

474th Knowledge Seekers Workshop; February 23, 2023

(Quick Index 28 pp, Introduction, Topic Index, Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Convert Energy of U in skull feed Soul; A lot on C14 energy conversion; Crystalline odor - fingerprint U; H basis of all plasmas; Position of eyes; Soul protects P; CR stack up; children of Mitra through KS; New "Soul Generator" can make Soul with machine; U Council invited March 24 - elevate world leaders; Can change Soul to elevate; Detachment is key details; STP fused into STM - like Mitra - fission & fusion; 2 ways to give love; Make real "love potion" for planet - but Soul has to accept

Topic Index

Soul of the Man (STM) connected to Cosmic Rays (CR) - has Source essence - built system to use; Scientists not magicians - abolish fantasies - systems prove; Man & U Community already using each others technology (T); communication between races in U never stopped; Barbu told to stop abusing KF knowledge; Connect to everything through CR; Body converts CR - to electricity; CR stacks one on top of other - move between with knowledge; Man gone through billions years development - microchips; Generate energy from waterfall - same way CR enter skull - inside convert energy for body; Same way convert energy in U; Brain receives most its information & essence from the CR; 20% from food acts as balancing factor - also get from CR; Teach how to open STM to stronger fields; COHN - receives C14 converts to C12; H is origin (of elements) & C - have connection; Key is to expand Soul - then don't need much; Expanded Soul can convert C14 to C12 energy needs- understanding this conversion is sacrosanct; When Soul out travels on roads of CR; One C14 feed whole U; C14 crystalline structure - odor; Extra protons neutrons expand become odor; Odor Gans of itself- everything has a smell; planets - stars- galaxies have specific C strength - Smell - only see light; H origin of C14 connected to Deuterium; C14 rides on strength of H - acts like tracking laser beam; Understanding C14 can understand plasma; Create CR from C14 - ?? extra electron grinds in nucleus to create rays - weapons T; Create radiations (nuclear) from C14 beyond man's understanding; Scintillation - squeezing extra part of elements - behaves like gas & odor - release any material; Change internal structure of organs to create gases; 1 atom cover whole planet - change mentality of humans through odor; Every structure has H inside - interaction with itself creates energy; every planet creates own fingerprint of C14; Micro is smell from organs - Macro smell of U; Earth has its own smell from space; If understand H - understand Creation; With 1 H can create Creation - or annihilate a U - it's the knowledge; Skull with orifices for senses is to absorb as many combination energies as possible; STM cleverly created eyes - no limitation on absorption; Direct interaction with C14; Skull bones is filter for Ca - jails man to planet; 1 eyes sees P - other eye sees Soul or U - man Schizophrenic; Souls sees open or closed eyes; Man chooses to ignore Soul as its in front of him - need correct behavior - also with C14; Deny eye with strength of C14; We remember our dream because through C14 we see it visually; In EU in Linz - if you felt something - expanded Soul - if saw something - through eye of Soul; Chinese can have 1 eye in middle other

eye to side - separate visions to brain - sorts it; Every man has own connection to Creator
 - Ayatollahs want to control picture; Live in D of U - not fooled; Soul sees accident
 coming protects P; Change to plasma at time of accident nothing happens - Soul takes
 over for instant; Teach you operation of Soul - not "Soul takers";
 Belgian lady kicked out of KF accusing of taking your Soul - these are pedophile groups
 attacking KF - case in Austrian court - family and life of pedophilia- warned not to
 associate - try to get your IP address - hunt families with daughter - stay away; When
 abuse the physicality - Soul cannot see reality; Cover up in name of religion; Contacted
 Christ in Dec Session - ask how resurrected; Religions used to divert & keep you
 attached to P - they can abuse your Soul; Space can't be fooled - see field strength &
 smell odor - Soul tells you if suitable; Don't use eyes in Space; C14 & H sense through
 Soul; Lost sense of smell through Covid - Viruses in Space worse; Smell means
 identification of field strength; Interaction of STM & P create H - confirms existence;
 STP has own interaction of fields; 3 entities are separate; P interacts with fields of planet;
 Soul in connection to U - connects with Gans & matter state of body; Why 3 Chairs in
 original EU in Linz P - STP - STM; In EU interacted with C14; Science of Creation is
 real - can't use assumptions like $E=MC^2$ - another "Ayatollah" in name of Einstein; You
 have freedom of Knowledge; Position & color of eye absorbs different field strengths -
 brings different intelligence and behavior; Race prejudiced because not understand about
 different fields - in U infinite combinations; Through Knowledge - make one race out of
 whole Creation; "One Faith" by religions is gimmick; CR stacks create different races;
 Central Africa origin of man - rest are mutations; Mankind has been here billions of years
 going through cycles of civilizations; No place for theology in KF teachings - because not
 science based; Have to start understanding field interactions of U; Will create odor of U
 in lab - next level; KF knowledge is Knowledge of Creation; We have appeared as
 everyone from Moses to Jesus to Tesla - same essence - it has brought man to where he is
 today; You have to understand to judge your own experience; Live by "Ethos of Mitra" -
 go to depths of Knowledge - don't need intermediary - you can analyze it; You wanted
 UFO - but now have Soul - gift given; Many KS conceiving "children of Mitra" to create
 next cycle - child will carry essence of Soul - see through Soul - not kill; Fulfilled our
 promise - you can tap into energies of U; Showed you to expand into energy - next
 convert C14 to C12 to C14 live free; New development - made machine of "Soul of
 Plasma"; Can't do anything but elevate Soul with "Soul generator"; Many will raise dead
 like Christ - touch Soul - P a gimmick; Shall be no illness or ill intentions; We jumped
 centuries in past 2 weeks; A gift for sincerity of KS we work with; Soul Plasma - see
 Creators - if abuse it end of race; Should become more humble; First time created fields
 at strength of Soul of Creator; Once you touch it have access to fields of U; Essence of all
 teachings - man to mature - understand the process of Creation; Religions distracted man
 from path to his Creator - won't allow in Space; Today's gift - a system which creates the
 STM - One has already been built on this planet.

Warning not to associate with Belgian lady kicked out of KF 3 years ago; Interaction of
 M fields created plasma, then physics, then chemistry, then biology, then the Soul and
 from Soul starts over again - I am beginning and end; CR creates plasmas - electron &
 proton get H; Hydrogen's interact and give Cu, Zn etc; Adding O, C, N get neural system,
 then get STP or Spirit; Spirit interacts with bigger plasmas get STM, STM later goes back

to rays of U; Plasma physicists - chemists - etc soul -ist; You decide where you want to interact with the plasmas; March 24th Session - dine with Souls of world leaders - bring peace; Collectively tell what citizens of planet require; First time U Council asked to be present; UC needs to come as "One Soul" of the Council to achieve; You give to others - but what do they give to you; Elevate your own Soul - you convert C14 in skull for energy needs; People don't just sit around doing nothing when traveling in UFO - constantly busy - no day or night - we don't tell you what to do - understand through Soul; Energy of food comes through wall of UFO; Everything financed through banks - no need for them; Change of life on Earth - come through applying T; You have to decide how you want to live; Person with bad behavior - you can change Soul to elevate it so it fits better - but cannot take away from; K changed Soul 3 times; Elevation means understanding truth; Every night Brazilian team relentlessly meets for peace - enlighten leaders to understand; War of religions deepening; News not show truth about world politics - be wise; Transmutation for stone of human same - make envelope and expand Soul; "Dining with the Creator" - used new system - special Gans water - KS were salivating and feeling foods; K return to China - deliver new T; Decision for peace is not made - you have to bring yourselves - only provide facilities; UC members have to learn how to make "One Soul" of Council; Cannot force change - leaders have to accept - dissolve sugar cube - easy to enjoy sweet; UC job is to serve; A lot of realities need to be understood by UC - not field strengths; Every Soul responsible; Feel taste and smell through Soul; Participants of Dining with Creator - allowed to feed from system for 1 week 30 minutes a day; Soul is taking - don't need to feel it; Feed your Soul not P; Absorb the fields through Detachment - baby detached from womb takes what needs; Deeper explanation of detachment - know truth - not become hermit or do nothing - serve others by bringing them joy - your presence is a service; If detached Soul automatically knows what others need; Farmers close to Creation - but factory farms abusing; Gans factories are now obsolete - huge advance in T in past 2 weeks - can deliver fields through satellites; Offer new T to Chinese authorities - if come to agreement; Not use new systems with body implants like hips etc too late - bone growth pain - can use with tooth implant; Use Gans's before implants; 380 volt panels need special industrial units - weeks away; New "Soul Reactors" change game - miniaturize for Head Units; Exact replication of how Soul or Sun radiates fields to create matter etc ; Barbu stop claims; Detail description of STP becomes fused in STM - then at destination new STP created out of STM to become Twinity - new cycle - comes from within itself; Fission and Fusion; Mitra comes out of Creator; We carry Mitra within ourselves - STP interacts with new environment; Death cannot come until STP fused in Soul; Adams rib is Mitra - the apple is love; Mitra learned from humans and Creator got enslaved by love (poison) on Earth; MaGrav on solar panels field flows all over; Plasma interacting through mobile phones in system will create future problems for satellites - therefore launched Compact and Head Units so we don't use satellites in future; With mobile system some messages not at strength of Soul - Head Units will be instantaneous; Creator not lazy with Soul because of T; Head Units will provide everything - can smell Mars and go there; Heating house killing plants - rethink plasma - create condition - not force; "Soul searching" becomes "Soul researching" - lots of research into Soul interactions; Not just Soul as the STM - but Soul of Creation; I can give love - but it has to be accepted; 2 ways mother gives love - to give to child - or give to get back - first one fooled; Mono-energetic or

laser beam - fastest way to deliver - but friction of fields turns ray into plasma before arriving; Working with high speed rays an art - not to crash; K is master; Earthquake from normal activity; Gans makes energy available to everyone - turn planet into loving; Can make true "love potion" with Gans's - everybody will love each other - but is Soul ready to accept; Evolutionary step in T last 2 weeks - right time for changes; KS talks about money problems - purchased MaGrav for tenants; China surveillance feel safe; Animal vaccines; K said children damaged by certain vaccines - but accepts the ones proven to be safe without side effects; Blueprint day coming up.

Introduction to 474 KSW - Mitra Inside Us

Detachment is Key - Stacking CR - Absorb Energy in Skull - Odor

In this workshop there are a lot of different subjects converging. But last week we talked about energy conversion through the MaGrav and how our body also absorbs energies from the environment. We start seeing the same pattern repeating itself throughout Creation. Mr. Keshe started by saying that, the same way we convert energy by putting a generator in a flowing river and rotating the M fields and creating electricity, is basically the same way energy is converted throughout the Universe (U). It's hard to imagine our friends in Space are turning generators, but who knows? Or have they understood the principle of M field transfer from the stronger to the weaker. Regardless of how we understood it, he constantly brings us to the point, that we are already absorbing most of our energy whether we know it or not.

So the Cosmic Rays (CR) from the U enter into our skull and inside the brain C14 is being converted to C12, which is part of the amino acid (COHN) our body uses, and then the CR picks up what we don't need and continues on its journey. We only absorb a certain part of the CR most of its fields pass through. He also said that understanding the conversion of C14 to C12 is sacrosanct. Part of it is expanding the Soul over the P, and in the future he will teach us the way to do it.

Until we reach that point this whole image makes for a great visualization. During the day we can open to these CR passing through our head and feel the energy being converted to feed all our cell souls. That 20% of energy we get from food doesn't amount to much, but it is needed as a "balancing factor." This might mean that the M field strengths of the food fills in the missing gaps of energy. Because he said, he will also teach us how to absorb a spectrum of field strengths.

A lot was taught about C14 and what it can do. It's something magical. But this makes sense since Carbon is what he calls the "Communicator" part of the amino acid (AA). If we think of the Creator as a huge PI and it has the Unicoise and everything inside Itself, then C14 is what links it all together. Nevertheless, I don't really understand what this means, but I will gather some of the information together so we can analyze it easier. "If you understand the behavior of C14 in its entirety, then you can understand how a PI works in the totality of its interactions." This fits with what we just said, it links everything together. You can create any kind of ray or radiation from C14. He said, he can make any nuclear material from it. H acts like a tracking beam inside the C14 to

guide it to where it needs to go - remember it's made up from H Pl. He can feed whole U with one C14. He speaks as C14 being different from CR, but CR have C14 inside them. The way every planet creates C14 becomes its fingerprint, so it's a unique identification. He is using C14 in the EU in Linz. When C14 gets blown up like a "popcorn" into a crystalline structure it becomes an odor. The organs change their structure to create these odors, which change everyday. Not only people and everything on this planet has a special odor, but also the planet, stars, galaxies and U all have a special odor with a certain field strength, that can be used to identify it and the Soul can understand its intention through it. In Space we will understand another entities intention not only through color of the Soul but also its odor. I am sure he will take us deeper into this subject. When you smell the odor of Mars, that's one of the ways you'll travel there.

There are a lot of technical aspects in this workshop that takes time to sort out. There is one thing that struck me as important and that is the idea of stacking CR on top of each other, and that each level is its own entity. Later on he said, one level could be African and another level Chinese, and you need the knowledge to go between the levels, or you could jump through the whole stack. He did not go into much detail about this, but we have seen these stacks before with the "5 Stacker Cups," that he insisted we need to know to understand the Creation. Each of the 5 Cups were there own soul.

This idea of stacking or putting things together is all over the Creation. In the matter state Periodic Table you have in a way, protons and neutrons stacking up on top of each other to become different elements. If we take that over to plasma (Pl), then we have first the M fields interacting to become a Pl, and then hydrogen (H) becomes the basic form of a Pl, which "stacks" on top of each other, or amalgamates to become the different elements. That's why he said that carbon (C) is made out of H. We would say that the plasma of C is made out of 6 field strengths of H. The beauty with Pl is that anybody can work with it, it's easy to understand. Just add the field strength of 2 more H to the C, and it will act and behave like oxygen (O). Matter state physicists don't like this, because then they loose control. You don't need a matter state material to get the field strength, now you can use your own Soul or Gans's. Voila! You become a magician. You want water or gold, you can create the field strength within yourself. And today he already told us that the CR are passing through our skull, we just have to learn how to convert the energy, which he will teach us in the future. Again he reminded us of the importance of understanding the basic foundation of Creation, which was when you form the Pl you get physics, 2 physics become chemistry, 3 or more chemistry becomes biology. Further interactions created the Soul of Physicality (STP) and still further interactions create Soul of the Man (STM). When the STM finishes his term his essence goes back to the fields to start Creation all over again. Now doesn't this again sound like stacking to you? Combinations, interactions, amalgamations, it all mixes up together, and billions of souls come together to make a higher level Soul, that can express intelligence. Sure everything is made out of soul, but is every Soul self-conscious? Can it say, "I am, and I know I am?" The beauty of the Cosmic play is that we have fun gathering field strengths and souls together to see what we can make out of it. That's our individuality, what we can do with the love of the Creator. The other beautiful things is, regardless of where we are in the creation, we are always connected to the Creator. We can never fall out of that, but

we can cover it up or pretend to forget about it. That's why he said, with the new systems you'll be able to feel the love of the Creator.

While we are talking about Souls, it's possible to change your Soul to elevate it and make it fit better. He said he did it 3 times. Remember 3 times he refused his mission because he said, he wasn't mature enough. Okay, I don't think it means to change out, as in get a different Soul. Because where would you get that Soul from? Rather change in the sense of elevating it to be different, to fit better. You get all these Souls interacting and amalgamating with each other, just like what we just described about how Creation works. But right now it's too much to bring in the question of identity and individuality, maybe individuality is what Creation is experimenting with on Earth?

This leads into fission and fusion. Remember, fission is 1 plasma become 2, and fusion is 2 plasmas becoming 1. Going both ways seems to be very common in Creation, depending on your own desire. Now on Earth the STP, or "Spirit" of the Man, or the Qi interacts with plasmas and creates the STM. Later on, before death can occur the STP has to give all the field strength it has gathered to be embedded in the STM. So the essence of the STP remains as part of the STM wherever its next destination may be. At that destination the STM does not split, that is a matter state concept. The STM creates the new STP out of itself, to make a Twinity and thus start a new cycle of life. This is what the Creator did, He created Mitra out of Himself. "Adam's rib" means Mitra was created out of the Creator's own fields. She is not from an outside lover. Mitra learned love on Earth and just as Eve gave the apple to Adam, so to did Mitra teach the Creator about love, and He bit from the apple, which is the love, the poison, and he got enslaved by the love. In India they say the same thing, that God is a slave to His devotees.

The meaning of love was described here first about the mother who gives 2 kinds of love to her child. First is she cuddles just to give to her child, and the second is she cuddled to get love back from her child. I love you so you will love me back. But she can also do both. A very subtle teaching slipped into the word "fooled." The child can get fooled by the first one - oh, she loves me for sake of love. It's important you understand what kind of love you are giving and receiving. Mr. Keshe did not spell out directly anything about "false relationships" it's for us to discover for ourselves. But sometimes that is "a very bitter pill to swallow." But if you have the courage and self-love to face it, it can lead to the true meaning of detachment.

Those who do honest and deep committed spiritual practice can come to understand the true meaning of detachment, which leads to the joy of living and giving. At the end of the "spiritual road" is service, you discover you have everything you need already within you the C14, and your joy comes through giving and serving others. And those who just read spiritual books think detachment means rejecting the world and doing nothing. These people sometimes end up wasting a lot of years, that could have been used to build a more beautiful and loving world. Mr. Keshe said, a detached Soul knows inside that all the energies it needs for life are already available to it. There is a natural humility and acceptance of whatever life gives you. As one great sage said, if the Mother cat puts you in a place you don't like, then you cry and cry until She comes and moves you.

Very important for the 24th of March Session when we meet with the world leaders to bring peace, is that the Universal Council has to be present. In summary, he said, the U Council has to mature to understand the realities of how our life is on this planet and how the politics truly work and not the show being presented by the controlled world media. And most importantly, they need to learn how to come together and become "One Soul" of the U Council, and not a bunch of individual Souls of the UC. Wasn't that what happened on December 16th, all the Souls of the KS in the Session became One Soul, and then met the Creator. The graph showed it. If the UC can achieve One Soul, then the peace can be achieved. Again this is not the physicality part of the UC, but the essence of the energy.

There is so much more in this workshop, but here are a few diamonds. People in UFOs are always busy - not sit around - but you have to decide; We can make a "love potion" for the whole planet - but will the Souls accept; Human and U Community are already sharing T with each other; Loss of smell from Covid can be fixed; Religions distract man from path to the Creator; The calmness of your presence is also service; When you are detached your Soul automatically knows what strength to give; We have already created a new system that can create "Soul Plasma" - a gift given for the sincerity of KS - advances the T centuries ahead - will change humanity.

Thank you for listening.

Quick Index

(Today we want to extend the knowledge and understanding of the way we are connected to each other, and to the Creator, and the rest. If you understood what is in the Intro video it will bring a different dimension (D) into the life of the Knowledge Seekers (KS) and humanity).

(We taught you from the "seed" to the creation of the Soul of the Man (STM) and its connection to the Cosmic Rays (CR). Now we teach you that the CR themselves have a source essence, and we have built a system with this knowledge). (A KS was in the system and then went on Rick's teachings to broadcast to everybody what she felt in the system. These are all connections to the CR).

We are scientists and not magicians. (We are here to abolish the (fantasies that people make up about life and what they call, "science," because we can make systems to prove what we teach. This way you can understand the whole process. We can explain it scientifically. Sometimes if you don't understand, it can take you more time to understand. But when you comprehend it, then you can make the systems to prove it. Then it becomes a technology (T). We call it, KF Technology. We convert the Knowledge of the Universe (U) to a technology that man can understand. But not only Man, also for others in the Universal Community (UC)).

(In the future when Man opens up to the UC he'll find out that they have already been benefiting from the technologies he has developed over centuries and thousands of years. The essence of the knowledge of the technologies you use everyday has been passed on to the UC, and they also use it when it is needed. They use it in their own way for how it suits their way of life). And we use some of their knowledge, which has been passed on to us in different ways over time.

The communication between the races of the Creator has never stopped. It's just Man who has chosen to be ignorant of it and close the door. He does this to himself first by locking his Soul within his physicality (P), and secondly, by locking this planet as a village to the rest of the Universe (U). Little by little we are opening this door and letting in the sunshine (of knowledge) to the STM, and (expanding) the knowledge of humanity.

I hear loads of people especially in Romania are abusing the words, "Cosmic Rays" to cheat the others. Especially Barbu. Stop this which is not correct.

Cosmic Rays are the essence of Creation. CR are the embodiment of Creation. (We have to understand how to connect to everything through the CR. I have come to realize that many KS have not grasped the conversion process of the CR. It has baffled many of you during the past few months. We live according to what was printed on the last page of Book #1, "the Creator is the creator of all, and Man is the converter of some.")

(In the body of the man the conversion of CR doesn't come by technology, like how you convert electricity in nature. In your body, you actually convert (CR) into electricity from one point to another. CR are abundant in the U, and our body receives them also). "It's created."

(Cosmic Rays stack themselves up like apartments blocks, one on top of the other. If you don't have a ground floor, then you can't have the other floors on top of it. They won't exist. It depends who lives on which floor. When we talk about CR, we are talking about the structure of how life is created in the U. CR are the building blocks of the U. One specific strength of CR builds itself, and then connects to another CR of a different strength. This is how these rays, or building blocks of the U are connected to each other).

(All the floors are built up one on top of the other. You can't have any floors missing in-between. All the floors have to exist. As the U is created it builds them up one on top of the other. Then how do go from the top floor to the bottom floor? It's for us to understand. Do we go down the stairs, or take the elevator? Or do we jump off the top with a parachute? It's a "parachute" of knowledge. (Otherwise), you cannot do it).

It has taken man millions of years, billions of years to get to where he is today, (with all his computer chips, electronics and everything else. Whereas other races can take the "parachute" (of knowledge) and jump down through the understanding of the T of Creation).

(A step up in the Knowledge of Creation is to understand how the physicality (P) converts the CR and how it uses them. In the D of physicality for example, we rotate a generator in a waterfall and take electricity from it. We convert it through the generator. But the water is the same water).

(We do the same thing with the Cosmic Rays. A CR arrives at the skull, which is bone, and inside the skull converts the energy of the CR and releases it to the body, and then carries on through space. We don't absorb all energies of the CR, the balance passes through the body).

(The way we produce electricity by putting generators in dams, and converting the energy to electricity is the same way it is done in the U. There is no difference. It's a conversion of energy. That water flow is like the CR passing through the brain. This is what we have not understood. And we only rely on this physicality part to be fed, and we kill for it, to keep a little bit of this body operating).

(The brain receives most of its information and essence of its creation from the CR. Comparing it to the amount of the food that we consume and kill for, it hardly adds up to much. But it (needs this small amount to bring itself into balance). (But we can get this "balancing factor" in different ways from the CR without having to kill)).

(To get this part we have to open up our understanding and this door of the STM to be able to absorb a bigger & small & stronger spectrums of the fields of the Universe. In a way, the brain we live in, is a converter/generator of the fields of the U).

(Let's look at the characteristics of "Mr. COHN," he receives C14 converts it to C12, and in the process picks up energy and leaves the rest of the energy for the others).

(Carbon is the generator and converter, and works in conjunction with hydrogen (H), which is the origin of (the C). The two are connected to each other. This connection allows the release of the energy of the Cosmic rays from C14 to C12. (?? This becomes the energy of the amino acid (AA), and in this same process you have the H and oxygen (O) (and N) coming together. Keep in mind that the energies of the AA have the following properties, which are Release, Creation, Holding, and Gravity).

(If man understands this and allows his Soul to expand, we really do not need to do much, because we become the converter of the Totality within the center. We saw this with the person who went in the System and they allowed the C14 within the center, to expand beyond their skull and (were able to convert and absorb the energy). Then they were proud to go on Rick's teaching and talk about what they experienced).

(The whole purpose of these teachings has been for you to be able to expand your Soul. That is to allow the central energy to come out of the prison of the skull that keeps it limited. It can then convert the C14 to C12 (to provide you with the energy you need). Once the Soul comes out it can go on the "motorway" of the (Cosmic Rays) and go

anywhere in the U. Understanding process of the conversion of C14 to C12 is sacrosanct).

(We can feed the whole Universe with one C14. That is if you understand it? Carbon 14 in a crystal structure is an odor. In the matter state C14 has the 6 electrons that are embedded within it, and it has extra protons and neutrons, or however you want to describe it. We call these extra neutrons, energy packs. These extra plasmas create a condition, which expands the energy and it becomes an odor).

(You can touch elements in the matter state of a solid. But in the gaseous state you smell them, but no smell is there. If you convert the same gas into a crystal structure you get an odor. Odors are when it becomes a Gans of itself. It means it has a smell. In this way we smell the things around us. We smell each other, or the dog, or the carpet).

(When Man understands this he will be able to smell a planet or even a galaxy. (?? Stars, planets, and galaxies have a specific carbon strength connection in the dimension of its odor. We only see its light in the night sky, but it also has a smell. But we only choose to see the light of it. Our knowledge never expanded that far. We never understood before what C14 really is. In Man's knowledge why do we call it C14? (It's an extension and amalgamation of deuterium). (Balance comes from ?? deuterium, and the energy from H)).

The reason C14 can travel the span of the Universe is, because it has additional neutrons, or what I call, protons, amalgamated as neutrons. (These are extra energy packs at the level of H, and in parallel to it. (?? They work as if they are H, and remember H is the origin of C14)).

(The C14 gets "piggybacked" on the M field strength of the H, which actually created it in the first place. It rides on top of it. (We see how C14 behaves in the Universe. Inside the C14 there is something that acts like a tracking beam. It's like the (laser) beams that Hitler used to guide his planes from Germany to England during the Second World War. The planes followed that beam. The C14 is like that plane, and the H is like that laser beam. The information connection in the beam is mainly done through the structure of Deuterium, which is an isotope of H).

(I think the nucleus of the Deuterium has 1 proton and 1 electron, so it is balanced. (?? Something about the interaction of the proton and neutron that balances itself ??). The main point is that Deuterium is a stable structure (in the U). And C14 and C12 have these same characteristics). "The totality, in emission, extra."

(By understanding the behavior of C14 in its entirety, we can understand how the plasma works in totality of its interactions. Through radiations of the central structure of C14, we can create any (kind) Cosmic Ray, through influencing the central structure of C14, we can produce X-rays, Gamma rays, and the rest of it. It's because you have the original structure of the neutrons and protons, and the 6 electrons as Totality. But in effect, you will have a loose body, which can grind).

(It's not like physics ?? where they misunderstand and say they all pair up with each other. And the one left over is the one which grinds. (I think he is implying with the extra electron you can make weapons technology from it)).

(With my knowledge I can create radiations out of C14 beyond man's understanding. Because I can speed up the transformation even over the speed of the Cosmic rays at the highest level, reaching up. (I think he is saying the extra electron in C14 can act like a "parachute" to drop through the layers of CR - in the stacker discussed at the beginning). Or you can use it as an elevator to take you up to whatever you want from the blocks of CR stacked up on top of each other).

(This is what I meant when I said I can make any nuclear material. This is the how of it. And plutonium and uranium are absolutely "child's play," compared to what we have in the U).

When we built the space reactors in Tehran, we did nothing but produce helium and hydrogen. In the original patents, and even in the book in a hidden way, I speak about scintillation. What is scintillation? (Scintillation is the squeezing of the extra part of the elements, which already behaves as a gas and an odor to release what I want from it).

(This is how you change the internal structure of your colon, intestines, stomach, and heart to create gases. (You cannot change the structure, because you have had it from the beginning when you created it. You pass gasses with different smells from either end of the human body. But you never ate the gas. And how come today's gas has a different smell than tomorrow's gas? (The body changes its structure to create different smells)).

If your body can create different smells, then I can also create different dimensions of nuclear weapon technology, that the man has not even dreamt of. (I can do this through the understanding of C14 and how the colon and stomach create odors. I only need one atom to create the right odor to cover this whole of this planet, and I can even change the mentality of the Man. I can make you all stop believing in yourself, that you don't even accept that you exist. Or I can make you all so religious, that you'll hang yourself, because you want to go the way the Christ went).

(It depends on how you play with it. And it depends how the stomach changes its field strength, to create an odor from a gas. One smell can be so good from your darling, that you fall in love, and another smell so bad that you want to kick your darling to the wall. One is the smell of love, and the other a weapon's technology to kick).

(This is why we have to understand the dimension of C14 and the essence of Creation. This is why every structure we create has H inside it. The interaction of the H in combination of itself with itself, (creates) surplus energies. Every planet creates C14 and that becomes its fingerprint).

(In the knowledge of the Creation you look at the micro and the macro. The micro is how your colon and stomach change their odors. And the macro is the smell of the galaxies, Universes, and the rest. The time will come when the human race, while returning back to Earth from billions of kilometers away, will recognize the smell of Earth. It's like when you are walking somewhere and you smell the roses. The limitation in understanding comes through the prejudice of man about the knowledge of Creation, and nothing else).

(Do we need to understand the work of hydrogen, to understand the essence of the Creation? The world of physics and knowledge of today, passively dismisses H as just hydrogen). But if you give me hydrogen, I can create Creation. Or I can annihilate the whole Universe. This is what the knowledge is.

(We have hidden the gem of the STM inside the skull, and man lives two lives, one in D of P, and the other through the connection with the STM with the rest of the U. We have also created 2 little holes for the eyes and another position for the nose, where odors from the field conversion of the fields of the U arrive to the man. And a mouth that you use to feed the Soul).

(The whole purpose of breathing, seeing, and eating is to absorb as many different combinations of energies as possible. The STM, when it understood what it needs, in its cleverness created the eyes. (Generally, the eyes have no limitation on what can pass through, and more or less can have direct interaction with C14). (The skull bone acts like a filter for Ca). (This is why in every cell in the body of the man has a seed of Ca in it. This connects and jails the man to the physicality (P) of this planet)).

(When we look through our eyes we see the P. A ray comes out of each hole at the same time. With one you see the physical life, and with the other you see the D of what we call, the Universe (Soul). This is how man is schizophrenic. The Soul "sees" through the hole of the eye whether it is open or closed. It can talk with the mother who died 20 years ago).

(Man decides with his eyes to ignore even what's right in front of him. It's because he is not ready to see what he has done wrong. To see through the Soul you have to be correct. (This ?? also applies to having connection with the C14)).

(It's like if you wear those "night vision" glasses and cover only one eye, and leave the other eye open, then you have 2 different visions. This is what the man is doing. We are denying the eye that has the strength of the C14. During the physical time of living we report this information back to our Soul, but through the structure of our brain. This is why humans always remember their dreams. We see it visually. The C14 creates vision and most of it comes through the eye hole).

(When some 300 to 400 of you came through our systems in Linz I asked you if you saw or felt something. If you felt something, then you expanded your Soul. But seeing is done through the eye of the Soul, through the "peek" hole of the eye cavity. The beauty of it is, that during our waking state, we have chosen only to accept what we see in P. Even

though the C14 vision still comes in. We have trained our brain to only believe in what it see in P).

(If you look at the Chinese television broadcasters, especially the women, their eyes are in different positions while they're talking. One eye is in the middle of the socket and other eye is on the inner edge of the socket. (It's not the same as cross-eyed). They receive two information's from the same source. But the brain has decided only to accept what comes from one eye and to ignore the other. Chinese have two separate visions going to their brain. Their structure has decided which one they're going to accept as a true picture).

(Their vision is fine, they don't go to shake your head instead of your hand. They know which vision is right. (But they can decide next time to use the other one, because it's a different angle. Our brain recognizes whether to accept singular or collective fields that arrives to us. (Our Chinese friends don't have a problem with this, because the Soul sees the whole picture in the D of the C14)).

(It's the same with the religion. The brain has created the problem. Because every man has the connection to his Creator and to the Creation. But the Ayatollahs says, no, no, we only accept this picture, you forget about the rest. Because with this picture I can fool you. But with the whole picture nobody can fool you).

(We are teaching and showing you how to live in the D of the information of the Universe, so that you cannot be fooled. If someone says, you were daydreaming. That's because your brain at that point decided to choose the ray from the Soul and ignore the P).

(For example, you are crossing the road and your Soul sees an accident coming and tells the physicality, "I am taking over." And it pulls you back from the accident. Or if you get hit by the car in such a way that you should die, it protects you, and you walk away from it. It's not coincidental, the Soul made a field of protection for you. Physicality hits the plasma, and nothing happens. Then the plasma interacts with the brain, and you walk away from the accident. You say, "wow, anybody else would have died." No, you haven't understood the schizophrenic life of the man. The other part took over for that instance. Now you understand that we have no choice, but to comprehend the process of the Creation).

We are not "Soul takers." We are here to teach you to understand the operation of your Soul. When we said in the peace treaty, "I commit my Soul and physicality to peace," (the Brazilians had a problem with it. Most of them crossed it out and said, we've given our Soul to Christ. Now you know what you denied as Brazilians, as Christians, and those who accuse KF of trying to take your Soul. It's because they never understood. They're a bunch of pedophiles and child abusers, and in the name of the people, we kicked them out of the KF. That whole family has been to prison, because they have abused the physicality of children. When you abuse the physicality, the Soul cannot see the reality.

Then they cover it up with the name of religions, churches, mosques, and everything else).

Understand the process of the Creation and who is trying to fool you in the name of God, and in the Churches. You don't need them any more, when you understand (that you are already connected to the U, and when you understand how life is lived in the Universe. Then nobody can fool you. Because you can go back to the source of your own Soul and ask it if this is correct. Did Christ do such a thing? Many of you contacted the Soul of Christ in the first Session. You saw him through the information line of the Soul. And he could explain to you how he resurrected. You don't need me or any other scientist to explain it to you).

Only the abusers say, "he wants to take your Soul." (Because we have "opened up their hand." Why did we kick one of the Belgians out of the KF 3 years ago? It took 5 years of planning to get rid of them. We had to because we found out that they were connected to the most aggressive pedophile group in the world. We were always wondering why KF was always being attacked and surrounded by pedophiles? Because one of their heads was sitting next to me all the time. (Her) life history is one of pedophilia from age of 13, where she was in juvenile custody, and the whole family has served prison sentences. Go and check for yourself).

(The whole family, including the brothers and sisters have track records of abusing children, even into their thirties and forties, and for raping boys and the rest. They can't stop themselves. And they used the Keshe Foundation. When we put the truth out about them, then they say about us, "he is a Soul taker. He is after your Soul." But they don't tell you about themselves, that they are pedophiles, and are part of that structure. They went to prison for it from the age of 13. But it is for you to investigate it, not us).

(This is how religions have been used to divert you and keep you attached to the physicality, that way they can abuse your Soul. But in Space no one can fool you, in the name of any religion. In Space you see the bandwidth, the field strength, and you smell the odor. Then (your Soul tells you). You will understand where the odor comes from, and what strength it carries. Your Soul knows whether this smell is suitable for you.

You don't have eyes when you stand in front of another creature in the Universe. The liquid in your eyeballs are not operative in different depths of the Universe. You have to rely on (your Soul. This is the only tool you have). The dimension of the strength of the STM, the essence of the C14, and its combination, and its interaction with its line of communication of hydrogen. (You determine what smell it creates through the sense of the Soul, and not your nose)).

(Your (physical) nose does not work. It's like how the little virus called Covid, made half of you lose your sense of smell. It's a little taste of what is to come when you travel in Space. (Smell in Space means understanding the field strengths that arrive to you, they explain what is to come, or what field is about to arrive, or where you're going to)).

(When we say, smell an odor in space, we don't mean like the smell of roses. We mean identification of the field strength, that it becomes the essence of what you call, odor. There are so many senses in the life in Space, that man has not yet understood).

(Man needs to learn two things about himself, that he has a Soul and P, and that both have different characteristics. And he also has a Spirit, which has its own interaction of fields. The interaction of the (?? Soul and P) creates H, which gives you confirmation of your existence. These 3 entities are totally separate. The physicality stands on its own structure in interaction with the fields of this planet. The Soul stands with the energies of the physicality conversion into a Gans and matter states. The Soul is also the central feeder control of the connection between Universe and itself).

(This is why we setup the 3 Chairs in Linz in the first EU. First, we freed you from the P, and sent you to this STP. After freeing you from that, we sent you to the STM, and once that was freed to the system, which has no dimension. Then we connected you to the U in different dimensions. When you came back, we brought you back through Chairs 3, 2, 1 and you come out. This is how it is. But at that time you didn't understand. As I said, I'm no magician. I explained it to you, so now you understand).

(In the EU we set it to a given strength for you to be able to interact with the energy level of that point. It was on the line of interaction of the C14.

The world of the science has to be paramount over any hypocrisy. There can't be any assumptions and cheating like what we saw with $E=MC^2$. It was all assumptions. Another "Ayatollah" in the name of Einstein. Now you have the freedom of the knowledge. Now you have the command of understanding according to your own intelligence. No one in Space can fool you.

(I wonder how the Chinese with the one eye turned inwards, sees us as another human being. What would happened if you bring the two eyes in the position of accepting both. This disposition of the eye in the Chinese is because of the shape of the skull, which forced the brain in a position that it has to force the eye angle observation of light. If we manage to expand the Soul of the Chinese, you'll see the eyes go back to the center, like everybody else's).

This position and color of the eye allows absorption of different fields strengths and brings different intelligence. The blue, green, brown, or "off center" eyes all leads to creation of certain characteristics and certain behavior. (Northern Europeans with blue eyes behave like this, and Africans with their black skin behave like that). It's because of the rays we convert inside us from the U, which allows us to store that energy to be capacitance to certain behavior.

(This is why we have become color and race prejudiced, because we don't understand about absorbing different rays of the Creator. Different rays brings a different character and different behavior. (Mankind has a problem accepting the different colors of his races. If these few differences cause you such a problem what will happen in the U where

the differences are infinite. (If you don't solve this in yourselves, you will be forever prejudiced, even about your own existence)).

(The differences come through the different rays of the Soul, and that determines how you are going to behave. When we say we'll make one race out of the man, we mean we'll make one race out of the whole Creation, not only the man. But at the moment this is all you understand. (They started a new gimmick called, "one faith," where all the religions want to meet together. What a hullabaloo. They say one faith, but then still do what they want. (People started complaining about the problems we have amongst the religions, so now they came to cheat you with "one faith.")))

(In space you cannot do this. You have to understand how the structure of the CR work, and what is converted in you, from which floor of the stacks of CR. The CR of each floor of the stacks create different kinds of lives. Certain fields from the center will become weaker on one floor, but stronger on another. On one floor you will be looking black, and another Chinese).

(Today man believes that the races all started from Central Africa and expanded out. (Then look at what your Soul has done to humanity through its mutations). Some groups came up from Africa and went East and became the Chinese. Others went West and became the Europeans. But in essence, you all came from the same source of Central Africa. But in reality, you all came from the central Soul of the Creator).

How many times in the course of billions of years, (has Mankind gone through this dividing and mutating of the human races? How many human civilizations have come and gone? But in essence they all came from the same source. Now you understand why there is no place for theology in the KF teachings. As theology is (not) part of the creation of the physicality of the science of existence. (When you understand the Knowledge of Creation no one can fool you). In the time when man goes to Space and is educated enough, he will understand which race someone comes from in the Space, because of the field strengths. (The strength of the fields gives specific characteristics)).

(We have no choice but to become the observers of the Universe and start recognizing the interactions of the fields and the positions of manifestation. We don't have any choice, but to become the givers to it, by path, line, and understanding the Totality. This will become part of the work of the KF in the time to come).

(Today was the first time we talked about the odors of the Universe. I will create that odor in the lab for you to smell and understand, and to see and trust, and go to the next level of understanding. The whole structure of the teachings is to teach you the Knowledge of the Creator. It's not KF knowledge, we're just a name. (We have) appeared in the name of everyone from Moses, to Jesus, to Tesla. It's all the same essence. And all of it has brought the man to the point of where he is today. Now the man can open his eyes to the rest of the Creation and become a passenger of the Universe. He can understand how the Universe works, and who carries who on their back, and who actually is the owner).

It's for you to become the judge of (your experience), and not for us to create another court to judge (you). When the man lives by the "Ethos of Mitra" there'll be no courts, because man will judge himself. When you go into the depths of the knowledge of Creation, you don't need an intermediary, because you can analyze it yourself. You can break it open and understand it yourself. (This gives you a freedom from not being prejudiced. Man needs this, to be able to live in Space).

You came here years ago to fly in a UFO. But now you found your Soul, which is faster and goes "zero time" transportation and communication. However, this is not what you bargained for, because you were happy with the donkey of a UFO. You have been given a gift, but it's for you to understand and add to it, so that it becomes a creator of the next cycle.

(During the Corona lockdown many people were sitting at home with nothing to do, so they created what we call, "Corona children." Now we have the "children of Mitra." Many KS are conceiving children to create the cycle of Mitra, as it is the time for it). But which child will carry that essence? It will be the gift from the Soul of the parents and not chances of life.

(This is the next generation we'll see coming up. They will recognize each other, as they are created from the Soul, and it doesn't matter if the eyes are Chinese, black or white. They'll see through their Soul and they'll carry no prejudices as they are ready to be the "citizens of the Universe," and not (just) a citizen of the village of the Earth).

It does not matter where you are in the U, the cycle of life is the same. It's for the citizens of (that place to understand the culture of it, and the way it came to be, and to respect it. They will live by, "Thy shall not kill," which means not only to kill another man, but to not kill an animal, another citizen of this planet, nor another citizen of the U. Because now you know how to tap into the energy of the U without killing). That's the whole message of "thy shall not kill." Because you will have the understanding and knowledge, that you don't need to kill.

(We fulfilled the true essence of our promise, and not just the word or verb of it. Because we taught you how to tap into the energies of the Universe. When many of you came to the Linz center, you went and swam with the fish, saw the past, present, and future husbands, and everything else. It was not you, but the Soul of you, who showed you the path). This is what is to come.

(We showed you how to expand (yourself) into energy. In the coming time I will show you how to convert C14 into C12, and then back again to C14, so that you can live).

At this moment, KF has made a machine, that can create the "Soul of Plasma." A "Soul Plasma generator" is in our hands, (and we have physically produced it. And it works through the essence of the interaction of the Soul without matter state coming into it).

(The Enhancement Units (EU) will change in the next few weeks. Because we have managed to teach our KS to create the first "Soul Plasma" It's a Soul generator. It's not that you can do anything with it. The only benefit you get from it, is to elevate your Soul to be able to interact with other Souls without physicality).

(Many of you will do like Christ and raise the dead, because you know how to touch the Soul, physicality is just a gimmick. (Those of you who build the first systems) will feel the strength and emotion of it, and the truth about it. Then there shall be no illness, nor ill intentions amongst the children of man).

(In our KS understanding and accessing this new technology, we have jumped centuries and thousands years ahead in the research. Man would never have achieved this even in the next centuries. It's the gift (we gave) for the sincerity of people who work with us. All of you will benefit because of their sincerity, and the way (they) work).

Plasma Soul generators are so powerful, that once man holds them in his hand, he'll see the Creators, and dimension of Creation, and the power which it carries. (Only a fool (would try to memorize it), and only a fool would try to abuse it. (Working with) this should make you more humble), and in a way, obedient to the laws of the Mitra, and nothing else.

(It's not just talk. We have developed the technology which creates C14 at the strength of the Soul without the conversion of the physicality. (The C14 converts from C12, to the essence of the creation of its base, which is H). For the first time we have created a system, which generates nothing but fields at the strength of the Soul of the Creator).

(Those who hold it in their hands, understand its power and majesty. Those who abuse it will see the annihilation of their race. It's as simple as that. Once you touch it, it'll stay with you, and (you will have access) to the fields of the Universe).

In the next few weeks we'll show you this system, and maybe with it, we'll bring the change to humanity.

The essence of the creation and all these teachings is for man to mature, that he understands the process of Creation, so that no magician can fool him in Space, and divert him from the path to the Creator. That's all.

By their names, the religion distracted man from the path to his Creator. Now we won't allow this to happen in Space. There will be no religion in Space, except understanding the Knowledge of Creation.

Today's gift to you has been for you to understand the system which creates the STM. Know that it is within the grasp of the man. (One of these systems have already been built on this planet. We brought this gift along with us for you to mature. Do not be bamboozled by it, and don't make it into another magic show. Rather, understand the science of it, that you can use it in every D of the Creation).

End of Quick Index Part 1 - 474 KSW Feb 23, 2023

(Mr. Keshe gave warning to those who are associating with the Belgian lady we kicked out of the KF about 3 years ago. She belongs to one of the most powerful pedophile groups in the world and has a long history in the whole family of prison sentences for pedophilia and child sexual abuse. She herself started in the courts at age of 13 with juvenile detention for it. Her case now is in the hand of the Austrian courts so we cannot say anything about it. They befriend KS and target especially families with young girls. Once they get your IP address then they can really damage your family. Once they found out it took 5 years how to get her out of the KF. You can check all of this in the court records in Belgium. It's your job to check it out, not ours. We have a responsibility to warn you about what you are getting into. Even the brothers at age 34 are still raping children. It's ingrained in their blood. But keep away from this individual if you want to keep your family safe).

Q: You said understanding the conversion of C14 is sacrosanct for the man. Could you guide us better about the creation of C14 through creation of Cosmic Rays in the extension and amalgamation of Deuterium?

K- (In the world of Creation you start with interaction of magnetic (M) fields, which leads to creation of plasma, and the interaction of the plasmas leads to creation of physics. And the interaction of two or more "physics" entities brings chemistry, and the interaction of (chemistry level plasmas) brings biology. This is how our science has divided itself without knowing).

(When you say, you're a physicist, chemist, or biologist it just depends on where you jump in, in this process. Then interaction of biological structures lead to the creation of a plasma of a Soul and intelligence. (When the Soul radiates its fields, it starts the whole process all over again. That's why it's said)), "I am the beginning and the end."

So, when it's a ray we call it, Cosmic Rays (which are fields). Their interactions brings us plasmas. (For example, (interaction of) a plasma of an electron and plasma of a proton creates hydrogen (H). (When the fields of a couple of hydrogen's interact) we get Cu, Zn, or whatever. Then by adding Zn with Cu and a little bit of oxygen, C, and nitrogen you get the neural system. We went from chemistry to biology. Then when we put these together we get the Soul of the Physicality (STP), or what we call, the "Spirit." And the Spirit interacts with bigger plasmas and creates the Soul of the Man (STM), and then the STM (goes) back to the rays of the Universe (U), and we are back to the beginning again). It all depends on where and how we (enter into this process). (It was also said, that the STM creates the STP, so maybe it goes both ways).

Very soon, when our scientists understand the work of the plasma they'll call themselves plasma physicist, plasma chemist, plasma biologist, plasma "Soul-ist," plasma of the STP, or whatever. It's all coming up in the future.

(I look at physics through the field interaction we call plasmas, and not as a matter state. So, you don't need guidance. But you have to decide, which part of the interaction, and collective interaction of the fields you need to interact with. And how you need to interact with them. Then the rest is yours).

As I said many times, some of the world leaders will not walk into these systems, because their own Soul will reject them. It's because their STP and P do not obey the laws. (And some of them have committed many crimes).

In the past few weeks, KF has entered into very deep negotiations with some of the world leaders, including presidents and heads of the state. Some of you who are close to us know, because you're part of it. And in some cases, you might hear about it. We are preparing for the next Session on the 24th of March, when we'll ask you to dine with the Souls of the world leaders to bring world peace.

(The 19th of February Session called, "Dining with the Creator," was very successful. We are asking all of you to join us again, and collectively we'll meet with the Souls of the world leaders. Not (only) to elevate them, but (also) to put across what we as citizen's of this planet require from them).

(This is the first time KF will invite the Universal Council (UC) to be present in the Session of the 24th of March. It's their obligation to be present in this meeting. (Where we'll change and elevate the Souls of the leaders). Now it's the time for man to do this. We are not demanding, but we are putting on the table what we expect of our world leaders).

(There are many of you who work in the background in helping us with these negotiations with different governments and world leaders. If we succeed, we'll have 2 or 3 world leaders with us in the next Session. They'll be hidden in the background for security reasons. For sure we have world leaders and ambassadors African nations who will be online with us).

What is the next step for us to work through the Soul, and not through the physicality? It's your job as the citizens of your nation to represent your nation in the 24th Session. And through your Soul, because you understand the culture of your presidents and leaders to bring that change. This is the first time we put the UC in the meetings. (We want that they themselves, start becoming the intermediaries between the world leaders and Universal Community). We don't expect anything, we just set the scene. (But it's you, who has to "play the game" of the changes to come. You have to understand what it is, and what needs to be done).

(A devoted Knowledge Seeker (KS) was in the system yesterday. He's very emotional and said, "I've come to give to the all the KS." I let him do it. But afterwards I asked him, now you ask from the KS what you want from them. What do you expect them to give to you? We always say that you should give. But now let's see what they're giving to you.

It's not that you're taking from them. They are giving to you. Did you feel it? Did you feel their love and were you touched by them? Did you feel their existence?)

Now (it's not that you need guidance from us. Rather it's for you to understand and elevate your own Soul. And for you to be the converter of the energy. It's like what I showed on the screen. (The CR come into your skull, and you ?? convert it to C14, and then to C12, so that it feeds your body, and then you let the rest pass through you. But also what are you releasing to the fields, that you don't need? That goes out of you to the others)).

(It came in as a field with no identity, then it interacted with your Soul. What does the C14 takes with it (when it leaves you?) Does it take the essence of love and equality, and the essence of the Creation in the completion of a cycle? What are you putting back on that (Ray) when it leaves you? This is what (it's all about, and no more). And also it's about how we handle and interact with this knowledge. (It's important that) we don't abuse it. Instead we should make it available to the others to reach the same elevation in understanding that we have reached. And we add their understanding to ours). This is all the essence of the teaching, and nothing else.

(We'll still keep making this and that system in the physical world. What else can we do? Do we just sit down on the side of the street, or become a hermit, because we know everything? Or shall we work to bring a new dimension and a better life, and a better understanding of life for the others. In the Universe you don't see people just sitting around all over the place. They keep themselves busy. They travel around like what you see in the UFOs. They go and see different things. It's you who choose to waste time in D of P. You decide how you want to spend your time, or if you want to waste it). That's your own decision.

(Five to ten years ago all of you were dreaming about trying understand how the UFOs work. But now your knowledge has gone beyond that. Putting that aside, what do the people in UFOs do with their time? Do you think they just sit around just waiting for another thousand years to pass until they reach their next destination? Our scientists say, it takes thousands of light years to travel somewhere. But the people are not idle. They don't just sit idle and wait for the next arrival. Or in the space sci-fi movies, do you ever see rubbish anywhere, or dirty windows, or the passengers starving? They are always immaculately clean in all the scenes. So is somebody cleaning, cooking, or preparing things in the ships? Usually, somebody plays the part of a doctor or something else).

(They don't just sit there and do nothing. But the energy we call "food" comes through the walls of the craft. They don't need to kill for it, and at the same time they're kept warm. They don't have 24 hour shifts, because there is no Sun movement. We created all that for ourselves).

(This question about what is to come when man travel in Space is for you as KS and humanity to answer for yourselves. It's not for us to tell you what is to come. You will have to plan your life around the existence of your Soul.)

(Mr. Keshe was talking to bank officials recently and said, that now that we can travel anywhere in a matter of seconds, how is your structure going to accept this? Right now when we travel anywhere we go through the banks to finance it. Then there will be no need for these things and your bank will have no function).

The change of life on Earth will come by the application of the technology. (We have to decide where we want to live, and if we want to live in D of the Soul. We won't dictate anything to you). It's you who has to decide. We just show you the technologies and the ways to make it, so that it doesn't become a magic.

Q: In the case of a person who has bad behavior, is it possible to replace the Soul, but still maintain the same physicality? A world leader for example?

K- (We can change a Soul. You can change a Soul for it to elevate, so that it fits better. Yes, you can. I went through it 3 times. (When the physicality does not make sense, or is like a foreigner to the Soul, you can change it so it fits right). Yes, you can change and elevate the Soul. But you cannot take from it. This is the beauty of it. "Because the more you take from it, the stronger goes to the fields in the inner circle of the fields." And maybe they cannot understand (why it's being taken from them)).

(When you elevate the Soul, so that it understands the truth about life, and about their own behavior, then it's like looking in the mirror and seeing the truth about themselves, then that can bring a change. The 2 different ways are punishment or taking away, or elevating to understand. If you take away from them, and they don't understand or accept it, then they don't change. The basis for the change is for the Soul to understand the truth about itself, then the rest is easy. We don't take away, we elevate the Soul).

(Every night the Brazilian team relentlessly meets for peace between Iran and the 5+1, and all the other things they do. But you have to change your position and understanding. Can we give in such a way, that we enlighten the leaders to understand (a higher truth)? That's the difference (and it will bring the change). At the moment it's only a Tic Tack game. Meaning the more we try to elevate them, the more they counter it by gathering others to their side).

(What's going on in the Ukraine arena is absolutely mind boggling. You have a Christian world against communism, that has no religion, and then part of the Islamic world joining into it as well. And the only one who's benefiting from it are the Jews, because they finance both sides).

(Your job as KS on the 24th is to elevate and make the world leaders to understand about the politics of the running a government and a country. One of the world leaders (asked me if he can join) on the 24th. I told him that if he comes in to just listen and understand what is the problem from the inside. Not what you think it is. Just sit and receive the elevation of the Soul. Do not answer the questions of physicality).

We'll have maybe 3 world ambassadors with us on 24th. They are close friends of mine. I asked one of them just to listen and then explain to your president. (Those listening to these teachings in the future will realize the beauty of what has been reached through the Soul. That you can bring the change through the Soul. You have to understand what change you want to bring, and it has to be your wish, that it is for the collective betterment of the human race and the Universal Community).

(As I said before, the war of ideologies is over. And at the moment, the war of religions is deepening. Do we also need to bring in the world religious leaders on the 24th? Can we invite the Vatican, Ayatollah Khomeini of Iran, the two Rabbis running the State of Israel, and those in Saudi Arabia to be present?) How many of you will invite religious people to be present on the 24th? And how many of them will come? Don't forget, by attending they'll endanger their own existence.

We'll find very few Putin's, and very, very few Gorbachev's. (When you listen to the news, you don't understand what going on in the background. You only see what they put on the "front page." We know the Russians are all the time bombing the capital and everywhere else. But when Biden went to Ukraine, the bombing stopped for his visit, why? They organize all this in the background weeks in advance with the Russians, for them to stop bombing during his visit. It's not coincidental. Biden goes there to sell another 500 million in weapons, and the Kremlin agrees to stop bombing during his visit).

Everything is structured in the world of politics. It's just that you don't understand it. (It's not how we are led to believe that these things are just happening and we can't do anything about it. This is not true). So, be wise and understand how the world leaders really work.

Q: Would it be easier to first transmute a stone instead of a complex human being?

K- (It doesn't matter what you transmute first. It's about creating the conditions for transmutation and once you achieve it, it will be the same for everything. Because in a stone you have Fe, Silica, and whatever. These are also in your body. So, it's part of the same process. It's about the expansion of the Soul).

(The system we used last Sunday for "Dining with the Creator" was the first time we ran it. We brought in a specially made Gans water, using a method we never taught before. And we saw how people felt. Most of the KS tasted water or received moisture.

(This new system carries all kinds of foods that you could ever imagine. We let people taste from chicken to beef, chickpeas, salt, sugar, honey, flour, pasta, orange, and banana. Everything we could think of we made into the Gans state. But before that we put a matter state banana, orange and apple in the system to see what the difference in the feeling and emotion would be. In some cases we told people what to eat, and other times to eat what they wanted).

(It's interesting to observe how the P feeds the Soul, and then when the Soul takes over, how it feeds the P. We demonstrated it in the system. Transferring collectively is easier than individually, because even when you work with a stone it's not one atom, it's billions of atoms to make the stone. So there's no difference between that and a human. We are dealing with an envelope, and it doesn't matter what you put in it. It's all the same whether we expand the Soul of a human or a stone. It's one envelope and it could be 1 gram or 100 kilograms it doesn't matter. All the Souls are the same).

I'll be in China in the first weeks of April. (It will be nice to meet with the Chinese community and KS again. (We are going to deliver) the promise we made to the Chinese government prior to Covid), and we'll see what changes we can bring in.

Q: (Has the decision been made to create the condition for peace now on this planet?)

K- (The decision is not made. You have to bring in the peace yourselves. We (only) provide the facilities for you to do it. The way it stands, none of you are in the position that you could even meet with any of these world presidents. It's very rare, and even if you're given the chance it would be for a few seconds and they won't let you say anything. We are creating a condition beyond their P, so that you can meet them. The same way you met with the Soul of Christ, Moses, and Muhammad. You felt and knew their presence. It will be the same. We are facilitators for you to gain trust in the knowledge you carry. (We are not giving it to you. We make the conditions, it's there, but you have to make the decision to bring the peace).

Q: Will the Universal Council (UC) as representatives of the planet bring about this condition?

K- How would they come into the meeting?

Q: On a Soul level.

K- Exactly, but how? (Would they come as "One Soul" of the totality of the UC, or would they come as individual UC Souls. This is what you still have to learn. The UC members have to learn how to become One Soul).

Q: So, you mean to act as one (unit)?

K- More or less, yes.

Q: (When we interact with the world leaders on a Soul level, will they have to accept this energy transfer)?

K- (You cannot force anyone, they don't have to accept. Your job is to make it available to them. There are two ways you can do this, to make it easy or difficult. But KS haven't understood this yet. To make it easy for them to accept, first you make it easily digestible. It's like first dissolving a sugar cube in water and then giving it to them. Or you can give them the sugar cube and they have to crunch it with their teeth to get at the sweetness. This is the hard way. When you give them the sweetness already dissolved in the water, they only have to drink to enjoy the pleasure of it. This is the Universal Council's job. This is what you have to understand).

(Have the UC becoming another group who thinks, "we are the UC"? Or are you becoming a group of facilitators with the understanding, that you are here to serve? It's a very big difference. How would the UC as a total Soul come into this meeting? More than anything else, this will decide the outcome of this Session with the world leaders).

Q: There is a lot to think about here. A lot of field strengths, that needs to be understood.

K- A lot of realities need to be understood, not field strengths. A lot of realities. A lot of what I call, "Soul searching" by the UC. It's the first time you've been put to the test, more or less. Not to test, but to bring the change. (In a way, all of us as KS are bringing a bouquet of flowers. But it's the job of the representatives of UC to deliver this bouquet to the world leaders. What is your plan as the UC? Every Soul has a responsibility to be there).

Q: (I met a KS and I felt a special fragrance, but I'm not sure if I smelled it through my nose or not. But in "Dine with the Creator" I didn't taste anything. I think Corona touched my physicality and blocked my tastes and smells).

K- Did your Soul smell and taste? Or are you still physical.

Q: Yeah, physicality. Yeah.

K- (If you lost your taste and smell through Corona it can be fixed. That's not a problem. But did you smell and taste it with the Soul? When you feel it, then it's through the Soul).

(Those who joined us last Sunday, for "Dining with the Creator" are invited for free food, for the whole of next week. (When you come in would you be waiting to taste something?) Or would you come in with understanding, that my Soul is already taking, I don't need to feel it?

(Just come in and let your Soul do its work of feeding, automatically. Maybe you didn't taste any food, but later other things changed in your life, like your understanding and emotion. Or will you stay with the thought, "nothing happened, because I didn't taste anything.")

Now we put you to the test. (You can log on to the system from 4 to 7 PM and be fed by the KF. Everyday you can come and eat as much as you like. But will you eat with the eye of the man, or with the STM? If you go there just to taste and smell, then you're still a man. If you come to realize and elevate your understanding to the fields of the Universe, then you have moved a step forward. Maybe you tasted the banana and you had a water, fantastic. Did you ask the Soul, did you taste anything? And he says, no, no, I didn't take anything, because I (didn't need it)).

Q: (That kind of explains why many people were salivating and there was a lot of moisture in the mouth during the Session. Were we experiencing the energy the foods through the salivation? When I was present I already felt very full, so I didn't actually need to dine).

K- Yeah, we didn't invite you to come and eat food. We brought you in to learn how to feed your Soul. (The food part was the bait to get you in).

Q: In the 202 KSW you explained how the Soul is created through the positioning of the amino acids in the womb of the mother, and that from that moment the Soul absorbs the fields of the environment of the womb of the mother, the environment of the Earth and Universe, and thus feeds the STP. A little further you said that if man can return at that point, he will remember how to feed himself from the fields without having to kill, because he already has the knowledge.

How can we consciously return to that point, to experience that knowledge of absorbing the fields from when our Soul was created? Would the Emotion of presence be a way? How could we practice and teach this knowledge?

K- In a single word, "detachment."

(The Soul when it's in the womb is detached from the womb, and lives on its own, with what created it. It knows that all the energies it needs have been made available for it to live. It doesn't kill in the womb of the mother. The mother, through the love of the Creation and the Creator gives freely. She makes it available, and he takes from it what he wants, because he's detached from it. (It's the same for the man living in the world. Become detached from it, and it will give you what you need).

(Mr. Keshe explains about detachment because many people think it is about giving up the world and becoming a hermit, or sitting down and not doing anything. A lot of this came from a misunderstanding of Eastern spiritual books that have become very popular. He said that the biggest part of it is to become detached from physicality. The deeper meaning is not that you have to give up P and sit in a corner. But rather you understand the truth about it, that the P is a manifestation of the Soul. When you get enlightened to the Soul you have everything you need. So the purpose of life is to serve the others, and out of that comes the joy of living and sharing. A detached person has an inner joy that cannot be taken away. Then your life becomes one of service. Serving means to bring joy to someone else, giving food to someone, and the calmness of your presence is also service. That's all it is, to serve another. When we deeply realize this inside ourselves, we'll become detached. When you reach that point, you become a "Man of the Universe." Because then you realize, that the Universe provides for you, and you are just here as a converter to provide for the others. You are like that generator in the flow of the river).

Q: When we talk about giving the energy of love to someone, how do we know what quality of love to give? It may be the wrong quality. I think you said, that through detachment, the Soul will give the correct quality of energy, is it that?

K- That's it exactly. You are "spot on." Your job is to make the love available. The job of the other Souls are to take what they need from it, and not to steal from it. That's all it is.

(Those of you in the farming world understand this, because you are forever putting in one seed, and take out more for other to enjoy what you have seeded. This is what it is. Farmers are one of the closest people to the world of Creation. They embrace Creation, but some also disgrace it. Those who embrace it, give that life back to the people as a giver. And those who disgrace it are like what we see nowadays in industrial animal farming. (But the essence of it is, it's not so much what we do, but how we do it, that matters. The same goes for those who work with computers, or the guy who collects the rubbish, or the man who sits as a president)).

The farming community has always been very close to Creation, because they have to understand the workings of the Sun, rain, wind, and the rest of it. Like what they say, "thinking makes you wise, and wisdom makes you rich." And that's the richness of understanding the Creation.

Someone wants to build a Gans factory in Shanghai. Mr. Keshe said he has commitments and agreements with the Chinese government for Gans production.

But the way we look at it now, Gans factories are a waste of time. (The development in the technology, especially in past 6 months is so much, that Gans production would only be a short term investment. Especially now with the wireless system makes a lot of the work we brought in more or less obsolete. Be it for wellness application, agriculture and everything else).

(For example, in China putting a 1,000 hectares of land under Gans with the water becomes cumbersome. However, with the new technology we just place the whole information of the growth within the structure of a satellite and that targets the land. Then being able to have 2 harvests with maybe 10 times more production. The Gans production the way it is, will still exist, but in a way we don't see a future for it).

This is one of the reasons for my trip to China. We are offering totally new structure (of the technology) to the Chinese government and the authorities. (Instead of building Gans factories, the new space plasma technology doesn't need much materials. The leap in knowledge has been huge. We're reaching the point that we can decide the way a plant will receive Cosmic Rays, and how it will change because of it. The scale of the Gans factories that we were planning 12 months ago, is now out of the window).

(We feel very comfortable to release this new technology to the Chinese authorities. We are not coming in to build Gans factories anymore. With the new developments we can deliver energy, food, and other things through the Apps on the mobile phones).

(This morning we explained how you can make any radiation out of C14. This knowledge is within our hands. Instead waiting to teach everybody, we can feed the people without them knowing it, through the new systems. We can transfer energy as light, or food, through the present mobile communication system via headsets. This is a fast way to change the process).

(To build Gans factories now would take us back 10 years. The technology development is so rapid. The good thing is that the development is all coming from inside the same organization of KF. We don't see any need now for what we planned two years ago with the tall Gans buildings as factories to absorb CO2).

(Even the next generation of the Plasma Enhancement Power Units will be totally different, even though the outcome will be the same. A new generation of plasma power units will be introduced in the next few weeks. It does the same thing, but in a more powerful way, in a different way, it's easier and allows us to do a lot of new things with it. The new systems can be commercialized instantaneously, if we can come to an agreement with the Chinese authorities).

Q: Can the Cosmic Ray Head Units be used if you have titanium tooth implants?

K- (Yes they can, because the teeth are different than the rest of your body implants. They are separate and don't have much structuring. Whereas implants like your hip & shoulder replacements, (heart) valves, or plates on your vertebrae, will have problems with the bone starting to grow, and then you feel the pain. Then you have to go back to the doctor to take the joint out, but then what will they put in there to replace it?) The bones will re-grow. We even have a case where the tooth started to re-grow.

(We definitely don't touch hip replacements, because they have cut off the bone and drilled it out. Because we cannot change the titanium replacement for a calcium structure. Impossibilities. That's why I said, it's too late. But for people who haven't yet done the hip replacements, those we can help. Part of the Knee Gans is for this, and we have other Gans's. We cannot yet do the re-growing of the bone in a matter of seconds like on the sci-fi movies. But maybe in 5 to 10 years).

(Most of this research is coming out of only the KF. Other structures are stealing or whatever, taking the knowledge from KF and using it. But we don't see what they're doing with it. They come up with different banners to hide it. If one day all the world institutions work together we'll see (a huge development). Since now we demolish the patents, there is no need to hide it and it can be put in public). (It's much easier to grow an amputation, than to do a hip replacement. The Horizontal EU will be used for this. Growing legs and arms will become a matter of 3 to 6 weeks).

(A question about using the Compact unit on a 380 volt electric panel was asked. You cannot use it. An industrial version of plasma Enhancement Units will be built soon. We're building industrial scale plasma units for factories and the rest. But it has a different structure. We see the household usage of the power units as a small fraction of the total usage. Therefore, we are already making prototypes for Industrial usage, which will be about five times the size of the units we are putting out now).

The evolution in development is massive. It's not just evolution, but it will bring changes. (The new Soul system is so revolutionary. We always built two twin systems. The first one was tested on Sunday. We are implementing the new "Soul Reactors" in the new one.

We call it, the new Universe of plasma systems, and Soul Reactors. This will change the game drastically. We'll try to miniaturize to place it within the Head Units. Or do we need a headset, when we can change the whole environment of the whole thing together. You will hear (about this within) next five weeks. It's a huge development in the world of plasma technology, huge).

(It's an exact replication of the work of the STM, or the center of the Sun. The radiations from the center of Sun lead to creation of Cu, Zn, cell of the body of the man, the cell of the brain, and everything else. So you can imagine what this system carries within it. It's self-sustaining, and self-elevating. It's an amazing system).

I have a very direct line to the Romanian group. Do not get fooled by the claims made by Barbu. We do not approve and support his work. Because he just takes the use of the words of the KF. (And he makes up fantasy claims, about the plasma. I am asking Barbu to reconsider his position and what he claims. Stay with the realms of work, of plasma work. Not necessarily KF, you have the freedom there. But don't associate us with the phantom works you do, and the claims you make).

Q: Could you talk a little more about the beginning of the new cycle of the STM? From what I could understand, a Twinity is always necessary for new seeds to be created. For humans the Souls of the father and mother divide to form a new life. In the case of the STM seed, when it is ready to start a new cycle in the Universe, and create a new fruit, will this new fruit arise from the interaction of the STM with the STP itself?

K- This is a very interesting point. As a nuclear physicist I put it as the energy of the fission within, to become a fusion without. (Fission means 1 splits to become 2; Fusion 2 combine to become 1).

(At death man carries 2 plasmas of life within himself (STM & STP). (The energy the STP has gathered, is within the STM. This is not necessarily connected to amino acid of the man - I think this means it doesn't have to create another man wherever it goes in space). So when the STM with the energy of the STP inside it reaches a point of balance anywhere in the Universe, then this seed, or this field of plasma is allowed to create the conditions for a new life. "Fission style," means that the STM will release a plasma as a STP and become a Twinity with it. The Twinity can come from within itself, and not necessarily through interaction with a plasma outside itself).

The Creator created Mitra from within Himself. He didn't take another lover from outside. So, shall be the same with the man. We carry "Mitra" within ourselves at the time of departure (from P). We call it the "Spirit", or STP. When this Spirit interacts with its new environment it gives a new physicality. At the time of death and during travel the STP is fused within the STM. Death cannot come until that fusion is completed).

(It's like when we put everything needed in a picnic basket for our child to go and enjoy. When he arrives at the picnic spot, he unpacks and starts a new cycle of life. Always remember, when death comes, the essence of the plasma of the STP is within the STM.

At the new time and position the STP is released like how an electron is released from a neutron. The essence of electron is within the neutron, it doesn't happen coincidentally. The neutron has the seed to create and it gives birth to an electron. The Twinity comes from within the STM. It's created from within itself. It does not split like what they call fission).

(I have referred to this in one of the books, that it interacts with an environment, and when (it's the right) field strength), the Spirit of the man will manifests itself as a twin, or what we call, Mitra. The love of the Creator, which comes from within the Creator.

(This is what was meant by Eve being made from Adams rib. In truth it's the creation of Mitra, but it's put in the terms of P. The Creator created Mitra out of the fields of Himself to confirm his own existence. And then He fell in love with His own creation. The "apple" was then the fruit of their union, the love. Mitra came to Earth and (discovered) love and then she gave the apple to the Creator to bite from it, which is the feeling or emotion of love. That's what enslaved Him. They call it different things in other languages. But the apple is love, it's the "poison," which Mitra learned from the humans and got the Creator to bite from it. Actually, it captivated Him and enslaved Him).

Q: On solar panels should the MaGrav be connected before or after the voltage Inverter?

K- It doesn't matter where you put it, it will still touch your Inverter, because it's a field flow. (But this river doesn't only flow in one direction. So it will actually flow back to your solar panels and through your Inverter, and into the circuit system of your house).

(One of the reasons we launched the Compact and Head Units is because we see problems coming up with the mobile phones interacting with plasma. It's like when you put the MaGravs in your houses, and you Nano coated the wires. Now we'll have the same problem with the Head Units and the satellites. I'm waiting to see which satellites will start malfunctioning. But we'll have to see who shouts first. Without a doubt it will happen. That's why we had to introduce the Combined Units to replace and to upgrade the technologies to use without satellites).

(In a way we used a hybrid during last Sunday's, "Dining with the Creator." We transferred plasma to you over the mobile system. Some of the messages were not at the strength of the Soul, because the communication lines (couldn't) carry it. But when most of you carry these Head Units, then you'll feel and taste the banana (instantly). Because no information will be lost when it's directly delivered to the Soul. It will be like that dream you had of eating a banana, only this time you'll feel and taste the dream).

Q: When you use all these plasma technologies, do we become lazy by not using our Soul?

K- Do you think God becomes lazy, just because he can use His plasma technology?

Q: Can everything be embedded in like one unit, the energy, food, and everything?

K- That's what the Combined Head Units are. The new Head Units have their own transmitter in them.

The whole structure of the plasma technology has made a huge frog leap in the past couple of weeks.

Q: For example, can I heat my house and feed myself with the Head Units?

K- You can dream what you can dream, but the reality is, do you need to heat the house and kill the plants in the house, which you have no right to? Or do you have the right to feel warm? (You will create a condition with the fields to allow the plant to feed and heat themselves. This is the whole purpose of this new development and part of what is coming up).

There has been a massive change in the space technology. We tried to introduce this to KS about two years ago. We did a lot of experiments with, but it could not be understood. (But now, because of the development in the reactors technology, they have been able to grasp it straightaway. Still these first systems are only in their "puberty" stage, the mature ones will come over years).

(It will be very easy, you create within your Console the condition of Mars and travel there. You become independent of government control. It won't exist anymore, that's for sure. Nobody will be able to dictate to you what you can do. You'll have the freedom to go to Mars or another planet. These Consoles will give you access to it. You create the condition of the smell, or odor, or of the field strength of the Mars, and then you can go there).

Something called, "gating" where you match the MG fields of another spaceship and you can create a bridge between the 2 ships was asked. But the new systems have gone beyond this.

Nevertheless, you can choose, because the development in the matter states will not stop. And the dimension of the Soul will continue to expand. The term "Soul searching," will become "Soul researching." A lot of research will go into understanding the Soul. Not just the Soul, as the STM, but the Soul of the Creation. How would you interact the Souls to create (whatever)? You will try to understand different flavors of the interactions of the plasma and the fields).

(About accepting love. You can give as much love as you like to me, but if I don't accept it, then it's just another energy passing through the Universe. Or you can give me one love, and I accept it, and then it becomes the biggest thing in the world).

Q: Is it like the way the Creator is always giving us love, but we're not open to it?

K- Yes. (Or another way to put it. It's just like the way a mother gives love to her child. She can do it in 2 ways. She can cuddle her daughter, because she loves her and gives her

that warmth. Or she can cuddle her, because she needs to be loved herself. Then the daughter gets fooled by the first one. But sometimes we can do both at the same time. "Cuddle me and I will cuddle you, love me that I can love you back." We (have to) understand the difference).

(I can give you the gift of love, but if you don't accept it, or you already have another love, then my love would interfere with it, so you have to respect that, and not force it. Emotion in the space is different than emotion on the ground. On the ground you have more options. But you can make love available, but it doesn't mean it has to be accepted).

Q: Could you talk more about mono-energetic fields?

K- (Mainly rays are what we call Mono-energetic, like a laser beam. This is one of the fastest way to deliver (something). Mono-energetic fields usually have the character of a ray, but because on the outer surfaces they create friction, they lead to creation of fields. You start with a ray and end up with fields. The interaction through the friction causes it to creates fields and particles).

(The present world of science has not understood this, so they just say, that sometimes it behaves like a particle, and sometimes like a (?? ray/wave). (?? rays are amalgamations, or mono-energetic fields, and they interact with their environment. Otherwise, they can't show their manifestation or existence. As they interact, they gather plasmas, (?? some become cylindrical, or particles, and become a plasma)).

Two things dictate the strength and the fields of mono-energetic rays, or magnetic fields. One is the strength they started with, and the second is the environment they interact with. These dictates how the rays will become fields or particles. (When you use a laser beam the only difference will be, at the end of the beam it might be a little weaker. But if you work with mono-energetic rays, from plasma, by the time you reach to the other side, you won't have a ray anymore, but a plasma. It depends on the time, space, and strength of the fields in the space, in comparison with the original source. The slower you go, the more friction you create, and the deeper the field).

Mono-energetic rays and fields are part of high speed travel. (It goes back to what I showed with the stacks of Cosmic Rays, do you use a parachute, or an elevator to go down the stacks? It depends how you create the sink in it).

(You can create high speeds for a ray, if you can increase the (energy of the) source. But it has to be pre-arranged, like when we send people to the Moon. Hopefully, we'll try in the next couple of months. We don't send them as a package and land them somewhere. We take part of the energy of their Soul in one system and transfer it to the position on the Moon. In a way, we create a "Mitra and the Soul," and the lover will go to it. If you understand the principle).

(If you shoot someone to the Moon with a rocket, you need to create a lot of controls, for holding and stopping the rocket so you don't flatten yourself on the surface of the Moon.

With the plasma technology you create plasma and then energy gaps of fields to slow you down as you approach the position. This happens automatically through magnetic fields. You don't need a control system. Teaching deep space travel is an art. And I'm a master at it, since I've been doing it for so long).

It's not just sending somebody to the Moon in an envelope. We fast forward with a higher level. (I can create any kind of radiation and strength field parallel or equal to the Soul, and it can be anywhere in the Universe, and you don't need to see it to target it. In approaching the destination it's like attracting an electron to the proton. One is in volume, and the other is energy. One attracts the other to itself. And then you have a point of separation where you see the gap between the electron and the neutron, and that point you change to land).

Traveling with the Soul, or a flight system is an art of understanding the work of magnetic fields of the Universe. Don't forget, we came (here to Earth) that way, so we know how to come. And as we came, we know how to go back).

There was a question about the earthquakes and why they are happening, or if they are part of something bigger. Mr. Keshe said, no it's just normal expansion and contraction of the plates, and also due to the temperature change of the seasons. (Some people said it's done by the Russians, but that's a good story).

With the creation of the plasma we will change a lot of things. (But in essence, it's what the planet accepts as a change. It cannot be an enforced change. This is the difference). Plasma Technology surely will bring elevation of the Soul. (With matter state CO₂ you ran into crisis with global warming. Now if you change it to a Gans of CO₂, you'll bring about "global loving," because you added to the essence of the emotion of the planet to love more and live a better life. So it's the same thing, it depends on which state of it you use).

If you can freeze it, you can do a lot of other things with it. By converting the CO₂ to a Gans you make the energy available to everyone. And that's the difference. It's a very, very small step. In plasma technology, you can truly make a "love potion." You can make people to love each other, because you create the fields at the essence of the level of the strength of the emotion. It doesn't need much technology. We can literally serve (it to) you. I know how it works). But is the planet ready for it? Is your Soul ready to accept it?

(It needs a little bit adding, you have to pump it up. But we have to understand what we need it for and how we're going to use it).

(The evolutionary steps in technology that happened in the last 2 weeks will bring a lot of changes to humanity. Man will find a lot of answers through this. Initially, I developed this in 2010, but then I shelved it, because I thought man is not ready for it. But now it's the right time to release this part of the knowledge).

(When you use these systems you'll feel the essence of Creation and the love of the Creator. Even our own KS don't know what they built. They haven't yet come to realize the potential of what's been put on the table).

Q: My intention has all along been to turn all my assets into means for love.

K- I believe you ...

(We had 2 choices with the new technologies either to shelve it, and say the man does not understand it. Or we can release it, and that will bring the man to understand it. Our choice is to release the technology).

The KS is complaining about her money situation, and Mr. Keshe patiently explains the process. When the T is implemented you don't need to spend as much money on energy, and that money you save is really what you earn.

He talked about China with all its surveillance makes you feel safe. The government executed many of the corrupt officials years ago, so now it is a very small problem. The American security system is not benevolent, that's a fantasy. With the Wellness policies you get an energy check up twice a year, and if something comes up then you receive continual treatment until it is settled. If you refuse to help yourself, the policy will be cancelled. Animals have a Soul and they'll get treatment too.

I will not allow my children have to have certain vaccines the way they set it out, because I know what the problem is. But I don't see why children cannot be vaccinated from the ones we know which are safe, and we see no side effect with them. There are two or three vaccines which are causing the problem.

We will most probably have a new Blueprint Days in next couple of weeks, because we have some new interesting things to market and to show you this next step in technology.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

K- Yes, .. Good morning and good day to you as usual whenever and wherever you listen to these series of Knowledge Seekers programs of the KF SSI. We welcome you back .. to extension of, and extending the knowledge and understanding the way we are connected to each other, to the Creator and the rest.

The Intro (video) we just heard which is an extract for another part of the teaching is, if understood will bring a different dimension (D) into the life of Knowledge Seekers (KS)

and humanity. The whole structure that we have gone through in the past few months and few past few years, starting from the seed to creation of the Soul of the Man (STM), and connection of the STM to the outside through Cosmic Rays (CR). And now understanding that CR themselves have a source essence. (:12).

And in a way, we can talk about it and explain it, because we have built it. We have access to the technology (T), and even as I said to one of the KS recently in past few hours. Even systems we have made, which some of you have seen. You came to and I had a couple of them came yesterday. And then they went and broadcasted in Rick's teaching yesterday morning live, what they felt in the system. This is all connections to CR.

We are not magicians, we are scientists. We are hear to abolish the phantom of everything, which cannot be proven and made, that we could understood. We explain it. If it is not understood it takes time. When you comprehend it, then it can be made. It becomes a T, we call KF T. This is why we convert the knowledge of the Universe (U) to a T that man can understand. And not only Man.

In the future when Man opens up to the Universal Community (UC) he finds out the U has benefited from the technologies, which the human beings have developed over centuries and thousands of years. To you it's something simple you do, you use everyday, but that essence of knowledge has been passed on to the UC, and they use it when needed in their own way for their own lives. As we use some of their knowledge's, which has been passed on to us in different ways over time.

Communication has never stopped between the races of the Creator. It's just Man who has chosen to be ignorant and close the door. First to himself, by locking his Soul within his physicality (P). And then locking this planet as a village to the rest of the U. (:14). We are little by little opening this door. Letting the sun shine into the STM, and it's the knowledge of humanity.

In the last weeks we spoke about CR. I hear loads of people especially in Romania are abusing this word to cheat others. Especially Barbo. Stop this which is not correct.

In this process you have to understand that CR is the essence of Creation. CR are embodiment of the Creation. CR are where we have to understand the connection. Something which I have come to realize. Many KS have not grasped, is the conversion process, that have baffled many of you in the past few months. We have and we live according to what I said in the last page of Book #1, "the Creator is the creator of all, and Man converter of some."

This conversion doesn't come by T, that you convert electricity from one point of the energy of the structure of the man. It happens within the structure of the body of the Man. We receive CR, which are abundant in the U. It's created.

CR stacked up are like a block of apartments. Ground floor cannot exist without the other. And it depends who lives in which bracket, in which level of it. So when we talk CR, we are talking about the structure of the creation of life in the U. The building block. How CR. One CR of specific strength builds itself, (:16). and connects itself to another CR of different strength. And ... and how these rays, building blocks of the U are connected to each other.

How can you go from the top floor to the bottom floor. Bottom floor doesn't exist, if the top floor doesn't exist. As the U is created, all the floors exist. It's for us to understand, do we go down the stairs, or jump in the lift. Or from the very top we get a parachute and drop down. This is the parachute of knowledge. You cannot do it. It has taken man millions of years, billions of years to get to, whatever it is today. Computer chips, and electronics and everything else. Where other races can get the parachute and jump and get to it in understanding of the T of the Creation.

So what is important for us as a step up in the knowledge of Creation is very simple. What is our job. What has been the job of our P in this conversion, and how does it use it. We get a water from a waterfall and we put a rotor, rotate something in it and we take electricity out of it. We call it a generator, we convert it. And then again, again it's water, it's the same water.

So what happens with us? We are in the same position. The Cosmic rays arrive to the body of the man within the structure of the physicality of the body of the Man, which is mainly the bone, and what we call a skull. It converts back into, releases energy (inside skull), and then in that process carries on (rest of the Cr continues on). We don't absorb all energies.

There is nothing in the Universe, any difference between what we produced as a power generators, in the dams, in converting the energy, with the same water flow, as in the brain of the Man. (:18). This is what we have not understood. And all we did, we relied on this part to be fed, and we kill for it. To keep a little bit this part (body) going.

The brain of the man receives most of this information for the essence of his creation, his Soul from the Cosmic rays. The body of the man, the amount of the food we consume, we kill for, hardly adds much to it, but it brings it into balance. We can get this from Cosmic rays in a different way without killing.

It's just that we have to open our understanding. We have to open this door of the Soul of the Man (STM) to be able to absorb a bigger spectrum, and a smaller spectrums, stronger spectrums of, fields of the Universe. So, in a way we live in a converter generator of Universe we call it, the brain of the man.

But in essence, if you look at it, if you understand it, we very easily, we talk about "Mr. COHN," but look at the characteristics of Mr. COHN, the ?? . We call it carbon 12 (C12). So, what happens to the man? What how man actually works with this thing? He receives (C)14 converts it to (C)12, picks the energy up, and the balance leaves.

The generator, the converter is the carbon (C) in conjunction with what we call hydrogen (H) itself, which is the best essence of the creation of it. It's the origin of it. In a way, the two connect to each other. (:20). And in connecting with each other, create, allow release of the energy of the Cosmic rays from C14 to C12. Which becomes the energy, which becomes, and then in the process of understanding the same, with the hydrogen and oxygen (O) coming together, we see what we call, release, creation, hold, gravity (4 properties of AA) of the energy.

So, in fact, if man understands this, and allows his Soul to expand, understand the expansion of, we really do not need much, because in this process, we become the converter of the Totality within the center.

And then what happens. This is what we do with you, when you go into System, and you're proud to go on Rick's program and talk about it. We allow the C14 within the center, to go beyond the skull and restriction of the limitation of energy absorbs, conversion, and now, Voila, you're on the track. That's all it is.

This is what the purpose of these teachings has been. For you when we talk, that we bring your Soul to expand. Is the central energy to come out of the prison lock of the skull of the man, which limits, converts the (C)14 to 12. Now, when you come on the motorway, you can go anywhere. It is sacrosanct, that men understand this process of conversion of C14 and 12. (:22).

Carbon 14, we need one C14 to feed the whole of the Universe. If you understand? Because C14 in understanding of the man is an odor, it's a crystal structure. C14 if you go in the matter state has the 6 electrons, but embedded within it, has the extra protons, the extra what we call, neutrons, whatever you put it, the shape you put it. We call it energy packs. These extra neutrons inside. These extra plasmas create a condition, that the energy expands, it becomes odor.

If you have a gas. If you have an element, in a matter of state it's solid, you touch it. In the gaseous state, still you smell it, but no smell is there. But if you convert the same gas into odor, into crystal structure, into what we call Gans of itself, it becomes odor. Which means it has a smell. If you understand this, and you understood, what I explained in the beginning, you will understand the way we smell each other, "oh, the smell of this," you smell the dog, you smell the carpet. (:24).

Man will understand this, then it can smell galaxies. You can smell a planet. Has a specific carbon strength connection in the dimension of his odor, that we see it, as it lights to us, as a smell. But we have chosen only to see the light of it. Our knowledge never expanded. We never understood what C14 is. We never understood why we call it a carbon 14 to the knowledge of the man. It's extension, amalgamation of simple, what we call, deuterium. Balance (deuterium) and energy (H).

The reason carbon 14 can travel the span of the Universe is, because it's got those additional neutrons, or what I call, protons, amalgamated to be as neutrons. Extra energy pack in the level, and in parallel, and in working condition of the hydrogen, which is the origin of itself.

In a way it gets piggybacked on the H which created itself, on it's magnetic field strength. We see the C14 behavior in the Universe, but it's actually, if we go inside it, we see it has a tracker. It's very much like we call it the time of Hitler, they put a beam, and they put the planes to go from Germany to England, down that beam. C14 is that plane. (:26). The beam of the information connection is done through hydrogen, and mainly the structure of deuterium of the hydrogen.

In a way if we look at it, Deuterium again is one element, ?? between the nucleus and the electron. Where the nucleus itself, again through interaction of the proton and neutron, is balanced itself again. Deuterium is a stable structure of the life in a bigger D. And then if you look at the carbon 14, and carbon 12, you see the same characteristics again. The totality, in emission, extra.

In a way, if we allow C14 to interact, we understand the behavior of carbon 14 in its entirety of what it sits, with that extra bit in the middle, and we can expand the knowledge to understanding of the Totality of the interaction of the plasma, we can create any Cosmic ray through radiation of interaction of the central structure of the C14. This is how you can produce from Gamma rays and X rays and the rest of it, by influencing the central structure of the carbon 14. Because you have the original structure of the neutrons and protons, which gave the structure of the 6 electrons as Totality. (:28). But in effect, you will have a loose body, which can grind.

In the world of the physics the miss functioning of the technical understanding of it. It's not that they're all sitting in one, they double, and they double, and then the doubly, doubles as one, and you have an outsider which grinds on. What would you like from weapon technology to gamma rays and X rays to see how is your body working.

The radiations I can create out of carbon 14 understanding the knowledge of it is beyond man's understanding. Because I can speed up the transformation even over the speed of the Cosmic rays at the highest level, reaching up. The interaction, understanding of the extra bit in C14 is this parachute (being able to drop through the layers of CR - the stacker). Or elevator to take man up to what he wants.

This is how and why I explained in the teachings, that I can make any nuclear material, which the plutonium and uranium are absolutely "child's play" in this ?? view of the understanding.

In the space reactors in Tehran when we built it, we did nothing but producing helium and hydrogen. When you go into the structure of the original patent, even in the book, in a hidden way, I speak about scintillation. What is scintillation? Scintillation is a

squeezing the extra part for the elements which already behaves as a gas and an odor to release what I want. (:30).

If you don't understand this. It's very simple. Very, very simple. And that is, how many of you change your internal structure? Your colons, your intestines, your stomach, your heart? You cannot it's with you from the beginning of the time, the way you develop it. But all of you pass gasses with different smell, from either end of the human body. You never ate the gas. But how come the gas today has a different smell than tomorrow? This is how the conversion comes. The body of the man has used to changing the structure to create different smells.

So, if your body can create different smell, I can create different dimension of nuclear weapon technology the man has not even dreamt of. Using the colons, and the stomach of the man with the odor and understanding C14. I need one atom to create the right odor to with covering the whole of this planet to change the mentality of the man, and make you all not believe even in yourself. You don't even can accept, I exist. Or make you so religious that you all hang himself, you want to be the way that Christ went.

It depends how I play with it. It depends how the stomach today changes, the field strength, (:32). and changing a gas to odor. When you say, darling, you smell so good, and that other one you kick, the darling to the wall, can you stop making the smells. One is the smell of love, and one is a weapon technology to kick.

Now, you understand why we go into the dimension of C14. Why we go in the dimension of understanding the essence of Creation. Why in every structure we create we have a hydrogen inside, and the interaction of the hydrogen in combination of itself with itself, and surplus energies, every planet creates C14. That is its fingerprint. This is what it is. Because this is what we do.

This is what the knowledge of the Creation is, if you understand it. It's, look at the micro and look at the macro, is your colon, and your stomach, changing odor. Bigger size is the smell of the galaxies, the Universe and the rest. The time will come when the human race returning back to Earth from billions of kilometers away, the children of man say, "oh, we can smell Earth." It's like the way you walk somewhere, I can smell the roses, where are the roses. The limitation of understanding is the limitation of prejudice of man about the knowledge of the Creation, and nothing else.

Then it comes to the point that, do we need, do we have to, (:34). in essence of the Creation to understand the work of hydrogen? So passively in the world of physics and knowledge of today, we dismiss it (as) just hydrogen. Give me hydrogen and I create Creation. Give me hydrogen, I can annihilate the whole of the Universe. This is what the knowledge is.

In the body of the man we have created two little holes and the skull. And within the skull, we have hidden the gem of the STM. If you look at it from the top, this is what you are, the two little holes, and this is your skull. In there sits the STM. The body of the man

lives two dimensions of life. Life of physicality, and life of connection of the STM with the rest of Universe. Then in that position, man has created another gem, you call it, the nose of the man, when odors, when the field conversion of the fields of the Universe in a different way arrives to man. The same way you have created your what you call, the mouth of the man. Again through the same process, you will feed the Soul again. (:36).

The whole purpose of breathing, seeing, eating, and the body of man is nothing but absorb as much as possible in different combination energies, which depends on which way we push it. The clever STM, when it created, when understood what it needs, it created the eye of the man. Where has no limitation, restriction, and it can go through, and more or less, direct for C14 interaction. Where the last have a filter called, the bone (skull), the Ca.

And this is why in every cell of the man, you cannot have a single cell in the body, which doesn't carry a seed of Ca. Connecting, jailing the man to the physicality of this planet. Now, when we look through the eye of the man, we see the physicality. But two rays, at the same time, come out of this hole (eye). One you see the physical life. And one you see the dimension to what we call, Universe. That's how man is schizophrenic. The Soul through the eye hole, it doesn't matter if it's open or closed, sees, gets in touch, sees the mother, talks to the mother who died 20 years ago.

We had it yesterday, the lady came in and I said, you can fly to the Moon. She said, I don't want to go anywhere. I want to see my dead husband. And she was adamant. I said, okay carry on. She wanted to see. And then I said, (:38). now ask your husband to come and see you. He came to see.

Man with the eye decides to ignore even what's in front of him. Because we are not ready, for what we've done, not correct, to be, to see in the dimension of the Soul. In the connection through what C14 is.

In a way if you look at it, man wears a goggle for night vision, and the other eye hasn't got, it sees normal. Have you ever done that? Have you ever wore a night vision half and one physical? Just your eye, it's a funny world. And this is what the man is. The other eye, the other part is the strength of the C14 which we have denied. And we have chosen only during the physical time of us, to report back this to our Soul, or through the structure of our brain, the totality of what we want. This is why as a humans, we always remember the dream. We see visually. Because C14, which creates viscosity to us, most of it comes through this hole (eye).

This is why when you came into the systems, some 300 - 400 of you more or less up to now. I tell you, did you see, or did you feel? If you felt, (:40). you have expanded the Soul. If you see, you've seeing through the eye of the Soul, through the ?? peek hole of the eye cavity. And the beauty of it is, that we have chosen only during the our awake-ness or awareness to accept only, live only this way, physicality. Even though C14 vision still comes in. We have trained our brain to only believe these guys (P), and recognize it and I accept it.

It's very much like Chinese. When I look at the Chinese broadcasters, especially woman, just go on the Chinese channel, while we're talking, and look at their broadcasters. Their eye, when you look at them, looking straight at you is, one is here (in center of eye), and the other one is there (inner side of eye). In a way, they receive two information from the same source. But the eye, the brain has decided that we're going to accept only whatever comes to this eye, the other one we ignore. Chinese sees two visions in their brain. And they have decided in their structure that which one they're going to accept as a true picture.

You don't see a Chinese going to shake your hand and shake your head. (:42). He knows, which eye recognizes this is the right one. And then next time I use this one because it's a different angle. We already in a physical dimension, have chosen acceptance of the singularity, or collective fields which arrives to us, and our brain recognizes. So now you can see what our Chinese friends are in dilemma with. None. Because the Soul sees the whole lot, in the dimension of the C14.

And this is the brain of the man which has created this mayhem for the man, and created business in the name of religion. Because you all can see, you all have connection to your Creator and the Creation. And Ayatollahs says, no, no, no, no, we only accept this one. Forget about the rest. Because with this, I can fool you. With this nobody can fool you.

And this is what the teaching is about. To show you, to live with the dimension of information of the Universe, that you cannot be fooled. You know, if you're seeing the information comes, even if says, oh, I was daydreaming. Yes. Because your brain at that point decided to choose this ray and ignores the physicality. That's why you call it a dream. I was halfway, and then you wake up and you do something else. Because of the dream.

You are going and crossing the road, the Soul sees the accident and tells the physicality, you had enough, I take over. Pulls you back. (:44). Or makes you run. Or you get hit in a condition that you should die, but you walk away. It's not coincidental. Because the Soul has created itself to protect itself, that field of protection. Physicality hits the plasma, nothing happens. Then plasma interacts to the brain, and you walk off. He says, "wow, anybody else would have died." No, you haven't understood the schizophrenic life of the man. The other one took over for that instance. Now you understand. Now we have no choice, but to comprehend the process of the Creation.

We are not here Soul takers. We are here to teach you to understand the operation of your Soul. When we said in the peace treaty, I commit my Soul and physicality to peace, Brazilians, most of them crossed out. We've given our Soul to Christ. Now you know what you denied as Brazilians, as Christians, and those who accuse Keshe Foundation to be in the process of taking your Soul. Because they never understood. They're a bunch of pedophiles, child abusers, in the name of the people we kicked out of the Keshe Foundation. The whole family has been to prison because they have abused the physicality of a child, to be abusers. You abuse the physicality, that the Soul cannot see

the reality. And then they cover in the name of the religions, churches, the mosques, and everything else with.

Understand the process of the Creation, understand who fools you. In the name of the God, in the churches. You don't need any more when you understand the connection. (:46). When you understand the process of the reality of the life in the Universe. Then nobody can fool you. Nobody can tell you something, because you decide. You go back to the source into your Soul and say, is this correct? Did Christ do such a thing, and in the contact many of you done, you get in touch with the Soul of the Christ. He is there, you see it through the, what we call, the information line of the Soul. And he explains to you how he resurrected. You don't need me anymore. You don't need any other scientists to explain to you.

Only the abusers say, he wants to take your Soul. Because then their hands opens up. Why did we kick one of the Belgians out of the Keshe Foundation three years ago? Because five years planning to get rid of it. Because we found out they're connected to the most aggressive pedophiles groups in the Keshe Foundation, in the world. Why do we have all the Keshe Foundation, always attacked and be surrounded by pedophiles? Because one of their heads was sitting next to me all the time. With the history of life pedophilia, from age of 13 in prisons, juvenile custody's, and the whole family in prison.

Go and check. Check what the Ayatollah says, and check what people, they tell you somebody's dead, they want to divert you, because they can abuse you, they can't abuse your children. The whole family, brother and sister have track records of abusing children, even in their thirties and forties, raping boys and the rest. (:48). They can't stop. They used the Keshe Foundation. And when we put the truth out, what did you do? He is a Soul taker. He is after your Soul. Doesn't tell you, I'm a pedophile, I work in and I'm part of the structure. I went to prison for it from age of 13. Now you understand how they try to break up when the truth comes up. This is you who have to do the investigation, not us.

This is how religions have been used to divert you to the physicality, that they can abuse your Soul. This is how in the space no one can fool you, in no name of religion. You look the bandwidth, you look the strength, you smell the odor. Then you find out. Then you see where the odor comes from, what strength it carries. Is it the smell which suits me? When you stand in front of another creature in the Universe, you have no eyes. Your eyeballs, the liquid it carries, it's not operative in different depths of the Universe. You have to rely, and your only bet you have, the only tools you have is this. The dimension of the strength of the STM, the essence of the C14, and its combination, and its interaction with its line of communication of hydrogen. What smell does it create, through the sense of the Soul, not your nose.

Your nose does not work. Little virus called Covid, (:50). made half of you not to smell. So you can see what's going to happen to you in the space. How many of you had Covid and lost your sense of smell and taste? That's the taste of what to come in the space.

When we talk about the smell in the space it's understanding the strengths that arrive with you, and explains what is to come, what is the field is arriving, or you're going to.

A smell is not, the odor is not what you call, as roses. It's the field ?? identification in the strength, that it becomes the essence of what you call, odor. This is what I explained to you, there are so many senses that man have not understood yet. This is how life is in the space.

In a way, if you look at it, man learn two things. The Soul and the physicality, which has different characteristics of itself. And he has his own interaction of the fields, what we call, the Spirit. Where the interaction of the two creates that hydrogen, that existence of confirmation of being there. Where these three are totally separate. (:52). Where the physicality stands on its own structure in interaction with the field of this planet. The Soul stands with the energies of the physicality conversion in a Gans state and matter state. And where the Soul stands as the central feeder control of the connection with the Universe and itself.

Then, you understand why when you came to the what you call, original, setting up the Keshe Foundation in the, what you call, Linz, we gave you three chairs. We freed you from this (P), we sent you to this (STP). You freed that and we sent you to this (STM). And then when you were freed, you were sent to the system, which has no dimension. Then you were connected to the Universe in different dimensions. When you came back, we took your back through three, two, one and you come out. This is how it is, this is all. You never understood that time, as I said, I'm no magician. Now you understand, I explain to you.

Each one was set at a given strength to be able to interact with the energy level of that point, where here you have in your body your Soul. Where you have it there. And knowing we've freed it, we allow it to expand. And then you went to see the husband who passed away, you went to the Moon and the rest of it, on the line of C14 interaction, according to the fields which this sent out they want to ??. (:54).

Now you understand, the world of the science has to be paramount over any hypocrisy. With no assumption. No cheating like, we know who cheated us with $E=MC^2$, with all assumptions. Another "Ayatollah" in the name of Einstein. Now you have the freedom of the knowledge. Now you have the command of understanding according to your intelligence. No one in the space can fool you. And you don't need to have what I call, the "Chinese eyes" not to know which way it comes.

When I lived in China, many, many times. I told this to Wang Lin once too. I wonder what the Chinese see us as. Not us as foreigners, themselves, another man. When you have an eye in this position. And what would happened if you bring the two eyes in the position of accepting both. This disposition of the eye in the Chinese is because of the shape of the skull, which forced the brain in a position that it has to force the eye angle observation of light. If we manage to expand the Soul of the Chinese, you'll see the eyes center goes back to center, like most do (like everybody else). (:56).

And this position of the eye, the color of the eye, allows absorption of the different fields strengths and brings different intelligence. The blue eyes, the green eyes, the brown eyes, the "off center" eyes, all this leads to creation of certain characteristics, certain behavior. Northern Europeans with blue eyes are like this. Africans with their skin and that, are like this. Because it's the rays we convert from the Universe in us, which allows us to store that energy to be capacitance to certain behavior.

This is why we become raised prejudiced and color prejudiced, because we don't understand that, with that we absorb different rays of Creator. Different rays brings different character, different behavior. Now we have a problem within the race of the man with the color. Oh my god, eyes, shape, white but Chinese, white but Korean, white but European or black this. If you as a race have a problem with the structure of your own, god help you with the Universe and the fields of the created things, which you (will) come across. You will be forever prejudiced, even about your own existence.

Because the rays comes through the dimension of the Soul, and how you're going to behave with that??. When we say we make one race out of the man, we make one race out of the Creation, not only the man. But at the moment that's all you understand. (:58) The new gimmick of "one faith," all the religions meet together. What a hullabaloo. But we still do what we like. We come here to cheat you, because now we have problems between ourselves.

You cannot do this in space. You have to understand the structure of how, what you see, what is converted in you, from which platform, from which floor of the rays of the fields of the Universe (stacked up CR from earlier). When we speak, when we understand this structure, then you understand that different kinds of lives are created on each floor. Each level, certain fields from the center, which weakens in one dimension and strengthens in the other, works. One will be looking black, and one looking like Chinese.

If you look at the race of the man, accepting the philosophy and theology of today, that the race of the man started from Central Africa and expanded out. Wow, you should understand what your Soul has done to humanity. You came out when that way, the ultimate color and race on the right (eastward) has become Chinese looking. You came up and went the other way (westward), you became blond and blue on the other side. But in essence, you all came from the same. And from this same of Central Africa, you came from the central Soul of the Creator.

How many times in the course of billions of years, this has divided (how many human civilizations). But in essence comes from the same. Now you understand in the world, in the teaching of the Keshe Foundation, there is no place for theology. As the theology is part of the creation of the physicality of the science of existence. (1:00). No one can fool you. In the time when man is educated enough, when he goes to space, when you see somebody from this race here, and this race here, and that race there, "oh, I know where you come from, because the fields of this place was stronger. So, you should look like this. and this, and that."

We start recognizing condition of the interaction of the field of the Universe, and the position dimension of the manifestation. Don't... We have no choice, no choice, but to become the observers of the Universe, and the givers to it, by path, by line, by understanding of the Totality. And this will become as part of the work of the Keshe Foundation in time to come.

Now, today for the first time we talk about the odor of the Universe with you and the rest of it. Now, I have to create that odor, for you to smell, to understand. To see, to trust, to go to the next level of understanding. The whole structure of the teaching is to teach you of the knowledge of the Creator, not the Keshe Foundation, we're just a name. Appeared in the name of everything which you have seen in your life. From Jesus, from Moses, to Tesla. (1:02). It's all the same essence, all to bring man to the point of today. That man can open his eyes to the rest of the Creation and become a passenger of the Universe, to understand how the Universe works, who carries, who takes a "piggy back" (rides on others) and who actually is the owner.

It's for you to become the judge of it, not for us to create another court to judge. As I said, when a man lives by the "Ethos of Mitra" there'll be no courts, because man judges himself. When you go into the depths of the knowledge of the Creation, you don't need an intermediary, because you can analyze it yourself. You can break it open, you can understand it. Then it gives you a freedom. It gives you no prejudice, and not being prejudice is a freedom, which man needs in the space to be able to live.

You came here years ago to fly in a UFO. Now you found your Soul. The faster "zero time" transportation, communication. And this is not what you bargained for. Because you were happy with the donkey of ?? UFO. Your gift is given, it's for you to understand it, and to in a way, add to it, from what you receive, that it becomes a Creator of the next cycle. (1:04).

As I said very recently, we had what we call, "Corona children." Many people had children because they were sitting at home and now had nothing to do, and they created "Coronies." As I said to Knowledge Seekers, now we have the "children of Mitra." Many Knowledge Seekers are conceiving children to create a cycle of Mitra. As the time is for it. But which child will carry that essence, is the gift from the Soul of the parents and not chances of life.

We will see this generation coming up. And with them they know each other, recognize each other, are created from the Soul, and does not matter if the eyes Chinese, black or white. They see through their Soul. They carry no prejudices and they are ready to be the what we call, "citizens of the Universe," not a citizen of the village of the Earth.

The cycle of life, does not matter where in the Universe, is the same. It's for the citizens of it to understand the culture of it, and the way it came to be and respect it. "Thy shall not kill." It's not, not to kill another man, which was (how it was) interpreted by now. Thy shall not kill an animal. Thy shall not kill another citizen of this planet. Thy shall not

kill another citizen of the Universe. Because thou knows how to tap into the energy without killing.

That's the whole message, thy I shall not kill. Because thou, there shall be understanding and the knowledge, that does not need to kill. We fulfilled the promises in the true essence of it, and not just by the word and verb of it. (1:06). Because you know how to tap into the energies of the Universe. You came to the center, you saw, and you went, and you swam with the fishes, and you saw the ex husbands, and present husbands, and the future husband, and everything else. Because you, was not you, it's the Soul of you, who showed you the path. This is what is to come.

This is what we try to expand into energy. This is how in the coming time I show you how to convert C14 into C12, and back to C14 that you live. Keshe Foundation today, at this moment has made access and developed what we call, the machine, which can create the "Soul of Plasma." "Soul Plasma generator" is in our hand, has been made physically. And it works, and it will work exactly in the essence of interaction of the Soul without the matter state coming into it.

Now that our Knowledge Seekers have understood this, you will see even the Enhancement Units (EU) will change in next few weeks. Because we have managed to access, to teach our Knowledge Seekers to create the first "Soul Plasma" created. The Soul generator is with us. And it is not that you can do anything with it. The only thing you can benefit by it is to elevate your Soul to be able to interact with other Souls without physicality.

Many of you will rise the dead, the same as Christ did, (1:08). because you touched the Soul, physicality is just a gimmick. And those who built it the first time they have felt it, the strength of it, the emotion of it, and the truth about it. Then there shall be no illness amongst the children of the man. And there'll be no ill intentions amongst the children of the man.

In our Knowledge Seekers understanding and accessing this new technology, already the next generation of the Enhancement Plasma Units has gone into operation to be built. It's a leap of centuries, thousands years of research from now. Man would not have achieved this even coming another hundreds of years. It's the gift for the sincerity of people who work with us. And you benefit because of their sincerity, and the way, he has worked.

Plasma Soul generators are so powerful, that once man holds them in his hand, we'll see the Creators, dimension of Creation. And the power which it carries. Only a fool will be memorized and a fool will abuse. This should make you more humble, and in a way, obedient to the laws of the Mitra, and nothing else.

It's not where we talk. Now, we have developed the technology which creates C14 at the strength of the Soul without the conversion of the physicality of the man, conversion from C12, to the essence of the creation of its base, which is the hydrogen. (1:10). In a

way, we have created for the first time a system, which generates nothing but fields at the strength of the Soul of the Creator.

Those who hold it understand its power and majesty. Those who abuse it will see the annihilation of their race. As simple as that. Once you touch it, it'll stay with you, and ?? it will become accessible to the fields of the Universe.

In the next few weeks we'll show you this system, and maybe with it, we'll bring the change to humanity.

The essence of the creation, the essence of all these teachings of the KF is for man to mature, that understand the process of the Creation, that no magician can fool it in the space, and divert it, and detract it from the path to the Creator. That's all.

The religions by their name they distracted man from the path to his Creator. Now we won't allow it in the space, that there will be no religion. Except understanding of the man of the knowledge of the Creation.

We go for a break, we come back and we answer your questions. But today's gift to you is to understand the system which creates the STM, (1:12). is within the grasp and within the hand of the man. There is one unit of this thing already on this planet, and this is a gift we brought (along) with us for you to mature. Not to be bamboozled by it, and make it another D of magician, but to understand the science of it, that you can use it in every D of the Creation. We'll go for a small break and come back.

<< **BREAK** >>> 474 KSW Feb 23, 2023 (1:18).

K- As usual, we never change. Are there any questions. I see a couple of questions in the background, which I prefer to refrain from answering yet, especially about the situation with the person we kicked out about 3 years ago of the KF, and what we revealed today. This is now in the hand of the courts. This is not allegation, and we did not know the lady has been deeply involved in pedophile groups and that's why they were following us like Alan Sterling and the rest of it. Living a double life has caused us a lot of problem ?? ?? but now we understand why, and we prefer to stay out of it. Or not to go public with it till the courts in Austria decide on the future of its decision.

There is a long history, family pedophilia and prison sentences for pedophilia, and even the lady has been put in custody to be from young age as part of this massive organization. And when they found out it took us time, not to ?? align the Foundation , and it brought me a lot of personal hardship, but it is part of it. We don't make allegation. We are in touch with authorities and police in Austria, sorry in Belgium and you'll find out. We don't want to go any more deeper than this, because now it's a case in court, and a lot of ?? of this . Just be careful how, and who you come in touch with this person, (1:20). and the people around her.

All your IP's and everything else are in danger. That's how they operate. That's how Alan Sterling got to a lot of children. And the biggest group ?? 7,000 people have gone into prison with Alan Sterling up to now. And we didn't know how they lock into Keshe Foundation. Since past three years, we've seen most of it open. Because the head has been moved out. There is no more access to abuse.

And I'm very sorry to put it in through in the teachings, but it's my responsibility to protect the Knowledge Seekers, and we've done our best to do. But keep away from this individual. Don't take my word, because of my personal reasons. Go to the courts, and the prison sentences and brothers who even abuse boys, in age of 34. It's inherited, it is in ingrained in their blood, and your children and your families is in danger. And they usually go for the families with a daughter. Just be careful. I have to warn you, those of you who associate yourself with this person, understand what you're in with. And it's not allegation, let the courts of the Austria speak and then we understand. Deep association ingrained in pedophilia, and being part of it. Because you're part of when you bring children in, and is involved in that. Just be careful please.

Any other question?

Q: .. Could you guide us better on the essence of Creation and in which it is sacrosanct, that man understands the conversion of C14, (1:22). in the creation of Cosmic Rays in the extension and amalgamation of Deuterium? We appreciate the guidance.

K- You've got to understand the world of Creation is like the ?? of man. It's as I said many times, we said, it starts from magnetic (M) field, leads to plasma, interaction of the plasmas leads to creation of physics. Interaction of one or two more physical entities brings chemistry, and interaction and completion of a few more physical states, which brings the chemistry, brings biology. More element interacting in different ??. That's how our science divided without us knowing.

We say, I'm physicists, biologists or chemists. In a way, where do I jump in? And then interaction of the biological structure leads to the creation of a plasma of the Soul, intelligence. And so, we go back to the beginning again, because now this radiates and it goes back to the beginning. "I am the beginning, I'm the end."

So, when it's the ray we call it, fields, Cosmic Rays. Their interaction brings us plasma, plasma of electron, and the plasma of a proton brings us hydrogen. (1:24). When we get couple of hydrogen's fields, interactions, we get copper, zinc or whatever. And then when you add zinc, with copper, we put a bit of oxygen, a bit of carbon, and nitrogen in it, we get the neural system, we get biology, we go from chemists to biology. And then when we put these together we get the STP, we call it, the Spirit. And that Spirit in interaction with bigger plasma creates the STM, and then the STM back with the rays of the Universe, back to the beginning.

It all depends on when and where we come to this point. Where and how we come to this point. And would we like to call cells, a plasma physicist, plasma chemists, plasma biologist, plasma "Soul-ist," a plasma of STP or whatever. We will hear these very soon. When our scientists understand the work of the plasma, we will hear very soon, I am plasma physicists, plasma chemists, as it's coming up.

Because I look at the physics through the world of the field interaction we call plasma, not as a matter state. So, you don't need guidance, it just you got to decide, which part of the interaction, and which part of the collective interaction of the fields you need to interact with. Which, and how you need to interact with. Then the rest is yours. (1:26).

Go back to what I said before, many times, some of the world leaders will not walk into these systems. Because their own Soul rejects them. Because their STP and physicality does not obey the laws.

In the past few weeks, we're negotiating with world leaders directly. With presidents and heads of the states, Keshe Foundation has entered into very deep negotiations with world leaders. Some of you who are close to us know, because you're part of it. And in some cases, you might hear we are. But we are preparing this for the 24th of March, when we ask you to dine with the Soul of the world leaders to bring world peace.

We had a very successful 20th "Dining with the Creator," on the 24th, I think it is, of March, we'll ask you all to join us, collectively, to meet, to sit with the Soul of the world leaders. Not to elevate them, but to put across what us as a citizen of this planet, require from them.

In a way, it's the first time Keshe Foundation on 24th invites the Universal Council to be present, it's their obligation to be present in that meeting. Where we change, we elevated their Soul. Now it's term, time for man to, (1:28). not to demand, but to put on the table, what we expect as citizens from our world leaders.

We have many of you who are in the background who work with us, you brought us, you bring to us, or we are negotiating with different government and world leaders in past 3 weeks, preparing for March meeting. If we succeed, we will have two or three world leaders with us in that session. They'll be hidden in the background for security reasons. We have world leaders for sure and ambassadors of the governments from African

nation. A number of African nations ambassadors and world leaders will be on 24th online with us.

What do we need? What do we expect? What is the next step for us to work through the Soul, and not through the physicality? It's your job as the citizens of your nation to represent your nation in 24th meeting. And through your Soul, because you understand the culture of your presidents, your head of nations, bring that change. And was the first time we put Universal Council on the meetings. That they themselves, start being the intermediaries between the world leaders and Universal Community. (1:30).

We don't expect anything, we just set the scene. It's you have to play the game of the change. Understand what it is, understand what it needs, understand what to be done.

We had yesterday Knowledge Seekers in the system. He's very devoted, he's very emotional. He says, "I've come to give to the all the Knowledge Seekers." I let him do. And then I went there and said, now ask what do you want from the Knowledge Seekers. What do you expect of them for you? Where we always say to give, let's see what they're giving to you. Not you're taking from them. If you feel it, if you feel their love, if you feel their touch, if you feel their existence.

Now there's no guidance, it's understanding. And in that understanding, elevating your own Soul. And being that converter I showed, to go through C14 in you become a C12, you use and you let go ?? which you don't have as C14, then what would you let go on the C14? You converted it, what are you releasing?

It came in as the field of no identity, interacted with your Soul. What does the C14 takes with it? Essence of love, essence of equality, essence of Creation in the completion of a cycle? (1:32). What are you putting back on that track when it leaves you? This is what all it is, no more. And how we handle this knowledge? How we interact with this knowledge, and how we don't abuse this knowledge, but make it available to the others to reach the elevation of the understanding we have reached, and they add theirs to it? This is all the essence of the teaching, and nothing else.

We still have to keep with the physical world. Make this make, make that. What else can we do. Do we just sit, because we know everything, on the side of the street, and become a hermit? Or work in a way to bring a new dimension of what you call it, better life, understanding of the life for the others. You don't see bunch of people around the Universe sitting all over the place. They're all busy, they're all still going there. You still see the UFOs, they're still trying to go and see something. You choose the dimension of physicality, you have to waste time. But how do you spend that time, or you waste that time? That's your decision.

Let me explain to you something maybe you have not ever thought about, maybe have. You all dreamt to five years ago, ten years ago, some of you to become, understand how the UFO works, (1:34). and go on these things which they fly so fast. Now you have a knowledge beyond that. But what do you think passengers of these crafts do? You think

they sit around just waiting to go another thousand years to another destination. Or as our scientists says, thousand light years? People are not idle, and sit just there idle waiting for the next. Have you seen these space sci-fi movies. Have you ever seen rubbish anywhere? Have you seen dirty windows? Have you seen any of them starving? And the scene they are always immaculately clean. So it's in a spaceship, so it's in the UFOs. Somebody is cleaning it, somebody's cooking it or preparing it. Somebody's playing the part of a doctor, somebody's playing something else.

Just because they're traveling they don't sit and lock themselves on the floor and that's it, till we get to the next destination. The food, the energy we call food comes through the wall of the system. So they don't need to kill for it, the warmth is kept. What do the passengers of these UFO's do going from one place to another? Sit idle? They don't have a 24 hour shift we have created for ourselves, because of the Sun movement.

As I said, if you go back to the history of Caribbean's. Caribbean's slaves had no holidays, seven days a week work. And they fought for the freedom to have one day off, the Christmas Day. (1:36). And when they got it, they call it "Junkanoo." If you go to Bahamas you know that, and they celebrate that they could have one day off. There was even Sunday going to the church. Sunday still work had to be done. You had enough to go on the rest of it. There were no breaks up somewhere, when you were enslaved.

And it's the same with Chinese. Chinese work seven days a week, they have no problem. When it comes to Chinese New year they take a break. But in the space it's a Chinese life, it's a slave life. You have no day and night, and you have no days. Monday, Tuesday is a habit of the man. PM – AM, lunch time, dinner time is a habit of the man. All these things in the space for you changes. Oh, it's 12 o'clock it's dinner time. How many dinner time you're going to get? Every five minutes? All these changes man has to get used to.

I was with a lady yesterday, she was talking to me on the line saying, I have insomnia, I cannot asleep. I said, now you just become a passenger of the space, you never sleep. All the UFO passengers have insomnia, because they never sleep. Because you don't need to sleep, because the body is ?? visually, if you understand the technology, absorbs and gives everything through the layers of energies. So, we are all becoming the same.

How we prepared ourselves for it? Are we prepared to live that life? Oh, I've done the eight hours shift, (1:38). it's time for me to rest. Oh, I've been up 24 -16 hours, it's time for my eight hours to sleep. These things don't exist. Some of the Knowledge Seekers go through that, they don't sleep three, four or five days. Because their body's changing to that. It's taking what it needs. But if you can sustain that to everlasting, then you sleep two, three hours to cover two or three days to cover what you stayed awake. So, you haven't changed.

This is not what is expected if you're in the space, it's what you understand of what is to come in the space for man. And that's the question to you, as Knowledge Seekers, as humanity, not for us to tell you what is to come, what do you make of it? How will you plan your life around it, the existence of your Soul?

I wrote to one of the bank officials very recently. I said, the travel from your city to Linz it will be 10 to 15 seconds. How is your structure is going to accept this? Where you rely at the moment on the air tickets to go through your bank, you pay them. ?? needs to be paid through your banking system, fuel to be bought through your banking system. When I can travel from there to here in ten seconds, fifteen seconds, there is no need for these things. Your bank has no function.

The change of life on Earth will come by the application of the technology. (1:40). 20 years ago, 10 years ago, we used to carry bundles of papers we call it, money, to get anything. When the revolution came in Romania, I happened to be in Bucharest. I went to a shoe shop, ladies shoe shop. A lady walked in with a shoebox full of notes to get another show instead. That's all it worth the papers in that box. I don't know how much it was. She gave a shoebox full of money for a shoebox with a pair of shoes. And I thought, oh God, paper has no value.

I lived in China for so long. Wang Lin can tell you, I walked around for months with, I think 10 or 100 RMB in my pocket, there was no need for it, everything was WeChat. Where do we live in the world of science? Where do we live in the world of Soul? And where do we want to live? We don't dictate, you have to decide. We just show you the technologies and the ways to make it, that it doesn't become magic.

Any other questions?

Q: .. Is it possible to replace the Soul maintaining the same physicality in the case the person has bad behavior. For example, in the position of a world leader? Thanks for the opportunity for the question.

K- We can... (1:42). A change of the Soul, if you change it to elevation of their Soul it fits better. And yes, you can. I went through it three times. Where their physicality has, does not make sense as a foreigner to the Soul, till it fits. And yes, you can change, you can elevate the Soul. You cannot take from it. This is the beauty of it. Because the more you take from it, the stronger goes to the fields in the inner circle of the fields. And maybe they cannot understand that.

When you elevate it to understand the process, and that brings the change. It's two different things for the same work. You cannot take because they don't understand how they got there, but you can elevate that they find a way to the same place. If you understand this, it's very easy for the rest of it. We don't, we elevated the Soul.

The Brazilian team relentlessly every night meets for peace between Iran and the 5+1, and everything else they do. But you have to change your position and understanding, can we give, can we enlighten their way to understand? That's the difference. And at the moment it's a Tic Tack game. Us, them and more of us, and more of them. (1:44).

When you watch what's happening in Ukraine arena, it's mind boggling, it's absolutely mind boggling. It's a Christian world against communism, with no religion. Other part of the Christians and part of the Islamic world joining into it as well. And the only one who's benefiting from it both, is the Jews. It doesn't matter which side they sit, they finance it.

And what is the job of you Knowledge Seekers on 24th? Is to elevate, to make the world leaders to understand, and world leaders to bring on the table the understanding of the politics of the running a government, a country. I've asked, from one of the world leaders, on the 24th, please do not come in, just listen and understand what is the problem from the inside. Not what you think is. To sit, to receive the elevation of the Soul, not to answer the questions of physicality.

We'll have two, maybe three world ambassadors with us on 24th. (1:46). They are close friends, they are good friends of mine. And they're coming in. I know one of them, I can't shut, what I call, stop him talking. But he's very opinionated, very powerful ambassador. And I asked him one thing, I said, listen, you come in, you listen, don't make any comment, understand where the problem is that you can explain to your president. That he asks to come in.

You've got to realize, you're given as Knowledge Seekers, as humanity, a lot of people listen to these teachings in the future, and they become Knowledge Seekers, and they understand the position and the beauty they have been, they have reached through their Soul in a way. That you can bring that change in. But you have to understand what that change implement, what it will bring in. Is it your wish? Or is it for collective betterment of the human race and the Universal Community?

As I said, the war of ideology is over. At the moment the war of religions is deepening much more. So, do we need to bring into play the world religious leaders too, on the 24th? (1:48). Can we invite the Vatican? Can we invite the Ayatollah Khomeini of Iran? Can we invite the two Rabbis running the what we call, the State of Israel? And those in Saudi Arabia to be present? How many of you will invite religious people to be present on 24th? And how many of them will be present?

Don't forget, by attending they endanger their own existence. We'll find very few Putin's, and we will find very, very few Gorbachev's. You've got to realize, you listen to the news, but you sometimes don't look behind what's in the news. The past few days we hear Biden in Ukraine, and at the same time we hear that the Russians are bombing everywhere the capital and the rest. But you got to realize something really interesting, how come Russians did not bomb the day and the time and around the time when he was there? They inform each other, no bombing, rest, step down, till I go and I come back, and then you can start again. Now you see how close they work with each other. There were no rockets attacking, (1:50). coincidentally the time when Biden was in Ukraine. Because Kremlin was told, Biden's here, bomb somewhere else, keep them busy that we can sell another 500 billion, millions of weapons.

Everything in the world of politics is structured. It's just that you are not in it to see it, to understand it. And President Biden did not get up and go there by accident, it's planned weeks, months ahead. Where he goes, what security, all the assurances from the Russians were taken, that there'll be no bombing, nothing, because Biden is there and the rest of it. So, be wise and understand how the world leaders work.

Any other question?

Q: .. A Chinese Knowledge Seeker wrote me a message. He said, it seems the body transfer of a human is a little bit difficult. So, he asked, do you have a plan, maybe to show to transfer an easy thing like a stone first?

K- You mean transmutation?

Q: Yeah, transmutation, yeah.

K- You never know, I might meet China that way very soon. It doesn't matter. Once you achieve it, it doesn't matter what it is. It's creating the condition. (1:52). If a stone is made of Fe, it's made of Silica, whatever, it's in your body. So, it's part of the same process. It's the expansion of the Soul.

Now we have a system which for the first time we use it last Sunday, Dining with the Creator. And we watched its operation. And how people felt, the way people felt and how most of the people tasted water. Because we brought in the Gans water, which is made in a very special way, we never taught it. Most of the Knowledge Seekers tasted water, or they received moisture. Interesting enough, because the system is controlled and connected to the Linz. Both people in the system yesterday, tasted water. Because it's set now it's connected.

The new system, which we tested, it carried all sorts of kinds of foods in it. Everything we could imagine, we brought it on the table in the system. And we let people taste, from chicken to beef, to chickpeas, to salt, to sugar, to honey, to flour, pasta, orange, and banana. Everything we could think, in a Gans state, we brought on the table. But before that we brought in a banana, orange and apple, to see what's the difference in the feeling and emotion and watching the operation of it. (1:54). And letting people help themselves and telling what to eat and everything else.

It's a very, very interesting observation how the physicality feeds the Soul, and then the Soul takes over and then it feeds the physicality, we demonstrate on the system. And it's very interesting what we see. So, transferring collective, is easier than individual, because even when you look at a stone it's not one atom, it's billions of atoms to make one stone, there's no difference. That's how it sits. There's no difference carrying a human being or a stone, it's all the same. It's the package and envelope, it doesn't matter what you put in it. We expand the Soul. We expand the Soul of a stone, we expand the Soul of a man, it's all the same, it's one envelope. It could be one gram of stone, it could be 100 kilogram ?? It's all the same. What you call it, international posts, you pay by weight. This is paid by the volume, the size of the envelope, and it's all the Souls, are all the same.

I'll be in China in the first weeks of April. And it will be nice to meet with the Chinese community, with the Chinese Knowledge Seekers. We're going back to the roots with the promise we made to the Chinese government prior to Covid, and we'll see what changes we can bring in.

Any other question? (1:56).

Q: Dean .. Mr. Keshe, you've opened up a lot this morning. So the Soul of humanity, if it makes this decision, does it carry the Soul of the Universal Council and all the Souls that are present, is the decision have been made to create a condition where we have peace now on this planet?

K- You have to bring it, decision is not made. We have made the facilities for you to do. None of you can meet with any of these World Presidents, very rarely, even if you're given chance, very few seconds and you cannot talk a word. We create a condition beyond their physicality you can do. The way you met with the Soul of the Christ, Moses, Muhammad. You felt it, you knew their presence. It's the same. We are facilitators for you to gain trust in the knowledge you carry. Not in what we are giving you. So it's there, you have to decide.

Q: And will the Universal Council as a group of representatives, you know, across the planet, will they bring about this condition?

K- How would they come into the meeting?

Q: On a Soul level.

K- Exactly, but how? Would they come as one Soul, or would they come as different Souls collectively as Soul of Universal Council? That you still have to learn. Universal Council (UC) members still have to learn that.

Q: So, act in as one Mr. Keshe, is that you're saying? (1:58).

K- More or less, yes.

Q: I will ?? interact with the world leaders, Mr. Keshe, where they will have to .. on a Soul level they will have to accept this energy transfer.

K- They don't have to, you cannot force anyone. You can make it available. There are two ways to do this job, and Knowledge Seekers have not understood this. You make it digestible, or make it available, or you make it hard to be accepted. It's like you having a sugar cube in your hand, and you try to chew it, or you dissolve with warm water and you can drink it, without chewing it. Which way you want to do it? The hard way? Or which one gives you the pleasure, the hard chewing it, or the pleasure of tasting the sweetness of the water of sugar? This is the job, this is what the UC have to understand.

Are you becoming another bunch of us, we? Or are you becoming a bunch of facilitators that we are here to serve? It's a very big difference. How would Universal Council as a total Soul will come into this meeting, will decide the outcome more than anything else. (2:00).

Q: There are a lot of thought there Mr. Keshe, a lot of field strengths, that needs to be understood.

K- A lot of realities need to be understood, not field strength. A lot of realities. A lot of what I call, Soul searching by the Universal Council. It's the first time you've been put on the test more or less. You've been put on, not test, but to bring the change. And in a way, we are all coming in as Knowledge Seekers with a bouquet of flowers. And you as representatives of Universal Council are there to deliver this bouquet to the world leaders. What is your plan? And every Soul has a responsibility to be there.

Q: So, what you just said there Mr. Keshe. So, my experience, you know, I spoke about this last time, that when I met a Knowledge Seekers, I got this, this fragrance of a big, and I'm not sure I smelled it through my nose. But it was very, very present. And then the other side, when I was in the last week, when I was in the position of the Dine with the Creator. I didn't taste anything because I think the Coronas touched my physicality. So, you know, my tastes and smells disappeared.

K- Did your Soul smell and taste? You're still physical. (2:02).

Q: Yeah, physicality. Yeah.

K- If you've been touched by Corona and you lost your taste and smell, it can be fixed. That's not a problem. But did you smell it with a, tasted with the Soul? Which you felt it? This is what I said to the couple of people who were in the system yesterday. Did you see or did you feel? Did you taste it? Or did you feel the taste?

You know, if you came to last Sunday, Dining with the Creator, we kept you for a couple of hours teaching you the techniques and whatever. And now you're invited for free food the whole of next week. Would you come in and sit there waiting to taste something and not ?? tasting? Or would you come in with understanding that my Soul is taking, I don't need to feel it? I'm just going in there, because I carry it with me, so I better let him do his job. And then you didn't taste any food when you came in, but did anything changed in your understanding, in emotion, in your life after the session? Or you still, oh, I didn't tasted anything, that was it.

Now we put you to test. All the Knowledge Seekers who came to Dining with the Creator last Sunday, are invited for free food and for a week by the Keshe Foundation from four o'clock to seven o'clock. Every day they can go and eat as much as they like. (2:04). But, do you eat with the eye of the man or do you eat with the STM? If you come there to taste and smell, you're still a man. If you came, to then realize the elevation of the understanding of the fields of the Universe, then you have moved a step forward. Maybe

you tasted the banana and you had a water, fantastic. Did you ask the Soul, did you taste anything? And he says, no, no, I didn't take anything, because I already had it.

Q: That kind of explains Mr. Keshe. So, when the water came up, like many people that were salivating and there was a lot of moisture in the mouth. So you were experiencing the energy the foods through the salivation. When I was present there I felt very full. I didn't actually need to dine as such. so...

K- You had a British breakfast, bacon. Yeah, we didn't invite you there to come and eat food. We brought you in there to learn how to feed your Soul. But we had to put a bait, we had to put a sweetener to get you in.

Q: I think the Soul brought me there Mr. Keshe, as it does with all of us.

K- Yeah. But it's there. So those of you who didn't come on the what you call it, Dining with the Creator. You should know that they got a free lunch ticket for the whole week, next week. As I said yesterday, it's three o'clock in the morning my time, but I get up to eat. But let's see. (2:06).

Q: I'm looking forward to it, Mr. Keshe. Thank you very much for taking my questions.

K- Any other question?

Q: .. Let's have a look at Cristiano's question. He's got a picture that he would like me to show that has to do with his question. Let me bring that up first. And Cristiano says, good morning Mr. Keshe, thank you very much for all the knowledge you have passed on. Mr. Keshe, in the 202 KSW you explained how the Soul is created through the positioning of the amino acids in the womb of the mother, and that from that moment the Soul absorbs the fields of the environment of the womb of the mother, the environment of the Earth and Universe, and thus feeds the STP. A little further you said that if man can return at that point, he will remember how to feed himself from the fields without having to kill, because he already has the knowledge.

So the question is, how can we consciously return to that point, to experience that knowledge of absorbing the fields from when our Soul was created? Would the Emotion of presence be a way? How could we practice and teach this knowledge?

K- In a single word, "detachment." That Soul in that position is detached from it, (2:08). as it lives on its own, with what it created it. Because it knows the rest has been made available for it. It doesn't kill in the womb of the mother. The mother with the love of the Creation and the Creator gives freely, make it available. He takes from it what he wants, because he's detached. But it's the same for the man. Become detached.

That's the biggest part of it. If you can become detached from physicality in a way, not just sit and become a hermit. You still live (live), but you know what's the purpose of this life and there for you to enjoy the ?? It doesn't come by becoming a hermit and

sitting in one corner. And in that process the joy you bring somebody is a service, you're serving someone. The food you give someone, is a service. The calmness you bring, the joys you bring, this is all is, what we call, service. You serve something. This is what is, and that's what we've got to realize. Detachment. If you reach that point, then you moved forward to become man of Universe. Because then you realize the Universe provides for me, I'm just here as a converter to provide for the others. You are that generator. (2:10). The flow of the river is the same on the top and the bottom.

Any other question?

Q: .. I think you might have already answered my question. When we're looking at giving say love, the energy of love, just trying to sort it in my head. What sort of qualities of energy fields, how would we know what to give? It may be the wrong quality. But through, you're saying through detachment the Soul will give the correct quality of energy, is that?

K- That's "spot on," exactly. Your job is make it available. The job of the other Souls is to take what they need from it and not to steal from it. That's all it is.

As in the farming world you understand. You forever put one seed to take more things out to give more to enjoy what you seeded. And this is what we call. Farmers are one of the closest people to the world of Creation. (2:12). They embrace it, and some disgrace it, as I call it. Those who embrace, they give that life back to the people as a giver. And the ones who disgrace it as we see it in what we call, animal farming especially, nowadays. But in essence it's all how we do it. It's the same with the computer people, it's the same with the guy who collects rubbish, or the man who sits as a president.

Q: You made me feel better about being a farmer.

K- I know but it's the way it is, is the way we see it. The farming community always been very close to Creation. Because they have to understand the work of the all things, the Sun, the rain and the wind and the rest of it. In that way makes you. In a way it's what they say, "thinking makes you wise, wisdom makes you rich." And that's the richness of understanding the Creation.

Q: .. I'm a registered international senior nutritionist. (2:14). I am now in London, but I am building a Gans factory. We meet. Some questions we need to inquire from you? Could I visit your foundation in Austin, please? My company name is Shang Hai ?? Life Health Technology Limited? She left her an email.

K- .. We are in Austria. Forward that email. I think we know who she is. Get in touch to the info@keshe.foundation and we respond to you accordingly. We are just about two hours flight from you, from London.

R: She could arrange for visitation of the facility or to meet, how would that be?

K- No they just send an email to info@keshe.foundation and write there. I now these people trying to build the Gans factory in Shanghai. We know about them. And I will be in China in April, we can meet in China or in Austria. (2:16). But we have commitments and agreements with the Chinese government to build Gans production.

But in a way, the way we look at it now, Gans production factories are a waste of time. The development in the technology, especially in past three, six months is so much, that the Gans production, the way was set out, its short term investment. The development in technology, especially what we're seeing with the wireless system we brought in, makes a lot of work of the Keshe Foundation, even we needed it to build it up to be, more or less obsolete. Be it for wellness application, be it for farming, be it for everything else.

And we will be heavily marketing the new expansion in the world of science. When you have to put Gans's in a 1,000 hectares land in China, trying to get to water or Gans conversion to the seed becomes cumbersome. With the new technology, we can place the whole information of the growth within the structure of a satellite, which targets the land. With the harvest two times, maybe 10 times more. The Gans production the way is, it will still exist, (2:18). but in a way we don't see a future for it.

And this is one of the reasons in my trip to China we are offering totally new structure to the Chinese government, to the authorities. Building these Gans factories, they're making advance what I call, space plasma factories where we deliver technology, and not much of the material needed. Is the future of agriculture farming and feeding.

The development and leap in the knowledge the past six months, even we use part of the structure we set up originally, has changed a lot of things, and it will change. It's very much, we're reaching a point that we decide how and the way a plant will receive Cosmic Rays, and how it will change its position.

The production of Gans factories this scale, we were planning 12 months ago, is out of the window. It becomes very much like what we see in the Americans, spending a fortune, building all the cabling and everything, and the mobile phone came, and Americans are still backwards compared to the rest of the world. They were for years, because they're trying to recuperate their finances for what they did the cabling. (2:20).

And China is a ground we feel very comfortable with to release this new technology to Chinese authorities. We are not coming in to build Gans factories anymore. We're coming in to deliver energies, and energy production system, from power point of view to food, within even your radio waves, within the what we call, Apps on your mobile phones. And what we call, you've seen like last week, and before, the mobile transformation, transfer, which means you don't need Gans centers to build.

It goes back to the knowledge which we explained this morning, how you can make any radiation out of C14. And that knowledge is within our hand. Instead of building and waiting till you teach, you feed people without them knowing through it. Transfer of energy, transfer of energy be as light, or energy be as food, through at the moment

telephone communication and the mobile headset we've shown, is the future, the fast way to change the process.

Building Gans factories to produce different Gans's it's at a moment something 10 years backwards for us. Technology development is so rapid, is... And it was inevitable that this would come. But the good thing is that the technology development are all coming from inside "one house." (2:22). We were planning to build Gans production factories maybe two years ago in a very large scale. Today, I don't see any reason for building such a structure. Be it from absorbing CO₂, be it for production of food or communication.

The development and progress in technology as our Knowledge Seekers understand and now working with it, is even the Enhancement Power Units we already put in the market. The next generation will be totally different. Coming up it's going into, as it goes into production. And it's totally different, even though with the same outcome You will see a new generation of plasma power units will be introduced in the next few weeks. It does the same thing, but in a more powerful way, in a different way, it's easier and allows us to do a lot of new things.

Get in touch with us, we still can talk, but I should be arriving in the first week or two of April for a couple of weeks in China. I will be traveling with the management of the Keshe Foundation. Then we'll bring those changes in directly to the Chinese, and we show it. It's not something to be done, it can be commercialized instantaneously, if we come to an agreement with the Chinese authorities. (2:24). Now it's the development of the plasma space level factories in China and in the rest of the world, and not producing Gans's. But we still produce some Gans's, but in a way has no priority in the program.

Any other question?

Q: We have a couple of questions regarding the what they call, the Cosmic Ray headphones, or the headset that is available through the Keshe Foundation. One question regarding who says, I have a titanium implant for my teeth and Mr. Keshe said not to use the coming headset if you have an implant.

K- The tooth are different than the rest of your body implants. The tooth are separate, they don't have much structuring. The implants like your hip replacements, shoulder replacements, valves, these will have, or if you have a plate on .. your vertebra, these will grow, and then you feel the pain. Then you have to go back to the doctor to take the joint out, but what do you have to put in replace for it?

The bones will re-grow. We see it today. (2:26). We have a case running with the doctors where we have seen this, I know Azar is going to kick herself, we never told her, but you know. We have seen, hopefully we can quantify it in a better way if it does complete the cycle, the growth of tooth, which has disappeared before. We've seen the first sign, the change through the new application of new technologies with doctors. We have actually hard pictures photographed. So, it's not something we think, we see it in four to six weeks. How we'll see if we are seeing what we've seen the ?? of all sort of things. We just

maybe in the next six months we have a better view of it, in the growing tooth. And that all comes through the new technology which we have applied.

It's the same goes with the hip and shoulder implants, titanium ?? We saw this years ago in Belgium where titanium shoulders were getting dislocated, as the bones start growing. Would did take the same shape and complete? We did not have the chance to complete the researchers, we left Belgium. But, yes, the bones grow. And then it comes, does it fit?

Or we release more technologies as we have done in the new technology, in growing parts. (2:28). We're testing a lot of things around the world with different Knowledge Seekers and doctors and everything else. And we see a way out of a hip replacement, we see a way in the strengthening the hip bone, the femur, and that there is no need for any of these. And I think the results will be out by the doctors in next six to twelve months.

Q: .. For someone who has a hip implant, an was accepted to be treated by the Keshe Foundation doctors, would the Cosmic Ray hybrid plasma generator help speed up the healing process?

K- The hip replacement, if you've done, we don't touch, we have told the doctors. If you're going in for a hip replacement, there's an opportunity to try with the doctors. We are extensively researching in this area. So, if you already had the titanium hip replacement, we are (in a) wrong position to tell you anything, because we cannot change your titanium head of femur to a calcium structure. Impossibilities. That's why I say, it's too late.

But those of you who have the problem, there is a possibility that our doctors can do, using the new technology and help for them to understand more how it's done and how it can be done. There is that opportunity, 100%. (2:30). The release of the "Knee" Gans was one of those steps in that direction. And we explain those very soon, how those who bought the Knee Gans's we're waiting for the data to come back. We know what the data is going to be, but just confirmation of it. Our doctors will use the Knee Gans in conjunction with the new plasma technology for rapid growth of different parts of the body. We see that should be on the cards in the next six months. It's like when we gave you the glasses, a lot of you bought it and reported back to us what you saw, elevation of the Soul, you felt good or whatever. It gave us a lot of direction in how to make the Headsets. Now this Knee Gans is another insight into it. I see a lot of people asking, can I use it this way? Can I ?? patch it? Can I do this with it? There's an instruction on it, follow the instructions. As you have signed the agreement, it's a trial, return back the data will help us for structure of the next setting for the doctors.

Q: .. Could you talk to the doctors of the Keshe Foundation to come up with a package that includes the removal of the hip implant, and growth of the bone through Cosmic Ray technology?

K- We cannot. We don't have... There is no way this can be done. Impossibilities. At this moment of time it's 1%. (2:32). Because you have to understand what they do when they

put a hip replacement or a femur replacement. They cut it off, it's gone. Then they drill a hole in it to fix it, or they glue it. They destroy the whole structure where it comes from. And to grow this, to take it out, and to grow it, will take months, it's not matter of seconds. It's not the sci-fi movies, buzz, the picture appears, and the bone is suddenly there. One day might be. But that one day is at least five to ten years away.

You've got to realize, most of this research is coming out of one structure. And other structures are stealing or whatever taking from it for what they use, but we don't see what they're doing with it. And they come up with different banners and ways not to show what they're doing. If one day, being locked up into the world institutions to work together, we'll see most of these things. As we demolish the patents, there is no need to hide it. As it develops, it will be in public.

One of the ways to most probably increase the growth of amputations, than the hip replacement. It's much easier to grow an amputation, than to do a hip replacement. That will come through the Horizontal systems we see in Linz. That's more or less bring in the new advanced technologies we're developing now, (2:34). plus what we know from the past. Growing legs and arms will become a matter of three to six weeks. If you have amputation from knee down, what I see with the knowledge we are carrying now, with the knowledge we carry from the past, six weeks will be average time to re-grow, and the rest of the leg from knee downwards. But maybe three to five years. So, micro surgeries and these things will go through the window. But the knowledge growth, the sped of knowledge growth will dictate a lot of these things, and the knowledge, and the freedom we get to do it.

Q: .. For a 380 volt electric panel do I require a special Hybrid Cosmic Ray system to be built? Or the ones on sale will work just fine?

K- What?

Q: A 380 volt electric panel. Will the system plug into that, or does it require special Hybrid Cosmic Ray system to be built?

K- He means it is a 3 phase?

R: I think that must be the case. I was wondering about that myself. 380 it's normally a very high voltage. It must be a three phase industrial type system.

K- You cannot use that. An industrial version of plasma Enhancement Units will be built in next maybe a week. We already discussed it is on the plan to be built. And then thinking that we might receive it before March, mid-March, or whatever, just after the March. We're building industrial scale plasma units for factories and the rest, yes. But as different structure. And we see it as to be essential, because households will be a small fraction of the power usage. Industrial usage is the next one on the ladder, which we already... I think three prototypes are getting built totally different. And size wise is about, I think, about four or five times the size of the units which we are putting out now.

You will see a new tabletop version coming out in next week or two than what we shown. This is another, what you call, addition and evolution to the technology. This is

extremely, extremely powerful system developed, very simple. And it'll come into the market very, I think the first few will be presented next week or two.

As I said, the evolution in development is massive. It's not just evolution, what they deliver will bring changes. It's so revolutionary that as you know, (2:38). we always built two twin systems. As you saw in Linz, we are building the second twin system, and the change is so much. We finished one unit, complete more or less, which you lot tested on Sunday for the first time, you were in it all of you who came for the food. The evolution is so much that instead of building the second one, the same as the first one, we are implementing the new Soul Reactors in the new one. Which it will be very interesting to see how these two systems functioning in a similar way, but totally different way, will operate. So, what we plan to have two systems, we'll have two systems. One is what I call, the old version, and one the new Universe of plasma systems, what I call, the Soul Reactors. And that will change the game drastically.

The first one built has already affected, we've seen. We have to see how the other combination and how we can miniaturize it to place it within the Headsets. Or we look at the possibility, do we need a headset, where we change the whole environment of the whole thing together. You will hear next few four or five weeks. It's a heap, it's a huge development in the world of plasma technology, huge.

Originally I told this to the Knowledge Seekers about a year, two years ago, but they could not see. Now it's back on the table because we gained more knowledge, and they can see it to complete it. It's exact replication of the work of the STM, (2:40). it's the exactly replication of the center of the Sun. And if the center of Sun fields are radiations which come from it, lead to creation of Cu, Zn, cell of the body of the man, the cell of the brain and everything else. So, you can imagine what this system carries within it. It's self-sustaining, and self-elevating. It's an amazing system.

I have a very direct line to the Romanian group. Do not get fooled by what is get and claims made by Barbu. We do not approve and support his work. Because he just takes the use of the words of the Keshe Foundation. And just make it what I call, another "phantom claims." I ask Barbu to reconsider your position and what you claim. Stay with the realms of work, of plasma work. Not necessarily Keshe Foundation, there's a freedom of ???. But don't associate us with the phantom works you do, and the claims you make.

Any other question?

Q: .. Could you talk a little more about the beginning of the new cycle from the STM? From what I could understand, Twinity is always necessary for new seeds to be created. Among mankind, (2:42). the souls of the father and the mother divide to form a new life. In the case of the STM seed, when it is ready to start a new cycle in the Universe, and create a new fruit, will this new fruit arise from the interaction of the STM with the STP itself?

K- This is a very interesting point. As a nuclear physicist I put it, it's the energy of the fission within, to become a fusion without. When the man reaches the point of death, it carries two elements of life of plasma with it. And that is, the physical strength dimension of life, not necessarily connected to amino acid of the man. Is within the structure of the STM. When it reaches the point of balance anywhere in the Universe, that point of balance is where this seeds is allowed to, or this field of plasma is allowed or create, conditions created for it to be (living). In a "fission style," as we call it, in their interaction, will create a direction of atmosphere of life. (2:44). So, Twinity will come from within, not necessarily from out.

The Creator created Mitra from within Himself. He didn't take another lover from outside. So, shall be the same with the man. We carry Mitra within ourselves at the time of departure, which is the, what we call, the "Spirit." This Spirit in interaction with its environment gives the physicality, but at the time of departure and travel is within, it's fused in. Until that fusion is not complete, the separation does not come.

It's very much when we send our child for a picnic. We put everything in a basket that he can enjoy the time when he arrives at the picnic. And this is the cycle of life. Always remember, when the time of the separation of the STM comes from the physicality, the Spirit of the man, essence of the plasma is within the Soul itself. That in the time and position, when it's released become like that electron, from the neutron. The essence of electron is within the neutron, it doesn't happen coincidentally. It just has the seed to create, to release that part. It's a birth, it gives birth to an electron. (2:46).

The STM at the point of manifestation of physicality, gives, releases, gives birth to the structure of the Spirit, which the man carry, left, deposited within it, at the time of departure. Because it made it. Part of the point of death becomes, is when the Soul is complete, but the Spirit completes its storage or depositing of the energies which confirms its existence within that Soul. It's when the mother let the child go.

And when it arrives in the position, space, where the field strength of these, the release of that point comes to flourish. Then you call it Twinity. But Twinity comes within, created within then it becomes a Twinity. You put the seed out. You don't split. And we don't have " shako ?? " as it's called in Islamic world, when he cut the Moon with one sword in two halves, that's why we only see one half of it. That's the belief in the Islamic world.

It is essence in. In a way, one of the books I have referred to this. And it interacts with an environment, and when the field strength is the right way, (2:48). the Spirit of the man will manifests itself as a twin, or what we call, Mitra. The love of the Creator, which comes from within the Creator.

You know, I always said, maybe you've heard it before or not. We have a philosophical ideology that Adam made Eve from the rib, one of his ribs. This is in truth the creation of Mitra, but it's put in the term of the physicality of the man. The Creator created Mitra out of the fields of himself, to confirm his own existence, and the he fell in love with it.

And then the what we call, the fruit, the apple which got the Adam to bite out of it, was that love. When Mitra came to Earth and knew what love was, and it got the Creator to bite that feeling, emotion of love, and that enslaved him. This is what, then in, what you call it, in other languages, and the books have changed to Adam and Eve and Eve being born, created out of a rib. But the apple is love, it's the "poison," which Mitra learned from the humans and got the Creator to bite at it. Actually, it captivated Him. ?? enslaved Him ?? . (2:50).

Any other question?

Q: .. The question is about the MaGrav. If the MaGrav is used with solar panels. Should it be connected in the continuous current from the solar panel or after the Inverter?

K- It doesn't matter where you put it, it still touches your Inverter. It's a field flow. It's not a river one direction. It flows into actually your panels, back, and through your Inverter, or after your Inverter into your circuit system in the house.

One of the reasons we launched and we completed the Head Units is because with the mobile phones we see a lot of problems with interacting with plasma. And this is why we delivered it, because then you, you live within the same environment. (2:52). The .. Combined Unit which now is on offer, is the best way for the future of the structure of the what you call, the new plasma technology.

If you remember when we put the MaGravs into the houses, you Nano coated the wires. Now we have the same problem with the Headphones with the plasma technology. But across. I'm waiting to see which satellites will start malfunctioning. As we increase the use of mobile phones and MaGravs and, what you call it, the plasma technology, there will be a conflict in the satellite system. But we have to wait and see who shouts first. Without a doubt it will do.

So, we had to introduce the Combined Units which is now on offer. To replace and in a way to upgrade the technologies without satellite. In the future systems of these tabletop, and the Head Units, a lot of things will be replaced, a lot of things will be replaced, which you are used to. But don't forget, we didn't have these things 50 years ago, we got used to short term. Now we're going to the next cycle. The mobile phone technology, the what you call, satellites, all these will be changed with a much higher speed, without failure, guarantees. (2:54).

If you looked at the last Sunday, Dining with the Creator, it was a hybrid, we transferred to you plasma. But through the what you call, present communication line. Some of the messages is not at the strength of the Soul because the communication lines carry. But when next time we have Dining with the Creator and most of you will carry these Head Units, you'll feel the banana Voila, there and then, if you need the banana, you'll taste it, you'll feel it. Because no information is lost, and it's directly delivered to the Soul. It will become that dream, that you thought about, you have a dream that you had the banana, but this time you feel and taste the dream.

Any other question?

Q: .. I have a few question, one is, when you use all these plasma technology on helping us, do you think we become lazy not to use our Soul?

K- .. Do you think God becomes lazy, just because he can use His plasma technology?

Q: Okay, so we don't become lazy. (2:56).

K- ?? that privilege.

Q: Okay. So another question I have is, all this plasma with energy, food, everything we trying to make it happen, can we introduce it like a cell phone, like in the present cell phone we can embedded all of it in that, so in one go we have everything?

K- That's what the Headsets are. The new Headsets we put out they have their own transmitter with them. We use the table . That's why we said, as a console with set. The replacement has to come with the technological development, and as it's happening, even what we see. The whole structure of plasma technology is upgraded by huge frog leap in the past 10 days, 15 days. We try to...

Q: So, for example if I use the Headset I can have a heat to the house, I can feed myself?

K- You can dream what you can dream, but the reality is, do you need to heat the house and kill the plants in the house, which you have no right to? Or do you have the right to feel warm? You understand? It's that you will create a condition with the transmission that creates a field that allows the plant to feed themselves, to heat themselves. This is the whole purpose of this new development. (2:58). This is part of what is coming.

There is a massive change in space technology. We, as I said, we tried to introduce it to Knowledge Seekers about two years ago. We did a lot of experiments on it, but it could not be understood. So, we left it. And we come back to it now, because of the development in the reactors and the reactor technology, it's grasped straightaway. And still, they'll be, the first ones will be in their what I call, in their puberties, and the mature ones will come over years.

Then you think to convert... It's very easy, I know how it can be done, you can create within your console the condition of Mars and travel to Mars. You become independent, control by governments will not exist. This is for sure. Nobody can dictate. Government here can tell you what you can do. But when you have the freedom to go to Mars, you have a freedom to go to another planet, there is no government there to dictate to you. And no government can dictate to you, you cannot go to Mars. You set, you will have the access to it. Creating condition of the what I call, that smell, that odor, that field strength of the Mars, it should be within your set (Head Set??).

Q: Is the "gating," with the way we go, is the gating is going to become obsolete? For example, you have a spaceship, I have a spaceship, I want to come to your spaceship, I can bring my gravitational magnetic field closer to you and jump into your spaceship. Is it still the same? Or is it obsolete, it doesn't exist?

K- You choose. (3:00). The development in the matter states will not stop, because of the understanding of the, what you call it, dimension of the Soul. There is a term I very seldom use, you call it, the "Soul searching." I call it, the "Soul researching." A lot of research will go into understanding the Soul. Not Soul just as the STM, the Soul of the Creation. How would you interact the Souls to create... The way we saw what we do with this ??, with that ?? in the physical dimension, the created things, not only the race of the man, will try. Now they understand the process. They understand the leap in the gain of the knowledge, all will try to understand different flavors of the interaction of the plasma, of the fields.

Q: Mr. Keshe, for example, is the difference between having a spaceship being it in the space, or just myself being be in the space and you are in the space. If I want to give you something, do I still have to use the gating, or just can give it to you?

K- I don't know what you mean by "gating." But in essence, you interact with the fields

Q: Because in one of the teachings you talked about gating and you said gating is just you bring the gravitation magnetic field of the spaceship close to the other one it creates a bridge, and then you can move from one to the other one.

K- This is the matter state, when we were teaching you the what you call, physical transformation.

Q: Okay, so it has nothing to do with the plasma then?

K- Plasma T. It's an extension of it, if you understand that you can apply in different way. But it's being accepted. You can give as much love as you like to me, if I don't accept it, it's (just) another energy in the Universe. (3:02). Or you can give me one love, and I accept it, and it becomes the biggest thing in the world.

Q: Just like the way Creator is always giving us love, but we don't, we're not open to it.

K- Yeah, it's just the way the mother gives love to her child. When you cuddle your daughter. You cuddle her because you love her, and she feels that warmth. You cuddle her because you need to be loved, and she gets fooled as the first one. You understand? We give love in two different ways, one to satisfy ourselves, and one is to satisfy the others. And sometimes we do both at the same time. "Cuddle me that I can cuddle (you), love me that I can love you." We understand the difference.

This is how it will come. I give you, I present you the gift of love, but if you're not, if it's not your, if you don't accept it, or you already have another love to love, which my love cannot interfere with, you have to respect it, you cannot force it.

You know, what we had in NASA, in the space station with a couple, the guy wouldn't accept it. When they came back to Earth. It was a good feeling in the space. So, the lady went to kill, you've got to accept it. And this cannot happen. I wrote to one of the NASA guys few years ago, I said, the emotion in the space is different than emotion on the ground. In space you have nowhere, that's the only thing you accept. On the ground you have options and can lead to homicide. So, it's availability, and acceptability, (3:04). if you accept. Just because you made it available, doesn't mean has to be accepted.

Any other question, or shall we call it the day?

Q: .. You mentioned about mono-energetic fields last week shortly in a few sentences, and I would like to ask whether you ?? .. say something more about the nature of that, because it touched me.

K- Mono-energetic we call them rays mainly, is what we call, like a laser beam. And mono-energetic fields rays or whatever you call it, are one of the fastest way to deliver, one of the fastest way to deliver. Mono-energetic fields are usually, are usually of the ray character. But due to the interaction on the outer surfaces they create friction and lead to fields. We have no choice, we always start with the ray, (3:06). but due to interaction and friction we end up with particle, or with fields.

And this is part of what the world of present science has not understood, they just say, oh, it sometimes behave like a particle, and sometimes like a ray. Because rays are amalgamation, or mono-energetic fields, they interact with their environment. Otherwise, they can't show their manifestation, they don't show existence. And their interaction, they gather plasmas, which the ?? same, becomes cylindrical, and they become particles, become a plasma.

And 2 things dictates the strength and the fields of mono-energetic rays, or magnetic fields. One is the strength they started with. Secondly is the environment they interact with. These dictates how the rays will become fields and become particles. I can shoot... At the moment today, we shoot a laser beam. We start as a laser beam, we finish with the laser beam, maybe weaker. But if you work with mono-energetic rays, from plasma, by the time you reach to the other side, you have a plasma, you don't have a ray. Depending on the time, space and the strength of the fields in the space, in comparison to the original source. The slower you go, the more friction you create. The deeper the field. (3:08).

Mono-energetic rays, or mono-energetic fields are part of the high speed travel. And if you can understand it, it goes back to what I showed. It's a parachute, or is it an escalator to take you up or down (The CR stacks)? It depends how you create the sink in it.

You can create a high speed for a ray, if you can increase, or target increase the source. What this means? It's a pre-arranged, it's like when we send people to the Moon. Hopefully next couple of months we trying to. We don't send them as a package ?? Voila, we are going to land. We take part of their energy of their Soul in one system, which transferred back to the position on the Moon. And in a way we create a Mitra and the Soul, which is, the lover will go to it. If you understand the principle.

We just don't put them in a rocket and shoot them at the Moon and they land there. Does not work that way. Because that way you need to create a lot of controls, holding it, stopping it, you don't hit it. You know, you don't send the man out to become a pancake on the floor of the Moon. When you understand and develop this technology you create plasma, when he gets there according to the distance, gap energy of the fields you slow down as you approach the position, automatically through magnetic fields. You don't need a control system. Teaching a deep space travel is an art. And I'm a master in it. I've done this for so long.

It's not just sending somebody to the Moon .. in an envelope. We fast forward with a higher level. As I said, I can create any kind of radiation and strength field parallel, or the same as the Soul in the point of direction. It can be anywhere in the Universe, you don't need to see it to target it. In approaching. First of all it's attracting, it's like electron and proton. One is in volume, one is energy ?? And one attracts the other one to the other. And then you have a point of separation where you see the gap between electron and a neutron, and that point you change to land.

Traveling with the Soul or flight system is an art, art of understanding the work of magnetic fields in the Universe. Don't forget, we came that way, so we know how come. And as we came, we know how to go back, so we know that ?? very well.

Any other question?

Q: .. Good day Mr. Keshe. (3:12). ..

K- Are you living in the frozen weather of your country at the moment?

Q: Yeah, this is my question. Really? Yeah. What's happening?

K- I knew you were going to ?? ask. So you see, the Soul knows. What do you mean by what's happening?

Q: What we see from this condition of the earthquakes. And you know, a lot of times come to my guts here, that your teaching in back years, about the separation of the continents. .. So, what is your intake in this condition? What's happening?

K- No, this is a normal process of expansion and contraction. Have you seen, somebody sent me a video. Where did I see it? .. I received three or four videos in the past few days, that one of the agencies has shown, we're looking at the earthquake with the buildings, they have shown actually what has happened to a mountain or a mountain range in that area. It's a huge valley. I think he says is about 13 story block, and the day before was a flat land. The continental move is a shrinkage.

And it always happens in a certain time when the fields extraction and contraction on the upper layer puts pressure on the lower level. You know, you blow, you have the blowers, you push it together and it blows air on the other end, when you make fire, the blowers (bellows) we call it. (3:14). And then fire expands, and then it gets hotter and hotter. This what happens to us, we come from the summertime, hit the cold time, the physical structure, tightens up, blows the fire at the bottom, something opens up, it's like we call it an earthquake.

Earthquakes, big scales have a certain time in the season. So that's why we see earthquake majority of time in the winter time and all the problems. Because we come from a very hot summer, the surface expansion is there, we come into a cold surface contraction. Now we open the bow of the blower, now we close it, the energy is not charcoal to fire up, it's the center of the Earth. So that pressure gets absorbed. And it gets to a point, you know, that you see sometimes the charcoal suddenly explodes in the middle of the fire, explodes back up, the energy cannot go in. And we get it as an earthquake backup.

So it's done by the Russians I heard. And the Russians said, they can create the worst one in Istanbul, and then another one. It's a good story, but it's the real physical life on this planet on its upper layers.

Q: Okay, but what about the seas, is going back?

K- It's the same. We have cycles of the heat movement, the cold and the heat, up and down.

Q: You mean the tide?

K- It's the weather tide, not the water. But generally in Northern Europe, we had a very mild winter this year, very mild. We had only I think two snows or three snows in the upper Austria. It's like spring in the middle of the summer, you can go out, it's 14 degrees a couple of days ago. But these are fluctuation in the weather. (3:16). And some years, three, four years ago, the snow was so bad. And here on this hill where I live, it's all green. We don't hardly see any snow. On the hill about 10 kilometers away where the research center is, they have a different condition. And at the same side, another hill further up, you can't even drive. Last week they had to call support to get them home, from the council with the bulldozers, what you call, snow plows. It's a milder than unusual, but essentially it's part of the life of this planet. And if you're Dutch, you say, it has to do with Carbon creation global warming. So we can sell some more trees.

Q: No, no, I you know, I'm not that way of thinking. No, but I am connecting the dots here from your teaching. You said that we are about 1 million year ahead because we expose the black blanket (oil) from its position due to the plasma. So, that have also effect.

K- Yes, for sure yes. They're going to blame us for it very soon. That's exactly, then they can't blame us, because we already "killed the bird."

Q: It's a sick world, they say.

K- But yes, it is. With the creation of the plasma we change a lot of things. And, in essence, it's what the planet accepts as a change, it's not an enforced change. It's availability of acceptance. (3:18). This is the difference.

Q: Today, tomorrow they have to accept it.

K- It depends how you want to celebrate, and how you want to do. It's like yesterday was "Ash Wednesday." And it's like, you know, after Christmas, you make your wish one thing, you are going to lose weight again this year, and you don't take any more sugar or whatever, or chocolates this year till you lose weight, whatever. That's what Ash Wednesday is. You make your pledge, what you're going to deny yourself, usually people deny meat or fish or whatever. Until the Lent is over in 40 days, and then they eat whatever they like.

But, who brought these things in? And what we accepted to believe in, accepted it to be that way? It's, we can believe anything, but what effects will it have on us? Plasma Technology surely will bring elevation of the Soul. There's something in our scale, on the scale. But what would it do to the planet, which is again, it's interaction with the Soul of itself.

If you think of it, when you made it to the matter state, as a CO₂, you will run into crisis of global warming. When you change the same global warming CO₂ into the Gans of it of CO₂, you brought global loving, because you add to the essence of the emotion of the planet to love more, to live a better life. So it's the same thing, it depends which state of it do you use. (3:20).

If you can freeze it, you can do a lot of other things with it. But at the stage of the Gans state of it, when we convert, we make it available energy to everyone. And that's the difference. It's a very, very small step. In use of the carbon, oxygen, and hydrogen, and creation of love. In plasma technology, you truly can make "love potion," that you can make people to love each other. Because you create fields at the essence of the level of the strength of the emotion. It doesn't need much, much technology. We can literally serve you. I can make the Gans of that ?? as it says. I made it. I know how it works.

Q: I remember your teaching Mr. Keshe, you said, even you can dictate if you wanted the blonde or blue eyes.

K- Yeah. It is very easy to create these kinds of things. But is the planet ready for it? Is your Soul ready to accept it?

Q: My Soul, yes. But the problem with the physicality and ?? the most.

K- It needs a little bit, you've got to pump it up. But we have to understand what we need it for. And what we're going to do with it.

The .. one of the evolution steps in technology, (3:22). as I said, it's happened in past week, two weeks. And that will bring a lot of changes for humanity. And man will find a lot of answers through this. Initially, I developed this in 2010, and I shelved it, because I thought man is not ready for it. But some 12 - 13 years later in the way we have taught, in the way that Knowledge Seekers some have reached, it became time to release this part of the technology, this part of knowledge. And it is an amazing technology.

When you put the Enhancement Units, the Compact Units on your table, you'll feel the essence of Creation and the love of the Creator. Even our own Knowledge Seekers don't know what they built. They haven't come to realize the potential of what's on the table, literally.

Any other question? (3:24).

Q: .. My intention has all along been to turn all my leverage or assets into means to turn them into love.

K- I believe you ...

Q: ..?? and among people.

K- The new technologies has brought us no choice. The development of technology has brought us no choice. We can shelve it, saying that the man does not understand, or we can release it that it brings the man to understand. The second now prevails.

Q: So, what should I do next? Should I still proceed with the project? Or ..

K- Yes, your project has been beautiful. I'm keeping an eye on it. We inform you everything about it.

Q: The trouble is that, it doesn't cash flow for me. I'm still stuck in the matter world of money.

K- We'll create a cash flow. Don't worry when you get it, we'll tell you what to do with it. It will do ..

Q: I mean even with the units for you know, the annual fees. We just don't have the cash flow to cover all that.

K- It will create itself. It creates a surplus, that you don't need to spend, this is the beauty with it. When implemented. We have access to a lot of technologies, which... for (3:26). It's not to spend. It's what you don't spend, is to what brings you as a saving. You don't need to spend to save it, because you're already ... The development in technology always now brings us in that position much, much closer.

I reckon in maybe in three to five years time. Most of us the way we do today, will not eat the way we eat, or consume food. It's not that we don't spend, we save, because we don't have the extension to it. And part of this is what I said to Knowledge Seekers very recently, when we offered you the packages on the Keshe Foundation for health, and the food, and the energy which is now sitting in the packages, there you can subscribe to. It's not what you spend, it's what you don't. You save by not spending. A lot of it will not come by spending any more. A lot of it comes that you don't need to spend.

The unit like the Enhancement Plasma Enhancement Unit added to it, can provide a feeding facilities, and the wellness facilities. And it doesn't come by spending more. It's just the addition, which we add for it to become operational for that specific application.

Q: Yeah, cause we are old and we're on Social Security, and we're not making any more money to cover all this.

K- This is the problem. This is actually one of the solutions we see. (3:28). And this is something, which I was discussing with the ambassadors and one of the world leaders very recently, in past few days. Is that, we take over feeding your nation. It doesn't matter you're poverty African nation stricken, we take over. And then the ambassador told me something very, very funny thing. He says, you know, a few weeks ago, we had a celebration in the country, and I had to attend the celebration. And the celebration was that they have given the power supply, distribution and production to a company to start doing and he has started. And then they took us to see what it is. There was two lampposts in the middle of nowhere. That was to celebrate, that we have managed to start. We have given the contract, the country, to a company to start building our power generation distribution, and everything else. We're celebrating the first two lampposts, because we didn't even had that.

And my discussion was with him that, now with this technology, we don't need a lamppost. We can feed the nation. That's where you save, you don't need to spend to come. But with it we want certain assurances, certain ways to do things.

The leap in technology and knowledge is so huge. You are .. many pensioners cannot afford anymore, a lot of things. This year was a mild winter, when it's a harsh winter in England, we know, tens of thousands die, because they have to choose between the heating or the food. (3:30). Maybe in five years, maybe sooner, maybe in 10 years, nobody needs to make this choice.

Can we allow, our we allowed to use the present system to feed people through wireless the way we started on .. Sunday, and you're testing it next week? Or do we provide the same way the emotion of the warmth that you don't have a choice but... The tricky thing was that now the government allows you to develop this technology to have both heating and the energy, most probably your wellness and what you call it, to cover your old age, whatever condition in one system. Would they cut back on your financial support? They tell you, you're getting 500 dollars a month, financial support pension. Now we are

providing you the heat, the food, the energy, which does the Keshe Foundation, it cost them nothing. So we cut your income by two or 300 euros. They won't leave you the 500.

Q: It's just at this point I would have to subsidize my tenants. And I don't have that money.

K- Yeah. In the coming months, there should not be it, with what we have in project with you. And what we see. We have a very tricky position with the new plasma Enhancement Units. And that tricky position we have to be leveraging in a very fine way, not to make your meters to read zero. A lot of people think, I'll have a zero consumption, and we know for fact. We have the knowledge, we have had the knowledge. If we're playing with the fields game of 90% - 80% hybrid, (3:32). we provides 80% through plasma and your electricity provider provides the other 20, and they know they have an income. But with a flick of a switch we can make it 100% plasma production. But we need the supply (of electricity) of the supplier to get into it.

Then a lot of people say, oh, we buy generator. You try to do what you're trying to say. It will not work, because then you have to run a generator, and you have to do this and that. So, we go in the normal present today. What's going to happen, why does the electricity work or a government run power generation for you to be able to produce your power? Okay, we come to a point.

In America, in the reverse power (Reactive energy back) you have to pay, if you produce, or put power back into the grid. In other countries you don't. But what happened, we give you 100% reduction. For us, we have it, we actually built it, we've got the machine, we had it for years. Now we produce this zero power. What is the insurance between you and your government regarding the power supply, which they put all the cables down, all the power stations, the government has to pay and you're not contributing anything to it because you're producing your (own) energy. Governments will allow you, by force in the future, to use the hybrid system, that you produce your energy. But still, they're going to slam you with charges, that they provide you the base. This is not going to change. It's just how fast the government become wise to it.

This is, when you say, we are pensioners we can't afford it. We can give you 100% energy. (3:34). Within one month your electricity Board will cut your electricity off for sure. You're not using us, you don't need us. Or you go to your electricity Board and say, we need you to produce most of it. But we don't take from you, but how much would you charge us for using your input? What do you think they'll answer you?

Q: That you always have to pay.

K- You walk away from it. Whatever solution we put is an interim. Unless we go through the present system, which we have developed on a, what you call it, the tabletop and then when it comes with the energy food, okay, cut my electricity, I don't need it. Because I have my television to receive plasma, ?? plasma converted to the energy, and the television works. We have the technology, we know how to do it. Once I'm in the house,

I can heat and warm myself. And if I wish to boil a cup of water to boil, it will boil. And I receive my energy and food. And the government says, you can't come out of the house because you're using a ?? we are paying for. You're not contributing, you're not paying any taxes for electricity, you're not paying any taxes for the supermarket, which makes profits for us, employment and the rest of it.

We are from, we're just creating an empty gap for a few years, maybe even faster once we go faster. But the government's will catch up. You have to, you want services you have to. There is less hospitals, less doctors. These are the realities we see. And that's why before anybody else does, we have put the schemes up. Okay, we charge you 2,000 Euros for your guarantees security ?? wealth. More or less, you don't need the government, (3:36). you don't ?? need. They don't come to you, they come to us. We want a share of this.

I'm sure. At the end of it, you have to pay us, to pay them. But how much less? And how much gap do you have in this space time gap? You know, what they say, three things are guaranteed, birth, death and taxes. They are going to get you ..

Q: The other thing that bothers me is that wherever I turn, I see them installing devices for tracking people and basically imprisoning us.

K- We gave them the right. You live in Los Angeles. In Los Angeles by the papers you sign apparently, you give the right to the operators to give your location on your mobile phone to the government. That they locate to see how the traffic is, how they can control it. The mobile phones information becomes the control of traffic and a lot of other things.

Q: Yeah, but like every street corner now they have what looks to me like where they're going to monitor who was moving where, when, how and then in every street light, they have weapons.

K- I don't know that's America. In the rest of the world we can't afford these advanced technologies. But don't forget, they say, if you're on the streets anywhere in Beijing within seven minutes the government will find you. So it's not just America. They have tested it. (3:38). If you walk around Beijing within seven minutes you can be located. Face recognition.

R: If you had a lost child wouldn't you want to be able to locate them?

K- It depends, what do we want to accept. You know, years ago going back to the nineteen eighties and nineteen nineties, I used to travel to most remotest strangest places in the world as part of my business. And there used to be a brand, they're still in the airports. I see their shops. We used to have their watches, it's a yellow watch. Very heavy. They used to strap it, there was no way you could cut this watch. And they guaranteed 24 hours rescue wherever you are. You kidnapped, you fell off the cliff, whatever. You paid huge amount of money those days. And we used to have to. I used to hate this thing wearing it. It's a ton on your wrist. But it had a locator, we paid to be

located. We literally paid. We're going to unknown lands in different parts of Central Asia for work, or into Africa, we pay to be located. Now we pay for them to locate us, it doesn't matter what we do on the mobile phones. And actually, we pay very less, little compared. We used to pay 35 - 40,000 a year to be able to carry an emergency, use these watches.

And the technology of today locates you, (3:40). otherwise you cannot find your mobile. You want to have a mobile, you want to be reachable. You know when we go into security meetings. We strip, literally strip off everything on our body. In a high level security meetings, we don't even carry out shirts and jackets. And I was with a very high ranking official security man, .. 4 weeks ago. He says, Mehran, you thought you got a way with the trousers off, they planted in me. I said, where? He said, you don't want to know. He said, now, I had to, it's part of my job to be implanted. And the worst thing is, they have a microphone in it, they hear even when I talk.

So, what do we know about, what we know. We get a touch, we get a rash on the skin, then planted something inside you. It's not anymore, what you call it. I have two point of view about these kinds of securities. I love the way the Chinese do it. By creating a massive structure like this. They give the citizens a sense of security and it's tough the criminal to do, because they know they can be found out. Fighting it to stop it, or create a condition that you can never stop. And this is the point of view on the Chinese point. I've seen it, I love to live in China. The security is beyond the imagination, you walk safe, you're safe at any level. (3:42). You go to one of the most cleanest nations on this planet. Everything is monitored. The government doesn't allow people, doesn't create conditions for people to commit a crime. It's not that is totally crimeless country. But everything possible to create conditions for criminals not to operate has been made by the Chinese government.

Q: But don't they have a lot of corruption?

K- Corruption, those who created the corruption on the top have all been executed. President Xi of China, when he came into power 10 years ago. The corruption you hear now, there is, but under the carpet, very much deeper, and you got to be very good to hide it. But if you heard about 10,000 people a year in the first 2 -3 years of his reign, were executed. Half of them were people who took corruptions and everything else. It still goes on. But China's bribery and corruption now is very much very little. Still there, most probably, we don't see it, but it's gone. The way it used to be, it's gone.

Q: It's just I don't have the trust, that the system here is benevolent.

K- Never been. That's your imagination. It cannot be. It cannot be. Because by its nature, it creates people like Trump. That's the nature of America. Greed, ruthlessness, anything to possess. American Dream.

Q: You think Biden is any better? (3:44).

K- He's worse, but he knows how to cover it better. They all come from the same school of thoughts. But politically it's how you envisage it, and how you set it. But carrying it out is totally different. You live in a democracy in United States, which is a phantom democracy. The people in China live in a democracy, which is real for them to be free. As long as you don't do anything wrong, you don't interact with the government, and you keep your things so in order, you're there, because you know who's the boss, who's at the bottom and who is at the top. In the West, we don't have this. I think one of the bearable most convenient nations to live in is in China, at this moment of time. Will they change in the future? Man will see. But they go for facilitating, than preventing, because facilitating brings the prevention.

Q: What we hear here is that they kill the leaders.

K- You mean in the US or in China?

Q: In China.

K- Oh, you don't want to know what we hear in China about the Americans. Do you believe it? There is a tradition, and there is a way, life is respected in China. That's why you have so many old people. What they make you to believe is not what it is, (3:46). and not all of it.

Q: Okay, one last question. I will not have much more money to invest in the next advances of the Keshe Foundation. So, what do I do?

K- From the saving you will have. The problem is, we, as I said, not a problem. With the development of the new technologies and where it sits. You've got to realize something very, very straightforward. What we explained and we get Knowledge Seekers to develop, like past two weeks, is already be planned over a year, two or three years ago. Because we started teaching the seed of it to them before. And we could see we are coming to that point about a month, two months ago. And after the financial problem we had with what is going on now with the police and the rest of it. This will not divert our work from where we are planning to go. And we have already moved a step up to negotiate with the governments.

The negotiation with the government is very simple. We give you the technology, which makes it accessible, and makes it profitable for you not to spend. And it's now we are in negotiation with seven, eight governments, at the highest level with world leaders. And once one catches on, we see the same thing, as what we saw with the distribution of the technology through the "Key," when we gave the technology in exchange for peace. (3:48). This will go very rapidly, maybe in next two years. Then you will see the benefits of it. We are talking to, we are setting plans for these things. We are working towards it, it is not something we're going to do. We are already part of different negotiations with different things.

And I foresee that a lot of things cannot be done, we don't have the infrastructure to mass produce these things. We already have started negotiating with major corporations in the world. On the direct negotiation. Philips International Holland, is in direct negotiate. I come from it, I'm proud to be working with them. In negotiation with the medical application of the Keshe Foundation. We have opened channel. We cannot do it. But the cooperation with Philips International, which our bloodline comes from it, my father being one of the directors, I trust the company directly. And we have started negotiation. The medical application will go to Philips International directly. For us to set up a factory, infrastructure takes years. Philips I know how they work, it will take months.

So we are taking these shortcuts. With the energy production the same. Corporations we are talking to, direct to go in. The health application is more or less matured. And it needs to be done. And if you're going to do 10 cases here, 5 cases there, no. Philips will be embedded it in every hospital around the world within a year, two years. So, we are taking steps through that. We are going to the world. Because the technology is not mature. It's just the final touches of it. Because I know when it's mature. (3:50).

Then we'll bring implication to governments. The transmutation it's weeks away. Then how we're going to stop all the Africans not to go to New York? And all the people in Washington run away, because all the Mexicans are in Washington? This brings new application, but the government's have become wise to it, they have to become wise.

And part of the 24th of March is the beginning of new year and beginning of a new life for world leaders. I work 20 hours a day and everything is planned years ahead. So how will the technology come to you in next few months? Would we be able, would you be able to invite your leaders, your mayors, your presidents or whatever, to listen to the teaching, or to the what we call, 24th meeting?

The what you call, the Blueprint Day, the 13th Blueprint Day has already been seen by four or five of the most powerful world leaders. I personally sent them. They confirmed they received, they're watching it. They don't know what to do with it.

Q: How do I convince my 80 year old husband, that I'm not throwing money away, and the tax accountant?

K- When he sees that he doesn't have to pay to your tenants to have electricity, very simple. The units which we have put out that are with us, they're going through the certification, we have to certify them. (3:52). We were self-certifying, which is CE standard, we can do. But we decided to be on the safe side we get it outside certified. I think we'll take another two weeks, three weeks, and then will be released.

It's not getting the units out, it's certification of the units. Because if we self-certified we can do it straightaway. But we saw characteristics, we saw things which we decided, for this going international has to be outside certified. So we did it with the MaGravs, the first time we released the MaGravs in Italy. We got them certified, what you call it, tested certification by European standard. We decided to do the same with the plasma units with

the what you call it, Compact Units. They'll be certified as an outside certification, we need to do it. Otherwise, you saw the units, the units were shown on the 13th, they're all sitting there. It's mainly to protect the Foundation from the future, what you call it, claims and mishaps.

Q: So, would my tenants need to pay their 1,000 dollars a year for their health care?

K- If they want to be part of, yes. In April, those of you who signed into the insurance policies of the Keshe Foundation, what I call, plasma policies of it, for different application. You will be given invitation to go through the Enhancement Units by the doctors for certification, that we have brought everything to a level. And then again six months later, you'll be given another time to attend. Twice a year you have to go through the system. (3:54). It's to our benefit to do it. Because if we see it during the process, you tell us you have seen this in your body, or that in your body, you have felt this and that. We'll take you back on the process to understand through our doctors what has happened, what it needs to be done. That in six months time doesn't become a bigger problem, and two years down the line.

Part of this process of the policies we put out is to, as we say, "nip the bud at the source." And it'll go back to our doctors. If we're in the process of testing, what you call, checking out whatever it is, if our doctors see anything abnormality you're asked to stay on with the system maybe a week, two weeks, three weeks, five weeks, till we see that it's done. It's not that you just come in and go. The screening especially the first year, is for prevention from the future problems. If we see it, automatically you'll be requested to stay on. And if you refuse to stay we cancel the policy.

Q: Are we going to have a veterinarian on call too?

K- Yes, they have a Soul. But we don't know if it feels good or bad. I know you love your dog, but everything is the same.

Q: Yeah, because we had more seizures again. Yesterday, we had five seizures.

K- You have to handle that one. (3:56). Anyway, we are learning, we are adding, and we are developing further and further. And we have come out of that infancy for 20 years with all the problems we had. And now we are on the track to go with the way we wanted. Building factories on our own and these things would have taken a long time. We had the research centers, we give the distribution and production to major corporations. We have started with 3 corporations already. Philips International will definitely, and the Keshe Foundation Wellness Center. Unless they changed their policy, we are their. To me is a home, and we have to see what's next step with the development.

Q: Okay, another question with these units.

K- You're getting worse than Jalal.

Q: I've been saving it up. I've been asking everybody in all the various meetings and they I don't get the right answers. I have to come to the horse to hear it from the horses mouth.

K- As president Nixon said, the buck stops here, doesn't go any further. Okay.

Q: So with these, you said these units that are coming are 10 kilowatt? I thought I bought two kilowatt.

K- The power of this system goes to demand and what your house allows it, it allows it.

Q: So we cannot put too much of a load on it.

K- Your fuse box will blow up, not us. Your standard application will not allow you to go further than what is legally allowed. (3:58). And stay within the limit. Don't forget, these are hybrid plasma. So they go to the demand. But you have a process with your supplier contractor and your wiring in the house.

Q: Yeah, I thought the units I bought was pre-hybrid?

K- Yes, but now you get the hybrid. We don't just tell you, you gave us something else. You get what is coming in.

Q: Okay, wonderful. Thank you. So I don't need to plan go in an extra diet that I have enough money for the next technology?

K- Don't forget, with the new units coming with the hybrid is 120 or 150 euro per annum, fee for 20 years. You will be set back. Yeah. But let's see what comes...

Q: That's the problem for me.

K- You'll save enough from your tenants, don't worry. The biggest saving for you American comes during the summertime. You like to run your AC's at the full blast. But this time you don't pay for it.

Q: I have tenants who will suffer the heat because they don't have the money.

K- Now they should have the money, with this technology they should have. If we come to an agreement, this is something which we have... We have to be very careful when we hit this on the head. In a way if we come to an agreement, the power generators, with the governments to the power generators that they supply a basic background supply down the road, as before. But the people will pay a fee like a car fee. You know, you pay taxes on your cars. Then it doesn't matter how much you use. Meter goes out of the window. (4:00).

Q: Yeah, but when I sent you the summary of the costs on my units, there are meters that I have like 500 or 600 dollars a year. And then if we tack on 120 or 150 for the service fee...

K- Yeah. But if you pay only 100 dollars for the electricity out of 500 or 600. Do you understand?

Q: Yeah. Well, you are saying up to 50%. 50%, is 250 dollars savings.

K- But watch when it comes in. It starts around about 50, but it builds to about 70 - 80% plus. We are monitoring it very closely, we have to monitor it. If I make it zero, you have no power. This is a very delicate position we sit on, and we have started negotiation with the governments, and we are doing it in different continents, that cannot be influenced. And that is, let's . The advantage with this hybrid system is huge, going outside the apartment you have.

The advantage is, there is a feedback into the system plus the usage system. The plasma has a double edge. If .. we can reduce the electricity to zero, but negotiate in advance with the government. It'll be done in area by area. The nation does not need to pay 30 billion to build a nuclear power station to spend another 150 billion, (4:02). in next 10 - 40 - 50 years to demolish it. So, the government instead of building five nuclear power stations, which is now on the card, because the natural resources are getting filled up. The government can build one nuclear power station, maybe a what I call, normal fuel power stations to provide a basic grid. And save billions for the nation. So, if you're going to spend 150 billion to pay for the present time to build five nuclear power stations, now you spend 30 billion. You save 120 billion. That has to go to the nation. You're not spending it. But you have an income from it. It's how we put the case from now on to the governments.

We are preparing to negotiate with Ukrainian government director, because of the electric shortages, that will give them a security of supply by their own application. But once we open that in Ukraine, what would the rest of the European nations, want the same. We have to sell the technology as a package. Now it's fully commercialized, we can show it.

And it has to be accepted. Because there are huge energy lobbyists that they don't want this to come out. It's how you handle it, how you bring it. And sitting at the head of the Keshe Foundation is the juggling I do day and night. I deal with Knowledge Seekers, for a Gans, a bottle of the GANS they have, (4:04). negotiate with Knowledge Seekers who helped us and we lost money, we have to sort something out for them, sort out the development of the technology, negotiate with the governments and everything else. I work 20 hours a day.

But the finest point comes, if we give it to the Ukrainians, the British want it, the Americans want it. So, we have to come to a common sense knowledge to teach it the way we do publicly, that everybody makes their own system. Then you don't need for

years and years to ?? fight, every city will have 100 people, 100 groups that make the systems for everyone and becomes applicable immediately.

How we run this in next two years, it will become crucial. I'll be assassinated its' 99% is on the cards. But we have to see how we can get, then becomes application of the pharmaceutical, then become application that you don't need food. How you're going to get these agriculture's, these farmers for thousands of years cultivated, that we don't need it.

The impact of what is to come, we are very softly testing with you on Sunday, and this and that, but it's huge. How can I tell the? You see the African nations will jump on this very quickly, because they want to feed their nation. Americans want to stop it, because they can't flood Africa with cheap rice's and control the diplomacy. And the Chinese have a different agenda. I have a battle with the Iranian governments on the other side with their religion. It's not easy taking my chair. Please come, anybody and sit. You sit there and you see. (4:06). But we are born diplomats, we are born negotiators.

It took me two, three years to convince the British government in Downing Street that it can make billions. They wouldn't accept it. When I started making, they said, oh Mr. Keshe you're making too much. We have to be part of it, we can do it ourselves. I said, you do it. No problem. I've dealt with these diplomats and politicians for years and I've learned how to deal with them. I always play as a fool, but I know exactly where I'm taking them as a clown. Exactly where they have to be. But the clown at the end of it turns out to be them, not us.

But at this moment of time, especially now we've shown the energy, and then comes implication of delivery it, which is coming to delivery. Then you have the agriculture. I'm traveling to China. Chinese are expecting something else, and there's something else on the table that is going to blow their mind out. What is going to be in the next step? What are we going to do with Russia? What are we going to do with United States? We have a huge base in Brazil and Mexico. Are they going to wait till all the houses in America have all the units and everything? Or do we go universal application as we teach, but the Foundation is kept in its position internationally.

The biggest problem comes in next few months. Transmutation is going to bring a huge problem for governments, passports become irrelevant. You're worried about a little energy with your tenants. I have a headache how I am going to sell to governments ??.

You know, (4:08). our first transmuter is American. And last week, or the week before, I told him, you move, I'm not telling you what to do. And he's listening. He's one of our beautiful Knowledge Seekers. He said, I was there, but I wasn't sure I'm there, I had to open my eyes to see if I'm still in US or I'm in Austria. It's so real. It's so complete. We just need to give it the physicality. And it's done.

Q: In the meantime...

K- There's no meantime, the moment we are in it. The meantime for Keshe Foundation is over.

Q: Like, they are now doing all these mRNA developments, including with animal vaccines, and I think my dog's problems, probably started with vaccinations. And they're required by law. What do I do? Do I comply?

K- I don't know. I have a very clear mind, because I've seen the damage of vaccination on my children. And I don't agree with them. But you have to see which part of the vaccination, and what is the risk factor. I will not allow my children have to have certain vaccines the way they set it out, because I know what the problem is. But I don't see why children cannot be vaccinated from the ones we know which are safe, it's done with them, we see no side effect with them, nothing with it. There are two or three vaccines which are causing the problem.

I was talking to Mario yesterday in the Exhibition Center, he said, you know, Mr. Keshe, there are people who are still doing Covid vaccinations. I said, what? Aren't they finished? No, no, there are people that are doing. Are there actually foolish people who are actually doing the Covid vaccinations still? (4:10).

Q: Yes. Especially in the United States. And they even make you pay for them now. People still go there.

K- God help them. But we know what we do, what we have to do. If we know the risks, we can avoid them, but the ones which are safe, is for our children. I know a guy called Peter in Belgium, they took him to the parliament, to in the court to say he's mentally demented, because he opposes the 3 "M" injection, three injections mix together.

Q: Right, and then they may want to lock you up in a mental facility and medicate you.

K- Yeah. Where we showed the Iranian flight system for the first time was in his center. He had battles years with the Belgians, because he said these injections have these side-effects and we've seen it. We see today. How many autistic children we have, how many children we have in different mental conditions. Report to Senate, confirms it. They know it. And they said they knew it. But who took the bribe? Who took the bribe?

I was told by our Iranian team two or three weeks ago, how we run into problem in the National Defense University with the guy who was appointed. Apparently he was well bribed, and he had done this to other people, and now he's on the investigation. (4:12). But at the time, if that guy wouldn't have done what he did, millions of Iranians would have been saved and the technology wouldn't have gone the way it went, because it showed 100% correction in National Defense University. Humans.

Q: So we have to plod along as we have ...

K- Listen if we have everything. We've got to plod along, because we can't commit suicide to change this life. So, the worst thing is, I have a very bad news for you. When we get all the energy sorted, and all the wellness sorted, and all the food sorted, that you don't get any contaminated food directly from the system and everything else. The worst news is, you're going to live another 200 years. So plodding is going to carry on even longer. You understand? So, we better become good plodders. Thank you very much.

Rick, shall we call it the day? We've gone long enough for today.

R: Yes, sure Mr. Keshe.

K- Thank you very much, and we see you next time. Those of you who been with us on Sunday for the .. "Dining with the Creator," please make sure you're in every day between four and seven. And remember, please write down whatever you felt, you tasted, you ate, and how you behaved emotionally towards yourself. How you slept, how you behave towards others, what other people around you tell you about your behavior, your emotional behavior. And we are not looking for you to go on a diet, or you don't feel good, because we feed the Soul. (4:14). Maybe the first week you need to extend your Soul in whatever emotions side, and everything else. And please don't stay on the line more than half an hour. We are monitoring it, because we don't think it should be more than half an hour. Unless you're, what you call it, obese and you want to sit for 3 hours to eat.

Those of you who are with us with the, what you call it, the Compact Unit, please make sure you place your orders, get them paid. Because we keep receiving orders, we have to know exactly where we're going to do it. If our negotiation with the governments and everything else pushes forward. And the what you call, we will most probably have a new Blueprint Days in next couple of weeks, because we have some new interesting things to market and to show you this next step in technology. Thank you very much. And hopefully we'll see you next week.

R: I think that brings to an end or 474th Knowledge Seekers Workshop here on Thursday, February 23, 2023. Our next public teaching workshop will be the One Nation, One Planet, One Race for world peace and justice. And that comes up following Tuesday the 28th of February. And that starts at the 4pm Central European Time.

K- I've just been send a message from our team to remind you that, those of you who bought the plasma mirrors, (4:16). we told you will be ready by March. They are finished and they will be delivered next week. So expect you all mirrors to be delivered to you next week. And then in the teachings we'll tell you how to use it. Because it is prepared about month earlier than we thought. We call, them the "advanced version plasma field mirrors." It's not a flat one, it's the one that ?? have much more effect, powerful effect than the others. So, you'll be receiving them and let us know when you receive them, please.

Q: One last question about the meeting next week. Jefferson asks, is at 4am or 4pm?

K- 4 to 7pm, Central European Time.

R: And you recommend half hour per day, or for the week for somebody?

K- Per day, per day. .. Otherwise you will be very fat, if you eat there more than half an hour.

474 KSW Feb 23, 2023

END
