

It's not blaming, it's understanding. It's the main point of what has come, what is the next, next pressure on the Western Europe will be the food. But you have to wait for that one, till next September, October, then you'll understand how bad it's going to be. Have you asked yourself why tomatoes are getting so expensive, which is in ?? the diet in western Europe, from like 99 cents to 3.99, 4.99, to 7.99 Euros. Most of the tomato growers in greenhouses use gas to plant, to create the CO2 to grow, and now the gas is expensive. That's why your tomatoes are expensive, and the rest.

Any other question? (2:02).

R: It's kind of ironic, they're trying to get rid of the CO2, and half the world, in the other half needs it to grow the plants.

K- When we started this Keshe Foundation Technology, near Antwerp, there was a tomato grower, who got to know about our Technology, and became a Knowledge Seekers. He invited me many times to his place, and he showed me how he has bought gas burners inside the greenhouses he had, to grow. He had to burn gas to create CO2 for tomatoes to grow. He wanted us at that time, to give him a technology that they can replace this, because it was costing too much for gas. That's how I know.

With the trials we've done in different things we learned a lot. I remember speaking to one of the world leaders years ago, he said, you know something. I said what? He said,

people ask us how we know about everything, he said, because I'm on the top, everything comes here and I have to see it, and I learn everything. Because then if I learn. If I don't know, I cannot make a decision. It is the same way with the Keshe Foundation. Everything tested on, this done, that done with people, with knowledge seekers with us comes up and we see it, we have a very broad spectrum of the knowledge about everything. So, you see it, it has happened.

Going back into work with Transneft and Lukoil. I've said that many times, I think the documents are still somewhere, if it is not stolen. I am only person we know, I was told, and we know, (2:04). that carry oil contracts in personal name, not company name. With that, I had to deal with Lukoil, with that I had to deal with Trans Naf. I know these companies, to get allocations, to get shipments, to get export licenses out of different positions, to ship through canals. I have huge experiences. Limitation of knowledge is not what was just said. If one day we find the documents we'll show you. You usually buy oil in the name of corporations. I was wealthy enough to carry oil contracts in personal name, I used to buy oil in my name. All the documents contracts are there. I know, I used to know the heads of Lukoil. I met them many times at two, three o'clock in the morning, and TransNaf in the Austrian Hotel in Armati, that was where we used to decide for allocation. These allocations came Russian pipeline, bringing all the Siberian and the mixed oil had to be given by Lukoil from Moscow, how much you could export out of Kazakhstan. They control the economy of the Kazakhstan by the pipeline, and I used to be part of it. When you work with the military leaders, before the revolution, before opening, these people became the next leaders, and we carried on the same friendship.

Any other question? (2:06).

Q: .. it has 7 parts .. I am studying here, but a conceptual doubt came up and I don't know if someone could give me a guideline. The question is, what would deep space be? And for not knowing what it is, I ask, 2- where is it located? 3- How would it be accessed? 4- And what is it in? 5- What is its importance? 6- What does the process of transmutation have to do with it? 7- How does the transmutation allow me to access it? These are all the questions about Deep Space.

K- Cosmologically deep space, we consider anything beyond Solar System, and beyond the Milky Way. It's deep enough. In a way, the distance is far enough. Forget about other galaxies and, what I call, deep space. But anything beyond our Solar System and our Galaxies considered as big as you call it, deep space. The way you live in Brazil, you want to see, to go to America, you decide how far and where you want to go, and ?? Russia. Are you interested to go or not? (2:08). We put many people in the flight systems and they say, we don't want to go anywhere, we just want to be here, and we want to go see an uncle down the road who passed 10 years ago. So, not everybody wants to go, but now the knowledge and the facilities is there for you, if you want to.

Any other question?

Q: ... What should we do with the Five Cups and Universe Cup Gans's? Should they be harvested to produce plasma waters? You said, that the Five Cups, if placed in a hospital would end almost all diseases, and that the Cup of the Universe would also be the Cup of Youth. So, can we make dynamic reactors with the Gans's of these Cups? And if so, what would be the effects?

K- Yes, you can do any combination, anything you'd like to do. That's not a problem. You decide what you want to add to it. The Five Cups, the Cup of Universe is a combination of understanding the Totality of the Creation, it's not just a cup you put in there.

The Five Cup is the man itself. What do you want to do with the man? Those of you who came to original Exhibition Center, in Design Center in Linz, were given an opportunity to go in the structure with the Cup of Life, with the Five stackers. (2:10). People could feel it, but it wasn't done the way it should have been done. But, people used to go in the center and feel it, because you create a dynamic flow between you and the structures. I think there were three of them stacked up and they were connected.

You will see in the, more or less the vertical operation of the system in the coming weeks, in Linz. Two vertical units are commissioned, and are under construction now. That will do a lot of things which the, what you call, the flight enhancement unit is supposed to do. In a more compact, more powerful way, it's set to be done.

We create that dynamism of the different stacks of the fields. Not that it is the same, it depends how you use it, how you understand it, and how you apply it. One of the things which we'll go back to is, (2:12). understanding in how the position will come in applying these Gans's. It doesn't matter if you apply it in a Gans water, you apply it in a dynamic system, you apply it in a gas system, or a liquid system. How we see it will come.

There is something I have to explain. We are trying, hopefully next Thursday, if we succeed, our team are working on it. I know they're capable. Next Thursday will be a Blueprint Day. We'll try, it depends if all the parts and all the things come together. Even though we are supposed to show and release the combined gas energy unit, by January of this year. We have brought the process forward that, we might show it as a Blueprint Day, next week. It could be next Thursday, could be next Friday, could be the following week after it. But, we try to bring, not only that Enhancement Unit, what we talked about this morning. The energy unit to show the combined five kilowatts energy unit and, what we call, the Gas production unit is in the process of getting completely done. We brought it up by three months, as fast as we could to complete it, that we can go for mass production, that we can be by September, October into production. But once, if everything which was planned for next two or three months brought up forward now, next week we will show the combined gas and energy unit. (2:14).

It only comes by who books first, who receives first the order for a large quantity, past few days. We've said to them very clearly, "who pays," orders don't count. This will be

available. If we can go into mass production, depending on the supplies, we'll deliver in September, October. But, we will show it first in the next coming days, that you can see what we're trying to do to run a cooker, that you can see you can cook with the gas with the same machine gives you electric cooker on the other side, and the lights, and the heating and five kilowatts is enough for a house.

So, if our team manages to complete it. We've been pushing it to bring it forward by at least two to three months, we'll show it, we'll do a Blueprint. If you hear a Blueprint Day next week. We will try to show you the combined gas and energy production unit. Because different parts of the system come from different parts of the world, if they arrive, and everything else. The basic has been put together. Then you will see it. But we said, it will be on the. It'll be another option to the, what we call, Western Europeans, in a rapid way to be produced.

Any other question?

Q: ... Wang Line, (2:16). So, some Chinese is asking if this 5G signal will activate the grapheme inside the vaccine and cause illness for people?

K- I have no clue about this. I can't tell you anything about it. There is a lot of things talking about these things. But we have no data, and we don't, what do you call it, get involved in it.

You have to understand, the vaccine in China is produced by authorization of the Chinese government and majority is homemade. So, it's implication and application of the technology by your government, if there is such a thing.

R: That was one of the very first things that was banned and censored, was this relationship between 5G, and virus, or vaccine. You are not talk allowed to talk about it even.

K- No, no, there is a. Now we had Knowledge Seekers with us, they are here and with us, I hope in the teaching today. Many of the Knowledge Seekers have been hit with the new version of Corona. Many of them are reporting to us, the effects which we've seen with the others, depression, suicidal condition, and all sort of things. It's the same, we have seen the same pattern in Iran with disease. We've seen the same thing in China, we've seen it in Brazil, we see in Europe. (2:18).

The new version of the Covid touches emotion. It brings you to insanity. It's the increase in the level of the fields, that now has approached the, what we call, the emotion level, which is higher than the physical condition. This is very clear to us. It's very, we've seen it, a number of Knowledge Seekers have been affected by it and we guided them.

We've seen in Brazil with a mother, with a child of six year old, other Knowledge Seekers asking for the picture of the child. These are all nonsense's. Never depart with a picture of your children to no one, for no reason. We have given our guidelines, our

understanding to the family. They say that they have seen a response immediately, with the recovery of the child. I know a lot of you do by goodwill, but it can be other actions to it.

Never give the pictures of your children to no one, to do nothing with. It doesn't matter what level comes in, from the Universal Council, or from anybody else.

The new Corona has hit the family. We saved the family and the child, were affected badly, and it's a very simple process. We have put out in things, and all our advice through the handling of the Corona comes through our beloved friend Dr. ?? in Iran. He puts out as a doctor the solution, which Keshe Foundation has put out for these conditions.

Soon we'll release the new one to Dr. Bararpour from Iran. (2:20) He will explain how to handle the new Corona, as a doctor, he always done. In past few years he's been the spokesman for the Keshe Foundation in the new processes. In next few days Dr. Bararpour will again put out a new, what do you call it, procedure to handle the new Corona with the emotion. We're waiting to see if it gets much deeper, and we have more exact knowledge of how to handle things. I have spoken ?? ?? ?? now Dr. Bararpour to handle the new processes, to handle the new Corona.

Q: By the way, Mr. Keshe, I want to know what's the status of you have mentioned the Italian corporation, with Italian doctors for healing the patient. So, is it ready? When people can. (Italian company will provide KF plasma for specific diseases.)

K- The Italians are supposed to see us next week, or n the 16th, or the week after. We have to see how they come up, because they come up with a new structure, strategy and we have to see how they come up with. Originally was supposed to be one center. Now they have brought in a new ?? backer, with many centers. We have to see what they come up with, and how they settle the situation. But it should be done very shortly. This month we are hoping. We entered negotiation with the Italians in one center, but now there are many more of them, because they work on the license, or ownership of a bigger chain. They want to do this, and now they are bringing their, what I call, the boss. (2:22). Once it's done, it will be ??. But, primarily it's for Fibromyalgia and for other diseases, ?? Italians.

Any other question?

Q: Salomea .. I'd like to pay some tribute to our light for peace, Mr. Gorbachev. I met him in European Parliament in 2009, maybe, if I remember well, with compact ?? of the word for water. It was a lovely movement, I don't know, manifest for the water of the planet. It was an instrument to make equality and bring the social justice at the planet level. And he was there and not alone. (2:24). He was with many other people involved on this subject, and I was so impressed by him. He didn't talk, he was just there present. And he was, accidental the history, I mean, in the direction of the peace, and we hope that such kind of accident. Will restructure the DNA of the history in the direction of the

peace. I'm wondering if you as a genius, you can help humanity to restructure the DNA of the history, to bring eternal peace.

And now, my question is about the relation between the Flower of Life, the DNA and RNA. I would like to understand better this link.

K- Flower of Life is manmade. But the energy transformation in DNA and RNA is a reality of working. In some cases, fields interact and create new conditions. Then we can relate it, or try to relate it to a structure. It's balancing of the fields.

When you speak about RNA or DNA. With the DNA, we speak about the conversion of the energy to a tangible condition. (2:26). With the RNA, we speak about the fields of that structure. When the mankind understand this, we'll see the change in the technology and knowledge of the Creation, of what man tries to understand of it.

So, how the fields structure themselves, leads into how physicality in fields strength, observation of the man will take shape, and what we call it, the DNA. Our desire to create a structure to serve certain purpose, leads for the body to create that structure, but the fields of creating that, needs to be maintained, and kept and can be repeated.

You cannot put every single cell of the man into an egg, or in a sperm, that it will replicate. But it's like, you put all of the music in one CD, and one CD can do all the recording, have all the information in it, which you call, the RNA.

So, RNA and DNA, in a way is the same thing, one in the matter of state, one in plasma or energy state. Where by reduction it becomes a matter state from RNA to DNA. How these position themselves creates how, whatever we want to call it, but usually has a ?? structure, which leads a position of, whatever you call it, a Star Formation. We always call it, that it creates three base, and one control, and sharing altogether. (2:28).

So, flower of life has no meaning in the world of the Creation, it's just manmade explaining a physical observation of it. We don't see our skin in the shape of the flower of life, or our stars shaped as it. It's a dynamic, it take position. It is the explanation of the, what you call, physical manifestation. We try to relate it to something, that we can understand.

But it's not a permanent shape, it's not a, it's how the universe works on it. We don't see everything circulates and what do you call, a star formation in the universe. They take their position. They're in transition to make a stable condition or they reach a stable condition until the stability to come.

Any other question?

Q: Jalal ... Mr. Keshe, now I know from your explanation, why I couldn't. You know, I kicked, I shout, I fight for coming to Linz. Since April, I have my all documents it's involved in it.

K- Did you get your passport?

Q: No, I couldn't. I think it is the purpose for me to be there is by what you announced today. I did want to come in physical, and I tried my best, and really, I tried my best. (2:30). But I didn't, I couldn't succeed that neither, maybe one month or two months more, maybe, if everything is okay. But I think the purpose of it as you said, it's that, I join this Mobile (transmutation). And yeah, that will be. I will join that.

K- Just register and complete the process, please. We need 10 to 20 people all across the world to be able to do that.

K- Thank you very much. How is your hidden secret society works?

Q: You know, they are all over the world now. I cannot. I cannot bring them in.

K- Have you managed to put your MaGrav together yet?

Q: Actually, Mr. Keshe. I told you last time, we are in vacation and all the parts of the team they are here and there. But, I am sure, I am now I am back to work, and I am sure next week we will join together. We will start.

R: .. how can an Iranian Knowledge Seeker can register and pay the bill? Do they need to come to Linz, at some point? (2:32).

K- You can come to Linz, or you can stay Mobile. Keshe Foundation Iran has an account, you can pay to Iran account direct. You don't need to pay outside, then get informed by our team in Tehran. The Iranians, let me explain to you something very interesting, which I explained before. Keshe Foundation in Iran has now evolved into one of our main manufacturing and operation systems ?? It's a registered company, you can donate or pay to the Keshe Foundation in Iran, to the accounts. It's on the website of the Iran Keshe Foundation, and they inform us, and then we process it from as a Mobile system. The Iranians cannot, it's hard for them to come to Europe, especially to Linz. But, in Iran, we can go through the process. You do the same thing as the rest do, but you make a contribution to, what we call, Iranian KF. The same as now with Brazil. Those of you who are in Brazil, you want to donate, you donate to Brazilian company of the Keshe Foundation.

The beautiful news is, as we said before, you're now aware, the Keshe Foundation as a space organization in Iran, as a company, is registered. We're waiting for the final announcements of it in the next few days, and allows, the company has been done, completed. Iran, it'll be the first Iranian Space company outside the framework of the government. Now we're doing the same thing in Austria, the same thing is done in US. (2:34). This allows us to transfer space technology in all levels within the Keshe Foundation without the restriction for intellectual rights, and all the other problems which we have with other countries. Because it's all done internally by the same foundation, the same organization.

So, Iran Keshe Space company is been established, and soon the same go through with, what we call, our team in Iran. Our work in Iran on the space program. Once we put everything in order, will be extensively increased. The same with Arizona, the same in Austria, as they're registered organizations, companies and we can go into massive work in that level.

There is something I have to explain, because I had to explain this recently to other Knowledge Seekers. The Keshe Foundation Spaceship Institute is a broad based structure. We work, for example, on the gas units and energy unit. We work on the space technology at the soul level. We work on a space technology at the physical level, what you call, flying system like UFOs and the rest. So, we cover a multitude of different applications of the space technology.

It's not just that you see what you see in Linz, that is the ultimate knowledge. (2:36). But, we still have a structure and work in physical movement, physical motion of materials, or people.

There are two different knowledge's, two different levels of understanding. In the space technology, we still will develop shipments of goods, humans, you don't like to go with the soul, I want to make sure I'm with my soul all the time, I want to go the physical way, I want to receive my TV from the Chinese in Shanghai directly to my house in Tel Aviv, or in New York. I don't want Amazon to be the middleman. So, I want to go from Tehran to Brazil to see my cousin, but I want to be physically there, or I can go different way, I prefer to be 18 hours or 10 hours there, I can do this instantaneously through my soul.

We are providing a broad based knowledge technology. So, to do these things, we need to develop technologies on the energy side, we need to develop technologies on the food side, on the health application, everything we have to consider, and we develop. The more broad based we become, the more aspects of the need .. of the man can be covered.

So, when we speak about the space technology, we're going to do this, it's just what's getting done. Even when you look at the Enhancement Units in Linz, they are physical structures we've built. They are not just talks, you come into a room you sit in the system, (2:38). you apply a system. Now we can get the system physically moved, or we can get this physically, produce energies. It's there, it's of it, has to be done.

So, as the Keshe Foundation we are a broad based knowledge, technology space. People say, if you can do with the Soul, why do you need the air craft? People want to see where they are, what they do. When we proposed the flying car in Ghent University, some 15 years ago, the understanding was, a lot of people don't like to hover, they like to have wheels, that they feel safe on the ground. How much of it is good, if you play a computer game whizzing around? Or would you like to put the grandpa in the backseat and whiz around, and see, and feels happy and come out alive on the other end. This is the extent of the technology, you has to satisfy all needs of the man and Universal Community whatever come.

There are many technologies will come to us, as we encounter with other creatures of the Creation. The magic has just started.

Any other question?

Q: (2:40). How many days should I plan to stay in Linz if I booked for the Vertical Simulation, and if it's okay to go straight to the Vertical Unit if I had not undergone the Enhancement Unit?

K- You don't need to go through anything. If we don't see you prepared to go through the conversion, we put other things in it to be done. We had this with a guy yesterday, and the day before. Very much in control, wanting to be in control of everything. First day he would not let anything go, yesterday was totally different, slightly more. It's the way you try to control the emotion. If some people come in and they just even entering the atmosphere of the building, they start the process. It is how much you control everything yourself, you're the captain.

We haven't advertised for the Vertical situation yet, we're building it. We haven't advertised for anyone using it yet, till we build it complete done, the way we want it, then we advertise for it. We were looking at the center construction yesterday and the day before, where to put these two units. We cannot put them in the flight zone. They have to be outside, but we put them upstairs, do we put them downstairs, there's so much electronics, .. the escalators, the lift, the metal structure around us is too heavy, if we move one person from one system to another, where to place it. (2:42).

We have not advertised for the Vertical system, not yet, till we are ready. It will be in next, I say, four weeks, six week maximum. But, the Enhancement Unit, we had a guy from Australia who booked five sessions last week and this week. The first time he was very excited, the second time was more exciting, whatever was there, the third time he couldn't go any higher. So, he said, I'm going to leave my other two payments for Mobile transportation, now with transmutation, and I will go back to Australia, bring me back from Australia. I said, okay. He left yesterday. Or he is leaving today or tomorrow from Austria. Some people booked three, four sessions, or two sessions. It's all to what you achieve, what you want to achieve.

But, essentially you're there for us to gather data and confirm the work of the system to go to the next level.

Any other question?

Q: .. My question is on electrical plasma, which is different to electricity of today or higher electricity. Has the electrical plasma ever given a name specifically. In some circles it's referred to as the technology of light.

K- I don't understand. (2:44).

R: Has the electrical plasma been given a name specifically. Electrical plasma is different to electricity of today or higher electricity. I'm not clear what he is talking about. Like electron plasma, perhaps. You'd have to clarify it better Antonio. Perhaps you can reword your question.

Q: .. Happiness to you and all seekers of knowledge. Is the behavior of the Soul image, that you described today, where there is interaction between two entities, but cannot be

seen in the protein based view of man, as described in your book as the principle of translucent dark zones?

K- Repeat that.

Q: Is the behavior of the Soul image that you described today, where there is interaction between two entities that cannot be seen and the protein based view of man. I think he means same as described in your book as the principle of translucent dark zones.

K- Translucent lights, not dark zone. It's what we can see, but it's not there.

R: He mentions in the same chapter you describe, (2:46). the science most beautiful insight about colors and bright of dark Universe, not understood by man. Again, maybe we need a little more clarification there.

Q: Each planet has its own specific emotion?

K- I fell out, can you go back? Can you repeat, please?

(repeats everything again)

R: We were talking about Josafa and these translucent zones, dark zones. It goes on to say, in the same chapter you describe the sciences most beautiful insight about colors and brightness of a dark universe not understood by man. Not quite clear to me, it's hard to read it clearly. I think he's talking about that there's more to be seen than through our eyes and more beautiful insights that can be seen that are not part of our protein based viewpoints, perhaps. (2:48). Any case, Danilo has the next question which is, does each planet have its own specific emotion?

K- What do you mean by that? A Planet is like any being, of course he has his own structure.

R: I guess we think of emotions, like certain gods and goddesses are attached, or identified with certain planets. Some of them might have, you know, certain jealous, tendencies, or the goddess of love is Venus, and so on. Are there any particular emotions that you see are attached to any particular planets that way?

K- Yes, they do create their own attraction. They do, yes. A planet is like a human being. He has his own emotion. He has its own anger. He has his own clouds and whatever. He attracts certain type of fields with it. That's why they behave in a specific way.

I've said this before, when you look at the Saturn, and Jupiter, and then you look at the Earth, (2:50). Venus and the rest. It's like a different state of emotion as they go through, and they join the Mother in the center (Sun). The young we see always are very active, they run, they create a lot of mayhem and everything else. We see the Saturn and Jupiter, young ones in the back, they gather everything, they create as many moons, as many mayhem, and huge explosions of whatever you call on them. Then you see them, as they get older become like Earth, get closer to the final destination. They calm down a bit, and then they have nothing (Mars), and then they go in (to the Sun).

(There's no) difference between the Solar System structure and the life of the man. It's very, a lot of similarities, wanting to own, and control and have everything. As we get older, we give up everything, and we go closer to the final position.

Q: What is abduction? And another question, what are angels? Has Mr. Keshe ever had a physical interaction with such beings?

K- Pardon. (he didn't hear the first part of questions)

Q: He says what are angels, (2:52). and has Mr. Keshe ever had a physical interaction with such beings?

K- No, yeah, the world is full of angels, depends what you call it. Every being ?? has an angel, it depends how you see it, and how you behave it.

Q: .. What is the planned product timeline for the new devices? Now the Energy unit is being released, later the food add-on for replacement of eating with energies, then what is next? How do all these applications align with the bigger picture of universal change, manifesting as the incorporation of the transmutation process, into the Plasmatic common denominator of created races?

K- The jaw of physicality is chewing it, as I call it, and swallowing it, yet. You don't have that in the dimension of the fields. Just because we develop the technologies on the energy, and foods, and the transportation and transportation, would everybody wants to use it and have it? It's there. There's more to come, as we give the freedom.

You've got to realize, if you understood the rest of the teachings over past decades, people from the universe come to Earth, convert their Souls to physicality of the Earth to eat, to chew, to enjoy the pleasures of this planet. (2:54). Man, at the point of today, would like to put on the Soul level to see how far he can go, where he can go. But what happen when you see, when you reach, like the people yesterday? You come in touch with the Soul of your partner for the first time in the room.

What happen when you come in touch with the Soul of a planet, or a star, or an environment that you want to enjoy and manifest in the physical dimension? Then you need to transfer, then you need the facilities to be able to exist according to the strength of your Soul.

We provide that facility, or you provide that facility yourself, if you know what to do. So, excursion and conversion will be everlasting.

What is the use of coming here? They come in shape of race of man, and then enjoying that bite of an apple, or enjoying the smell of the beauty of a flower. Why did you come here for? Is it like the British who go to Spain and always go to the same Fish and Chips shop. Why do you come to Spain to enjoy the Spanish environment, but your everyday go to the fish and chip shop? English food, English breakfast.

We have a beautiful say in Farsi, (speaks in Farsi), if you want to enjoy and be part of it, take the Totality of it, not just what suits. The job of the Keshe Foundation is that, we provide the technology, the knowledge, both for the man who is here physical, for those

who become to physical to enjoy the life of man as man does, or for the man who wants to go out and see what's outside. (2:56).

The Totality of understanding of the process is completion of the process, in every dimension and every direction. When we become short sighted, we only think about our own thing alone. And that's where the problem starts. This is part of the, what I call, for you as Knowledge Seekers to understand the Totality, and in that process, we have to look after everything a man needs, at the point of need.

So, we do not go out of our way to create that condition which is half cooked, (2:58). which is half done, and which is, what I call, not mature. But in the process, we have to create a condition, that it's not any more beneficial only to the human race. The systems we put in operation has to be useful and applicable to all races of the Creation. Even though now you're only interested in the Enhancement Unit, or the Power Unit, or Energy Unit.

We have to create a condition that, when we have the visitors of the universe, when people come here to be part of us, do not go through the hardship of the Man. Everything is prepared for them. It's when you invite a guest. You don't give them what you like, when they don't like to eat it. You prepare everything, you prepare the best of the best for them. This is what we're trying to do.

Prepare man, not only to have a pleasure of what you cook yourself, but it's good enough for the others who come here or, what you call it, used to better standard, or better living than us. So, you've got to understand, that is part of the work of the Keshe Foundation. We are accommodating the Totality of, not only for human race, but the, what we call, the Totality of the race of the man, (3:00). and the races in the space. When we do this, we have to understand exactly what we are doing, the way we are doing it, and the reason we are doing.

We are preparing man and at the same time, not for itself alone, but for guests, that the race will receive by introduction of the new technologies. How fast we can get this done, how fast can we get these people, these beings and man to become at the same level of understanding.

It's no use bringing people who talk about different points of the universe, when our people do not even understand such a point exists, and the possibility of life in these conditions. Then it all becomes magic. This is why when we started this process, we told you, when you come out of the system, we listen to everything what you say, and respect it. Because it's you who has been there, not us. It's you who have explored, about the dimension of your Soul to expand to that dimension, to that understanding. Doesn't mean that every one of us can. Unless we both decide to expand to the same dimension. (3:02). So, this is part of, this is understanding of, and this is the process of Creation.

We are preparing man to go out, and preparing man to be able to go out, to be part of this, this process of. You only look at yourself. When man goes to space, or deep space, we

are looking at, we make everything prepared for man to receive visitors from the deep space. The way they are used to.

You know, nowadays when you go to a restaurant, to a hotel, they have a continental breakfast, and they have an English breakfast in the corner, that if there are English customers here they enjoy their food, or if you want to taste what the English have for breakfast. We are preparing that English corner, as I call it. That when somebody comes, or if you want to taste that, it's there for you to enjoy that.

Now I hope you understood. (3:04). We are not just preparing everything for man to go out, we are preparing man to be able to receive new, what we call, visitors, new dimensions in life. We are here to serve, not to be (served), we are here to serve and not to be served. This is our motto. We are here to serve the creatures of the Creation, not just man to be served, to help himself out of his own manmade disasters, I call it.

Any other question?

Q: .. If someone has a tooth filled with zirconium, can they apply for the Mobile test?

K- Yes, we passed those points. We carry people even, yesterday I was told with the implant, eye implant, or something like that, we had people with a lot of things going through. We put restrictions for us to gain knowledge, that our systems are correct, or we have to change things. Now we have gathered that knowledge. So, there is less and less things to, what you call it, to consider. (3:06).

Q: .. Can the mobile experience go through the phone connected with the internet Wi-Fi, without having the normal 4G cell reception?

K- ??We think so, if we can reach you, we can get you.

A lot of people are asking that there is no entry for the Keshe Foundation (Store) the the new, what we call, what we announced today for the Satellite (Soul). Just use the standard Mobile confirmation, just put your things as a Mobile. We have people who just wrote, we just registered. If you haven't paid, we just ignore it. This is the pattern, the Keshe Foundation system automatically considers it. We only see when it pops out, as this process is completed. So, if you have registered, I've registered, if you haven't completed the payment, it will not come up in our system. So, you have to go through the full process, we only see when the process is complete. So if you just went there and registered, I want to be Soul and travel, and not complete the rest of it, we don't see it on our system coming up.

R: So they have to pay the 2,000 Euro.

K- It's the standard. We even accepted, the German community knows, and Italians know. We accept people for, what I call, donation from the Keshe Foundation systems. Those are different than when we do things. It's not that we do everything for ??. This week, the German Community collected for one person to go through the test and the

Foundation offered parallel, the same to anybody else the German community gives a donation to. (3:08). We work in a very structured way.

It's not that we are all financially positioned, no, because it has to be done the way it is, everything is, has to go. Otherwise, we have everything, give us free. Your knowledge is ours, you have to ?? where can we develop the rest of it. So, the structure is very, very clear. And is set up, with people who made the reservation, and made the reservation, yes. But if it's not complete, that it comes at the end of the system, the process has been completed and can match, we usually don't see it, we don't apply with it.

Use just the Mobile, as I said, they are trying to fix a new entry for Satellite. But use that one (the Mobile test), and put a message on it, "this is for Satellite test." The pop out, we'll see it. I see while I'm talking in the teaching process. We go through a lot of communication in the background with everything from knowledge's or Knowledge Seekers who want to share knowledge instantaneously, with the responses to everything, and to security calls, and everything else. We respond to everything. But, it has to be correct, the way we structured it. Not the way you like to do it.

I can hear you clicking away.

R: Ops. I'm trying to respond to Dimitri in the chat here. Who didn't hear the question that he had about the connection with, between the cell phone, and the internet and so on. (3:10). Your answer was essentially, it didn't matter as long as the connection works. I was just going to say to him, in his case, his connection didn't work. So, perhaps you better think of a different way of doing it. Because then, in the time of crisis where the answer was right there for him, his system failed. So, it's kind of ironic. That's the test, though. Don't want to have it breakdown in the middle of communications, you know, critical communications with Mr. Keshe on how to land on the Moon, or something. or more importantly, how to take off from the Moon.

K- It's Moore's Law, isn't it. It happens, when you don't expect it to be.

I just received another communication from our team, that they're getting requests from people, I think Antonio from Australia says, I have a mobile, that Mobile test stays Mobile test. The Satellite test is different. If you, they are trying to put up a Satellite test on (the website).

We need the Satellite test as part of our work. It's very urgent, it needs to be done. We test it, because before we go into transmutation, we need this to be completed. We've done that.

Put it this way, as I said to one of our Knowledge Seekers, that we don't want to bring part of you here, we want to bring all of you here.

The system is set in a very beautiful way, maybe as part of the knowledge shared, you understand how the transmutation work with us. When you enter the system, (3:12). When you enter the system. We put you through, what we call, the expansion part, or we

originally put in the Chair number 1, chair number 2, chair number 3 and the rest of it. But essentially, was for us to see if we can interact with the physicality, with our system, which the answer within the first day, two days, came, that's okay.

Then we put you through the other systems, the other chairs, to see if we can interact with your Soul, STP. We heard people telling us, the upper half was moving in chair number two, but they felt everything in number three. So by building a system, if you remember, we started with one system on the left, and then we went to the system number two, because we had to gather more information what we had to imply and apply. Then we added more things to number one, and then we changed number two, and we kept on going back and forth. Once we learned something, we added to the other one, and we brought it back, and forward to the other one.

In this process, we brought all these three into one headset, and then this headset on the left, they start getting combination of different connection between the Soul, the Soul of the Physicality, and the Physicality. Then we went to the point that we had no connection with any of them. So, in the system on the left, we came, that we connected the Soul of the Physicality and Soul of the Man, with the physicality of the man, and we watched it. We saw how it performs. Then we eliminated direct use of these systems.

Then, when I explained to you earlier on today, that we put the people on hold, was to keep them in a condition that, (3:14) what you call it, that we don't move them out to the physical condition, but we hold them in the environment, that the Soul is still active, till we want it, in a way we keep it on a hold, standby.

The new structure, which we are asking for you to join us, is more or less, we try to connect all of you to the system. Hopefully by next week, we have the whole system, in a way, that, if I put it in the right way, Physicality, and the STP. What we're trying, and what has been designed now, is that, we simply don't transmute you from one system to the other. What we will do is that, in this system we put you in, we expand, we allow your Soul to expand with your physicality inside it, we do the same with this side. We allow your, in a way, your Soul to overtake your physicality. That's why you sit there for maybe half an hour, 20 minutes, whatever.

Then what we do, we've done it a beautiful way of doing this thing, is that, now we consider (3:16). that with what we experienced yesterday and from our other work, we consider that nothing else exists in the room. This is how the new structure is.

Then what we do is that, we have systems set in the structure to transmute you between these two positions. The system has been built in a structural way, that first of all, we transmute once the expansion takes place, your Soul into this direction, to the Soul level of the system, if you look at it. When we are satisfied that the Soul has moved and located in 2 positions, with the things we set up. Then we have systems built, it's a virtual systems. Then we go in for the STP. (3:18). We transmute the STP to see if the Soul of the Physicality would like to accept the position. Then when we're happy with this, we go for the ultimate goal of, physicality to be transmuted.

This is important to us that we reach this position. We are not just carrying you "zip" (instantly) across. We carry you in a system where you see, you feel first, the way. This is the reason we asked the couple to go together, where the two Souls went together.

We ask you both, in both chairs. If you have, you're happy to be manifested in the other chair, and if the person of the Soul in the other chair has arrived in the position and the time. Then we switch to the next one. Each stage has his own strength, he has his own technology.

It's taken me 40 years to develop this. There is so many universal systems hidden inside this system. So, when you come in, when you sit in the system, it's when we decide to move things forward.

Then, where do you come as Satellite people. (3:20). You'll be brought into the system. You're in Australia, another person is in New Zealand, another person is in New York. With combination, mobile communication we have with you, with the agreement of the Soul prior to move, we allocate a person they choose. You remember the four sitting in the middle, the husband and wife, they chose, they chose, they want to come to Australia. In this transmutation we open a channel to Australia.

If the person in Australia feels the Soul of the person. Have you arrived? Have we gone to the right destination? This part of the process, we checked with Rick, five weeks ago, four or five weeks ago. No one of you understood what we were doing. But that was the purpose of it. Now we have the Soul in a position, to be in another system, or pre-agreed to be in Australia. We'll return the Soul back to the system. Once we get the confirmation of both Souls in our system, and in Australia confirming, they feel each other, they're aware of each other's presence, the way it happened in the room yesterday. (3:22).

Once we establish this, and see how much we succeed, and how then we can transmute to this position, or back to the original seat, then in the coming time with the Mobile transmutation, we allow the people who go through this system, if they like, we have to adjust our systems. This is a literal physical system which is built, to transmute the Soul of the Physicality, when they can feel each other, they can see each other.

If you came to the Linz Center, we asked you specific questions. Did you see anything? Or did you feel it? All the people in this system has seen it, and felt it. People in this side, they don't see anything, they just feel it, because it's built totally for the Soul level. Then when the person in the room tells us, yes, I can see, I can feel the emotion of the man in Australia, and the man in Australia tells us, I can feel and see the person. Then we ask to switch to physicality transformation. Then in that position, we should have no one in this room. You physically manifest yourself in Australia.

But the position is with customs and the rest of it, which we have to sort out, which is coming up in October or November. So, what in fact you as Totality are doing is, that's what we need to do. We have proven we can do collectively. (3:24).

So, when it comes to the point of the disaster or whatever, we use these Satellites Souls to move as many as we can. Now you understand the crucial point of wanting and asking for Satellite Mobile situation. Mobile was for you, Satellite is for humanity.

When you're in Australia and you make a call to Austria, how many satellites are used to connect you to? This is the purpose. But, when you are here, you're here, you cannot do anything, it's a physical communication. When you're on the phone, you're on the phone. When you want to go to Australia, how many airports you got to go through, it's the same. Now you understand the process, which from this week on Keshe Foundation is set to do. When you come in to, or past two or three weeks, you have come to the exhibition center, some of you who we saw, we can reach to understand, we took you back in the room and showed you the flight system, set in.

You physically seen the, what I call, "satellite dish" on top of the system. But, many of you are not aware of it, you just get too excited to sit, and you are not aware of what's going on. The transmutation system for this, without a control, has been sitting in there for past three, four weeks. So, when you come into Linz Center, (3:26). it's the process as, in a way, of the Chairs. Why did we build the chairs? We brought you in, you sat in Chair number one, through the physicality, through the STP, through the STM, and then we put you in the system.

When you went into the system you saw the expansion of the Soul, what did you do? What did we do with you? We put you back in system three, then to two, then one. Now, you understand why we did this. It's exactly what we are doing here. We move you, we expand your soul to the dimension of the, what we call, STM, with physicality, and then we move step by step.

In the future, this will be done automatically. In the future developments and production of units, this will be done very much automatically. But now, you see why we had the chairs, why you sat in Chair number one, and two and three. Now, the same knowledge as one, two and three, transfers you back into the Soul, into the dimension of the Soul of the Physicality, and physicality. All this you see now, planned 10 years ago.

The first flight system, the first, what we call, (3:28). transportation system as a "hovering chair," was designed to be shown in Hanover. Now, 2011, we're 2022, 11 years later. We had to get rid of the Belgians in our system to be able for you to get here. For 10 years, 11 years, I've tried to bring this out, but every time Belgians had their "mole" inside the bedroom, the betrayer. Now you have it, now you understand it.

Now you have seen the change. Now, you see when we opened the Enhancement Unit in the Design Center, why the lady called everywhere, produced two terabytes of information to Iranian government to get me executed. For humanity not to reach to this knowledge. They used to do it when I left the bedroom. Now they did it in public. Now you understand why so much was done to stop this technology. You remember they called the center to stop this, this is this, this is that. Now you see the devil. Now you see

the prostitute. Now you see the betrayer. Now you understand how much you have paid for, with this knowledge, that would have been here years ago. (3:30). Prostituting our knowledge, their governments to stop that they can carry on with the abuse of the man. This is not, hasn't happened yesterday. Look at the transmutation, look at the flying system, it's all based on the same technology. Now you see it, now you feel it.

The smallest nation in the world went to battle with the Creator, and they lost, and they ?? the rest of it.

One of the prerequisites for saving Germany is dismantling of the state of Belgium. You will see, we'll achieve, whatever we said we'll achieve, we'll achieve. There should be no abuse of ?? left ?? as a king, as an empire, to, for the rest of the humanity to suffer with it. Now you understand what was, has been on the cards. When they knew we are about to release this technology in Linz, two years ago, we saw the mayhem. Personal calls, writing, going to see ambassadors personally, I'm a state of Israel agent and the rest of it.

Keshe Foundation will grow out of the state of Israel's funding, and Foundation and the work, because it's the place where Muhammad became a Prophet, that Jesus came, and where Moses appeared. (3:32). If we deny the truth about our own existence and path of belief, what do we have left to believe?

This technology, what we see, this is what will bring man to the point of glory in the universe, and not the demise, ?? and abuse in the state of Belgium. Now, you understand, why we are so adamant. Why we are so clear and continuous with this process, step by step. That it is understood, it's now not a talk, it's a technology, the knowledge of Creation has been translated to Totality of the knowledge, and this will bring us new dimensions. This will bring us to understanding more of. This will bring us to seeing, understanding, being able to, in a way, communicate with everything, which we need to know, what we need to do.

The whole structure has to be systematic.

Understand the system, the reason for the system.

The process of Creation, (3:34). how life exists, how energy in life is created.

How we create energy in our body.

How we convert energy of the plasma to energy of the heat in our body.

The process, the mechanism that the body of the man has chosen for this process.

If I teach you that, you will throw the whole biology and chemistry of the book of the man into the bin. This is the way we will transmute. This is the way we will transfer. This is the way we will understand this process.

The transmutation has to confirm and has to convert into transportation. This is the where and the point of the maturity. We transmute you to the dimension of the Soul. It's you who has to go through the transfer to physicality. That's why we call it transmutation and transportation. (3:36).

It's you who transfers that, to transport your own STP, to dimension of physicality, in the interaction with the environment of it. Why it's easy for us in the, what we call, our system to do, because we are in the same environment. As we showed yesterday, the people in the center had the Soul touch, not the physical touch. So, it's easy for me to do the first trials in the room, as the environment has been kept the same. That's why we do the transmutation trials in the house.

We do the Soul transmutation to outside, hopefully next week with the Knowledge Seekers. When we do the first trials, we are happy, we understand it, the system responds correctly, we go beyond the boundary. Now you understand how complete this process is. How much has been done in advance, in more. It's taken us two years from the Design Center to today. It has taken us all the knowledge to do. .. (3:38).

We have to understand the condition, we have to understand the process, we have understood the completion of it. We had to find people who could understand to translate, to transfer the technology, to translate it into mechanical system, to translate it into the physical dimension. That needs a lot of understanding.

Any other question?

R: ... There's a couple of comments. I like to read one from Kay in the chat, who says, bless your Soul Mr. Keshe, and all the challenges you've experienced in the past and all to come in the future. May the brightest light shine upon you to pave the way for your divine mission of the permanent world peace.

Another one ... (3:40). With your contribution to the humanity in energy, transportation, etc. It is beyond me, that Mr. Keshe hasn't been recognized as the greatest scientist of all time.

Q: .. My question is, with regards to traveling in space, you mentioned that Souls travel in sets of four within the same magnetosphere. Could you explain a little bit about that, please?

K- What do you mean exactly?

Q: Well, you mentioned that within the magnetosphere of a spaceship, (3:42). whether it be Soul manifestation or a physical spaceship, I'm not sure what you're referring to, you mentioned that there is the Souls travel 4 at time, there's 4 of them.

K- In this test there is a 4. We find the combination of the 4 as one of the best. Because not all the Souls are the same, and you go back to the Star Formation. That's the reason. That's why in the flight system, we put 4 seats. We don't look at the position of the seats, we look at the structure of the, what you call, the field dimension. That's what is important.

Q: Just quickly, in our lifetimes will we see universal family openly visiting and interacting with humans within the dimension of Blue Planet Earth?

K- They've been here in the lifetime of your forefathers, you've been blind to it.

Q: But in terms of the Totality of humanity, there's not been.

K- In Totality, has been a lot of interactions, it's daily interactions. Some governments are fully aware of these interactions. It's not. It's hidden. (3:44). It's like the guy said, why the Keshe Foundation is not known? They let you know what they want you to know.

They are amongst us. Some of your listeners are part of them, born out of their interactions, are partially there, in your, you know the knowledge, and you are visitors.

It's not hidden. To you, it may sound strange, but a lot of. I explained this to one of my children some times ago. I explain it to you if you understand it. In the England, when you go to Liverpool you see different nationalities, especially a lot of Chinese. And now we think that Chinese are here, just now. But the Chinese have been in Liverpool for centuries. But they're stuck in the back corner of that world.

If you go to Italy it's about the same. In Italy we have different nationalities making the nation of Italy, as the Romans brought from different parts of the world. But we've been blind to it, we call them all Italians. (3:46). Chinese in Liverpool, we can separate them, because of the colors of their face and everything else. But Italians, you can't say, to you they're all Italians just because ?? speak to them. But look into their face. They're not Italians. Look at their features. They're not Italian. But we have accepted them Italians.

There're 200 races, as part of the nation of today's Italy. Romans brought villages back with them. To become part of them, to understand them, and brought with them the souvenirs, now they have become Italians. We don't know the difference, we just go to Italy.

It's the same with the people from the Universe, they've been amongst us so much, they've changed the color of the yellow, black, white and every other color, they're so entangled in us, that we don't even see them ?? in us. But if you look ?? now. Most probably, if you've been around your city in past seven days, you'll come across quite a few. Maybe you have a ??.

So, when you speak this way, it means you haven't understood. Earth is not isolated. It's a common ground for the rest of the life, the rest of the universe, where the people come and go, and enjoy its beauty. It's us who has been ignorant to the truth, (3:48). we chose to be ignorant.

Thank you very much for today.

If there's no other question, we bring it to an end. As I said, please go and register as a Satellite member. We need it to do the process in the coming weeks, next two or three weeks. We might call up on you for a long time, as we develop. Somebody comes in and wants to go to Australia, we need somebody in Australia, somebody comes in and says, I would like to go, like yesterday, the husband wanted to go to New York and the wife to

Spain. We need somebody in Spain, as much as we need somebody in New York. It'll be a busy time for your Soul. Even you might not be aware of it in the physical dimension.

I pay my tribute to His Excellency President Gorbachev. We hope, we know your Soul has found a new dimension, higher than the Pope, who brought him down. Even though he's still a cleaner in the bottom of the pits of the universe.

Thank you very much for today, and thank you for being with us to share knowledge.
