

Mr. Keshe asked us to continue with our intentions for the 5plus1 negotiations. It sounds as though the process is going ahead, he mentioned we broke through, but we need to continue our part in elevating the souls of the negotiators, leaders and decision makers involved in the 5plus1, but we should add the world religious leaders and scientists into our intentions. (He also mentioned about a KS who is in the hospital, but didn't give any details, but said he was close to KF. Maybe we could remember him and elevate his soul to find peace.)

By what Mr. Keshe said, it seems the 5plus1 negotiations are becoming a point of control between the Islamic world and the Christian world, and somehow the religious leaders are involved in the background. We can really help by focusing more on raising the soul of the religious leaders.

If you have a chance try to see the North American teaching of Jan 2, 2022. One sentence sticks out.

The religious leaders are needed to get the people to accept the situation

This has huge implications even for ourselves. Perhaps unknown to us, we all have been conditioned to accept the denial of "Universal Knowledge." This is deep in our subconscious, the concept, that there is no being-ness - no soul - no Creator - and we can never be the soul. And this where the control comes through the religious leaders, because they are claiming to know. This inner confusion within the people causes them to accept what the religious leaders say - mostly out of "not knowing" themselves and the fear of being condemned.

We can breath this "not knowing" in - feeling it within us - and breath out love - peace - certainty of the soul within me. And we spread this field throughout all of humanity - and especially the world religious leaders - elevating their souls to look inside - recognizing the mistake - and accepting the truth. And we actually see - that they find the truth to stand up in the essence of what they claim to believe...

Let us all give our full hearts and emotion to this - and feel the enlightenment spreading across the planet.

>>>

The teaching Mr. Keshe gave on the meaning of the 21st December and Mitra is so powerful and hopeful. He also said, this is not a vision of the future, this IS what is happening, and it has already started on the 21st. After hearing this, one may feel great relief and think that, our work is done. Far from it. Our work has just begun. He also says, that we have brought the knowledge, but you have to understand it, and implement it.

We can take great encouragement, that our wishes and intentions are being heard, and are growing in strength. But we must keep it up now, and make it even stronger. Let us remember that, by accepting the field strength of change into our own life, we become like the orange in the center of all the Cups, and our fields radiate out to all the Cups. The Cups are humanity whose bodies are made of saltwater. Humanity will taste the sweetness of the peace in our heart, and the delicious flavor of the changes the new technology will bring.

Let's take a period of SILENCE now and continue to concentrate on elevating the souls of the 5plus1 negotiators, the members of IAEA, world religious leaders, scientists and the decision makers who sit in the shadows. "Take from our souls what you need," and find the peace within and allow the new technology to come out.

We feel with all of our emotion, that I am changing, and the change is taking place throughout the planet. More and more souls are joining us. The Universal Community can begin to see the light of the plasma glowing on planet earth.

Together let us feel our connection to each other to the "Soul of the UC" - to Mother Mitra - to Mr. Keshe - and give all our hearts to complete this work.
