

Thank you, to all of you who join this daily Intention for World Peace and the release of the new plasma technology by KF to humanity. It's important that we all gather here each day with devotion and understanding of what we are doing, as we are getting closer and closer to the "Great Change" humanity will go through to bring the understanding of the Knowledge of Creation, which will sweep across the planet like a hurricane of love and wisdom to live together serving each other and all beings across the Unicose. Those who come here day after day, it's your Soul, that knows what is coming and wants to be a part of it.

Since the Birth of Mitra on December 21, 2021, we have gone through huge advances in our understanding about creation. We never knew we had a Soul, which we call, the STM, let alone another soul called, the STP, and the physical souls of the body. Now we know, because we have witnessed it in the flight test trials in Linz. It's a science open to all of us. Becoming aware of these Souls within us, is what is traditionally called, Enlightenment. Now enlightenment can be facilitated through the flight Enhancement Units (EU) in Linz, and through the transmutation process over the Mobile phones.

It's important that we as Knowledge Seekers (KS) understand what we are doing and open our hearts and mind that our Soul can be a part of it. That is what we are doing continuously with our power of intention. We are elevating the soul of the World Leaders (WL) to accept the change, and one of the vehicles of the change is the peace negotiations ongoing in Vienna known as 5Plus1. These are the major countries involved in nuclear technology and they will adopt the Plasma technology and release it around the world. Iran will be the key player because it is already so far advanced in developing the Technology. Mr. Keshe confirmed that we should continue this practice. He even stated something like, the soul of our group has the power to see it through.

So now we know why we are here, what we are doing, and the importance of continuing to do it, but also to increase our emotion of love, devotion, openness to bring the change first in our own lives.

A few weeks ago it was shown that we have access to world leaders through the Soul and that we can bring them to the EU in the Linz Center for elevation. This does not mean that we have direct access to change their individual Soul. We are not changing the WL to fit into what we want. It reminds me of Mahatma Gandhi, when he tried to teach his followers that he loved the British, and that they should not use the tool of "non-violence" as a weapon against them to get what they wanted. When we focus the fields to elevate the Souls of the WL, we are not directly accessing them and changing them. We are creating a condition where the field strength of peace is becoming stronger. It effects them in the way they perceive themselves and what they are doing.

Remember, for a simple person like you and I, it would be almost impossible to meet one of these leaders. They are protected against other ideas. Now with the tool of this technology, we can access them by the Soul. Because we are made out of the same

material we can connect to them. We can ask them, "what are you doing, why are you killing us and enslaving us." We never thought that this was even a possibility. We have discovered the immense power we have within us to make this change happen. This is also why each of us has to participate and build up the M field strength

Recently, Mr. Keshe sent a pulse of Love so strong that it lifted him off the floor, and the EU in Linz is turned on to continuously send its M fields around the planet to elevate the soul of the planet. Our Intention Group also has a soul that we are a part of. With our Souls and wishes, we join together with these other fields and feel within us this immense force of Love pulsating throughout the planet and elevating all the Souls. We feel it happening within. It is reality. We are part of it, and it is happening now.

All our intentions spoken and unspoken are automatically included in this plasma field. Now let us take a period of SILENCE to intensify it.
