

UPDATE

Just a brief update from yesterday's workshop. It is very important that we increase our emotion for peace and success of the 5plus1 negotiations. It's a little bit complicated to explain and it's full of twists. But it turns out that the leaders, especially Americans and Israelis, were deliberately hiding the following information from the public, so that they could accuse Iran of developing nuclear weapons, and put sanctions on them. This new information is that Iran is a supplier of enriched uranium, and this is why they have been developing nuclear technology, in addition to developing it for space T. All the medias of the world went along with this plan.

This is very important for us as KS to understand, so that we can stop being a slave to the lies of the media, and subconscious programming. It means the worldwide media has agreed to go along with certain narratives. Now, we along with Mr. Keshe are breaking through this wall of deception.

On Saturday, the head of the IAEA made an announcement during his visit to Tehran. He said, that Iran is not trying to pursue nuclear weapons. This is a huge advancement in our intention.

Iran always had permission from IAEA to sell enriched uranium only to Russia. Now we understand how we have been lied to and manipulated. This will not be allowed in the new world we want to bring through the KF plasma T.

Let us intensify our efforts in sending love, peace and truth to elevate the souls of those controlling this world, that peace may come and release of the technology.

>>>

First of all we would like to thank all of you who join this intention for world peace. It is beautiful to see how it is growing, and that there is a large core group who continues to participate day after day. In a way, through the dedication and love, we have created a soul, or a plasma as our group. The G fields are what pulls us together to continually show up, and we are gaining "weight" like the EU in Austria, and the M fields are our intention to achieve world peace and release of the technology, by elevating the souls of the 5plus1 negotiators, world decision makers, religious leaders, scientists, and ourselves - the inhabitants of planet earth.

It's only been a few months or so since Mr. Keshe suggested we join our soul powers together to help the negotiations. Now they have again asked the KF to join the negotiations, because the KF technology will be the basis for the peace and sharing of the knowledge among nations. This is exactly what he said would happen months ago, when we were still wondering if such a thing were even possible. Let us continue in our loving intentions, as we are truly part of these amazing changes taking place in our world today.

The declaration of Methi, the coming of the Messiah, it was already declared last week. It means man has matured to be able to understand the Knowledge of Creation, and we all become the Methi, when we open to it, share and understand it. This is exactly what we are doing in this group, we are sharing the love and knowledge of Methi, through our souls. We can also declare it in physicality, it is up to us to decide.

SPECIAL INTENTIONS:

We have an additional request for our intention tonight. In the 417 KSW Mr. Keshe said that, "we wish, and would it also be the wish of KS and the Universal Council (to have the same wish.)" Remember he said the UC is an independent organization and he cannot tell them what to do. It is up to us to listen, feel and understand.

If we all could join Mr. Keshe and the Messengers in wishing for the US military to deliver the first flight EU to Tehran, Austria and Arizona. Then the other nations would also feel proud to take the EU home with them. In this we also wish from our soul, that our own people will lovingly request our governments to accept the EU.

>>>

We can take great encouragement, that our wishes and intentions are being heard, and are growing in strength. But we must keep it up now, and make it even stronger. Let us remember that, by accepting the field strength of change into our own life, we become like the orange in the center of all the Cups, and our fields radiate out to all the Cups. The Cups are humanity whose bodies are made of saltwater. Humanity will taste the sweetness of the peace in our heart, and the delicious flavor of the changes the new technology will bring.

Let's take a period of SILENCE now and continue to concentrate on elevating the souls of the 5plus1 negotiators, world religious leaders, scientists and the decision makers who sit in the shadows. "Take from our souls what you need," and find the peace within and allow the new technology to come out.

We feel with all of our emotion, that I am changing, and the change is taking place throughout the planet. More and more souls are joining us. The Universal Community can begin to see the light of the plasma glowing on planet earth.

Together let us feel our connection to each other and to the "Soul of the UC" - to Mother Mitra - to Mr. Keshe - and give all our hearts to complete this work. Through our soul let us all be the Methi.
