

468th Knowledge Seekers Workshop; January 19, 2023

(Quick Index 22pp, Introduction, Topic Index, Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Teaching about Cosmic Rays (CR) - made from Gans interactions - similar to how X-rays made; UC & EC & CT have to decide for humanity to release in One Go - or delay process; 1 System can feed whole Earth; 20th new T - elevate STP of Prophets world peace; Everyone connected through Creator inside; KF desperately needs support; Davos are foot soldiers deal with Prophets; Brazilians committed to Christ - elevate; Expand Soul over STP through true love; STP gives birth to STM; Commandments STP & STM

Topic Index

Cosmic Rays (CR) come to us as rays, fields, and energies; Only lived in room called Earth - opening to house of U and neighborhood of Unicose; What is structure of CR rays - fields- energies come to us - so it's not just a word "Cosmic Ray"; How to make them - what are all the ingredients and things needed; Science has touched edges of cosmic radiation but doesn't understand it - X-rays - Alpha - Beta - Gamma radiation are the lower & middle spectrum of CR; Present physics makes up ridiculous explanations to hide ignorance; Science has not defined what these radiations are; Professors didn't know - nuclear physicists in power stations don't have clue - can't control release of energy; Nuclear bombs drop and run; We have to understand in new space T otherwise same problems; If send man to Moon & goes other way how to get back - or if interacts with strong M fields - would he loose a leg?; Had to abandon test because of background noises and interference - need to be able to replace energies in both matter & energy states; CR conversion of energy for food & strengthen Soul; Example of - how does your Soul know how to contact mother who died 40 years ago - how does she know what will happen to you in 2 weeks time - ends up coming true; Like to test CR on feeding disaster victims - saturate an area with CR fields - take from it what you need; How to create field radiations that one becomes a banana & another an aspirin; We grew amputated toe with CR - creating environment of "grow"; Same with rebuilding Naomi's brain; It's an open secret and very simple; Wikipedia definition of X-rays; Collective meeting of UC - EC - Core Team to decide how to release T to humanity - go old way develop systems for energy - agriculture - and clean up environment - or release CR T in one go - rapid conversion to new system - new way of life; UC to decide about human colonies in space; Delay process or do it in One Go; Comprehensive Plasma Coverage was part of this - top up energies annually to prevent diseases - get fed and everything else through Headset; Carry on with status quo - or bring the change; Describes how X-rays are made like "shooting match" - high energy beam at angle to target - radiation comes off at an angle to go through body for x-rays; It's similar with plasma - 2 plasmas interact and give off CR; Also about nuclear radiation "fly by seat of pants" can't control it Fukushima; Reads Wikipedia; Draws pictures of how plasmas create CR; Deeper go down plasma spiral stronger the fields - interaction of plasmas may give banana - stronger fields red meat; Different from X-ray interaction which is a single field it hits and goes; Plasma is dynamic can rotate and interact to create more plasmas and they have intelligence and a

soul; When interact with body ask - "what do you need from me - and I take away what you don't need"; Cosmic Plasma Fields have emotions - "fields with justice"; This is why science sees photons as particles or waves; Man can decide the strength of the field as love or pain or other dimensions (D); If send man somewhere with CR T sustains life and arrives with all emotions; If you give CR for depression plasmas are released as Gans's not fields; Cheaters are calling it "Quantum" - quantum means smallest - but in Creation always something bigger; Can put plasmas of different strengths into same ray or plasma - also create different field strengths; STM on Moon can use energies other than O to survive guarantee P - interacts with soul of environment & Inertia; Protons - electrons - neutrons are all plasmas - we don't give new names to their interaction like science to hide ignorance - understand amalgamation of fields; You understood this when you mixed Gans's to overcome Covid energy - considered as D of fields - already working with CR but didn't know; Early days used gases in reactors - to create CR; Created fields of CR with emotions & MG fields; Next step in T is using CR for needs of thousands of people at once - create D of fields of whatever you want and beam it to them; Then no need for leaders - help each other to be successful; Americans use satellites for high level bombing - we use to feed; UC & EC have to make decision about delivering T; Can use one central System to feed whole Earth - don't need to spread systems all over; Central System support needs of all life on planet man - animals - plants - all coexist together; Can feed any created thing throughout Unicoise; You are connected to it - supplies you with food - information - knowledge - energy - but have to develop process to feed both Soul & P; Our systems don't have detectors but detects emotions of people and knows when they go outside room; High energy of Souls don't notice noise man makes in P; On 20th take you to D never been before - will become part of life; Participants shall meet own Soul & S of Creator; Put your own Soul in balance then help Soul of Prophets; 20th bring new D; This time come to give and be balanced so you can balance others; Clean out the rubbish from yourself so you can be filled; Left "empty handed" on 16th; First time on 20th not use manmade communication between systems; Romanians to live on 2.5 Euros per day; Monetary system will change; Sustaining life in U - obligation of every man; Surplus energies from Earth available to travelers of U; CR are created through interaction of MG fields of Gans's; How does your Soul know where your Grandmother who died is at - how do you find her - P is linked through the Soul of the Cosmos - same way we send you to Moon and back; Abandoned trial because too much noise in background - can add or loose something through emotions of others; Need to create filtering system to prevent losses from interactions with other plasmas; What is secret to get you to Moon when man has emotions that always change?; Have to support emotion with certainty to arrive; Won't need clothes in new environment; Create a miniature version or copy of you in our system - it will carry all emotions; Have to be able to compensate for any energy losses - to manifest body completely; 16th took you to Creator - because little piece of Creator inside you - makes connection; How many tomorrow come out the same as when you went in - change in emotion - devotion - understanding; When claim you understand - actually farther away; More humble - more understanding; Making coils was to understand Cu was high energy beam - Gans's the target (CR are emitted) - but didn't understand; From beginning taught you every possible way to make CR; Video of 2 rays to make plasma - actually fields with a soul; The central system in Linz can provide everything for planet - do you call it "House of God"

or becomes the next Creator - because it creates everything; Through humbleness you gain knowledge - not through arrogance "I know"; Mankind has to make decision how to deliver T to humanity without anyone ever knowing it; Life on Earth has to become like a beautiful game - play to enjoy; After implementing T - interaction with Soul of U Community - maybe in P; UC & EC draw up future plan; Problems created by delivering T in one go can be overcome; Have you gained enough Knowledge to repair yourself and then with surplus energy the Prophets; Sincere wish that our labs elevate to next step;

Teaching & sharing knowledge never finishes; KF in desperate need of financial support to keep running; Details about how KS defrauded KF of millions through largest "scam" company in world, involving 7 countries and 10 international banks; Investigation is out of KF hands - but keeping out of public; Regardless, we don't stop the work; Those who can help can get reimbursed in future; This whole affair has brought the "books to be balanced"; CR compared to "PMTICS" from the Books - recommended to go back and read from beginning Books 1 - 2 - 3 will have a new understanding because more knowledge; First time reading wasn't in love with it - now have experience and fell in love - has new meaning; Old & New Testament - then who comes becomes Future Testament; Same way make X-rays also make CR but knowledge has to be deciphered - don't become arrogant; "Elites" in Davos, Switzerland - World Economic Forum meeting are foot soldiers - elevate the generals which are the religions - Prophets - they will command soldiers to change; Gates - angel of death - going for animal vaccination; Saudi Arabia join BRICS - barter system; How do you add emotions to work with plasma - have to live it - integrate teachings into your life so it becomes real to you; Brazilians committed to Christ - now have to elevate his STP - to give back and move forward; Feel honored and humble to elevate Christ - give what he is short of to become perfect; People don't understand that a King lacks true love from people - they come to take; People with strong religious belief's have opportunity to use part of their Soul to elevate the religion; Life is setup that the STP gives what it has to STM at death for it to take birth as a Soul in the U; Mother hanging from cliff with child on back - she is STP and gives her surplus energy to STM for him to live; Deliberately chose couple in love with each other - first flight to Moon- through love STM expands over STP & P; Love is the key to Plasma; Those who felt nothing in EU in Linz - because had no love to confirm; Don't need to wait for death for STM to expand - through love you can - Soul free; STP gives birth to our STM to create a new life - we are always responsible for this; The structure of the 24 Commandments are for the STP and STM - not the P as man understands; They are about the relationship between the STM and the STP; Do not kill in your Soul - you steal by depriving it from its elevation - entity does not reach maturity to become part of Soul of the Creator - but in essence as fields and rays, it's part of the Soul anyway; Eternal life is not for the physical life - for maintaining interaction between STP & STM - when one is weaker it can help other and vice versa; You decide which of 24 you're going to deny; Tomorrow you can elevate any Prophet who will receive the elevation.

Introduction to 468 KSW - Cosmic Rays already - Love Expands Soul - Elevate Prophets - One System

This is one of those Workshops that contains a lot of hidden teachings. How Cosmic Rays (CR) are made is one of the main themes, and that we have already been making and using them without our knowing it. Even what we call matter state X-rays are "partially part of the CR." For those of us with limited background in science let's start by going over what X-rays are.

X-rays are made by hitting a high energy beam against a matter object at certain angles, which causes the release of radiation in the bandwidth of X-rays. The X-rays are then passed through the body to make an x-ray. That is pretty much all modern man has been able to do with these kind of rays. Mr. Keshe calls it, "hit and run." That's the same with nuclear radiation, all they were interested in doing was boiling water and dropping bombs. We think we are safe behind their PhDs, but in reality they don't understand how these radiations are made or how to control them. This is the extent of what our science could achieve.

Cosmic Rays on the other hand, though similar are very different. But basically they are made the same way. Only we don't "hit and run" or bombard, instead we interact the plasmas with each other gracefully, and they release fields, which we call CR. These fields are a soul with intelligence and "knows justice." When they pass through us, they respond to our emotion and ask, "what can I give you," while at the same time they receive from us the fields we don't need.

The new dimension that opens up for us, is that the world around us is made of fields, and they respond to our emotions. And later I think we'll discover that we respond to their emotions as well. It's like thinking you are all alone and then one day you find out you are surrounded by your family.

In radiation technology our scientists only look at the number of protons and neutrons present in a nucleus, and when they give off a radiation, they give it a special name, because they don't understand, that they are just plasmas interacting, releasing fields to find a balance with each other. So for example, what they call Alpha, Beta, and Gamma radiation, to us are just M fields released by a certain number of plasmas interacting to find their balance.

When we made the Cup of Life we used Nano coated Cu, Cu and Zn, which created a spectrum of Gans's like CO₂ & ZnO and whatever. All these interactions, and the rubbing together of plasmas and fields, led to creation of CR and connecting through our emotions and intentions, these Gans souls were able to overcome the Covid energy. From the beginning we have been working with CR without knowing it. The main reason for today's teaching is to help our KF scientists deepen their knowledge about how to create and work with CR, so that humanity can make the next step.

As Knowledge Seekers we have to find ways to bridge this gap between the words being taught and the actual feeling of what they mean. Somehow we have to try to get in touch with our emotions, because this is the way we'll work with the plasma. On this note, there was a lot in today's teaching about love. Many of us think, when I feel good, then that's

love. I got my way and I am happy. But true love is so different. Unfortunately, it is rare in this "Americanized" world.

Mr. Keshe said something very interesting, that when you have the true love, your STM expands over the STP and P, and it's free. You don't have to wait for death. He said, the 2 ladies who are so much in love with each other & their family, that he could pick them up from anywhere, and send them anywhere. It was so easy with them, because they know love. This is why he chose the first couple to "fly" to the Moon, because they are truly in love with each other. And that those who don't know love, it appears as if they don't get anything from the system.

The next obvious question is, how can we have this love. Or maybe it doesn't work that way. It might not be something you can get. Rather it's something that you open up to. That if you have a strong desire to go inwards, then you start a process of "your life unfolding itself." You might begin by being present with yourself, wanting to grow, to understand and develop more. Somehow we get to the point of taking a hard look at our life and asking ourselves what's it all about. And if we are lucky, we start taking that inward journey. The plasma technology can help on this journey, but it can't do it for us. We have to be part of the process.

Another thing that can cause the change is being touched by love. If somehow we get touched by love, it will change everything in our lives. If you listen to the testimonials of people who have been through the Enhancement Unit, love is always in the background of their experience. That's the beauty of the plasma technology, it can shorten this process. Mr. Keshe said, there are no short cuts, we still have to face ourselves. But the plasma will strengthen our fields and remove the fear for survival and this will make our journey more direct. But still, it is us who has to want to do it.

There were important teachings about the Soul of the Physicality (STP), that throughout life it gathers energy through its actions in physicality, and at death gives its surplus energy to the STM to take its birth as a Soul in the U. This is the process of how life is setup at this time. Maybe this is because the STM is created through the physical interaction and goes through this process. But when the STM is created first, then the P is manifested. This whole process will be different. There is still a lot to learn in this area. There is the beautiful image of the mother (STP) giving her food pack (energy) to the child (STM) while hanging on the cliff. She tells him to go on and live, she already lived her life and will fall down the cliff, so that the STM can take birth.

The 24 Commandments are for the relationship between the STP and the STM, and how the STM can reach its maturity to take birth as a Soul. It's not for the physical life, but of course, man usually only considers the physical life.

Tomorrow is the 20th of January flight session for KS to meet the Creator and their own Soul, and also to elevate the STP of the Prophets. This will end religions and bring world peace. It's hard for us to imagine that the Prophets could have a fault, because of our conditioning and we always put them equal to God. Now we find out that all of us are

made out of different Souls that have different awareness's of Knowledge of Creation. It's not that we heard some words from Mr. Keshe and now we think we are better than the Prophets. Not at all. First we have to elevate our own STP and then offer that help to the Prophets, so that they can perfect their own weaknesses, and thus correct their followers. They are the "core reactor" of that concept, what we call religion. So we are going to the source to fix the problem. There may be some KS who can transfer more fields to the Prophets than others. Nevertheless, we all can, without thinking, send the love from our Soul to elevate them. Many KS may have felt their presence on the 20th, so we can also begin a dialog with their presence, through our Souls, and share the knowledge we have learned. It doesn't matter that the physicality of the Prophet is not there, the Soul is present. Like with the spraying of the Gans's, we need to start the process.

We were all thinking that it will take years to get so many systems built and installed around the world. The wonderful surprise is, that now we don't need to wait. A single central system in Linz is enough to feed and meet the needs of the whole planet. One wonders if they heard it correctly, did he really say, this central system can even feed the Unicose. But it's not magic. It's because we are all connected together through the Creator.

Mr. Keshe said that the UC, EC, and CT will have to make the decision for humanity, of whether to delay and slowly release the technology, or to do it in One Go. And that whatever problems will occur from a quick release, we will be able to handle. If we really felt the suffering all the beings on this planet are going through every moment, would we want to wait 1 minute longer? If this is the case, we should contact the U Council through our Soul and let them understand, that we want the change now. This is the power we all have, if we join our Souls together and wish for the explosion of love to hit our planet. Again, Mr. Keshe slipped a "gold nugget" into our consciousness. He said, we'll release the technology in such a way, that nobody will know it. Does that mean we'll wake up one day and not have to kill anymore? Let's pray with our whole Soul, that this day will come sooner than later.

Thank you for listening.

Quick Index

In the past few weeks, we have (taught a lot about the work of the Cosmic Rays (CR), which are rays, fields, and energies which come from the cosmos to us. Up to now we only lived in the room of the Cosmos called Earth, and soon we are opening the door to go out into the hallway and through other passages to find other rooms, dimensions (D), atmospheres, and conditions in the house we call, the Universe (U). This is one of the houses in the neighborhood of what we call, the Unicose).

What is important to us, is how the structure of the these Cosmic Rays, fields, and energies come to us? How can we use, develop, and understand them, so that they don't just stay as the word, "Cosmic Ray"? What are CR and how do we create them? If the man's scientists does not understand this, (then they cannot come to use them. This then,

is the purpose of all our work. It's not just eating the baked bread on the table. You have to learn how to make it and which kind of dough to use, for which kind of bread and what to add to it. You have to learn which ingredients to use and where they come from, and what kind of problems (you can have with them)).

(The science of today has touched on the edges of the world of the cosmic radiation, but we don't understand it. Most of us have no clue about what it is, that we are using. (We are using a little bit of the lower and middle range spectrum of these rays). We have given them various names like X-rays, Alpha particles or radiation, Beta, and Gamma rays. We have also created a framework of (labels) for understanding how to work with them in the present world of physics. Some of these explanations are the most ridiculous things the world of science has ever made up for itself. Because nobody understands, so we just keep on with the "same game" and nobody will find out. Like calling them Beta and Gamma rays. (The truth is, in essence, they haven't really defined any radiation, like how do you create them, or where do they actually come from).

(For years I put these questions and other questions to my peers in Queen Mary College. I asked them to explain what a Beta ray is. What they were telling me did not work, nor did it make any sense. Since childhood nobody could ever explain what X-rays were. At the age of about 10, I said to my father, you're an engineer, tell me what X-rays are. He said, we have a target, we create a current, we shoot at it, and then it releases energy. We call it an X-ray. I said, Papa this doesn't work for me. He said, that's what it is. I said, Papa, it doesn't work. You're an engineer and you know how these machines work. But it does not make sense. He said, if it doesn't make sense, then when you grow older, you try to explain it. But for me, this is what it is).

(At Queen Mary College, while sitting at a table sitting with my peers Dr. Shaun and Professor Lesley, I told them I wanted to understand what is missing in my knowledge. Why do nuclear reactors run out of control and create disasters? But nobody has understood it yet. We think we do, because we spend \$30 billion and make such elaborate constructions. But believe me, no nuclear physicist has got a clue what they are doing in these nuclear power stations. They just follow (along with what they were taught), and if it looks to work, then we carry on with it. This is why we are afraid of them and they run out of control. And this is why we are afraid of nuclear bombs. And also why we are afraid of different gases like nitrogen, helium, or whatever, because we cannot control their energy release and they can become dangerous. We call them, "neutron bombs" and the rest of it).

(We know how to start a fire with these things, but we don't know how to control it. But for us it's okay with nuclear bombs, because we just drop it and run. Let's see what it does. In reality, a nuclear physicist should know enough to create (a method of control for the nuclear reaction), so that when you start the "fire" and if it runs out of control, then you have a "fire" extinguisher on hand to put it out).

(This is the same problem we have in our space technology. We haven't understood (how it works yet). We still have to solve the problem of manmade matter state X-rays,

Gamma rays, and radiation. Today, if we open the "Pandora's Box" of the Universal Cosmic Ray energies, what is the man going to do? Will he just, "start the fire and run," because we don't know what it's going to do).

(Do we send a man from Earth to Moon, and hope that he lands there. What happens if he goes in the wrong direction? How am I going to bring him back in? How am I going to land him where he's supposed to go? What about if on the way to the Moon, he interacts with strong magnetic fields and loses some of his energy? Would he arrive at the destination with one arm or leg missing?)

(Recently we had to abandon part of a test. We'll try to establish it again in the next week or two. We need to bring stabilization into the system. We discovered that small noises in the background creates interference, which we have no control over. We need to be able to bring replacement energies in, both for the matter and energy states).

(Our people don't yet understand the work of the CR. It's still "monkey sees, monkey does." But the monkey has to understand what he sees, so that he can do it. That's why today we are teaching you about cosmic rays. Today's teaching is about the essence of the creation of the rays in the universe (and how they work), because we need this tool to become the "passengers of the Universe").

(What does a CR mean to you? Is it conversion of energy for food and to strengthen the Soul. (In transmutation, you need to direct the transfer). You need to understand how CR transportation systems work. How do I send you from here to the Moon? What is the principle behind it? Do I just target it like a shotgun and hope that you land there? Or do we create a new knowledge and new understanding?)

It's very simple. How is it that when you dream of your Mother who you lost 40 years ago, or the grandfather you never met in physical life, you are able to communicate with them? The mother tells you stories about your grandfather, or what you're going to do in 2 weeks time. How and where do you find the Soul of your mother and grandfather? And how come your mother who died 40 years ago, knows what's going to happen to you in 2 weeks time. (And then 2 weeks later it happens. How did she know?)

It's important for us to understand how we maintain life in space without interference, and how to feed you on this planet. (It's possible that, if there is a disaster in the next few months we can try to feed the (victims) using the CR technology (T). There are disasters going on now in different parts of the world, where you have refugees looking for food. One side man kills in the name of the religion, building and blowing up blocks, and killing in tens of hundreds. And on the other side, the nature, through the interaction of the fields of this planet creates floods, earthquakes, and the rest of it. This leaves many of you without food, shelter, and a shortage of medicine and everything else).

(With the present knowledge of CR we can help the man who is struggling in the deserts from lack of water, or the ones dying of hunger and thirst in drought stricken areas. If we teach you how to saturate an area with CR fields, then you can take from it what you

need, then you will not die of hunger or thirst, or lack of shelter. Then do we need to send you things dropped by the aircrafts of the United Nations, UNICEF, and every other crooked bases?)

(But how do we create these (field) radiations, and the conditions of the fields for one to be a banana, and the other one to be an aspirin. Another field radiation could be for antibiotics to stop the rot of an injury from a wound).

(When we grew a toe from an amputation using a transmutation system, we didn't see any infection. We used the CR in a very simple way. Through our understanding of CR we created an environment on that spot to grow that toe. It was an environment of "grow." We did the same thing to rebuild Naomi's brain). A containment was made, the skull was there, we just needed to provide a "brick work," then the body of the man put the bricks together and rebuilt the brain, which was partially lost.

(It's an open secret and very simple. There is no mystery in understanding the knowledge and the science of the (CR). We'll try today to share knowledge and open a little gap for the Knowledge Seekers (KS) about the CR. (First we have to understand what man has done up to now in understanding about rays (in general). How do our scientists define these rays? And how can we make these rays even without the matter state? Rick looks up X-Rays and how to produce them in Wikipedia).

(When we go to hospitals they take X-rays of our body with a series of fast pictures we call, a CT Scan. The difference between a CT Scan and a MRI, is one is X-ray imaging, and the other is magnetic field imaging. Even though magnetic field imaging is (actually) a X-ray itself. (These are all part of a spectrum of the same Cosmic Ray).

(We capture different parts of the same CR and we develop different technologies and different systems (for it. Basically we know it as X-rays. But what is a X-ray? What I would like to do today, is go through the path of the growth of (my) knowledge from playing with X-ray machines as a child, to (being trained as a) nuclear physicist, and then now to show you the way to produce the CR. This way those of you who are knowledgeable, and have become experts in developing the new science will understand soon).

In the next few days, Keshe Foundation (KF) will call for a collective meeting of the Universal Council (UC), the Earth Council (EC), and the Core Team (CT) to meet (and make a decision that will decide the future development of the Keshe Foundation Space Technology. As a matter of urgency, I will be calling on the members of the three organizations of the KF to meet and decide whether KF moves with the old system? Or does KF bring a totally new initiative in technology. (Do we leave (things) where they are now, with those who are involved in it (to continue on). (Or) we introduce a new technology?) It's the responsibility of the UC to make that final decision, but it has to consult with the EC and CT in how we will implement it. What we (already ??) have in the background and how it will be.

Let me explain what the difference will be. For the members of UC, EC, and CT the decision is, (whether or not the KF will continue working, developing and investing its time and assets in what we call the "old Technology of Gans's" like creating water resources (through the Gans's), building (plasma) flight systems, and all sorts of other things like fertilizers for agriculture, and developing technologies for cleaning the environment). (These will all be on the old system before the development of CR ??).

(Or we deliver everything through the new T in one go, and abandon the way the man has lived up to now).

(We cannot carry water and oxygen into space. (If Man goes into space with his body, the way it is now, he will die in a space in milliseconds without O). So that's the limit of that understanding).

(The Council's have to decide where and how we're going to establish human life, and human colonies in the space. (At the moment do we want to set up the production of the (Gans) water factories and create all the different plasmatic products to sell in the shops to start introducing it to people that way?) Or we create a dimension that you'll receive all the energies (you need to live ??), that for instance with water, you won't need to have the physical water. (You'll receive everything through the energy and emotion. This is how your life in space will be).)

(Are we going to delay the process? Or do we bring it in, in one go? What this will bring for us? What will this bring to the knowledge and the present structure of the man? It will most probably diffuse the present economical and political situation in the world).

(This is why I released the ("Comprehensive Plasma Universal Coverage") some weeks ago. You purchase a 1 years membership and (go for an annual Energy Check up, to top up your energies and prevent future illnesses). As a member you'll get "food" and everything else you need through the system. You'll have everything covered for the physical dimension. We have already started setting this up).

Do we feed the nations and humanity, and support the system, that we do not need water, or fertilizers to grow (plants). (Then would that end the hunger policies built through controlling the prices to abuse each other?) It's the responsibility of the UC and EC to make that decision. They will decide where the knowledge and technology of KF will go in the coming weeks and months.

Do we carry on with the status quo? Or do we release the knowledge and bring the change? (It's a new knowledge, very much like (when computers came out), but with this knowledge, there shall be no hunger. With this knowledge, there'll be nobody freezing in the North Pole, or (over heating) in the Sahara. Because you'll have all kinds of (environmental) conditions when traveling in space. (If you're somewhere at 40 degrees and I send you to planet that's minus 50, you'll will be able to handle the conditions). Would the clothes of the man become a thing of the past. It was said, we close our eyes

for our wives and women to be free. We close our eyes not to see, but only allow (those) who we want to see).

(We have to understand how to manifest the physicality in different dimensions (D) and energies of the universe? And we have to be able to create these dimensions. We have tentatively understood a little bit of it, but then our scientists did nothing to bring it forward. They got stuck with the X-rays. And they turned it into a "shooting match," but only in the matter state of energy). (In other words, they shot high energy beams into different matters and then used the X-rays that radiated out of that matter in their X-ray machines. This was very close to plasma fields, but they couldn't make that jump).

(What are CR? They are partially part of the (same) "shooting match," but what radiates out are plasmas, not in the matter state condition. If the world of science would understand this, then we have broken through into the World of Creation. The X-rays are produced by targeting energetic beams and (smashing it into another matter), while always making sure it's at the correct angle, the correct energy level (of KB) and rest of it. (By hitting the correct target area, it gives the correct X-ray field strip). Then by increasing it, we can have a better intensity, and better (x-ray) pictures. For softer tissues we reduce the intensity, and we get different pictures. For example, you don't use the same KB (energy level) for tissues of the heart, as you do for the brain. This is the first thing an X-ray engineer (learns)).

(This is how the X-rays were developed. Now let's talk about how we target nuclear materials (to get the fields) from the fuel rods in our nuclear power stations. Absolutely, and utterly by chance. In nuclear reactors with higher level energies, we have no control. We have more control in X-ray machines. We call our nuclear physicist "the brain of a nation," but in reality, they are flying by the "seat of their pants". Shame on the knowledge, which pretends to know everything, but he actually only flies by the "seat of his pants." If it goes out of control, (the only thing they can do) is push the "control rods" in further. If that doesn't work we get Fukushima. And if we deliberately let it go out of control, then we get Hiroshima).

(What do our future scientists need to do? This is the decision of the UC in the time to come. Integration of the new technology with the present lack of man's understanding).

(Rick read from Wikipedia about "X-rays" you can find it and read it. They never said what X-rays are, but gave some wavelength numbers, and historical background. Then he read about how they produce X-rays using vacuum tubes with gases and high DC voltage electromagnetic radiation. Then they started picking up radiation outside the tubes).

(The X-ray machines are targeting high speed current flow into a static position. What gets radiated is directed to a specific area. Then you can put an object in this area or the body of a man, and allow the radiated energy to pass through the object. Then they determine how much energy is absorbed by the body (compared to the area outside the body). They can put aluminum foil on the back side to confirm what energy has passed through the body).

Let's look at this in a different way. (In the X ray system, they create a high energy and beam it at a matter at certain angle that radiates the X-rays out to its target, which is an object or a body. Then they see how much energy that body has absorbed. The x-ray image comes from the fact that the different tissues in the body absorb different amounts of x-rays, and the contrast gives the picture).

(You can follow Mr. Keshe's drawing. He explains what we can learn from this type of system. He separates it in 2 parts. First there is the high energy source that hits a certain material at a certain angle, causing the radiation. The left side of the drawing is about how much of the passing fields of the radiation are absorbed by the body. Is it also possible that the cells of the body pick up the radiation and in turn give off even higher energy than what was absorbed? This part of the understanding of what you call, X-rays).

(Taking this knowledge, what our science has been able to develop up to now and bringing it forward with the knowledge of plasma we have today. We can create 2 plasmas and have them interact at different or the same angles, but different strength position of the plasma itself. (Remember that a plasma is drawn as a spiral and the deeper you go into it the stronger the fields of the plasma are). So for example, when this strength of the plasma is interacted with another plasma, maybe it is at the field strength of a banana. Then if I go slightly deeper in the spiral of the plasma and interact that field strength, I might get red meat).

(In the drawing of the matter state X-rays the interaction was only of a single field. (But here with the plasma it's dynamic, (and the fields rotate together and in their interaction they create (yet another) plasma). These are not rays, but fields. (The plasmas they create have intelligence, they have a soul). When they interact with the body of the man they say, "my darling, what do you need. As I'm going through you, I'll take what you don't need with me." What you don't need you can add to me).

(With the matter state X-ray system there is none of this, it just hits and goes through. But with the understanding of "plasma targeting," it's different. What we call, "cosmic plasma rays," or cosmic plasma fields are fields that have what you call, emotions). They are fields with justice. This is why in the world of radiation we say, some of the lights are photons and some are particles.

In the plasma condition of interaction of matter state, it's different than (plasma conditions of interactions. You can also create conditions where you only create Rays. If man understand this technology, then he can decide the strength of the field. He can decide on the strength field of the emotion of love or of pain, and other fields and other dimensions).

(If you use plasmatic field energy as a cosmic ray, then when you send a man somewhere you can sustain (his life) and he will arrive with all his senses of emotion. The same thing happens when you give this to somebody who suffers from depression. You release plasmas of Gans's, and not fields).

(Nowadays, people are cheating the plasma by calling it, "quantum." Anywhere you see "quantum" in the world of wellness, write underneath it, "crooks." Because there is no quantum in the dimension of the Creation. Even the smallest, which is the smallest man, is still large to another dimension of fields of Creation. Quantum physics is taking the smallest specimen, but still in that small specimen, there is another dimension of the universe).

(If you understand how to create plasmas, then you can play in the world of Creation the way you like. For me, I can target plasmas in the world of Creation. (I can put plasmas of different positions of strength, onto the same Ray or same plasma). And at the same time create fields of different strengths, that in their interactions, they allow transformation, transmutation, and transportation at the same time with the totality of the emotion (intact)).

(As a Soul of the Man (STM), when you leave Earth and go to the Moon, how will your Soul interact with the soul of the environment of the Moon and its Inertia, so that your physicality (P) can be guaranteed. Even though there is no oxygen on the Moon, I can use other fields of energies to survive and sustain life).

(If our KF scientists understand this, and some of them have already understood it, then man is ready for transmutation. The systems getting developed are in position without them understanding the totality. (But nevertheless we don't come up with terms like taking 2 protons and 2 neutrons and calling them "Alpha radiation.") Hello .. since when do we call a plasma, a matter state radiation? (We only say that if we haven't understood). Because 2 protons and 2 neutrons are 4 plasmas, their interaction is that amalgamation of their fields). (We don't need to come up with fancy terms to hide our ignorance).

(The world of science needs to redefine what an "Alpha radiation" is. It's the interaction of the 4 different plasmas, (and the) radiation, are the fields in trying to keep balance with each other. When these interactions come together, they always give a certain amount of energy).

(What happens if now our scientists, instead of 4 plasmas interacting, they now see 6 plasma fields interacting together? Do they call it 6 protons, or 3 protons and 3 neutrons? Because one has a slightly higher energy than the other, so it's trying to give its energy to the others. It's the same with other plasmas in the group, they always (try to find a new) balanced field. So does that mean that our scientists have to come up with a new name for these cosmic energies? Then what will happen in the next cycle of 4. (When you get a new field, you get a new radiation). (They would have to keep coming up with new names). But now man has the knowledge of the Gans's and plasmas, (and can look at that field dimension)).

In a way, as Knowledge Seekers (KS), you understood this without understanding it. This is what you did when you mixed the CO₂ plus Zn, and whatever, and then said, it's good

to overcome the Covid energy. My dear friends, you were already working with the CR when you made ZnO and CO₂ Gans's. (But you didn't understand that it was CR).

When we built the first nuclear based space reactor in Tehran, the Iranian scientists never understood what was on the table. In the Sansano, Trani, and in Bari Italy. You saw me bringing in the gas cylinder and connecting them to the reactors. What for? For creation of this.

(It's very hard to get an X-ray from high voltage and this and that. Then you have to target the matter plates to get the radiations. But here I only deal with the dynamic Gans target. In their systems you create "manmade matter state rays." Here I create CR with the dimension of emotions, and gravitation magnetic (GM) field strength, (but it is) always as fields).

(KS and scientists in the coming time, now that you understand how the next step that will come in technology, (you can meet the needs of thousands of people at once). If thousands of people are dying of thirst in the desert, or are starving, or need energy to recover from a broken leg or infections you can help them.

All you do is create the dimension of the fields of whatever you thought, and you beam it to them. Then they receive the food, water, and medicine they need).

But would this bring a new dimension for the world leaders to claim power? (Or can we deliver the technology directly to those who want to receive it, (then would there be a need for power?) "They become needy in the strength of the fields." Then no man will ever claim power to be a leader, instead we all lead each other to success and a new life).

Do we use satellites to do high level bombing, as the Americans are doing? Or we use them for high level feeding through plasma technology? (With this knowledge should any man have a cancer, which is created through the emotion? Would any man be thirsty or hungry on this planet or in space?)

(This is why there is a need for the UC to make the decision, and why it's important for the EC to bring the implementation with the governments for delivering the T. Governing will be through science and technology).

Then it comes to one big question. (Do we need all these units (spread everywhere), or can we create just one central system that can feed the whole of the Earth? The man in the deserts, as well as the ones living in the luxury apartments of New York, London, or Beijing, all become equal. Do we all become part of one world nation?) "This is not in any way, or shape, or form, as a source of creation. It's as a source of support to support what is created."

(The "central system" would support all the living things including man, animals, plants and trees. They all would be able to satisfy their needs for life. The fields from the same source would feed everything in its path, irrespective of color, race, religion, creed, in the

dimension of life, vertical, horizontal, intelligent or no intelligence. Then would one animal or being eat another on this planet? Or all would coexist peacefully). This is the evolution of this technology.

(In the time to come, the "source," (or central system), what you call, the dimension of the Creation, will feed any man and any created thing, in any dimension in the universe and Unicose. You will be fed whether you are a man from Earth and you end up on Planet Zeus, Mars, Moon, or in another universe. As you are connected to it through its dimension of fields, you will always be supplied by this "source." Down this line you can carry food, information, knowledge, or energy. But, you have to develop a condition and a process, that it can feed both the dimension of physicality and the (Soul as an energy), that where they manifest, and in whatever shape or form, they all stay together as an integrated system. And that they function with all their emotions and facilities, and can exist in any dimension).

(What is Mr. Keshe saying here? That one system on Earth can feed the whole of the Unicose?)

(The people in our lab just noticed this recently, that we don't have any speakers or noise detectors. (And yet our system detects emotions). The generator and field system on our detectors were moving erratically. What is going on? The people go for lunch and (the oscilloscopes become) quiet and peaceful. But they're all still in the same building and making the same noise. The minute they come back from lunch the fields show disturbance. The emotion has changed, they have the emotion of thinking about the girlfriend, the cooking tonight, or going to cinema and this creates a (turbulence) in the fields. (But the noise in the room hasn't changed)).

(This happened on the 16th of December. There were a lot of people coughing, and making noise. But the minute we said, go to the Soul of the Creator, (the detectors) became calm and in unison. But there was still the noise of coughing and everything else. The Souls are of a higher energy, and don't care about the noise the man makes, (or ??) what goes on in the universe). Because they are with the Totality of the Soul.

In the tomorrow's session, I'll take you into a dimension that you've never been before, but it'll become part of the path of life in the coming time. Those of you participate in the 20th of (January ??) will meet the Soul of the Creator, and you shall meet your own Soul. (How can you try to give to another soul, to perfect it, if your own Soul is in dilemma? (It needs to put itself in order first), to be able to give (to another))?

Tomorrow's flight session will bring a new dimension. This time we have more people than last time. A lot of you came (on the 16th to get help with your problems, cancers and whatever. You all came to take. This time come to give. Come this time to be balanced, and see what you can bring to those who are unbalanced).

(If your stomach is already full of rubbish, then you can't put anything more in it. That's why your mother used to say, don't eat sweets before dinner or you won't be able to enjoy

your diner it will be too full). You all came to the 16th session with a stomach full of rubbish, and you were hoping to have a dinner, and that you'll feel good. But more or less, you all left empty handed, because you didn't (clean out the rubbish first)).

(You've got to realize the process of how the CR will come to be part of (what you ?? need). The systems used tomorrow are different than the systems we had last time. (We made additions to them. For the first time we will not use (any manmade communication systems) between the system and generator, and the Creator).

(On the 16th we used the same telephone lines as the rest of you. This time we'll take a major step, and introduce the CR. We'll see how you will feel this time? There will be no satellites mobile phone connections between the two KF buildings). This time, you cannot come cheating. Eating the biscuits and fruits, and having the drinks before you come in on the table and then say, "I'm hungry."

In the past few months the president of Romania told his nation, that people in his country can live on 2.5 Euros a day. Yes, on bread and water. The price of the tomato in Romania is the same as supermarkets in the rest of Europe. In the rest of Europe, you get 4 to 5 times more wages than the pensions. (And you are able to live life).

With the new knowledge, every man in Romania, Bulgaria, London, New York, and in Beijing, can enjoy exactly the same pleasures of life, not even with the financial return, but understanding where they receive it from, and what they have to contribute to the next cycle of life. Then we'll give the 2.5 Euros back to the president. Let him live in the dimension of physicality and see if it's possible.

(The monetary system will change. Because by understanding the field strengths of the universe, and through the new technologies, I cannot send you to the Moon, and then say, "sorry, I can't send you back to Earth because your subscription of \$10 has finished). This is where the new technology will bring a lot of changes.

Sustaining life across the universe becomes the obligation of every man on this planet. (Your life will be sustained and maintained so that it suits the emotion you carry. In a way, if you understand it, you have 8 billion human beings, and so many trillions of other animals with emotions and souls, and then all the plants on top of that. Everyone creates and releases field surpluses that they don't need. (In collective interaction with the central (system), and in understanding the emotion of the fields of this planet), these surplus fields become available to every traveler of the universe).

(It's very much like when I have a beautiful dress in the closet from when I was size 10, but now I'm size 14. So I don't keep it hoping that one day I'll become size 10 again. As I already had my pleasures with it, I give it for somebody else to enjoy. It's the same with the energies of the Creation. And it's the same with what is to come. Then we'll see if you understand the next position.

(Recently man has been given access to the CR through the Gans technology. (Through interaction of the plasmatic magnetic fields of the Gans's he can create CR). This is the key to a balanced life and to world peace. And it's the key for man to live in anywhere and in any dimension in the universe).

(Man has to develop a technology that will land him on the Moon in a few seconds, in the exact position where he wants to be. How do you do this? What is the secret in the dimension of transmutation? Well, how did you find the soul of your grandma? Or your mother who died 40 years ago? Did you arrive at (the place where your mother is with your arms and legs missing? Have you ever seen yourself in a dream using your glasses to try to find out where your mother is? Or do you see through the Soul of the energy. But you may still see your mother wearing glasses as you do. Because that's the impression you had in your Soul of your mother).

(Your physicality through the link of the "Soul of the Cosmos" knew where your mother is. In the same way the new space technology will be able to land you safely on the Moon and bring you back every time).

(I had to abandon a trial this week, because there was too much noise in the background. I thought I might lose an arm or a leg in the transmutation. They didn't like it, but sorry, I have to be 100% correct before I can move you. But the beauty of it is, I can be in (any position I want to do it). I can be in New York, and the radio transmutation in Linz. I can be in Saudi Arabia and organize your transmutation in Accra. But I cannot have interference (in the background while doing it. I cannot add or loose something through the emotions of others in the background)).

I need to create a filtering system, that always has a given bandwidth of the energy in the CR (level), so that I can feed the Soul and (do) the transportation. (We can't have any losses, accidents, or interactions with another plasma on the way).

But what's the secret to get you to the Moon? How can I transmute you across this little span of our Solar System to the Moon? Forget about the galaxies and the universes. Go back to the principle of the teachings. We always said, (The stronger plasma, the one which has more, gives to the smaller one, that in interaction the two come into balance with each other. But the difference is, that this time the body of the man has an emotion, and that emotion changes. If you're anxious about going from London to New York, what's going to happen? Your emotion goes with you).

In plasma technology we have to support that emotion, (so that without anxiety, you land with certainty to where you are going. You have to understand the principle, that you don't end up on Mars, or another galaxy). (Wherever you end up it has to be that your P will manifest according to that environment. You won't need clothes and you'll still survive).

(In the process of the transmutation you create the gravitational-magnetic fields at the field strength of your emotion and physicality. Then (you decide to go to the Moon).

(Then we need to create a copy of you within our system. It's a miniature version of you at this point. Then by interaction of the fields, in giving to, you move across to. But you will carry your emotion with you. You are your own cannon and you are your own target).

(Understanding the plasma T and the CR are the key to man's being able to travel the span of the universe at zero time. But the man's scientists have to understand this principle. Man's scientists have to be able to support this field, that in interaction with something else, you don't arrive here with one leg missing. (You have to be able to compensate for any energy loss of the fields, then the body will manifest in its complete form).

(When we rebuilt Naomi's brain we didn't get a lump on top of the head. We rebuilt in the area that it was missing. So the fields are already living, and they know needs to be created).

(Go back to the teaching of last couple weeks and to the 16th. We took you to see and become part of the Soul of the Creator. This was the easiest job for me to do, because, hello, "I made man in the image of Myself." I have a little Me inside of you. (So, to elevate you, I just needed to connect to that little (piece) of Me already inside of you. It was and easy job)).

Now you understand the technology and the knowledge of Creation. I don't care what color you are or where you live in the universe. (There is a little (bit) of Me inside of you, which is the image of My Soul. My field strength in you, connects Me to you. That's why it was so easy. On the graph we showed you when we told you it's time to meet your Creator. (The line became) balanced. Then we asked you to take your agents with you, and you brought them to meet the Creator, in the name of Muhammad, Christ, and the rest of the battlefield).

Now you understand the technology behind the plasma and the Gans's, and behind the world of Creation. (I wonder how many of you will come out of tomorrow's session as the same people you were, before you went in. Be it in the dimension of emotion, devotion, or understanding the Creation in the dimension of Totality).

(The minute you claim, that you have understood it all, is when you actually have moved further away from the point of understanding the Creation. Because you understood none of it. The humbler you become, the closer you come to (understanding). The more you gather the Knowledge of Creation), the closer you come to understanding, that nothing about the world of Creation, as much as it is within the Creator.

(Part of the process of understanding the teachings, is understanding the work and interaction of the rays. I brought this to you in a very simple way, when I had you make the coils. Way back at the beginning. But you all only went for the energy). I taught you everything I knew.

(After making the coils you coated it with CO₂ and Zn Gans's. What for? The (Cu) metal was the electromagnetic beam, and the Gans's were the target. (The example is from how X-rays are made). But you never understood. You cannot comprehend, because it's "monkey sees, monkey does." No matter what frock you put on the monkey, he is still a monkey. Because there is no intelligence in understanding the work).

(From day one, I taught you in every way possible how to make CR. Rick just read from Wikipedia that they found a fluorescent tube and the gases could radiate fields. Hello... Now you understand. KS have to go back to the first teachings (and deepen your understanding of the interactions of Gans's and plasmas). (In one of the Intro videos they show 2 rays coming together to make a plasma. These are themselves fields, not rays. They have a Soul and they understand the Totality)).

This is what our scientists are busy building at this moment. But, let's say 50% of the time they don't even know what they're doing. (Until something happens), they see something and say, "oh." But what's the knowledge behind it? What did I miss?

In the past days I was discussing with KS that one system from Linz is enough to feed the whole of humanity. Why do we need to make service centers? Our own scientists in our research centers have not understood this yet. They have not looked beyond the fence.

(If you understand that one system in Linz can feed you, elevate your Soul, supply you with energy to warm yourself, create communication, transportation, and everything else you need. Then, you understand, (would this system become the next "Creator"?) Would we call this the "House of God," which God to us is the one who creates everything?) Or do we say for the first time, that we have understood the process of Creation?

How long will it take for mankind to go through this process? (It's through man's humbleness that he gains knowledge, not through his arrogance, that "I have the knowledge." We have called on the UC, EC, and CT in the coming days to meet).

Mankind has to make a decision about how the scientists of the KF will deliver the technology to humanity without ever anyone knowing it.

Life on this planet has to become like a beautiful game. We are all on it, we all kick the ball, we enjoy to see if we can score a goal. But when the game is finished, we all celebrate it. And we enjoyed each other's presence on the field. (That "ball" is our connection. That "ball" for mankind is the knowledge. Humanity and the rest of the created things (in the Unicose) are the players on the football field. There is no tackling or pushing. We all play only to enjoy the game of life).

Now hopefully some of you understand the position of the man, the technology, what I'm teaching, and what has been the purpose of the teaching. We have come to the position, that humanity through the Soul of its representatives has to decide the future of humanity. All have to be equal and be able to enjoy (life). (At the same time we'll have a time of

transition, where the Totality can be introduced, so that mankind goes through this process).

Once we've done that, the next step will be the interaction of the STM with the Soul of the Universal Community, and maybe in the dimension of physicality. But the process has to start. The teacher, by a guide, (by the request of us), and the "student of man" in the form of the UC, and Earth Council has to meet and draw up a plan for the future of mankind. The KS and the Keshe Foundation laboratories will deliver the wishes of the Universal Council, then you'll understand where we are.

We are not selling you a dream. We are not creating another Prophet. We are not creating another religion. We are creating a system, that humanity will live through the process of the Creation, and not through the process of the man's physical dimension, of breathing, and everything else, along with the pain and the rest of it.

(Our scientists and humanity as a whole should understand, that the rest of the Creation on this planet has to go through a transition. Or (there has to be a) decision by the Universal Council to (make the changes) in one go. There'll be a lot of problems in doing it in one go, massive problems. But still they can be overcome).

(From the level of Spirit, you cannot elevate the STP of your Prophets in tomorrow's session, if your Spirit or STP is a "damaged bird." As the Souls are all equal. First we have to repair the man. In a way, to elevate him. In a way to give to (his STP) that it finds within himself the solution. After he does that, he will have enough to give to his own Prophets for them to repair themselves).

(Now you understand what we set our systems up for tomorrow and what we'll be carrying out with you. A lot of people have been asking, what's going to happen tomorrow? Come and see. See if you have gained (enough) strength in the Knowledge of the Creation, that you can elevate the Spirit of yourself, then with that surplus (energy), you can give and repair the Spirit of the others. At that point, you can elevate the Spirit of the Messengers, that, through them, then they become the center point to elevate the rest (of their followers)). Then we'll see the end of all the conflicts, and a peace in the dimension of the Soul, and STP of the man, which brings the true peace.

I hope you understood the teaching of today. And if you did, I hope you find the point of elevation. And as the religious people say, "salvation" for the whole of the structure of the STP of man, that with it you can find peace in another dimension.

My wish, my desire, my hope, as a teacher, is that the students understand and that they are ready to enjoy the fruit of the knowledge. As the universal game starts, as the cosmic rays and understanding the creation of the cosmic rays, becomes the key for the man of when to be a field, and when to be a matter, and when to be a ray. And what you need to give, to keep and maintain each state according to the wish and love of the owner. And not your own greed, stupidity, and what I call, ignorance.

I hope I brought you to a point, and that from today you understand what is the next step. I wish one of the most sincere things for our team in our labs, that they will elevate to the next step.

End of Quick Index Part 1 468 KSW

The teaching never finishes. Sharing knowledge never finishes.

Q: Is there any way for the KS to help or support the Foundation to overcome this problem where the KF got defrauded for millions?

K- (Someone who pretended to be a KS was really part of a big fraud against the KF. It has created a financial problem for us. The case now is out of our hand. We do not know how long it will take us to stabilize our finances. Since the time we realized we were defrauded by KS, we have been able to bring some stability in the past two months).

(Some of the KS who helped us are themselves running into problem because of our problem. We were trying to (rapidly expand the work of the Foundation internationally). We need substantial financial support immediately to bring back stability. We are doing most of it ourselves. (Those who help us can be reimbursed back in the future. Regardless, we don't stop the work. Even with all these problems we haven't stopped).

You've got to realize, that we were set up to be defrauded by somebody who claimed to be a KS. It's the same pattern as before, we trusted someone and it turned out, that they led us into one of the biggest fraud organizations in the world. There are 7 countries and 10 international banks involved. But the matter is out of our hands. (It was not a small operation. It was so big, that it would have brought the change).

(The KF team in the background has supported us as much as they can. We'll try to sort it out for the KS who have run into trouble because of it. But even those who ran into problems, also created a problem for the Foundation. In a way, I was thinking about it this morning, this whole affair has brought the "books to be balanced.")

(We are not going bankrupt, but we are in a desperate need of finances, both short and long term. Some Knowledge Seekers are helping us in the background to sustain and to keep (going). And we are also doing a lot of it ourselves. We've been very open, because the investment we put out was for all of you. It wasn't for me personally, or anything like that. It was done in the name of the Foundation, (for the humanity)).

I received a death threat by one of the KS, and they said, they're going to open the books and destroy (us). Nothing can be destroyed. (It's one of the people who you love so much, that has made this threat, because he thinks he was set up. But all of us were set up by somebody who came close to Knowledge Seekers and pretended to be everything. But actually he was working with one of the biggest scam companies in the world).

Yes, we are in desperate need of financial support in any shape or form to get through this. But we'll come out of it. (During the past weeks we are traveling far from home, to try to gain some stability until we can sort this thing out. The losses are in millions, not thousands. We found out the KS who you loved so much, through lies and cheats he has been defrauding the KF. In a way, it opened up the things we didn't see. And if "push comes to shove," as we say in English, I will open the books).

Today's teaching is not coming from Austria. I'm far away from (home trying to sort this out. Hopefully I'll be back in time for tomorrow's session. Yes, we need help, like how before we came to you for loans or whatever). We can create a lot of gold through our system, but that will not help. It will become another abuse. (This is what we are trying to abolish).

Yes, it was a huge loss. And about 6 or 7 KS got caught up in it with us. We're trying to sort them out. (We have brought some stability to extend our work, but more is needed. We need a few hundred thousand just to support us to go through the interim, until we come back to stability).

(In the past we lost a lot of money in Ghana, Italy, and other places, but we always supported it and stood up. This operation was systematically set up to drain the KF, by one of the world's biggest companies). Now we're talking to people who we talk to. Even they are baffled how this defrauding operation is run. (It's not just something we're telling you. Sooner or later it will come into the News. It's so huge, that it will have to come out into the International News, because many people have been touched by these people. We're staying out of it in public. But you'll see very, very soon).

Q: (This teaching on CR makes a connection with the books you have written. One can associate a CR to a "pmtic," then things becomes clearer).

K- (With the knowledge we have taught about the CR over the past weeks, if you go back and read the books again, then you'll get an even newer understanding. It's actually the same story, but has a different meaning, because you have learned more).

(In a way, it's like at the time you read the book you didn't know what "love" was, so it didn't mean that much to you. Now that you are in love, the understanding opens up. Now you can feel it, because you have a connection to it. This opens a new understanding). As I said, you take from these books according to your understanding, (and what I call, clarity of Soul, which is more than mental consciousness).

(In a few months time, we'll go the next level of the teaching, which is beyond CR. Then if you read the books again you'll see (an even newer) dimension. The beauty of it is, that once you learn, it stays with your Soul, then it becomes a knowledge for you in your travels across the universe. If you read them in order of Book 1, 2, and 3 then you will understand how far you have come. A long time ago I said the following to Dirk Laureyssens, bless his Soul, that these Books are like the Old and New Testaments, and Future Testament to come. It depends on which part of the history of time, that you

locked yourself into as a Jew, Christian, Muslim, or whatever who might come in the future (to write the Future Testament)).

It's understanding the knowledge in a new way, (because the words haven't changed. It's like what I showed you this morning about how we make X-rays. Now using the same understanding, transfer it to the work of the plasma and how you make CR. Then you understand that the technology itself is embedded with a lot of knowledge, but it is up to you to decipher it. But be careful when you decipher it, that you don't become arrogant and think you know it all. Rather, become humble that you had the pleasure and gift to understand it).

Q: (Tomorrow we elevate the Soul of the Prophets of the past. Can we also elevate those who think they are prophets of the present? Meaning the (elites) who are part of the (World) Economic Forum meeting at this moment in Davos, Switzerland. Should we elevate their STP, so they no longer can cause mayhem on this planet?)

K- You see, do you want to fight the soldiers on the ground one by one, or you negotiate with the generals, and then the soldiers follow their instructions. The people in Davos are just a bunch of soldiers, the same as the others. (You've got to sort it out with their Messengers. None of the ones you see in the Davos, or any other forum like this, are without religion or a way to believe in the Creator). Most probably the Chinese believe in the Buddhist path. The Christians are in the name of Bill Gates and the others. The Jews are in the other names, and the Muslims in the form of the Saudis.

They're all in there, but they're nothing. They all have the mentality and emotion created in their STP for some religion. (Do you want to negotiate one by one with the rebels? Or you sit down on the table with the generals and tell them to bring the rebels into line. I prefer the second one, then you just deal with a handful, instead of hundreds, then thousands, and then millions).

(In the past couple of years, many of these people who come to Davos, have become disgraced around the world in different shapes and forms. Davos is the window for planning the abuse, and to determine how successful it has been. We saw a guy who was a computer man, now he changed to vaccines, and now he demands the animals to be vaccinated. Now we know the vaccines he was pushing two years ago, are the cause of the higher death rates. I call him the "angel of death." It doesn't matter how he presents himself in Davos. (In early 2000 he was attempting to take over the KF. If he would have succeeded then you wouldn't be having the knowledge you are having today. That way they could abuse you more)). Forget about Davos, it's a place for the abusers, to show how much they can abuse.

(The Saudis want to start dealing in currencies not backed by the American dollar. It may sound like nothing, but internationally it will bring chaos. It means Saudis have joined BRICS as another coin, because now they don't need to hide behind the valuation of dollars, but stand on their own valuation. That's why Saudi moved that way. Sooner or

later we hear another new members to the BRICS will be the Saudis. (The implication is that it could bring back the barter system of international exchange).

(Don't pray that you can or cannot elevate the Souls. Because the physical war is over. Now (the only wars) are wars of religion. For this we have to go to their bosses, and not the governments. (Putting Ukraine aside you were able to stop the wars). We don't see wars as such, anywhere around the world. We achieved the physical peace, now we have to achieve (peace by stopping the abuse of the Soul), which are the religions, then we'll find peace everywhere. Tomorrow on the 20th, you are there to meet, give, and elevate the STP of the Prophets. But there's more to it, then that).

(If any of you reach that point, don't become arrogant because of it. Rather consider yourself, that you were humble enough to contribute to the elevation of his STP. Then you will understand it).

Q: In some class I remember that you said, that in the work of scientists there is part of their Soul. In your book there is the emotion of your Soul. And when we read it we have the understanding that this emotion, or each fragment of it are like those lines of field flows, that brings us your presence, or in another way take us to the "you." I don't know. In a way it's as if each line of that emotion was a key to a door to the universe of knowledge. My question is, how do you add that emotion with that force into what you do in the material state? Hope you understand my question.

K- It's very easy, just try to live it. Try to understand and make it part of (your) life. It's very simple. (You started understanding the whole process, when we taught you about the Soul).

(This was evident especially with people from Brazil, a Catholic country. When we had you sign the first peace treaty, we said, "I sign with my physicality and my soul." How many Brazilians got turned upside down by this, and wrote back to the Foundation, "I have committed my soul to Christ, but I can give you my physicality." Every time I read this I laughed, because they were coming from countries with a strong Catholic background).

(Brazilians gave their Soul to Christ as part of the different beliefs of the "72 ships of Christ" in different names. And now you find out, that it's you who has to give to him to be elevated, that it will bring peace in the physical life. (How does that feel?) When you always thought that you have to ask the Christ for help. And now it's turned around that you can help him. (It's for you to elevate him in the level of the Spirit of the man)).

You can use the knowledge to create a lot of beautiful conditions. (Tomorrow, I think there's about 30 Brazilians attending and I wonder how many of you will understand how to use the strong belief in Christ, that you have to elevate him. How many will understand that you have been given a gift, and are humble enough to feel honored to give to the one who always gave to you. Now you can give to him what he is short of).

(It's like if you go to a king who has everything and you sit next to him, then you see how he suffers from a lack of love. Everybody comes and bends to him because they want something. And nobody shows him true love).

There's an old Persian proverb that says, "come and stay with me one night, then you understand my true feelings." (If you stay with the kings for one night, you'll find out what they're short of). It doesn't matter if he wears a crown of gold, or one of "thorns." What you thought was perfection, still needs a little bit more to become perfect. And through it, when it's perfect, the rest will become perfect).

(I wonder how many of you with strong belief's in whatever path, will come to understand that part of your Soul, has become part of the soul of what you believed in. It doesn't matter how small. It's in the man's path of belief in the knowledge. Call it whatever religion you like. (Let's elevate and find the peace for all of us at one level, or another)).

(Knowledge is an instrument when it's shared, and when it brings more knowledge and peace to the others. Otherwise it's not a knowledge. We always kept with this in all the teachings. We always remain as Knowledge Seekers, because we seek the Knowledge of Creation, and not the arrogance of having knowledge).

Q: (What happens to the STP if, when the physical body reaches its point of death, and if the STP has not yet reached its elevation to merge with the STM? Does it encapsulate the STM and start playing the role of the physicality of the STM on that other journey?

K- It never reaches, it's impossibility. It finds a path to give, to share.
(I think Mr. Keshe means that it's impossible for the STP not to give what it has to the STM. It finds a way to do it).

(KS in the flight systems in Linz told us their experiences of when the energy fields of the STM passes over them. They say, "we can hear you, but everything is blurred, we can't see (you), it's like we are behind a curtain." (It's the dynamic field of the Soul)).

(When the STM passes the STP, and you see that curtain, did it interact with all of it? Or it just passed it by, because it was so weak that you couldn't feel it? (If we managed to build a manmade system to create this condition, couldn't humans do the same), (without a system ??)).

(This is why we chose a couple that are in love with each other to go to the Moon. The love they have for each other is enough to expand the STM. That expansion passes the physicality and allows the man to (travel)).

(In a way, the loving partner on the Moon becomes like the system in Linz. You allow your Soul to expand and encapsulate the STP. You can become the Enhancement Unit (EU) for your partner, as much as your partner becomes the EU for you).

This is why I deliberately chose two lovers to be the first two passengers to the Moon. (If you see them, they are so devoted to each other. When one speaks it's like the other one is also speaking. Their Souls are so balanced, that one becomes the system for the other Soul to expand).

The whole purpose of the Creation was for the love of the God. (To love is one of the pleasures of being a human. When you love you give everything to your beloved. You expand beyond to give. When your Soul expands it encapsulates your physicality and the STP. (Then you do the same for your lover, you becomes the source (or the EU). Then you let your lover decide where you both should go, back to Earth, or to Mars).

The first two travelers of the KF are "true lovers" with each other. We haven't chosen them randomly, (because they will bring their love to be shared with the rest of humanity, and fill (humanity) to the point of elevation).

(If you have understood about your STP, then you can develop technologies to allow you to feel it). Then the next step will be, do you need the physical dimension to live?

(When people who could not feel anything in the EU, I would keep trying to help them by putting them back in the system. But they kept saying, "I can't feel anything, nothing is happening." That's because you don't have anyone to give your love to, that they can confirm the love you are giving. The love allows the Soul to expand. My system cannot betray you. It can only satisfy what you really are (inside), and what you truly want to do).

We had a lot of KS who came to Linz, but never understood this. And step by step I opened the doors (for them). (For example, I had the 2 ladies who were so in love with each other. It didn't matter where I (took) them, I could always pick them up. They didn't even need to be near me, because the source of giving, or the envelope of the expansion of their Soul, is part of their life).

(Do we need to wait for death to elevate the STM? Or can we just pass the energy of the STM over the STP to go out? (The process (of the Soul traveling) is pretty much the same as when you come to the point of death)).

(It's like a mother with her child on her back hanging from a cliff. The mother gives her food pack to the child, and says, "take the food and go, it doesn't matter if I fall down the cliff, because I have lived my life. It makes no difference.")

(The STP gives (all the surplus energy it has accumulated in life) to the STM at the point of death. The STM is like the child on the mothers back. She says, take what you need, I have done everything for you to be created, and nourished so that you will be able to survive on your own in the (Universe). That's all it is. We just put different names to it. The mother sees the survival of her child as more important than her own survival).

That mother is the STP and the child is the STM, which gets it freedom by taking whatever the mother gives him, even if she sacrifices her own physical dimension. It's nothing more than that. It's just how you choose the words and names. (If the mother feels she can't give any more education to her child she sends him to a boarding school, or another country to get more educated), to become part of a bigger structure to be successful.

This is what our STP does with our Soul. It lets it go, that it becomes another child in dimension of Creation. A new life. We never understood. But now we understand, (and we are always responsible for this).

Q: (We have been working a lot over the last two months to understand the (24) Commandments. We went through the 204th KSW. A question that keeps coming up I what is the structure behind the Commandments?

K- The structure behind all the Commandments is the unity, or understanding between the STP and the STM. "Thy shall not steal." The STP cannot steal from the STM, that it stops its elevation. "Thy shall not lie." Because you can't lie to the Soul. (These were not written for the physical human life, which is the way most of us interpret them. They are about the relationship between the STM and the STP of the man. But man uses the emotion to create mayhem by stealing and the rest of it).

If you truly understand all of the Commandments, then it's a relationship between the Spirit and the STM, and nothing else. (Unfortunately, we never understood it. But now that we do, we will (comprehend) what it truly means. It's not about "thy shall not kill." (Do not kill in your Soul, that you steal from it, by depriving it from its elevation. That causes the entity to not reach its maturity to become part of the Soul of the Creator). But in essence as fields and rays, it's part of the Soul anyway.

When you kill a man there is still a body (leftover on the ground). So, the Commandments in truth are written about the relationship between the Spirit and the STM, and nothing else. (But since man is always physical, it was translated to his own dimension).

Q: (So is the key then to bring a balance between the STP and the STM to be on one line. Then all the emotions will be in balance. Because when we don't behave correctly we create blockages).

K- If you want to translate it that way.

But if you reach balance between the STM and STP, you will find eternal life in the true essence of it, and not just in the dimension of, "I live longer." Because the two always give and take from each other, or from the environment, to guarantee the life and existence of the other one.

Eternal life is not for the physical life.

Eternal life is for being able to maintain the interaction, life, between the Spirit and the STM. (That's why when one of them is weaker, the other one can super pass it (and supply its needs ??)).

In a way when your STM super passes your STP, the STP is much stronger, (because now it's inside and has received (fields) and is protected).

Q: (Is there any importance to the order of the Commandments?)

K- It's all part of the same. It's one package.

Now you decide which of the 24 you want to deny, and you make a new understanding with the 14 commandments, or 20 commandments, because the other 4 didn't suit you, because that's how you want to live. Now it's your freedom to make your own path.

(Tomorrow when we meet those who are going to join us, we'll come with the new technology, which has been linked up to our system. The February session will again be a meeting with the Soul of the Creator, a second time. That will be another trip for the STM. It will partially depend on the outcome of the meeting of the Universal Council and the Earth Council, and their decision in how to take the next step.

Q: Tomorrow can we elevate the Soul of other prophets, we like?

K- Any prophet. If they need elevation they will receive it.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:16).

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever whenever you listen to this series, of Knowledge Seekers of the Keshe Foundation, Spaceship Institute. We welcome you back. And in so many ways, we go back to the process of knowledge seeking.

In the past few weeks, we have spoken we have talked, taught, seen some of the work of what we entered in knowledge of the Cosmic Ray (CR). The rays which, the fields which, the energies which, come from the cosmos to us. The cosmos being a bigger home, up to now will live in the room called Earth. Now we are opening the door to go into the hallway, to go into the passages to find other rooms, other dimensions (D), (:18). other

atmospheres, and other conditions in the house we call, the Universe (U). And then this is one house in the neighborhood of many houses we call, Unicose.

But what is important to us is how the structure of the this cosmic rays, these fields, these energies come to us? How can we use it? How can we develop it? How can we understand it? That does not stay just the word, "cosmic"? How do we create cosmic rays, what are cosmic rays, and if the man's scientists do not understand this, and does not come to apply it. Then what was the purpose of all this work. It's not the bread baked on the table to eat. You have to learn what kind of dough you have to make, what you need to add to the dough, and where the ingredient comes from, and which ingredient you want to use, and with what ?? problems.

In the ?? follow science of today. We touch on the edges of the world of the cosmic radiation. We don't understand it, most of us have no clue, we just use it. In the world of, or in the dimension of the knowledge, we are little bit familiar with a lower range, or middle range spectrum of these rays. We call it X-rays. (:20). We call it we call it Alpha particles, or Alpha radiation, we call it a Beta, or we call it a Gamma. We have made an understanding. And we have defined the work, defined the creation, according to our own present understanding of the world of the physics. But how do we access the rest of this world of the radiation? How do we create them?

Some of the explanations of the radiation has been the most ridiculous thing the world of science has ever put itself to it. But because the others don't understand, we just keep on with the "same game" and nobody will know. One of these, we call it Beta rays, one of the these we call Gamma rays. But in essence, the world of the science and technology of the man has not really defined any radiation. How they're actually coming from? Where they come from? How we see the Creation?

This is a question and other questions I put for years to my peers in Queen Mary College. You explain to me what is Beta ray? Not what you're telling me. It does not work, does not make sense. When you speak about X-rays, something nobody ever could explain, from childhood to me. I put this question to my father at the age of maybe 9 or 10. I said, you're the engineer, you tell me. He said, we have a target, we create a current, we shoot it, and then it releases energy. We call it ?? an X-ray. (:22). I said, Papa it doesn't work? Not with me. He said, that's what it is. I said, Papa, it doesn't work. You are the engineer, you know what these machines do. But it does not make sense. He said, if it doesn't make sense, when you grow older, you try to explain it, but that's what it is.

When I start asking my peers in Queen Mary College, on a table sitting with Dr. Shaun, Dr. Professor Lesley, I wanted to understand what is missing in my knowledge. Why we cannot, why we run out of control? Why our nuclear reactors creates disasters? Because we haven't understood. We think we do, and we make such elaborate constructions, we spend \$30 billion on it. But believe me, no nuclear physicist has got a clue what they are doing in these nuclear power stations. They just follow, it looks to work, so we carry on with it. This is why they run out of control. This is why we are afraid of them. This is why we have fear of nuclear bombs. Why we have fear of what we call nitrogen, or

whatever .. helium, or whatever gases, that they can become dangerous. We cannot control, we cannot, we control their energy release. We call them neutron bombs and the rest of it.

Because we know how to start a fire, but we don't know how to control it. And we use that control in nuclear bombs that okay, we saw the fire, we drop it and we run. Let's see what it does. Where, in reality in the world of science, if nuclear physicist could understand, (:24). when you start a fire, you bring the water and a fire extinguisher with you first, that if it runs out of control, you're on top of it.

And this is where we will run into the same problem in our space technology. We haven't understood. We have not solved the problem of man matter state X-rays and Gamma rays and radiation. And now if we open the Pandora Box of the universal cosmic ray energies, what is the man going to do? Another, "set the fire and run," because we don't know what it's going to do.

Send a man from Earth to Moon, hopefully he lands there. What happens if it goes in the wrong direction? How am I going to bring it back in? How am I going to land it where it's supposed to go? What about if on the way from here to the Moon interacts with a strong magnetic fields and loses some of the energy, or reduces in energy. And it arrives at the point of destination with one arm or leg missing or one leg missing.

We abandoned it, a part of a test. And we are trying to do, to establish it again in next week or two, till we bring the stabilization into the system. Because we could see, the small noises in the background creates interference, which we have no control over. So we need to bring replacement energies, both for the matter state, and both for the energy states.

But our people don't understand the work of the cosmic rays. It's "monkey sees, monkey does." But monkey has to understand what he sees, that he can do. So, today's teaching is about cosmic rays. Today's teaching is about the essence of the creation of the rays in the universe. (:26). How and where do we go? Because this is the tool we need to become passengers of the universe.

What does a cosmic ray mean to you? Energy for Food. Conversion of energy to strengthen the Soul. You need direction of the transfer, transmutation. You need cosmic ray transportation system to understand. How do I send you from here to the Moon? What is the principle behind it? I just target it like a shotgun, and that's it. Hopefully you land there? Or do we create a new knowledge, new understanding?

It's very simple. You go to bed, you go to sleep, you dream of the Mother you lost 40 years ago, or the grandfather you never met in life, but you communicate with them. The mother tells you stories about your grandfather, or what you're going to do in 2 weeks time. How and where do you find the Soul of the grandpa? How and where you find, know where the Soul of the mother is? And where does the mother who died 40 years ago going to tell you what's going to happen in 2 weeks time, or something is going to

happen, that in dream come to you. "I saw such a thing. Mom told me such a thing." And then a few weeks later when it happens, says, "Oh god, Mom knew. That's why I had that dream."

So it's important for us to understand how we maintain life without interference in space. (:28). How do we give you food on this planet without anything else? It next few months it's foreseeable, that we will try, that if there is a disaster, that we can feed masses through the technology of the cosmic rays. Now you have disasters in different parts of the world. You have refugees that are looking for food. One side man kills in the name of the religion, building and blowing blocks, and killing in tens of hundreds. And on the other side, the nature of the interaction of the fields of this planet creates floods, earthquakes, and the rest. And leaves many of you without a shelter, any food, shortage of medicine and everything else.

With the present knowledge, this is where a man is struggling. With knowledge of the Cosmic ray, the guy in the deserts, the guy the drought stricken place will not die of hunger, will not die of thirst, will not die of (no) shelter. If, how we teach, and we create facilities, that we send the things to you, that instead of by aircrafts drops United Nations, UNICEF, and every other crooked base. With a fields of cosmic rays. We saturate the area, you take from it what you need.

But how do we create these radiations? How do we create these conditions? How do we understand, (:30). one to be the banana, and one to be the aspirin, and one to be the field radiation of what you can damage you, and you call it antibiotics to stop the rot of the injury of the wound.

When we did, the amputation and transmutation system of growing a toe, we didn't see any infection. In a very simple way, we used the cosmic rays. We used the understanding of the cosmic rays to give to that point, to that spot, what it needs to grow. We create the environment of the "grow."

The same thing happened in a very, because you couldn't understand, situation with establishment, rebuilding the brain of Naomi. The containment was made, the skull was there, we just needed to provide a "brick work," that the body of the man put the bricks together and rebuilds the brain, which was partially lost.

Now the secret is very simple, it's open. There is no mystery in understanding the knowledge and the science of the cosmic. And today's teaching, today's sharing of the knowledge with the Knowledge Seekers (KS), we try to open a little gap, a little opening in the knowledge of the cosmic rays. But to understand cosmic rays, we have to understand what man has done in understanding the rays. How do our scientists define these rays? And how can we even make these rays without matter state? (:32).

Rick, you're in the background? And could you please go into Wikipedia, and look for the explanation of the X-rays, and how do we produce them. We all go to the hospitals. We take X-ray from our body, or we do a series of fast pictures we call the CT Scan. The

difference between the CT Scan and the MRI, as all of you know, is the X-ray imaging, or magnetic field imaging. Even though magnetic field imaging is a X-ray itself. It's part of the spectrum of the same cosmic ray as is the X-ray.

So, we capture different part of the same cosmic ray, we develop different technologies for it and we call it different system. But what is X-ray? What I would like to do today. I like to take the passage of the growth of the knowledge, playing with X-ray machines as a child, and into the passage of nuclear physicists, and then through it, show you the way to production of cosmic rays. Then, those of you who are knowledgeable, those of you who become knowledgeable, those of you who become experts in developing the new world of science will understand soon.

In the next few days, Keshe Foundation will call for a collective meeting of the Universal Council, the Earth Council, and the Core Team to meet, to make a decision. (:34). Then that decision made in that meeting will decide the future of the development of the Keshe Foundation Space Technology. I will be calling on the members of the three organizations of the Keshe Foundation to meet as a matter of urgency to decide, does the Keshe Foundation moves with the old system? Or does the Keshe Foundation brings totally new initiative in technology, and we leave where it is now, with those who are involved in it. And we introduce a new technology.

It's the responsibility Universal Council to make that final decision. But it has to consult with the Earth Council. It has to consult with the Core Team. In how we implement. What we have in the background and how it will be.

Let me explain to you what the difference will be. For those of you who are members of Universal Council, the Earth Council, and the Core Team. The decision is, the Keshe Foundation will stick and work, and develop, and invest its time and assets and knowledge in building water resources, building water bottles, building flight system, building all sorts of things, for fertilizers, building systems and developing technologies for cleaning environment.

Or we set out and start a process of delivering everything through the technology, and abandoning the way the man has lived up to now. We cannot carry water into a space, we cannot carry oxygen into space. Man in the dimension of physicality (P) in the body of the man, the way it is, will die in a space in milliseconds, because there is no oxygen. So that puts a cap on the total understanding. (:36).

What this means is, that the meeting of the Council's has to decide. And that's why I put it on the table today. Where and how we're going to establish human life, human colonies in the space. And for the present time. Do we set up the production of the water factories to create plasmatic, plasmatic, and the rest of it, and sell it down the line in the shops and start introducing people into it. And or we create a dimension that you receive all the energies of the water as you need, without actually having any water? This is what's going to happen to man in the space.

Are we delaying the process? Or can we bring it in, in one go? What this will bring for us? What will this bring to the knowledge and the present structure of the man? It will most probably diffuse the present economical situation in the world. Political situation will follow the same.

Now you understand why a few weeks ago, I released the membership of one year supporting, or doing the annual check, and the rest of it. In a way, when we established that dimension, you are a member, you'll be enriched by the food, by everything else you need, what you have through the system. You will find you have no need for backup of the physical dimension. So, you can see we have already brought the setting into it.

Do we feed the nations and humanity, (:38). and support the system, that we do not need water. We do not need fertilizers to grow vegetables or seeds. That then we can use it, to abuse each other by pricing and controlling, with the hunger and policies which is built ?? on it. It's the responsibility of the Universal Council, and the Earth Council to make that decision, where the knowledge and the technology of the Keshe Foundation in coming weeks and days and months will go.

Do we carry on with the status quo? Or do we bring and release the knowledge. A new knowledge very much like computers, but with this knowledge, there shall be no hunger. With this knowledge, there'll be nobody will be cold in the North Pole, or a heat and warm and burning in Sahara. Because you'll have these conditions in the space. I send you to planet so and so. You're on Earth 40 degree, 30 degrees, pressures sitting in beaches of California. And then you land in minus 50 degrees, in another point with your bikinis. Would the clothes of the man become a thing of the past, because as it was said, we close our eyes for our wives and women to be free. We close our eyes not to see, but only allow who we want to see. (:40).

Manifestation of the physicality or manifestation in dimensions and energies of the universe? But we have to be able to create these dimensions. We have tentatively understood a little bit of it and we left it. And the scientists can do nothing with it any further. We got the stuck with the X-ray. And that comes from the "shooting match." But it's a "shooting match" in the matter state energy?

What is cosmic rays? Cosmic Rays are partially part of the shooting match too, but of plasmas, and not matter state condition. If the world of science understands this, we have broken through the world of Creation. X-rays are produced by targeting energetic beams and bashing one another, and always making sure we have the right angle, the right energy level, ?? cavies and rest of it. And the right target area, that it gives the right X-ray field strip. And if we increase it, we can have better intensity, better pictures. If it's softer tissues we reduce it, we get different pictures. You don't use the same KB for the tissue of a heart, as you use for the brain. This is the first thing an X-ray engineers will tell you.

So, understanding this comes to the next point, how we target nuclear materials in our fuel rods, in nuclear power stations? Totally, absolutely, utterly by chance. (:42). In X-ray machines we have more control. In nuclear reactors with a higher level energies, we

have no control. We fly with the seat of our pants, and we call ourselves, "the brain of a nation nuclear physicist." Shame on the knowledge, which pretends to know everything, and he himself flies by the "seat of his pants." Goes out of control, we push in "control rods" ?? the rest of the rods and when we cannot push enough, we get Fukushima. And if it goes deliberately out of control, we get Hiroshima.

What do we do? How do we extend these things? How do we understand these things? What our future scientists need to do. This is the decision of the Universal Council in the time to come. Integration of the new technology with the present lack of the man.

Rick, read us how man creates X-rays and then we learn something to start our work with. This is what is the knowledge of the man, on his book of knowledge, what we call "Wikipedia."

R: Okay, this is on the specific parts called, "X-rays" in Wikipedia. I will just read the first paragraph here, perhaps it will give us some background. An X-ray or much less commonly X radiation is a penetrating form of high energy electromagnetic radiation. Most X-rays have a wavelength ranging from 10 pico meters to 10 nanometers corresponding to frequencies in the range of 30 Penta Hertz to 30x exa hertz, which is three times 10 to the 19th Hertz in energies in the range of 145 electron volts to 124,000 electron volts. X-ray wavelengths are shorter than those of UV rays, and typically longer than those of gamma rays. And many languages X radiation is referred to as ?? "Ranta" radiation after the German scientist who discovered it in 1895. He named it X radiation to signify an unknown type of radiation. The most familiar use of X-rays is checking for fractures, but X rays are used in other ways. For example, chest X rays can spot pneumonia and mammograms use us X rays to look for breast cancer. Because some of the history you want to know how to do we produce?

K- Yes, how do we produce?

R: Well, the first X rays were a type of unidentified radiation emanating from experimental discharge tubes. Which are gas filled tubes, with electrodes inside, similar to fluorescent light bulbs. They were noticed by scientists investigating cathode rays produced by such tubes, (:46). which are energetic electron beams, that were first observed in 1869. Many of the early Crooke's tubes, which they're called, which are early experimental electrical discharge tube with a partial vacuum. William Crookes and others around 1869-1875 were experimenting with these and they noticed effects that were attributable to these tubes. They created ionization of the air in the tube by the high DC voltage and that was enough to create the X rays when they struck the anode or the glass wall of the tube. So, they were dealing with a few of 1,000 volts and up to 100,000 volts, and those voltages are enough to create the X ray effect.

So, the earliest experimenter who thought to have unknowingly produced X rays was, William Morgan in 1785. When he was describing the effects of passing electrical currents through a partially evacuated glass tube, producing a glow created by X rays. ... There's Philip Lenard in 1888, conducted experiments whether cathode rays could pass

out of the Crookes tube and into the air. (:48). He found that something came through that would expose photographic plate and cause fluorescence. He measured the penetrating power of these rays through various materials. So, it's been suggested at least some of these Lenard rays were actually X rays. And there's a Ukrainian born, Ivan Pulu, who 1877 was constructing different kinds of gas filled tubes and exposed them to photographic plates, which became dark when exposed to the emanation from the tubes. And it's interesting in 1894, Nikola Tesla noticed damage film in his lab that seemed to be associated with Crookes tube experiments. And he began investigating this invisible radiant energy after Röntgen identified the X ray, Tesla began making X ray images of his own using high voltages and tubes of his own design, as well as Crookes tubes. There was Hazard discovered, and for example, even Nikola Tesla noticed that his assistants hand was getting burned by these X rays. (:50). So, he sent a notice out to others to be careful with the experimentation, because of this effect. And others also started to discover more about that, as it went on.

K- In a way, what the X ray machines is targeting, high speed current flow into a static position. Then what is radiated, you targeted it into a space, where in that space you can ?? put anything, be it a body of a man, be it an object, and you capture how much energy was absorbed by this system. And what you call it, on what you put up as what we call, aluminum foils or different kinds of foils in the background, and he confirmed the existence of the energy passing through the body. But let's look at this in a different way. Can I take over for a second, please?

Let's look at this in a different way. In the X ray system, we create a high energy, we put an angle of target, this high energy releases the radiation, which by putting an object in front of it, we create how much that object has absorbed energy. We see it as spawns in the tissue of the man, we see the extremities of the tissue of the man, (:52). because he absorbs different radiation.

What does this system tell us? What does this teach us? Keep this side apart. We look at this side of it as a principle, as a knowledge. Then we still have this blue pot, still as a body of the man ?? itself. But, we allow, we don't want to take an image, we see how much of the fields we put through it, it will be absorbed, and how much of it, will it be leftover on this side. Or, what would it exchange that it might even release higher energy than what it absorbed from before. This part of the understanding, because you understand it, it's very simple to develop. So, you have identified a specific material, you have identified a specific energy to give you a specific radiation, call it, X-ray.

Now, if the man goes one step further with the knowledge we have today. We create two plasmas, and we decide them to interact maybe in different angles, (:54). maybe the same, but different strength position of the plasma (draws a spiral). Where this one is the energy field of this position, the same as this one, which gives us a radiation field in the strength of a banana.

I turn the plasma slightly to higher strength, I go for a deeper position in a strength (deeper in spiral), which now is this one. This gives us, in interaction with this, a new

field, a new dimension. This could be the strength of the field of red meat. But, this time in the X ray is singularity of the fields. Here, you have plasma of the fields. It's dynamic, they rotate together and in their interaction they create a plasma, not as a ray, but as a field. But as a condition that it has intelligence, it has a soul. When interacts with the body of the man it says, my darling, what do you need. I'm going through, take what you don't need, I'm taking somewhere else. What you don't need you can add to me, I take it away from you. (:56).

Here with the X rays we leave no choice. We hit, we go with the understanding of the "plasma targeting," this is what we call, "Cosmic Plasma Rays," cosmic plasma fields. Fields with emotion, if you want to call it. Fields with justice. This is what in the world of radiation we say, some of the lights are photon and some are particles.

In the plasma condition of interaction of matter state, it's different than what you call, condition of the plasma interaction. You can create conditions, that you create only rays too. Then, if man understand this technology, then man decides on the strength of this field, the strength of field of emotion of love, the strength of the fields of emotion of pain. Another fields, another dimensions.

And when you bring this as a cosmic ray, a plasmatic field energy, when you travel a man and you can sustain it, man will arrive with all senses of the emotion available to it at the time of arrival. (:58). The same thing happens when you give this to somebody who suffers depression. You release plasmas of Gans's, and not fields.

We've seen the cheaters nowadays, they call it, "quantum." Anywhere you see quantum in the world of wellness, write underneath of it, "crooks." Because there is no quantum in the dimension of the Creation. Even the smallest, which is the smallest man, is still large to another dimension of fields of Creation. That what quantum physics is, taking the smallest specimen, but still in that small specimen, is another dimension of the universe.

And if you understand this, you stay with the world of plasma, understanding the creation of the plasma, and you can play creation in the way you like. When it comes for me to, what we call, the world of Creation, I can target plasmas. I can ?? in different position of strength of the plasma onto the same ray, or onto the same plasma. And at the same time create fields of different strength, that in their interaction, (1:00). they allow transformation, transmutation, and transportation at the same time with the totality of the emotion. When you arrive at the point of destination, I'm here as a Soul of the Man (STM) who left the Earth, but I'm on the Moon. How do my Soul interacts with the soul of environment, with the Inertia of the environment, that my physicality (P) can be guaranteed. There is no oxygen here, but I can use other dimension fields on energies to survive, to live, to maintain and sustain life.

If our scientists in our labs understand this, and some of them have already understood, and the systems, which are getting developed are in position without them understanding the totality, then man is ready for that point of transmutation. Then we don't come up with "two protons and two neutrons" and we call it, Alpha radiation. Hello .. since when?

What we call, "plasma entity" in the matter state has become a radiation? Because we never understood. When you put two protons, and two neutrons, which are very much the same, with a small difference, you get fields which is amalgamation of interaction of the 4 plasmas. (1:02).

Now, the world of Creation needs to redefine. The world of science needs to redefine what is an Alpha radiation. Alpha radiation is the interaction of the 4 different plasmas, radiation fields in trying to keep balance. In whatever the interaction of these come together, it's always a certain given energy.

What happen if now our scientists interact always 4, now 6 fields together? Let's say why do we call it 6 protons, and why you call it, 3 protons and 3 neutrons? Because one is a slightly higher energy than the other. So, it' trying to give his energy to the others, and the same with others, they always release a balance new field, which now we have to find a new name for this cosmic energy. What happens in the next cycle of 4 of these? A new field, a new radiation. Now the man has the knowledge of Gans's, plasmas in dimension.

In a way as Knowledge Seekers, you understood this without understanding it. You mixed the CO₂ plus Zn, (1:04). or plus whatever, and then you say, this is good for Covid energy, to overcome. My dear friends, your ZnO's and your CO₂'s, you already worked with the cosmic rays without you understanding it.

When we built the first space nuclear based reactor in Tehran, Iranian scientists never understood what was on the table. Why those of you who worked with me in the Sansano, and then in Trani, and in Bari (Italy). You saw me bringing in, those of you who were in the Sansano, you saw the cylinder gases outside the lab connected with the pipes to the reactors. What for? For creation of this.

It's very hard to go back and create that "high voltage, blah, blah," to get an X ray. Dealing with the matters they targeted, here I deal with the Gans dynamic target. There you create "man matter" rays, here I create cosmic rays. But cosmic rays with dimension of emotion, (1:06). with dimension of the gravitation magnetic field strength, always as a, what we call it, a fields.

So, the scientists in the coming time, in the coming months, Knowledge Seekers, now you understand how the next step in technology will come. When you stand in the field of a desert with thousands of people short of water, thousands of people short of what they need to recover from energy, of a damaged broken leg infection, thousands of people hunger. If you can create the dimension of the fields of whatever you thought, and you beam it, you download it, whatever you want terminology to use. You give them the water, you give them the medicine, you give them the food.

But now, would this bring a new dimension for the world leaders to claim power? Or can we deliver a technology that those who want to get to that state, will become in this condition, that they have no power. They become needy in the strength of the fields. And

then no man will ever claim power to be a leader. (1:08). But we all lead each other to success. We all lead each other to a new life.

Do we use satellites to do the high level bombing, as we are used to by the Americans? Or do we use the satellite to do high level feeding through plasma technology? Should be any man with a cancer with this knowledge, which is created through the emotion? Would, with this knowledge be any man thirsty or hungry on this planet, or in the space?

Now, you understand why there is a need for Universal Council to make the decision, and why it's important for the Earth Council to bring implementation with the governments of delivering. Governing through science and technology.

Then it comes to one big question, do we need all these units, or can we create one, and only one central system, that can feed the whole lot? The man in the desert and the ones who lives in the luxury of the apartments of New York, or London, or Beijing, all become equal. (1:10). Then it comes that, do we become part of one world nation? This is not in any way, or shape, or form, as a source of creation. It's as a source of support to support what is created.

Here you deal with the man, because of the droughts, the animals in the Sahara are suffering, and because of the drought the trees are in the same dilemma. Then when you do this, the fields from the same source feeds everything on its path, irrespective of color, race, religion, creed, in the dimension of life, vertical, horizontal, intelligent or no intelligence. Then on this time, would the lion, or the tiger, or another vultures would eat the man who was dying of hunger, as the man is fed, and so is the animal. This is the evolution of this technology.

Then in the future to come, the source, this, what you call, dimension of the Creation, will feed in any dimension any man, any created things in the universe and Unicoise. (1:12). You are from Earth and you end up on Planet Zeus. You are from Earth you end up on Mars. You are from Earth you end up on the Moon, or you go to another universe. As the source is connected to you through its dimension of the fields, they'll always be the supplier of the source. You can carry food down this line, as you can do information, knowledge, energy. But, you have to develop a condition, a process that it can feed both, the dimension of physicality and the energy as a Soul. That the point of manifestation, at the point of delivery of in any shape or form, all stays an integrated system, function, with all emotions and all facilities to exist in any dimension.

Yesterday in our lab our people noticed this, or the day before, they noticed this. We have no speakers, we have no noise detectors. But in our system we have emotion detectors. Our generator and our field system on our oscilloscopes are moving erratically. (1:14). What's going on. They go for the lunch, and it's quiet and becomes peaceful. They're still in the same building, they're still making the same noise. The minute they come back in, because the emotion of the time has changed, there's a responsibility of the emotion thinking about the girlfriend, the cooking tonight, going to cinema, disturbs the fields. The noise hasn't changed.

This is what happened in the 16th test. There were a lot of people coughing, and buffing, and making noise. But the minute we saw, and we showed it, we say, we go to the Soul of the Creator, we saw peace, unison. But still there was a noise of coughing and everything. The Souls of a higher energy don't care about what noise the man makes, on what goes on in the universe. Because they are with the Totality of the Soul.

In the tomorrow session, I'll take you into a dimension you've never been, but it'll become part of the path of life in the coming time. Those of you participate in the 20th of December (January), meeting the Soul of the Creator, you shall meet your own Soul. How can you try to give, to perfect another soul, when your own Soul is in dilemma, and it's not in order, to be able to give?

Tomorrow's session of the flight will bring a new dimension. And this time we have more people than last time. (1:16). In that process you will meet. A lot of you came in the first meeting, I have a cancer, I have a problem, you all came to take. Come this time to give, come this time to be balanced, and see what you bring to those who are unbalanced. You cannot eat when your stomach is full rubbish. What does mother say, don't eat sweets, don't eat this, don't drink that, you can't have your dinner. Because your stomach will be full. You all come, you all came to the meeting of the 16th with a stomach full of rubbish, and you were hoping to have a dinner that you'll feel good. But you all, more or less, left empty handed, because you did not wait till the rubbish cleaned out.

You've got to realize, the process, what it is, how the cosmic rays will come to be to replace to be part of. The systems tomorrow are different than the systems we had last time. There are additions, there are systems, that for the first time we use no man communication between the Creator, the generator, and the system which dispatches.

Before, on the 16th, we had telephone lines, the same as the rest of you. This time there's a major step, with what we call, (1:18). introduction of the cosmic rays. How would you feel this time? There is no satellites mobile phone connections between the two posts of the Keshe Foundation. This time, you cannot come cheating. Eating the biscuits, and the fruits, and having the drinks before you come in on the table and say, I'm hungry.

The president of Romania in the past few months has said to his nation, people can live with two and a half Euro per day in his country. Yes, on water and bread. The price of the tomato in Romania is the same as supermarkets in the rest of Europe. In Europe, you get four or five times more wages than the pensions. And you get life to live. With the new knowledge, every man in Romania, Bulgaria, in London, in New York, in Beijing, can live on exactly the same pleasures of life, not even with the financial return, but understanding where they receive it from, and what they have to contribute to the next cycle of life. Then we give the two and a half Euro back to the president. Let him live in the dimension of physicality and see if it's possible. (1:20).

Where, with understanding the fields of strength of the universe, and developing the new technologies, I cannot return you from the Moon, sorry, your subscription has finished, you have 10 dollars, you used 9.9. This is where ?? monetarism will change. This is where the new technology will bring a lot of changes.

Sustaining life across the universe becomes obligation of every man on this planet. As your life, sustaining life it's been maintained, and you live life that it suits the emotion to carry. In a way, if you understand it, you have 8 billion human beings, and so many trillions other animals with emotion and soul, that's putting the plants on top. Everyone creates and releases a field, which as surplus they don't need, and in collectiveness of interaction with the central, in understanding of the emotion of the fields of the planet, it's available to every traveler of the universe.

It's very much, I have a beautiful dress in the closet, I used to be size 10, I'm size 14, I don't keep it, in that one day I might become 10. Somebody who's 10 can enjoy it. As I had my pleasure with it. (1:22). It's the same with the energies of the Creation, it's the same with what is to come. And then we'll see the next dilemma, then we'll see if you understand the next position, then we understand by creation, understanding of the process of production of the cosmic rays, by interaction of the plasmatic magnetic fields, that man now recently has got access to it through what we call, the Gans technology. It's the key to life in a balance, it's the key to the world peace, it's the key for man to be able to live in a dimension of the universe, anywhere it could be.

How would I send you from Earth to Moon? You remember the olden days, they used to put you in a cannon ball and shoot you, and some time you landed on the net, and sometimes, sorry, unlucky, you landed on the ground. Even when you landed on the net, it wasn't a guarantee, that you will survive it, broken neck, broken arms, and the rest of it. We don't have the option of the cannon. We don't need the safety net.

Man has to develop a technology, which lands man on the Moon on the exact position where the man wants to be. Few seconds. How do you do this? (1:24). What is the secret in the dimension of transmutation? How did you find the soul of your grandma? Or your mother died 40 years ago? Did you arrive at the scene with your mother with your legs and your arms missing? Grandma said, or the mother said, where is your arm? Did you lose it on the way from your body to here? What happened to your eyes? Have you ever seen yourself in a dream with your glasses trying to find out where the mother is, where the grandmother is? Or you see through the Soul of the energy, and you still see grandma wearing glasses, as you do. Because that's the impression you had in your Soul of the Grandma.

Did you use a cannonball from your Soul to the soul of the mother? Or did your physicality through the link of the Soul of the Cosmos knew where the mother is. And you ?? that imperfection. The job of the new space technology is this. I have to land you safe on the Moon every time, and bring you back every time.

I abandoned a trial this week, because there's too much noise in the background. I might lose an arm and a leg on the transmutation. They don't like it, but sorry, I have to be 100% correct before I can move you. And the beauty of it is, I do not need to be in the position to do it. I can be in New York, and the radio transmutation in Linz. I can be in Saudi Arabia and organize your transmutation in Accra. (1:26). But I cannot have interference and losing or adding, through the emotion of the ?? others.

I need to create a filtering system, that always have a given bandwidth of the energy in the cosmic ray, that I can feed the Soul and the transportation. Any losses, any accident, any interaction with another plasma on the way, ?? ?? . But how do I get you to the Moon? What's the secret?

How can I transmute you across this span, little span of our Solar System? Forget about the galaxies and the universes. Go back to the principle of the teaching. We always said, in the world of the plasma technology, the strongest, the one which has more, gives to the little one, that in the interaction of the two, the two become in balance. But this time, this interaction, this body of the man has an emotion, and the emotion changes. You're anxious to go to New York from London, what's going to happen, whatever, whatever. And then you arrive in New York, you arrive the anxiety, the anxious, whatever, would it be on time, would the son be there to pick me up, all gone, The son is at the airport, he picks you up, you go home. What happens if the plane is late. So, your emotion goes with you.

In the world of the plasma technology we have to support that emotion, (1:28). without anxiety, with certainty, that I land where I'm going. Understanding the principle. I don't end up on Mars, and I don't end up in another galaxy, I end up on the Moon, because my son is picking me up, I am meeting with the soul of my son, then in physicality we both look like a monkey, we go for a walk, but we know it's us, it's father and son, but looking monkey this time because the monkey here doesn't need oxygen, doesn't need clothing and we survive, enjoying each other presence in dimension of physicality or Soul.

So, how do you transport? In the process of the transmutation you go back to what I just taught, creating gravitational magnetic fields, which is the field strength, at the field strength of the emotion and physicality of you. Then we know you want to go to the Moon. We know how we have a copy of you. We need to create within our system a miniature version of a smaller of you to be on this point. Where by interaction of the fields in giving to, you move across to. But with the emotion of arrival at the same time. You are your own cannon and you are your own target. (1:30).

So, understanding of the plasma technology and the cosmic ray is the key to man's travel in the span of the universe at zero time. But the man's scientists have to understand this principle. Man's scientists have to be able to support this field that in interaction with something else, you don't arrive here with one leg missing. Because the compensated fields for the energy of the leg it's already, it's compensated for what's gone.

Don't forget, when we built the brain of Naomi, we didn't get a lump on top of the head, we built in the area which was missing. So the fields are already living, knowing what to be created. Go on a step further, and understand the teaching of last week and the week before. And go back to the 16th, we took you to see the Soul, to become part of the Soul of the Creator. This was an easiest job to do for me, because, hello, "I made man in the image of Myself." I have a little Me inside you. So, when I need you to elevate, I just need to connect that little of Me. It wasn't a big job, was it?

Now you understand the technology, the knowledge of Creation. I don't care what color you look and where you live in the universe, that little of Me, which is the image of My Soul, My field strength in you has connected Me to you. (1:32). And that's why it's so easy when we showed you the graph, we tell you this is the time when the man met his Creator. Because now it's balanced. And we took your agents with you, which brought you to Him in the name of Muhammad, Christ and the rest of the battlefield.

Now you understand the technology behind plasma, behind Gans technology, behind the world of Creation. I wonder how many of you will come out of the tomorrow session as people you were before you went in. Be it in the dimension of emotion, being on the dimension of devotion, being on the dimension of Totality, to understand the Creation.

And the minute you claim, I understood it all, you have actually moved further to (from) the point of Creation, because you understood none of it. The humbler you become, the closer you become to the ???. The more you gathered the knowledge of Creation, the closer you come to understand nothing about the world of Creation, as much as is within the Creator.

This is part of the process of the teaching, understanding the work of the rays, understanding the interaction of the rays. I brought this to you in a very simple way in the original work of the Keshe Foundation when you started making the coils, but you all went to the energy. (1:34). We told you, I ??? graveled with you, I taught you everything I knew.

Okay, you're for that. Gans coat it with CO₂. GANS coat it with Zinc, blah, blah. What for? The metal was that, beam of the electrical field and the Gans's were the target. You never understood, you cannot comprehend, because the monkey is a monkey, does no matter what frock you put on him. A frock of king does not make the monkey a king. Because there is no intelligence in understanding what the job of a king is.

I have taught in every way and possibilities how to make cosmic rays from day one. Rick just read to us, that they found a tube like a fluorescent tube and the gases could radiate fields. Hello. Now you understand. Man has to go back. Knowledge Seekers have to go back to the first teachings. And now understand the knowledge in the matter of plasma, as a Gans. Interaction of the Gans, and not two fields, which has been seen in one of the Intros. They come together and make a plasma. (1:36). These themselves are fields, not rays. They have a Soul, they have to have understanding of the Totality, that mankind in the coming time can move to the next step.

And this is what our scientists are building. And this is what our scientists are busy with at this moment. But, let's say, 50% of the time they don't even know what they're doing, because it's there. Till they see something and say, "oh." But what's the knowledge behind it? What did I miss?

I was discussing with the Knowledge Seekers in the discussion in the past 24 hours, 48 hours, that one system from Linz is enough to feed the whole of the humanity. Why do we need to make service centers? Our own scientists in our research centers have not understood this yet. Have not looked beyond the fence.

Then, if you understand that one system in Linz can feed you, can elevate your Soul, can bring you energy to be warm, can create you communication, transportation and everything else you need. Then, you understand that, with this now become the next Creator. Would we call this the "House of God," which God to us is the one who creates everything? (1:38). Or do we say, for the first time, that we have understood the process of Creation?

How long will it take for mankind to go through this process, it's a man's humbleness in gaining knowledge, not in his arrogance, that "I have the knowledge." In the calling of the Universal Council and Earth Council, and the members of the Core Team in the coming days, mankind has to make a decision, that how the scientists of the Keshe Foundation will deliver the technology to humanity without ever anyone knowing it.

Life has to become on this planet like the beautiful game. We are all on it, we all kick the ball, we enjoy to see if we can score a goal. But when the game is finished, we all celebrate it, we enjoyed each other's presence on the field. That ball was our connection, that "ball" for man has to be the knowledge. And humanity and the rest of the created things, the players on the football pitch. No tackles, no pushing. We all play to enjoy the game of life. (1:40).

Now, you understand. Now hopefully some of you come to understand the position of the man, the position of the technology, and what I'm teaching, and what has been the purpose of the teaching. We have come to that position, that humanity through the Soul of its representatives has to decide the future of humanity, that all are equal, that all have to enjoy. And at the same time, a transition time, that the Totality can be introduced, that the man goes through this process.

Then the next step will come, once we've done that, the interaction of the STM with the Soul of the Universal Community, maybe in the dimension of physicality. But the process has to start. The teacher, by a guide, by ?? us, by request. The student of man in the form of Universal Council and Earth Council to meet and draw up the plan, what would be the future of mankind. The Knowledge Seekers and the Keshe Foundation laboratories will deliver the wishes of the Universal Council, then you understand where we are.

We are not selling you a dream, we are not creating another Prophet, we are not creating another religion. (1:42). We're creating a system, that humanity will live through the process of the Creation, and not through the process of the man physical dimension, ?? breathe, and everything, and the pain and the rest of it.

But our scientists should understand, and the humanity as a whole, and the rest of the Creation on this planet has to go through a transition, or is the decision of the Universal Council to be in one move. There'll be a lot of problem in one move, massive problems. But still can be overcome.

You cannot join the meeting of tomorrow to elevate the Soul of your Prophets from the Spirit level, as the Souls are all equal, when you carry a "damaged bird" in the shape of the form of the Spirit of the man. Our first job is to repair the man. In a way to elevate him, in a way to ??, in a way to give to it that finds upon themselves a solution. That after that point, he has enough to give to his own Messengers to repair theirs.

Now you understand why we set the system up for tomorrow. Now you understand the process, which we'll be carrying with you tomorrow. A lot of people tells, and they've been asking, what's going to happen tomorrow. Come and see. And see if you have gained the strength in the knowledge of the Creation, that you can elevate the Spirit of yourself, (1:44). that with that surplus that you elevated, can give and repair the Spirit of the others. And that, in that point, you can elevate the Spirit of the Messengers, that in that point through them, then they become the central to elevate the rest. And then we'll see the end of all the conflicts, and a peace in the dimension of the Soul, and Soul of the Physicality of the man, which brings the true peace.

So, I wish you, and I hope you understood the teaching of today. And if you did, I hope you find the point of elevation. And, as the religious people say, "salvation" for the whole of the structure of the Soul of Physicality of man, that with it you can't find peace in another dimension.

My wish, my desire, my hope, as a teacher, is that the students understand and that they are ready to enjoy the fruit of the knowledge. As the universal game starts, as the cosmic rays and understanding the creation of the cosmic rays, becomes the key for the man where to be a fields, when to be a matter, when to be a ray. And what do you need to give, to keep, to maintain, each state according to the wish and the love of the owner, and not your own greed, stupidity, and what I call, ignorance.

I hope I brought you to a point, and I hope from today you understand what the next step, (1:46). as we've done, step by step in past few weeks and months, will be for us. And I wish one of the most sincere things for our team in our labs, that they elevate to the next point.

Thank you very much Rick. We'll go to a physical human break and then we'll come back, and we'll finish by about 11:30 or so, today. We are travelers last two weeks, trying to sort out the Keshe Foundation problems, which we created. And we hopefully will be

back in Linz for tomorrow, to be able to bring that change. Thank you very much Rick. And take us through a break and we come back. .. (1:47:40).

<< **BREAK** >> 468 KSW (1:52).

K- .. the teaching never finishes, sharing knowledge never finishes. Let's see if there are any questions because we don't have time today.

Q: Jalal ... My only question is, is there any way for the Knowledge Seekers to help or support the Foundation and overcome this problems?

K- Which problems?

Q: That what you said just now that the foundation is coming through?

K- Well, our position is financial, and it's created by a Knowledge Seeker who pretended to be a Knowledge Seeker, a big fraud. The case now is out of our hand. And how long we will go, it will take us to go through it to stabilize, we do not know. Financially the Foundation is... We brought it to stability in past two months, since we realized we've been defrauded by Knowledge Seekers.

And a number of Knowledge Seekers who helped us, they're running into problem because of our problem. What we tried to bring the expansion into the Foundation work. We need a substantial financial support immediately to bring a stability. We are doing most of it ourselves. Once that comes out, even as guarantees, that we reimburse back, in the future. Once it's done, we can go ahead. (1:54). We don't stop. We don't stop, we haven't stopped even with this.

You've got to realize, we were set up to be defrauded, set up by somebody who came, claimed to be a Knowledge Seeker. The same pattern as before, we trusted and turned up to be one of the biggest fraud organizations in the world. There are 7 countries, 10 international banks involved in this, and the matter is out of the hands of the Keshe Foundation. It's not something we did, something small. This was something to bring the change, and the matter now is out of the hand of the Keshe Foundation.

But the team of the Keshe Foundation in the background has supported as much as they could. A couple of Knowledge Seekers have run into serious problems financially because of it. We're try to find a way to sort it out for them. But even those who run into

problem, they created a problem for the Foundation. In a way, I was thinking about this morning, that the whole thing brought the books to be balanced.

But we are, we are not going bankrupt, but we are in desperate need of finances. Even short term, long term. Some of the Knowledge Seekers have helped us in the background to sustain and to keep. And we are doing a lot of it ourselves to maintain that. But we've been very open, because the investment which we put out was, for all of you. It wasn't for me, or whatever. It's done in the name of the Foundation. It's not done in a personal name or anything else.

I received a death threat by one of the Knowledge Seekers, they're going to open the book, they're going to destroy. Nothing can be destroyed. One of the people you love so much, has done so much threat to us, because he thinks he was set up. (1:56). But we were set up by somebody who came close to Knowledge Seekers, and he pretended to be everything, but he was working with one of the biggest scam companies in the world.

And yes, we need desperate financial support in any shape or form to get through this. But Foundation is ?? we'll come out of it. Even in past week, 10 days, even today, we are not home, we are far from home, trying to gain some sort of stability, bring stability till we can sort of this thing out.

It's not the loss with a few thousands, it's millions has been lost, and set up. Then in that process we found out that the Knowledge Seekers who were actually defrauding the Keshe Foundation, and you loved him so much, by lies and cheats. In a way, it opened up the things we didn't see. And if we comes to, shove to the push, as we say in English, I open the books.

We need help, Foundation needs help. Today's teaching is not coming from Austria. I'm far away from. Hopefully I'll be back on time for tomorrow. We need help. That's why we came to you as a loan, as whatever, yes, we do.

We can create a lot of gold through our system and support, but that will not help. It will become another abuse. What we try to, what you call it, abolish, to bring, to do, to push, to become.

Yes, it was a huge loss. And about six, seven Knowledge Seekers have got caught in it with us. We're trying to sort them out. But we have brought the stability to extend, to the Keshe Foundation, but it's needs more than that. We need a few hundred thousand just to support us to go through the interim, (1:58). till we come back on the stability.

We've lost a lot of money in Ghana, in Italy, and in other places, but we always supported. We always stood up. But this was systematically set up, to ?? drain the Foundation in a very systematic way, by one of the biggest world companies in the world. Now we're talking to people who we talk to. Even they are baffled how this operation is run. Sooner or later it will come into the news, it's not something that's just we're telling you.

It's so huge that will come into the international news, because it has to, because there are many, many people, plus Keshe Foundation has been touched by these people. We're staying out of it in public. But you'll see very, very soon. Yes, we need help. Even today. There are a lot of bills to be paid, we're covering as much as we can. There's a lot of support needed, we are covering as much as we can, and there are five or six people who sincerely helped us and for what we had, they will be returned, but we got stuck with it and they got stuck with it. We'll try to sort the position out, but it's not as easy. We started back, as very much minus, we try to just bring balance that the establishment can run as it is. As I said, we played a very open card. But we received the life threat from one of the Knowledge Seekers, and this matter will not be, what you call it, taken lightly by the governments and the officials.

Any other question? (2:00).

Q: ... Hello Mr. Keshe, thank you for this teaching, which makes the connection with the books you have written. One can thus assimilate each cosmic ray to a "pmtic," and as far as I am concerned everything becomes clearer, thanks to you.

K- I think if you go back and read the books again from the beginning, with the knowledge of what we teach and what we taught in cosmic rays, and understanding the past few weeks, you will see a new knowledge in the book. Because now it's the same story. But it has a different meaning.

In a way, I read this book at the time when I read it, I wasn't in love, I didn't ?? know, even mean. What it ?? was talking about love. But now I'm in love, now I understand what it means, the story in the book. I feel it, because now I have a connection to it. I felt it. It's that kind of way.

As I said, these books are written, and you take from it according to your understanding, according to your, what I call, clarity of Soul. That's more than mental consciousness.

In a few months time, when we go to the next level of the teaching, which is beyond cosmic rays, then when you read the book again, you'll see a new dimension. And the beauty of this, once you learn, it stays with your Soul, then becomes a knowledge for you in your travels across the universe. It will be very interesting. (2:02). Read the first, read the book one, read the book two, read the book three, and then you will understand how far you have come. As I said, long time ago to Dirk Laureyssens, bless his Soul. I said, these are like the Old Testament, the New Testament and the Future Testament. Depends in which part of the history of time you locked yourself as a Jewish, Christian, Muslim, or whatever who might come in the future.

It's understanding the knowledge in a new way, the word ?? cannot change. As you saw this morning, I showed you how we make X ray. And in the same understanding, if you understand the work of plasma, how you make cosmic rays. And then you understand even how technology is embedded in a lot of knowledge, it's for you to decipher. And

when you decipher it, don't become arrogant that you know it all, become humble that you had the pleasure, the gift to understand it.

Any other question?

Q: Dear Mr. Keshe, thank you for another insightful and elevating workshop. Regarding tomorrow, Friday, the 20th of January, we are asked for elevation of the Prophets of the past. There are also those who think they are prophets of the present at this moment, a bunch of them meet in the Economic Forum, in Davos, in Switzerland. Should we connect with them and elevate their Souls and in their STP, so that they no longer can cause mayhem on this planet? (2:04)

K- You see, you want to fight the soldiers on the ground one by one, or you negotiate with the generals, that the soldiers follow the instructions. The people in Davos are just a bunch of soldiers, the same as the others. You've got to sort out those who believe. None of the ones you see in the Davos, or any other forum like this, is without religion, without a way to believe in the Creator. Buddhist, in the form of, most probably Chinese. Christians in the name of the Bill Gates and the others. And the Jews in the other names, and the Muslims in the form of the Saudis.

They're all in there, but they're nothing, because they all follow the Book, or the mentality, or the emotion they created in their STP in the name of religion. So, do you want to go and negotiate one by one with the rebels? Or do you want to sit down on the table with the chiefs and tell them to bring the rebels on the ?? line ? I prefer the second one, you deal with a handful. You don't need to deal with hundreds, and then thousands, and millions.

The interesting part is, many of these people you follow who come to Davos every year, in the couple of past years, many of them have become disgraced around the world in different shape or form. Davos is the window for abuse, planning of the abuse, and how successful all the abuse has been. We saw a guy who was a computer man, now he has become to vaccine, (2:06). and now he demands the animals to be vaccinated. And then we know the vaccines he was pushing two years ago, is the cause of the higher death rate. I call him the angel of death. It doesn't matter how he presented himself in Davos. ?? I was with some officials in past 48 hours or so, and I explained to them sitting in different hotels, which he and his team chose in Holland in early 2000, to take over the Keshe Foundation. Because then he would have had. We would have had no knowledge of the present knowledge, and that's ?? the way they could use it, to abuse you.

These are foot soldiers. Deal with the generals, they will sort out their foot soldiers. Forget about Davos, it's something, as I call it, a place for the abusers, to show how much they can abuse.

We saw it yesterday in one of the side talks, or main talks that one of the biggest things, if it happens, if you understand the implications of it, the Saudis will deal with all currencies not backed by American dollar anymore. It sounds nothing, but internationally

it will bring chaos. Which means Saudis have joined BRICS as another coin, because now they don't need to hide behind dollars valuation. They stand on their own valuation. That's why Saudi moved that way. Sooner or later we hear another new members to the BRICS will be the Saudis. But why do they do this? What's the implication of it? What is the application of it? (2:08).

In a way if it goes the way it goes, and we get more influential governments joining directly or indirectly part of BRICS, the whole system become back literally to the barter system of the past. I barter with the Americans for two glasses for one bottle, I deal with the Africans for four glasses for one bottle, because Africans don't have to give it, but Americans ?? can. This is what the change is.

Don't pray for, you can elevate, or you cannot elevate the Souls. Because you've got to understand, as I said before, the physical war is over. Now it's a war of religion, and we have to go to the bosses, not the governments. You changed the people in your work. Putting Ukraine aside, we don't see wars as such anywhere around the world. We achieved the physical peace, now we have to achieve the what we call, dimension of the "abusers of soul," which is the religions, and you'll find peace everywhere. So, tomorrow is not that you're going to. You will be there to meet, to elevate, to give for them to be elevated, there's more into it.

And if any of you reach that point, consider yourself as humble enough, that you could bring that contribution to elevate him. Don't become arrogant with it. And then you will understand it.

Any other question?

Q: .. In some class I remember that you said, that in the work of scientists there is part of their Soul. (2:10). In your book there is the emotion of your Soul. And when we read it we have the understanding that this emotion, or each fragment of it are like those lines of field flows, that brings us your presence, or in another way take us to the "you." I don't know. In a way it's as if each line of that emotion was a key to a door to the universe of knowledge. My question is, how do you add that emotion with that force into what you do in the material state? Hope you understand my question.

K- It's very easy, just try to live it. Try to understand and make it part of life. Very simple. The whole process is, now you understand, with what we started teaching about the Soul. Especially like in Brazil, how many people went upside down when we released the first peace treaty that you signed with, "I sign my physicality and my soul." How many Brazilians wrote back to the Foundation, "I have committed my soul to Christ, but I can give you my physicality." And I laughed every time I read these coming from the Catholic, strong Catholic background countries.

And now you gave your soul to Christ as Brazilians, as different belief of the "72 ships of Christ" in different names. Now you'll find out that it's you has to give for him to be elevated and it brings peace back to you all, in physical life. How do you think? (2:12).

What you always thought you asked, "Christ, help me." Now it's there for you to help out, to bring back, for them to understand the level that you understood about the peace in the dimension of the Spirit of the man.

Then you understand. You can use the knowledge to create a lot of beautiful conditions. And I wonder how many of you Brazilians tomorrow, I think there's about 20 - 30 of you in total, will come to be with the strong belief you have, to understand, have I become, have I had the gift, have I been honored to be humble enough to give to one who always gave to me, for what he is short of?

In a way I explained this to one of the Knowledge Seekers very recently. It is you go to a king, and he has everything, you sit next to him, he suffers from the love, lack of love, because nobody shows him true love, except they call him the king because they have to, and they bend to him. There's an old Persian proverb, we say, "come and stay with me one night, then you understand my true feelings." You will stay with the kings and find out, one night, what they're short. It doesn't matter if he is a crown gold, or the "thorn." What you thought was perfection, needs a little bit more to become perfected. And through it, when it's perfect, the rest will be ?? perfect. (2:14).

I wonder how many of you strong belief in whatever path come to understand that part of your soul, it doesn't matter how little has been, become part of the soul of what you believed in, in the man's belief, path of knowledge. And then you call it whatever religion you like, and then we find peace, all of us together in one level, or another.

Knowledge is a knowledge when it's an instrument to be shared, and to bring more knowledge and peace to the others. Otherwise it's not a knowledge. And this is what we kept all the time in all the teachings. We always stay as Knowledge Seekers, because we seek the Knowledge of Creation, and not the arrogance of ?? having.

Any other question?

Q: .. When the physical body reaches its point of death, and if the STP has not yet reached its elevation to merge with the STM, what happens to the STP at this point? Does it encapsulate the Soul of the Man and start playing the role of the physicality of the Soul of the Man on that other journey?

K- It never reaches, it's impossibility. It finds a path to give, to share.

We've seen it with the Knowledge Seekers who went through the flight system. (2:16). That when the Soul of the Man, the energy fields, the inner part of what we call, the Soul of the Man passes them, when we talk to some of them, they say, "we hear you, but everything is blurred, we don't see, it's like we are behind a curtain." Because it's that dynamic field of the Soul.

So when the Soul of the Man pass the STP, which you came beyond, that you see that curtain, did it interact with all of it? Or it was so, that it just passed it, for it being so

weak, that it did not even feel it? And the biggest question will be, if we managed with a manmade system to create this condition, how would you as humans can do the same?

One of the reasons we chose a pair, a couple, to go to the Moon, or, go to space, is this. That the love of the partner expands the STM, that expansion passes the physicality that allows the man to take the next excursion.

In a way, when you are with your partner on the Moon, he or she becomes the system in Linz, if you think of it that way. To allow your Soul to expand, for the STP to be encapsulated by the Soul. That in a way you become the Enhancement Unit for your partner, as much as your partner becomes for you. (2:18).

This is why I chose deliberately the first two passengers, as the two lovers who... if you see them, they are so devoted. When one speaks it's like the other one speaking. That in being in such a balanced, Soul level, one becomes the system of the other for the love, for the Soul to expand.

The whole purpose of the Creation was the love of the God, which is what is, we call it, one of the pleasures of being a human, to love. When you love you give everything. You expand beyond to give. In that position, when your Soul expands, your physicality, the STP becomes encapsulated in it. And then you've done the same with your lover, that it becomes the source. We both want to go back to Earth, we both want to live in the space, we both want to go to Mars, we leave the condition of the position to the other, for them to decide, not for us.

The first two travelers of the Keshe Foundation are the "true lovers" with each other. We haven't chose randomly, because that will bring their love to be shared with the rest of humanity to fill it, to be the point of elevation. So, your STP, if you have, if you understood, if you can teach, if you can develop technologies, to allow that, for you to feel it, then you go to the next step of, do you need the physical dimension to live?

It's like people who came to us, and I kept them in the machine, two, or three times, ten times. (2:20). I can't feel it, I cannot, there is nothing happened. Because you have no one to give the love to, that can confirm the love you are giving. That allows the Soul to expand. How do you want to go beyond it, when my system cannot betray you. Can only satisfy what you really are, what you want to do.

We have a lot of Knowledge Seekers who came to Linz, who never understood this. And step by step I open up the doors. How come when we had two lovers, two girls, they came, one of them is so much in, they are so much in love with each other, these two women. And so, giving, loving each other and their family. That it does not matter where I put them, I can pick them up.

They say they don't want to go to the Moon. I can send them to the Moon. They don't even need to be near me. But, because the source of giving, that envelope of the expansion of the Soul is part of their life.

So, do we need the physical elevation? Or do we need the extension, or death for the STP, to pass its energy, or part of it, for the Soul to go? It's like literally when you come to the point of death. It's like a mother and a child hanging on a cliff. And the mother has a pack of food with her, and she gives the food to the child who's on the top. She says, "you take and go, it doesn't matter about me, I fall down the cliff, I lived my life. It's no difference."

That what is surplus, that allows the Soul is given to the child at the point of death, which is the STM. (2:22). You take what you need, I have, I've done everything for you to be created, to be nourished, to survive on your own in the world. That's all it is. We just put different names to it. The mother and child, when a mother sees the survival of the child more important than her.

That mother is the STP. And the child is the STM, which gets freedom, by taking whatever the mother has to give, and even she sacrifices her own physical dimension. Nothing more. Just choice of words and names. When you don't see any more further that you can contribute to your child, to be, you send her to a boarding school, you send them to another country to be educated more, to become part of a bigger structure to be successful.

This is what our STP does with our Soul. Let it go, that it becomes another child in dimension of Creation. New life. We never understood, now we understand, we are responsible for this, always.

Any other question?

Q: ... (2:24). We put our intention in the last two months very much to the Commandments. And tomorrow we have to elevate ourselves as well, as well the Prophets, and we went through the 204th Knowledge Seekers Workshop. And every time the same questions come up. Of course we understand today more about it with the new understanding, what we have learned. But still there are a lot of questions, but one question is, the structure behind the Commandments. I don't know if we, for me, I would like to know more about it and maybe you can say something to that.

K- The structure behind all the Commandments is the unity, or understanding between the STP and the STM. "Thy shall not steal." The Soul of Physicality cannot steal from the Soul of the Man, that it stops its elevation. "Thy shall not lie." Because you can't lie to the Soul. It's not for human life, which we have interpreted it. It's the relationship between the Soul of the Man and the Soul of Physicality of the man. And man uses the emotion to create that mayhem, stealing and the rest of it.

If you truly understand the whole, all of the Commandments, it's a relationship between the Spirit and the STM, and nothing else. We never understood it. (2:26). Now, we understand it, we will see what it means, what it truly means. It's not about, "thy shall not kill", that cannot kill in his Soul, cannot steal from it to deprive from its elevation, that it

causes it, to not reach maturity to become part of the Soul of the Creator in the entity. But in essence as a fields and rays, it's as part of the Soul anyway.

When you kill a man there is still a body, beheaded, the arm, the leg. So, the Commandments in truth is written about the relationship between the Spirit and the Soul of the Man, and nothing else. But as man is physical always, what you call it, translated to his own dimension.

Q: The key then, between, to bring the STP and the Soul in one line, is that the emotions are all in balance, our love, that there is no blockage, because you don't behave correct.

K- In many ways, if you want to translate that way. But if you reach balance between the Soul of the Man and Soul of Physicality, you will find eternal life in the true essence of it, not in just the dimension of, I live longer. Because the two always give and take from each other, or from the environment, to guarantee the life and existence of the other one. (2:28).

Eternal life is not for the physical life. Eternal life is for being able to maintain the interaction, life, between the Spirit and the STM. That's why one can, when the other one is weaker, super pass to accommodate the other one, which is in the need. One become weaker, one become stronger. In a way when your Soul super passes your Spirit, the Spirit is much stronger because it's inside, has received, it's protected.

Any other question?

R: Did you mention you had to go around this time?

K- I'll finish one or two more questions, yes, and then we can call it.

Q: .. How important is, because there are 10 Commandments which had been released, and 14 which haven't been released. Is that the correct order? Or do the 14 mix with the 10?

K- It's all part of the same. It's all part of the same. It's one package.

Now you decide which of the 24 you want to deny, (2:30). and you make a new understanding with the 14 commandments, or 20 commandments, because the other four doesn't suit you, because (that's) how you want to live. Now it's your freedom to make your own what I call, path.

Q: Okay, thank you.

K- Thank you very much. Have we finished Rick?

R: Well, we finished with the questions in the chat, and in the Q&A, and in the live stream and in the YouTube.

K- That's good news. Thank you very much for today. And we meet those of you who decided to join us tomorrow at 12 o'clock Central European Time, and we'll come in with

the new technology, which has been linked up and set up by our people in the Uno Center and laboratory, and we'll see how successful this next step in the knowledge gained will be. Thank you very much for today. Thank you very much Rick. And see you those of you who are be there tomorrow, at 12 . I was told that the booking will close the next two or three hours, because we had a surge of other people joining in past 24 hours. If you want to join, just register. They will leave it open for a few more hours, and then we close it.

There is a session for February, which again ?? the meeting with the Soul of the Creator, number two. That will be another trip for the STM, (2:32). and then that will be partially, it depends on the outcome of the meeting of the Universal Council, their decision, and the Earth Council, in how the next step will be. Thank you very much. See you tomorrow, or see you next week.

Q: .. Tomorrow can we elevate the Soul of other prophets, we like?

K- Any prophet. If they need elevation they will receive it.

We received a message from Dr. Bararpour that some of the Iranian team or people who wanted to join tomorrow, will not be able, or may not be able, because of the what you call, national examination for university entrance, as the government found that some people are cheating with their watches, or whatever they carry with them. They're closing all the Internet for the duration of the examination. So, Dr. Bararpour and the Iranians who are, might be in the area of the examination might not be able to join us, or partially, or the minute the network opened up join us. We'll see where we can go. Yes, it's not a joke.

R: It's a funny way to do it. But it's common sense it makes.

K- Because you've got to remember, one of the reasons you see so many Iranians out of Iran or before revolution, was that we have a, we had a system, still operating, it's called the ?? concur, which we had that time 40 - 50,000 places for universities. And we had four or five hundred thousand candidates, and people had to sit for this internal examination that they can pass a certain mark. Then if they can choose what subject they study. This now has become a thing of the past. Now the Iran there is 4 million candidates and 6 million places in universities. (2:34). These examinations is to decide which university, or what level whatever you're going to do, and to be there. So, it has taken different shape, but there is still people wanting to be doctors, but they know nothing about biology, as I call it. So, it started them cheating, in a way. It's a new technology, and new developments, and new approach by different governments. Thank you very much for today, and we'll see you hopefully shortly. Thank you Rick.
