

Man has discovered his Soul - Cosmic rays - Reincarnation

Introduction to 465 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This is the last workshop of 2022, the year the plasma technology by KF was released. Mr. Keshe called it a kind of "Annual Report of the KF, but also a workshop for KS to get clarification on parts of the teaching they have not understood. The highlight of this year was without a doubt, December 16th when for the first time Man was able to join together his Soul with each other, his Prophets, and members of the Universal Community, and by adding Cosmic Rays (CR) become as a single "Soul" and then without knowing, they were asked to go to the Creator, which they did. It was physically shown on instruments and graphs. The implications are huge, not only on this planet but across the U.

He went on to say, that the hardest thing has been to teach man that he has a Soul. They have been trying for thousands of years, but now man knows and has scientific proof, so the taboo to talk about the Soul will be lifted along with all the false understanding about it. Part of our acceptance of our "slave" mentality and way of life has come through our ignorance of how Creation in the U actually works. Everybody that joined the 16th has made a connection to their Creator that can never be broken. All they have to do is remember it, and they immediately feel that Presence. The religious leaders and world leaders have used this ignorance in a way, to control the man. Therefore, this is the obvious next step, to expand on these sessions and spread them, so the masses can experience it, then their false belief's will vanish.

A time gap was given between the 16th and the next session of January 20th, which will be even more amazing, for people to digest and go deeper into their own experience. Those who choose to continue on with the sessions will go deeper into their Soul. The more knowledge they gain, the more they can teach the others. Now that we have the proof, it is important for all of us to join in and quickly bring the change across the planet.

Everything seems to be about the fields of the plasma, how they interact and connect with each other, that this determines what kind of experience, manifestation, and the kind of world we can create. The call has gone out for those who have a direct connection to any of the world leaders and religious leaders to attend the upcoming sessions starting on January 20th. This means that if you have personally met them, or even just been in their presence, close to them, you have a plasmatic link to them. This link can be used to elevate their Souls in the same way that it was done on the 16th. We do not have to wait for them to decide to change. Because we all know that the physicality (P) has denied the Soul's existence, especially in the leaders. But as they are the servants of the Creator they have to come. Nevertheless, for those leaders who have a sincere desire to serve the Creator, they were invited to be brave and come openly to the session. The Creator is so

merciful, that He is giving them this last chance to willingly follow the "words" they themselves tell to others to do, rather than forcing them. How beautiful it would be if the leaders themselves would come forward. Because their own Souls will make them to tell there masses the truth. Mr. Keshe said, don't be surprised if one day you hear that the Pope walked away from his position, never to be heard from again. Remember, the time for change is now, and KS who have this connection to the leaders have an obligation to come forward and help create the field interaction.

Part of the testing that needs to be completed are the "100 patient" trails each for Alzheimer's, MS, and Parkinson's. So we need 300 volunteers from around the world. By studying these diseases we'll learn how the emotions through the Soul effect the physicality. The Soul can release energies to specific locations in the body, like for instance, Parkinson's targets the hands. It's the same knowledge that will be used in space for re-growing organs and limbs if needed. Though, the man already has this knowledge stored in the brain from the time of the dinosaurs. It's a matter of accessing it.

Another thing needed for these changes to take place, are more Souls to volunteer for being Satellites around the world. It was said, "you don't know what a gift you are giving humanity." Not only mankind but Satellites will also create a connection with the U Community. 2023 will be a big year for interfacing with the U Community, for sharing and receiving knowledge to carry out these changes.

Some of the changes that will come will be that in the future we will not need streetlights anymore. Through where we look and our emotion that area will be lighted up automatically. Without looking we will know what is going on behind us and will know how to react to it. We will be taught how to connect our Soul to the Soul of the Planet and that will provide all the energy we need in our lives, as well as heat our bodies and whatever light we need. This is way beyond anything Tesla was ever involved in, bless his Soul. Actually, this system is already developed.

All of this has come about because of the creation of CR. There is also something called a Universal Ray which has not yet been explained. There is a lot going on inside a CR, like they can contain plasmas and clusters of plasmas and other things. A beautiful analogy was given to describe more about CR. Think of a Capital city and then all the roads that leave from it and go out into the countryside. At first there is open land then you come to towns, villages, and farms and houses. When somebody goes into open land and start to build a house there, and then they make a family and there children start building around them and it becomes a village and maybe later a town. This is how the CR work and how creation spreads throughout the space. But they all are connected to those main roads, which come out from the Capital, which is the Creator. Next time you are driving in the countryside - ponder about how all this development started and spread - then you will understand about CR and how simple life is, and that we are all connected to it. And wherever go there is always a "road."

I think subconsciously a lot of people believe in what has been taught as "reincarnation." We want to think I was such and such a person in the past and that's why I behave the

way I do. This will be very hard to let go of, because there is also some ego attached to it. Mr. Keshe made it even more clear that the creation does not work that way. There are Masters in India who totally rejected reincarnation the way the Hindus and Buddhists have taught it. They didn't care what the scriptures said, they knew scientifically, but they could not explain it. Maybe partly because the people were not ready to hear it. If you challenge the reincarnation theory people get angry. But if you openly listen to what is described in this teaching it will become clear.

If your grandfather recorded and played a beautiful piece of music and then shared it with others who in turn recorded and shared it. The essence of that emotion energy information is a M field, that is now spreading across (like in the bloodline). It doesn't matter that the original recording and recorder have been destroyed and don't exist in P anymore. The energy information of that music has been passed down through the RNA to all the offspring in the bloodline. Then one day you find out that you can play that music. It does not mean that you were your grandfather in a past life. Rather you already have that information in your RNA and you have a matching field strength to it, and that's why you can play it. There are countless tendencies that we can have access to, in our RNA. What causes us to have a matching field strength has not been clarified.

This explains why you feel like you were someone in a past life. But the STM is created for the first time from the fields of its mother and father here on earth. All the memories are carried in the RNA. Just like the P is born after 9 months, so too the STM is born on the "death" of the P. There are a lot of other things we have not yet learned about. For instance, how does it work with another soul joining the STM, like what happens with Prophets. A Soul is a plasma, and just like CR can have other plasmas and clusters of plasmas inside it, why can't the Souls have other souls in them. This understanding will come in the future. But now we have a solid base about reincarnation.

A few other things to remember are "Plasma" servers will come in 2023; with 2 mobile phones can feed forever; A lot of data was collected in Monday's Nourishment session - being fed over phones is very close; Produce fields of wheat through CR farming not needed; Don't need to kill for clothes animal skins or cotton; Soul is naked in U; Keshe Coin will be exchanged in banks - cannot be stolen; Don't worry about what to do without a job - exploring the U; Man will adapt and always find something to do; Our accepted life as a slave will end; If you make wrong action Soul will paralyze P; Decision dreaming; New emotional Covid protocol Cup 1 & 2 at 1:1 ratio with Mg added; New Tabletop Gans making unit and much more.

Thank you for listening
