

China will lead us to Peace - Share T - Materials Produced from Fields - Expansion of Soul Introduction to 495 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

There was a big focus in today's workshop about China as our new partner to bring the technology (T) out into open and spread it across the world to bring the change we all have been waiting for. For many years Mr. Keshe has patiently and diligently tried to offer the T in exchange for peace to the western nations, but instead of embracing it with open arms they have been trying to silence it in every possible way, so that they can keep the power for themselves without any regard for the suffering of humanity.

Now this has all changed. The last straw so to speak, was the defrauding of the KF of millions in the past 2 years. This "opened the doors" to deepen the already established relationship with the Chinese. Only this time through the wisdom of President Xi of China and the Chinese leadership, they have decided to continue down the path of peace, which seems to only be achievable on this planet through the introduction of truly new technology. With their "one step forward," Mr. Keshe reciprocated with "100 steps" towards them, by actually demonstrating the power of the T directly to the leadership. This demonstration showed that nuclear weapons are now obsolete. And this week he showed them, that with the T we can create materials from the fields. This will help fulfill the promise of helping the Chinese to colonize Moon and Mars. This is only the beginning, there is so much T, that has been held back, and is waiting to be showered upon the nation that will bring peace to humanity. He said, the Chinese can dip into the "ocean of knowledge" we'll give to them, and they decide how to use it to speed up the spreading of the knowledge across the planet.

We may be asking ourselves what if they use the T in the wrong way. Mr. Keshe was in a way answering this question throughout the workshop by explaining how he has been developing the relationship with the Chinese over many years. He is continually warning the leadership not to become proud thinking they are gaining so much T, rather instead to become more humble and have the attitude of serving humanity. He observes how they respond to each release of T and is going in a step by step process. He further explained why China is the right nation to lead the world to peace is because, in general they don't have the religious dogmas and fanaticism we see in other countries. Their upbringing is in Taoism, which like the Plasma, seeks to accommodate rather than force one's way on others. The ethos of Taoism is very similar to that of the KF. Also his experience with spending time with the Chinese military at very high levels, is that they prefer peace to war. It is his hope to make a "peace army" out of the Chinese army, and this will come by releasing more and more technologies.

Still this may be very hard for us to believe because the Western Media has a one way portrayal of China, and that is to make the "devil" out of them and that we should fear them. When Mr. Keshe went to China and started experiencing Chinese culture first hand, he realized how we all have been lied to. He used the example of Libya. Because of the Media's portrayal and lies, almost nobody knows that Muammar Gaddafi shared the oil money with his people for improving their life with hospitals, schools, roads, etc for them to become one of the richest nations. People accepted the lies of the Media, and this allowed the British to steal all the gold in Libya's central bank. This is very hard for us to accept, and it's the same with China. As Knowledge Seekers (KS) we need to become aware of the facts, so that we have the right attitude for spreading the T across the planet. Accepting China as our partner will save us 40 years in advancing the T.

After the Chinese leadership was shown the power of the T first hand, they have agreed that all the products will have the KF name on them. That the teachings and sharing of knowledge will continue, but of course they will make the decision about what knowledge and when it can be released. For example, today they allowed Mr. Keshe to tell us about the production of materials from the fields, or from energy to matter. Any other country would have blocked it, but the Chinese allowed it. I don't think we have anything to fear with them. They also want world peace. Mr. Keshe said, there will be no "strangle hold" on KF. The Chinese will handle commercialization of products and KF is now free to fully concentrate on bringing out more and more new technologies.

I hope that we as KS will continue to expand our Intention and prayers for peace and spreading of the T. The more true emotion and love we can add to it, the more the plasma expands. Confirmation of the change came in a very subtle way. The Brazilian government released an article about the President of Brazil signing an agreement with the Chinese government to be part of the space technology. What is interesting is that back in 2019 Mr. Keshe and Rafael were in that same room, unsuccessfully discussing the T with the previous administration. I don't think we will be seeing this on CNN. It doesn't matter, because in reality it is happening.

There are many subtle teachings in this workshop. In the demonstration of the production of materials it "rained" particles in the room, and this could be seen by officials outside the room. We might think, how is that possible? The bricks are made of solid matter. Yes, but matter really is just a M field or energy. How is it that our body is in the Gans state, which means an energy state, but we see it as solid matter? But if you push on it, you feel the softness of pushing Gans's or plasmas aside. Is it the outer skin layer that makes it look solid and the consciousness of our senses? These are the kind of things we need to ponder, especially now as more and more T will be shown.

The other thing that was mentioned is the expansion of the plasma. I understood it, as the plasma was expanding outside the room from where the materials were being produced and therefore the observers could see it. More teachings were given on the expansion of plasma. As the Soul and plasma of the Enhancement Units, expand further, then we have access to all the knowledge in that expansion. We can travel in the U only as far as this plasma has expanded. I thought he said, that it will take some years for the plasma of the

system to reach the whole U. This is really amazing, because this is what we are doing in the monthly flight sessions. The first thing we do is to expand the Soul. How far we can expand our Soul is the dimension of our life, and it's how far we can travel, and how much knowledge we can have access to. Maybe all of us should start to practice expanding our Souls as often as we can. It's not like a method, we just do it through our intention and feeling our emotion. If we do this in a committed way, eventually we'll be able to feel the emotions of the STM, STP, and the P. When we can feel all 3 and they become equal with each other, then this is called, "heaven," and it leads to eternal life, which is the ultimate goal.

However, in human life it is the emotions that block these 3 from becoming balanced. The emotions get in and "short circuit" the work of P. It was compared to the tilt of the Earth. This slight tilt causes diversity of field strengths and thus creates a variety life on the planet. The emotion of the summer tilt is different than the emotion of the winter tilt. Unfortunately, one of the field strength diversities of this tilting is killing. But it can be corrected through the fields. And it's the same with the man, we can correct the tilt so that the emotion of all 3 Souls come back into balance. When balance is reached there will be no sickness. Souls don't get sick, but they have different field strengths.

A misunderstanding with the KS about the idea of weakening a Soul so the other can come out was clarified. For example, we don't weaken the Soul to allow the STP to come out. Instead, the Soul is transferred to a new position. Remember that M does not change into G, and that it is the same field only it changes direction, and then we give it a new name. The name is not the reality, it's the same field going in a different direction. Instead of thinking of weakening Soul, think about adjusting the balance between the G and M fields. If you reduce the strength of giving or M, then you automatically increase the strength of G, and this is how we create motion and positioning of the plasma. Mr. Keshe added that, the more you give, you'll find out the more you receive, to give even more.

Other Topics:

Attending conferences in Manchester - London - Beijing will change many KS lives;

Teaching on Oxygen (O) and Hydrogen (H) gases which are separately gases but when you mix them together it depends on the fields in the environment and Inertia whether they will manifest as a liquid in matter state or the energy state of plasma as a Gans;

Scientists don't want to understand that nitrogen (N) is created in upper atmosphere from the rubbing of the fields of the Sun & Earth - Politicians in Netherlands using misunderstanding to stop farming - damaging their nation;

We need to create detection tools for plasma so that we can separate the two sciences and teach them separately and together;

Plasma is already expanded over P in the example of the matter state bone structure inside the Gans plasma of the body;

Thank you for listening
