

# 493rd Knowledge Seekers Workshop July 6 2023

(Quick Index 23 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Colonize whole solar system; Teach children both plasma & matter state sciences - need to know both; Don't become prophets or enslave those who don't understand; Study fields of matter magnets - plasma easier to understand; Book 8 origin M fields created Creator; Transmutation gift from Mitra - man will teach rest of U Community; UFO matter state not transmutation; MaGrav positioning = matter state - Transmutation with Soul is plasma - ride M field lines of U; Keep emotions of human - change shape; July session you experiment; Overcome dogmas of religion; NASA small player;

## Topic Index

Soon to colonize all of our solar system (SS); Swim in "liquid part" of SS; Science can't even reach edge of SS; Two separate methods of travel - MaGrav positioning which is matter state - and Transmutation - M fields of Soul & universe (U); Have to teach children both matter and plasma state travel; Energy means dimension (D) of plasma - no limitations with plasma; Cannot transfer parameters of matter state to plasma - have to understand Totality of knowledge; In plasma convert physicality (P) to energy & M fields then convert back to matter at destination if want; Have to understand difference between plasma and matter state; Only limitation is man's understanding - can use both states; Speed of light has no meaning in transmutation - fallacy of present science - can't use with plasma; Opposition to new T from leaders in science; We are responsible with leaders to teach both sciences in parallel with each other; Researches like CERN & others have to be revised; Children taught both chemistry in matter & chemistry in plasma - for all sciences; When transmute through body have to know which state you are in - if manifest on highway not get hurt; Everyone at same time has to be taught plasma science so we don't get those who understand to become prophets and enslave the ones who don't understand - worse slavery than now; We all have to know totality of knowledge in both parallel systems; Can't transmute with computers - Soul does in dream - brain matches field strength of grandfather who died 200 years ago; Brain not fitted with microchip; Where in U did grandpa go?; No addresses in U - Soul finds by connection of field strength & emotion; Find someone who died centuries ago through connection of "Soul of Ancestors" - same way pass DNA on to us; From now on KF educates us - Reality; Responsibility of KS to understand & become teachers - Not prophets; Cannot dismiss what man has achieved in matter state - doesn't mean it's correct - but need to add to knowledge; We are where we are today because of accumulated knowledge - continue to add to it; Whole understanding of Creation comes out of understanding work of plasma - energy fields & their connections; Mankind has not tried much to understand plasma - ignored Messengers; Never understood work of solid magnets & their fields - MaGrav positioning & sharing of fields; Don't always need to be in matter state - in & out of plasma; First learn magnets then plasma; Energy of magnets don't change even years later - try to measure their fields; Learn to connect matter magnet fields to plasma fields - understand transmutation; Japanese magnetic train - similar to get Soul on M field lines

of U - don't ignore what don't understand; Begin by discussing parts of teaching that you DO understand - get enquiry going; No jet plane to see grandpa in U - use energy of the emotion of your love - feeling & connection - brings your Soul to him; Have to understand differences between each state of Existence - then apply knowledge; Once man understands plasma & transmutation then other states of existence will be opened to him - another science of Creation will emerge - be able to transmute across other universes - not able to understand now; First understand to go from matter to plasma state - then how plasma is created from fields of Creation; If there was "nothing" how was Creator created - knowledge is "self-secret" because man cannot understand - but knowledge is already within him; Can exist without tangibility - created through interaction of fields of plasma - out of that created the body; Where did the original fields come from - Book 8 "Origin of M Fields" about the fields our Creator was created out of; We were created out of His fields; This knowledge not yet open to man - first master the totality of the Knowledge of Creation - then understand motion of M fields and plasma; The understanding is within ourselves and not outside in memorizing formulas; No formulas to take you to your grandpa tonight when dream about him - but with your Soul you actually went to see him feel his presence & emotion - it was real - maybe he was creating the seed for a new planet; Go deeper in knowledge - understand Totality of it; Overcome fear to live in both D of plasma & matter - many are afraid they won't be able to come back; Ways in plasma never get lost in space; Youngsters will learn transmutation before parents - like computer games; Need to educate all citizens of planet on equal basis; Transmutation is a gift from Mitra - man will teach others in U unconditionally; It has to be taught in all schools across planet; We have to understand transmutation correctly first before teaching others; If you change shape in other part of U emotion still same as human - might be a stone on another planet; With transmutation have to continually remind which D talking about; The more open you are the more you can learn Plasma; Sharing knowledge doesn't depend on what we understood - listen to recordings get it first time; Some change teachings to suit own understanding; Man doesn't want to understand - happy with status quo; Depends on how much you enjoy to work with own Plasma; Teach how to connect from Soul to matter state; Harder to teach next part - wait for your questions - how much you want to understand; Measurement of plasmatic M field strength - cornerstone of transportation - like choosing right fuel; When baby goes to sleep - its energy & level of understanding is set according to that time & place only; Asked you to estimate age of U through plasma; If part of you went to another D - other part stayed behind; How to keep objects we take with together - take favorite chair with; Does Soul lose part of memory bank by interacting with new fields - how to protect integrity of each object in plasma; How to keep our identity of who we are in plasma; Couple of nations struggling to start teaching plasma to people; How do change to different M field strengths and still manifest self in matter state; Transmute when one position is taken - go to emotion of STM; Have to trust the strength of plasma to protect integrity of our existence; M fields have own D and direction - know how to calculate both - teach in future; In "dream" suddenly Mom wakes you up to go to school - traveled across U in split second; Do we queue up in Transmutation; Can we return to dream at will; Have to distinguish between matter and plasma state; Create a plasma wall in dream.

July flight sessions 14 - 21 - 28 for 3 hours each - can join at any time; You decide what you want to do in sessions we provide facility for you to experiment; Purpose is we are testing in background to help humanity and future generations with research; In last session didn't need to do survey of participants - did with new system - 90% accurate - fed energy of Soul into system; Need stereo adapter to plug in at least 2 separate headphones - put 2nd headphone where you want change; Can try to make teeth or arm grow - cancer - depression - change emotion of loved one - help an animal - experiment with what you want to achieve with plasma - session is up to you; Development of T coming from teaching KS and what they understand; Point of session is not to change your P - but to elevate your Soul that it changes the physical dimension - transfers the energy needed - even to animals; All depends how you apply your emotion; August session bring in 25 trainees for transmutation; KF should remain free and independent to do research with KS - no controls or limitations; Might have news soon about International operations & One Nation; Linz Center closing for good; Headphones in session act as GPS to locate your Soul; Plasma communication system as "Combination Headset Units" coming soon - feel emotion translate into words; At first put over mobile headphones to train to "home in" P & STM together; Two ways of traveling MaGrav positioning as matter state & transmutation through Soul and M field lines of U; KF major part of development of the T for first 50 years - then open to U Community to collaborate; Once we open to U Community in P dimension then share T both ways - flooded with new T; Human race heading knowledge transfer initially; Colonization of Moon & Mars by 2025 inevitable - or by 2030 then rest of solar system; Then go beyond SS into deeper ocean of M fields - but need to transmute for this; As long as I am alive will head operation - before close eyes for last time take man to galaxy; We are carrying so much knowledge need to share it; Not enough population to colonize SS - shortage of people - don't need judges - doctors - teachers and rest - learn through Soul; Not fairytales - happen next 50 years; Up to 500 years to cross U; Knowledge will come through "Soul of Child of Mitra" - her responsibility not mine - that's the path to the Creator and not mine; Books 1 to 3 guide to life in U; Need T to survive in gap between universes; Mankind will lose many men to advance knowledge; Chinese and Iranians head space T - with peaceful nations; Still afraid to touch Soul; Develop as whole human race - not nations; Moon & Mars already colonized by others - not yet man - trying to transmute first couple to Moon; facing stumbling block of bureaucracy - religion and legislation; Moon holy to Moslems can't go; Have to overcome dogmas in all religions; International law to govern planet and space colonies in 3 to 5 years; UN disqualified from governing planet; U Council & Earth Council part of the process; Never meant One Nation OPOR was in matter state - can create all you need; Pharmaceuticals - Gates wants control - will change in 3 to 5 years - saw same in Iran - corrupt structures will be dismantled; Tests done by KF & KS over remote phone lines - don't need pharmaceuticals; KF wellness centers beginning of process - same service across the world - same with feeding people but has to be addressed by world leaders - afraid to lose power; Join party of "human race"; Controlling population through food will change; With rapid development of T and space colonies all these problems on Earth will resolve themselves in about 30 years; Change inevitable once "runaway train" rolls - we already pushed train it's rolling; NASA expects Internet to shut down from plasma of sun; NASA small player in new space T; Russians - Chinese & Iranians working on decentralizing

Internet from Americans & Microsoft; New Plasma Communications will change Internet - coming - create superconductor chips at room temperature - All knowledge on 1 USB Stick; KF open channels to Huawei - can bypass boycotts for advancing T; KF can also work with Americans not just Chinese - they are open to peace; KF first space T tested in Iran 2008; No limitations - bring change; KS are the "cat" that has got out of the bag" - can't put it back; "M Plasma Packaging" tested in Linz by KS went to Moon or see dead relatives - also developed in background - travel on field lines of U; MaGrav positioning is matter state travel with M & G fields - attracted or repulsed from a position - this is UFO T; No one can control transmutation - not government or others in space - travel without passports - taxation - permission from anyone; MaGrav positioning still have those who think they govern - they want to limit what is to come; T will balance out extremes of wealth - not extreme poor nor rich; Leaders afraid of T because people of colonies go to colonizers country to live - no beds left in US; Use App T on phone to get everything; They can delay T but not stop it from coming out; With plasma T explore galaxy; Speed at which T is released depends on you KS - T already here - get over "silly Gans making" - start expanding your Soul and M fields; Cosmic Rays partially related to M field lines of U - learn later; Oxygen to Deuterium through emotion - lungs feed and elevate STM; Teaching on O as heavy gravitational element in amino acid (AA) or COHN - pulls everything together creates life; O common denominator between AA and H2O - why AA form on top of Gans box; 3 H dynamic juggling cause - life created - AA attracted to water; Sacral bone or tail from time humans had a tail - now keeps upright position - deliver fields of Soul; Only one person in flight session; No implants for July flight Sessions; Belgian King & Gates causing trouble through " Black Opps" - a fact of KF work - always trying to block; Got rid of Belgians inside KF but still causing problems - they will sort it out; Belgium not the only nation causing problems; Can knowledge gained during July sessions be permanent? - depends on KS what they share; Always working in background during sessions; Don't need to be conscious to receive help; Part of brain of every being with brain and Soul interfaces between Soul & STP - gradually master how to work with both Souls; STM is in brain - "If you have a heart of a man you cannot make a man - but if you have a brain you can make a man - I think you have your answer"; Closing Austrian operations and moving; July Flight Sessions use 2 headphones minimum - you can experiment with what you want to do - even help animals or raise emotion of other Souls.

## **Introduction to 493 KSW - Teach Children Plasma & Matter - Creating New Plasma on Earth - Solid Magnets - Gravity of O**

This is a workshop of questions. Mr. Keshe put a lot of questions for us to be thinking about the plasma such as M fields of the U and the Creator, and that we should have studied more about solid state magnets and their field interactions, because that would have prepared us to quickly move into understanding of the plasma. But most importantly we have to change the education system on this planet and teach both plasma science and matter state science in parallel to each other. For the technology (T) to be accepted we have to start educating our children and ourselves. And actually the children will learn quite quickly and he compared it to how the parents and grandparents watch with awe,

when their younger generation plays the computer games so intensely, while they cannot even understand what they are doing.

Maybe we thought that we were just going to get rid of the matter state altogether. This is not the case. One of the reasons we are able to understand this much of the plasma is because of all the accumulated matter state knowledge our forefathers built up over the centuries. We don't dismiss any of it, but we have to bring it to a higher level of understanding and be able to add on to it and take it further. This is where we run into problems with the status quo of today's scientists. Like the Catholic priest's of old, they want to keep the power and position they have built up for themselves, even at the cost of enslaving the others. I brought this up once to an old man who devoted his life to science, and he always used mathematics as proof that he was correct, because you could repeat the formula and get the same result. He was furious when I compared him to the priest's. The sad part was that he did not know he was programmed to believe these things in a certain way, and he did not want to change. This is what we have to deal with, if we want to bring the plasma T out into public. When we start teaching it side by side in the schools, then these people will have no more power over the others.

In one way it seems almost impossible to change things. But then Mr. Keshe said, the "cat that got out of the bag" is us Knowledge Seekers (KS) and there is no way they can put it back in the bag. This is good news, but at the same time it might be hard for some of us to believe, that us little people, who will never be heard on the news, have so much power to change things. In a way, it's like how our Sun was created, one little particle of energy at a time that starts to gather around a center. But remember that center was another being that had gathered enough M and G field strength to create a plasma, or gravity, that it can attract the others to it. Isn't this what we are doing in our daily Brazilian Intention, gathering fields. Everyday we are gathering fields together to create the "new plasma" on Earth. It's not when the change is going to happen, it is already happening. Just think back to 2022 when all the changes took birth, we were part of it, and now we are continuing on with it. It is so simple, but we also have to confirm it within ourselves that it is true, and then it grows stronger and stronger.

Mr. Keshe gave us a lot of encouragement as KS to continue down this path of learning the new plasma science. In fact, he strongly suggested we get out of this silly child's play with the Gans's and MaGrav game to get free energy and start practicing to expand our Soul and the M fields. Many people may be thinking, "I don't know what to do?" That's really not appropriate, because you can just go on the Brazilian website and find a huge amount of material that has been transcribed and translated, that it will take years of daily study to go through. One thing he mentioned was that to get the knowledge of Creation moving we have to start discussing it, but at the level that we are at, not some fantasy idea we may have about ourselves. Again it really comes down to whether or not we have a true love for this beautiful knowledge and all that it can give us. When we were scared of Corona, we did something, now that the fear is gone, the participation and "fire" to learn is less. It goes so much better if we learn out of love, rather than fear. The July flight sessions have been setup so that we can do our own experiments with the plasma, and what we can generate emotions for. For example, if we want to reach an animal to

help it or communicate with it, first we expand our Soul and become energy fields and then through our emotions we make the connection to do what we want to do. We can also use a second pair of headphones to direct the fields to where we want them to go. The only limitation is our thinking, and our openness and what we allow ourselves to feel. Initially there is the fear of leaving the "herd" and walking alone, but when we overcome that through the love of Truth or the Creator, then the Soul expands and can travel the universe (U). We do this at night in our sleep, but we are not conscious of it. Through the T we can become conscious of it on a continuous basis.

One thing that is easy for everybody to do is to start to play with magnets, but this time we should become aware of the field interactions we are witnessing. He spoke a lot about matter state solid magnets and how if we would have paid more attention to how they work, we would easily transition into plasma fields. Just because they are Fe magnets doesn't mean they are not plasma. Holding 2 magnets in our hands and feeling the attraction and repulsion, is the same as feeling what it means M field strength. It's not a concept on a computer screen what we call, "Apple Computer" - how they brainwashed us to be a drone. No, it's something alive. That M field can become a life if we understand the Knowledge of Creation. It's a direct experience of life. We don't need to ask an expert what it means, instead we can ask our Soul and the Soul of the Fields to reveal itself to us. This is how much power we have. Nobody can stop us from accessing this knowledge, only our own fear. I did this some years ago. I picked up a big stone and a little wood stick and dropped them together, and they fell at the same speed to the Earth. I wanted to know why? I didn't ask the silly professors who said, oh, it's a complicated mathematical formula. I knew they were hiding their ignorance. Instead, I asked my Soul, teach me, I want to understand. It seemed impossible, but I stayed with it, each time when I was outside I kept dropping the stick and stone and asking for the knowledge. Years later Mr. Keshe gave the teachings about Gravity and Inertia and the difference between matter state and plasma. When we drop a stick and a stone we are directly experiencing the plasma state and the matter state Weight, when they hit the Earth. That's it so simple, the complicated mathematical formula is for the ignorant people to fool themselves. The point is that we can do it ourselves. All the knowledge is within us, we only have to access it.

We do it when we dream at night. But it's not a dream, we are actually traveling billions of light years through our Soul instantly across the universe. When our Mother calls us to go to school, instantly we travel across the U back to our body, but it is so natural for us that we don't think anything about it. Tonight when this happens again, let's stay aware and feel what is happening, and accept the truth of it. Then we have learned transmutation and then slowly we'll transfer the knowledge to matter state physicality.

There was a teaching on Oxygen (O) and how it holds "Mr. COHN," or the amino acid (AA) together and creates life. The O is the heaviest element in the COHN and it creates the gravity of the AA structure and pulls all the other elements to it. The lightest element can't do that, it has to be the heaviest. This is important to understand when we go to other dimensions in the U and study their life forms to find out which element is the heaviest in their AA structure and how that will effect how they appear in physicality.

Then on Earth two gases O and H, create the liquid part of the planet. Then he said that we should have been able to figure out why the AA forms as fat on top of our Gans Box. It is because the O is the common denominator between the AA and the Water, so it gets attracted to it.

It's interesting about the O being the creator of gravity for the AA. Didn't he say the grandfather was in another part of the U trying to create a seed for a planet. Is O the grandfather of our planet? He appears in all the important combinations such as oxides and even in the air that we breathe.

The knowledge to cross the U will come through "Soul of the Child of Mitra," that's her responsibility not mine. But what did Mr. Keshe mean, "that's the path to the Creator and not mine." Why is that not his path to the Creator, or is he from a dimension beyond what we call our Creator. Or does he stay in the Creation until all beings are liberated, something like what they call the "Bodhisatva vow," to help all beings till the end of time?

Other Topics:

Transmutation is gift from Mitra to humanity - our responsibility to teach other races;

You learn the knowledge yourself by teaching others what you understand, but that doesn't mean that your knowledge is complete. Mr. Keshe added that, first learn the correct way, so you teach others correctly. And don't become a prophet. The bottom line here is to remain humble.

Book 8 "Origin of M Fields" was mentioned again, who created our Creator? We know that we were created out of His fields. Man first has to master the totality of the Knowledge of Creation and then understand motion of M fields and plasma;

Sharing knowledge doesn't depend on what we understood, or some people may change it into their own limited understanding - we all listen to it directly on the recording - maybe understand and get enlightened in the first go;

Man will colonize the whole solar system, not enough population;

"Grandfather is in another part of the U trying to create the seed of a planet in the dimension of energy."

Today when you go to sleep at night as a baby, your energy and level of understanding is set according to that time and place. (Does this mean we are given a certain amount of understanding, according to what we need to fulfill our task in life? Like setting a particular fuel for an engine to do a particular task).

Thank you for listening

## Quick Index

(We welcome you back to share more knowledge and organize things according to the level of (your) understanding. In the past 2 or 3 weeks we have opened a new insight and new ways of trying to find out how we are going to land at our destination, now that we have become "man of space." We are thinking about what our future and our possibilities in space will be. For sure, in a very short time we will colonize the rest of our solar system. The goal is not just the Moon anymore, as the Moon is part of us. The goal will be Mars, landing on Saturn, and being able to swim in the oceans of the deepest "liquid part" of the solar system and beyond).

(Our scientists have only managed many, many years ago to send a probe out with a disk saying, that we are humans and the rest. After so many decades we are not even sure if the thing has passed the boundary of our solar system. So for us even to imagine to traveling in space with the physical transportation of today is beyond imagination. We can't even get to the edge of our solar system, let alone enter another galaxy).

(For Mankind to travel in space he has to look into and understand the work of the universe (U). And he has to understand that there are 2 separate aspects to work with one is transportation in the dimension (D) of physicality (P), and the other is transmutation through the energy fields. KF defines energy as magnetic (M) fields in motion, because for a field to move it has to have an energy. In the coming time, man will learn this and teach both states of Creation to his children, the matter state and energy state as a plasma. Sooner or later we will have to resolve this issue. In the matter state we have the limitation of friction (of the fields) and how much fuel we can carry, as well as the limitation of everything else).

(What we call the energy state is really working in the D of the plasma. There are no limitations in the plasma state as long as we understand the totality of the knowledge. In most of cases we cannot transfer the workings and functioning of the parameters of the matter state into our plasma energy systems. In a way, we cannot work with matter state. But we can live within matter state and transmute in the dimension of the fields of the U. (When we say transportation we mean moving an object in the matter state from one place to another). Transmutation means traveling by using the fields of the U. We cannot fly with a donkey. We have to understand what is used for what purpose. When we transmute ourselves to a position and then if we need, we can transfer back into the matter state).

(We are opening up new avenues of knowledge, which will give man the opportunity to understand both the physical D of travel and that of the energy of the plasma. In some cases one part of the knowledge can be used in the other method of travel. The limitation is not with the Knowledge of the U, rather it is how man limits himself to understand. In space everything can be done, and be achieved. We can mix the knowledge and use it to manifest in different ways. It all depends on how much we have understood the process of Creation. Understanding it is our only limitation. (When we strive to learn something,

then that becomes our target and we work towards it and use the tools of Creation to achieve it).

(It's for us to understand what the limitations are and somehow be able to interface the matter state into the plasma state or D of energy. In some way, the new chapter of teachings we started in the past couple of weeks will be how man will achieve this. (For example, constants like the "speed of light" that became the cornerstone of most of present science has to be changed to the plasma understanding, so that it fits the totality of reality, and he gets correct data in real time conditions). The limitations put by the speed of light don't exist in transmutation. These numbers that we have accepted are not workable in the new space technology (T). But we also have to understand both the matter state and plasma state together).

(In most of cases it won't work to apply the matter state knowledge into the plasma state, or energy fields, or what we call the dimension of magnetic (M) fields. They don't fit. Our children and those of us who were educated a long time ago will have to go back to school and relearn the new system. Or are we going to fight it, (and try to stop it because it's new to what we know)? We see this happening in our talks, conversations, and negotiations (with the governments). The biggest challenge for the new understanding will be to separate the understanding of the transmutation and energy, and the matter state, (but to keep both knowledge's). The next generation has to overcome hurdle. We see opposition coming from the leaders of today's science, and those who we have accepted to lead us).

(It's our responsibility and that of the world leaders to bring these teachings out as a parallel teaching worldwide. This is one of the points that will be raised in London conference, how to amalgamate the sciences of matter state and plasma energy state in real term and conditions across this planet. We have to understand that we have two tools to work with. This will cause all these researches like what goes in CERN, plasma technology, and researches like "Jet Projects," to be revised. We need to understand and teach the new generations the differences between the two, and that from now on they understand both systems together).

(This means that when our children go to school they will learn for example, mathematics in both the matter state and plasma state., The same for physics, chemistry, biology, and all the others. They'll learn to do the calculations also in the plasma conditions. And with biology they will learn about the Gans's, which are in the plasma state and what we call "Mass", the objects like stones are "Weight," or what we call, matter state. They will learn how the sciences operate different, whether they are in matter or plasma state. At first our children will go a lot of confusion with the emergence of the new science, because they don't fit together. They'll have to learn how and when to use which one, and be clear about what need to be done. Because when they are transmuting through their Soul, they'll be transmuting the energy of their body and then manifesting it physically somewhere. If they were to manifest on a highway by mistake, we wouldn't want them to get hit by a car. They would have to remain in the plasma state so the car wouldn't effect

them. It would just drive right through them. And then when they are safe they can manifest physicality (P)).

(The educating of the people of our planet sits with the leaders. Both the matter state and plasma state teachings have to be done together. We want all generations of the human race to the Totality of the knowledge. We don't want those who understand both to abuse the ones who don't understand the plasma. They should not become like prophets and magicians. By teaching everybody about the plasma T and energy field motion, will end the slavery of today. And if the plasma is not fully understood by everybody, then the slavery will be continued by those who think they have understood part of it. They will take the rest of humanity to ransom, and create a worse slavery than what we have now. They will become the prophets and magicians of the future). (Remember this is what happened the last time the knowledge was shared with humanity. The priests kept the knowledge for themselves and abused the others).

(This is why it's important for us to be able to comprehend the totality of the knowledge in both parallel systems. We have to learn how our Soul works in the D of energy and be able to embrace the P to transmute it to another position. We don't have computers to do this. (Our Soul does it when we dream. It matches the strength of the grandfather who died 100 years ago, and we go and see them. It can do the same if he died 200 years ago, or 500 years ago in the future, during the time when man's lifespan will be a 1,000 years?) Our brain systematically finds the right condition. We are not going to fit our brain with a microchip to go here or there. We have to control it ourselves. When we dream at night we go to see the grandma or grandpa, we don't use a control system to do it. (We already know how to do it)).

(Mankind has to unravel this knowledge through the Soul as a D of energy. When we were children we traveled the U to see our grandfather who was already dead. Now when we are 80 years old we still can go and see him. But where in the U did he go? How come we have knowledge to be able to dream about him, but in P we cannot see him or know where he is?)

(We know that the body of the man was created to feed the Soul, and the Earth is a nursery for the Souls to be spread around the U. Now we understand the totality of the connection not only for this planet, but beyond. It's not just about having the right address, because in the U there are no addresses nor zip code to find someone).

(In our dream of our grandfather last night, the Soul did not have a "zip code" to find him. It used the connection of the fields, the field strength, and the emotion we have for him to bring us to him. Strange enough, he still looks the way he did 50 years ago when we dreamt of him as a child. He has not aged. Or, have we given him that picture according to our memory of the time and place?)

(How do we get in touch with someone from 200 years ago, or 10 centuries ago? How do we see the Soul of someone from that time? How is it done, as there are no control systems, no gadgets, and no microchips in our brain? It's done through the connection of

the "Soul of our ancestors," the same way as they pass their DNA & RNA information to us. And they were connected in our time, space, and place to the others that we see (in D of P)).

(There is still a lot to learn and understand. From now on the KF starts the education of reality. It's the responsibility of Knowledge Seekers (KS) to understand and become the teachers of the future, but not to become prophets.

Try to explain what the upcoming possibilities of the future are in the D of plasma and field interaction. And explain both the matter state and plasma state together. We cannot dismiss whatever man has achieved in the matter state. We should always add the additional knowledge of we need to learn. But it does not mean that whatever has been done is correct. We are in this position of today because of all we have accumulated from the past as a race. We will continue to add knowledge that will make our future race what it will be).

(The whole understanding of the world of Creation comes out of understanding the work of the plasma, energy fields, and the connections of the fields. In fact, mankind has not tried very much to understand the plasma, even though we (as Messengers) played with (you) for centuries. Mankind played with magnets, but we never understood the work of their fields, or the sharing of the fields between two magnets, or the interaction of the fields between the magnets with their environment, that allows MaGrav positioning through attraction and repulsion).

(If you really go back into the depth of it, we still have not completed our understanding of matter state magnetic fields. And this is why we are having problems understanding the interaction of the fields of the plasma. One of the biggest problem will be how to know any moment which M field we are in respect to which one we want to go to, and which one we want to return back to. It does not mean that you always have to be in the matter state to interact. You might find more pleasure being in the plasma state. In the plasma state you cannot age, so you might go back and forth between the matter and plasma states).

(When you put a magnet on a table does its energy change (everyday)? Does its energy and position change after 10 years time? Does the energy of the magnet vary during the span of a 100 years? Does its effect on its surrounding change? Because we don't know how to answer these questions, it means we have not even managed to measure the fields of matter state magnets, let alone going to the next stage of understanding the plasma and its field interactions. Is the field interaction of a solid magnet the same as a plasma magnet? What about the plasmatic magnetic fields of the Earth? If we have a solid state matter magnet in our hand, is there any difference in it? Could they lose their energy at any time? Can we interact with it? Can we lose it? Can we manipulate and move it? How do we connect the magnetic field of the matter state to magnetic fields of the plasma state?)

(Many of you should have gathered this know a long time ago. You should know how to connect the magnetic fields of a plasma to the magnetic fields of matter state. If you don't understand this, then how do you expect to do transmutation? How do you want to transport yourself? For example, how do the Japanese manage to do magnetic tracking of their railways? (In the same way how can we get our Souls, or the energy fields of our life, on a track like that, but instead, on the M field lines of the U? Is there any difference between the two? Or is it because we haven't understood, that one is a wonder and an advancement in technology, and the other one we just ignore, because we can't even comprehend it).

(Understanding the whole structure of the teaching comes by and bringing up and discussing the points that you do understand. Like with one of the questions from last week, we said, it's a step by step process the leads to the whole understanding of the Totality. The KS of the future will understand the separation, interaction, and transmutation and transportation from one (state) to the other. You don't get on a jet plane to go and see your grandfather who died 200 years ago. Sorry, no plane has been built for the "dream line." Instead, you transfer the energy of the emotion of your love, feeling, and connection, and that connects you to the grandfather at that point in time. There are no donkeys to take the P and the Soul of the Man (STM) to the other part of the U where the Soul of the grandfather is. Even the Creator hasn't created such a "donkey," let alone the Man).

(We have to clearly understand the separation and differences between each state of existence. There are other states of existence that the man is still blind. Once man matures and understands the process of energy, plasma, transmutation, and M field motion, then another science of the Creation will emerge. With that knowledge man will be able to transmute across other universes. At this moment of time man will not be able to comprehend this knowledge. First you have to understand the knowledge of the Creation and how it goes from the matter state to plasma state, and then the knowledge of how the plasma is created from the fields of the Creation).

(It goes back to the question of how, where, and the way our Creator was created. If there was nothing, then how was He created. That knowledge is (self) hidden, because man cannot understand it. Even today that knowledge already exists within the man, but he has not understood it. He has not understood the transmutation and the D of existence without tangibility. Without this knowledge he cannot even imagine what the next step is. (Actually, he was created from the interaction of the fields of the plasma, (that created his own physical body)).

(In the coming time, we shall teach about this state of interaction. It's a level of Creation, of where the fields came from. This is the title of Book 8, "The Origin of Magnetic Fields." It's the essence of the creation of the Creator, and the environment (out of which He was created), and the way He was created. We always said, Book 8 will be about the origin of the M fields, and the essence and origin of the fields our Creator was created out of. We were then created out of His Creation, what we call, the universe and Unicose. That knowledge is not yet open to the man, even though I can teach it to you today. This

knowledge comes when the man masters the Totality of the Knowledge of Creation. It's when he understands the plasma and the motion of M fields).

(It's important for us to gradually understand this inside ourselves, and not by remembering formulas. Because unfortunately there are no formulas that can take you to your grandfather when you dream about him. You actually went there and you saw him, you got the kiss and cuddle, his smell, and the emotion of his presence. Maybe you had dinner with him, and then came back and told your Mom, "Mom, last night I dreamt about the grandfather." But in fact you should have said, "last night I was with grandfather. He is okay and he's busy trying to make a seed for a new planet in the D of energy. He's very happy where he is at." And your Mom says, "you should have told him hello from me and that I miss him." By hearing this, your mother would have been educated to the level of understanding the work of the plasma. Even though she already has the ability to do the same herself).

(One of the biggest challenge for KS will be understanding the Totality. To go deeper to understand all of it, and not just part of it. If our KS can overcome their fear to live in both dimensions of the P and Soul, then they can practice the transmutation and transportation (T&T). Many will not go through the T &T out of the fear of whether they can come back. They are afraid that if they cannot come back they would end up as a nomad in space).

(There are methods and ways with the plasma that you can never get lost in the space. But would you be able to carry your physicality with you? The question is that if you suddenly got lost in space could you manifest your P to gain confidence to get back to the original transmutation? The primarily question is, that if you get scared during the transmutation process where would you manifest yourself? On Earth, in space, on another planet, or in another galaxy? And if through the fear you forget what to do or how to connect back to the plasma state, would you become a nomad in the deserts of the U, lost and not knowing where to go?)

(As we start traveling in the D of the plasma it will be in zero-time transportation, and we'll be connected to the world of the M fields. We'll be able to transport ourselves in D of matter, and also if we want to convert to energy and then back to matter. It will be an interesting time. If your child knows how to transmute and decides to go from London to New York to see the uncle. Then while you are sitting 18 hours on the plane she is already with the uncle in London a few seconds after you depart with the airplane).

(In the coming time, the biggest problem for human race will be the difference in knowledge between the youngsters and the older generation that didn't learn the new knowledge. It's very much like the kids playing the computer games of today and the parents and grandparents standing by and wondering how they are playing these computer games. It's all a matter of how much time you put in to practice to master it. Very soon your children will master transmutation and you'll be standing by like the grandparents watching them play computer games).

(We need to educate the public in all dimensions and all citizens of this planet on an equal basis. For example, let's say if the Americans learned how to transmute and transport and some of them do it, then it should not become a disadvantage to the boys in South Africa, or in the jungles of the Amazon. As KF brought the knowledge, it's our responsibility to share it equally irrespective of border, color, race, religion, nationality, or from which place in the U you come from).

(The teachings of T & T are not only for man, but man will teach the others in the U, even though they are in some of the most advanced UFO's. Twenty years ago man could not imagine that he would be ahead of those in the UFO's. They might have mastered transportation, but it's through the teachings of the human race that they will master transmutation. It's a gift from Mitra to Mankind).

If you understand this, you'll open the horizon of the U. (It's your responsibility to freely teach this knowledge during every age, meaning today, tomorrow, and in a hundred years from now. You should teach this unconditionally to all beings totally irrespective of their race, color, religion, creed, and whatever part of the U they come from).

(We have to make this very clear to you as now you have worked with the Gans's, and you understood and felt their fields, you went through the systems in the Linz Center, and you did everything else. This has to become a mainstream understanding and education for all of us on this planet. It has to be taught in all the schools, so that no race in the future will be left behind. The advancement in science allows us to teach the Soul instantaneously and it does not matter where in the universe it is. but first we have to understand it correctly, so that we don't teach the wrong thing in the wrong way).

(Operation and existence of life across this universe is the same irrespective of location and what knowledge you carry, or what shape your P might have. You might be happy with the features of two arms and two legs, but in another dimension you might just be a box. The emotion is the same as you had when you were a human).

(It'll be interesting to watch how, once mankind understand this, he will view the other creatures and creations of the Creator. We live in one dimension, as man with a Soul and being mobile. (When we go to another D we'll carry the same Soul), but in the D of physicality, we might be like a stone on that planet. That would be the best existence in that position, time and place and manner).

(In the new educational part, and with respect to the energy field transportation and transmutation, we'll have to continuously remind you in which D we are talking about. From now on, most of the teachings will be on the D of transmutation and interaction of the fields, and not the physical interaction of the man. How you'll react and embrace the knowledge will determine how much more you can learn and experience in the D of the plasma, or what we call, the STM. (The more open you are the more adventure you'll have).

(The sharing of this knowledge will not depend on how much you as KS have understood, rather it will be taught through the recordings and someone in the future might listen and grasp it the first time. It does not need someone to teach it and change it how it suits them. The people listening will determine how much they can understand. (We have the matter state and the plasma state, and the fact is that one is already inside the other. It's the natural state of life, but man does not understand it. He doesn't want to understand it, because he's happy with the status quo of today).

(One of the most important parts of teaching is understanding the D of the plasma, its strength, and how each individual will enjoy to be part of the work of his own plasma. It does not matter where, when and how).

In the coming time, we'll teach you how to connect through Soul to the matter state, through the Soul of the matter. Not in the dimension of physicality of the matter. How to separate the two, and how to live with both in the same position and dimension. (Education of the new plasma technology in the physical dimension is much harder than when we taught the first part of this technology. There are many reasons for this and in the coming time we shall explain step by step and how each one needs to be done. Initially we'll leave it to you as KS to come out with the appropriate questions through the strength of your understanding and what (knowledge) you are looking for).

In the coming time, the measurement of plasmatic M field strength will become the cornerstone of how you will transport. (Today we have problem of choosing the right fuel and that's why there are different types and different ways of using fuel. In the future, mankind should understand how to use the resources, but not abuse the resources. This will be a big change for mankind).

(Today if you are a baby and you go to sleep at night, your energy and level of understanding is set according to that time and place. It's not set for higher or more. The teaching of today needed to be done, so that KS have a direct clarity and understanding of where and how we are going, and the way we will get there).

(A couple of weeks ago I asked you to try to come up with an estimation of the age of this planet, and the age of the U, or "Universal Time Zone." And how would we go from one to the other? What would happen if one (?? part of you) goes to another dimension, while the other part is left behind? "Would our father call us blind? Or have we become blinded by knowledge?"

(It's important for future space travel that we understand how the motion of M fields in plasma T are connected and stay together. How do we take the energy of a matter state (object) and to somewhere else and then how do we convert it? Can we take our favorite chair and table to another dimension? When we arrive at the new destination, then can we enjoy the comfort of that particular chair? Would it exist in the new dimension and field strength? Would our Soul lose part of its memory bank, or part of its energy, through the interactions with the new plasmas or dimensions of plasmas in the U? How do we protect and keep everything together the way we do on the physical side. Where we keep the

integrity of our body, its hands, fingers, toes, nose and everything else together, so that it identifies us as who we are in the dimension of the plasma?)

(We have to teach our youngsters and the up coming generation about the new plasma technology and how the world of physics will change. There are a couple of nations planning to implement this, but they are having trouble and they don't know how to overcome it. (They have to find a way to make the knowledge useful for the future generation)).

(Coming back to the teachings, it's important for us to understand how we change the strength of M fields, so that we can move up and down through different M field strengths (and go into higher order fields). (We want to be able to change field strengths but still be able to manifest ourselves as who we are in the matter state. How do we calculate the (strengths)? It's not by calculators, but through our emotions. Then we can tell our grandfather that we miss him even though he died a hundred years ago).

How do we transmute between two positions, when one of the positions is already taken, even though we cannot see it? We have to go to the emotion of the STM and into the understanding of the totality of the existence of the man. We have to realize that when we go in the D of plasma, even though we are aware of the existence in the physical D, we have to trust the strength of the plasma to protect the integrity of our life, which it is carrying, (while at the same time) it is "existing to confirm its own existence." How do we calculate (the distance ??) to go from one place to another, and actually land there? All this needs to be understood, and to understand that the M fields will have (?? their own) dimension and direction. We have to know how to calculate both. Are there vectors (that we have to know about, and do they have a limitation in being able to transport one to the other?))

(I'll teach you these things in detail in the coming weeks, but not with numbers, because "numbers game" is over. Now we need to understand the combination (of the fields and how they work) in the plasma state. (This is where the speed we travel in is zero time, and its conversion is also zero time)).

(This is related to what we all have experienced at some time. Where we are in our "dream" and suddenly someone wakes us up and immediately we are back in eh physical D. For example, we traveled in the D of transmutation, or M field energy, and we're sitting with the grandpa who died years ago. He's giving us tea or coffee and cake, and a toy for our child who's there with us, while we're enjoying grandpa's presence. And then suddenly somebody says, "John wake up, it's time to go to school." And then immediately we bring everything back to our "dimension of existence" and in the matter state we are getting up to go to school).

(If you wanted to, how would you calculate this transition?) "I was standing (and watching people through the reflection in a mirror). There were a lot of people, waiting for the harvest machine to harvest the seeds. And in that process, no one knew what they

will get. No one knew what the next process will be to get something. But they are physically present. They make a decision to be there to see what they will get."

But does this apply in the dimension of transmutation? Do we queue up in the "world of the transmutation?" Or do we rely on our mobile (phone) system and a bike to take us somewhere? Can we take off and catch up with where we took off from?

(Ask yourself a question, what happened in that instant when you had to suddenly come out of your dream when you were being called to go to school? Did you wake up because someone called you, "John, it's time to go." Or did you switch off everything? How fast did you manage to come back (to the physical dimension)? Grandpa was in another position somewhere across the U, in the process of becoming a planet. How did you get there without rockets? And you don't yet have the new T of the "mobile phones" to transmit you. How would you do it, in the D of physicality? How do you nourish this and how will you teach your body this in the coming time?)

(How did you came so quickly from the other corner of the U when Mom called? And you were there solid on the bed not moving, because you were still dreaming about going through the process (of getting up, eating, and going to school). Let's say for example it was Sunday. Would you be able to go back to sleep and return back to that journey you were on and see the grandpa again? Because, you didn't yet finish enjoying his existence).

(What mechanism was used in our brain, to bring us back over billions of kilometers, or "light years" across the U? We were able to instantaneously manifest ourselves when our Mom called us. And what happened to grandpa? How did you manage to do this, to instantaneously travel at a high speed across the U? Does it mean that you learned to do what I taught you? (For this week try to create a condition or find a system ?? that you can do this with).

We have to discuss and bring these things on the table, so that you can start distinguishing between the matter and plasma state. (You have to start being able to distinguish what can be made (?? in the plasma state). (For example, if (in your dream) you wanted to have a somewhere, then you could create it, not a solid wall, but a plasma wall. You can do this in the D of T & T. Maybe you lose a little as a child wanting to play, but you gain a lot in understanding the Totality). (Today we tried to help you understand more how to distinguish and the matter state and plasma state and to work in the plasma state).

### **End of Quick Index Part 1 - 493 KSW**

(July Monthly flight Session will be on 14th, 21st, and 28th for 3 hours each session. You can join any of the sessions at any time. You join the sessions for whatever your reasons are, but we are doing very important testing for the technology (T) in the background. Remember KF is a research organization and whatever we do is for us to learn and

develop something that will benefit all of us now and in the future, and for our future generations).

(Something interesting happened last Friday during the elevation of the "Soul of the abusers of children." Usually we do a survey at the end to understand how people felt during the session. But this time we used the technologies we developed in the background (to determine) how you felt. We ran the systems and it allowed us to see what the effect was on the collective Soul of the people who participated, along with their emotion, physicality, and everything else. We don't need to do the survey anymore, because our systems give us all the data we want. If I would have taken the same data from a survey it would have been 90% exactly the same).

(We fed the energy of your Soul into the system, and it cannot lie. We see when the Soul elevates the Soul of Physicality (STP), and the P. We also see the challenges the STP has and how the P responds to the situation. We understand and monitor it fully in the background. We can add to (the information) and change the parameters. (When we ask you to go offline, then we are acting and delivering new technologies). This is how the next step in the T will be).

(From next Friday the 14th onwards the sessions will be 2 to 3 hours long. We don't assign any particular condition to the sessions like we did before. Instead it is up to you what you want to work on. We will fit the system to your needs. But we are testing things in the background).

(It might occur that you come in for all 4 sessions, but in the 2nd session you receive what you were looking for. Or it may be that you didn't feel anything in the first & second, but then what you wanted comes in the 3rd session. For these sessions you will need at least 2 sets of headphones, one you put on your head as usual and the other one you place on your body where you want to make the change. You'll need a stereo adapter for your headphones that allows you to plug-in more than one set of headphones at the same time. The 4 sessions are for you to do as you like. Maybe you want to elevate your Soul, or get rid of a pain in the arm, or send a loved one an emotional change (?? maybe you'll have their picture with you). Or you want to change a sick dog, or a fish that is in a tank. This time we give you the facility to do these things).

(If you want to change a condition on the left side of the body, then you put the headphones there. It's for you to decide what you want to do. We'll be covering a full spectrum (of fields). In some cases we'll change things to fit our technology. Don't forget, you are joining these session to help us learn, so that we can help the next generation. But at the same time maybe you'll get the satisfaction of what you wanted, and the reason you entered the sessions. These sessions will be very extensive. Most probably we'll have a session at the end to discuss and understand how some of you were affected).

(The developments of the technology has come out of teaching the KS and them understanding the processes. So you are welcome to join us. We're trying to put a limit on the numbers, because we want to understand exactly how it works. We want to

understand how much we have helped you, and how much you have helped yourself. Or should we say, how much of the change was brought about by you. Some examples of what people work on with the system are addiction, if you're an abuser or you've been abused, cancer, depression, maybe you want to try to grow a tooth, or extend the lengths of your leg, a hip replacement, you are emotionally stressed, or you want to see if you can change the characteristics of your fish. It all depends on you and how you apply your emotion to the system. Keep in mind that we are not here to deliver what you want in physicality. Rather we are here to see how we can elevate the Soul, and then the Soul will bring the change needed by the STP. The Soul transfers the (energy needed) to the physical condition of the man, animal, or whatever).

(Join us in this group of 4 sessions for your sake and for the sake of gathering knowledge. And then we'll see how we build it up for the August sessions, which will be very interesting as we'll try to bring in the 25 KS who are being trained in transmutation, then we'll go for the 200 and then the 65 of those).

(The Keshe Foundation has to remain independent and free to do its research with the KS. There should be no limitations or controls put on it. We might have some news for you in coming weeks that will bring changes to the whole structure of the KF operations internationally. We hope it will be to the advantage of all of us as "One Nation, One Planet, One Race." The KF Exhibition Center in Linz, Austria is closing its door for good in the next week or two. It will be moved to one of the major cities in the world).

Q: Can you explain in more detail how the headsets and microphones work during the monthly flight sessions? Do the plasma fields follow the headphone line to the Soul by way of the Internet?

K- (KS have been doing these sessions for the past 7 or 8 months, so it's well practiced. In a way, the headphones act like a GPS for the location of your Soul, then the rest of it is transferred. We'll do it this way until we send out the "Combination Headset Units" that many of you ordered from the Store some months ago. Then those of you who have bought them can use the plasma communication system instead of the phone lines).

(The Headset Units are going through their completion phase in the next few weeks, and they'll be released to those of you who purchased them. Then you will see the differences between that and what we are using now. It's like listening to mono and then to a stereo system, you'll feel the difference. It's more like feeling the emotion, rather than actually listening to the words. Gradually you'll learn how to translate these emotions into words, or into your way of living. You'll build it up gradually. (During the learning phase you can put the plasma headset ?? over the mobile phone headphones, one on top of the other. You can do this to help you train to "home in" to the physicality and the STM together). We'll slowly teach you how to use them when they come in).

(During the July sessions we'll advise you how to place the headsets during the session, so don't worry about how it has to be done. We'll guide you how to switch your systems on and off, and where to go and what to do, because we control a lot of things in the

background. It'll be more or less the same. There are translators who translate the instructions into the languages of the people present).

Q: How will the future transportation systems be? Will large size group traveling be handled by big corporations and governments, like the plane traveling that we have today?

K- (From the KF point of view we are "running two horses in the same race." I was discussing this recently with some government officials and people who understand these things. We are teaching both the new MaGrav system, which is MaGrav field positioning in the matter state travel, and at the same time we're developing the energy transportation system, which we call, transmutation. That's where you transmute through your Soul into energy and ride the field lines of the U. In either case, KF will be the major player in this development, at least in the beginning, or maybe the first half a century of it. Then others from humanity will add their talents to it, as well as other races from the U. It will be a collaboration).

(Once we open the doors to the Universal Community in the physical dimension, mankind will get flooded with all kinds of new technologies. At the same time, we will flood the other races with the technologies we have, that they don't have. It won't be one way traffic. There will be a massive change in the D of physicality. Some of you might like to travel in the UFO, which is the matter state form of travel. But as the human race is being taught transmutation and plasma transfer, that will become the unique work of the human race. Because the other races in the U who have tried to develop transmutation have not succeeded. This will come through the human race. You will become the teachers of transmutation across the U. For a long time the human race will be heading the knowledge transfer in this area. This is just for the initial stages. And KF will be part a major player in this transfer of knowledge. We'll see the integration of other things as well, and it will bring a new dimension in transportation. We'll explain more in the next few weeks).

(The colonization of the Moon and Mars by 2025 is inevitable, it's on the cards, depending how our nations and the world leaders decide on it. They might push it back to 2030, but we should be able to colonize most of the planetary systems in our solar system. Because once we learn to walk, then running and jumping from one to the other will be easy).

The stumbling block will come when we have to learn how to cross the bandwidth strength of this solar system. It's not easy, it's very similar to how we exit this planet or how we have tried to exit this planet, (but in a larger scale as it is the solar system. When we leave the solar system we'll dive into a deeper ocean of M fields. To do this we need to learn how to transmute. Part of KF work will be teaching us transportation on this side of the inner solar system. I'll be heading this part for a time, as long as I'm alive to teach you, to bring you to that point. Before I close my eyes the last time, we hope to be able to take man into the U beyond our galaxy).

(This means there's a lot of work to do in teaching you, and for you a lot of understanding. We are carrying so much knowledge that it has to be shared. In this process, maybe in the next 50 years, man will be able to cross this galaxy. It's quite feasible, given the intuition and ingenuity of the man, once he's given the chance to develop. The biggest problem for the human race will be the small population of the Earth and a shortage of numbers for colonization. We know the man is curious to see the U and its creation. This exploration will take a lot of men out of the work for running this planet. But don't forget, there won't be anymore need for jobs like judges, jails, hospitals, doctors, and no more schools since we'll teach through the Soul in any language and any knowledge you need. Then there will be a lot of what I call, "holiday makers." The ones that take care of the planet won't need to be paid, because everybody can make as much gold as they like in their back garden. By feeding the Soul which feeds the P all the needs will be taken care of. Looking after the rest will become the joy of serving others).

(These are not fairy tales, these things are on the cards within the next 40 to 50 years. After this it may take mankind another 200 to 500 years to be able to cross this U and go to another U. Again this needs a lot of (knowledge), which will come through the "Soul of the Child of Mitra." That's her responsibility and not mine. And that's the path to the Creator and not mine).

(During this time the knowledge and the guide will come through Books 1, 2 and 3, because it's the same as you are. Life in other universes still exists. (But the question for you is, do you have the knowledge to live under the ocean without any clothing? Or can you travel outside the space of planet Earth without any "monkey suit"?) This is the dilemma you'll be in when you travel further out into the U. You have to understand new technologies, and new sciences for surviving in the space gap between the universes and then how to exist in the others universes).

Mankind will lose many men in this process. (It will be like during the Roman times when the mothers gave birth to children only for them to become the soldiers of the Emperor. Many of us will create the "Soul of Man's life," to become the passengers of the U, to add to the knowledge of the man in the D of knowledge of the U. In the short term for sure during the next 5 to 10 years, we'll colonize Moon and other planets in mass numbers. It won't be just one astronaut with a "monkey suit" flying out of Cape Canaveral or somewhere else).

(This development comes on the back of the KF teachings. Together the Iranian and Chinese space technology developments will head this project. You will see close collaboration between the Iranian space nuclear industry and the Chinese in a very short time. They will spearhead the project through their ethos of peace and take humanity to the next level of space travel. At least for a short time, and KF will be part of it. We'll be heading the knowledge, and I'm sure the geniuses in the universities of Iran and China, and other peaceful nations would like to join us to take humanity to that level).

(First we have to learn the physical part, because there are those of us who are still afraid and don't want to touch the Soul. And there are also those of us who do want to travel

with the Soul. If you travel with the Soul it won't take much time to travel the span of this U. But the problem is you might get lost in many places, then how am I going get you back home. Then there are a lot of other bits of knowledge that we need to know. It will be a learning curve and understanding it will take some time. We foresee a lot of these things coming up in the next 2 to 5 years. We look at the technology differently than others, because we brought it).

(These things will happen as a human race, and not individual nations. You will hear things in the news, which refer to these developments in the coming time. In summary, the two main ways of travel are in the matter state with MaGrav positioning and that flight takes about 15 minutes. And with transmutation of the energy pack we call the Soul it's instantaneous. The future is bright and we are working very hard to make it happen in the smoothest way possible).

Q: Aren't the Moon and Mars not already colonized?

K- (Yes, by other races, but not by the man. I mean there is a lot of question marks. We are in the process of sending the first two humans to the moon with the new plasma technology).

(There is a lot of bureaucracy with these kind of things that we are facing today. It doesn't matter that the technology is already here, we still have to deal with legislation. This can be used as a stumbling blocks for releasing the upcoming science and technology. We can deliver systems where we can expand your Soul and travel and do whatever you like. We have done it. But now the ethics and religions starts to come into it through legislation in some countries. This will be one of the biggest stumbling blocks for the release of this technology internationally. Unless a nation opens up and says that it's going to start using the T).

(We have this problem in Iran as it is an Islamic nation and the Moon is holy to the Islamic world. So there is a huge problem for going to the Moon. There are millions of Muslims and many of them are fanatic. We are trying to convince them that man can go to the moon. But you cannot imagine that this is an impossibility in their brain, even though their nation is trying to do it).

(When there is illiteracy in the Knowledge of Creation and of God, then men abuse each other through religion and blind dogmatic beliefs. This is one of the things that will emerge very soon. Once we open these doors, then these Ayatollahs, Mullahs, Rabbis and Priests will have to go to the same Church and tell their people the truth about how man can go to the moon, or even Mars. This is the hypocrisy of the religions).

(We will have to overcome a lot of dogmas, and it's the same problems with Jewish, Christianity, and the rest of the religions. Religious leaders and lawmakers need to open the legislation for the T to come out. In the next maybe 3 to 5 years we'll see the emergence of "international law," which will apply to all of us as a human race. When we start zero-time traveling it will be only a few minutes to go from one nation to another,

then new laws will have to be structured, but not by the United Nations, (which because of its corruption) is a disqualified as a ruling organization).

(Part of the responsibility will fall on the back of the Universal Council and the Earth Council. Whatever laws they pass will have to be equal for all of us regardless if we do wrong on this planet, or in a colony on Moon, Mars, or wherever. There will be equality among all of us. I had this discussion with a wise man of power in one of the most powerful nations. We talked about how we are going to share the knowledge and T with everyone and not to the exclusivity of a single nation. We need an administration to see this through very rapidly. (We don't want to create a third world nation in the matter state, but all equal nations in the plasma state, as "One Nation").

(From the time we introduced "One Nation, One Planet, One Race" we never meant that it would be in the matter state. Because now all of you can create everything you need from energy, matter, to whatever).

(When there is maturity in the totality of the members of the Universal Council, then they will lead in creating the legislation needed for equality on the planet. (The UC will guide the Souls irrespective of what language or race they come from and this will force the governments to go for a rapid development of the T)).

(There will be a massive change in the pharmaceutical and world of medicine. (We saw clandestine activities over the past 3 to 4 years from people like Bill Gates and the others who planned things to become the richest men, or just to bypass the legal process to have control over things. These will all become non-existent. We'll see a massive change in pharmaceuticals, where they will have no meaning. We saw this in Iran during the situation with Covid. Even though we worked with Iran's National Defense University and published a scientific report, and everything was done properly, still the people inside the health authorities were able to block the T from helping the people. It was because they were profiting through pharmaceuticals. Now these structures will be dismantled).

(With the tests we did with the KS through the mobile phone and transmitting fields we don't need pharmaceuticals. Our systems can be centralized and delivered from one country and everybody can have access to it. It's not that these are on the cards, the process has already been started. The wellness centers of the KF are the beginning of this process. It doesn't matter what condition you have or where you are in the world, you get the same time and services as everybody else. We have already brought this into operation).

(It's the same with the feeding structure, but this has to be addressed internationally by the world leaders. One of the biggest problem we'll have are the world leaders, and how to keep them from losing their position as a world leader, but still be able to lead. Or are all becoming the members of one party, the "party of the human race" as I call it, and how we can serve better).

(Taxation is another problem we'll see in the next 10 to 20 years. How do you tax people to provide services when they have access to everything outside of their own country. Now you don't have to go to a supermarket, when you can buy the energy of the food you want online from an App. You can buy it from any country. So now the government doesn't earn money from importing food or whatever. Controlling the population through food will change).

(These are the conditions of the transition time, because with rapid development of the space technology and opening of colonization, all these things will resolve themselves in the next 20 to 30 years. There are a lot of changes to come. The change is inevitable, and the human race needs this shock, this change. It will come sooner or later, once the "runaway train" starts rolling. Everybody will fit into the train and be somebody. We have already pushed the train down the track and it's rolling).

Q: We know about NASA's behavior and performance. Recently they spoke about the Internet shutting down because of plasma emanated by the sun. Does this check out or is it a fallacy?

K- I don't know, go and ask them. (NASA now is not everything, they are a very, very small player in the new space T. So, they do what they do. There is a problem (?? with the Internet) and we know the Russians, Chinese, and even the Iranian governments are looking into it. They are thinking about moving away from the centralization of all computers from the hands of the Americans, as it is today with Microsoft and the rest of them. There's a lot of work is getting done (in the background)).

(When the new plasma communication systems come into operation a lot of things will change with the Internet. There are changes coming. Once we start releasing these new technologies, (actually they are getting released), then new ways of transferring information and knowledge will come with it. We'll create new Chips as we have superconductors that work at room temperature. And all the knowledge you need will be on one memory stick. Literally, (whatever is on all the computers today can fit in one USB stick), and you'll have all the information in your hands to be used on demand. And nobody will be able to disconnect you, like what they did with Huawei (pronounced: Wahway). With the new T, this will become impossible to do).

(In a very short time, KF will open channels with Huawei, as we've done before, to use the new plasma communication lines, which will allow them to bypass all the boycotts and sanctions of big companies put on them just because they're advancing in technology. But we will also work with American organizations the same. We don't just work with the Chinese, we are working with the Iranian nuclear centers to transfer space technology. Don't forget the first plasma nuclear reactor for flight was tested in Iran in July and August of 2008. If the Iranian government opens up the advancement in plasma technology to Iran, then in conjunction with other powerful nations a lot of things will change).

There are no restrictions or limitations. We are in it, and doing what we can to bring that change. The "cat has been let out of the bag," and somebody has got its tail in their hand, and they think they can put the cat back into the bag, but it cannot be done. The part of the cat that is out of the bag, is you Knowledge Seekers.

Q: This question was from last week. Could you open up a little more about the magnetic plasmatic packages for transmutation, and what the difference is between magnetic and gravitational fields that are for the matter state?

K- (KF has already tested the plasmatic packaging, which was partially done by you KS who came to Linz and used the systems. By your participation we were able to develop it further. And partially it is from us developing other technologies that are in parallel to this T. We also worked on it during the monthly Friday flight sessions. In plasma packaging, the physicality (P) doesn't come into the line of operation. Instead you travel on the field lines of the U. This is part of the new developments in space technology).

(The M and G fields of "MaGrav positioning" are very much on the line of matter state transportation. This means you get attracted to and you create fields to get attracted by another position in the U. Another way of saying it, is you create fields to be rejected from a position. However, the "plasmatic packaging" is different from the MaGrav positioning, it's where you do the transmutation. Even though with both methods you do the same thing, where the MaGrav positioning could be compared to riding a donkey, and the transmutation is like traveling with the jumbo jet. The difference is that it depends on how much you understand about the T and want to apply it).

(For sure, there can be no control on transmutation. No government can control transmutation, nor any other race in the U. It's like when you dream tonight, nobody can control what you dream or where your Soul goes. Because it's not a dream, your Soul is actually traveling the span of this U. You travel without passports, visas, taxation, or permission from anybody. Whereas with the MaGrav T we'll still have governments, because it's in the D of P and there are people who think they are governing. These are the ones who will bring limitations on what is to come, and who can go where, and the rest of it).

(Another beauty with this T is that it will balance the wealth across the human race. We will not see the extremes of poverty, nor the extremes of wealth, even though there will be a difference (amongst people), it will be balanced. Part of it will be done through the technology, and part of it through governments, or organizations, so that we don't reverse the things and go back to something worse than what we had before).

(In my talks with many governments over the past years, one of the biggest problems they have with supporting and opening up the KF MaGrav T is the chaos it will bring in the initial stages to what we call, the "colonizing countries." (Today they don't use that word colonization, but it amounts to the same thing). It's just like the refugees we see from different wars like Ukraine, Syria, Libya, Iran, and the refugees from Vietnam war in the past 50 years, we'll see that with the T. Millions of people will move to find a

better life. So if you added up all the refugees in the UN statistics over the last 60 years, that will be nothing compared to what will happen when we release the new T. People will be able to move rapidly).

(One of the reasons the T has been objected to, blocked, and everything else by many different governments, is because they are afraid that all of the people from the countries they are colonizing, will end up in their own home. The "3rd world" countries became poor because of the organized debts from the colonizing countries, now they will all be able go to the country that colonized them).

I don't think you'll find a single room empty anywhere in the United States, England, France, or Germany. They'll all be populated by people from their colonies. They will be able to buy an App that can send them to London for example, and live in such and such a place, and not have to pay rent and everything will be provided. These are the realities. That's why we are teaching you to go and teach the others).

(This is what you did when you came to Linz to use the EU. Some of you went to the Moon or Mars, and others changed the pH in their body. Once this T is understood and completed it will become part of the App technology, where you buy an App for your phone. It means people can be sent anywhere in the world by buying a ticket on an App. All we need to do is to deliver the energy through our headphones, the way we do in the monthly flight sessions. When this happens, will there be borders anymore? Will we still see Africans living in a hut? And will there be luxury apartments in New York, Tokyo, and Washington. Now you understand why there is such a huge opposition to the Keshe Foundation work).

(They can delay it for a few years, but they cannot stop it. It comes to the point, that when you have access to the plasma T and "plasma packaging," would you like to live on this planet with so much abuse going on, or would you rather go and start your own village on a planet, or somewhere where you feel good. We are not talking about over the next hill, but over to the next galaxy, or whatever place you feel good to be in. These are the realities coming up).

(How fast this T and knowledge will come in depends on you KS, because the T is already here. It's a matter of you getting out of the silly "Gans's making" mode, and playing the "MaGrav game," and actually start to understand the real knowledge, which is the expansion of the Soul and using M fields of the U. (That's where the difference will come in, when you start getting serious with the more advanced T that is already here. This is also why we are doing these monthly sessions, so you can practice with the T right now, and don't have to wait for the others)).

Q: In the last teaching you spoke about the Cosmic Rays (CR) being the boundaries of our U. Are they related in any way to these M field lines where Souls can travel?

K- Partially yes. It's like part of it, not all of it. There are certain limitations and in time mankind will learn.

Q: Is the point of connection of the M fields of the material state, and the M fields of the plasma, between the transmutation of Oxygen (O) to Deuterium through emotion? (Reference is the 165th KSW about the connection and conversion between CH<sub>3</sub> and CO<sub>2</sub>. And the question how does O change to H<sub>2</sub> (Deuterium) energy, is it through the lungs or through the emotion? Could you please expand on that knowledge?

K- We do it in a physical dimension in the lung, but the whole essence of it is to feed the Soul. As O moves through the breathing passage it "increases the order (of) deposit," (or increases the field strength to elevate the STM)).

(One of the most important things to understand about the body of the man and the D of the life on this planet is that Oxygen is the (main) gravitational (G) field force (of the elements). By holding the amino acid (AA or COHN) together it holds life together. This is due to its own M field strength. It's the heaviest element (in the AA), then there is a communicator, something to deliver energy, and a storage tank. This is the same system of AA used in any position in the U, therefore when you see a new life form you can look at the combination of the fields and find which element is sustaining that life, or is the holder of the others, the one that is most gravitational. When you see the O in combination and conversion to Deuterium or Hydrogen, then you understand it's the universal line of creation of M fields and its connection (to everything)).

We have this across all the elements. (But O on this planet (holds the plasma of the AA together) because of its gravitational field mass. If it is the lightest, then it cannot hold everything together. But when it's the heaviest, its G field pulls all the other together in common, and positions them in respect to it. Through this positioning life is created and sustained by that element holding the position. Then the other elements come in, the C communicates with everything, H provides the energy, and N the storage. They all give and take what they need and create a line of transfer of energy, and thus create life).

(The M field positioning of the Earth and O, and then adding H to it creates the water, which is a beautiful liquid gas (?? Gans). The combination of two gases, H & O gives a liquid. In this ?? combination there is a common denominator). The presence of the O creates a common denominator of "gravitational Mass energy" to create a protein, or the amino acid. That's why the AA stays liquid in this environment. And that's why 95% of our body, more or less, is water).

(Through the physiology of the "magnetic plasmatic fields" we can see how things are connected to each other and how life is created. In our case, it's the holding power of the G fields of O that allows the life to be created at this given time, position and place. Oxygen is one of the key players in life, because it is the common denominator between the liquid part of this planet, which is the water, and the structure of the body, which is AA. This is why when it combines together with another element it gives flexibility to its tissues, like a plant, and everything else).

(When you have spare Hydrogen's and a connection to the AA, (which is the O), then you get an active life. Because for example, if you have 3 Hydrogen's then they are continuously interacting and juggling for field forces. And the Carbon plays that game in the presence of Nitrogen. This is how life is created on this planet. This is also why our protein (AA) ?? is liquid and dynamic, and always ?? gets attracted to the water. We have seen this in our Gans Boxes when the AA forms on top. We should have understood this by now. The COHN has an O which is the heaviest element and it connects to another O in the water).

Q: What is the role of the sacral bone in the structure of the human physicality?

Rick looks up and reads about the sacral bone in Wikipedia. Essentially it is the base of the spine and the vertebrae's of the spine go down to the sacrum.

K- (It's what we call the tail bone, and it goes back to the time when as creatures we had a tail. Then when we became upright and started sitting more, gradually we lost the tail and the bone bent inward. It's still there, but it is part of the support for the skeleton to sit upright, and to keep you from falling backwards. Otherwise, it doesn't have much use. It's part of man's history from the time he was a mammal with a tail. Now we use it for balancing.

(It ?? plays an interesting role in field transmutation, in that it has a lot of connection to reproduction through the STM. We'll teach this sometime in the future. Especially the bottom end of the tailbone, is the deliverer of the fields through containment of the Soul. It's a bit too early to teach this).

Q: When you want to help an animal where to put the second set of headphones on the animal during the flight session?

K- We'll go through that in the session. We'll allow a few minutes at the beginning for people to ask questions.

Q: (Can I bring more Souls into the flight session?)

K- (No, it's only for one Soul).  
There will be translators for different languages in the sessions.

Q: Can persons with implants attend the July flight sessions?

K- We advise you not to.

(What Mr. Keshe mentioned in a previous workshop about allowing people with implants to attend, and that the fields would not effect the implant zones, is for something different).

K- That was for special cases. We don't allow for collective sessions like this.

Q: Do you have the backing of the Universal Community (for what is happening on Earth)? Because I am relating it to the treachery of the Belgian King and Gates, and others who will do anything to stop this science from coming out, like these "Black Op" people assassinating scientists and so forth.

K- (They are already doing these things and they are very busy with it. They are still doing it. This is a touchy point. Actually, we are not touchy about it, but it's a fact, that it's part of the KF work. (We got involved and trapped with a lot of things, and even today we are still trapped with them. We battle with the Belgium structure. It was all set up and then was used by the people close to us who were inside the KF. Even though we got rid of them, they are still causing problems. But, in general, when there is no more kingship, then that country will dissolve back into what it was before it was formed into what it is today). (I think Belgium was carved out of two neighboring countries some hundreds of years ago).

This country is not our problem and headache anymore. (We have moved on, and in time (their situation) will be processed by themselves. The abuse, misuse, and the killings of different people for the benefit of the rulers, is not the exclusivity of this one nation).

Q: Can one connect and maintain the knowledge and understanding of plasma technology (that they gained during) the July sessions?

K- I don't know, it's a question I can't answer. It depends the KS present, (what they have) understood, and what they want to share through their Soul).

R: It depends on one's intention and so on, as well.

K-Yeah. Unless you want to tap into my brain, which I don't think I'm ??. Even though we are in the session, (we are also outside the session. That's the way we set it up. We keep 3 to 4 people from the KF in that level (?? working in the background during the session). The people who operate outside during the session are usually not part of the session, so they cannot tap into (what is going on inside the session). They don't get involved into the process. Unless they choose to do so).

Q: You always say that the Soul is conscious, like when we create a dome (of peace) with our intention to help other Souls to begin communication (to resolve conflicts). Is this communication conscious, even for those who don't have the knowledge, or is it just that we are aware of it?

K- It's combination of both. (It's not the exclusivity of KS or of man. It's a combination of everything put together. Inherently, we carry part of our ?? genetic codes).

In all processes of creation ?? Our brain has a section responsible for the interface between the STM and the STP. When you look and find the position of the Soul, you always see that interface line (between the two). I spoke about this earlier when I said we

draw a line between the P and the plasma, in the emotion. All creatures that have a brain and Soul have this capability built into their structure. Even animals have this ability to translate, transfer, or synchronize, between the two emotions and two dimensions of the Souls. Gradually, we can become a master of it and we'll have a beautiful time doing it).

Q: (I couldn't understand the question so clearly. But something about the Soul being in the third ventricle, which Rick thought was the heart, and like the rays of the sun, it shines out and charges the spinal fluid with energy).

K- I don't understand this. (How is it that the Soul got into the heart?)

R: I guess he's saying that, if the Soul sits in the heart, it's like the Sun's rays giving out to the spinal fluid, which then travels to the organs to provide them energies. Is that the way it works?

K- Not really.

If you have a heart of a man you cannot make a man. If you have a brain of the man you can make a man. So, I think you got your answer.

K- (Please, if you're joining us for the three sessions in July try to complete and conclude the registration as fast as possible. We will explain to you how to use the system, but make sure you have at least two headphones. Some of you might need 3 if you want to do different things with it. If you want to examine and develop things for yourself).

We are closing operations in Austria. The exhibition will move to one of the wonderful world capitals in the coming weeks and then we'll move on to other works of the Keshe Foundation.

**End of Quick Index - 493 KSW July 6 2023**

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:16).

K- Yes, good morning, good day to you. As usual, wherever and whenever you listen these series of Knowledge Seekers teachings from the Keshe Foundation Spaceship Institute, we welcome you back and, as usual we try to share more knowledge, and to see where we go and how. We organize things according to the level of understanding.

In the past two or three weeks we have opened a new insight or new ways or trying to find out, now that we have become the "man of space," where are we going to land? What will be our future in space? And what are the possibilities? For sure, in a very, very short time, we will colonize this solar system. The key is not the moon anymore. Moon is part of us. The key is Mars, landing on Saturn, being able to swim in the oceans of the deepest, what we call, (:18). liquid part of the solar system and beyond.

We'll find out. And as we have seen, sometimes ago, many, many, many years ago, sent a little thing going out with a disk on it, saying, we are humans and the rest. And after over decades, we are not even sure if the thing has passed the border of this solar system. And for us to travel in the dimension of the physical condition, understanding of the physical transportation of today is beyond imagination. We can never even get to the end of the solar system, let alone entering the galaxy.

So mankind has to look into and understand the work of the universe (U). Understand the two separate .. ?? work, transportation, transmutations, energy, which we define in Keshe Foundation energy as magnetic fields in motion. Because for a field to move, it has to have an energy. In the coming time, man will learn to teach both states of conditions of the creation to his children, matter state and energy state as a plasma. Sooner or later, we have to resolve this matter. In the matter state, we have limitation of the friction. We have the limitation of the fuel. We have limitation of everything else.

When we go to the energy, what we call, dimension of the work of the plasma, (:20). then the limitation changes. There are no limitations, as long as we understand the totality of the knowledge. We cannot, in most of cases, transfer the working and the functionality of the parameters of the matter state into energy systems. In a way, we cannot work with matter state. But we can live within matter state and transmute in the dimension of the fields of the universe. Transportation is a matter of the matter state. Transmutation is using the fields of the universe to travel through. You cannot fly with a donkey. So we have to understand what we use for what purpose and what we fly in, in the matter state, or we fly in what we call, energy state, and then transmute ourselves to a position and transfer ourselves back into matter state, if we need and we have to.

This opens new avenues of knowledge. This opens new opportunities for man to get involved in understanding both. And maybe, maybe in some cases, some knowledge of one can be used in the other. The limitation of the science of universe, as I've said many times, is the limitation of man his own understanding of the work of the universe. It's us who puts a limitation on what can be done and what is achievable. In a way, everything is possible and achievable in the space. How we do it, how we mix it, how we manifest it, (:22). how it .. disappearing, how it depends on how much we have understood the process of creation. What we understood become our limitation. And what we strive to understand becomes what we call, the target. (audio breaks ) (trying to find the tools ..)

R: Sorry, Mr. Keshe, you've... You broke up there and ... you said something like ... is to become the target, I believe it was, and we lost that last part of your sentence there, just now.

K- We have a bandwidth problem. Yeah, I think we have a bandwidth problem. So we have to resolve it in another way. Let me see what we can do. Give me a minute. I have to switch over and see how we can do it. Just one second, please.

R: Okay, thank you Mr. Keshe. Okay, I'll bear with us for a minute or so, while Mr. Keshe switches some gear on his end and gets a better connection. We have a couple of questions already in the Q&A. (:24). And people that are attendees here are welcome to place questions in the Q&A for the second part of our show where Mr. Keshe will be answering questions. And also our YouTube and Livestream audience, Folks there are welcome also to put a question into the chat. Hello Mr. Keshe, are you back?

K- Yes, we'll try and fix ?? a couple of minutes to bring in new servers into operation. Just give me, if there is a cut or what we call it, short of bandwidth, we try to resolve it.

As I said, it's for us to understand the limitations. It's for us to be able to somehow interface the matter state into the plasma state, into the dimension (D) of energy. In one level, in one way, we started a new chapter in teachings in past couple of weeks in how man will achieve this. How man has to start changing a lot of calculations which become the cornerstone of his work, to totality of reality and the data, which is available to us in real time conditions. We have come to explain that what we call the speed of light limitation does not exist in transmutation. What the limitations has been put and the numbers and figures, and some unreal conditions we have accepted, is not workable in the dimension of what we call, present science of space technology. (:26). How would we in the future, in the coming time, will change. And how we will, in some ways, become able, have the possibility to understand and facilitate the both side of manifestation, matter state and transmutation, and what we call, the transmutation together.

In so many ways, if we apply the matter state into the plasma state, or energy fields in motion, in the dimension of magnetic (M) fields, in most of cases they don't fit. Do we have to send our children back to school, and many of us educated a long time ago, back to understand new things? Or are we going to fight it, because it didn't happen during our time? In where we sit, and in talks and conversations, in negotiations, and all sorts of cases over past decade. We have found out the biggest challenge for the new understanding, the separate understanding of transmutation and energy, will be the biggest hurdle for next generation to overcome. And opposition will come from the leaders of the science, those who we accepted to lead us.

To break this level, it becomes the responsibility of us and the world leaders to bring, education leaders, (:28). to bring about the new parallel teaching. One of the points which will be raised in London conference will be this, separation or amalgamation of the science of the matter state and energy in real term conditions across this planet. We need to understand, we have to understand, we have two tools. And then we understand, researches like what goes in CERN, researches like plasma technology, researches like what we call, "Jet Projects," all will be revised. Because we need to understand the

separation of between two, and teach our future generation from now, that they understand both together.

Our children go to school today and learn (mathematics), physics, chemistry, biology, all in matter state. In the condition of the new technology, understanding and emergence of technology, our children have to learn (mathematics) in matter states calculation, (mathematics) in plasma calculation, biology in the plasma condition, like we call, Gans, and in matter state we call, stones or weight, or what we call, "objects." To understand the physics of the plasma and matter state. Understand the chemistry interaction in plasma and in physics matter state, in chemistry matter state. We find out that, in the future our own children will have a lot of confusion about the emergence of the new science, because they don't fit, (:30). or one has to be clear about what is this and what is that, and where it needs to be done. Because they'll be transmuting through the Soul, they'll be transmuting the energy of their body, and then physically manifesting and hitting a car. In the plasma condition, there was no car, because I could go through it. Now I converted to matter state, I have to stand the problem of physicality. Oops, by accident I manifested in the highway with hundreds of cars going up, where I wanted to be as energy and manifest on the other side of the road and enjoy the park.

Now we understand what it sits. And it's not just teaching the plasma technology, traveling with the speed of light and beyond with the speed of magnetic fields, and then trying to exist in the matter state too. The education of the future, which sits with our leaders, will come in the ?? shape of teaching the two technologies together. It has to be done that way, that in the future, all generations of human race will understand the Totality.

And not for those who understood the two become to abuse the one who did not understand the plasma, and abuse and through dimension of physics, of matter state. Then, they become like prophets and magicians. The ignorance and illiteracy in the dimension of plasma technology (T), energy field motion, will cost nations beyond the slavery of today. If it's not understood fully. (:32). The slavery will be carried on by those who think they understood part of it, or some of it, or a bit of it, and then they take the rest, ransom. Or they become prophets and magicians of the future.

So it's important for us to set out to understand, to be able to comprehend the totality of the knowledge on both parallel line. This is important as you learn how your Soul works in the dimension of energy and embrace the physicality to transmute it to another position. You don't have a computer. Do you dream and match, and set a system for you to go and see the grandfather who died 200 years ago, or 100 years ago, or 500 years ago in the future, where the man lives a ?? speck of 1,000 years? Or do we do what our brain does, systematically finds a condition? System control position will not come to us. They're not going to fit our brain with a chip and a microchip here and there, that they can, .. we can control it. I set it at this. I'm going to see grandma. I set it at this. I'm going to see the grandpa. Our body, when it dreams at night, there is no control system in it when it goes and sees the grandpa.

Mankind has to unravel this knowledge. Mankind has to unravel the way through the Soul as a dimension of energy we travel the span of universe to see the grandfather, who we saw when we were young children, or young boy, or a girl. And now we are 70, 80, and that was 70 years ago. (:34). Where did he go? How come we can dream about him, but we cannot see him or know where he is? Now that we know the body of the man is creation to feed that Soul, that nursery of the Soul for the universe, now we understand the totality of the collection. We have to understand the totality of the connection, not only for this planet, but beyond. It's not just having an address on the 5th Avenue, block so and so, floor so and so, apartment so and so, blah, blah. Universe has no addresses and there is no zip code.

Our dream of the grandpa last night had no letter and no zip code to go to. It used the connection of the fields, it used the strength of the field. It used the strength of the emotion of us, for the grandpa which took us to the address. And strange enough, he still looks the way he was 50 years ago, he has not aged. Or, have we given him a picture frame, according to the memory of the time and place?

When we think or we go back 200 years, 5 centuries, 10 centuries, and we see we got in touch with the Soul of someone in that time, how do we do this? How is it done? There is no control system, no gadgets, no microchips in our brain. It's connection through the Soul of our ancestors. The way they pass through the DNA or RNA, the information to us. (:36). And how they were connected in my time and space and place to the others that we see that image control of the dimension of physicality.

Still a lot to learn. There is still a lot for us to understand. And in so many ways the education of the Keshe Foundation (KF) it actually starts in reality from now on. It's the responsibility of you Knowledge Seekers (KS) to understand and become the teachers of the future, but not to become the prophets of the future. Try to understand, to explain the upcoming time, the possibilities and the future, which is there in the dimension of plasma, in the dimension of field interaction. And then try to explain the two together. We cannot dismiss whatever man has achieved in the matter state. But we always add that it's additional knowledge that we need to learn. Dismissing most of the gained knowledge in the matter state, dismissing one's own creation in the dimension of matter state. But, does not mean whatever has been done is correct. But, in Totality we are in this position as a race, due to accumulation of the knowledge from the past and added on today. It'll be what it'll be for our future race.

The whole understanding of the world of Creation comes in the dimension of understanding the work of the plasma, energy fields, connection of the fields. In fact, mankind has not made much strive to understand this, even though we played with them for centuries. (:38). We get the magnet and we play with it with another magnet, but we never understood the work of the fields, the sharing of the fields of the two magnets, the interaction of the fields of the magnets with their environment that allows such a position, what we call, between the two, attraction, repulsion, what we call, MaGrav positioning.

If you really go back into the depth of it, we have not completed to understand the process of the matter state magnetic fields. And that is why we have a problem understanding the interaction of the fields of the plasma. And the biggest problem will be in the future, to be alert at any moment in respecting to which one you are in, and which one you want to go to, and which one you want to return back to. Does not mean that you always want to be in a matter state to ?? interact. You might find more pleasure in the plasma state. And sometime come to the matter state, for whatever reason, and go back to the plasma state, where there is no age time. When there is no time, you cannot age.

When you put a magnet on the table, does its energy change today? Does its energy and the position changes in 10 years time? Does the energy of the magnet varies in 100 years time? Would its effect on its surrounding will change? Then we understand we have not even managed to measure that. (:40). Let alone going to the next stage of the plasma, understanding the field interaction. Is the field interaction of a solid magnet the same as a plasma magnet? A plasmatic magnetic field is Earth. A solid state matter is a magnet in your hand. Is there any difference? And would they lose their energy at any time? Can you interact with it? Can you ?? lose it? Can you manipulate it, to move it? How do we connect the magnetic field of the matter state to magnetic field of the plasma state?

Many of you, you should have gathered that long time ago. How to connect the magnetic field of the plasma to magnetic field of matter state? If you don't understand, how do you want to transmute it? How do you want to transport yourself? Now we look at the Japanese magnetic tracking of the railways, we are wonder they do this. How do we get our Souls, our fields of energy of our life, on that track, but in the magnetic field of the universe? Is there any difference? (:42). Or because we haven't understood, one is a wonder and advancement in technology, and the other one we just ignore because at the moment we cannot even comprehend it.

The whole structure of the teaching, the whole understanding of the process of the teaching, it comes by understanding, discussing, and bringing up the points that you understand. This comes on the back of one of the questions of the last week. As I said, we have just started. And step by step, step by step, we'll bring in the whole understanding of the Totality. That you understand, the Knowledge Seekers of the future understand the separation, the interaction, and transmutation and transportation from one to the other. You don't get on a jet plane and you go to see the grandpa who died 200 years ago. Sorry, no plane has been built for the "dream line." You transfer energy of the emotion of the love, feeling, and connection, that connects you to the grandfather at that point in time. There are no donkeys between the body of the man and the Soul of the Man (STM). To take the body of the physicality (P) across to another part of the universe where the Soul of the grandfather is. (:44). Even the Creator haven't created such a donkey, let alone for man.

We have to understand the separation and clarity between each state of the, what we call, existence. There are other states of existence, which at the moment is blind to man. Once man matures and understands the process of energy, plasma, transmutation, magnetic field motion, another science of Creation will emerge. That science will give man the

dimension of knowledge to be able to transmute across universes. That knowledge at this moment of time, will not be comprehended by man. You have to understand the knowledge of the Creation from matter state to plasma, and then the fields of the Creation, which leads to creation of plasma.

This goes back to the question, that how and where and the way our Creator, we call it, was created, if there was nothing. That knowledge is, knowledge is hidden because man cannot understand it. That knowledge is within the man today, but he has not understood the transmutation, he has not understood dimension of existence without tangibility, (:46). he cannot even imagine the next step. Where (?? he was) actually was created from the interaction of the fields of the plasma, for creation of his own physical body.

In a coming time, we shall teach about that state of interaction. That level of Creation, where the fields came from. This is the title of the Book number 8, "The Origin of Magnetic Fields". The essence of the creation of the Creator, and the environment, the way He was created. If you go back into my teachings, we always said, Book number 8 will be about the origin of magnetic field. The origin, the essence, our Creator was created. Out of his creation, we are created, and we call it the universe and Unicose.

That knowledge is not open to man, even though I can teach it today. The knowledge of the creation of the Creator, is the knowledge when the man masters the Totality of the knowledge of the Creation in the plasma and the motion of the magnetic fields. Now it is important for us to gradually to understand, not by formula, because unfortunately there was no formulas when you dreamt the grandfather last night to get you to him, but you went there, you saw him, you got the kiss and the cuddle, you got the smell, you got the emotion of the presence, maybe you had a dinner with him, and you came back and you say, (:48). "mom, last night I dreamt about the grandfather." Where in fact you say, "last night I was with grandfather." He was okay, he's busy, he's still trying to make a seed of the planet, but, in the dimension of energy, but he's very happy where he was, or where he is. And mom says, "you should have said hello to him, I miss him." Because, the mother would have been educated to the level, to understand the work of the plasma. Even though she has the ability to do the same herself.

One of the biggest challenge for the Knowledge Seekers will be the Totality, understanding of the Totality, whereas he is partially understanding the process of the Creation, life and existence in the dimension of plasma. To what extent our Knowledge Seekers will strive, to what extent our Knowledge Seekers will try to understand and practice the knowledge of the transportation and transmutation, depends on the fear of their own existence in both dimensions. Many of you will not go through the transportation to transmutation out of the fear of, would I come back? Would I be able to manifest or do I become a nomad in the space?

There are methods, there are ways that you can never get lost in the space ?? of the plasma. And the question you ask, would I carry my physicality with me? (:50). Would my physicality be there, if I get lost I can suddenly manifest myself, gain confidence and then if I feel good I go back to the transmutation? But there is primarily one big question.

If you get scared and manifest yourself, where would you manifest yourself? On Earth? In the space? On another planet, in another galaxy? And if you had that fear and you've forgotten what to do in the matter state, to convert, to interact, to connect to the plasma state, would you become the man in the desert of the universe, lost and not know where to go?

The other position of the understanding of the teaching will come when we travel with the dimension of the plasma. We'll have a zero time transportation, as it is connected to the world of the magnetic fields. Then it becomes, can we or should we allow ourselves, our physicality, to transport itself in a matter dimension. Or would we be converting ourselves to the energy, transmutes, and then converts back into matter state? It'll be interesting time, when your child knows to do this, and she decides to go and see the uncle in New York, and you're sitting in London, and you have to get a plane 18 hours on the way, you go to the airport to get the ticket, to get on the plane, to get there, (:52). to get home to your brother, where he's actually been there, 10 seconds since he left you.

The biggest problem for human race in the coming time, will be the separation between the knowledge gained by youngsters, new generation and the old ones. It's very much like the computer games of today. We see our grandparents and our parents watching us with a wonder how we play on the computer game, where they have no clue. It's just a screen and you play the game. You have the knowledge and they have to watch as they have not practiced the amount of time, from age of 2, or 3 or 4 you played with that keyboard with everything else and you mastered it. Very soon you'll get to that position that your children will master transmutation and become what I call, a witness like your grandparents watching you (with) the computer game.

We need to bring the education of the public education to all dimensions, to all citizens of this planet on an equal basis, in a way that just because the Americans know how to transmute and transport some of them does, not become disadvantaged to the boys in South Africa, or in the jungles of Amazon. It is the responsibility of the Keshe Foundation, who has brought this knowledge, to share this knowledge, (:54). irrespective of border, color, race and religion, nationality, and which place in the universe you are, you come from, and you'll be in.

The teaching of transmutation and transportation, will not be only for man, but man will teach the others in space, that they have the same ability to do, even though they are in the most advanced UFO's that man could not imagine 20 years ago, he would be ahead of them. They have mastered transportation, but the human race through the teaching, will master transmutation. And that is a gift from Mitra to Mankind.

If you understand this, you open the horizon of the universe. And it's your responsibility at any age, today, tomorrow, in a hundred years time, to teach it freely, unconditionally to another being. Irrespective respect, totally irrespective of his race, color, religion, creed, and which part of universe he comes from.

In so many ways, we had to clear this, that in the coming time, now that you work with the Gans's, you understood the field of the Gans's, you felt them, you went through the systems of the Linz Center and you did everything else. Now this has to become a mainstream understanding and education for all of us, in all schools across this planet, that no race in the future will be behind and ?? . (:56).

Advancement in science allows us to teach the Soul instantaneously, does not matter where in the universe it'll be. It's just to find out, to understand how, the way it has been done, and for us to understand it first, that we don't teach the wrong thing, the wrong way.

Operation and existence of life across this universe, is the same irrespective of where you could be. Irrespective of what knowledge you carry and what shape you might have. You might be happy with the features of two arms and two legs, and in another dimension you'll be just a box. But it's still the same emotion as you had when you were a human.

It'll be interesting in once the mankind understand this, how he will see the other creatures and creations of the Creator. We live in one dimension, as man with a Soul and mobility. And we carry the same Soul, and in dimension of physicality, you might be like a stone on that planet. Where it's advantageous for us to exist in that position, time and place in that manner.

As I said, as we enter the new educational part, (:58). in respect to the energy field transportation and transmutation, we have to continuously remind you, as Knowledge Seekers, in which dimension we are talking about. And from now on, most of the teachings is on the dimension of transmutation, interaction of the fields, and not physical interaction of the man. How you will react, how you embrace the knowledge, will give you the advantage in how far you can experience better or more ?? adventurous part of the life in the dimension of the plasma, or we call, the STM.

To what extent we'll share this knowledge, will not be on how much of it you understood as Knowledge Seekers. We teach it on the record (recording) that someone in the future might listen to it and grasp it the first time. And does not need someone to teach and change that it suits him or her for the system to be applicable to them, or to the people around. Understanding the life in the dimension of matter state, understanding the life in the energy state, or plasma state, and understanding of the manifestation of the one within the other, is as normal as ABC today for man, but man has not seen it. Has not, and does not want to distinguish between the two, as he's happy with the status quo of today. (1:00).

One of the most important part of teaching comes in understanding dimension of the plasma, the strength of a plasma, and how each individual will enjoy to be part of the work of his plasma. Does not matter where, when and how.

In the coming time, we'll teach you how to connect through Soul to the matter state, through the Soul of the matter. Not in the dimension of physicality of the matter. How to

separate the two, and how to live with both in the same position and dimension. Education of the new plasma technology in physical dimension is much harder than the first part of the teaching of this technology. There are many reasons for this. And in the coming time, we shall explain, step by step, how each one needs to be done. But initially we leave it to you as Knowledge Seekers, to come out with the questions, to come out to, in a way, strength of your understanding and what you're looking for in the future for.

In the coming time, (1:02). measurements of the plasmatic magnetic field strength will become the cornerstones of your transportation. Today we have problem even to choose the fuel. That's why we have different types and different ways of using fuel. In the future, mankind should understand how to use the resources, but do not abuse the resources. And this will be a big change for mankind.

In a way, if you are a baby today and you go to sleep at night, your energy, your level of understanding is set according to that time and place. Not for higher or more. This teaching of today had to be done, needs to be done, that Knowledge Seekers have a direct clarity and understand where we are going, and how we are going, and the way we are going.

A couple of weeks ago, I asked you, with what you know, what you have, tried to come up with estimation of the life on this planet, or the life of what we call, Universal Time Zone. How do we go from one to the other? What happens if one goes in another dimension and you're left behind in the other? Would the father will call you blind? Or have you become blinded by knowledge? (1:04).

The technology of plasma, motion of magnetic fields, and how they're connected is important for the future space technology. How do we get a matter state, the energy to somewhere else and convert it? Can we take the table and chair which are our favorite, to another dimension? As we travel this part of universe, that where we get there, we still would like to have that comfortable chair. Would our chair exist in the new dimension and field strength? Would our Soul lose part of his, what we call, memory bank, part of his energy, in interacting with the new plasmas or dimensions of plasmas in the universe? How do we protect it? How do we keep the way we do on the physical side, everything to keep the integrity of our body, the fingers, the hand, the toes, the nose and everything else together that it identifies us, as us in the dimension of the plasma?

And how do we teach our youngsters? How do we teach the coming up generation about the new plasma technology, changing the world of physics? A couple of nations who are planning to implement this, have a problem with this, and they don't know how to overcome it. And how to use it for the future generation.

Coming to the teaching, (1:06). it becomes important for us to understand, how do we change the strength of magnetic fields, that we can move up and down in different magnetic field strength into higher order, or to the order that manifests us as a matter existing condition, as who we are? To what extent, how do we calculate through

emotions and not by calculators, that we can tell the grandpa we missed, even though he died for a hundred years back?

How do we transmute between two positions, when one of the positions is already taken, even though you cannot see it? You have to go to the emotion of the STM. You have to go into understanding the totality of the existence of the man. You have to realize when you go in the dimension of the plasma, even though you are aware of the existence in the physical dimension, you trust the strength of the plasma to protect the integrity of life which it carries, plus existing to confirm his own existence. How do we calculate going from one place to another, and we actually land there? Need to be understood, (1:08). that magnetic fields will have a dimension and direction. And how to calculate both? Are there vectors? And are they, or do they have limitation in transporting one to the other?

In the coming week teachings, I'll teach you in detail, but not with numbers, because numbers game is over. Now we need to understand the combination of the work in plasma state. And the speed that we travel in conversion and time is zero.

Let me explain to you something, you understand very, very easy, and it's happened to all of you. You have traveled in the dimension of transmutation, magnetic field energy, and you're sitting with the grandpa who died years ago. He's giving you tea, coffee, cake on the table, a toy for your child who's with you to play, while you're enjoying his presence. And then suddenly somebody says, "John wake up, it's time to go to school." And then you have to bring everything back to the dimension of existence and become in the matter state getting up to go to school.

How do you calculate this transition if you want to do it? (1:10). I was standing in a mirror ?? field and watching a lot of people, waiting for harvest machine to harvest the seed. And in that process, no one knew what they will get. No one knew what the next process will be to get something. But they are physically present. They make a decision to be there to see what they get.

But does this apply in the dimension of transmutation? Do we queue up in the world of the transmutation? Or we rely on what we set as a mobile system and a bike that it can take us to a position, that we can take off and catch up with what we took? Ask yourself a question. What happened in that instant, when you have to come out of what you call a dream, to waking up to go to school? To waking up because someone says, "John, it's time to go." Did you switch off everything? How fast did you manage to come back? Grandpa was in another position across the universe, becoming a planet. And, how did you get there? You have no rockets, and you have none of these new technologies of mobile phones to transmit you, because you don't have the knowledge. How would you do it, in the dimension of physicality? (1:12). How do you nourish this and teach this to your body in the coming time?

Then, if you can understand how you came so rapidly from the other corner of the universe to be present, because mom called you with her voice and you are there solid, not moving, because you're still dreaming about going through the process. To get up, to

teach and to feed, ?? and you can carry on. What would be and how you decide that, "okay, you woke me up. But today is a Sunday, I don't have to go anywhere, I'm going back to bed." And you decide, can you decide, and go back to the journey and see the grandpa again? Because, you didn't finish enjoying his existence.

What mechanism was used, in our brain, to bring us billions of kilometers, according to the man or light years, according to the science of today, across the universe, instantaneously to manifest yourself, to answer in a physical dimension, "mom, I'm awake." What happened to the grandpa? And how did you manage to do this? High speed travel instantaneously. Does it mean what I talked you learned to do? Try for next week or by next week, to create a condition or find a system that you can fit into it. (1:14). And see if you can fit into dimension of the reality and physicality.

We have to discuss and bring these on the table, that you start distinguishing between the matter and the plasma state. You start distinguishing in what can be made, I want a wall here, but in the transmutation dimension of the transportation, and not in the solid state of "wall." I lose a little bit as a child. But I gain a lot in understanding the Totality.

We go for a small break, we come back and we answer some of your questions. (1:15). But please understand the work of the matter state and understand the work of plasma state. And then, in the coming time, we try to go through the process together, that we don't miss much, in the ?? creation. Rick, if you like, take us for a break, and we come back, and we see what we can answer.

<< **BREAK** >>> 493 KSW July 76 2023 (1:22).

K- Yes, yes, with great pleasure. A couple of things to announce, or to remind, is that the session of 7, 14, 21st, sorry 14, 21st, 28th, and 30th of the July, with the 3 hour sessions, will not close at the given time. It's open till, literally, 29th, is the session you join, or you can join the session of that week, or you can join from the beginning for all the sessions. We expect a lot of things in this process. First of all, it's not that you are joining for whatever purpose you are. We are testing strong developed technologies in the background, for our purpose, for development of technology. Keshe Foundation is a

research structure. And whatever we do, (1:24). is for us to learn something and develop something, that benefits us and our future generation, in our future time.

In the last week, Friday, elevation of the Soul of the, what we call, abusers of the children, we usually have a survey. We do a survey to understand how you feel. But, we have developed the technologies in the background and we feed you in the process of the system, or we bring matters, structures, in the background into play, very simple ones, which allows us to see the effect of your Soul, collective Soul of the people participated, their emotion and their physicality and everything else, and we didn't need to do a survey anymore. Because, our systems in the background, gave us all the data we wanted. If I would have taken the data from the screen and put questions to the people, 90% would have been exactly what we got from our systems.

In a way, now we don't need to ask you, we didn't need to ask. We relied on the data we collected in the background from the feed, the energy of your Soul, which means it cannot lie. We see it directly, we see when the Soul takes to elevate the physicality and the Soul of the Physicality (STP), we see the challenges of the STP, we see how the physicality respond to the situation. And we understand this fully, and we monitor this in the background fully. We can add to it, we change parameters. (1:26). And in most of the cases, you see our, what we call, service line on, but all of your lines are off. Which means we are acting, we are testing, we are delivering new technologies. And then we understand how the next step shall be, how will be.

So, for the next, from the 14th on, the sessions will be 2 or 3 hours. Many of you asked us, "which session can I join? Can I come in this session? Can I come?" You can come in any session. We'll befit you for that session. There are so many different people with different needs or different, what I call, wishes and different conditions, who come in. So, for us is not important if which one will fit. We don't announce this section today is for this, this, this, and next session is for that, that. We are testing.

Maybe you come in all the four sessions, and in the second session you receive what you're looking for. In the first session you may not feel anything. Maybe what you gain from the first and the second session, in the third session, will bring you to what you came or you wanted to. In the sessions of 24, sorry 14, 21st, 28th, you need 2 microphone heads (headphones) minimum. One, you put on your head as usual. And one, you connect as adapter to your, where you want the change in your body. So the session of this coming four sessions is for you. You want to elevate your Soul. (1:28). You want to get rid of a pain in the arm. You want to send a loved one an emotional change. You want to put their pictures. You want to change a sick dog, a fish in the tank. You have that facility this time. So you need to get hold of an adapter which can connect your mobile phone to two headphones at the same time, stereo, and join the session.

If you want to change a condition on the left side or the right side of the body, join one session just using the same ?? headphone on the right side or left side. It's all how you want to do it. We cover a full spectrum. And in some cases, we change things to fit our technology. Don't forget, you are joining for us to learn to help the next generation. On

top of it, you get the satisfaction of maybe what you want, why and how you entered this session. And it will be very extensive. And most probably, at the end of it, we'll have a session to comprehend, to understand, how it affected some of you.

The process of the, what we call, the developments of the technology comes and has come out of the Knowledge Seekers teaching and Knowledge Seekers understanding the processes. So if you are planning to join us, you can join. We're trying to put a limit on it, because we want to understand exactly how it will work. (1:30). We want to understand how much we have helped you, how much you have helped yourself, how much it has brought change to you. You're an addict, you're an abuser, you've been abused, you have cancer, you have depression, you have a tooth broken, you want to grow a tooth, you want to extend your leg, you need a hip replacement, you are emotionally in a stress, you want to see if your fish will change its characteristics. All depends on you in how you apply your emotion to the system. We are here to deliver not what we call, to do with the physicality. We are here to see how we can elevate the Soul that the Soul brings a change on the need of the STP and how it will transfer that to the physical condition of the man, or the ?? beast, or the animal.

So join us in these 4 sessions, what we call, group of sessions we put, for your sake and for the sake of gathering knowledge. And then we'll see how we build up to the August, what we call, sessions. August sessions will be very, very interesting. We'll try to bring in August the 25 Knowledge Seekers together. And sometime in August or early September, that will take shape. We'll announce or we send you the place to meet sometime in early August or sometime in August. (1:32). And we try to get consensus that you all can be in a place and time to be together. How you organize your ticket, how you organize your stay and the rest of it. Then we go for the 200 and then the 65 we put up.

The process of development of the technology has been amongst the Keshe Foundation Knowledge Seekers and has to stay free research base. Has to be no limitation and no control on it. And we control only to extend the knowledge and how we collectively we see it to go to the next step. We might have some news for you in coming weeks that will bring changes to the whole structure of the Keshe Foundation's operation internationally. We are still waiting ourselves for that. And once we are informed, when we are fully understand it, then we'll pass on to the Keshe Foundation family internationally. We hope that it'll be to the advantage of all of us, as "One Nation, One Planet, One Race."

The other point you have to, we have to remind you is that the Keshe Foundation Exhibition Center closes its door by end of next week or the week after. We are closing the Keshe Foundation exhibition altogether and it will be moved to one of the major cities in the world. Those of you who want to go to the exhibition maybe next week it will be the last week, or if we can extend it a week after that. But by second, third week of July, the exhibition center of the Keshe Foundation Linz will shut down for good. On the other hand, (1:34). the Keshe Foundation operation worldwide will expand in a different way that we'll inform you as we come to it in the coming months and weeks.

Are there any questions?

Q: .. Can you explain in more detail how the technique in the plasma session with units and headsets and the microphones work. Does the plasma fields or Souls follow the headphone line by way of the Internet? Thanks a lot.

K- This is a well practiced situation with the Keshe Foundation KS for past nearly 7, 8 months. We use the headphones in a way of GPS location of your Soul. And the transfer and the rest of it is done that way, till gradually .. you receive your, what we call, "combination sets," which are getting ready, I think a number of them will leave (the factory) within the next couple of weeks or so. Then you use those for interaction and interface.

The, what we call, the "Headset Units," are going through their completion phase in the next few weeks, and they'll be released to those of you who purchased it. And then, you will see the differences. It's like listening to mono and stereo system, and then you see, you feel the difference. This, you will feel the emotion, than actually listening to the word. (1:36). And then you gradually have to learn how to translate these emotions to the words, to your way of living. Gradually you build it up. We even advise you some points you still use two headphones on top of each other. If you use a small inner headphones with the new headphones on top, to gradually "home in" the physicality and the STM together. When we come to it, we will teach you slowly, slowly, as the systems are getting finished and set up by our team in the next few weeks. On the other hand, you just use, what I call, adapter, that allows two headphones to join your, what we call, handset. And then use one as usual for the head and another one for whatever use you join it for.

Any questions?

We will advise you during the closed session, in how to actually place things (Headsets) and put things in places. Don't worry about that part. As you've been in other sessions, you gradually will learn and we guide you how to switch your system on, how to switch your system off, and the where to go and what to do, because we control a lot of things in the background. It'll be more or less the same. In those private sessions, we explain to you the use of your headsets, for what purpose you are in and then, what you can do and you learn and as usual, there are translators who translates it to the languages of the people present. (1:38).

Any other question?

<< Connection of Mr. Keshe dropped >> ...

Q: .. How will the future of transportation be? Will large size group traveling be handled by big corporations and governments, like the plane traveling that we have today?

K- We got to realize, we, as I say, "we are running two horses in the same race," from the Keshe Foundation point of view. This is one of the discussions I had recently with some government officials and people who understand this. We are teaching about

transportation, new MaGrav system, MaGrav ?? system. (1:40). And then at the same time we are teaching, or we're developing the energy transportation system, what we call, transmutation. In either case, Keshe Foundation will be major share player in, at least at the beginning of it, maybe the first half a century. And then, we'll see the talents from the rest of humanity and other races of the, what we call, universe, will bring in and add to it. And then it collaborates in.

Once we open the doors in the Universal Community on a physical dimension, mankind will get flood of new technologies coming in. At the same time, we will flood the other races with the technologies which we have, they don't have. It won't be one way traffic. That point, that part, will be a massive change for the dimension of physicality. You like to go with the UFO. The other part which comes with the transmutation and motion or energy of the plasma transfer, that will come as the unique work of the human race. Even the other races have tried this, have not succeeded or have not developed fully into what it should be, and it'll come through the human race. That is where you, you become the teachers, you become what it'll be. And for a long time, human race will be heading in that direction, and will be heading in what we call, the knowledge in this. Because of the situation which is and the way it's been brought up. (1:42). And again for part of this initial stage, Keshe Foundation will be part of the major player on this. And then we'll see the initiative, integration of the other things, will bring new dimensions of transportation.

We see clearly, and maybe in the next few weeks we can put a more light on it. The colonization of the Moon and Mars by 2025 is inevitable, is on the card, depending how our nations and world leaders decide on it. If they push it further back by 2030, we should be able to colonize most of the planetary system on this, in the solar system. Because once we learn to walk, running and jumping from one to another become easy.

The stumbling block will come when we have to learn how to cross the bandwidth strength of this solar system. It's not easy, it's very similar to how we exit this planet or we have tried to exit this planet. But in a larger scale, but we jump in a deeper ocean of magnetic fields. In that part we need to, we have to learn how to transmute. Transportation and learning about it on this side of the inner solar system will be part of the work of the Keshe Foundation, and I'll head it for a time as long as I'm alive to teach you, to bring you to that point. Before I close my eyes the last time, we hope to be able to take man into the universe beyond galaxy.

Which means there's a lot of teachings, a lot of work, a lot of understanding. (1:44). We carry so much knowledge that it has to be shared. And in that process, maybe in next 50 years, man will be able to cross this galaxy. It's quite feasible, understanding the intuition and the ingenuity of man once he's given the chance to develop. Understanding it and the biggest problem for the human race will be the shortage of numbers. Colonization, re-habitation, curiosity of man to see the universe and the world of its creation. It will take a lot of men out of the work of this planet. Don't forget, we will, we have no more judges, we have no more hospitals, we have no more doctors, we have no more schools where we can teach through the Soul any language, any knowledge you need, then you see, there is a lot of what I call, "holiday makers." They don't need to be paid, because they can all

make the gold, as much as they like, in the back garden. But, all the facilities through feeding the Souls, feeding the ?? P, looking after them, become job of the rest, because they enjoy serving, and the others serve them in the same way.

These are not fairy tales, these are on the card, within next 40 to 50 years. Then it comes, maybe take mankind another 200 to 500 years to cross this universe to another universe. Again this needs a lot if ?? . And that will come through the Soul of the child of Mitra. That's her responsibility and not mine. And that's the path to the Creator and not mine. (1:46).

In that time then the knowledge what you read in the Book 1, 2 and 3 becomes your guideline, because it's the same as you are. Life in other universes still exists, but you have to understand, can you live today under the ocean without any clothing? Or can you travel outside the space of planet Earth without any monkey suit? You'll be in that kind of dilemma. You have to understand new technologies, mankind have to understand new sciences in how to survive in the space gap between the universes and then how to exist in the others.

Mankind will lose many men in this process. In a way as I said in one of my talks some time ago, it becomes like a Roman time. If you remember, read the history, Romans, the mothers gave birth to children for them to become the soldiers of Emperor. Many of us will create Soul of Man's life, to become the passengers of universe, to add to the knowledge of the man in the dimension of knowledge of the universe. Short term, next 5 or 10 years, for sure, we will colonize Moon and other planet, in a very mass numbers, not just one astronauts and one monkey suits, maybe you're flying out of Cape Canaveral or somewhere else.

This comes on the back of the teaching. Iran space technology will head with the Chinese space technology together to this point. (1:48). You will see close collaboration between the Iranian space nuclear industry and the Chinese in a very short time. And they will spearhead, through the ethos of their peace, to take us into the next level of the space travel. At least for a short time. And Keshe Foundation will be part of it. And we'll be heading the knowledge, and I'm sure the geniuses we have in university of Iran and China, and those in other nations of the peaceful level, would join us to take us to that level.

So we have to learn first physical, those of us which are still afraid, who do not want to touch the Soul. And then those of us who travel this space through the dimension of the Soul. If you travel dimension of the Soul, energy space, that will take not much long to travel the span of this universe. But the problem is you get lost in many places, I'm ?? going get you back. And then there is a lot of other bits which is needed. So, it's more or less what we said. Learning curve and understanding it will take about the same. So, we foresee these things to come up in a, what we call, alphabetic order in next 2 to 5 years. And as we have brought the technology, we look at the technology different than others, we go into the next step of colonization.

Possibly, possibly as what I call, as a human race, not as nation wise. And you hear things in the news which is the basis for that development in the coming ?? time. (1:50). So if you think what might happen, it's what is on the card. If you want to go with the donkey, you choose the airplane, because you like to wait in the airport, you choose the space time transportation, which takes you a few minute, or you would like to travel with the Soul. As we see there are still a lot of people who go around the world on the bicycle and we still see people on the back of donkeys going from A to Z, even there is a car passing them as fast as they could imagine. And while we are driving car we see a craft above us doing hundreds of kilometers covering the same distance as we are trying to do in the car. And then we see our Space Station guy going faster than even the planes on top of them, watching them, ??. And now we add another level above that the space thing, which is there, what we call plasma, MaGrav technology, and above that, with the transportation of the energy ?? packs, what we call, the STM. So it's a development, step by step, in the knowledge of the man.

In the next level, transportation through what I call, MaGrav positioning, will bring a new dimension of instantaneous, more or less, 10 - 15 minutes flight time. And then those of you who like to go a step higher for what we call, to transmute across this planet and this universe, you learn how to go through the energy packs ?? of the STM. So it's ... the future is bright. And we are working very hard to make it happen in a smoothest way as possible.

Any other question? (1:52).

Q: .. Aren't the Moon and Mars not already colonized?

K- By other races, yes, we're talking about the Man. Man has not... I mean, there is a lot of question marks. We are in the process, we said, for the first two people to go to the moon, with a new plasma technology. Then we have to work.

You got to understand, there is a lot of bureaucracy. We are facing it today. I mean, even today at lunch I was facing it. We are dealing with legislation. Doesn't matter the technology is here. Legislating it that everybody can use it are the stumbling blocks in the technology and in the upcoming science and technology. We can deliver the system that you can travel, we can expand your Soul and do whatever you like to do. But because now it's done by equipment and then ethical situation comes into it because now goes against everything. A religion somewhere has said something, it comes into legislation.

Then you have this to come. This will be one of the biggest stumbling block for the release of this technology internationally. Unless a nation opens up and it says, we are going, you've got to be ??. We have this problem in Iran. And I've mentioned it many times before. (1:54). Iran and the Islamic nation has a huge problem to go to the moon. Moon is holy to the Islamic world. Now you have 1 million Muslims, many of them fanatic. Now you're trying to convince them that man can go to the moon. You cannot imagine this is impossibility to their brain, even though their nations are trying to ?? it.

We have illiteracy in the knowledge of Creation and in knowledge of God and abuses of the man through what we call, religion. It's one of the things which will emerge very soon. Once we open these doors, these Mullahs, and the Ayatollahs, and Rabbis and Priests have to go to the same church and tell their people the truth about how you can go to the moon, how you can go to the mars. And it cannot be just... It's very much, I said to one of my family members some time ago. You can't eat meat if it's not kosher or it's not ?? halal. So you go to a supermarket, Muslims and Jews never buy meat because it's not a ?? halal shop to buy meat in. Moon become the same. Moon is not for Muslims to go to because it's holy and it's blah and the rest of it. So there are exclusivity to places. You don't want to be with Muslims. (1:56). You buy a house, you buy a property, you establish a residence on the moon. Now you understand the hypocrisy. And many Muslims come, it doesn't matter if there's something wrong with it, or we don't believe it or the rest of it.

So we have to overcome a lot of dogmas with the same, there are the same problems in Jewish and Christianity and the rest of it. And this needs legislation or opening of the time by religious leaders and lawmakers. And then we see, in the next maybe three years, five years, emergence of the "international law." What it means? Laws that applies to all of us as a human race. Once we open the space, once we travel in the time of a zero-time, a few minutes from one nation to another, new laws will become a structure set to rule the heads of the nations, not the United Nations. United Nations is a disqualified body of organization.

We see this, part of this, to fall on the back of the Universal Council and the Earth Council. So those has to be passed that is equal for all of us. Does not matter where we do wrong, on this planet, or as a part of the colony on the moon, on mars, and the rest of it. Then it comes equal teaching right across, and sharing of the knowledge and technology equal amongst all the human race. This is one of the discussions I recently had with one of the men of power in one of the most powerful nations. (1:58). That how we share the knowledge and technology, not exclusivity of one nation. And we need administration to see this through very rapidly. That we don't create a third world nation in the matter state. We create an equal nation in plasma state, as One Nation.

From the day we said, "One Nation, One Planet, One Race," was not in the matter state. Because now all of you can do everything to create energy, matter, whatever you need, if you put your head into it. Now it comes to the matter of the plasma technology, energy in motion. And this knowledge has to be on "One Nation, One Planet." And as all of us are ?? illiterate to it, once the teaching starts, we all go together, irrespective of time, place and space.

So this will bring us to that point. And then there's the maturity of what and how those who see the totality as members of Universal Council lead in the, what we call, legislation part of this organization. How they guide them through, irrespective of what language or race they come from. These are the few things which brings back or forces in the nations, the governments, for a rapid development and ??.

There is a massive change in the pharmaceutical and world of medicine. People like Bill Gates and the others who planned, we saw the clandestine activities in other fields of the past 3 - 4 years for becoming the richest man just to bypass or have the control over, (2:00). will become to non-existence. We see a massive change in pharmaceutical, where pharmaceutical will have no meaning. If we understand. We saw this in situation with a, what we call, Covid in Iran. We worked with Iran National Defense University as a report, you, all of you seen, and everything was done. But people inside the health authorities blocked it and stopped it, because they're profiting through pharmaceuticals. Now these structures will be dismantled.

You understand the things, you can buy, you can use, which does not need pharmaceutical system technologies, which can be centralized. From one country, you can have all access to it. All these is not on the card. It's already, process has started. The wellness centers of the Keshe Foundation are the beginning of this process. When you go through the process of the wellness, doesn't matter what condition you go to them, where you are in the world, you get the same time, the same services as the rest. We have already brought this into operation.

Then it comes the feeding structure that again has to be addressed internationally by the world leaders. One of the biggest problem we have is world leaders, how for them not to lose their position as a world leader, but still be leading the section of the part of the world which they want to lead. In a way, all becoming one member, one party in the "party of the human race" as I call it, and how we better serve.

The biggest problem we'll see in next 10 - 20 years is taxation. (2:02). How do you tax people to provide services where people have access to everything from outside the dimension of the country you live in, because you are not providing a service. Now you go to a supermarket down the road, you buy the fruit, or you buy the energy you want to use, whatever. Now you go on the line on the app, you buy your energy for living from somewhere, somewhere in Iceland or in the middle of China. You don't need the government, government doesn't earn money from importing food or whatever, and controlling through food. National food security will change drastically, and governments have to adjust to it. This is the part where governing parties of the world will run into problem, as they want to keep the leadership.

But in transition and time, with the rapid development of the space technology and opening of colonization, all these things will resolve itself in the next 20 - 30 years. There is a lot of changes. And even today, we are working on that way to achieve this in the coming time. It's inevitable, and the human race needs this shock, this change. And sooner or later, will come once the, what I call, runaway train, starts running. Everybody will fit into it, to be able to be somebody in that train. And we have already pushed the train on track, and it's rolling.

Any other question? (2:04).

Q: .. We know about NASA's behavior and performance. Recently they spoke about the shutdown of the Internet due to the plasma emanated by the sun. Does this check out or is it a fallacy? Thanks for the guidance.

K- I don't know, go and ask them. NASA now is not everything. NASA is a very, very small player in the space technology. So, they do what they do. There is a problem and we know Russians and Chinese are looking into it. Even I know Iranian governments are looking into it, to move away from centralization of computers in the hand of the Americans. Microsoft and the rest of it. There's a lot of work is getting done.

But you got to realize, again in this line, the bringing of the new plasma communication, will change a lot of things in the Internet operation. There's, there are changes. Once we start releasing these new technologies, once releasing, is getting released, new emergence of new ways of transferring technology, knowledge will come up. Superconductors at room temperature, superconductors will create us new chips, that all the knowledge you need will be on one memory stick. (2:06). Literally, you have the whole of whatever at your demand on your, in your hand. And then nobody can disconnect you. Nobody can, what they did with Huawei, will become impossibilities, if we go the new way.

In a very short time, Keshe Foundation will open channels with Huawei, as we've done before, in ?? trends, for Huawei to use the new plasma communication line, which allows them to bypass boycotts and sanctions of big companies, because they're advancing the technology.

We will work with American organizations the same, it's not just the Chinese, where the... We work with the Iranian nuclear centers to transfer the space technology into Iran. In conjunction with understanding, don't forget the first plasma nuclear reactor for flight was tested in Iran. About this time, July, August of 2008, if the Iranian government opens the advancement in plasma technology to Iran, then in conjunction with other powerful nations, will change a lot of things.

There's no restriction, there's no limitation. And we are in it, and we are doing what we can to bring that change. It's a cat which is been let out of the bag, (2:08). and somebody has got the tail of the cat in their hand, they think they can get the cat back in the bag, but it cannot be done. And the end which is out, is you Knowledge Seekers.

Any other question?

R: Mr. Keshe, I'm reminded there is a question that was asked in the last Knowledge Seekers Workshop, toward the end, that you wanted to open up at the beginning of this Workshop. So we kind of missed that, but here is the question.

Could you open up a little more about, for our understanding, about magnetic plasmatc packets for transmutation, and what the difference is between magnetic and gravitational fields that are for the matter state?

K- The plasmatic packaging is already been tested by Keshe Foundation. This is where, partially we use the, you traveling to Linz, for us to develop it further. And partially in us developing other technologies, which run in parallel. And many of you have participated in the Friday (monthly) sessions we run in past few months. In plasma packaging, the physicality doesn't come into line of operation. Plasma packaging in a way, you travel on the line of the fields of the universe. And is to do, it's to the new space development technology.

The MaGrav, magnetic field and gravitational field, is very much on the line of the matter state transportation. (2:10). Which means, you get attracted, you create a fields to get attracted, or you create fields to be rejected from a position. The packaging is to do with the transmutation. The MaGrav positioning, gravitational and magnetic field, is to do with the matter state transportation. And, even though you do the same thing, what is done in a way with the donkey, and what is done with the jumbo jet. And, the difference in understanding it, is according to, what I said in the teaching of today, in how much you understand about technology, and what you want to apply.

There is for sure, there can be no control on transmutation. If the Knowledge Seekers learn how to transmute, no government can control it. No race in the Universe can control it. The way nobody can decide what you dream tonight. Because it's not a dream, it's actually your Soul, who traveled the span of this universe. You had no passports, no taxation, no permission, you had needed no visa to go. Where, in the dimension of MaGrav technology, in the dimension of gravitational magnetic field technology, we will find governments, because it's physical, or people who think they are governing, will bring limitations on what, who can come, who can go, and the rest of it.

The beauty with this technology is, the balance of the wealth across the human race. We will not see the extremes of poverty, and we will not see the extremes of wealth. (2:12). Even though there will be a difference balance of. Part of it will be done through the technology, and part of it will be done by governments, or organizations, for not to get the things reversed back to worse than what it was.

One of the biggest problem has been, in my talks with many governments in the past years, is that opening the Keshe Foundation technology MaGrav, supporting it, that will bring chaos to the colonizing countries. You've seen the refugees of Ukraine. You've seen the refugees of Syria. You've seen the refugees of Libya. You've seen the Iranian refugees. We've seen refugees from Vietnam war in past 50, 60 years. How many millions have moved, displaced, moved for a better life. If you put, according to the United Nations, the total refugees of the present time, of the past 60 years together, once this technology is released, this will be a peanut into what people will move and move rapidly.

One of the reasons that technology is so much objected and blocked and everything else by so many governments, is that bringing this technology today in open. That's why we are teaching it for you to do, and for you to teach the others. It is just for how many hungry people in 3rd world countries, who they became 3rd world country's, because of

the debts to the colonizing countries, will move to the countries, which they colonized them. (2:14). I don't think you'll find a single room empty anywhere in the United States, or England, or France, or Germany. It'll be populated. People will sell tickets App on the mobile phone. We can send you to London to live in such and such a place. You don't need to pay no rent and nothing, and everything is there. These are the realities.

The way you come to us, the way you came to us, and you went to moon and mars, the way you came and you changed your pH in your body, very soon, once this technology understood and be complete, it will become an App technology. Which means people can send you anywhere in the world with buying a ticket on the App. Because all they need to do is to deliver the energy through your headphone, the way we do. Then, is there any border? Then, do you still see an African living in a, what I call, a hut? Than the luxury apartments in New York, Tokyo, and Washington. Now you understand why there is such a huge opposition to Keshe Foundation work.

They can delay it a few years, but they cannot stop it. So it comes to the point, when you have access to the plasma technology, plasma packaging, would you like to live on this planet which is full of so much abuse, than to go and start your own village, village colony on the planet or somewhere where you feel good. Extending the village, not up the hill, but up to the next galaxy and next other place where you feel good with it. (2:16). These are the realities.

But how fast they'll come to it is not that knowledge and the technology is there. It is how you Knowledge Seekers jump out of this silly making Gans's and playing MaGrav game, and actually get on with the real knowledge development of the technology in dimension of the expansion of the Soul, the magnetic field expansion. And that's the difference.

Any other question?

Q: .. In the last teaching you spoke about the cosmic rays. Are the boundaries of our universe related in any way to these magnetic field lines where Souls can travel?

K- Partially yes. But it's just like part of it, not all of it. There are certain limitations and in time mankind will learn. Yes.

Q: .. The point of connection of the magnetic fields of the material state, and the magnetic fields of the plasma, (2:18). is between the transmutation of Oxygen to Deuterium through emotion?

K- Can you repeat that?

Q: The point of connection of the magnetic fields of the material state, and the magnetic fields of the plasma, is between the transmutation of Oxygen to Deuterium through emotion? He says, I ask this because in the 165th Knowledge Seekers Workshop, after a beautiful teaching about the connection and conversion between CH<sub>3</sub> and CO<sub>2</sub>, a

Knowledge Seeker asked a question starting at 1:57:58 about, how does Oxygen change to H<sub>2</sub> energy, whether it is through the lung or through emotion? Could you please expand on that knowledge? Thank you very much.

K- It's the... We do it in a physical dimension in the lung, but the whole essence of it is to feed the Soul. And the passage of the Oxygen through, what I call, the breathing passage, to increase the order deposit, or to change the elevation of the strength of the STM.

The process of... One of the most important things to understand in the body of the man and in the dimension of the life on this planet. Oxygen is the gravitational field force. It's what is holding the life together as amino acid. (2:20). And that goes due by principle in the magnetic field the strength of itself. It's the heaviest element. Carbon is a communicator. Hydrogen is the deliverer of transport, and the Nitrogen storage tank.

And in a way, if you understand this, then in any position in the universe, when you see life, you understand the combination of the fields which leads to creation and sustaining that life, you look for the holder of it. And when you look at the Oxygen and in combination, conversion to Deuterium or Hydrogen, you go back on the line of what we call, universal line of creation of magnetic fields connection.

We have this across all the elements. But Oxygen on this planet, due to gravitational mass field for it of the plasma, holds that, what we call, responsible ?? position. You cannot be the lightest and holding everything together. But when you're heaviest, your gravitational pull, pulls the other together in common, and positions you in respect to them. And when this positioning is done, then you create life, because you can sustain it, you can create all ?? (hold) the position, then you get the position of the, what we call, communicating to bring what is needed and what to give. You bring the storage, what you need, you give out, what you need you take, and then you create a line of transfer of energy, (2:22). and you create life.

In this part of, due to, what you call, magnetic field positioning of the Earth and Oxygen, and adding of the Hydrogen to it, gives this opportunity to it. If you look at it, I look at the water, water or is a beautiful liquid gas. If you understand, which the combination of two gases gives the liquid. You have the Hydrogen and Oxygen. And then this common denominator, due to presence of the Oxygen, creates that common denominator of the gravitational Mass energy for protein, or the amino acid. That's why amino acid stays liquid in this environment. And that's why 95% of our body, more or less, weight is mass by water.

You, once you understand the physiology of the magnetic plasmatic fields, then you see how one is connected, and how life is created, and how life is connected and what holds the gravitational field of life in given time and position and place. Oxygen is one of the key players in life, because on one side has a common denominator in the liquid of this planet, which is the water. And then at the same time has a common denominator in the structure of the body of the life, which is amino acid. (2:24). That's why, when it

combines together with another element, gives the flexibility of the tissue, a plant, and everything else.

And then you have the, when you have the amino acid with your spare Hydrogen's and connection with the amino acid again, and connection in line, then you bring active life. Because you have three Hydrogen's which are continuously interacting and juggling for field forces. And Carbon needs to play that game in the presence of Nitrogen. Then you see how life is created on this planet. And why our protein, our liquidish, what you call it, dynamic, and always make themselves to water. You've seen it, this, you should have understood this, when you made the Gans boxes, how you get the layer of amino acid on top. Because the amino acid, by nature, has an Oxygen, which is the heaviest element connecting to the another Oxygen, which is within the water.

Any other question?

Q: .. Hello Mr. Keshe, what is the role of the sacral bone in the structure of human physicality? Thank you.

K- Would you like to use your, what I call, fantastic system, and show us what it is? (2:26).

R: Okay, just a second here.

K- I bet our translator are scratching their head. How to translate? And where it is?

R: So, let me see here. The sacral bone, I believe it's sacral vertebrae, there's actually several of them apparently, from S1 to S5. And basically the sacrum is the center part of this, the bones of the anatomy, essentially the base of the spine. And the vertebrae's of the spine go down to the sacrum.

K- What we call a tail bone. And this goes back to the time when we had a tail, as a creatures. And as we became upright and start sitting more, we gradually lost the tail and the bone bend in. And now it's still there. It's part of the support of the skeleton to sit upright, or to hold you not to fall backward. And does not have much. (2:28). It's the part of the history of the man when he was a mammal with a tail. But now we use it for balancing.

It has a very interesting, what you call it, field transmutation. And it has a lot of connection when it comes to reproduction through the STM. We'll teach this sometime in the future. Where this, especially the bottom end of the tail, is the deliverer of the field through containment of the Soul. It's a bit too early to teach this, but it is part of it.

Any other question?

Q: .. Where to put the second headphone, when you for example, want to help an animal who is not near you?

K- We'll go through this in the session. If there are any questions, we allow a few minutes at the beginning, for people asking questions.

Q: .. Can I support more than one Soul in a session? (2:30).

R: I think you've said before, only one person per headphone set up.

K- Yes, because it is connected to your emails, so you cannot do anything else.

Q: .. How will the people that don't understand the English language manage the connection in these sessions?

K- Usually we have translators, for the languages.

R: Yeah, it seems to be at least probably half a dozen of the popular languages.

K- You have the German, the English, the French, we have the Iranians, we have the Chinese, we have the Portuguese, anybody else? I think these are the languages. Italians. Yeah. It gets translated directly in the sessions. We've done this up to now. But because these sessions are there, instantaneously people absorb, understand.

Q: .. Can persons with implants attend the July sessions?

K- We advise you not to. We advise you not to.

R: You mentioned, you said that you know how to reverse the effects of plasma fields, so it's possible to reverse the effects over implants, and leave the rest of the body in the plasma state, (2:32). during the plasma processing, so that it could heal, whatever is wrong and not affect the implant zones at the same time?

K- Yes, yeah, but that's for special cases. But not for collective sessions like this.

Any other question?

Q: .. Do you have the backing of the Universal Community, I mean, the treachery of the Belgian King and Gates etc., would you, would do anything to stop this science, like these black opp people, assassinating scientists...

K- They already are doing and they are very busy with it. They are still doing and they're very busy with it. You got to understand, you touch a point which is very, what I call, we are not touchy about it, but it's the fact part of the Keshe Foundation work. A lot of the things we got involved and trapped with, and still even today we are trapped with, and we battle with, with the Belgium structure, was taking of the Keshe Foundation to Belgium. And all of it was set, and then was used by people who were inside the Keshe Foundation. And when we went out to get rid of them, they tried to still cause problems.

But, in general, when there is no kingship, and when we come to end of these kingships, and then that state, that government, that country, will dissolve back into.

I was talking about this with one of the Knowledge Seekers, past couple of days, (2:34). about how this country was established and it's going to go back into what it was. This country is not our problem and headache anymore. We have moved on and in time it will be processed by themselves. The abuse and the misuse and the killing of different ways and different things, different people, for the benefit of rulers, is not exclusivity of one nation.

Any other question?

Q: .. Can one connect and maintain the knowledge and understanding of plasma technology in the July sessions?

K- Repeat.

Q: .. Can one connect and maintain the knowledge and understanding of plasma technology in the July sessions? Thank you.

K- I don't know, it's a question I can't answer. Depends the Knowledge Seekers present, understood, want to share through their Soul. (2:36).

R: Depends on one's intention and so on as well.

K-Yeah. Unless you want to tap into my brain, which I don't think I'm ??. Even though we are in session, we are outside the sessions. That's the way we set up. Even though we stay in most of the, we are in all the sessions, but we are outside the sessions. We keep that to 3 or 4 people the Keshe Foundation, in that level. The people who operate outside during the sessions are usually not part of the session, so he cannot tap into it. Or they don't get involved into the process. Unless they choose so.

Any other question?

Q: .. Mr. Keshe, good morning, thank you all, for all the love and patience. You always say that the Soul is conscious, when we create a dome with the intention of creating a condition of love and peace for other Souls that are in certain conflicts and cannot see that through peace and service it would be much simpler, somehow a communication begins to occur. Is this communication conscious even of those who don't have the knowledge or are we the ones who are seeking to understand that we are aware of it?

K- It's combination of both. It's not exclusivity of Knowledge Seekers, it's not exclusivity of man. It's a combination of everything put together for it. We carry inherently part of our ?? genetic code actually. (2:38).

You got to realize something which is very natural, in all processes of creation, is that even our brain has section, which is responsible for the interface between the STM and the STP of the man. When you look, when you find the position of the Soul, you always see that interface line. This is what I spoke about earlier today, that where we draw a line between the physicality and the plasma, in the emotion. And our brain has specifically developed, not us, all animals, all creatures which have a brain, Soul, structure, for that purpose, to that effect. To translate, to transfer, to, what you call it, synchronize, between the two emotions and two dimensions of the Souls. And we gradually, and those who become master in this, will have a beautiful time in doing it.

Any other question?

Q: .. So the Soul sits in the third ventricle and the spinal fluid is charged by it to reduce in strength as it travels to give certain field energies for certain parts of the organs, like the Sun's rays?"

K- What?

R: I thought you might say that. (2:40). So the Soul sits in the third ventricle, I guess in the heart he's saying, and the spinal fluid is charged by it, to reduce in strength as it travels, to give certain field energies for certain parts of the organs, like the Sun's rays?

K- I don't understand this, where the Soul got to the heart?

R: I guess he's saying that, if the Soul sits at the heart, it's like the Sun's rays giving out to the spinal fluid, which then travels to the organs to provide them energies. Is that the way it works?

K- Not really.

If you have a heart of a man you cannot make a man. If you have a brain of the man you can make a man. So, I think you get your answer.

R: Hmm, it's a good point.

K- Shall we call it a day, or is there more questions?

R: He mentioned it was the third ventricle of the brain he was talking about. Okay, so, is that kind of ties in?

Well perhaps we should wrap it up Mr. Keshe.

K- Yeah, we are done for today. Thank you very much for today and please, if you're joining us on the three sessions, try to complete and conclude as fast as possible. And we will let you know how to use the system, but make sure you have at least two headphones. Some of you might need 3 if you want to do different things, (2:42). ?? and examine and develop things for yourself.

And as I said, those of you who are, who've been trying to get yourself to Linz and Keshe Foundation Exhibition in Linz, will shut most likely at the end of next week. If we push it to the following week and that will be it. As we are closing operation in Austria. The exhibition will move to one of the wonderful world capitals in the coming weeks and then we move on to other works of the Keshe Foundation. Thank you very much for today and see you next week.

**493 KSW July 6 2023**
