

482nd Knowledge Seekers Workshop, April 20, 2023

(Quick Index 19pp, Introduction, Topic Index, Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Soul makes agreements to balance - P complies - Soul in charge; Learn through P to connect STP then STM; No methods - elevation; Inertia Gravity teachings continued - Emotions; STP & Emotions; Robots with emotions; Emotions always parallel M & G - reference points; Linz Center closing moving; New plasma "Ball" creates everything; Material production; Light in Jerusalem explained; Disease of excess Ca; Chakras counterbalanced with Spine; One Nation 60% setup tested

Topic Index

How little we know & how much fallacy we accepted; We think we decide over physicality (P) but really Soul decides - puppet; STM creates destiny for P to be somewhere - through arrangements and agreements with other Souls; Over half of life used to fulfill commitments made to other Souls; Balancing actions made in physical life; Prophets said this will happen - then spend centuries making arrangements for it to happen; Understanding & correct conduct can plan operation of your Soul - what kind of star it will be when leave P; If you understood everything has to be paid for - would you ever commit a crime; Soul can live in balance with STP; When accident or something happens have attitude "what can I learn from this"; How does STM communicate with STP - friction on cells; STM can speak any language without studying - knows emotion of language; What do I need to know about my emotions; Understand the connection between STM & STP and how operates in body; STM wants better life for man - trapped in box; Man interferes with Soul out of fear; Understand process of Creation - if true to yourself will find answer; Life is a series of conversions; Get fed up and give up on D of P; Travel with 2 parallel travel systems one in P and other through STM; KS have to pass knowledge onto rest of humanity; Soul arrives first and STP comes after; If die on board UFO where does Soul go?; It's not knowledge by reading - by understanding emotion of Creation; To become aware of Soul look within to our emotions; Understand what emotions create within P - trust feelings - create conditions to elevate strength of our Soul and others; In short time teach - how to see through eye of Soul - understand interactions of fields - become part of own creation - emotion - travel; Cannot teach you STM by words or formulas or system to elevate your Soul - you have to learn through P to connect to STP and then to STM - being taught; No method except understand and elevate Soul; Physicality brought Soul into womb of mother - but STM created STP; Your Soul has been nourished by teachings for past 2 years - strengthening it; Absorb energies from thoughts and outside to survive; What's the reason for life? Why are you here? How long before Soul finds home; You have to decide how much you have understood and can trust yourself - so you as creator can provide for your Soul; How do you become visible; Build systems to train man to understand Creation - and swim as energy in ocean of fields of U; Today's teaching is enlightenment to your own Soul; Would it be from C14 to C12 - Soul does not need C; Soul agrees to be present at time and place; Have to comply with Soul - then can change life; We are now creating a

process for you to understand and move Soul; You have to understand the power within you; One day Man will become wise to see truth; In future Man will first learn about Soul - then P and be able to move P; We'll bring new tools for teaching.

Inertia creates matter by interacting with fields of plasma of gravity - then emotions; Impossible for emotions to exist without STP - interaction with STP creates emotion in P; KF knowledge can produce robots with emotions - can detect and feel field strength; Robots can show real affection; Be able to distinguish a cry from pain or happiness - pain is more G - joy more M; Emotions come together in 2 opposite parallels like joy & sadness - same place in brain; Emotions can be replicated in KF systems - you can do same through STM - if sad add field strength to make joy; Parents do with children; Emotion is interaction between STM & STP and materials created to absorb emotions at given strength; Explain how brain operates; Understand interaction of fields - then understand emotions - depends which side - STM for existence & elevation - STP reaction & action; Book 1 - 2 fields create mass (means plasmas) this mass interacts with same fields creates more mass that becomes weight (which is Inertia and emotions); one created out of the other; less weight is happiness - does more weight mean pulling to; Need 2 points of reference to fly - from and to - same with emotions going from Soul to STP or vice versa; Brain is just bunch of "potholes" fields & plasmas with given strength at given position; Sand storms in Beijing from desert moving east - can't be stopped; Explains again how gravity formed - when G stronger than M higher order fields created which absorbs the lower order and Mass created in lower order - this Mass builds up Inertia till greater than M - matter is created; This is how cancer is created - we create "mini" planet inside ourselves; Same way we create materials in our systems - keep Inertia changing in respect to Gravity; Took years to teach scientists this - same way body is created; The AA or fat floating on top Gans Box - absorption level for CO2 - bottom get Gans; (Is AA a higher order fields absorbing the lower order - creating Mass or the Gans?); Understand how "holy lights" lights candle on Easter Sunday - creation of conditions - used by religions for power; Bath in Iran lit by one candle - subliminal methane - couldn't see - British destroyed looking for nuclear T; KF has created a plasma "Ball" that can produce food - energy - materials - everything - will show as "completion of Man's Knowledge" - needed for survival in deep space; The Ball works the way the Earth works - daylight water & air is made; Transition point between emotion of P & emotion of Soul before going deeper into emotion of Soul - learn not to be cheated by P; Pass through Coulomb's barrier: Plasma doesn't have fine line border - bandwidth - had P and emotion dimension; Will of Creator close to will of Soul of U Community - created from same & part of; Mother creates child but was created out of - had to mature before becoming creator; What was created becomes a creator; When we disclaim to be creator - deny own existence - we were created out of; Diseases where phosphorus and sulphur can turn into Ca in Thalamus & Thymus - rare disease Ca deposits in blood vessels of leg - amputate - or in heart tears apart; Processed successfully one case - re-grew amputated toe; KS worried robots with emotion could turn on humans to "solve" problem - but KF is already ahead; Demonstrate technology (T) can change emotions soon; Work in prisons; Linz Exhibition Center will soon close and move out of Europe to another capital - because needs easy access so everybody can see T; Chakras are energy centers like planets to Sun; Charkas related to organs and in front - counterbalanced by parallel points

on spinal column; New Pain Pads setup 2:1 ratio to move energy from back to front - if move from front to back spread disease; Hidden knowledge don't teach; Damage to neck vertebrae effects digestion - intestines - bladder; Telekinesis possible - but need to expand the soul; To move a stone connect to its soul and then give to that soul it will want to please you; Our Creator is part of a bigger Creator; From outside our solar system doesn't look the same as to us - we don't see cells of organs - but know they are there - look within to see; Big change in KF operations in coming months; Special training with Mr. Keshe first 25 filled - still room in 200 - soon closed - start around September; Artificial Intelligence has to be programmed - KF can create emotion becomes "reality intelligence"; Computers - satellites all change drastically in next 5 years - microchips with emotions; When make sudden change during transmutation - pre-accept new conditions; Will transmute to dome on Moon - need to accept new conditions temperature; Moving out of Linz because location is too remote for people to visit - informed KF months ago; Satellite Souls still part of bigger work and its completion - need to wait; The One Nation organization is slowly being put together for health - food - energy - financial system - need to connect everything together; Been brought together piece by piece over 20 years - 60% in position - 20% deliver soon - last 20% in 5 to 10 years; U & Earth Council need to come into operation - govern as One Planet - by the people for the people- through knowledge T not politics - no kings - everybody self-sufficient; KS are needed to help so that it is accepted by humanity; Planned for centuries; Material production same low price for everyone - Africa can begin to develop again; Never before in history of Man has there been such a just structure for the planet - done by KS; The Promised Day of "milk and honey" is here - just have to wait until it's served; One nation ID cards have to be accepted by all nations - then works; Training for 200 most comprehensive ever; The final 65 people will become first passengers - pioneers of work of KF; Addiction session next Friday - join in - for Soul but still help with addictions.

Introduction to 482 KSW - Inertia Lesson #3 - Emotions STM controls Life - One Nation 80% ready - Chakras

This week the teaching on Inertia and Gravity went still further, this time a little into the emotions. This series of teaching started in the Introduction to the 480 KSW, so let's keep going with it and see where it will take us.

Inertia - Gravity - Mass - Weight -- Emotions: Lesson #3

Mr. Keshe answered a question about how emotion is related to Inertia in a way to put us to think deeper about what we understood. He said, the answer is in the question - if you understand it. The question was put specifically to confirm what we have already learned, that both Inertia and Gravity are MaGravs and they are different. That the Gravity is related to plasma or Mass, and Inertia to Weight or matter. This is why the little stick and the huge rock fall equally to the Earth, even though we think the rock should fall faster. It's because the plasma of the rock is only effected by the plasma of Gravity. The next

time you are outside pick up a rock and a stick and drop them, this will give you an immediate proof of the teachings.

Then he strongly added new information, that it's impossible to have emotions without the Soul of the Physicality (STP). Remember also that the Soul of the Man (STM) and the STP interact to create emotions in the physical dimension (D). We have to put together all these little bits of information. A Knowledge Seeker (KS) shared his experience about feeling the subtle point when the emotion switches from STP to STM and that the physicality (P) tries to hijack it, and take it over. So we have to understand how the emotion occurs in 2 parts, the STM & STP.

Mr. Keshe referred to the brain as nothing but "potholes" of fields and plasmas. A pothole is a hole in the asphalt of the street. When you look at a brain you see all these little twists and turns like a worm. Could those pockets in the little turns be places where plasmas forms? And could these be centers of emotions?

He referred to emotions as like isotopes for example, C has C12 & C14, and they occur in opposite pairs, one being M and the other G. Could emotions come from the same plasma? It's not clear by the description. He said, they have a common denominator, but then used 2 different elements in his example. He said, C could be on one side and Mg on the other side. So joy would be like a M field and sadness a G field. But we also know that they occur in the same location in the brain, could they be coming from a pothole in the cholesterol? He also said, that if we add field strength from our Soul, then we can increase the sadness into joy. If we can now put emotions into robots, then maybe they have a physical dimension to their plasmas and M & G fields? And maybe they will have to make little potholes on the microchips to form the plasmas of emotions, like copying the structure of the brain. But it still has to connect to intelligence of the soul in some way.

How do we tie this into Inertia. He said, the answer is in the question. Inertia is a MaGrav, and emotion is also a MaGrav. I don't know, we have to go further. First of all, most probably, we are not aware of our STP and we still don't know how emotions are created, let alone being able to control them. We know that through detachment we can have some control over emotions. We have to contemplate more on this to open up the discussion.

A second question about Gravity was asked and this opened up things further. Mr. Keshe referred to emotions as being created the same way the Gravity of the planet is created. He said, when the G field strength is stronger than M, central field forces of a higher order are created and absorbs the lower order or weaker strength fields. This is how cancer is created in the body. He is now using the word "higher order," and it absorbs the lower order. But doesn't the higher strength give to the lower strength? He must be talking about another level of knowledge here. The higher order absorbs the lower order and creates Mass. In other words, M & G fields are interacting and creating Mass or plasmas, or entities. And further interactions lead to creation of weight, which is another way to say, matter. Then the M fields interact and come to balance and create an

atmosphere. The atmosphere is the Coulomb's barrier of an entity, and for humans we have the skin to define ourselves in P as an entity. This is as far as I can go with this.

We are getting closer and closer to understanding the Totality of the Knowledge of Creation, and how all life is created in the U. But we have to dive deep enough into this one pattern to fully understand it, because we keep coming back to it time and time again. If we look into the environment we'll start to see that this pattern is occurring everywhere. This is what we do in our Gans boxes and how the Material Systems work. Somehow the Nano materials create higher order fields that start to absorb the lower order, and create the Gans, which is again Mass, or "number of plasmas." It is not yet weight, it still needs further interactions. But how is the AA or fat attracted to the top of the saltwater? There are enough combinations and interactions of plasmas in the AA to create biological life. And this week he said, KF created a plasma "Ball" that can create anything we can imagine. He talked about this years ago, but now they have produced it. It must be based on this same basic pattern of Creation that we are trying to understand. Hopefully, we are keeping this summary's simple enough that everybody can follow, but you still have to lovingly take the time to be with it and open the emotion of knowledge.

This leads into the next topic that we have the power to create within us, because we are created out of what created us. The example, of the mother being the creator of the child, who was herself a child. We have to adjust our thinking, because in the physical D of Earth only the mother can create, but in the plasma D all of us can create. It's reaching maturity and understanding ourselves as the energy of a plasma. How did I go from a baby to what I am now without me knowing it? Those who know, we call enlightened.

Actually the main teaching of today was about us, not knowing ourselves, or thinking we are in control of things, when really the STM is in control and making arrangements with other Souls for us to balance the fields. In a way, it's like what people call "Karma" or "what you sow, you reap." But in this case we are also responsible for what our parents and ancestors have done in the past, and we have to balance it. Scientifically there is much more to it, then just saying, "it's your karma". In fact, that really doesn't help much and it reinforces a victim mentality. But if we understand that ignorance is that force that is pulling us through life, then we have a chance to learn and grow by our experiences. It's ignorance of knowing our Soul and the Knowledge of Creation, and how we are created. Ignorance that we don't know that we are created from the fields of the Creator, and thus part of Creation. To make it worse, our society has trained our egos to really believe that when we do bad things, somehow we can get away with it. The lack of experiencing true love is also behind this bondage of being forced to repeat the same stupid things over and over again. Lessons never learned. When we look back at our life we can see how we keep repeating the same things. If we look even further we can see that, there were times that no matter how hard we tried to avoid something, in the end we still had to experience it. And if we finally learned the lesson, then we didn't need those experiences anymore.

Now we understand that the Soul is in charge and wants what is best for us, even if we don't know it. And when the STP comes into balance with the STM, and we stop resisting

the truth of life, then we change. We become aware of the STM through our emotions. There is no method to use to teach us about the Soul, it comes from within and by experience. When we realize the world cannot give us what we thought it could, and somehow the love touches our heart, and all of our focus goes towards finding the Soul, then it slowly unfolds itself. And now we have lots of help to take this journey.

So where are we at with the release of the technology? Mr. Keshe went over all the things that he has been setting up over the past 20 years the food, health, energy, travel, financial system with the Keshe Coin, Insurance policies that actually help you, and governing the planet through One Nation by the Universal Council and the Earth Council. The whole thing is about 60% done and another 20% in the next few months makes it 80% complete. The last 20% will be completed over the next 5 to 10 years. He said, he has been planning this for centuries and the last pieces are getting put together. But the acceptance of it by humans comes from our participation as KS. If you have been wondering why all these years he never shows anything, this is why. (Actually, the T is being shown, but we have to learn how to see it). If something is shown now prematurely, it could cause a reaction from the powers and a delay. Not only that, but the true change is coming through the Soul, and that's why this will succeed. Because what we learned today is, that the Soul is in charge.

Finally, in today's teaching he talked about how the Chakras pretty much line up as being energy centers of the organs. The Chakras are in the front of the body and spinal column acts as a counterbalance to them. The new Pain Pads are setup in a 2:1 ratio to move the energy from the back to the front and out.

Additional Topics:

Can't stop desert moving east - abandon Beijing in couple centuries;
A bath in Iran lit by 1 candle - subliminal methane - but you cannot see it;
"Holy Fire" in Jerusalem Easter Sunday understood as created by conditions;
Rare disease phosphorus & sulphur convert to Ca through Thymus & Thalamus - deposit Ca in leg arteries have to amputate or heart tissue tears apart - technology can reverse - 1 case of amputated toes re-grown;

Thank you for listening.

Quick Index

(We are here to learn from each other and teach each other something about the real ways that the Creation is done and how it works. As we go deeper into the science of Creation, we understand how little we know and how much fallacy we have accepted).

(We have always considered ourselves to be the decision makers of our own physicality (P), but in fact, the real decision maker is our Soul. We are a puppet in the hands of our Soul. We make decisions that have to do with things like food, water, shelter, and how to

exist and sustain the physical body in the dimension (D) of physicality. But the real master is sitting behind is the Soul of the Man (STM).

(The STM creates the destiny for the physicality (P) to be in a certain position, and it has to follow that, because it has made agreements with other Souls. We have to be present and part of the continued expansion of the interactions of the Souls of the man. We say, "accidentally I happened to be there and I saw this and that, but it was only by chance or something else." We have created words for something we don't understand. The STM (created the conditions) to bring the physicality into the position it needs to be. It's like taking someone to a surprise birthday party without them knowing the party is actually for them).

(In a way, the "Soul of the man" along with the "Soul of the mother" has agreed to meet the mother in such a such a place. The Soul of Physicality (STP) makes sure that the P shows up to bring about the interaction of the Souls for certain purposes. Later on, when we look back, then we understand why we were there. Together the Souls decided that your Soul would meet the Soul of the mother at that point in time, for both your Souls to learn something from the interaction, (and for the ?? future interaction of the Souls)).

(In a way, we are running 2 horses at the same time, the horse of P, which we think we are in charge of, and the horse of the STM. But the STM, through interaction with other Souls have come together to guide and bring the STP to that position, to fulfill the promise and agreement between the Souls. Sometimes we call it revenge, or he did something and now that's the payment for it. He did something wrong, and he deserves this to happen. We use different voices, or communication lines to explain what we don't understand).

(It's the connection between the STM and STP, and the man in a physical D. Now we can understand why we turned up in such a place to see such a thing. And what will be the outcome in the future for the things we do now. We can understand the purpose of why we were there. Maybe more than 50% of our lives are spent fulfilling the commitments made to other Souls for the physicality to be somewhere).

(Even if we get lost in the desert, or drowned in the ocean there is still a commitment to other Souls. It's not just that we got drowned out of nowhere. The process of balancing, causes Souls to bring other physicality's to a position where they've done right or wrong. We don't just go to a funeral. It's what comes out of the process of that funeral. (All the different Souls have been set up to deliver and comply with the total agreement of all the Souls (involved)).

(A child becomes an orphan when somebody kills the father. Why are we born at a particular time, on such a day, and such a second? What would have been the effect on the parents or grandparents, if we were born a week before, or two weeks later? Now we have to not only accept, but understand with full comprehension how the time, place and position is dictated by interaction of the other Souls, and then the interaction of the STM with the STP, to direct the P of the man).

(Things don't happen just by chance, or "accidentally." They are already set up. But we are blind to it. We can't see or understand it. What our great grandfather, grandfather, mother, or brother did all have a consequence, and the Soul come to an agreement of how to balance the fields. We're not paying back. Have you ever seen a magnet jump up and go somewhere else, because suddenly he thinks something? No, he just keeps his distance and creates a condition (for whatever to happen)).

(This is what we as a human race with the physicality of the body of the man, have to understand. That during our physical existence, 80% of the time we think we are the ones doing everything, and that we are in charge, but we are not. We think when we put on our suit and shoes to go to work at 8 AM, to catch the train and be in the office at 9, have a coffee at 10, and then catch the train back home at 5 PM, that we are in control of everything. Oh boy, how misguided the man has been. The STM uses all of those times that we think we are doing things on our own, to interact with other Souls to carry out what it needs to do. It's the STP and STM who internally plan your day for what needs to be done, that it brings everything to balance).

Most of the repetition, magnets don't move.

(When there is an external force, or when something was done wrong by the other Soul, then that Soul gets the word, that it suddenly has to go out, and then it has a car crash during lunchtime. But why? They thought that was not supposed to happen. But it was exactly what was supposed to happen, because there are other sequences, other effects, and other dimensions to this accident, which was set up by the Souls, (for what that person did wrong) to come into that position for it to be corrected).

(With this knowledge you can you understand how the Prophets could promise, that in so many centuries or whenever, there will be such and such a messenger, and he will do this and that. It's the guy himself, who has just changed the clothes, and is appearing in the same place. It's because through the effect of his own operation, he has setup all the Souls that will participate to be ready for it. Then after 2,000 years he appears and manifests himself - resurrection of the Soul. But in fact, during this 2,000 years he was preparing other souls to be ready for it). Then when he comes, he says, "oh, this was the one which was promised."

(Understanding this, then with the correct conduct you can plan through the operation of your Soul, where you Soul and its STP will be and what it will do in the future. (You can decide) what kind of star it will be when it leaves the point of P. Then mankind understands that he has not been very kind to himself, even though he claims to be kind to everybody else. If we fully understood the totality of this part, what would it bring us? Would anybody ever commit a crime again? Would anybody ever kill again? Would somebody go out of his way to create so much mayhem for others if he knew that he himself will have to balance all of it? Then would the life of the man become bearable, because now he would live by the Soul in (balance) with the STP).

(When something happens or an accident happens, what can I learn from it? What was my Soul, or STP, or my P trying to teach me? Was it trying to elevate my Soul for the next step, so that I don't go wrong? Or do I just carry on as if it was something that just happened?)

(How does the STM communicate with the STP? What system does it use, on which bandwidth, and which structure? The different emotions are settled, and compacted on the Totality of understanding the structure of the physicality of the Man. We find correction of the total energy, which is released by the Soul, as friction with the cells of the body. This creates certain knowledge, and certain information, which (shows) that the STM has full control over it).

(Don't forget, the STM can speak any language it needs, even though you never studied that language. In a way, the STM has been to the "universal" University, and knows everything according to the time and place. It can use that knowledge to speak French for example, even though you never studied it. It understands the emotion of French, without speaking a word, because in the emotional level everything is the same).

(What do I need to know about emotions, and my emotions? Are the emotions the same amongst all of us. Today's teaching is more or less for you to learn to know yourself and to understand the connection between the STP and the STM, and how they operate the physical body. You may think you are fully in charge, but really you are carrying out the wishes and orders of the Soul).

(You are forever the servant to the master, which is the STM. He wants a better life for the man, (who is trapped) in a box. (The Soul has appeared and will appear again and again). There are no limitations to this. From now on you can look at both the D of physicality and the D of the Soul. (When the Soul does things, then you say), why did I use that word, which I can't remember ever using before? Or why did I show this affection to my child, where in public I never showed it before? (It's the Soul working). But it's the man who interferes in the D of P, out of fear of his own existence. This is what creates all kinds of mayhem for the rest of mankind).

(The extent to which we will come to understand this, depends on how much we understand about the process of Creation and our own life cycle, and how this cycle affects other Souls. If you are true to yourself, you'll find the answer in the end, because it was given at the beginning and in between. (Life has been a series of conversions). But man doesn't accept the truth about how life is actually lived).

(How much more and to what extent we can pass this knowledge on to the rest of humanity depends entirely on Knowledge Seekers (KS) and how you teach it. How will you add to the knowledge and bring it across, so that the others understand, and not just your Soul? Would you be able to give and share unconditionally? Mankind needs to understand that his existence has many facets and many dimensions. Then in that process, he will get fed up with not understanding his own Creation, and give up on the dimension of physicality).

(How far we can bring this understanding forward, will then allow us to become "Man of Space." We will have to run two parallel systems, one for physical travel, and another for travel through the STM, or the central energy of existence of every living thing in the U. If you understand this, then we can decide to take this part of the journey with a flying machine, and the other part with the energy of the STM, and then wait for the physicality to arrive. (But you have to understand the dimension of existence)).

In a way, the Soul takes its "flight of fancy," and the STP has to follow behind and join it at a given time, place and position. What happens if a man or any creature dies on board of a UFO while traveling the span of the U? Where would the Soul find its place and position? Where would the Soul find its peace, in a way, the position it was destined for? Can we extend our lives to the understanding of this position? And can we predetermine where our Soul will go? What shall we do? How will we expand the knowledge of the others who are around (us)? It's not knowledge by reading, it's knowledge by understanding the emotion of Creation. But if we can do this, then why aren't we aware of the work of our Soul during our daily life? And how can we work to see its elevation, that it serves the others, rather than actually taking from the others?)

The answer is simple. Look within, to our emotions. (What do our emotions create within our physicality? And can we trust what we feel? Do we understand how we feel? And do we understand why we feel? Would we be able to create a condition, that we can elevate the strength of our own Soul and others. Surely we'll find a new way to communicate between ourselves and the others).

In the coming time, shorter than you think, I will teach you how to see through the eye of the Man, and at the same time, understand and see through the eye of the Soul, and understand the interaction of its fields. And then we'll see how you as KS will take the necessary steps to understand more, and be part of your own Creation, your own emotion, and your own dimension of travel.

(In the dimension of the STM there are no formulas. We cannot teach you by writing something, or by giving you a system that elevates your Soul. You have to learn through the D of P, which you are being taught, how to connect with the STP. Then through the interaction with your STP, make connection to the STM. (Jumping from the P to the Soul is more or less, .. well not impossible). But you have to be able to interact directly at a given strength)).

Don't forget, it's the STM which created the STP. (But the P) brought the Soul into the womb of the mother). Now, we come to understand.

(Gradually we are starting to understand, that for man to learn a space system to travel through the D of the Soul, has no calculation. There is no method, except understanding the process of elevating the Soul).

(Think of how you as a man have been receiving all these teachings over the past two years. They have been nourishing your Soul from the environment of life. What you breathe, extends your strength. What you swallow, extends your strength. What you think and the energies you absorb from outside, are able to create a condition that you can survive).

Then, what's the reason for life? Why are you here? And how much time is left until your Soul finds its home? Then, maybe one day you'll find the answer to the totality of what is on the table.

(If you understood this, then any questions that arise, should come from within the man, and not verbally from outside). Connecting makes you wise, then that wisdom shows the path to the Creator. It's for you to decide how much you have understood from separating, filtering, and cleaning every dimension of Creation, which is in your pot.

How much more does Man need to know? How much more does Man need to trust himself, and what will it take, (so that you as the Creator and Creation know how to provide for your Soul on your own? As our friend said, I do not know what to do. But I'm doing something, because I'm still breathing).

In the process of understanding the Creation and the Creator, we have to understand at least what is going on. (What does it mean to be visible and how you do it. We can't make assumptions. We have to understand the process of Creation).

(In the coming time we'll build systems for Man to be trained to understand the process of Creation. You will learn how to swim in the ocean of the fields of the U, but not as a fish, meaning not as a body, but as embodiment of the energy of the STM. Then you'll be able to go everywhere. (?? it will be visual, a P in the D of existence). (?? It will be as if you are being kicked out of a session, because they say it's not going to happen, but then it actually happens)).

(Has the STM made the STP blind to it, so as not to show the truth about the man himself in the D of P? To what extent have we understood the truth about ourselves, the truth about our Soul, and the truth about (our own creation?))

Today's teaching is enlightenment in the D of the operation of our own Soul, and nothing else. Would it be from C14 to C12? And how much of it will be Carbon this and that? The Soul does not need Carbon, and does not have frequency, and it does not work in what it decides to ?? be. It operates in the dimension of what comes and where it has to go. It's actually a postman, it's a postbox. (There's an agreement with the other Souls about what their physicality's have done. Our Soul agrees for us to be present at the time, place and position).

Now we understand how we as a human being have to comply with the Totality of the wishes of our Soul, and not as we thought with the hunger of our physicality. If we understand the separation between the two, then we will become part of the Totality of

the operation of our own Soul in the D of Creation. One day Man will understand this and then he will change his life.

(We are in this process now, to create a dimension that you understand the operation of your Soul, so that you can move your Soul when and where you want. The teaching is for you to understand the power you have within you to understand the knowledge of your own Creation, that with it you can create a new dimension of life).

(One day Man will become wise, and in that wisdom he will see the truth. But till then, we keep trying to drag the Man along till he becomes wise to see the wisdom. Maybe today you understood the possibilities you have to understand the operation of your Soul).

(In the coming time, humanity will start learning about his Soul first, and then about his physicality. Then by feeding his Soul, he will feed the P, (and then be able) to move the P. The STM and STP will be in unisons). But it's vulnerable that both can be involved in the dimension of another position, time and place without their own choice, but through the choice of where they have to be.

One day mankind will become wise to this, and understand the Totality of Creation, which he himself is part of. We will bring in new tools of teaching, of carrying (the Man), and allow you all to play with them.

End of Quick Index Part 1 - 482 KSW April 20,2023

Q: We started to learn about how the Inertia, creates matter in terms of interacting with the MaGrav fields of the plasma of Gravity. How does the emotion come in?

K- Repeat the question and you have answered yourself, if you understood. Emotion cannot exist without the STP. It's impossible. Interaction with the STP creates the emotion within the physical structure of the Man.

(Recently, some officials were informed that the knowledge of the KF has reached the level of being able to produce for example, robots with emotions. This is not programming them with emotions. The robot actually detects the field strength and feels it. (It feels what it) means to "clean up," or "be safe," or whatever).

(Recently, Mr. Keshe had an encounter with one of these robots that are now everywhere. He calls them "Susie's." A Susie came on the elevator he was on and turned itself around facing the door, pressed the button for the 17th floor, got off and started cleaning all the corridors, floor by floor, and the whole building. But it had no emotion. It was totally programmed for what it did, and nothing else).

If it sees a child, or a dog it cannot show emotion towards it. It's a robot. (It's only a physicality. The development of technology has reached the point where now we can create the interaction of the fields at a specific strength of the field, so that when the robot

sees a child, or an animal, it can show real affection. It can say, I feel you're thirsty, can I bring you some water? It can leave its programming of cleaning the floor to go and get some water. If it sees a child hurt in the corridor, it can respond by getting help).

(Up to now we never had the knowledge to be able to create systems with emotions. It's all about understanding the interaction of the fields. But you have to be able to distinguish between the cry of happiness and the cry of pain. One is stronger in magnetically (M) and the other is stronger in gravitational (G). The balance between the two is emotion of crying in the physical D of tears. This is why joy and sadness are in the same place in the brain. One is M and the other is G. When you're joyful you give and that's more M. And when you are sad you take, because you need that energy, and that's more G. Sadness allows you to take more, so that in the future you'll become joyful and then you can give).

(Up to now Man never understood what emotion is, and that we always have parallel and opposite emotions like happiness and sadness. It's very much like an isotope, for example, carbon, sometimes it's C12, and sometimes it's C14. C14 travels in the D of the Universe, whereas C12 only travels in the D of P. Which one is happiness and which one is sadness? Is it joyful that the P is allowed to link up with the D of the U? Or is it sad, that he cannot give to the D of C14, and has to be a taker?)

(Emotions have 2 true presentations and manifestations, but with the same common denominator. (If you have a carbon and let's say, Magnesium, so you have one that is feeding and the other opposite to it). Because one is M and the other one is G. Then you have to understand which side you are sitting on M or G. And are you in the D of P or in D of the Soul?)

(Emotions are now fully understood by KF and we can replicate them and create them in systems. If you master it well, then you don't need KF. Through the STM you can connect to the same field strength, and then you decide, that if it's sorrow, then you can give to it to become joy. We're already very good at doing this as parents. But when the children get a bit older then we forget about it. Unless we are deliberately manipulating, which means in essence, we are only doing it in physicality, and not with emotion. I've experienced this sitting at a table, when another person looked me with anger and then right away switches to someone on the other side and laughs. Then he switched back to me again with anger. How is it that he had two faces? But in fact it's not two faces, it's the way the emotions are. The Soul interacts with the physicality and confirms the weaknesses in physicality).

When you ask about emotion, then you have to understand what it is. It's the interaction between the STM and the STP and the materials created to absorb emotions at a given strength. (It's like the position in the brain where you feel sadness, and another for the languages, etc).

(When the Cosmic Rays (CR) get converted into the matter state of physicality, certain energies are released in specific positions in the brain. (We see that at certain field

strengths we show tears and other strengths joy and laughter). Now we can explain in a more details how the brain operates, and about the physical manifestation of the data you see on the screens that monitor the brains activity. But the STM does not have monitors, and the STP does not carry a screen everywhere).

(I think the questioner has found his answer about the emotions. That is if he understood the process of the interaction of the fields, and on which side you sit as a giver or a taker, and it depends if you're sitting on the side of the Soul, or the side of the STP. If you're on the Soul side, you'll find elevation and dominion. If you're on the STP side you'll find action and reaction in the D of P. (When tears or laughter are felt, that position triggers certain other fields in the body of the Man, which get manifested in the D of P).

(Read about it in Book One. When the two fields interact they creates mass. (And then when that mass interacts with the same fields, it again creates another mass), and it becomes weight. But in fact, one is created out of interaction of the others. If one has less weight than the others, compared to its position, then you call it, happiness. If it has more weight, then you call it, fat. And if it is about right, then you call it, slim or the right weight. But the fact is, it's actually the same interaction and same structure).

(When you're talking about the emotions, you have to understand the interaction between the two (??). It's like with a test flight, you need to have 2 points of reference. Where you start and where you are flying to. It's the same with emotions. Are you going from the Soul to the STP, or from the STP to the Soul? (There is a given field strength for a given position in the brain. And the brain is just a bunch of potholes of fields and plasmas). (What would be the reaction if the Soul becomes happy to learn things, and then this makes the physicality happy, then would the body be enjoying all the time?) And then you find out what the emotion is. From this you'll find the process of addiction, because at that point you're addicted to creating the same thing, the same rhythm all the time, which achieves the giving and the balance of the emotions).

Q: Recently there has been a lot of sand storms in Beijing, that also cover most of China. Is there a solution to resolve this issue?

K- Yes, abandon the city. (I discussed this some years ago when I was in Beijing. Ten years ago there used to be around about 30 days a year of sand storms coming from one of the largest deserts on the planet in Central Asia, which is northwest of Beijing. This desert is moving eastwards towards Beijing for thousands and millions of years. It's eastbound wind creates mayhem especially for Beijing, and it wouldn't matter if the city was there or not).

(This beautiful city was built on the path of the movement of a desert, which over the next few million years, will again usually become an ocean. The whole thing circulates and this is how continents move. No one can stop the movement of this desert. Now we see after 10 to 15 years that the number of annual heavy sand storms has reached to 45 to 55 days. When you are there, it looks like a mist, I have seen it a few times. It looks like

the city is cloudy, but in fact it's a storm with fine dust particles. Nothing can be done about it).

If we stop this desert, or if we try to stop the motion of this desert, then we'll create mayhem in weather condition of this planet. It'll be worse than the global warming. So, we have built a very big city on the path of a slow "snail" called, the desert. And this cannot be stopped. And you'll get more and more.

(But we do have systems to control and understand the direction of fields and energies created by these sand storms. The interaction of the upper atmosphere with the lower atmosphere are creating new chemical hazards, and poisonous air. Breathing this sand into the lungs leads to all sorts of respiratory conditions in China and especially in Beijing. The dust particles have different sizes and there are those which are very fine and can penetrate the skin. The larger particles we see as sand everywhere. In my last stay in Beijing, the entry way of the hotel was covered in it. The number of storm days per year will increase to 100, or maybe 150 days in the next 200 or 300 years, Man will abandon the city, as the desert takes over).

(You can't do anything about it. You are in front of this slow moving snail. It doesn't matter how many trees you plant, or barriers you put up, because the field strength of the storm comes from the center of the desert itself and is moving eastwards.

Maybe in a few thousand or in a million years somebody will find under the sand, that there used to be a very large city there where millions of people once used to live. Sooner or later, after hundreds of years the city will be abandoned. Nobody has managed to stop it, and scientifically it's not correct to stop this motion, (because it will effect the whole planet). We don't have any scientific tools to stop the motion of this desert).

Q: In the previous workshop Mr. Keshe said that first the gravity of the Earth formed and then that led to the Creation of the Earth. Can you give more of an explanation?

K- No, this is how it is. (It's like what we just explained about the emotions. When the G field strength is stronger than M, a central field forces of higher order is created, and it absorbs the lower layer or weaker strength fields. This is how cancer is produced in the body of the Man. (The higher order fields in an environment, absorbs the lower strength fields). It then creates Mass in the lower strength field level, which builds up the Mass field Inertia until it becomes greater than the M fields, and this leads to creation of matter).

(The P that would begin to appear would be I guess, the tumor of the cancer. It's the same pattern as how the planet was created. The Mass means the number of plasmas created by the M and G field interactions. He called it, "the higher order strength fields absorbing the lower order strength." Remember that first, the G fields were predominant and that created the physical surface of the planet, and then the M fields were predominant and that created the outer atmosphere. Most likely the outer atmosphere would be like the

outer boundary of the tumors. So basically through the field strength of our emotions we are creating a "mini" planet inside ourselves. It's the same pattern of creation).

(This is what we do when we produce materials in our systems. We are not talking about a theory here, we see it now physically when we produce matters in our system. We fully understand this phenomena. And we have the knowledge and technology to keep the Inertia changing in respect to Gravity, and then we can produce carbon as a solid, or as a C in the amino acid of a plant or in the Man himself).

The knowledge within the KF is very deep. (It took me years to teach our scientists how to understand this, and to be able to create as much matter as you like in a natural way. It's not by chemically adding things. It's a natural way to produce matter, the same way the body of the Man is created. This knowledge is now in the possession of the KF).

Many of you have seen it, but you don't understand it. (It's that fat floating on top of the Gans Box when you make the Gans of CO₂. That fat has a CO₂ characteristics absorption level, otherwise it wouldn't be there. On the bottom you see the Gans of CO₂, and on the top you see is amino acid of the CO₂. We know how it's done and we do it).

Q: (Can you explain the phenomenon of lighting of the "Holy Light" at the grave of Christ in Jerusalem?) (I think it's in the Orthodox Church on Easter Sunday, but not sure).

K- (I think we are talking about the phenomenon of a candle lighting up at a given time and place. Or are we talking about a different light? The creation of light by creating specific conditions has been understood for centuries, but it depends on how people use it. Some use it for the benefit of Man, and others use it to become a magic, and then they connect it to a religion to get influence and power).

(We had a similar phenomenon in Iran. Up until the middle of last century we had a public bath that was lit with only one candle. But then the British came and they destroyed it, because they thought they could find in this mystery a way to make a nuclear bomb, or whatever out of it. The bath was setup in a combination of structures that allowed the spreading the fields, and when that got moved, it didn't work anymore. The bath is still there, but it's not warm anymore. One candle had been able to heat the whole structure of the bath including thousands of liters of water for decades).

(From Mr. Keshe's description apparently there was an underground source of methane gas, and exhaust from the gas, and a combination of distributing the gases around the pool of water, by what we call, ?? subliminal fields kept the water warm. Now we understand the technology of it. But as usual, wherever the British went, they created mayhem, because they had to find something they could take back to England to show what they found. But they never understood this knowledge). The Iranians used ?? subliminal methane plus methane itself, and it manifested as lighting one candle, but actually the "whole pot" was in flame, but it wasn't visible. (Maybe this is similar to what is used in the new Gas Units by KF)).

(The light phenomenon in Jerusalem is of the same level of understanding. The light is created according to how things are moved at a given point for a specific place of manifestation. And you can create that light anytime if you watch the movement, concentration, and understand the positioning, then you need very little to light a candle up. It is like a few seconds to light a match, it's the same with the candle. We understand the knowledge, so there's no trick to it. But if you want to make it holy, then you can add everything from Jesus, Moses, to Muhammad, and then somebody slept there, or blew into it. You control the time so the magic only happens on Easter Sunday. When Man understands the knowledge he won't be fooled by any magician in the depths of the U, or those calling themselves prophets for the mystery of the light).

(You can learn to create field interactions that become concentrated at a certain point and create a spark that can light a candle or a clothe. Light comes from the interaction of the fields. Static energy can convert to an electric spark, then the light will come on as you pass by. And if you're clever enough, you can use that spark to light a candle, and every man on the street will come and pray).

(The KF laboratories have managed to develop a new plasmatic system, that if it's run in conjunction (??), and correctly, can produce materials, energy, food, and anything else you can imagine from the same system. It will be demonstrated in the coming time in one of the major cities in the world. (This will be) the manifestation of the completion of Man's knowledge in technology. With this "ball" we can create fire, water, food, and it's only a ball. I'm sure if we leave it long enough, they will make a temple around it and call it a "holy ball.")

(If you understand the knowledge behind it, then you'll understand that it's a key to survival and life in deep space. After seeing this, I wonder how many of you will become afraid and call us everything that was promised in every book, that we made something to control (the people)? It's not something we're going to build, it already has been built. In a very short time it will be demonstrated in one of the biggest capitals of the world. This is to show the completion of Man's knowledge). The same ball will light up, will bleed blood, will create honey, and then if you like it, we can add anything else you like to it. Because we understood the secrets of Creation, and no more.

(It depends how we're going to use it. It's not to fool you, and have you think we are magicians. Maybe it will create a new way of thinking. This is the way Earth works. It's how the daylight is created, how water is made for you, and how air is made for you to breathe, and how milk and honey are made. Nobody brings tankers of milk and honey from another destination in the U. The cows eat grass and the child drinks the milk. Now we understand that process. And the beauty of it is that, anyone of you can do it.

Q: I noticed that at the transition point between the emotion of physicality and the emotion of the Soul, there is a very subtle change before we go deeper into the emotion of the Soul. However I noticed that physicality tries to "kidnap" this transition. How can we make a faster leap to go through this transition without interference of physicality in the process?

K- Learn not to be cheated by it. It's like a coulomb's barrier, you have to pass through it. Some people say the coulomb's barrier doesn't exist, but it actually does. (Our upper atmosphere is a coulomb's barrier. Again Man has made so many names for the same physical operation. It doesn't take, but, you need to understand the point of interaction. The beauty with the plasma is, it doesn't have a fine line, that this is the line of interaction. It is a bandwidth, it's a gap, it's a distance from one point to another, and it has a physicality dimension to it. And that's the beauty of it. It depends which end you fall in, and that means the same emotion as somebody else on the inner side of the same plasma fields.

Q: If whatever happens is the result of the interaction of the Souls, does that mean the will of our Creator is in fact the collective will of the Soul of the Universal Community?

K- Not far from it. Because we are part of the Creator and created from the same. The Creator, Creation, and the created are all the same. It depends on which side of the fence you stand. (A mother is the creator of a child, but she herself was a child 20 years earlier conceived from a sperm and egg, and created out of the previous cycle. At that time she could not create a child, first she had to mature with time. So, we have to look at where we are in that cycle of creation).

(This is the process of life and if you understand this, you understand that what was created becomes the creator of. And there is no difference between Micro and Macro. (As a creator) she's still part of the society and lives with the others. As a child she was born as a girl from the womb of the mother and cannot yet give life. It depends on the point of observation. If you wait long enough, then she matures to be able to create a new life. This is how the cycle of life in the Creation works, and we are part of it. Are we the observer? Or are we actually that child? Or are we the mother who created the child, but was born as a child herself?) (The problem is we think only woman can create. If we understand that we all can mature to create, then it makes more sense).

(I'm a cartoon lover and sometimes it's nice to watch them. When we were little "Tom and Jerry," and "Mickey Mouse" used to be on television. In this cartoon two little girls talking to each other and one says to the other, you're a baby. And the other says, no, I'm not a baby, I'm always me. Then again the other one says, go and ask your mom. Both of them march to the mother and say, mom, she is telling me that once I used to be a baby. And the mother says, yes, that's how you were born. You're a baby and you are what you are now. It's we who deny our own existence, because that way, we can disclaim to be the creator of, while at the same time we've been created out of).

Q: Over a long period of time, why does the body convert phosphorus to calcium? Could it be a certain emotion, and if so, what would be that emotion? Another question was why does the body convert the calcium to phosphorus? What is the relationship between these? (I think they are referring to a disease condition).

K- (Historically, the thalamus and thymus (convert elements to what is needed in the body). They can convert phosphor to calcium (Ca). Every single cell in the body has a seed of Ca in it, so the same seed of Ca can be used. (The cells can have) an attachment of phosphorus and Ca. If a Ca is attached to a Ca cell, then it ends up being a physical bone. If the attachment to the Ca cell is phosphor then that's for disinfecting and cleansing the body, which is partially the job of both the phosphorus and the sulfur. They convert through certain interactions with Ca.

(Through energy conversion the field strength of phosphor is converted to a Ca seed. (Now Mr. Keshe is talking about a disease), where at any time there are about 20 people on this planet whose body automatically converts phosphor into Ca. Doctors have developed some medicines that use aluminum to try and slow down the rate of the conversion of the energy fields. Aluminum is an absorber, that's why when it gets in the brain we have all the problems (dementia??), or if it gets in the blood cell we have other problems like anemia).

(The thalamus and thymus convert the energies of sulfur and phosphorus into energies of Ca. Then this Ca usually gets deposited in the blood veins, instead of in the blood. The disease of the 20 people occurs when the Ca gets deposited in the main arteries of the leg. And this is coming from the phosphor and sulfur converting to Ca. But it doesn't actually convert, rather the conversion energy information received from the thalamus and thymus goes to the DNA and RNA, (from that information) it deposits the heavy materials into the main arteries. Usually they have to amputate the legs, starting from the toes, going to the feet, and then amputating the leg, and then they usually die. But sometimes the Ca gets reposition to the walls of the heart. This is like putting a sand grain between the heart tissues, and through the repetition of the heartbeat, the inner wall of the heart gets torn up, and you die of heart failure).

(We've done a lot of studies on this, and that's why I know fully about it. We have also developed a technology to reverse this process and the body goes back to normality. It's a very extensive work with the thalamus and thymus, and part of the digestive system, to stop the conversion. In a way, it brings balance in the M fields of the body's phosphor and sulfur).

(In around 2008 Mr. Keshe worked on a case like this with one of his relatives, and they took some 10,000 pictures of their work. It was successful and the lady died of old age at about 85 and not the disease, a couple years ago. It was too late to save the toe, so they amputated it, but then it was grown back through the technology. They were able to stop the conversion to Ca. It can be done, because we understand the technology and the conversion. This is one of the beauties of understanding the essence of Creation, and you can help others with it).

(A KS was worried about the robots having a Soul, because they might see it as their duty to stop the aggression of humanity. Which means they might turn on humans to solve this problem. Mr. Keshe made a joke. You mean to make human's more humane? Maybe, but

we are already one step ahead of that, if you understand how to create fields at the strength of the field of emotion).

(In a very short time when we conclude our negotiations KF will open one of the largest exhibition centers in the world in one of the biggest capitals of the world. In that exhibition we'll demonstrate how the technology can change emotion. In a way, we'll show how Man can come to understand and handle himself, and how he can change his emotion).

(We're also talking to a representative of a government that wants us to help with one of their prisons and change the life of criminality in their nation. This is a very extreme prison, but one of the problems is all the prisoners are covered in tattoos from head to toe. They were asking if the T could help remove these tattoos).

(The technology is very advanced and now it's time to show its power, and very soon we shall. Sooner than any of you can imagine. (This may be a surprise to some of you), but very soon we'll close the exhibition in Linz. This is one of the last times it will be present in Europe. So if any of you wants to see the Linz exhibition center you have only a short time left. This is one of the largest exhibitions of the KF, and it will move to a new location very soon. The move will be out of the mainland of Europe).

Q: How important are the chakras and meridians for the operation of the Soul, and what exactly are the chakras and meridians of the Earth?

K- How important are the Earth, Saturn, and Moon to the Solar System and to the Sun? It's a collection of energy centers that we have given names to. (What you call chakras are really just the energy centers of the organs. With the exception of the one above the head, or they thought it was above the head. But they actually missed it, because they never considered that the Soul was within the body of the Man).

(If you look at the location of all the chakras, and then at the concentration of the fields of the organs, one by one they are in the same place. You have a right and left kidney, the heart, and then the combination of the energy fields between the two hemispheres of the brain. And all of these are counterbalanced by the field strength of the back spinal column).

(Most of these energies are like in a Star Formation (SF). The chakras are in the front of the body, and they are all interconnected, but they need to have a counterbalance. That counterbalance comes through the power transmission of the spine in the back.

(You see all of the nerves that come out of the spinal column, and if the chakras get out of balance it effects these nerves and you have all sorts of problems. But Man only looks at the energy fields of the organs in the front, he doesn't understand that they need to have a counterbalance in the back. Everything in the body goes through neural system in the back, which feeds the energy, (to the) loose part in the front).

(Through parallel points on the back, and through the power of the neuro system you control the chakras in the front, because it's a twin system. This is a very deep discussion. (If you look at how the nerves come out of the disks, it's like a leakage and the structure is at an angle of 10 to 15 degrees to where the energy of the chakras are in the front. But actually it's mostly controlled through neural system in the back. (The energy flows through a Twinity between the front and the back, and you can control it in the front).

(The KF setup the Pain Pads this way. You put a double loaded Pain Pad on the back, and a single on the front. This way you push the energy from the back to the front, and out of the body. If you do the reverse, you push that energy into the spinal system, and you can spread the disease through the body).

(This is part of the "hidden knowledge" that we don't teach, because mankind is not ready to understand. But mainly most of the divisions of the chakras are connected with the spinal cord divisions for the body within three vertebrae or disks).

This is why if you have a car accident and damage your neck, you'll find problem with the digestion system, intestines, and in your bladder. But doctors don't see the relationship, because they never understood it. (If you take most of the energy dissipating in the neck, and through the fine tissues take it through the stomach, it will change the characteristics of the chakras). Because the same amount of energy is not going down the spine to control the chakras on the back through the spinal cord divisions).

One day we'll teach you this, but in essence you have used it in the system. (This is why the new Enhanced Pain Pads are so effective. If you noticed KF has marketed new Pain Pads that work on the same principle as the chakra energy distribution. But it's specific for certain ?? two chakras).

Q: (Will we be able to use the (new Combination Head units) to regain access to human abilities such as telekinesis? (Being able to move objects with the mind)).

K- Everything is possible if you can get your Soul moving out. (This means expanding the Soul over the STP).

(When you want to move a stone, don't say, "come to me." Rather say, if I can give you enough to please you, then come to me. This way you can move a stone, or even a man). But you first have to find the Soul of the other. It's like when your child sits in front of you and you say, I love you, can I give you a kiss. Then the child runs to get that kiss, to please you, that you love her. Now do the same thing with the stone. But don't forget the writings of Bahauallah, bless his name, even a stone has a Soul. Find that Soul, you'll move the stone.

Q: If we are all from the Creator, and all are part of Him, is our Creator also a part of a larger Creator? Does it continue looking up like this infinitely?

K- I think we touched on this in last week's teaching. Why do we look up, when there's more to look within? (There is still something to look up to, otherwise we won't have confirmation of our own existence).

Look at it this way, from inside our Solar System, we see the moons, planetary system, and the Sun. How does the Solar System look from outside it? Do they see it the way we see it? Or do they see the same thing in a different way? Are we looking within, or are we outside looking in? What do we see? (When we look at our own body do we see our liver, kidneys, and organs? No, but we know they're there. But if you're a liver or a kidney do you know what your operation is? How is it that you know to wait for the rest of the body to bring the materials to you for you to clean them as a kidney? So we are aware of existence of the others, but from outside nobody sees our kidney. You have to look within to see).

Q: What do I do to get rid of my foggy left eye?

K- Join the KF health section and get an appointment with the doctors. I'm sure they can help you with the new technology.

There will be a big change in KF operations in the coming months. And we'll keep you updated and informed.

(We announced last week about the first 25, and then the 200, and then the 65. We have more or less completed the 25, and we're still looking for the rest of the 200. We still have room for more to join the 200. Sometime in June you'll be informed of the time and place. The teaching for the 200 will start in September or October, but we'll inform you if you need visas and everything else, and we can support you to get your visas and whatever else is needed).

Q: What do you think about what's happening with artificial intelligence? Do you have any opinion on that?

K- (The artificial intelligence will become "reality intelligence" very soon. They won't be artificial, because they'll have the essence of Creation within them. The knowledge has changed. There will be a lot of changes in the coming time. Over the next 5 to 10 years, even technologies like computers, satellites, and (artificial) intelligence will all drastically change. We see it in the "pipeline." The microchips will have emotions, because the materials to create emotion are now in the grasp of the Man. You'll understand how and the way it's done).

Q: If you travel by car from A to B, for example, you know that you will arrive at B in two hours, and you can adjust to it. But if you're standing in your living room, and a second later, you're standing next to you in Linz, couldn't you have psychological problems coping with this sudden change of location?

K- (We pre-accept that we are going to make that change. I think the joy of arriving is more than any psychological conditions. (We're more concerned with how you will be dressed when you arrive in the dome on the Moon. Will you be ready for the change in temperature, since you won't be carrying any clothes? How are you going to accept the new condition. We have to learn to accept the "evolution in acceptance.") They say, "if you can't stand the heat do not go in the kitchen."

Q: Somebody wrote to me, why are you moving out of Linz?

K- (It's because Linz is too far out of the way for most people to get here. We have to move to a place that is easy for everyone from all corners of the world to reach, and there has to be enough people coming to see the exhibition. Our team in Linz knew, that sooner or later we would be moving, and now gradually it's taking shape. We informed them months ago, that we'll move. It's because Linz it's too remote, for people to easily get here. Keshe Foundation soon will move to a major capital of the world to allow a larger number of people to come and see the new technology. It's not something new, our team was informed months ago of the move).

Q: I had registered and paid for the special Satellite Soul program. Will I still be able to serve in this way?

K- Yes, Satellites Souls will be brought into operation for completion of the work, yes. Stay where you are, you're part of the bigger work which will come.

(We have been setting up an international "One Nation" organization and to do this you have to have a feed of contracts with people like ambassadors and whatever in the physical dimension of the Man. You need a structure for health, food, to deliver energy to people, and support them through a correct financial system. you have to set all this up yourself. Then you have a structure for governing, and being able to connect everything together).

(In a very subtle way, we have brought all these things together over the past 20 years. Each piece has been brought together and left in its proper place until the time we are ready to bring it in. We brought in the Keshe Coins to start a new financial structure. We brought in the insurance policy's for health, food, wellness, and for energy. Like with the food you'll pay an annual fee and receive most your nourishment through the headphones and the systems we set up. And the energy system is now getting setup).

(With our "One Nation" government it doesn't matter if you're in Berlin, Toronto, Beijing, or Lagos Africa, you can call into the system to get what you need. KF will become a worldwide organization. It's like with Walmart, it doesn't matter if you go to one in America or in Beijing, or any other part of the world, it's all the same structure of Walmart looking after people of the community in the same way).

(The Keshe Foundation is getting set up, and it won't matter where you are in the world, you'll receive the same health care, food, energy, and financial structure. Everything for

governing "One Nation" has been set up. And a lot of you are participating in it without you knowing it. The Satellite Soul systems are part of it. None of you joined this by chance, your Soul brought you to be here).

(The Universal Council will be the governments once it comes into operation, and a similar work will be done with the Earth Council. We also brought in the television, and the KFSSI as a university education, or education centers).

(We have set it up and tested it, and now its sitting like a quiet nice baby in the corner waiting to play. The structure for "one nation, one government, one policy, one benefit" is 60% in position. The other 20% will be delivered in the next few months. And the completion of 20% will be in the next 5 to 10 years).

(The structure that I have setup to govern as one planet, is by the people, and for the people, and through knowledge and technology and not politics. You will not have presidents or kings. (The structure is one of self-sufficiency, if "I am the last man standing," then what am I going to do to survive in the correct way?)

(Keshe Foundation has slowly set up this structure with the help of each one of you. Each of you came and picked up one corner of this carpet, and now it's well structured and tested. We have to wait until it comes in. You can see it all set up on the KF website. It costs this much for health, that much for food, and so forth. For example, for travel through transmutation we'll offer a package deal to travel anywhere around the world for a whole year per family for 5,000 Euro, or 3,000, or whatever it is in the package. We know, that in the next 5 years the systems will be all over the place. At that time the people who will run it will probably charge much higher amounts. So if you buy now you'll save).

(I have set up the Universal government, and I'm a very patient man. All these things are set up and will come together. I planned this for centuries and I'll deliver it complete at the right time. But if only we do it for you, then it becomes magic. When human race "gives a hand" to help bring it forward, as you Knowledge Seekers and the others are doing, then it becomes accepted and humanity as a whole will take it up).

(Instead of paying what you do today, 63,000 dollars for a kilo of gold, and all the other metals, everybody will pay the same 500 a ton. It's the same system, it depends how you tune it to produce the material you want).

(With this African nations will now be able to develop themselves. As you know Africa has come the maximum limits of its natural resources of energy, so it can't grow its industry anymore. And the Europeans are taking full advantage of it. All the dams on the rivers that can be built, have been built. Whereas, the Europeans have access to fuel from the Middle East and everywhere else, that is feeding the fire of their industry. The Africans cannot afford the costs for fuel).

In the coming months, Africans will have access to the same energy at one cent a kilowatt, as do the Americans. Let's see what Africa does with it. Never ever in the history of the Man has there been such a just system, and we do it delivering science and technology to the Man. Let's see what the others do. (Reduction in the price of the natural resources in the coming years will bring a balancing between the rich and poor nations. Because the rich nations have robbed the poor ones through their gold, and other resources. The Africans will develop the KF technology even further).

Never before in the history of Man has there been such a just structure. And it's done by you Knowledge Seekers, we just deliver the knowledge. The Promised Day of "milk and honey" is here, you just have to wait until it's served.

The "One Nation" ID cards are in the works and waiting until all the nations accept them.

You can still join the 200, but it will be filled up soon. I have a very good idea of where we're going to go, and it's one of the most beautiful capitals in the world. The most amazing places on the planet. It will be announced sometime in June. The week of the 200 will be one of the most comprehensive teachings of the KF. But remember, you're not there on a holiday. You're here to enrich the Soul and the knowledge of the Man. Many of you when you leave as part of the final 65, you will be the first passengers of the Keshe Foundation, what we call, "pioneers of work." Don't forget, next Friday the 28th is the Addiction session, but this is a different kind of addiction then you're thinking of, but it still helps you if you have the other addictions. Thank you very much, and see you next week.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:22).

K- Yes, thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, we welcome you back. And we hope as usual, we learn from each other and we teach each other something about the real ways that the Creation is done and it works.

Today's teaching is part of the continuation of the other parts of the teaching over past few months and years. And what we're going to look into and what we understand from the point of belief, the way we have been taught it, and the way it actually is. And as we

hear more and more about the science of Creation, we understand how little we know and how much fallacy we have accepted.

We consider ourselves to be the decision makers of our physicality (P). But in fact, the decision maker of our physicality is our Soul. We are a puppet in the hands of our Soul. We make decisions we do things, which to do with the food and we exist in it with the dimension of physicality. That's the job of our physical condition. (:24). We go and look for water. We go and look for shelter, we look, we go and look for something to give us energy to sustain this physical body.

But the master, the Soul of the Man (STM) sits behind. How it creates destiny for the physicality to be in a position, then the physicality has to follow that, to be in the position in which the Soul has agreed to be. To be present in a continuation of expansion of interaction of the Souls of the man. We call it, "accidentally I happen to be there. And accidentally I saw this and that and accidentally, it could have been by chance or something else. I happen to be there." And I happened to do this. We have created word which we don't understand for the operation of the STM to bring the physicality in the position where it needs to be. It's like you tell someone, they're going for a blind birthday party. So you bring the birthday boy, but he doesn't know he's coming to the party, as we spoke before.

So, in a way, the Soul of the man with the Soul of the mother has agreed to meet the mother in such a such a place. So, the physicality through connection with Soul of Physicality (STP), makes sure that the physical condition is there, to deliver to bring the interaction of the Souls for certain purposes. And then, later on, we understand why we were there. Why we met the mother at that point in time, because the Souls have decided, for your Soul, and the Soul of the mother to learn something from the interaction of the future interaction of the Souls.

So in a way, we are running horses at the same time. (:26). The horse of physicality we think we are in charge of, and the STM, which itself with the interaction with other Souls come to guide and bring the STP for it to be there, to bring the physicality to deliver the promise and agreement between the Souls. We call it revenge. We call it the condition that, he did something and now that's the payment for it. He did something wrong, and he deserves this.

We have found different interactions, or voices, or noises, or communication line to explain what we don't understand. The connection between the STM and STP of the man, and the man in a physical dimension (D). And in that process, we need now to understand this, that, why did I turn up in such a place to see such a thing? And what's the outcome in the future for what I've done? What was the purpose of me being there. 50% of our lives, maybe more of it, is fulfilling the commitment of the Soul to the others, other Souls for the physicality to be.

Even if you get lost in the desert, there is a commitment to the Soul of the others. Even if you get drowned in the ocean, there's still a commitment to the other Souls. It's not just

that you've drowned. (:28). It's not. That process has caused other Souls to bring other physicality's to the position they've done right, or wrong to be in. It's not just a funeral we go to. It's what comes in the process of the funeral. The Souls which have been set to, to come in to. To deliver to, and to comply with the total agreement of the Souls.

A child to becomes an orphan. Somebody loves his son, somebody ?? kills a son. Why are we born in such a moment, such a day, such a second? What would have been the effect of it on the parents or grandparents, if you were (born) a week before, or two weeks later. Then we come to understand, that now we have to accept, not only accept, understand, the full comprehension of the time, place and position is dictated by interaction of the Souls and interaction of the STP with the physicality of the man in communication with the Soul.

It's an ever, never lasting "blind dates." Telling us. Calling it by chance, "accidentally" and the rest. But in fact, it was already set up. But you were blindsided. You could not see, you could not understand that, what your grandfather did, what your great grandfather did, what your mother did, and what your brother did, and in the consequence of the agreement of the Souls, you're balancing the fields. You're not paying back. Have you ever seen a magnet jumping and going somewhere else, he thinks something else? He just keeps a distance. It creates a condition.

So for us as a human race, the physicality of the body of the man, this is what we have to understand. (:30). That our physical existence, 80% of the time we think we do everything, we are in charge, we put the suit on, we put the shoes on, 8 o'clock we're on the train, 9 o'clock we're in the office, we come back 10 o'clock, having a coffee, and then five o'clock on the train back home, we control everything. Oh boy, how misguided the man has been. The STM uses those times, which you think your clock work, on the same train, same time, every week for all year. It plans your time for the interaction of the Souls in that time bracket.

So the STP and STM plan your day, internally what it needs to be done, that it brings the balancing. Most of the repetition, magnets don't move. When there is an external force, when there is something done wrong with the other Soul, and that Soul has the word, oh, I have to suddenly go out, and you have a car crash during the lunchtime. But why? This was not supposed to happen. But this is exactly what's supposed to happen, because there are other sequences, other effects, other dimensions to this accident, which was set up by the Souls, for those, for you, ?? not for the others, to come in the position of what was done wrong, or what was to be corrected.

Then, in the simple way, you understand how the Prophets promised, there will be such a messenger in so many years, and so many centuries, and so many decades, and he will do this and that. It's the guy himself changing the clothes, appearing in the same place, (:32). because he's already set all the Souls through the effect of his own operation, to be ready for that. And then he appears and manifests himself. Resurrection of the Soul over 2,000 years. But in fact, in this 2 thousand years he is preparing other souls, for it to be ready, that when he comes, he says, "oh, this was the one which was promised."

So, if you understand this, you can plan with the correct conduct of the STP the future of your Soul, the operation of your Soul, where it will be, what it will do, what kind of stars will be when it leaves the point of physicality. And then mankind comes to be understanding, he is not very kind to himself. Even though he claims to be kind to everybody else. What would be, if you understand this position fully? And what would be, what will bring all of us, if this point, and this part of the Totality was fully understood?

Would a man commit a crime again. Would a man should kill again? Would a man go out of his way to create mayhem in every direction and possibilities? Would the life of the man becomes bearable by living of the man, in conjunction between the STP and the STM.

Something happens. (:34). Or some accident happened. But the truth is, what can I learn from it? What was my Soul. What was my physicality, my STP was trying to teach me that causes the elevation of my Soul in the next step, that I don't put a step wrong. Not just, "oh, something happened, I carry on."

How do, and where do, and the system that the STM communicates with the STP? On which bandwidth? On which structure? On Totality of understanding the structure of the physicality of the Man. The different emotions are settled, compacted. We find the ?? correction of the total energy, which released by the Soul, in friction with the cell of the body of the Man, creates certain knowledge, certain information, which the what we call, STM has full control of.

Don't forget, you never studied French, you have no clue what "monsieur" means, or what ever in the language. But the STM has been to the "universal" University, knows everything and according to the time and place, can use that to speak French. To understand the emotion of the French, without speaking a word, because in the emotional level everything is the same.

Then it comes to the point, what do I need to know about the emotions, my emotion? And is the emotion the same amongst all of us. (:36). Today's teaching is more or less for you to know yourself. To understand the connection between the STP and the STM, the operational of the physical body of the man, even though you think, you are fully in charge, you are carrying on the order and the wishes of the Soul.

And if you understand you're forever servant to the master, which is the STM, which is the, in a way, wanting the better life, for the life of the man in a box, has appeared and will appear again and again.

What's the limitation to this? There are no limitations. What's the understanding in this process for us? The process, I'll explain something simple. From now on, look at both sides of the dimension of physicality and the dimension of the Soul. Why did I say this word, which I can't even remember ever using it? Why did I show this affection to my

child where in public I never show? Then the answer comes, it's Man who interferes directly out of fear of his own existence in the dimension of physicality, that creates all this mayhem for the rest of mankind.

To what extent we will come to understand this depends on this extent we have understood about the process of Creation, our own life cycle, and how this cycle has affected other Souls. (:38). And if you are true to yourself, you'll find one answer in the end, the answer which was given at the beginning and in between, it's just been series of conversions and everything else. Except the truth about the actual life of the entity in existence ?? amongst ?? us.

How much more, then to what extent we can pass this knowledge on, to share it that the others share ?? with you? It all entirely depends on Knowledge Seekers (KS). How do you teach? How do you add the knowledge across, that the others understand, not only your Soul? And then would you be able to share, to give, and unconditionally?

The existence of Man has many facets and many dimensions. Mankind needs to understand this, and then in that process, mankind will come to comprehend how his own Creation has become fed up, giving up on the dimension of physicality.

How far can we go? How much can we bring this understanding forward will allow us to become the Man of Space? As we said, we will run two parallel systems, physical travel, (:40). and dimension of the STM, or central energy of the existence of every living things in the U. And if you understand this, then we can decide. This part of the journey I go with the flying machine, and this part of the journey I go with the energy of the STM, and wait for physicality to arrive, but understand the dimension of the existence.

In a way, the Soul takes flight of fancy, and the STP will follow to join it on a given time, place and position. What happened when Man dies on board of a UFO, or any creature, and is traveled through the span of the Universe? Where would the Soul find his place and position? And where would the Soul finds its peace, in a way, the position which it was destined? Can we extend our lives to the understanding of this position? And can we predetermine where our Soul shall go? What shall we do? And how we will expand the knowledge of the others who are around? Not knowledge by just reading, knowledge by understanding the emotion of the Creation. Then it comes, if we can do this, how come you're not aware of our Soul, the work of our Soul during our daily life? And how can we work to see its elevation, that it serves, than actually taking? (:42).

Then, the answer is simple. Look within, emotion. What emotion creates ?? why come the motion within your physicality? And do you trust what you feel? Do you understand how you feel? And do you understand why you feel? Would you be able to create a condition that you can elevate the strength of the Soul of your own or the others. Or clearly, you find a new way to communicate between yourself and the others.

In the coming time, shorter than you think, I will teach you how to see through the eye of the Man, and at the same time, understand and see through the eye of the Soul, or

understanding of interaction of its fields. And then we'll see how you as Knowledge Seekers will take steps to be there to understand more, and to be part of your own Creation, and your own emotion, and your own dimension of ?? travel.

Everything in the dimension of the STM has no formulas. We cannot write, can you teach us, can you give us a system that we can elevate our Soul. You have to learn through the dimension of physicality which you have been taught, how to connect with the STP, (:44). and through interaction with your STP make connection with the STM. Jump in from the physicality to the Soul it's more or less, not the impossible, but ?? not impossibilities. You have to be able to interact directly at a given strength, because don't forget, it's the Soul which created the STP, where the physicality brought in the Soul in the womb of the mother.

Now, we come to understand. We in a way have come to the point that we start gradually understanding that learning the space system for the Man to travel in dimension of the Soul has no calculation. And has no method except understanding the process of elevation of the Soul.

Think how you as a Man with all the teachings of two years, been nourishing your Soul from the environment of life? You breathe it, you extend its strength. You swallow it, you extend the strength. You think and absorb energies from outside, still create that condition that you can survive. Then it comes the process of, what's the reason for life? Why am I here? And how long more is left till my Soul finds its home? Then, maybe one day we'll find the answer to the totality of what is on the table. (:46).

Any questions if you understood should come from within the Man, and not from outside in a verbal direction and dimension of the Man. Connecting makes you wise, then that wisdom shows the path to the Creator. It's for you to decide how much you understand and understood from separation, filtering and cleaning of every dimension of the Creation, which is in your pot.

How much more Man needs to know? How much more Man needs to trust himself, and what it will take, that you as the Creation and the Creator know and can provide for the Soul of your own? As our friends says, I do not know what to do. But I'm doing something because I'm still breathing.

In the process of understanding the Creation and the Creator, we have to understand ?? at least ??, what is going on. What is ?? visibility and what is the possibility. Then don't make assumptions. (:48). We have to understand the process of the Creation. And in the coming time systems will be set up for Man to learn the process, to go through that training, the way you get trained how to drive, you get trained how to swim. Now, with understanding the process of Creation, you learn how to swim in the ocean of the fields of the Universe, not as a fish, not as a body, but as embodiment of the energy of the STM. Then you'll find that you will be going everywhere, but there will be visual, physicality in the dimension of existence. Where you are just being kicked out as the session is not about to happen, but it actually does.

Does the STM, has the STM made the STP blind for it, not to show in the dimension of physicality to the Man the truth about himself? And to what extent we have come to understand the truth about ourselves, the truth about our Soul, the truth about the dimension of the Creation of us?

Today's teaching is enlightenment in the dimension of the operation of our own Soul, and nothing else. Would it be from C14 coming in to C12? And how much of it will be Carbon this and that? The Soul does not need Carbon, and does not have frequency, and it does not work in what it decides to ?? be. It operates in the dimension of what comes and where it has to go. It's actually a postman, it's a postbox. (:50). Where whatever the other physicality's are done, in agreement with their Souls, my Soul agrees for me to be present at the time, place and position.

Now we understand how we, as a human being, have to comply with the Totality of the wishes of our Soul and not as we thought with the hunger of our physicality. Then, if you understand this, and then if you comprehend the separation between the two, then we will come to be part of the Totality of the operation of the Soul of our own in the dimension of Creation. One day Man will understand that. One day Man in understanding will come to change his life.

We are just in the process to create a dimension that you understand the operation of your Soul, and not to be what we call, a guide, for you to use to move your Soul when and where you want. The teaching is for you to understand the power of you, for you to understand the extent of knowledge of you about your own Creation, that with it you create a new dimension for life.

One day Man will become wise, and one day in that wisdom, Man will see the truth. But till then, we try to drag the Man along till he becomes wise to see the wisdom. Maybe today you understood, you have to understand or you see the possibilities that will become reality with building, developing, (:52). changing and doing everything possible for us to understand the operation of our Soul.

What will be interesting in the coming time, how humanity will start learning about his Soul first, and then about his physicality. And to what extent he will understand by feeding the Soul he can feed the physicality the way he wants the physicality to move. So, the STM and STP of man become unisons. But it's vulnerable that both can be involved in the dimension of another position, time and place without their own choice, but through the choice of where they have to be.

One day mankind will become wise to this, and one day mankind will become wise to understand the Totality of the Creation, which he himself is part of. To what we need to do to be there in those kind ?? of position. We will bring in new tools, new tools of teaching, new tools of carrying, allowing you all to play with. We go for a small break and we come back. And then if you understood partially what was on the discussion of

the, on the table today, we'll carry on to answer some questions. Rick, would you like to go through a break? (:54).

BREAK >>> 482 KSW April 20, 2023 (:58).

K- Yep. Ready, Willing.

R: Let me remind the attendees that they can raise their virtual hands and then we can allow you to open your microphone so that you can speak and ask a question. No hands are up right now.

K- Thank you very much, we can say goodbye, and see you next week.

Q: ..We started to learn about how the Inertia, (1:00). creates matter in terms of interacting with the MaGrav fields of the plasma of Gravity. How does the emotion come in?

K- Repeat the question and you answered yourself, if you understood.

R: We started .. to learn about how the Inertia, creates matter in terms of interacting with the MaGrav fields of the plasma of Gravity. How does the emotion come in?

K- Emotion does not exist, cannot exist, if you did not have the STP, impossibility. It's interaction with the STP creates within the physical structure of the Man, emotion.

And, as we wrote very recently in one of our communications with some officials, the knowledge of the Keshe Foundation has reached a position and time, and level, that now we can produce for example, robots with emotions. It's not programming. It feels, it detects the field strength that, to it means "clean up," do it means, be safe, whatever.

Very recently, I was in the position to enter a lift (elevator). Next to me there was one of these big robots you've seen it, which now they're everywhere. (1:02). I call them "Susie's." But this guy was wearing a bow tie, front, and everything. I ?? .. was on the lift. The lift door closed, and the lift door opened again. And the Susie came in into the lift, turned around, faced the door and pushed tower floor 17. Waited, when he came to

the 17th floor, he went out and following it, he went through the whole corridor, floor by floor, cleaning the whole building. It has no emotion. It has preset.

If it sees a child, or a dog cannot show emotion to it. It's a robot. It is a physicality. If, in the dimension of the development of technology where we are, we can create the interaction of the fields at a given, a specific strength of the field, when the robot sees a child, or sees an animal, it will show the real affection. Can I give you water? I feel you're thirsty. Can I bring you some water? I can abandon my job which is programmed to clean the floor to go and get some water. I see a child hurt on the corridor. Oh, how it is? Can I go? It's something I have to respond to.

Up to now we didn't have this facility, up to now we did not have this knowledge. Now we can create systems with emotion. And all it is, it's understanding the process of interaction of the fields. (1:04). Which of the same thing is joy and cry? Pain, cry of happiness. Pain cry of pain. How can we ?? confusion in this as an emotion? We cry because we are happy, we cry because we are in pain. Isn't truth about it, is that one is stronger in gravitational, and one is stronger in magnetical. And the balance between the two is emotion of cry in the physical dimension of tears.

This is why joy and sadness are in the same place in the brain of the Man. One is gravitational, one is magnetical. When you're joyful you give, when you're sad you take, because it's the energy you need. Because that sadness allows you to take more in that in the future time it become a joy that you can give.

So, up to now, Man never understood what emotion is, why we have always parallel opposite emotions. Because it's very much like an isotope, it is Carbon. Sometimes it's 12, sometimes it's 14. If it's 14 travels in the D of the Universe, if it's 12 it travels the D of the P. Which one is joy, and which one is sadness? Is it joyful that is brought in and given and allowed to be given for the physicality to link up with the dimension of the U? Or is it sad, (1:06). that he cannot give to the D of 14, and he has to be as a taker?

So, now we understand even how emotions have 2 true what we call, presentation and manifestation. But in fact, they have the same common denominator. It's a Carbon, the other one is, let's say, Magnesium, we call it, whatever feeding and opposite to it. Because one is gravitational side, and one is magnetical side. And then you have to understand on which side we are sitting as a magnetical. Are you in the dimension of physicality? Or are you in dimension of the Soul?

So, emotion now is fully understood by the Keshe Foundation. And we can replicate systems that create that emotion. And if you mastered it well, you don't need KF, through the STM you connect to the same strength, and then you decide if it's the sorrow I can give it to become joy. You're very good doing it as parents, and when it comes a bit to our older children. we forget it. Unless we are deliberately manipulating, which means in the essence, only physicality is in operation. I've sat on the table, where the person looks at you with anger and switches to the other side and laughs. Switches back to you again with anger, and how can he have two face? But in fact it's not two face, it's the way the

emotion, the Soul has interacted with the physicality, confirmation of the weaknesses in physicality.

So, when you ask about emotion, now you have to understand what emotion is. And it's in fact, (1:08). it's the interaction between the STM and the STP of the Man and materials created to absorb emotions, at a given strength, we call it. If you've seen the new technology, this is where the sadness is felt. This is where the languages is in your brain, and this is where the other thing is.

In converting from the Cosmic Rays (CR) into the matter state of physicality of the Man, certain energies released, and in that position, we can say, what this position of the brain is. Because at that strength we shown tears. At this point, at this given strength we shown joy and laughter. So now even we can explain in a more detail way, the operation of our brain in the manifestation of physical data on the screens of monitors. But the STM does not have monitors, and the STP does not carry a screen everywhere.

Then, I think you have found your answer. If you understood the process of the interaction of the fields, and which side you sit as a giver or taker, depending if you're on the Soul side, or the STP. If you're on the Soul side, you'll find elevation and dominion. If you're on the STP you find action and reaction in dimension of physicality. Tear, laughter, where what was felt in that position triggers certain other fields in the body of the Man, which manifest yourself in the dimension of physicality.

It is the same, read Book number one. When the two fields interact, creates mass. And one again when mass itself interacts with the dimension of the same fields, it becomes weight. But in fact it's one is created out of interaction of the others. (1:10). If it's less weight than the others compared to the position, then you call it, happiness. If it's more, you call it, fat, and the more or less, you call it, slimmer or the right weight. But the fact it's the same structure, the same interaction.

So, when you're talking about the emotion, you have to understand the interaction between the two. As I said, very recently, you cannot test fly if you don't have two points of reference. Where are you flying to? Where are you coming to (from)? It's the same with the emotion. Are you going from the Soul to the STP? Are you going from the STP to the Soul? And in that position, that given strength of the brain of the Man which is again, it is just a, potholes of fields and plasmas. What will be the reaction if the Soul gets with the joy of learning that this makes the physicality happy, then takes the body to be enjoying and being in a joyful condition all the time. And then you find the emotion. And them, in so many ways, you'll find the process of addiction. Because at that point you're addicted to creating the same thing, the same rhythm all the time, to achieve the giving and the balance of the emotion.

Any other question?

Q: .. One of our Chinese Knowledge Seekers asked that, since recently, there's so much sand storms in Beijing, (1:12). and it cover most of China. So he's asking, is there a solution to resolve this issue?

K- Yes, abandon the city. This is something we discussed years ago when I was in Beijing. For those of you who don't know, is that, some 10 years ago, there used to be round about 30 days, 20 days, 30 days a year, where the sand storm coming from Central Asia, which is on the northwest of Beijing, is on the move. This desert has been on the move for thousands and millions of years. It's one of the biggest deserts on this planet. And it's eastbound wind creates mayhem. And if Beijing wasn't here, it would have been the same as if Beijing was here.

We have built this beautiful city on the path of the movement of the desert. Which over the next few million years, again becomes a land maybe an ocean usually. And then the desert moves into the ocean and then the whole thing circulates. This is how continents move. No one can stop the what we call, the movement of this desert. And now after 10 - 15 years, now there is something like 45 to 55 days a year, and heavy sandstorms in Beijing.

If you come it looks like a mist, I have been a few times as I lived in Beijing for sometimes. (1:14). And it looks like a cloudy. But in fact it's the storm, which fine dust particles through the weather change are moving the desert towards Beijing. Nothing can be done about it.

If we can stop this desert, if we try to stop the motion of this desert, then we'll create mayhem in weather condition of this planet. It'll be worse than the global warming. So, we have built a very big city on the path of a slow "snail" called, the desert. And this cannot be stopped. And you'll get more and more.

With the difference that now we have system to control to understand, and these sand storms create direction of field and energies, which in the interaction with the upper atmosphere and lower atmosphere create new chemical hazards, poison air. Which then in breathing with the sand in the lungs, this leads to all sorts of respiratory conditions in China and especially in Beijing. Dust particles have different sizes and there are those who are below very fine, which can penetrate the skin. And those who are thicker we see them as sands on the streets and everywhere else. In my last stay in Beijing, we saw it even in our entry. In two or three days like this and I remember the manager of the hotel we stayed in he said, it used to be less, now in past 10 or 15 years is now getting to about 40 - 45 days a year. It will increase to hundred, maybe 150 days, (1:16). and in time, maybe in 200 or 300 years, Man will abandon the city, as it gets covered as the what you call it, the desert is moving to the east side.

So, you can't do anything with it. It's just don't be in front of this slow snail. It doesn't matter how much trees you build, much barriers you put up, the sand storm, the field strength of the storm from the center of the desert itself on the back end of it, is east direction, and it will come. Maybe in a few thousand years, in a million years somebody,

the cycle of sand don't move further, we'll find, oh, there was a city, millions of people use to live in it. We'll abandon the city, sooner or later hundreds of years this city will be abandoned. Nobody has managed and scientifically it's not correct to stop this motion. Just try to get out of its path. And we don't have any scientific, any tools to stop the motion of this what we call, desert.

Any other question?

Q: In the previous workshop Mr. Keshe said that first the gravity of the Earth formed and then that led to the Creation of the Earth. (1:18). Can you give more of an explanation?

K- No, this is how it is. It's like the emotion we were explaining. When the gravitational field strength is stronger than magnetical, a central field forces of higher order is created. So, it absorbs a lower layer or a strength of fields. This is how cancer is produced in the body of Man. You create an environment of absorption, a heavier field strength in a given environment. And then because it's higher absorbs the fields of the lower level. So, it gets up building mass in that lower level. Till a point when the mass field Inertia, compared to the magnetical field changes and then what we call, the atmospheric and physicality appears.

This is done in production of materials. This is not a theory we talk about, we see it physically. This phenomena is fully understood. We have the knowledge and the technology to keep the Inertia changing in respect to gravity and produce the Carbon as a solid, the Carbon as it is in amino acid, and the Carbon as it is in the amino acid of the plant or the Man.

The knowledge within the Keshe Foundation is very deep. It took me years to teach our scientists to understand the possibility of creating as much fat as you like in a natural way. (1:20). Not by adding and chemistry, in a natural way as you produce in the body of the Man is in the possession of the Keshe Foundation.

And many of you have seen it, but you don't understand it. You collect the Gans of CO₂ and in the top of it you see fat. That fat has a CO₂ characteristics absorption level, otherwise it wouldn't be there. So, in the bottom you see Gans of CO₂, on the top you see is amino acid of the CO₂. Now this knowledge we know how it's done and how we can do.

Any other question?

Q: .. Good morning, Mr. Keshe are you so kind to develop a little the phenomenon of lighting of the light at the holy grave in Jerusalem.

K- Explain.

R: I'm not sure about the lighting of the light at the holy grave in Jerusalem. He wants to know more about that phenomenon apparently.

K- It is the phenomenon at a given time that candle lights up or the light comes on at a given time and place and they bring the light up? Or are we talking about a different light? (1:22). Creation of light in a specific way, by creating specific condition has been understood for centuries and depends how people used it. And some use it to the benefit of Man, and some used it to become a magic and they can connected to religions to find influence and power.

Until mid, late last century, in Iran we had a bath, a public bath which was lit with one candle, for decades. And then the British came to understand how they thought they can find this mystery of what they called, nuclear bomb or whatever out of it. And they by moving the combination of the structure, which was set up to create the spreading the fields was destroyed and the bath is gone. The bath it's still there, but it's not warm anymore. And it was a light, it wasn't just some geological. One candle was heating a whole public bath, thousands of liters for decades.

The exhaust from the gas, which was a methane gas, was understood, and then the combination of submitting gases around the pool by what we call, ?? subliminal fields kept the water warm. Now we understand the technology. But as usual, wherever the British went, they created mayhem, because they had to find something they could take back to England to show what they found. But this knowledge they never understood.

Nowadays, we control the methane in the houses and we say, this is the problem, blah, blah, (1:24). but then the scientist, man of knowledge understood and used ?? subliminal methane plus methane itself. And manifested as one candle, but actually the whole pot was in flame, but could not be seen.

This light situation which goes in Jerusalem is of the same, what I call, level of understanding. How things are moved at a given point with a certain point of manifestation, the light is created. You can create that light anytime if you know. You have to watch the move and you have to watch the concentration, you have to understand the position. Then you need a very, very little to light a candle up. It is like a match which needs to be instant for a few seconds to get the candle lit. Now we understand that knowledge, so there is no trick into it.

But if you want to make it holy, you can add everything else from Jesus, to Moses, to Muhammad, and somebody slept there, somebody blew into it. Something which is magic and it only happens on Easter Sunday, whatever. This is what I said many, many times, if you understand the knowledge, Man in the depths of Universe will not find any more magician calling themselves prophets or the mystery of the light.

Now we understand the process, you understand the field interaction. How can you create that field in a given position in a certain point that creates that concentration and a spark. If you think of it, how many times you have suddenly moved and said, oh, I received an electric shock, (1:26). static energy. If you can, where they talk about this light, if you study the movement of physicality, you'll see is an instance sparking in a certain motion which creates ?? burns anything, you can put a candle, or pieces of ?? it will burn.

Then where is the mystery, and then if you found out you can do this in a given position, then you attach it to Moses, and to Christ and everything else. It can be on a Sunday, on a Monday or a Tuesday. It depends on which are you going to light it, and which religion you are going to attach it. This is why we keep on emphasizing, do not get fooled, and do not accept no prophets and no prophecies. Understand the knowledge.

A light has to come from interaction of the fields. And how do they light it up? How does the static energy converts to? How come every time you pass a place you get an electric shock and you say, and you hear the spark. And if you're clever enough, you can use that to candle a light and then from that on make every man on the street come and pray, it is a magic ball, the light comes on every time I pass. That's all it is. Find the knowledge, and develop technologies we can see and measure the electric current charge and how something at a given point will ignite. Then you can do it every 24 hours on the hour. You don't need the Sunday, you don't need any resurrection. (1:28). And no one can fool you in the space.

Any other question?

R: Ok, we have a question from Cristiano in the Q&A here.

K- Let me explain to you something. .. In the laboratories of the Keshe Foundation, we have managed to develop a technology system. A plasmatic system that if it's run in conjunction correctly, can produce materials, can produce energy, can produce food and can produce anything else you can imagine from the same system. And it will be demonstrated in the coming time in one of the major cities in the world. As the manifestation of completion of the Man's knowledge in technology. With this ball we can create fire, we can create water, we can create food, and it's only a ball. I'm sure if we leave it long enough, they'll make a temple around it and they become the holy ball.

But if you understand the knowledge of it, you understand it's a key to life survival in deep space. I wonder how many of you will call us, everything else which is promised in every book that they made something to control. It is not something we're going to build, it already has been built. And in a very short time will be demonstrated in one of the biggest capitals in the world. (1:30). To show the completion of the knowledge of the Man. The same ball will light up, will bleed blood, will create honey, and then if you like it we can add anything else you like to it. Because we understood the secrets of Creation, no more.

It depends how we're going to use it to what we call, fool you, and create a new way of thinking, or influence your thinking that we are magicians. But this is the way Earth does. Lights you have a daylight, it creates water for you, it create honey for you and the milk, and you breathe in it. Nobody brings tankers of honey from another destination in the Universe, and nobody does with the milk. The cow eat the grass, and the child drinks the milk. Now we understand that process. And the beauty of it is that, anyone of you can do it.

Any other question? (1:32).

Q: .. Good morning Mr. Keshe and all Knowledge Seekers. Mr. Keshe, I noticed that at the transition point between the emotion of physicality and the emotion of the Soul, there is a very subtle change before we go deeper into the emotion of the Soul. However I noticed that physicality tries to "kidnap" this transition. I ask, how can we make a faster leap to go through the transition without interference of physicality in the process? Thank you very much

K- Learn not to be cheated by it. It's like a coulomb barrier, you have to pass it. Some people say it doesn't exist, but it actually does. We call it barrier, we call it, upper atmosphere, you call it, the coulomb barrier. It is again the way Man has made so many names for the same physical operation. So, you don't need to do much, you need to understand the point of interaction. The beauty with the plasma is, it doesn't have a fine line, this is the line of interaction. It is a bandwidth, it's a gap, it's a distance from one point to another, has a dimension of physicality to it. And that's the beauty of it. It depends which end you fall in, and that means the same emotion as somebody else in the inner side of the same plasma fields.

Any other question? (1:34).

Q: .. If whatever happens is the result of the interaction of the Souls, does that mean the will of our Creator is in fact that collective will of the Soul of the Universal Community?

K- Not far from it. Because we are part of the Creator and we are created from the same. The Creator, and the Creation, and the created are all the same. Depends which side of the fence you stand. It is a mother with a fine line of life span. Born as a child, conceived as a sperm and egg in a different environment. If you stand 40 years down the line, or 20 years down the line, matures to become what was created out of, to become the creator of the child, another cycle. So, where are we?

If you understand this, you understand the process of life. What was created becomes the Creator of. And there is no difference between Micro and Macro. But she's still part of the society, she still lives with the others. But at a given point, from point observation, if you look at the child born as a girl from the womb of the mother, it's just a child, she cannot give life. If you wait long enough, matures enough, then what was created become the Creator of. And this is how the cycle of life is. This is how the Creation is, and we are part of it. Are we the observer? Or actually are we that child? (1:36). Or are we the mother who created the child while she was a child herself born of.

There's a very nice program on television, sometimes it's nice to watch children cartoon, I'm a cartoon lover sometimes. This is of Tom and Jerry when we were little, and Mickey Mouse. In this cartoon, the little, two little girls talking to each other. And one says to the other one, you're a baby. She says, no, I'm not a baby, I'm always me. Says, go ask your mom. Both of them march to the mother and say, mom, she is telling me that I used to be

a baby once. The mother says, yes, that's how you were born. You're a baby and you are what you are now. We deny our own existence, because that way, we disclaim to be the creator of, while we've been created out of it.

Any other question?

R: We have a combined question here from the Q&A from Wolfgang of the German speaking community, and also from Jalal has the same question apparently, though...

K- ??Those in the German community they all talked and then they came over here .. with one question.

Q: .. When the body converts phosphorus to calcium over a long period of time, what is the reason for this? Could it be a certain emotion? And if so, what would that be? That's the question from Wolfgang.

From Jalal he says, why the body converts the calcium to phosphorus? What is the relationship between these? (1:38).

So I'm not sure if they're talking about phosphorus to calcium, or calcium to phosphorus.

K- Historically, historically, .. the thalamus and thymus work to create this condition. And in the cases of conversion of the phosphor to calcium, the body produces. They use the same seed calcium. Because every single cell of the body of the Man has a calcium. And then the phosphorus is attachment and we have a calcium attachment. If you have a calcium attachment to the calcium cell, you end up with a bone, physical bone. If you have a phosphor with a calcium, you have all this cleansing system within the body of the Man and disinfecting. That's what the job of the phosphorus and the sulfur is in the body of the Man, partially.

You have a combination of sulfur and phosphorus, which converts due to certain interactions into calcium, where the seed center is, manifests itself as a calcium. And the phosphor field strength is converted to the seed of calcium by energy conversion. There are about 15 - 20 people at any time alive on this planet, which the body does this automatically. Doctors have developed the material for it, which by introduction of aluminum, they try to slow down the rate of the conversion of the energy fields. Aluminum is absorber, that's why we have it in the brain and we have all the problem, or we have it in the blood cell we have other problems like dementia and what we call, (1:40). anemic condition.

In the thalamus and thymus conversion, the sulfur and the phosphorus energies changes into energy of the calcium. And then this calcium comes in, usually gets deposited in the blood veins, instead of the blood. So, if you take .. the main arteries of the leg, the calcium gets deposited into this. And all these people with this disease, which phosphor and sulfur convert. It doesn't convert, the energy received from thalamus and thymus conversion information in DNA and RNA, gets deposited in as a heavy material into the main arteries. And they usually amputate the legs, and then they starts from the toes, then the foot, then they amputate the leg and they usually die. And sometimes, due to

repositioning of it, this calcium sits on the wall of the heart. It's like putting a grain between, a sand grain between the tissue. After a while with the repetition of the heartbeat, the wall of the, what you call, the inner wall of the heart tears up, and you die of the heart failure.

And we've done a lot of studies on this, that's why I know fully about it. And we have developed too a technology to reverse this position, where body goes to normality. It is a very extensive work. It has to work with the thalamus with thymus, and work with part of the digestive system, to stop the conversion. (1:42). Or in a way to bring balance in the magnetic field of the phosphorus and sulfur in the body of the Man.

I worked on a case like this in 2008 - 2009. And there's some 10,000 pictures available, on how it does, because the lady, she just passed away about two years ago through old age, around 80 - 85, I think. She was adopted daughter to my mother and she lived in Manchester, born in South of Iran, two brothers and a sister. Brother died due to heart failure with the calcium tearing apart the heart. The lady, the woman, she had the calcium in veins, arteries, the main arteries of the leg. She was brought up, she was due to be amputated because it creates gangrene, when the blood doesn't go to the toes. And she was supposed to receive amputation in Manchester Royal Infirmary on the next couple of days. I said to my mom, there is a possibility this can be reversed. And my mom spoke with her and she took the first flight out of Manchester. She joined us and they did the vein what we call, artery replacement in the hospital to put the plastic vein as we call it, in. (1:44). Two years later again the vein was blocked with calcium and they could not replace it. And the toes were going for amputation. With the supervision of the head of the hospital in the second time when she was brought to us, we agreed that it was too late for the small one toe, actually the big toe to be saved we agreed on how the amputation is going to be with the surgeons in the operating room. And the first time we went above the joint between the foot and the toe. And the nurses made a mistake, they didn't understand this is a different way of handling it with the new Plasma Technology. The gangrene set in. So we agreed with the doctors in the operating room, I was present, where is going to be cut, beyond the joint towards the foot.

And we set out while the cleaning the structure, we set the whole body to stop converting calcium, phosphorus and sulfur combination to calcium. And we succeeded. Her fingers all were going to be amputated, because they all were in the same condition. They were peeling and falling off and we could see the bones, literally we see the ?? cartoons bone sticking out, this lady had bones sticking out. We had 10,000 plus pictures of every process of this.

And then I said to the doctors that, leave it I know a way to grow the toe. And we went through the process of growing the toe. And we saw it, we spoke about it before. (1:46). And then we watched the total grow from inside, bones growing. And then we watched the conversion of the balancing of the growing back to normality which was genetic, because in their family they had it, to a normality. The fingers covered, it became back to normal and the toe went ... This was done in 2009. She died in 2020 in the city of Manchester. (with it) never coming back. Because at that time she was taking aluminum

tablets, and each one was (costing) about 40 pounds each. She had to take one, and she was taking cocktails of medicine to try to stop this process. Because she would have died in a matter of months, as (from) the gangrene and the amputation. She never had any amputation. I saw her last picture at the funeral of my father three years ago, and she was normal. Those sticking (up) bones were all gone, and everything else. It can be done, we understand the technology, we understand the conversion. And this is one of the beauties of this technology, if you understand the essence of Creation it can create ??, and can convert.

Any other question?

Q: .. Mr. Keshe is it possible that not only robots having a Soul, but because of humanity's aggression, that they may turn on us to solve this problem? (1:48).

K- To solve which problem? To make a human out of us? Humane human?

R: Yes, I believe so. Humane to human.

K- Maybe we are a step ahead of that, if you understand how to create fields at the strength of the what you call it, the field of emotion.

In a very, very short time, very, very short time, I hope we come to conclusion. One of the largest exhibition centers in the world of the Keshe Foundation will be opened in one of the biggest capitals. And in that exhibition we'll demonstrate the change in emotion, and how technologies can be brought in. And in a way we will show how Man can handle itself. How Man will come to understand itself. How Man can change his emotion.

We're talking to a representative of a government to move into a prison and change the life of criminality in the nation. A lot of our friends who is involved in this with us. He said, you know, .. the only thing we cannot change Mr. Keshe? He said, have you seen this, what do you want to handle? I said, I can guess. He said, I promise you can't do one thing with ?? these ?? . (1:50). They have all of their bodies covered with tattoos, can you get their tattoos cleaned up, they can get their emotion and behavior change. I said, then it becomes their regret, what they've done with their body. He said, all of them are tattooed from the top to toe, you don't see any skin. And we wish we could change this, because when they look at it, would they become ashamed of what they've done through the other part of their lives.

Technology is very advanced, now it's time to show its power, and very soon we shall. Sooner than any of you can imagine. We soon will close the exhibition in Linz. ?? One of the last times it'll be present in Europe. Very soon, if any of you wants to go to see the exhibition in Linz, you have very short time left. As the technology and one of the largest exhibitions of the Keshe Foundation will move to a new destination in very, very short time. Out of the mainland Europe.

Any other point?

Q: .. How important are the chakras and meridians to the operation of the Soul, and what exactly are the chakras and meridians of the Earth? (1:52).

K- How important is Earth, Saturn and Moon to the Solar System and to the Sun? It is a collection center of energies. And we have chosen a name for it. It's if you look at it, whatever you call a chakra, except the one which is above your head, which we thought it was above our head, they missed it, because they never considered the Soul to be within the body of the Man. Is the energy point centers of the what we call, organs.

If you look at all the chakras they tell you, and look at the concentration of the fields of the organs, it's in the same place. One by one. And you have a right kidney, you have a left kidney, you have, what you call, the heart, and then you have the combination of the what we call, the energy fields of between two hemispheres of the brain. And these are all are counterbalanced by the field strength of the back spine bone.

Most of these energies when you look, it's like a star formation. You look at the chakras in the front. They say, this is chakra blah, blah, blah, blah. But they have an interconnection in the front, but they have to have a counterbalance, which comes through the power transmission and the spine. If you move or if the chakras move in balance with the position of the fields in the spine, (1:54). where the nerves come out of the spinal cord, you have all sorts of problems. But Man always looks at the energy fields through the organs in the front, but they have a counterbalance on the back. And everything in the body goes through neural system in the back, which feeds to the energy, which is a loose part in the front.

In a way, by parallel points in the back through the power of the neuro system you control the chakra in the front, as it's a twin system. This is a very deep discussion, and through the break, not a break, but if you look at it through the leakages of the nerves out of the disks into the body, you can see much structure in, some time in the angle of 10 to 15 degrees, as where they call it the chakra to be, with the energy in the front. But it's actually controlled most of it through neural system in the back. Because you can feed one through Twinity, you feed the other, you control the other at the front.

And most, that is how, in principle, when you deal with the systems of the KF, and if you been with us or in some of the teachings, we always say, put the double loaded (Pain) pad in the back, and the single in the front. That you push the energy from the back to the front, out of the body. If you do the reverse, you push that energy into the spinal system, you spread the disease.

So, this is part which, is what I call, the hidden knowledge we don't teach, (1:56). because mankind is not ready to understand. But mainly most of the divisions of the chakras if you look, is connected with the spinal cord division into the body of the man within three, what you call it, disks.

This is why when you have a car accident, the damage to your neck, you will find problem with digestions, and in the intestines, and in your bladder. And doctors don't see the relationship, because they never understood. You take most of the energy dissipating in the neck, and through the fine tissues go through the stomach and change the characteristics of the chakras. Because the same amount of energy is not going down the spine to control the chakras in the back through the backbone, called the spinal cord division.

One day we teach this, but in essence you have used it in the system. This is why the new Pads, the Enhanced Power (Pain) Pads are so effective. If you notice Keshe Foundation has marketed a new Pain Pads, work on the same principle of the chakra energy ?? distribution. But it's specific for certain ?? two chakras.

Any other question?

Q: ..Will we be able to use the systems to regain access to human abilities such as telekinesis?

K- Translate. (1:58).

R: I guess he's talking about the new systems that have been created by the Keshe Foundation, and he wants to regain access to human ability. He mentioned telekinesis, which is, would be the ability to move an object at a distance using your mind basically.

K- Everything is possible if you can get your Soul moving out. A new magician tables, you call it. I always said, don't say, "come to me." If you want to please me, if I can give you enough for you to please, move. That way you can move a stone, let alone a Man. But you have to find the Soul of the other ?? first. In words our child sits in front of you. When you say, I love you, can I give you a kiss. The child runs to get that kiss, to please you that you love her. Now do the same thing with the stone. But don't forget the writings of Bahauallah, bless his name, even a stone has a Soul. Find that Soul, you'll move the stone.

Any other question? (2:00).

Q: .. If we are all from the Creator, and all are part of Him, is our Creator also a part of a larger Creator? And keep looking up, is this infinite?

K- I think we've touched this last week in the teaching. Why do you look up? When there's more to look in or ?? down, within. Even though there is still something to look up .. ?? with ??, otherwise we didn't have confirmation of our own existence.

Look at it this way. To us from inside the Solar System, we see the moons, and the planetary system and the sun. How does the Solar System looks towards outside it? Do they see the way we see it? Or do they see the same thing in a different way? Are we looking within, or are we outside looking in? What do we see? When we look at our own body do we see our liver, and our kidneys? We know they're there. But if you're a liver

and kidney you know what's the operation of ??, how do you wait for the rest of the body to bring the materials to you for you to clean as a kidney. And the rest of the things bring that things for you to wash your heart. So we are aware of existence of others, but from outside nobody sees our kidney ?? . Look within ?? look outside to see what it is ?? within it.

Any other question?

R: Just checking over here. (2:02).

K- We're now going for two hours, which is ?? . let's call it a day

Q: ..What do I do to get rid of my foggy left eye?

K- Join the Keshe Foundation, go to the info@keshe.foundation or health@spaceshipinstitute.org and get the appointment with the doctors. I'm sure they can help you with the new technology.

R: Okay, that's a good suggestion.

K- We announced last week about the first 25, and then the 200, and then the 65. We are more or less completed with the 25, we're looking in the 200. Those of you who live outside EU you have to get in touch with the Keshe Foundation info@keshe.foundation, where to send your donation to be part of. Those of you who are within EU still carry on paying into the what you call it, Keshe Foundation account in Holland. This is a technical change for the Keshe Foundation, gradually you will understand more why. But if you're living outside the European Union with the IBAN number, you have to go through a different channel of transferring your funds to the Keshe Foundation EU. Money transfer or if you write to info@keshe.foundation or health@spaceshipinstitute.org, (2:04). they will give you the details what you have to do.

There will be a big change in Keshe Foundation operation in the coming weeks and months. And we'll keep you updated and informed. It's part of the changes, which we have come to accept the change.

Any other questions?

We still have room for the 200 people, and those of you who have already joined us for the first 25. Sometime in June you'll be informed of the place, time and position you have to be in, and then September, October for the 200. But we inform you if you need visas and everything else, we can support you to get your visas and everything else to be in the position we allocated to do this work.

Any other question?

Q .. What do you think about what happened, or what's happening with artificial intelligence, you have any opinion on that?

K- The artificial intelligence will be "reality intelligence" very soon. Because they have essence of the Creation. It won't be artificially, but in a way the process of the knowledge is changed. There's a lot of changes coming on board in the coming time. And over the next 5 - 10 years, even the technologies like computers, and satellite, and intelligence, what we call it, all will change drastically. (2:06). We see it, it is in the pipeline, intelligence, what you call it, with emotion, microchips are on the card. In the process of chips ?? emotional ??. Because the materials to create emotion now is at the grasp of the Man. You understand how and the way it's done.

Q: .. If you travel by car from A to B, for example, you know that you will arrive at B in two hours, you can adjust to this. But if you're standing in your living room, and a second later, you're standing next to you in Linz, couldn't you have psychological problems coping with this sudden change of location?

K- We pre-accept that we are going to see. I think the joy of arriving is more than the psychological, one of the biggest thing is, now, is when we put you to Moon. A few seconds before you're on Earth, and then you arrive in Moon in a dome. You were wearing clothes of being in a cold condition, now you're on Moon or something, you did not carry any clothing. How are you going to accept the new condition and ?? And these are the, what you call it, the evolution in acceptance that we have to accept.

They say, if you can't stand the heat do not get in the kitchen. So if there's going to be, you don't have a pre-mindset that you're going to be in Linz, and you are going to meet your friend, what will be happening in between does not the 18 hours of flight. (2:08).

Q: Somebody wrote to me, why are you moving out of Linz?

K- The reason being, Linz is too far, and not many people can make it, mainly Germans and Austrians. We have to move in a position that everybody from all corners of the world can reach, and there is enough traffic. Our team in Linz knew that sooner we will be moving, and now gradually it's taking shape. We informed them months ago, that Keshe Foundation Exhibition will move. Because it's too remote, for people have to get from wherever, from Vienna, and then two, three hours by train to get to Linz, and then get the train to .. and all sorts. And the expenses are too high, because it's a remote position. So, Keshe Foundation will move soon to major cities capitals to allow the large ?? percentage of the world to see the coming of the new technology. It's not something new, our team were informed months ago of the move.

Any other question?

Q .. I had registered and paid for the special Satellite (Soul). Will I still be able to serve in this way?

K- Yes, Satellites (Souls) we brought in the operation completion of the work, yes. (2:10). Stay where you are, you're part of the bigger work which will come.

You've got to realize, I was explaining this to some people. Some of our Knowledge Seekers online, they know what I'm talking about. If you look, we have set up an international "one nation" organization. And when you do this, you have to have a feed of contracts with people, like ambassadors and whatever, in the physical dimension of the Man. When you need a structure of the health, you need a structure of the food structure, you need the structure to be able to reach energy to people, you have to have a structure to be able financially for them to support through a system which you set up, which is correct. And then you have a structure of governing, governance. And then you have a structure, what we call it, being able to connect everything together.

If you look at it, we have brought in, in a very subtle way, all this together. Every pieces over 20 years have been brought together in pieces, and the it's left till the time it's there to bring it in. We brought in the Keshe Coins, to start the new financial structure. We brought in what we offered a few months ago, that you can join in as part of the, like insurance policy, for the health, for the food, for your wellness, for your energy. And we made the wellness available. It will come soon. So, you can pay a fee and receive most of the nourishment you need through headphones and the systems we set up. So, and then we come to the energy, which is now getting setup, the system is reaching up to get there.

So as a "one nation" government, doesn't matter if you're in Berlin, (2:12). you're in Toronto, or you're in Beijing, or you're in Lagos, you can lock in. Like a nation, you go to a supermarket, if you go to, let's say, Walmart in America or in Beijing, or in another part, it's all Walmart, the same structure, the same setup, looking after people of the community the same way.

Now, the Keshe Foundation is all being set up, coming to it. It doesn't matter wherever you are in the world, you receive the same health care. It doesn't matter where you are in the world, you receive the same pleasure for food, the same energy, the same financial structure. Everything for governance of "one nation" has been set up. And a lot of your are participating in it without you knowing, or you're. And part of this Satellite (Soul) system is that. Not any of you became, the Soul brings you to be there.

And then we set up the governments, which is the Universal Council, we see a few here and there, they are working and everything else. Once it comes into operation, Universal Council will take over its shape and its work similar with the Earth Council. So in a long term, we brought in the television, we left it there to be, because it's set up to be the structure, which needs to be come in. The KFSSI as a university education, education center has been set up, and then we're coming to go.

We have to do, we tested, we set it up, now its sitting, like a quiet nice baby in the corner waiting to play. The structure for "one nation, one government, one policy, one benefit" it's 60% in position. The other 20% will be delivered in the next few months. And the completion of 20% will be in the next 5 to 10 years. (2:14).

I have set up a structure to govern as one planet by the people, for the people, through the people, through knowledge, and technology and not politic. You will not have presidents, and you will not have the kings. And the structure comes, "I am the last man standing," what am I going to do? How am I going to survive the correct way? And this is how it is.

To you Keshe Foundation could be a lot of things, but it's a structure set up. And to set up one structure slowly, slowly with help of you, each one of you came in and took one corner of this carpet, it's well structured. Test it, brought in, wait till it comes in. Tested, brought in, wait till it comes in. When you go into the Keshe Foundation website, and you see all this so much for the health, so much for the food, so much for travel, because we know, traveling. At the moment let's say you pay, 1,000 pounds, 2,000 pounds for every time you're transmuting between, let's say, outside London, and South London to go to work.

We know the cost of the travel becomes so much through transmutation, that we offer you a package to travel anywhere around the world for a whole year per family for 5,000 Euro, or 3,000, whatever it is in the package. Because we know, in the next five years, systems will be all over the place. (2:16). You who paid this policy now, when it comes into operation, you'll find out that the guys who are going to do it, is going to pay maybe 8,000 to 10,000. You've done your saving now, joining in.

But we have the technology of it. I explained past few days, to some people, you go and buy insurance policy. And then you have to go, when you get ill to find a doctor. And therefore the doctor to diagnose for insurance policy to pay the doctor, and then you need operation. To get the insurance benefit to agree to pay for the what you call it, the care you need. And it could be the wrong care, not necessarily do what it's supposed to do. And then it can lead to some side effects and everything else.

But with the Keshe Foundation "Wellness Plan," Keshe Foundation is the insurance policy provider, is the care giver, and works in a way for it to make you better that you don't use the system later on. We are not sending you to somebody else to see you. Our doctors serve directly at the beginning. We put a permanent plan for one hour or two hours a year for you to have to go into the system that the future problems ?? are not there that it clogs the system up with 20 - 30 maybe weeks, two or three hours a week.

So, I have set up the Universal government, and I'm a very patient man. All these things we set up when it comes together. Now you have BRICS, now you have gold, now you have dollars, or the pound, I have the Keshe Coin. That's all. I can cash it anytime. It is not a Bitcoin, (2:18). which they make me a millionaire, tomorrow I lose everything, nobody can steal it. Because ?? it's ?? not worth anything, because belongs to the same people in the same line, and it's the same value. Your healthcare is done. Energy transformation, the satellites systems, conversion of the fields and energy, all is set up.

I planned this for centuries and I deliver it complete when it comes. But if we do it all it becomes magi. When human race "gives a hand" to make it as Knowledge Seekers and the others, then it's accepted and bring that collective.

Today you pay 5, what is it 63,000 dollars for a kilo of gold, and you pay 6,000 dollars for a kilo of copper. And then you pay half a million for another metal a ton, or a kilo. Now with the production of the material production, everybody's cost is 500 dollars a ton. Because it's the same system, how you tune it produces the material you want.

African nations now can develop. Africa has run into the maximal uses of natural resources of energy. This is one of the reasons Africa nations cannot grow anymore and the Europeans are using it to the maximum hilt of it. All the dams on the rivers have been built, whether it could be done, done. Europeans have access to the fuel they burned from Middle East and everywhere else, feeding the fire of the industry. The Africans cannot, because they can't afford for the fuel.

In the coming months, Africans have access to the same energy one cent a kilowatt, as do the Americans. Let's see what Africa does. (2:20). Never ever in the history of the Man has been such a just system through technology and science delivered to Man. Let's see what the others do. Reduction in the price of the natural materials in the coming years will bring balancing, what we call, poor and rich nation. Because the rich has robbed on the back of the same mine coming out of the what you call it, gold, and silver, or platinum or copper. As the Africans do with the technology of the KF in the cities to produce maybe even better and a new version of the ?? same. Never in the history of Man has been such a just structure. And it's done by you Knowledge Seekers, we just deliver the knowledge. The promised day of the milk and honey is here, you just wait till it's served.

Thank you very much for today. Hopefully, we'll see each other, we'll meet very soon. And then we'll share more knowledge. Thank you very much Rick for today.

R: We have one question maybe you can quickly answer, are the "one nation" ID cards going to be available soon?

K- Still those. It's in the backfire working on. "One nation" cards has to be accepted by all the nations to be a valid card. It is no use being a piece of plastic in your back pocket.

Q .. How to join the 200? (2:22).

K- If you're in EU, you go and pay the 10,000 which is on the thing to the account of the KF in Holland. If you're outside the EU you don't carry, what you call it, IBAN number in your account, which is if you are in Netherlands or British, or GB in front of it. You contact the Keshe Foundation info and they give you direction where to make the payment. And you automatically.

The 25 is full, the 25 was completed. We are now into the 200, and soon it will be completed. I have a very good idea of where we're going to go, we go to one of the most beautiful capitals in the world. The most amazing places on the planet. And we're just working on it, but it will be announced sometime in June. And if any of you have any

problem with visa, Keshe Foundation will sort it out, and you won't miss a flight, we'll make sure.

But it will be one of the most comprehensive teachings of the Keshe Foundation in the week of the 200, and you're not here on a holiday. You're here to what you call, enrich the Soul and the knowledge of the Man. Many of you when you leave as the 65, final section, will be the first passengers of the Keshe Foundation, what we call, pioneers of work.

Thank you very much. And we'll see you next week. Don't forget, by the way, next Friday 28th is the Addiction session of the Keshe Foundation. (2:24). Again, if you're all... All of you who live outside EU and you've been making donations or payments, get in touch with Keshe Foundation because it goes to a new system. And if you are in the EU, you still goes to Holland, because you might pay and it comes back to you. Just get in touch with the Foundation you will be given the new structure, and work through that.

Thank you very much Rick, and see you next Thursday and next Friday on the Addiction. But don't forget this is a different addiction then you're thinking, but it still helps you in your, if you have other addictions. Thank you very much, and see you next week.

482 KSW April 20, 2023
