

Teach Children Plasma & Matter – Creating New Plasma on Earth – Solid Magnets - Gravity of O Introduction to 493 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This is a workshop of questions. Mr. Keshe put a lot of questions for us to be thinking about the plasma such as M fields of the U and the Creator, and that we should have studied more about solid state magnets and their field interactions, because that would have prepared us to quickly move into understanding of the plasma. But most importantly we have to change the education system on this planet and teach both plasma science and matter state science in parallel to each other. For the technology (T) to be accepted we have to start educating our children and ourselves. And actually the children will learn quite quickly and he compared it to how the parents and grandparents watch with awe, when their younger generation plays the computer games so intensely, while they cannot even understand what they are doing.

Maybe we thought that we were just going to get rid of the matter state altogether. This is not the case. One of the reasons we are able to understand this much of the plasma is because of all the accumulated matter state knowledge our forefathers built up over the centuries. We don't dismiss any of it, but we have to bring it to a higher level of understanding and be able to add on to it and take it further. This is where we run into problems with the status quo of today's scientists. Like the Catholic priest's of old, they want to keep the power and position they have built up for themselves, even at the cost of enslaving the others. I brought this up once to an old man who devoted his life to science, and he always used mathematics as proof that he was correct, because you could repeat the formula and get the same result. He was furious when I compared him to the priest's. The sad part was that he did not know he was programmed to believe these things in a certain way, and he did not want to change. This is what we have to deal with, if we want to bring the plasma T out into public. When we start teaching it side by side in the schools, then these people will have no more power over the others.

In one way it seems almost impossible to change things. But then Mr. Keshe said, the "cat that got out of the bag" is us Knowledge Seekers (KS) and there is no way they can put it back in the bag. This is good news, but at the same time it might be hard for some of us to believe, that us little people, who will never be heard on the news, have so much power to change things. In a way, it's like how our Sun was created, one little particle of energy at a time that starts to gather around a center. But remember that center was another being that had gathered enough M and G field strength to create a plasma, or gravity, that it can attract the others to it. Isn't this what we are doing in our daily Brazilian Intention, gathering fields. Everyday we are gathering fields together to create the "new plasma" on Earth. It's not when the change is going to happen, it is already

happening. Just think back to 2022 when all the changes took birth, we were part of it, and now we are continuing on with it. It is so simple, but we also have to confirm it within ourselves that it is true, and then it grows stronger and stronger.

Mr. Keshe gave us a lot of encouragement as KS to continue down this path of learning the new plasma science. In fact, he strongly suggested we get out of this silly child's play with the Gans's and MaGrav game to get free energy and start practicing to expand our Soul and the M fields. Many people may be thinking, "I don't know what to do?" That's really not appropriate, because you can just go on the Brazilian website and find a huge amount of material that has been transcribed and translated, that it will take years of daily study to go through. One thing he mentioned was that to get the knowledge of Creation moving we have to start discussing it, but at the level that we are at, not some fantasy idea we may have about ourselves. Again it really comes down to whether or not we have a true love for this beautiful knowledge and all that it can give us. When we were scared of Corona, we did something, now that the fear is gone, the participation and "fire" to learn is less. It goes so much better if we learn out of love, rather than fear. The July flight sessions have been setup so that we can do our own experiments with the plasma, and what we can generate emotions for. For example, if we want to reach an animal to help it or communicate with it, first we expand our Soul and become energy fields and then through our emotions we make the connection to do what we want to do. We can also use a second pair of headphones to direct the fields to where we want them to go. The only limitation is our thinking, and our openness and what we allow ourselves to feel. Initially there is the fear of leaving the "herd" and walking alone, but when we overcome that through the love of Truth or the Creator, then the Soul expands and can travel the universe (U). We do this at night in our sleep, but we are not conscious of it. Through the T we can become conscious of it on a continuous basis.

One thing that is easy for everybody to do is to start to play with magnets, but this time we should become aware of the field interactions we are witnessing. He spoke a lot about matter state solid magnets and how if we would have paid more attention to how they work, we would easily transition into plasma fields. Just because they are Fe magnets doesn't mean they are not plasma. Holding 2 magnets in our hands and feeling the attraction and repulsion, is the same as feeling what it means M field strength. It's not a concept on a computer screen what we call, "Apple Computer" - how they brainwashed us to be a drone. No, it's something alive. That M field can become a life if we understand the Knowledge of Creation. It's a direct experience of life. We don't need to ask an expert what it means, instead we can ask our Soul and the Soul of the Fields to reveal itself to us. This is how much power we have. Nobody can stop us from accessing this knowledge, only our own fear. I did this some years ago. I picked up a big stone and a little wood stick and dropped them together, and they fell at the same speed to the Earth. I wanted to know why? I didn't ask the silly professors who said, oh, it's a complicated mathematical formula. I knew they were hiding their ignorance. Instead, I asked my Soul, teach me, I want to understand. It seemed impossible, but I stayed with it, each time when I was outside I kept dropping the stick and stone and asking for the knowledge. Years later Mr. Keshe gave the teachings about Gravity and Inertia and the difference between matter state and plasma. When we drop a stick and a stone we are

directly experiencing the plasma state and the matter state Weight, when they hit the Earth. That's it so simple, the complicated mathematical formula is for the ignorant people to fool themselves. The point is that we can do it ourselves. All the knowledge is within us, we only have to access it.

We do it when we dream at night. But it's not a dream, we are actually traveling billions of light years through our Soul instantly across the universe. When our Mother calls us to go to school, instantly we travel across the U back to our body, but it is so natural for us that we don't think anything about it. Tonight when this happens again, let's stay aware and feel what is happening, and accept the truth of it. Then we have learned transmutation and then slowly we'll transfer the knowledge to matter state physicality.

There was a teaching on Oxygen (O) and how it holds "Mr. COHN," or the amino acid (AA) together and creates life. The O is the heaviest element in the COHN and it creates the gravity of the AA structure and pulls all the other elements to it. The lightest element can't do that, it has to be the heaviest. This is important to understand when we go to other dimensions in the U and study their life forms to find out which element is the heaviest in their AA structure and how that will effect how they appear in physicality. Then on Earth two gases O and H, create the liquid part of the planet. Then he said that we should have been able to figure out why the AA forms as fat on top of our Gans Box. It is because the O is the common denominator between the AA and the Water, so it gets attracted to it.

It's interesting about the O being the creator of gravity for the AA. Didn't he say the grandfather was in another part of the U trying to create a seed for a planet. Is O the grandfather of our planet? He appears in all the important combinations such as oxides and even in the air that we breathe.

The knowledge to cross the U will come through "Soul of the Child of Mitra," that's her responsibility not mine. But what did Mr. Keshe mean, "that's the path to the Creator and not mine." Why is that not his path to the Creator, or is he from a dimension beyond what we call our Creator. Or does he stay in the Creation until all beings are liberated, something like what they call the "Bodhisatva vow," to help all beings till the end of time?

Other Topics:

Transmutation is gift from Mitra to humanity - our responsibility to teach other races;

You learn the knowledge yourself by teaching others what you understand, but that doesn't mean that your knowledge is complete. Mr. Keshe added that, first learn the correct way, so you teach others correctly. And don't become a prophet. The bottom line here is to remain humble.

Book 8 " Origin of M Fields" was mentioned again, who created our Creator? We know that we were created out of His fields. Man first has to master the totality of the Knowledge of Creation and then understand motion of M fields and plasma;

Sharing knowledge doesn't depend on what we understood, or some people may change it into their own limited understanding - we all listen to it directly on the recording - maybe understand and get enlightened in the first go;

Man will colonize the whole solar system, not enough population;

"Grandfather is in another part of the U trying to create the seed of a planet in the dimension of energy."

Today when you go to sleep at night as a baby, your energy and level of understanding is set according to that time and place. (Does this mean we are given a certain amount of understanding, according to what we need to fulfill our task in life? Like setting a particular fuel for an engine to do a particular task).

Thank you for listening
