

Introduction to 466 KSW

2023 Year of Change; CPCU introduced; Effect of stars; Electricity; Judgmental; STM & Soul of Prophets – Merge

Note: Not checked by KF interpretation by KS of KF Brazil

A lot of different topics were discussed in this first KSW of 2023 - which is the year of the Change. The transmutation of the Soul of the Man (STM) has already successfully been achieved, and the next step is to transmute the physicality (P). This should happen in a week or so, as the work of adding the Cosmic Rays (CR) to the units is getting completed. The CR addition to the systems is very important as it allows us to transmute the whole package of the STM, STP, and P without interference from outside fields. Up to now there was a fear, that matching fields from outside could interfere with the transmutation process. But now with the higher level CR this will not be able to happen.

There are different threads of topics in this workshop. The next important one was that as we become travelers of the Universe (U) we need to understand how plasmas like planets, stars, and others are plasmatic entities, and their MG fields interact and effects us both physically and emotionally. Our scientists never considered this seriously before. The U is like a huge ocean and we are all floating around in it together, so our MG fields effect each other. Now we have a deeper true science that can help us understand the process of these field interactions, and to protect ourselves as we become the new traveler of space. When we go into certain areas these fields can become germs and diseases to us. This will open up a whole new area of study and research in the future.

Many people who went to Linz already experienced the power of the Headset units. With the work on CR, these head units have evolved into the new CPCU's (Cosmic ray Plasma Communication Units), and they will be released soon. With these new Headsets your Soul, emotion, and knowledge cannot be interfered with. The CPCU will allow you to tap into the Knowledge of the Universe. In the beginning the distribution will be controlled and further developed. When someone sees you with one of these units on, they will worry that you will know what they are thinking. But it's not just information, the emotion is also transferred. With these units we won't need mobile phones anymore, and you can connect to be fed the energy you need instead of killing to survive. Soon all the things we have become dependent on like Apple computers, satellites, Google to get information will all become obsolete. We'll have access to direct knowledge immediately. If you think about Mars you'll feel the emotion of being there instantly. Many aspects of this T were confirmed during the tests on December 16 and 19. But the whole purpose of all of these things is to make "One Man" out of humanity - this was achieved when we came in touch with the Soul of the Creator. None have yet understood what gift was given humanity on December 16, 2022.

For thousands of years man missed the knowledge that was in front of him, because he did not pay attention, and then he ended up getting abused by those who did pay attention

and they became the "Elites." But the new T changes all this. By end of 2023 we hope that many Knowledge Seekers will travel across U and come back and share their experiences. The year 2023 is the opening of the space and the Universe to the Man. And the Universal Community will come to the man to learn the Knowledge of the Universe. A "Plasma Revolution" on an industrial scale is upon us this year. We'll deliver every inch of it step by step. Everything has been made, and the Souls are ready. I hope those of you who worked with us will start enjoying the fruits of your work. Together we'll achieve what has been promised. And those who have been sitting on the sidelines will also benefit, because the T will be shared by the whole society.

For those who are working with their MaGravs, there were some more hints. Electrical energy is made of the same M fields as plasma, but it is a step lower in field strength. Plasmatic energy is a collection of fields of different strengths. Every plasma has a full spectrum of the fields. How a plasma shows itself depends on the environment it is in. You can power appliances with plasmatic energy if you do it properly - but up to now KS have not understood this yet. A big hint was given. In the labs the energy of the plasma was converted into electricity and used to light up the fluorescent lights. The purpose of the MaGravs was for us to understand what plasma is and how to work with the field forces. And the black hole in the MaGrav units is the Nano coating. It's as simple as that. But KS have not yet managed to understand how to harvest it.

Mr. Keshe told how he calculated the actual amount of physical matter that is in a human body. When you add up the Fe and C and all the elements they are just a dust on the table no higher than 2 mm. That dust gets blown up into the Gans state of the body and stands 2 meters high. Only the plasmatic condition of the Gans state can explain this. It gives a huge understanding about Creation. Remember that these Gans's are like dynamic spherical magnets. This changes everything we were taught about creation. Then think about the same process in the U and how it got expanded. Our science never understood the interaction of MG fields.

I think everybody has been wondering what happened to the original STM of Jesus, and today he brought more clarity. The Soul of the Prophet is a separate Soul but when it joins with the STM of Jesus, it gets elevated to the same understanding and becomes part of the Soul of the Prophet. The two exist individually in their own D, but also together as one. It's like accepting a guest that becomes part of you. When people remember the Prophets in their prayers it adds to their fields.

There is a big teaching on being "non-judgmental," but it is very difficult to bring it out, because of the values of modern society have twisted things around, that it's hard for a modern person to understand it. The essence of it is to remain innocent in your Soul, while not being afraid to stand by Truth and follow the Ethos of Mitra. I'll leave it at that for now, because our social conditioning is very much against the Truth.

Let's finish by highlighting a few topics.

The physicality understands only by comparison - this is the habit of the man. The memory of the STM is a limitless recording space and all of it has been recorded in RNA.

(So it's not reincarnation, it's tapping into the RNA where the experience is stored). The next step is the enlightenment of the leaders. You can be fed from Butterflies if you know how. I would have asked Christ how he raised the dead.

There is a lot to study here.
Thank you for listening.
