

**Upcoming Change - STM & STP-  
MaGrav Source of Plasma - Fibromyalgia  
End of Child Abuse  
Introduction to 485 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Again this week Mr. Keshe told a lot about the upcoming release of the KF plasma technology (T). That the papers have been signed by one of the most powerful governments and it's the start of world peace. When this nation announces this in public, then he will give us more details of the process. He said, in the coming weeks KF will make a drastic announcement regarding world peace. This is the time we have to increase our intention, and help strengthen the Soul of the world leaders that they keep to their word. Because once one changes, the others will change too. It's just like when one electron flips the others flip too. This change is not only for humanity but the whole Universal Community and it will bring mayhem, but I am assuming in a good way, that we all have been waiting for. The promised change is 1,000 days away, that's less than 3 years, when the world leaders will come together and sign the peace.

The government that has signed, has to show the true power of the T for the others to see. It cannot be just in words, the actions have to be taken. This will push all the nations to work hard to try and catch up to the others. If only the governments could work together, then sharing and spreading the T would be so easy. Mr. Keshe said it was easy to teach the Knowledge Seekers (KS), but it will be hard to get the leaders to accept the equality of the nations in sharing the T, but they are masters at it and they will push & shove and the "golden promise" of peace will come. This program of knowledge sharing will be one of the biggest programs mankind has ever known. And KF will become the leading organization in regards to the T. As the peace is signed more and more new technologies unknown to mankind will be shared. This is a huge incentive for us as humanity to cooperate, because our lives are going to change beyond our imagination.

This puts us as KS in a very important position to help bring this change, as we have a "head start" in learning the knowledge. And that's all it is, is a head start. We are a little ahead of the others, so it's very important we don't become arrogant, but share the knowledge with everyone equally. He said, people will come in masses to KF, but mainly because it will become fashionable. I hope the KS will not start setting themselves up as "gurus," but some of this will probably occur, and as usual they will disappoint themselves and others in time. The true KS have and will go through the test of time and learn to become humble and share the true plasma science, which they attain by personal experience of the T, and because this will be done through the Soul of the Man (STM). It will be a joyful time because everything will be provided by the Soul. And KS will become part of the structure to organize the change. So we all need to work hard now and learn as much plasma science as we can to prepare for the upcoming change.

In this workshop a lot was mentioned about the connection between the STM and Soul of Physicality (STP). Before he said that you can't have emotion without the STP.

Understanding our emotion is one of the keys to the T. We don't become pilots, rather we'll travel through the interaction between the STM and STP, and to be able to transmute we need the knowledge of the field interactions. We travel by our emotions and how far we can travel in U depends on how much we can understand the emotion of the U. So the U as a plasma has emotions just like we do. Then it must be the same when traveling here on Earth, that we need to understand the emotion of the Earth? Through the strength of our emotions we tap into the Universal Energy, and how much we can tap into it will determine how far we can go.

There must be balance between the STM & STP, and this balance comes out of how much we are aware of our own emotional condition, and if we are willing to learn. In a subtle way Mr. Keshe is confirming something we have talked a lot about, and that is being willing to face ourselves and taking the journey of self-discovery. As we observe how we behave, then we discover how we were conditioned as a child to believe certain things, and we usually keep them for the rest of our lives. Part of our process is to find out which emotional experiences we are willing to accept and which ones we deny, and this leads us to see how we keep repeating the same old patterns. The beautiful part is, that the Soul keeps giving us the same experiences over and over again until one day we open up and discover the truth about our selves and our Souls. Maybe this is why he said, how much are we prepared to learn - about ourselves? This relationship between the STM & STP is so fundamental that everything else is flowing out of it. This is where the teachings are taking us, because when we understand this interaction between the STM & STP and the emotions that are created, then all the other things will fall into place, and then we'll find out that we really do have the power within us.

This brings us to the part where he said, that we have missed a fundamental point in the teachings - mankind has always been in control of every dimension, and we never needed any intermediaries, and it's not something we can be taught, because it is already within us, we feel it through our emotion, through the interaction of the STM & STP. We do this in the womb of the mother, where the STM is created through interaction with STP, and then we decide how to manifest physicality and what we need to take from the womb. And the example of it is, that if you take the same egg & sperm and place them in 2 different wombs you end up with 2 different creatures. This shows us that it is the interaction of STP & STM which dictates the physical manifestation. To further emphasize this he said, the visitors to this planet look and talk exactly like us, because they have manifested themselves through the power of their emotion. So when we arrive at another planet we don't have to hide and try not to be noticed by the people, rather we become one of them and integrate with them. This is the best choice to make, because then we share the knowledge between the different civilizations in different dimensions.

Also when we travel the U we have to learn how to mix different compositions of field strengths, so that the STM & STP stay together and not get separated during the travel, where the STP could lag behind by a 1,000 years. The beautiful part is the STM & STP

are made from the essence of the fields of the Creator, so they never get dissolved by the different field strengths they travel through. This is one of the advantages of using the Soul rather than traveling with metal space craft, which can convert to another state of matter like a gaseous state when it travel through different field strengths. You could be cruising along through space when suddenly your spacecraft becomes a gas. Souls don't have this problem because they are made from the fields of the Creator.

Maybe it's time for us to start paying more attention to this relationship between the STM and STP and start to work with it in a practical way. The text of the Brazilian Daily Intention tries to lay out the structure of the STP, which is an amalgamation of all field interactions of the "cell souls" of physicality. And we know from the EU in Linz where a German lady experienced 2 different Souls coming out of her body during the flight, one was the STM and the other the STP. It is something very new for us, but maybe it's time to try to go deeper in our understanding and interaction with the STP. We know that many of the problems we have in P are coming from the STP needing elevation. It's something we can spend more time with, especially with health conditions. When we are sick or have some problem in the body we can try feeling the STM elevating the STP and exposing any hidden emotional agendas. Mainly it's just realizing that there is a consciousness we call the STP involved with the body, and we can have a say in it, by discovering our true intention, and then bringing the light of the STM to it. We can also share our experiences to help each other open up this dimension.

### **MaGrav Teaching - Source of Plasma to elevate Soul**

Mr. Keshe gave us another MaGrav teaching. He said, we should look at the MaGrav and understand the Totality of the knowledge, and that it is a source of plasma, a source of fields. Don't look at it as an entity, a "blue box" from KF that saves you electricity. Instead, build the MaGrav with the intention of elevating your Soul. There are 3 levels of coils each having smaller inner coils inside them, and all interact with each other on the plasma level. It's not that they physically touch each other, they interact through the plasma, the soul, the fields.

So where does the magnitudes of interactions come from? For example, let's take one turn of one coil in the inner coil of the middle level and look at what it interacts with. First it interacts with the coil that it is part of. Then it interacts with the coil that it is inside of, then the set of coils above it, which is a coil within a coil, and then the one below it, which is also a coil within a coil, and each coil has a huge number of turns. Let's say for instance, there are 76 turns in that coil then you multiply it by 76 times, and then you continue to do that for all the coils. Now you see how the magnitude of field interactions start to become huge. Today he added more knowledge, that each of the 360 degrees of one turn creates a different field strength. So now it's 360 times 76 and continue to multiply it for all the coils. This is why the MaGrav is a source of plasma.

It will take centuries for Man to understand what is in the MaGrav. It's the backbone of the 3 Books he has written for life and travel in the U. He said something like, try to replicate the field interactions in a MaGrav with the interactions of the STM & STP. It is

interesting that we also have mentioned this as part of our Daily Intention in Brazil, but for the most part are we have not yet managed to interact with our MaGravs in this way. Well actually, we may be interacting with it, without our knowing it. The problem is we don't know how to measure these interactions, but we feel them through the Soul.

When I plugged my MaGrav into the grid the electric meter started turning backwards, and I got scared and unplugged it, because I didn't want trouble with the Electricity company removing the connection. Instead, I use a 12 volt battery and plug a DC to AC inverter into the MaGrav and surprisingly, the few milliamps it takes to run the inverter is enough to trigger the plasma. I know it is making plasma because the electricity detector beeps when it's near the coils. That's all that is needed to start benefiting by the fields of the MaGrav. Mr. Keshe said, he will start opening up the teachings on MaGrav again, because we have no choice but to live the knowledge and teach it, and to do that we have to understand the Totality of the MaGrav teaching.

The upcoming monthly flight sessions for May is to elevate the Soul of children who are abused, and June is to elevate the Soul of those who abuse. And today he gave further teaching on Fibromyalgia, which comes out of abuse before puberty. Maybe this is to help us prepare for the upcoming sessions. So that everybody understands, Fibromyalgia is when you have pain and weakness in the muscles and a small amount of work tires you out for days. When you go to the doctor they can't find any physical cause, sometimes they say it's in "your head." The abuse doesn't have to be sexual it can be physical, emotional, or psychological. Another important point to remember is that, it can occur in varying degrees and manifestations in a lot of us, and we might be in total denial of the emotional part. Just because we didn't have an extreme experience of abuse doesn't mean, "we don't have it." A skilled doctor like Mr. Keshe has to hear the story and put all the pieces together to find the cause.

The main point of processing Fibromyalgia is to help the person understand that since the abuse occurred in childhood, that it is not their fault. The abusers try to get the Soul of the child to accept the blame for the abuse. This is why we are going to elevate the Soul of the children, so that they don't accept the abuse. Once the person accepts that it wasn't their fault, this means internally they process it in themselves, then their Soul can elevate and take care of the physicality (P). This is the same basic pattern that occurs everywhere in our lives, and not just Fibromyalgia. When our Soul and self love is strong enough then we don't give others permission to abuse us in any shape or form. But these are complicated and interlinked conditions that have to be seen within the whole pattern of the life. As our society denies existence of the Soul these conditions easily arise. We elevated the Soul of the world leaders in 3 months, so we should also be able to elevate the Soul of the children and the abusers. It's very important to join these sessions, because our experiences help humanity progress and we become part of the change.

Other Topics:

Population will deplete to 2 billion by end of century - want to keep Earth as a place to come home to;

Killing & destroying & taking from others - worst thing for Soul - need to eradicate;  
Parents abuse children without knowing it;  
Case study - sharing Cup shares fields and diseases with the other user;  
If we can change the pH in the body we can diminish a lot of the diseases;  
Today's achievement comes through the hard work of many KS - each one has put 1  
brick into wall of Peace.

Thank you for listening.
