

491st Knowledge Seekers Workshop June 22 2023

(Quick Index 14 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias) No Break today 1 hour 3 min.

Fallacy in present science age & size of U; October 28th Ambassadorial Meeting - cornerstone of space technology in exchange for peace - official invitations by 2 government; Unseen T shown; Calculates kilometers light travels 1 year at speed of light - 9.5×10^{15} km; Circumference of U - 2.7×10^{27} in light years; Circumference of U 2.7×10^{27} in km; Say U is 13 billion years old & Earth is 4.5 billion; Earth has only traveled 2.7×10^{17} ; 10 to power of 10 missing; Numbers fallacy; Einstein fooled humanity; Wrong number - why nuclear stations explode; KS to calculate real number present in October to leaders; Egg yolk round like plasma - oval shell - which is boundary; Key is STP trapped STM - higher strength - H - C14; No assumptions in Knowledge; $E=MC^2$ fallacy; Why Earth kills due to seed & environment

Topic Index

Uncover fallacy in "speed of light" & size of U; Ambassadorial meeting October 28th & 29th - 2 governments signed with KF - implement new technology (T) for peace; As student questioned validity of speed of light as ultimate speed scientists could not answer - huge mistake by assumptions; If use wrong info in transmutation end up in another U or middle of non-existence; Same process for matter state travel as in U; Still using mistakes of 18th century - not changed; Einstein's assumptions are fallacies; Ambassadorial Meeting supported by 2 governments - invitations sent government to government; Revolutionary delivery of T - share with everyone; All embassies in London invited; This time no problem from Belgium's bombarding embassies with false emails; Ambassadors & high ranking politicians attending - decision makers; When KF invites governments attend - Italian conference Israelis & Palestinians - Pope sent Prince of Malta; Meeting will be cornerstone for World Peace in exchange for new Space T; Soon flagship nations with KF will be known; Limited seats KS can attend - part of change; New T not seen before shown; T will take us outside Earth; October 28th most celebrated day - start of change for humanity; Leads into meetings with leaders in 2024 - 2025 - Earth work as one - collaboration of world scientists; Memorable event - MOJHANS tempted to transmute for first time; T will be delivered level we said it would; Wikipedia shows accepted values of speed of light by scientists - all false - have to rewrite books; M fields travel faster than speed of light - by magnitudes; Scientists couldn't answer Mr. Keshe question because given false knowledge in education - but they stick to it; Calculates how many kilometers light travels in one year at the speed of light; Speed of light - a cornerstone of present scientific understanding - if it is wrong a lot of things are wrong; Light travels roughly 9.5×10^{15} kilometers in 1 year; Cosmologists assume this is correct - they base everything else on this number; Calculations made in 18th century confirmed by Einstein and others - used still today; We have limited ourselves to this number in matter state - Soul travels much faster; Circumference of U calculated at 2.7×10^{27} - this is how big they say the U is; They have made a U out of this number - all accept it as a fact; This is 1 day in lifespan of our U;

Huge number with 27 zeros; This is public knowledge - but we don't accept it - it is false; Even worse mistake scientists say the U is 13 billion years old and Earth is 4.5 billion years old (not light years but Earth years); When you calculate how far Earth has moved through space using the base numbers for the age of the U at 13 billion it only adds up to -- 1.8 times 10 to the power of 17 -- and remember U is 2.7 times 10 to power of 27: Numbers don't add up - missing 10 to the power of 10 - kilometers (27 minus 17 equals 10); (A KS who understands how Mr. Keshe is getting these numbers and what they mean - should explain it to us in simple terms for example if a Soul is leaving Earth wouldn't the diameter of the U be more important than circumference?); Scientists have made up this fallacy about age & size of U - sticking to it for centuries; Cannot send you into space with these fallacies of human mind - many problems; Asked KS to do the calculations and bring them to us next week; Rewrite science books; Brought these figures to IAEA & British Nuclear Fuel scientists - this is reason can't control nuclear reactors - using wrong data - this is matter state - radiation from neutron is in plasma condition - why nuclear disasters happen; First time brought fallacies to public - ignored by scientists; All assumptions in nuclear T wrong; KF uses plasma and it works for nuclear accidents like Fukushima - science & reality match up; Understand volume of spheres increase by order of magnitude - same with plasma; No plasma scientists believe U is 13 billion years - it's actually trillions of years old; KS - come up with figures that make sense to common man; Earth 4.5 billion years is nonsense - plasmatic fields millions of times faster than speed of light; Transmutation T correct - used plasma numbers from beginning - speed & strength of plasma - but speed becomes irrelevant; Speed is not time of life in U - transmute in D of fields - not matter state; I know how to make numbers match - hidden in Book 3 and back to Book 1; Explain collectively to scientists the truth; Or has KF made a mistake - then our knowledge comes to a halt; Those numbers put us close to center - but we are on the edge; No scientist from all schools able to answer his questions; To find Soul of mother who died calculate time since death and multiply by speed to get distance - measure distance from Earth - look in that layer for mother; Have round yolk and oval egg shell - which one; Gans plasmas are spherical - U is spherical; Is yolk or shell size of U? two don't match; STM encaged in shell of egg by Ca - not able to travel true speed; Key to understand Creation is how has STP which is weaker - trapped the STM a stronger plasma within itself?; Find common denominator in life - H - why Deuterium part of transmutation cycle - it becomes like C14 line of communication & connection; These numbers are taught in all school to children - becomes ingrained - creates problems to learn plasma; $E=MC^2$ is a joke - if you understand speed in plasma T; In Creation there are no assumption - means you are wrong - have to clarify uncertainty; Einstein not a scientist too many assumptions; You are accountable to yourself for what you learn; If you use those numbers end up in different U; Is U yolk or egg shell; Einstein managed to fool whole human race; Show you Reality on 28th October; All universities in world have to come together to work on this new T - not for a nuclear bomb - but for a change and peaceful world; Nuclear radiation has a strength power that man has never found out yet; Why when it runs out of energy - then explodes; Have not understood how it works; Go faster than radiation build system stronger to absorb it - don't need plutonium - used Gans's in Fukushima; Meet your Mother who is creating a star in the U; Better to create new stars at edge of U to expand out into Unicoise; Even little boy can figure out Einstein was nonsense; Have to

rewrite books of K of U - but need to understand so don't make same mistake; We put limitation on child and future life in Space when teach wrong knowledge; Things have to make sense to us - to learn; If M fields faster than light why don't we see light when put 2 magnets next to each other; See light when Sun fields interact with Earth's; Light at bottom scale of speeds in U; Man's knowledge lacks a lot of truth - but our grandchildren will have new knowledge; Harm to science by narrow minded race of Jewish men - pushed to change science - Einstein - Netanyahu tried call KF space reactor Iranian nuclear bomb - brought IAEA to Tehran - stopped it; Need to accept truth about Creation regardless of race - religion or color; One day erase everything Einstein did - he put huge limitation on man's understanding of Creation; As a leader said - we'll rewrite books of science; We don't put any limitations on speed; The actual speed of light measurement is only a fraction of true speed - measured only visible part; All television programs have to be changed - literature rewritten; Give KS platform on 28th October to confirm age and size of U through plasma science; Better if a number of KS come together to teach leaders - I will stand next to you on platform; Cannot transmute you with present knowledge; Knowledge & T have to make sense - KS won't allow fallacies anymore when numbers don't add up; These numbers put us in center of galaxy - compression of fields too great for this kind of life to survive; Fierce KS get to work - bring the change to our leaders - you do it - show how we all got tricked; Today's teaching will become science of KS; Do calculations for MaGravs - I'll tell you more; It's the acceptance of truth by yourself and nobody else; Not indoctrinating you - explaining what doesn't make sense; Scientists were too afraid to tell truth when they saw discrepancy; A lot of things needed to be able to transmute you; Put STP inside STM; New science means new cosmology - everything else changes along with it; A new way to create gravity and M fields; Redefine science - create true science of space T; Please start calculating the age and circumference of the U - find out if I am right or wrong and we'll discuss it next week; British billion is American trillion - Mr. Keshe uses 9 zeros for billion and 12 zeros for trillion; It doesn't matter - still way off; Easier to calculate on 10 to power of 12 - bigger dimension closer to speed of M fields; 12 zeros weakest M field - M field strength goes to order of 20 to 40 zeros; Soul that created Earth also has killing in it - consider both the seed and the effect of the environment for reason why we kill; Like Gravitation and Inertia; Planets not tilted don't have seasons - always in balanced state; Trillions of Souls from Earth that spread killing throughout U only a speck of dust compared to U - still need to clean it up; Please do your work to understand more - prepare for the Ambassadorial Meeting on October 28th and 29th - we want KS to use this forum to bring the change to the world of science.

Introduction to 491 KSW - Age & Size U Fallacy - October 28 Ambassador Meeting - Egg Yolk or Shell? - Why Nuclear Explosions

This was a short but very exciting workshop. The really good news was the scheduling of the Ambassadorial Meeting in London on October 28th and 29th for exchanging the space technology for world peace. The hint given about being outside the Earth, was perhaps related to the planned colonization of Moon and Mars. The big difference between this conference and previous ones is that the invitations to all ambassadors and high ranking government officials will come through government to government

channels, and not just KF by itself. New technologies will be shown, that even Knowledge Seekers (KS) working with KF have not seen. We hope this will be the prelude to the Change, and it will also set the ground for working with leaders for technology transfer in 2024 and 2025.

Mr. Keshe gave a big push today to get the ball rolling for the conference by exposing the fallacies of present science in regards to the size and age of the Universe (U). This is the first time in public he has taught this. Throughout his life he has asked cosmologists, scientists, and nuclear physicists these kind of questions but they can give no answers, other than what is written in the books they learned from. For some of us today's discussion may be a little hard to follow, but keep in mind this was only a brief introduction to this topic to get us KS interested to carry it forward. More than 200 years ago scientists of the 18th century came up with some theories about the speed of light and age of the U. Over time what they said became accepted as fact, and in the 20th century big named scientists like Einstein said they confirmed that those figures were correct. So even today people still believe it is fact, because it was said by Newton or Einstein and written in the books. Today, Mr. Keshe fearlessly challenged the accepted norm as a fallacy. That even the cherished concept of $E=MC^2$ is nothing but assumptions by a non-scientist who managed to fool the whole world.

One of the problems people have understanding the new technology is that they generally accept the matter state as the only reality. They don't know that matter state is really a plasma state at a lower field strength. This requires an open mind to accept that the 2 states can exist together, and that by doing experiments you can discover the effects of the plasma state. This is what we are doing with the Nano materials and Gans's. Mr. Keshe has challenged us KS and especially those among us who are orientated towards science and love the plasma to come up with a formula that will express the true size and age of the U that all of us, even the common people can accept. When you ask scientists to explain something that doesn't make sense to you, they usually say, "it's has to do with a complicated mathematical formula that you won't be able to understand." Now after today's teaching we are not going to accept this anymore. Those who really have the knowledge of reality can explain it in simple terms everyone can understand. This is what Mr. Keshe does for us. Now it is our turn to help bring the change by getting together as KS and coming up with a formula, or a way to explain the true age and size of the U in terms of plasma. Mr. Keshe said, he will stand next to those who can do it on the platform of the conference on the 28th of October. This is our chance to explain the true science to the leaders and decision makers of the world. We all should focus our intentions, that this conference is a success and the start of the change.

So if you also had trouble understanding today's teaching don't worry, he said he will go into more detail next week or in upcoming teachings. Because we need to understand this and have the correct knowledge to be able to transmute. The example he gave is that if we use the assumptions by scientists of 200 years ago and try to transmute ourselves, instead of landing on the Moon we might land in another unknown U. The biggest problem was that they said the speed of light is the ultimate speed and that immediately puts a limitation on whatever the Man is trying to do technologically. The truth is M

fields are billions of times faster than the speed of light. So if you calculate your space flight at the speed of light to go to the Moon, but as you are using plasma fields and M fields are way faster, you would "overshoot the target" by an unimaginable amount.

This is also part of the huge problem in the nuclear industry, they are using wrong information and knowledge about radioactive materials and that's why they have nuclear accidents. First off, they don't want to accept that the radiation from the neutron is in the plasma state and not the matter state. Somehow the plasma runs out of energy, maybe because they are using matter state constants like speed of light to do their calculations and then it goes into explosion, because the heat cannot be contained. With the plasma knowledge you can create a stronger field to absorb the radiation. This is how the Gans's were used to contain the nuclear accident in Fukushima. It's not more and bigger, that is better, rather it's having the knowledge of how to create the conditions for what you want to do.

Recently Mr. Keshe started asking us to think about why the egg shell is oval and the yolk inside round. It's the same with how we draw our eyes with the colored pupil round in the center representing the Soul of the Physicality (STP), and the oval appearing white part of the eye, as the Soul of the Man (STM). He alluded to this again today when he said, what are we measuring as the size of the U, the round yolk or the egg shell? He said, the round part is the STP. My understanding is that if this U is a plasma then it has a Soul and a STP just like we humans do. So what are the scientists of matter state measuring when they give us an exact number for the circumference of the U? Is it the space between galaxies? If all the galaxies make up the STP of the U, then where is the boundary of the shell, or is the true boundary the "Soul of the Universe," which is non-tangible? Since the scientists don't accept that there is an energy center we call the Soul, how would they even consider it. Their knowledge is so Earthbound they would never be able to travel in space.

Some of us might not understand clearly what these measurements are about. The distance light travels in 1 year at the speed of light was easy enough, and that was given in kilometers. How the scientists came up with the circumference of the U and the age of it being 13 billion "Earth years" old are much more technical and need a lot of study. But how are they determining how the Earth travels through the U? What I understand is our Earth is traveling elliptical around our solar system, which rotates around the galaxy, which rotates around the U. It seems unlikely that we are traveling in a straight line directly out from the center of the U, since all the orbits appear to be elliptical around a center. I thought he said all the planets are slowly moving into the center of our Sun to be reabsorbed as energy. As in macro so in the micro. So after the energy fields go outwards from the center of the U, and then interact to become matter state stars and planets and galaxies, then do they start moving back inwards towards the center of the U to be reabsorbed as energy. We have to clarify all these things if we are going to try to explain it in terms of plasma to the world leaders. The other important issue is, that if the U actually works on the plasma system, which we know it does, then what we think we are seeing in matter state may be very different then the reality of it. In terms of M fields it may be very different. Maybe that is why Mr. Keshe put that question about whether the

U is the egg shell or the round yolk. We know that the Gans's are spherical so a plasma is spherical, maybe the "STP of the U" is spherical and the "Soul of the U" is elliptical. These are questions that can only be answered by deeper understanding of the plasma. This is our job to get ready for the October 28th conference.

If we could understand how the STP has managed to entrap the STM, who has a higher field strength than itself, then this would be one of the biggest keys to open Man into understanding the world of creation. How it is that the weakest is able to hold the strongest within itself? The hint given was that the common denominator of all life is H. And we know that in plasma science H is the basic building block of all other plasmas, but in terms of the M field strength, and not the matter state of it. This is also why Deuterium is part of transportation system as it behaves as a C14 and is the line of communication between all things and the connector.

Since M fields are faster than the speed of light and over take light, then why don't we see light when we put 2 magnets next to each other. We do not see light. But when the M fields of the Sun pass over the fields of the Earth we do see light. This is what we call our daylight. The only hint I got was that, this shows that field strength of matter state light is at the bottom of the scale in terms of the fields of the U. And something about it not being able to absorb higher strengths ?? It's a question.

A question was asked about how the killing got started on this planet. Did the "seed" of our planet that came from somewhere else cause the killing? Mr. Keshe said that it was a combination of killing in the seed, and also the fields of the environment. But what does that mean? Is the environment the MG fields of the point in space where the seed interacted with to begin life? Or was it that our Sun had already manifested itself and then the seed was added to it, that together they created the killing? Then he said, that the trillions of "Soul Life" that have left this planet with the seed of killing is like a speck of dust compared to the whole of Creation. Nevertheless, it needs to be corrected. And once he said, if you correct it at the root, all those Souls that already left Earth will automatically be effected, and the killing will end.

Other topics:

It will take all the universities to work together on the new plasma science for many years to come. But we have to start. Similar to what many nations did to create the nuclear bomb, only this would be for peace and a new life for whole of humanity.

There are no assumptions in the U - everything has to be clarified and understood. So there will be no room for ignorance, deception, and enslaving the others through their own uncertainty.

Thank you for listening.

Quick Index

Today's teaching is only one hour and a half and there are two parts to it. The first part is uncovering the fallacy of present science in regards to the speed of light and the size of the universe (U). And the second part is an announcement about the upcoming ambassadorial meeting to present the new technology (T) to the world. This time it will be announced officially by 2 governments, that have signed to work with Keshe Foundation (KF) to implement the new T.

Please note that we are so fortunate to receive this teaching, as today there is a lot of background noise and Mr. Keshe has to mute the audio when the airport makes a flight announcement. That's why it is broken up, however it's amazing that the theme and presentation of the knowledge is not at all broken. We are forever grateful to Mr. Keshe and the Messengers that without fail for the last almost 500 weeks in a row, have never failed us as Knowledge Seekers (KS) to shower us with the Knowledge of Creation.

(Many years ago when Mr. Keshe was a student he started questioning the validity of the speed of light as being the ultimate speed in the U. He questioned many learned men from scientists to cosmologists, and even nuclear physicists, before and after his time as a student of Queen Mary College in London. Those who understood why he was questioning this, also understood the huge mistake that is being made by these assumptions like, the speed of light is the ultimate speed. Today he explains to us scientifically and digitally, how much we have been misled in the Knowledge of Creation. We need to know this, because when we are traveling we don't want to end up outside of our U by mistake. Or somewhere in a place of non-existence, because we made a miscalculation. It's just like when an aircraft is short loaded on fuel and crashes before reaching its destination. It's the same in the process for traveling the U).

(Back in the 18th, 19th, and 20th centuries the scientists made a lot of mistakes in their work through their assumptions, and today's scientist are still sticking to these mistakes. Now, I will open up the major errors of these scientists. Because if I send your Soul somewhere, we want it to land in the place we intend, and not somewhere else. We don't want to say, "Sorry, the scientists from 200 years ago made a mistake and we are still accepting it." For example, We understanding the fallacies of all the assumptions made by Einstein).

(The most important thing for today is this announcement we making for the upcoming ambassadorial meeting in October by a major government and the KF. As you've been with us for years you probably remember the earlier ambassadorial meetings in and conferences we held back in 2009 to 2011, where we gave lectures and presented the new science to the governments. They were called, 'Ambassadorial Meetings and Conferences'. The first one was held in Nino. Then some years later we gave an Ambassadorial Meeting, where we presented the MaGrav Technology, which is one of the most powerful technologies given to humanity. The ambassadors came and received it at the meeting).

(Now we are announcing a new ambassadorial meeting, but this time the meeting will be supported by two world governments. KF will we set it up, but the support will come

from two powerful nations to make sure the ambassadors of that nation and other nations of Europe will attend this meeting. (It will be a revolutionary delivery of knowledge, because all the governments know we are here to share it with everyone)).

(The ambassadorial conference has been put on the KF website this morning and will be held in London starting on Saturday after 7 PM on the 28th and 29th of October. All the ambassadors will be invited and some powerful politicians from Europe will be attending this meeting. It will be the governments we work and not the KF that will be inviting these politicians. Among those invited are some very high ranking British politicians).

(This meeting will be a prelude to 2024, for what we call, 'World Leaders - Technology - and Space Plasma Technology, in exchange for world peace.' This time the invitations will come through the supporting governments and the KF. We will be part of the providers of the technology. All the embassies from around the world in London will be invited).

(The reason we are going with the governments is because before people started bombarding the embassies with emails and creating all sorts of problems for us. This way the invitations will come through official channels from government to government. So, there is no use for them to be writing all the rubbish which they did. This time we asked the embassies to forward to us who and what they are receiving. There are a lot of friendly embassies, especially the two governments, which we work closely with. There are a very limited number of places. But we are asking KS to join us on October 28th and 29th in London. The event will be held in one of the most prestigious locations in London, because we are representing KF and two powerful nations for this conference. With the support of the nations we'll announce the development of the new technology).

(The conference will be held over 2 whole days of both Saturday and Sunday. On Saturday night at 7 PM we will invite you as KS to sit and discuss your point of view with the world Ambassadors and high ranking politicians. You will discuss with the decision makers what this new technology will bring and what it means. The reason we are doing this is because KF has already signed agreements with powerful nations for delivery of the Space Technology in a very (direct) way). (And you who have been using the T and understand more about the knowledge will present that in the conference, and this will help the other governments see that the change really has come. And hopefully they will join in).

(Pictures are shown of earlier peace conferences attended by world ambassadors, and even Palestinians and Israelis were sitting in the front row. On the far end you see the Vatican's ambassador, the Prince of Malta who was sent by the Pope. When we invite, world leaders turn up. In the Nino conference we had other ambassadors who turned up, and there were important changes to American policy).

(This ambassadorial meeting will be the cornerstone leading to World Peace in exchange for the new Space T. It also means receiving the knowledge that goes with the T. Sooner or later you'll hear about the flagship nations that are working with KF. So, if you want to

be part of this memorable event in the history of mankind, then please apply soon, because there are a very limited number of places for KS. The same goes for people outside the KF who are not KS but want to be in this conference. New technologies will be shown, that have never be seen before. We have the permission of the two governments we work with to show these in the conference. (This conference will lead into a meeting with the World Leaders in how to apply the new technology. If you want to be part of the change, then you can come and put your ideas and questions to the world ambassadors and leaders).

(This will be a beautiful beginning for the release of the KF Technology in exchange for peace, and (?? it will take us outside the environment of the Earth where we don't have nationalities). The 28th of October will be one of the most celebrated days in the history of humanity. It will take place in London at one of the most prestigious hotels with hundreds of people attending, including ambassadors, government officials, possibly two or three Prime Ministers will be invited. High level government officials who are the decision makers will be in attendance).

(This will ?? carry on into 2024 and 2025 exchanging space technology for peace with the world leaders, and (?? something) outside the Earth. The Earth will work as one. In the past 2 or 3 weeks you heard the prelude to this by nations announcing collaboration with world scientists in space technology. (What KF is doing will come on the back of this, and a lot of other things, which we have received support from the governments)).

(I hope we see some of you at this conference as it will be one of the memorable times for the opening up of the technology. Technologies will be shown, that even the KS who work closely with us have never seen. This will bring the last step for the change. (?? Some what we call, MOJHANS, will be tempted to show for the first time ?? transmutation during the conference). The technology will be delivered at that level we said it would).

(We have come to a new part of teachings where we can show the mistakes of the present day world of science. Rick will show on the screen what Wikipedia says is the accepted science of the day. As we reveal to you the mistakes we will have to rewrite all the books of science. In a way, you rewrite them by yourself now that you understand, that you can travel faster than the speed of light with the strength of the magnetic (M) fields).

(Our current situation with the world of science is like what they said more than a century ago when the new automobiles were coming out. That if you travel faster than 25 or 60 miles per hour your eyeballs will bulge out. Later were we found out it was all nonsense, because the scientists at that time couldn't understand.

(When I was a student I put this question to the heads of Queen Mary College, and prior to that to the nuclear physicists at British Nuclear Fuel (BNFL), and the only thing I got were "dropped jaws." They could not answer me, because the knowledge they were given was wrong. But now as we are coming to the time of space travel, we have to correct it.

Otherwise, you'll end up in the middle of nowhere, or you somewhere you never thought you would end up).

(Rick looks up on Wikipedia what the "speed of light" is. And Mr. Keshe asks how many kilometers do you travel in one "light year." One light year means how far a ray of light travels for 1 year at the speed of light. Then we take 365 days times 24 hours in a day, times 60 minutes in an hour, times 60 seconds in a minute. You multiply all that up and you get a number. It's a scientific number. But it is a very strange number. So how many kilometers does light travel in 1 year at the speed of light. This will bring us a new understanding).

(The speed of light is one of the cornerstones of the present science and understanding. They think they have determined how many kilometers light travels in one year, at the speed of light. The number they give is 671 million miles per hour, which you still have to multiply by 1.6). (Rick cannot find the number so he calculates it himself).

(Mr. Keshe calculates how far light travels in a year. He says it comes to a very random figure of around 9,460 times 10 to the power of 12 - kilometers. Roughly 9.5 times 10 to the power of 15 - kilometers in one year. The cosmologists are assuming this to be correct, and they are basing everything else they measure on this number).

(These calculations were done in the 18th and 19th century's and afterwards by Einstein with everybody else confirming it. So today we use this number 9.5 times 10 to power of 15 - kilometers).

(The speed of light is the limitation of the matter state when you travel with your physicality (P). But the Soul travels much faster than this. Now we know with the speed of the Soul we travel way beyond this number. But the scientists have stuck to Einstein's number).

(The other point I would like you to check is the circumference of the Universe (U). The number is from the scientists of the 18th and 19th century and we are still accepting it today as correct. But through the knowledge of the plasma and the reality of Creation, this number is also wrong. They said, the circumference of the U in light years is about 292 times 10 to the power of 12. Therefore, by multiplying 292 times 10 to power of 12, by 9.5 times 10 to power of 15, you get an amazing figure of 2.7 times 10 to power of 27 - kilometers. This is the distance around the outer boundary around the U).

(The present world of science assumes that it knows the measurement of the U, and this is accepted by world of science and cosmology as a fact. They have taken a measurement and made a Universe out of it).

They say our U is about 2.7 times 10 to power of 27 - kilometers. To travel this distance around the circumference of the U is also 1 day in the lifespan of the universe. This is a huge number with 27 zeros in it). (Our scientists have told us the size of the U in the

matter state, but we don't accept it as true. This number they gave us is public knowledge, we did not make it up. But we don't accept it).

(An even bigger thing that our scientists made us believe, is that this U is 13 billion years old, and they say the Earth is 4.5 billion years old. That is not light years, but counted in Earth years. They want us to believe that all this evolution, biology, physics, human mind, and emotion, was created over this 4.5 billion years).

(So, let's forget about the light years, 13 billion is the same as 13×10^9 . Then you add it by the days, hours, and then multiply it by 1,600 kilometers per hour, which is the speed the Earth moves (??). Then you come to a very interesting point. (13 billion years means the Earth has rotated that many times around the Sun). (So if we calculate 365 days in a year, times 24 hours in a day, and then multiply by the 1,600 kilometers per hour that the Earth moves (?? through space), it gives you only 1.8×10^{17} . This is calculated in Earth hours. But remember the U is 2.7×10^{27} - kilometers)). (The numbers don't add up!)

(If you are a very clever scientist, or a mathematician, then you see the two numbers don't match. We cannot have a circumference of 2.7×10^{27} as a Universe. They said the U has only existed for 13 billion years, which gives us 1.8×10^{17} kilometers. Ten to the power of 10 has gone missing somewhere).

(The scientists have made up this fallacy about the age and size of the U and all the others have been sticking to it for centuries. Nobody seems to understand or want to understand what the truth is. As a plasma the U has a boundary). (I cannot send you into space based on these assumptions and fallacies of the human measurements made back in the 18th century and are still in effect today, without any upgrade in the knowledge).

(New knowledge and T is needed for man to advance. The new and correct measurements will come through the plasma science. The new understanding of cosmology through the Knowledge of Creation has to be accepted. When they say the U is 13 billion years old, that is nothing, if you think about how long it takes just to make a single human cell. I'm sure a lot of people will do these calculations by next week, and when we come back, we'll write the new books of science and bring some reality into it. The U cannot be 13 billion years old. They are still working on the fallacies of what they were taught in their education).

(I brought these figures on the table with the scientists of IAEA (International Atomic regulators), and the British nuclear fuel scientists, and I said, "this is why you cannot control the heat in nuclear reactors. It's because you've made a big error in the speed measurements." You're working in the matter state, but the radiation fields of the neutron are in a plasma condition. (?? Because it's already done). That's why the reactor don't respond and run out of control, and we get all these disasters. This is also why when we put the Gans's in, we can control the reactors. Now you understand).

(From today you KS sit down and redo the calculations from the 18th century and bring them back next week, and we'll come up with some figures that are realistic and acceptable. Then I can transmute you. Don't forget the speed of M fields are billions of times faster than the speed of light. This is why I said years ago, that none of the science of up to now makes sense anymore).

(This is the first time I put this numbers in public. Before I put them to the scientific world, (but they ignored them). I told the nuclear scientists and professors from UB, that because we don't know the correct (numbers), is why we have these problems in the nuclear industry. This is why we can't control the nuclear reactors. There is a fundamental mistake in our calculations and understanding. All our assumptions in today's nuclear technology are wrong. This why when KF does things it looks like a magic, because then the science and the reality match up).

(The matter state speed of light figure is off by a huge number of zeros, which are orders of magnitudes. To better understand what a magnitude is think of a ball with a 2 centimeter diameter and fill it up with water. And then get another ball that is 2,000 times bigger and fill it up with water and look at how much the volume has increased. Or if you go from 2 centimeter to a 4 centimeter ball, that 2 centimeter gap in the sphere gives you more volume, than what was in the original 2 centimeter ball. It's goes by an order of magnitude).

(There is no way for any plasma scientist to accept the age of the U at 13 billion years, unless they want to fool themselves. Limiting the life of the U like this is total nonsense. It doesn't make any sense. And we are only talking about the matter state, if we go in the higher orders (of plasma), then all the numbers get worse).

(The reality is, that our U is trillions of years old and not just billions. The age of our U is not what they led us to believe it is. Then what about the life cycle of the Unicose? We want one of our KS to come up with a figure that makes sense to the common man. Now that we know the discrepancy).

(The same goes for the age of this planet, there is no way it's 4.5 billion years old, this is a lot of nonsense. When we understand Creation then see they have made a big mistake. Not only do we have to correct the speed of light, but we have to understand that the plasma works at the speed of plasmatic fields, which are millions of times faster than the speed of light. Then you see why the calculation of the size of the U at 13 billion years is wrong).

(The reason our technology is so correct about transmutation, is because from day one we calculated everything on the speed and strength of the plasma. Then the speed becomes irrelevant. The speed is a matter state ?? of the mind. The speed is not the time of life in the Universe. When you transmute you do it in the dimension of the fields and not in the matter state. (Understanding this the whole science of cosmology goes (down the tubes)).

(As of today, somebody has to redefine and rewrite these two figures so that they match somewhere. I know how to match them. In Book 3, I gave you an indication of how to calculate it. This isn't something new. I wrote those books around 14 years ago. I put the knowledge in the books in a very clever way. Read them again, but this time read the end of Book 3 and then add it to the first 3 or 4 chapters of Book 1. Then you'll find out).

(From now on we'll work in the age and dimension of the plasma. (We need to understand the truth get the scientists together and collectively explain to them how we have accepted such fallacies. Or, is the KF wrong? Does your knowledge and my knowledge come to a halt. They told us the age of the U is 13 billion years. Then the cosmologists have fixed the circumference of the U to 292 billion (kilometers). They tell us the circumference of this planet is 40,000, then 24 hours multiplied by 1,600, and then times 365, and then multiply it by 13 billion, and we should be somewhere on the outer edges of the U. We are in a solar system with planets inside it, and inside the U. (?? This would put us close to the center of the U. But we are in a plasma condition, and not in the matter state). (I think he is talking about that 13 billion would have put us in the center of our U which we are not).

(For scientists and KS we opened up a "Pandora's box" of knowledge. I can be 100% wrong, but up to today no scientist from all the schools of science have been able to answer my questions. (But it comes back to you and whether you can understand the knowledge and T to give a much more powerful way of understanding things. If I give you the speed of sound or light and put you in a U, will you be able to figure out where you would end up?)

(If you wanted to find out where the Soul of your father, who died so many years ago is, could you do it with knowing the speed of plasma? If we use the figure they gave us for the circumference of the U, could you use it to calculate how far your father's Soul could have traveled since his death? If you know the speed at which his Soul travels and you know the time of his death, then you could calculate how far his Soul has gone).

(If we have a round yoke inside the oval egg, and if the yolk is 13 (billion) years, what about the shell of the egg? The numbers the science of today have given us do not make sense. They have not to me for the past 50 years. They should not make sense to you, unless I have made a mistake. Which I don't think so, maybe, because I've made a lot of mistakes. But these figures we've given you are public on the Internet and are accepted in the world of science of today).

(In the new knowledge of plasma T you have seen, that the Gans's are spherical, and the U is spherical. So, do we accept the yolk as the size of this Universe? Or do we accept the egg shell as the size? The two do not match up. This is the revolution in the space technology that is coming).

(In matter state we don't even consider the Souls. The Soul of the Man (STM) and Soul of Physicality (STP) are inside us. The STP is like the egg yolk and the STM like the shell of the egg. Today STM is encaged by the shell of the egg, the Calcium. It's not

allowed to travel with its true speed. The P takes the maximum speed as the speed of light).

(The biggest key to the world of Creation will open up when humans understand how the STP has managed to trap the STM, which is a higher power and strength, within itself. How can something weaker manage to trap something stronger than itself. Once the KS understand this, then they will understand the common denominator of life, which is the Hydrogen. This is why Deuterium becomes part of the cycle of transmutation, and how Deuterium in combination becomes like a C14, a line of communication and connection. (?? it can control above and below, the matter state and the higher order states, and is used for the Universal transmutation and transportation)).

(For you KS, as we say in English, "I have put a cat amongst your pigeons." See where your "pigeons" of knowledge will land. How much of the digital numbers that your own human scientists have given you, have you accepted? We are not "making anything appear out of our pockets." These numbers are taught on a daily basis in the schools and universities to our children. It's a world of nonsense. It's not so easy just to tell our children to forget what they learned. It has become ingrained. This is exactly where we run into problems every time we try to explain plasma. The wrong assumptions of Einstein's $E=mc^2$ have become automatic. Even though with this new knowledge, that has become a joke, if you understand speed in plasma T).

(In the world of science and Creation there are no assumptions. You cannot make assumptions. It's impossible to make assumptions. Once you start assuming, it means you're wrong. You have to be able to clarify your uncertainty, so that there is no assumption in it. Einstein's $E=mc^2$ has got hundreds of assumptions in it, because the guy was absolutely not a scientist. This was how he kept his accounting books, by assuming this or that, and telling it to the tax man).

(You're accountable to yourself to understand what you are learning. In the coming time, as you travel the U, it's you who dictates where your Soul goes. Do you want to end up in a different U, because you listened to the human scientists? So, according to the science of today the circumference of the U is 2.7 times 10 to power of 27. But is that for inside the yolk or the egg shell, what we call, the Universe. The science and numbers don't add up. None of it adds up).

(After today everything will added up, because now you understand and we will show you on October 28th in London. It will be science based on the reality of the Creation of the U, and not on assumptions of what I call, "an accountant," who never understood how to do accounting. That's why they wouldn't let him remain being an accountant. He could not fool the tax man, but he managed to fool the whole of human race as "Einstein." Because his numbers do not add up).

(You have to decide what speed you want to travel to see your uncle who died 20 years ago. If you take the speed of light, then multiply it by the days, hours, and seconds since the time he died, then you should be able to find out where your uncle could be, in what

layer of the shell. Then you make a simulation that increases by speed of light per second).

(This is how you're going to find out where the Soul of your mother is. That's why I brought this topic up. It's time we got engaged in the knowledge I've brought to you to start making all the discoveries of the new science. It will take all the Universities on this planet to work on this for years to come. It is far better than working on a nuclear bomb. Nuclear radiation has a strength power that man has never found out yet. This is why it runs out of energy, and then it goes into explosion, and gives us all this mayhem and the fear. We call ourselves, the people of nuclear power, but we only have the power of it, because we don't understand how it works. We only know how to use it).

(With today's knowledge we understand we can go faster (than the radiation), and we can create a system more powerful to absorb it. This is what we did in Fukushima using the Gans's. We didn't need Plutonium and Uranium. Now you understand. I cannot send you somewhere, where your mother is not. Nor can I send you to a planet that doesn't exist. If I use the measurements from the 18th century to send you to the edge of the planet, most probably you'll end up somewhere in the center of the U. Somewhere you didn't want to be. Instead you wanted to meet the Soul of your mother who is creating a new star in another part of the U).

(We don't need (to create new) stars in the center of the U. We need new stars on the outer boundaries of the U, so that as it grows it will expand into the Unicose. So now you see there are a lot of discrepancies in the fallacies we have accepted by the men of science. I think a little boy in primary school could tell you Einstein was nonsense).

(We have to rewrite the books about the Knowledge of the Universe. But we have to understand what we are rewriting, so that we don't make the same mistakes as the knowledge of today has made. Because then we put limitations on our children's understanding of the future life in space. The things we learn have to make sense to us. And what I was taught in school did not make sense in the way I understand physics and the creation of life. For one thing, if the M fields travel faster than the speed of light, then the M fields and light should interact as the M fields pass over the light. This means that when 2 magnets are sitting next to each other, we should see the light of their field interactions. But we don't see that. (?? unless in the matter state). In the scale of things light will be very slow and at the bottom of the scale of the speed of motion in the Universe. (?? We don't even absorb its light). When for example, the fields of the Sun and Earth interact they create light and radiation. But we don't see that light creation when we put magnets together).

(The man's knowledge of today lacks a lot of truth. But the knowledge of tomorrow, that your children and grandchildren will receive will have the new knowledge. They will understand how I can send you to the moon in milliseconds of earth's time. When we speak about the speed of light, then you'll be on the moon within minutes or seconds).

(The new space technology and understanding of space travel has to bring a new dimension in the understanding of the reality of Creation, and the life of the Creator within it, which has created it. And not the fallacies made up by men, especially if they are Jewish, or just because they're called, Einstein. So much harm has come by the mentality of this narrow-minded race of Jews. They have destroyed the whole world of science. They are what I call, a community of gangsters. There are mafias who control money. But because the Jewish community can push things around, they have tried to change the course of man in science. But the new knowledge will bring the nonsense of this society to an end).

(We saw this when Netanyahu came out in public showing the KF space reactor as a Iranian nuclear bomb. That's when we hammered the IAEA, and within days we got them to go to Tehran. And they said, "what was said about the "nuclear bomb" was all nonsense." And now we don't hear anymore about it. The rest of the nonsense by these people has to be stopped. We need to accept the truth about the world of Creation, regardless of race, religion, or color. The science of Creation cannot be controlled by those who are after false glory, as what we've seen (with Einstein). (The day will come when the Man will erase everything that Einstein has done, because there's never been such a criminal in the world of men, especially in the science of man. His work has put a huge limitation on man's understanding of Creation. The guy didn't have a brain to start with, anyway)).

(You have seen the data by your scientists. Now you tell me, by next Thursday, how much you think is assumed, and how much you can yourself calculate as the size and age of our Universe. You have to consider the speed of light as different than the speed of the M fields. When you understand this, then you understand, that the Creation has been going on much, much longer than 13 billion years. That's not even the first few seconds of Creation).

(When we send you somewhere we don't want you ending up 20 Universes further down, because Einstein said, "the maximum speed is the speed of light." And other scientists measured the size of our U at 292 times 10 to the power of 27 (kilometers ??), or whatever limitation they have come up with. This is very important. One day I'll explain to you how man has gone wrong in many other things, because they had to follow the mistakes that were made at the beginning, centuries ago).

(Some KS were with me in a meeting with scientists and government officials who understood what KF is about. A scientist said, "Newton said this, and the equation of relativity says that, and what Mr. Keshe is saying, is against all what we were taught in the books." Then the man who was in charge said, "Now with Keshe we'll write new books and let them learn from us." This is what we're going to see from now on in the Universities and education centers of the countries which work with us. Because we don't put any limitations on speed and where we can travel. The limitation is in our own understanding of our own world of Creation. We are not bound by a Jewish man who couldn't even keep his own accounts straight nor be accountable to the tax man. But he has "taxed" the whole of humanity with his stupidity).

(There is no limitation, even for the speed of light which was measured. Actually, that measurement is only a fraction of the speed light travels at. That's because they were relying only on the visual part, on what they could detect with man's meager knowledge and technology. Now we can see how they limited us, in our understanding of reality).

(I hope I opened your eyes today to something new. It's not really new, it was something that did not make sense to me and I could not accept, so I found the solution to it. Up to this time I could not present it, but now the public is ready. These are just the findings of a plasma scientist, which I hope I could be considered a scientist and somebody who thinks beyond the frame of the lies we've been given. So what are we going to do now with this new understanding? Do you know how many television programs are going to have to be changed? And how many literatures have to be written off because of this 13 billion?)

(This is the job of you Knowledge Seekers, and I'll give you a platform on the 28th of October before the world leaders. If any one of you can logically confirm this new understanding you can come and present it in the conference and I will stand next to you on the platform. But not just one person, we want a number of you to come and explain this to the rest of the world. You can explain it to the world ambassadors and the leaders of the world of science what you think the age of the U and this planet is. They tell us the age of this planet is 4.5 billion years, and that the age of the entire Universe is only 13 billion years. Then we must be the old people of this Universe, because we have already lived one third of it).

(There are a lot of other questions in the world of Creation. This is why I brought you down this line of teaching. I cannot transmute you using the current measurements for the position of the Moon, because I'm using plasmatic fields, then suddenly you would end up in another Universe. Because Einstein said the speed of light is this, and it takes so many seconds to get there, so we went way beyond because the measurements were false. For example, if according to Einstein it takes a thousand seconds to get there, but we're working with M fields, then it will take maybe less than 1 second. So you would end up way beyond what we thought. It would be the same if we wanted to send you to New York, but you would end up in London).

(The knowledge and T of the future has to make sense. We as Knowledge Seekers won't accept any more fallacies and numbers that just don't add up. The numbers put us in the wrong place. We should not exist in that position, because we would be too close to the center of the (?? galaxy), and the compression of the fields in that area would not allow life like this to live).

(With this knowledge for example, if your mother passed away, you could calculate the distance in the U she would be by the amount of time that has passed since she died).

Or maybe you met your brother in another U, because he is not dead, he is with his Soul, and you end up in the right place with him. Now you can calculate it. You take the speed

of light, you can use the number Einstein says is correct and then multiply it by the time for instance, since your mother passed away. Then you make a circle around where you are and say, "Ok, my mom is somewhere in here. I'm going to look for her." If the numbers are wrong, then you would be in the wrong place to look).

(This is how the interaction of M fields come into play. So, for our fierce Knowledge Seekers, get to work! And come up with something for the 28th of October, when I will give you a platform to bring this into play. Then you'll see how wrong and how much fallacy we got tricked with. We thought we were so clever, but we got tricked by somebody much more cleverer than us).

(We invite you to come by yourself, or in a group. Today's teaching will become the science of KS. You made the MaGravs, now do the calculation. And then I will tell you why you couldn't get the things you wanted out of the MaGrav. Welcome to the world of reality, it's the acceptance of the truth by yourself and nobody else).

We are not indoctrinating you. We are just explaining that what we've been given as science does not make sense. It did not make sense to me when I was 10 years old, some 50 odd years ago. The more knowledge I gathered, the more I understood about the world of Creation, and seeing what they have given us, it became worse. Take 13 billion years from the point of the center of the Earth and move out and see how many kilometers it becomes, and then make a circle of it. (?? Is our solar system and planet on the edge of the U). Which one are we going to accept? Did any scientist ever put "2 and 2" together? Or were they too afraid to say something, because it didn't match the "status quo?" If they would have said 13 billion light years, then maybe we could have compromised somewhere. But 13 billion Earth years doesn't add up. It's off minimally by a factor of 10 to the power of 9. And that's for the matter state speed of light).

(We have to do a lot of things to be able to transmute you, to create the condition of transmutation, and it has to be in the plasma condition, so that you travel at the speed of plasma, which is not in the matter state. That's why we put your STP inside your STM, to get you shifted, so you don't go with your body).

(With the new science will come a new cosmology and everything else changes too. Even the world of medicine will change if you understand this. The world of every science and dimension will change. And then you have to understand the new way to create gravity and M fields. It's not the way you've been doing it).

We have to redefine the science to be able to create the true science of space technology. Otherwise we are back in the same thing, and we shoot a rocket up and put some "Chinese fireworks" behind it, and then gloss it up, until someone finds out it was all a lie).

(Thank you very much for today, and please start calculating the age and circumference of the U. Find out if I am right or wrong and we'll discuss it next week). The discussion is, I cannot send you to somewhere where your mother is not. But, if you understand,

when you went into the Enhancement Unit, and you met the Soul of your mother, those of who came to see Jesus, and you met, and you felt him, then, it cannot be ?? correct.

Q: (It was brought up that the British billion and American billion are different and we have to define which to use). (Note that the Americans use 9 zeros for billion and 12 zeros for trillion. The British say thousand million for billion, and million, million for American trillion, but they also call the trillion, a "British billion." But Mr. Keshe is using 9 zeros for billion and 12 zeros for trillion).

K- (It doesn't matter, it's only three digits, or three zeros. You would still be off by more than 10 to the power of 7. It doesn't make any difference. I've calculated it in every way and it doesn't matter. Actually, from plasma point of view you are in a bigger mess for size measurement when you use only 9 zeros. It's an order of magnitude. It's easier to calculate it on 10 to the power of 12, because it gives you a bigger dimension, and it's more towards the speed of light, and above into the speed of M fields. It's an order of magnitude. If I go by billions with 9 zeros, I remain in the matter state. If I allow it to go to 12 zeros or trillions it's in the speed of plasma. It's a very big difference. 12 zeros is the weakest M field, not the strongest. Stronger M field strength go in the order of 20, 30 and 40 (zeros). We brought it down this low, because it's just about what man can understand).

Q: As to last week's teaching, the Souls of Earth create similar solar systems and planets when they spread through the U. So my question is, who created us? We must come from a similar Soul, or Souls that seeded our solar system.

K- This is very correct. This is what we mentioned a few times in the teachings.

Q: Is the issue of killing from that Soul, or from the environment of this planet?

K- (It has to do with both. It's a combination of two. You have a seed, which is short of energy, and an environment which gives ?? It's like Gravitation and Inertia, one is an attributes of the environment, and the other of the state and position).

(Another example, is of planets that are not tilted and don't have a change of seasons. Their life condition is singularity, which is always perfect, because they don't need to ?? gain anything. They work always in a balanced state, more or less. With 4 seasons, we're always having to ?? compromise between one season or another, like summer and winter, and the rest of it. There is a gap between the two seasons. Today is the summer solstice on June 21st and it's the longest day of the year, and then the days start getting shorter. Then we'll see the balance of the fields, and how life creates until we reach around 21st of December. These life conditions are constantly changing).

(Partially it is the Soul which created this condition of killing. We don't want to keep spreading the killing when Souls from Earth spread through the U. But in comparison to the U, several trillion Souls dying from humans, animals, and other creatures is not much in the world of the Creation. If you put all the Souls which left Earth together it wouldn't

amount to a speck of dust, compared to the number of Souls in the U. But we are still trying to clean it up).

(Sorry we had to cut today's teaching short. Do your calculations, but work on 10 to the power of 12. Don't work on 10 to the power of 9, or the "billion," because later we'll teach more about why we chose these numbers. The 10 to the power of 12 is much easier to understand with the larger scale of the plasma work).

(Please do your work to understand more and prepare for the Ambassadorial Meeting on October 28th and 29th. We want Knowledge Seekers to use this forum to bring the change to the world of science. Then we'll start looking at new dimensions. Start measuring the fields of your MaGravs, and understanding how we transmute you as a plasma, and not transport you as matter state body).

End of Quick Index - 491 KSW June 22, 2023

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:11).

K- Yes, good morning, good day to you. As usual, whenever and wherever you listen to these series of Knowledge Seekers of the Keshe Foundation, the Spaceship Institute. We welcome you back, and, we hope to be able to add to the knowledge. Today, we have two points of ... announcements and teaching.

The teaching, it goes back to long, long time ago, (:12). when I put the question to the scientists, to cosmologists, and to the nuclear physicists in, during the time of the student, before and after. And, those who understood, understood how much mistake we have made, how assumptions we made, just ?? like the speed of light is the ultimate speed. Now we understand, I'll explain, scientifically, digitally, that how much we have been misled, in the Knowledge of Creation. We need to know this, because then we find out, we don't end up outside the Universe (U). Somewhere doesn't exist, because we made a miscalculation. It's just like, if you heard before, aircraft was short loaded, and it crashed because it never ?? arrived, because there wasn't enough fuel. It's the same in the process of the Universal ?? travel.

So, there is a lot of mistakes made by scientists, a lot of assumptions, from 19th, 20th century, 18th century, and we stuck to it. And today, I open that, because, if I send your Soul somewhere, it has to land where it's going, not, "Sorry, scientists made a mistake 200 years ago, and we accepted it." This is all like assumptions which were made by Einstein, and now we understand it's all fallacy.

But the most important thing today, is the announcement we make. As you've been with us, with the Keshe Foundation for years. You knew that since early years of Keshe Foundation, in 2009, 2010, 11, we gave lectures, we made scientific presentations to governments, we called it 'Ambassadorial Meetings and Conferences'. We had the first Ambassadorial Conference in Nino, and then, if you remember, in Italy, later on, some years later, we gave the Ambassadorial Meeting, where we presented the MaGrav Technology, And now we understand the MaGrav technology (T) is one of the most powerful technologies. But it was given, if you remember, ambassadors came and received. (:14).

Now Keshe Foundation announces a new ambassadorial meeting. This meeting will be supported by two governments. In a way, we set up, but the support will come from two powerful nations. To make sure ambassadors in that Nation, and from other parts of the Europe, will come in for this meeting. It is one of the revolutionary points, in the point of knowledge, that the all governments know. We are here to share with everyone.

So, the announcement we make today, and it's been put on the Keshe Foundation website this morning, is that the ambassadorial conference will be held in London, on 28th and 29th of October. October, Saturday 28th, after 7 o'clock, all the ambassadors with some of them, powerful politicians in Europe will attend this meeting. British politicians at a very high ranking are invited, not by Keshe Foundation, but by the governments who we work with.

This is important that we understand, this is a prelude to 2024, what we call, 'World Leaders, Technology, Space, Plasma Technology, in exchange for Peace.' So, this time this ambassadorial meeting is to inform, as we always done. But this time, we are as part of the provider of technology. Where the invitation and the support will go both, by governments and the Keshe Foundation, to all the embassies around the World. And, embassies in London will be invited.

The reason we went with the government, is because before people started sending emails to the embassies and (created) all sorts (of problems). This way invitation will go officially by government to government. So, there is no use you writing all the rubbish which you did, because this time we ask the embassies to forward to us, who is sending what, if they receive. (:16). And there are a lot of friendly embassies, especially with the two governments, which we work so closely. So, we invited. There's a limited number of places, very limited number of places. As Knowledge Seekers (KS), you can join us in October 28th, 29th, in London. At one of the most prestigious locations in London, because we represent Keshe Foundation and two powerful nations for this conference. Where with the support of the nations, we announce the development of the new technology. ... [Audio cut] ...

So, now what we understand is that we meet in London for two days conference, Saturday whole day and Sunday whole day. But Sunday, Saturday night on the 20th to ... On Saturday at 7 o'clock, you are invited to sit and discuss your point of view, as a

Knowledge Seekers, and what we see with the World Ambassadors. Even very high ranking politicians. Those who are the decision makers, and what this new technology will come. You'll understand the reason we do this, is because, Keshe Foundation has signed agreements with powerful nations, for delivery of the Space Technology, in a very powerful way. And now, we will go in through a number of governments, for the conference in London.

We will have, as the pictures you see, this was a conference with the World Ambassadors, Palestinians, with Israelis on the front line. The far end is the Vatican ambassador, what we call the Prince of Malta, in the far end, was sent by the Pope. When we invite... (:18). When we invite, world leaders turn up. And, if you were in Nino, (Italy) we had other ambassadors, who turned up, and important change even to the American policy.

This ambassadorial meeting, will be the cornerstone, before World Peace on the agreement of the new Space. It means Space, not only peaceful, but with the knowledge and technology. And, sooner or later you'll hear, the flagship nations which work with Keshe Foundation. So, please understand, we apply, with very limited number of places for Knowledge Seekers. The same goes for outside, those who are not KS but want to be in this conference. New technologies will be shown, unseen. New technologies, with the permission of the two governments we work with, will be opened in that conference. Leading to the World Leaders Meeting, in applying the new technology. So, if you are interested and you are part of the change, and you want to put your ideas and questions to the World Leaders, to the World Ambassadors, please...

In this point, we bring everything to a beautiful beginning, with the Keshe Foundation Technology, in exchange for peace, outside the environment of the Earth, because there, we don't have nationalities. So, we bring in one of the most, what I call, celebrating days, on 28th of October in London, as one of the most prestigious places, with hundreds of people, ambassadors and government officials, (:20). possibly two or three Prime Ministers will be invited. High level government officials, who are the decision makers, will be present.

And then, we lead to 2024, 2025, for the world leaders, technology, space technology, in exchange for peace, outside the Earth. Which means we become, working as one. You have heard the prelude to this, in the past two or three weeks, by nations announcing collaboration with the world scientists in the space technology. This will come in the back of that, and a lot of the things, which we received support from governments.

I hope we see some of you, as this will be one of the memorable times of the technology being opened up. Technologies will be shown, that even Knowledge Seekers who work close to us have never seen. And it will bring that change, the last step. And the first time by that, during the conference, the first, what we call, MOJHANS, will be tempted to be, what we done, what we said, to transmute. The technology will be that level and we deliver what we said.

We come to a new point, a new part of teaching. I would like Rick to, in the background, to support and to understand about the mistakes in the world of science of today. And if we understand this, you understand how much with what we know now, we have to rewrite all the books of science. In a way, you do it yourself. Now you understand, with the strength of magnetic fields, you can travel faster than the speed of light.

So, now we understand what we said, (they said when automobiles were new), if the man goes faster than 25 or 60 miles, his eyeball ?? falls out, and the rest we found out is all nonsense, because the scientists couldn't understand. Now I want to explain something, which I've put to the heads of Queen Mary College. (:22). And, prior to that, to the nuclear physicist at British, British Nuclear Fuel, BNFL. And, the only thing I got, was a dropped jaw. And, they could not answer me, because this was wrong. The knowledge we are given, is wrong. The knowledge we've been shared with, is wrong. And, now that we come to the time of space travel, we have to correct it. Otherwise, you end up nowhere, or you end up somewhere you never thought.

I would like you Rick, if you bring Wikipedia up, it gives you the speed of light. And how many hour, what, how many kilometers, is in one light years. Don't forget, if you go to Wikipedia, and open up, and look at what Wikipedia tells us, according to the speed of light. We are presumed, we assume, that the speed of light, one year of it, which is 365 by 24 hours, by 60 minute, by 60 second, it comes to somewhere, very interesting point, of roughly, scientifically, can give us the, what we call, a very strange figure. Which, this will bring us to new understanding. Rick, if you could tell us how many kilometers, one year, speed of light is, please? You can take over the white screen and then we come back to it, if you want to share through Wikipedia.

You have to understand, that this is one of the cornerstones of present science, present understanding. That how many kilometers do we actually travel in one year, (:24). speed of light year. Would you like to read it out for us?

R: Yeah, let me see if I can find it here now. It's got a number of comparisons, it's got...

K- It says, 671 million miles per hour, which you still have to multiply by 1.6.

R: Travel times.

K- It's very easy, the speed of light is ?? around 1.9×10^8 just under 2 times 10^8 to the power of 9, and then you multiply it by the rest of it. And then, this brings us to a very random figure round 9,460 times 10^{12} kilometers. That is about 9,000 or 9 to the power of 15 kilometers per year a light travels. Roughly, 9 and a half times to the power of 15 kilometers. That's how much we travel, if you go with the speed of light. This is what ?? is assumed to be what we do, and all our measurements cosmologically, are based on this, light years.

So, you haven't managed to find it, but it's okay, it doesn't matter. Roughly, when you sit down, you calculate, this is from 18th and 19th century, they've done these calculations

afterwards with Einstein and everybody else confirming it. (:26). But it comes to about, just over, just under 2 to the power of, 2 times the power of 10 to the 15, sorry 12 and per hour, per year. And then when you calculate it all together it becomes something in the region of 9,460 times 10 to the power of 12, or nine and a half times to the power of 15, roughly.

Now we know this is how much we travel. You've got to understand your Soul travels much faster than this. Speed of light limitation in the matter state, not in the... This is limitation of the matter state. This is, if you travel with the physicality. Now we know, with the speed of light (Soul), you travel beyond this. So, we stick to what scientists accepted and what it is.

Now, the other point I would like you to check, it says, the circumference of the Universe. Scientists from early years have decided, measured, in 18th, 19th century, and we have accepted it in the world of science as an acceptance, But, you will find out, in the world of plasma and reality of Creation, this is a fallacy. And they say, the circumference of the planet, or of the Universe, is round about 292 times 10 to the power of 12. So, we see that we have 292 times 10 to the power of 12, to be the circumference, in light years. (:28). Which means, we have to multiply 292 times 10 to the power of 12, by that 9.5 to the power of 15, to get the actual measurement of the circumference of the Universe in kilometers. So, this gives you an amazing figure of 2.7 times 10 to the power of 27 kilometers.

So, by the present science of today, we assume we know the measurement of the Universe, accepted by world of science and cosmology, and we measured it, and we made the Universe out of it. So, our Universe has a measurement of about 2.7 times 10 to the power of 27 kilometers. The way we measure the circumference of the Earth. So, our Universe, in the Unicose, to go around itself, it has to travel from one point, back to its point, that many kilometers, to make one day, to make one day, for its life. Now, this is a huge number. If you are mathematically enough, conscious of the dropping of zeros and all sorts of things, you'll find out. (:30).

R: Just to let people know, we're not losing sound here with Mr. Keshe. He needs to mute periodically in order to avert some background noise. Okay, continue Mr. Keshe, thank you.

K- Thank you very much, thank you very much for explaining. We are in public domain, so we have to stop when we know the noise is coming up.

So now we see, our scientists, in the matter state of the Universe, they tell us that our Universe, now we don't accept the ?? circumference of it. This is a public knowledge, is not something made up by us. So, you have 2.7 times to the power of 27, roughly. I'm not a mathematician, I make a lot of mistake with zeros, but let's say I'm, I'm right, for once. Now, you come to another point. Now we know the circumference of the Universe. According to the present facts here.

Now comes another interesting point. The biggest interesting point is, that our scientists have made us to believe, that this Universe is 13 billion years old, Earth is 4 and a half billion years. Not light years, earth years. And, all this evolution, biology, physics, human mind, emotion, was created over this 4 and a half billion. Not light years, yes. So, we throw away the light years. Now, if you put 13 billion, which is 13 times 10 to the power of 9, and then you add it, by the days, by the hours, and then multiply by 1,600 kilometers an hour, (:32). which the Earth moves, you come to a very interesting point. You come to a very interesting point. You find out that it means, if we accept the 13 billion years, that the Earth has rotated, considering a plasma is a sphere, it's not flat line, so it has a circumference, it has a dimension and diameter. We, as humans, have decided through our scientists, that the Universe is 13 billion years, and we accepted that 365 days in a billion year, and we accepted it's 24 hours a day, and then we accepted 1,600 kilometers per hour, the Earth moves, which we calculate our position. We are not calculating the speed of the Universe motion, because we consider this is earthly hours we are calculating. So, what it gives you is 1.8 times to the power of 10 to the 17. Don't forget, the circumference of the Universe was measured to be 2.7 to the power of 24.

Then, if you are a very clever scientist, a mathematician, then, you come to see the two don't match. It does not match. We cannot have a circumference of 2.7 times to the power of 27, (:34). as a Universe. And then saying the Universe exists only 13 billion years, which gives us 1.8 to the power of 10^{27} , or 17. There is simply 10 to the power of 10 missing somewhere.

In a way, if you go back to the light years and light motion, you'll find out, our scientists cannot explain. We have given our Universe a fixed time of 13 billion years, with the fallacy of our scientists. And again with the fallacy of our scientists, we've given the Earth, the Universe, a measurement of 2.7 to the power of 27. And, where is that gap to the 10th power, in the volume between what we say is the life of the Universe, and what is outside. Or, did we travel more? Or, we cannot have a Plasma, if it's not encircled, it's, but closed. It's a straight line, it's expanding, whatever, but it still is a plasma.

So, we understand, if we do a little bit of clever work, and divide the, what I call, 2.7 by 1.8, one is in to power of 27, one is in power of 17, then we see our Universe is 1.5 times the power of 10 years. Difference in kilometers. And then, if you divide it back into the kilometers, you find out, our scientist has given up a lot of ?? (:36). The two don't match. And I cannot send you into space, by the assumption of the fallacies of the human measurement from 18th century to 19th century.

A new measurement, a new technology, a new knowledge in the world of science of plasma, In the science of Creation, cosmology has to be accepted. And if you think of it, 13 billion years is nothing, even to make a single human cell. And, if you go any further. If you go further, you find out, and I'm sure a lot of people will do a lot of calculation by next week, and come back, let us write the new book of science, and bring some reality into it. The Universe cannot be 13 billion years. And you have to understand, we're still working on the fallacy of their lifetime.

When I put these figures on the table, with the scientists in IAEA's division, and I put it in front of the British nuclear fuel scientists, and I put it in front of the scientists in nuclear, I said, "this is why you cannot control the heat." Because, you've made a big ?? duda (error) in the measurement of the speed. Because you're working on a matter state, where the fields of the radiation from neutron, works in a plasma condition, because it's already done. That's why we run out of control, our reactors don't respond, and we get all these disasters. This is why when we put Gans's in, we can control. Now you understand.

So, from today, you sit down and do the calculation till next week. And you, as Knowledge Seekers, come up with a figure, that is realistic. (:38). That is acceptable. That I can put you in a transmutation, and don't forget, the speed of magnetic fields, it's millions, billions of times faster than the speed of light. Now you understand, when I told you years ago, that none of the science of up to now, makes sense anymore.

This is the first time I put this on the table, in public, but in scientific world. Even when I sat in ?? UB with the nuclear scientists and professor from there, UB, I told them, "you answer me this, why are we in this position?" "Why are we running into nonsense, and that is why we're running into "not controlling" nuclear reactors?" This is why all our assumptions in nuclear technology of today is wrong. And then the things we do, looks like a magic, because now you can see it.

In a matter state, speed of light, we are out (off) by huge numbers, in zeros, order of magnitude. You got to remember, you get a ball of 2 centimeter, fill it up with water. Then you get a ball with 2,000 times bigger and fill it with water. And you see how much volume of the water you have. Even if you go from 2 centimeter to 4 centimeter, you see that 2 centimeter gap, (:40). gives you more volume of water than the 2 inside. It's the order of magnitude.

Then you understand, there is no way. Unless you want to fool the scientists, who understand plasma technology, into accepting 13 billion years, is the limitation of life. Is limitation of life on this Universe, is nonsense. Does not make sense, or less ?? we calculate. And this is only in the matter state we are talking. And this is only in the matter state. When we go in the higher order, we find out, that really works worse. Everything worse, everything worse.

And, in reality, our Universe is trillions of years old. Not only billions. Our Universe is very much different. Our Universe is not what they let us to believe it's ?? age. And then, if you understand this, then it comes the cycle of life in the Unicose. In the world of common man we say, figures don't make sense. Unless somebody, one of you, a scientist, as a Knowledge Seekers, come up with a formula, come up with something that us common man can accept. Now we know the discrepancy.

The age of this planet, there is no way it's four and a half billion. Four and a half billion lifetime is nonsense even... (:42). If we come into understanding this, we'll find out that we are making a mistake. And then, not only we have to correct this, as the speed of light, then we have to understand the plasma works in a speed of plasmatic field, millions of

times faster than the speed of light. So, even the calculation of the size of the Universe, is wrong. Then, the calculation of 13 billion years is wrong.

And then you understand how our technology is so correct. Because from day one, in understanding transmutation, we calculated everything on the speed of the plasma, on the strength of the plasma. And the speed becomes irrelevant. The speed is a matter mind. The speed is not the time of life in the Universe. Then you understand you transmute in the dimension of fields. and not in the matter. Then, the whole science of cosmology, goes into what I call, the big hole.

From today, now we understand, somebody has to redefine, or bring these two figures to match somewhere. I know how to match it. And in Book number 3, I have given an indication of how you calculate it. So this is not something new. It's already 10 years ago, 12 years ago, 14 years ago, written in the 3 books, (:44). in a very, very clever way. Read the books again. I told you last week, read the end of 3 and add it to the first three, four chapters of the 1. You'll find out.

Now you understand why. Now and from now on, we work in the age of plasma. We work in the dimension of the plasma. And we need to understand the truth. And we need scientists together, collectively to explain to us, how do we accept, how do we accept all of us, such a fallacy. Or, the Keshe Foundation is wrong. And my knowledge, and your knowledge, and everything else knowledge, comes to a halt. We have a 13 billion age of the Universe, 13 billion speed of sound, 13 billion speed of Earth, 13 billion light speed, 13 billion plasmatic field speed. There is a big difference. And our cosmologists tell us, they have fixed the number to 292 billion years, is the circumference of this Universe. And, they tell us the circumference of this planet is 40,000. 24 hours multiplied by 1.600. And then we say, multiply it by 365, (:46). and then multiply it by 13 billion, and we are somewhere on the outer edges of the Universe, because we are in a solar system, which has planetary system inside it. Inside the solar system, inside the Universe, as we close up to the center, there are still planetary systems, but in a different shape, in a plasma condition, not in the matter state.

So, as scientists, as Knowledge Seekers, today I opened up for you, the Pandora's box of knowledge. I can be 100% wrong. I can be 100% wrong, but up to today, no scientist from all the schools of science have managed to answer me this question. And this comes back to you. Can you stand this? Can we come to this point that our knowledge, our science, our technology has to answer in a much, much, much stronger, powerful way than anything else. It has to be powerful, it has to be strong enough, we have to have capability. As I said, if I give you a speed of sound, if I give you the speed of light, and I put you in the Universe, where are you going end up?

But one of the problems you have is, where is the Soul of your father, who died so many years ago? With the speed of plasma, how can I send you to connect to you (to connect to him), but you connect to him? Is he so short? Is he so near? Is he... You can understand if he's 13 billion years, and we take that as a circumference of this Universe, (:48). how far do we go? To what extent ... have we made a mistake? Have we made a yolk inside an

egg, and we say, "the yolk is 13 million years, because of the dimension." But what happened to the egg? It does not make sense. Science of today, the figures of today, does not make sense at all. And hasn't made sense at all, for past 50 years to me. And now, should not make sense to you, unless I have made a mistake. Which I don't think so, maybe I've made a lot of mistakes. But these are figures, which is on the Internet. These are figures which we have accepted in the world of science of today. We measure the speed of light. And we say, this is the way it is, the way it's supposed to be, and the way it's done...

In this process, in this understanding, in this new knowledge of plasma technology, you have seen the Gans's, they are spherical, Universe is spherical. So, do we accept the yolk as the size of this Universe? Or do we accept the egg as the age of the Universe? Which they don't do match, the two do not match. (:50). ?? Don't understand what the revolution in the space technology is to come. Why, when we talk about the matter state, we don't even consider it as such, we say the Soul of Physicality (STP) is inside us, the Soul, because literally, the STP is that egg yolk, where the Soul becomes the (shell of the) egg. Where today, the Soul of the Man (STM) has been kept, by the shell of that egg, Calcium, inside, trapped. And it's not allowed to travel with its true speed, where the physicality takes the speed of light, as a maximum.

Sometime, if you understand, how the STP has managed to interact the STM with the highest power and strength, then you, the biggest key in the human world of Creation will open up to you. How the weakest can manage to hold the strongest in a trap. And once you understand this, or once these Knowledge Seekers in the future, become knowledgeable enough to understand how it's possible, then you understand the common denominator of the life, which we call, Hydrogen. Then you understand why Deuterium becomes part of the cycle of the transmutation, and how Deuterium in combination becomes what we call it as, because you understand it as a C14, becomes a line of communication and connection. And then above and below, in the matter and a higher order, in the Universal transmutation and transportation.

Now, you Knowledge Seekers, as we say in English, (:52). "I have put a cat amongst your pigeons." See where your pigeon of knowledge lands. And how much you have accepted, digital numbers, which your own human scientists have given you. We are not bringing anything out of our pocket. These are numbers which on a daily basis are taught in the schools and universities to our children, a world of nonsense. And then, we try to tell our children, "oh, just forget it." Exactly where, every time you run into problem of knowing you're wrong, you call it assumption, and you become Einstein. This $E=mc^2$. Even that now has become a joke. If you understand, the matter ?? speed in plasma.

Then you understand, in the world of science, in the world of the Creation, there are no assumptions. You cannot make assumptions, it's impossibility to make assumptions. Once you start assuming, it means you're wrong. Because, you have to clarify that uncertainty, that there is no assumption into it, that $E=mc^2$ has got hundreds of assumptions in it, because the guy was absolutely not a scientist. This is how he kept his

books ?? strict, by assuming this is that, and that is that, and he could give it to ?? the tax man.

You're accountable to yourself, you're accountable to understand, as we said, (:54). in the coming time, you are the travelers of the Universe, you are dictating where your Soul goes. "Oops, I ended up in a different Universe, because I listen to the human scientists." So, it's very simple. Two point whatever, to the power of 27, according to the science of today. And we are inside the yolk, not inside the white, and the shell of the egg, what we call, Universe, and the numbers don't add up. The science doesn't add up. None of it adds up.

And after today, everything added up, because we ??. Now you understand what we will show you in October 28th. Science on the basis of reality of the Creation of the Universe, not on assumptions of a, what I call, "an accountant," who never understood how to account. That's why they wouldn't let him to be accountant. He could not fool the tax man, but he managed to fool the whole of human race as Einstein. Because his numbers does not add up, that's it ?? in his ?? account.

Now you have to understand. Now as Knowledge Seekers, that you want to travel with the speed, to see your uncle, your mother who died 20 years ago, and take a speed of light, multiply it by hours, multiply it by seconds, multiply it by speed of, let's say, light, which is the maximum, (:56). then you should be able to find out where your grandfather could be, in what layer of the shell. And then, you have to have a simulation that it increases by speed of light per second.

So, this is how you're going to find out, where your mother is, your "Soul of mother" is. Now you understand, why I brought this topic up. Now it's time for us to become engaged. The knowledge I've given you, the knowledge I've brought you, it takes all the Universities of this planet for years to come, to work on it, than trying to find a nuclear bomb. Because, nuclear radiation has a power strength, which man has never found out, and that's why it runs out of energy, and it goes into explosion and ?? around, gives us all this mayhem and the fear, and we call ourselves, nuclear power people. We have a power because we don't understand it, but it can do.

Now we understand it, I can go faster, I can create a system more powerful to absorb. And this is what we saw in Fukushima, this is what we said, "you don't need Plutonium and Uranium." Now you understand. I cannot send you somewhere, where your mother isn't. I cannot send you to a planet, where it doesn't exist. If I send you to the measurements of the today knowledge, on the edge of the planet, you end up most probably somewhere in the center of the Universe. Where you wanted to be, on the other edges, where the Soul of your mother is creating a new star. (:58).

We don't need stars and expansion in the center of Universe. We need new stars on the outer bounds of the Universe, as it grows and expands in the Unicose. So now you see, there is a lot of discrepancies, in the fallacies we have accepted, as men of science. I

think, a little boy, in a primary school could tell you, "Einstein was nonsense." Now it doesn't make sense.

We have to rewrite the book of the Universe. But we have to understand what we are rewriting, that we don't make the same mistakes as knowledge of today. Because then we put limitation on our children's understanding of the future of space. Then we come. The beauty of it is, ask yourself a very simple question. I asked this question many times, and now I put it to you. You have to understand. You got to understand how I understand the physics, how I understand creation of life, because things have to make sense in what I've been told, and none of it makes sense. If we can, and if the magnetic field travels faster than the speed of light, or it's the ultimate in interaction with the field of each other, we should see two magnets sitting next to each other, light. Never seen, unless in the matter state. So, the speed of light should be a very little things, at the bottom of scale of the speed of the motion in the Universe, that we don't even absorb its light. Because interaction of the fields, like the Earth and the Sun, create light, creates fields, it creates radiation. And we don't see that. We don't see light when we put magnets (together) ... (1:00).

You've got to understand, man's knowledge lacks a lot of truth. Today's knowledge, not your children and your grandchildren, that they know the new knowledge. Then you understand how I travel you to the moon in milliseconds of your time to the speed, and when I speak about the speed of light, and you'll be on the moon within minutes, seconds, now you understand how.

The new space technology, the new understanding of space travel has to bring new dimension in understanding the reality of the Creation, and the life of the Creator within it, which has created it. Not with the fallacy of the men, especially if they are Jewish. Just because they're called, Einstein. And we've seen so much harm, by this narrow-minded race of Jewish, what we call, mentality, that has destroyed the whole world of the science. What I call, community of gangsters. We have mafias who control money. The Jewish community, because they can push things around, have tried to change the course of man in the science, and has come an end to this nonsense of this society.

You saw us, when Netanyahu came out with showing Keshe Foundation nuclear reactor as a Iranian nuclear bomb, we hammered it at the IAEA, and within days, (1:02). we got IAEA in Tehran, and they said, "it's nonsense what they said about the ?? nuclear bomb." And we don't hear it anymore. Now we have to understand, the rest of the nonsense comes out of it. These people has to be stopped. That we accept, does not matter race, religion, or color, the truth about the world of Creation. About the science of Creation, and not be controlled by those who are after false glory, as we've seen.

The day will come which man will erase anything which got Einstein on it, because there's never been such a criminal in the world of men, especially in the science of man. That has put limitation on man understanding of the Creation, because he had no brain anyway to start with.

Now, you have the figures, now you have data, according to your scientist, man's scientist. You tell me, by next Thursday, how much do you think is assumed, how much you think you can calculate, is the dimension (D) of our Universe, the dimension of our, what we call, age of the Universe, considering the speed of light, is different (than) the speed of magnetic fields. And when you see, you understand this, then you come to understand, the Creation is much, much longer than 13 billion years. It is not even the first few seconds of the Creation, 13 billion years.

Does not add up. And, sorry, I cannot send you to 20 Universes further down, because Einstein said, "there's a speed of light, a maximum." (1:04). And other scientists measured the size of our Universe, at 292 to the power of 10 or 12 light years, or whatever limitation we have come up with, by 27 . And it's very important. One day, one day I explain to you, we're in the midst of a lot of numbers and calculation, how man has gone wrong in many other things, because they had to follow.

As I said, some of you Knowledge Seekers were with me in that meeting. The scientists, the government officials who understood what Keshe Foundation is, the scientist next to him said, "Newton said that, and equation of relativity says that, and this is against what you say because it's in the books." And the man on the top said, "Now with Keshe we'll write the new books, let them learn from us." And this is what you're going to see from now on in the Universities, education centers of the countries which work with us. Because we put no limitation on the speed. The speed, and what we can travel with, is a limitation on our own understanding of our own world of Creation. Not a Jewish man, could not even account to an accountants and a tax man, and he taxed the whole man with his stupidity.

There is no limitation, even the speed of light which you measure, is the fraction of actually what the light travels with. Because you only rely on the visual, on what you can detect with man's meager knowledge in technology, and this is going to (stop) ... (1:06). Now you understand. Now you see how the limitation they have put on us, has put limitation on us, to understand the reality.

I hope today I open your eyes to something new. Not new, to something which I could not accept and did not make sense. And as a scientist in the world of plasma technology, which I hope I could be considered a scientist, somebody who thinks beyond the frame of the lies we've been given, what are we going to do now? You know how many television programs are going to be changed? How many literatures have to be written off because of this 13 billion?

Knowledge Seekers, this is your job. And on 28th of October, I'll give you the platform. Any of you who can confirm, who can logically, with what you know now, can come. I stand next to you on the platform. Not just one, collection of you, to explain to the rest of the world. To explain to the ambassadors of the world, to explain to the leaders of science of the world, what you think is the age of this planet, the age of this Universe. If you understand, even when they tell us, the age of this planet is 4.5 billion years, and then the

age of the Universe is 13 billion years, Ah oh, we must be the old people of this Universe, because we have already lived one third of it. (1:08).

And then it comes a lot of other questions, in the world of Creation. Then it comes, why I brought you down the line of teaching, Because, I cannot send you in transmutation, measuring this is the position of the Moon, I'm using plasmatic fields, and suddenly you end up in another Universe. Because Einstein said the speed of light is this, and it takes so many seconds to get there. Now you understand. If Einstein says it takes a thousand seconds to get there. And you're working with the magnetic fields, think about maybe one second. Then you end up at the actual orbit where the mother is and you have a meeting. You don't go to another moon ??, you're in New York and mother, "oh, I'm here by mistake, ended up in London."

Have you ever done this? Go to airport, go to a travel agent and ask for a ticket to Oman. And then they give you a ticket to Amman in Jordan. But you say, oh, I want to go to Oman as a country. It's a big difference. And I'll tell you why. It's happened to me. I bought a ticket to go from Rome to Oman. And just before boarding, it says an hour and something flight. I said, excuse me, there's a mistake here, because I know where I'm going. It's only a six-hour flight. Oh, the lady made a mistake. She took the Amman as Jordan. you're flying to, not to, Oman, as a country. Now you understand? I had appointment in Oman. I would have ended up in Amman in Jordan. And I've been to both, and they're both beautiful, but thousands of kilometers apart. Our Knowledge Seeker, our friend who listens to the teaching, he says, (1:10). "I know, because he would have been waiting for me in Oman, and I've been in Amman in Jordan."

This is where knowledge has to make sense, where the technology of the future has to make sense. We as Knowledge Seekers, we don't accept any more fallacy. Ages don't add up. Thirteen and a half billion years, age of this planet, this Universe according to us, and four and a half billion, puts us in the wrong place. We should not exist in that position. We are too close to the center, and the compressions of the fields does not allow life like this.

So could you please calculate how many years ago, how many minutes ago, your mother passed away? Or you met your brother, and he's in another Universe. He's not dead because he is with his Soul, you end up in the right place with him. Now you can calculate. Put the speed of light which Einstein says is the right number, and then calculate how many hours on second and minutes your mother passed away. You should make a circle around where you are and say, "Ok, my mom is somewhere there. I'm going to look for her." You are in the wrong place to go.

Then you understand connection of magnetic fields the interaction of magnetic fields come to play. So, our fierce Knowledge Seekers, get to work! And on the 28th of October, you have a platform to bring this into play. And you understand. Then you understand how much wrong and how much fallacy, (1:12). as we think we've become so clever, we've got tricked by a much cleverer ...

Now, we invite you, you invite yourself, come in, as a group of you. The scientists, scientifically, today's teaching, now become the science of Knowledge Seekers. You made the MaGravs, now do the calculation. And then I tell you, why you couldn't get your things out of the MaGrav. Welcome to the world of reality, acceptance of the truth by yourself and nobody else.

We are not indoctrinating you, we're just explaining what we've been given, does not make sense. It did not make sense to me at the age of 10, 12, 50 odd years ago. And the more I gathered knowledge, the more I understood about the world of Creation, it became worse. 13 billion years, take it from the center of the Earth and move out and see how many kilometers it becomes. And then make a circle of it. And say, our planet, our solar system, is on the edge of the Universe. We are on the edge. Which one are we going to accept? Did any scientist ever put "2 and 2" together? Or were they too afraid to say, because there wasn't ?? down that side of the stream of life? If they would have come with 13 billion light years, (1:14). maybe we could have compromised somewhere. 13 billion years, it doesn't add up. Does not add up. Is out by the factor of 10 to the power of 9. Minimum. And that's in the matter state speed of light.

So, now you understand. We have to do a lot of things to be able to transmute you, to create the condition of transmutation, and it has to be in the plasma condition, that you travel with the speed of plasma, which is not in the matter state. That's why we put your STP inside your Soul, to get you shifted, and not letting you go with your body. With your body you can go as much as you like. With the STP you can go as much as you like.

And then you understand, new science. You understand new cosmology and everything else changes. Even the world of medicine will change if you understand this. The world of every science and dimension will change. And then you have to understand a new world, a new way to create gravity and magnetic fields. Not the way you've been doing it.

We have to redefine the science to be able to create the true science of the space technology. Otherwise we are back in the same thing, and we shoot it a little bit, put some "Chinese firework" in the back of it, and we gloss it up, till the next one finds out, "ah oh, this was all lie."

Thank you very much for today. And, as I explained, we'll close the teaching early today, and we have a frame of hours to do the teaching. I'll let you one or two questions, and then we come to an end. We don't take any breaks, if there are any questions, (1:16). and then next week we go in more detail. We understand more.

But please start calculating. Am I wrong? If I'm wrong, it's to me I'm wrong. If you are right, add up the knowledge of today, and by next week let's talk. The discussion is, I cannot send you to somewhere where your mother is not. But, if you understand, when you went into the Enhancement Unit, and you met the Soul of your mother, those of who came to see Jesus, and you met, and you felt him, then, it cannot be ?? correct.

Are there any questions?

Q: .. We still got to define the incongruency between the British billion and the American billion. Those are two different ...

K- It doesn't matter, it's only point, it's only three digits, three zeros.

Q: Exactly.

K- That doesn't make even, you're still 10 to point 7 up, or 10 to point 7 down, doesn't make any difference.

Q: Fine, but did you talking about quadrillion or quintillions?

K- We always talk billion as 12 digits, 12 zeros or 12 digits. This is how we calculate. Not in the...

Q: Fine.

K- And then you understand.

Q: Yeah, so do I, because you were brought up in the British school, but the Americans...

K- It doesn't matter. I was brought up in the international school. So, billion to us is 10 to the power of 12. Million, sorry, billion is to the 9. Trillion, million is 6, billion is 9, trillion is 12. (1:18). So, we go on either numbers of 12 and 9. I've calculated in every way. Even 12 billion, we went on the third, what we call, 10 to the power of 12. You understand? Because we calculated your way, or our way. If you go down to the power of 9 billion, you're in a bigger mess, in a size and measurement.

Q: Exactly, yeah. Yeah, that's why I go down on defining each number, because we've got a big error there.

K- No, it's 5 to the power of times 10 to the power of 3, is the order of magnitude, we calculate on a power of 12. In easier way to do it, than to the power of 9. Because it gives you a bigger dimension, and it's more towards the, what we call, speed of light, above, what we call, the speed of magnetic fields. It's an order of magnitude. If I go by billions as nine, I still stay in the matter state. I allow it to go to the 12, in to be in the speed of plasma. It's a big difference. It's a very, very big difference, but in order of magnitude, we allow this calculation to go to 12, because it shows a bigger problem, when you go to the speed of, what we call, magnetic fields. Or the magnetic. The weakest magnetic field, not the strongest.

In a stronger magnetic field strength, you go into the order of 20, 30 and 40. We brought it down to what is just about what man can understand. (1:20). If you do the same thing with a 10 to the power of 9, or 10 to the power of 12, we calculate on the American side or the European side, or we calculate it on the difference in the power of what we call, magnetic field, in order of magnitude, than the matter state.

This is one of the biggest problem, that in the future, in the coming time, we'll explain more and more. Now you understand, how we accept fallacies. It doesn't work. Thirteen billion years, in a magnetic field on American size, or European size, gives you what we call, roughly between matter and what we call, magnetic field side. I always work on a 10 to the power of 12 as a billion, because it is fields which we can understand.

Any other question?

Q: .. As to last week's teaching, the Souls of Earth create similar solar systems and planets. So my question is, who created us? We must come from the Soul or Souls similar that seeded our solar system. And is the killing... (1:22).

K- It is that, this is very correct. This is what we mentioned a few times in the teaching. When the ?? came spreading. Carry on.

Q: She goes on. Is the killing issue from that Soul, or the environment of this planet?

K- It's the two which has led to this. It's a combination of two. You have a seed, which is short. But then you have an environment which gives... It's like a Gravitation and Inertia. One is an attributes of the environment, one is attributes of what we call, state and position. If, if, there are, there are few factors, for example if you look at most of the planetary system, which don't have the seasoning, they are not tilted. You get this situation of singularity life. Which is always perfect, because does not need to gain any ?? thing. It always works in a balanced state, more or less. Where on the four seasons, we always have to ?? compromise between one or another, summer and winter, and the rest of it. Then, there is a gap between what we call, the two seasons. Today is what we call, 21st, 22nd. We are at the longest day of the year, and then we start going shorter, and then we see the balance on the fields, and how life creates, till we go to somewhere around 21st of December.

In these conditions we get the changes and we get the life. (1:24). ..

So, we understand a lot of things and yes, partially it is the Soul which created this, and partially now we're creating the same Souls across the Universe, because we came the wrong way. And several trillion people dying, or animals and creatures Soul created is, not much in the world of the Creation. All the Souls which we have created from the establishment of the life on this planet is a speck of dust, to the other Souls which have created the Universe. So, trying to clear that out.

Sorry about that today, we have to cut short, and we meet next week. Do your calculations, but work on the 10 to the 12. Don't work on the 10 to the 9, billion, because then we'll teach you some more, why we chose these numbers. This proportion is much easier to understand the bigger scale of the work.

Thank you very much for today Rick, and we see you next week, and we'll see what we can ...

R: Okay, very good Mr. Keshe, thank you very much for today's teaching. Very concentrated and important teaching I believe.

K- We'll see, and thank you very much. And please, do your work, to understand more. And the 28th, 29th meeting, is a forum where we want Knowledge Seekers to bring that change, in the world of science. And then start looking at the new dimensions. Even your MaGravs, start measuring fields, start understanding how we transmute you, we don't transport you. Thank you very much, and we'll see you next week, as usual time. Thank you, Rick. (1:26).
