

489th Knowledge Seekers Workshop June 8 2023

(Quick Index 21 pp, Introduction, Topic Index, Transcription, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

KF signed collaborate with leading nation; Trick - set "seed" to attract energy; Teaching on Eyes - White - Soul - Colored is P; Second Vision - whites; Manipulate electronics with mind; Humble enough receive; Eye absorbs in dream; Same as Creator; Live as stone; STM starts at zero time; Do not make AI - mercury - Lead Gans; Bio-fermentation project; Smell Bone stuck Ca from Corona; All creatures amputate limbs; World Peace settled - China; New organization market for KF; Turkish president

Topic Index

July Monthly session 4 weeks long - 3 hours each - anybody come in choose what you want to do for Wellness; Need 2 sets of headphones - 1 for place of problem; Massive operation in background; KF signed agreements with leading nation - become organization beyond imagination - to reach all humanity with knowledge & T; Become part of "One Nation" government conjunction with another government; In 2008 signed agreement with Iranian government - T in exchange for peace; European nations keeping KF silent - breaking out; KS asked to join team with 500 for KF part of collaboration with government; July session test collective feeding for colonization - reach remotely through communication lines - fed by energy fields; Colonies on Moon with hundreds of people; Can divide time of 3 hour session for multiple purposes - food - wellness; Last week taught to close physical eye open "Second Vision" of Soul - some said only saw darkness - because have to learn to see light; When eat banana vitamins act as seed to attract fields from environment to feed - like Gans Patches - stronger Gans feeds weaker; Know energies in environment exist because see it interacting with "aura" of body exchanging energy; Same way attract energy is same to see - set seed to see in emotion & Soul - "I want to see my Mother" - then you attract Mother to you - this is secret to "Second Vision"; Can do with hundreds of people at same time; Secret in structure of eye - inner colored circle is for P - the white part around eye for Soul; Eye is shape of U or a plasma; Colored part is round to absorb certain field strengths; Color of eyes dictates emotions - skin & hair color; Eye not just for sight - line of emotion; Eyes - reason for different cultures - mentalities among nations - cultural behaviors; Slight change in color tone - creates different emotion; Most important part of eye is white part - where Soul transmutes & transports; Soul always keeps communication line open; Go through white part when dream; Colored part sees P in front of you - STM works through white part sees other Souls; What happens when blind; When close eyes shut off only P - not the Soul; During dreams some of fields get absorbed by colored part - why we remember dream & see visually; Practice turning colored part of eyes upwards - whites covering socket - set the seed of what you want in your emotion - Soul will fulfill - Soul can do multiple tasks same time; Not multitasking - Soul is always busy; This is how give yourself cancer - through emotion & Soul; Soul pulls you back from danger; Every part of body has purpose - every single hair; Liver absorbs multi-faceted energies - different proteins; Eye does multi operations; When die color part turns up to let Soul out P no

more use; To help abused children taught you to use Second Vision - to reach Soul of children; Flickering eye for P; Nothing is coincidental; He learned computer games - set mind predetermine to win - fix vision through Soul to create energies - can manipulate M fields of electronics with Soul; Transfer energy - information emotion to it - but cannot harm it - only elevate - only receive to elevate own Soul; We allowed you to see "Soul of the Christ" - because humble enough to accept him as higher order of energy - set seed of love in your Soul to receive - this is secret; Love of your Soul for Christ - is seed to attract that energy; You don't see yourself as lower - instead set seed of love to connect; Do same to travel U; Teach you how to (transmute) with pinpoint accuracy; First create seed of love in Soul - remember pleasure Mother gives you - understand relationship & field strength - emotions with STP - then you arrive in Mother's arms; Energy system controls STP which dictates position; If don't remember position or anybody in place you want to transmute to - use other Souls who are there - like asking for directions on the street - other Souls help; Like putting magnet among other magnets - all reposition for you; Never get lost traveling with STM & STP - always land where should; Next time look at everything through white - eye of Soul - cannot lie; Physical vision has 17 km horizon - Soul's horizon is U & Unicose; Looking through white of eye is trick - use it July session; Learn how to dimensionalize energy through Soul- then through emotion can position P; Concentrate on tumor - disappear after year - transfer emotion through Soul to manifest P; Use fields of U to manifest in environment of destination - not stay in "monkey suit" of Earth - because maybe material to make suit is of gaseous strength in next solar system - turn to gas - learn to use field energy of Soul - travel anywhere in U; People close to death see light - when energies of STM & STP cross each other - cocooned in energy of peace; By understanding structure of eye - understand whole process of Creation & death; Understand more about spinal cord and why neural system has white greenish color - communication goes down to ground - humans & animals; Animals without bone structure still use Ca to transfer energy to AA - don't need spine in space; Some places in U man cannot manifest P - because fields strength can open STM; Plasma continuously creates layer to protect itself - keeps its integrity of own center; Body lives double life of Soul & P; Position of eyes & volume of colored part of eye in relation to white part dictates behavior - emotion - openness & what meaning you have - plays big role in many things; First thing we do when interact - look in peoples eyes see Soul - even if wearing dark glasses - cannot block Soul; Do not need P or sight to live - if understand fields of existence; One H atom fill whole U - same with seed of love - this is how Creator creates - loves what He has within Himself; His creations starve for His love; If we do our best on Earth - go to "heaven" - means closeness to His Soul - but it is within our own Soul; Trick is to learn to create seed of love for Creator - attract His love - this is principle of Mitra; Will have no time for anything but to act good; The lies come through the colored part of the eye - Soul tells truth; Life in any D of U has both P & Soul interactions - principle does not change if you are on Earth or planet Zeus - or within the Soul of Creator; Moses kept out Commandment so he could lie himself; Now understand a lot about yourself; Relearn how to see through eye of Soul; Gradually you'll learn how to transmute this energy to create what you want - make a cocoon - envelope of plasma - it will change your life; Life only has one dimension - not 2 - P collaborate with Soul at same time; We learn the P things because there is pleasure in everything we do - soon get tired of the Void or non-tangibility - long to come back to P for a while - be

able to feel and touch what you love; You are no different than the Creator - "I made man in the image of Myself" - I made Mitra to love the D of P; You have to teach yourself about the Soul yourself - no Prophets can do that - leads to abuse; Use the eye whites to reach Soul of abused child or move emotion of president to be peaceful - but first create love within yourself - then you can elevate others; If find strength of stone can live within it - I have done many times - sat as a stone for centuries - watched man passing by; Don't have to do something all the time; In D of Soul "no time"; We decide to start time ourselves - STM starts it at zero point; Mr. Keshe manifested himself thousands of years ago - spoke prophecies - lived as stone - fulfilled prophecies - because he knew where to manifest STP within another Soul or within the Soul itself (very interesting to ponder this); Now you understand biggest magic & how Prophets are manifested - it's same Soul; You decide to manifest Soul through eye whites; When you make the energy seed of that "banana" all the energies of the bananas in the U will target and connect to you - you can take what you need from them; It's same when you connect to one Soul of an abused child because that Soul is connected to many other abused children - they all receive from you; Now you understand how it works - but it has to be that you are only giving - not taking.

July teachings start at new time; Do not make Aluminum Gans nor Mercury, Lead and others - because at field strength of AA of brain & emotions; Interact with Mg - affinity to solidify in brain; Adding more misery instead of detoxifying; Bury deep in ground encased in concrete - not to leak harm creatures underground; Extra Al fields in body lead to dementia & others; East Bloc used Al in disinfectants - workers suffering; Mercury Lead most horrendous have strength of emotion; US Senate investigate MMR injections for children - companies had to admit used mercury - stopped mercury but all 3 together overloads body - doctors want to move time of injection to puberty - but unknown problems - no doctors know why mix all 3 except money for pharmaceuticals; Asked Rick to remove video of how to make AL Gans from his program; Mercury permanently changes brain operation; KS who made Al Gans said very bad - not to do; Most of Plutonium interacts with emotions - Mr. Keshe made - but Uranium Gans has benefits; More about the bio-fermentation project in Mexico - wait 6 months to a year - maybe new collaboration with the government could turn this into a large scale international project with huge investment; In South America they burned vegetation and waste turned into Nano material became fertile; Best when burn same vegetation because then it has the correct field strength for next years growth - energy seed is there; Fermentation process gives H gas can give to farmers; From Corona KS developed heightened sense of smell - can't go into certain places or around people overwhelmed by smell; Gave teaching about "smell bone" in nose that gets stuck to wall of plasma cavity - can lose sense of smell; Cause is Corona which is Ca based - get build up of Ca on Bone; Goes away after 1 to 3 years; Smell bone can recognize 3,000 smells stored in brain; Gans to deplete Ca energy on bone - do not use Ca Gans make worse; Teaching on difference between Transmutation & STM traveling in dream; In dream STM only goes out a peep hole; In transmutation STM envelopes whole body; Christ went out peep hole and learned to envelope whole body; All creatures have ability to self amputate a limb if they get caught - like reptiles - Man has ability within himself forgotten; Through eye whites STM & STP can amputate limb through high energy and temperature - can grow

back later; Plants also do this - take part of self and grow another plant from it; "I can put you in a dream expand your Soul around you - easy"; It's more enlightenment of Soul then expansion - not like elevator going through levels; We'll help you transmute to colonize Moon - Vertical System; Inhabit empty planet by creating a dome on it; But no empty planet or space in U - nothing is empty - it has active plasmas at different field strength - need to become aware of; Before microscopes man used to drink water get sick from bacteria's didn't know existed - it's same with Space - need to learn about flowing rivers of M fields in U - it all has life; To you empty space - could be colony of Covid plasmas; Colonization projects years away - could be sooner have knowledge; When government goes public with KF collaboration - NASA & Musk rocket propulsion become history - others breaking rank - wasted enough time on rockets; Space travel in U needs to replicate planets - provides everything; KF knows how to replicate planets; Silenced by Belgium pedophile groups; Collaboration signed - what all KS waiting for - very soon goes public; Cities using AI in water treatment process - causing problems; Waste water recycling study found in London - men's sperm count lower due to heavy use of contraceptives coming through sewage; KF not only alternative - others also doing things; Once one government breaks rank and shows T others will jump on it; KS serves 200 people with Gans drinking water - they love it; You said peace is only days away - what happened; Fundamentally the world peace has been settled - China using economic power to dictate peace; Example of Middle East - America & Israel promoting war to sell weapons - China offering economic development - changing relationship between Saudis and Iran and others; Vatican will pay heavily for interference in Ukraine - a dam destroyed - stopped expansion of war into Russia; China is prepared to rebuild Ukraine and become new grain breadbasket - will use KF T for Non - GMO seeds - will stop American domination of developing countries by forcing them to buy their seeds every year - long term change; Taiwan will be resolved; China uses wisdom - seed for world peace; Colonial powers will soon finish - Western media lies to readers to keep colonial power; Church & gun manufacturer's make money; Compact Units should be delivered within some months; KF handing over marketing & products to new organization but still part of - products should increase to 30,000 in next 2 years; New brand name (not clear if KF name will go public??) for products; KF products bigger than Amazon in 5 years; Teachings will carry on; Emerged from obscurity - signed agreements - become one of biggest corporations in world; KS called upon to join new organization; Guarantees given that teachings won't stop - merge into new organization over 2 years; Details about re-elected Turkish president - man responsible KS and close friend; Supported by China; Two different colored eyes means two different characters (not 2 different personalities) in person; Example if blue & green eyes - blue might love you & green hate you - don't know where you stand with person; Space has viruses and not bacteria's need to understand how to coexist; Scientific organizations learned a lot from Corona. Join July's monthly flight sessions - will be 4 weeks and 3 hours each time.

Introduction to 489 KSW - White & Colored part of Eyes - Secret is Seed of Love - Create Time - China to bring out T

The teaching part of the workshop was more focused on elevation of the Soul and a deeper understanding of how the eyes function in this respect. The eyes are not just

something we look out of and see the world, they have many functions. Mr. Keshe asked us why are the colored part of the eyes a circle. This is interesting because the eyeball itself is actually round, but appears oval from outside. If you look at an egg, it is also oval and the yoke inside is round. And the Earth makes an oval shaped orbit around the Sun, but is itself round. There must be some kind of relationship here. He also said, the eye is shaped like a plasma and the inner colored part absorbs fields.

The eye is composed of two parts the white part is for the Soul of the Man (STM) and the colored part is for the physicality (P), and the white part is much more important then we ever assumed. The Soul does many things through the white part, for instance it transmutes and transports and it keeps open the line of communication to the Soul. When we dream we go out through the white part, and when we remember the dream it's because the colored part has absorbed certain field strengths, and that's also why we see things visually in our dream.

The eyes also carry the line of emotion and the color of the eyes dictates the hair and skin color. The different eye colors create different mentalities among the races of people. It's also responsible for cultural behavior. If you change the color tone slightly you get a different emotion. Even if you are blind it doesn't effect the Soul. The eyes carry out multi-operations. In fact, every part of the body has a purpose, even the smallest hair on the head. It's only we have to obtain the knowledge of it.

When a person dies sometimes the colored part of the eyes turns upward to let the Soul out. We can do this exercise ourselves when for example, we do the Intention together. We can try turning the eyes up and feeling the Soul expanding and enveloping the whole body. The purpose of elevating the Soul is to bring the enlightenment, or understanding of our true nature, and that we are part of the Creator. In answering a question about this he said, it's not about going up and down like on an elevator where you reach different levels. It's about acquiring understanding and knowledge. This is the same as what he called, opening the "Second Vision." Mr. Keshe introduced this in the Flight Session for elevating the Soul of abused children. He asked that we close the physical eye and open the Soul's eye, and this is the major teaching of today's workshop. If we look at everything through the white of the eyes, or the Soul's Eye, then we cannot lie. But when we are living through the Soul lying wouldn't even come into question, because the whole energy changes and becomes light, open and transparent. The joy is so much a part of every breath, that you just want to serve the others so they can feel it too.

Today we were not only given this gift of knowledge about the eyes and the Soul, but also the secret to receiving the energies of the U. We were taught this essential pattern a long time ago, when Mr. Keshe explained that when we eat food it's not for the food itself, but rather for the energy "seed" the food carries. For example, when we eat a banana we first turn it into a Gans and what we call, the "vitamins" are converted to energy plasma, and they act as a seed to attract the matching fields from the environment, that gets added to the lymph and carried around to feed the cells. We know all this from previous teachings. But the new knowledge or the secret, is that we do the same thing for the Creator. We create a seed of love for the Creator and that attracts His love to us. Or if

we want to meet the Soul of our mother, we create a seed of love for her, with all the emotions we remember of her presence and love for us, and that attracts her Soul to us. The beauty of life in the U is its simplicity. And a sincere and innocent Soul already knows how to do all this. It's the Soul of the Physicality (STP) that needs to learn and elevate. Then the two Souls will work together as one. He revealed today that there aren't really two dimensions (D), there is actually only one, the P collaborates with the Soul at the same time. So I guess this means that they are already acting as one, it's only the illusion of duality that makes them appear as two

Some KS used their time in the Enhancement Units in Linz to see the Christ. Mr. Keshe said, we allowed you to see the Soul of Christ, because you were humble enough to accept him as a higher order of energy. It doesn't mean that you saw yourself as lower than him. It is very important to understand the details of this statement, because as humans we are caught between the 2 extremes of arrogance or low self-esteem. Rather the scientific understanding of it is, for us to set the seed of love for the Christ, or whomever, and by that seed we attract the energy of it to us. It's a matter of connecting to that field strength and then receiving. This is actually the same way we are feeding ourselves now with food, only we are unconscious of receiving the cosmic energy. And this is the way we will transmute our Souls across the U.

There was another trick along this same line. By connecting to the Soul of the children who are abused, and through their connection to the other children of abuse, we are able to reach all of them at the same time. The way I understand it is, that we make the fields of our Soul available to all those who have a matching field strength to the Souls of the abused children, or whatever the case may be. Again it is learning to see life through the interaction of the fields, and not just the matter state of name and form. As he gives us more knowledge our power expands to be able to serve even more.

During the Corona virus we saw it effecting the lungs through calcification, and in the heart, brain, and other places. Now Mr. Keshe explained very clearly how when the Ca based energy packs went through the nose, instead of going down the throat to the lungs, it started energetically accumulating on the "smell bone" in a plasma cavity between the eyes where it effected the ability to smell. For those who lost their smell the energy state converted to matter state and caused the bone to stick to the walls of the cavity and they lost their smell. In other cases, like the lady in today's workshop it made the bone more sensitive, so that her heightened sense of smell was creating problems for her. The beautiful part here is that we have understood the knowledge of how it works, and not being pressured to believe in falsehoods to sell drugs. I wonder if this person could emotionally connect to the STP & STM and the smell bone and then reverse the field interaction of Ca through the power of love? This would be a great experiment.

Mr. Keshe gave some of his personal experiences on this planet while talking about time. And that for the Soul there is "no time," because it is the creator of time. The STM through its desire to exist creates time. The Soul is the zero point of when our time starts. So thousands of years ago he started his time on this planet. And later when his Soul manifested as a Prophet, then as his Soul controls its own time, he told prophecies for the

future, that he himself will fulfill. Some of that time he spent as a stone waiting to fulfill his own prophecies and was watching the man pass by. Does this mean that as a stone he was consciously watching as man was developing and progressing in his understanding? Then he said, he knew where to manifest the STP, either within another Soul, or within (his own) Soul. Was it his STP that manifested within the Soul of Moses or Jesus. We tend to think of the STP as being unenlightened because of our current situation with humanity. But what if his STP was already enlightened, then it would have been the STP of Moses that was the problem, and not the STP of the "Soul of the Creator." This is where we need to learn more about Souls, and not think that all Souls are the same. Of course, their essence is the same, but what they manifest through their actions in physicality is different. And this is what we are trying to do now is to enlighten our own STP to lovingly join with the STM.

Just because we are trying to detach from the P does not mean we do not want to have anything to do with P. On the contrary, the P is where we can feel and act out our love for the Creator. Isn't this what Mitra is, the love of the Creator in the physical dimension. We are created out of the fields of the Creator. That's why he said, you are no different than the Creator - "I made man in the image of Myself" and I made Mitra to love the dimension of P. We are doing this work so that we can come in and out of P as we wish. When we get bored with the bliss of the Void, then we take another P so that we can feel and touch what we love. But not to be trapped by what we love. Unfortunately, I don't think the mind can really understand this. This is for the D of the Soul. And we all have to find our own Soul and live by it, then no Prophet or priest can abuse us. The Soul works out everything so wonderfully, it has no problems. It's the STP that gets enlightened and elevated to understand.

So where are we with the release of the KF technology (T) to public? A lot was said today about China, which I am sure everybody has guessed by now, is the government that KF has signed agreements with. We'll have the advantage of their huge structure to take care of the marketing of the products, which should grow to 30,000 in the next years. This organization will be larger than present day Amazon and reach the whole planet. This is what all of us KS have been waiting for. But it has not yet come out in public, and has been left up to the government to announce the collaboration with KF. But the question for a lot of us is, will the name of KF be allowed to break through the ban made by the pedophile king of Belgium and Fox News? He said there will be a new brand name on the products, but he did not say that KF will become a public name. The question is will KF continue to be hidden from public? We have to wait and see on this. Also he made the hint that they will allow the teachings to continue, and there were guarantees that the Thursday teaching will continue. In the past KF always held 51% control over any partnerships, but this has not been made clear yet. And what about Markray corporation? How much independence will remain with KF? We'll have to wait and see how the things develop over the next years. The most important thing is that the T starts to be manufactured on a massive scale to reach the whole planet. Just by the use of the T, the change will come.

More was said about how China is working towards world peace both in Africa and in the Middle East. It is using its economic power to influence nations to follow a peaceful way rather than the "gun policy" of the Americans and Israelis to sell more weapons. In the recent re-election of the Turkish president, China was heavily involved in the background using its economic power to bring peace in the Middle East. Let's see how the Chinese through their announcement of the agreements signed with KF will bring our organization out of obscurity and into the spotlight of peace, change, and true Space exploration - to go where no Man has gone before.

Other topics:

Time is relative - time starts with the STM - not with the "Big Bang";
Physical vision has a distance of 17 km to its horizon - Whereas the Soul's horizon is U & Unicoise;

You never get lost traveling in Space with STM & STP - always land in right spot;
By understanding structure of eye - understand whole process of Creation & death;
All creatures can amputate their limbs through STP and re-grow them;

Thanks for listening.

Quick Index

(The story of KF and its work is embracing a larger and larger structure of science and technology (T) and space. We have seen this with the monthly sessions of 'meeting with the Creator' and the others. We had a lot of success and much understanding in developing our systems and with the time you shared with us. We have reached a point that our doctors and scientists in the background are launching an international collaboration with the different wellness centers. (We are creating a new kind of session where you will meet with the Soul of the Creator, and with the wellness of the Man himself). This program will be different than then previous monthly sessions where we did only one session on a Friday. With the new sessions which will be promoted as a wellness program, it's for anyone to attend. It will be held over a 4 week period on July 7th, 14th, and 21st, and then a concluding session on the 28th. The session will run for 3 hours in each section).

(This is part of the programs we announced months ago, where we said we'll be able to reach anyone at any point for anything that they wish for. It could be for addiction, food, or any kind of wellness conditions they have. We think this will open a new dimension (D) in what we call, the 'Wellness of Man'. If you have psychological or physical problem, such as a tooth, or knee pain, or whatever, you can try and see how it gets better).

(We are stressing that we are not in the medical world, but rather communicating and transferring new technologies. These T will come into operation more or less, as of next week, and we'll try to reach everything people need at the same time. We are launching a mass trial for hundreds of people. We want this to be one of the pre-requisites and part of

the Space Technology development. Anybody can connect to our system at any point. The sessions will be 3 hours long and that's more than enough to complete the cycle. The following weeks will be to teach the body how to "tune itself" to (the systems). We want to find out how many we can reach and how far away they can be).

(People ask me constantly if I can help them with this or that. Now all you need are two sets of headphones. One to wear on your head, and the other to be placed where you want the energy of your Soul to be transferred to. (For example, if you have a knee problem you can place the second headphones on your knee). Or it can be for any other condition. Then we'll run a massive operation in the background from KF to reach you).

(Maybe you would like to taste water melon, or to fall in love. We want (to test) every combination. Somebody says, that they want to use it for their cancer. The only things is we are not working with the medical side, but if this is your wish, you can try it. It's the freedom of working with the wellness of the man. We want to know if we can reach you emotionally, and then whether or not you'll feel better in your life. Do you know where your emotion comes from?)

(You can go on the KF Store as we are the agent for this operation, but we are not running it. It is being run by the wellness centers and they are distributing a "Promotion Pack." It's for 3 sessions of 3 hours each over a period of 3 weeks. It's a breakthrough we are looking for).

(KF is now involved in a massive project with one of the world's leading nations. Whatever we have done over the past 10 years, and are doing now will go into the operation of our signed agreements with this national government. KF has become an organization beyond the imagination of many Knowledge Seekers (KS). But this is what you wanted, that we could reach every man on this planet with the knowledge and T. We have signed ourselves into it with one of the leading nations on this planet. As our agreements begin to flourish piece by piece, you'll become part of it).

(We have become part of the "One Nation" government in conjunction with another government. The signed agreements are for use of the technology for Peace. I have also signed this agreement with the Iranian government back in 2007 - 2008. The new agreement stipulates that the KF technology is used in exchange for Peace).

(We are doing this now on a larger scale. In the coming months you will come to know who we signed with as our major partner in the national and international operations. (These upcoming sessions will allow us to collaborate with the space agencies, (and being a new way for things to be done)).

(For those of you in the international News arena you may have heard about part of the agreements signed with the KF has been announced by Space Agencies internationally in the past couple weeks. It appears that it will be a national program until the KF comes into the national operation).

(We have come out of the cocoon of "keeping KF silent" created by European governments, and now a leading nation has backed us. And we'll see the results. The KF team is working very hard in the background going step by step and bringing everything in according to our agreements. This national government wants to make sure everything is secure and correct. So for the next year or two we'll be working with the governments scientists, step by step proving (the T)).

(Many KS will be called upon to join and be part of this new work. A number of KS have already been approached and are going through the transition to become part of this KF One Nation operation together with a government. You will be called upon based on your expertise to be part of the 500 strong KF Knowledge Seekers team. This will be part of this government's operation. As we grow, develop, and prove the technology step by step, through the tests, labs, officials, and the scientists, then we go to the next step. We've taken on a massive project and the first phases have already been approved by the government, and a number of KS have already started working on these projects. They know what they are doing and they're part of this new revolution and evolution in science).

(In the July sessions we want to understand how we can collectively feed the man in Space. For us colonization means that we can do everything we need up there on the Moon. It's not just to move somewhere and colonize it. We are not going to shuttle all the materials we need from Earth to Moon nor grow all our food. Instead, we'll be fed through the energies of the fields. Through the new T we'll reach you through the communication lines. We'll use all the knowledge we gained through the monthly sessions and what we'll learn from the July sessions to be able to supply the colony with all its needs. We are planning for hundreds of people in the colonies, not just a few scientists).

(Now you understand how important this July session is for all of us. You'll be participating in a large scale, multi-faceted dimension project of the KF, which will be implemented in the upcoming space program. As we said, we come to you when we need help, or to share our joys, and the technology. In the Addiction session many of you were able to stop bad habits. This showed us that we can reach our goal. And that we can change the pH in the body through the technology. And that we can make you happy. The T can serve multiple dimensions at the same time. This means if you are hungry, you can come to the 3 hour session and for example, only use a half an hour of it for food, and then use another part for pains in your body or something else. You can divide the time in the session how you want to use it).

(But then we want you to record what happened, whether you received what you wished for, and then tell us. Then it becomes a multi-structure understanding, covering different cultures, different nationalities, and different religions, which you all are part of. We'll see how our emotion changes during these 12 hours of session. Go to the KF website and sign yourself in for it. The KF account in Holland is totally closed. We'll supply links that you click on and they will direct you how to pay. It's the same if you are making donations. Please wait until we make further announcements in the best way to pay).

(Coming back to the teachings. Last week we taught about opening the "Second Curtain," or second vision, where you close your physical eyes and open the inner eye to the Soul. Many of you might have tried this, but you only saw darkness and no light. This is because you have to learn how to see and look at the light).

(As was said in the Introduction video, when you eat a banana, the vitamins in it act as a seed in your stomach (to attract the matching M fields from the environment). It's the same process you use with the Gans "Patches." You put one Gans Patch in the front and one in the back but they have a field gradient of say 1 to 3. Maybe you put the bigger Gans in the back. Then through the properties and characteristics of the plasma, the stronger tries to feed the weaker and then it covers it to bring it back into balance. This is the work of Creation, to always seek the balance, and not to be better than. It says, "I give for you to be equal to me." In this process we transfer energy through the body. You eat the banana and it converts to a Gans, and then it (uses the vitamins in the banana, to attract the same fields in the environment to be absorbed in the body)).

(We know the energies in the environment exist because we see it interacting with the "aura" of the body. The aura is not just the heat of the skin, it's all the energies, which the banana and the other things exchange. (The photos of auras show how it changes with different foods and emotions). It shows what you take, and what you give).

Now it's the same with your vision. You say, you look but you don't see anything. Or you only see dark. The secret to it, is that you have to set the seed for it in your emotion and in your Soul. As you heard in the Intro video we tested this with hundreds of you who came into Linz. Our doctors are continuously testing this with the people who go through different processes with them. You set the seed of, "I want to see my mother. Or I want to show love." And then you create that seed, that love, but not so strong that you overwhelm the love of the mother. You become that banana. That with it, you get the line of communication with the Soul of the mother. This is the secret of using the "Second Vision," or opening the Second Curtain).

(You can do this with hundreds of people at the same time. One secret that mankind has not understood, is about the structure of his eye and the color and shape of his eye. You have an eyeball, which is white, and then you have a different colored circle inside it, which is the shape of the Universe, or the shape of a plasma. Why is the colored part of your eye round? There is a reason for it. It absorbs certain strength fields in the D of the plasma. The color of your eye dictates the emotion you carry, and it dictates even the color of your skin and hair. It's not just for the vision and sight, it's also the line of the emotion).

(It's also why we have different cultures and mentalities among the nations. It's what made nations of us, and the cultural behaviors we created. A slight change in the tone of the eye color creates a different emotion. This has become part of the characteristics of life. Usually, when you look at your eye, you mainly see the colored part. But the most important part of your eyes are the white part, and not the colored part. The colored part

is for your physicality (P) and the white part, is part of your Soul. It's where the Soul transports and transmutes. It's where the Soul irrespective of color, always keeps its line of communication open).

(We always just look at the colored part of the eye. Our doctors only look at the (colored part) as a physical part of the eye. But when you dream you don't go through that channel, instead you go through the white part. (It travels through the white part in the space dimension of the Soul. This is why I keep on telling you, that you live a two dimensional life without knowing it. The eye of the man looks at the person in front. The Soul of the Man (STM) looks through the white part of the eye and sees the Soul of the person).

(We have ignored the most important part of our lives. But what happens to blind people, or those who only have the white part of the eye? What happens to our children when they are born? Now you understand how much man ignores all the time, the second part of his life).

(When you close your eyes by bringing the "shutters" down, you close the D of physicality, and not the Soul. This is why sometimes we remember our dreams and see them visually. It's because some of the fields get absorbed as they go through the colored part of the eye. That's why you remember the dream?)

(You can do this exercise. The next time we ask you to close your eyes, lift the colored part of the eyeballs up, so that most of the white is filling the eye socket. Then set the seed in your emotion and the Soul in a way that you want to see your mother, or your whole family. Your brother may be half dead or half alive, or some members are on the Moon, Earth, Africa, or some in Asia. Then you understand that your Soul has the power to do multiple tasks at the same time. (Actually, it's not multitasking, rather it is "Always tasking," (it is able to be busy all the time). That's the job of the Soul).

(This is what happens when you are about to do something, and suddenly somebody pulls you back. That "somebody" is your Soul, and it looks through the white part of eye and is aware of what the P doesn't see. In its openness, the Soul can instruct, and interact with your physical D, and pull it back if it needs to. This is how you give yourself cancer, you do it through your emotion and Soul).

(Every part of the body of the man is created with a purpose, even every single hair. Your liver absorbs multi-faceted dimensions of energies, you call it, different proteins or whatever. The eye of the man has multi-faceted operations. The color part of the eye interacts with the P and the white part is the communication line of the Soul. When you die, your eye usually moves upwards to the top to allow the Soul to depart. Physicality is of no more use to it).

(This is why many people in coma move to the same position. This is why during the session for elevating the Soul of abused children, we taught you how to use the "Second Eye," because through it you were able to reach the Soul of the children. This is why

babies always look deep. "The flicking of the eye is for the physical part. And understanding to register the Totality.")

(The "World of imagination" is made the same way. We stare off into the distance, because we allow D of physicality imagination. This is how we use our eyes. Understand that nothing is coincidental).

(This is the generation the computer game. I played with the first computer games just before I went to University, when they first came out. Today it has developed into a multi structure of games. You can play a game with yourself. First set your mind and pre-determine that you are going to win the game you are going to play, and you will win. This means that you can use the structure of the Soul to control the computer game. This is why some people are very good at it. Without knowing it, they fix their vision through the Soul and create energies, which set them in that direction. I still do this. (I set my mind to do the impossible before the game, and then it does it. So the M fields of electronics can be manipulated, and you can transfer energy, information, and emotion (to it). But you cannot harm it). You can only elevate it. And you can only receive to elevate your own Soul.

(When we allowed you to see the "Soul of the Christ," it was because you were humble enough to accept him as a higher order of energy, and you set the love in your Soul and received it. That's the secret of the game. (The taste of the "banana") is that love of your Soul for the Christ. You don't see yourself as lower, instead you set a small seed of love in your Soul, and that connects to him. You do the same thing to see your mother, or to go to another place in the U. "I'll see you on the dark side of the Moon.")

(In the coming time, I'll teach you how to do this. You'll be able to do it with pinpoint accuracy, better than the satellite system of today, which is only accurate within 5 centimeter. With the Soul you'll be "dead on" the point every time. When you want to go New York to Tehran to meet your mother, first you create the love of the mother within your Soul, and the pleasure she gives you. When you understand the relationship and the field strength, and that you want to cuddle your mom in your arms, then when you arrive in Tehran you will. (??) The emotional distance, in conjunction with the STP, dictates the position).

(The system of taking energy (is used) to control the STP, or the Spirit, and that will dictate the position and distance. If you want to go to the most beautiful restaurant where you ate 20 years before, but now you don't know anybody in Tehran, (the system) will use the Soul of the others who have been there. It's like when you ask people on the street, where such and such a shop is located. Now you interact with the Souls of those who have been there).

(It's like when we put a magnet amongst other magnets, they all move to accommodate the one. You establish that connection with them, because you want to be in that position. The others indicate to you how much they will move, and what place (they have made) for you. It's the same way as when you put a magnet amongst other magnets).

(When you travel through the STM & STP you never get lost and you always land where you should. But you have to train yourself how to do it. The next time you walk on the street, sit in front of your cat, hold your mother, or sit in front of a flower and enjoy its beauty, try to look through the white part of your eyes and see the Soul at the same time. I've told you many times, "thy shall not lie." Then you'll understand how you are living a schizophrenic life of P in the fields of the U. And when you close your eyes you call it a dream. But you've been a dreamer all your life, but it's the dream of reality, and not the dream of what we call a dream, which is really fantasy).

(The horizon of our vision extends about 17 kilometers give or take a little. But the vision of your Soul is the whole U and Unicose. Now you understand how to do the tricks, so that when you join us in July, you'll know where and how to look through your eyes. You'll understand how to dimensionalize the energy through the Soul. And then through D of emotion, you can position the P. (Maybe there are some of you who don't like to have that "little lump" somewhere on your body. Then in July you can concentrate on it, and see if that little lump by the following July has disappeared. It won't be a coincidence. Because you will have learned how to transfer the Soul and the emotion of physicality together, to where the P manifests itself).

(When you travel in deep space without a "monkey suit," you will have learned to use the fields of the U to manifest what is needed for that position. Now when we wear the "Monkey Suit" in space it can dissolve or change when we go to the next solar system for example. Maybe the material used to make the Suit in this solar system is what we call plastic. But in the solar system next door, its field strength might be at the level of the gaseous state. Then what's going to happen to the body inside the Suit when it turns into a gas?) Now you understand why man needs to learn how to use of the field energy of the Soul.

(This knowledge explains why when people were close to death they say they see a light. This is because it's the energies of the STM and STP cross each other. The interaction of two fields creates that light, and that light position creates a D of peace. That's why they always say it was so peaceful. Yes, because you were cocooned within the energy of it. You allowed it to expand and cover yourself).

(By understanding the structure of your eye, we understand the whole process of Creation and death. There's even more, you can understand why you have a spinal cord and why your spine and neural system have a white, or greenish color. And why it goes down the body to the ground. It's like a volcano. You have surrounded it with a skull. It has nowhere to go for communication but down the line or the spine to the ground. It doesn't matter if you walk on 2 or 4 legs).

(Even animals that don't have a bone structure, use the Calcium (Ca) structure in their body to transfer their energy through the Amino Acid (AA). It's connected to the Ca. Therefore, you don't need a spine in Space. The Ca in part of the space will change to Magnesium (or another element) to create the same communication line. (There are some

places in the U where man will not be able to transfer from the energy state into the physical matter state to become a body. He won't be able to manifest P because the field strength is as such, that it can lead to the opening of the plasma of the STM. The plasma continuously creates layers to protect itself, and to keep its integrity within its own center).

(Now you understand how you as a body have lived this double life of the Soul and P. You should even understand how the position of your eyes, and the volume of the colored part of the eye, in respect to the white part, dictates your behavior, emotion, openness, and what meaning you have. (It plays a big role in many things)).

(The first thing you do when you interact with people is to look into their eyes, and see their Soul. It doesn't matter if they're wearing dark or light glasses. The physicality has no dimension when it comes to the position of the Soul. The knowledge being given to you is deep enough for you to gradually understand, that in no place or time do you need the sight, or need to have the D of P to live, that is, if you manage to understand the fields of your existence).

(One atom of Hydrogen can cover the whole U. It's the same with the seed of love. This is how the Creator created. He loves what He has within Himself. And we the creations starve for it. (We do our best on Earth so that when we finished with P, we are loved and will go to heaven, which means, the closeness to His Soul. But it is within us, and within our Soul. (If we learn to be the "seed" with the banana which attracts the energies, which in a way, is being the love and care, then we'll understand the principle of Mitra. We'll have no time to do anything but think, speak and act good. The only thing we will have time for is to act good).

(This is the importance of your eye. Because once you learn, that the colored and the white parts have to operate the same, then you cannot lie through the colored part, because the Soul will tell the truth. This is how what I said last week, when that Soul was standing in front of me, I knew I was being lied to. The Soul told me I was being betrayed).

(Life and in any dimension has both its physical and Soul interactions. It doesn't matter where you appear in the U. This principle does not change if you are on Earth, Moon, or planet Zeus, or within the Soul of the Creator itself. Then you understand how Moses lied. He kept the Commandment about lying out, so that he could lie himself).

(Now you understand a lot of things about yourself. This time when you close your eyes and you say, "I see nothing," understand that you cannot have a flower if you don't sow the seed for the flower. And you also have to learn how to grow that seed to become a flower. You have to re-teach yourself how I see the physical with the eye of the Soul. Many people call it the "Third Eye," but in fact it's your own eye). It's what you ignored.

(Gradually as we go forward you'll learn through the teaching how to transmute this energy out to create what you feel like creating. You can make a cocoon, or a shelter, or

an envelope of the plasma. Then you shall see how it will change your life. (Actually, Life only has one dimension, and not two. The Single Dimension comes from the collaboration of the physical life with the Soul at the same time).

(Gradually we are bringing you to be both the passengers of the physical UFOs, and the STM as an energy plasma of the man. You may ask, then why do we need to learn about UFOs, rockets, and all the other things we like to create. It's because there is a pleasure in everything (we do). Very soon you'll get tired of just seeing everything without tangibility and you'll long to come back for a while into the D of P and be able to feel and touch what you love).

Don't forget you are no different than the Creator. He said, "I made man in the image of Myself." I made Mitra to love the dimension of physicality. Now you understand, that you are no different. (You have to learn how to teach yourself (about your Self). There are no guidelines, and there are no Prophets to teach you how to do it, so that they can abuse you next time).

(This time when you close your eyes, (through the whites of your eyes) you can reach the Soul of the abused child, or move the emotion of the world president to be a peaceful president. But first create that love within yourself, then you'll be able to elevate the child and move the president. As it was written, even the stone has a Soul. If you find the strength of the Soul of that stone, if you wish you can live within it).

(I have done it many times. (As a stone I sat for centuries and watched the man passing by. Life doesn't have to be active constantly. You don't have to be doing something all the time. When you want to do something, then Life is there to enjoy the time. And when you have a dimension of the Soul, there is "no time," it's always zero. It's you who decides (to start time) from the point of your manifestation and action. It can never be late, because you are the starter of time. (It's relative to the observer). Daytime in Japan starts 6 to 10 hours ahead the man in Europe, so while you're still asleep, the others across the world are doing things. So it's relative).

(It's the same with the STM. Wherever you start (your life, that is your zero point). I manifested myself at one point and thousands of years later at another point in time, which I promised I would be at. I did the same (for another period of time), in another name. And then I became a stone and watched the time pass by. Later, I fulfilled my promises, because I knew where to manifest the STP within another Soul, or within the Soul of itself).

(Now you understand the biggest magic and how many Prophets are manifested. It's the same Soul. The promise was made at one time, and later I fulfilled my own promises. I did what was prophesized to do. It's the same with you. You decide. This is the manifestation of the Soul through the white part of your eye. Next time when you close your eyes don't say, "I don't see anything." Of course you don't see anything. But you didn't take that banana, did you? And once you have that banana, all the energies of the bananas in the Universe will target you, and connect to you, and you can take what you

need from them. It's the same when you connect to the Soul of one abused child, because that Soul is connected to many other abused children, and they all can receive from you. Now you understand how it works. But it has to be where you are doing nothing other than giving, and not taking.

End of Quick Index Part 1 - 489 KSW June 8 2023

In July the teachings will start at a new time.

Q: (A KS made Aluminum Gans and its amino acid (AA), and wants to use its fields to help someone suffering from Aluminum poisoning. He thinks the fields of the Aluminum AA will interlock with fields of the cells that are poisoned, and balance them). This would also detach its fields from the cells and the body would have an easier time removing it. Is this deduction close to what would happen?

K- Theoretically, you're correct. (But in reality, never touch Aluminum, Lead, Mercury and a couple other materials at all. These should never be used by KS. You should never produce these Gans's. Do not produce them, even if you want to store them somewhere. Because of how these Gans field plasmas are constructed and how they interact with Mg and other fields present, have an affinity to attach to, and solidify this matter in the brain. Mercury does the same thing. So, even though theoretically you're correct, physically I advise you with the knowledge we have to never, ever make these Gans's. Because they are on the field strength of the part of the emotions of the man).

(You may think you are removing the poison, but you can actually be adding more misery into the whole process. In a physical human body on this planet you should never make these 3 Gans's. If you already made them, then put them in a container of themselves and bury it deep in the ground. And if you can, build a concrete box around it so that it stays there for a long, long, long time. And that it doesn't seep out to harm other creatures on or inside this planet. So, my advice to you is, don't even think about making them).

(Do not use these Gans's because their field strength is very close to some of the field strengths of the AA of the brain and emotion. Aluminum poisoning or when you have extra Aluminum fields in the body can cause dementia, internal bleeding, blindness, and loss of orientation).

We know this especially from the Russian time of the Eastern Bloc countries. Prior to 1990s they used Aluminum in their rat poison and for disinfecting silos that stored rice, grain, and flour for human consumption. It ended up that all the workers who used to spray these chemicals have had massive (health) problems. They had special teams for disinfecting and all the workers on these teams have shown long term and huge health problems. So, don't even go near these Gans's in any shape or form).

(Mercury and Lead are the most horrendous ones, because they have a strength of the emotion. In past years there was a member of the US Senate who pushed for investigation of the mercury used in the 3 MMR vaccinations for children by pharmaceuticals. This

was hidden from public, but the vaccine companies had to confess that they were using Mercury in the 3 MMR injections for children. This brought a lot of problems for the children and their families. There is a White House report on it. Now they say they produce it without using mercury, but still the combination of the chemicals themselves, have the same effect on the children because they combine all three injections in one shot. This is too much for the children's system to handle).

(This has become a discussion amongst a lot of world scientists, of whether or not to do the MMR injections in the first year or two of the child's life. They want to delay it until puberty. A lot of doctors are supporting this because of their own children. They are not ?? giving their own children the MMR in the first cycle of life, as they do now. Because there have been a lot of papers that connect the injections with a lot of other problems. So many doctors have moved to doing the MMR after the age of 12 to 14).

(Recently Mr. Keshe was in a meeting and he explained to them, that even when you inject at puberty, this is also a new cycle in the life, when the body goes through many changes. So if you hit this new cycle with the injections what effects will it have? Just because you delayed it doesn't mean (it's safe). We don't know yet. Will we see more aggressive children, or other things happening because this is a vulnerable point when changes are taking place? Originally, it all had to do with mercury, which when injected became a Gans of it in the brain and it touches the emotion. It permanently changes the brain operation. In all the doctors I have talked to over the years, nobody seems to understand why they have to put these 3 injections together. They were happy with injecting them individually. It's just pharmaceuticals make a lot of money out of it. And very large percentage of people and families pay for it for rest of their lives).

This person presented how to make Al Gans on Rick's program. Mr. Keshe asked him to remove that part from his recording so people don't try to make these Gans's. Another KS commented on how bad it was when he made the Gans of Aluminum.

(Just forget about making Al Gans, because we know the result and it's not good. Gans of Plutonium is another bad one and certain isotopes. But Gans of Uranium is a very good one. Gans of Uranium in Isotopes 235 is extremely valuable. Some isotopes of Plutonium has the same effect as mercury. The effect of the energy of the isotopes of Plutonium is to clog up the sperm in men, it sticks them together. Then it has no genetic effect. We keep away from making Gans of certain higher order radioactive materials. Years ago I made Plutonium Gans's and saw its effects and its field strength. It creates emotional interaction with Lead, Mercury and Aluminum).

(The KS who talked with Mr. Keshe some weeks ago about his bio-fermentation project in Mexico asked again what he thought of it. Mr. Keshe is interested but need 6 months to a years to first handle the project he is working on now. It's possible to do a very large scale operation with the government KF is collaborating with. It would need a huge investment and go on an international scale).

(South America became a fertile land by the original settlers, because they just burned their waste and the ashes became fertilizers. Now we call those ashes "Nano" materials. The locals know that it works, but they don't know scientifically how it works. Now we understand it scientifically. The material you burn becomes a perfect Nano material for absorbing energy. As it is black, it holds energy. But because the ash is made from a component of the same vegetation and fruits, it has the right field strength to give the energy back to it. When you make your biomass from tomato roots, leaves, and whatever, and then make a Gans of it, or the charcoal of it, it's a Nano structure of the same field strength, of for example the tomato. Then the next harvest grows better because the energy seed of it is already there).

(The biomass process the KS is doing produces Hydrogen gas, and Mr. Keshe said, he should compress the gas and give it back to the farmers, they will love you for it, because of the high cost of fuel needed for farming. Also by compressing the gas the whole process will shorten, if you takes 48 hours then it will drop to 18 hours. The more gas you pull, the more fermentation you create).

Q: (A KS developed a very heightened sense of smell and someone suggested she ask Mr. Keshe about it. She perceives the smell on people and even on the clothes of her children when they come home. Sometimes her perception of the smells are so strong she feels sick from it. She says it started after the vaccination. Then Mr. Keshe asked some questions and determined that it was from the Corona, which she did test positive for).

K- (A very large percentage of people who had the Corona, are also having this problem you speak of. You're not the only one. The reason for it is very simple I'll use the whiteboard to explain it).

(In the center of head above the nose there is a very fine bone structure that sits in a plasma cavity. When you smell, the air goes past this bone and it vibrates, which then dictates what you smell. Each smell has a field strength, and in touching this bone makes it vibrate. Through this vibration the brain recognizes the smell. And this is the process of how we smell).

(For some people who have had a head on collusion with their cars, this bone can get stuck to one side of the wall of the cavity, and they lose their sense of smell. As Corona is a Calcium (Ca) based virus, most probably you got your Corona through breathing and as it went past this bone it attached to it. It's like a very fine Ca gel, (?? on the bone or it might not exactly be a bone), but let's call it the "smell bone." The smell bone has picked up a mass of Ca. (This has changed the sensitivity in this area, and probably has moved the bone to one side or the other).

(The energy mass of Ca might stay with you for six months to 2 years. We see people now gradually losing this mass after a year or two, and their smell goes back to normal. A lot of people couldn't smell after the Corona, because of this (build up) of Ca. It has a Corona connection. And this is how it's explained).

(Usually the Gans's can help. Or you just have to wait until it goes back on its own. Gradually this Ca mass will lose its energy and it frees up the bone. Other options would be to produce a Gans that can deplete its energy).

The KS said she doesn't have the problem of losing smell, but that it is too sensitive and sometimes the smells overwhelm her. Mr. Keshe said, yes, that's because the bone has picked up this energy mass and it has become more sensitive. He said, there was a lady who could smell a particular shoe in the back of the house when she entered it. This happened after she got the Corona, but now it's getting better.

(This bone vibration is very sensitive. I think it can smell 3,000 different smells and it has a memory bank in the brain. The minute it moves to a position, brain recognizes it, and it has a connection to emotion as well. It's 100% sure you have been loaded by Ca energy in this bone. You can wait, and it might go away in a year or even up to 3 years. We've seen a lot of people who lost their smell totally, because the bone got so heavily loaded with Ca energy that it stuck to the side of the cavity. Gradually you'll get it back, or you make a patch of CO₂ with its AA and just place it between your eyes and your forehead, where this bone sits. You might be able to release some of the energy, and you'll get your smell back).

(Don't go anywhere near Ca Gans patches, as you have already interacted with the Ca on the bone. We see a lot of these kind of side effects from the Corona coming out now. He did not recommend drinking the Gans water, but rubbing a little of it inside your nostrils so the fields come into contact with the bone. If you use the Ca Gans you could reload the bone and make it worse).

(This means that you probably got the Corona through your nostrils, not through the mouth, and it has transferred its Ca based energy to the bone. In other cases of Corona we saw calcification of the lungs and in the brain and other places. This energy has calcified in your nose. If it has calcified and become part of (the bone), then you'll carry it for the rest of your life. If it's just an energy, then maybe in the short time you'll get rid of it).

Q: You taught us that when we sleep the STM expands and can go anywhere in the U, but at the same time it remains connected to our physical body and that allows us to have physical sensations during our dreams. Could you give us more details about this connection between the STM and the physical body and why the transmutation doesn't occur, even when we are dreaming? Is it that the fields of the emotion of fear prevail over the other Souls, even when we are sleeping?

K- (No, it is not because of the fear. It has to do with the STP and ?? it's Inertia and Mass. Going through transmutation is a different dimension than when you dream. During transmutation the Soul expands and envelopes the whole body. But when you dream the Soul escapes out only through a small peep hole. (So it's a totally different situation). If in your dream time you can get your Soul to expand over the whole P then you can transmute. Christ did this on the cross. (Does he mean that Christ went out the peep hole with his Soul and then was able to envelope the whole body?).

(It's in our brain, and in the system structure of our Soul, and man used to do it (millions of years ago during the dinosaur time). He could go out the peep hole with his Soul and (with the ?? STP encircle the arm or leg and with M fields amputate it to escape where he was trapped). But, now we have forgotten it, and we don't use it. It's very much the same like reptiles, when they get their tails trapped. They can drop the tail and get out. What we do is create a high level of energy, which is a field energy, and not matter state energy, and then we separate the fields. We can literally loosen all the muscles and bones at a given line, and then the separation comes).

(The trick is to create this field energy, and in a very high temperature energy transfer. Man used to be able to do this exactly like reptiles do. Every mammal and creature has this capability, even the plants. Plants can amputate or cut off a piece of themselves and grow it somewhere else, or re-grow next to themselves. But we don't do this anymore, and that's why we don't remember our dreams, because we go through that peep hole).

(This is what we were teaching today. You look through the sight, (white of the eyes) and then you bring the STP & STM to the point you want to amputate and you create the separation. The beauty of it is, because of the way it's done later on you grow the arm back again).

"But I can put you in the dream, create the plasma around you (expand the Soul around your P), and you'll ?? join your dream. It's very easy to do, extremely easy to do."

No information regarding the element Indium.

Q: (If the key to the success of transmutation is elevation of the Soul, then that's not an easy thing to do).

K- It's more expansion than elevation, there's a difference.

Q: How will millions of people be able to raise their Souls to participate in the colonization of the Moon, for example?

K- Oh, we'll give you a helping hand, don't worry. It's called the Vertical Unit. We don't transmute you in the Vertical Unit system. We expand your Soul, and you do the rest yourself. (But it will be easy).

(Elevating the Soul is not like going in an elevator, that you go from one level to the next. In Plasma T terminology elevation comes as "enlightenment." (If you understood the story of the banana, (getting the energy from it ??) then you should have understood how to enlighten yourself and in which way).

(This goes back to what I told you about when you go to China through the Soul you'll speak Chinese, and you'll understand the essence and emotion of the language and not just the dictionary meaning. It is elevation of the Soul and not getting on an elevator, but

expanding the Soul to get enlightened. Then I think you understand what it means and how you have to work with it).

Q: Can we make dead planets livable utilizing the MaGrav Plasma Science and Technology?

K- As long as you can make a dome there, then yes. There are no dead planets, you've got to find out what lives there. There is no corner in this U that does not have an active plasma as a life. When you have Gravity and Inertia interacting then life is the result).

(For thousands of years we drank the waters of this planet and sometimes we got poisoned, or got all sorts of diseases because we didn't understand it came through the water. When we got educated and enlightened in the sciences and developed microscopes, then we found out there are bacteria's in the water. Through our lack of understanding we were ignorant to their existence. It's the same now with Space and what we have to discover about it. We have to tap into that river of knowledge, and see which part we haven't understood? That the life itself exists in that time and place we thought was empty).

(When you go hiking they tell you not to drink from a stream, but instead drink at the beginning of a stream, which is a spring. Because below the spring the water gets contaminated by the deer, rats, and other animals. Down from the spring other energies have been added to it. It's the same in the U. You have to find out what lives in the flowing rivers of M fields. Even if it seems like to you that there is no life there because there is no planet there, it could be a colony of what you call, Covid plasma energies).

(There is no place in the U where there is no life. You are in a bigger life, but you cannot observe it so you think it doesn't exist. It's really because you are too small to observe it. There are no dead planets. If you find an empty one you can colonize it, but beware of what's underneath you).

(This colonization project will bring a lot of interesting data and new research and understanding. We are preparing for colonization and it has to be in a real state stage. I'm sure within next few months you will hear more about the KF program and other satellites colonization. If things go the right way the project should happen within the next two years, but our conservative people say 8 to 10 years. But the technology development is so advanced, that two years or even a year from now is quite feasible. Once the governments allow the new plasma gravitational system to replace the rocket propulsion space technology there will be an evolution in the whole space industry. We'll see this announcement within the next 12 months maybe much sooner).

If everything goes the way it's set, we will see a total change in the space technology of the present time. It's not that we think it might happen, this is what we have signed ourselves in, to happen. So, Musk and NASA will become part of the history books of the space technology within a few months, because other governments have decided enough time has been wasted in rocket propulsion.

(It hasn't been wasted, but we have reached the limitation of carrying cargo and food and what is needed to survive. It's time to look at the new understanding. The new way cannot be under the manmade systems, it has to be a replication of how the Universal work. A replication of how life exists in multi-faceted and multi-direction dimensions like planet Earth, where we move, create heat, food, and life. And we create the D of emotion and presence).

(If a star can transfer energy that becomes a planet with all its different facets, then it cannot be that difficult to replicate it, once we understand the process. And we at KF have understood and replicated the process. Once this becomes known it will change. We were silenced by the Belgians to abuse and steal. Now other nations have broken rank, and this technology has opened up. Very soon you will hear about it).

(The collaboration of KF with the most powerful nation on Earth, has been signed and sealed. And what you supported KF all these years for will come to be, irrespective of a bunch of pedophiles in Belgium, and the head of their nation and his servants and the police force. But it was a good thing, because it allowed us to correct and develop a lot of things).

Q: (Cities normally take their water from rivers and treat them with flocculent Aluminum to precipitate the contaminants. But this Aluminum ends up being a secondary contaminate and they can't get rid of all the chemicals). All these waters are not really good for people to drink, are they?

K- (In the places where they (recycle the water through these kind of water treatment processes) we see certain collective diseases. We look at the effects on the local and national structures on the society which uses this water. For instance, what kind of diseases and behavior come from it. (There was a big study for the city of London and how the use of birth control pills effected the birth rates. There was an expansive contraceptive use by women, and through recycling the sewage water and then feeding it back into the drinking water supply of the city has reduced the sperm count in men. These are some of the problems that can occur. Recycled water is also used a lot in farming and then it goes directly into the food chain. But scientists don't understand the plasmatic connection of how it occurs. The new T will change a lot of things in the coming time. KF is not the only alternative. There are others, like what we heard from our friend in Mexico. But we have to understand how to use it correctly).

Q: Personally I produce quite a bit of Gans Water daily, and I've offered this process to the Water Treatment Plant here, but they're not interested in doing it.

K- Because they have to spend money on it to do it. This is one of the problems for changing the course of humanity. If one country or one government will do it and show all the benefits of it, then they'll all jump on it. This breakthrough is important.

Q: Up to around 200 people come along every month to fetch the Gans Water. Once they drink and taste it they're hooked. They can't drink any other water, even from deep wells, or whatever.

K- (That's because you created an emotional connection with this Gans water. Especially if you use the CO2 Gans because it has a certain amount of Zn in it, so affects the emotion. We saw this with Lisa and Jim in Australia with their lettuces. People asked specifically for their lettuce. It would be good to get it in the supermarkets then everybody can have access to it. They like it because their body receives what it is short of. The body goes for it subconsciously).

Q: You said a month ago that world peace would be proclaimed in the coming hours days. Can you tell us more about that?

K- (The peace has been settled. But you have to look at how things are happening in different ways. The fundamental basis for world peace has been settled. So much so, that the Chinese have taken the lead on it, and their economical power is dictating it).

(The Middle East has been a "hot spot" for war over the past 1,500 years, and now it's under the strong influence of the Americans. The same thing was going on in Africa for a long time between the Communists and the others. This situation has been settled by the Chinese under the beautiful leadership of president Xi of China. They pushed for development, while at the same time standing on the sideline, without taking sides. They pushed with their mighty economic power, by influencing those who purchase from them. This is the new way to find a solution for peace through the power of commerce).

(It's the opposite way of how the Americans have been pushing for war between Saudi Arabia and their neighbors like Iran. It's a very lucrative business for the Americans and Israelis. They sold as many weapons as they could to the Saudis, who lined their pockets with the "black gold," meaning oil. But then the Chinese came in with a different approach. They understood that stability and growth comes from peace and having a continuous supply of resources from the Middle East and Persian Gulf. The so called, "wisdom of the military approach" did not work. Rather the wisdom of peaceful financial investment and collaboration does work. So much so, that after about 8 years Iran has opened its embassy and consul in Saudi Arabia this week. The same thing is happening in the United Arab Emirates, where they are canceling a number of military agreements with the Americans in favor of collaboration and bigger expansion with China. China has injected a massive 100 billion dollars in Iranian gas lines, because they want to make sure these gas lines are never damaged. To do this they needed peace and cooperation with the Saudis).

(The same pattern is happening in Africa. And 20 new nations are lining up to join the BRICS in their next months meeting. This will devalue the US dollar. This has pushed the Americans to change their direction, but maybe only for the short term to try to get those nations back. But in the long term they have lost ground to the Chinese. President Xi is very prudent in his way of doing things. They push with their massive construction

companies to give the nations what they need. China might lose in the short term, but it will guarantee long term success).

(The same will happen in Ukraine very soon, in the next few months. Vatican will pay heavily for their interference in Ukraine. We've seen it even in the past few days with the breaking up of a dam in Ukraine, either by accident or deliberately. There was a huge plan by the Western allies to push the war into (?? Russia itself) and maybe begin another war. A huge number of soldiers and military hardware have been washed down ?? But they don't tell us this in the Western media. The official military reports shows hundreds and thousands of vehicles have washed down the line. All their promises of getting back ?? will now become a bigger danger for other things. China will be the beneficiary of the loss of this dam, because they'll rebuild it. No other government has the financial backing and the materials needed to rebuild this dam, except China. It will cost billions of dollars).

(With KF new technologies especially in agriculture and the support for the Chinese, China will soon replace Ukraine as a grain breadbasket. Maybe by 2030 China will become an exporter of grain replacing Ukraine. This is the biggest mistake Vatican made in encouraging this war. The Americans will also pay, and even more heavily, because the Chinese grain will not be GMO. The KF will have a huge hand in this development. By around the 2030s China will become one of the major suppliers of beautiful, natural, and most importantly Non-GMO seeds. This will push the Americans back, because of how they have indebted so many farmers around the world, especially in Africa and Asia, by manipulating them to buy GMO seeds. Every year they have to buy new seeds. The new seeds with the help of plasma T will bring a lot of relief to farmers).

(In general, we'll see a massive change. But it has to be fundamental, it cannot be just talk. We also know that situations like Taiwan will be resolved by Chinese in a very amicable way. The forces against China are trying to use it as a "hot spot." Taiwan should become part of the mainland China in the next 5 to 7 years).

(The Chinese don't create war to get what they want. Instead, they use wisdom, and do things in a wise way. In the long term China will be the only beneficiary. They'll use their gain for world peace. The seed for world peace has been set by the Chinese leadership and you will see it. They tell me that I support the Chinese a lot with this and that. But the truth is we sit where the reality is and observe what is happening. We've been part of the structure and we'll see how the changes come in. The news you hear through the Western newspapers and media is all a bunch of lies. This is the only way they can keep their "colonial power" alive, is through lying to their readers. But the fact is, there are no colonies left).

(Back around 2011 a Chinese ambassador once told me, that now colonization comes through science. He said, if we get hold of scientists like you, then we become more successful, because you are like an "oil well." No land can replace the new technology and sciences that scientists like you bring. That "oil well" has landed in China. We see all the angles of the development and it's based on fairness and development of the peace,

and not on military might. More money can be made out of peace, than the few factories that make guns. The only people who make money, especially in the West, are the Church and the gun manufacturers. They kill, and the rest of the family pays the Church every week to pray).

(Now all this has come to an end. The new way of science and T has started and it's backed by the most powerful nation in the world. You as citizens see and realize it gradually in the coming time).

Q: Can you still keep the promise of delivering the Compact Units in the second quarter due to the current situation?

K- We are trying to, yes. (If not the second, then the third quarter. We are going for mass production. By end of June or early in the third quarter we'll start shipping everything out. This will be done before we close all our operations in Europe. Yes, you can still make orders).

(The product range will increase massively in the next 12 months up to two years. We are moving it out of the hands of KF, but we'll still be part of the organization. This way we can concentrate on research and development, and our partners will do the commercialization and marketing).

(We made a lot of the small things just to show that the T works. Now we'll go from a few hundred products to tens of thousands. (It was not clear if KF logo will appear on the products or the partners, but when we see it, we'll know KF is part of it). We've gone that way. (Does this mean KF has less control over the products ??) We are in the development of a space science technology, and not in marketing. We only did that to show the technology is correct and applicable).

(You will see a new brand (name??) and a new structure of marketing. In the past we used KS but that didn't work out. Now we put it in the hands of professionals, and in the hands of a government to launch the KF products. It's not in our hands. We are major part of the ownership and we are happy with it. It allows our team to do what we came here for, and that is to bring the change through new technologies). (He once said he wanted to keep KF free and independent. What does this mean in regards to the Chinese government? How independent will KF be in the future?)

(Collectively we'll see European, American, Asian, and in most probably African product depots in a very large scale, even bigger than Amazon in the next 5 years. We have signed ourselves to this agreement, so it's not a talk that we might do. It just needs time to go through the process).

(The teachings will carry on as it is (now). The time of the teaching will change, because we are moving our headquarters and operations. The product range of KF will be under a new banner (a new name ??) of a new organization, and it will appear internationally. We are being backed now with a massive structure. We have signed and sealed agreements.

It's just that we have to learn how to operate within this new environment, and they have to learn how to adjust themselves to the new technologies. It's a growing process that was started weeks ago. Our own teams are learning how to become part of it, and organize themselves to be in it).

(KF Technology will bypass Apple, Microsoft and the rest in the next 5 to 10 years, because it touches everything from agriculture to energy, food, space, and health. But we have to be very prudent and our partners are very careful (how to bring it about). Step by step we have to confirm that we can deliver it. The product range should reach to around 30,000 in next two years. It's more or less very feasible. And everything will carry the Ethos of the KF in the process).

(We have emerged out of obscurity in a very big way. Maybe the cause of losing so much over the past 2 years has brought us to where we are now. I presume the many of you can guess where we are going. We are committed and have signed the agreements and when I sign an agreement, I stay to it. Without a doubt in the next few years we'll become one of the biggest corporations in the world. We are part of a bigger organization. (?? And in that organization we are only involved in research and development of the new technologies and new structures)).

(It's thanks to all of you and those who supported us in the background. Many of you will be called upon to join us. We have kept track of everyone who's done something with the T. But it's not just because you made one Gans, or did a good things, or whatever. You have to be an expert in what you do and bring that into the KF so that we can flourish. The teachings will not stop. We have guarantees that the teachings will carry on. But the product range and its delivery will merge into this one organization in the next year or two).

Q: Will Turkey have a new position regarding peace?

K- (Turkey has taken a very delicate position. There is a long explanation you can read in the transcript about this. But it seems that the KS who helped get the Turkish president re-elected is a good friend of Mr. Keshe. The background support came through China in regards to some kind of financial backing. I think he also had to agree to let go of some of his dealings with the Americans and Israelis. But he has cancer so it is unknown how long he can stay in office. The Americans will try to entice him away, but he is important for peace in the Middle East. China played a massive role in this process for peace).

Q: What does it mean when someone has two different colored eyes? And what does bloodshot eyes mean for the Soul?

K- (About the blood shot eyes you have to ask the person themselves. When there are two different colors of the eyes usually it means the person has two different characters, or personalities. They're usually very pleasant people to be with. I have a couple of friends who are like this. I used to ask them things for example, if they had a blue and a green eye, to close the blue one, and say what the green one is thinking for the same

emotion. Even though they may say it's the same, you yourself have observed the story changed. (So, you know they have different emotions)).

(Maybe you remember what we said about the Chinese eyes looking in different directions. But with them it is emotional. With the people that have 2 different eye colors, the blue eye might love you and the green eye hate you. You never know which one you are with).

(The drawing on the whiteboard in today's teaching shows that we'll start seeing the real side effects of the Corona. It's important to connect and understand it. There are changes with the smell, behavior, new cancers, and other new conditions that we will have to learn to live with. But with the Corona we have found new opportunities to survive with it. We need to understand that Corona is Ca based, and not everything will be bad when we get a virus, because now viruses are part of our daily life, now that we have become men of space).

(Space has nothing but viruses, and does not have bacteria's. So we have to learn and see which one benefits us and which one is a hazard to us. We had the first international contact with it on a large scale, and for the second and third time we'll see the opportunity and the rest of it. As a scientific organization we learned a lot from the Corona. (With more deep study it will help us with our travel in space. Please join us in the July sessions, because this will complete a huge part of our research)).

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:10).

K- Yes, good morning, good day to you as usual. Whenever, and wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute knowledge sharing. We welcome you back, as usual. And it is interesting to see how the story of the KF and its work and embracing a larger and larger structure of science technology (T) and space. (:12).

We see with us in the past few months in the sessions of meeting with the Creator and we had so much success and so much understanding and development with these systems and with the sharing of your time with us, that we have reached a point with our doctors and scientists in the background, that this week KF has launched very interesting international what we call, collaboration with the wellness centers and we in conjunction with the doctors, have launched a very unusual meeting with the Soul of the Creator and

the wellness of the Man himself. This program is unusual as before we had one sessions for one Friday. This sessions which is now promoted on the KF as a wellness, is for anyone who can join on a 3 week session which is 7th, 14th, and 21st of July and the conclusion week on the 28th of July. Where we run a 3 hour session and each section.

This is part of the background of the programs we announced months ago where we can reach anyone at any point, any destination, for anything that they wish. Would it be addiction, would it be food, would it be any wellness conditions that they have. (:14) And we think this will open a new dimension (D) in what we call 'Wellness of the Man'. You have psychological problem, you have a physical problem, it could be you have a tooth pain, and you have knee pain, or whatever, and you want to see how you can get better, how wellness comes.

We are not in a medical world, we are in the understanding of how we can communicate and transfer new technologies, which has come into operation as of next week more or less, in the process of reaching everything people need at the same time. This is a mass trial, hundreds of people, and we have launched this. And we think this will be one of the pre-requisites and part of the Space Technology development. Where we can reach Man at any point. He can connect to systems at any point. And 3 hour duration is more than enough to complete the cycle. And then teach the body in the following weeks, to what we call, 'tune itself to it'. We want to know how much we can reach and how far we can reach.

Somebody called me and I... "Can you do help me with this?" "Can you help me with that?" The only thing is, you need two sets of headphones. One on your head and one where you want the energy of your Soul to be transferred to. You might want a big muscle on one eye, or you want to have a condition, doctors tell you, it needs exercising this, (:16). or you have any condition else, where wellness, you put it on that point. And then, we run a massive operation in the background, for Keshe Foundation, to reach you.

You might like a water melon, you might like to fall in love. You... we want every combination. Somebody says, "Can I test it with my cancer?" We are not there on the medical side, but if this is your wish, you can try. It's a freedom of the... reaching the wellness of the man. I like to feel better in my life, can we reach you emotionally. And you know where your emotion comes from.

So, we have launched this, you can go on there, ... with the Keshe Foundation Sale, is the agent for this operation. They are not running it, they are appointed by the wellness centers, to distribute, what we call, the "Promotion Pack." And it's for 3 sessions, for 3 weeks, for 3 hours each. And it is something, a breakthrough we are looking for and we do.

Do not forget that the Keshe Foundation now is involved in a massive project, with one of the leading Nations in the World. And whatever we do, now on, and we've done in past 10 years, will go into the operation of our signed agreement with the National Government. We have become an organization beyond imagination of many of

Knowledge Seekers (KS). And that's what you wanted, to reach the knowledge, the technology to every man on this planet. And we have signed ourselves into it, with one of the leading nations on this planet. And we are working in that progress, that as our agreements come into flourishing, part by part, bit by bits, you'll become part of it. (:18).

We become part of One Nation government, in conjunction with another government, which is a leading Nation, but the signed agreement is use of the technology for Peace. I signed this with the Iranian government in 2007, 2008, and now the new agreement signed with the government, it stipulates the technology on the basis of Keshe Foundation, "technology in exchange for Peace."

So, whatever we do, on a larger scale now, You will understand in the coming months and weeks, who we signed with. Who is our major partner in the National and International operation. And these sessions we put on, will allow us in collaboration with the Space Technologies, Space Agencies, to put a new way to do, to be done.

You, if you're in the International News arena and you can hear, part of the agreements of the Keshe Foundation in past couple of weeks has been announced by the Space Agencies internationally. But, beyond it, has been the discussions which we had, and now we see it appears a National Program, till the Keshe Foundation comes in and becomes Keshe Foundation and the Nation operation.

We... we have come out of the cocoon of what we call, 'kept silence' by governments in Europe, and leading Nations in the World have backed the Keshe Foundation. And we'll see the results, you will see it. We're working, the Keshe Foundation team, working very hard in the background. Moving, bringing everything step by step, according to our agreements, step by step. National governments want to make sure everything is secure, everything is correct. And, for next year or so, two years, (:20). we'll be working on those levels step by step, working with the national scientists, government scientists, proving.

Many of you Knowledge Seekers will be called upon, to join, to be part of this new work. A number of Knowledge Seekers have already been approached, and going through the transition of becoming part of this Keshe Foundation One Nation operation, with the national government. Many of you will be called upon to join, according to your expertise, to bring in, as part of the 500 strong Keshe Foundation Knowledge Seekers team, which will become part of the national government operation. As we grow, as we develop, as we prove the technology step by step, through the officials, through the test, through the lab, through the scientists, then we go to the next step. It's a massive project we've taken on, and the first phases of the project has already been approved by the governments and a number of Keshe Foundation Knowledge Seekers have already started working on these projects. They know what they are doing and they know they are part of this new revolution and evolution in science.

What we would like to understand in the July sessions is how we can feed the man in space, collectively. Colonization, for us, is not just to move somewhere and colonize, it's

to be able to reach everything. We cannot grow all the tomatoes and potatoes in colonization, but we can reach you through the energies of the fields, that you are fed. We cannot have shuttles for "Expats," the way Americans fed Berlin, (:22). inside Berlin.

We do that "airdrop" through communication lines, through new development of the technologies. And as we do this, when we come to the space technology development, and as we announced by governments to colonization to start, in the coming years, then colonization becomes easy. What you've done in past few months with us, and what we do in July and forward, would allow us to jump that part of the technology, that we colonize, but we don't need to take ?? shuttles every week, every month, to feed few people on the Moon, or few people on the Mars. We feed hundreds. The colonization program, which now you hear in the background announcements of (one) the leading nations, will be feeding hundreds of people, not one or two scientists. This is not colonization.

Then you understand how important this July session is for all of us. You participate in a large scale, multi-facet dimension projects of the Keshe Foundation, which will be implemented in a coming time in the space program. As we said, we come to you when we need help, we come to you when we share our joys, and we come to you when we share the technology. Many of you stopped the habit of the chocolates, when it was addiction. And many of you stopped other personal habits. It showed us, yes we can reach. Many of you showed us how pH can be raised through the technology. How we can make you happy. And now it's the face of multiple, multi-facet dimension. Which means, you could be hungry, you come for the food in that 3 hours, (:24). half an hour of it, another half an hour you want to reach a muscle, in another half an hour you had a headache, and you divide how you would spend that 3 hours.

You send it to us, you record it, "I wished, I wanted, and I received." And, "what I came in for." So it becomes a multi-structure understanding, covering different cultures, different nationalities, different religions, which you all have. And we see how emotion changes, in this 12 hour session. So, if you go to the Keshe Foundation website, and sign yourself to it, please understand the Keshe Foundation accounts in Holland is totally closed. Keshe Foundation, you used to send funds to Keshe Foundation in Holland. All that has closed now. All the payments has to go through the links, which is given, and go through the same. If you are making donations to Keshe Foundation, please wait till, we make a further announcement in, how it'll be set up and the way it's going to go.

Coming to the teaching. We come to the point of understanding even what the Intro (video) was saying. In the last sessions where we asked you to look through what we call, the second screen (Curtain), second vision, where you close your eyes and you see and you look. And many of you might have tried but you see darkness, you see no light. Because you have to learn how to see the light. You have to learn how to look at the light. (:26).

As we said in the Intro, you take banana as a vitamin as a seed in your stomach, And it becomes that process of the (Gans) "Patch," where you send, put a Gans Patch on the front, with ratio of, let's say 1, and you put a bigger Gans patch with ratio of 3 at the back, where the, by the properties and the characteristics of the plasma, the larger tries to feed the weaker, the stronger tries to cover the weaker, to bring it back into balance. This is the work of the Creation, always balance, and not to be better. I give for you to be equal to me. And in that process, as Knowledge Seekers, we transfer energy through the body. You take banana, and the banana creates the Gans, and then opens the transition of the vitamins, which is in the banana, to be absorbed from the environment.

And we know that the environment exists, because we call it, aura of the body of the man. Aura of the body is not just the heat of the skin, it's all these energies, which banana and the others change. If you keep and looked at the aura pictures which is created, it changes by your food, it changes by your emotion. What you take, what you give.

Now it's the same with your vision. You look, say, "I don't see anything. It's dark." The secret to it, is that you have to set the seed, in your emotion, in your Soul. And we tested this, as you heard in the Intro, (:28). in hundreds of you who came to Linz. Our doctors are testing this continuously with those of you who are in different processes with them. You sit the seed of, "I want to see my mother. I want to show love." And you create that seed, that love, not so strong that you overwhelm the love of the mother. You become that banana. That with it, you get the communication line with the Soul of the mother. This is the secret of using the second vision.

You can have and you can deal with hundreds of people at the same time. One secret which mankind has not understood about the structure of his eye, is the color of his eye, the shape of the eye. You have an eyeball and then you have a different color circle, which is the shape of the Universe, shape of a plasma. Why your colored part of the eye is round? There is a reason for it. It absorbs certain strength fields, in the dimension of the plasma. You see that color, the color of your eye, dictates the emotion you carry. (:30). Dictates even the color of your skin. Dictates the color of your hair. Because it's not just a vision, it's not just for you to see, it's the line of emotion.

It's why we have different cultural, mental differences in the nations, what we made nations of us, and the cultural behavior we created. A slight change in the tone of the eye creates different emotion. And this become part of the characteristics of life. Now, if you look at your eye, you just see the color part. But the most important part of your eye is the white part, not the color part. The color part is for your physicality (P). The white part is part of your Soul. It's where the Soul transport, transmutes, where the Soul always, irrespective of color, keeps his communication, his line of opening.

We are always looked at the color part of the eye. Our doctors look into it, because they are physical doctors. When you dream, you don't go through that channel. When you dream, you dream through the white. It's a travel, the space dimension of the Soul. (:32). This is why, when I keep on telling you, you live a two dimensional life without

knowing. The eye of the man looks at the person in front. The Soul of the Man (STM) through the white, sees the Soul of the person.

We have ignored, the most important part of our lives. What happen to the blind people? What happen to the people who only have the white? What happen to our children when they are born? Now you understand how much man has ignored the second part of his life, all the time.

When you close your eyes, when you bring the shutter down, you close the dimension of physicality, not the Soul. And this is why, sometimes we remember dreams, we see them as visual, because the eyeball, as a white, with this section, which is a physical part, is part of the same, some of the fields gets absorbed, touched through it as it goes, and you remember it as a dream. So, next time when we ask you to close your eyes, lift the eyeball that most of the white is in use. And then, set the seed in your emotion and the Soul, that I want to see the mother. I want to see the whole family. My dad, (:34). my brother is half dead, half alive. Some on the Moon, some on the Earth, some in Africa, some in Asia.

Then you understand, multiplicity of the power of the use of your Soul. Multitasking is not the job of the Soul. "Always tasking," is the job of the Soul. This is why you say, "I was going and somebody pulled me back." That someone is your Soul, which looks through the white (part of eye), is aware of what physicality doesn't see, but in openness, can instruct, interact with your physical dimension, and move it back. You do this through the emotion and the Soul, and you give yourself cancer.

No part of the body of the man, not a single hair, is created for no purpose. Your liver absorbs multi-faceted dimensions of energies, you call it, different proteins and whatever. The eye of the man has a multi-faceted operation. The color part, which creates interaction with the physicality, and the white part, where is the communication line of your Soul. When you die, your eye moves, most of the time up, to allow the Soul to depart. Physicality has no more use. (:36).

Maybe now you understand why we do this. Now you understand why many people in coma move to the same position. Now we understand why a few weeks ago, when you joined us in elevating the Soul of the children, I taught you how to use the second (Eye), because you reached the Soul of the children. This is why the babies always look deep. Flicking of the eye is for the physical part. And understanding to register the Totality.

World of imagination comes into the same way. We stare into the distance, because we allow dimension of physicality imagination. Now you understand, how you use your eyes. You use to understand that nothing is coincidental. Play with yourself something very interesting. Many of you play computer games. I know the generation of us is computer game generation. (:38). I played the first games when I was in, just about, before University. When the first things came out, we used to go "click, click." And it's developed to a multi structure of today, play games.

Set your mind and pre-determine the game. You will win. It means that you can even with the structure of the Soul control computer games. This is why some people are very good at it. Without knowing and fixing the vision through the Soul, they create energies which sets them in that direction. I still do this. I play a number of games and then I say, in this game I want this and this, and I get what was impossible after that. So world of magnetic field of electronics can still be manipulated, let alone transfer of energy and information and emotion. You cannot harm. You can only elevate. And you can only receive to elevate your own Soul.

When we told you, we let you to see the Soul of the Christ, it's because you were humble enough to accept him as a higher order energy and you set the love in your Soul, and you received it. That's the secret of the play, you put that banana as a love of your Soul for the Christ, bless his name. (:40). You don't see yourself lower, but you set the small seed of love in your Soul, that it is connected to him. You do the same thing with your mother, you do the same thing with another point of position in the Universe. I'll see you on the dark side of the Moon.

In the coming time I'll teach you how to manage this. How to pinpoint with the accuracy, not even with a satellite system of today you'll be 5 centimeter out of position, you'll be "dead on" position every time. You tune to move from New York to Tehran to meet your mother. You create the love of the mother within your Soul, the pleasure that she gave you. And understanding of relationship and the field strength, when you land in Tehran, you wish to cuddle the mom, the mom is in your arm. You don't want to cuddle your bus when you land in Tehran. The same distance ?? emotion will put you in front of him. The same emotional distance in conjunction with the Soul of Physicality (STP) dictates the position. (:42).

So the system of taking energy to control the Spirit, or the STP will dictate the position and distance. You have nobody in Tehran, but you want to go and see the most beautiful restaurant you ate 20 years ago, you heard in Tehran but the GPS doesn't show you, you want to go there. That systematically uses the Soul of the others who have been there. It's like you ask on the street, "can you tell me where this shop is on this street?" Now you interact with the Soul of those who are, who've been.

When we put a magnet on a set of magnets, we see how the others move to adjust, not only one. So, you establish that connection, because you want to be in that position. The others indicate how much they move and where for you is, to be, for you to put that magnet. It's the same way.

When you travel through the STM, through the STP, you never get lost. You always land where you should, and you train yourself. So, next time when you walk on the street, next time when you sit in front of your cat, next time when you hold your mother, next time when you put a flower in front of and enjoy your beauty, (:44). try to look through the white of the eye and see the Soul at the same time. Then, I've told you many times, thy shall not lie. Then you understand how you live the schizophrenic of physicality in the

fields of the Universe and when you close the eye you call it, the dream. You've been a dreamer all your life, but the dream of reality, not the dream of what we call, fantasy.

Your vision has around 17 kilometers horizon vision, plus or minus. Your Soul vision is Universe and Unicose. Now you understand the tricks, that when you join us in July, where to look for, and how to look for, and how to dimensionalize the energy, through the Soul. And then, through dimension of emotion, the position of physicality. It'll be interesting, if some of you don't like a little lump somewhere on your body, and in July you concentrate on it, and that little lump by next July is not there, it's no coincidence. (:46). Because you learn to transfer the Soul and the emotion of physicality together to where the physicality manifests itself.

This is what you do when you travel into the deep space with no "monkey suits." We live this life with a "monkey suit," within the atmospheric condition of the Solar System. Because the material is created, the "suit" we wear is created out of the interaction of the field strength of the our Sun, our Solar System, it's blue. In the next Solar System, next door, the field energy of the plastic you wear as a "monkey suit," is in the gaseous state. What are you going to do with the body inside it? Now you understand why man needs to understand the use of the field energy of the Soul.

Now you even understand why when people tell us they became with the position of death they saw a light. This is a point when the STM, energy of the STM, crosses the field strength of the STP of the Man. The interaction of two fields creates light, and that light position creates a dimension of peace. They always talk, it's so peaceful. Yes, because now you're cocooned within the energy of it. (:48). You allowed it to expand and complete itself around you.

Now we understand the whole process of Creation and death, if you understand the structure of your eye. Even more, you can understand why you have a spinal cord and why your spine, your neural system is even white, greenish color. And why it goes down the body of the man to the ground. It's like a volcano. You have surrounded it with a skull. It has nowhere but to go for communication down the line, which you call it, a spine. Does not matter if you walk on four legs or two.

Now you understand, even the animals who don't have bone structure, how the Calcium (Ca) structure in their body, transfers its energy through the Amino Acid (AA), connected to the Calcium. You don't need a spine in the space. The Calcium in part of the space will change to Magnesium and another to create the same communication line. In some points, man can never transfer from energy into physical matter state, to become a body, to get physicality. Because the field strength is as such, that can lead (to) the opening of the plasma of the STM. (:50). The plasma continuously creates the layers to protect itself, to keep its integrity, because it's within its center.

Now you understand, how you as a body, have lived these two double life. Now you even should understand, how the position of your eyes, and the volume of the color part into

respect, to the white part, dictates your behavior, your emotion, your openness, your "meaning-ness," for you to be a lot of things.

When you interact with people, first interaction is to look into the eye, and see the Soul. Does not matter if they're wearing dark glasses or light glasses. Physicality has no dimension when it comes to the position of the Soul. You've got to understand, now the knowledge given to you is deep enough, (:52). and gradually establishing the point of understanding, that in no point in time and position you need the sight to see or have the dimension of physicality to live, if you manage to understand the dimension of the fields of your existence.

I once said, one atom of Hydrogen can cover the whole universe. So is one seed of love. And this is how the Creator created, loving what he has, within (?? Himself). And we starve for it. And we work that when we finish the physicality, we are loved, that we go into heaven, which is the closeness to his Soul. It's within us, and within our Soul. And if we learn to do, to be that banana in the seed, all the time as a love and care, then you understand the principle of Mitra. You have no time to do anything but think good. You have no time but to act good. And no time but to actually do good.

Now you understand the importance of your eye. Because once you learn, the color and the white have to operate the same, you cannot lie through the color where the Soul tells you the truth. (:54). Then you understand when I was telling you last week, standing in the front, I knew I was lied to, because the Soul told me I'm betrayed.

The life, physical life, in any dimension, has its physical interaction and its Soul interaction. Does not matter where you appear, anywhere in the Universe. This principle does not change if you are on Earth, on Moon, on planet Zeus, or within the Soul of the Creator itself. Then you understand how Moses lied, that every Command had, "thy shall not lie." Because he wanted to lie. Because then he ?? wouldn't have been able to do it himself.

Now you understand a lot of things about yourself. This time when you close your eye and you say, "I see nothing", you understand you cannot have a flower if you don't sow the seed. And you have to learn how to grow the seed to become that flower. (:56). You have to re-teach yourself how I see the physical, or with the eye of the Soul. Many people call it the third eye, but in fact is your own eye, it's what you ignored.

You will understand through the teaching, gradually as we go forward, how to transmute this energy out to create, when you feel like it, that cocoon, that shelter, that envelope the plasma. And you shall see how you change your life, because there is no two dimensional life in respect to the others, as it has one dimension. And that dimension comes from the collaboration of the physical life and the Soul at the same time.

Now you understand how gradually we are bringing you to be both passengers of the physical UFO and the passengers of the STM as an energy plasma of the man. Then you ask why do we need to have the UFOs and the rockets and whatever you create. There is

a pleasure in everything. Very soon you will get tired of just seeing everything without tangibility, that you yearn to move back in the dimension of physicality for a while. (:58). To be able to feel and touch what you love.

Don't forget you are no different than the Creator. He said, "I made man in the image of Myself." I made Mitra to love the dimension of physicality. Now you understand, you are no different. And you have to learn to teach yourself. There is no guideline, there is no Prophet to teach you how to do it to abuse you next time.

This time when you close your eyes, to reach the Soul of a child who is abused, you move, to move the emotion of the world president, to a peaceful president, create that love within you first. Then you'll find the child to elevate, the president to move. As I always said, it's in the writing, even the stone has a Soul. You find the strength of the Soul of the stone, you'll live within it if you wish to.

I've done that many times. I sat there for centuries, watched man passing by. Life is not to be active, to do all the time something. Life is there to enjoy the time when you want to do something. (1:00). And when you have a dimension of the Soul, there is no time. Always is zero. Because you decide the step of time from the point of manifestation and the move. And it's never late, because you are the starter of the time. The day starts for the man in Japan, 6 or 10 hours ahead of you, if he wakes up to see the day. While you're still asleep, waiting for the light to come, that your day starts. Before that, for you, zero time, because you're asleep.

It's the same with the STM. Wherever you start, you start from that zero. I manifested myself at that point, and thousands of years later, in another point in the dimension of the time which I promised it would be. I did the same in another time, in another name. And then, because I was there, I became that stone, watching the time goes by. Then I fulfilled my promises. Because I know where to manifest the STP within another Soul, or within the Soul of itself.

Now you understand the biggest magic, a manifestation of many prophets. The same Soul. Promise of time, the fulfillment of what I promised myself, I would do. It's the same with you. (1:02). You decide. Now you understand to the manifestation of the Soul through the white of your eye. Next time when you close your eye, you don't say, "I don't see anything." Of course you don't. You didn't take that banana, did you? And once you have that banana, all the energies of the bananas in the Universe will target you, connect to you, you take what you need. You connect with the Soul of one abused child, and that Soul is connected to many other abused children, then they receive from you. Now you understand how it works. It has to be in it, nothing but giving and no taking. We go through a break, and we come back. And we'll answer any questions you have. Rick, would you like to take us through a break?

<<< **BREAK** >>> 489 KSW June 8, 2023 (1:10).

K- No, yes, something to tell you in advance, we're going announce later on. On June the 22nd, Thursday teaching. Teaching will be from 10:30 till 12 o'clock for an hour and a half only. We don't start at 9. We start at about 10:30 till 12 o'clock. So, we'll make an announcement for that, but Knowledge Seekers not next Thursday, the Thursday after. In two weeks time the teaching is for an hour and a half, when it starts at 10:30 and not at 9 o'clock.

R: Okay, good. We'll make sure that that's clear for everybody before that workshop.

K- Yep. Any other question?

Yes, just one more things I have to announce. The teachings from July, (1:12). on Thursdays will be allocated a new time, that we'll move it from 9 o'clock in some weeks, into a different time, most probably around 12 o'clock, instead of 9 o'clock. And it'll be kept that way for some times, but we make the announcement when we come to it.

Q: .. Hello Mr. Keshe, I've recently made some Aluminum Gans and Aluminum amino acid. Is my deduction correct, that if we could use fields of Aluminum Amino Acid on a person, to help them if they're suffering from Aluminum poisoning? From what I've learned to this point, I'm deducing that fields of Aluminum Amino Acid would interlock with fields of cells of poisoned person and Aluminum Gans content in these Amino Acid would interlock its fields with fields of Aluminum in the body and balance it. So now the Aluminum in the body would have its fields detached from the cells and the body would have an easier time removing it. Is this deduction close to what would happen?

K- Theoretically, you're correct. Reality, you never touch Aluminum, at all. Aluminum, Lead, (1:14). and a couple of other materials should never be used by Knowledge Seekers, you should never produce the Gans of it. Doesn't matter even if you produce it and keep it somewhere. These materials have affinity to attach to, due to construction of the field plasma interaction presence of Magnesium and presence of conversion of the fields due to presence of the different field strength, to solidification or manifestation of this matter in the brain. We have the same problem with Mercury. So theoretically you're correct. Physically I advise you with the knowledge we have never ever make Gans's of

Aluminum, Mercury, or lead and couple of others. Because it is field strength, is on a field strength of the part of the emotion of the man.

You think you're removing, but you can add more misery into the whole work. (1:16). You never, in a physical human body on this planet, should make these 3 Gans's. If you made them, put them in a container of themselves and bury it deep in the ground. And if you can, build a concrete cocoon for it, that it stays there for a long, long, long time. That it doesn't even seep out to harm other creatures of this planet, inside the planet. So, my advice to you is, don't even think about it.

Next question.

R: So, I guess his next question, you would probably say, no, as far as other uses with Aluminum Gans, have in respect to plasma devices, like the MaGrav Power Unit Plasma Capacitors or plasma batteries?

K- No, do not use, do not use. It's just it's field strength. Its field strength is very close to some of the field strength of the amino acid (AA) of the brain and emotion. Aluminum poisoning or ?? extra Aluminum fields can create dementia, internal bleeding, blindness, loss of orientation.

We know this especially from Eastern Block. In Eastern Block in prior to nineteen nineties, (1:18). they use Aluminum as poisoning for rats and for disinfecting silos with rice, and grain, and flour. And all the workers who used to spray this, have ended up with massive problems. They had special teams disinfecting and all the workers in these teams have shown long term huge problems. So, don't even go near any shape or form with these things.

One of the most horrendous ones are Mercury and what you call it, Lead. They have a strength and the strength of the emotion. And we've seen in the report to (US) Senate when the interaction, which was hidden from the what we call, public and then when a push by a member of the Senate in years ago, the vaccination companies had to confess that they use Mercury in a 3 MMR injections for children, which brought a lot of problems for children. This is a report to the White House reports, and the Senate following this over the years. (1:20). And now they say they produce it with no Mercury, but still the combination of chemicals is the same effect to all the two, three together.

This is a discussion now with a lot of world of scientists, that the three MMR not to be done in the first year, two years to children, but delayed to the puberty. And a lot of doctors are supporting this, even their own children. They don't give the MMR in the first cycle of what they are pushing now. Because a lot of papers connected to a lot of other problems. And they moved it, a lot of doctors moved the parents to do the injection of the MMR after age of 12, 14.

But what I was in a meeting recently, and I explained to them, is you inject this now at a point of the change in the life, you would hit a new cycle. Do we know what is the effect

on that cycle, just because we delay it? Will we see more aggressive children? Will we see more other things with the children at the point when it's vulnerable and changes are taking place? And it all had to do, originally, with Mercury, which in the brain, when injected, it became a Gans of it. And it touched the emotion. but it permanently changes the, what you call, the brain operation. And the more doctors I talked to over years, nobody understands why they put these three together. They were happy with individual injections. (1:22). It's just pharmaceuticals make a lot of money out of it. And very large percent of people, families pay for it for rest of their lives.

Any other question?

Q: .. Last night, when I heard that somebody was making these Aluminum Gans's, I was, I was shocked. And, how little knowledge the people that are making the Gans's have in their repertoire of understanding. We were always taught that you use the four main Gans's and you don't get out of that. And even when I made it, that Gans of Aluminum, it was horrible. It was absolutely horrible. I mean, I've made some Gans's, but I've never felt anything so, as abhorrent as the Gans of Aluminum and the feel of it. It was the feel of it. It is when you get it near you, you go like, what the hell is this? And you just want to get it, it was far away from me. And this particular young man was putting CO2s and other Gans's near it. (1:24). Honest to goodness, I almost freaked out. I can't believe the misunderstanding was going on here. And I thank you so much for addressing it tonight because this is really important. You don't make these Gans's, they're not good for us, and they've got nothing to do with the knowledge of Creation. They're like, if I could put it as a subset of what you can create, but if they were to be created, you have to know exactly what you're doing in order to get to that. And it was, honestly, I was "gob smacked" yesterday.

K- When did you hear it?

R: It was in the Keshe Plasma Reactor Group and we all, or several of us disagreed with the creation of Aluminum Gans's and talked to Peter about it. Peter gave a presentation about him making Aluminum Gans's and showed it. And we suggested that it was not a good thing to produce.

K- If you can delete it, go and reload this and delete it. Off your teaching, of your, what you call it, program.

R: Well, we're telling people not to do it, so...

K- If you can go back, because... Yeah, not to do it, but if they don't listen, if they don't listen to this program, or the others like it, they'll think it's the way to do it.

R: Right, okay, I'll delete it.

K- Delete it, delete it from your brain.

R: Yeah, let's just forget the topic totally.

K- This is something which we know, (1:26). we know, that the Aluminum pollution. We looked at this. The same thing..

R: We looked at it several times, and you've had the same answer for quite a few years now for the Aluminum, the Lead, and so on. We hear the same stories.

K- Because we know, we know, we know, we see the result. One of the other effects which we see it, effect, is Plutonium. A lot of you don't have access to, a lot of you don't reach to that level, but as nuclear physicists we have access to. Gans of Plutonium and certain isotopes you never make.

R: I suggested that the Gans of Uranium might not be a good one to focus on.

K- It's a very good one.

R: It is?

K- Gans of Uranium in Isotopes 235 is extremely valuable. Some isotopes of Plutonium has the same effect as what you call, Mercury. But the effect of the Plutonium isotopes energy is that it clogs up the, what you call, you know the sperm of a man is singular, it clogs them together. They become like ?? "vermicelli's". And it is... and then it has no genetic effect. But it does have, as far as we know. But certain Plutonium, (1:28). some conversion of the higher order radioactive materials, we keep away from making the Gans's. I have made Plutonium Gans's years ago, and we see the effects of it. And it is their field strength, which creates emotional interaction with Lead, Mercury and Aluminum.

R: Well thank you for clarifying that Mr. Keshe.

K- Any other question?

Q: .. Good morning, Mr. Keshe. I wanted to ask if you had had the opportunity to read an email that we sent to you from Mexico about a month ago, in regard to the bio-fermentation process we are about to begin.

K- I looked at it, we would like to collaborate and bring some things to you. But the reason I don't come, I did not come back to you is, we can discuss this, (1:30). but through the agreement we signed, we can change your program inside out. Maybe in a year or so, to literally bring it into a very large international operation. Not by financing it, but bringing other part of what we agreed with.

It's a very interesting proposal, but you have to... I have to put in a framework, in something if we done the correct way, it'll have a lot of implication. If you do it the way you are doing it, there will be something done enthusiastically, a few bit projects and then disappears. This what you're doing needs a huge financial backing but it needs a bit of what you call it, tuning. It's not all the way you explain, or what you discussed to be.

There is more to it. If you want to make a time we can talk about it but I'll be looking at this maybe in six months a year time to bring it. But this needs a huge financial backing to be what you want to do. Otherwise it's just a what I call, prototype platform and maybe in a few years you push it to a few more projects. It's a very interesting project. But, the projects like this, needs very detailed looking and then, make it into international operation. (1:32).

Q: Okay, yeah, that would be... It would be wonderful if we could connect to the point and touch on to that. Because we are definitely open to the idea of this being a much longer term project. And I don't think we were thinking we had it all figured out at this stage.

K- Have you actually finished any prototype of it? Have you... in any scale?

Q: We are in the process right now of meeting with the Congresswoman tomorrow, I believe, or the day after. And we'll be bringing the first unit into operation, probably within the next month. So that'll be the first beginnings of that.

K- But what do you exactly convert? What do you exactly do with your system next month?

Q: Yeah, the idea is to bring the bio-fermentation systems into an existing facility, perhaps in Zamora or in another part of Mexico here, where they're producing a lot of food waste. Perhaps going into a facility where they're freezing fruit or vegetables that they're packaging and have a lot of waste material. We would go to these companies and offer to collect this waste material as the input mass for the bio-fermentation system. And then we would be inoculating the biomass with specific bacteria's, which are able to convert that biomass into bio-stimulants in a much shorter period of time than is conventional.

K- What is the shorter time you're talking about?

Q: We're talking about 24 to 48 hours, as opposed to 90 to 180 days, which is conventional with biogas.

K- Biogas, yeah.

Q: This is a much faster, a more high stream process and these plants can be made in various sizes. (1:34). But at the beginning we were just looking to do a prototype facility and show it with the local Congresswoman here and have it be a use case.

K- Do you have the financial backing for the first time?

Q: Yes we do.

K- And how much you estimate that'll cost?

Q: It looks to be at this stage between 50 and 100,000 dollars.

K- This is a very nice project. And I was talking to one of our, what you call, top management of the Keshe Foundation. And what you do, what you suggested. There is a

growth industry, very parallel to waste, biomass waste, food, whatever, in cosmetics. And the Keshe Foundation is looking into it. There's a company now producing these, very successfully. And what you do as a biomass, a lot of what you call, green ?? wedge, can be changed in a lot of things, healthy things for, not just for energy. We're looking at it as one of our top people is very deeply involved with this now. You can look at both side of it, but it will be very interesting. And I would like to discuss it, but in a few months time. And then we'll see how we can take it to the next step. Because I think you can, as not only a speed up the process, you can change the process through a specific way of using Gans's. This is where my interest is. (1:36). And then we can collaborate with you.

Q: Fantastic. Yeah, thank you very much. We were wondering if the email had, fell through the crack or not.

K- Come back to me. Come back to me. Yeah, come back in about six months or so, where we tied ourselves in a very big way internationally. And we can't divert any attention from it till it's, what you call it, the baby starts walking in the next few months. And then this is a very good proposal. Maybe we can still bring you into operations somewhere in Mexico for us. We can collaborate with you there.

Q: Wonderful, thank you very much, I appreciate it. And ... yeah, I look forward to the opportunity to share the knowledge that we gather through the first tests and perhaps we do it in the background, if that is the best way. I can contact you in Telegram and share updates that way.

K- Contact me that way, yes. Keep me updated and we can even, maybe, interfere through governmental channels. It's much easier than you battling it on your own.

Q: Absolutely, that's why we reached out in the way we are. And that's also why we're moving in the direction with this influential Congresswoman because she understands the vision and is very much in support of what we're doing and wants to share this with many of the areas in Mexico, which are the food producing areas, because they have a massive problem with the soil quality and the bio-stimulants, which are a process of this equation, can be used to revitalize the soil, retain moisture back into the soil and give better yield to the crops as well is doing something positive with the waste material that would otherwise be in the trash. (1:38).

K- Yeah, but you know how South America became a fertile land by original settlers. They just burned their waste and ashes became fertilizers, and now we call it, Nano materials.

Q: Yeah, we see that across the countryside very often, and as we're driving around, and they do that here too. And whether that's intentional or not, that's another question. But..

K- They know it works, but they don't know how scientifically. Now we understand how scientifically it works. You produce it into a perfect Nano material for absorbing energy. It's black. So it holds energy, but because it's a component of the same vegetation and the fruits, that is, it'll grow on it. So it has the right strength to give back.

In a way, when you make a tomato roots or tomato leaves and whatever, and you make a biomass of it, or a Gans of it, or what you call, charcoal of it, and you put it on the land, and then you grow a tomato on it, that burned material, which is a Nano structure, has a strength of the tomato, because it was made of it. So the next harvest grows better because already the seed of the energy for it is there.

We understand the process, but it's interesting what you're doing. But we've seen this in China. I saw a system like this in China about three, four years ago. They built, but the government could not carry it out through to produce gas from it and then you still had the mass you could use for as a by-product. It's somewhere in our files. (1:40). When they took us to see, what do you call it, the skeleton of the structure. I was interested in it then and I can see a lot of usage. But do you produce a lot of gas out of it, prior to conversion?

Q: Yeah, the gases produced, I believe, are Hydrogen.

K- But you burn it, you use it as an energy source?

Q: That is to be determined. We could probably burn it at the source, at the location itself, and use it as an energy source.

K- No, don't do that. If you produce it, use it, you need a compressor, use the gas, compress it and sell it as a product to the farmers, for the conversion of their ?? cars, or their tractors. That will attract them a lot more.

Q: Yeah, then we have all kinds of bases covered, and we can do this in a decentralized manner, where we go to the farms and offer them a "one stop shop" for converting their waste material into usable fuel, as well as a specific fertilizer, specific to their land based on what they're growing. That was the whole purpose that we wanted to go to the mango farmers and give them the Gans materials or the bio-stimulant materials from the mangoes and go to the avocado farmers and give them the same.

K- Yeah, but we use the gas, use a compressor for the gas instead of burning it, as a product to the farmer. They'll grab it, they'll embrace you for it. It's you serve three purposes. You give them the energy, you clean up the land, and you give the land new life. Just look at adding a compressor in, because when you pull the gas with a compressor, you produce more of it anyway, and you speed of your conversion. You understand?

Q: Yes, yeah, wonderful. Thank you. (1:42).

K- You compress, if you do it, let's say, in 48 hours, you might do it in 18 hours. But the more gas you pull, the more fermentation you create. But sell that gas, compress that gas into a product for the farmer. That will change the balance a lot for them. And they'll grasp it, because the fuel cost for farming is huge. So very interesting. I'll be interested,

but come back to us in a few months time then. Maybe then we can build up in a different way. But we'll have the governmental backing for it as a project.

Q: Wonderful. I appreciate your time and thank you so much for adding to the knowledge.

K- Thank you very much.

Any other question?

Q: .. It's fine Rick. And I know actually, I know your voice pretty well because I've been doing some translations with the gardeners workshop. And this is why... well I was told to ask this question. Somebody in the neighborhood recommended me to join this session.

K- Introduce yourself. Where, who are you? Where are you from? You're Australian?

Q: No, no, I'm from Germany. And I'm in a... well, in kind of these Plasma groups around our neighborhood here. (1:44). And I've been... well, I started with the Gans's already, and I have them in my garden, etc. And, what I wanted to ask, it's got nothing to do with Gans's, but it's about what I smell and perceive. And, well, one of the guys and persons in my neighborhood, they said, "Okay, please contact Mr. Keshe. He may give you an answer." Because I've been perceiving these kind of things attached to people. I smell that and I do not know what I perceive. And that's why I have to be keep away from people. I have to really consider very wisely where I go, because sometimes I feel really sick. It makes me feel sick. And what I perceive is, well, actually I can't judge. It's a little bit, as I said, it's attached to people, rooms, clothing. When my kids come home, they have it on them. And I've started perceiving it when the vaccination started. So, and I, well, I don't know what I smell. Difficult question probably, and I don't know if it's out of place here.

K- No, no, no, no, you're perfectly home.

Q: Okay, thank you.

K- I'll ask you a couple of questions.

Q: Sure, you may.

K- When did it actually start?

Q: With vaccination. And well first I did not know what it was. And I was attending a meeting, an official meeting. And I really was about to have... yeah, sorry.

K- This is very, very, very common with vaccination.

Q: Yes. Yeah, but now the vaccination is over. And I smell it with my kids as well, who have not been vaccinated, and my family as well.

K- No, no, no, no. let me

Q: Ok, sorry.

K- I stop you because I understand where you come from and a lot of people will do. It all to do with the Corona. And is... Did you get the Corona at all or not?

Q: Well, yes, well we did this kind of testing, yes. (1:46). And yeah, well officially with this PCR test we had it, yes. And of course we see people who had it, yes.

K- Okay, a very large percentage, we're not even, what we've seen, runs into double digits, of people who had the Corona, have this problem. You're not the only one. The reason for it is very simple. I'll go on the screen, if you can see it. (The problem is, where did I put my pen. This pen will not be with me when I need it. I cannot find a pen). But I'll try to explain to you scientifically, you understand?

Q: Okay, thank you.

K- You will see, you can, you can help it. You can help it yourself. You can do a lot of things with it to get rid of it. Okay, I'll go on the sharing of the screen on the whiteboard. (....)

Q: Well, I appreciate your time, so don't you worry.

R: There are very few questions that I've seen Mr. Keshe, you know, not take. So, it's appropriate and might spark some interesting.

Q: Well I was really wondering and it got me worried already because I can't go to a lot of places these days because I'm restricted everywhere I go. (1:48).

K- You have to bear with my fingers than actually a pen. This is your eye, this is your nose. I hope it's much nicer than this.

Q: Thank you, yes.

K- Here, right in the center there is a very fine, very fine bone structure. And it sits in a cavity, it's a plasma cavity. And when you smell, the smell goes up, passes. How this bone vibrates, will dictate what you smell. Because each smell has a strength. And in touching this bone, this bone vibrates. And then your brain recognizes this smell. That's how we smell.

In people with, have a head on collusion, this bone usually goes and sticks to, what we call, one side of this wall. And they lose their sense of smell. Corona is a Calcium based virus. And you most probably got your Corona through breathing. So, it's (goes) past this (bone). And as this is a very fine Calcium gel like, not a bone, but it's a bone, your, what I call, (1:50). "smell bone," has picked up a mass. So it has moved in sensitivity in this area somewhere. It has moved somewhere, slid into one direction or the other.

And because it's an energy mass of a Calcium, it might stay with you for six months, a year, two years. We see people now gradually losing it after a year or two, going back to

normal. A lot of people couldn't smell after the Corona, because of this delivery of the Calcium, what you call it, mass of the Corona connection. So you have, it explains what it is and how it is.

We usually have the capability to help with Gans's. But it's a... you can get it back, you can go back, you can wait maybe another year, that gradually this mass has lost its energy and it gradually the bone frees itself, or you can go and, what you call it, take other options with producing a very reverse Gans of it to deplete this energy.

Q: Yeah, but the... May I say something?

K- Yeah.

Q: But the point is, I have a very, very great smell, and I actually never lost my smell. Also during Corona, what I smell now, I mean, go out into the woods, etc., I smell everything. I smell the...

K- Yes, it's becoming...

Q: But when there are certain people passing by, it's as if there's something attached to them. And this is what I smell. Once they're gone, everything is fine again. Just, I just come to try to...

K- Yes, because this bone has become... (1:52). Yeah, this bone has been energy mass sensitive. That's correct. You don't pick all the smells. You understand? I know a lady who could pick up a smell of a shoe when she entered the house, from the back of the house. You understand? It's one shoe she was allergic to, or she picked up after Corona. And every now and then she still smells it. Not all the time. Gradually it's getting better.

So it's not you... this bone vibration is very sensitive. It can smell 3,000, I think, different smells. And it has a memory bank in the brain. The minute it moves to a position, brain recognizes that ?? this. And it has a connection to emotion as well, this line of the smell. And you've been loaded by Calcium energy on this bone, 100%.

So, you can wait, it might go away in a year time, two years time, three years time. Because now we see a lot of people who got, some people lost their smell totally. Absolutely, the bone got so heavily loaded, that it stuck to the side of the... actually, it's cavity. And, gradually you can get it back, or you make a patch of CO₂ with the Amino Acid of CO₂. And just place it in the position of the top of your eye, between your eyes and your forehead, where this bone sits, that you might be able to release some of the energy, and you get your smell back. Not everybody smells. (1:54).

Q: Okay. So just CO₂? No Calcium patches ..?

K- No, no, no, no, no, no, no, no, no, no. Don't go anywhere near Calcium, you already been interacted by the Calcium. We don't know the extent of it, but this is the problem with this ... We see a lot of side effects of Corona, now coming, now coming out.

Q: Okay, would you recommend then to also drink it?

K- You can inhale it, if you just rub your finger with the Gans's and just rub your nose, your nostrils. And see if it gets worse or it gets better, and then you change the ratio of the Gans Water. It seems to be helping. Because if we go with a Calcium patch on it, you can reload it and you can literally stick it to the wall and you won't smell anything. It is a very, very light, very light mixture of CO₂, with a lot of water in it, and just try it and see. But it's one of the side effects of the Corona, 100%, and you're not the only one. Many, many people lot their smells. I hope at least they smell good, not the bad smells.

Q: Well, as I said, it's just that, so sometimes I go places and I'm thinking, "oh my God, what do I smell?" and I have to leave, because I can't stand it. It makes me feel sick actually. And I do have problems sometimes with that, so going out...

K- Yeah, but it's... you are correct, you are 100% correct. It is... it comes with Corona, which means you've got the Corona through your nostrils, not through the breathing, through the mouth. And it has transferred its energy, because it's Calcium based. We saw it as a calcification of the lungs. We've seen it as calcification in the brain. So, this energy has calcified on your nose. (1:56). If it's calcified and become part of it, you'll carry this for the rest of your life. If it's as energy, maybe in the short time you get rid of it.

Q: So thank you very much. I hope... I'll stay in contact and tell you.

K- No problem. This is what the joys of new science, they experiment on all of us. Thank you very much.

Any other question?

Q: .. Hi Mr. Keshe, when we are sleeping you taught us that the STM expands and can go anywhere in this Universe. But at the same time the STM is connected to our physical body. Since we can have physical sensations during the dreams. Could you give us more details about this connection between the STM and the physical body and why the transmutation doesn't occur, even when we are dreaming? Is it that the fields of the emotion of fear prevail over the other Souls, even when we are sleeping?

K- No, this is just to do with the STP. It's with Inertia ?? and Mass. When you dream, you're in a different dimension than when you actually go through transmutation. When you go through transmutation, you... (1:58). When you go through transmutation, you envelop the body, the whole physical body (Soul envelops whole body). When you dream, you... it's the reversal, which is the actual, if you take the body, and you (are only) peeping through. And that's why you cannot... And if in your dream time you can do this (expand STM over body), create this, you'll transmute yourself.

Christ did that on the cross. It's .. that's the difference. It's in our brain, it's in our system structure of our Soul, and man used to do it. That they could use this with the STP, and amputate the arms, the legs. (2:00). But, we have forgotten, we haven't forgotten, we have not used this. It's very much like reptiles. You get your tail trapped, you drop the tail and you move on. You create high level of energy, which is a field energy, and not matter

state energy, and then you, that field separation, can literally loosen all the muscles and the bone at a given line, and then separation comes.

But the trick with it is, to create this energy, in a very high temperature energy transfer. And man used to do that. Exactly like reptiles. Every mammal has this, every creature has this capability. If the plants, even the plants have this capability. They'll amputate to cut a piece and grow somewhere else, or re-grow next to it. But we don't do it, and that's why we don't remember the dreams, because we go through that peeping hole.

You look, literally, this is what we're teaching today. You look at the sight, and then you bring the STP and the STM to that point, and you create separation. But between it is, if you understand it, is that, because the way it's done, (2:02). later on you grow the arm back again.

So, that's why you dream, we ?? do not go with it. But I can put you in the dream, create the plasma around you and you'll join your dream. It's very easy to do, extremely easy to do.

Any other question?

Q: Can you give us more information regarding the element Indium?

K- No.

Q: .. Good morning Mr. Keshe. (2:04). I understood that the key to the success of the transmutation is the elevation of the Soul. Only this is not an easy thing to do and therefore...

K- It's more expansion than elevation, there's a difference.

R: Okay, and he mentions that you will do a special course with the first 25 of the 200. The question would be how will it end up as millions of people, if not billions, will be able to raise their Souls to be able to participate in the colonization of the Moon, for example?

K- Oh, we'll give you a helping hand, don't worry. It's called the Vertical Unit. We don't transmute you in the Vertical Unit system. We expand your Soul, you do the rest yourself. But we tell you, you've got to go in that box. So, it's easy, it's not that ?? hard.

Q: .. How many times needs a Soul to be elevated normally?

K- What?

R: I think he means, how many times would you need to elevate a Soul, in order to be elevated? I'm not sure exactly. How many times need a Soul for it to be elevated normally? Maybe for it to be elevated ...

K- I think people have a physical dimension, they think it's an elevator, (2:06). you can go to the next level and next level. Elevation comes in terminology of the plasma technology as "enlightenment." And if you understood the story of the banana, you should have understood how to enlighten yourself in which way.

This goes back to when I told you, you go to China, you speak Chinese, you understand the essence of it, and it's just not the book, dictionary. And this is the essence of. And that's where it comes in. It is elevation of the Soul, not getting in the elevator, but is expansion of the Soul in the way of enlightenment. Then I think you understand what it means and how you've got to work with it.

Q: .. Hello Mr. Keshe, utilizing MaGravs Plasma Science and Technology, can we make dead planets livable?

K- As long as you can make a dome in there, yes. There are no dead planets, you've got to find out what lives in there. There's a no life, no corner of this Universe, which does not have an active plasma as a life. When you have a gravity and when you have a Inertia, life is a consequence of their interaction. (2:08).

It's always said, for thousands of years, we drank the waters. Sometimes we got poison, sometimes we got all sorts of diseases from what we didn't understand. It comes through the water. When we got educated and we got enlightened in the science, we found, oh, they have bacteria's and in the microscopes it has been there. It's just us who's been ignorant to their existence due to a lack of our understanding. Now, space is the same.

It's that river of knowledge we have to tap into and see which part we haven't understood? That the life exists in that point, in that position. If you've been hiking, they always tell you, never drink of a running brook. Doesn't matter how thirsty you are. But you can drink from a spring where the water comes actually out of the ground. The same spring you saw is 20 meters higher, you don't drink 20 meter lower, because you know where the spring was. You don't know what has been contaminated in that point, from the start to the bottom. Usually at the spring, you have no contamination or less contamination. Down the line, other energies added to it. The rats, the mouse, the deer all drink from the same brook. So it's the same in the Universe. You have to find out what lives in that rivers of fields. Even there is no planet, even there is no life to you, but it could be a colony of what you call, (2:10). Covid plasma energies.

So, there is no way, no way, anywhere in this Universe, which there is not life, or you are in it, is part of a bigger life, that you don't observe it, because you are too small to observe. So, there's no dead planet. You can immigrate. You can ?? own it and immigrate to it and colonize it. But watch what's underneath of you, because you thought there is nothing there.

Any other questions?

K- This colonization will bring a lot of interesting, what you call, data on it. It brings a lot of new research and understanding. As we said, we are prepared, we are preparing for colonization and it has to be in a real state stage. I'm sure within next few months you hear more about Keshe Foundation program and other satellites colonization. And most of you in one way or another who've been regular with the Keshe Foundation have participated in that understanding and growth and trial and test.

We foresee colonization if things go the right way within the next two years. On the book. (2:12). Our conservative people talk about 8 to 10 years. But technology development is so advanced, that two years is quite feasible, even a year from now is quite feasible. You've got to understand once the governments allow the new plasma gravitational system to replace the rocket space technology there will be an evolution in the whole of the space industry. And we see this announcement within the next 12 months even, maybe much, much sooner.

If everything goes the way is set out, we will see a total change in the space technology of the present time. This is not what we think might happen, this is what we have signed ourselves to happen. So, Musk and NASA will become part of the history book of the space technology, within a few months. Because other governments have decided enough time has been wasted in propulsion.

We have not wasted, we have reached the limitation of cargo carrying, food carrying, life's and ???. We need, we have to look at the new ways, new understanding. And the new way cannot be under the man made system. It has to be replication of the Universal work. Replication of how life exists in multi-facet, multi-direction, (2:14). like Earth. We move, we create heat, we feed, we create life. We create dimension of emotion and dimension of presence.

If energy transfer from a star has become a planet which has all these facets, cannot be that difficult, once you understand the process. We have understood the process and replicated it. So, once it taps open, it will change. And we were silenced to steal, to abuse by the Belgians. And other nations have broken rank. And this technology has opened up. Very soon you will hear.

The collaboration with the Keshe Foundation with the most powerful nation on Earth, has been signed and sealed. And you will see, Keshe Foundation, you supported for years, is what you supported and what we came here for. Irrespective of bunch of pedophiles in Belgium, or from the head of their nation, to his servants and the police force. But it was a good thing, because it allowed us to go with it, and correct a lot of things, develop a lot of things.

Any other question?

Q: .. About the waters. (2:16). Normally, cities are taking the waters from rivers and treating them with the ?? flocculent Aluminum to precipitate the contaminants. But all

this is contaminating with Aluminum and they can't get rid of the chemicals. All these waters are not really good for people to drink, are they?

K- We see in the places where they do this, certain collective diseases. We... Nowadays, in a larger scale, we look at the local and national structure of the processing of the water, and the effects on the society which uses that water. And certain diseases, certain behavior comes from it. For example, one of the biggest studies goes on, is on big cities, like London. How this cleaning up and processing of chemicals, and returning the water back into, has created a massive problem for birth control and birthrights. Where the big expansion in the use of contraceptives by women, directly feeding into the waters of the city of London, and then been cleaning up, (2:18). for reprocessing, for consumption, recycling. In being drank by both men and women, has reduced the sperm counts in the men. And it's one of the biggest problems in large cities.

So, the effect of these chemicals used, we already know. And they create certain specific problems in certain countries for what is used. So, it's not something new, but it does exist and you are very correct. But you have to see where this cleaning of the water has ended up, and what is used for and what is the effect of it. We see the farming, a lot of cleaning water has been read into the farms, because it's not good for human consumption. But what is not counted at this, now as a part of food, has become part of the human consumption cycle.

So, we'll change. A lot of things will change in coming time. New technologies. We are not the only alternative. New, as we heard from our friends in Mexico, new ideas, new interaction between what you call, fields, different fields of science, will bring emerging technologies which help us. But we cannot use it just, because we use it in one place.

Q: Yes. I personally use natural fountain water. I produce quite a bit of Gans water daily. (2:20). But I've offered this process to the processing plant here, but they don't... they're not interested in doing it.

K- Because they have to spend money on it to do it. They have... this is one of the problems, changing the course. If you get yourself, if you get one country or one government, do what you do and show all the benefit of it, they all jump on it. But that breakthrough is important.

Q: Yeah, well I'm helping a lot of people, about 100 to 200 people come along every month to fetch the water, and they... once they taste it and drink it, they realize they can't drink any other water. Be it processed, be it from deep wells or whatever.

K- You create an emotional connection with this Gans water. It's because, especially when you produce like CO₂, you have a certain amount of Zinc in it. So, it affects the emotion. We saw this with Lisa and Jim in Australia with their lettuces. People were picking up their lettuces, and they wanted that specific. If you remember years ago, they were telling us. They do better in supermarkets, than when some people pick up. Because you receive what we are short of, so the body goes for it, subconsciously. I know how

you live, I understand. And how you produce these waters. You actually touch the emotion with it.

Any other question?

Q: .. You mentioned that in the monthly meetings, a "child of the Earth" should be begotten by those involved? Can you tell us more about it?

K- Can you repeat that?

R: You mentioned, it says, you mentioned that in the monthly meetings, I'm assuming the ... one of the flight meetings.

K- Yeah.

R: A child of the Earth should be begotten by those involved. Can you tell us more about it?

K- Explain what you mean.

R: Okay, well she'll have to, or he or she will have to put that in the chat.

Q: We can go to the second question now. It says, you said a month ago that world peace would be proclaimed in hours to days. Can you tell us more about that?

K- It's been settled. This is very interesting. Even you see separate things happening in different ways. The basis, fundamental world peace basis, has been settled. (2:24). So much so, that the Chinese have taken lead on this and economical power of them is dictating it.

The hot spots of the war, past 1,500 years, has been Middle East and the strong influence of the Americans. We saw the same thing in Africa for a long time with ... between the Communists and the rest. And this situation has been settled two ways. The basis for the world peace is now fully grounded by the Chinese. It's the beauty of the leadership of president Xi of China. They pushed the... they stood on the sideline they didn't take sides, but they pushed the mighty power, of purchasing power, to influence those who are purchasing from them. That you want us to purchase, this is a new way, find a solution.

American pushed war between the neighbor country of Saudi to create, to bring Iran into war as supporting that country. And it was very lucrative for Americans and Israelis. They sold everything to it (weapons) and the Saudis line it with gold, black gold. And Chinese came in said, the stability comes when we have a continuous supply and there is a peace in Middle East and Persian Gulf, in that part of the world. (2:26). The wisdom of military did not work. The wisdom of finance and collaboration worked. So much so that this week, Iran, after seven, eight years, has opened its embassy and consul in Saudi Arabia. We see the same thing. United Arab Emirates canceling a number of military agreements with the Americans in favor of collaboration, bigger expansion with China. We've seen a massive injection of 100 billion by the Chinese into gas lines of Iran. And they want to make sure these gas lines are never been damaged, or there is nothing ??. They needed this peace, economical peace, so with Saudis.

We see the same pattern in Africa. And next month's meeting of the BRICS with 20 new nations on the board, lining up to join, devaluing the dollar. And this now has pushed the Americans to change direction, more maybe short term, trying to get nations back, but long term, knowing they lost the ground to the Chinese. President Xi uses this for a very prudent way of doing it, because they push with their massive construction companies that we give this, but we do this. China might lose long term, but short term, will guarantee the long term success.

And we will see the same, very soon in the next few months in Ukraine. Vatican will pay heavily for their interference in Ukraine. And we've seen it even in the past two or three days, (2:28). by breaking up the dam in Ukraine, either by accident or deliberately, a huge plan by the Western allies to push the war into the line of the Russia and maybe beginning of another war. A huge number of soldiers and hardware have been washed down the ?? Rhine (line). They don't tell us in the West, but military reports, official reports in military shows hundreds and thousands of vehicles have washed down the line. So all their promises of getting back now has become a bigger danger with other things. But China will be the beneficiary of this dam. They will rebuild this dam. No government has the financial backing and the material backing of China to build this dam. Billions of dollars.

But with what we see sitting in the side of the Keshe Foundation with the support, agricultural support, and new technologies, Ukraine and grain breadbaskets will soon be replaced by China. By (2027 to 2030) China will become an exporter of grain, replacing Ukraine. This is the biggest mistake Vatican made in encouraging this war. And Americans will pay for it more heavier, because the Chinese grain will not be, what you call it, (genetically) modified. And the Keshe Foundation will have a huge hand in this development. By 2027 - 2030s China will become a, one of the major, (2:30). natural, normal, beautiful, Non-GMO (seeds). Which again pushes the Americans back and all these, so many debts we see in the farmers in Africa and Asia, which they cannot, every year they have to buy the seed.

So, in general, we'll see a massive change of shift. But it has to be fundamental, it cannot be by talk. We know clearly, situations like Taiwan will be resolved by Chinese in a very amicable way, because they're making, trying to use as a hot spot. But, we'll see Taiwan to become part of the mainland China, in next 5 to 7 years.

Chinese don't go to war, they don't go to war to create war to get. They use wisdom, and it's the wise way to do it. And the only beneficiary we'll see, it's a long term, is Chinese. And they use that for peace. And the seed for the world peace has been set by the Chinese leadership. And you will see it. They tell me I support Chinese a lot with this and that. But we sit there with reality. We sit, we watch, we've been part of the structure. And we see how the changes are coming in. What comes in the Western newspapers is a bunch of lies, which is only (to) lie to their readers. That's the only way they can keep their, what I call, "colonial time" alive. But in fact, there's no colony left. (2:32).

As a Chinese ambassador told me once in Brussels in 2010 - 11. He said, now colonization comes with science. If we get hold of scientists like you, (You) are an "oil well," we become rich. No more lands can replace the new technology and sciences that scientists like you bring. And that oil well has landed in China. And we see the whole angles of the development. And it's not based on military might, it's based on fairness and what we call, development of the peace. We make more money out of peace than the few factories making guns. The only people who make money, especially in the West, is the Church and the gun manufacturers. They kill, and the rest of the family pays in every weekly prayer to the Church.

And this is what has to come to an end, and it has come to an end. So, it has started, it's backed, science and technology is backed by the most powerful nation in the world. And you as citizens realize and see it gradually in the coming time.

Any other question?

Q: They promised that the compact units would be shipped in the second quarter. (2:34). Can you still keep this promise due to the current situation?

K- We are trying to, yes. We try. If we don't do it second, we do it third. It's development which we stop and we just go for mass production, yes. By end of June or in early second quarter, third quarter, we start shipping everything out. This will be done before we close all our operations in Europe.

R: And can people still order products and so on?

K- Yes, that's...

R: Still being delivered and all that?

K- The structure is that our shipment, everything will move with our staff. Our staff will move, most of our staff will move to new locations. And the exhibition center will move to two new locations, most probably we know by end of next month. And, as I said, we move out of the mainland Europe. It's not in favor of our work. But, we will have a distribution center in Europe, for the products.

But the product range will increase massively, in next 12 months, maybe two years, the product range of the Keshe Foundation will move, increase massively. And it'll move out of the hand of the Keshe Foundation. It'll be, we are still part of the organization, but we concentrate on research and development, and our partners do the commercialization, (2:36). and the marketing, and the rest it's their job. This allows us through technology to influence the products, to influence the, what we call, what we see as the outcome.

This works perfect for us, because for us, we did enough to show the technology works, making the small things. But now, this has already moved, it's not something is going to be done. Our team are working on it, even this morning before coming on I saw messages. So, in next year, two years, you'll see products from two or three hundred to tens of thousands. And, in the background, it'll be logo and confirmation, and you know

when the name of the company appears, Keshe Foundation is part of it. We've gone that way. We are in development of a space science technology, not in marketing, but we had to do it to show the technology is correct and is applicable.

But, you will see a new brand and a new structure of marketing. Because, this is where we always went from Knowledge Seekers now, is in the hand of professionals, it's in the hand of governments, to launch the Keshe Foundation products, not in our hand. And we are major part of the ownership and we are happy with it. It allows our team to do what we came here, to bring new technologies, to bring the change.

But, collectively we'll see European depots in a very, very large scale, even bigger than Amazon in the next 5 years, both in America, and in Asia and in most probably Africa. (2:38). We have signed ourselves to this agreement, so it's not talk we might do. It just needs to go through the process.

And you, the teaching will carry on as it is. The timeline as I explained earlier will change, because we'll change our headquarters of operation. And at the same time, the product range of the Keshe Foundation in the banner of a new organization, will appear internationally. We are backed with a massive, massive structure. And we have signed sealed agreements, it's just that we have to learn how to operate within this new environment, and they have to learn how, or to adjust themselves with new technologies. It's a growing process, and it has started weeks ago. And even our own teams are learning how to become part of it, organize themselves to be in it.

And, as I said to you a few weeks ago, Keshe Foundation Technology will bypass Apple, Microsoft and the rest in the next 5 to 10 years. Because it touches everything, from agriculture to energy, to food, to space, to health. But we have to be very prudent and our partners are very, very quite careful. And step by step we have to confirm, we have to deliver and step by step we've done that. And it'll go that way. So, you still get your products, (2:40). you will see much more, much more bigger product range in 20 - 30,000 in next two years it's more or less very feasible. And everything will carry the Ethos of the Keshe Foundation in the process.

We have (emerged) out of obscurity in a very big way, but we needed that to grow. Even maybe the cause of losing so much was to bring us to where we are now. And very soon you will know, I presume many of you can guess where we are going. And we are committed. We sign agreements and when I sign an agreement I stay to it. Without a doubt we become one of the biggest corporations in the world. In next few months, years. We are part of a bigger organization. And we are only involved in research and development of the new technologies and new structures.

That's thanks to all of you and all of you who support us in the background, and many of you, you've been called upon, we kept a track of everyone who's done something, not just because you made one Gans's, or you are a good things, whatever. You'll be brought in to specialties of the jobs we need, and we flourish. The teachings will not stop. We have

guarantees that the teachings will carry on. And the product range and the deliveries, is all will merge into this one ?? organization next year, or two.

Any other question? (2:42).

Q: .. Will Turkey have a new position regarding peace?

K- This is a very delicate position Turkey has taken. One of the reasons for Erdogan winning the election last week, 2 months before the election, he was very far behind. And he needed certain support to get to be re-elected. And the major person in creating that support is one of our close Knowledge Seekers. Very good friend of mine. And we are very much aware and in touch with the situation in Turkey through his operation. He's one of the devoted Knowledge Seekers for years. He's a very high-ranking diplomat. And we meet quite frequently with him. He's a family friend, become a family friend.

And it's... he told me he's going to change it. and he puts his life on it, that he'll get elected and he managed to do it. We see very important role for Turkey to play for Erdogan. But you have to realize he suffers from a very severe cancer. The biggest problem for Turkey is not while he's in power. Would he be able to hold on for another 5 years? Or maybe 10 years? (2:44).

And the geo-politic of Turkey will touch the operation of China in Middle East. And this is very, very delicate position. How much Americans will try to entice him and what we've seen the bilateral and combination of meetings between Iran, Syria, Turkey, Iraq in resolving the situation is very important, because he had to relent to the Chinese. You have to understand the political situation Erdogan is in. And China again played a massive role in this discussions and what we'll see as a peace in this part of the world.

The earthquake was part of it. Turkey does not have the financial backing to reconstruct this massive earthquake. And guarantees through Chinese construction companies will bring him relief. And it'll be paid in a way we know how. It's been set to be paid in a very, what you call it, physical way. And Erdogan to get that, to re-elect and to be there, had to relent to peace applications and pressures of the China with the, what we call, quadruple nations. And in the background he had to kick the Americans and turn back on the Israelis. But this time he cannot jump just to get re-elected. (2:46). Chinese will hold him to this.

And now we see a lot of... Erdogan talks, but position of power has changed in his operation. And Chinese have a lot of say in the process of changes politically in Turkey. And we'll see in the end of interference of what you call, Americans in that part of the world. When you look at these things and when you speak about the person, you have to understand the whole culture he set up. As we say in English, Chinese have got him "by the short and curly's." And he will stick to it. He will not budge and we'll see the peace process in Syria will complete in a favorable manner for everybody.

The biggest problem has been to resolve the situation in northern borders of Iran on the, what we call, Russian satellite countries, which now they think they have a power and they've gone in "bed with Israelis," but the tale has been cut. Again with this agreement. So, Erdogan has a lot of freedom, but he cannot... domestically he is very powerful, but internationally to stay in power he had to give a lot out to the Chinese. And to get it he had to say goodbye to a lot of American's agreements and you see more and more of it. (2:48). We'll see a peaceful in what we call, West Asia East European zone in next 3 to 5 years.

Any other question? Shall we call it a day?

Q: .. What does it mean when someone has two different eye colors? There are two different colored eyes, I should say. And what does bloodshot eyes mean for the Soul?

K- Then you have to ask the guy who got the blood eyes shot. The different color eyes usually have a very... two different characters, or not personality. And they're usually very pleasant people to be with. I have a couple of friends who are like this. And I tell them sometimes, I used to tell them, "can you close your eyes on one was green and one was blue?" And I used to tell, "can you close the blue eye and tell me what the green eye thinks?" And then I say, (2:50). "okay, close that eye and tell me what the other eye thinks, for the same emotion." They say, "no, it's the same." But when you sit there, they change part of the story. So, it has an effect. And she was a very close friend of the family and it was interesting. I did a lot of tests on 2, 3 of them like this. It's like the Chinese with 2 different position eyes, but with them is more emotional, with the Chinese is more trust. And I always said to my friend, don't get involved with her, you never know where your emotion sits. The blue eye loves you and the green eye hates you, so you never know which one you are.

Any other question?

R: I think you did pretty well today with the questions, thank you.

K- Thank you very much. There's something which came up through, with the picture which is on the screen, in the today's teaching. We start seeing the real side effects of Corona. As long as we can connect to it and understand it. And the smell, behavior, new cancers, new conditions that we should not live in a way with all the way, but with a new way with the Corona, we have found new opportunities to survive them. What one of the parts is people who had a bone mass problem and they got Corona, we see some correction in their lifestyle. (2:52). And so, it hasn't been all bad with Corona. It has had, but we have to look into it, and be aware to connect to it, to understand that Corona is a Calcium based. And not everything will be bad when you get a virus, because now viruses are part of our daily life, now that we have become man of space.

Space does not have bacteria's, and nothing but viruses. So we have to learn and see which one benefit us and what hazards for us. And we had the first international contact with it in such a large scale. And for second, third time and we'll see the opportunity and

the rest of it. We learned a lot from it as a scientific organization. And I'm sure once man start traveling in space with fields, we'll consider, we'll study the cycle of Corona in a very deep, deep way, to be able to stand the fortunes and misfortunes of space travel.

Thank you very much for today and please join us in this July sessions, because this will complete a very huge part of the work of the research and trials for our work. Thank you very much for today and hopefully we meet you next week. And don't forget on 22nd we'll start at 10:30 to 12 and from July on we'll change the regular time of the Keshe Foundation 9 o'clock in the morning to a new time on Thursday. (2:54). Thank you very much.
