

# **457th Knowledge Seekers Workshop**; November 3, 2022

(Quick Index 27 pp, Introduction Topic Index Transcription (part 1 got lost), Proofed Need to do; Key Phrases, Words) (Auto transcription from Elias)

Rapid release of T Canceled; Center of STM and cells imprinted with genome of this U - other fields layer on top including STP; Cosmic Rays will be added to all systems - become enlightened; Receive fields through color of plants or beings; Souls communicate through colors like Gans; Gas in Nano State - Gas Units - color of Galaxy - Cosmic Rays; Galaxies like body of Man; Feelings interaction between STM & STP; Islam forced on Iran - women and scarf's; Putin and Ukraine; Powerful Men in Linz - now we understand what needs to be done; Relation with NASA; Matter state plasma scientists mind is fixed - KS open to free plasma; ALS will to live switched off - physical switch can't be turned on again - Cosmic Rays can switch on; Recovery time from 10 weeks to 10 hours

## **Topic Index**

Rapid release of T through international organization canceled - money refunded; 80% of energy we receive from environment includes fields of solar system, galaxy, and U - We are made from totality of all these fields; In center of STM and every cell of body is the genome of this U, it's a building block that always stays there - other fields come as layers on top of it down to the STP; We can travel backwards in time along the bandwidths of field strengths to the origin - we can also travel forwards into what we will become; By the fields of our Soul that we have gathered we can see what we will establish; Add Cosmic Rays to new flight systems - connects us to everyone and everything; We become aware of their Souls as much as they become aware of ours - then we become balanced with our environment; Don't need to kill to share in energy of other beings; The color of a plant that we see are the fields that they cannot absorb - it becomes available to share; For example the green rays of grass are the fields the grass cannot use, they become available for us to receive; Absorb the fields like the Orange on top of the Cup of water; Communication with other plasmas creates a color from the interactions - which then has a meaning - fields may not match then move on to somewhere else; We are one of the arms of the spiral of a plasma - if we move the others have to move with us - learn to accommodate; When we come out of new EU - would we rejoice to become man of peace - or try to abuse others with knowledge gained; We will come out of the systems changed - the emotion will be touched - what would you like to be - new capabilities & knowledge; Can I become so transparent - diverse in energy - be part of Unicose; Will you become humble or arrogant; Through Cosmic Rays become enlightened - connect to everything; Feel a tree understand what it is saying to you; Another being far away calling for help; Not limited to life on this planet; When travel U bring fields of it home - like dust on skin; This why feel at home in strange places "dream of"; Do we punish world leaders or elevate them - reach them through another dimension (D); Become members of UC care about U; Man needs time to understand new D; Manufacturing team will be first to receive Cosmic Rays - gradually become member of U Community - in fields all day; Privilege to work in KF factories - cosmic rays -

working will be a pleasure; More benefit to people outside the new EU; Add cosmic Rays to old EU; Knowledge is complete - time to play with it; It will be a right to go into new EU; No government can block it - built by the people for the people; Not for elite to have personally - we all become equal; Problem will become not having enough CO<sub>2</sub> - instead work with Cosmic Rays; Plasma Gas Unit were first Cosmic Rays units - none understood; Gas in a Nano State - Gans; Cosmic rays >> Cosmic gas; Colorful Galaxies shown by NASA - Gas in Nano State within M field of U; Man can produce these Gases; Hide so much knowledge in teachings - look back it was all put in the teachings from the beginning - now you understand; Man is "wheeler" race now become spherical race - STM is a sphere - can't see it - confirmed by fields of U; Huge amount of hidden knowledge in this teaching - KS have to unravel; Have no choice but to understand - become constructive member of UC; Go beyond MaGravs and Gans - interactions and combinations of fields; Rotating Gans balls was for you to understand fields; Wisdom comes out of true understanding - be it love, physics, or cosmology - how are the cosmic rays fed; Cosmic Rays contain all the different combination of fields you need to exist for certain parts of STM; Effects of the fields = is secret of Creation; Colorful space pictures of Galaxies - different color represent different organs of Galaxy like heart and liver - colored gases D of Life; Our bodies have skin as boundary - Galaxies & U have M field boundaries non-tangible but keep entities separate; Don't see finger hanging next to neck; Next phase of teaching is about the work of U, Unicose, and U Community - prepare for life in U; Will laugh about neutrino concepts - only fields; Man has to develop knowledge & technologies to tap into the universal Cosmic Rays to benefit mankind; It took man hundreds of thousands of years to migrate from central Africa to northern China and Canada - now in seconds - knowledge was always there - need to mature to use it; Interaction of Cosmic Rays with STM will create new D; Need to be aware how fields interact in U - one place good - but another not fit; Man can pass other creatures of U in understanding Totality;

Plasma Mirrors - explain use in transmutation later; German doctors start working with KF T; Soon Italian doctors start; Here to serve - don't be selfish - human state; Thoughts are manmade - feelings are interaction of fields between the STM & STP - that's why psychosomatic conditions occur; News using emotions in Ukraine and Iran; Long talk about Iran Zoroastrian nation - Islam forced by sword to convert - now forcing women to cover is another enforcement of Islam on Iranians with gun policy; Man cover eyes so women remain free; Don't burn scarf - give as gift to soldier - not fire; Religion and politics hiding their control over the population; Oppositions to T don't go beyond physicality - beyond is accommodation - no point of conflict; Brazil election violence - outcome in short time; With new T countries cannot force people to do things - can easily leave to another location; Countries will strive to attract people to live with them - not hold them in; World leaders will be forced to be just and correct; Need time to learn and apply the new T - can't build car on first day of school; Have to learn how to use the Soul; Man fought for freedom of choice - now fight for freedom of Soul; Only you can set yourself free; Birds and fish migrate without passports or kings - so to STM will be free to move; Mr. Keshe gets all the news of the atrocities around the world - sometimes don't like to live; America pretends to respect life on surface - behind has no respect; We don't encourage any group against another - we bring understanding; History of Islamic

world - Mohammad allowed 1 man 4 wives - all the mayhem began - before women were in control; India not able to control because of its diversity; Dress codes do not cause women to be more educated because of shame for not having clothes and makeup - they want us to believe this story; Iranian men have to go to military for 2 years - women get ahead in education; Mr. Keshe educated with orphans - everybody was equal - learned not to create privilege; He called children by first name - treated equal with adults; Iran ruled by outsiders from Iraq - rip nation apart - enforce ideas on people; Iranian security shielded him from seeing mistreatment of women; We cannot force our decisions on people; White House to decide about visas for transmutation; Need few weeks to finish new Systems of Cosmic Rays; If elevate 1 cell in body whole body effected - same with Unicose; All Souls have capability to elevate; Started to elevate Soul of the humanity in a very specific way; Putin realized he has lost war - was it because of soul elevation?; The souls of World leaders have been at Linz and have received elevation; Their physicality will respond like when you water a plant - you slowly see the growth; The elevation will expand out from them; But don't look at it as - just because you do something then you think you should receive back something - is at the strength the Soul can receive?; "You can take a horse to the water, but you can't make him drink."; KF receiving videos from China, Ukraine, and Iran; Elevate the whole of the nation; Fox News decides not to report; Peace comes with balance between STM and STP; Not making new prophets or religion - all are equal; Humanity is receiving energies but not aware of it; Powerful world decision makers visit Center - "now we understand what this technology is, and what needs to be done"; They felt the knowledge and what it carries; These people were part of organization to spread T - but international pressure too great against; After visiting Center their conclusion was - is humanity ready for such a thing; Top military people secretly visit Center; NASA and other space agencies people listen to teachings; Russians far ahead of Americans - deeper understanding of plasma - but want to become powerful - if join with KF would learn a lot; Matter state plasma scientists from universities can't understand free plasma - can't get beyond their PhD - not looking for true science but to promote own ideas and they lead organizations their way; Whereas KS are looking for more knowledge - they are open to learning about the fields and the Soul which is energy center; Huge gap between different viewpoints of science. Their cup is tainted with the wrong knowledge - they need to clean their cup so new knowledge can come in; KS have "virgin brain" in plasma - can learn from Mr. Keshe; Best matter state plasma scientists in world are Iranians - countries secretly violate boycotts to hire them - but they are mainly matter state plasma - look at neutron and electron acceleration like at CERN - they can't accept using free plasma as Gans to process disease or space flight; KS work is only drop in ocean - need many drops to create new ocean; Man has to change inside himself otherwise blame others and goes back to old ways; After 15 years man finally understands problem was within himself - turns 180 degrees; Elevating doesn't mean becoming bigger - means understanding the totality; "I think the point of change has to come progressively - cannot come as a shock"; Plasma is life; Not like NASA all types of KS brought in based on knowledge and Soul understanding; Had to bring all people in - not do things in isolation; Other beings brought into EU; Important teaching on ALS;

ALS and MS psychosomatic diseases with a wish to die; KF has done a lot of work with these types of illness - new T is best for processing; Not every wish ends up with ALS; Doctors use psychological medicines, but never look at Soul, emotions, and the fields; The wish to die is so powerful and happens in a split second and it turns a switch off - that switch is will to live and emotion of life; Switch gets locked through the emotions and can't be reversed; With Cosmic Rays we can turn switch back on; Brain and life systems have to be rebuilt so it takes time; Massive changes coming to China; Call back original EU given 3 year ago for testing; With Cosmic Rays added to EU instead of 10 weeks recovery - can do in 10 hours.

## **Introduction to 457 KSW -**

### **Cosmic Rays will change humanity beyond imagination - "The Switch"**

This workshop started out with the news that the organization that was to help KF rapidly release the technology across the world could not do so, because the international pressures were too great. It was not said what the pressures were. Was it the Vatican and the Elites? Anyway, they will refund the money.

Out of this attempt came something very important. Two very powerful men who were part of this organization that was to release the T, came to Linz to see the flight systems firsthand. They were very touched and taken aback. Now they understood the power of the knowledge and what is at hand. They concluded their visit with the question, "is humanity ready for this?" This is another huge indicator that we are approaching that "tipping point," for humanity. Later Mr. Keshe said, the change has to come gradually and not with a shock.

The teaching part of the workshop went deeper into the Cosmic Rays and what it will mean to humanity. First of all it's important to know that the center of every cell in our body and the STM is registered with the genome of this particular U. Wherever we travel to, our base remains the same. We are made up of a totality of layers of all the fields from the solar system, Galaxy, and U, and the STP and others.

We can discover the strength of the fields we have gathered and what we will be able to create, and where we will end up. Through the Cosmic Rays we get connected to everything and everyone. It works both ways, they become aware of us, as much as we become aware of the other Souls. Gradually we'll learn how to communicate with other plasmas and field forces in the U. Communication is done through colors and how they change. We are like an arm in the spiral of the plasma, if we move the others have to move also. Therefore, we have to learn how to conduct ourselves in the U. This is also why the teachings are now moving more towards how to live in the U and the U Community, so we can become a constructive part of it to bring more advancement. At this level of existence everything will be done through the fields, this is why we have to learn how to work with the fields, and go beyond the matter state existence.

The new EU will be coming very soon and we have to prepare ourselves for their arrival. When we come out of the new EU it will touch our emotion and knowledge and it will

change our Soul and our character and bring about a new dimension. We'll become aware of more knowledge and capabilities within ourselves. How will we handle it? Will we become more humble and be able to explain the joys of it? The enlightenment comes through the connection through the Cosmic Rays (CR) to everything, and not just to the fields of this planet. It's like if you have seen one of those cartoons where the trees start talking to you. Our awareness will not be limited to this planet, but will extend to beings throughout the U. This connection through the CR also explains why people in the flight systems who reported going to strange places in the U said, they felt like being at home. Even when we travel through the U in the dimension (D) of the Soul, we pick up specks of cosmic fields, like we pick up dust on our skin.

The KF manufacturing teams will be the first to join the U Community, because when they build these new EU, they will be in the CR all day long. They will receive the knowledge faster, this is what we said, it's a privilege to work for KF. The manufacturing places will be seen shining off in the distance. More people will benefit by being outside the systems, rather than inside them. Going into the systems will be a right, and not just a privilege. The governments will not be able to block it.

The knowledge is complete, now it's time to play with it and enjoy the beauty of creation.

Part of the CR technology was already shown to us in the Plasma Gas Units, but we didn't understand it. Gas in a Nano State (GANS). The colorful space pictures of the Galaxies are the Gans's created by the interaction of the elements in that galaxy. They are gases in the Nano state in the M fields of that galaxy. The knowledge was given to us right from the beginning with our Gans Boxes, we just needed to ponder it deeply and become aware of the essence of the field interactions. I am sure we all felt it, just by being in the presence of the first Gans we made. When he said, we are made up of the fields of the SS, galaxy, and U. Does that mean we are sitting in the Gans Box of the U? Then who put the coils in the box? Was it the Creator? Is this what is meant by the Totality of the knowledge, when you can bring the essence of creation down to the simplest understanding.

Mr. Keshe said, that they have hidden so much knowledge in these teachings. We just have to take the time to study them, and give our hearts and life to it. What else could possibly be more important than this. The beauty and the joy of the knowledge comes when you spend time with it. He also said, when you teach others what you understand, than you get enlightened by it. By trying to push the matter state with the Gans's and the MaGravs you keep yourself stuck there, from understanding the totality. He wondered to himself - when will our KS become wise? Wisdom comes out of true understanding of the knowledge, be it love, physics, or cosmology. So even by observing and deeply feeling our relationships we can come to understand how the plasma fields interact. This knowledge doesn't come from books or PhDs, it comes from the simplicity of living an honest and truthful life full of love for oneself and others. It's that simple - even "Cosmic Rays" is that simple. The Love of the Creator for His Created.

This teaching is like one of his hurricanes of knowledge. You could spend many days with it. Let me try to focus on a few more things. The birds don't have passports or a king. When the leader is tired he goes to the back and a new bird takes the lead. This is all done by the Soul, not by fake voting. This is how we will live through the STM, but we have to practice it in our lives. Just like he said, we have to practice learning how to use the CR. Again it comes back to the Ethos of Mitra, Think, Speak, and Act Good.

A KS couldn't understand that "we are here to serve and not to be served" is actually serving yourself. It's for us to rise above our human thinking and let the Soul guide us, it's so full of bliss when you do.

There is a lot here about current world conditions in Ukraine and Iran. It could very well be that the KS have reached Putin in elevation of the Soul. Hopefully, we will also reach the Pope so a true settlement can occur. About the problems in Iran, is that religious people from Iraq are ruling Iran and trying to enforce their ideas of Islam on the Iranian people, and forcing the women to cover themselves is the issue used to try to get their way. In both international conditions, the Media is using the emotions to fire people up, so that they will not think clearly about the true issues at hand. There is a lot of hidden knowledge about how to handle world politics. With the new EU we'll be able to leave a country that doesn't behave correctly towards its own citizens. They won't be able to force through lack of wealth and border control, we'll be free to move through the Soul to where we feel comfortable to live.

Mr. Keshe shared the pain he feels with having to witness the atrocities humanity is doing to itself, so much so, that sometimes he doesn't want to live. He is trying so hard to quickly elevate the STM, but there is so much resistance to change. But nevertheless it is happening on the Soul level. There is a lot to study. Peace occurs when the STM and STP find balance with each other. This elevation cannot be forced from outside, otherwise the man will go back to his old ways. We have to keep motivated even though he said, what we as KS are doing is a drop in the ocean, and we need many drops to create a new ocean. We have to understand this on a deeper level, and that our efforts are reaching the STM, and we all will feel it. It takes time, but we are moving forward. He's in direct contact with NASA people, they are aware of the progress being made, and top military people have come secretly to see the Linz Center. The scientists don't want to let go of their power that is established in the old knowledge that doesn't fit with the reality. And that KS have a "virgin brain" towards the T, because we are looking for something new. We are bringing the change forward.

A wonderful piece of knowledge has been shared that will bring relief to a lot of people suffering from psychosomatic illnesses like ALS, MS, Fibromyalgia, Parkinson's and others. What is so amazing is that Mr. Keshe explained, that these illnesses get started by a wish to die. This would come out of living in a traumatic and abusive condition, that you reach the point of desperation where you can't take it anymore. You tell yourself in a split second, that's it, I want to die. This creates a physical mechanism or a switch in the body, that gets turned off. The emotion of life and intention to live gets switched off, and

it gets locked. It cannot be switched back on. Now with the new Cosmic ray technology we can switch it back on. This will change a lot of peoples lives.

I would like to share with you my experience. I have seen this in working with people, that this kind of "switch" can occur with issues other than wanting to die. When a trauma happens to us in childhood we can in a split second make such a powerful will, "I will never experience that again," and it actually becomes like that. And they end up suffering their whole life without knowing why or how it started. They keep on repeating to themselves "I will never experience that again." The sad part is they don't know they are doing it, it's unconscious and their emotion is blocked. I mean it is like concrete. So I hope this new development with Cosmic Rays will be able to help these people too.

Thank you for listening. Please spend a lot of time with this workshop.

## Quick Index

We have an important announcement to make and it's the reason for delaying Thursday teachings these past 2 weeks. For close to a year we have been negotiating with an organization to bring the technology out in a very rapid way internationally. We invested a lot of money and time in it, and many of you helped us with donations and loans. We tried our best and the organization tried their best, but the international pressure is too much, and we will not be able to do it. Maybe mankind is not ready for it.

Therefore, the organization has agreed to refund the money back to KF, and we will in turn refund those of you who gave us loans. Thank you very much for your gracious help, and we may need your help in the future if there comes (a new opportunity).

We explained to you before, that man takes 20% of the energy from the food he eats, and the other 80% comes from outside, from the environment. (But the environment just doesn't mean your immediate surroundings, like your room, it means the Solar System, galaxy, and the Universe you belong to. We are effected by all these fields. We are made of the totality of all these fields. It's like when you travel on a big cruise ship, you go from place to place, but you always remain connected to your cruise ship, which is your base. You are registered to it.

Mankind is registered with (this) universe. It's within us, in the center of our Soul, and within every cell of our body. It's a building block of what we call, the genome of the universe. We are part of it. (As we move around, that tiny, tiny, powerful center stays in its place, and then the other layers come on top of it. You have the field strength of the galaxy and the Solar System. Then the strength of the Soul of the Physicality (STP), and then the rest of it).

(We can travel both ways along these bandwidths of field strengths. We can go down into the roots, or back to the origin. But we also can go the other way, further from the origin. What will happen to our Soul in the future. We have the capability to understand what strength our Soul has gathered, and through that strength where we will end up, where it's

going to finish. We can see where it's going, and how it's going to live. By the fields of the Soul that we gather, we can see what we are going to establish).

In the new flight systems, that are getting built, we can add the cosmic rays and then we get connected with everything and everyone. We become aware of their Souls, as much as they become aware of our Soul. In that position, we become balanced with our environment.

(When I receive energy, the part that I don't need I share and make it available to you. We don't need to kill an animal to share in what it has. If an animal eats green grass, I don't need to kill it to share in the properties of the grass. By looking at it or walking on it, I can take the energy it doesn't need. The energy it doesn't need, or which it can't absorb gets reflected to me as rays of color, in this case green. Then I can convert that field into food).

(What does science say about colors? That when we see for example a blue plant, it means that blue is the color, which the plant cannot absorb, and therefore reflects it, as the color blue. This "blue color" is then is what is available for us to use. Plants don't just give us their beautiful color and smell, they also give us their energy fields through the color they reflect to us).

We never understood the whole of the science, we only learned part of it. Why is it that, when we look at a beautiful flower, we get enchanted by it. Why do we feel good by certain smells? (Are these certain energy fields that we need?) Mankind will come to understand more and more about the process of his own Creation. We will come to understand why we like tomatoes and what the color red means to us. How much of it can we absorb? Again it goes back to the "Orange on top of the Cup of Water." (Gans's are placed around the Cup, and the Orange on top transfers its fields and emotions to the water, which you taste when you drink it). We become that Cup of water, and the tomato becomes that orange.

Gradually we'll start understanding how to communicate and interact with other plasmas, with other fields forces in the U. The color that comes out of the interaction of your soul with their soul, tells you if they love you, or whatever it means. It tells you if they want to be with you, or if they see that your field strength doesn't match theirs, and you could be a danger to part of their life, because you might take some of their strength fields that they need to survive. They might say to you, "you cannot have this field from me, because this is the cornerstone of my life." Then you move somewhere else. You don't take it from them because your soul understands the energy, and what would happen if you took it from them. For a lot of us, this brings a totally new understanding, that we are part of the Totality.

On the back cover of Book #3, you see the fields of the spiral coming open. You are one of those spirals. The others depend on your position, time, and place. If you move the wrong way, they have to go with you, (because you all are connected through the fields

and accommodate each other). Now, we understand how man will conduct himself in the new system.

We will see many of you going to different corners of this universe with the new flight Enhancement Units in Linz. You will become the travelers of deep space, and also travelers on this planet. We will achieve what we thought was unachievable. But the most important thing is, how will we feel when we come out of these systems? Would we rejoice into what we have become, "men of peace, wisdom, and men who have the culture of Universe." Or would we try to abuse the (others, because we think nobody else has this knowledge?)

(We will come out of these systems with a different character and characteristics, according to what we want to be. We've seen it, that when we go to a movie that really touches us, and then when we talk to another person, it also touches their emotion and their knowledge. It changes us in the dimension of the Soul, our behavior, and the content of our life).

(The new flight EU will bring you that same opportunity, where you can ask yourself what you would like to be? What would you like to do? Now that you have become aware of more capabilities and knowledge within yourself).

(It's for us to understand what will be the future of our Soul. What will this Soul create in any dimension? It does not need to be physical. It does not need to be total energy. Nor does it need to be a combination of both). It's understanding the essence of Creation.

(What will this new energy make out of me on this planet, or in another position in the Universe, or as an energy fields traveling the span of the Unicose? Can I become so transparent, so diverse in energy, that the Universe is not big enough for me? That I want to be part of the Unicose), I want to see what's beyond this Universe.

In the coming months, as you go through the flight EU, or as part of the Mobile program, transmuting from one position to another, (some of you will come across this new opportunity. How will you handle it? Will you understand it and become humble enough to be able to explain the joys of it, and not to become arrogant because of it).

The enlightenment within these systems, comes as you connect with everything. It's because now you connect to the cosmic rays, and not to the fields of this planet, nor the fields of the cells of yourself. (Then you'll be able to feel the tree and understand what it's trying to tell you. You will feel the man standing next to you, and the dog walking across the street, or another being on the top of another mountain, who is in trouble in the dimension of physicality. Another strength of the field of the Soul reaches you, and you understand that he needs help). We will become aware of many things, and not necessarily limited only to the life on this planet.

(The way we feel the plant here on Earth, we'll feel another stranger, in another galaxy, Universe, or in another dimension. We can connect through the fields of the Universe.

Now, you understand, when many of you went through the flight EU simulation test, and you went to different places, but you said, you couldn't explain what you experienced. You said, something just happened to me, there were strange characters, I was part of them, I felt like I was home).

What did you bring from that home? Did part of the fields of the Unicoise (as a cosmic ray, that came from them and is a part of you? Is that why you feel connected to them and see yourself as part of them?

(Like the specks of dust that fall on our skin, we receive specks of the fields of the Cosmos, through cosmic rays within our brain, and within the cells of, what we call, the Soul of us. Mankind needs to look beyond the dimension of his skin. Mankind needs to look beyond the dimension of this planet. Mankind needs to look and see how he is part of the Totality).

Do we need to punish the world leaders for what they've done wrong? Or do we elevate them, that they walk away from what they've done wrong? Do we have to go to another dimension to reach them? (We tried to reach them through the soul of the language, through the Universal Council, because they understand the culture of their leaders). Now gradually, as you become Universal members, you become members of the Universal Community. It's not any more just to care about your next door neighbor, or somebody you know. Now you care about everything which exists in this Universe. (All in due time. Man needs time to understand the new opportunity and the new dimension he has been given).

As we develop these new technologies we'll see our own manufacturing team go through these kind of changes, because they're in (the fields of the system. It's not that they just build a system. They are constantly in the room with the system).

We see the change in the knowledge and understanding of the KF manufacturing team. Because they are working in the fields of the system all day long. Gradually they'll become members of the Universal Community. They are the front runners of receiving the cosmic rays. They are joining the cosmic rays, are being part of them, and they are becoming aware of what is happening.

(When you come to the Center you spend a half an hour, but they spend the whole day working on these systems). Then you will see, they'll become knowledgeable in the size of the Universe much faster than you, who only spent a half an hour in the systems.

It becomes a privilege to work in the factories of the KF, because you are working putting the systems together in the dimension of the Universal cosmic rays. Even though it's like a conveyor belt, that they use in car production. But this time this "car," is not just the door, window, and the chair, it's the total environment, which creates both the inside and the outside.

Then you'll understand, how it is that mankind will see working as a pleasure, and not as an obligation. What would you like to be, (and at what level would you like to be it? How much would you rely on what you receive? The manufacturing places will be seen shining off in the distance? Then you will know, that, that is the place where the systems using cosmic rays are being developed). They are putting them together for the others.

(Every EU will carry this technology and benefits. When I was discussing this with Jon regarding the 12 EU for Arizona, I explained this in a very soft way to him. That more people will benefit by sitting outside the systems, than inside them. They will be benefited more by the different fields they interact with. In a way, when you buy and run these systems you'll be benefiting more the people outside, then the ones sitting inside the system).

(In the future we'll mix the Body and Material EU, and we'll create the fields of the cosmos inside them, so that all the man needs for life in space will be met).

In a way, the knowledge is complete.

In a way, if you understand, now it's how we manipulate it. In a way, where do we go to see this, and how do we enjoy the beauty of the Creation?

Very, very soon, going into these new flight systems with cosmic rays will not be a privilege, it will be a right. As the systems get developed, we'll be reaching that point. There shall be no government or no structure which can block it, because it's built by the people, for the people, for the citizens of this Universe, and not for the elite.

(A crown prince asked me if he could buy a system for himself). I said, your Excellency, your Majesty, it's impossible. I built these systems for humanity, you cannot have one on your own. It cannot be done. Because then we become privileged. Instead, we all have to become equal. The new EU, which are coming into operation in the coming weeks, will become the basis, or the foundation for what is to come. (We will no longer burn fuels, rather we'll use the fields of the Universe to move from place to place).

(As part of our negotiation I was showing some very powerful people the EU in the Uno Center here in Linz. At the moment, the problem in the world is global warming, so I explained to them my biggest worry, which is that in a few years time we'll need to produce more CO<sub>2</sub>, if we take the CO<sub>2</sub> out with these systems, just to balance what we actually need for our use on this planet. In less than a decade, with the amount of CO<sub>2</sub> we propose to convert, we'll end up with a shortfall. What then are the calamities we'll have to face?)

Or instead, from now on we learn to work with the cosmic rays and fields. (If we understand the operation of the Gans's and that within the Gans combinations, we can create the gases. Maybe none of you really understood what we were showing with the Plasma Gas Units, but just looked at it as something to make gas).

Gas in Nano State ... or GANS

cosmic rays >> cosmic gas

Understanding of the Totality of the fields of the Creation.

The beautiful pictures produced by NASA shows these colorful explosions and colorful Galaxies. But where do these colors come from? From gases in the state of the Gans created by the interaction of the fields of the elements of that Galaxy. (Remember from the past teachings, that you identify a Gans by its color).

When you look with your most sophisticated telescopes into the depths of the Universe, you see different colors, these are gases in the Nano state, within the M field of the Universe.

Now, for the first time Man can understand what he's dealing with, and that he has the capability to produce these gases. (We brought the knowledge to you on the banner of the Plasma Gas Units which produce gas that you can burn. But hidden within it, is the knowledge. This is the beginning of the work with the Cosmic Rays).

I had to play the only game the children understand how to play in the nursery, (because they are not educated to understand the university level. The "University" of Knowledge of the Universe. This is what is on the table. Man is a toddler in the nursery of the Knowledge of the Universe. But he will graduate to this "University.")

We hide, and have hidden so much knowledge in the teachings. (As you grow and understand more you will look back and realize what was there in the teachings all along. It was put there. Gans or Gas in a Nano State is the game of the Universe. It's the play of the Cosmic Rays. It's the creation of life in the dimension of the surplus fields of the Universe. (No life is lost), but it's the essence of the source of the energies of the Universe. Now, maybe some of you who understood, or are beginning to understand, or will understand in the future, that what was taught in the past teachings, all had a meaning. But at that time you were not aware of it. You only understood it according to your level of intelligence and what you could physically see).

It was written in a way, that those who could understand, they could look beyond to understand more about the world of the Creation and the Creator.

In the near future, as many of you start traveling and using the Enhancement Units, you will look back and laugh, and also ponder, why did we make these machines? As I always said, man in the Universe is known as a "wheeler," because (when he invented the wheel, everything started going around a wheel. Now, we have become what we call, the "spherical man." Because we live within the dimension of the STM, which is a sphere, the plasma of the Creation. We have gone from moving everything by the wheel, to using a sphere, but that sphere has no tangibility within it. It receives confirmation of itself through the interaction of the fields of the Universe).

There is much hidden knowledge in the teachings of today. It's for you Knowledge Seekers to unravel it in time, and understand it, that through it you become a constructive member of the Universal Community. Where you add to the next step of the knowledge of the Universe.

(You have no choice but to understand. As I always say, you're in it, you have to understand it. Then you have to teach it, and while you're teaching it to others, you, yourself will become enlightened).

Many of you are still in the doldrums of MaGrav and Gans making, (and are not able, or do not listen when we talk about the fields, their interactions and combinations. When you build systems, try to understand the interaction of the fields and you will see the benefit of it. As long as you just sit there, and try to push the matter state, you'll remain with the problem of not understanding of the Totality).

We brought you the Nano layers, then the gas reactors, then the Gans's, then the dynamic Gans's, and finally we brought you the understanding of the Soul. Now go back and read and comprehend the teachings, it's all the same. It's just, which part of it, can you add to another, to create a new condition, a new dimension, and a new understanding.

But man is so physical, that he gets stuck in the coils, the number of windings and the direction of rotation. When we had you rotate of the balls, it was not for you to see the Gans's, it was for you to understand the motion of the fields.

During many of the teachings I always wondered and pondered, "would our Knowledge Seekers become wise?" In a way, wisdom comes out of true understanding of the knowledge, be it love, be it physics, or be it cosmology. (It's not only understanding the cosmic rays, but also what is fed into it at the same time, and how it works).

I explained this to a child, maybe some of you will be able to understand it. (When you feed a child, you put in a combination of ingredients, such as starch, protein, vegetables, and vitamins, so that the child will receive the total combination of all that he needs for his proper growth. Cosmic Rays work in the same way. They have combination of the fields, and each part feeds a certain part of the STM. But in matter state, we only look at it, whether it is a potato, carrot, vegetable, or a meat. (We don't look at the energy or fields these items provide). In the dimension of the plasma, we look at the different strengths of the cosmic rays). Then we understand the Totality, (and how deep a knowledge we have shared with mankind for his future development).

Go back and study the teachings and start to understand the effects of the fields, and walk away from the matter state. Then you'll graduate to the "secrets of Creation." As long as you're tied up to matter state, you're still in doldrums of the physicality of the man. Try to understand the fields of the U.

(The next time you open your computer look at the pictures and the colors of the galaxies, which space agencies have put on the Internet. You'll see a galaxy with a

combination of colors. Then look at these different colors as if they are the structure of a body. Which part embodies the heart or liver of the galaxy, and what is the function of totality of all the structures in the galaxy. Then look at the colored gases and what do you see? Is it an actual physical embodiment, or is it the dimension of the life of that structure).

(Our physical bodies have a skin, but in the dimension of the Universe and Unicoise they have the strength of a M field which creates the boundary of the entity. It's not tangible, but it effectively controls the boundary of separating one entity from another. You don't see a star sticking outside the boundary of a galaxy, unless it actually belongs to that galaxy). Just like you don't have a finger hanging next your neck without it being connected to your body. It has to be part of it.

(When Mankind understands the interaction of the fields of the cosmos, and the cosmic rays, then man has entered into a new dimension. In the past few months I explained this to you when I started teaching you about the work of the Universe, Unicoise, and Universal Community. This is a knowledge, which does not exist in the vocabulary of the man. When you understand it, then you'll laugh at concepts like neutrinos. Because you will understand, that they are just fields, and field radiations). Everything will have a meaning, and man will look at the Creation in a totally different way.

(This is part of the reason why several years ago we started teaching you about the Soul. And now in the past few week we have gently started pushing you towards these new teachings about the Universal Community, Universal structure, and living in the Universe). It's time to start to understand.

Some of you are still busy with MaGravs, and God knows what all, because that's part of keeping yourself busy. And some of you will jump into the dimension of fields of the Gans's and their fields of the cosmos, and cosmic rays, and then you'll start a new life.

Try to understand the gravity and the potential of what is being taught and what is now on the table. We built it up step by step, and now it's there for you to enjoy, and to expand and extend it. I hope, and my wish is that, we gradually start opening the door of the Knowledge of the Universe, by understanding the existence and the use of Cosmic Rays Fields of the Universe, and how they interact with our Soul and physicality.

(In the past we did not know about something under the ground called, uranium. Or that it could bring us so much benefit and at the same time misery, until we got the knowledge of it and expanded it. It had been sitting there for millions of years. For hundreds of years the Arabs saw a black material on top of the ground, but didn't have a use for it, until now, where it has become the most dearest commodity in the world, as oil. Man became knowledgeable about how to use it, and progressively developed systems to receive the benefits of it).

(It's time for man to go through the same process with this new technology. He has to develop the knowledge and technologies to tap into the Universal cosmic rays, and

Universal fields to start benefiting humanity. Then we'll all laugh at the black bubbling materials that are coming out of the Earth, and we'll leave them alone). As we have moved to the next level of understanding. It's very much like leaving a donkey and getting on a jumbo jet.

It took the man hundreds of thousands of years to migrate from central Africa to northern China and Canada, as he began walking, and then he went to the camels, donkeys, horses, and the rest. Today the same distance is traveled within hours by jets, and within seconds by understanding transmutation. The whole time the knowledge has always been there, it's just that man needed to mature to understand how to use it.

Many of you will see the work of the interaction of the cosmic rays with the STM. From these interactions will come new dimensions in the world of travel, feeding the man, and satisfying the urges and needs of man to be part of one community or another. (Man will learn to be aware of his environment, and how when he takes (cosmic) fields in one position of the U to be part of one community, but if he moves to another part it may not fit, and the same fields become detrimental to him in that position). Gradually we'll become knowledgeable to how to live life in the U.

We welcome to humanity to the Universal Community. I am sure, as man is a clever creature, he will soon pass most of the creatures of the U in understanding the Totality.

### **End of Quick Index Part 1 457 KSW**

If more people get interested in the plasma Mirrors by preordering them, then we can produce more of them. I'll explain in the future what to do with these, and how we'll use them in the systems for transmutation and transportation.

You can get in touch with the German doctors who starting working with the Enhancement Units (EU) through the Keshe Foundation Info.

We are negotiating with another group in Italy who are a medical research team. They have a much larger structure and are in many cities in Italy. (We hope to complete the negotiations soon).

Q: Where did the phrase, "we are here to serve and not to be served" as the KF motto come from? .... (For some reason this KS thinks that he is not allowed to use the T himself, but only to give it to others).

K- (From my point of view), this is a very selfish way of looking at things,. In the process of serving you're serving yourself, (you are receiving everything yourself. But if you expect to be given something, because you gave to someone else, it means you're still in the state of being a human. (You are not understanding the Totality of the knowledge). Serving does not mean being a waiter in a restaurant. Serving in the knowledge of plasma means, making it available to others, to elevate themselves. (You don't destroy or abuse where the fields come from). It seems that you have not understood the language of the

plasma and technology of the KF. People are always thinking of "me, me, me," and when I give something, then what am I going to get in return).

Q: Why do our feelings effect our Soul more than the thoughts do?

K- Thoughts are manmade, feelings are the interaction of the fields between the STM and the Soul of the Physicality (STP). That's why you have psychosomatic (conditions), because the emotions are touched at the strength of the STM and the STP. It's as simple as that.

(The emotions effect us in different ways). At the moment, the frontline news consists mainly of 2 issues. One is the war in Ukraine, and the other is about the freedom of women in Iran.

(They have made the news to mainly focus on the emotion of the situation, and not for people to understand what is really happening, especially in Iran. They base their stories partly on what people actually don't understand).

(I talked recently with some people who are deeply involved in this situation. I said, we are all equal, but it depends on who draws that line of equality, and whether they do it in a way that is beneficial to them).

We see the suffering and the changes, and whatever is happening on each side, both in Iran and in the Ukraine. (In Ukraine, what is inflicted by another, who used to be a part of them. And in Iran, what is inflicted on Iranians by those who are not a part of Iran, but they want to enforce their way. As we look at it, one disguises what they are doing under the cover of religion in politics, and the other hides the politics, under the cover of religion. But both are emotionally based). (In other words, they use people's sentiments to fire them up, so that they don't think clearly about what they are doing).

Very soon we'll address this with the Iranian government and the Iranian nation. The Keshe Foundation will take a pivotal point in the present situation in Iran. We are very clear about what we're going to do. And we'll enter on the dimension of, the understanding of the Creation, and scientific knowledge. (The basis of governing should be the knowledge. But we don't take sides, nor do we set one side against the regime, nor do we put one group against the other. Instead, we go back to the origin).

The origin is very simple, Iran is a Zoroastrian nation. (In its history it was forced by the "power of the sword," to accept Islam. Today, we are facing the same swords, but this time it is by guns and bullets. The Iranians are forced to become Muslims, and to cover themselves).

(In the recent past a tradition has been set up that in these times of conflict people reach a point of trying to understand the other side. If you go back and remember that in many revolutions, people used to put roses in the gun barrel of the soldiers, and the soldiers

stopped firing. They gave love and understanding, and no bullets came out of those barrels).

Iran is a Zoroastrian nation. When the Arabs came to Iran in the name of Islam, they forced (the people to convert by the sword. Now change the sword to guns, and forcing the men to cover their women. The Arabs wanted the women covered, because they could not trust themselves. But the Iranians were full of trust for themselves, and gave the freedom to the women. As I mentioned before, the Iranians told the Arabs, that we cover our own eyes, so that our women stay free).

Our advice to the Iranian women is, do not burn your scarf's, rather give them as a point of peace to the soldiers to cover their own eyes, (that they can allow you to be free. Do not (go against) the bullet. Do not give your scarf's to blind them. Rather give your scarf's, that they understand, it's for them to be human, and cover themselves. This will change a lot).

(The real issue of what this conflict is about, is that the emotion of one side, is forcing the other side to do what they want. Don't fight Islam with the sword. This is the same as what happened in the past, Islam is forcing a Zoroastrian nation through "gun policy." When Iranian woman go on the street don't burn your scarf's. Instead give them as a gift to the Revolutionary Guard, SEPAH, the soldiers, and the police officers).

(If you want to be free, then be Iranian, the way Zoroaster taught us, "think good, talk good, and do good." You don't need to cover the women. Give your scarf's as a gift to the Revolutionary Guard and kiss them for it. Do not fight, and do not burn your scarf's, because once they are burned, they have no use. We stay clean, we think good, we do good. You do the same. You do not need to cover your weaknesses of temptation, by taking our lives). (It's the same for the men. That is if the women have to cover, then the man also has to cover).

The time of gun policy, fighting, and creating upward revolution is gone. (It's the time for us to be logical, and to clearly understand what we are doing. We ask the Iranian women, to not burn your scarf's. Give them as a gift to the soldiers and the Revolutionary Guard, to cover their eyes, so that you remain free).

Then it comes to the emotions and the understanding of who truly is Iranian, and who is truly, what we call, "a foreigner." (Those who are enforcing their thoughts on the nation, a free nation of man. Go back in the history, as centuries ago you were Zoroastrians, and as men, we covered our eyes, and let the women stay free. This how everything will change).

The same goes for Ukraine. Change the gun policy, to one of greeting the Russians, don't fight. They'll dissolve themselves. Don't look for guns, bombs, and rockets. Look for a way that it brings peace with both dimensions without the guns. When you greet them, they cannot shoot you. By greeting them, you make them to understand (what they are doing).

This is where we will take our position in respect to the present (situations in the world). This is how the conflicts will be resolved as the man become mature to the new science and the technology.

We ask the Iranian women, to not burn your scarf's, instead give them as a gift to the Guard. Let them cover their eyes with it, so that you stay free. It's hard to do, but you'll find out, that they will not shoot. Tie your scarf's on their guns, (and let it be as a banner for them). Don't burn, because whatever you burn and destroy, you are destroying part of your national assets.

Q: There are many conflicts going on right now in Brazil and the world. Is it because of the changing fields of the Universe, and the work that Mr. Keshe has been doing for the good of humanity? There are many oppositions to this work. Do these oppositions go beyond the physicality?

K- Not really. (Beyond the physicality the fields and entities accommodate each other. So that there is no point of conflict).

We know now there is a problem in Brazil, due to the elections, (and we see the things happening around the world). We will stand to see the outcome of all these in a very short time.

You got to realize, once these new technologies are offered, and they come into common use in next 5 to 10 years, or maybe sooner, people won't stand to be in the zones of conflict. (They won't have to stay in their country because they can't afford to leave. When you go to another place with these systems, you will be able to speak that language and understand the culture).

The biggest problem for the governments in the coming time will be how to attract others to become part of their own population. If you are not a just ruler, people will simply move to another location, they don't need money or a passport and visa. They won't be able to stop you. There will be no borders on this planet, except the manmade ones, and with this new technology (those will disappear).

(By this the world leaders will change to be just and correct), that more people will want to be part of their population and their structure of life. The changes will be drastic. It's not a promise anymore. The knowledge is here and it has been taught. (Now it depends how many of you, and how fast you can decode it and apply it. And we also have to teach it to the others).

(Now the true application of the T comes in. It's like when you go to school to become an engineer. On the first day you cannot put an aircraft together. Progressively you learn the "nuts and bolts" of how to do it. That might take some years for you to master, which bolt goes where and how it works. It's the same with the plasma T. You've been taught the "bits and bobs" about the new flight system, which is your Soul. Now it's for you to learn

how to put the bolts in the proper place, and what strength to use in the dimension of the M fields. This is how you will go to, where you want to go).

(So don't look at the complexities of the situations around the world. Understand that in a very short time, if you don't like to be in Brazil, you just move to another location. Those who want to be rulers, let them be a thief. With the new T we'll see if they can keep that position).

Up to now men fought for freedom of choice, from now on, man will fight for freedom of Soul, and that's a big difference. But nobody can give you that freedom, except yourself. There are no governments, there are no Soul agencies, and there are no immigration control for Souls. It's you, from now on, if you understand the knowledge. Then you dictate what and where you want to be.

Do the fish and the dolphins in the oceans have a government? Or do the birds have a king and a ruling party, borders and the passport control? So too, the STM is free, both in the ocean and in the air. Birds immigrate without passports. Now man has the same chance with the STM. He just has to learn how to fly and swim.

All we are teaching is the freedom of the Soul, which is the freedom of the Man to choose his time, place and position. When you see flocks of hundreds of birds flying during their migrations from the North Pole to the equator, do any of them wear a crown on his head as the king? (Have they selected anyone as their leader? The bird flying at the point takes the lead, and when he is tired he falls back to the rear and another one takes the lead. But they all know where they are going. If the lead bird gets shot, or drops, the rest of the flock doesn't get lost and spread out everywhere. They all know where they're going. They already have set the destination through their Soul. This is what the Man has to learn. To fly through his Soul, and that is his freedom.

As I said many times, we are not a religious organization. Now we have proven it through the systems, that you are free across the U. (Even more advanced technologies will be coming up. You are not bound to a single nation, or to any one place on this planet, for you to be abused. Now you are free).

An Iranian KS who recently visited Iran told about her experience of feeling safe in Iran as a woman on the streets and that she doesn't think this whole conflict about women having to wear a scarf to cover themselves, is about a piece of clothe, what she called a tissue.

Mr. Keshe said that he wanted to tell it in the right way and give people the background, so that they understand better. He said, it's not about a piece of clothe, it's about people enforcing their will on others. And that we see the same things in other parts of the world not just in Iran. (The leaders need to find an excuse to govern, and they usually find different kinds of excuses like this. It's much deeper than a piece of clothe. It's about having the control (over the society). He called it a "greed of control.")

(Then he said in the Western world, like in America, they pretend to respect life for appearances sake, and for everyone to see, but underneath there is no respect at all. We've seen how they treat the Blacks and the rest. (Remember the Black man killed by a White police officer, "I can't breath.") And the same goes for the other parts of the world). It just depends on which side of the fence of the politics you whistle.

We don't encourage one group or another, anywhere in the world. (We want to bring sense and understanding to what is really happening. In Iran they are enforcing their will. It's the weakness of a man on a woman. If men can control their weakness, then women can be free).

The history of how the Islamic world got into this was that before Muhammad, one woman could have 9 or 10 husbands. (They would kill the girls before they were born. I think he means that at that time the women were in control). (So when Muhammad allowed the men to 4 wives, the women lost control. Back in the history of the Middle East, in Iraq and Saudi Arabia, there was shortage of women, because they never had a respect for women. When the men were allowed 4 wives all this mayhem started. When somebody has been hungry for a long time and then you give them more than they could imagine possible, they become greedy and want the whole lot, and more).

We see the same in North Korea and in parts of the East Asia with the governments (controlling everything). The only country where we don't see this kind of control is India, because of the multiplicity of their culture. They cannot control, the Indians are totally uncontrollable, because they're so mixed and diverse, that nobody knows who sits where.

The KS changed the talk to what she felt was just, and that by enforcing a dress code, so that all had to dress the same, allowed the poor women, who could not afford clothes and makeup to go to school, because they would not feel ashamed. It means the rich and poor dressed alike. She attributed this as the reason why Iranian women are more educated.

Mr. Keshe said that the reason women got ahead in education is because the men had to serve 2 years compulsory military service, and this allowed the women to get ahead in their studies. About the uniforms, he said, we are not communists. Nowhere in the world has a torn pair of Jeans, or not having makeup, made any difference in education, only in very rare cases. (They used that as an excuse, and want us to accept it, but that's not the way it is).

(Mr. Keshe was brought up to live amongst ordinary people. His father purposely sent him to a school where the majority of the students were orphans. But it made no difference, everybody was treated equal. The father wanted his son to know that he was not different than the others. He had wise parents).

So, clothes doesn't make the difference. It's the man himself who has to understand. (They want to make us think that it does make a difference. But in fact, it's us who accepts this belief).

Mr. Keshe treated his children as equals and they called each other by their first names, which is unusual. He was brought up as a child to have a say in things, so he did the same with his children.

(One of the beauties about the human race is the class differences or what is called, the class gap. This gap is the cause of the progress of the human race, whether it's a difference of culture, education, art, or whatever. In trying to have, in striving to achieve, and by doing, you add to the development of the race).

A poor person is just as important as a rich person. (Because the rich will later become poor, and the next generations that are poor won't want to suffer anymore, and they will strive to become rich again. In that cycle they add to the progress of the society. It's a pattern in the life of the man. After people become rich it takes about 3 or 4 generations for their descendents to become poor again. It's because the later generations never understood where the wealth came from).

What we see happening in Iran is not done by the Iranians. The heads of Iran's parliament, are the two brothers from Iraq. (They are not from the culture so they have no respect. They have ripped the nation apart. Most of the top people in Iran are not of Iranian blood. When you have the freedom to do what you like, then you do what you like).

When Mr. Keshe was in Iran in 2008 to help Iran with the plasma T, he was treated as a VIP and government was careful that he should not experience certain things while in Iran. Once he went to a restaurant and the security cleared the place so he was alone. But he hear noises from a crowd on the street and they were dragging a girl to a van. (Perhaps she violated the Islamic code). But when he came out he noticed everybody had cleared the street, and they let the girl go. Only later he realized what had happened, and that they let her go because they didn't want him to see that kind of behavior.

We cannot force our decisions on people. (They have to have the freedom to decide. Women have to be free to chose if they want to wear the scarf). It's the understanding of the culture of the freedom of the man.

(The T will bring the freedom that nobody can rule over us, imposing their own ideas on us, religious or political). 200 years ago his grandparents were free to roam across the borders in the area of Kazakhstan. They didn't need a passport they were free to travel there. The new T will bring the freedom back.

The Austrian and American governments were contacted about the upcoming transmutation flights, and they were asked to decide about the passport and visa control. The Americans said they will send it to the White House for a decision.

There was a question about if Mr. Keshe would go to a conference about "creative society."

K- We get invited to many of these things, but KF has to stay independent. We keep it that way. When the time right for something to happen, it will happen. It's no use pushing it. (But we are here doing our work).

Q: How is the elevation of the Soul of this Planet expanding?

K- The new Unit is getting developed to go into the Uno Center. Just give it a few more weeks, it'll be here. The strength of the fields that they will carry will be felt long distances from the Center. I'm sure your cameras two meters away will detect it.

Q: If you were to elevate the Soul of a Hydrogen or any element, would that affect the Totality?

K- Of course.

Q: If you elevate the soul of a cell in a body, would that effect the whole body?

K- Of course.

If you elevate from an atom to a Universe, (that would effect the Soul of the Universe, and then you would elevate the Soul of the whole Unicose).

Q: Do the Souls present and listening at this very moment, do they have the capability to elevate?

K- Of course. We all have, we all have.

Especially in the past few days, we'll start the process of elevating the Soul of the humanity in a very specific way.

(Gradually we are extending the boundaries of the understanding. Elevation does not mean that you become bigger. It means you come to understand more, and you become more humble).

There was a video of the Turkish leader meeting with Putin, who has realized that he has lost the war, and he's trying to find a way out of it. He'll try to negotiate a way for him to get out of what's happened in Ukraine, and the rest of it.

(I thought how much of it was from the KS who elevated his Soul), or is it just a coincidence.

Q: Have we had the souls of any world leaders present (in Linz) and have they received (the elevation)?

K- Yes.

Q: Will they respond in their physicality?

K- Of course they do. It's like when you water a plant. The plant shows it in his physicality. When you give energy to the STM, you elevate the Soul. Of course it shows it.

Q: Will this elevation expand out from them, once they receive it?

K- Oh, yes.

You see, we are looking at in the way, that just because I did something, now it has to happen. First of all, (what is it that you think you've done? And secondly, is it at a level that the other can receive it?) As we say in English, "you can take a horse to the water, but you can't make him drink." But, when he drinks, then he thanks you for taking him to the water.

(We have to realize, that just because we did something, and it didn't happen the way we think it should happen, that doesn't mean it doesn't work. We make it available, but will it elevate, that's another point).

(We are receiving videos out of China in past few days and weeks, that literally, is destroying me inside. Why .. ? What we've seen coming out of Hunan with the Covid, and other parts of China, with the youngsters in Iran, in Ukraine, and what we see now in Brazil with the elections. I sit in the position, that these information's are forever being filtered up to the top. We don't interfere. The only thing we do is to elevate the whole of the nation).

Go back a few weeks ago before we saw these problems in Iran. I said, we cut our hands from Iran. We stopped any collaboration and cooperation (with the leaders). It was because our Soul knew what was to come. It wasn't coincidental. Just go on the recording of past few months and listen to what I said it, and then look at what has happened. We usually tell something 14 days (ahead).

(We see things. We see the position and pick the countries, because we are in touch with). Somebody who was very close to Keshe Foundation from Australia. The person doesn't want to leave till the government is changed, and the World Government is changed. Because it doesn't fit the image they have. The Australians have bent backwards to do everything possible to control everything.

Canadians talk about their Prime Minister, and say the worst thing happened. Americans are with the other one (?? who used to be the leader). We always complain about the world leaders we choose, we elect to be. But, do we elevate their Souls, that they become just and correct leaders? Or have they already sold themselves even before they come to power, because they signed so many agreements.

(Don't expect, that just because you elevate, that you'll get what you expect. If it's good for that elevation, it will come out of it. Not just because I thought something, and it happens. The KS who just came back from Tehran spoke about how beautiful and peaceful it is in Iran. That's because we see what we want to see).

(But on the other hand, we see what's going on with the other side through social media, and KF members around Iran. We see the massacres in Ukraine, which continuously get reported. It's not just in one place, it's all over the world. Mankind has to be elevated as a

whole, so that there is nowhere on this planet we can have this condition). When I see the videos and correspondence about the things coming out of China in the past few weeks, I sometimes don't want to exist. If you think the situation in Iran is harsh, look at the other places around the world.

Just because Fox News has decided not to report it, doesn't mean it doesn't exist, like what they are doing with Keshe Foundation. But our job is to change what this planet is missing, and put that energy back into it, so that it finds peace with itself, and with the STM and the physicality of the man. Soon you will understand a lot about what it is and how it works.

It's not just elevating the STM, it's bringing balance between the STM and the STP of the man. Then you will find peace.

Q: To elevate this planet, do we need to give you, Mr. Keshe, more energy to be able to bring this forward in an instant?

K- Not to me ... I'm one of you, I'm a Knowledge Seekers. It's us to become in control of our freedom, and our fields and energies. We are not making another prophet or another temple. We are all equal. It's just some of us understand more and have access to more, and with it create a lot for all of us to benefit by it.

Q: The image of this Gans painting on the screen, is humanity receiving the plasma waters, is it ready to drink from them?

K- He has been drinking from it, but he's not aware of it. It's always been there. It's always been there.

I had a very amazing experience at the Center today. (The supporters of the Foundation, from the organization that we gave so much money to, to spread the T quickly across the planet came to see the systems first hand. These are the ones who have been trying to save the operation. When we went into the flight room, then one of them said, "now we understand what this technology is, and what needs to be done. We never understood until now." But even then, they think they understand).

(We had 2 people who are world decision makers in the Linz Center today. We shut everything down for the past two days, nobody could come in. Because some of the most powerful men in the world were in the Center. One of them is a friend, and the other one we've known for a long time. These are the kind of people who can change governments. That's how powerful they are. Their decision can change governments, anywhere around the world. And they wanted to be in the Center today). They stayed for a couple of hours.

They came as a man, they left as a confused man, they didn't know exactly what to do anymore. (It was for this kind of reaction, that we tried a year ago, to bring the T out as fast as possible). They came in, and they could not believe what was on the first floor, and then still more on the ground floor and in the flight room. To me, this was a massive

elevation of knowledge and the Soul. (Now was the right time to bring the top guys in, because they don't get the total knowledge passed up to them. That's why they came to see it for themselves, to get the total knowledge).

Q: Did they feel the fields, did they experience it?

K- They felt more than the fields, they felt the knowledge and what it carries.

(These people are the most powerful, and they are hidden, but they wanted to be (part of it). We didn't let anybody into the Center for 2 days before they came, so that nobody touches anything. They're respected by world leaders for (their evaluation of things.) And here they are at the Center. These are the people we went to for support for expanding the KF work. We spent a lot of time and finances on this, and a lot of you and other people supported it). But the conclusion is ... is humanity ready for such a thing?

Some times at twelve or one o'clock at night I entertain some of the top military people to the Center, so that nobody knows they've come here. They want to see and feel it. (They want to know if the change is really coming).

Q: When they experience this on the Soul level, do they understand that we're all equal, that we're all the same?

K- Some of them come and look and think about how they can use it to become more powerful. I have seen that.

Q: We know that won't happen, with the plasma?

K- That's their thought. (That the human thinking).

Q: (When people like from NASA come and experience the Flight systems, and if it touches their Soul), do they go back to give this information to their colleagues? Do they totally understand what is being given?

K- Not really.

A large number of NASA staff listen to these teachings. We encourage them continuously to go back to (like last weeks teaching and listen to certain parts. Some of the top echelon NASA scientists are online right now, or they'll listen later to the recordings. It's the same with the Chinese, Iranian and other space agencies).

In many of my communications with these people, I refer them to listen to the teachings. (We monitor it, and we know who is online. They go and listen and they come back with a question, or they ponder something from the teachings. One of the top directors of NASA was an Iranian, and he is very close to the Foundation. He's been following the Foundation from the beginning when I released the first technologies. At that time in 1985 he was part of the staff. He's very high ranking and on the Board of Management of NASA. We've always had direct contact with him since the early 1990s).

But they cannot understand the possibility of motion within the movement of the fields. (It's beyond them. And because they're Americans, they have to show something like a rocket, to believe it exists).

Q: Can you give them some kind of plasma rocket so they can experience it?

K- We've invited them to come to Linz and see it first hand. (We know them personally, and it's a respectful relationship). We talk with a number of top people in NASA, not just one. We continuously deliver messages to them. And they read them, because they gave us their WhatsApp address. We didn't ask for it, they gave it to us, and their Telegram address. Otherwise we wouldn't have it. We continuously update them on what's being achieved, and how they can use it in their systems. It's just not NASA, the Russians have and even bigger structure working around the technology of KF. We are very close to the Russian work, because they understand this technology much better than the Americans.

Q: Why is that Mr. Keshe?

K- They work on a much deeper level with the plasma. Tokomak is a Russian system. Tokomak is like CERN or (the other programs. The Russian scientists have gone very deep into the knowledge).

I've had a connection with the Russian space scientists since 1980s and 90s. I used to travel there and meet their scientists on one to one basis. (In my business life I had an office in Amati, and I spent a lot of time there. The father of the head of my operations in Russia, was something like the head of KGB). We had access to anybody we wanted to talk to. If I wanted any information, he used to "let me just ask papa."

(At that time we wanted to share the knowledge and see what they could do with it. I've traveled the depths of Kazakhstan and Russia, talking with scientists along the way). Russia has a group of space scientists who work (especially) on the plasma technology. They tried to mix KF plasma with the Tokomak. And we know about the Chinese, that they don't have the fuel combination, but they're working on it very hard.

Q: You said the fuel was very easy to produce.

K- Do you remember that Coca Cola bottle? Everyone was wondering what that secret liquid was? (It was just), caustic. Do you remember?

Q: I do, yes.

K- So now it's the same thing. We make it easy, but still they don't see it.

Q: (That just amazes me that they don't get it. Because they have all money and facilities, and the best of everything to achieve, and yet they can't see it. And here we are as KS with that little bit of information. But they can't reach it). It's all dependent upon a very simple little plasma that needs releasing.

K- You see, it's all in how you look at things, and how you were brought up to look at things. Most of the KS came to the knowledge through trying to understand something

new. But these scientists in these organizations they are not after something new. They want to try to prove their own points (from their own thinking), and they end up pushing these organizations their way. It's a big difference (between KS and these high paid scientists).

Knowledge Seekers come here to learn something new, and discover something different. (But with these scientists they are with the structures of their organizations. Even if they become Knowledge Seekers, they still have to conform to what their organizations and the governments want to do).

Q: So, they come with their cups full. First they should empty their cups?

K- No, they come with a tainted cup, first they have to clean the cup. And that taint comes from the wrong knowledge in the matter state, and nothing else. (They need to change the knowledge to the plasma state).

(Hundreds of the Russian plasma scientists understand the KF technology. They work in a specific operation in Russia, we know and have contact with them. They are amazing in their work. But still, whatever they do, they don't go, the way we go. They want to use it so that Russia will become a big powerful military organization).

If the Russian Plasma technologists (would join with KS and go in the direction with the KF, you will be amazed at how much we can learn from them).

Q: So they have the knowledge, but they just need to come forward and share it, together collectively?

K- Yes. They have the part of knowledge, which suits them, but they don't go beyond that part. They have to look at the plasma side, not the matter state plasma side.

With you, Knowledge Seekers, you look at the Plasma side. Most of our KS have no knowledge of the matter state plasma, the way scientists look at it. They look at the plasma the way we have taught them. You are all, what I call, "virgin brain" in Plasma. That's why you understand it so easily.

The matter state plasma scientists are framed in the matter state way of thinking. That's why they can't see or it's very hard for them the plasma side. Plasma physicists, especially with the PhD and degrees next to their name, they're "hardest nut to crack" like in a block of steel. There are a large number of Iranian scientists working in Ghent University, where I used to go. With all the boycotts, it was shocking to discover.

Iranian plasma physicists are more or less, the only scientists, which are allowed to come out of Iran and work internationally, but nobody knows about it. A very large number of Iranian scientist work at CERN. Iranians are masters in plasma physics.

But when you speak to them, they're all in the matter state plasma, they don't understand the free Plasma, (that we work with). KF did a lot of work with them.

But they don't understand the plasma physics, that we as KS talk about. You KS are like an empty canvas, on which you received the knowledge of Creation through the Gans's. These people have been taught that plasma has an electron, and you have to open it, and then this happens. None of you KS talk about the electron and the proton. Now you understand the difference. (They have to separate the neutron and a single electron, by putting it in a fast accelerator, and the rest of it).

Where as you use the plasma for painting, toothaches, or whatever. You are very educated. (But you don't see how rich you are in the knowledge). The gap between you and the plasma physicist is as big as the distance between the Earth and the Moon.

Q: Through your teachings we gather the information, and experiences, and we set an intention for using the plasma. We manipulate the plasma with our thoughts and intentions, and allow it to flow.

K- You try to explain that to a plasma physicist at CERN, and they'll call you a lunatic. If you tell somebody you use a Gans Plasma for disinfecting, toothache, or for space technology, they'll tell you, you're crazy. I'm a plasma physicist, you don't understand, you're being fooled. But you used the Water and stopped the Corona, or you used it to walk again. So, who's the fool?

There's a separation between the two schools of knowledge. I teach you the Knowledge of the Universe, and the way the plasma and the fields work. They're still after the electrons, what they are, how fast they go, and how they can accelerate them.

Q: That's a great explanation. But what is it on an emotional level, that doesn't allow them to get past their educational constraints?

K- It's called, "alphabet." This is the only thing which stops the scientists from universities to understand any new science and technology. It's the alphabets. Do you know what it means? It's the BSc, MSc, and PhD. These 3 letters create all the craziness. "I have a BSc in physics, I know you and you don't." So you read three physics books, in 30 hours of physics lectures, in three years, it doesn't make you God. And anyway, you read the wrong books to start with. This is the biggest problem man has.

The Chinese government realized this, when they saw how their advisors block new technologies (from going ahead). Because they carry (the idea in their head, "I'm a professor," or I am an elite scientist).

Q: How are the teachings going? You said there are people who are listening in the background. Are they receiving enough information to actually educate and elevate themselves?

K- They can do it. It depends on you, (if you put the effort to educate yourself, and test what you have learned, you will see the results. When you have a pain, you made the Gans Water and you put it on the pain, and it took your pain away. But you try to explain this to a plasma physicist or a doctor, and they'll say, "no way, you are crazy, it's just a coincidence, you think something happened, but it didn't really.")

But you KS understand that water carries the energy of a plasma, of the Gans you used. It's a hidden energy. But the scientist cannot understand it, because it doesn't fit into the books he has read.

I had a beautiful letter from one of our knowledgeable KS, and it brought me a lot of joy. It brought me so much joy, how our highly educated KS are experts in their specific fields. (He understood the difference between the language and the knowledge of the plasma, that they didn't teach us in the university. Just because they didn't teach it, doesn't mean that it doesn't exist. The plasma science is another way to look at things).

Q: It's a viewpoint.

K- If you're open to it.

(It doesn't matter who is in power in Iran, because they embrace the technology with open arms. We are the first independent private space company registered in Iran, as far as we know. They don't allow anybody else to open a space agency, because they know what we are doing, and what the T can do).

(The big problem in Iran is that they want to annihilate the State of Israel. They want to destroy it. As Ahmad ?? (former president) that stupid guy said, they want to wipe it off the face of the Earth). So now they can't come and say, the guy who's brought so much technology to Iran is half Jewish blood. They cannot sell it to Iran. This is the problem we have in Iran. How can you have a Jewish blood so devoted to a nation? It doesn't fit. So, they have to keep it out.

Q: You said to step away from the Gans's, MaGravs, and everything else physical, and do it on another level. So, (if we have the Sun inside ourselves, can we not use this to touch them on the Soul level, through the Universal Council, Earth Council, Core team and all the beautiful Knowledge Seekers (focusing their intention on the elevation)?

K- You are just a drop in the ocean, we have to gather many drops to create a new ocean. That's the only way I can put it.

Q: Does it have to be done by people from this planet?

K- Man has to change it from inside, otherwise he says, "the others have done it to me, I didn't want to do it." If you change yourself, then you can't blame anyone else for imposing it on you. But if somebody else gets you to do it, because they see the benefit it will bring to you, then later you go back to your old ways, or you blame the ones who tried to help. I know this firsthand. Man has to do it from inside himself. It's no use

changing the man (by outside forces, because then he goes back to his old ways, and then he blames you saying, "the others did it to me, I didn't want it. I still want to kill and eat.")

I had this battle for nearly 15 years with someone, until very recently. Finally, the person understood, that the battle was with his own self. He didn't understand that, what was being done was for his own benefit. But in the end he changed 180 degrees.

Q: I've noticed with the plasma it has the distinct ability to flip and completely change its direction, it's that MG field interaction.

K- It's understanding (how the things are. That's all it is. Elevating doesn't mean becoming bigger. It means understanding the totality).

Q: Is it what we allow ourselves to do?

K- .. No, it's not what we allow. It's what we would like to accept. It's a very big difference. What we would like to accept. Anyway, we'll see what happens, how things take shape, and how much we can educate.

I think the point of change has to come progressively, it cannot come as a shock, in one way or the other.

(Change the word plasma to something else, call it life, because that's what it is. We always considered life as something that is physical, and breaths and moves. Now we understand that the life in us has a center, and that center is made up of fields, which we call plasma. So plasma is life. It interacts in different ways. You don't need an arm, your arm extends across the Universe. You don't need legs to walk, you can get anywhere instantly the way we do in the flight systems).

I know Dean, one of your wishes is to get into that room and get into the system. And I say, it's not the time yet. When it comes, you will jump across.

These systems are made for us to learn and to teach. (We had to bring the KS in, so that you all became a part of it. No organization has ever done this. They keep things away from public and then just tell us about it. That's not the case with KF. We want you to be a part of it. The change is for you. How many of you came here every week and sat waiting the whole day to go into the flight system. I sometimes thought, my god, these people are so hungry to be part of the change. They come nine o'clock and they don't get into the system till five o'clock, and they're happy that they got in, so that they can add something to the knowledge).

It's the first time that knowledge is created, tested, proven by a broad spectrum of people. It's not NASA, (where you take an exam and go through a selection process. In KF we have doctors, laymen, housewives, painters, carpenters, and anybody that wants to go through our system. We didn't look at their physicality, we looked at their knowledge and

what their Soul brings. The system accepts and then we can learn from. It's a big difference).

Q: Have you brought other beings, entities, or other Souls into the system, like a flower, or other kinds of beings?

K- Yes.

Q: Do you know how their soul felt. What interactions they had?

K- Yes. You do not know what I carry into that room? But you've seen me, sometimes I walk in there with things in my hand. They just don't go in there for the sake of being in there. They go in for a purpose.

Q: And they're adding to the Soul of the Totality of the unit?

K- In a way.

(I don't think there is anybody as close as you, to the structure, who has seen what is going on in there. I think it's you and my bodyguard are the only ones who actually monitor everything that goes into that room.

Q: Recently I was studying your paper on ALS, and concluded that the will to die is the ultimate cause of ALS. Therefore, I think the so called, "natural death" is not actually natural, but due to the same reason as ALS patients, a will to die. Only the difference is that ALS patients have a very strong will to die, while the others have a weaker will. Then if we can (understand this, then) we can freely decide how long to use this body, that is, we can decide our own lifespan. (If we can understand this, then we can quickly relieve ourselves when the body is in pain or stressed. Are my views correct? If not, then please correct me.

K- I did a lot of work on MS and ILS (means ALS), to see the effect and progress of the new technology, and the will of the man. (We worked with an Italian guy who (was dying with ALS). We've done a lot of work on this. There is a KS here who would have died from MS 15 years ago, but we applied the T and she's still living, more or less, a normal life with MS. She understood the reason why she enforced MS on herself.

It's the same with ALS. (ALS doesn't happen every time someone wishes to die, but then they control it. It's an event or a one time occurrence that happens in a split second. The will in that split second is so powerful, that switches (off) the emotion of life, or the intention to live. (Can it happen that the person is not really aware that, that is what they did?) Up to now we had no knowledge (of how this works). With the new knowledge, and especially the new Enhancement Units, we can turn that switch back on).

(Doctors came out with a lot of chemicals and psychological medicines, but nobody has ever looked at the Soul, emotions, and the fields. The new plasma technology

understands that emotions create fields. It's more or less, will be the only technology, that we'll be able to turn that switch back on).

(In the future this will be proven by the world of science. I proved it in a way, through physical plasma, but not with the new understanding of the Plasma. Especially now, if we add the Cosmic Rays to it, we'll be able to switch it back on. Once it's switched on, the person doesn't even remember, what they had).

(It's like when you take tablets to commit suicide, once the tablets start working they take you all the way to the death. It's the same with an emotional switch. Once it happens, you can't reverse it, because it's there, it's all setup, and the switch gets locked).

(In the past 10 years, we were able to bypass the switch and change the condition. With the new technology we don't bypass it, we actually have the knowledge to create the switch, to flip that switch). (Does he mean they can create a new switch to live, or switch it back to wanting to live?)

(In places where the new T gets setup like in AZ and Germany I'm sure a number of ALS patients will use these new technologies. Then you will find out the ALS will not be there).

(It's a switch made of a wish, that gets stuck. The "life survival information" is not allowed to pass the switch. The switch is a physical entity inside the brain of the man, and we know where it is. But it needs the field the strength from the Soul to switch it back. The new technology has that capability to operate the switch. In a way, it melts the lock. If say the switch is covered in ice, then the new T has the power to de-ice it).

This technology is made for psychosomatic conditions like ALS, MS, Fibromyalgia, and Alzheimer's, Parkinson's. We used to use the technology of the plasma matter state. Now we use the total plasma state of the body of the man. It just goes and we are getting better at it all the time.

(Now, if one of these conditions takes 10 to 15 weeks for our doctors in the KF Centers to process, with the new generation technologies using cosmic rays, you should be able to do it in a day. But the body still has to learn how to go back to normality. The brain has to rebuild itself to go to normality).

(When you turn the switch back on, you have remember that over time the rest of the body's systems have shrunk, and the brain has shriveled and turned. So it can take months to rebuild the systems back to normal. It doesn't happen in a second).

Q: (Wang Lynn passed the paper about ALS to a company whose high level management person got ALS. But they said, unfortunately they cannot accept it right now).

K- They can never accept it, because it doesn't make sense to them, it's not in the books.

(I'll keep quiet for a while, and then we'll tell you what is about to come. In China you suffered because of the decisions we made. But something is going to happen. Today we have concluded this matter, and hopefully by tomorrow it will be done. We setup up to bring a massive change in. We still hope it will take shape in one way or another. Once we publish something, there'll be a lot of work to do on it, in the area of research and develop it). We have to wait and see.

(With the Italian man with ALS, in the end we were able to bypass the switch. We brought his will to live back, but we couldn't dissolve the switch. Now, with the new technology we can. We can open the switch. And the only thing is, the proof of the pudding is in eating it. It takes time.

I think we'll hear a lot from Arizona, when people start using the KF facilities there. The same with Germany and other places. (Once the people start using these systems we'll see a lot of things happening.

We keep revamping the systems internally. All the Enhancement technologies are developing so fast, that the present ones soon become obsolete. And instead of spending 10 weeks processing, you only spend 10 hours.

Q: That's all we are looking forward, for the more powerful.

K- It's not the powerful, rather it's understanding (the knowledge).

Q: But you said, the cosmic rays are the most important technology base.

K- Yeah, but it's not a power, it's a knowledge, it's understanding it. It could be of the weakest strength in cosmic rays, which is the one that does the trick, not the most powerful one.

Mr. Keshe asked Wang Lynn to gather together the 6 EU they sent to China for testing 3 years ago, he has a plan for them. These EU were the preliminary units of what we have today, and they became the backbone of them.

Q: Thank you, I'm so excited about the developments that I cannot fall sleep again.

K- Thank you very much indeed.

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(Part 1 of the English Transcription got lost by mistake. Part 1 of the Quick Index was made from the proofed transcription before it got lost ... you'll have to go back to original recording, sorry, I don't have the strength to do it again.)

(:17).

K- Yes, Good morning, Good Day to you, wherever you are

Mr. Keshe 17:46

Yes, good morning, to your to your wherever you are. Whenever America here listen to this Knowledge Seekers or to Keshe Foundation Spaceship Institute. We welcome you back to another adventure of science and technology. And we'll see what we can do on moving my land step by step a little bit more about what is to come. Before I start, we can you please check on your list of audiences in zoom or live stream there is somebody new right on the top? Could you find out what it's

Rick Crammond 18:21

it's at the top because there's an extra explanation sign in front of their name. And that automatically puts them in front of the ease. So I think it might be a manual split Tyria to spit theory of some sort. It might be a manual. Not sure how to check on that. I can't. We can only ask them. So you can put in the chat who they are. For usually donation Andrew read does, Terry. Yes, it's a manual.

Mr. Keshe 19:03

It's a manual. Okay, that's good. Thank you very much. Thank you did we go back to the teaching modalities as we said we have a small but very important announcement to make. And that is if you notice past two weeks, we are transferred to teaching to seven o'clock in the evening, the reason for it as we always been open with everything is that if you remember about four or five months ago, John, April May and that time we came to you for supporting the Keshe Foundation for a big adventure which was set up to do with the process past few months. This is going on since last October of last year. We tried to take a new direction for the Keshe Foundation to extend and expand the Foundation work Internationally. We invested a lot of money and time in it, and many of your helpless supporters donated to us So and foundation us millions of his own assets to try to make this for the company of change. We could not come to any understanding of what we call operation with these people. And in past week, on a daily basis, we've been negotiating, but we have come to a conclusion on negotiation. Hopefully by tomorrow night, he'll be settled. And we receive what we invested back. And hopefully, if everything goes okay, the next week or so, all of you who so graciously helped to bring this change in will be refunding you back the finances you tried, we tried our best to bring that change. But that could not happen, we could not see it. And hopefully, hopefully, by tomorrow, we concluded and most of you who helped us there to support us, if you give it as a donation will stay with us, if you will lend them fund to us. Some of you okay very large, some some of you give what you could we try to start refunding as we receive the refunds back to the foundation account. And we thank you for such a thing. It was a what we call an

opportunity we have to take and to see if we can bring a rapid change and restore steps. And after more or less a year of work and negotiation, we do not see we could not see an last weekend this weekend today be spent time with those people who were supposed to do it and completed and we have come to a conclusion and a closure. And so hopefully, next few days, some of you who want record and money to transition to achieve this goal, will start receiving the refunds we advise you in advance because we've been told we agreed this refund was supposed to be done some weeks ago, but it was a lot of document diving, they're trying to see if they can get it done, it couldn't be done. So we will not position within the next few days to refund most of you back we thank you for this help. So you can see when it comes back. If we need such a hiccup, such a position that we see there is a need for it will come back to you. But all of you who lent money to us within the next week or two or whatever will start receiving your funds back. Now we thank you very much, especially those who gave a lot in support of the they would like us and just to see the change. But now it's gone for nearly a year in bits and bits it couldn't be done. And what we call it was an ambitious job. But it was a very solid base, that people we have what we call given the funds to are trustworthy and internationally known and could not get it done. So thank you, all of you and other people after the company that they tried to support us to bring the change. But as we understand international pressures are so much that it could not support it. Maybe mankind is not ready for it. Going back to the teachings and what is to come, you will have heard be called the discussion and teaching your classmates in the process of the teaching in the process of understanding in the process of way coming in touch to understand the teachings from the very beginning. The very beginning teachings, we always explain man takes 20% of the energy from the food it takes.

Mr. Keshe 23:56

Dollar 80% comes from outside from exterior or from environment. The environment does not count the room and the place you're in there are going to counts as the Galaxy theory, the Solar System, you're in the universe theory. We are affected by all these fields. We are made of Totality of these fields. It's like you are a big cruiser. You will have you stop at many places, step by step from one place to another. But you're always connected to your base to where you are registered to where you're connected. We call it the flag of the what we call the ship where is registered. Mankind is registered with the universe is willingness was within the central policy. It's witnessed, every cell of our body is a building block of what we call the genome of the universe, we are part of it. As we move away, that tiny, tiny, powerful center stays, then the other layer comes, the strength of the galaxy, the other layer comes the spring feed of the Solar System, other layer cannot tolerate the strength of the Soul of the Physicality, and then the rest of it. And then then there are, we can go both ways we can go down into the bandless, we can go down into the roots, we can go back to the origin. Or we can go further from mention of what happened while solving the future. We have the capability to understand what strings our soul has gathered. And another string where we learned what is going to finish what is going to be, where is going, and how is going to live. And what is going to establish. By the fields we gather by the fields of the soul began in this process, in the new, what we call flight systems, that we add what we call the cosmic rays, we get connection with everything and everyone we become aware of their souls as much as

they become aware of also, in that position, we become balanced with our environment. In that position, what I do need as energy which I received, or I use, part of what I received, I share is open to you, it will not need to kill me as an animal to share what I have, I take the grass I eat grass do I need to kill an animal to eat the grass, but by looking at it by walking on it, I can take the energy which it doesn't need any reflexes, the rays of green to me. And then I convert that field into food. When we study science of colors, what colors do they tell us why an object is green, why a hand is blue in one of the leaves of its flowers and the rest of it, this is what it cannot absorb any flags. And that is what is available to us to us is not just the beauty of the smell and the color is the availability of the energy is availability of the fields that is there, I cannot accept, we learn part of the science, but we never understood the science. Why when we look at a beautiful flower, we get enchanted why do we understand with another smell, we feel so good do we have we not understood the process of the Creation. In that process, mankind will come to understand more and more about the process of Creation, about what we call progressive development of understanding us on Creation. With this process, now, we see when we walk we like a tomato, the color of the red, what does it mean to us how much of it can be absorbed we become that cup of water where tomato becomes an orange.

Mr. Keshe 28:37

Then gradually we start understanding how to communicate how color means is to go back to some of the teaching always said when you come when you interact with another plasma and other fields, courses of universe, the colors of them what comes out of interaction there. So with you also tells you, if they love you, what does it mean? If they want to be with you or they see you as feel the strength not necessarily matching to them it could be in danger to part of their life that you might take some of the string fields that they need to survive. You cannot have this field from me because this is the cornerstone of my life. You move somewhere else, you don't take it because you understand your soul understand that energy has been taken and this brings us brings to allow us the total new understanding what does this mean? What does the humanity will go forward? We need to understand you know coming time in a process of understanding, we will come to understand we are part of the Totality If you look in the back of the book number three, you see the way the spider off the fields come over. You are one of those spirals in that spot. Others depend on your position, your time, your place, you move the wrong way, they have to wait to accommodate you for that reason. Now, we understand how a man will conduct himself how man will come to understand to be what it is, in a new system in a new flight enhancement system, which are in development, and hopefully soon will be in a flight All in all, no, we will see many of you go into different corners of this universe will become the travelers of deep space, we become the travelers of this planet on this planet, we will achieve what we thought is unachievable, but the most important thing is, how would we come out of the systems? And how would be filled with we rejoice into what we have become men of peace, men of wisdom, men of culture of universe, or we try to abuse them because we see no we think nobody else has, or nobody asked but we will come out with different characters and characteristics of these systems, according to what we want. We see when we go to a movie, and the movie touches us, we come across another person who we talk to, and their emotion and the knowledge touches and we change word in the dimension of the Soul and the behavior and content of

the man's life. The new enhancement fi system will bring you that opportunity. What would I be? What would I want to be what would I like to do? Now that I am become aware of more capabilities and knowledge within me?

**Start here >>>>** (this part was not proofed)

What is for us to understand is, what would be the future of our Soul. What this Soul will create in any dimensions? Does not to be, need to be physical. Does not need to be total energy. Does not need to be a combination of both. It's understanding the essence of Creation. What would this new energy will make of me to be on this planet, another position in the Universe, or as energy fields traveling the span of the Unicose? Can I become so transparent, so diverse in energy, that the Universe is not big enough? I want to be part of the Unicose, I want to see what's beyond this Universe. Some of your in the coming months, as you go through the Enhancement Unit Flight System, as a Mobile transmuting from one position to another, (:34). will come across this. You will have to handle it. You have to understand it and become humble enough to be able to explain the joys of it. Not to become arrogant because of it. The enlightenment within these systems comes as you connect with everything, because now you connect to the cosmic rays, not to the fields of this planet, not to the fields of the cells of yourself. Now you feel the tree. You understand what it's trying to tell you. You will feel the man next to you, the dog walking across the street, another being on the top of another mountain, which is in trouble in the dimension of physicality. Another strength of the field of the Soul reaches you, and you understand he needs help. We become aware of many things, not necessarily only limited to the life on this planet. The way we feel the plant we'll feel another strange in another Universe, another dimension, in another Galaxy. We connect through the fields of the Universe. Now, you understand, when many of you went through the Enhancement Unit flight simulation, you went to places, but you said, I couldn't explain. Many of you came out of the system and you said, I couldn't explain, I cannot explain, It just happened something, there're ?? strange ?? characters, I was part of them ?? just, I was home. What did you bring from that home? Did part of the fields of the Unicose in a cosmic rays came from them that it become part of you, that you get that connection to be there and you see yourself to be part of them? (:36). We receive like the speck of dust, we receive on our skin, we receive specks of fields of the Cosmos, through cosmic rays within our brain, within our cell of the, what we call, the Soul of us. Now we understand, mankind needs to look beyond his dimension of the skin, mankind needs to look beyond the dimension of this planet, mankind needs to look to be part of the Totality. As we said, do we need to bring the world leaders to be punished for what they've done wrong? Or do we elevate that they walk away from what they've done wrong? Do we go to another dimension to reach them? We try to do this through the Universal Council, that they can reach the Soul of the language to understand the culture of it. Now gradually, as you become Universal members, you become members of this Universal Community, it's not any more to care about your next door neighbor, or to care about somebody you know, you care about everything which exists in this Universe. But in time, in time, man needs time to understand the new opportunity, the new dimension man has been given. In the coming days and weeks, as we develop these technologies, we

will see our own team will go through these changes, because they're in it. It's not that it's built, and it's just brought in, and when it comes in that room start working. We see the change of knowledge, we see the change of understanding in the Keshe Foundation manufacturing team. (:38). Because now they're in it, they walk in it, they walk out with it, it's within their structure, and they gradually become members of the Universal Community. Because now, they are the front runners of receiving the cosmic rays, are joining the cosmic rays, are being part of and becoming aware of what's happening. Because when it's finished, it comes to Uno Center. But to build, it needs for them, like you spend maybe half an hour, they spend whole day in these systems, operating, working. Then you will see that. They'll become knowledgeable in the size of the Universe much faster than you, who spent a half an hour As I said, become a privilege to work in the factories of the Keshe Foundation. Because you work in dimension of the Universal cosmic rays, because you're putting the system together. It's like ?? conveyor ?? belt in producing a car. But this time this car is not just the door, the window and the chair, it's the total environment which creates inside and outside. Then you understand how mankind will see working as a pleasure and not as obligation. What would you like to be, and in what level would you see to be? How much would you rely on what you receive? Would we look for these places where you will see the manufacturing part of this system as shining ?? gills in the distance? You know, this is where the cosmic rays, the system to ?? develop ?? has developed. And they are putting it together for the others. (:40). As we announced, the new production of the new systems, even every enhancement system, the new enhancement system will carry this benefit, this carry this technology. When I was discussing with Jon regarding the 12 unit enhancement units in Arizona, I explained this in a very soft way to him that, more people benefit by sitting outside the system than inside the system, that as different fields of them interact, will benefit more by it. In a way, you'll buy this system, and put in them and running them, that we benefit by what's outside, not what is inside. Then you understand in the future we'll mix the enhancement unit for, what we call, the body and the material, that in that enhanced unit of body and material, we create the fields of the cosmos that the man needs for life in space. In a way, the knowledge is complete. In a way, if you understand, now it's how we manipulated. In a way, where do we go to see this, and how we enjoy the beauty of the Creation? Very soon, very, very soon, many of you will walk into these places. Going through the new flight system cosmic ray, it's not a privilege, it's a right. This, as a system developed, will be reaching that point. There shall be no government or no structure which can block it, because it's built by the people, for the people, for the citizens of this Universe and not for the elite. (:42). As I said, the crown prince, he said, I want the unit for myself. I said, Your Excellency, Your Majesty, it's impossible. I built the system for humanity, you cannot have that on your own. It cannot be done. Because then we become privileged. ?? Where we have all to be equal. We have to understand, the new enhancement systems, which is coming into operation and you will see the first, what we call, cycle of the appearing in the Uno Center in the coming weeks. We become what they call, the basis, the foundation for what is to come. Do we need to burn fuel where we can use the fields of the Universe without ?? ? I was with some very powerful people this afternoon as part of our negotiation. As we were going through the Uno Center, through the systems, I explained to them, do you know what is the biggest worry if we go through these systems? The problem at the moment is global warming. My fear,

in the few years time is, we need to produce more CO<sub>2</sub> just to get to the balance of what we actually need on this planet. What we destroyed, what we produced over centuries, past century, especially with ?? our burning fuel, the way we propose to convert, soon, in less than a decade, we'll be short of CO<sub>2</sub>. What are we going to do? (:44). Then, what are the climate ?? changes which we have to face? Or do we learn from now on to work with the cosmic rays and cosmic fields, understanding the operation of the gases and the Gans's, and understanding within the Gans's combination, we can create the gases. Maybe, maybe none of you ever understood, but just took it as it was. Gas in Nano State, cosmic ray, cosmic gas, understanding of the Totality of the fields of the Creation. As I said to our friends in past few days, when you look into the beautiful pictures produced by NASA, where you see these colorful explosions and colorful Galaxies being there. Where do these colourfulness come from? From gases in the state of the Gans created by the interaction of the fields of the elements of that Galaxy. When you look with your telescopes, with your most sophisticated systems, into the depth of the Universe, and you see different colors, these are gases in Nano state, within the magnetic field of the Universe. Now, man for the first time can understand what he's dealing with, that has the capability to produce them. We brought it to you on the banner of the gas that you can burn, (:46). but it was hidden within the knowledge. This is the beginning of the work of the cosmic rays. I have to play the game, as the children only understand how to play in the nursery, and are not educated to understand the knowledge of the university. University of knowledge of the Universe is what is on the table. What will man and mankind will graduate out of this University, where he has just entered as the toddler in the nursery of the knowledge of the Universe. We hide and we have hidden so much knowledge in the teaching, that as you grow to understand, you'll find out what it was there, what was put there. Gas in Nano State, game of the Universe, play of the cosmic rays, Creation of life in the dimension of the surplus fields of the Universe. Has no life ?? to lose, by the essence of the source of the energies of the Universe. Now, maybe some of you who understood, understand, or will understand in the coming time, what was taught in the past years and in the past teachings, had a meaning. But you were not aware of it. You understood it according to the intelligence and what you looked at. But now you have to understand, it was ?? written in ?? way, those who could understand could look beyond to understand more about the world of the Creation and the Creator. (:48). In the near future, many of you, as you start traveling using the enhancement units, your transportation systems, you look and laugh, ponder, why did we make the machines? As I always said, man in the Universe is known as a wheeler, because they invented the wheel and everything goes around it, around the wheel. Now, we are become, what we call, the spherical man. We live within the dimension of the spherical of, what we call, the Soul of the Man, the plasma of the Creation. We have become knowledgeable to understand, to move from the wheel to the sphere, but the sphere is within it. Nothing, has no tangibility, but he has the confirmation of the interaction of the fields of the Universe. In the teachings of today, there are many hidden knowledges, it's for you Knowledge Seekers in time to unwrap and understand it, and within it to become a member and, what we call, a constructive member of the Universal Community. Where you add to the next step of the knowledge of the Universe. You've got to understand, you have no choice. As I always say, you're in it, you have to understand it. Then you have to teach it, and while you teach it, you will become enlightened. Many of you are still in the, what we call, doldrums of

the Magrav making, and Gans making, and do not listen to what we talk about the fields, and interaction of the fields, and combination of the fields. (:50). If you build the systems you build, understanding the interaction of the field, you will see the benefit of it, as long as you sit, and watch and try to push, what we call, matter state ?? with still in the problem of the understanding of the Totality. We brought you the Nano layers, we brought you to the gas reactors, we brought you then into Gans's, and then we brought you into the dynamic Gans's, then we brought in understanding of the Soul. Go back ?? it's all the same. It's just which part of it you could add to another to create the new condition, a new dimension, a new understanding. But man is physical, and he gets stuck in the coils, in the windings and the rotation. Rotation of the ball was not for you to see the Gans's, rotation of the ball was for you to understand the motion of the fields. In so many parts of the teachings I always wondered, and I always pondered, would our Knowledge Seekers become wise. In a way, wisdom comes out of, through understanding of the knowledge, be in love with physics, be it cosmology. Understanding of the cosmic rays, understanding of the work of what is fed, (:52). but at the same time. I explained this to a child some times ago, maybe some of you will understand it. When you make your food, you put combination of ingredients in it, starch, protein, vegetables, vitamins, that you feed the child with, that he receive the Totality of combination of what is needed for its growth. Cosmic rays are the same. They have combination of the fields that each part feeds and reaches part of the Soul of the Man. Here we look at the matter ?? eaters, and matter states of the potato, carrot, vegetable, or a meat. In the dimension of the plasma, understanding the cosmic rays, we look at the different strength of it. Then we understand the Totality. Then we understand the position of the gravity of the knowledge which has been shared by man, with man, for the development of the future of mankind. Go back to the teaching and start understanding the effect of the fields, and walk away from the matter state. Then you're fine graduate in the secret in the, what we call, secrets of the Creation. As long as you're tied up to matter state, you're still in doldrums of the physicality of the man. (:54). Try to understand the fields of the ??. Today, tomorrow, next time, open your computers, look at the pictures and the colors which space agencies around the world, scientific organization around the world, put on the internet. You see a Galaxy with combination of colors. Now, look at them as, what we call, a structure of a body, which in the embodiments of Galaxies as a heart, the Galaxies as a liver, and the function of Totality, and that gas, what we see, is actual physical embodiment, or dimension of the life of that structure. In the physical dimension you have a skin, in the dimension of the Universe and Unicose we have the field strength and the boundaries of the fields, of the magnetic field. Not tangible, but effectively in control of it. You don't see a star outside it, unless doesn't belong to it. You don't have a finger hanging next your neck without being connected to your body. It has to be part of. Mankind has to understand the interaction of the fields of the cosmos, and the cosmic rays, and then man has entered in a new dimension. I explained to you in past few months, I started teachings you about the work of the Universe, and Unicose, and Universal Community. This is the knowledge which does not exist in ?? of the man. (:56). Then, neutrinos will become a laugh in the ?? of what they are, because we now understand, and then those fields, and fields and radiations, everything will have a meaning, and man will look at the Creation in totally different way. This is part of, as we went back two or three years ago, teaching about the Soul, the new teachings about the Universal Community, Universal structure,

living with the Universe, will start. In past few weeks, very gently I've been pushing you that way. Now it's time to start to understand. And some of you are still busy with MaGrav's, and God knows what, because that's part of what it is to keep you busy. And some of you will jump into the dimension of fields of the Gans's and their fields of the cosmos, and cosmic rays and then you start a new life. Try to understand the gravity and the potential of what is taught and what is now on the table. Step by step we built it, and now is there to enjoy it, and expand and extend on it. I hope, and my wish is that we gradually start opening the door of the knowledge of the Universe, by understanding the existence and the use of cosmic rays, fields of the Universe, and their interaction on us, on our Soul and our physicality, and how they're ?? We did not know that, what we call, something under the ground called uranium can bring us so much benefit and misery, (:58). till we expanded on the knowledge. It was there for millions of years. Arabs for hundreds of years saw black material underground, but now is the most ?? dearest commodity in the world as oil. As man became knowledgeable of how to use it, man became, what we call, progressive developed to make systems, to benefit from their existence. Now it's time for man to go through the same process. But find a way, and technologies and the knowledge, that can tap into the Universal cosmic rays and Universal fields, that new technologies, new understanding, new benefit for humanity start. Then we ?? laugh, and we leave those black bubbling materials coming out of the Earth on their own, as we have no more use to it, as we have moved to ?? of understanding. It's very much like leaving a donkey and getting on the jumbo jet. It took the man hundreds of thousands of years to move from Central Africa to northern China and Canada, as he walked, and he used the camel, and the donkeys, and the horses and the rest. Now the same distance is carried out within hours by jets, and within seconds by understanding of transmutation. And all the knowledge has always been there, it's just man needed to mature to understand how to use it. Many of you will understand and see the work of, what we call, (1:00). interaction of the cosmic rays, with the STM and new dimensions of travel, new D of feeding the man, new D of satisfying the needs and urges of man to part of one community or the other. Where he learned how to take fields in one position of the U to be part of one community, and he moves into another part and he refuses the same fields as it can be detrimental to him in that position. Gradually we'll become knowledgeable to life in the U. As is said, we welcome to humanity to UC but we start teaching you, as I am sure, man is a clever creature, soon will pass most of the creatures of the U in understanding the Totality.

Thank you .. Hopefully, my wish is that you have learned something new, and to start thinking in a new D. We go for a break ...

(The proofed part 1 section got lost. The next part, part 2 has been proofed 1 time.)

<< **BREAK** >>> 457 KSW Nov 3, 2022 (1:02) - (1:06).

K- willing ready, able and helpful. There is something, I just got a reminder. If you remember a couple of weeks ago we announced the disks (Plasma Mirrors) which we put in 10 sets. They all have been sold in the first week. If you want to purchase you have to put the orders in that the people in factories will start producing them. They take about 2 to 3 months to make. If we see there are more people who put the request in to purchase, we'll start producing them ?? take 2 to 3 months to produce a new disk. (1:08). The 10 new sets we put out last week is already been sold out. This will come, as I explained, in the future what will do with these, we'll use in the systems which we have developed, for those of you who are for transmutation and transportation.

Anything else? What are the questions?

Q: .. I would like to get in touch with the German doctors who starting from last Monday begin working with the enhancement units, as Mr. Keshe said two weeks ago...

K- You will have to go through the Keshe Foundation Info. The information, the request goes through there to Germany, and the doctors will get in touch with. Some people have already made their contacts and they gone through. It will be that process. Yeah, you go through the Keshe Foundation, and we pass it on, this just to protect the, what we call, people who work with us. As we know, there are a lot of hooligans around there, going around. So, you have to get in touch with us, we do the vetting in the background, or whatever needed, and then you go to, what we call, to the doctors.

We are, as I said, negotiating with another group in Italy. Some of them are online, they know who they are. We will add the Italian, (1:10). what we call, research medical team into this very soon. There in Italy is a much larger structure and in many cities in Italy, which you can benefit by the, what we call, the wellness of the technology. We are in the phase of negotiation, they should be completed. We started it months ago, but very soon it will not be only Germany, you can go to centers in Italy, It's a large number of centers will be, more than handful of them that you can reach them. It will be part of the research and development structure.

Q: .. The phrase, "we are here to serve and not to be served," came from where, as a motto? I ask this because if I, as a Knowledge Seeker of KF technology cannot be served, it sounds to me like a complex understanding. So, the Gans and all technology cannot be used by me? I learn and develop for the other, to deliver to the other?

K- This is a very selfish way to look at things, the way I look at it. In the process of serving you're serving yourself, everything yourself. And if you have to be given, because you do something, it means you're still in the state of being a human. This is part of the understanding of the Totality. (1:12).

Serving is not being in a restaurant, and a waiter, serving in the knowledge of plasma is making available to others, to elevate themselves. By not destroying, or by the abuse of,

where the fields comes from. It seems that you have not understood the language of the plasma and technology of the Keshe Foundation. Always "me, me," when I give, what am I getting?

Any other question?

Q: .. By black oil, don't you mean "black goo"? You know about it? Should be the consciousness from Earth, you know about it?

K- Black what?

R: Some people talk about black goo is some sort of strange substance they have, maybe in some kind of the underground technologies, or something. I think you're talking about black oil, you don't mean black goo? You mean black oil.

K- Oil. Out of the ground, yeah. (1:14).

Q: .. Mr. Keshe, why do our feelings affect our Soul more than the thoughts?

K- Thoughts are manmade, feelings is an interaction of the fields between the STM and the Soul of the Physicality (STP). That's why you have psychosomatic, emotions, which are touched at the strength of the STM and the STP. It's as simple as that.

R: Okay, let them reflect on that, that was very succinct and direct.

K- We hope... ?? I'm not ?? these anymore.

You see, emotion comes with a different ways. At the moment a lot of us, we see it, we hear it in the news, in the press, and it's a frontline. The two frontline news of the moment, one is Ukraine, and one about the woman and the freedom, being free in Iran. Literally covers most of the news.

If you look at the situation, especially with Iran, it's become part of the emotion, not the understanding ... part of what people don't understand. As I said very recently, to some people who are deeply involved in this situation. (1:16). We are all equal, but it depends who tries to draw a line for what equality, that is to benefit to them. We see the changes, and the suffering and whatever, which is happening in both dimensions, in both in Iran and in Ukraine. What is inflicted by another one who used to be part of. One is inflicted by those who are not part of, but they want to enforce their way. As we look at it, and one covers it under the cover of the religion in politics, and one covers it on the politics on the cover of religion. But both are emotionally based.

I said, and very soon we'll address this, the Iranian government and the Iranian nation, Keshe Foundation will take a pivotal point in the present situation in Iran. We are very clear about what we're going to do. And we enter on the dimension of understanding of the Creation, scientific knowledge, on the basis of governing with the knowledgeable. We don't take side, or part against one regime, or one group, or the other, we go back to the origin.

The origin is very simple, Iran is a Zoroastrian nation, then, by what I call, force of the sword, forced to accept Islam. Now we are facing the same by guns and bullets, Iranians are forced to become Muslim, and to cover themselves. (1:18). The tradition in the past has been when we get to the point of trying to understand the other side.

If you remember, if you go back to many, many revolutions, people used to put roses in the gun barrel of the soldiers and soldiers stopped firing. They gave love, they gave understanding, and no bullet came out of those barrels.

The Iranian nation is Zoroastrians. When the Arabs on the name of Islam came to Iran, they forced by the sword, now changed to gun, for men to cover their woman. That they're covered up, because Arabs could not trust themselves. Iranians were full of trust of themselves in freedom of the woman. What the Iranians told the Arabs, as I mentioned before, was, we cover our eyes, that our women stay free.

Now, our advice to the Iranian women is, give your scarf's as a point of peace, not burn them, to the soldiers to cover their eyes, that they could be free. Do not stand the bullet. Do not give scarf's that blind them. Give the scarf's, that they understand, it's them who have to be human to cover themselves. This will change a lot. The point of understanding is emotion forcing another to be with it. You don't fought (fight) Islam with the sword. This time it's the same, Islam forcing a Zoroastrian nation, what we call, the "gun policy." (1:20). When the Iranian woman go on the street, don't burn your scarf's, give them as a gift to the Revolutionary Guard, to the SEPAH and the soldiers and the police officers.

You want to be free, you'll be Iranian, the way Zoroastrian has been, "think good, do good, and talk good." You don't need to cover the woman. Give your scarf's as a gift to the Revolutionary Guard and kiss them for it. Do not fight, do not burn the scarf's, because once burned has no use. In a way, we give, we've done, we make what we call, we've seen it in the Islamic world, they use the cover, to cover them on the burqa. Make these scarf's like glasses, and give it to the soldiers, give it to the Revolution Guard. You cover your eyes, we stay Zoroastrians. We stay clean, we think good, we do good. So, you do the same. You do not need to cover your weaknesses of temptation with life of us. The same for the man.

Time of gun policy, and fighting and creating upward revolution is gone. Time is to be logical, to understand and do this. We ask the Iranian woman, don't burn your scarf's. Give them as a gift to the soldiers and Revolutionary Guard, to cover their eyes, that you are free.

Then it comes to emotion and understanding who truly is Iranian. And who is truly, what we call, "???" a foreigner, (1:22). enforcing their thoughts on the nation, free nation of man. We gave roses, now we give what they force us as scarves, for women to cover themselves, that the man does not get tempted. Go back, as you were Zoroastrians, man always said, centuries ago, we cover our eyes, let the women stay free. That's how everything will change.

Then it'll go the same to Ukraine, change of gun policy. Greet the Russians, don't fight. They dissolve themselves. Not to look for guns, and battles, and bombs, and rockets. Look for a way that it brings peace with both dimensions without the gun. Greeting them they can't shoot you. Greeting them it makes them to understand it.

This is where we will take position in respect to the present situation, as this will go across in different explanations and time, as man become mature to the science and the technology. We ask the Iranian women, don't burn your scarf's, give them as a gift to the Guard. Let them cover their eyes, that you stay free. It's hard to do, but you'll find out that they will not shoot. Tie your scarf's on their guns, and let it be the banner for them to use it. (1:24). Don't burn, because whatever you burn and destroy is part of the national assets of your nation.

Any other questions?

Q: .. My question is about the moment we are going through many conflicts as Brazil and in the world. Could it be because of the changing fields of the Universe? And moving on, the work that Mr. Keshe has been doing for the good of humanity there are many oppositions. Do these oppositions go beyond the physicality?

K- Not really. Beyond physicality is accommodation, fields, and entities accommodate each other, that there is no point of conflict.

We know now there is a problem, as we understand, in Brazil, due to the elections, and we see the points, which are running around the world with different conditions. (1:26). We will stand to see the outcome of all these in a very short time.

You got to realize, once these new technologies are offered, and becomes common use in next five years, ten years, or maybe sooner, people don't stand to be in the zone of conflict. They don't need to buy a ticket. It's not that I can't afford to leave the country. It's not, what am I going to do when I go to America, I don't speak English, I don't understand the culture. You go to America through these systems, you live like an American, and you speak fluent in English, and it's not your worry.

The biggest problem for the governments in the coming time is, how to attract the others to become part of their population. Not depopulating. When you are not just ruler, people will move to another part of it, they don't need to spend a cent, they don't need to get a passport to get the visa to go out, that you can stop them. There are no borders on this planet, except the manmade one, and with this technology we bring that back.

Then you understand, world leaders will change to be the justice, the correct, that they can have more people to be part of their population and their structure of life. The changes are drastic and it's not a promise anymore. The knowledge is there, it's been taught, and it depends how many of you, what I call, decode it, and how fast you can decode it. (1:28). How would we go through these things, how do we teach these things?

You came through the understanding of the, what I call, technology. Now the true application comes in. It's very much, when you go to school, you want to become an engineer. The first day you cannot put an aircraft together to become, what we call, "builder of aircraft." First you learn about the nuts, and the bolts, and the structure of the materials, then the wind flow, and the dynamic flow and the rest of it. At the end of the third year you might be able to put a small craft together. Where you have enough knowledge, and you know which bolt, you want to do.

Now the knowledge is under the same point. You've been given and you've been taught "bits and bobs" about the new flight system, which is your Soul. Now it's for you to, how to put the bolt, where and what strength of it, in the dimension of M fields, to where to end up.

Don't look at the complex, don't look at how the situations are. Look, in a way, that in a very short time, you don't like to be in Brazil, you don't need immigration officers, you don't need passports. You just move. (1:30). Those who want to be, let them be a thief, they can rule. If they can keep that position. We shall see.

Up to now men fought for freedom of choice, from now on man will fight for freedom of Soul, and it's a big difference. And nobody can give you that freedom, except yourself. There are no governments, there are no Soul agencies, there are no immigration Soul control. It's you, from now on, if you understand the knowledge, that dictates where you want to be, and what you want to be.

Are there any governments in the oceans for the fish, the dolphins and, what we call, whatever? Or do the birds have a king and the ruling party, and the border and the passport control. So, the STM is free, both in the ocean and in the air. Birds immigrate without passport. Now man has the same chance with the STM. He just got to learn how to fly and how to swim.

That's all we are teaching. (1:32). The freedom of the Soul, the freedom of a man to choose his time, place and position. Have any of you seen birds flying in a flock of hundreds, of thousands, and one having a crown on his head as the king? Have you seen only one bird flies all the way from North Pole down to the equator and he is the leader? One is the head, and then he swings back to the back, the other one to take the lead. And they all know where they are going. When the head one gets shot, or drops, the rest doesn't spread everywhere and lost, they know where they're going. They already have set the destination through their Soul. So man has to learn. Flying through the Soul is the freedom of the man. We are not a religious organization, as I said many times. We have the system now, we have proven and more advanced technologies comes up, that you are free across the Universe, not bounded to one nation, one place on this planet that you can be abused.

Any other question? (1:34).

Q: Mehranez ... Indeed we need good news. I'm also very effected by children, and blood in Iran. And, of course I don't think it's just for a piece of tissue (scarf), there is all that. Because as a woman, I don't care at all to go to a place where they put something on their head. I put it, it doesn't bother me at all. Because I'm kind of person, I would rather observe people, than they observe me. It's more useful for me. I was feeling very, in a safe place when I was in Iran. I was traveling, I was feeling safety. I was free. It was security. The last time I was in Iran, there was exceptional security in these streets. And I think the police are very respectful, also to women. Of course, that's what I see. And a piece of tissue, which the more we go up there, the town, it becomes lighter and lighter. Now it has become a very light, and 15 centimeter tissue on the hair all over. That seems such a stupid thing that a woman wants to fight for this, because in Iran we have never been ...

K- We have to put it in the right way. (1:36). It's not a tissue at all, it's enforcing a will.

Q: That is right. I was going to come to that.

K- That is not it (the scarf). The same thing is in other parts of the world. To govern, they find different excuses. It's not just a tissue, it is much, much deeper. It's control. It depends on the, what we call, "greed of control." How much you respect life. In the Western world, in America, we respect life on the front, but underneath there is no respect. We seen what happened to the blacks and the rest. The same goes in other parts of the world. It just depends on which side of the fence of the politic you whistle.

Q: Yes, exactly.

K- The situation, what we see, is not encouraging one group, or the other, anywhere in the world. It's just bringing sense into it, understanding it .. why? In a way it's, I don't think ever has been just the tissue. It's been the way they dress, the way they can be. Enforcing a will. The weakness of a man on a woman. (1:38). If men can control his weakness, women are free.

You've got to understand the history of how most of the Islamic world got into this. Before Muhammad, one woman had nine or ten men, because they've killed the women before they were born. When Muhammad allowed them to have four women, they lost control. Because they could never imagine. If we go back in the history of the Middle East, in Iraq, in Saudi Arabia, there was shortage of women, because they never had respect. Anywhere there was a woman, had 10, 5, 9, 10 husbands. When Muhammad said, one man can have four women, now they thought they got the control. And all this mayhem started. Enforcing what we call, somebody who's been hungry, and now that he's given something, his greedy, he wants the whole lot, and more.

It's the same we see in North Korea. We see the same in part of the East Asia governments. The only country which, with population, we don't see this kind of control is India, because of its multiplicity of their culture. They cannot control, the Indians are totally uncontrollable, because they're so mixed and diverse, that nobody knows who sits where.

Q: What is import for me is the social justice, (1:40). that people don't feel bad because they are poor. And I observed that in the streets of Iran. I noticed years ago, that being poor visibly, is not something to be to be shy about. And that was such a victory for me for this (uniformity) of the clothes. At the time, this cover of the head, which is now very, very light. For me, this (uniformity) of the women, the poor women who didn't have to buy their clothes, and makeup, they could put this and go to university without being shy, and the rich ones, was also of the same. So that's, I think, it's why we have so many PhDs, doctorates of Nano coat, in universities, women, even one ?? each other, which I don't care about that. But we have so much women from the poor level.

K- There is a culture we have to understand. In Iran, most of the boys when they finish their high school have to go to two years of military. Those two years puts a gap in the education. Girls don't have to go to military, so they continue. The unbalance in education, in seeing more women educated, is that, compulsory of 2 year military (service for men). If that was taken away, we'll see the same. Maybe the opposite way.

It's just to understand why. We see the same thing in many, many countries. (1:42). Nowadays, men have to go on the national service, not women. In Israel it's different, they all go on the ?? battle. But Iran, the unbalance with more women getting educated to highest rank, because they are not boys, as we say, ?? goes between the education. Two years in military, some of them push directly from universities, go from high school to university. This is where we see most of the unbalance.

But this uniform, uniform clothing, we are not communists. And nowhere in the world a torn Jeans, not having clothes, not putting a makeup, or putting a makeup, has made any difference in education, very rare cases. They make it for us to accept, that's the reason. But it doesn't work.

I was brought up to eat, to sit and to live amongst people. And I didn't see it, I didn't feel it, I did it. I understood it. The first school I ever went to, was a school where majority of the students were orphans from a nearby orphanage, but all these children ?? go from other school. I couldn't, I'd never knew, to me they're all the same, we all were the same, till I went to their, what they call, living accommodation.

Then my father explained to me, these people don't have a father or mother, they're orphans. But I said, they're all the same to me in the classroom. He said, because we want you to be brought up that way, that you're no different than the others. (1:44). Maybe I had wise parents to allow me to see this. I went through the first year of education with majority of the children in the classroom orphans. The celebration of the school wasn't done in the school, it was done in their orphanage.

So, cloth doesn't become the difference. It's the man who has to understand himself. They want to make us think that way. But in fact, it's us who accepts it. We don't need to. If a makeup, and a jacket makes you more intelligent, than the one who doesn't have it, most of the people come from the ?? ones who don't have.

Q: Another observation I had, which was very hopeful, that the children at the time they were eight and twelve, they were so polite, so intelligent, and so much respected by the parents. The father calls his son, "you," you know, a plural. (In different language they have different formal ways of saying "You," that we don't have in English). I was amazed. I asked the father, how come things have changed?

K- This always has been in Iranian culture. We ignored it. ..they try to ignore it. (1:46). We use different ways, but respect always has been in the culture. My children ... (called me by my first name). Hardly they called me by, as "daddy." They called me by my first name, because they are equal. I don't call them son, I call them by their name. They respect the same. They call me back by my name. It's how we're brought up.

A lot of parents still call them, daddy, or papa, or baba, or whatever. Then a lot of people opposed, "why do your children call you by your name, they're children." They are human in a small pot, I always said. Then they become polite, because they're equal. You make a decision from childhood, they have a say in it. Not because I'm a father you follow. It's depends how you're brought up.

My parents brought me up the same way. We were not just a child, we had a say in where we live, how we live, what education we want. It's just the culture, how you are brought up, and how you do, and how they force us to adapt. My children are in their thirties, they started calling me a papa when they're in their thirties. Before that, it always has been my parents, always they all called me with the first name. Depends how you put it there. They never called their mom, mom, they always called their mom with her name.

Q: Well, I think, I thought the reason why children are so advance, which was not before, and they had goals, things, (1:48). it's because of this generation of mothers, women who went to university, and they are so eager to learn anything they can find Internet, whatever, and the radios, are so intelligent. So, the women listen to the best educational programs for children, educational programs for health. It's so rich. And I think this is beautiful. This is a hope for future. I'm afraid that the day the women, majority are poor, they take out, they pull out this uniform, and they have no money to look like the people from the North. .. this is a problem.

K- No. You see, people have to understand the culture of Iran. What you're talking is a specific culture, what you are bringing up. The money you spend on a coat, you can spend on something else. The understanding of it is very simple. The freedom is there. If you want to wear the coat, you wear the coat, if you want to be fashionable, be fashionable. It's the same in India, it's the same in any part of the world.

One of the beauties about the human race is class, what we call, gap. The class gap has been, it doesn't matter if is cultural, if it's educational, if it's art, or whatever, has been the cause of the progress in human race. In trying to have, to achieve, you add to. (1:50).

A poor person is as important as a rich person. Because the rich will become poor, and then in that cycle of next generations they become rich, because they don't want the

poverty. Then in that progress they add to the society. It's been in the pattern of life of the man. If you look at the people who become very rich, look at their third generation, fourth generation. Those children are poor, because they never understood where the wealth came from.

Q: Yeah, I'm not talking about my case. But I'm talking about the justice, social justice in Iran.

K- Justice doesn't come by clothes to cover. Social ...

Q: Integrity, I like everybody feels integrity... even they are

K- It's the culture of the nation. What we've seen in Iran is not done by the Iranians. The head of Iran parliament, the two brothers are from Iraq. They are from the other side, they have no respect. They ripped the nation apart. Most of the people in Iran who are on the top, they are not the Iranian blood. When you have a freedom of, do what you like, you do what you like.

Q: Also there is a matter of, Iran actually has a lot of young men, twenties, thirties, which have no possibility to get married. (1:52). No possibility to get a house or something, to get, to be married to go there. So, if the girls are so beautiful, so what are they going to do, these boys?

K- But it's the same around the world, in China it's the same. In China due to "one child policy," they have some 20 million I think, or quite a few millions of boys, but there is no woman for them. What do they do? The same we have in other parts of the world. This is a social structure for humanity, it's not exclusivity of one nation or the other.

Q: I think the Iranian people, which are very calm, the women, I think because of this scarf, has become very calm. And when they see these...

K- What do you mean, it has always been. ... Everywhere around the world women are calm, it's man who makes them violent. And some women make man violent.

Q: And these women who come and say, "burn the scarf," are so masculine, are so violent, are so much, not normal. It makes people afraid to look like them.

K- Actually, what we see, a lot of people like to look like them. Give the Man the freedom and let him choose. Doesn't matter what color, what race, what nation you are. That's the whole point.

You've lived in the West too long, and you go and see snapshots (of life in Iran). I was in Tehran. I was explaining this to my cousin in US a few days ago. (1:54). I went to Iran in 2008, as you know, by invitation of Ahmadinejad and their leadership to develop the Iranian Space. While I was in Tehran, I came to know their family. I think I explained this before, but it becomes relevant to what is today. Extremely rich family from north of

Tehran. You know the, what we call, right up north of Tehran. That's where I was brought up. I came to meet a guy, and his son was doing system control in Dubai. And the father said, as you are specialist, Mr. Keshe, can you help my son? And I said, yes. On Fridays, I used to teach him one hour, a couple of hours, I used to go to their house, it was the area I was brought up in, in ?? Jordan area and that part, years ago.

One day I went to, I think it's called, ?? "Sabadar" or whatever, shopping, it's just a hall, like a shopping center with a big hall, multi outlets of food. I went, and I took a food and I sat down to eat. I noticed suddenly, there was a space gap around me. There was nobody around me, I thought, maybe I sat in the wrong place suddenly. I ate my food, I left, as I came out of this compound on to the, what used to be the ?? "Palavie", the main street between north and south of Tehran. I notice the same thing as what we see in the news. (1:56). A girl was getting dragged into a van, and there was a lot of shouting and howling, and suddenly it stopped. Suddenly, as I came out, it stopped. In those days in 2008, I used to walk with ties in Iran, which was very unheard of. A lot of people used to make comments, how come this guy can wear a tie, and nobody tells him anything.

Suddenly, everything stopped, and the girl was left on the floor, and the van disappeared. I thought, very strange. I didn't take notice of it. I went the next Friday to teach the boy who was in his early twenties. He said, "oh, you were having food in that place." I said, why you did not joined me, it would have been nice to have a meal together. He said, I tried, the security people didn't let me, they said, "sorry." I said, I am his student. They said, no, he is eating. They cleared the place in the restaurant, that nobody's in touch with me. When I went out seeing such a thing, they must have told people to drop (it). He is here, he cannot see these things. That's 14 years ago. When I hear about what happened in Iran, in the case of this woman, I've seen it with my own eyes.

We cannot force on people our decisions, we have to have the freedom of. Years later hit on me, what I saw, and what was the reason that girl was let go. We are not, we do not see when we are in it. (1:58). We go on the two extremes. Society has to be free. You see a lot of women in the West put a scarves and hats on, nobody forces them, it has to be the same.

In Iran when we were children, "chador" was free whoever wanted wore it. Whoever didn't want it, they didn't wear it. It's not just a piece of tissue (clothe), it's the understanding of the culture of the freedom of the man.

Now, if we teach these things (new technology), many times I thought, now that they're coming to this level of understanding. The girls in Iran, they don't need to get shot at, or the boys. You travel with the Soul, you go to the United States, you go to Africa, you go to another planet. Nobody can rule over religion or the politics, for man. The technology brings that freedom.

When 200 years ago, our grandparents traveled from Palestine to ?? "Ishpardan," then Kazakhstan once or twice a year. Where were the borders? Did anybody check them? Did

they carry a passport? They had the freedom to go where they wanted. We allowed this control, and now with the knowledge and technology we're gaining our freedom back.

We wrote a letter to the Austrian government recently. Our people spoke to the officers, the letter is going out with them. And we informed the Americans, (2:00). can you.. In a way, we want immigration officers in Linz. When I spoke to American embassy and officials last week, that we want the Americans to allow us, that the Americans can come to Austria, and how the person to come, (that) they can issue the exit (stamp), that he left the country. They cannot understand it. Mr. Keshe, we send it to the White House, they are making a decision on it, we'll come back to you, your agents will call you.

Where is the freedom? It's the knowledge and technology, it's not any more, what I call, a piece of clothe. Now, if the Iranians learn, that they can travel through the Soul to United States, or to Brazil or somewhere else, would they stay? That's all it is. The technology brings that change, and it's, not on the verge of, nearly 200 of you have been through it.

Q: I hope your technology gets fast enough to everywhere.

K- We're trying to do it. That's why today's teaching moved from 9 today, because we were trying, we tried for a year to do it.

Any other question? (2:02).

Q: Salomea .. You said that climate change is a priority, or challenge for humanity, for planet. In this context, we do something, I mean, Foundation, and also human being and maybe "creative society" could be a solution. On 12th, November will be a big conference or a summit, something like this, about this subject. Thank you very much.

K- Can you repeat I didn't understand.

R: What was your question? I didn't understand.

Q: My question is, if creative society could alleviate, could be a solution for climate change, and for a better life on this Earth, for progress and development, spiritual and physical development in this context of climate change. Because on 12th, November will be a big summit about this subject, how we can create a creative society, which is not democratic, ?? model of society, it is not democratic, and it's not a dictatorship, it's something else, a creative society, a third way. (2:04).

K- I don't know, I don't understand.

R: I don't have a clue what you're talking about. So, we will have to have a reference to it and try to define the term "creative society." What does that mean? Is that anything that's other than the societies we have now? You better redefine your question and come back later.

Q: Yes, when I went in, I traveled in Belgium, I traveled with somebody from Ninove which was the same birthday like my mine. I contacted there people working for creative

society. And at that time, I wasn't able to understand what it means? Because I was very young.

R: We don't understand what you're talking about either. So, you would have to explain it all to us. And we don't have time for that today, unfortunately.

Q: Yeah. Like, a creative society. I mean, to create another way of living together.

R: Isn't that what we're doing through the Keshe Foundation and what Knowledge Seekers are doing?

Q: Yes, and my proposal was, maybe we can collaborate with them and give us a model and an example, for example, and to work less, for example, four hours, and to have general revenue, fixed revenue.

R: Isn't that all part of what we have in the Keshe Foundation and what Knowledge Seekers are doing? I don't understand what you're getting at. Do you want Mr. Keshe to go to this webinar thing?

Q: (2:06). Yes, yes, yes, yes, yes, you are right. To be there an expert, and maybe we can imagine something and help Mr. Keshe, and Mr. Keshe can help us to understand...

R: He might be interested, but you'd have to send all that information through the proper channels so that he can have a look at it, he can't make a decision here, right now...

K- We get invited to many of these things. Keshe Foundation has to stay independent. And we keep it that way. The whole structure is, as I always say, when it is the time right for something, it will happen. It's no use pushing it, try. We are there. There are people from different societies who understand what we do. And we keep it that way. We have to go the way, and as much as people can understand, can support themselves to be part of.

Any other question?

Q: Dean .. Mr. Keshe, you spoke about, that you switched a system on in the flight room, in the exhibition hall in Linz. A little while ago, you said that, you made an intention that took you off your feet. How's that going? How's the elevation of the Soul expanding across?

K- That unit is not in Uno Center yet. That unit is in getting developed to go to the Uno Center. (2:08). The unit, you haven't seen it yet. Just give it a few more weeks, it'll be there. I think when we install these four new units, which is getting constructed and put together, will change a lot around the Uno Center. Because they are not confined within the power, they carry. The strength of the fields they carry, it will be felt in the long distances from the center. And I'm sure your cameras two meter away will detect it.

Q: So Mr. Keshe, if you were to elevate the Soul of a Hydrogen or any element, would that affect the Totality?

K- Of course.

Q: So, the cell in a body, an atom it was to elevate that particular Soul. It would effect the body?

K- Of course.

Q: So, if we go from an atom to a Universe, if we elevate from a viewpoint ...

K- The Soul of the Universe, you would elevate the Soul of the whole Unicose.

Q: Doe's a Soul present in the moment. One of the beautiful people that are listening, are wonderful Souls that are feeling the presence of the fields in this very moment. And the moment that they are present themselves. Would they have that capability?

K- Of course. We all have, we all have.

In the past few days, and especially the past few days, we'll start the process of elevating the Soul of the humanity in a very specific way. (2:10).

In a way, gradually extending the boundaries of the, what we call, understanding. When we talk elevation, it's not you becoming bigger. It's you come to understand more. You come to be more humble with it.

I was sent a video by Dr. Bararpour, I think few days ago, where in that video the Turkish president, or the Prime Minister ?? (name) is with Putin. He said, Putin has realized that he has lost the war, and he's trying to find a way out of it, and he'll try to negotiate a way for him to get out of what's happened in Ukraine, and the rest of it.

I thought how much of it depends on the Knowledge Seekers who elevated his Soul, or is it just a coincidence.

Q: Mr. Keshe, have we had any world leaders Souls present that received, that have received?

K- Yes.

Q: And they will respond in their physicality?

K- Of course they do. It's like you watering a plant. When you water a plant, it shows in his physicality. (2:12). In the condition of the man you elevate the Soul, you give energy to the STM. Of course it does.

Q: Do we see this elevation .. expanding out from them, once they receive it?

K- Oh, yes. You see, we are looking, just because I did, it has to happen. First of all, what you think you've done. First of all, is it at the level, that he can receive it, and is at the point that he can receive? You can take a horse, as we say in English, to the water, but

you can not make it to drink. But, when he drinks, he thanks you for taking him to the water.

We have to realize, just because I did, and it didn't happen, (then) it doesn't work. This is how we perceive, has to be. We make it available. Would it elevate?

We see videos coming out of China in past few days and weeks, which is literally destroying me inside. Why? What is coming out in Hunan with the Covid, what we've seen in other parts of China, what we see in Iran with the youngsters, what we see in Ukraine, what we see now in Brazil with the elections. I sit on the position that forever these information's are filtered to the top, filtered to the top, (1:14). and the only thing we do. We don't interfere. We elevate the whole of the nation.

Go back a few weeks ago, before we saw these problems in Iran, two or three weeks before that. I said, we cut our hands from Iran. Any collaboration and cooperation. Because our Soul knew what is to come. It wasn't coincidental. Just go on the recording of past few, two months. Find what I said it, and see what happened. We usually give it 14 days.

We see things. You see, the position we pick countries, because we are in touch with, we see it, we have one of our, some of you know, somebody was very close to Keshe Foundation from Australia. The person doesn't want to leave till the government is changed, and the World Government is changed. Because it doesn't fit the image they have. The Australia has been backwards to do everything possible to control everything.

We see Canadians talk about their Prime Minister, worst thing happened. Americans are with the other one. We always complain about the world leaders we choose, we elect to be. But, do we elevate their Souls, that they become just and correct leaders? Or they are sold even before they come to power, because they signed so many agreements. (2:16).

Don't expect, just because I elevated, I get it. Expect, what will come out of it, if it's good for that elevation. Not just because I thought, is there. Just past few minutes, we listened to Mehranez, how she speaks, how beautiful and peaceful it is in Iran. She just come back past few days or weeks from Tehran. But, because we want to see that.

But we see the others with the other side, which is coming through the social media, which is coming through Keshe Foundation members around the Iran. We see the massacres in Ukraine, which are continuously get reported. It's not just one, it's all over the world. Mankind has to be elevated as a whole, that nowhere we have this ?? condition. If you see the videos, the correspondence, the things which are received from China in past few weeks, I sometimes don't want to exist. If you think the situation in Iran is harsh, look at the other places around the world.

Just because Fox has decided not to report it, like Keshe Foundation, it doesn't mean it doesn't exist. But our job is to change what this planet missed, putting the energy back,

that it finds peace with itself, the STM and the physicality of the man. (2:18). Soon you will a lot understand what and how it works.

It's not just elevating the STM, it's bringing balance with the STM and the STP of the man. Then you find peace.

Q: So from a perspective Mr. Keshe, of being outside, if this planet is part of a much bigger totality, then if we look at the cell of a human being and the cell of this planet, then to elevate the planet, do we need to give you more energy to be able to bring this forward in an instant, in a moment?

K- Not me, I'm not, nobody. I'm one of you, I'm a Knowledge Seekers. It's us to become in control of our freedom, of our fields and energies. We are not making another prophet, we are not making another temple, we are all equal. It's just some of us understand more, some of us access, has access to more. And some of us can create, for a lot of us to benefit from that access.

Q: So, the picture on the screen Mr. Keshe, the image of this painting with the Gans, is humanity receiving the plasma waters, is it ready to drink from them?

K- He has been drinking from it, but he's not aware of it. It's always there, it's always been there.

I was in the center today, I had a very amazing experience today. As I said, we are part of, all what we are trying to do. As you know, with the supporters of the Foundation, we had to get them today into the Center, (2:20). we were all in there. All the ones (from the organization to spread the T internationally) who are trying to do it, and the ones we're trying to see how we can save it, to do it, and we came to the conclusion, or whatever. We went to the flight room, and one of them said, "now we understand what this technology is, what needs to be done." We never understood till now, and even here, we think we understand.

With ordinary people, you come into, with the Enhancement Unit, with the people who are world decision makers, two of them were in the Keshe Foundation Center today. In past two days we shut everything down, nobody could come. It's because some of the most powerful men in the world, in a given position, were in the Center. One of them is a friend, and the other one we know for a long time. They wanted to be in the... They change governments, these people. They are that powerful. Their decision can change governments, anywhere around. They wanted to be in the Center today.

They spent a couple of hours, and they came as a man, they left as a confused man, they didn't know exactly what to do anymore. That's why we went for this a year ago. We canceled all the meetings, even today's teaching was moved because of these people. They came in, and they could not believe what was on the first floor and the ground floor, (2:22). and in the flight room. And to me, that was a massive elevation of knowledge and

the Soul. That's why we after a year, we could bring. Because these top guys don't get passed up, the total knowledge. This time they came to see the total knowledge.

Q: Did they feel it Mr. Keshe? Did they feel the fields, did they experience it?

K- They felt more than the fields, they felt the knowledge and what carries.

They are most powerful hidden people, they wanted to be. If you were in the Center in past two days, there was no entry for no one, we left 2 days, to ??, that nobody touches anything. They're respected by world leaders for what they do, and ?? here they are. These are the people we went for support, for the expansion of the Foundation, and we spent a lot of time and finances. You and a lot of other people supported it. But the conclusion is, is humanity ready for such a thing?

I entertain some of the top military people some times, twelve, one o'clock at night without anybody knowing it to the center. They want to see, they want to feel. They want to know what is there to change.

Q: So, when they experienced this Mr. Keshe, on the Soul level, (2:24). they come to understand that we're all equal, we're all the same, and that...

K- Some of them look at it, what can I do with this, that become more powerful for me? I've seen that.

Q; We know that won't happen, with the plasma.

K- That's their thought, that's the human. That's the human.

Q: So, when we get a position where certain people on the planet like NASA, let's say, that have been put in a position to experience other planets. When they experience it on a flight room experience themselves, do you think that they touch, their Soul is touched so much that they when they go back to give this information to their peers, their colleagues, do they totally understand what is being given?

K- Not really. I keep on telling them. You've got to realize, a large number of NASA staff listen, even today, now, into these teachings. We encourage them continuously to go back to the teaching last week, two weeks ago, listen to that part. Some of the NASA scientists are online now, they know who they are. Top, top on the echelon top of the NASA are online, or listen today or later on. The same with the Chinese space agency, the same with the Iranian space agency.

In my, many of the communications with these people, I refer them to go to the teaching (2:26). .. because we monitor it. They go and they come back with a question, or they ponder something somewhere. Those who are... You've got to realize, one of the top directors of NASA has been an Iranian, Mr. ??. He is very close to the Foundation. He has followed the Foundation from when I started the Keshe Foundation, when I released the first technologies and when he was still, as part of the staff in 1985. He's on board of

NASA. He is a Board of Management of NASA. He's a very high ranking NASA people. We always had direct contact with (Mr. ??) in early 2000 and 1990s.

But they cannot understand the possibility of the motion in the movement of the fields, because they have to show something to be Americans, they have to have a rocket.

Q: Can you give them a plasma rocket Mr. Keshe, in some way, so they experience it?

K- They're invited to come to, what you call it, to Linz. We know them personally, we have everything with them, it's a respected, what you call it, talk with a number of. We don't talk to one person in NASA. We talk with a number of people in the top with NASA. We continuously deliver messages to them. (2:28). And they read it, because they gave us their WhatsApp, we didn't get it, they give us their Telegram. Otherwise we don't have. We continuously feed them what has been achieved, what it is, and how they can use it in their system. It's just not NASA, Russians have bigger structure working around the technology of KF, because we are very close to Russian work. Russians understand this technology much better than the Americans.

Q: Why is that Mr. Keshe?

K- They work on plasma much deeper, Tokomak is a Russian system. Tokomak, which most of like CERN, and the rest, because Russian scientists are very deep.

I've had a connection with the Russian space scientists since nineteen eighties, nineties. I used to travel, I used to meet these scientists on one to one basis. We used to have an office, people who worked for me can tell you. We used to have an office in Amati, which I used to spend a lot of time there. The head of the Keshe Foundation, not the Keshe Foundation, the head of my operation in Russia was headed and run by a gentleman called Mr. ?? Botika. And his father was like the head of KGB. We had access to anybody we wanted to talk. If I wanted any information, I said, Mr. Botika, he said, let me just ask papa.

We wanted to share the knowledge, we wanted to see. I've traveled the depths of Kazakhstan and Russia, with scientists talking. Especially nowadays, Keshe Foundation. There are a group of space scientists in Russia who works on the plasma technology, (2:30). they tried to mix the Tokamak with the Keshe Foundation Plasma. And the Chinese we know, they don't have the fuel combination, but they're working on it very hard.

Q: You said that was very easy to produce Mr. Keshe. You still not give them the recipe.

K- You remember that Coca Cola bottle? Everyone was thinking, what is that secret liquid? Caustic. You remember?

Q: I do, yes.

K- So now it's the same thing. We make it easy, that they don't see it.

Q: That just amazes me, they have all these abilities, all this technology and all the money in it, and everything behind them. And yet this single bit of knowledge that some Knowledge Seekers have. I do not want to say that the Knowledge Seekers know everything, but they have the information, as simple as, not simple, a Knowledge Seeker, and yet you have these institutions, and these corporations, and governments that are sat there waiting, and it's all dependent upon a very simple little plasma that needs releasing.

K- You see, it's how you look at it and how you brought up to look at it. Most of the Knowledge Seekers came to the knowledge through trying to understand something new. These scientists in these organizations, they are not after something new, they are trying to prove their points, and they push these organizations their way. It's a big difference. Knowledge Seekers come here to learn something new, something different. These people in the, (1:32). what we call, structure of these organizations, they become Knowledge Seekers, but they still have to come, conformity to be within, what the government put in.

Q: So, they come, as Jalal would say, they come with a full cup, and they need to empty their cup before they come.

K- No, they come with a tainted cup, they have to clean the cup. And that taint comes from the wrong knowledge in the matter state, nothing else. If they change the knowledge to plasma state.

The Russian plasma scientist understand the Keshe Foundation technology, many of them, it's hundreds of them. They work in a specific operation in Russia, we have contact with them, we know them. They are amazing in their work. But still, whatever they do, they don't go the way we want to go. They want to go to be used, that Russia will be big, and they'll be powerful military organization.

If they go to share. If the Russian Plasma technologist, Knowledge Seekers, come open and the direction with the Keshe Foundation, you will be amazed how much we can learn from them.

Q: So they have the knowledge, and they could, they just need to come forward to share it, together collectively?

K- Yes, they have the part of knowledge which suits them, they don't go beyond it. They have to look at the plasma side, not matter Plasma side.

With you, Knowledge Seekers, you look at the Plasma side. (2:34). Most of our Knowledge Seekers have no knowledge of the plasma the way scientists look at it. They look at the plasma the way we taught it. You are all, what I call, "virgin brain" in Plasma. That's why you understand it so easily.

The Plasma matter state scientists are framed, are in the thinking in the matter state. That's why they can't see this side, very hard for them. Plasma physicists, especially with

the PhD and degrees next to their name, they're "hardest nut to crack" in the block of steel. I used to, in Ghent University there is a section which plasma physicists work, worked when I used to go to university. A large number of, quite a large number of these Plasma scientists in Ghent University are Iranian. When I discovered them I was shocked. With all the boycotts, with everything else. Iranian Plasma physicists are more or less only scientists, which are allowed to come out of Iran and work with international, but nobody knows about it. If you go to CERN, very large number of the CERN scientists, are Iranians. Iranians are masters in Plasma physics.

But when you speak to them, they're all matter state Plasma, they don't understand the free Plasma. And I had an encounter with them, I sat with them a few times in Ghent University, when we were doing the tests in there, because the university structure was very favor of the Keshe Foundation, we did a lot of work there.

They don't understand the physics Plasma we talk about, (2:36). as Knowledge Seekers. You are like an empty canvas, which you learned the knowledge, through the knowledge of Creation with the Gans's. These people have been taught Plasma has an electron, you have to open it and then this happens. None of you Knowledge Seekers talks about the electron and proton. Now you understand the difference. To get the Plasma physicists to separate the neutron and a single electron, and then put it to a fast whatever, whatever, and accelerator and the rest of it. None of you speak about the Plasma, use it for whatever you use it for, for painting, for toothache, or whatever, speak about electron and neutron. You are very educated. You don't see it because you're rich in it, you don't understand matter Plasma physicist, there's a huge gap, it's as big as the distance between the Earth and the Moon.

Q: We allow Mr. Keshe, as Knowledge Seekers, you know, we gather the information, the experiences from your teachings, and we set an intention and we use the Plasma, we manipulate the Plasma with our thoughts and intentions, and allow it to flow and allow it to...

K- You try to explain that to a Plasma physicist at CERN, and they call you lunatic. If you tell somebody you use a Gans Plasma for disinfecting, or for a toothache, or for space technology, they tell you, you're crazy, I'm a Plasma physicist, you don't understand, you're being fooled. But I use the water, I stopped the Corona, I use the water I can walk. So, who's the fool? (2:38).

It's separation between the two schools of knowledge. What I teach you is a knowledge of the Universe, the way that the fields, we call it, Plasma works. There, they're still after the electrons, how fast they go, what it is, how they can accelerate it.

Q: That's a great explanation Mr. Keshe, the thing that... So, on an emotional level, what's the emotion that sets this position for them, where they will not allow, and they will not get past the educational constraints that they've gone through?

K- It's called .. "alphabet." The only thing which stops the scientists from universities to understand any new science and technology is alphabet. Do you know what it means? It's called BSc, it's called MSc, it's called PhD. That three letters create craziness. "I have a BSc in physics, I know you don't know." You read three physics book in 30 hours of physics lecture in three years, doesn't make you God. And you read the wrong books to start with anyway. The biggest problem man has.

The Chinese government realized this, how their, what you call it, advisors, block new technologies. Because they carry, "I'm a professor," I'm a, or whatever you call it, elite scientist. (2:40). They block it, because the initials, they know nothing.

Q: How is the teachings going there Mr. Keshe, with the education that is, the Plasma that is expanding and coming out, coming forward?

K- Where?

Q: Everywhere. So through the teachings, in this very moment. You say people are listening in. Are they receiving this information enough to actually, to educate themselves and elevate themselves.

K- If they are, they can do. It depends if you are there, educate, test and you see. You gather water, and you have a pain, and you put it on the pain, and that water takes your pain away. You try to explain this to a Plasma physicist, you try to explain this to a doctor, they say, no, you're crazy, it just happen, you think it's not there.

You understand that that water carries the energy of a plasma, which you added to, as a Gans, it's hidden energy. He cannot understand it, because it doesn't fit into the books he has read.

I had a beautiful writing from one of our knowledgeable Knowledge Seekers, and it brought me a lot of joy. If I read it, he knows who he is. He wrote this to me a few days ago, I just read it for you. And it brought me so much joy, that how our highly educated Knowledge Seekers in the specific, they are experts in their fields. Now see, now they understand the difference in the language, in the knowledge, that they didn't teach us these in the university, (2:42). in our education. Just because he hasn't been taught, it doesn't mean it doesn't exist. It's another way to look at it.

Q: It's a viewpoint, yeah.

K- If you're open to it. This is what I always said, the biggest problem with the Keshe Foundation and ever, doesn't matter who is in power in Iran, it's not the technology. They embrace the technology with open arms. We are the first space independent private company registered in Iran, as far as we know. Keshe Space company registered in Iran. They don't allow nobody else to open a space agency, because they know what it is, what it comes, what it can do.

But there is a big problem in Iran, as I said many times, they want to annihilate the State of Israel. They want to destroy that. As Ahmad ??, that stupid guy said, they want to wipe me off the face of the Earth. They can't say the guy who's brought so much technology is half Jewish blood. They cannot sell it to Iran. This is the problem we have in Iran. How can you have a Jewish blood so devoted to a nation? It doesn't fit. So, they have to keep it out.

Q: Mr. Keshe, you said to step away from the Gans's, and the MaGravs, and everything, and do it on another level. So, the expansion fields the, you know, the field interaction of the reaction, the reactor inside ourselves, the Sun inside ourselves, (2:44). will this not initiate and touch them on a Soul level, through the Universal Council, and through the Earth Council, and the Core team and all the beautiful Knowledge Seekers that are present in this moment. Being present in the moment...

K- You are a drop in the ocean, we have to gather many drops to create a new ocean. That's the only way I can put it.

Q: Does it have to be planetary based?

K- Man has to change it from inside, otherwise, "the others have done it (in me, I) didn't want to do it." If you do it yourself, then you can't blame anyone. But if somebody else gets you to do it, because they see the benefit of it, you go back to it, or you blame them for it. I know this firsthand. Man has to do it from inside. It's no use coming from outside trying to change the man inside. Because then he goes back to it, and he blames, "the others did it, we didn't want, we still wanted to kill and eat."

I had this battle for nearly 15 years, till very recently the person understood, that it was a battle with himself, not understanding what was done was for his own benefit. Then he changed. He changed 180 degrees.

Q: I've noticed that with the plasma Mr. Keshe, it does have a distinct ability to flip and completely change its direction, it's that MG field interaction. (2:46).

K- It's understanding, it doesn't mean becoming bigger. It's understanding, it's totally understanding. That's all it is. What do we understand.

Q: What do we allow?

K- Yeah. It depends what. Not, what do we allow, it's what we would like to accept. It's a big difference, it's a very, very big difference. What we would like to accept. Anyway, we'll see what happens and how things take shape, how much we can educate.

I think the point of change is, it has to come progressively, it cannot be as a shock, in one way or the other.

Q: Yeah, it's definitely a filtering process, Mr. Keshe, you taught us a long time ago. I remember, one of the teachings you've said about this gathering of the heavier and then it gradually gets finer, and finer, until you get to the end, and then. But each one has its position and has its unique ability to be used in a certain way. So, the filtering process, whether .. it goes from the matter state through, gradually filtering through to the Soul and becomes that essence of the Sun of, you know, the essence of the Universe and the Creator. It's all part of us. And, you know, we are a Plasma, the Earth, part of the system, that everything that we're involved, everything that is us is a Plasma, (2:48). you're teaching about Plasma, and is that condition of...

K- You know, change it to another word, call it, "Plasma life," because that's what it is. We always consider life as a physicality of breathing and moving. If you, now we understand, that in the center of us is a fields, and call life a Plasma, or a Plasma life. You interact different way, you don't need an arm, your arm extends the Universe. You don't need a leg to walk, you can get anywhere instantly the way we do in the systems.

I know one of your wishes is to get into that room and get into the system. And I say, it's not the time. When it comes, you will jump across. But these systems are made for us to learn and to teach. We had to bring Knowledge Seekers that you are part of it. Keshe Foundation is not an isolated thing, they do things, and they tell us. No organization has ever done what we did with you lot. How many of you, we came every week, every week, sat there, waited the whole day to go into that system. I sometimes started think, my god, these people are so hungry to be part of the change. They come nine o'clock and they don't get into the system till five o'clock, and they're happy that they got in, and they can add something to the knowledge. You've seen them.

Q: I have Mr. Keshe, yeah.

K- So, it's the first time that knowledge is created, tested, proven by a number of people. (2:50). It's not NASA, we chose you, you do an exam, and you come. A doctor, a layman, a housewife, a painter, a carpenter, anybody has walked through this system. We didn't look at their physicality, we look at their knowledge, we looked at what their Soul brings, that the system accepts and we can learn from. It's a big difference.

Q: I just suddenly thought Mr. Keshe, something just occurred, a thought. So, have you placed, I don't know, obviously you would tell me whether or not you can discuss this, but have you placed other beings, other entities, other Souls within the system, like a flower or something else other than, you know, what we would describe as a being with arms, legs and everything? What about something else?

K- Yes, ??.

Q: And the interactions, can you describe what, how? Do you know the soul felt, what they expressed?

K- Yep. You do not know what I carry in that room? You've seen me, sometimes I walk in with things in my hand in there, I think.

Q: I have, yes.

K- So, they just don't go in there for the sake of being in there. They go in for a purpose.

Q: And they're adding to the Soul of the Totality of the unit?

K- In a way. I think nobody is close outside the structure of people who make these things, than you have seen what's going on in there. I think you and my bodyguard are the only one who actually monitors anything goes into that room. (2:52).

Q: Yes. There's Souls that are present, that have been through there. I've encountered many beautiful Souls, Knowledge Seekers. And the reason I asked that question is that, when you come to understand the knowledge. You understand the beauty and Divinity of everything. And many people know this and in all sorts of expressions of life, and walks of life, and teachings and things. However, when you actually experience it, on a Plasma level, on a Soul level, you do as a Knowledge Seeker, touch another position, another field strength, that does expand the consciousness of and the thoughts that you have, towards another Soul, towards another position. It makes you, it does touch you.

K- It depends what you do with it.

You've been there, you've seen, as I said, my protection officer is the only one who's literally always within meters of me, and he sees how people go in, and how they come out. Sometimes I look at him and I think, God, this guy is not a Knowledge Seeker, but the things people come out and say, and he has to listen to, what goes in his head? You've been there. You know when people go in and they come out, and they explain the emotions or things they did. He's there, he listens because he got to be a few meters from me. You've seen him. I wonder sometimes what does it go in his head?

Q: He's a very beautiful Soul. (2:54). I'm sure that he's receiving many, many fields strengths from all the Souls that are present, that go through the system.

K- He is an amazing guy. But, I sometimes wonder, somebody who just is there in the line of protection officer, what does it go in his head, seeing these things, coming out of no background of the knowledge? A total outsider.

Q: I sense he knows a lot, Mr. Keshe.

K- You've been there, because you talk to him.

Q: I think he knows a lot, yeah.

K- Any other question? Or shall we call it the day? We had a long, long day today.

K- It's four o'clock in the morning, what are you doing this time of day?

Q: I'm celebrating.

K- Ah, that's good. What's happening? What are you celebrating?

Q: Celebrating new life. A new world.

K- Tell us what's happening. What's your question?

Q: .. Recently I was studying your paper on ALS, and concluded that the will to die is the ultimate cause of ALS. (2:56). So, I think that the so called, natural death is not actually natural, but due to the same reason as ALS patients, a will to die. Only the difference is that ALS patients have a very strong will to die, while others have a weaker will. Then if we can rewrite, .. we can freely decide how long to use this body, that is our own lifespan. Then we can quickly relieve it when the body is in pain or stressed. So, I would like you to comment on my views, which are correct, and maybe not correct. So help me to correct me if I'm wrong. Thank you very much.

K- As many of you know, we used to, I did a lot of work on MS and ILS. To see the effect and the progress in new technology, and the will of the man. If you remember, we had a guy in Italy, who we followed, he built up and then his sequence of work was to die with ILS. We've done a lot of work. I see in the background, even in some of the .

There is a Knowledge Seeker here in the background. She would have died from MS years ago. She's here, she knows who I'm talking about. We applied the process of the technology with her. Now it's more than 15 years, she's still living, more or less, (2:58). in the dimension of the normal life in MS.

She understood the reason why she enforced this on herself. And ILS is the same. ILS doesn't happen, that every time they wish to die and they control. It happens in a split of a second, and for once. And it's so powerful, that switches the emotion of life, or the intention of life. Up to now we had no knowledge. Now with the knowledge, especially the new Enhancement Units, we can turn that switch.

Doctors came out with a lot of medicine, a lot of chemicals, a lot of things, psychosomatic, psychological medicine or whatever. Nobody has ever looked at the Soul, the emotion, the fields. The new technology, Plasma technology, as emotions are creation of the fields, it's more or less, will be the only technology, that we'll be able to make that switch back.

This will be proven by the world of science. I proved it in a way, of physical Plasma, not the new understanding of the Plasma. Now, especially adding the cosmic rays to it. We can switch. Once that switch is switched, the guy doesn't even remember.

It's like wanting to commit suicide, you go you take a tablet and you kill yourself. With these people it's emotional switch, it just happens. And that's it, (3:00). they can't reverse it, because it's happened, it's there. The switch is locked.

In the past, we could bypass this switch. But with, in the past, I mean the past 10 years, we could bypass the switch and change the condition. With the new technology we don't bypass, we actually have the knowledge to create the switch, to flip that switch.

I'm sure next few weeks and few months, a number of ILS patients will use these new technologies in, most probably in Arizona, in Germany, in the other places using our system, and you will find out ALS will not be there.

It's a switch of wish which gets stuck. It doesn't allow the life survival information to pass the switch. It is a physical entity inside the brain of the man, we know where it is. But it needs a field the strength from the Soul to switch it. And the new technology we have, has that capability to switch it. In a way, it melts the lock. If you look at it, you got the switch locked in the ice, you can't move it, you're trying to change the gear but it's iced up. This technology has that power to de-ice it, in a way, if you call it.

This technology is made for psychosomatic conditions like ALS, MS, Fibromyalgia, and Alzheimer's, Parkinson's. (3:02). We used to use, as I explained to Dean, technology of the Plasma matter state. Now we are in a total Plasma, plasma state in the body of the man, Plasma, it just goes. It gets better, we're learning more, we are adding more.

Now, if it takes 10 weeks, 15 weeks to, for our doctors in their centers to change the, let's say, Parkinson's, Alzheimer's, with the new generation, which is coming in with the cosmic rays, you should be doing in a day. You will see it. But then the body has to start learning to go back to normality. Then the brain has to rebuild to go to normality.

You can switch the thing on, but you have to understand, the rest of the system has shrunk, the rest of the brain has shriveled and turned, now it has to build and go back. It doesn't happen over time of one second. Months and months it takes to go back.

Q: Actually one of our famous enterprise Jingdong, one of his high level management people has get ALS. And he was fighting for several years and set up a committee in China for helping people, which had ALS. I had approached his, like a, leader of his committee, and the company had passed the paper to them. But unfortunately they cannot accept it right now.

K- They can never accept it, because it doesn't make sense to them, it's not in the books. (3:04). I keep quiet for a while and then we'll tell you what is about to come. In China you suffered because of the decisions we made. What was going to happen, and now today we have concluded this matter, hopefully by tomorrow it will be done. But what we set up to do was actually, bring a massive change in. We still hope that it will be taking shape in one way or another. Once we publish something, there'll be a lot of work on it to research and develop it. We have to wait and see.

I remember when we did, the Italian ALS guy was in a wheelchair, I don't know if you remember the videos, and we followed him to go to the company, to the factory where he used to offices, he used to work, to go back to work. And at the end, he, we bypassed the switch, we brought the will to live, but we couldn't dissolve the switch.

Now we can, with the new technology, we can open that switch. And the only thing is, the proof of the pudding is in eating it. It takes time. I think we'll hear a lot from Jon,

when people start using the facilities there, we hear from Germany, we hear from other places, when they started using these, and the people will come through it. (3:06).

Q: Yeah, I had the feeling that the time is coming.

K- You know, we were talking with the factory people to start releasing the Enhancement Units last week. So, the knowledge is there, then we start it. But it still doesn't stop. My biggest concern is that, even though we have become so advanced, every six months twelve months, we have to revamp these systems internally and all the enhancement technologies is developing so fast, that it becomes obsolete. Instead of spending 10 weeks, you spend, what do you call it, 10 hours.

You remember the gentleman with the Parkinson who came in, and he was running after a few days. So, we learn so much in those systems. You saw the lady is in a wheelchair and the brain, and a few days later was dancing in the hospital. You remember? We have the videos of it. It is, technology is there. It's just a matter of. Now we could not do certain things, with the new developments we can do.

Q: That's all we are looking forward, for the more powerful.

K- It's not powerful, it's understanding.

Q: But you said that the cosmic ray, that's mostly important technology base.

K- Yeah, but it's not a power, it's a knowledge, understanding it. It could be the weakest strength in cosmic ray which does the trick, not the most powerful.

Q: Yeah, yeah, yeah, that's the beautiful of the Plasma. I always call me a little Plasma, right?

K- Let me ask you something. Where are our six systems which we flew to China from Austria? (3:08). Do you know where they are?

Q: Two are in our office, but there are several is student doctors, in their hand. They haven't returned to us yet.

K- Can you collect them, please? And I tell you what we going to do with them. For those of you, if you don't know, we built a preliminary of these Enhancement Unit, six of them in Austria, about three years ago, maybe more. We shipped into China to be tested and the academician who started test with us, he is a military academician, of the Chinese military hospital, who worked with us with these systems. The whole the structure was to see, and we learned a lot from it.

Then it became the backbone of what you have of the Enhancement Unit.

Thank you very much Lin, go back to sleep. Thank you very much everyone. Hopefully we'll meet each other next week at the same time, as normal nine o'clock in the morning. Thank you Rick

Q: Thank you, I'm so exciting. So, I cannot fall sleep again.

K- Thank you very much indeed.
