

# 484th Knowledge Seekers Workshop May 4 2023

(Quick Index 16pp, Topic Index, Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Collective call of Soul; Balance STP; Earth effects rest U; Gans Gas mass delivery through government; Breathe air elevate Soul whole planet all animals; Change has started; Gans Gas will ingrain STP and DNA - permanent; Deuterium Gans; Liquidity - Water on Earth allows plasma to flow - create life with consciousness & emotion; AA creation of life anywhere in U; Fish became Man - many races; May Session end Child abuse; Create fields MaGrav; Gans in construction; Feed through eyes

## Topic Index

The call of the Soul - for ourselves - Collective call - do for other Souls; Soul is actually in charge; You have accident so other guys wife can find out; Partially we are planning - rest is Soul; Collective Souls decide to bring STP to balance - to open it up; Already living in both D of Soul and P; Nothing happens "accidentally"; All human Souls collectively are being educated to reach maturity and travel U; Man lives 2 lives Soul & P and connected to all life on planet - if harm animal - Souls arrange for you to experience the pain you caused - bring balance & understanding; Man will live life of Mitra not make a mistake - then Soul of Humanity & Souls of living beings on Planet - move together as one; World leaders are responsible to bring this about - why we asked you to elevate Soul of world leaders; Behavior of Man effects Souls of other creatures in rest of U; When do wrong it passes to galaxy and U; One brick wrong makes whole wall crooked; Prophets came to correct Man; It's not just me - now it's totality of Life on planet; We are responsible to correct next generation of Man - straighten wall from here to Creator; This is why we bring new T to start new cycle - all Man's needs met - won't do wrong - live life of Mitra through Soul; Because Man is so physical have to correct everything at one time; Can't tell people to be good when they can't feed children; Race differences push part of society just to survive - leads to criminality: USA majority of crimes committed by blacks - marginalized from beginning brought as slaves; Mr. Keshe teaching & promoting equality on planet - never asked about race or religion or anything - set example of giving unconditionally for Man to follow; Teaching both citizens & government so if one fails the other can correct; Coming months & years see change & evolution in STM - when finished no child will go to sleep hungry; System in Linz can deliver - only need headphones - feed Soul - become peaceful; Change step by step - all animals also fed - lion not kill lamb - satellites feed planet - makes no distinction gives to all beings equally; Take few seconds to make conditions for you to walk away from religions - but it has to be ingrained in STP; Evolutionary change in man's life coming soon; Change mentality of those who govern planet in same way; Create jobs so people don't do wrong; Governments should create conditions for Man's maturity - comfort, & abundance in feeding STM - man can walk streets for years go to other nations in 1 second - but always remain peaceful; In my travels through U never seen factories - sweat shops - refineries - courts & jails except on Earth - Man made mess for himself to confirm his existence - & hierarchy to control one man over another; If put Man on UFO

size of planet would he create sweat shops - enslave people from other parts of U? U Community doesn't go around opening up shops - man makes all these useless things to enslave himself to physicality; Opening doors to governments to bring change without them knowing it - share "Gans Gas Units" we taught you months ago; They can run on large scale power stations and sell to you - this Gans gas touches STM - elevation of knowledge and peace - not like gas out of ground; Cannot sell billions of Gans gas units and wait for individuals - only governments can deliver on a massive scale; Will change Man without him knowing - correct his behavior; Inhale Gans through burning gas for heating & electricity - like when you inhaled Gans for virus; Cities that use Gans gas will have no crimes; Play hard to get otherwise taken as fools - we know how to play Man's games; Everybody on planet breathes air - cooking in houses - change to loving family; One H can cover U; Process of Change has started; Continue to educate citizens & government to change inner structure of life - then change gets ingrained in STM & STP through RNA & DNA; You'll hear about cities without crime - governments may claim it - but know KF T is being used; These cities become example for humanity - no crime - hunger - sickness - People will ask how did this happen; President of El Salvador put 65K prisoners in jail - no crime - but didn't change STM - breakout crime comes back; Give me prisoners - I'll change Soul - no more crime - you imprisoned P - I will free STM; Walked leaders into doing what we wanted; Change will be ingrained in Soul without Man knowing; Even you made the MaGrav wrong - still your Soul was reached by Universal Fields - we know how to do our work; Been throwing liquid Gans's in rivers - now we are covering the air with Gans Gas - Soul of Planet will be covered with Gans's - make change; Part of 3 step process of breathing - drinking - washing body - but on planetary scale; All living beings on planet will be elevated by breathing Gans Gas; Start process in few weeks in first city - takes 6 months to go into operation - then watch for changes; World leaders have taken a bite from the "bait"; When Gans gas burns the water produced will be embedded with what is needed to elevate STM - same Souls breathing will be also drinking; The rain will spread water around the planet - ground will be saturated; I am a master of my work - leaders keep governing - while we bring change; It's time for "lion to lie down with lamb" - lion is world leaders - lamb is citizens; Kingship will end - all equal; Instead of getting enlightened from within - we have elevated you from the outside - to bring you inside to the STM; You'll understand in coming months & years - Man will become lover of Mitra live by ethos of Creator - this is the promise we made - now we managed to get powerful leaders to bite at it; Not knowing their nations will be free of crime & hunger - all equal taking whatever energy they need; As Man gets elevated will travel U - planet will become depleted of Souls in less than 50 years - will create restrictions on Souls to leave planet to keep it from dying; habit of Man is to explore unknown - from one galaxy to the next; Planet started from 1 man & 1 woman - now 8 billion - life on planet spread out from one spot expanding village after village - now to U - we are travelers from Earth - not refugees; Today is cornerstone of teachings - we have delivered what we promised; I am a master of disguise - we have taught you - but you have to understand; After 6 years KS couldn't expand T we went to governments - then we had you elevate them - now we work with both; We are still not happy with what governments gave us - but let's get it going - we are elevating the Souls & planet; Opposite to Corona which strangely stopped at a border; When the gas is burned it will cover whole planet through the love of the skies blowing

and raining; Spread by the greed of the leaders for gas money and power - but will eventually end leadership because everything will be done by STM; Until time of change comes you have to sleep and taste hunger of P - where we gave you the taste of the freedom of STM; 15% of children in USA go to sleep hungry - only 3% in Africa - know how to pick fruits & survive on less; When supermarket well stocked - people feel more hungry because they see but can't afford to buy; Wealth of the Man has become the shame of Man - this will change. Leaders will deliver T through their greed - but elevation will get ingrained in STM & STP; Remember teaching of May 4th, 2023.

Second session of Addiction tomorrow; May session announced shortly; Black stuff from CH3 Gans gets pulled by magnet - mixture of Fe and Deuterium - method to separate but can't show or KS abuse; Huge application for this Gans; How Gans circulate in jar hint to separate Deuterium; T has reached level don't need Gans's to transfer energy; Possible use of KF T with a biofermentation plant by KS in Mexico; Teaching on the importance of Water - Liquidity; All life everywhere in U & Unicoise have a factor of liquidity in energy - this planet it's called water; O & H mean "hold & feed" - don't need much to sustain life; Amino acid (AA) sustains life on planet; COHN - ?? gives liquidity makes life dynamic with emotion; Keep O & H and change the other elements for different conditions in U - will have different effects; AA pattern repeats itself across U; H is the essence of the source to Creator - Everything started from H - add Deuterium - H & C14 for line of communication in Universal D - say hello to the Moon or anywhere in U; H source line to Creator & connection to Unicoise; When G field Inertia of an environment allows liquidity - get free motion of fields; Liquidity for free motion of fields to create life is fundamental Knowledge of Creation - Life can exist anywhere - not exclusivity to Earth; On other planets have different combination of elements - but need liquidity; Liquidity allows plasma to flow needed for creating life (?? and creating consciousness & emotion). By replacing the elements with different ones you get different colors and conditions; (?? You trap the fields of liquidity from the environment of the planet to sustain consciousness and emotion which becomes the essence of life) - This is how Creation works in the D of fields; This is how life is manifested within the waters of the planet; One drop - create a fish in a fish tank; Strength of the AA in that drop in that water - instantaneously creates conditions of life - because water is the liquidity of the plasma fields on this planet; The drop becomes a goldfish; Natural wells of this planet spontaneously create fish out of nowhere - and sometimes manmade wells - called "wells fish"; Life through AA creates itself within the well - the same way you create AA on top CO2 Gans Box - but not every well can create fish; Depends on composition of well water; This water and its conditions will create fish anywhere on this planet; This is due to its minerals & current flow within that water - these create conditions for AA; This race of Man has not been the only one; Life grows like a weed on planet when temperature and materials are correct; Some creatures are created from fields of this planet and others come through connections to other parts of U - they could replicate in this environment; History books talk about different races taking over others throughout time; You got Fe and Zn running through waters of planet just under surface and they bring the energies up to create life; A fish became a man and walked out of the rivers - same in mud's of Africa - any position on this planet has the ability to create life; (Interactions of AA and emotions create life - don't need red blood cells nor skin - only

need Soul and intelligence - that's the creation of the Creator; KS stopped smoking after Addiction sessions convinced of T; May and June session to elevate Souls of men to stop abusing children - one session to elevate children and other to elevate abusers of children; Elevate king of Belgium and entourage - bring back into fold of KF; Addiction comes through habit of repetition & being indoctrinated through STM & STP; Child abuse also psychologically & physically; Do not give medical advice contact KF; U does not store MG fields - you take what need at point of need; Create "mini Souls" through intention - but must be without expectation of something in return; If you have true intention - even if you get it wrong - Soul receives what you wanted to give and gives it for you - intermediary of emotion - can travel U; How the MaGrav creates new cycles of fields - can use your intention for peace - but where do the fields come from - need to understand this; Careful using Gans in building materials - study first - Gans can change conditions can lead to new diseases - Do not use metal Gans in bricks etc ; Have long term effects; Need to create a field flow between walls or circulation in house; Cannot just stop consuming animal products or create new problems - everybody has to do it together to create a new condition for Totality; As Messengers partially our job to change the course of this planet - we have done; When we reach the Totality I'll teach you how to feed yourself through your eyes and then you'll see the marvel of Creation; Art of living is to take energy directly through the Soul - through the eyes; We love through our eyes and that's giving.
