

Creation Part 2: How We're Created

Trillions of Years of Divisions

Family Tree of the Universe

Excerpt 427 KSW :

Times: 14:02 to :30:02 (16 minute)

Total time : 16 minutes

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (*interpretation by KF Brazil*)

INTRODUCTION:

This teaching is a further explanation of the video "Cycle of Creation," please watch that to understand it better.

There is a lot hidden in this teaching, it needs to be pondered for a long time. But it answers a lot of questions about how we are created, that man has been wondering and fighting about for centuries. When you read the phrase that, "we are totally and utterly created out of coincidences," this maybe very hard for some of us to accept. The religions told stories of creation, that were at the level of man's understanding at the time.

Unfortunately, they became something, solid and concrete. When science started developing, so did the idea, that there is no "God" in the form of what the priests were telling, because they could not explain it scientifically. Therefore, it may sound atheistic to say everything started as coincidence. Now with a deeper understanding of the Knowledge of Creation, Mr. Keshe has explained it very clearly if we can understand it.

It's not about whether there is a God, or there isn't a God. Because we already know in the plasma science, that we are created out of the essence of the Creation, which is the Creator. So we can never fall out of that. We are always in that love. But a mental veil can fall over our Soul and through concepts, we can believe that we are separate.

So what is left?

The coincidences are the M field interactions, that, then lead to the manifestation in physicality (P), and the variety and beauty of the play of creation.

From the Source, you get division, just like cell division, or the neutron. This is the fundamental pattern of creation - dividing and then creating more life forms. Our Earth is on one of these lines, or lineages from the Source. There are many lineages, and they divide and divide, and keep on dividing. These different lineages can join, and add on to other lineages, in that way we all become part of each other.

The fundamental building block of creation is the amino acid (AA), we are all made out of it. The essence of the AA is not the elements it is made out of, but the characteristics of Giving, Taking, Storing, and Communicating. The information of the whole creation is in the Souls RNA. Now we belong to the whole family of the Unicose. We are not alone. It feels like we are alone because we have been quarantined as a planet, until we learn to stop killing and destroying.

In the Universe we see at night or from satellite photos, there appears to be huge amounts of empty space. They say we can only see about 2% of what we call the U. This is because in physicality we are only seeing what the field strength of the man's vision can see. In reality, the U is jammed packed with life at different field strengths and dimensions. When we increase our own strength by going deeper into our plasma to a higher order, then we will be able to interact with these dimensions.

With the introduction of the Flight Enhancement Unit (EU) and through traveling by the Soul we will start to interact with our big family. These interactions will cause the man's intellect to be able to understand the creation.

Another piece of knowledge is that our own U is traveling on a spiral of a bigger plasma moving towards the Creator. With each life cycle that our STM goes through we add experiences and learn more, in effect, we increase our field strength and travel ever more closer to the Creator. This is the true meaning of reincarnation. Man can even take a shortcut and go directly to the center of the Creator's plasma.

It is a great relief to know with absolute certainty that we are not alone in the Universe, and that we have a huge family waiting to share everything with us. But first we must do our best and work hard to become peaceful.

Thank you and enjoy and share this teaching.

SUMMARY

Mr. Keshe started to share more knowledge about the way the creation works. How does everything get created? This is one of the most important question to ask in our ability to understand creation. From the new plasma (PI) technology (T) of the KF, we know, that the human race is not the only race in the whole of the U. Understanding this completely, will allow us to take the next step in our comprehension of the totality.

Up to now man talked about "Adam and Eve," as how man was created. As the sciences of man developed, they considered that the essence of the creation of man, started in central East Africa, and then we spread out from there. Of course, the rest of all the theories about creation.

But how did all this lead to the creation of man? Is the life of man an accident of time and position in space? Or do we put aside all our prejudices, and we come to understand the total knowledge of how it really is. In a way, up to now, man always thought that he came directly from the Creator, and started in one position, and that was south central Africa, and the rest of it goes from there. In the past teachings of the KF we explained a lot about these processes. (Please follow with the drawings of Mr. Keshe).

We are not created directly from the Creator, as we thought. Rather, we are connected on a long lineage of division after division after division, which has been going on for trillions of man's years. (These divisions are much the same as when a neutron splits into a proton and an electron. Another example, is like when you see cells splitting and dividing). In the U, these cycles, or divisions occur even when galaxies divide, or another U, or another dimension (D) in different shapes and forms. When this happens there is a release of energies, in which the end product is the combination of what we have become, for example, the center of the earth. One of these cycles has created what we call, the life of man in the position we are in.

When we study and start understanding the cycle of creation, and even in the historical data, we understand, that man was not created only in a single place on the earth. There is a possibility, that simultaneously a number of races of man, or races of beings were created at the same time across this planet. From all the (scientific data) and information we have gathered, we understand, that the cat, dog, dinosaurs, and the rest of creation, plus the trees and the man, have all started from the amino acid (AA). During the process of creation there are deviations and diversions from one to the other. The presence of different materials (or elements attaching to the AA), have lead to the creation of all the varieties of lives and beings on this planet.

The question that arises for all of us is, what happened in this cycle, or lineage from the Source all the way down to us, here on this Earth? Or what happened in the many other cycles that emanated from the Source, that are not on our lineage? Would some of those from the other lineages, meet up and join to our lineage, and lead to and become part of our creation.

If we find a combination of the energy source (H), a communication source (C), a (storage for energy) or holding energy pattern (N), and a line of gravity (O), then you can replace any of the elements in the AA with any other element. (What creation you'll get) depends on the time, place, and position, whether you are on the Earth lineage, or any other lineage from the Source.

(Mr. Keshe has revealed what the essence of the AA really is, not COHN, but energy supply, communication, storage of energy, and gravity. When these 4 properties exist you have what we call, AA, the structure for life. Knowing this we can replace any of the elements in this structure with any other one, to create a life form, and the different combination of elements will reflect the change. For example, the only difference between hemoglobin (blood) and chlorophyll is one has Fe, and the other Mg, and you get a different life form - variety. He then reflects it back to what has happened over trillions of years on our lineage from the Source, and all the variety of life forms created).

So in fact, life is not exclusivity of this planet. It never has been, and it never will be, because this ongoing process is still carrying on, with other lineages started from the same Source, and our own lineage is also going forward. (It hasn't stopped with the creation of Earth. The soul of Earth continue to create forward).
(The creations from the soul of this planet, their collective souls become a seed for the future creations).

If we understand the totality, then we understand the reality, and the fact, that we are totally, and utterly the creation of coincidences. If these coincidences have lead to the creation of life on earth, so too, life exists in all dimensions across the U.

The understanding that is happening now with the human race, and hopefully, once the human race understands it, will also come to all the rest of the creatures on this planet, and to those which comes from them. Now we understand, that we are members of a very big family, the community of the universe, which have all been created from the dimension of the creation. This is not an exclusive family, and it's not going to end, because the cycle of the Soul of the Man (STM) has already started into the creation of the next generation and next cycles.

If we are going to make the trip backwards to meet with our relatives, the ones we were created out of, then it's very important to understand all this. As I said, in your AA, RNA, and DNA, this information of the whole creation exists. It exists in the same way, that the information about the color of your eyes and how to behave, etc, exists in your DNA. The man's RNA is collective of the whole of creation. But, because we have not yet

understood about the rest of the structure of the energy fields of DNA and RNA in totality, we do not see, that it is connected to the whole structure of the creation we just drew here.

We need to understand this for the space and new spaceship developments. How would a soul from this planet survive and perform in another U, galaxy, and dimension. How would the enhancement unit (EU) perform and survive in other dimensions? Would we be able to tune our flight systems (FS), that when we go to another dimension we are not so weak in field strength, that in essence we are not heard, seen, or exist in the D of physicality (P), of that time, place, and position.

Does the STM and the P of the man need elevation in the strength of its own plasma (PI)? As we know the PI is like a spiral, do they need to go deeper inside their own spiral. Do they need elevation in the cycle of inner strength, to be able to manifest themselves in a higher order. Just because you cannot be seen, does not mean you don't exist.

Once you understand the strength of the emotion, would this lead to a new generation of more intellectually developed humans. (Would this result) from starting to travel back and forth between different dimensions.

Has the STM reached the point of understanding, that it does not need spacecrafts, but rather, needs to understand how to go within its own soul's inner sanctums, and then be able to revert back (to the physical D). Then man can manifest at any position, and any time (in the U). It's the man himself who decides, and not the machines.

Maybe the machines will be able to help us within our solar system, or our galaxy, but what if you go into a deeper essence of understanding? The reality is, that what the human sees through its matter state, human strength level of vision, makes up perhaps less than 2% of what we see, when we look into the night sky. (In other words, when we think of the U, we think of all the empty space there is in between the stars and planets. But this is less than 2% of what is really out there. Mr. Keshe drew the U, and inside it made markings of different colors representing the different field strengths of different stars, using green, red and black). The green cannot see the red, and the red cannot see the black, (and yet they all fill the space of what we call our U). We have to gather enough (inner) strength, to be able to see the different field strength existences within our U, and then we can manifest ourselves in these different strengths.

This is why space appears to be mostly empty, from the point of view of the man's vision. Where in fact, the universe is a multitude, a solid density of what we call, interactions and existence of fields. All these fields are centralized in our U, while at the same time our U is itself, on another spiral of energies, (of something bigger than our U), which will lead in one way or another, to the Source. The Source, is where the origin of the first energies started.

On the spiral that our U is traveling towards the Source, we will come across different galaxies and universes. (But to interact with these galaxies and universes will) depend on

how far we can go, in the terms of the energy. (To interact with these other universes, does he mean that it depends on how far, and how deep we can go into the inner sanctums of our Soul?). But essentially, we all carry the essence of the Creation, the Source, the level of where the life will start.

The question for Man will be, that in the essence of the spiral of his own Creation, (in what he can be seen in manifestation), does there exist a strength, within his own inner strength, which is at the strength of the Creator? Is this strength, a line of communication to the common Source? ("Does it find a seed of?"). If you understand this, and what we explained, then within the center of the STM, within the seed of the STM, sits the "Seed of the Creator." I made man in the image of Myself, because I am Myself within the Image.

This will bring a lot of complications, for a lot of people, (especially those with certain belief systems.) In the coming time, we will develop this space technology, not in the D of physicality, but in the D of what we call, "the field strength of understanding the Creation."

"If you are sitting here with the STM, then you want to connect with the soul of the others, which you see through the dimension of physicality."

When man opens his eyes and sees the totality of the vision of the universe, at a higher order, he'll see nothing but transparency of the fields in motion. This means, that you will not see the galaxies or the stars anymore, you will see fields in the dimension of the total motion.

In fact, this is the beginning of what we call, the teaching of the Keshe Foundation. (Man's understanding started) with the matter state existence, then he saw the elements, then he became atomic, then nuclear, and now he has become plasma. The knowledge of the KF has opened up the world of the plasma. In this knowledge of the plasma, we see the essence and replication of what we saw in the universe, (and this will also be the same) with the Creator. When we understand the totality, then we'll (enter the spiral of the Creator somewhere here, at the beginning. Then the process will continue to carry on).

In a way, we are just an energy transformation.

If we can add enough strength to our soul, in the next cycle of the creation, we might jump (closer to the center of the Creator). (Is this a deeper understanding of what man previously understood as reincarnation? That you continue to add strength to your fields with each cycle of life. These "cycles of life" are based on the Soul's manifestation of a new physicality in a different dimension. Not the physicality being reborn, as man has understood up to now).

But if we can gather enough (strength) to understand the totality of (the creation), and to be able to lock into the energy fields of the cosmos of the higher order, then one day man

can find himself to be here (in the center of plasma of the Creator), without having to travel the whole length of the spiral of creation.

What these teachings comes down to, is the fact, that Mankind is not alone in the U.

END

English Transcription:

K- .. we hope we share, (:14). more knowledge of the way the creation works. One of the most important parts of understanding of the creation is, how does everything create, how everything was created? We know from the understanding of the new T that, in a way, human race is not the only race. But to understand it completely, that allows us to bring us to the next step, that allows next step of .. comprehension of totality.

In the world of creation, in the science up to now, we walked, we talked about the Adam and Eve, we talked about the man being created or the essence of the creation of the man from central East Africa and then we spread and the rest of it. But where did this come, to lead to the creation of man? Is life of man an accident of time and position in the space? Or for us to put aside our prejudices, man becomes to understand the total knowledge of how it is. In a way, man always thought up to now, that from Creator, comes the man, in one position, in south central Africa and the rest of it. In the teachings in the past, we have explained a lot in these processes. (:16).

In a way, we are not a direct line connection. We are a connection of, of a connection, of a connection, and these connections have been going on for trillions of years of man's cycle. Each one being another galaxy, another U, another dimension (D) in different shapes or forms, releasing energies, that the end product of the energies, in combination of what we have become, the center of the earth. Even a cycle has created what we call, life of the man in one position.

But again, when we study and start understanding of it, even in the historical data, we understand, that man was not created in one position alone. There is a possibility that simultaneously a number of races of man, number of races of beings were created at the same time across this planet. Because we know, we have understood, and we have gathered enough information to understand, that the cat, the dog, the dinosaurs and the rest, all plus the man, plus the trees, all started from the amino acid (AA), and a deviation and diversion from one to the other, with the presence of different materials, lead to the creation of a varieties of lives on this planet.

Then the question arises for all of us is, (:18). what happens in this cycle (from Source to Earth), or what happened in many cycles that emanated from the Source. would some of these in the long run became in meeting this (line from Source to earth), lead to the creation of (a creation on the earth line). Or did some of this (another line from the Source) came back and it met in a point, that it lead to creation of (Joins to earth line).

In a sense, once we found a combination of the energy source, communication source, holding energy pattern and line of gravity, you can replace this (elements in AA) with any element, depending on the time place and position (on earth line or any other line from the Source). So in fact, life is not exclusivity of this planet. Never been, and in a way, shall never be, because ongoing process is still, is carrying on, with other cycles (from earth outwards) from the same Source. Where could be that these sources (creations) which lead on, could be collective, the soul of the planet, and the man, which is created out of it, as a seed.

But we understand now the totality, and if understand the totality, we understand the reality and the fact, that we are totally, utterly creation of coincidences, and if these coincidences lead to creation of life on earth, so life has existed, and exists in all D across the U. (:20).

The only thing, which now is happening with the human race and hopefully, once the human race understands it, will come to all the rest of the creatures on this planet, and the rest, which will come from them, is that now we understand we are member of the a very big family (Universal Community), which all creates from the D of the creation. This family is not exclusivity, and it's not going to end, because this cycle (STM) has already started into the next generation. The cycle of the Soul of the Man (STM), that it leads to creation of next cycles.

So what is important to us, if we are going to make this trip backwards and meet with our other fellow, and other people, which we are created out of, then very much as I said, in your AA, in your RNA, and in your DNA, this information exists (of the whole creation). The way, in your DNA, the information about the man and how to be a blue eyed, .. to behave exists, because this (Man's RNA) is collective of this (whole creation). But as we have not understood the rest of the structure of the energy fields of DNA and RNA in totality, we do not see, that we are connected to this, and to this, and the rest of it.

In a way, we have to understand in the development of the new spaceships, (:22). and space development, how would this soul from this planet. How would this system what we call, enhancement unit (EU) will perform in this (on another planet) would it survive?

Would it become the whole understanding of us, how to tune our systems, flight systems (FS), that we do not go to D, that we are so weak, that in essence we are not heard, .we are not seen, we are not existing in the D of the physicality (P) of the time, place, and position.

Does the STM, does the P of the man needs elevation of the strength in his own circle, as we know the plasma (PI) goes this way, does it need elevation in cycle of inner strength, to be able to manifest itself in a higher order. Just because you cannot be seen, does not mean you don't exist.

But once you understand the strength of the emotion, and understanding, would this lead to a new generation of more intellectual, intellect-ed being, as we start traveling back and

forth in different D. Does the STM, has reached the point of understanding, that it does not need crafts, but it needs to understand how to go within its soul's inner sanctums, and be able to revert back. So man, (:24). can be manifested at any position and any time. It's him who decides, not the machines.

The machines will help is, maybe within the Solar system, maybe within our galaxy, but if you are to go in a deeper essence of understanding. We understand more. The reality is, what we see as a human race, in one corner of this U, what is matter state (S) to the human strength vision point of view, which is something like less than 2% of what it is. So we have to gather strength to see the different strengths, that we can understand, and we can manifest ourselves in these different strengths, because the green cannot see the black, and the black cannot see the red.

This is why our spaces are empty from the vision of the man point of view. Where in fact the universe is a multitude, a solid dense, what we call, interaction and existence of the fields, which one is centralized, but at the same time this universe itself, is on the what we call, another spiral of energies, which will lead in one way or another, to what we call, the Source.

The first energies, the first origin started, (:26). where in this point, we'll come across different, what we call, galaxies, and universes and depending how far we can go, in the terms of the energy, but in essence, we all carry the essence of the Creation, the Source, the level of where the life will start.

The question for Man will be, that in a circle of his essence of Creation, in manifestation, which it gives to be seen, would that, within the inner strength exist, a strength, which is at the strength of the Creator, that finds the line of communication, finds a common source, finds the seed of.

If you understand this, and what we explained, then within the center of the Soul of the Man, within the seed of the Soul of the Man, sits Seed of the Creator. I made Man in the Image of Myself, because I am Myself within the Image.

And this brings a lot of complication for a lot of people, in the coming time. As we develop this space technology, not into the dimension of physicality, but in the dimension of what we call, field strength of understanding of the Creation.

If you are sitting here with the Soul of the Man, then you want to connect with the soul of the others, which you see through the dimension of physicality. When man opens his eyes and sees the totality of the vision of the universe, (:28). at a higher order, will see nothing but, transparency of the fields, emotions.

Which means you will not see the galaxies anymore, you will not see the stars anymore, but you see fields in the dimension of total motion. And in fact, this is the beginning of what we call, the teaching of the Keshe Foundation.

Because we started as matter state existence, we started what we saw as elements, we became atomic, we became nuclear, now we become plasma. In the world of the plasma, once we start looking, that we have opened with a knowledge of Keshe Foundation, we see the essence, replication of what it saw in the universe, and then what it'll be, in the Creator, and us in understanding of totality, sitting somewhere in a weaker position here (outer ring of plasma spiral), most probably but, in the process will carry on.

In a way, we are just an energy transformation. And if we can add enough strength to our soul, in the next cycle of the creation, we might jump here (closer to the center). But if we can gather enough to understand the totality of, to be able to lock into the energy fields of the cosmos of the higher order. One day man can be here (center of PI), without needing to travel the whole length and capuddle of the creation. (:30).

So what it comes to, is the fact, that Mankind is not alone. (30:02)
