

487th Knowledge Seekers Workshop May 25 2023

(Quick Index 16pp, , Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Controlling direction of motion of plasma through emotions; Emotions in brain - moving spaceship - same T; 2 reactors steer spaceship - STP & STM move Soul; Nano materials in magnets change emotions - diseases; Elevate Soul with emotions of STP; Emotion of survival keeps STM together; Man created genetics within himself; Falling in love with UC; Creators emotions same as Man; Incubation T - cocoon shield on Moon;

Topic Index

Transformation of energy & transferring energy from one point to another; Controlling the direction and motion of energy; Only travel in straight line - Each time have to come back to Earth and get new field strength - learn to change direction of motion through emotion; Same way you change your thoughts & emotions from one thing to another; Same way we change emotion in brain - we change direction of motion in space; Travel by sending little bit of STM ahead and get drawn in; When STP is inside STM it's like having control room inside the plasma; Create plasma around spaceship - then can change directions of spaceship by changing dynamic plasma; Changing direction is same as when changing emotion in the brain - the way you go from joy to sadness - a spaceship goes from A to B; You change the field strength in D of the STP; 2 choices of travel UFO - or by Soul & STP - uses field strength energy without matter state; Basic structure is Star Formation (SF) the base reactors feed the weaker top reactor - by changing orbits of plasma in SF you change direction of travel; It's the same with emotions one orbit can be happiness another sadness - another no emotion; Presently Man can build a UFO - now can go further to plasma; By changing position of STP in relation to STM - change directions create motion - STP outside of STM create emotions; Body uses energy of emotions - but STM can use energy without P; Same T as UFO; How you produce & control energy determines how you can move around; STM & STP interact to create emotion for example - sadness - the energy comes in through eyes from what we see - it also carries energy & information to create emotion and cause physical reaction - cry - but does it get carried to STM - this is the question; Spaceship has a central plasma and how it interacts with other plasmas inside it dictate the motion created and direction; Each eye carries its own information and field strength - seeing with one eye is different than seeing with 2 eyes; Understanding this you can dictate direction of Soul through thoughts; When emotion of STP inside STM easier to control direction - like moving 1 magnet others reposition - magnets don't have to be all the same; Old Health Cups he made were built this way - Nano materials hidden inside magnets - created field forces that created different emotions by drinking water or coming near fields; These fields can change the position in the brain of say a point of depression - to feel better it needs to be moved to a different location; Same what do with Alzheimer's; If understand this can decide to elevate STM - you strengthen directly the STM; STP & STM can interact like vortex - rotate in different layers of fields in different directions to strengthen Soul - already path to elevate - don't need Prophets; Can redirect one field from a group of fields

to act like laser; You can keep adding layers of fields while you travel; Rings of Saturn example of multiple different fields rotating - blocks of ice in fields - like emotions in brain; Understand principle of having different field state interacting with each other - matter with matter - fields with fields - combination of 3 or 4 different types of fields - create condition of life in space - and motion; Plasmas of Earth rotating inside solar system - inside galaxy - inside U at a million rotations - same basic pattern of plasmas; Earth doesn't rotate around Sun in smooth orbit - up & down as it interacts with different entities & fields - "bumps" in orbit are like emotions we feel when interacting with different entities; Environmental M fields matter state interact with STM - STM wants to stay alive - "emotion of survival" - interacts with STP change color of skin to adapt - skin color comes from emotion of survival; Man will change color in space through emotion of survival; Without emotion to survive body explode energy released to become other entities - STM has own emotion to stay together as Soul; STM & STP rotate fields through blood to create different emotions; STP creates different emotions of different field strength than STM - when inside it; STM emotions can expand through U; STP only in body; Can replicate T - create plasmas of STM & STP see how interact and will manifest in other parts of U; Teachings are consistent and bring everything together; STP which is weaker controls STM through dynamic field concentration; When STM expands beyond P creates shielding; Point is to understand how to change field strength & emotions - go from one condition to another; Skin color changes came from the emotion of the P interacting with the emotion of the STM, while interacting with the Soul of planet, and the time and position. The change in the skin color came through emotion of existence, the emotion to survive, and the emotion to keep the fields together with the STM; Man developed T of genetics within himself to transfer information and changes from one generation to the next; Plasma of sperm & egg give mixture of races - but sometimes mixture produces only one of races - emotion of skin; Understanding these topic next part of teaching; Agreements made for colonies on Moon - Man will interact with counterpart in Space - U Community; Falling in love with UC will be worse than earth man or woman; Happening for millions of years; Man has to transfer emotion - keeping out killer instinct; Interact with energies - create children of U; Have to understand before let out of Earth; Will teach you how to go from Soul to P - see both at same time; Go from light to entity in 1 second; Important plasma science doesn't just become a fashion - understood deeply; Understand mixture of fields of U; Learn how to go between dimensions - bring STP within STM - give emotions of Soul; No control buttons have to learn to create emotions; Creator has emotions same as Man - feels pain of Earth to change it - increase joy; We are part of Creator; Learn how to feed & gather energy from Soul - increase P becomes irrelevant; Feeding Soul through breathing eating till becomes mature not need P; STM becomes seed for another creation; Didn't know what happens at death - now do - can control how we feed Soul - take STP inside decide where to go; Man's life will be beautiful - can always stay young; Change maturity by what we eat - Chinese change diet - becoming bigger; P only to mature Soul - Phoenix Rising from ashes; Expand Soul beyond P - don't need to wait 60 years - bring STP within now travel U; Developing systems to expand Soul within seconds; More advanced systems in background don't show; Committed ourselves to Chinese government - transmutation come out of China; Created from Earth fields - but on Moon and U manifest different P; Essence of STP child of Earth - STM child of U; World leaders

scared to hear what is to come; Next cycle in evolution of STM come soon - Soul takeover emotion of P; Fewer people came to help elevate children of abuse - because you are yourselves part of that structure of suffering; Man has long way to go - become citizens of U; Man has not learned how to handle emotion of own Soul or Souls within & around him; These children will become the future world leaders; Understand emotion of everything we do at KF; Psychology is emotion; If understood what was just taught - become passenger of U - don't have to wait to die - change field strength; Squeeze energy in vortex - open up energy - becomes higher opens more; Fields that come into vortex continue wherever you are in U - saturation point then gives - how STM & Plasmas work; Fields cross each other create matter state - Earth, Moon - emotion of love; Next phase of teaching how to create with fields; Children of Mitra - leaving behind children of Adam; Man can choose to create children of Soul or P - would he want the suffering of P; Create systems make perfect Soul; Hope some will go to full transmutation; Past teachings all coming together; Change has already come - comprehend and accept it; Moving faster towards completion of Knowledge;

Systems soon be relocated to new KF position; If transmute with things inside body - may not all come with - but do you need them; Appear according to interaction of fields of STP & STM with environment - similar to what egg & sperm do in womb - need incubation for body to take shape; New incubator space T developed - like womb - to see how you will manifest at destination - transition to new environment - have videos of it; Called "creation of the conditions for the birth emergence" - but you dictate how you want to emerge; Incubation cycle dependent on fields of environment - plastic heart valve - plastic doesn't exist in environment; After going through transmutation no heart condition; Might release knowledge of tests; KF quickly change research - flexible - other agencies take 2 years to change something - KF 2 months; Unfinished projects because T advanced or already learned what needed move ahead; Can't tell you what we do because doesn't exist for you; Incubation system creates a cocoon ?? over body - protective shell - so can survive environment during transition; How will you react if see your partner change into something else on other side of Dome on Moon?; Planning for colonization; Powerful men want T - "test man's greed with gold - gold now is knowledge - Belgium King killed Fabio for it; Man is too comfortable to change - stays with greed; What we have achieved so far is beyond your imagination; You interact with emotion to change Soul; Souls are always aware; Soon KS be able to interact & see Soul; Physically aware - same time aware of Soul; It's not you become the observer because then you only watch - you become aware through Soul - Soul knows what is happening and what arrangements made with other Souls to balance - it's not that you see future - knowledge through awareness - see both Soul and P - and what you've done wrong - correct your conduct; In the end let the Soul be the guide - knows how to interact with other Souls; Become aware of how actions effect other Souls - won't do wrong; Correct what you've done wrong in physical life - through Soul; Actions effect strength of Soul; John Paul II did nothing to correct child abuse & other abuses of Church while ruled - strength like dust - lower than homeless living outside Vatican walls; Lot to understand about how Soul expands over P - field - position - emotion interactions have to comprehend; If not happy to go somewhere will effect transmutation manifestation; Transmute to go to Moon - will understand all Soul at same field strength - no leaders in colonies; It's STP

within STM changes shape & size of Man; Weight on Moon one fifth of Earth because of inertia of gravity - the field that decreases weight will also change body; Will small heart handle change or grow too; Same problem when too rapid weight loss - organs used to heavier body - have to readjust; Observing mankind over years to prepare for change; Hope Man won't use animals to test - but his own Soul like KF is doing; KS experienced becoming a bubble during sleep time - possible that he expanded Soul without machine - Many KS in EU reported being as a bubble or energy pack when Soul expanded; Don't die when Soul expands - live more; Future explain why Man goes from P into Soul; Souls learns a lot from P - two way learning; Are bringing all past teachings together - start to make sense; Can choose UFO or travel with Soul.
