

# **Gans Gas by Governments - Liquidity Emotion & Intelligence - Fish became Man - Collective Introduction to 484 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

The major part of today's teaching was really about the release of the Gans Gas Units that we were shown last summer to the governments for mass delivery of the technology (T). That's why Mr. Keshe said you will remember May 4th, 2023 as the day the Messengers delivered their promise to elevate the Soul of the planet. But exact details of it were not released and will come in time, and it's the responsibility of the governments involved to release the information to public. I understood that they will start the project in the next few weeks, but it will take 6 months to come into operation, and then we'll watch the change of the 2 pilot cities involved in this project. They will become examples for the rest of humanity of cities without crime and hunger, and the Souls of the citizens will become elevated.

How does this work? If you remember with Corona we breathed in the fields of the Gans's, drank it and washed our body with it, and in this way elevated the gas, liquid and solid states. Our physicality (P) is made out of these 3 states, along with other states. So now we are doing the same thing with the Gans Gas only on a planetary scale, and that's why the governments are needed. In a world where gas is polluting everything, it's hard to imagine that we actually want to be exposed to this gas and its fumes, and the more we burn the more our Souls and the Soul of the Planet elevates. This is not ordinary gas, but it burns like ordinary gas. Like Mr. Keshe said, I am a master of disguises. And the Messengers have to elevate this planet and they'll do it one way or another. As Man is too greedy and ignorant he cannot stop his destructive behavior, even though he knows it is wrong. The Creator is saying, okay, you want to burn gas, fine, burn this gas, and you all will get elevated without even knowing it.

We don't know exactly how the plasma gas works, but we know it covers the 3 states of matter. Last summer we witnessed the machines producing the gas and saw it burn. The beautiful part is that when you burn the gas it doesn't create pollution, and somehow the imprint of the plasma state is passed to the exhaust and that goes into our lungs and as our body is actually in the Gans state of plasma it receives it. And then one of the by products of burning gas is H<sub>2</sub>O, so now the imprint of the plasma is passed to the water, it remains with it. This water gets into the atmosphere and the clouds and wind spread it around the whole planet as rain. So now both the gas and liquid part of our planet is covered in the loving fields of the plasma. And finally the rain that falls on the ground saturates the entire planet, or what we said with Cup One, washing the body. All the animal life walks on the ground and so do we, sometimes. We are all going to be completely covered in Gans's, and that includes all the beings on this planet, and the Soul of the Planet is reached as well. This is what Mr. Keshe meant when he said, every being on this planet has to be elevated together in one go. And this is it. This is what we all have been

working, hoping and praying for, that the high beings would come and be able to help us, despite ourselves and our weaknesses.

Mr. Keshe told us that he has the knowledge and power to change us right now, but if they do that, then it won't be ingrained in our Souls. This way over time the plasma is going to seep down into our Soul of Physicality (STP) and change our RNA and DNA. I think it takes 25 years to change the DNA. But also remember recently he said there are two tracks, the slow and the fast. I believe this means the people who are doing the inner work, like for instance the monthly sessions with the Enhancement Units (EU) are on the fast track and will elevate sooner and educate the others in the knowledge, and then those on the slow track catch up when they start wanting to change and merge right into the flow. Everybody is going to win, there will be no losers because we are all connected through the Souls, and as we elevate the Soul will lead us. We have been given a gift beyond our imagination. But we have to continue doing our work, because this will make things smoother and faster.

The other important teaching in this workshop was about liquidity. That all life in the U needs what he called, a factor of liquidity of energy, and that factor on this planet is water. From what I could understand is that liquidity allows the free motion and flowing of the fields, which is required for intelligence and emotion. One sees this when you meet intelligent and loving people, they give off a sense of freedom and flowing and caring. In a way, they create life, because they make life worth living. Life is really the dynamic interaction of the fields. In water, or H<sub>2</sub>O, the O is more gravitational and is the holding part, and H is the feeding part, with these 2 parts you don't need much more to live. And then just by adding 2 more elements you have the amino acids (AA), which are the building blocks of life in the U. Does the O & H give liquidity of the fields of the AA, the movement, the ability to give and receive? There's a lot to think about here. The Inertia of the environment allows the liquidity. Remember the Inertia is what makes the matter state out of the MG fields. Earth is abundant in life and some form or another of water fills the whole atmosphere and a large part of the matter state on the planet. This in turn allows the plasma to flow freely and create life abundantly. Don't we say life started in the sea, all the minerals and metals from the land are washed into the sea by the rivers. The whole planet is connected through the sea. There is a lot to put together here and it feels fundamental to Creation.

The teaching went back again to that "one drop" to create a fish in a fish tank. He said, that by the strength of that AA in that drop and together with the water creates life instantaneously, because the water is the liquidity of the plasma fields of Earth, and it would become a goldfish. The water gives us access to the intelligence and emotions and the H - Deuterium - C14 access to the source of life - the Creator. But maybe this is only part of it, because he said, not all the natural wells produce fish, it depends on what's in them. The underground water system has access to all minerals and elements for life and it provides a current flow. Maybe this is the other part of the equation. The example given was our Gans Boxes, and what happens in them. We have the saltwater, Nano plate connects to the plasma or to the Soul, and our intention the emotion, and then we attract

the AA from the environment and start life. We need more knowledge of Creation to understand this deeper, but it's a great exercise.

Unfortunately many of our scientists believe only life occurs on this planet and the rest of the U is empty and unknown. But today Mr. Keshe has shattered that dogma of science. Life is created everywhere in the U and it's especially abundant on Earth. He said, when conditions are right life grows here like a weed. There are many natural occurring wells where you suddenly find fish growing in them. They spontaneously manifest, as we now know, out of the fields of this planet. The Earth creates condition similar to our Gans boxes. The waters in the earth carrying minerals from deep inside together with Fe and Zn, at the same time there is a static current flow, and then the AA gets attracted from the environment. Some of the life created here comes from the fields of Earth and others are from the U and the conditions here on Earth are suitable for them to replicate themselves. There have been many civilizations and races of Man. He doesn't just have to come out of Africa. A race can start itself on any continent.

Then how do we deal with the fish becoming a man and walking out of the rivers. I am understanding that it was not necessary to go through evolution, but through the emotion the fish made himself a man. Or was it from the emotion of the Planet, or maybe even the Creator? But this requires much more knowledge. The only thing required to create life is intelligence and a Soul, not red blood. Again it goes back to the creative power of our emotions, and then our emotions have to be under the control of the Ethos of the Creator.

There was a lot in this workshop about being part of a collective Soul and not just as an individual. There are many different factors to consider when trying to understand the difference between doing something that you yourself want to do, as opposed to doing what is best for the totality of humanity. It needs a lot of life experience to handle this topic in a meaningful way. But just briefly, in traditional societies when a child crossed over into adulthood they first went through years of training by the wise elders of the tribe, and you had to face your fears and overcome them. A mature adult meant you were able to serve the tribe over your own personal desires. This is pretty much missing from modern society, so we are kind of trapped in the childhood, and controlled by the corporate machinery, which also controls most aspects of society. I only bring this up because our background makes it difficult to understand a more true meaning of collective Soul.

A KS was understanding that now he is killing other beings and eating them, so he wondered if he should he stop eating eggs and meat. Of course, if suddenly you understood what you were doing, you would feel guilty and want to get rid of that pain of wrong doing. But it is not that simple. Mr. Keshe said, it all depends how you think of things. And that it will create other problems if you suddenly stop eating those things without the rest of humanity making the same change. And collectively the Souls have to come to an agreement to make the change. Only strong willed individuals can make that change on their own if they can reach the essence of their being. The collective Soul and the individual have different meanings and are part of a bigger picture. But he also said,

the Messengers are partially responsible to bring the collective change to this planet, and they have started the process.

When an individual does something wrong with his physicality, then the collective Souls come together and agree on how to bring balance to that individual, for example, when suddenly an accident happens to us. Actually, there are no "accidents" the events of life are aimed at us becoming aware of our Soul.

I would like to bring in just one more part of this topic. When we do something it effects the others, all the way back to the Creator. It's like if you are building a wall and you put one brick in wrong, it makes the whole wall crooked. What we do on Earth is passed on to the galaxy, U, and to Creator. So while we are certainly individuals, we are definitely effecting the rest of Creation. When we really understand this we will not want to do wrong things, because we will feel the pain we are causing the others. This is why we need to get the correct education and knowledge right from the start in our life. And this is why Mankind is being taught the Knowledge of Creation, so that from knowledge and wisdom he will live a correct life, and not from fear and punishment. It's a totally different change that is happening right now to humanity.

Other topics:

What happens on Earth effects whole U - everything connected together - Earth is "bad brick" making whole wall crooked;

Haven't seen jails or shops in the Universe - only on Man's Earth;

In 50 years Earth will become so depleted in Souls that they will be restricted from leaving so the planet doesn't die;

Black stuff with Deuterium has many applications - hold back for now so no abuse;

May & June sessions with the EU will be to end child abuse - focus on Belgium's king and people and bring back to the fold of KF;

Dry Gans used in building materials - do not use metals - have to know what you are doing and consider long term effects - possible new diseases;

When you reach maturity we will teach you how to feed yourself through your eyes - take energy directly through the Soul;

Thank you for listening.
