

Near Death Experience: Field Strength of Blood

Blood: Emotion - STM : Part 2

Excerpt 427 KSW :

Times: 2:35:15 to 2:53:22 (18 minute)

Time: 2:58:48 to 3:00:50 (3 minutes)

Total time : 21 minutes

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (*interpretation by KF Brazil*)

INTRODUCTION:

The near death experience (NDE) has been fascinating for a lot of us, especially those interested in spirituality. We usually end up studying some of these accounts and wondering what it really means. Now Mr. Keshe has taken the mysticism out of it, by explaining it in terms of plasma science. It's quite amazing and also takes the fear out of dying.

In reality, the people experiencing NDE are not really dead - yet. But from present scientific understanding of the body and life, their body exhibits what is defined as death. However, in the Knowledge of the Universe, we wouldn't consider it death until the STM totally separates from the physicality, and transforms itself into something else. If it has gathered enough field strength, and is a giver it can become a Sun, or create another physicality in another dimension, or if the energy is very low it may just become a dust or a cell in another entity. Our understanding of what is life and death has become very wide with this technology.

So if the person is not really dead, than what has happened? If the heart stops pumping, which means the blood stops circulating, and as long as the blood hasn't solidified, then it still actively carries the M fields, which have gathered from all of our M fields of our

cells throughout the body, and our emotions, and the STM still remains caged in the brain of the man. From the outside you look dead, but inside you are still very much alive. To understand more about the M fields and how they record all the actions and emotions of the physicality, please see part 1, "The Heart .. " in this series, we explained it in detail.

So basically you can say we are still "on," and recording as a living human being. But why can the soul travel and see what other souls are doing in the next room, or visit loved ones, or have experiences with higher beings? The same thing happens when we go to sleep at night, the field strength of the "cage" made of blood flowing around our skull has lowered, and the "bird" flies free, but it is still connected, and it comes back and remembers all that it experienced.

As to the colors they see, that are "not from earth," Mr. Keshe explained this very clearly, that it is due to the field interactions of the different Gans's. He gave examples of the Cups made by KF, where you can see the photos of them at the KF Store. These colors are not normal and usually found on earth.

Some interesting points he made were, "Our blood flow is the prison of our soul. If once mankind understands this, you can do a lot." And the fastest way to revive someone whose heart has stopped is to get the blood circulating directly, not pumping the heart, which is a harder way. It's amazing to ponder the fact that our blood is a magnetic recorder of all our emotions, intentions and behavior, like those old magnetic tape recorders we used to use, or the hard drive on our computer. That something nonphysical like emotions, manifests itself also in physicality at the same time.

He also said, if you can find somebody whose ancestors witnessed the crucifixion of Christ, then through the KF technology using the M fields of the RNA, we can find out exactly what happened - like we'll be able to replay the memory bank that was gathered by the blood of the person's ancestor 2,000 years ago.

Finally, whatever a person experiences during the NDE, good or bad, their own soul has a connection to that experience. It's their own emotion. It comes from inside themselves, not outside, like people tend to believe.

SUMMARY

A question was asked to Mr. Keshe about the phenomena of Near Death Experience (NDE), which is when people are reported to have died by the doctors for a period of time, heart stops or whatever, and they go to the other world and come back. These people talk about the wonderful colors they see, and that these colors don't exist or cannot be made on earth. They also talk about how beautiful everything is and they go around and meet people who used to live on earth, but all communication is telepathic. Are these colors and things, the creation of their own consciousness? He asked her to repeat the question. The Knowledge Seeker (KS) said, are these colors and things they see the creation of their own consciousness, and being able to move and go around to different

places? Or is it caused by the dimension (D) they are in? Is that D another kind of plasmatic creation, or composition, other than our earth?

Mr. Keshe was trying to find a picture to demonstrate about the colors made from Gans interactions. He will show it later. We know the interaction of fields create what we call, new dimensions, and new positions. We produce these interactions (through different M field) strengths.

What they are calling the NDE, is due to certain conditions of the blood. In plasma science we say they changed the field strength of their blood. It's like when you dream, or when you go to sleep, the field strength (in your blood) changes. This change allows the Soul of the Man (STM) to go beyond the boundary of the body of the man, and in that process we dream and connect to other things, (and other experiences and souls).

About seeing other colors and having interactions, generally we know that if you are in consciousness, and then there is a reduction or stoppage of the blood flow, the M fields of the brain are still working. (The brain is still functioning and this is why you are still experiencing consciousness - seeing colors and interacting with other souls).

When you go through a condition where the heart stops, the M field of the brain doesn't stop immediately, it's still there (functioning) and holding the M field strength. The doctors can call you, "physically dead," but in fact, the soul is still contained by the M fields of the body, and this containment holds on.

When this happens you are in a state of half dream and half sleep, the soul is still confined by the strength of the M fields of the blood, which is within the skull of the man. You are not (totally) asleep in this position, so if I revive you by bringing back your blood circulation, which is holding the M field strength and the emotion, the part of your brain that keeps the emotion, is still functioning. It is still registering experiences. It keeps on recording everything including memories, images, field interactions, and every other interaction, until the point where the STM departs the physicality.

Now you don't have the restrictions you had before when you were awake, or even when you are asleep, and this allows you to have what we call, (experiences), or we "dream of something," or maybe we say, we had a dream. But the fact is you are still alive.

You remain alive till the point when the strength field of the blood, drops below the strength field of containment of the energies of the soul. You are still there, you are active, and you still can dream, but now there's a different field strength, but you are still communicating and connected to the outside world.

In this process of transition you see different field strengths of the soul interacting, because it is still within the body's fields, and within the brain. The vision is still part of your experience. But now you have a different field strength interacting with the same brain. The field strength of the soul, and the M fields of the blood are different. Therefore, you see new colors, because now it is purely M fields. There is no motion of

the blood. You observe new colors, you see new interactions of plasmatic colors, not matter state colors.

In China, we saw new colors that were never seen before, (even in what you could bring out in paintings), when we produced the first Sterilization Cups. The new colors were created from both the matter and Gans states interacting with each other on the M field level, you create a new dimension.

Whereas in the body of the man during the NDE the brain is active, and it's where the soul is, and it is also still active, you have only the M field of the blood, which is holding onto the containment of the soul. During this process you see 2 plasmatic fields interacting, and then you get new colors we haven't seen before. We've seen the same process in the space T with the plasmatic fields interacting. And working with the Gans's you see colors, that you don't usually see in the normal condition of life.

We saw new colors like this in China when we produced the new Sterilization Cups. The Cups have a pinkish color, that we never seen before. This opens up a lot of things for us. We explained this in a book where we showed the color of the Gans's for the first time, which are not matter state colors.

So yes, in the NDE they see new colors, that they've never seen before, because now it is the plasma of the soul interacting with the pure plasma of the blood and the part of the brain, that is still functioning. Without a shadow of a doubt, they do see new colors.

If they revive you by pumping your blood and getting the circulation going again, that is if the blood hasn't solidified in the vessels, then a new M field containment is created, and you come back to life. All your memories and interactions are real, because you actually went through it, (you weren't really dead). You simply went from a physical containment, to being contained only by the plasma, a plasmatic containment without the circulation of the blood to carry the information and emotions.

In a way you are like a frozen picture, in the position where the fields of the blood, interacts with the fields of the brain, or the soul. The memories and the understanding of the brain are still being held onto, and are functioning. Maybe you see your mother, or an uncle, that you have been waiting to see for fifty years. You are able to see her, she is there, because now the field strength is different, (and it matches to be able to see her). We fully understand this.

Just go on the KF Shop website and look at the odd colors of the Cups. When you look deeply you see, that they are not normal colors. These colors are formed in essence, the same way the people who experience NDE see colors. With the Cups, you have the plasma of the Gans, which is within the clay. It interacts with the matter state of the clay and creates new colors. Now it's very normal for us, because we understand the principle, the reason behind it, and how it takes shape.

So the people who say they have been dead, actually they weren't really dead. The soul was still contained within the M fields of the blood. If the physicality, what we call, the roof, has collapsed, or if, what we call the spirit has collapsed, then the soul is released. (In the past Mr. Keshe has called the spirit, the Soul of the Physicality (STP), and he refers to the soul, as the STM. The STM is of a higher order and at some point we want to mature enough to bring the STP inside the STM. In these cases of collapse that wouldn't appear to happen.).

When you see people who are revived after having their heart pushed and pumped for 10 to 20 minutes, it's because by circulating the blood you recreate the M field cage around the soul. Literally, you stop the soul from leaking out, or getting free, to take what I call, the flight of fancy. When there is no M field around it there is nothing to hold it back anymore. It flies free.

The KS commented further, most of the people who have a NDE say, that at the same time they can see what their neighbor is doing on the second floor above them, or what their father in the village does. They say, that if they think of something, then they see it.

Mr. Keshe said, that's because they don't have that boundary anymore, as such. Because the limitation put there by the blood is not there anymore. So their soul is free to travel deeper and further.

Our blood flow is the prison of our soul. If once mankind understands this, you can do a lot.

This is part of the what I call, the Enhancement Unit (EU). Not to interfere with the blood flow, but work within the structure of the STM, and the energies, are over the strength of the what we call, the blood. If you can do that, you can create all sorts of conditions, all sorts. I can take you to a dream land, where you can see your grandfather and grandmother, and have a food with them, and come back and say, "I have been there, they are there." In fact, it's not a dream. We change the dimension of the strength of the soul, to the strength of the grandmother or grandfather, so you can connect to it, and you also enhance it.

As we understand more and more, these kind of things will become a reality. People will endeavor to create machines for it. Like when we have all these magicians, who say they can connect us to our dead father and mother. Or some say, that they can hear our mother talking to them right now. But now we can understand the knowledge of it, the science of it, and that it is, a reality. If you give me the destination, I will land in that destination.

The KS asked about why these people can see their life past before them like a video, they can see what they have done starting at age 1, 2 ,3 etc. At the same time, they are able to see the results of how they have treated somebody hours afterwards. For example, if they kicked somebody, then they feel the pain of it hours later when the person was in pain.

Mr. Keshe answered, that's the connection of the fields, there is nothing you can do about it. It's the same process, but now you see the whole thing.

Remember I explained to you, that if we find people whose ancestors have been in Jerusalem, at the time of Christ, they'll tell us exactly how Christ carried the cross, and how he behaved on the cross, because their ancestors were there, (and it is carried in their RNA). That is, if you put them in the position you were talking about. (I think he means if you change the plasmatic field conditions like what happens in NDE).

I am sure that not very far in the future, we'll develop many of these technologies to bring that condition. Now we need spies to tell you what is happening, when they steal computers with information on it, and then threaten to release it. We'll be able to go into the dimension of the STM, into the RNA of the soul, and we'll be able to hear what the presidents are planning to do, what wars they are creating, and how, and also what was the outcome of it.

Now that we understand more about the technology, then we understand how realistic it is to create machines that can do such things. We'll be able to put the world leaders who claim, that they had nothing to do with such an incident and we'll find out the truth. We'll be able to find out, if they were involved in creating biological labs, because through the RNA of their souls, it cannot lie. Now you understand, that a lot of things will change with this new technology, a lot of things.

The KS said, most of the people who come back from a NDE end up changing their lives. They start serving people. They watch their thoughts and actions very carefully, and they change their ethos to those of what you have been telling us about, that is to be careful not to harm, to serve other, and to practice unconditional loving. All this was a result of their NDE.

Mr. Keshe said, sometimes we learn from it, but sometimes we carry on with what we were doing before. It's the condition of life we carry.

He made further comments. People who experience NDE see colors they've never seen before. These colors come from the interaction of the fields of the blood, which is not circulating at the time, but it's still M, and the soul is still active, and the brain is still in-between recording everything that goes on. If I can bring you back by circulating your blood, you'll remember everything, because the blood was there, and the brain was there, (recording everything).

One of the easiest ways to revive somebody whose heart has stopped, is to connect a blood pump directly to the circulation of the blood, and get the blood moving again. The ambulance drivers never do this, they come and start pumping the heart and using electric shocks and the rest of it. But you will revive the person faster, if you just get the blood moving again, because it's the blood that contains the soul.

He was asked, why some people who did bad actions, but nobody around them knew about it, when they have a NDE, they don't see beautiful things, instead they see scenes of hell, misery, extreme heat and cold, and hear people crying and things like that?

Mr. Keshe said, that's the emotion of (themselves). It's the interaction of the fields, which they are connected to. This is what is with them. How they connect, and why is the soul connecting to that position in time and space. What they had to do with it. Or why the soul has taken that position to see such conditions.

END

English Transcription:

Near Death Experience (NDE) (time : 2:35:15 to 2:53:22)

Q: Mehranez, ... I have a question about the life for the phenomena of (NDE) for people who go to the other world and come back (Near Death Experience), ?? medically. They ... talk about the wonderful colors, that there is no such thing on earth, they can never make it, and wonderful scenery, and they go around, (2:36). and they meet people all in telepathic communication. The question is, is it creation of their consciousness, these colors and the things ..

K- .. can you repeat.

Q: Is it the creation of their own consciousness, that creates these colors, ?? movement and going around, or is that by the D they are in, when they are taken in, has another kind of plasmatic creation, or composition, than our earth?

K- I am looking for something to share with you, you have to bear with me, then I explain this. I have to get to it if I can find it, take a screen shot and come back to you. We know the interaction of fields create what we call, new D, and new positions, and in the strength, we .. produce these interactions. When the, they call it near death experience (NDE), or some people who, due to other conditions of the blood, (2:38). they what we call, have changed the strength of their field. It's like when you go to the dreams, or when you go to sleep, their field strength changes. That change of field strength, allows the STM to go beyond the boundary of the body of the man. In that process we dream, we connect to other things.

Proofed to here

But in general speaking about interaction, and seeing other colors, we know if you are in the position of consciousness, or blood flow reduction, or at the point of no blood flow reduction, but still M fields of the brain are working. You can go through what we call, a condition where .. when the heart stops, the M field of the brain doesn't stop immediately, because it's still, even there, it still holds what we call, field strength. So you could be called, "physically dead," but in fact, the soul is still contained by the fields of the body. (2:40). This containment holds on.

So now you are in a state of .. half dream and half asleep, soul still has confinement with the strength of the fields of the blood, which is within the skull of the man. So in a way, if I revive you in that position, you are not asleep, your blood circulation comes back and holds strength, but your emotion, and the part of the brain, which keeps the emotion is still working, is still registering, till the point where the STM departs the P, man records everything, fields interactions, every other interactions, memories, images.

Now you don't have the restriction you had before when you were awake, or you were asleep, and this allows you to what we call, we dream of something, or we had a dream. You are still alive. Till the point when the strength field of the blood, drops below the strength field of containment of the energies of the soul, you are still active, you still dreaming, you are still there, but now a different field strength, you are still communicating connected to the outside world.

So in that process of the transition, you see different strength of the soul interacting, still with the body of the man's fields (2:42). within the brain. So the vision is still part of it, so you have a different field strength, interacting with the same brain, but now in a different strength of the soul, and different M fields of the blood.

So you see new colors, because now it is purely M fields. There is no motion of the blood. You observe new colors, you come to see new interactions of the plasmatic colors, not matter state colors.

It's very much we've seen this one in China when we produced the first cup for sterilizing, they saw new colors we never knew before, in paintings, in what you can bring out. Because now it's both the matter S and the Gans S interacting with each other in the M field level so you create new colors, new D. But as the brain is active, and it's, what you call the soul, is still active, and the only M field of the blood are holding on to the containment. Then you see 2 plasmatic fields interacting, and you see new colors, which we haven't seen, but in the space T you've seen this. The Gans's have colors you don't usually see in the normal life condition.

When we produced .. the sterilizing Cups, which we've shown before, we created this in China and they could see new colors. (2:44). The Cup has a pinkish color that we never seen before. What we call, this, opens a lot of things, and the book where we show the Gans's for the first time, we explain this, that you see colors, which are not matter state colors.

So yes, they see new colors they never seen before, because now it is the plasma of the soul interacting with the pure Pl of the blood, in a way, and the brain, which is what is left. They see new colors, without a shadow of a doubt.

But if I jump in, and pump your blood, circulation, if it is not solidified in your .. blood vessels, then I get going, create a new M field containment, you come back to life, but your memory, your interactions, is real because you went through it. You went from the

physical containment, to the plasmatic containment alone, without the circulation of the blood to carry the information and emotion.

So you are frozen picture, in a way, if you look at it, in a position where the fields of the blood, interacts with the fields of the .. brain, or the soul, and the memories of the brain are still working and holds onto the memories and understanding.

Maybe you see a mother, or an uncle, you were waiting to see for 100 years, or 50 years, and she is there, because now the field strength is different. This we understand fully.

If you look at the some of the cups we sell, you see odd colors in these Cups. They are not normal colors, when you look at it deep, it's the same way. You have a Pl of a Gans, (2:46). which is within the pot, within the clay and interacts with the matter S of the clay, so it creates new colors. Just look at the, just go on the KF website on the Sales, and into the Cups and see the colors you see there. It's very normal, now we understand the principle, the reason behind it, and how it takes shape.

So people who say they have been dead, you haven't been, because if your soul has left the body it's very, very, especially if the physicality has created to keep, what we call, the roof, the what we call, the spirit, has collapsed, then the soul is released, and you see people spend 10 - 20- minutes, reviving somebody and they come back, because with that push of the heart, pushing and pumping, you create that cage, you create that M field, which can literally stop the soul to be loose, to leak out, to what I call, take the flight of fancy, because there is nothing to hold it. You cannot hold it anymore, because the M field is not there.

Q: Thanks ... most of them have a consciousness, that at the same time can see what the neighbor on the second floor does, what his father in the village does, they can think of something and they see that.

K- Because you don't have that boundary anymore as such, you understand, your soul travels deeper, further, (2:48). because the limitation which was put by the blood. **Our prison of our soul is our blood flow.** If once mankind understands this, you can do a lot.

This is part of the what I call, the EU. Not to interfere with the blood flow, but work within the structure of the STM, and the energies, are over the strength of the what we call, the blood. If you can do that, you can create all sorts of conditions, all sorts. I can take you to a dream land that you can see your grandfather and grandmother, and have a food with them, and come back and say, I have been there, they are they. In fact, it's not a dream. We change the D of the strength of the soul, but in the strength of the grandmother or grandfather, and you connect to it, and you enhance it.

These are become reality, as we understand more and more. Because we will create machines for it, people will endeavor to do it, and we have all these magicians, who say, you know, I can connect you to your father and to the mother, and oh, they are talking to

me. But in reality if you understand the knowledge, if you give it the destination, it will land in that destination.

Q: Last question, most of them, I think this is partly physical condition, but most of them see their whole life like a video, (2:50). going through them, and there are active of that video, from years (of age) 1, 2, 3 and at the same time, they are able to see the results to what they have done to somebody in later hours, like they have kicked somebody, and they feel what they have done to that person hours later, when he is in pain.

K- That's the connection of the fields, nothing you can do about it, it's the same process. It's a process, nothing you can do, because now you see the whole thing. It goes back to the point if you remember, I said, if we find people who have been in Jerusalem, at the time of Christ. If you put them in a position you talk about, they'll tell us exactly how Christ carried the Cross, and how he behaved on the cross, because they were there.

And I am sure in the future, not very far, many of the technologies developed, will bring that. We'll go into, you know now, you need the spies to tell you what happened, whose computers was stolen, what information was on it, we are going to release. You will go into the D of the STM, the RNA of the soul, and we'll hear what presidents plan, and to create what war, and how, and what was the outcome of it. It will be very, and I said, now we understand more about the T, you understand how realistic it is to create that position. We come to the point when we put the world leaders who claim, (2:52). like we had nothing to do with, we never created the biological labs, into the machine, and see the truth, their souls cannot lie, through the RNA of the soul. Then you understand a lot of things will change with this T. A lot of things will change.

Q: Most of them when they come back, they change their lives, they go the serving of people. They watched their actions, their thoughts very carefully, and they change to the ethics you are telling us, ethos of be careful not to harm, and do the serving of unconditional love, and they brought that result to change their life, after death.

K- Sometimes we learn from it. Sometimes we carry on with it. It's the condition of life we carry. (2:53:22)

Near Death Experience - extra (2:58:48 to 3:00:50)

Now when you are in near death you see these colors, colors you've never seen. But comes from interaction of the fields of the blood, which is not circulating, but is still M, but the soul is still active, and the brain is still in-between and still recording. If I can bring you back by circulating your blood, you'll remember, because the blood was there, and the brain was there, and it's done.

One of the easiest way, which I always said, which is never done, when you have somebody, and you know you get the ambulance drivers coming and pumping. Just connect the blood pump to the circulation of the blood, and pump it. You'll bring him

back, faster then pumping, and all this electric shocks, and the rest of it. If you can create that circulation, you'll contain the soul.

Any other question.

Q: .. (3:00). Some people who did not have a good action, but nobody knew about it, they go there, they see these scenes ,which is not like that, the beautiful things. Instead they see things like what we know about hell, like the misery, very cold there, hot, people are crying, like that..?

K- That's the emotion of. That's the interaction of the fields, which with what they are connected to. This is what is with them. How they connect, and why is the soul connecting to that position in time and space. What they had to do with it. Or why the soul has taken that position to see such a condition. (3:00:50)

END
