

Reincarnation Does Not Exist - Scientifically

Excerpt Starting 2:06, from 465 KSW, 2022 12 29 ;

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

In the 465 KSW Mr. Keshe taught about reincarnation in a much deeper and scientific way than ever before. Perhaps this is to prepare us for the upcoming transmutations, which in a way, is similar to reincarnation. This discussion is just to help organize in our head some of the teachings that he has given us over the years. The main teaching is from the 465 KSW and you'll find the summary and English transcription below. Other teachings will be just from memory.

In the history of mankind, our knowledge of reincarnation was never taught scientifically, because mankind did not have the basis to understand it, like genetics, RNA, and DNA for instance. With this knowledge we understand better how tendencies and traits from our ancestors get passed down to us. But in the West the extent of what Christians were taught to believe by the Churches was that you are born, you live one life, you die and are judged, which will then determine whether you go to eternal heaven or hell. Nobody really had the capacity to take this any further.

And when atheism and materialism took over society, they basically only added that when you die, you die and that's it, no heaven or hell. There really is no room here for much scientific discussion, because the Knowledge of the Creation is too limited. So more intelligent people who knew in their hearts, that there is much more to life than what they have been taught, went off to the East and borrowed their philosophies, like that of reincarnation and continually being reborn until you get it right. Then one day you go beyond birth and death to eternal life in the Universe. To a Western mind this sounds much better, but there are also many inherent problems with this philosophy too. For one thing, it leads to stagnation in spiritual development and people say, "oh, I don't need to worry about that, I will just be reborn again and one day I will get it." There is no doubt that a higher knowledge is needed and that's where things have changed for us today.

What we have learned from KF plasma science is that what we call our Soul, or the Soul of the Man (STM) is created from the divisions of the original M field, that came from the Creator. So in essence we are always connected to our Source. This is a huge step for mankind, who has been taught in different ways, that he doesn't have a Soul and is separated from his Creator. This changed on December 16, 2022 when 160 people connected their Souls together as one and met the Soul of the Creator, which was shown on physical instruments of the man.

But how did this happen? The Man we know today is born from the physical interaction of his parents, that led to creation of his Soul, which then got trapped in the physicality of

the brain and is imprisoned through the M fields of the blood. Man believes, that the only way he can be born is through the physical interaction of his mother and father. He doesn't know, that the essence of the sperm and egg, are actually M fields whose interactions lead to the creation of a plasma called the STM. The STM is a new creation, but it is not yet independent. He goes through the process of maturing through the life experiences with the Soul of the Physicality (STP) and the physicality (P), and at the point of maturity, or what we call death, the STP gives all its energies to the STM to take birth, then it becomes independent and finds its place in the U according to its field strength. The STM and STP have the responsibility of correct conduct of the P, and this is one of the ways it gathers strength to find its place in the U. Or if it conducts itself in a negative way, then it will become a dust or a cell of something else.

So where would reincarnation come in? Now if a Soul would want to come back to Earth, or live again here, there are different ways that this could be done. They could join another Soul that already exists, or create a human body or what appears to be a human body, or maybe the Soul can implant itself in a womb as a plasma, and begin the process of developing a human body over 9 months, or other ways we don't know about. When Mr. Keshe says, that reincarnation doesn't exist, I take it to mean, that the process of creating a Soul happens once, and then it goes through its life in the U until, it returns back to the Creator. So in a way the Christian Fathers were not totally wrong. It all depends on what we understand about things and how deep our knowledge of Creation goes. This is the beauty of the Creation, its an endless journey of self-discovery.

So really, life is a flow of M fields, like a river, as they say, you never step into the same river twice. The second time, all the conditions have changed, though it may appear like a repetition, it's not exactly the same. Life may copy itself, but it doesn't repeat itself, it's always here and now. The person who says, I was "so and so" in a past life has stopped the river, or they believe they have stopped the river of life. The biggest point is not that I was the physical being, which of course is impossible, but what matter is the essence of the emotion and energy that gets passed on from that experience, and helps Creation grow and learn. It adds to God's experience, which is Mitra, to the love of sharing life and spreading it.

The science behind how emotion is transferred through the RNA is beautifully seen in the example of music and how it is spread around the world. A person gets inspired and develops his emotion that he can transfer it to sounds, then he records the original and passes it on to others, who in turn record again pass it on to others until it spreads throughout the whole world. When you have a recording of it, that is the information in RNA, but you still have to play it through the apparatus of your brain, which is here and now, and not in the past, and because of all the present conditions, it's actually a new recording of the old information. So how can you say, "I was the person who created this music?" Instead you could say, "my Soul was present when this music got created." (It is impossible to be that body, because it got destroyed like the original recording. All that is left is the energy or field of that memory).

When you really ponder this and wonder how it fits into your life. It suddenly dawns, what is the point of being egotistical and thinking I am "so and so," when in reality you understand, that we all share the same access to the same RNA, and it's all about how we experience, create, share and expand the love, which are the M fields of the Creator, or should we say the Cosmic Rays. It ends where it began in the love. Not the love in the sense that I got what I wanted. But the love of being and knowing that is connected to the Source, and wants to give to others, so that they grow, share, and expand.

The present concepts we have about reincarnation were never fully understood, and then got used to control the man through the religions. It's time for us to expand these ideas, so that it will be easy for us to transmute, because we will understand about energy and not a physical body at some point in time. After thousands of years of darkness, Mr. Keshe has lit a match of knowledge, and freed us from the bonds of limited understanding.

You can read in the following Quick Index in more details about the teachings on reincarnation. It also has been discussed in the Introduction to 465 KSW. You can also search all the transcripts of the past teachings. Recently, Mr. Keshe said that the Soul of the Prophet was not born as Jesus, it was added latter. Many years ago somebody was asking him about who he was and about the different souls. I remember him saying, "they merged." At that time KS didn't have enough knowledge to expand the question. Did he mean that the STM of Mr. Keshe, the man, merged with the Messenger? In another place he said that plasmas keep their boundaries. Maybe it has something to do with clusters of plasmas as they can exist in Cosmic Rays. There is so much to learn.

Thank you for listening.

Excerpts from 465 KSW December 29, 2022

Quick Index 465 KSW

Q: (A KS was trying to understand what Mr. Keshe meant by saying, that those who came to the 16th, did so because their ancestors served humanity in some way. He was trying to connect it with reincarnation and the work done with hypnotherapy. Or as a result of what they call, "good karma" for what good deeds you did in the past).

(Mr. Keshe answered in a way that clearly states that "reincarnation" the way the people believe about it, does not exist. That just because you may have memories of people from the past, does not mean that you were those people in a past life. Rather, the field strength of your ancestors actions, or the energy information is still being carried through your RNA. These tendencies are manifesting in you, because you have a matching field strength to them. (Human Souls are created for the first time on this planet from the love and interaction of the fields of the Souls of your father and mother. The physicality needs

9 months to mature to take birth. The STM matures during ones life time, and at the point of separation from physicality, in a way, takes birth. The STM is already formed in the person, but it is gathering field strength to mature so that it can exist in the Universe on its own. Enlightenment can occur before the death process of physicality. How another soul attaches itself to the human soul has not be fully clarified. For example, with the Prophets. But reincarnation the way people believe and talk about it, does not exist, according to the Knowledge of the Universe)).

K- (What happened on the 16th has many things involved in. But it is not that you did something good in the past, and now you are the reincarnation of somebody else. You are a collection of the RNA and DNA of the lives, lived in the past, that led to your creation. It's like when you say that you inherited a particular disease genetically through your genes. The genes are included in the RNA, and there is no DNA without RNA. RNA is the M field information, that through the DNA, leads to (the creation of) your physicality).

(So, it's not that you are your ancestors, or they are with you. Rather, you, as the person you are now, carries the reflection of what they have done on the level of energy. It doesn't matter whether it was on the 16th or any other time and place).

(When you experience things from past times, it does not mean that you lived other lives. (All the actions and interactions from your past (through your ancestors) has led to your creation, and you carry them forward with you). They are part of you. (At the time and place you are created they come with you). You are not reincarnated, that does not exist. It cannot exist).

(Let me explain it in an easier way. For example, you record a piece of music on a gramophone and then you play it to 10, 100, or a thousand people. And then those people record and play the same music to another 10, or a hundred people. Now it just happens that by accident the original recording gets destroyed. What was already recorded and given to the others still carries on. Even though the original recording is no longer available the music is heard by many down the line, and for many generations. Then you say, this was the music my grandfather used to listen to, but the original recording doesn't exist anymore. The same way, that the music is carried down through the generations, so it is with the genes).

(When a man does a good deed it is spread out through his bloodline, and not just for him. The children, grandchildren, and the great grandchildren all carry that knowledge. And maybe one of his descendents down the line finds the original recording, but the original recorder will not be there).

(This is how your Soul works, and how you reflect the work of your ancestors. You do not have the original recording, but you have the essence energy of the original piece of music your great grandfather recorded).

(This is the same with your RNA and DNA. You are a reflection of what he originally recorded, in the strength of his RNA. You have that information, but you don't have the original. You are not the great grandfather (reincarnated). And you are not the recorder).

(This is how the Souls pass down the energy of what they did in their life through the RNA. It goes down through the generations. You were created from your mother and father, that's two recordings. Then maybe they had 4 children whom they passed their fields on to. And the parents were also part of other fields of their parents. At the day of your inception you carry all that information in the memory bank of your genes. You carry whatever each one came in touch with, or had emotions about).

(The STM goes back thousands of generations, and you have all these recordings in your Soul. Maybe 200 generations ago one of your ancestors had to tackle a bear in the North Pole. Let's say he lost an arm, because he did a wrong move. That wrong move got recorded on his emotion, and on his RNA and has been passed down through his offspring's. Now if anybody in his bloodline sees a bear, they run like a rabbit. Whereas, another man from that same generation in the North Pole came across a bear, but instead he fed it, and they became friends. Now when one of his bloodline sees a bear, they have no fear and hug the bear. So it depends on what's been recorded on the recorder, and what was passed down through the RNA and DNA). This is what you have to understand.

<<< Speaks in Portuguese Language >>> (2:06).

Q: .. So what Cristiano say first, he says, (2:08). thank you very much Mr. Keshe for all the love and knowledge that you give to us all these years. He's connecting his question with something that just said today regarding the people who went through the flight test on the 16th, many of people who were there in the 16th came, because of the of their ancestors who did some serving, and did some good works in the past. So, he was trying to connect this with the hypnotherapy. And in these therapies, in hypnotherapy or something, they say that you lived other lives before. And he's asking, if I understood correctly, if those people, that you were in the past, you are coming back. You did that good deeds in the past, and now you're coming on the 16th through the good deeds that maybe you yourself did, and are coming on the 16th as, let's say, like a reward of something good that you did in the past or something like this. Was that clear Mr. Keshe?

K- The situation with the 16th is part of everything involved in. And it's not the reincarnation of somebody, you did something good in the past. You are a collection of the RNA and DNA of the past lives, which led to your creation. You call it, or they say that you inherited this disease genetically through your genes. So you now understand the genes are included RNA, (2:10). without RNA there is no DNA. And RNA is, what you call it, magnetic field of the information, which leads in dimension of physicality through the DNA.

So, it's not that your ancestors are with you. You carry the reflection of what they've done in the energy level, at the time of the present. It doesn't matter in the 16th or any other position you like. This is what it is.

It's not that you lived other life. No, you brought part of the actions and interactions, which lead to your creation, which is part of you, to be understood at the time, and the place and position. You are not reincarnated, it does not exist, cannot exist.

But the, what you call, the... I explain it in the easiest way. You have a recorder and you record a music. Then you play this music to ten, twenty, hundred, a thousand people. Then they play the same music to another ten, twenty, a hundred people. But the original recorder breaks down, gets destroyed by accident, or whatever. But what was recorded by the others, and given to the others, and given to the others recording, is .. still carries on. (2:12). So the recorder is destroyed, but the music is heard by many down the line, maybe for generations. This is the music my grandfather used to listen to, but the "grammaphone" (recorder) doesn't exist anymore. He actually was listening to it.

My father had tape recorders, and my grandfather recorded on that, and then my father had a stereo system, and a CD recorded, and my time it's just on the headset, and I'd give it back to my children, this is the music, that your great grandfather enjoyed. But god knows what they're going to record it on. The physicality of the original recorder is gone. But the music is carried on down the generation. It's the same with the genes.

The man who did a good deed, his good deed has spread through his bloodline, not just one. So, the children, the great grandchildren, and children, and the great grandchildren carry that knowledge. And maybe one of these grandchildren down the line, or great grandchildren comes to find the original recording, but the recorder is not there.

Now you understand how your Soul works, how you reflect the work of your ancestors. You don't have the original recording, you don't. It's not the ancestor to show which button he show, he pressed, where he bought the recorder from, or whatever. It is just a music which is played, it was recorded generations back.

And this is the same with your RNA and DNA. (2:14). What you see, what you say, is a reflection of what they, in their strength of RNA, recorded in the disk. You have that information, but you don't have the original. You are not the great grandfather. You are not the recorder.

This is how the Souls when they present in the recording of the Soul is the RNA recording of the life, and generation and creation. You have to understand, when you were created, you had a mother and a father, that's two recordings. Then they had four or five children, which they've shared that. But your father and mother are children to their .. mother and father, your grandfather and (grand)mother, with many children.

So now you carry the memory bank of the gene of your father through the day of your inception. You have now the recording of the 4 grandfathers and mothers, and then 8

great grandfathers and grandmothers and all the siblings, whatever they're in touch with each other, or had the emotion in respect to each other.

So you see, the STM goes back a thousand generations, two thousand generations, you have all this recordings in your Soul. How two hundred generations before your ancestor had to tackle a bear, in the North Pole. And he lost an arm, because he did the wrong move, (2:16). and that wrong move was recorded on his emotion, on his RNA. And down the line, any of the bloodline sees a bear, runs like a rabbit.

Other man in the North Pole came across a bear, fed it, they became friends, and a thousand generations before, and this bloodline when they sees a bear, they hug them, they have no fear of them. It depends what's recorded on the recorder, and what was passed on the RNA and DNA. This is what you have to understand.
