

458th Knowledge Seekers Workshop; November 10, 2022 (Quick Index 33 pp, Introduction ,Topic Index, Transcription, Proofed, Need to do; Key Phrases, Words) (Auto transcription from Elias)

Land on planet don't go through evolution; Mutate; Plasmatic Magnetic Inertia; Non-dimensional life as energy packs; Soul fed by Cosmic Rays (CR); Macro/Micro examples - electricity & computers - Coca Cola Bottle - EU; CR interacting with KS in lab; Gans to gas interact with skin becomes odor - how CR work; KS fed by fields felt in stomach; Soul can be captured; Fall in love with STM; CR converted to electricity in Nano layers; Messiah is your dream; Space travel need knowledge to survive; Soul needs feeder - CR - beginning & end; 80% from CR; Giving Soul's field to others; Infant death - CR soul mature; Soul communicates back to Creator; 99 Names of God; No more mysticism in religion; Trauma stored in brain; Soul not burn; Many states of matter; Sow transmutation - everything changes; ATM machines; C14 - CR field connector; Center on Moon; Micro Plasma Power Units a reality no more power stations; Birds in U; Child of Mitra; Commercialize through Markray; Change U; rich refugees; Aura

Topic Index

Land on planet don't go through evolution - manifest as they are; Mutate to what you need to survive; Another D of Inertia - Plasmatic Magnetic Inertia - always adjusting; Life in Earth's upper atmosphere - Non-dimensional - energy packs; Open for all kinds of things in U beyond imagination - not say "don't exist" or afraid of; Will learn how to elevate Soul and be fed through Cosmic Rays (CR); CR are radiating through lab; 80% part of CR; Hundreds of years for man to understand Totality; Interaction of CR with body creates Aura; Fields around head with STM different than around body; Skin protects from CR that don't need; Cancers can come from CR you don't need - creates mutations for evolution of man; Far north countries high rates of suicide - not enough CR to elevate Soul; Dancing in African village - more CR; Falling in love different in summer than winter; With creation of CR the EU become separate U; CR effect mood - understanding - interaction with U Community; Already experiencing things like CR - later discover the knowledge & understanding - same with new knowledge; Macro in the Micro - electricity & computers already with us as lightening & Brain; Dimension of P won't need to confirm itself - free: Man will be given completed space T to travel - not wait for evolution; When you transmute from US to Austria will you change to Germanic characteristics and speak German?; Will transmutation travel cause elevation of the Soul?; Through emotion can change shape during transmutation - arrive as a cat then switch to a man; Can enter ATM machines in D of Soul - take Euros - but remember correctness; When go to another D - use CR to survive - but pretend to live like locals; Could see the CR fields interacting with KS building new units - like a Plasma Ball - fields go to person and come back to CR system - (Like a Sci-fi film) - Understand field interaction; With CR using minute M field strength - not billions of Tesla's; Body example of work of Cosmic dimension of fields - Gans in body become gas - interact

with skin and environment become odor; We constantly transform CR; KS given experience of feeding from fields - felt taste of Mango - felt movement in stomach; Appear on planet - they have T to capture your soul - would you be able to transmute out?; Can I change the soul strength from a dog to man or whatever - next step in teaching; We are Universal Teachers - not prophets - waiting for Messiah is in your dreams; We share knowledge; How to explain love to someone who doesn't know it; Fall in love with STM - to live together with it in U; Space travel - you're "last man standing in that position" - how will you survive - need knowledge to live there; Soul needs a feeder - the CR - "I am the beginning and the end" ; Earth confirms existence of itself and Sun; Once we understand K of Creation don't need theologians to confirm existence of God - our own P is confirmation; We ignored being the Source - in contact with it; "I made man in the image of Myself" - but how will man come to accept his own new image? First contact with KF was "Coca Cola bottle" (Macro in Micro) is same as EU - probes in bottle same as Helmets - magic liquid is CR; Measured electric current - CR converted in the Nano layers; Teachings have been same - your knowledge is growing; We produce CR on planet; 80% feeding us are CR; Much more knowledge to come; We have to decide what strength and D we want to be in; Can help other beings by changing strength of your Soul - even help beings from U; Would you give your Soul's fields to another even if it meant your own end? - we have missed part of knowledge - you give at strength you receive - become intermediary; We are bottom feeders from Energy Packs living in upper atmosphere - eat their leftovers; Are we ready to interact with them and guarantee their survival; Infant death - pure Souls interact immediately with CR - maturity reached - don't need suffer P; Babies communicate with each other through Soul; Our Souls beam messages back to Creator - like weather satellites - tell what is needed; Creator not tied down by P - like STM; Scientist will research what each of the M fields strengths give and can do; Koran 99 Names of Creator - field strengths and interactions - multitudes more than 99; EU are for learning about different field strengths of CR of the U; Keep moving goalposts further from Nano to CR and beyond - but have solid foundation in knowledge; Be humble to process teachings and teach others; Preparing to live in U Community;

No more mysticism - understand K of Creation; No more exclusivity of the knowledge - shared with everyone; Clergy think they are appointee of Creator - using gun policy to enforce; When we understand no need for Popes and Ayatollahs claiming superiority; Mr. Keshe still a KS - seeks knowledge of interaction of the fields of the Creator; When makes claims of superiority - stop learning; Traumas are stored in the brain - you decide if it's trauma by perception - becomes part of STP in D of P; Soul does not burn - not effected by P; Soul in D of free fields same as fire - receives energy; Experiences get stored in the part that touches your physicality; Whatever touches STM - becomes part of information of plasma; Compared to meteorite; Soul can fly to Sun in D of Soul - plasmas don't burn each other; CR come from other U - effects Soul only if it has a matching field strength - otherwise not attracted and moves away; Many, many states of matter in U besides solid liquid gas and plasma; Mixtures of states man never heard of; How does a Gans become bone or hair; Why does hair change from black to white; All has to do with fields; Change color through desire of Soul; Experiment with changing skin color during transmutation; 80% of world of medicine finished - 20% need to build

systems for; Lady who felt water in EU - now can make fields of water - don't need to irrigate - bloom deserts; Transfer fields of water to man - no thirst; Cosmos limited to man and his universe - whereas Universal Fields from Creator to man and beyond - then we are complete; Wars today are religion based - done with large invasions for land; Ukraine is Catholic trying to take over Orthodox; Man has to sort out problems of Soul; Once transmutation travel starts - religious wars over; Bring cameras inside Flight Room - see transmutation - can't deny it; Will governments allow; ATM machines "Dead men" waiting for soul; Then would we need a financial world; ATM storage behind EC; Need to have something to do in perfect world - continue to evolve and elevate Soul - no zombie souls in U; Man gifted with K of Creation & Creator - become superior or humble and share - all equal; Muhammad took love of God from tribe of Moses - became nomads - gave that love to Christians; We took love of God from Iranian clergy few weeks ago - see what happened; Religious leaders sickly - P doesn't accept lie of STM; Gave system to help Pope with knee - he didn't want peace - continues with war - back in wheelchair; Peace comes through Soul; Do not inhale matter state CO₂; C12 is essence of creation in man part of AA; C14 is connection to universal CR; C14 is CR - not speck of C; Look at field strength & connector to all other fields - a bridge; Not talking about C14 as plasma energy - but as connector to all fields - has more parameters to connect to spectrum of fields; Man connected to G fields of liquid (O) and gas (C) - fields of soul - essence of Inertia and STP; If you land on planet without O - mutate to what is available; Understand field strengths - example of bullet traveling through water in different states of matter - solid liquid gas - but all water - ponder relationship; Possibly deceived by organization that tried to expand KF around world - venture ended - in writing; KF T should become part of every hospital; Have knowledge to help Parkinson's - Alzheimer's - MS - Fibromyalgia - can setup center on Moon - transmute to get processed - no FDA; Offered to German Chancellor with Parkinson's; Governments and doctors like Turbans and Hats - lie to themselves and others; Diseases have M field strength - can adjust it;

Don't need megawatt power stations anymore; KF has patent on Micro Plasma Power Units (MPPU) the size of 9 volt battery; Fusion reactors are finished; MPPU produce electricity on demand at point of need - no more transmission lines or environmental destruction; Patented 20 years ago - now a reality; These miniature reactors create CR and plasma for few cents - MaGravs now obsolete; Completed within past few weeks - nuclear power stations obsolete; Can multiply power to what you need; Can embed in electronic and cars; Europe by 2035 no more fossil fuel; Possible strong hotspot for another religious war; MPPU carries emotion; Can reposition planet if understand; System effects emotion of humanity - but your Soul decides what to take from it; STM has emotions also not exclusive to P; Why birds migrate - absorb higher strength M fields in higher altitudes - geo cosmic rays; Have a kind of bird flies between galaxies and universes - free unconditioned connected; If Soul can become size of planet how does it shrink to become a man or cell - field compactors to whatever size - fields expand to what size you give them; Take plant from one place to another change size of leaves; Highly intelligent creatures could be size of amoebas on earth - more intelligent than man- depends how they want to accept condition; Does everybody have to accept the change for it to happen - we make it so available everybody goes with it; If you ever made or touched a Gans - will become part of the upcoming process for change; Man like

prince who thought he was a cow and wanted to be slaughtered - soon he will want the noose off his neck; Once our people understand will release Micro plasma unit to humanity to make yourself - like the MaGravs - then elevate your soul - they are CR units; This will elevate the U as well as planet; Recycles energy surplus in U - how totality works; Mitra collected best in the U - Child of Mitra gives it back elevates the Totality - comes from Creator goes to Creation than back to Creator - a cycle; Patents drawings took months; Layering of plasma not matter state; KF will commercialize through Markray - become the largest corporation - KF majority shareholder - KF belongs to you - I came with nothing will go with nothing; I have no expectation - just actor in big theater - scene is set by Creator and Mitra; New T will change whole of U; People in UFO waiting to see how humanity will handle change; Humanity learns new knowledge - like Orange and U like Cup; Ask Mitra & child of Mitra why humanity chosen; My sister was a "Mitra" I understood what loving means; Need 200 more Satellites - 50 more Mobile ; or development comes to a halt; Situation is desperate KS have to start coming again to Linz; We don't test - you don't get T; Linz tests have come to a halt; Italian 11.11 guy destroyed Italian KF community with lies; Tests are for humans to understand technology; Christmas package; Need Satellites Souls to cover earth; December 6 is birth of Child of Mitra - U Council member to transmute; Teachings are heard in all dimension - not just voice of man; Creator and Mitra - 2 fields of Plasma; Once we show transmutation - a lot of things will change; November 17, 2011 - offered to show Americans transmutation; Very rich Ukrainians coming as refugees; Billionaire Ayatollahs evacuating families in case of regime change; Ayatollahs will be brought back to Iran face justice; Pushing for transmutation to also stop suppression and abuse of man; 14 year old virgin Iranian girl raped by police so they can shoot her- done in name of religion; Free beautiful people from hospitals; Love of God taken from Ayatollahs and children; More about Aura of man; Gans and gas interact together with environment to create Aura; Can move things in and out of body through Aura; Use CR to feed STM which than feeds millions of cell souls of body; Soul feeding creates different Aura; You interact with Soul of the fields of the prophets - not P - golden white colors; Know U Council by their soul; Transfer energy through fields of Aura - give love to children; Transfer fields of Gans without touching them; Mobile needs visa permission from government will not break laws;

Introduction to 458 KSW - Cosmic Rays & Macro/Micro & Totality

There are so many subjects taught in this workshop, that for introduction we'll just go over a few things. You can spend a lot of time with these precious teachings. The main part for us to continue going deeper into the Cosmic Rays (CR) how we will open and use them for our adventure in traveling the U. Let's start with the beautiful image Mr. Keshe gave us about watching the CR interact with a KS who is building the CR system. It was like something out of a Sci-fi movie. The colored rays were going from the system to the KS, like when you touch one of those plasma balls and all the colored lightening bolts are dancing around your finger. Then he saw the CR going back from the KS to the system. It's like an exchange of energy - and being a part of something bigger. It makes you wonder what was going on in the KS head, would the CR give him the power that his

thoughts would come true? But maybe he wasn't aware, that the rays were penetrating him, the way Mr. Keshe was seeing it.

How quickly this is all advancing, because in this workshop he announced that the Cosmic Ray technology is available now in the size of a 9 volt battery. This 20 year old patent has now been achieved, and when the KS understand the knowledge of it, it will be released to us. In fact, we'll be able to make it ourselves. We will have access to the CR for elevating our Souls and for having all our energy needs for living met. The CR will feed our Souls and the Soul will feed the physicality.

Actually we are already using the CR in our bodies. One way is how the Gans converts to a gas, which then interacts with layers of the skin and becomes odor. Have you ever noticed that we all have a unique odor. I mean the totality of our odor, that comes with who we are. We each have a smell. Perhaps the smell reflects a particular field strength, and that we emotionally connect with certain smells, while with others we don't. I have also noticed that there is a particular smell that goes along with aging. All these things change over time, because they come from dynamic plasma interactions. This is part of becoming aware of how fields interact.

This workshop gave a deeper understanding of the Macro inside the Micro, but it is subtle. For example, we experienced the lightening in the sky, the Macro, and later it became the invisible electricity (Micro), running our computers. And the computers are a copy of the brain, which operates all the functions in our body. It's an essential pattern repeated, but we weren't aware of it. We didn't have the knowledge. Now we do. He showed us the Coca Cola bottle, which produced voltage and current. The EU is a copy of it, and the Helmets are like the Nano parachutes inside the bottle. These are all the same thing, but we call them by different names, thus we get confused.

Mr. Keshe constantly refers to being able to understand the "Totality." My understanding is that, all these different Macro/Micro relationships come from the same field interactions, but they have a different physical appearance, so we don't see that they are connected to each other. It's like if you can understand the Totality, or better to say, feel the Totality. Then you feel or sense the invisible field interactions and how they lead to creation of everything. It's actually very simple, but because everything is interconnected, to the mind it appears very complex. And then the teachings always bring us back to ourselves, that the essence of who we are, is that Totality.

The beauty of KF teachings is that it is not just an idea. There is repeatable technology to go along with it. Now with the new Micro Plasma Power Units we'll be able to feel it and change our lives with it. When you hold something in your hand and you feel the power and what it can do, all doubts disappear. Later, we'll discover that it was already within us. It's the same with the transmutation process, once it is shown publicly, the whole game changes.

One of the things that blocks our progress, is holding onto the traumas experienced in childhood. This was opened up a little more. The traumas are stored in the brain, but it

really depends on how we perceive it and what we do with it, and if we consider it trauma. Wow, this gives us a lot of power to live our life through our true desires.

The physicality stores the experience in the actual place it gets touched by it. That means the body's cells remember what happens to them. He also said that what touches the Soul becomes part of it. So if an emotion touches your heart or stomach, then that place stores it. So now we can understand why experiences trigger certain feelings in different parts of our body. By dealing with them we can change them. Like if you treat a burn right away with certain Gans's it will leave no scare, because the emotion is satisfied. That means we can also satisfy the emotions of our childhood traumas. Then they become part of who we are, in a good way, and in a way that we can help others with the same problem.

These were the main parts of the workshop I wanted to share but there is a lot more. He mentioned a kind of bird that flies through the Universe. Is there a "bird" that flies through the Universe of our body? The Macro in the Micro. Maybe it is microscopic and plasmatic that it is not restricted by physicality? The Child of Mitra was born on December 6th. Mr. Keshe gave a KS the experience of feeding through the fields, he said he felt the taste of Mango, and the stomach moved as with food. The same can happen in a dream, you wake up and your stomach is working.

A further understanding of the Aura was given. It's the interaction of the CR with the fields of our body, like the Earth and the Sun. We can also feed the physicality through the Aura, but it's more complicated. It is easier to feed the Sun of the body through the CR, then the STM feeds all the cells. Same way you can receive the fields of a Gans without touching it.

This workshop is a feast for the Soul, please enjoy.

Thank you for listening

Quick Index

(When you travel in the space and land on a planet, life (in most cases) will have already been created, which will dictate the parameters of your existence there. The life will have already gone through the process of maturity, creation of a brain, organs, and emotion. It will also have created other kinds of interactions, such as languages and a lot of other things. You will manifest in that place and time, in a complete way with all that you need to survive. That is if you decide to go into the dimension of tangibility or physicality).

What would happen to you if the energies you need for the emotion of love don't exist on that planet? Or the energies you need to create a kidney. Or the field strength field for creating a liver causes it to be a hard solid metal in that position. Or the strength for holding your intestines together is a gaseous state. What happens to you? How do you mutate? And how does everything get fixed right, according to the position and time. In a

way, you are not born from millions of years of evolution. When you arrive there, the planet has already evolved and created life in that position in the Universe. (You will manifest there according to the Inertia of that place).

There is another dimension of Inertia, that the man doesn't know. It's called plasmatic Magnetic Inertia. It's different than matter state Inertia we have here on Earth. In the space we have M field Inertia, which behaves totally different. It's dynamic and is all the time adjusting itself to the space (conditions) of time.

You won't necessarily appear on the planet. Instead you'll appear in a plasma field, which sustains life, but has no tangibility. We know this life, because NASA has recorded it in the upper atmosphere of this planet. The astronauts have recorded non-dimensional energy fields moving up and down within the upper atmosphere of the Earth. (There is also life existing in the atmosphere of the Solar System).

We always looked in space for asteroids and meteorites. We never looked for these "energy packs." Because we don't have the tools (to measure them). But we do measure energy packages coming from the Sun, which create havoc with the satellites. There are other living energy packs that are evolving constantly, beyond Earth's atmosphere within the Solar System. Each environment of the Solar System has different life (structures), just like we have on this planet. On this planet we have warm and cold weather, snow, forests and deserts among others. The same structure of life exists (throughout the universe and galaxies and even in our Solar System, but without the dimension of matter state.

Gradually we will understand all this. But we have to be prepared for (all kinds of new things in the U) and not remain ignorant of them, and not to take the position, that it's impossible for these things to exist. When you become Man of space, the way you as Knowledge Seekers (KS) are gradually building up to it, you have to accept everything as you see it. You have to stay open minded, because you work through the energy fields and the Soul. When you're open to it, you have nothing to be afraid of.

(We said this when we did the flight simulations, that we will listen to anything anybody says, because it's their experience. We didn't laugh or make a joke about them, because they went through the transmutation, not us. It was their experience and we were open minded about it. We heard people saying that they were half mermaids, and the two lovers were on each other's lap. As KS we have become open minded about the technology (T) and the teachings. None of you came out of the EU and put down your experiences or denied they happened). There is no limitation in the dimension of Creation. Part of today's teaching is about this.

As more and more of you become passengers of space, you'll come to understand the cosmic rays, what their strength is, how to use them to elevate your soul and your position. (You'll learn how you can manipulate the understanding of the emotions of the man with the cosmic rays, then you'll find new dimensions of love, interaction, and new ways of giving).

(Yesterday I was in the lab where the new systems are getting built. I walked in the lab as a man, and I could feel the emotion of the cosmic rays and how they are (radiating) through the lab. The two systems are less than a half a meter apart from each other. One is stripped, and one is half stripped. One has received the "Head Unit" for transmutation. And one has received the Cosmic Ray production system. It makes you feel, that the man is getting ready for the maturity of becoming part of Universal Community (UC)).

It's not just by having a UFO and shaking hands with aliens that you become part of the UC. (The main part of joining the UC are the energies (you receive). It's that 80%, that you've denied all your life. Now, you'll see and interact with the UC. It's like the way you take vitamin tablets to get certain energies you need for your physical condition. You'll become wise to which fields you'll take to enhance and elevate parts of the "Soul of you," which will give you more. You will be able to interact more).

The KS working on the production of these new systems are getting touched by the (Cosmic Rays), because they cannot escape from it. It's in the space, that they constantly move in and out of. Some of the fields are concentrated, and some are half inside the system, and half outside. You interact with them when you pass through them. It's like passing between the two Gans paintings we showed you before. These fields are giving new dimensions, new emotions, and new understanding of the technology.

(It's no use putting these Units in Linz in 3 or 4 weeks time, if you don't understand what they are and what the system's are capable of. (When you go in them), you'll come to understand the Totality. You'll know which fields to receive from the system, and where to position yourself to elevate your Soul in the dimension of joy, giving, and which strength of love you want in the dimension of transmutation. These systems will create cosmic rays, and they match to different things. Some fields are connected to planet Zeus, the Moon, or to another universe).

Gradually, over the next decades and hundreds of years, man will come to understand the Totality. But for now, the Totality is not just being a (Satellite Soul) to visit Africa or another part of this world, it's going to other parts of the U to see how it feels, and what you can add or take from that position, so that you can give more back to it.

(Man needs to learn about a new fueling system using cosmic rays). We have seen and played with it, but we never understood it. You call it, the aura, or the fields around your body. These fields cannot exist, if the fields from outside do not interact with the fields of your physical body.

The interaction of the fields, or the light, on the level of the head, which contains the Soul, is different than on the body below the head. The body interacts with different cosmic rays, and it absorbs and radiates different rays.

Your skin layer protects you from the cosmic rays and other fields, which your body doesn't need. If you are intruded by the fields in the wrong way, what will happen to you

if you receive fields you're not supposed to receive? Then we see different interactions. The doctors today tell us, that they see cancer at the area where the incision was made. Yes, there was a mutation, but how did it come in? What fields were available to be absorbed by the body at that point?

Scientists place pots in the depths of the Earth to see if they can record neutrinos. Now the pot is you, and the neutrinos are the fields of the cosmos going through you like nothing. How will these fields interact with us, and what effect will they have on us. We see high rates of suicide in Scandinavian countries, because during the long dark winters, they don't receive the right fields of the Cosmic Rays (CR) for the Soul to be elevated.

Whereas in the heat of the jungles of Africa and Brazil, people receive different CR and we see them dancing in the villages and being happy people. They have received different CR, which effects their Soul and emotion. On sunny days you wake up happy. But on winter days you might be miserable, because certain rays of the fields, which you need, are not there. However, you can create them yourself.

Does it matter if you fall in love in the summer or winter? Is there a different effect? These are things that we as KS have to understand about the new Knowledge of Creation, and (the new understanding of life). The more I go into the environment of the new EU getting built, the more I see, how mankind is gradually getting ready for that step next.

(Entering a new Enhancement Unit (EU), is like entering a separate universe, because we have pre-dictated the conditions of the cosmic rays in them. By changing the condition or absorption of CR, we can change your mood, your understanding, and how you interact with the Universal Community).

Those of you who registered for Mobile, Satellite Souls, and space travel will feel these changes when you come in. Then we'll see how humanity will go to the next step of understanding the new knowledge.

(In the past we did not know that electric current existed, or about the computers. Later we came to understand electricity and then we built the computers. Then we realized, "Oh God, they have been here all the time." The lightning in the sky was the electricity and the computer was our brain controlling the operation of the cells, and relaying all the information. We didn't do anything new. By understanding a small process of creation, we were able to replicate it in different ways. And now we understand, that we actually replicated what we already had been living with. It will be the same with the space technology of the future), when we travel the span of this universe, through the fields, and not by flight.

Mankind up to now looked at the UFOs as being so advanced, because they travel so fast. But it's like the man who lives in the village with a donkey, and he marvel's at the guys in the city who have the bicycle and drives a car. You there are that man on the donkey and you think the guy on the bike or the car is very advanced, but there are other men who travel in jumbo jets, rocket space technology, and the rest.

We are getting to the point where even the D of physicality doesn't need to confirm its existence. It's a different knowledge, but in a way, it's the same understanding. (When man comes to understand a fraction of the Totality of the knowledge of the Creation, he will become part of this structure). This is what's on the table today.

(Yesterday, by looking at the new systems in the factory, and having just seen the present system in the Center, I realized it was like looking at a donkey and then a car). Even though they both were built in the same environment.

(The knowledge gained has created a space gap of emotions. The new things we learned has created that gap. The new systems look just like the old ones, nothing has changed, maybe it's a little bit bigger. But the technological advance is understanding the essence of the Creation. That's like the difference between the donkey and rocket propulsion). (The systems we have now, when compared to what is getting developed, it's literally like man hasn't even learned to walk yet, let alone to get on a donkey).

(We are not waiting to complete everything step by step, and then wait for man to catch up. We are completing the technology in a way that man will literally walk into the dimension of space. Those of you who go through it, you will understand (just how advanced it really is)).

We are preparing for the first American to enter Austria through the (new) system. (How will he arrive? What level of his knowledge or human characteristics will he bring with him. Would he appear in Austria (with Germanic features) like black hair and blue eyes, and whatever else. Would he speak fluent German? Would we still recognize him as the man who we lifted out of the US. Will the emotions he carried be the same as before he left his home?)

(Our first two Mozhan's will be sent to Moon hopefully in the beginning few months of the new year, as soon as we can complete the other tests? How will they arrive on the Moon? They are a couple, one Russian and one European? How would we see them and how will they see each other? Will they be able to find each other on the Moon? Even if we transmute them holding hands, will they appear at the same place, or one is in the north and the other in the south of the Moon? Will they be crying looking for each other? Or they arrive as two souls and then we see them. When we bring them back to the same position, we'll expect to see the same people back. But will their emotions be the same? Would they be elevated in the D of Soul?)

We don't have enough of you registered yet for the space travel. We need many more of you to participate. Then what will be the next? How will governments handle this? How will us as a humanity handle this new change. It's a new knowledge, new school (of thoughts), new language, and it's a new technology.

(We try to put human parameters around it to think that we are in control of it. Governing does not count when your Soul has no dimension. Governing does not count when we do

not understand ourselves, what would be the position and the condition of arrival? Does our immigration officer in Linz look for the man in the picture on the passport. What if a cat appears in the landing zone, because the traveler wanted to see how cats live in Austria, he arrives as a cat. Does the officer ask for the passport. Cats don't have passports. Then when he walks outside and in the D of openness in Linz he decides to see how it feels to be a human, and converts. He can do it because he has reached the understanding of the knowledge).

All these controls like passports, borders, money, everything else man has created for himself, goes out the window. (If I can travel in the D of the Soul, then I can also change the shape of the physicality. If I arrive without money, I know how to change the strength of the fields so I can appear and disappear. Then I can pop into an ATM machine, take a couple of thousand Euros, nobody, not even the machine will feel, that a couple of thousand Euros has gone out of his box. Now, you should begin to understand the implications of the new technology. We have to understand the correctness of what we do with it, and where this technology will lead us).

A KS said, Mr. Keshe says to think, talk, and do good. Yes, we do, but we do according to what you tell us is the truth, and we share that truth with others. This is how it will be. You will understand the truth by yourself.

(When you use the systems you know the parameters and how to conduct yourself. The Moon and other dimensions don't have banks or restaurants. How will you survive in that environment? They have their own way of surviving. But for you to survive there, you'll have tap into the universal energy and feed yourself through the Soul. But you pretend to be one of them, and do what they do).

Yesterday, I could see the soul of the new structure, the new life. Life, that us as the human race are not aware of. I saw one of our KS who is building these systems having lunch. It was amazing how I saw him, and I could see how he saw himself. (It looked as though he were one of those plasma balls, where you see the colored lights going from the center magnet to the edge. The lights were going from the system to him and then back to the system). The source of the essence of the new Space Systems are very much like those plasma balls. Now that ball is your Soul, and it's you who decides to which reactor, or to which space, time, and position you want to interact with.

We always thought that the lightning comes from the sky. But actually the lightning starts from the Earth and goes up. Now that Earth lightening rod, is you, it's your Soul within your physicality. Where do you want it to connect to? Now you have a choice. The first few times you try you might burn yourself, or you might end up somewhere you don't want to go. But you always know the reference is Earth, so you can go back and try again. (Whichever field strength you succeed in traveling, with that you will survive, and taste and enjoy the experience).

(In the structure of the new space technology, we do everything with the Cosmic Rays. We are not working with hundreds of billions of Tesla's. Instead we work with Pico M

fields. We do not see atmospheric pressure changes the way we see it on Earth. We feel plasmatic M pressures, the way it changes in the field of our stomach).

(The best way you can understand how the cosmic dimension of fields work in your body, is through the odor it produces. When your body produces a gas, first it changes it from a "Gans gas" to gas, and then to an odor. Your body is a living example of the interaction of the fields, with the cosmic rays, both in the matter state and in a plasmatic state. But you never understood it).

(We never analyzed how odors are formed by the body, which is made of Gans's. Due to the construction and process of the layers of the skin the Gans became a gas, and then through the last layer (of the skin) in interaction with the environment, becomes an odor. We are a living example of cosmic ray field transformations, but we never understood it. We just went around trying to silence the sound of the gas, by not letting it go through the last transformation).

(We have to also understand the aura, which is the interaction of the collective body fields. I have taught you too much to let you remain ignorant. Last week a KS drove a long way from northern Germany to be here. I asked him to get something to eat, whatever he liked to have. He said he tasted mango, and could feel it in his mouth and going through his stomach. With that emotion of feeding, he was actually already absorbing (the energy, and the feeling confirmed to himself, that the physicality received it? Could he also receive it without actually having to confirm it in the physical dimension?)

(Isn't that the dream? When you interact and see something as a dream? But now you do it in the waking state, you give reality to the dream, and now it becomes a reality of actually eating? How many of you have had dreams where you went to a restaurant and ate the most beautiful food? When you woke up did you feel that your stomach was working? Even though it was a dream, you changed sense of emotion. This time you are changing the essence of Soul of the Physicality (STP), because you're in control of it, and you want to feel it).

Now you understand how we have set up the systems. When I ask it to be done, it's done, it's not psychologically setting it up, it's for you to understand in what channels you want to open. Why did he feel mango, but not an apple. Because at that point, the fields which the body needed was at the strength of what mango gives you. (He had felt the Mango before (Africa) - so body knew fields ??).

Then we enter a new dimension of life and knowledge. (We cannot just say it happened accidentally. We see how when we can strengthen the Soul, then that changes even the psychosomatic conditions in our body. We taught you that the 80% of the energy comes from the environment, and now you see how powerful this energy is and that you can receive it, and that we can stop the 20% intake).

(Understanding the new process of the cosmic rays, and the interaction of cosmic fields on the structure of STM, physicality of the man on this planet and beyond, will become your entertainment, enjoyment, and your way of surviving).

(What would you do if you appeared on another planet and the inhabitants have the technology to capture your soul. Or if they captured you, they might know, or they might not know if you have a soul. But now you have become a monkey in their zoo, or a fish in a tank. Would you be able to transmute yourself out of there, or would you remain in their zoo for the rest of your life, whatever that might be?)

How much connection (have you developed) between the STP, STM, and the dimension of physicality of the man, or the entity, that you could transmute yourself between the Soul and the physicality, depending on the interaction of the fields?

(Let's say I come here to Earth with a soul strength of this position, that dictates I will be a dog. But I don't want to be a dog, I want to be a man. How do I change it, so that I appear as a man? This is the next step in the development. How far will humanity understand the new science and knowledge?)

As I said many times, we are not prophets, we are Universal Teachers. That Methi or Messiah you're waiting for it's in your own dreams, it's in your own understanding. To us, we are Messengers of the Knowledge of the Universe, and we share that knowledge. How much you take, (and how much you evolve to be able to understand and enjoy more, is up to you).

It's no use going into a man in the back villages of Africa and trying to explain the beauty of Niagara Falls, unless you yourself have actually been there and felt the emotion of the place. Likewise, how a skyscraper or a jumbo jet feels, will have no meaning to him. Because he hasn't been educated to it, or he hasn't had a television or a mobile phone to see that such things exist, and that he wishes to feel how it is to be part of it.

How can I explain to you what it feels like to be in love, if you (haven't experienced what love is? Because you were never taught about it, you are ignorant of it, and you've never come across it, and you've never had even the intention of discovering it. Then when you fall in love you'll say, oh, this is what that guy was talking about).

All I say to you is, fall in love with your Soul and with the STP, so that you can live together (with it) in any dimension in the Universe.

In the coming weeks, when we transmute you from one unit to the other, or from the US to Linz, or from here to the Moon, Mars and beyond, you're the "last man standing" in that position. How will you survive? How will you use the knowledge you have to survive? Or would you manifest yourself as (a half a man, because you don't understand the rest of the knowledge at that time, place and position. Or because you still want to be half man. But a misplaced man cannot exist in that dimension. The atmosphere does not allow the amino acid at the strength of the life of the man to survive there).

(This is why we started teaching you about the Soul so you can understand these things. You have to understand, that the Soul needs a feeder, which are the cosmic rays, which are the interactions of the cosmic fields, and the interaction of the plasmas of the cosmos). Some of these fields emanate from the essence of the Creation of the Universe, and what you call, the Creator.

At the point of maturity you understand, I am connected to It, as much as It's connected to me. I'm part of it, because I create that strength between it and me, that it gives me the confirmation and dimension of existence. "I am the beginning and the end." Is the beginning where it comes from, or is my Soul the beginning that it goes back to?

(There can be no planets if the fields from the Sun do not slow down at the outer boundary of the atmosphere of the Solar System. And then it comes back towards the Sun and creates the Inertia, or the mass, that confirms the existence of the Sun. Otherwise, there would be nothing there. It would just be fields moving. When you put the Earth in front of the Sun and it creates that life, and it creates that light, which confirms not only the existence of the Earth, but also the existence of the Sun. You cannot have one without the other. I am the beginning, and I'm the end. The confirmation of one, is also confirmation of Me).

This is what I've always said, there is no line between theology and what we call, life, and science and technology. Once you understand the science of Creation, you become a (theologian), and once you become a theologian, you've confirmed the existence of (God) through the manifestation of physicality. (Then, do we need these people who try to tell us about God and Creation, just because they think they can. Or do we trust in our own ability to understand the knowledge we have been given).

(Because we always ignored being the Source, and being in contact with the Source, (they were able to take control). But now (with what we have been given) we cannot ignore it anymore. Many of you will walk into these new systems and you will become a light. You yourself won't see the light, but those standing outside will see it. But at what strength will you become the light? (What will be the confirmation that you exist as the light?) "I made man in the image of Myself." But how will man come to accept his own new image?)

(Think back to the first time I tried to explain this to you in that "Coca Cola bottle." This was the very first time many of you came in touch with the knowledge of the Keshe Foundation. Nothing has changed since then. Look at the shape of that Coca Cola bottle, and then look at the Enhancement Units. Those probes that were stuck in the bottle, is the same as the Head Unit you wear when you go inside. The atmosphere of cosmic rays and fields created inside the EU, is that magic liquid in the bottle, that you all have been asking about for decades. What's the magic liquid in the Coca Cola bottle? Cosmic Rays).

Today you are more knowledgeable and you can understand it easier. As you see the knowledge has always been consistent on all levels. (Before you couldn't understand the

Coca Cola bottle with its electrodes and some liquid. But we are still in the same position. Instead of the Coca Cola bottle, now we call it, the Universal, Enhancement Unit. The electrodes are the Head units. And the liquid is the fields, which we create and we become part of it. That creates the transmutation, transformation, and the Nano materials, in which you measure the electric current. Where did the current come from? Many of you years ago when you first became KS, built one of these Coca Cola bottles and measured the voltage and amperage? Where did that current come from? You were saying it was electric current. But now we understand that they are cosmic rays, which convert to electric current in the space of the Nano layers).

The technology and the teachings have always been on the same line. It's just how much more knowledgeable you have become. We had to teach you about the Soul, because now you put your head in that Head Unit, it's there, it's the energy, it's the essence. What's going to happen to it?

We had to teach you about Nano technology and the Gans's, because now those are the absorbers, and the creators and the creation of all dimensions, what you call, Cosmic Rays. (In the new developments in the science, we produce the cosmic rays. It's not anymore the cosmic rays are just in space. Now we can produce them on the planet. Now we can control them and we understand their interactions. We have found that "magic 80%," that has been feeding us, but we've been ignoring it, because we were ignorant in the Knowledge of the Creation.

(There is still much more to come). We have just entered the "twilight zone" of the knowledge of the Creation. The Sun is still to come. The beauty of the knowledge is still to be added, as you mature more and more.

We have to understand and decide, (so that it is not decided for us, what strength and D we would like to be in? If you see a horse in pain, you can change the strength of your Soul, so that you can communicate with its soul, and find out where the pain is. Then you can convert that information back to the human dimension, by interaction of the fields between both of you, and then give him the right remedy?)

(You can do the same with other creatures from another dimension of the universe? You have to understand its pain and joy, and how you can give to it to alleviate its pain. Or free the sources. What would you do if you come across a being in the universe that is in need of magnetic fields to survive, that match your own strength, but part of that M field is the structure of your Soul's strength. Would you give it? Or would you hesitate, or would you give it to him knowing that it would be the end of you?)

As a traveler of the universe I give it. But you have missed part of the knowledge. My strength (comes from what I give), and at that strength I can receive. I become a feeder to him and the essence of his survival. (In this way I am like an intermediary. Because he cannot tap into it, then I tap into it for him. How long would I stay in this position for him to be satisfied, a millisecond, or a million years, so that his survival is guaranteed?)

We're not talking about being romantic, we're not talking about something imaginary. You will come across it, now that you will become travelers of the universe. The first thing some of you (have to deal with is, how do we handle the lives that are living in our upper atmosphere with the dimension of physicality, but as energy packs)?

(The world of science has to come to understand that the AA in the upper atmosphere are part of the structure of the Creation of this planet. We need to become aware of their existence, and that we are the bottom eaters of the Earth's atmospheric condition. What falls from their surplus energies, we collect. Like the "Orange and the Cup," we are the Cup that absorbs the energy fields which fall from the sky, the leftovers of from their interactions. In a way, part of their excrement is most probably what we need to survive).

This is something we couldn't accept nor understand, but we have a confirmation of it through NASA videos. We see them existing and moving. (There are many questions unanswered like, where do they go, how long do they live, and what is the fall out? And then there are other creatures? How do we interact with their souls, because we don't know their language. (When we discover a new fish we can watch and learn what they do. Now it is the same with these AA creatures in the upper atmosphere). In comparison to them we are like that bottom eating carp, in the tank of the atmosphere of this planet).

(There are also creatures living beyond the atmosphere of this planet, within Solar System (SS). On Earth we say we know there exists about 1,500 mammals. Above and beyond us in the atmosphere of the SS there are thousands of creatures we have ignored, but that doesn't mean they don't exist. How do we interact with these creatures and how do we guarantee their survival? How much our soul is already in interaction with them, and the other creatures?)

In the new understanding we have gone from knowledge of the Soul, to the Cosmic Rays. We have to learn about the interaction of the cosmic rays, or the fields of the universe, with our own Soul, or our star. What will be the outcome of this knowledge?

(Why is it that sometimes when children are born they only last a few minutes or hours and then they die, what we call infant death? Are they born in the field strength of purity, so that they immediately interact with the Cosmic Rays, which then matures the STP, so they have no need to (go through the suffering of life)? Infant death is really the maturity of the soul, which has received the fields, that we wait decades to receive enough of).

(We receive that 80% in bits over the 100 years or whatever to mature. Whereas they receive it instantaneously, at the point of birth, and then they can leave right away. The collection of its strength fields has touched and matured the soul, so there's no need to wait).

In the past teaching I said many times, how do the babies and infants communicate with each other? How do they know their position and hierarchy between each other? (It's through the interaction of the Soul and it doesn't matter which color of race they are,

Chinese, black, white, or whatever. Put 2 babies in a room, and they immediately know each others position, and are aware of the other's existence).

The teachings are now going in the direction of the Soul, (and how it will exist and be fed through the cosmic rays. Today there is no other word for it in the vocabulary of the man, so we call it, the rays of the Creation, and part of those rays come from the Creator).

In a way, the rays from the Creator to you, are like the satellites beaming back the weather forecast to you on earth. Your Soul sends messages back to the Creator. (It says, there is a problem here, or something is needed there). We are that satellite, as the Creator is a satellite to us.

(There is no physicality tying the Creator down anywhere, as there is with our soul, which is tied down within the dimension of the physicality of the man. One of the main occupations for the scientists of the future will be to understand the separation of the different dimensions and strengths of the Universal Fields, or Cosmic Rays. (Just like today when scientists say they find a new vitamin, plant, or animal. When we understand the process of Creation, then we'll look for what field strength it will give us, in what position in such and such a Galaxy. And even what field strength will give us the emotion of happiness).

(The Koran has the 99 names of the beauties of the attributes of the Creator. But to get the last one you have to read the whole of the Koran, and then you come to it. That whole is the Creation, it's the universe. Those attributes are different interaction of the fields of the Creator within the man, within the emotion of the Creator itself. So, how many more essences of information, in the dimension of fields of the universe, does man still need to learn? The 99 is a scratch on the surface of the knowledge of the Creator. (If it means 10 to the power of 99, (then it's huge), and it just might bring you to be a small part of it. How many more emotions and attributes does the Creation have? It may be that we are living them, but not aware of them)).

(In the coming time, we need to understand how we create the Cosmic Rays. And we need to understand the interaction of the fields of the plasmas, that we create, that it leads to the creation of certain conditions. This is the essence of the new Enhancement Units, and the essence of the world of Creation).

(Some KS say, Mr. Keshe keeps moving the goalpost further and further. The minute we come to learn something like the Nano technology, then he moved to the Gans's, and later moved to the soul. Now he is moving to the Cosmic Rays. Nevertheless, you have been educated from the A to Z, and your foundation in Plasma science is solid. What's coming next, after the universal energy, or what you call, Cosmic Rays? Would it be that I understand the essence of my own Creator, as I am part of it and it's part of me? Then I wonder how many of you will start to call yourself God? Or will you become humble enough to be part of the process of these teachings, and to teach the others to understand the totality).

Gradually over the past two or three weeks I have been putting you in the direction to understand how to feed your Soul, and how to start living in the dimension of the Universal Community, in the dimension of the plasmatic fields and not in the dimension of the physicality of the man.

End of Quick Index Part 1 458 KSW

Gradually we have educate our people to understand the process of Creation, that there is no mysticism, and nobody is above another. And we all become KS and share the knowledge of creation. That's the whole essence of the teachings. (Because up to now, when people gained some knowledge they made it exclusive, and put themselves above the others). With the total understanding of the total structure of the Creation, it will put an end to this exclusivity. Because we all have the same knowledge, and (we share it). Knowledge should not be a point of advantage.

(I saw something interesting yesterday on the Internet. They said, what gives the religious leaders the right to call themselves, "the appointee of the Creator." We have seen that some call themselves the appointed (one), or a reflection of the prophet, or a reflection of the Creator. Why is that, because I managed with the "gun policy" to push people to get where I am at).

Because now we understand, that we are all connected and there is no exclusivity. It doesn't matter what name you have put on yourself, from Ayatollah to Pope, or anything else. Once we understand, we won't accept people claiming superiority. I've said this many, many times, and I repeat it, it doesn't matter how much knowledge I carry I'm still a KS. Because I seek the Knowledge of the Creator. What interactions have the fields of His life created, that we still haven't understood, or we need to understand, and somehow we need to share it.

When somebody calls himself a reflection, or replacement, or being whatever of whatever, it shows he has gone to the end of his understanding of his own creation. It's time for him to move (on).

(With the EU we promised instant transmutation. And that brings us back to square one, of the knowledge of the Creator).

Q: Are bad experiences that we perceive as trauma, a physical or psychological condition? Where are these stored?

K- You have a computer called the brain, and it's stored and installed there. (Whether or not you perceive it as trauma, depends what it does with you, and how you refer to it. Or do you just forget it, and put it on the back burner? You remember what it did to you, and you remember not to do it again). It's part of the structure of your STP, and is in the dimension of the physicality.

Your Soul has no problem touching a hot pan or the fire, it doesn't get burned. (As a child when you touch a fire and get burned, you remember that for the rest of your life. I learned my lesson, that's not for my physicality to touch. But your Soul has no such limitations. In fact, it's also made of the dimension of the strength of the free fields, same as the fire. So it doesn't get burned).

The experiences get stored in the part that touches your physicality.

The same happens in the dimension of the STM. (Whatever touches the Soul becomes part of the information of the Soul's plasma). (That experience might create a change in the Soul, but then it adjusts to it, and the field strengths of that experience becomes part of it. This needs to be opened up a lot more to understand it more fully).

(He compared this to a planet getting hit by a meteorite. If your Soul survives (trauma or change), like when the Earth survives a meteorite, then that meteorite brings a change in the atmosphere for short or long term. The meteorite and the dent it created becomes part of the structure of the Earth. The Earth remembers that such a meteorite with such an energy hit the surface and brought materials to the Earth. It added to its assets and is a facet of its existence).

(Your question has to do with your dimension of physicality. As a child when you touch a fire you feel it in your dimension of physicality, then you never go near a fire. But the fire doesn't do anything to the Soul, because it's part of its energy, free, transmutation. Physicality can burn, but not the Soul. The soul does not feel the pain of the fire. Maybe it even rejoices, because it has added to its dimension of free energy. The fire gives out freely. But your physicality could be totally destroyed by it).

(Your physicality remembers not to touch the fire. But your Soul may want to jump in it, because it's free to take, so it can gain energy). (From the fire's point of view, he radiates what he doesn't need. The Soul is free ??).

R: So if we traveled with our Soul flight to the surface of the Sun, we won't feel any pain?

K- No. Because your Soul is another dimension. You will see the interaction of the fields. You cannot burn a Soul, you cannot burn a plasma. (You can open it up, or build up a plasma, or you can compress the fields and shrink a plasma. But you cannot burn it. If you change the dimension of the plasma to manifest its physicality, then something will happen to it. But in the dimension of the Soul, Sun's don't burn each other).

R: What about in the dimension of the cosmic rays, that say, come from another galaxy. Apparently, the highest energy ones, comes from other galaxies, other than our own.

K- The Cosmic Rays come from other universes. Forget about the galaxies. They come from different dimensions.

R: Do they effect the soul?

K- Yes. (But you will not receive, detect, or feel it, if you don't have a matching field strength to the Cosmic Rays. If we detect the cosmic rays in our body, it means we have the field strength within the structure of soul, (or) physicality, to receive it).

If they interact with the atmosphere of this planet, it means their fields (match) part of the soul of this planet, so it attracts them. Even if they go through the planet, the planet has created a condition for that to be done. Otherwise, it simply doesn't come your way, because you don't have the strength of it, to attract it). (Even if it's traveling somewhere, if your body is not somehow connected to its field strength, it will just move away. It won't come near you). (Just like magnets on a table, they all have to have a field strength connection, otherwise they don't interact with each other).

The STM is a Sun. (In essence, it's always a field that gives and receives energy. It has no tangibility, unless it decides, and unless the conditions can confirm it in a universe, where it will change to manifest itself in physicality).

(There are many other conditions of life, that man has not even understood. There are many more states of matter other than solid, liquid, gas, or plasma. Man has yet to learn about these. There's a 10th state of matter. There are hundreds of states of matter).

How can we explain it? (There are states like liquid, but it's also like a gas and a liquid at the same time. There are states like solid, but at the same time liquidity. Or even solid but like a gas. It's like with the lottery, you can choose 7 of 49 numbers, but to get the same 7 numbers you selected twice, you need something like 14 to 15 million combinations. If you compare it like this to the field strength of the universe, which 10 to the power of 49, then you can see the magnitude of combinations of matter states you could have).

Man has not understood the process of the Creation. (We are happy with a water and a gas, but there is much, much, much, more. You have just become aware of the Gans fields of the plasma within your body, and you still don't know how to handle them. How does that Gans become a bone, or hair, or in which position we call it the (hair) roots. Conditions are created to convert a gas and the Gans into hair).

Why does my hair suddenly change from black to white? How come I was born brownish and now I'm blackish. (You see these changes going on in your body everyday, but you have not understood it. What positions and field changes goes on within what we call, the "seed" of the hair of the man, that we are not aware of. Instead we just use chemicals to change the color. Why does the hair turn white when you get old? What fields have changed in the roots of the hair?)

Maybe you used some Gans's and your hair grew a little bit. What combination of field strength did these things create. Was there a shortage in the wish of your soul in the dimension of the STP, that you changed the color of your hair? (You just understand one part and do something with it, but if you understood the Totality, then it becomes very

easy. If you know what field energy the hair needs to grow, then you could stay with the young black hair of a hippie for however long you live in whatever dimension of the universe).

Why is it that some people's hair color doesn't change, and they keep a young bushy hair all of their life? They were born with a "carpet" of hair and they die with the same carpet. You haven't even understood this. How come your nails grow the way they do? How come your skin is the way it is? (We always looked at the physicality, but we never looked at the interaction of the fields, and what creates the conditions of those fields. If you understand that, you can be anything you like).

(We are going to experiment with changing the skin color during transmutation very soon. We'll ask you what color you would like to be when we transmute you from one unit to the other. Or if you have a wish to be black, when you arrive in the other system would you be black. Then would your mother deny it, even though you told her all the things only the two of you know. If you wanted to both black and white maybe you'll come out as a human zebra).

We are doing a lot of experiments in the background, which is not in public. We have finished with 80% to 90% of the present world of medicine. And the other 20% we have understood it, but we haven't managed to (build) a system for it. (We're also done with a huge amount of the (manufacturing) and energy production. But if I tell you, you would laugh, because you don't understand).

If you remember the lady during the transmutation who could taste the water and drink as much water as she wanted. The implication of it is, that if I create the same fields and sustain that fields over a desert, or a plantation, would the plants and trees wait for the rain, or would they take what they needed now, and as much as they needed. (We know how to transmute the fields of water, from a cup to the man). She felt that she was taking so much water that she was flooded. I can do the same with the plants, then there's no need for irrigation. To you it's a magic, but to me it's a knowledge. I know exactly what to do with it.

To make beautiful plants do you need to give it Gans's? (Or if you understand the energy fields, then you just create that condition? Working with the Gans's is still in a primitive condition. When you understand the interaction of the Gans fields and what they do then you don't have any problems. It's not only the Gans of CO₂, you can also do it with the Gans's of water, and even the Gans of gold. The fields which that plant needs to grow, will reach to it, and it doesn't need any water.

As I've said many times before, by understanding the interaction of the fields you become free from the shackles of physicality. But now (you have to include understanding the fields of the universe, what you call, Cosmic Rays and universal fields. The Cosmos is limited to man and his universe. Whereas the Universal fields goes from the Creator to the man, and beyond. Then we are complete.

Q: You said, that you have tried several times to bring peace to this planet. But we still see today the persistence of man wanting power and money. Can you tell us if you are seeing the differences in human behavior today, in relation to thousands of years ago, when you were trying to bring peace to this planet? Or is it only through technology that this behavioral change can occur?

K- At the moment, wherever we see conflict and war, it's has to do with religion. (Man is done with the policy of making war to gain land and the rest of it. Man has understood he has to live with the land he has).

(The situation in Iran is an internal war, completely due to the ignorance of the religions. The Ukraine war is a religious war in the background, between the Catholic Church and the Church of Russia. When man sorts out the problems of his Soul, we won't see this anymore).

We don't see the invasions, like what we saw during the Second World War. These things are finished. (The wars we see at the moment are the last remnants of the stupidity and arrogance of the "turban and the hat." When man realizes that what is under the Turban and the Hat is the same, and that we are all equal he will put them down. The only conflicts we have now are the religious ones. The religious people are fighting for what they don't have or are not entitled to, and what they want to hold onto).

The Church of Russia has bought the biggest property opposite to the, I think, the Norwegian naval base. Why does the Church need this property for? Has the religion gone into marine warfare, or are they keeping an eye on something, in the name of the religion? The way we see it, the wars of today are irrelevant. Man soon will solve this, because once you learn that you are all equal, then religions won't go anywhere. The conflict between Israel and Iran, is again religious based. (As man is getting educated about his own Soul, then these religion businesses will only belong to just a few, and soon they'll die off).

Once we start moving people around this planet by transmutation of the soul with the EU, all this will go out the window. We are a few weeks away from it. I've seen the evolution in the Knowledge Seekers who are building these systems. (And I've seen changes coming through this new technology in different ways. The Mobile Transmutation, will change the world by changing the perception of the superiority of the Soul. You change the superiority of the travel and control.

We'll take the cameras inside when we do the first complete transmutations. You will see it, and it cannot be denied. Then, would you like to spend 18 hours coming from Sydney to London, or would you spend 18 microseconds and do the same thing? (Will the government's allow you? Do you need the passport to come in, or you go where you like? We have to make sure your comfortable when you arrive. I know how to get into your ATM machines and have as much money as I need, every time I run out, I just pop into another and pop out.

It's a very interesting, and I've been through it a few times. If you're not in it, you cannot understand what I'm talking about. But if you feel what I'm talking about with the ATM machines, then it will give you an amazing experience.

(If you haven't been to the Linz Center, but you've listened to some of the recordings of Dean interviewing people on the sofa, you hear something like a noise in the background, of a forklift moving, and other noises in the background. Because on the back side of the two Enhancement Units there is a white curtain, and behind this white curtain are thousands of ATM machines, (stored here) to be installed across Europe, or wherever. To reach the other part of the KF we have to walk past this ATM storage depot, which is about 100 meters long). I call them, "dead men" waiting to be given a soul.

(If you can get your soul into the soul of these machines, then you become part of them. They are just waiting to be loaded and shipped. After these machines are shipped, whenever that is, you will have access to all the cash in the world you need). Then, is there a need for a financial world? If I know how to get into these machines through the elevation of the soul, then I become that invisible man, or invisible soul. Then does money have any value?

(A KS said, when the world is made perfect everything will be done for us. We can have all the food we want and everything else. There will be nothing for us to do. We are going to get bored. I said, you've got to do something. You can't sit there just because I got everything I need. Find yourself a hobby, a job, educate yourself, and do a sport that you can keep everything else in motion including the Soul and physicality. You can't sit there and wait till you die. You have to evolve and elevate your Soul). We don't see people in the universe just sitting there doing nothing because their soul is elevated. We don't have zombie souls in the universe.

We have been gifted now with the knowledge of the Creation and the Creator. Would we use it to bring to ourselves superiority? Or do we use it to bring balance with others that we are all equal?

As I mentioned earlier in an interview with one of the Iranian Mullahs who said, who do these people think they are, that they are from God, and that they have the right to kill in the name of God. And he's a clergyman. Remember what Muhammad said, that he took the love of God from the tribe of Moses, and they started becoming nomads. And he gave that love to the people of Christianity.

A few weeks ago, we took the love of the Creator from the clergy of Iran. (You saw what happened within a few hours and days. The clergy have to be a point of peace, not a point of death by gun policy. We took the love of God from those who use the sword of the Creator to harm the others, be it from Ayatollahs to the soldiers, and those who use the name).

If we managed to bring a tribe to be nomads for centuries, these people are nothing to what we can do. It doesn't matter in which side of the (religion) you sit, be it Shia, Sunni,

Christians, or whatever. When a man who's supposed to be a representative of the Soul of the Creator and Christ, is on a wheelchair, that shows already physicality does not accept the lie of the STM.

I explained to you that a few years ago, we built a unit for the Pope's knee problem. He couldn't walk, and we helped him, and then he could walk again. He went against us, and he's back in the wheelchair. He went against all of us who wanted peace, because his game is war. (A man of God, the representative of the Creator, should be walking with his head held high to deliver his message of peace).

Look at all the religious leaders today, (like the Ayatollah Khamenei from Iran, are all bed bound, because the physicality does not accept the lie), which it is trying to enforce on the others. Just go back a few weeks ago before all these problems started in Iran. We said, we took the love of Creator from the Turban, and the same with the Hat. Because it's the time now for peace. The peace comes when we accept that we are all equal. Peace doesn't come by firing a gun. Peace comes through the Soul. And we still have those who are arrogant, and they can muscle it, but unfortunately this time, they "bustled" it. And we'll see the change.

As I said, no man will take the crown of kingship. No one will take the "Hat" of the lie of religion anymore. (We as humanity are done with it, it's over. As man gets more and more educated, he will realize we are all equal. You don't need to bend, or to kiss, and to lie, whether on a wheelchair, or in a bed). They are still trying to say, "I am the appointee of the Creator." We've seen the Creator, and He hasn't appointed anyone, not even us, let alone you lot.

Q: You taught us that inhaling CO₂ gas can quickly elevate our STM and make us peaceful men. (As the planet Earth changes its position in relation to the Solar System, and with cosmic rays, and greater amount of hydrogen, will there be changes in the concentrations of atmospheric gases, of for example, the plasma fields of CO₂, and will it influence human behavior?)

K- You've got to understand why we said CO₂. Matter state CO₂ kills you. I explained why we said CO₂, before. You have a Carbon-14 (C14) and C12. C12 is the essence of creation of the carbon in man, it's part of your amino acid (AA). C14 is the connection to universal cosmic rays. (Universal Cosmic Rays is what we call, C14). We don't look at C14 as a speck of carbon, we look at it as a field strength, which is interactive, and a connector with all other fields. It's like a bridge.

(We never said to you, that you should inhale the CO₂, matter state. We are talking about the connection of the plasmas, where the field strength of the life on this planet connects with the field strength of the universe. You have to understand the knowledge. Otherwise, excuse me, if you stick your mouth on the exhaust pipe of a car, you'll see if you get elevated. Physicality will have no more time to live, because you'll be dead).

Understand the knowledge. (It doesn't matter where C in the AA is. What matters is that the C14 connects to the Universal Fields to exist. Even when we talk about C14, we are not talking about it as an energy plasma. We are talking about the connection it has to the fields. It has more parameters so that it can connect to a spectrum of the fields, of more fields. We are not talking about anything else. It's like the difference between a single outlet, which can only plug a single cord into it. And a multiple outlet strip, that can plug 20 cords into it. Nevertheless, they only connect to the same source outlet on the wall). Understand the knowledge and stop talking about the atmospheric changes and the rest of it.

Man is connected to the gravitational fields of liquid and gas. One is in the D of oxygen and the other one in C. You have to understand, the essence of the source of the Inertia of the field of the soul, and the dimension of STP. Then you'll understand why you have nitrogen in your amino acid. Just look at the energy field strength of it. Then you understand how everything is connected.

What happens when you go to another planet where there is no energy at the level of O, do you die? I don't think so. You mutate to the fields, which guarantees the evolution of survival of the matter state of the fields, when the soul converts, or interacts with dimension of physicality.

I explained this once before, maybe you can understand it. (Get a very powerful gun, and create different atmospheric conditions of matter state in front of this gun, and then shoot the bullet through them. Let's say you use water, then you would have the solid, liquid, and gas forms of water in front of the gun. Then see how fast the bullet travels through each of the states). This is how the fields of the universe are in the condition of the life.

(It depends what you're observing, what condition was created, what fields strength the bullet was released at, and what the atmospheric condition it has to go through, solid liquid or gas. But in essence it's the same water that the bullet traveled through, but in different strengths according to the different conditions. It's the strength of what we act upon that environment, and the strength the environment has created for manifestation of that particular creation. Then there are the emotions (you have about it), and what impressions it gives you).

Q: Is the seven candlesticks or the seven headed snake over Jesus and the Buddha. The seven chakras giving its energies to the soul to expand. And are the cosmic rays the depiction of the light in cylindrical form?

K- What? I think we pass on this one.

Q: Has there been any interest from doctors in Australia for setting up a Wellness Center?

K- We don't disclose what we do, but yes.

(It was almost exactly a years ago KF, through the introduction of one of the KS, started working on trying to create a rapid expansion of the Foundation with an organization. But

as you know, it did not work out. Part of this expansion was the creation of the health centers around the world. We put an end to this venture in writing today). I think, we've been deceived.

Nevertheless, we'll carry on in any shape or form, and let's see what comes up. Part of our long term target is the creation of centers around the world in every country and city, and to be part of the hospitals or whatever. Like 30 or 40 years ago hospitals didn't have MRI machines. The plasma technology we teach will become another section in the hospital. Hopefully, in the long run there won't be hospitals, because gradually we learn how to (balance our own fields).

We had a man suffering with Parkinson's for 10 years, and after a few weeks, there was no sign of it. How long do you think we can keep this T away from those who are suffering from the same. The knowledge is here. (If they don't allow), as I said very frankly, we'll open a clinic on the Moon, where there is no FDA. Anybody who has Parkinson's can go KF centers and be transmuted to the health and wellness centers on the Moon. We'll process the situation and send you back without it. That's the bottom line of it.

Once we complete this process of transmutation, then we'll become a condition of doing what we want for the betterment of man without any governments. The beauty of it is, that as we've been kept out of the public's eye, this has allowed us to grow the way we want.

I received a note from a gentleman who makes a lot of things happen around the world. He says, "you are one of the most influential scientists in the world today." With the science and the technology we bring, we'll influence the pattern of life and bring that positive change to society, and we get nothing else out of it.

If you have diseases that are incurable today, would they suddenly become curable tomorrow, when we open our Wellness Centers on the Moon? People travel to countries like Switzerland where they allow procedures like "self suicide." for incurable diseases. How many governments would allow KF systems into their country, so that people with health conditions can come in for 10 or 30 minutes, and then leave without any condition?

Do we create environments with a few thousands of these systems, that anybody with a cancer would go through, and it would be gone. Would the governments have any say in it? There's going to be a lot of controversy, a lot of movement, a lot of things to be done, but at the end of the day, who is benefiting by it?

We invited the former German chancellor to come to KF Linz. Would that be the end of the Parkinson's she's been going through. We saw her symptoms in public before she left office. Would that give credibility to us? We don't need the credibility, because if you managed to save or change the life of one man, you've done enough. It's up to the others to follow. We don't use medication, that's not our job. We understand that the physicality

is connected to the soul, and our systems elevates the soul, then the physicality follows. It has to sort itself out. I call it, the medicine of the fields of the Creator.

We saw the man in China with Parkinson's walking and then running. Now we can repeat it millions of times. With the knowledge that sits with the KF today, no man should suffer from Parkinson, Alzheimer's, MS, Fibromyalgia, nor many other diseases.

But at the moment, (the ones running our governments and the doctors are the same as those wearing the "Turbans and hats" of the religions. They lie to themselves and to the others. We don't claim we have discovered any cure. We explain the process of Creation. Knowledge, science has to be explainable and repeatable. If you have a Parkinson's or these kind of diseases, Keshe Foundation has the technology for it and we have proven it. A lot of people have claimed a lot of things, but the difference is that we have a T to prove it and we can repeat it).

But our T has to be understood, then it can be replicated within the framework of the Totality, that it benefits all. (If the cause of your Parkinson's is emotional, that emotion has a M field strength. Then what would happen in the space, if out of nowhere you come across that same field strength? In one second you would start shaking like a leaf with full body Parkinson's. Those fields would just pass through you. Then I've got to put you back in the system to sort it out. I know exactly what it is, so I can take it out, or add to it, which ever is needed for you to become normal again. You would go in the system like a vibrator, and come out as a man). If you see full body Parkinson's, God help them, because they shake from head to toe.

(We tried different aspects of the technology, and now we came up with a universal system for it. If you suffer from Parkinson's, the KF doctors should be able to process this like drinking a water. They have the knowledge and the systems, and we support those who are really knowledgeable in it, and not the hypocrites. You'll come to a point of really understanding the technology, and not as something undecipherable).

Q: Have any governments shown interest in setting up your megawatt units in their countries?

K- (Let's see ... how am I going put it? When you look at the patents, you see that we introduced things like light balls that have no wire connection. It uses what we call, micro plasma power units, which are the size of a 9 volt battery. Talking about megawatts, this is the man's way of thinking, that you have to have megawatt power stations. But all you need is energy on demand at the point of need).

As a nuclear engineer, I've been trained to make power stations, with transmission lines that go to substations and then to the homes. (With this new technology there is no need for any of this. Now we can produce enough energy at the point of need. All these huge nuclear power stations have come to an end).

(The patent we submitted nearly 20 years ago for micro plasma reactors, is now a reality. KF has developed a system for energy at the point of need, and it can be replicated. Today, I sat in front of one of these micro plasma units with our Knowledge Seekers. It just needs to be commercialized. It's a Micro Nano Plasma Energy unit, which produces current and voltage at the point of the need. It's a reality in the hands of the KF).

The huge fusion reactors they are trying to build to create the energy of the Sun, is dead. It's over and done with. (Because what we need is energy on demand at the point of need. We have it, it's understood by our team, and it's part of the new Enhancement Units. Some of the controls of our EU were still powered by wires and electricity. But our reactors don't really need it, because they're self-sufficient, they produce the power themselves).

With these new micro plasma reactors, we don't need megawatts, or to burn, or to destroy so many things. (We don't need to dig up and destroy the earth to mine Cu, because we don't need transmission lines).

(With these miniature reactors we create plasma and cosmic rays for a few cents. The MaGrav systems are now obsolete. This T is sustainable. In the past 12 months it has been rapidly developed. Our people understand it and can develop it to the next stage. Most of the things that were on the table a year ago, are now obsolete. You saw how the size of the reactors inside the Enhancement Units kept shrinking. Now they are just miniature reactors hanging around). (Do we need huge power stations? Maybe last week, or last month, we could still talk about it. But today with this development we don't need them anymore).

We have managed to break through to get power out of the plasma, without having to generate hundreds of thousands of degrees, (as they think it is in the center of the Sun. As of today, fusion technology is obsolete. I always said, fusion was a dream that will never come true. Because now, through interaction of the plasmatic M fields, we can create current at the point of need. It's a reality in the hands of the KF. We don't even need the gas generators which we told you about earlier). The technology has jumped in the past few weeks. Nano micro reactors are a reality, if you understand how to work with Gans's and the production of it. And we have achieved it.

(It's not power) in mille-volts, or little watts, we can multiply it to what we like. Don't forget, we set these things up to happen, it hasn't happened accidentally. Our team has been working to set this up for weeks, and now we have confirmed it. The patented micro plasma reactors, what we call, battery is complete. The new energy units are cosmic ray units, what we call, Nano plasma systems. It cost very little to make it and in the next few years, we can embed them in any electronics and even in cars.

The European Community has passed a legislation, that by 2035, 13 years from now, they cannot sell any car which uses fossil fuel. The fuel stations will become a thing of the past.

But now the plan was to put the power stations outside the city, and burn there, or use Solar and bring the electricity through cables, to new type of energy fueling stations. With what we have achieved today, even this is obsolete. It brings the energy conversion system for the cars, years ahead. We produce the condition of cosmic rays, and it gives us the energy of the universe. We just need to convert it to what we need.

These developments have leaped the science by hundreds of years. It's all thanks to the very competent and capable team we have developing it. I said, that I have to keep away from the lab, because every time I go there I change things. But our team has to understand where the change comes from. It has taken a long time for our people to understand the process of conversion. We have the micro plasma reactors, because we operate within it.

Q: Will the Ukrainian Russian war be the last war humanity has to experience?

K- War is a habit of man trying to show he's better and stronger than the others. This will come to an end with understanding of position of our religious leaders.

There is a possibility of very strong hotspot boiling somewhere, again it has to do with religion and religious people. It might take its own condition, its own shape. Again, we see collaboration of the religions, under the name of religions, in trying to bring politics into it, so that they can justify it, to sell weapons.

(More or less, with the end of these two religious situations in Middle East and Ukraine, we should see the end of a lot of things. But as usual, others take advantage of these kind of situations to make money out of it. But these should soon come to an end one way or another).

Q: Will this micro plasma reactor carry an emotion?

K- Yes, 100%.

Q: I remember once you saying that with the reactor you had in the palm of your hand, you could move a planet, or reposition a planet.

K- It's still applicable, if you understand it, yes.

Q: When you turn this system on, how will this emotion effect humanity in what ways?

K- Of course it does. It depends on what strength (fields it emits, how you receive it, what your soul decides to have from it, what it is short of, and what target the system wants to achieve.

Emotions are not exclusivity of the physical dimension. "I made man in the image of myself." If physicality has emotion, (so too does the STM).

Q: When you were speaking, a lot of birds started turning up outside the place I am right now. Earlier you spoke about going to the Sun, and that people take certain positions

around the planet, because they need the energy of the Sun. Would this explain why birds have a migration, and they move from one place to another, are they following this field strength?

K- Partially, yes, (and partially they migrate for their survival, and ?? extension of the soul. Birds that migrate absorb different field strengths in the higher altitudes, as compared to birds that don't migrate). Do they work on the geo cosmic rays?

(There is a kind of bird that travels between the galaxies and universes, like the birds on this planet. This bird is free, unconditioned, and connected.

(When we did the Gans trial in China with the crops, a lot of birds came and ate the seed, but still we had an increase in production. They feel the fields and absorb and understand. If you put specific Gans's in your garden you will see a huge change in number of birds flying in, because you create a connection. We've seen this many, many times).

Q: If a soul comes from a galaxy to a planet, does it become the Totality of the planet? If a soul can be a galaxy or a universe, how does it condense itself then, to be a planet, or a man, or a cell? How does this operate?

K- It's a dimension of the field compactors, how you compact it, to what size. Remember we said that, one atom of hydrogen can cover the whole of the Solar System. It depends on what room you give it, and then what you allow the fields to be.

(A very simple example of this is, if you take a plant from one place on this planet, where it has small leaves, and then you take it to another place, but in that place the leaves grow to be giants. The fields are different in the new place, and the plant has accepted to live in that D. The main thing is that the plant has accepted the new condition).

(Another example is, there could be creatures in the universe which are highly intelligent, and they become travelers of the universe. If they decide to come to Earth, they might be the size of the dinosaurs, or they could be as small as amoebas. Either way they are intellectually very high and more advanced than the human race of today. It all depends how they want to accept the conditions to confirm their existence). With what is coming up in technology, you'll all be facing this amazingly very soon.

Q: (Is it going to be that everybody's going to have to experience all these things you've talked about? Will this position will be as one cell in our body, or one cell in the planet? And will the whole humanity have to accept and go through this transmutation?

K- It's not acceptance. We'll make it so available, that (everybody) goes through it.

(We have brought something very intriguing to all of you who have ever produced Gans's. Even if you left the KF, but you still have the Gans's on the shelf, in a very short time they will become part of our process. Any of you who took a sip of the Gans

(Water) for different reasons, or washed yourself, or it accidentally fell on you and touched you, soon you'll understand how you have become part of this process).

(I told the story before of the Prince who thought he was a cow, and wanted to be slaughtered, and the physician came and put a rope around his neck and tied him to the ground. He said, you are too skinny, I have to feed you, and when you mature I'll slaughter you. Then the prince started eating. One day he says to himself, why do I have this noose around my neck. We are at that stage with the human race. We have put a noose around your neck and have tied you down, and we are feeding you until you become wise. We are in that position, and very soon we'll take the noose off your neck).

(With what I've seen coming out of our development side in the past few days and weeks, we are getting close. Once we complete the cycle and go exactly where we want to, because our people will have understood it, then we'll release it freely to humanity. Then everybody will have enough to live).

(Our target is that every man is benefited by it, and not just KS having the knowledge. We want every man on this planet to be a part of it). A lot of you helped us try to set this up, during this past year, but apparently mankind is not yet ready for it. It's not time.

We'll do it the way we did when we taught you all the MaGravs and other things. We'll make it free for every man to have access to the micro plasma systems, where they can elevate their Souls. Don't forget, when we talk about a micro plasma, we're still looking at the electricity. (But also you can use these cosmic ray systems to elevate your soul. You look at the matter side, while we look at elevating the essence of Creation. Then it can feed the Soul, and the Soul can feed the physicality. Then do we need to kill. (That's why we go into the back of the ATM machines to get the cash, so that man has everything he needs to live).

Q: So, will this elevate the planet as well?

K- We'll elevate the universe, forget about the planet.

(It's like a machine that recycles garbage. Whatever is surplus in the universe, what nobody else needs, then we collect them, and make food out of it, for the other souls to elevate. It's part of the Totality of the work, and not exclusively of this time).

I keep on going back to it so that one day you will understand. Mitra went about the U collecting the best of the best, to make her child. (Then this child sends the best of the best, to elevate the Totality of all that it was collected from. The cycle goes from Creator to the Creation, and back to the Creator). One day, one day mankind understands what I'm talking about.

(In reference to the patent drawing on the screen. I remember when we drew this up. Dirk worked on it for a long time. That was his dream. He drew, and I said, no it's doesn't go that way, it doesn't represent, because it has to (work for) all levels). I think it took a month or two to do this drawing, because it came in stages and stages. But in essence, the

right hand drawing, is the battery, and has a physical dimension to it, because that's what people understand. The bottom left drawing manifests the plasma).

(It's a layering of plasmas, not matter state layering, as you have with the (cores). In the center it says, plasma. It doesn't say gas. That plasma is the essence of the fields of the universe. Now, maybe after 20 years, you see those words and it makes sense, because you have a better understanding of it). This is part of the technology, which will be opened up gradually.

Q: These reactors are for everybody. How are you planning to distribute them?

K- Why should I distribute? We still set up to build the factories for those who cannot do it themselves. But a lot of you will be able to copy and make them yourself.

All the efforts of the KF will go to back Markray Corporation to commercialize the T. We have signed an agreement with Markray, and the international distribution will go through Markray International. We are the majority shareholder and we control every aspects of Markray. Soon we'll go in that direction.

It's very much like Tesla, which has a factory in every country in the world, but it is based in the US. We'll back Markray to the hilt, but we will not issue anything beyond that, and we allow Markray to become one of the largest corporations on the energy side, food, water and everything else. The majority of the shares of the Markray is owned by Keshe Foundation, which is owned by you lot. I came with nothing, I'll go with nothing.

Q: So, that's helping humanity physically. What about elevating the soul, would this not be an instant reaction from the core?

K- It depends what you need from it. (You expectation creates a need and absorption of what is needed).

Q: What is the expectation?

K- That depends on the individual.

Q: What is your expectation?

K- I have no expectation, because somehow things are set to be done. We are just actors in a big theater. (Hopefully you will understand it the way we understand it, and that is, the scene is set by the Creator and Mitra. The rest are actors. In a way, they are spectators, watching how it will change).

This new technology, this understanding will have a profound impact on the whole structure of the operation of lives in the universe. Soon you'll understand.

You waited for UFO's to try to understand how they work. Now people with the UFO's are waiting to see how humanity will understand this (new knowledge, and learn everything that they tried to get to. Then, when humanity learns, it will be like the "Orange and the Cup." Now the Orange will be the new knowledge of energy, and Cup

will be the Unicose). (Now you can understand mankind's role in the process of the change of the Unicose).

Mankind has not understood what gift we have given to him.

Q: Why is humanity being handed this gift, that the others didn't receive for trillions of years?

K- Ask Mitra, not me. And ask the "child of Mitra," when the time comes.

Q: Do we ask Mitra through our thoughts?

K- It depends where you look for it.

I had one and I kissed one from the day I opened my eyes, and understood what it means, "loving one." She happened to be my sister.

Q: How does mushrooms such as Amanita Muscaria help or alters human, or other creatures, soul and brain?

K- I do not know. I don't take mushrooms.

Q: To participate in the Satellite Soul program do I need GPS, and elevation (of the Soul) as a criteria for becoming a Satellite?

K- We will be running a tests for the Mobile program. We have setup a procedure to follow. We have started (the procedure with people in a very physical way. Then we'll transmute you across).

Q: And the Satellites just like a group of people connecting together to each other?

K- It's like when you are on a Zoom call, there are hundreds of you in it. It'll be like that. We tested this on Rick's program a few weeks ago. That was a prelude to what's coming. We did the transmutation back and forth with. A lot of things are happening.

We are short of Satellite people by 200. We need another 200 Satellites, minimum, then it makes it easier to operate. We need at least another 50 Mobile people to complete the process. We need Mobile people to come into Linz physically, so that we can send them out from Linz to test it properly. Mobile people all think they have to stay at home. No, we also need you to come into Linz so that we can test sending you out from Linz.

We are short by about 250 volunteers for Mobiles and Satellites. Then for the space flights to Moon and Mars we are short by at least 12 to 14 people. We need this to test the systems to complete the process. So roughly we need around 300 KS to volunteer to complete the flight tests.

(For some reason, the Knowledge Seekers suddenly all stopped coming to Linz. They thought, "oh, the tests are done." No, we need you to come in so we can continue to develop the systems. Some Knowledge Seekers came back a second and third times, this

is good, because they are maturing to the system. Especially in next 2 weeks, we need more KS to come in).

(After we get the Mobile program completed, we can send somebody to you in Australia from Linz, and then bring the both of you back here to Linz. We have to be able to do this. The original Mobile system will be done that way, (then we get) a connection to bring you in here).

(A lot of KS thought the tests were done. They are not. We need you to keep coming. Then there was that idiot from the "11.11 Italian radio program" who tried to come into the Linz Center and steal. He got angry and wrecked up the Italian community, because he didn't get what he wanted. He wanted to make himself famous, but it didn't work. Now he made up a lot of rubbish in Italy, and destroyed the whole Italian community).

We are very straightforward, if we don't get it, you don't get it. If we don't complete the systems, then nobody can go anywhere with it. It's like an aircraft sitting in the hangar. (Right now we don't have enough people that we can start working on it. We need Mobile people to come into Linz in the next few weeks, so that we can then send them out).

(The reason we need you to help us is because this technology is being developed without any governments controlling it. It's us who is developing it. We want to remain free).

We need a bunch of Europeans who are closer, to come to Linz. (Later, we can bring in people who are far away in Brazil, Australia, and wherever through the Mobile system. But first we have to start testing the transmutation part so we can complete it).

(The tests are not for me personally, I already know it. It's for the humans, our developers have to understand everything which is done, and how it's done, and what needs to be adjusted. If you remember, when we started the EU, it's a continual progression of development. We kept on changing and adding to the system. This all came about by you lot, who keep coming in to do the tests).

We are more or less short by 250 people to complete the programs. Suddenly, everybody thought we had enough. (This has caused us to come to a halt in our testing).

(It's Christmas time and we usually offer package deals in the KF Store. This year we'll offer the Mobile, Satellite, and Space Flights as a package. Because we have to do these tests within the next week or so. We can't be waiting till next year for somebody to come. We don't have enough people, then we can't test. We won't risk the flights without doing the tests. We don't go into the flights as an unknown).

(First the Mobile people inside Linz will go from one unit to the other, and then we'll go outside.

(Suddenly, somehow, the Knowledge Seekers all thought, it was done. No, we just started it. There's no use having the machine sitting there doing nothing. We have to first check

everything through these tests so that we don't leave a leg or something behind. Once we can transmute the whole body, than we can go out into space).

(Don't wait for the Christmas package, sign in and come now, so that we know and we can plan for our development. Otherwise it comes to a halt. And then you complain that we didn't do this or that). Maybe we can we send you out for Christmas to the North Pole to see Santa Klaus, or Father Christmas? It has to be done, otherwise the technology comes to a halt. It literally, comes to a halt. We have come this far, we have to complete it.

(I want to map up the Earth with the Satellite Souls, so we need the other 200 Satellites to cover the planet so we can reach you. Later we might come to you and say), we need people in Iceland, South America, or in this or that position, because the network has to be fixed.

Thank you very much for bringing this up. Because I didn't know how to put it out. As I said, the Souls know what to bring out.

With the new space T you can't just take off "on the seat of your pants." It's scientific, and it has to be done in the correct way. (When we put 2 Souls in one chair to test about the beautiful people, would the system recognize the difference? These tests cannot be done just by the imagination. If you can't come into Linz you can also donate for others to come in).

Universal Council members have been sponsored to come in on the December 6th, if I'm correct, that's Saint Nicholas day. It's also the birth of the child of Mitra. It's there to be, sit, watch, and see what we can do. By that time will we be able to transmute the soul of Universal Council members as, what we call, the soul of Mitra, across this planet? Will we be ready for it?

Actually it's a very desperate (situation, if we cannot continue the tests, part of our process comes to a halt. We thought the Knowledge Seekers would carry on doing it, but somehow it has came to a halt. It would be best if the old volunteers came back for more tests).

For the Space Flights to Moon we need people with specific characteristics. The first couple is best for it, (because they're well experienced with the system and they know each other very well).

Q: Is it possible that the Foundation's teachings are being transmitted in other dimensions than the one we are simultaneously living in?

K- We always said from the beginning, when we teach, we don't teach only to the man. The teaching is done at the level of the soul. You'll hear it in the voice of the man, but the others understand, the way you dream and go somewhere, they listen through the ear of the elevation of the soul of knowledge. It's not the exclusivity of man.

(This time we are not teaching only to one Ayatollah, or one religion, that then they become dominant. Now it's for everyone).

Q: If a plasma needs to have at least two M fields to be created, does that mean that there are two Creators? And if so, does the Creator have a partner too?

K- Yes, called, Mitra.

Alzheimer's and Parkinson's can be processed through KF doctors in Germany.

(When we get enough KS to complete the tests, the effect on society will be that it brings confidence to it). People will see a different angle to life. The whole persona of life on this planet will change overnight. When people see with their own eyes that they don't need to take flights anymore, and that they don't have to be shackled by governments, or shot at on the streets. (They will be free to move about what they want). Once people see it physically the first time, it will change everything. It will touch every being on this planet. Freedom of soul, freedom of physicality. Yes, it will do.

Q: Will this end the wars?

K- Once we can show man can travel and be transmuted this will end a lot of things. A lot of things will change beyond imagination. Will there be wars? Would you sit somewhere waiting for a bullet to come? Or would you change the soul of the bullet? (We taught this before about the nuclear warheads can be left in the silos, not able to be fired. We are not going to change the soul of the missile, we will change the soul of the man who pushes that button, so he will not push it).

(Once we can visually show the transmutation, then we'll see the change in emotion of humanity, like how we have seen with people coming out of the EU.

I said to the Americans when we met in Brussels, give us one thing you have in Tehran, and we'll deliver it to the White House within seconds. They laughed. That was exactly November 17, 2011. This is not something new, that we just come up with. Now it's a reality. How will our government react to it?)

(Something strange Mr. Keshe noticed about the new refugees, they are very rich, especially the ones coming out of Ukraine and the billionaire Ayatollahs coming out of Iran, in case the regime changes. Who would you give the T to, the rich ones or the people suffering hunger and everything else in the refugee camps? He would help the poor. And return those who escaped by killing, back to Iran, to be judged by the system).

We have to bring the change so that we can take thousands of people in political prisons out to other countries, where they are welcomed to be free. (He saw a video from Iran where around 50 police officers are beating a man, then one says, move aside and puts a bullet in his head. (If we don't express the reality of what we see, how will people know. You don't do that to animals, let alone people).

We take the love of God from the Islam and the "Turbans," which they wear. In the name of Muhammad, bless his name, (for) abusing humanity.

Q: Will the transmutation end all this?

K- It has to. It has to be, that's why we are pushing. We need to do the transmutation. It's not just Iran, it's many places around the world. Suppression of man has to stop, and this technology, for the first time, allows it.

This is not theory anymore, it's the reality of the technology. It is what the KF has in hand. (The same knowledge that moves a man to the Moon, can move political prisoners to safety). I will not fight with the bullet. I'll deliver the technology so that they don't have anything to fight with. A man has to be free, and we have the knowledge to do it. We don't need to march on the street to be shoot at. We need to march in the Space of the Universe to enjoy.

If Christ could get himself off the cross, (now we have the knowledge to free every man from his shackles. The religion of Iran doesn't allow virgin girls to be shot. So the policemen all raped her, and then said, she's not a virgin anymore and they shot her. They did this in the name of religion. Our job with this technology is to free those people they imprisoned and to bring the leaders of these perpetrators to justice).

This is why we need to complete the transmutation tests and the Enhancement Units. It's not just for flights. There is much more behind it. (We can free political prisoners, those who are, especially the "beautiful people" shackled in psychiatric hospitals).

We are at the verge of a breakthrough in science, and we have proven it. It's not theory anymore. You've been there and have seen it.

For love of God, why a man who has no sense, wears a turban and calls himself an Ayatollah, but allows others to be killed, so that he can have power. Muhammad said, don't touch Iran, they already are religious, they already have the religion of themselves. (Why should the man with the turban kill more Iranians), in the name of the same religion?

We take the love of God from your names of Ayatollahs, let alone your children.

We need to complete this Enhancement Unit as fast as possible, to be able (to help the others. It's not just for you to go from one unit to the other. It'll bring a new dimension of freedom where no man can abuse another man. No man can put a 14 year old on the bed to be raped by 10 Sepah and Revolutionary Guards, because she's virgin and they cannot kill her, and afterwards they put a bullet in her head.

It's not just to free women, it's to free the whole of humanity from the shackles of these (kind of people). Now we have a technology to do it.

Q: Please can open up more about the aura of the man?

K- The aura of the man is the interaction of the fields of the gases in the body with his environment. Up to now we didn't know what aura was. Now we know that the body of man is made up of Gans's and it's a dynamic plasma. (The Gans's and gases of the body interact with each other, together with the environment. It's like the atmospheres of the Earth and the Sun interacting. These field interactions with the body create the aura).

(Now we know and we can interact with this aura, and allow things to go in and out. We can feed the cells of the body through the aura. But this is too complicated. You can also work through the Soul. You can feed the soul, as the soul lead to the creation of the Gans's, which created different centers like the kidneys and other organs. However, instead of using the cosmic rays to deal with millions of cells, you can feed one station, which has control over the rest. That's why we feed through the soul).

Soul feeding creates a different aura. Man will see a different aura once he starts feeding through the Soul. (At the moment, the aura comes from the interaction of the fields).

(Prophets and holy people are usually depicted in white or golden color, and have an aura around their head. When you deal with the soul of the Prophet, you are not dealing with their body anymore, you're actually interacting with the fields of their Soul. This is the way we do it in the EU. We embed it in ?? a soul, because it's the soul that interacts).

This is why I said, you will know the Universal Council members by their soul, because they'll shine. (They are in the same position, as the Prophets of the past. We will see, feel, and understand it).

So when we talk about the aura, we talk about the aura of the soul, or we talk about aura of physicality? If you see a light around a man, as if he is embedded in it, then you are seeing the light of his soul.

People in the EU say they feel as if they're in a cocoon, because the soul has expanded, (but it doesn't interact with his environment. But still it exists. This is because, the man is looking at himself from inside, and not from outside looking in. When the man walks you see his aura).

(If you just touch the clothes of someone and not the skin, they still feel it, because it's the interaction of the fields of the aura. We didn't understand this because we never knew our body was made of Gans's, or that it is a dynamic plasma. It's that's simple).

Q: Is this a line of communication?

K- Yes, it can be. When you touch your child, she feels the love? As parents we caress our children on the head, and they feel the emotion of the love we give them. How many

times they come and ask you for a cuddle. You don't feed them food, you transfer energy through your fields.

Q: And we can do this with the Gans's, without even touching them?

K- Thank you very much. Rick, let's call it a day.

Q: Does the Mobile test require a visa?

K- Yes. It has to be with the authorization of your government. We are not breaking any laws. We have actually drafted letters to go to the Austrian Foreign Office and foreign secretary, for this purpose. Because we are ready to go, we don't want to have to wait. The documentation has started.

SUMMARY:

ENGLISH TRANSCRIPTION

(:14).

K- Yes, good morning, good day to you as usual. Whenever I'm whenever you listen to the series of Knowledge Seekers of Keshe Foundation Spaceship Institute. We welcome you back and we try to add to the knowledge. In the, what we just heard as an Intro, it brings in and explains a lot of new things.

If you listen to it in a much deeper way. We look at how life is created on this planet. We understand it, but it has to go through a process of maturity, creation of brain, creation of organs, creation of emotion, creation of interactions, languages and a lot of other things. But now that we are opening the doors of the space travel when you land on the Moon, or another place, arrive, and life has already taken shape, has dictated its parameters, you will manifest in a dimension (D) of that position and time, in complete. In a way, in a completion of totality of what you need to survive, if you decide to go in the dimension of tangibility, living in D of physicality (P).

What would happen to you? The energies you need for emotion of love, in that planet doesn't exist? (:16). The energies you need for creation of kidney doesn't exist. You're strength field of your liver is a hard solid metal in that position. And your intestine strength of holding it together is gaseous state. What happens to you? How do you mutate? And how does everything fixes, changes according to the position and time. In a way, you are not born from evolution of millions of years, you arrived, you're there, the

planet the position in the Universe has already evolved, created life. So you have to fit in according to the Inertia.

There is another dimension which man doesn't know. "Magnetic (M) plasmatic Inertia" is different than matter Inertia we have here. On Earth we call it, Inertia. In space it's a M field Inertia, which behaves totally different. It's dynamic. It's all the time adjusting itself into the space of time.

You will not necessarily appear on a planet, you'll appear in a plasma field, which is sustaining life, but has no tangibility of it. We know this life. We know we have recorded it, as I said many times by NASA, in the upper levels of this atmosphere of this planet. (:18). When we look at the videos and recordings of the space shuttle, and the Space Station, when we see astronauts sending up reports and videos of non-dimensional energy fields moving up and down within the atmosphere of the Earth, upper atmosphere. The same thing exists on the other side of the atmosphere of the Earth, in the Solar System.

We always in the space looked at meteorites, asteroids. We never looked at energy packs. Because we don't have the tools of it. We measure, or we see energy packages coming from the Sun and they create havoc with the satellites. But there are other constant evolving living energy packs beyond the atmosphere of the Earth, within the Solar System. And each environment of the Solar System has different life, the same as we have on this planet. We have a warm weather, we have a cold weather, we have the snow, we have trees, we have forests, we have desert. The same structure of life without matter state dimension exists in the universe, in our Solar System. Then they say beyond our Solar System, in the galaxy, and beyond the galaxy, within the galaxy and in a universe.

We will come, we will understand this gradually. But we have to be prepared for it and not be ignorant of it, and don't take position, that this cannot be. When you become Man of space, the way you as Knowledge Seekers (KS) are gradually building up to it, you have to accept everything as you see. You have to stay open minded, (:20). Because you work through the energy fields, you work through the Soul, you have nothing to be afraid of, because you're open to it.

If you go back before we started the flight simulation, I said we listen to anything anybody says, because it's their experience, nothing to be laughed and nothing to be joke, because we didn't go through that transmutation, we didn't go through the cycle they went through. And you have become open minded.

Many of you have listened to a number of the recordings of these people coming out of the flight zone, and you listened to them, half mermaid, two lovers being on each other's lap, because now, you as Knowledge Seekers are, have become, and are, and those who have become Knowledge Seekers, and the teaching, and the technology (T) opens up, we become open minded. Because there is not. There is no limitation in the dimension of Creation. And part of the teaching of today is this.

What happened now, many of you went through the enhancement of flight system and you came out, you are testing, feeling different emotions, different contexts, different approach. And none of you, or some of you put it down, that what I went through in the experience in the Enhancement Center (EC). But as more and more of you become passengers of space, you come to understand, and see what we call, cosmic rays. The strength of the cosmic rays, how you use the cosmic rays, to elevate your soul, elevate your position. How you manipulate understanding of the emotions of the man with the cosmic rays, (:22). then you find new dimensions of love, new dimensions of interaction, new dimensions of what we call, giving.

So, I was yesterday in the lab, where the phone (new) systems is getting put together, and walking into that lab, I walk in as a man. But as the systems are getting built, somehow build. Some things are getting tested, some things are getting added, I feel the emotion of cosmic rays, and how it's going through that lab.

The two systems are less than half a meter apart from each other, that's getting built up. One is stripped, and one is half stripped, one has received the unit of the what we call, transmutation, of the head units simulation. One has received the cosmic ray production systems, and you feel, that the man is getting ready for the maturity of becoming part of Universal Community. Becoming part of U Community is not just being in a UFO and shaking hands, and seeing aliens. Part of, the main part of the Universal Community is the energies, that 80%, that you have denied all your life. Now, you'll see them, you'll interact with them. The way you take vitamin A for this, and you take magnesium for that, for your physical condition. You become wise to which fields to take to enhance, to elevate part of sections of the Soul of you, that will give more. Will be there to interact more.

Those of Knowledge Seekers, (:24). who are working in the production, now are getting touched by it, because they cannot escape from it. It's a space, that they move in and out of it. Some of them are concentrated. Some of them is getting put together. Some of the fields half in the system, half outside, interact when you pass through them. It's like the two pictures you have. You buy the 2 pictures and you stand in the middle of the Gans's. These are the fields. These are new dimensions, new emotions, new understanding of the technology.

It's no use putting the units in Linz in three, four weeks time and say that's it, wahla, you are going in the center. You have to understand what you're going in for. You have to see what you can do. What the system's capabilities are. You'll come to understand the Totality. "Whoa, I was worried about the zinc, and I've taken up iron." Now, I have to look how, which fields, in which position I stand, elevates my Soul, in the dimension of joy, in a dimension of giving, in a dimension and strength of love, in the dimension of transmutation, because these cosmic rays, which we create, brings the matching in, which field is connected to planet Zeus. Which field is connected to Moon, which field is connected to another universe.

Gradually, over next decades and hundreds of years, man will come to understand the Totality. But now, (:26). the Totality is not just having a satellite going to see how Africa is, or going to see how another part of the world is. It's going to see how it feels to be in another position in the universe. And what you can add to that position. What you can take from, that you can give more back to it.

Then, you understand now, that, Man needs to learn about a new fueling system what we call, cosmic rays. We have seen this. We have played with it, we never understood it. In many ways, many of you call it, aura, the fields around me. These fields around you cannot exist, if the fields from outside do not interact with the fields of your physical body.

The light, the interaction of the fields, on the level of the head of the man, where the Soul is, is different than the body of the Man. It absorbs different rays, gives different rays, interacts with different cosmic rays.

In a way your skin layer is protecting you from the cosmic rays and other fields, which your body doesn't need. And if you are intruded in the wrong way, what is going to happen to you. You received fields you're not supposed to receive, and wahla, we see different interactions. The doctors today will tell us, "oh what are the point of the cut of the body, we see cancer? (:28). Yes, there is a mutation, but how did the mutation come in? How, what fields was absorbed by the body at that point, and what was available to be absorbed.

The scientists today go in the depths of the Earth put a pot to see if they can see neutrinos. The pot is you, and neutrinos, fields of the cosmos go through you like nothing. And how these fields interact, effect us. We see how rates of suicide in the Scandinavian countries, because of the long term winter, dark times, they don't receive the right fields of the cosmic rays for the Soul to be elevated.

We see people in Africa in the heat of the place, in other places, in Brazil, in the jungles, happy people, they dance, they are different. They receive different cosmic rays, which effects their Soul, which effects their emotion. You wake up in a sunny day, you're happy. And in a winter day, you're miserable, because certain rays of the fields, which you need, are not there. You can create it yourself. You can bring it to absorb it.

Does it matter if you fall in love, it's in the summer, or a winter. Does the falling in love in the winter, is different than the way you fall in love in the summer? These are the points that we have as Knowledge Seekers to understand about the new knowledge, knowledge of Creation, knowledge of understanding. The more I go into this environment, (:30). the more I see how gradually mankind is getting ready for that step next.

When you entered a new Enhancement Unit, they are what I call, a universe on their own. We have pre-dictated the condition of cosmic rays in them. We can change the condition,

or absorption of cosmic rays, and we can change your mood, we can change your understanding, we can change your interaction with the Universal Community.

The technology which is now in development, and most of you, in next few weeks will come to test it. Those of you who became Mobile, what we call, people with registering yourself to become a Mobile transmutation. Those of you who became Satellites. Those of you who becoming transportation to space, will feel this, will go through this. We'll see how humanity will go to the next step of understanding the new knowledge.

We did not know about the (electric) current, we did not know about the computers. But we came to understand the currents. And then we came to build the computers. And then we realized, "Oh God, they have been here all that time." Thunders and lightning has been the currents and powers, which are running, and the computers has been in your brain, the operation of the cells, interaction of the information. We haven't done anything new. We just understood a small process of the Creation, (:32). and we have replicated in different ways. Now we understand we actual replicated it what we already lived with.

The same will be in the space technology of the future. When we traveled the span of this universe, through the fields, and not by flight. As I said before, mankind up to now looked at the UFOs, they are so advanced, they can go so fast. But it's literally as I said, it's like the man who lives in a village with a donkey, and marvel's the guy who's got a bicycle, and the guy who drives a car. You there are that man on the donkey. And we thought the guy on a bike or a car is very advanced, but there are other man who are on jumbo jets, rocket Space Technology, and the rest.

Now, we are getting to that point, that even the D of physicality has no need to confirm the existence. It's a different knowledge. But in a way, the same understanding. Would man come to be part of this, what I call, structure. Would one day man become to understand a fraction of the Totality of the knowledge of the Creation? This is what's on the table today. When I sat yesterday, watching, looking at the new systems, knowing half an hour an hour before, I was in the Linz in the other two systems, working with their effect, and moved to the laboratory, to the factory, (:34). to see the new systems, which are getting built. It's literally like a donkey and that car. Even though they both been built in the same environment.

The space gap of knowledge gained, has created the gap. This space gap of emotion, which is learned has created the gap. When you walk into the laboratory today, and you see system if you understand it, but also it's the same frame, if you've been there, nothing has changed, a little bit bigger. But the technology, which is the understanding the essence of the Creation, is a donkey to rocket propulsion difference. Man with the knowledge of today, compared to what is in the laboratory, is literally like man hasn't even walked, let alone to get on a donkey. And the knowledge, understanding of the man in the rocket.

We have not waited to complete step by step, you'll find something else. We are completing the technology in a way that man literally walks into the dimension of space. You will understand. Those of you who go through it, you will understand.

We are even now preparing for the first American to enter Austria, through the same system. How would he arrive? In what level he'll bring his knowledge, and in what I call, human characteristics with him. Would he appear in Austria, with the black hair, blue eyes, and whatever else. Would he speak fluent German? (:36). Would we still recognize him as the man we lifted out of US.

Then would the emotions with him, will be the same? Would our two first Mozhan's, which will be sent to Moon in hopefully January, February, March. As soon as we can complete the other tests? How would they arrive on the Moon? They are a couple one Russia and one European? And how would we see them? How would they see each other? Would they find each other on the Moon? Even if we hold them hand in hand when we leave them, when we put them in the condition of transmutation. Would their physicality on Moon hold hands with each other, or one will appear on the north of the planet and one on the south of the planet, crying looking for each other. Or they come as two souls, and then we see them. Then we bring them back to the same position. So we expect to see the same people back. But the interesting is, would their emotion will be the same? Would they be elevated in D of Soul?

We need many of you to register for what we call, space travel. We don't have enough of you. Then it comes to, what will be the next? How would governments handle this? How would us as a humanity handle this new change. It's a new knowledge. It's a new school. It's a new language. It's a new technology. (:38).

Although we try to put human parameters around it to control it, that we are in charge of it, and we are in control of. Governing does not count when your Soul has no dimension. Governing does not count when we do not understand ourselves, what would be the position and the condition of arrival? Does our immigration officer in Linz look for a picture of the man in the passport, he has been given on arriving. Or if a cat passes him by, and the guy on the way wanted to see how cats live in Austria. Where is your passport, sir? You're a cat, you come in. Oh, I am just a cat. Because we don't have no passports for the cat.

He walks out and in the D of openness in Linz he decides to see how it feels as a human, and he converts. Because he has reached the knowledge, he has reached the understanding. All these controls man has created for himself, passports, borders, money, everything goes through the window. If I can travel in the D of the Soul, and change the physicality, I arrive here, I have no money. I know how to disappear and appear on how to change the strength of the fields. I pop into an ATM machine, couple of thousand Euros, nobody, even the machine doesn't feel a couple of thousands has gone out of his box. Now, you should start from understanding the implication of the new technology. (:40). Now, we have to understand the correctness of what we do, and where this technology is going to go.

Somebody wrote to me this morning somebody, KS says, Mr. Keshe says, talk good, do good, whatever. Yes, we do, but we do according to what you tell us is the truth. And we share that truth with others. This is how it will be. You understand the truth by yourself.

When you come in, you know the parameters, you know the conduct. When you go on Moon, you go to another dimension, they have no banks, there are no restaurants. How do you survive in that environment? They never heard of banking, because they take whatever they need from .. . Whatever, oh, we need certain things you don't need, your body cannot take it. On Earth you do not eat. But it's the point of survival, or you tap into the universal energy and feed yourself through the soul. But you pretend to be one of them.

Yesterday, when I went around the new 2 systems, I see the soul of the new structure, new life. Life that us as human race are not aware of. I saw one of our Knowledge Seekers who is building these, having lunch. And it was amazing how I saw him, and it was amazing how he saw himself. He was like, literally a magnet with the light, you know as you call these plasma balls, you see the lights going. What was going from the system to and back from him. (:42).

You got to understand, the new technology, the new source of essence of the new Space Systems, is very much as I explained to our knowledge seeker, is like this plasma balls. Remember when you turned it on in your physic classes, and you see fields coming out in different colored rays, and just move everywhere. Now that ball is your Soul. It's you who decides where, to which system, which reactor, which space, time, and position you interact with.

Go back to the understanding of the physics of today. We always thought that lightning comes from the sky. But actually the lightning starts from the Earth, because it's the soul which ?? Now that Earth lightening rod, is you, it's your soul within the physicality of you. Where do you want it to connect? Now you have a choice. The first few times you might burn yourself, you might end up somewhere you don't want. But you know the reference point back, is Earth. I go back and try again. I come here this time with different field strength and I will survive it. I will I taste it. I will enjoy it.

In the structure of new space technology, we ?? confine everything with the cosmic rays. We see the dimension of the field transformation. In the cosmic rays we are not working with hundreds of billions of Tesla. You work with macro and micro, and Pico magnetic fields. (:44). We do not see pressure the way we see on Earth, atmospheric pressure changes. We feel magnetical (M) plasmatic pressure, the way it changes in the field of your stomach.

I always say, the best thing you understand, that you understand how cosmic dimension of fields is in your body, is the odor you produce. Your body produces a gas, and your body changes it from a "Gans gas" to gas, and then to the odor. You are a living example

of the interaction of the field in the cosmic ray, in the matter state and in a plasmatic state. But you never understood.

You never could analyze that the odor coming from my body was a Gans. And in the process of the layers of the skin, due to their construction, it became a gas, and again through the last layer interaction with the environment, became the odor. We are a living cosmic ray fields transformation, but we never understood it. We just went about, .. that I silence it (?? fart), I don't let it go through the last transformation.

But, then you call it, the aura. Again the interaction of the collective body fields. Now, we have to understand, we have no choice, as I said many times, (:46). I've taking it too far to let you go, I have taken you, I have taught you too much, for you to become and stay ignorant.

When we had the last, what we call, the space test last week, with one man walking in, driving in, god knows how many kilometers, .. from Northern Germany, to be there. I asked him, get something to eat, whatever you like. He says, I tasted the mango, I could feel it in my mouth, I could feel it going through my stomach. Was that emotion of feeding, was actually already absorbing, that confirms to him the physicality has received? Or he could have received it without actually explaining any physical dimension, because he was supposed to explain the transformation he went through, when he received that emotion of the field from the mango, maybe down the road, maybe in Africa or somewhere else?

Isn't that the dream? You interact and saw it as a dream? Now in, what we call, day light, in aware of awake-ness, you put the reality to that, what you call, dream, and now becomes a reality of actually eating? Does your body. How many of you had dreams, that you went to a restaurant you ate the most beautiful food? Did you wake up and felt it in your body and your stomach working? It was just a dream. Because that was changed in the ?? sense of emotion. This time is changing the essence of Soul of the Physicality (STP), because you're in control of it, you want to feel it. (:48).

Now you understand how we have set up the systems. When I ask it to be done, and it's done, it's not psychologically setting it up, it's for you to understand in what channels you want to open. Why did he feel mango, but not an apple. Because at that point, the fields which the body needed was the strength of what mango gives you.

Then we enter a new dimension of life, we enter a new dimension of knowledge. We cannot just leave it, it happened accidentally. We see how we can strengthen the Soul that even changes the psychosomatic conditions in the physicality of the man. How this knowledge, how this energy growth to be so powerful, which we taught, which was that 80% of the energy, which we always ignored, we receive it, and we ?? stop that 20% banana, the vitamins and the cheese. As I said, life has become a bit too cheesy not to understand it, because now we cannot ignore it.

Understanding of the new process of cosmic rays, interaction of cosmic fields on the structure of the field of the Soul of the Man (STM), physicality of the man on this planet and beyond, will become the knowledge of your, what I call, entertainment, enjoyment, survival, whatever you call it. (:50).

What would you do, if you appear in another planet, as we see the flying ?? UFOs, and they have the technology to capture this soul. They capture you as a soul. They don't know there is a soul in it. They might know there's a soul in it. But now you have become that monkey in the zoo, that fish in the tank. How do you change it to be out of it? Or would you stay that monkey in the zoo for the time of your life, of whatever it might be?

How much connection you have between the STP and STM, dimension of physicality of the man, or entity, that you can transmute, between the soul and the physicality, depending on the interaction of the fields?

I come here with a soul strength of the position, which dictates, this will be a dog. I don't want to be a dog, I want to be a man. How do I change it, to I appear as a man? Then, the next step is how far does man, how far the humanity will understand the new science, the new knowledge?

As I said many times, we are not prophets, we are universal teachers. That Methi you're waiting for, that God knows, Messiah you're waiting for, it's in your dreams, it's in your understanding. To us, we are Messengers of the knowledge of the universe, and we share. How much you take. evolves, how much you will come to understand to enjoy more. (:52). It's no use going into a man in the back villages of Africa, and trying to explain to him the beauty, how Niagara Falls fall, unless you've been to Niagara Falls. And you have the emotion of the water. How is a skyscraper? How does it feel to be in a jumbo jet? It has no meaning to him. Because he hasn't been educated, he hasn't had the television, he hasn't had the mobile phone to see such a thing exists, that wishes to see how it feel to be part of it.

How can I explain, how to be in love, when you don't even have the understanding of what love is? You're ignorant of it. Because you never been taught of it, you've never come across it, you've never had the intention of it. When he falls in love, he says, this is what the guy was talking about.

All I say to you is, fall in love with your Soul with the dimension of the STP, that you can live together in any dimension in the Universe.

When in the coming weeks, we move you from one unit to another. We move you from United States to here, we move you from here to Canada, or to Australia. We move you from here to Moon, and Mars and beyond. You're the "last man standing" in that position. How would you survive? Or how would you take the knowledge you have to survive? Or would you manifest yourself half handicap, because you don't understand the rest of the knowledge at the time, place and position. (:54). Because you still want to be

half man, but a misplaced man cannot exist there. The atmosphere does not allow amino acid (AA) to survive at the strength of the life of the man.

What is the next step for us? What is the extent of it? This is why we put these teachings, now we move into Soul, you understood. Now you have to understand, Soul needs a feeder, which is the cosmic rays, which is the interaction of cosmic fields, plasma of the cosmic, of the cosmos, of interaction, which some of these fields emanate from the essence of the Creation of the Universe, what you call, the Creator.

Then, in that point of maturity you understand, I am connected. As much it's connected to me. I'm part of it, because I create that strength between it and me, that it gives me the dimension of and confirmation of existence. I am the beginning. I'm the end. It's the beginning, where it comes from, or is my soul the beginning that it goes back to it?

There is no planet, if the fields which came from the Sun, does not slow down in the outer atmosphere of the Solar System, that it comes back, and creates that Inertia, that mass that confirms the existence of the Sun. Otherwise, there's nothing there, it's just a field moving. When you put the Earth in front of the Sun, and it creates that life, it creates that light to confirm the existence of not only the Earth, but existence of the Sun. One cannot be without each other. I am the beginning, and I'm the end. On the confirmation of one, and it's confirmation of me. (:56).

This is what I tell you, and I've always said, there is no line between theology and, what we call, life, and science and technology. Once you understand the science of Creation, you become theologian, and once you become a theologian, you've confirmed the existence of it through the manifestation of physicality. Then, do we need these, what we call, people who try to tell us, just because they think they can, or is it our ability to be able to do what we do?

Being the source, and being in contact with the source, because we always ignored it, now we cannot ignore. Many of you will walk into these new systems and you become a light. You shall not see, but those would stand outside will see. But to what strength you becomes that light? To what confirmation you become to exist to be that light? I made man in the image of Myself. But how man will come to accept his own new image.

As I said, we brought you from. If you remember, the first time I tried to explain this in a Coca Cola bottle. The very first time many of you came in touch with the knowledge of the Keshe Foundation. Nothing has changed, if you look at the shape of that Coca Cola bottle and the Enhancement Units. Those probes in it, it's the helmet you wear when you go inside. (:58). The Head Unit. The atmosphere inside, the cosmic rays inside, the fields which creates inside, is that magic liquid, which all been asking for decades. What's the magic liquid in the Coca Cola bottle? Cosmic rays.

Now you are more knowledgeable, you can understand it easier. Now, you come to see the knowledge has been consistent in all levels. You couldn't understand the Coca Cola bottle, and a few electrodes, and something in it, back in the same position. The same

Coca Cola bottle, we call it, universal, Enhancement Unit. The electrodes is your, what we call, the Head units. And the liquid is, the fields we create and we are part of it. It creates transformation, it creates transmutation, it creates Nano materials, you've measured electric current through it. Where did it come from? How many of you, when you first became part of the Knowledge Seekers years ago, built the first Coca Cola and measured the voltage and amperage? Where did it come from? You put it down as, "oh, it's an electric current." No, these are cosmic rays that in the layer of Nano material convert to electric current.

Now you understand. The technology and the teaching has been ever on the same line, it's just how much more knowledgeable you become. We had to teach you about the Soul, because now you put your head in that Head Unit, it's there, it's the energy, it's the essence. What's going to happen to it? (1:00).

We had to teach you about Nano technology, we had to teach you about the Gans's, because now those are the absorbers, and the creators and the creation of all dimensions that you call, cosmic rays. Then you understand the new technology, the new developments in the science, understanding cosmic rays produced by us. It's not anymore in the space, it's not anymore, they are cosmic rays. The new ?? agent of the knowledge of the man, is a cosmic ray on this planet. Because now we produce it. Now we control it. Now we understand its interaction. Now we have found the magic 80%, which has been feeding us, and we've been ignoring it, because we were ignorant in the knowledge of the Creation.

The next step for us, there'll be more, as I explained to one of the KS, we have just entered you in the, what we call, "twilight zone" of the knowledge of the Creation. The Sun is still to come. The beauty of the knowledge is still to be added, as you more and more mature.

But as I said, to a beautiful young Knowledge Seekers recently, we have to understand, we have to decide, and not be decided for us. What strength, what dimension, we would like to be in? (1:02). If you see a horse in pain, can you change the strength of your soul that you can communicate with the soul, and find out what is, the pain is, and convert back yourself to the human dimension, or interaction of the fields of confirmation of information between the two, and give him the right remedy?

Would that horse would be another creatures from another dimension of the universe? You have to understand its pain or its joy, and how you can help him, how you can give to it to alleviate his pain. Or free the sources. What would you do if you come across a being in the universe that is in need of magnetic fields to survive, and part of that magnetic field is the structure of your soul strength, that it matches it. Would you give it? Or would you hesitate giving it to him, it would be the end of me?

As a traveler of the universe, I give it, because you have missed part of the knowledge. My strength is that what I give, at that strength I can receive. So I can become a feeder to him, I become the essence of his survival. My giving for him to survive, is the dimension

that, I'm like, what we call, intermediary. He cannot tap into it, but he can use me to tap. Would I stay in this position for him to be satisfied, maybe one millisecond, maybe a million years, (1:04). that his survival is guaranteed?

We're not talking about romantic, we're not talking about something imaginary. You will come across it. Now you become the, what I call, travelers of the universe. The first thing some of you, especially understanding this technology and going through it, is how do we deal immediately without what I call, delay with those who live above us in the upper atmosphere, in no dimension of physicality, but energy packs.

The world of science has to deal with it, they are part of the structure of the Creation of this planet. We are aware of their existence, we are the bottom eaters, as I said many times, of the Earth's atmospheric condition. What falls from their surplus energies, we collect. We are, what we call, the Cup. We take everything. ?? itself, energy fields which falls from the sky from their interactions, from their leftovers, in a way, most probably part of their excrements is what, is we need to survive.

We couldn't accept this, we couldn't understand it. But we have a confirmation of it. We have a pictures and videos of them, they exist, they move. Where do they go? How long do they live? What is the fall out? And then the other creatures? How do we interact with their souls, because we don't know understand their language. We get the fish we know what it does. (1:06). Now we are that bottom eater carp in the tank of the atmosphere of this planet.

Then the same is beyond this atmosphere, within Solar System. We say we know about 1,500 mammals, or whatever, creatures on this planet. There is hundreds and thousands more above us, which we have ignored, but doesn't mean they don't exist. How do we interact with these? How do we guarantee their survival? How much our soul is in interaction with them, and the others?

In this process of the new understanding, we went from the soul, now to cosmic rays, we have to understand the interaction of the cosmic rays, the fields of the universe, with our soul, with our star. Then, what will be the outcome?

Does those children who last a few minutes, or a few hours after they're born, they're born in the field strength of purity, that immediately they come, they interact with the cosmic rays, which matures the Soul of the Physicality has no need for. The STP has matured itself. We call it, the death of an infant, but it's the maturity of the soul, which received the fields, which we wait for decades to reach that point. Because the soul is there, it's interacting.

Instead of receiving 80% in bits for it to survive, 100 years to mature, that it can leave, instantaneously, at the point of birth. Because of its strength field collection, has touched it and matured it. (1:08). There's no need to wait. We know this.

I said many times, go back to the teachings. How do the babies and infants communicate with each other, and they know their position and hierarchy between each other? Interaction of the Soul. Be it the infant a Chinese, a black, a white, a blue, whatever. Put them in one room, they know each others position, they know, they're aware of its existence.

So now, the teaching is going in the direction of the food of the soul, the life of the soul, the existence of the soul, and what we call, cosmic rays. Or we can call it, because there is no other word for it in the vocabulary of the man today, we call it, the "cosmic," or the rays of the Creation, and part of it is the rays from the Creator.

In a way, the rays from the Creator to you, its like that satellite beam feeding back the weather forecast, "it's going to be rainy, it's good here, it's going to be sunny today." Your soul sends messages back to the Creator. Here is a problem. There is something needed, there is something. The weather is good, everything is happy, we receive enough food. We're that satellite, as the Creator is satellite to us.

Because there's no physicality tying him down to anywhere, as our soul has been tied down within the dimension of the physicality of the man. (1:10). Understanding separation of the different dimensions and the strength of the, what we call, universal fields, or cosmic rays, it will be one of the main occupation of the scientists of the future. You found a new vitamin, you find a new plant, you find a new animal, today with the science. Now, with the understanding of this Creation, and the process of the Creation, now we'll look for what field the strength will give us the position to such a Galaxy. What such a field strength will give us the strength of the emotion of happiness.

As I said, in Koran, Muhammad, blessed His name says, I've written 99 names of the beauties of the attributes of the Creator. One, the last one has been ??, read the whole Koran you come to it. That whole is the Creation, it's the universe. Those attributes are different interaction of the fields of the Creator within the man, within the emotion of the Creator itself. So, how many more essence of information, dimension of fields of the universe, man still needs to learn. 99 is a scratch on the surface of the knowledge of the Creator. 99 power, which means 10 to the power of 99, might just bring you to be a small part of it. How many, much more emotions and attributes of the Creation is there, that we live with it, but we are not aware of it?

Then you understand, (1:12). we need, in the coming time, to understand how we create, what cosmic rays we create? What, what I call, interaction of the fields of the plasmas we create, that leads to create of the condition? This is the essence of the new Enhancement Units. This is the essence of the world of Creation.

Then it comes to the point, as Knowledge Seekers, as Mr. Keshe move the, what we call, the goalpost further, we came to learn about the Gans, Nano technology, you moved to Gans, you moved to the other one, we moved to the soul, now the cosmic rays. But you're educated from the A to Z, your foundation is solid. What would be after universal energy, what you call, cosmic rays?

Would it be that I understand the essence of my own Creator, as I am part of it and it's part of me? Then I wonder, how many of you, you call yourself to be God? Or you become humble enough to be part of the process of these teachers, to teach the others to understand the totality.

We'll go for a small break and come back. Now, I hope, gradually past two or three weeks, I'm putting you in the direction to understand how to feed your soul, and how to start living in the dimension of the Universal Community, in the dimension of the plasmatic fields and not dimension of physicality of the man.

Rick if you'd like to take us to a break and then we'll come back. (1:14).

<< BREAK >>> 458 KSW (1:20).

K- Not really. I think we have to gradually what we call educate our people to understand the process of Creation, that there is no mysticism, and nobody is above another. And we all become KS and share the knowledge of creation. And that's the whole essence of the teachings we do. Because up to now, all these has become exclusivity, and somebody who understood more became whatever. This, this understanding of the total structure of the Creation will put an end to this. Because we're all the same knowledge. Knowledge should be there to share. Knowledge should not be a point of advantage, and how whatever we do with it, and how we do with it, how we deal with it. And what the way we come to understand it.

I heard something very interesting yesterday, from one of the KS, a link, that what gives the religious leaders to call themselves, "the appointee of the Creator." And we've seen it, appointed, reflection of the prophet, and reflection of the Creator, because I managed with the "gun policy" to push people, and get where I am. (1:22). It's a very interesting video, if you look for it on the Internet.

Because now we understand, we are all connected, there is no exclusivity. It doesn't matter, whatever name you have put on yourself, from Ayatollah to Pope, to anything else. This is what we have to understand. Once we understand, we don't accept superiority. I've said this many, many times, and I've said it many, many times, and I repeat it, I'm still a KS, does not matter how much knowledge I carry. Because I seek the

knowledge of the Creator. What interaction of the fields of His life has created, that we didn't understand, or we need to understand, and somehow we need to share it.

When somebody calls himself reflection, or replacement, or being whatever of whatever, it shows the man has gone to an end of his understanding of his own creation. It's time for him to move it. If you listen to the first Intro, we're talking about the Enhancement Units (EU) we just had, a few minutes ago. Listen to it. Listen to what we thought in past two or three weeks, and referred today. Isn't it what was promised to do, the Enhancement Unit? Now you understand the science behind it. Now you understand how it does, how it feels, how it will be instant transmutation, how, what it is, because many of you have tested it. We're back to "square one," we're back to square one of the knowledge of the Creator and the ?? not ours. (1:24).

Any other question? Let's start ??.

Q: .. Are bad experiences that we perceive as trauma, a physical or psychological condition. Where are these stored? Thanks.

K- You have a computer called the brain, and it's stored installed in it. Depends what it does with you, how you refer to it, or you just forget it, and put it on a back burner, and just remember not to do, or remember what it can do with you. It's part of the structure of your STP, and in the dimension of the .. , what you call, dimension of physicality of the man.

Your Soul has no problem touching a hot pan or the fire, it doesn't get burned. But when you're a child, you touch a fire you get burned, for the rest of your life. That's not for my physicality to touch. I learned my lesson. Your Soul has no limitation, it goes in there, it's made of the fire field of the strength of the dimension of the free, of what we call, fields.

So, where does it get stored? In the part which touches your physicality.

The same happens in the dimension of the STM. What touches the Soul, in that part, because part of the information of its plasma. (1:26). It might create an evolution or revolution in it for a while, but then it settles down. It's like getting hit by a meteorite. If your Soul survive it, if the Earth survives a meteorite, what that meteorite brings the change of atmosphere for short term or long term, it becomes part of the structure, and remembers that, with a dent on its surface, that such a meteorite has hit, such energy has come in, such a material is added to me as assets, as a facet of my existence.

But all what you asked, it's literally part of your dimension of physicality (P). As I always said, get a child, touch a fire, never go near a fire, because he feels it in the dimension of physicality. Put the Soul to it, it doesn't do anything with the Soul. Because Soul is part of its energy, free, transmutation. A Soul does not burn with a fire, but the physicality does. The soul does not feel the pain of the fire, maybe even rejoices, because he adds to it, because it's on the dimension of free energy, it's giving it out freely. But your physicality could be literally destroyed, because of it.

But you remember not to touch the fire. It's your Soul who will jump in the fire, because it gains what it says, it's free to take. It's not taking it from me. The fire .. it's what I don't need, I radiate. (So the Souls), I take.

Any other question?

R: So in that manner, we can, a Soul travel, a Soul flight, we could place ourselves on the surface of the Sun for example and we don't feel any pain, there's no...

K- No. Because your Soul is another dimension. (1:28). You will see the interaction of the fields. You cannot burn a Soul, you cannot burn a plasma. You can open it up, or do the build up, of the compressions of the fields, shrink it, but you cannot burn it. If you change the dimension of the plasma in a condition to manifest its physicality, then something will happen to it. But in the dimension of the Soul, do the Sun's burn each other?

R: What about in the dimension of cosmic rays, that say come from another galaxy, the highest energy ones, apparently comes from other galaxies, other than our...

K- They come from other universes. Forget about the galaxies. They come from different dimensions.

R: Do they effect the soul?

K- Yes. We will not feel it, we will not detect it, if we didn't have something to receive it. It's part of the need we have in our soul to receive these. We cannot. It's what I always said, you cannot receive it, if you're not there at the strength to receive it. If we detect the cosmic ray to our body, it means our body has the field strength within the structure of soul, our physicality, to receive it. It's not just for somebody else's.

If it interacts with, if it is there in the atmosphere of this planet, it means the soul of this planet has that field as part of it, that he attracts it. (1:30). Even if it goes through it, it has created a condition for it to be done. Otherwise, it doesn't come your way, because you don't have the strength of it. Even if you're .. a passenger of it, it's going through A to B to get to the source where it is, or connected to. Your body, if it wasn't in a strength field dependent on it, will move away.

Look at the magnets you put on the table. The fields move across, they ?? move, field, the side, what is not there. When it's interacting with them and it's at a strength they need to interact with.

The STM is a Sun. And in essence, unless it gives all its energy, or receives more energy, it's always a field, it has got no tangibility, unless it decides, unless the condition confirms on it, in a universe, that changes in manifestation dimension of physicality.

There are many, many other conditions of life, the man has not even understood. We call it a solid, we call a liquid, we call it a gas, we call it a plasma. There are many, many other conditions beyond this, .. man has still to understand. There's a 10th state (of matter. There is hundreds of states of matter. But we haven't understood.

How can we explain it? It's liquidish, but it's gas liquidish. It's solid, but it's liquidish, solid with a gas. Remember, I always go back to something very simple. You all play lottery. (1:32). You take 49 numbers, and you choose seven of it. And to get the same combination twice, you need something like 14, 15 million combinations. Now, the field strength of the universe is ten to power of 49, to the power of 49, if you put it that way. See what combination a few of these can create, and have different strength of.

Then you understand how much man has not understood in the process of the Creation. We are happy with a wood and a glass. We are happy with the gas, and the water, but much, much, much, much more. You just become aware of the Gans's fields of the plasma within your body, and you still don't know how to handle it. How does that Gans becomes a bone, and how that Gans becomes my hair, and how, in which position we call it the roots. Conditions created to convert a gas and the Gans into hair.

Why suddenly my hair changes from white to black? And the black to white? How come I was born brownish and now I'm blackish. This is what you see everyday and you have not understood it. What position, what field changes goes within even, what we call, the seed of the hair of the man? Forget about the rest of the knowledge of the body of the man. We handle it with chemicals to change the color, "oh, I'm white, I have to get black, I use, I'm getting old." Go and ask, why does it get old? (1:34). What has changed in the root? What fields you have changed? And what can you put. "Oh I use Gans number one and Gans number 2, and I did some of the Cup of Life. My hair grows a little bit.

Hello. What field strength, what fields, the combination of these things created, that has been a shortage in the wish of your soul in the dimension of the STP, that you changed the color of your hair? You take one part. If you understand the Totality becomes very easy. You can stay a hippie as long as you live in every dimension of the universe. If you know how, what field energy the hair needs to grow and stay hippie and black.

Why some people don't change any color of the hair and they have very bushy hair, all their life? They are born with a "carpet" and they die with a carpet of hair. God knows ???. You haven't even understood this. How come your nails are produced the way they are? How come your skin is the way it is? We always looked at physicality. Look for the interaction of the fields, interaction of what creates that condition of the fields. Then you can be anything you like.

One of the experiments we'll do in transmutation, very soon, is changing the skin color. When we transmute you from one unit to another, we ask you, would you like to be blue, blond, when you arrive in the other unit? Or, what your wish has been? I wish I was born black. (1:36). Would, when you arrive in the other system, will be black? And your mother denies it. You say, mom, you tell her all the stories she's done with you. (She

says, "I had a white child who went in this machine, you come out black, it cannot be." So, we will see, we will feel, we will understand. We have no choice, because now you're in it. Stupid Mr. Keshe, has built the system, I go in white, I come out black, I wanted to be like ??, I'm going go back to the first machine again. Sorry, you come out zebra. Half of you wanted to be black, you wanted the other white. So we've made the zebra out of you. You come out as a human zebra, is ???. We see it.

We are doing a lot of experiments in the background, which is not in public, and we see. We have finished with 80%, 90% of the present world of medicine. And the other 20 we haven't understood. We have understood, but we haven't managed to complete the system for it. We've done with a huge amount of the productions and energies. If I tell you, you laugh, because you don't understand.

You know, if you remember, the lady who could taste the water and drink as much water. If you understood the implication of that. (1:38). If I create the same fields and sustain that fields over the desert, over the plantation, would the plants and trees wait for the rain, or they take what they need, as much as they need to ??? live. Have you ever understood, we know the fields of transmutation of the field of the water, from the cup to man. She felt, she was flooded, she was taking so much water, and she could feel it. I can do the same with the plant, there's no need for irrigation. To you it's a magic knowledge, to me, I know exactly what to do with it.

Do you need to give Gans's and get a beautiful plants when I use Gans's? Or did you understand the energy, which you create that condition? As long as you're working with the Gans's you're still in primitive condition. When you understand the interaction of the fields of it, and what it does with the other, you have no problem. ??? It's (not) only the Gans of CO₂, you can even do it with the Gans's of water, you can even do with the Gans of gold. The fields which that plant needs to grow, will reach to it, and it doesn't need any water.

Understand, as I've said many times before, interaction of the fields, and then you're free from the shackles of physicality. But now when you understand those, now you have to understand the fields of the universe, what you call, cosmic ray, universal fields, not cosmos. Cosmos is limited to man and his universe. Universal fields goes from the Creator to the man, and beyond. (1:40). Then we are complete.

Any other question?

Q: .. You said, that you have tried several times to bring peace to this planet. But we still see nowadays the persistence of man wanting power, money, and on the other hand, I listen to your teachings about love and peace, which I have always longed for in my life. My question is, can you tell us if you are seeing the differences in human behavior today, in relation to thousands of years ago, when we were trying to bring peace to this planet? Or is it only through technology that this behavioral change can occur?

K- At the moment whatever we see war, conflict, it's to do with the religion. Man peace policy of gaining land and the rest, is done with. Man has realized, that's all it is, what he has.

The situation we see in Iran, internal war, is completely to do with the ignorance of the, what we call, religion. What we see in Ukraine is, again, background is religious, between the Catholic Church and the Church of Russia. When man sorts out the problems of his soul, we won't see this anymore.

We don't see the invasions, what we saw in the Second War, (1:42). these things are finished. At the moment it's the last remnants of the stupidity and arrogance of the "turban and the hat." When man put a turban down, when man puts that hat down, that what is under this hat and turban is equal, same with the others, then we are back in it. We see the flaring of these, especially in the situation in Iran, especially the situation in the, what we call, Ukraine. We don't have conflicts anywhere, except that religious people fighting for what they don't, they're not entitled to, and what they want to hold on into.

It's very interesting, one of our Knowledge Seekers sent me a beautiful bit. Church of Russia has bought the biggest property opposite to the, I think, the Norwegian naval base. Why does the church need to buy property opposite the ?? largest naval base? Has the religion go into marine warfare, or keeping an eye on, in the name of the religion? The wars of today, the way we see it, it's irrelevant.

Man soon will solve this, because once you learn you're all equal, religion doesn't go anywhere. What we see with the conflict with Israel and Iran, it's again religious based. This religion business, the soul, as man is getting educated, it just belong to a few, and they'll die off. In next few weeks, we'll see the end of the revolution, in this process of the religions. Then we will see how we move into the next step.

This will come with the technology. (1:44). Once we start moving people around this planet with the EU, transmutation of the soul, all this will go through the wall. We are a few days, a few weeks away from it. I've seen the evolution in the Knowledge Seekers who are building the systems. I see changes which is coming up with this bit of the technology in different ways. A lot of you have volunteered to be Satellites, and some of you there to do the Mobile transmutation. New ?? people when they become Mobile Transmutation, will change the world, will change the perception of the superiority of the soul. You change the superiority of the travel and control.

When we do the first transmutation complete, we'll take the cameras inside. You will see it, cannot be denied. Then, would you like to spend 18 hours come from Sydney to London, or would you like to spend 18 microseconds and do the same thing? Then with the government's allow you, you need the passport to come in, or I go where I like? You make sure, I'm comfortable when I arrive, I know how to get into your ATM machines and have as much money as I need, every time I run out, I just pop in and pop up.

It's a very interesting, very, very interesting position, and I go through it, I've been through it a few times. If you're not in it, you cannot understand what I'm talking about. But if you feel what I'm talking about, it gives you an amazing experience. When I speak about ATM machines.

If you listened, if you haven't been to the center. (1:46). If you listen to some of the recordings, when Dean interviews some people on the sofa, you hear like a noise in the background, like a forklift moving, and noises in the background. Because the back of the two Enhancement machine, you see a white curtain. Behind this white curtain, there is hundreds and thousands of ATM machines, brought in to be installed across Europe, or wherever. Be it from parking systems, automatic, being a cash machines. For us to go from one part of the Keshe Foundation, which most of the staff do, to the, what we call, our storage depot, our dispatch depot, they have to go through these machines to get there. So every time I go from the, what we call, the exhibition center to the dispatch, I have to go through it. It's like maybe 100 meter, 150 meter, and it's hundreds, and hundreds, and hundreds of these machines sitting there waiting to go to be installed in car parks, in banks, and whatever.

I call them, dead men waiting to be given a soul. If you can be part of, now you know, hundreds of thousands of these machines are everywhere, and you, you're at the source. I think this is the biggest depot, one of the biggest depots in Europe, all the hundreds of thousands of these machines still in ?? packaging. Then if you can get your soul into the soul of the machine, you just wait to be loaded. In one years time, in 10 years time, in six weeks time. And you have access to all the cash in the world you need. (1:48). ?? will be given life??

Then is there a need for financial world? If I know how to get into these machines through the ?? elevation of the soul, I become that invisible man, invisible soul. Then does money have any value?

Then, I was talking to one of our very young Knowledge Seekers yesterday, the day before, yesterday in the center. He said, when there is a perfect world there is nothing we can do, everything is done, we can have all the food. So we're going to get bored. You've got to do something. You can't sit there just because I get everything. Find yourself a hobby, find yourself a job, education and find yourself a sport that you can keep the physicality, the Soul, and everything else in motion. You can't sit there, "I have, I just wait till I die." You have to evolve, you have to elevate the, what I call, the Soul.

You can't just sit there, we don't see people in the universe sitting there, just because my soul ?? elevated, I wait here till the soul is finished. We don't have zombie souls in the universe.

We have to understand, we are gifted now with the knowledge, to understand the knowledge of the Creation and the Creator. Would we use it to bring to ourselves superiority? Or do we use it to bring balance with others that we are all equal?

In this interview, as I said to you, was sent to me, it's one of the Iranian Mullahs. (1:50). In his talk he says, who these people think they are, that they are from God, and they have the rights to kill with the name of God. And he's a clergyman.

Remember, go back on the teachings, a few weeks ago. Remember what Muhammad said, he said, I took the love of God from the tribal Moses, and they started becoming nomads. And I gave that love to the people of Christianity.

A few weeks ago, we took the love of the Creator from the clergy of Iran. Within a few hours, few days you saw. Clergy has to be a point of peace, not a point of death by gun policy. We took the love of God from those who use the sword of the Creator to harm the others, be it from Ayatollah to the soldier, who uses the name.

If we managed to bring a tribe to be a nomad for centuries, these people are nothing to what we do. It doesn't matter in which side of the Islam you sit Shia, Sunni, be Christian, whatever you are. When a man who's supposed to be representative, and the soul of the Creator and Christ is on a wheelchair, that shows already physicality does not accept the lie of the STM. (1:52).

If you remember a few years ago, I explained to you we built the unit to go to the Pope, because he had a knee problem, he couldn't walk, and we helped him, and he walked. He went against us, he's back on the wheelchair. He went against all of us, that we wanted peace and his game is war. He's in (name city ??), on a wheelchair. Man of God, the Creator, should be walking head high to deliver his message of peace.

Look at all the religious leaders today, be the Ayatollah Khamenei from Iran, be it of the ?? all are bed bound, because the physicality does not accept the lie, which it's trying to ?? enforce on the others. Just go back, just a few weeks ago, before all these problems. We took the love of Creator from the turban, and the same with the hat. Because it's time for peace, it's time. The peace comes when we all accept we are equal, the peace doesn't come by firing a gun. Peace come through the soul. And we still have those who thinks they're arrogant they can muscle it, nut unfortunately this time, they "bustled" it. And we'll see the change.

As I said, no man will take the crown of kingship. No one will take the hat of lie of religion anymore. (1:54). We've done with and we're finished with it. As you will get educated, as man gets more and more educated, realizes we are all equal. You don't need to bend to kiss, and to lie, on a wheelchair, or in a bed. They are still trying to say, "I am the appointee of the Creator." We've seen the Creator, he hasn't appointed anyone, not even us, let alone you lot.

Any other question?

Q: .. You taught us that inhaling CO2 gas can quickly elevate our STM and make us peaceful men. With the planetary transition where planet Earth will change his position in relation to the Solar System, the amount of cosmic rays and greater amount of hydrogen

will change on the planet. Can you tell us if there will be changes in the concentrations of atmospheric gases, for example, the plasma fields of CO₂ gases and thereby influence our human behavior?

K- You've got to understand why we said CO₂. CO₂ kills you. But why we said CO₂, and I explained this before. You have a Carbon 14, and you have a Carbon 12. Carbon 12 is ?? the essence of Creation of carbon of man, it's part of your amino acid (AA). Carbon 14 is a connection to universal cosmic rays, or what we call, Carbon 14. (1:56). Carbon 14, we don't look at as a speck of carbon, we look at it as a field strength, which is interactive, connected with all other fields, it's like a bridge.

So, when you talk about CO₂, we are not talking to, you to inhale the CO₂, we are talking about a connection of the plasmas with the field strength of the life on this planet and field strength of the universe. So you have to understand the knowledge. Otherwise, excuse me, stick your mouth on the backup of the exhaust pipe of a car, and see if you get elevated. Yes, you've gone (dead). Physicality have ?? no time to live.

Understand the knowledge. Then, does it matter where in that process, the carbon of the physicality amino acid uses the carbon of the, what we call, fields of the Carbon 14, or connection, universal connection between the fields, to exist. Even when we talk about Carbon 14, we don't talk about as an energy plasma, we are talking as a connection of the fields, it has more parameters to connect in the spectrum of the fields with more fields, nothing else.

It's like a, one has a plug of one outlet, the other one has a plug with 20 outlets, but connected to the other one, which is the same. So understand the knowledge, then stop talking about the atmospheric, and changes and the rest of it.

Man is connected to gravitational field of the liquid and the gas. One in the dimension of oxygen and one in the dimension of, (1:58). what we call, Carbon. You have to understand, the essence of the source of the Inertia of the field of the soul, the dimension of STP. Then you understand why you have nitrogen in your amino acid. Just look at the energy field strength of it. Then you understand how everything is connected.

What happen when you go to another planet which there is no energy level at the oxygen? You die? I don't think so. You mutate to the fields ,which guarantees the evolution of survival of the matter state of the fields, when the soul converts, or interacts with dimension of physicality.

I explained this once, if it can be understood. Give yourself a very powerful gun, and create yourself different atmospheric conditions in front of this gun, and shoot the bullet, let's say of a water. Which goes as fast as possible through these different conditions. One is frozen, becomes, shows itself as ice. The next section is high ?? operation. The next section is condition that the same water shows itself as a steam, and there on, and there on. (2:00). This is how the fields of the universe are in the condition of the life.

Depends what you're observing, what condition was created, and how the bullet for which the field has released, in what strength, and what condition it goes through. But in essence it's the same water, which the bullet went through the system. It's the strength of what we do, and understanding the strength of the creation and the process, which the environment has created for manifestation of that creation. It's how we do, how it's done, and what emotions you take with it, and what impressions it gives you.

Any other question?

Q: .. Is the seven candlesticks or the seven headed snake over Jesus and the Buddha. The seven chakras giving its energies to the soul to expand. And are the cosmic rays the depiction of the light in cylindrical form?

K- What? I think we pass on this one. (2:02).

Q: Has there been any interest in doctors in Australia in setting up a Wellness Center?

K- We don't disclose what we do, we work around different ?? clients, yes. It's just that, Keshe Foundation, as many of you know, we entered a position nearly exactly a year ago, with the introduction of one of Knowledge Seekers, that we can create facilities and conditions that the Foundation can grow rapidly. But it hasn't worked. We asked for some of you to help us to finance it, and some of you got stuck with us, created you some problems with it. Part of this expansion was creation of the health centers around the world. We have come to a conclusion this week that, this is ?? dead, we put an end to it in writing today this morning, before I come to teaching. As we think, we've been deceived.

But in any shape or form we'll carry on, and we'll see what comes up. But part of the process, yes. Our target, our long term target is creation of the centers where the people around the world can go. They don't need to go to Austria, or to go to Germany, or to go somewhere. In every country, every city, part of the hospitals or whatever. Now, like we didn't have X ray machine, we didn't have MRI machines in the hospitals 30, 40 years ago, ?? ... ??

The technology of the plasma technology we teach will become part of another room section in the hospital. Hopefully, long run, there will be no hospitals, because gradually we learn how to do. That will be the part of it. There are a number of doctors who work in the fields of the health of the Keshe Foundation in different countries, and they do different things. (2:04). We observe, we watch, and now our ?? priorities at the moment is, the Health Center in, what we call, every corner of this planet using the present, as what you saw, and established as hospitals. Because once you have it .. You've got to see what we see.

We have a man who is suffering with Parkinson's, and after 10 years, and after a few days, weeks, there is no sign of it. How much do you think we can keep away from others to suffer from the same, when the knowledge for it is there? Or, as I said very frankly, we open a clinic on the Moon, there is no FDA. Anybody who has a Parkinson, please go to

KF centers, we transmute you to the space, the health center, the wellness centers on the Moon, we'll process the situation and send you back without it. That's the bottom of it.

Literally, you've got to understand, once we complete this process of transmutation, we will become a condition of doing, what we want to do for betterment of man without a government. The beauty of it is, we've been kept out of the, what we call, public eye, allows us to grow the way we want.

I received something from a gentleman this week. I'll read it to you if I find it. He's the man who sits behind a lot of things. He wrote to me. He is one of those who makes a lot of things happening around the world, as he says. (2:06). He says, "you are one of the most influential scientists in the world today." With the science and the technology we bring, we have to influence the pattern of life, the way we as Knowledge Seekers bring that positive change to society, and for nothing else, nothing else out of it.

Our target is to bring this technology to a solution, or bring this technology to do. If you have diseases that are incurable today, would they suddenly become curable tomorrow when we open, what we call, Wellness Center on the Moon? How many of you would travel to Switzerland to do, what I call, "self suicide," because they allow it, and the facilities are there to do it? How many governments would allow the Keshe Foundation systems to go in their country, that for somebody comes for 10 minutes, half an hour, and goes back without the any condition?

Do we create a condition, that we put a few thousand systems, or we create the environment, that anybody with a cancer would go through, and it will be done, and then would the governments have any say in it? This is, what we call. (2:08), There's going to be a lot of controversial, a lot of movement, a lot of things to be done, but at the end of the day, who is benefiting by it?

We invited the German chancellor to come to Keshe Foundation Linz. Would we see end of the Parkinson's she's been going through. We saw it in public before she left the office. Would that give credibility to us? We don't need the credibility, because, if you have managed to save or change the life of one man, you've done enough, the others have to follow. Because we don't use medication. We don't enter into giving medicine. It's not the job of us.

We understand the physicality is connected to the soul and the systems we developed elevates the soul, the physicality follows, and then it has to sort itself out. As I call, it's the medicine of the fields of the Creator.

What we saw in China, the man walking and then running, now we can repeat it 100 times. 100 times, millions of times. No man today, with the knowledge, which sits with the Keshe Foundation, should suffer from Parkinson, should suffer from Alzheimer's, should suffer from MS, should suffer from Fibromyalgia, should suffer from many, many, many diseases.

But at the moment, (2:10). our governments and our doctors are the same as those with the turban and hat. They lie to themselves, they lie to the others ?? with it. We don't claim, we discovered the cure. We explain the process of Creation. Knowledge, science has to be explainable and repeatable, that it can be done. You have a Parkinson, Keshe Foundation has the technology for it. We have proven it, even in the recent past. You have Alzheimer's, KF has got a technology for it. You have MS, wow, we can put you through it. A lot of people claim too, and we've got this, sure, whatever you like.

Technology has to be understood and then be able to replicate it, within the framework of the Totality that it benefits all. If your emotional field strength causes Parkinson's, which again emotion is part of magnetic field strength, what happened when in the space, you come across this field out of nowhere, in one second you'll be shaking like a leaf with a full body Parkinson. It just passes through you. I've got to sort it out, I've got to put you back in the system. I know exactly what it is. I take it out, or add to it, or take it away, then you come normal. You're going like a vibrator, you come out as a man. (2:12).

None of you have seen body Parkinson .. people are, God help them. They shake from head to toe. Then should be able. We tried different technologies, we've tried different aspects of the technology, and now it's universal system for it. You suffer from Parkinson, the Keshe Foundation doctors should be able to process this like drinking water. They have the knowledge, and they have the systems, and we can support it with the support of those who are really knowledgeable and not those of hypocrite. You've got to come to a point to understand, as a technology, and not as a privilege, and not as something ?? undecipherable.

Any other question?

Q: .. The megawatt power systems, have any governments shown interest in setting up a unit in their countries?

K- You've got to... How I'm going put it... (1:14). Go into the patents. When you open the patents, you see, we introduced light balls, and things, which have no wire connection. Use micro plasma, what you call, power units. This is the thinking of the man, you have to have mega power stations.

You need energy at the point of need. I'm a nuclear engineer, I've been trained to make power stations, to build with the transmission lines, to substations and to the homes. With this new technology there is no need for a power station. There is no need for transmission. There is no need for substation. Now we can produce enough energy at the point of need. This man huge nuclear power stations, these man huge, god knows what, has come to an end. And funny enough, I was sitting in front of one yesterday, we were discussing with our people yesterday in the lab.

Keshe Foundation has developed a system that can be replicated, energy available at the point of need as you need. Micro. We've got a patent on it, we have submitted a patent on

it, micro plasma reactors. Now, are a reality. Today is a reality. Patent was filed nearly 20 years ago. (2:16).

The units are built today. I sat in front of one standing it yesterday, with our Knowledge Seekers. It don't need mega power, blah, blah. We have developed the technology, it needs to be, now that it's fully developed, commercialized. Micro Nano plasma energy unit, which produces current and voltage to the point of the need, now it's a reality in the hands of the Keshe Foundation.

What they tell you, they're trying to build these huge fusion reactors to create the energy of the Sun, to have mega power, it's dead, it's over, it's done with. Because what is needed, is what you need at the time of need. What we submitted as a micro plasma reactors power generators, which is patented, or put in patent application, is the reality today. I can tell you, because we have it. It's developed, it's understood by our team. And it's part of the new Enhancement Units.

Why we had to complete it? Because if you come to the new, the present Enhancement Unit in Linz, you see, we still power some of the controls with the wire, with electricity. (2:18). Our reactors don't really need it, because they're self-sufficient, ?? with the power they produce themselves in it. Now with this new technology, production of the micro plasma reactors, we don't need megawatts. Why do you need to burn? Why do you need to destroy so much things, so much, whatever, to gain, destroy so much, dig up mines to make the transmission lines, the coppers, or whatever, the frames, or whatever, destroy the environment, and then there to bring it in, to produce little tiny electricity that one LED lights, can light up, which uses fraction of a micro of a watt?

Where now, you can create this plasma cosmic ray, miniature reactor, which we patent 20 years ago, and it costs a few cents. Would you not have a distributor box on the table with you plug your, what you call, television, the rest, into this little box, and use ?? all these energies.

MaGrav systems, with the knowledge we have today, we created, are obsolete, and it's sustainable. So as the technology has developed so rapidly, the knowledge has developed so rapidly in past 12 months, there's, our people understand it and develop it to the next stage, that most of the things which is on the table a year ago, are obsolete. You saw it from the size of the reactors inside the Enhancement Unit. To those of you who've been in the system, (2:20). where you've seen what miniature things are hanging around.

Why do we need mega power? Maybe last week, and maybe last month, yes, we could do, we were talking about it. But sitting here, wasting so much energy, going to where we're going, do we need it? Because we put it in the patent in 2005, 2006. Today, that patent is reality.

We have managed to break to get power out of the plasma, without going to hundreds of thousands of degrees, the center of the Sun. Fusion technology as of today is obsolete. I always said, fusion is a dream, which will never come true. But now, interaction of the

plasmatic magnetic field leading to creation of the current as the need of the man, it's a reality and it's in the hand of the KF. We will overview, overlook, we don't need even the way, we sat yesterday in the lab looking at it. We don't even need the gas generators which we told you. Technology has jumped in the past few weeks.

Would we go to the next steps? It's what our people have to understand, to develop the next stage of. This is completion of part of the process of the Keshe Foundation technology. Nano micro reactors are a reality, if you understand how to work with Gans's and the production of it. And we have achieved it.

We haven't achieved it in millivolts, (2:22). in little watts, we've achieved it in what we can multiply to what we like. This is understanding of the technology, this is the development of the next step. Since yesterday, when we.

Don't forget, we set these things up to happen, it hasn't happened accidentally. Our team has been working to set this up for weeks, and now we have technology, we have oscilloscope, we have everything, we have systems, we measure and confirms it. I sat yesterday watching, as it was getting explained what's been achieved. I said yes, the patent micro plasma reactors, what we call, battery is complete.

Do we need to create energy for to lose it down the line? We're now with the cosmic rays to understand it, we can change it. The new energy units are cosmic ray units, what we call, Nano plasma systems. It's been patented, put in patents 18 years ago. Today for what our team has achieved, in what we set out to achieve, we don't see any need for such a position. What you see on the screen, submitted as a patent application in micro plasma reactors, today is a reality. (2:24). And it cost very little to make it. The way I see in the next few years, we can be embedded in any electronics. You can be embed in, what we call, automotive.

Don't forget, European community has passed a legislation by 2035, twelve years from now, thirteen years from now, they cannot sell any car which uses fossil fuel. It means, fuel stations will become a joke, the time of the past. In 2035, 2040, 50, maybe, because they have to allow the cars which are now in this condition, maybe they bring conversions for them. They cannot go to any fuel station anywhere in the EU to tank your fuel, because it's not there. These fuel stations the way we see it, are gone.

But now the plan was to put the power stations outside the city, burn it, or use the Solar System, or whatever, and bring the electricity through cables, to new type of energy fuel stations. With what we have achieved now, today, this is obsolete too. It brings the electron, what we call, energy conversion system of the cars, years ahead. Because we have confirmation, we have systems and we don't have any running, anything.

We produce the condition of cosmic rays, and it gives us that energy of the universe. We just need to convert to what we need. (2:26). I said yesterday, we're done with the (fuel) pumps, because even if you have pumps, it doesn't make any difference. And if we have the pumps we can generate the power internally.

With the science in past few weeks, we developed the new enhancements unit to go to Linz, has leaped by hundreds of years, and it's thanks for the very competent, capable team we have, and they're just working, developing it. I say, I have to keep away from it, because every time I go there I change things, but they have to understand where the change comes from. Even the process of understanding the conversion, they've taken a long time for our people to understand. We are in that process, we have done. The micro plasma reactors are a reality and in the hand of the Keshe Foundation today. Because we literally see it, we have it, we operate within it. Don't look for mega power stations, now I think we're going go into very micro and macro different directions.

Any other question?

Q: .. Will the Ukrainian Russian war be the last war that we humanity have to experience?

K- The war is a habit of man trying to show he's better and stronger. (2:28). This will come with, what we call, understanding of position of our religious leaders. In this Ukraine.

We see a hotspot, there is a possibility of very hotspot, very strong hotspot boiling somewhere, again to do with religious people and religion. That might take its own condition, its own shape. Again, we see collaboration of the religions, under the name of religions, in trying to bring a politic into it, that it can justify it, to sell a weapon.

But, more or less, end of these two religious situations we have in Middle East and in Ukraine, we see the end of a lot of things. You saw the end of the wars, what we saw in Vietnam and we saw in a lot of countries. Peace state now in Somalia, what you call, Saudi Arabia, it's again between the religions, Shias and Sunnis. As usual, others take advantage of ?? it and get in it, because they can make money out of it. But Ukraine, more or less, it will come to the point that, we have seen the end of this ??, these last religious positions, governments will not go into the war, because there's no, even with the war in Ukraine is, we call it a war, but it's a religious conflict. This should soon come to an end one way or another. We will see an end in this situation in Iran, again through religion ?? and the freedom of ?? . (2:30).

Q: Dean .. Thank you for that wonderful explanation of what you've spoken about today. So, this micro plasma reactor, would it carry an emotion?

K- Yes, 100%.

Q: So, Mr. Keshe, I remember you saying once that you could have a reactor in the palm of your hand that could move a planet, reposition a planet.

K- Still applicable, if you understand it, yes.

Q: So, the emotion in mankind and when it manifests in certain ways, it causes conditions that manifests in the physicality as all sorts of problems, and diseases and things. When you turn this system on, will this emotion effect humanity in certain ways?

K- Of course it does. It depends on what the strength ?? of it does, and how you receive it, and what your soul decides to have from it, and what target it has to reach, or achieve, or receive, what is short of. Emotions, as I said before, is not exclusivity of physical dimension. "I made man in the image of myself." (2:32). If physicality has emotion, so the image of it, or reality of it, the STM has emotion too.

Q: I noticed today Mr. Keshe that, as usual, when you were speaking, and you've spoken about before, lots of birds started turning up outside my vicinity where I am right now. And I always know that, you know, that you have a presence, a physical strength, sorry, a field strength, that is present and around us in each and every moment. So, the birds themselves Mr. Keshe, you spoke about, earlier on, you spoke about going to the Sun, and people are needing the energy of the Sun, and taking certain positions around the planet. So would this explain why birds have a migration, and they move from one place to another, are they following this field strength?

K- Partially, yes, partially the way they go for the survival, ?? extension of the soul. Something very interesting is, when the birds fly, we have birds which stay locally, other birds which fly from one continent, one place to another, immigration. They are in the higher altitude. Do they absorb a different field strength? Do they work on the geo cosmic rays?

I'll give you a very, very interesting point, I know the answer, but I'll leave it to you to decide. We have birds on this planet which go from one place to another. (2:34). Do we have the same kind of, like a birds, which travel between galaxies and universes? Bird being free, unconditioned, connection. So, yes they do it.

When you go to places you see and you have done it. A lot of people who use a lot of Gans's see a lot of birds. We had this problem in Inner Mongolia, Wang Lin is here, she can tell you, that when we used the Gans's in the experimental trial, the farmers in the farm were complaining, they never seen so much birds, birds are coming and eating the seeds. Because our harvest was completed days before, the rest of the harvest, which wasn't using the Gans's, so the birds know, they were coming. And after even eating so much, as I said before, we still had an increase in production. They feel the fields. They absorb, they understand. If you put a specific Gans's in your garden, you will see a huge change in bird flow. How they flow, and how they flow in and out they go. You see the change. Because you create a connection. We've seen this many, many times.

Q: So Mr. Keshe, when the seeds, if they go through a plasmatic condition of being in contact with the Gans's, they get a different field strength, they get elevated, (2:36). and then the birds take this elevation, and then they migrate and take it to another position. How does that work?

So, you spoke about birds from the galaxies and universes. Obviously, there will be. How does that happen in a micro to macro?

K- The same.

Q: So, if a soul comes from a galaxy, then comes to a planet, does it become the Totality of the planet? Because it has to become very much smaller, because if a soul can be a galaxy, or a universe, how does it condense itself to then be a planet, or a man, or a cell? How does this operate?

K- It's a dimension of the field compactors, how you compact it, to what size. We, goes back to, I always said, I think it's something, it's one of Rick's favorite things. One atom of hydrogen can cover the whole of the Solar System. It depends what room give it, then what you allow the fields of it to be.

Simple, simple example, and many of us see, you take your plant in one place on this planet, small leaves, and you take it to another position and the leaves grows totally different. Different, giants. This is the same. It's dimension and acceptance of the dimension. That's the main thing. If you accept and live in that dimension.

Would there be creatures in the universe which are highly intelligent, they become travelers of the universe. (2:38). They are, if they come to Earth, the size of the dinosaurs of the past, or they'll be small ?? amoebas, but intellectually very high and more advanced than the human race of today. Depends how you want to condition yourself, or how they want to accept to confirm their existence.

You'll all be facing this very soon, very, very soon. Amazingly very soon. With what is coming up in technology.

Q: That was going to be my next sort of observation Mr. Keshe, was, this always comes around to a position where everybody's going to have to experience this, everybody is going to go through this, if this technology evolves and becomes everything that you've spoken about. So this position will be as one cell in our body, or one cell in the planet, the whole humanity will have to accept and go through this transmutation.

K- It's not acceptance. We make it so available, that it goes through it.

We have brought something very intriguing with all of you, and I've said that before. Any of you who have produced Gans's, any of you, even you produce Gans and you left, the Keshe Foundation, you left it on the shelf, in a very short time it will become part of our process. Any of you who took a sip of Gans's for different reasons, or washed yourself, or it accidentally fell on you, or you dropped it and it touched you, soon you'll understand how you become, you have become part of this process.

You know, I explained that before that, (2:40), a Prince who thought he was a cow and he wanted to be killed, to be slaughtered, and the physician came and put a rope around

his neck and pinned him to the floor, and said, you are too skinny, I have to feed you, till you mature, then I slaughter you, and the guy started eating. Then he says, why do I have this noose around my neck. We are in that stage with the human race. We have put a noose, we have tied you down, we are feeding it, till it becomes wise. We are in that position. Very soon we take the noose off.

Q: Interesting moments to follow, Mr. Keshe.

K- For what I've seen in past few days, in the past few weeks, what is coming out of our development side, I said to our Knowledge Seekers on our team, once I complete the cycle and we go exactly where we want to, because our people have to understand it, and then it's done. We release it freely to humanity. I have enough to live, and I have enough to survive.

But we bring it to be, that's our target, that every man is benefited by it, it doesn't become just the Knowledge Seekers have this knowledge. It has to be the position of every man on this planet. Part of this, where a lot of you helped us, was to set that up. But apparently mankind is not ready for it. It's not time.

The way we did, with teaching you how to make Gans's, teaching you how to make MaGravs and other things, (2:42). We'll make it free for every man to have access to micro plasma systems, to have access to systems which they can elevate their souls. Don't forget, when we talk about a micro plasma, we still look at the electricity, if you can have your power running. When we talk this plasma, micro plasma system, is these cosmic rays that you can use to elevate your soul. You look at the matter side, we look at the essence of the Creation to be elevated. That it can feed the soul, and the soul can feed the physicality, that does not need to kill. ?? and that's why we go in the back of the ATM machines to ?? get the cash ??, that he has everything he needs.

Q: So, will this elevate the planet as well Mr. Keshe?

K- We elevate the universe, forget about the planet.

In a way, it's a recycling garbage machine. Whatever is surplus in the universe, which nobody else needs, we collect them, and make food out of it, for the other souls to elevate. It's part of the work, which is not exclusivity of this time, it's part of Totality.

Don't forget, I keep on going back to it, one day again, one day you will understand. Mitra collected the best, of the best, ?? to make his child. Then this child will send the best of the best, to elevate the Totality of what was collected, from Creator to the Creation and back to the Creator. One day, one day mankind understands what I'm talking about. (2:44).

Q: I'm just looking at the core now Mr. Keshe, on this micro plasma reactor. It's black and white on the screen. A digital representation of all of it, but we can connect with it

with a thought and intention and set the emotion within it. So the physicality, part of it, can then can re-create exactly the technology that you are putting forward to humanity?

K- It's the way, I remember when we drew this up. Dirk worked on this for a long time. That was his dream. He drew, and I said, no it's doesn't go that way, it doesn't represent, because it has to stand all levels.

If you look at that little drawing on the bottom left of this battery, it represents, more or less, if you look at it, what is in the back of the number three, if you understand it, but in a different way. It took about, I think a month or two months, to do this drawing, because it came in stages and stages. But in essence, if you can enlarge it Rick, enlarge the bottom left hand drawing. The right hand drawing, the battery, has a physical dimension to it, because that's what people understand. The bottom left manifest the plasma. If it can be expanded, then you can see it. (2:46).

The Totality of the essence in the layering as a plasma layering, not layering as a matter state, as you have a balls. If you look at it right in the center, it says, plasma. It doesn't say gas. That plasma is, what we call, the essence of the fields of the universe. Now, maybe after 20 years, you see those words and it makes sense, it makes, what we call, understanding of it. This is part of the technology which will be opened up gradually.

Q: Will these reactors, Mr. Keshe, you say you're going to open up to humanity and it's for everybody. So, how are you planning to distribute this?

K- Why should I distribute? We still set up to build the factories for those who cannot do. But structurally a lot of you will do it, copy it.

As I said, (2:48). all the efforts of the Keshe Foundation will go into commercialize, to back Markray Corporation. We have signed an agreement with Markray, and we go through international distribution through Markray International. We are the majority shareholder and we control every aspects of the Markray. Soon we'll go in that direction.

It's very much like Tesla, has a factory in every country in the world, but based in US. We go through the same channel. We'll back Markray to the hilt, but we will not issue anything beyond that, and we allow Markray to become one of the largest corporations on the energy side, food, water and everything else. The majority of the shares of the Markray is owned by Keshe Foundation, which is owned by you lot. I came with nothing, I go with nothing.

Q: So, that's helping humanity physically Mr. Keshe. So, the position of the, you've spoken about it many times, about the elevation of the soul, would this not be an instant reaction from the core?

K- It depends what you need from it. What's your expectation? And that expectation creates a need and absorption.

Q: What is the expectation?

K- Depends on the individual.

Q: From your viewpoint, from your viewpoint?

K- I have no expectation, because somehow things are set to be done. We are just actors in a big theater. When you look at the structure, (2:50). if you understand it the way we understand, hopefully, the scene is set by the Creator and Mitra. Then the rest are actors, they are the, what I call, spectators. How it will change.

This new technology, this understanding will have a profound impact on the whole structure of the operation of lives in the universe. Soon you'll understand.

You waited, and I said, for UFO's to understand how they go. Now people with the UFO's are waiting to see how humanity understood this, and everything they missed it. They tried to get to it. Then you go back to other part of the teaching, as we said, the Cup and the orange, now, the knowledge of energy ?? becomes that orange, and the cup is the Unicose.

Mankind has not understood what gift we have given to him.

Q: ... Why is humanity being handed this gift that the others didn't receive for trillions of years?

K- Ask Mitra, not me. And ask the child of Mitra when the time comes.

Q: Do we ask Mitra through our thoughts?

K- Depends where you look for it. I had one and I kissed one from the day I opened my eyes, (2:52). and understood what it means, loving one. She happened to be my sister. Now we have to deal with it in a different way. It's just a ?? little bit of ?? our knowledge and ?? integrity. ??.

Any other question?

Q: Sun's starting to shine very brightly. Mr. Keshe. Thank you for taking my questions.

K- Thank you very much.

Q: How does mushrooms such as Amanita Muscaria helps or alters human, or other creatures, soul and brain?

K- I do not know. I don't take mushrooms.

Q: ... (2:54). ..

Q: .. Mr. Keshe, on the Satellite. Do I need GPS and elevation as a criteria for the satellite, or the mobile, I'm getting confused now. I'm looking at both systems, the Mobile system, yeah.

K- We will be running a test on the Mobiles. We have set the things up. To set the Mobile up we have a procedure, we have to follow. The first person we are putting through this, we have started the procedure for that, in a very physical way. Then we go back to other Mobile, see how it works, and how we transmute you across.

Q: .. And the Satellite? ... Just wondering how that is, like, (2:56). you know, a group of people connecting together.

K- It's like, what I call, you're in a Zoom call, like now, it's hundreds of you in it. It'll be like. We tested this with Rick a few weeks ago, if you remember. That is a prelude to, and then if you remember, with the session we came live, even many of you were there, we did the transmutation back and forth with. .. We've done a lot of tests, a lot of things is happening.

There is a. We need another 200 satellite people minimum, which we are short of. If we get 200 more people, it makes it easier to operate. We need at least another 50 Mobile people to complete. We need Mobile people who can come to Linz, that we can send out. You Mobile people all think you have to be where you are . We need, as much as we send out, we need too people to bring in.

So, on target, we are short by about 250 volunteers. Then we are short by at least 12 to 14 people, who we can send into space (Moon and Mars). Because these are conditions we have to test on the system, it's not just having it. A lot of you came in, you know we do special tests for certain things. So, in around, about 300 people out of you Knowledge Seekers, we still need. We need at least 50 people in Linz to go out. At least to go out, that we understand the ?? whole. (2:58). We need about 150 people to bring in. We need Satellite people.

Knowledge Seekers suddenly all stopped. They thought, oh, no, you stopped the. When we test, we develop. You a lot stopped. Some Knowledge Seekers came back a second time, third time. We need, especially in next week, two weeks, we need at least these, to be signed in and people to come in. Because when we put the units in Linz, we need them to be tested. It's just not there for the beauty. You understand?

And then we have the Mobile people. We need you, Mobile people, from Linz out, not just to bring in. Can we send somebody to you, to Australia from Linz, and then bring both of you back here? Because we have to do this. The original Mobile system will be done that way, that we have a connection to bring you in. You understand?

So it's a lot of things, Knowledge Seekers said, oh, the tests were done, the first few people came in. Then we had this idiot, 11.11 guy, who came in and went and wrecked up the Italian community, because he didn't get what he wanted .. a thief. He wanted to rob us, to get himself fame, he didn't get it, he went and came up with all the rubbish in Italy, and destroyed the whole Italian community.

We need, we're very straightforward, we don't get it, you don't get it. We don't complete the systems, nobody goes nowhere with it. This aircraft sitting in an aircraft hangar. But,

what we have now, we can't start working on. We need mobile system people who come to Linz in next few weeks, that we can send out. (3:00). We need...

It's a development technology without control from the government. It's us who's developing it.

Q: So, you want say, say myself coming to Linz in your system? Or do I have to fly there 18, 20 hours ...

K- We need a bunch of Europeans who are closer to come to Linz. You understand? Then, when you people who are very far distance in Brazil, in Australia, whatever, we have to bring you in. But we have to start testing how we transmute. You understand?

It's not for me, I can do, but our systems are, our developers have to understand everything which is done, and how it's done, and what it needs to be adjusted. As I said, if you remember, when we started the EU, we started with three helmets, three Head units on either side. Then we went into the Enhancement Unit, and then we went from the left to the right, because as we develop, we kept on changing. To you, you come this time, next time it's the same. But you don't know how much changes were added. From the day one, we started, what we took out, what we put in, some of the reactors changed, some of the Head units changed, some of the connections changed. This all came by you lot coming in to test.

We are more or less, we are short by 200, 250 people to complete, the Satellite people. We need Mobile people come to Linz, that we can send you out, and see how you land, how you feel, can it be done, and then put part of the satellite unit, they'd like to be with you, Antonio, and they come to Linz, (3:02). I want to go to Australia and come back with you. We send, we bring back. Then we bring back on his own. You understand?

And suddenly, everybody started, "oh, they had enough." We have come to the point of literally a halt.

We have a number of people who booked in for Mobile, from all over the world, and they are sitting in their house to come in. We need Mobile people from here, we can send out. We need people with the satellite, that we can connect. We need mobile people in Australia and in Canada, that we can switch you over, we can take you across.

We need people who can go into a space. I was talking to the heads of the Keshe Foundation, a few days ago. They said, can we do a Christmas pack? We always do Christmas pack. I said, yes, do me a Christmas pack for people to do the mobile, and satellite, and the space (Moon). How can we put it together? I said, okay, sell a package for a mobile, a satellite, and a space, for so much. And see how many people will take it up. Because we need it. This year the Christmas pack will come from the Keshe Foundation is not any more to, what you call it, MaGrav systems, this and that. This year package, if they can get it done, it'll be a space unit, because we have to do the EU, it has to be done this week, next week. It's not there for, next year somebody will come.

We don't have it, we don't test it, we don't risk it. We don't go that we don't go to unknown.

We need mobile people inside Linz, to go from one unit to another. Then we can go outside. We don't have mobile people, (3:04). all the mobile people who sign, I don't know how many of you there are, all sitting in your countries. Thank you very much. But we need you, it doesn't matter where you are, to come in to Linz, and we can ship you from one machine to another, to see what it is, what it needs to be adjusted.

They're short. We are short. Suddenly, somehow, Knowledge Seekers all thought, it's done. No, we just started it. We are short by 12 people for the space fight (Moon). There's no use having the machine sitting there doing nothing. We need today at least 250 people for satellite systems, mobile systems, 50 at least, you have to come to Linz for us to test. Otherwise the machines are sitting there idle.

Q: I would love to come, Mr. Keshe.

K- I would love to have people that in next four, or five weeks .. We most probably in December, we start the test. Would we run a Christmas run, that Knowledge Seekers would travel around the world on a Christmas Day, using the Keshe Foundation T? We've done things like this.

Today, we need people to sign in. We are short by 200 people, because we know how many people we need to do the transmutation & transportation from one system to another, check everything, once we take the whole body, not the leg left behind ,and everything else inside the room, because it's one cosmic shell. If it can be done, then we can go outside, then we can go to space.

I said to our team, make a flight package for Christmas, you're selling, what you call it, the, (3:06). whatever we sell in the Shops. Come in, do it. We do a satellite, we do a thing in a package, it has to be done. Don't wait for the Christmas pack. Come in, sign, that we know we can plan. Otherwise it comes to a halt. And then you tell us, oh, we became... Yes.

But we have lost the number of people who come in now for the next cycle of the new systems. We finished with them. All the tests with the present system is finished. We had the last guy, last week. That was, actually I enjoyed the last guy more than any, because it was maturity of everything we wanted to do.

Now we need people to start signing in for December, to start testing the flight systems, the new transmutation system, that we can send you out, to bring you back in. Can we send you out for Christmas to North Pole to see the Santa Klaus, or, what they call it, the Father Christmas? I don't know. We need to.

If we don't get it, we cannot do it. We are short, we are definitely short. Now that we have come to this point, we need Knowledge Seekers to come back in, sign on this week. Because we cannot plan if we don't get it. I was doing a full calculation, because we have

to check on the emotion, what the things move. We need 200 more people into Linz, 50 of them, at least. Europeans to come into Europe, into Linz, and sign in. Maybe we do a, God knows, a Christmas trial. We've done that before, and see on a Christmas day, if I remember Dr. Kostova, and the Germans, and the Canadians we needed to stop our system, (3:08). maybe now we can transmute people for Christmas. In a beautiful day.

It has to be done, otherwise the technology comes to a halt. Literally, comes to a halt. Because if we don't test, we don't know. If you're Germans, if you're French, if you're Italian, if you're Swedish, whatever. This week, today, sign in, because we need it. Now, what I've seen in the lab, we need to do it.

I mean, put it this way, we can put out people with cancer, and with Alzheimer's to go to the German, and test it there, it'll be hundreds. But we need this to be done, this needs to be done. So, we say, if you have a Parkinson you get the flights package, what you call it, free. If you go to the clinic in Germany and you pay tens of thousands of euros for it, and if they can accept you. Don't work that way. You understand? We need to do it, we've got to be directly in what it is. We are short. We are short about 200, 250 volunteers, on 50, definitely, from Linz has to go out. Fly in, come in, sign into, don't sign in tomorrow, I'll think about it.

We have come this far, we have to complete it. Then we need the other 200 satellites we are short of. If we cannot cover, we cannot reach you. Because, I will map up the Earth with wherever the Satellites are. Then we might come to you and says, we need people in Iceland, we need people in South America in this position, (3:10). because the network has to be fixed.

Thank you very much for bringing this up. Because I didn't know how to put it out. As I said, the souls know what to bring out, to come out. We need, if you're a knowledge seeker, and we have discussed it with the, what you call it, with the team here. This year, Christmas package has to be the Satellites and Mobile systems. We are short of 12 people for space, and I know why we're short by 12, and where we're going and what we're going to do. I know there's the charge of this heavily, heavy 25,000 per head. But we still can do. We already have volunteers, but we have to complete it.

Q: So, for that you still, you'd have to come into Linz, would you?

K- We try not to, because by that time we have completed the satellites and the mobiles. By that time we should have no problem.

One of the beautiful things with this will be, is that, we can send an Israeli from Tel Aviv, we can send an Iranian from Tehran, we can send a Chinese from Beijing, we can send an American from wherever, a Mexican, a Brazilian and an African as a team of six or 10 to Moon. You understand? And see how they land, how they interact in the soul level. (3:12). How would the Universal Community accept man in such immigration?

People don't understand what is involved in this new space development. It's not anymore, if you can take off from America, land with the "seat of your pants" in Europe. It's, scientific it has to be done in the correct way, it has to be laid out.

We, our team of developing is there, but we know what need to do to complete the transmutation & transportation. Would it succeed? How would it succeed? How the last people we had, the Germans and the French guy, how did the French guy could feel the German pushing him off the chair. Now, in the next system, can we make you physically this, they could share a chair together?

We had a test case, they know, the Knowledge Seekers, we had to sit the 2 on the lap of each other in one system, as I explained, to see how it will be, what we call, like beautiful people, with two souls as one body in the system. Would the system recognize the difference? We need this to be done, and it cannot be done by imagination.

If you cannot come, you're in Brazil, you're in whatever, you can tell us. I'll pay for somebody. Keshe Foundation will find a lot of volunteers, there are a lot of people who want to do this, but financially cannot afford it. We have enough people in Europe to fill up for 10 years, but financially they can't afford. If you can afford it, (say), I'll give for 2 people, 3 people to come and one of them comes and picks me up, back from Australia. It'll be done.

But we need it to be done this week, next week, because this is something now we're getting to that point of getting it done. (3:14). I was discussing with the Keshe Foundation, the promotion this year, if you do a Christmas promotion, do the packages of space flight, mobile people and the rest of it.

... Let me explain something, some people have sponsored the Universal Council members to come in on the sixth of December, if I'm correct. Sixth of December is Saint Nicholas day. It's the birth of the child of Mitra. And it's there to be, to sit, to watch, and see what we can do. Can we transmute the soul of the, what I call, Universal Council members as, what we call, the soul of Mitra across this planet by that time? Will we be ready for it?

We need this, and thank you very much for bring it up, we need this support, we need this physical support of you in the Linz center, that we can start. We have to test from one machine to another, from the other machine. At the moment the machines are one way traffic, in one of them. The new system is a four way traffic, so two chairs in each unit, and each one can be crossed from one unit to another, receiver and sender. We can see if we can position directly to one chair, or directly to another chair. You understand? Then we can position you on Moon together from one system. Now we can land you in different places.

We need. Actually it's a very desperate condition, (3:16). if we cannot test with people in Linz, in this December, we come to a part of a halt, and random bringing mobile people across. We thought the Knowledge Seekers would carry on doing it, and somehow it

came to stop. That was good, because the new system is finished, the old system is finished. The new system we need physically people. All the Italians, Germans who've been once, will be the best volunteers to come back.

Q: I'm Italian, but I hope not to give you any trouble.

K- No problem.

Q: When I say Italian, I'm an Australian, so.

K- You're an Australian Italian.

But we need this to be done. Especially, I ask the German, the Swiss, the French, the Spanish, the British to get signed in and done this week, today, tomorrow. Because we have to plan it and it has to be done. Otherwise we come to, we come literally to a halt, if you cannot test it ??.

Q: Well, I'm booked in. So, the only thing is the spaceflight, that's probably out of my reach at the moment.

K- Spaceflight we need people with a specific characteristics. I mean, the first couple are best for it. They're well experienced, they know each other very well. We can do a lot of pre-testing and then testing of this, and it will be done from Linz anyway.

Any other question? (3:18).

Q: .. Is it possible that the Foundation's teachings are being transmitted in another dimension than the one we are simultaneously living in?

K- We always said from the beginning, when we teach, we don't teach only to the man. Teaching is done at the level of the soul, from the beginning. You'll hear it in the voice of the man, but the others understand, the way as you dream, and go somewhere, they listen through ?? the ear to the elevation of the soul of knowledge.

It's not exclusivity of man, this time we are not making anymore, what you call it, teaching only one Ayatollahs, and one religion, and then they become dominant. It's for everyone.

Q: .. If a plasma needs to have at least two M fields to create, to be created, (3:20). does that mean that there are two creators? And if so, does the Creator have a partner too?

K- Called, Mitra.

K- If you don't have any questions, we'll call it a day. Let's see what we can gather and what we can bring in. Let's see what we'll lead up to next week, and how we progress in the knowledge and technology.

Something to do. If you, because this goes back to our doctors in Germany. If you like to be processed through, especially Parkinson, Alzheimer's. Parkinson is a very specific things which the Foundation is supporting the doctors. It's because it's both in the level of

the Soul, and manifests itself in the physicality, in a direct way we can see it. Please contact Keshe Foundation. They have charges that has to be met. But we need another, maybe 20, 25 people with the Parkinson's, for them to complete their process. There's a reason for it, because there are different aspects of the Parkinson. They have tested and they have a success with it. We need to go through this and then hopefully, we're still sorting out, what we call, our position with the Italian clinics in next few days.

Any other question? Or shall we call the day? (3:22).

Q: Dean, ... So, after what you've just said, what you've just spoken about. If this position takes place, and you get enough souls or you get people to come in to the center. Will this have a direct emotional effect upon humanity? Will it? How will it develop?

K- What? which position

Q: If this position takes place, which you get enough people to come forward over Christmas, how will this affect the emotion of humanity? How will this ?? reposition?

K- The reposition is, it brings different confidences to the society. People see a different angle to life. Will change overnight the whole, what we call, persona of life on this planet. You've got to remember, you personally will be there seeing one going from one to another unit, and recording it and broadcasting it.

When people see with their own eyes, they don't need any more flights. They don't have to be shackled by governments, and be shot on the street, because they want to be out on the street. We saw it in Germany, with the East and West with the walls and mines between the two parts of a city, where they can just move along and nobody can know, whatever.

Once people see it physically the first time, it will change everything. It will touch every being on this planet. Freedom of soul, freedom of physicality. Yes, it will do. As the man who broadcast everything live from the center, you will be instrumental in it. (3:24).

Q: ... So, this will end the war? Not in the physicality, end the war...

K- This will end a lot of things. This will end... Once we can show man can travel and be transmuted, the way what we planned. We're hoping to be successful, we are hoping it will be done. Once we show it, do you think the pressure on the governments to finish the airports, we got the pressure in EU, will drop the pressure in EU.

A lot of things will change beyond imagination. Will there be a war? Would you sit in somewhere, and to be waiting for a bullet to come? Or will you change the soul of the bullet? Go back to some of the teachings years ago I gave, about how we'll let the nuclear warheads in the silos, to be in there own silos. They'll never leave. Now, maybe you understand how. We are not going to change the soul of the missile, we will change the soul of the man who pushes that button, so he will not push, he will not do it.

Once you can visually show what... You've interviewed a lot of people coming out of that room in the past two, three months. And you see the emotions they come in. I've seen the emotion you show to them, how they trigger you, in what they tell, and what they went through. Now humanity will see no shackles of borders. When we can bring live, people from different corner of this planet to here. And we can send from here to different corner of the planet, and within seconds. (3:26).

I said to the American people when we met in Brussels. I said, gives us one thing in Tehran, and we'll deliver it to Washington in the White House within seconds. They laughed. That's 14 years ago, no, 10 years, 12 years, in 2011 when we met. Exactly 17th of November, exactly eleven years ago. This is not something new, which we just come up with, that will do that. I said to the American delegation in the café, when we met in the restaurant, talking about handing over the Key. I said, give us something in Tehran, and within seconds we'll give it to you in Washington, you can check it's what we sent.

Now it's a reality. How would our government see what you as Mr. Dean Butler, broadcast live one person moving from one unit to another? Then what would be the reaction in December and January, when we start shipping people from different parts of the world and sending from here out.

It's evolution in the science, it's not a magic. So, you'll have a ?? . Man will feel free from the shackles of restriction of everything. Would you like to live in camps, which you have to look for food and everything else as a refugee? Or you'll be free in the city to walk, and you can move from one place to another? (3:28).

There's a very big strange, I go through, I see it more or less every week. It is amazing if you understand the consequences of this, what I'm going to explain to you. What we see as refugees over the past years coming from Iran, Syria, Libya, and Iraq and the rest of it. People with no clothing walking the human path, poor. They come here going into the refugee camps for years to be given a piece of paper, that they can come out of their camp. Having good, cannot do anything, because they are not given this, and then there's always fear of, I can't work, I can't do anything.

We see a new type of refugees called, Ukrainian. The Ukrainians in Europe, now they come with a top model cars, they stay in the most expensive hotels, they eat in the most expensive restaurants, and they are still refugees. We see Syrian, and Iraqi, and Kurd refugees walking on a pavement, because they cannot do anything. They have enough just given to them to survive, and in the restaurants across, in the most expensive French restaurants in Vienna, Ukrainian refugees.

Is this correct? I've never seen so many top brand cars being driven by refugees. BMW, Mercedes, and god knows what, in Europe. (3:30). Do we need to have the status? Do we need to keep them in camps, and the other refugees are paid to live in the most luxurious hotels in Europe? Because they know and they have influence to get it, as refugees.

We see today what they call it, become refugees, exports of every aircraft possible into Iran, that the families of the rich Ayatollahs are taken out of Tehran in case the regime changes. Billionaire refugees, under the name of religion, and there are Iranians who have no food to eat, and they have to wait for handouts in the refugee camps. Who would you give this technology to? To return those who escaped by killing, back to Iran, to be put on the judgment of the system? Or would you free those who are in the shackles of the refugee camps, give them the freedom of the whole planet. I go with the second one. The first one, the others will sort out.

At the moment, you cannot get any aircraft into Iran. But somehow these people are getting aircrafts into Iran in the most private airports, and putting their families with all the jewels into it. In case regime changes, we are out. ?? Excess of billions of dollars on the back of the same as the Ukrainian refugees. A lot of you in Europe, you will start seeing a lot of Ayatollahs on the street. They might change their clothes.

So what do we do? How do we do it? We have to bring the change. (3:32). When I can take hundreds and thousands of people in political prisons, into the other countries, which they are welcome to be free, which one would you help? Should the woman who wears, to be free, imprisoned and raped, and then a bullet into the head in the name of? I will go for freeing those from, with these systems.

That's why we want to test so fast. You do not understand what we see. I saw a video sent to me, I get huge amount of videos sent out of Iran, and some of them is devastating. The man getting beaten up by 50, 100 police officers on the floor, and still getting beaten up, and one says, move aside, I'm going shoot him. The guy on the floor, and he gets shot. I thought it was a plastic bullet, I had to freeze the picture, and you see the fire coming out of the bullet, out of the barrel.

Q: .. Mr. Keshe, what you just spoken about. That's bringing forward many things. The image on the screen reflects a different reality. Do we do we need to go into that reality? I know, I'm sure it exists, do we need...

K- Which reality? The reality is there, of course. If we don't express it, how people will know? How would you, how... Why do you shoot a man, tell the other man, move aside, I want to shoot him. And the man who's been beaten by 50 hooligans, in the name of the police, and then we shot. You don't do that to animals let alone people.

We take the love of God from the Islam and the turbans, (3:34). which they wear. In the name of Muhammad, bless his name, abusing humanity.

Q: So Mr. Keshe, this transmutation will end this? Will, ?? change...

K- It has to. It has to be, that's why we are pushing. We need to do the transmutation. It's not just Iran, it's many places around the world. Suppression of man has to stop, and this technology, for the first time, allows it.

What happen when you use the place, the position of your brother, your sister, your friend, your family and somebody you don't know, who is put into shackles in prison somewhere, because he wants the freedom? They can go to the prison, and he's not there. We have removed him.

This is not the theory anymore, it's the reality of the technology. It is .. what we have in hand, and the Keshe Foundation is the only scientific organization. We are not doing it by moving souls and whatever. Technology is there to do. If we can send the man to the Moon on a given position, and we can bring you out from Australia to here, we have the same knowledge to free many political prisoners, which are there, wanting freedom for themselves, and their family, and their nation.

I will not fight with the bullet, I .. deliver the technology, what, they don't have anything to fight with. It doesn't matter where you go. A man has to be free, and we have the knowledge to do it. We don't need to march on the street to be shoot at. (3:36). We need to march the Space of the Universe to enjoy.

If Christ could get himself off the cross, the knowledge is here to get every man, which has been put on the shackles, and get beaten up, young girls at the age of 14, 15, get raped, and then because they cannot shoot a virgin girl, they cannot kill but, godforsaken, in the name of which religion, and then they rape them, and then they can shoot them, because ... they went on the street, they want freedom.

Our job with this technology is to take them out. Then the same to bring their leaders in to justice. And we need to complete the Enhancement Units. It's not just for flights, there's more behind it. Political prisoners, abused prisoners, those in psychiatric hospitals shackled, as "beautiful people."

Q: So, for the love Mr. Keshe, so from the love of the Knowledge Seekers and the people that come into the Center, this can then be for the love of all, to free all?

K- Yes. It has to be done. We are at the verge of a breakthrough in science. And we have proven, it is not theory. You've been there, you've seen it.

Q: Yeah, I felt the fields there Mr. Keshe, many times.

K- For love of God, why a man with no sense, and turban, call himself an Ayatollah, allows others to be killed, for him to be powered over others. (3:38). Muhammad said, don't touch Iran, they're already religious, they already have the religion of themselves. Why makes a man of turban to kill more Iranian, then the name of the same religion?

We take the love of God from your names of Ayatollahs, let alone your children.

We need to complete, we need to complete this Enhancement Unit as fast as possible, to be able to do. It's not just for you to go from one unit to another. It'll bring a new dimension of freedom. No man can abuse another man. No man can put a 14 year old on

the bed to be raped by 10 Sepah and Revolutionary Guards, because she's virgin, she cannot be killed, then they put a bullet in her head.

It's not just women, and be free, it's humanity has to be free from the shackles of these ?? others. And now we have a technology to do it.

Q: ... You brought some, one topic here, and unfortunately you said it only one time. So, can you please open a little bit more, and that is, the aura of the man?

K- The aura of the man is the interaction of the fields of the gases, (3:40). of the body of the man, with his environment. Up to now we didn't know what aura is. Now we know that the body of man is made up Gans's, it's a dynamic plasma. So, in the interaction with each other, and the atmosphere like the Earth and the Sun, create a field interaction, ?? with body, we call it aura.

So, now we know this. Now we can interact with this aura, and allow what goes in and what comes out. We can feed the cells of the body of the Man through the aura. But this is too complicated. You can work through the Soul, or feed the soul, and the soul, which lead to the creation of these Gans's and their position, what we call, kidney or whatever, let that do it. Instead of dealing with millions of cells, and with rays, you feed one station, which has control over the rest. And that's why we feed through the soul. And that Soul feeding creates a different aura. Man will see a different aura once he start feeding through the soul, than trying to interact with, at the moment, as you see, the interaction of the fields.

Let me explain to you something very, maybe some of you will understand. When you deal with the soul of the Prophet, when you deal with the. What you see people, the holy people, in a white or golden color. It's not their body anymore, you're actually interacting with the field of their soul, because that's what we do in the system. We embedment (embed) it in, because it's the soul which interacts.

This is why I always said, in Universal Council members will be known by their soul, because they shine. That, in that position, as the Prophet of the past. (3:42). And we'll see it. You will feel it, you'll understand it.

So when we talk about the aura, we talk the aura of the soul, or we talk about aura of physicality? If you see a light around the man, as embedded in it, you see the light of his soul.

This is what we said in the systems, people say they feel they're in a cocoon, because the soul has expanded, but it hasn't become to be interacted with his environment. But still it exists. It is because, within the man looking inside from himself, it's not from outside to look in. And when you see the man walking, we all have an aura.

Take the clothes, touch to a skin and you see the other one feels, because that's the interaction of the aura, the fields of it. Because you never knew our body is made of Gans's, plasma dynamic. That's all.

Q: And this is the line of communication?

K- Yes, it can be. How do you touch your child, and she feels love? How do we as parents, we caress our children on the head, and they feel the emotion of the love we give them. How many times, which of them have come and asked you, papa can I have a cuddle. You don't feed them, you transfer energy through his fields.

Q: And this is what we need to do, even with the Gans's, without even touching the Gans's?

K- (3:44). Thank you very much. Rick, let's call it a day.

Q: .. if the mobile test needs a visa?

K- It has to be. It has to be the authorization of your government. Yes. Has to be. We are not breaking laws. We have actually drafted the letters to go to the Austrian Foreign Office and foreign secretary, for this purpose to switch. Because when we are ready, we can't say, we wait. When we are ready, now we are ready to go, documentations all started.

Thank you very much, Rick.

458 KSW November 10, 2022.
