

# **501st Knowledge Seekers Workshop** August 31, 2023

(Quick Index 16 pp, Introduction, Topic index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

From Manchester ready for flight; 2 visitors not from Earth; Man is amalgamation of recycled fields of U - nothing special; Sperm requires matching strength - not strongest; Learn to accept pain of first breath - transmutation; Experience knowledge of all being on planet fed into Mother systems - equal access to all; Visitors to Earth amalgamate - can't recognize; Fingerprint of energy added to system; M fields of U always recycled - humans; Field strength of element have to be part of Soul of Planet - part of body; Wait for China to announce collaboration; Ether made up concept; Feel Souls

## **Topic Index**

From Manchester conference; KS getting ready for flight; Man's life is amalgamation of "Fields of Creator" - progressively - we are nothing special & never become special - totally connected to U; We are accidents of U - truth about how life takes place; Not strongest sperm creates life - fallacy - doesn't understand Creation; Sperm has to have matching strength to egg or no life - pre-decided moment of interaction; Two plasmas have to be connected & fit together - then can interact; Can create M field of any entity - material production; Two plasmas create twinity; 3 sperms match field of 1 physical D get triplets; When multiple Souls with 1 STP get schizophrenic; Expect life to be smooth - not that way - have to accept pain; First breath on planet is painful - same when transmute first breath back to P is painful; Can tell who really transmuted - others pretend; On Moon have to adjust to take energy from environment not breath; Transition between body & STM becomes habit - teach in schools; Have to adjust systems so everybody can transmute - nobody left out; Match fingerprint of Soul with difficulty transmuting to match fingerprint of system; Set systems for people not from Earth; We need to find fingerprint of Soul of planet Zeus for others to transmute - go back home; New technologies to facilitate speed of transmutation - depends how world accepts T; Next develop systems without physical structure - only energy of plasmas; Coming time many KS will knowingly or unknowingly take into Space - without wishes & desires - think about & achieve it; Will understand how to live in both D; Can use MaGravs to tap into energy of U; All systems will feed into a single "mother" system - knowledge become equal to all - food - medicine & everything else; In Linz we gathered your information into central system - everybody has access to knowledge - will be in memory - see a face recognize from the knowledge; System will gather information from every creature on planet - knowledge free and part of emotion - access on demand; governments afraid of new T - no control - all equal even with U Community; In Manchester 2 people not from Earth - ancestry outside Earth - still connected to origin - choose to stay on Earth beautiful place; Doesn't matter where from in U - all came from same Source - no need to fight; Have to bring world leaders to understand all are equal; KS responsible for ambassador to attend London Meeting; Can make world leaders answerable to world - in Meeting & outside it; The change is within us - not in individuals - gurus - prophets - don't have leaders to follow; Accommodate Souls

according to field strength; We always thought of ourselves as subordinate - need a leader; Led to Creator; We create the Creator; (Soul is our leader); Man also become independent of planetary system; Whatever we learn in P and Soul becomes part of Universal Knowledge - everyone has access to it; Not anymore "me" I patent it; This will happen when we start transmutation; Creator never opened a patent office; All knowledge becomes part of Totality - you can find out which Soul brought the knowledge; Do we want to add a wrong fingerprint to "Soul of Creation"; Follow Ethos of Mitra; Create perfect Soul for rest to evolve and live from; Have to educate 8 billion human and rest of creatures on planet; Understanding "motion of the fields" is understanding Creation; Make distinction between matter and energy states; Soul can feed you in easy way; Don't need P structure to show love & affection - feed oneself - travel span U; 99% of problem - man is too physical - constantly needs to confirm existence in P; Don't know we have existed & will exist for eternity; Come from Creator - go back to Creator - no need to fight; M fields in motion - always being recycled; We are created out of recycled fields for billions of years - ignore want to be individual; We are part of something bigger - but Man too feeble & arrogant; Born from recycled fields - will die - fields become part of others; I am the Beginning & End; When become star some fields become Universal Energy - Cosmic Rays - feed others; Totality of Creator & Creation are one; If Man understands no difference in creation - stop fighting; Man is a progressive development & mixture of fields - temporary condition in matter state; Problem when look to matter state for confirmation of existence; Build systems man can see his greed & fear to identify and overcome; When no fears all become equal; Man with no fears strong enough to comprehend Totality; When afraid of learning - create dilemmas - same when afraid of another; Our level of understanding becomes equal - no fears; Takes time to achieve - but not much time - all have same fears - lacking wealth & death; When Man understands no wealth & no death in Creation - become man of peace; Can teach only to extent that you can feel it - then understand own creation; After become Passengers of U return to Earth to teach others; Some will elevate to Totality; Understand all the Souls come together become one Universal Knowledge - shared equally among all; Knowledge not exclusive to few; Eventually we all come to this point - back to Creator where it started from; I am Beginning & End; Understand wealth & land have no meaning - can live anywhere in U free - we are part of Creation & it is part of us; Didn't need anything in womb of mother - no jacket or coin - U provides everything for Soul to exist; Don't need to wear frock of man - Rolls Royce; Don't see triplets fighting in womb - Souls accommodate each other; In World Peace - "world" is you - be peaceful with self - this is Totality; We aim at governments & societies - but really it's you to become peaceful - you govern own Soul; Not to bring change - you understand and change yourself; Learn to become detached then understand more Creation - become part of it; We are amalgamation of Totality - nothing will change - does not matter what man does; Develop systems and machinery to show - how simple life has been - we make it complicated by wanting to confirm our own existence in P; In London show leaders they have no power - answerable to all of us as "Soul of this planet"; We as Messengers stay equal - we teach the same.

We are scientific organization look at data - graphs - what is physically there; 2 people in Manchester not from planet Earth - ancestors were Passengers of U - won't tell who; On

earth we are a mixture of races from U; They fit right in like us can't tell difference; He notices their different behavior; When we go through transmutation then recognize Passengers of U; They carry fingerprint of home planet in energy; Mixed Universal Marriages; Dimension of life means which Soul of a planet we come from - fingerprint of energy of that planet; Don't need to drill can find out what is below ground from field strengths in atmosphere above ground; Mining will change; Cannot have elements in ground that are not part of Soul of Planet; Only 200 or so elements on Earth but 200,000 in U; All elements on Earth are in human body - STM learns how to use - including plutonium; High energy elements used to disinfect in body - put certain fields that endanger body out; Without certain elements we would die - never knew - extends life; Will learn how to use radiation from Cosmos to extend life of man; If everybody extends Soul then will recognize each other at Soul level - how we recognize each other in Space; 2 visitors Souls shine differently than humans; Adapted to our environment - like GMO of Soul; They become part of us - we both feel safe - original ancestors must have felt safe - not be eaten or killed by man; Tesla was visitor; If visitors managed to live peacefully on Earth - than man can live peacefully in U - visitors key to take man into U Community; Soul from Earth has blue color - people have different colors in U based on field strength of Soul; Everybody learns to transmute - they cannot come in your bed - both plasmas have to accept interaction or no interaction; Have to have right field strength to interact with another plasma; Gap between plasmas; KS explains experience in Manchester - Soul through dream told him to attend - saw Souls from other D in room; When will China publicly announce collaboration with KF - it is up to them; At moment Americans can't work with Chinese - relocating factories back to US - big mistake; In future science will be wealth of country not manufacturing; KF to bring best scientists from around world to China - work on space T for world peace; Opposite to American "brain drain" for war; Want international scientists to join Space development benefit whole Southeast Asian region; Game has changed; Chinese generals and officials talk about peace not war; Americans operate like British - divide and rule; China policy based on Taoism - bring together as one; Chinese culture share meal with each other - westerners meal only for oneself - not share; He observes the Soul of people when in China - not sightseeing; If understand a culture - then understand own Soul - how it interacts with others; Physical interactions are a reflection of Soul - explains a lot; Souls who come to Earth are refugees - planet destroyed - or Travelers of U - come and go continuously; When we put down prejudice and fear - they will tell story of home planet; Manchester was center of slave trade - cotton from US ran mills; He can feel Souls in places he goes - pain of slaves in mills - marching soldiers in Nuremburg & Belgium - injustice - Souls not at peace; We are still "aliens" to different parts of ourselves; Mixed race of U not like genetics 50/50 mother & father; Soul takes the best from whatever parent - Souls not deformed; Aether or ether was never proven or defined - it's a made up theory to cover ignorance - people accepted; Ether then like the M fields of U; Collection of fields like human body - cat or dog; In Nuremburg felt STM emotions - not STP because no P; In Vatican felt injustice done to Souls - not at peace; Cannot bring Souls to peace - make peace available to them they are free to choose peace - not forced; Can add amino acid tablets to Gans - drink only few drops of Gans water; There is continuous flow of space people coming to Earth - and going; Nature of man and Soul is to travel - be in D of motion; Service to Creation can create Inertia elevate Soul - if know how - can

be feeder to other Souls like Sun; Missionaries go to steal and change people into their own belief; Charity workers go help out of love & obligation to make someone else life better; Colors of planet and peace; Have to live Ethos of Mitra to be perfect Man - then giving not tainted by killing; Cannot say anything about "etheric body" ether made up idea; Flight systems now have blueprint of Souls from Manchester conference - baseline of peace; Listen to first 10 minutes of today's teaching - key to become travelers of Space

## **Introduction to 501 KSW - Manchester Conference - 1st Breathe - The Oneness of Creation - Visitors Amalgamated Among Us**

This workshop was broadcast live from the Manchester conference with about 20 Knowledge Seekers (KS) present. Not too much about what went on in the conference was revealed, but we can gather a few important things from the teachings. From what one KS said, they were all given a Headset Unit, which most probably had the latest technology (T) in it to test. One of the main goals of the conference was to start training humanity in how to transmute the physicality (P) and also to prepare the fields for world peace in the upcoming London Ambassadorial Meeting in November. They were also printing out graphs of the interaction of the Soul of the Man (STM) and the Soul of Physicality (STP) to calibrate the systems for the upcoming flight sessions.

Then Mr. Keshe said one of the KS immediately went into transmutation of the Soul. They must have gotten so far away from the body that it stopped breathing. They had to ask the person to start breathing, and when they came back into the body they began crying. This prompted him to give a very soft teaching on learning how to accept the pain of life. The first breath we take on switching from the liquid of the womb of the mother to the air of the atmosphere of this planet is painful and that's why the baby cries at birth. It's a transition from one state to another state, and it is painful. He said, this is exactly what happens when we go through the transmutation process, when we come back to the body it's like taking the first breathe again and we have to get used to it. This is not very easy to hear since modern society has trained us to avoid pain at all costs. This is where he said, we have the belief that there should be no pain, but this doesn't fit with the reality of life, which is one transition after another. And since our life is M fields in motion it will be one change after another. It is something we have to understand and get used to, and not be afraid of.

We each have to find a way to come to terms with how we handle pain, and can we learn from it? I don't think this transmutation pain necessarily has a lesson with it. It's basically a physical process we have to learn to go through. It only becomes a problem if we try to avoid it and create an emotional blockage. And this is where the problem is, because most of us are carrying some form of these emotional blockages to avoid pain. This is due to a lot of reasons like wrong understanding of the purpose of life, attachment to physicality (P) and to ideas about how life should be, but pretty much all of it stems from not knowing and feeling our own Soul. So in preparing for transmutation it will be important if we can experience our Soul directly and learn how to expand it over the P and then elevate the STP. When we practice this, then hopefully the transmutation will become easier.

Another truth of life that came up was that we are all the product of accidental interactions of the fields of the Creator. The life of man is a progressive development of the Creators fields and that we are nothing special and will never become something special, because we are totally connected to the U. At first glance we might think, this is what the atheists say. Yes, that is true, but only part of it. The difference is that we are totally connected to the U. This is another way of saying we are totally loved, and we also love totally the Creation. And the "progressive development" is the joy of living, or experiencing the field interactions as we grow back to merge with the Creator. The problem is with the ego, which is really just a bunch of thoughts, ideas, and feelings rotating around itself. It's a separate entity made up by repeating thoughts and it dissolves when it runs out energy, which can happen in different ways. This is very hard to hear as we are trained to think we are special and unique. And part of this is also true, because the way our fields interact with each other is unique and can't be repeated. It seems like we are going around in circles. And this is because we only think of the matter state existence. When we understand that we are both plasma and matter, then our confusion will end. And hopefully transmutation will become very easy.

Out of this discussion came the point, that our understanding about the strongest sperm is the one that can fertilize the egg is nothing but a fallacy. It is born out of the concept that only the strongest wins and survives. In a way, it's a kind of slave mentality and is not based on the reality of the plasma. As the sperms and eggs are both plasmas, they have to have matching field strengths to interact. This is pre-decided the first moment of interaction. But what does this mean? Which interaction, the sexual contact or when the mother and father first meet? It was not disclosed. When you see all those sperms in the microscope swimming around, you start wondering. The reproductive process is like creating little duplicate "people" of the father, and the egg the mother. It's the same pattern, the micro in the macro. Then he mentioned about the process of creating materials out of the fields. It's the same as with the sperm and egg, only we control the plasma and can make the matching M field strength of the material we want. But then there is the secret part about the Inertia, that he said he won't reveal to man at this time.

A lot was taught today about the oneness of Creation. Everything comes from the Creator and goes back to the Creator. The fields that the Creator emits, are constantly being recycled. We were created out of fields that were used before and when we die, our fields will be used again. This is easy to see with the body, because the elements go through transformation, they break down to their essential components and then get used again. But with the Soul it is not easy to see, because if we build up enough field strength to become a Soul, he said it lives for eternity, or does he means trillions of years and then merges back to the Creator? But nevertheless, during that whole time it is still emitting fields like our Sun and whatever fields we don't use goes out into the Cosmos for others to use.

I believe Mr. Keshe was implying that the fields keep a record of all their experiences and knowledge and then that knowledge gets fed back into the Creator as "Great Reservoir" of Totality. When we merge into the Creator all the fields that have been a

part of us carry that knowledge with them, and all the fields that go out from us also gather knowledge and we still are connected to that knowledge. Then all this knowledge comes together and becomes part of the Totality of all the knowledge in Creation, and everybody has access to it. The fields are constantly being shared throughout Creation. So what is the point of killing another being when at some point in Creation you have shared the same fields, in a way it is like killing yourself. The Buddhists explain this in a different way by saying, that every being at some point in time has been our mother. But I never really connected with this idea, there was something too limiting about it. Now with the plasma science we understand that we all can be "mothers" and create, and we are sharing fields all the time. So in effect, we are already connected to each other whether we like it or not.

Part of the current technological development is that they are building a "mother" system that will collect the experiences and knowledge of all of us and all the beings on this planet, likewise everyone will share this knowledge. The "oneness" theme went further by saying that all the elements on this planet are contained within our body. The STM finds a way to use every element, so they are not just sitting in our body, but are actively a part of our functioning. We are constantly being taught that we are part of the Totality of all life and life itself is a process of sharing. It seems so strange that if Creation is inherently moving towards sharing a totality, then why are we living such an opposite life, having to fight to survive, thinking constantly about me and mine and how am I going to be happy. The Manchester conference has helped to bring a lot of hidden things to the surface, for us to change our focus and to get serious about living a true life, because I don't think there will be any other way to transmute, unless there can be a group elevation that bypasses all the fallacies we have in our mind.

During the conference Mr. Keshe said that there were two people amongst them who were not from this planet. They have amalgamated into our structure so well that you cannot tell who they are, and the people themselves might not know that they are from another planet. This made a big stir among the attendees and some were wondering if it might be them. The golden rule for visitors is to never reveal themselves and these two kept to that. Of course, when man becomes peaceful this will change. Remember Mr. Keshe has openly stated he is not from here. Where do we think all this knowledge is coming from? He didn't say there were only two, but these two he recognized by his feeling and observing their behavior and one he has known from before. This is an important lesson for humans who think we are the only ones in the vast U. Now we understand that they have been living with us all these years and helping us with our technological advances. Tesla was from another planet and greatly helped humanity advance in science. But what is interesting is that he was not a master of plasma. So not every "alien" knows everything there is, many in the UFO's don't know how they work even. Visitors come to our planet either as refugees because they couldn't live on their planet any longer, or as travelers of the U. And they come and go constantly throughout our history. So it's time for the man to wake up and let go of his fear and ignorance. Their being here is the proof that we can live peacefully in the U among other races. In fact, when it is safe for our visitors to come out into the open, they will help us integrate into the Universal Community.

There is something I want to bring up, because earlier Mr. Keshe said, in physicality you can't mix the Space races together, just like we can't go onto their spaceships unless they create a special Earth environment for us, because the fields are different. Therefore, I don't think they came by spaceship like in the movies. So then, what is this amalgamation? Is it that M fields of the plasma of their Soul has found a matching field strength with the plasma of the human Soul? Then that means the Soul of our Planet would also have to accept them. We are not able to recognize them physically, and as we don't know our own Soul we can't recognize their Soul. But then how does it work? Would they have to have a separate Soul among the Souls of that person that they join to, that is still connected to their home dimension? This reminds me of when Mr. Keshe broke a bunch of eggs with the yolks intact and put them in a bowl and slowly mixed them together. We see that the eggs stay separate up until their "Coulombs Barrier" gets broken, then they amalgamate into a single mass. Nevertheless, they still keep their individuality at the atomic level. It's like metal alloys, they are mixed up, but you can analyze the metal and find out how much of it is Fe, Nickel and the rest. Hopefully, soon Mr. Keshe will open up this door of the "science of Souls" further, so that we can learn how Souls behave with each other and what they can create. Because this is not the case of channeling another Soul, these Souls are mixed up and amalgamated as one Soul. And it's also not schizophrenic or "beautiful people." Now I know, a lot of us are wondering if we are from another planet. The sooner we learn how to be our Soul, the sooner we'll find out.

When we read different "New Age" books they usually come around to talking about "etheric bodies," energies and those kind of things. Today Mr. Keshe made it clear that the "aether" or ether has never been proven and that it is an idea made up to explain things some scientists couldn't understand. The atheists just threw the ether out all together. But many scientists in the past knew that there was something in the space that was alive and caused creation to happen, but they could never prove it, so they made up the theory of the ether, which says, everything is created out of the ether. Now Mr. Keshe has enlightened us to the Knowledge of Creation. This mysterious power is the M fields of the U, out of which everything is created. And we can go even further and say, that these M fields interact with themselves and others to create plasmas, and these plasmas continue to interact and join more plasmas to make the variety of Creation. And eventually the plasmas merge back into the original M Field or what we call the Creator. After all these years of confusion it is finally made simple that everybody can understand.

Thanks for listening.

## **Quick Index**

(Today's teaching is from the conference in Manchester with the 20 "rebels" who joined Mr. Keshe there for teachings. Later you can ask them questions if you want).

(The teaching today is very simple and goes back to the origin of where we come from and where we will land at. Many things will not show itself, until we are ready to put

them on the table, otherwise people cannot understand and realize what is to be. In the past few days here in Manchester we put out a few small points to the KS and it's very interesting how they have started to trust themselves, and in what their Soul will do if they are ready to take flight. Or are they still attached (to the physical dimension (D) of Earth)).

(The life of Man is a progressive development of the amalgamation of the "Fields of the Creator." We are nothing special and we never become special, because we are totally connected to the U, and we are accidents of the Universe. How our parents met and fell in love with each other was a pure accident, and they created our human body. This is (the truth) about how life takes place and how it will happen).

(The present science and technology (T) of medicine says, that the strongest sperm will manage to break into the egg and life is created. Again, this is another fallacy in man's understanding of the science of creation of the man. Whereas in Plasma Science we know that the egg which will create the man in the womb of the mother, is pre-decided at the very first second of the interaction. The man always believes that it is the strongest (that survives). But in fact, it's the (sperm) that matches (the fields of) the egg and they pull towards each other. This is one of the reasons why many people cannot have children, because they cannot create matching fields).

(We talk about the interaction of the egg and the sperm (only from the point of view of) the matter state, but in fact, it is the creation of the Soul. This is why the two have to be connected and fit together with each other. The present science tells us it is the strongest sperm that can get through the egg, and they show us the films of the sperms fighting to penetrate the egg. This is all a fallacy. We know that when two plasmas match they interact with each other. Now with the successful creation of materials from the fields, we can create a plasma of the magnetic (M) field of any entity, be it plastic, wood, metal, Fe, or Cu. We understand the truth about creation).

(The minute the sperm takes motion, it already fits the strength field of the egg, and it will be attracted to it. The rest of the stories about the "strongest wins" is fallacy. Because the two plasmas have to match to create what we call, a 'twinity, or twin cells. (Twinity means the two matching plasma create an "Infinity Loop" interaction between each other). This is the way it works. If you have 2 or 3 sperms with matching fields, then you get the twins and triplets. Triplets occur when there is one dimension (D) of the physical life (?? condition of the womb), but each sperm have different matter state strengths. If multiple Souls are created, but there is only one Soul of Physicality (STP), then we get what we call, schizophrenic, or "beautiful people.")

(Many of us expect to have a smooth life, because we've been told that, (or it appears to be that way when we look at peoples lives). But it is not that way. This was brought up yesterday here during the teachings. We have to learn how to go through transitions in life, and some are painful. We have to go through the process of learning what it means to be born into a "real" condition of life).

(When we go through the process of the birth the first breath we take on this planet is painful, and this why babies cries when they comes out of the womb. The first breath (is when we convert from liquid to breathing air). Yesterday one of the Knowledge Seekers (KS) went through this when they managed to rapidly depart in the D of the Soul. (When they came back to the body), we had to ask them to breathe. And this is exactly the same way it happens when we take the first breath and are born on this planet).

(Many of you will go through this transition, when after the transmutation you arrive back to be a human body, then you'll have to take that first breath. Many people cry from the pain when they go through the conversion. It's a conversion of matter state, plasma state, and transmutation).

(Gradually, we'll start to see the process of transmutation happening. It's very easy to tell the difference between people who pretend that they've transmuted, and those who actually do it. We don't teach these things, because otherwise people will learn to play along. In a way, it's part of the birth process. We'll go through this every time we come back from a transmutation to life in the physical D. Each time we'll have to take that first breath. When we go to the Moon there is no air to breathe. Our body has to adjust in taking energy from the environment to feed the Soul. It has to bring that dimension into operation).

(In these programs and tests like this past week and those coming up, more and more of this structure will reveal itself. It is for the KS to understand and develop a pattern for it. Then it will grow more. We expect to see the transition between the body of the man and the Soul of the Man (STM) to become a normal process like remembering the ABC's. Gradually KS won't need a tool to help them. Then we'll start opening schools where people can learn how to go through transmutation of the physicality (P) and the rest of it. In this process we'll start seeing how things work and what needs to be adjusted).

(In this conference there are amongst us many different characters and different Souls with different (field) strengths. In the coming time, we'll have to be able to tune the system that it can work for every individual and Soul. There should be no exclusivity, and no one should be left behind. We have to make a system so that everyone will be able to transmute regardless of their condition. This is part of the development of the T. By progressive understanding we'll be able to take the fingerprint of these Souls that have difficulty transmuting and match the fingerprint of the Soul of the system. This will make it possible for everyone to be able to transmute).

(This is why I explained in past teachings that those who are not from this planet will not be able to tune into the system that is from planet Earth. We have to design systems that match their Soul. Otherwise, they would have (already) been able to do it for themselves. We have to find the fingerprint of the Soul of planet Zeus and plug it into the system, so the citizens of planet Zeus can go back home. This is part of the development of the T and what we are working on).

(In the next few months new technologies and systems will emerge which will facilitate different speeds of transmutation and transportation. This all depends on how the KS and the world accepts the evolution in science and understanding the totality of the knowledge of the man).

In the coming weeks KF will release new technologies which make it possible for all of you at the same time, to be fed, receive energies, and to transmute. These systems are under development and are actually getting manufactured and ready to deliver. They will be a full planetary system for transmutation within the body of the man).

The next step will be to develop structures without embodiment. Up to now we've seen MaGravs and other physical systems made by man that carries matter state energy. In the next few months we will see systems that have no physical structure, no physical D. You won't see the MaGrav, but you will see the energies and plasmas of it. Gradually, we go without matter state conditions).

(Gradually we are seeing that KS can create a condition to travel like this. It doesn't matter if they're in the body of the man, or in the body of (a being from) another D in the U. It's the knowledge of the Soul and understanding (how the physicality moves) in conjunction with the field flows of the U).

(In the coming months and years many KS knowingly or unknowingly, will take into Space. In a way, they won't have any wishes or desires. They just have to think about it, and they will achieve it. It will become like having a "second nature." They will understand how to live in both dimensions, and in both reality's. One in the D of matter state, and the other in the D of energy state (or plasma). We have that already in the MaGrav systems we introduced to you. But you only wanted electric current from it. You were happy with a few volts. But you can also use them to reach a point of understanding and how to use the energy of the U).

(In the next few years we'll start promoting and delivering to bring a new dimension and understanding. In so many direct and indirect ways, we are accommodating all of these through one system, what we call, the "mother" system. The whole process of the whole structure will be connected through the same system. Then knowledge will become equal for everyone and everybody will have access to it, like food, medicine, and everything else. This is why we brought you into Linz, so we could gather all this information into one center, or central system. (?? In the system you saw images, buildings, people and things, then sometime in the future you'll see it again and remember that you've already seen these buildings for example. It's because it's in your memory, and you have seen it before. Maybe you'll remember that you've seen this face before).

(We are setting this structure up where every man and creature on this planet will (have access to the knowledge that every creature has gathered) and has learnt and it will all go into that central system. Then all of us creatures on this planet will have access to it. The knowledge will be free and be part of the emotion of the man, at the time, place and the position (of need or demand)).

(The beauty of the new technology puts fear in the governments. But it's for us to understand, that there is no one to govern us a few meters above this planet. Therefore, we are all equal. Sooner or later the governments and those who want to govern will realize they are no different than the others. It goes even further. The man is equal not only with other men, but also the rest of the Universal Community).

(In this room in Manchester we have come to learn that there are two people here who are not from this planet. Their origin and ancestry from outside our planetary system. (To me) it is very clear who they are and how they operate, (but they don't themselves know). They are in the body of the man, (but they are still connected to the place of their birth in the body of the Universal Community). It's very hard for KS to understand this. In the coming time these KS will recognize who they are, what they are, where they are from, and how they can go back home).

(But they'll find out that Earth is a beautiful place. Many of them take the option to stay in the D of P, but they are still connected to where their roots are from. We had this same situation in the Rome conference when we recognized somebody who was not from Earth. There was no prejudice or racism. It doesn't matter who they are or what they are. (This attitude has to become the pattern of the life for KS). It should not matter where we are from, (rather we all have equality in knowledge). We are equal and know that we all come from the same Source. So what are we fighting for?)

(This will bring us a lot of changes and understanding for our world leaders. My work and most of the KF work from today onwards is to bring our world leaders to understand the equality of man. This process will start in the London conference. We've already explained some of the things we are going to do in London. Gradually we'll bring it up to the world leaders. It's the responsibility of KS to make sure your ambassadors are present in the London Meeting. (If we wish it, then we can do. We have the capability and understanding to bring the world leaders to answer to the world in that Meeting, or outside it).

(The beauty of the change is, that it is within us. It's not individually as one person. We don't have gurus, prophets, and we don't have leaders that we have to follow. In this process it's the accommodation of the Souls according to their strength. (This will sound very harsh for a lot of people). Because we have always thought of ourselves as being subordinate, and we have to follow a leader. (?? In the end we find out that the only thing we can be led to is the Creator). Because we are part of, and It is part of us. We create the Creator. And we are the created of the Creation).

(In other words, as we are created from the fields of the Creator, the Creator is in us, and the only thing that can lead us is that part of us which is from the Creator, what we call our Soul).

(In this process, many of you will come to understand, how life on this planet will change. The Man will become independent of this planetary system and independent of

the physicality. (Then you can choose to taste the P, test it and decide to understand it, and then add it to the knowledge of the U)).

(When we learn something then we teach it. In the upcoming time, we'll learn about the U, different cultures in the U, and the structure of the interactions of the fields, and whatever we learn will become part of the Universal Knowledge. It's not anymore just about "me," I patent it, I hold it, and it's mine. This is what will happen when we move into the D of transmutation. Our knowledge through the D of the Soul becomes Universal Knowledge, and everyone will have access to it. Now you understand why we don't believe in patents. As I always say, the Creator has never opened a patent office anywhere in the Creation, why does the man do it?)

(Whatever we do and gather in knowledge in the D of P or the Soul, becomes part of the Totality. (Earlier Mr. Keshe said, when KS came to Linz they brought their knowledge and experiences with them and added it to the system, which others have access to. Therefore, someone later on will see a building for example, that they never saw before, but someone in the system saw it and they have access to that knowledge through the system. Therefore, they remember it like it was their own experience). You can find out who brought that knowledge to the system through the STM and understand what they saw and did. (Then it comes back to the fact, do you want to do something wrong and add that to the system?) Do you want to leave a wrong fingerprint, in the D of Totality of the "Soul of Creation"?)

(This brings us back to the same point, what we call, the "Ethos of Mitra," to Think, Speak, and Act Good. Because (through our behavior) is how we'll create a perfect Soul for the rest to evolve into and live from. If we comprehend this it will bring us to a new dimension and new understanding. Then how do we educate the other 8 billion humans, and the ants, dogs and cats, and the other citizens of the U to be perfect?) (As an example, Mr. Keshe referred to some people in the room who were not listening and talking amongst themselves, disturbing the group. How do we reach them, that they will find the love within themselves not to want to disturb the others)?

(Part of understanding the work of Creation is understanding the motion of the fields. And then we have to understand the separation between matter and energy states, or what we call, "magnetic fields in motion." From now on this is the job of you KS to understand and to comprehend it. Then you'll find out your MaGravs will give you megawatts of electricity, and your Soul will feed you in a very easy way. You don't need to create (anything). Somebody in the crowd is laughing very deep, because they know exactly what I'm talking about). (Is he hinting that they have been able to achieve it?)

(Eventually we'll learn how these things are done. Then will man need the structure of physicality (P) to show his love and affection? Does the man need dimension of P to create energy for his Souls to be fed to survive when traveling the span of the U? The answer to all of these is, "no." But man is too physical. In the D of P he needs to confirm his existence. This is 99% of the problem with humanity, we continuously need to confirm we exist. We have not accepted that if we understand we are part of the structure

of the U, then we'll also understand that we have existed and will continue to exist for eternity. We have been here since the beginning. We are part of the structure of the Creator. And we will go back to the Creator. As I always said, "so what are we fighting for?")

(If we understand the motion of the fields, then we understand they are always being recycled. Even when we talk about the egg and sperm, these are made of fields of plasma, that have been regurgitated from the U over the past billions of years. But we (would like to ignore that) so that we can see ourselves as individuals. We want to think that we are unique. But the fact is, we are recycled fields of the U, we are unique only at this here point of time. And soon our fields will become another body in the U. Maybe in a few million years, or whatever, the fields of our body will become a part of another entity in the U).

(Man's problem is that he doesn't understand this. He takes the physical frame of his physical life and existence on Earth to be the only existence. He does not understand that he is part of a cycle. He is a piece of something bigger than himself. And then he is too feeble and arrogant to think that there could be something more. As I said from the beginning, "I am the beginning and the end." I was born and I will die. (But we can learn to understand that we were born from regurgitated powers and fields of the past, and when we die, the pieces that we are made of will become part of the others in the future)).

(In the past I taught you to think about your Soul, because at that time you never knew it existed. Now we taught you it can become a star or planet. That its fields become the source of life for others. You are recycled fields that have gathered here on Earth. Now you (give your fields) for other children to be born from you through the interaction of your fields with other fields from plasmas of the U that interact with each other).

(When you become a star your fields do not only go to your own planets, or what you create as life. Some of your fields become part of the Universal Energy, (?? and part of those energies becomes of you), and part of your fields become universal Cosmic Rays. But you don't know where your fields, in conjunction with other fields, have fed other lives).

(Now you understand, that the Totality of the Creation and the Creator are all one. There is no difference in what you call, a Cosmic Ray and the ray from another Soul, which has come from recycled fields of the past, and in the future it will become another cycle of life).

(If man understands this point he will not fight with others for one second. Man will come to understand that he is just a progressive development, and is a mixture of the fields of the U. That he is a temporary condition from a mixture of fields in the matter state. It's all very simple, once you understand it. The teachings become difficult when you look for matter state confirmation of existence).

(In the very near future we'll bring in systems where the man will be able to see himself and identify his greed, and his fears. He'll be able to identify the fears he has within himself and what needs to be done for him to overcome them himself).

(When man has no fears everyone becomes equal. A man who has no fear, is a man who is strong enough to understand the Totality. When you're afraid of learning, you create dilemmas for yourself. Then when you are afraid of somebody else, you create another dilemma. But when you understand, your level of understanding becomes equal to the others, and when we are equal, we don't have fears. It takes time to achieve this, but on the other hand it doesn't take that much to achieve it, because all men have the same fears. In most cases the biggest fear of the man is not having enough wealth and death. And when he understands that wealth has no meaning, and death no existence in the D of Creation, then man will become a "man of peace.")

(The extent we can teach this depends on bringing the man to feel it, and to understand his own creation. One day in the future as you become "Passengers of the U" you'll come back to Earth and teach the rest of us, that there is no difference. Some of you will elevate to reach the Totality, or the Center of Creation. At that point you'll understand that the total Souls that you have been created out of will all come together to become one Universal Knowledge to be shared amongst everybody else. (The knowledge will not be exclusive to a few, but will be spread to the Totality. Eventually we'll all come to this point. And eventually we'll all go back to the Creator. We'll go back to where the whole thing started from).

("I am the beginning, and the end." It's about understanding the Totality, the Creation and the created. Once we understand this land and wealth will have no value, as we'll know that we can live anywhere in the U free, and that we are part of Creation and it is part of us. Let's go back and understand how we were created. Did we need anything when we were in the womb of the mother? Did we have a jacket or a coin? Or were we the wealth itself, inside the womb of the mother? In the U we are that baby, that infant in that embryo, which is in the womb of the mother. The U provides everything for a Soul to exist. We do not need to wear the "frock" of the man, nor have the Rolls Royce, jumbo jets, or the "guns and bullets" to confirm we exist and have power).

(We don't see twins or triplets fighting in the womb of the mother. They all accommodate each other as they are Souls. They don't worry about who's wearing what, and which one has what. So why does the man fight? If you understand, the destination of all of Creation comes to one point and place. This is part of the KF teaching. To have world peace, the "world" is actually you, you have to be peaceful with yourself. This is the Totality. We aim at governments and societies, but in fact it's you, that we really want to be peaceful in yourselves. It's you who is the society, and it's you who is the governor of your own Soul. This is the whole aim, and it is not to bring change, but to bring understanding and comprehension for you to take the next step for the change).

(In the coming time, the more we learn, the more we will become detached, the more we'll understand the process of Creation, and the more we will become part of it. Then

we'll find out one point, that we are the "beginning and the end." We are the amalgamation of the Totality and nothing will change. It does not matter what the man does. We'll develop systems and machinery to show you (things you couldn't imagine), but that's just to facilitate for you to understand how simple life has been, and that we make it complicated by wanting to confirm our own existence in P).

(In the teachings of London and then Beijing, we'll open up a new dimension for the world leaders to understand that they have no power, and that they are answerable to the totality of all of us, as the "Soul of this planet." (It's not for them to think they are separate from us, to rule over us). We (as Messengers) stay equal and the same and we teach the same. We pass on the knowledge to man, but it is for him to understand the Totality).

In regards to the routine Mr. Keshe said, we never change the tradition.

### **End of Quick Index Part 1 - 501 KSW**

(We are a scientific organization and we look at data, graphs, and what is physically there. Now I just put a "cat amongst the pigeons," as they say in English. Two of the 19 KS with us here are not originally from this planet. Their ancestors were Passengers of the U that came to Earth. The KS are asking me if one male and the other female. I'm not going to tell).

(We are a mixture of races (from the U), and if we fought up to now over the color of our skin or the culture we are from, how are we going to handle these two people from the U? They have fitted so well into our structure that we don't notice them, they look like us, live like us, and they make love like us, we can't tell the difference).

(Mr. Keshe noticed that the 2 from the U Community (UC) behave totally different, but they have amalgamated into humanity that we don't recognize them. Those from Earth and from the UC will start seeing each other now. This is the third time he has seen people from the UC in the conferences. So now we have physical data of the interaction and one day he might reveal it to KS. Then we can understand that we already are in contact with the UC. If he tells too much then people will go out looking for those from the UC).

(We'll never be able to guess who it is, because they have integrated into the culture of man, taken his mentality, and they live the life of the man. They have managed so well to amalgamate into the culture that nobody recognizes them. It is wonderful to see. He was hoping to get one of them in the conference. He has known the other one for a long time. Then the second one appeared here, which was not a surprise, rather it was a beautiful gift. This is not the first time he has had contact with the members of the UC).

(In the Rome conference he announced that there was somebody from the UC amongst them. Then a foolish lady got up and said, "it's me." The "golden rule" with the UC is to never reveal yourself. The beauty of it is, that once we start traveling and are able to

transmute then we'll know them immediately. He put the group in a locked circle yesterday to see how these two actually operate and it was amazing. Everybody was looking at them, (wondering if they flew or not). But these two are like a rock they didn't reveal who they were. Mr. Keshe could see them because they create a different field dimension).

(We didn't want to disturb them so we didn't take ?? any data on them. The people in the room were all wondering who it is. Some were thinking "am I the one?" You will only know when you go through the D of transmutation, or when you are getting ready to go into the D of the energy. When you do this, you'll understand that your energy is already locked to a destination, then you can decide ??).

(Many of them are living mixed amongst the men, but they still carry the fingerprint (of where they are from). Their children will also carry that fingerprint with them. In a way, it's like a mixed race marriage. But now we have "mixed universal marriages." Because some of (these races) have managed to marry into the man's race. Those who cannot or have not (yet managed to do it) have found a different dimension of life (to exist here). We've seen them come to the teachings in the past where I referred to them, and we'll see more of them in the future. By the way, they are not "aliens." They feel like we feel, bleed like us, and love like us. They have managed to fit perfectly into our structure).

Q: When you say, "they are from another dimension of life", what you mean by dimension of life?

K- (In the KF we have explained dimension (as being the planet you are from). We are from the D of Earth, because we were created out of the field interactions of the Soul of this planet).

(When we wanted to find out if certain minerals or whatever were under the ground we didn't have to drill a hole and test what's in the ground. All we had to do was create the right field atmosphere, and we could tell what was in the ground from outside the ground. This will become a new evolution in the science of mining and other things. (You cannot have these materials in the ground if they don't have a connection with the Soul of the planet. (They have to carry the essence of what exists inside the planet, the field strength of the planet)).

(This planet only contains the elements that it has the field strength for. So in the U there are many more elements than what shows up on Earth's Periodic Table. For example, if there are around 200 elements in the Table, then perhaps in the U there are 200,000 elements. This planet only has the field strength to create 200 so the rest are not part of us. Whatever elements the Soul of this planet contains are in the body of the man. It doesn't matter what material it is, from Uranium & Plutonium to Hydrogen. It will be part of our physicality, and there will exist a function for it. The STM has learned a way to use (every element) for its advantage, and to extend its life).

(In the future time, I'll show you how the body has learned to use radiation from the cosmos to extend the life of the man on this planet. Without it we would die. It's like a disinfectant. We don't understand it, because we never knew it existed. Many of the elements we have in our body are there to extend our life. They act like a disinfectant and they put out germs or certain fields. If we didn't find a way to neutralize these fields they would become a danger to our life. Whatever is in the Soul of this planet is also in the body of the man. We have to understand that all these things are part of us).

(Gradually, we'll learn how to extend our Soul. Then if this gentleman extends his Soul, and that one too, and everyone else can extend their Soul, then we'll be able to recognize each other at the Soul level. This is how we recognize each other in Space and who's from where. The two people from the UC that are here have beautiful Souls and they shine totally differently).

(The Souls from other places, even though they have the cover of the human race on it, they have adapted to our environment. It's like they have a "GMO" of the Soul. If you know how to recognize it, then you'll see it in a different way. They have become part of us, and we all feel safe. Their ancestors who originally came here must have also felt safe. They became like a man so he would not eat them, nor kill them).

(We know that very few of these races who came here brought knowledge with them, but they could not reveal the knowledge because man was not ready for it. They left inscriptions on rocks, and writings in books, and from these we can tell who these people are. Definitely Tesla was one of them. All this is a process of understanding. It's not anymore us only from this planet. Now it's us from the U. If visitors have managed to live amongst humans peacefully on this planet, then we can live peacefully together in the U also. These people will be the key for taking man in a peaceful way into Space. So, when we say (dimension) it means its origin and that it is connected to the Soul of this planet. It has a fingerprint).

(A KS said that if our Soul goes outside the planet, it will be colored blue because it's from Earth. But other people in the U have different colors. He confirmed that is right, but it is more or less understanding the field strength).

Q: (If we teach the whole humanity how to transmute, it means everybody can go wherever they want. How do I make sure that my neighbor doesn't come into my bed and look at me naked while I'm sleeping?)

K- This is the only thing (this KS) thinks about, is who gets into her bed? But, the understanding is, nobody can get into anybody else's bed (without them allowing it).

(We have to understand how the plasma works. Two plasmas can only interact if both accept the interaction. It's like if you put 3 magnets together. The first two will connect the M to G, and the third one ends upside down, so it does not fit. It's as simple as ABC. Secondly, you have to have the (right field) strength to interact. You cannot bring a

copper next to a steel and put them together. (There is a gap between the plasmas). So don't worry, nobody can get into bed with you, you already have a husband).

(A KS asks permission to explain his experience in Manchester and Mr. Keshe agrees. He is from Sydney, Australia and has been listening to the public teachings for the past 6 years. The reason he came to the conference is because he had a dream where he went to an unknown planet. The dream was special because there was a physicality, or a density to it. It was like he was truly there, without a doubt. Then he realized his Soul was telling him, to please take him to the conference. He had some experiences with the Head Unit and then he got a graph of his Soul and STP. During the second day he saw a being silhouetted behind other KS. He was very grateful to be there).

Q: (When will China open up and publicly announce its collaboration with KF?) We are waiting for them to actually come out in the public domain and say there is a new science and a new technology on the planet. Is this in the cards?

K- (You can see how American he is, because he wants it to be confirmed on CNN. A lot of things happen (in the world) without CNN knowing. They cannot confirm (a lot of things). This is up to the Chinese to announce and not us. We have the freedom to review, and explain, but remember the Chinese are very reserved. They will do it their way).

Q: But the Americans are waiting to start working with the Chinese.

K- (It's impossible for the Americans to work with the Chinese at the moment. Because, on the economical side, Americans think they have won a big battle in bringing a lot of work back to the US. A lot of factories have been closed in China. And they are giving incentives with taxation to go back to the US. But in fact, this will turn out to be the biggest mistake they ever made. You'll come to understand the reason why very soon. Because, (more or less) they do not export what they make out of the US. In the next 5 to 10 years it will be a bigger financial disaster for the Americans. You'll come to understand very soon).

(The world situation has changed. Now it's not what you manufacture or produce anymore. From now on the knowledge of science will take over and it will be how much you know that counts. Before America could do what we called, "brain drain" from other countries by attracting the smartest people to America through money and the "American dream." You'll become rich if you come to America. KF in working with China, will make it the center of space technology and knowledge. The game has changed).

(It took time to explain to the Chinese that you cannot just manufacture, you have to bring in talent to be part of the development. In the next few months KF will literally go out and bring in experts. People we have been watching for the past 10 to 20 years. We'll bring international scientists into China for space development).

(If you want to be with the next generation of space science development then come to China. We'll reverse the "brain drain" and take back what the American took to become

superior in creating war. Whoever joins us in China will be developing the new space technology for world peace. We leave it to the scientists to decide where they want to go. Do you want to go to the United States and create more weapon technology to kill? Or would you like to move to the peaceful land of China and develop space technology for peace).

(We are advisors, and we advise thoroughly, we just don't go there, we have a new technology. We look at all aspects of it. My job has been not only to show the technology, but show what the technology can bring to China, and Southeast Asia like Vietnam and the rest. The KF will drive heavily to absorb international scientists into our research and development process in China).

(We make a very clear line, but we don't fight. If you're a scientist and you have a technology or are using ours, China will give you room to join with us and grow, and use it for peaceful application. We drew a very clear line about this peaceful development of the T with the Chinese government and the leadership understood, that this is the way we're going. We are not bringing more scientists into China to make better weapons. Absolutely not. We are bringing more scientists to create more peace).

(This is a game changer. When I have spoken with and eaten with the high ranking Chinese generals and government officials, none of them ever talk about the superiority of China. Instead they say, "how we can bring peace and live without (war)?" The biggest problem with Taiwan is that the Americans are using it to create a new war, and to say that they are superior. China wants to bring a balance to the area, so that the Taiwanese will become part of China in a peaceful way, without the interference from America).

(A lot of you (here today) come from America, and you carry part of that British blood, and the English mentality in foreign policy, which is to "divide and rule." And this has become ingrained in the constitution of United States. Whereas as the policy in China is in Taoism, and that is to bring all together to be one. The story that best explains this is about a German Minister who went to the restaurant with Chinese officials. When his food came he took it for himself and right away started eating. Whereas in China it is the custom to share each dish with everybody else. So they put it in the middle of the table for all to share. It's the opposite to the western mentality, who are not used to sharing).

(When Mr. Keshe went to China he did not focus on sightseeing. Instead he observed how the people act and he connected to the Soul of the nation. Western people don't understand this. If you understand a culture, then you also understand your own Soul and how it interacts with others. The physical interactions are a reflection of the Soul, and it explains a lot to you).

Q: Why do the Souls come to Earth from another planet, is it to learn, or to resolve a karmic lesson? Are some of them aware of who they are?

K- (Most of them are homeless and are refugees. Maybe they lost their planet, or maybe when they came to Earth they discovered it was too good and they decided to stay. In the

future when we can put our prejudices down we'll let them tell us their story and how it is living on Earth).

(The conference is being held in the city of Manchester, which had been the center of the slave trade for the whole British Empire. Africans were taken from George Island in Gambia to America as slaves to grow the cotton, which was then supplied to the mills in England. Slaves were used to build the canals of the city. Children between 5 and 10 years old worked in the mills and were given just enough food a day to run the mills. The slavery carried on and they used the same slaves to push the Finnish cotton back into British empire. The slavery network was set around running this city. Manchester was one of the most important slave centers of the world. We don't know about it because most of the slaves were sent to America to grow the cotton, which was used to run the factories in Manchester. Without the cotton from America the factories would have closed. The mills are less than 200 yards from where the conference is being held).

(In a fortunate or unfortunate way, we had the usual "last supper" in the basement one of these old mills. Sometimes you hear the noise of (the past) and feel the Souls (still hanging around). (It's amazing of how indicative it is of what went on here). Every time I go to Nuremberg in Germany I feel the marching of German soldiers and I don't like to go there. And I get that same feeling in parts of Belgium. I can feel the Soul of the people and the pain. I feel the same in Linz, where I actually feel the Soul and emotion of the people of the city. We are part of it and it affects us and brings us back (to what happened in these places). We are still "aliens" to ourselves, (to the different parts of ourselves). If you go to these places as a tourist, you don't usually feel it. It means you're still in the matter of state of (existence). If you are able to feel it, then you move with the nation). The problem with me is I've traveled to too many places around the world.

Q: Do the mixed race Souls work on the same principle as genetics, where it's 50/50, equally from the mother and the father?

K- Not really. It depends. (The Soul takes the best. That's the beauty with the Souls, they take the best. We don't find deformed Souls with one leg or arm missing. They take the best. (They keep everything together, because they don't know which part they might need later, and what's connected to what).

Q: What is aether (= ether) energy in plasma technology? And is the etheric energy body the field of the STP in the physical body?

K- Can you read what Wikipedia says.

R: ... There are a number of different definitions for ether, but according to ancient and medieval science, ether is also known as the 5th element or quintessence. It's the material that fills the region of the universe, beyond the terrestrial sphere. The concept of ether was used in several theories, to explain several natural phenomena, such as the propagation of light and gravity.

K- (The question to ask is, does such a thing as "ether" exist? Or did they make up something for the rest to accept and believe in? Some of the scientific papers say ether is what we are made of, or what is part of our structure of life. But nobody can tell us what it is. It's a made up definition that does not exist. I call ether the fields of the U. If you want you can call it the human body. It's basically a fabrication. When they say ether is the environment or material, then it's easier to call it the magnetic fields of the U. So, it's all the same. It does not exist, or else we can call it, a cat or a dog. It's a collection of the fields. Nobody has ever actually confirmed its existence. They had to call it something so people would stop asking questions about it). And secondly, whatever you call it, it is part of us, it's part of the magnetic fields of the U.

Q: What were you feeling in Linz and Nuremberg when you said you were feeling this Soul. Was it the STP or STM?

K- (It's usually the STM, and the emotion of the Soul. It's not the physicality where you can hear or see things. You feel the emotion of the environment. I felt the same thing when I went to Vatican. I felt the emotion and how (the situation really is). It's usually the feeling of those who lost life, and (their Souls are ) still connected in a dimension to the place. You can feel the injustice and that the Souls are not at peace. There is a specific place in Belgium, that whenever I go there I hear marching soldiers. It doesn't happen anywhere else but in this place in Belgium. For a long time I was trying to understand why, but I haven't yet found out why. One day I'll find out and then I'll let you know).

Q: How can we bring peace to these Souls?

K- (You can only make the peace available to them. You don't bring them peace. It is for them to take if they want it. We are not here to force anybody to take the peace. We can only make it available for them to take if they want).

Q: How can I use the 8 essential amino acids that I take daily, as a Gans? Can I dissolve them in Gans water of the Cup of Life 1 or 2, which would be more beneficial to our health?

(For more precise instructions see KF website).

K- (You only have to dissolve the amino acid (tablets) in a Gans once, and not everyday, and then just use the Gans water. (The Gans will settle to the bottom). You just can use a few drops of the water not a whole cup full. It will do the same. The field strength is propagated in the water. Usually the amino acids connect to the CO<sub>2</sub>, Zn, and CuO. Try not to use the CuO, it is used in specific ways. (Remember we don't drink the Gans water of Cup 2, only spray on the red muscle tissues).

(You can use only 1 or 2 drops on the tongue of the Gans water you make).

Q: Are they first generation travelers of the universe, (the ones here on Earth)? And do they realize who they are?

K- (It's a continuous flow of refugees, as I call it. They always come and go. It's like the Iranian refugees we had in the 1980s and others as well. They're still coming in different names. It's the same with the Passengers of the U. Some of them are travelers of the U and not refugees).

(In the coming time when we are open to them and it is safe for them to come out, then they'll tell us their stories of their home. Maybe then we will travel to their planet after hearing about it from them. It's the nature of the man and the Soul to travel, to be in dimension and motion. At the moment man only travels on the village of the Earth to see new things. Soon he will travel the U and learn new things).

Q: Is service to the Creation one way to create the Inertia within, to elevate the Soul? And could you become like a second Sun, to be a feeder to others?"

K- In a way, yes. It's easily done, if you know the way. (It's the difference between a missionary and charity worker. A missionary goes to steal from the others. They go somewhere to change the people into something else, the way they want them to be. But a "charity worker," they go to help others out of a sense of love and obligation to change somebody's life. And this is how the Soul works. And that's why actually we call ourselves a foundation).

(This brings up something from some years ago when I wrote to an international organization that was claiming to be for peace. I said, if you want to claim peace, then the colors of your organization should have blue in it for the planet Earth, which is blue. They have a stupid structure in their system. Also the letters in the written part should be gold. The blue represents the man from Earth, and the gold is the greed of the man. When you can bring the two together to work in perfection, then you'll become a man of peace. The flag carried by the organization should be correct). (We don't carry a flag on our Souls, but we carry the color of our greed. Blue is the color of the STM).

(To be a perfect man you have to live by the Ethos of Mitra, because then what you give is not tainted (by the killing of the man). One day man will understand these teachings.

We can't say anything about the etheric body since nobody has proven its existence. It's just a definition, so how can we place it.

Before starting the August flight sessions we wanted to complete the Manchester conference. Now we have a fingerprint of the Soul from the conference. This gives us a more clear understanding of the fingerprint. Because we can analyze the fingerprints exactly what it needs.

Please listen to the first 5 or 10 minutes of the teaching of today. If you understand it, I gave you the key to become travelers of the space. But again, it needs the wisdom to understand it.

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:10).

K- Yes, thank you very much. Good morning, good day to you as usual. wherever and whenever you listen to this series of Knowledge Seekers from the Keshe Foundation, the Spaceship Institute, we welcome you back. Today is a rather different way of teaching. Today we are in Manchester as part of the cycle of the teaching and what we call, the starting of the Spaceship Institute programs for Space. And today we have 19, 20 rebels with us, I call them. They're all sitting around the table, they wanted to be part of the teaching. So, you might hear a lot of coughing and sneezing and the rest, it's just comes from the background noise. Later on, in the second part of the teaching as usual, they might would like to come in, and to, if you want to ask them any questions, or to ask any question from us.

Today's teaching is very simple, it goes back to the origin of what we said, how we come, where we come from and where we land. (:12). Many things, especially till we don't put it on the table, does not show itself. And people cannot understand and realize what is to be. In the teaching of this past few days, here in Manchester, a few small points has risen and it's very interesting for people to start trusting in themselves, trusting in what their Soul will do if they are ready to go, or they are still attached.

And, in so many ways, the life of the Man is a progressive development of the amalgamation of the Fields of the Creator. We are nothing special and we never become special, because we are totally connection, accidents of the Universe. Even when our parents meet each other and fall in love and create the human body, it's just a pure accident. How, what, it will happen, the way it happens. How life takes place.

The present science and technology of the medicine tells us, the strongest sperm will manage to break into the egg and the life is created. This is again another fallacy in the science of the man and the creation of the man. In fact, we know from the Plasma Technology, the seed which is going to be the creator of the man, in the womb of the mother, is already pre-decided from the first second of the interaction. It's not the strongest, because this is the way Man always look at, the strongest. In fact, the one which matches the egg and the sperm, they pull together. This is one of the reasons why many people cannot have children, because they cannot create the matching fields. (:14).

We talk about the matter-state, but in fact, the interaction of the egg and the sperm is the creation of the Soul. So the two have to fit too, the two have to be connected with. In the present science they tell us the strongest egg can get and we see all the movies fighting to

get there to penetrate the egg. Such a thing is a fallacy. When you know the two plasmas, when they match, now we have managed to create plasma of the magnetic (M) field of any entity, be it plastic, be it wood, with metal, with iron or copper. So now we understand the truth about the creation.

In a way, the minute the sperm takes motion, is already, if it fits the strength field of the egg, it'll be attracted to it. And the rest of it is fallacy. Because it cannot be, the two have to match to create the what we call the 'twinity', the twin cells. And this is the way it works. And if you have two or three of them matching, then you have the twins and triplets. If you have them creating in one dimension (D) of the physical life, dimensions of different matter-state of the strengths, then you'll have triplets. If you manage to create different Souls, but one Soul of Physicality (STP), we call it the schizophrenic, we call it "beautiful people."

Now we understand, through the process of the creation. This is how we go through, this is what we see. It's interesting that a lot of people, this has come up in the teaching of process of the yesterday especially, and I was explaining this morning before the teaching. (:16). We are told, we are seen, we are, we expect the life to be a smooth life. It's not that way. We have to go through transition. We have to go through the process of understanding what it means to be born in the real condition.

As I was explaining earlier on to the Knowledge Seekers (KS) here, when you go through the birth, when you come to take the first breath in this, on this planet, we go through a pain, and that pain is what makes a child to cry. The first breath, to convert, to divert, to change. Yesterday we had this with one of the Knowledge Seekers, who managed very rapidly to depart in the dimension of the Soul, and then we had to ask to breathe, exactly the same position of taking the first breath when you are born.

Many of you, when you go through this transition, when you arrive back to be a human body, you come back from transmutation, you have to take that first breath. And most of the time, we see the people who go through this process, they cry, because it's a conversion of the first pain. It's a conversion of matter state and the plasma state and transmutation.

So, in a way, we start seeing, gradually, the process of the transmutation. People who pretend they've been, and the people who actually go, it's very simple to see. We don't teach these things, because then people learn to, what we call, "play it." But in a way, it's part of the process of birth. Every time we come back in a transmutation to the dimension of the life of the physical dimension, we go through it. We have to take the first breath. As I explained in the teaching yesterday, when you go to the Moon, there is no air to breathe. You have to find. (:18). Your body has to adjust in a way, to take energy from the environment to feed the Soul, to bring that dimension into operation.

In these tests, in these programs, like past week and past few days, and coming up, more and more of this structure will reveal itself. It is for the Knowledge Seekers to understand, and for Knowledge Seekers to set what we call, the pattern for it. And then

we'll see more. We expect, in a way, to see the transition between the body of the man and the Soul of the Man (STM). It becomes as normal as ABC. In the teaching of past days, we have explained and Knowledge Seekers gradually come to understand, they don't need a tool. We just here, as I said, we start opening schools where people learn how to go through transmutation to physicality (P) and the rest of it.

In that process we start seeing how things work, how we need to adjust. Amongst us in the meetings are many different characters, there are many different Souls, there are many different strengths. In the coming time, we have to be able to tune a system that it meets the demand of every individual, every Soul. That there is no exclusivity, that certain people are left behind, and they cannot be seen, or they cannot be operated with, or be able to transmute. This is a development of the technology (T). And in the upcoming time, gradually, and by progressive understanding, we take the fingerprint of these Souls. And we can match the fingerprint of the Soul with what we call, the system. That it makes it possible for everyone to be able to transmute.

This is the reason why in the past, in the past teachings I explained, those are not, who are not from this planet, (:20). they will not tune into the system of the planetary system, as we have it, confirmation of the Earth. We have to design systems which match their Soul. Otherwise they would have been able to do it themselves. In a way, if you are from planet Zeus, we have to find the fingerprint of the Soul of the system of the planet Zeus, and make it, arrange it, develop it, and deliver it, that the citizens of planet Zeus can go back home. This is part of the development of the technology, this is what we expect to see and what we are working on.

In a way, we can do the same, in the next few weeks and months, new technologies will emerge, new systems will emerge, which facilitate different speed of transmutation, different speeds of transportation. These all depends on actual how the Knowledge Seekers and the world accepts, the evolution in science. Evolution in understanding the totality of the knowledge of the man.

In the next few days, and in the coming weeks, Keshe Foundation (KF) will release new technologies, which makes it possible for all of you, at the same time, to be fed, at the same time, to receive energy, at the same time, to transmute. These systems are under development, these systems are getting actually manufactured to deliver, a full planetary system, transmutation, within the body of the man.

The next step after this development is to create structures without embodiment. What it means? Up to now you've seen MaGravs, you've seen systems which is made by man and carries matter state energy. In the next few months you will see systems which have no structure. It means it has no dimension of physicality. You don't see the MaGrav but you see the energies of it, the plasma of it. (:22). And gradually, we do without matter state conditions.

We'll create the systems in a way, now the Knowledge Seekers gradually can see, they can travel themselves how to create this situation. And the point of need does not matter

if they're in the body of the man, or in the body of another direction and dimensions in the universe (U). It's the knowledge of the Soul. It's the knowledge of understanding the physicality in conjunction with what we call, dimension of the field flow of the universe.

In the coming time, in the coming months and years, many of you Knowledge Seekers, knowingly or unknowingly, will take into Space. In a way, you don't have any wishes, you don't have any desire. You think about it and you achieve it. It becomes a second nature, in understanding that you can live in both dimensions, and both of these reality's. One in the dimension of matter state, and one in the dimension of energy state. And in a way, the MaGrav systems we introduce, is that system. You want current from it, you're happy with a few volts. Or you can use them to reach to the point of the understanding, of the use of the energy of the universe.

In so many ways, in the next coming few months and years, the evolution of the science and technology with the what we see now, we start promoting and delivering, to bring a new dimension, a new understanding. In so many direct and indirect ways, we are accommodating these through one system, what we call, the "mother" system, maybe you call it, what the whole process of the structure, that you all can be connected through the same. (:24). Knowledge will become equal as everybody will have access to it, food, medicine and everything else. This is why we brought you in to Linz, to update, upgrade and gather this information into one center. You walk on the street, you see pictures, you see buildings, you see people. And then, years later, months later, or sometime in the future, you come back and say, "I've seen this building." Because it's in your memory, you've seen it. You remember the face, "I've seen this face before."

Now, this is the structure we're setting up. Everything every man learns, everything every creature learns, sees, goes into that central system, that we all have access to it. And the knowledge becomes free, knowledge become part of the emotion of the man, at the time, and the place and the position.

The beauty of the new technology, puts fear on governments. But we have to understand, there is no one to govern us a few meters above this planet. So we were equal, and sooner or later the governments and those who want to govern, they realize they are no different than the others. And this brings us back to the point of what we call, equality, equality of the man with the rest of the Universal Community.

In the process of past few days amongst the people in this room, we've seen two people from not this planet. They are not from here. They have an origin, and ancestry from outside this system. And it's very clear who they are and how they operate, without them knowing. In the body of the man, they are man. In the body of the Universal Community, they are still connected to the point of birth. It's very hard for Knowledge Seekers to realize this. But in the upcoming time, Knowledge Seekers who are in this room, they'll recognize who they are, (:26). what they are, and where, and how they can go back home.

But you'll find out Earth is a beautiful place. Many of them opt (take option) to stay in the dimension of physicality, but know the roots, know where they come from. We had this situation in the Rome conference, as I explained before. And this is the way we start recognizing. As we see, there is no prejudices. There is no racism. Doesn't matter who they are and what they are. And this has to become the pattern of their life from the Knowledge Seekers. Does not matter where you go. It does not matter where you sit, does not matter who and where you are from, or where they are from, it's equality in knowledge. Equality knowing we all have the same, and knowing we all come from the same source. What are we fighting for?

This brings a lot of changes, this brings a lot of understanding for the world leaders. My work, and most of the Keshe Foundation work, from today on, from this regard, is to bring our world leaders to understand the equality of the man. And this process will start in London conference. As I said, some of the things we're going to do in London, it's already been explained to the Knowledge Seekers. But gradually we bring it up to the world leaders. It's the responsibility of the Knowledge Seekers to make sure your ambassadors are present in London conference. Or, if we wish we can, we have the capability and understanding to bring the world leaders to answer to the world in a conference or outside.

The beauty of the change is, that is within us. It's not individually one person. We don't have gurus, prophets, and we don't have those who lead us and we have to follow. It's the dimension and accommodation of the Soul according to their strength. And this will be a very harsh thing for a lot of people. (:28). We always been subordinate, we always followed to have a leader. Where we find out the only person, the only things we ever lead to, is the dimensional direction of the, what we call, the Creator. We are part of, and it's part of us, we create the Creator. And we are the created of the Creation.

In this process, many of you will come to understand, how the life on this planet will go. How life on this planet will change. How man will become independent of this planetary system. How man become independent of physicality. Unless you choose to taste it, unless you choose to test it. Unless you decide to understand it, and then add to the knowledge of the universe.

Today we learn something and we teach it. In the upcoming time, we'll learn about the universe, the culture, the structure of interaction of the fields. And whatever we learn, will become part of the universal knowledge. It is not anymore me, I patent it, I hold it, and it's mine. In moving into the dimension of transmutation, this is what will happen. Your knowledge, through the dimension of the Soul, becomes the universal knowledge. And everyone has access to it. Now you understand why we don't believe in patents. Because as I always say, the Creator never opened a patent office. How does the man do?

Now you understand, whatever you do, whatever you gather in the knowledge, in the dimension of physicality or the Soul, now you understand, become part of the Totality. And then, as I said, you remember the building. They know who brought that knowledge in. You can go to the STM who added the knowledge, to understand what he's seen, what

he's done. (:30). And then it goes back, do you want to do something wrong? Do you want to leave a wrong fingerprint, in the dimension of Totality of the Soul of the Creation?

Then this brings back us to the same point, as what we call the "Ethos of Mitra." We do good, we act good and we think good. Because, this is how we'll create a perfect Soul for the rest to ?? evolve, to live with it. Understanding this, brings us to a new dimension, new understanding. How do we educate the other 8 billion, the ants, the dogs, the cats, and the other citizens of the universe, to be perfect? As you can hear, we have some people making a lot of noises in the background, but we get used to it, it's part of being there. They can't stop talking. It's very interesting when you talk. "We can hear you, you are not very far from me."

Understanding this, is part of the teaching. We do not go in the depth teaching today. Maybe at the beginning you understood, I opened up the secret of the Creation. And then, if you understand it, you can open up the rest.

Part of understanding the work of the Creation, is understanding the motion of the fields. And then, understanding the separation between matter state and the energy. What we call, "magnetic fields in motion." And this is the job of you Knowledge Seekers from now on, to understand this, and to comprehend it. And then you find out your MaGravs will give you megawatts. And your Soul will feed you in a very easy way. You do not need to create. I have somebody here laughing very deep, knowing exactly what I'm talking about. (:32).

In this process, we see how things are done, how things are developed. And one of the things that you come to understand, is does the man need the structure of physicality to show his love, to show his affection? Does the man need dimension of physicality to create energy for his, what we call, Souls be fed to survive the span of the universe? The answer to all of it is, "no." But man is too physical, and in that dimension of physicality, man needs to confirm his existence. And this is 99% of the problem with the humanity, continuously confirming we exist. We have not accepted that we have existed and we exist for eternity, if we understand that we are part of the structure. We've been here from the beginning. We are part of the structure of the Creator. And we go back to Creator. As I always said, "what are we fighting for?"

In so many ways, if you understand the motion of the fields, even when we talk about the egg and the sperm, that they are fields of plasma, even those that are regurgitated fields of the universe in past billions of years. But we still would like to see we are individuals. We still would like to think we are unique. But in a way, in fact, we are regurgitated fields of the universe, uniquely at this point of time here. And soon, we'll become another regurgitated body in a few million years, or whatever, of the body of another part of (another) entity in the universe.

What has been the problem with the man is that man has not understood. (:34). He has taken a frame of the physical life, existence on the Earth has to be the only existence

where he does not understand he is part of a cycle. He is pieces, a part of, what it is bigger than him. And then he is too, what we call, feeble and arrogant to think that's it. As I said from the beginning, this is my beginning, this is my end. I was born and I die. But does not understand I was born from the regurgitated powers and fields of the past. And then, when I die, I become another part in pieces of the others in the future.

In the teaching of the past, I always explained, what do you think about your Soul, where you never knew. Now it becomes a star. It becomes a planet. It becomes the source of life. So you understand. You are regurgitated fields, gathered here. And now you split to regurgitate for other children to be born of you in the interaction with the fields of other fields of the plasma of the universe with each other.

In a way, when you become a star, your field does not go only to your own planet, or what you create as life. Part of it is become part of the universal energy, part of it becomes you, part of the universal Cosmic Rays. And you do not know where this field, in conjunction with other fields, feeds another life. Now you understand, the Totality of the Creation and the Creator is all one. There's no difference. What you call, a Cosmic Ray, is the ray from another Soul, which has radiated from the existence of the regurgitated fields of the past, and in the future it'll become another cycle.

If man understands this point, man will not fight for one second. Man become to understand, he is just a progressive development, a mixture of the fields of the universe, (:36). and is a temporary condition, to be in the matter state, mixture of matter state, to be itself. The teaching is very simple, once you understand it. The teaching become very difficult, where you always look for matter state confirmation of existence.

In the coming time, in a very near future, man will see himself, he can identify his greed, he can identify his fears within itself, and gradually we bring systems to show that what is fear, what you're afraid of and what it needs to be done by yourself for your understanding to overcome these fears.

In a way, you become equal. man who has no fear, is a man who's strong enough to understand the totality. When you're afraid of learning, you create dilemmas. When you're afraid of somebody else, you create another dilemmas. When you understand, your level of understanding is equal to the others, and what we have is equal to the others, there are no fears. It takes time to achieve this, but on the other hand it doesn't take that much to do, because all men have the same fear and nothing else. And the biggest fear of the man in most of the cases is wealth and death. And as you understand wealth has no meaning, and death has no existence in the dimension of Creation, man will become man of peace.

To what extent we can teach this, to what extent we can bring this for man to feel, it depends on man understanding of his own creation. One day, in the upcoming time, some of you and many of you, as you become the Passengers of Universe, you come, you come back and then you teach the rest of us, (:38). that there is no difference. Some of you will elevate to the position to reach the Totality, the Center to what we call position of the

Creation, the center of Creation. And then at that point you'll understand the total Souls that you have ever created or been created out of will come together to become one universal knowledge to be shared amongst the others. This point is not exclusivity, but it's the totality at one point or another we all go back to this point. We all go back to the Creator. We go back to where is the whole thing started from.

In a way, I'm the beginning, I'm the end. It's understanding of Totality, it's understanding of the Creation and it's understanding of the created. And once we understand this, land, wealth, and no life on anywhere in the Universe will have any value as we know we are part of it and it's part of us. Always go back, understand how you are created and did you need anything in the womb of the mother? Did you have a jacket, or did you have a coin? Or were you wealth in the womb of the mother? And understand in the universe you're that baby in the universe, you're that infant in that embryo which is in the womb of the mother. Universe provides everything for a Soul to exist. You do not need to wear the frock of the man, the Rolls Royce car of the man, and the jumbo jets, and the guns and bullets to confirm you exist, or you have the power.

We don't see twins or triplets in the womb of the mother fighting. They all accommodate as they are Souls. They don't worry about who's wearing what, and which one has what. (:40). So why is the man fighting for? If you understand, the destination of the creation is all one point and one place. And this is what is part of the Keshe Foundation teaching. World peace is actually the world which is you, and you have to be peaceful with yourself. This is the totality. We aim governments, we aim societies, but in fact it's you. It's you who's the society, and it's you which is a governor of your own Soul. This is the whole aim, is not to bring, is not to change, is to understand, to comprehend, and take the next step for a change.

In the coming time, the more we learn, the more we become detached, The more we understand the process of the Creation, the more we become part of. And then we find out one point. We are the beginning and we are the end. We are amalgamation of the totality and nothing will change. Does not matter what the man does. In the process, the systems we develop, the machinery we show you, it's just to facilitate for you to understand how simple life has been, and how complicated we made it to confirm our own existence.

In the teaching of the, what we call, London and then Beijing, we open a new dimension for the world leaders to understand they have no power. For the world leaders to understand they're answerable to Totality of us, as the Soul of this planet and not for them to be as part of one. We don't exist and we don't enter, we stay equal the same and we teach the same. We pass the knowledge and it's for the Man to understand the Totality.

I bring the teaching of today to early close, as we have the Knowledge Seekers with us today. And then you can ask any question you like. If that's okay with you Rick, and we go back to answering questions.

R: Sure of course, you want to take a break first then and...

K- Yes, we never change the tradition.

<< **BREAK** >> 501 KSW Aug 31, 2023 (:48).

K- I just put a "cat amongst the pigeons," as we call it in English. As we are a scientific structure, and we see data, we look at the graphs, we look at actually what is physically there. And I explained to our Knowledge Seekers here, is 19 of them today. And that two of them are not from the origin of this planet. They are passengers through our ancestors or whatever. And they're asking me, "is it one male and one female?" I'm not going to tell you that. It'll come even in everything, even like those across the roads in the back. You've seen a lot of them on Saturday.

In so many ways, we are a mixture of races. And if we up to now fought for the color of the skin, or the culture, now we have to understand how we are going to handle these twos in here. They have well fitted into our structure, they look like us, they live like us, they make love like us, and then we do not know. (You have to leave that door open. Because, there's a couple of people coming back in).

So, are we going to see each other? And the interesting thing is, in the process of the week, it's amazing how these two, now we know who they are, behave totally different. It's like, you heard all the story, (:50). the Indian guy calls home mom, after being a week in London. He says, "nobody knows I'm from India, I speak such a good English." So, even though they pretend, or they don't pretend, they're actually amalgamated across us. Now I see them for the first time in these meetings, or second time, or the third time, it's very interesting, now we have a data. We have physical data and I'll mark it one day for Knowledge Seekers to understand, that we have already passengers of the universe in this room. If you put out, then it becomes "headhunting" (looking for corporate executives).

So you got to understand and the best thing is, guess who is it? You'll never find out. They have gathered the culture of man, mentality of the man, life of the man, and they actually, when they call home, says, "mom, they don't know me at all. I've managed to well amalgamate." This is the story of man. And it was wonderful. I was hoping that I get one of you here, because I know the other one for a long time. The second one was not a surprise, but it was a beautiful gift. And we see it, we understand it, and this is not the first time I've done this.

If you, as I explained in the, these past few days here, if you were in the Rome conference, I explained the same. There is somebody from outside, from us, and a foolish lady got up and says, "it's me." The rule is, the "golden rule" is, you never reveal yourself. (:52). And the beauty of it is, once you start traveling in what we call, transmutation, you know them immediately. I put the team here in a more or less locked circle yesterday, to see how these two actually operate. And it was amazing. Everybody was looking at them, if they flew, or what they not flew. These two are rock. They will not reveal who they are. But you can see them. They create a different field dimension.

And in a way, for not to disturb, we did not take anything, data, back on it. It's interesting, now these people in this room thinking, who is it? Am I the one? You only know when you go through the dimension of transmutation. You only know when you go to the dimension of getting ready to go to the dimension of the energy. And then you understand your energy is already locked to a destination, then you decide.

But many of you, even lived mixed amongst the men, you still carry a fingerprint. And your children will carry that fingerprint with them. In a way, we call it, mixed race marriage. Now we have mixed "universal marriages." Because some of this structure have married into man. They have managed to do. Those who cannot or have not done, have found a different dimension of life. We know them in the teachings in the past. I referred to them. And in the future, we'll see more of them.

Are there any questions? (:54).

By the way, they are not aliens. They feel, they bleed like us. They love like us, and they have managed to fit perfectly in our structure.

Q: ... Thank you very much for the teaching. I wanted to ask, when you say, "they are from another dimension of life", what you mean by dimension of life?

K- We all... What we explained dimension in the Keshe Foundation, is the origin of the source of the planet. We are a Earth dimension, because we are created out of the field interaction of the Soul of this planet.

It is very interesting in... I don't have my pad, but I explain it in a very simple way. When we carried out the test, we did not need, I explained this before, to drill a hole, to find out what's in the ground. By creating a field atmosphere we wanted, we could tell what is in

that ground, from outside. This will become a new evolution is in what we call a lot of mining and other things. But it's the same. You cannot have these matters in that point, if they don't have a connection with the Soul of the planet. If they don't carry the essence of what exists inside, the field strength of this planet.

In a Periodic Table, we say we have how many elements? 200 and something. Whatever we have, it's actually 200,000 of it. But this planet does not hold it. We don't have the strength of it. So, it's not part of us. (:56). Whatever the Soul of this planet holds, doesn't matter what material is, it's in the body of the man. From Uranium, Plutonium to Hydrogen, is part of our physicality, actually works. The body of the man, the STM, has learned a way to use it for its advantage, to extend life.

In the future time, as I always say, I'll show you how body has learned to use radiation from the cosmos to extend the life of the man on this planet. Without it, we'll die. It's like a disinfectant, but we're not used to it. We don't understand it, because we never knew it exists. Many of the materials in our body is done to extend life and it's used as a, what I call, disinfectant. In a way putting out germs or fields, which (if) we don't (neutralize), we can (bring) danger to life. Whatever, whatever is on this Soul of this planet is in the body of the man. ( .. Are you recording what ?? ? )

Q: I tried to offer you my iPad.

K- It's okay, thank you very much.

So, we have to understand this is part of us. And I'll be very interested now that gradually we learn how to go out of, or not to go out, to extend our Soul. And if this gentleman extends his Soul, and this gentleman managed to extend his Soul, (:58). and this gentleman managed to extend his Soul, and then this lady, and all of you, look to the left. Look, she's not from here. Because at the Soul level, you recognize each other. This is how you recognize each other in the space. Who's from where? And two of you in this room have a beautiful Soul, or with two ?? source, and you shine totally differently.

Your Soul, your structure, even though has a cover of human race on it, it's actually what I call, "GMO" of the Soul. You have adapted. But if you know it, you see it a different way. And this is part of us, because do I feel safe? Or you have chosen, or your ancestors, or the way originally you came here, they felt safe. Man will not eat us, so we become like a man. Man will not kill us.

We know in the process of life of this planet, very few, one or two of these people have brought knowledge with them. But they never revealed the knowledge, because man was not ready for that knowledge. And it's in inscriptions, it's in books, where we can tell you who these people are. Tesla was one of them, definitely. But it's a process of understanding. It's not anymore us from this planet. (1:00). It's us from this universe. If you have managed to live amongst each other, peacefully on this planet, we can live peacefully in the universe. And these people will be the key for taking man in a peaceful way to space. So, when we say the origin, it is connected to the Soul of this planet. It has a fingerprint.

Any other questions?

Nobody else asking? Oh, we have Azar as usual. If she's on the panelist, she puts her hand out, she's here, she puts her hand out.

Q: Mr. Keshe, if for example, when we go out, our Soul goes out, like I am blue, because I'm from this planet, the other people are not blue, because they're not from planet, they got different color. (MK) Yeah.

K- Yeah.

Q: That's it, that's right, yes?

K- yes, it's more or less understanding field strength.

Q: And also, imagine the whole, we teach the whole humanity how to transmute, so it means we can go to different places. Now, how do I make sure if I'm sleeping in my bed, my neighbor doesn't come into my bed and look I'm naked in my bed?

K- This is the only thing Azar thinks about, who gets in her bed? But, the understanding is, nobody gets in nobody's bed.

You got to understand the work of the plasma. Only two which both accept, interact. You get two magnets, you get three magnets. And try to connect the head of the magnets together. Only two fit, the third one is up or down, (1:02). does not fit. It's very simple, it's as simple as ABC. And secondly, you have to have the strength to do. You cannot bring a copper next to a steel and try to put them together. We create that distance. And don't worry, nobody will get into bed with you, you already have a husband.

Anybody else? Any other question?

Q: Well, can I explain the dream that brought me here, and the experience that I had here?

K- Yes.

Q: My name is Nick Vlahos from Sydney, Australia. I've been roughly, listening to the public teachings, One Planet, One Nation, One Race, and some of Rick's teachings for past 6 years. Now, what brought me to this seminar, it was actually a dream I had, and when I wake up, I had dreamt that I went to a planet, I'm not sure which planet it was. But the difference with this dream is that, there was a physicality to it, it was a density to where I was, like, I was truly there, without a doubt. And from that moment I realized, it's like my Soul was telling me, "Please", because I heard about the "25 plus 200" seminar that was coming up. And this was around May or June this year. And then I realized, it's like my Soul was telling me, "Please, you know the savings that you've saved, please do

this for me." Because it's like, I've done this, some things for you, please do this for me. It was like, I realized then, like, it was like there's a man inside me or something, something like that. And that was my realization to it. (1:04). So I put the money down and I came here this week. Now, what happened on Monday, we all came here and it was nice to put a picture on some of the faces that I used to hear in the teachings, like Azar and a few other people that were here, like people like me who talking now.

So what happened we had some of the Head Units here, and we were told by Mr. Keshe at about two o'clock, the control room will turn them on. So I was really drawn to, I was waiting for someone else to put their headsets on before I do, in case I do a mistake and you know, I didn't want to be like a bit silly, but I was drawn to the Head Unit. So exactly about ten past two I put it on and then I grabbed the two hand pieces that are with it. Now as I was doing I seen Mr. Keshe say, come to my unit said, this number and ran the control and please give me the graphs for it. I was on roughly about half an hour, Mr. Keshe said, all right take your hands off the hand pieces, and then go for another 20 minutes. After that, he told me to stop and then told the control room, send the graphs that are in it, of my Soul and my STP. And what I noticed, and what Mr. Keshe said that, I was really, really physical, that's why I held on to the two pads for that long, and he showed me in the graphs and he was very surprised, you know. It's a little bit different graph he sent, he was surprised how physical I was, and holding on to the physicality, not letting the Soul go. But he said, "then look at this, when I told you to take the hand, your hands off the two pads. Mr. Keshe said, "look at the graph now." (1:06). And I noticed that the graph were more even, my Soul and my STP almost into a line. And he also told me that there's something, you might have a sickness, or the graph shows that you might have a sickness in you or it might be a big fear, but we have to delve more into it, and I have to look more into it.

But what happened the next day is what really surprised me. We all had our turns on the Units and we started talking. Now I first noticed a silhouette behind Azar. It was like a lady, or behind Azar. There's no one else in the room but it was a silhouette, a white silhouette behind Azar. And it was coming in and out. I couldn't see it properly and I had to adjust my eyes to try to keep it there. Then straight after that I seen another silhouette but much more clearer behind Galib, another Knowledge Seeker that's here. And I actually seen the silhouette, the person that was behind Galib, he was very surprised that I seen him. And he actually had a, he's quite a big guy, and actually had a upside down, ?? moustache, a long one. And when he seen me, he sort of went down ways into the floor.

But there was another Knowledge Seeker here, Catherine, a Chinese Knowledge Seeker. She had been on the headsets for about one hour. And Mr. Keshe was saying, "look at her face, she's definitely somewhere." Because she had a big smile on her face and she was doing, you can tell in her face she was somewhere in a happy place, somewhere. Then Mr. Keshe told her to please explain where she's been and this and that. And she said, "I was actually on the Moon with my family, this and that." And then when she talked about her mom, that's when I seen a lady just appear behind, from behind her. And this lady was different from the others, she was almost, (1:08). it's like she was almost there, but just her face was blackened out. And I was thinking to myself, how did this happen? It

must be the, maybe something to do with the headset the other day, and the fields that these units actually bring, do something to the plasma of this air that made me see that. Now this lady that appeared, she went behind Catherine again and then she reappeared to me. And, I didn't hear a voice in my head, but it's like I had a feeling, that she wanted me to acknowledge her, and then when I said to my head, "Yes I can see you", she disappeared and I really, I'm really happy that I came here and witnessed that. And something so clear and so almost, it's almost like a pure person came into the room. And I thank my Soul and Mr. Keshe and all the Knowledge Seekers for giving me this chance. Thank you. Nick Vlahos from Sydney, Australia.

K- Thank you very much. Is there anybody else who wants to say anything?

Q: How about China opening up publicly and acknowledging the KF? I am Mark for US, what about China opening up publicly and acknowledging I know they're in the midst of testing, and confirming and looking at it this way and that way and upside down and backwards and forwards. But we're waiting for them to actually come out in the public domain and say there is a new science and a new technology on the planet. Is this in the card?

K- You can see how American he is. It has to be on the CNN to be confirmed. (1:10). A lot of things happens without the CNN knowing, and they cannot confirm it. But this is the job for them, not for us. We have a freedom to review, to explain, but Chinese are very reserved. They do it their way.

Q: But the Americans are waiting to start working with the Chinese.

K- The Americans cannot work with Chinese. It's impossibility at the moment. Because, on the economical side, America thinks it has won a big battle. Bringing back a lot of work back to US. They closed a lot of factories in China, or they encouraged with taxation, to go back to US. But in fact, that was the biggest mistake they ever made. You'll come to understand the reason very soon. Because, they cannot export, they do not export what they make, more or less, out of US. It'll be a bigger financial disaster in the next 5 to 10 years for Americans. You'll come to understand, very, very soon.

Because, the point is, it's not what you manufacture anymore, or what you produce. From now on, the science will take over. How much you can put in. And the structure with us, part of our work with the Chinese is very simple. America attracted ?? brain (brain drain of poorer countries) by paying a lot of money. "American dream". You'll become rich if you come to America. In our work with Chinese is, we make China, the center of the space technology and the space knowledge. (1:12). Game has changed.

In a way, it took time to explain to the Chinese that you cannot just manufacture, you have to bring the talent to be part of. And in next few months you will see the Keshe Foundation will literally go out to bring the experts of the Keshe Foundation. We know who you are. 10, 20 years we've been watching. We know who you are, who the people sit with, plus the international scientists into China.

You want to be with the next generation of science development, you come to China. We'll shift it. Whatever American took, was the superiority to create war. Whoever joins us in China, with the development of new space technology is for peace. We leave it to the scientists. Where they go, people with the knowledge where they sit. Do you want to go to United States and create weapon technology to kill? Or would you like to move into China, where is the land of peace of knowledge for space technology.

We are advisors, and we advise thoroughly, we just don't go there, we have new technology. We look at all aspects of it. My job has been, not just showing technology, but showing what technology can bring to China, what can bring into the, what you call it, North China Sea, be it Vietnam, be it the rest of it. So, when you say, "what's going to happen?" In a way, in the next year, two years, in next six months, Keshe Foundation will drive heavily, to absorb international scientists into Keshe Foundation research and development in China. (1:14).

We make a very clear line. We don't fight. If you're a scientist, you have a technology, using our technology or yours. In China we give you room, to join with us, to work with us, but for peaceful application. It's a very clear line we drew and Chinese government leadership understood. And this is the way we're going to go. We are not bringing you more scientists who can make a better weapons. We're bringing more scientists to create more peace.

And it's a change of game. Because, when you speak, when you I eat and sit with Chinese high ranking generals and the government officials. None of them ever talk about superiority of China. Says, "how we can bring peace, that we can live without this?" The biggest problem with Taiwan, with China is, American are using it to create a new war, to say they are superior. Chinese want to bring the balance, that the Taiwanese will become part of China in a peaceful way, without interference of America.

Americans, sorry to say, a lot of you come from America, you carry a little bit, or mainly, British blood. You are in England. English mentality, foreign policy, is "divide and rule." And this has become ingrained in constitution of United States. The policy in China is Taoism. Bring in to all be one. We were talking about it yesterday. We have a food, and we put it in the middle, and we all shared. (1:16). And I explained what happened with a German minister who came to China before Corona, and they set a table, a round table with swings. And they gave a menu to the minister and two of his entourage. With the Chinese ministers, they called, six of them sitting around the table. They all ordered what they thought the Chinese would easily put in the middle, and everybody eats from it. When they put the food on the table, the German minister put it in front of him and started eating his plate. They are not used to sharing.

There is a big difference between the Japanese chopstick and the Chinese chopstick. Japanese have a little box. They eat it themselves. They don't share. Chinese have a longer stick. They put it in the middle. Everybody shares it. The Koreans have a flat stick.

Chinese chopstick is round. If you look, the culture of how you feed yourself is how you think. So it's part of the structure, part of understanding.

Normally, most of you, when you go to a country, you look at how the walls are. I have a beautiful advantage, I don't speak Chinese. I know, after six or seven years in China, I only know about five or six words. And most of it they don't like. One of them is ?? "bing shwei", which means cold water. And the Chinese like warm water, so I'm marked out.

And it's because I don't speak the language. When I (sit) in the meeting, it has to be translated. I watch the Soul of the people. (1:18). I watch the behavior. And I know what the thing is long before they decide. How they come in, how they shake hands, how they sit, where they sit you. China Oil Corporation has a beautiful policy. The door is always, comes with a table going along to the door. Their officials always sit on the door side that if it's too dangerous, they can run out. They put the other's side, far away from the door. And this explains a lot. When you go into a Russian cabinet room with a minister, the door is right in the rectangular, furthest possible from the table of the minister. And then it's a T-shape. He always sits on the top. And then the rest have to answer. And then you see them, when they walk from that door to sit in their chair, how they change in character. I had the pleasure of this with the minister of oil of one of the Russian satellite countries. He said, "Mehran, come and sit next to me and understand the power of my seat."

You don't have this. In understanding a culture, understanding your Soul, you understand the interactions. And physical interaction is a reflection of the Soul, it explains a lot to you.

Any other question?

Rick, it's your side. I have no questions here. The chicken is done. (1:20).

Q: ... Mr. Keshe, my question is, the Souls that come from another planet, is it to learn, or to resolve a karmic lesson that they come to Earth and are some aware of who they are?

K- Can you repeat that again, please?

Q: My question is, the Souls that come from another planet, is it to learn, or is it to resolve a karmic lesson that they come to Earth or...

K- Most of them are homeless, they are refugees. In a way they lost their, what you call, (planet) or they came and it was too good and they stayed. I've spoken about this before. We let them explain to us when we put our prejudices apart, how to be, and how it is.

The city of Manchester where we are, I was explaining to the Knowledge Seekers here, is actually a slave city, is known inside England. Manchester has been the slave center of the whole British Empire. Where we, the slaves were used, taken from George Island, originally in Gambia, into America, and then, cottons they produced, brought back to Liverpool, up the canals, they built the canals with the slaves, to come to Manchester,

(1:22). because there were rivers around here, and the water was flowing all the time. They built the mills, and they put the children of 5 years, 7 years, 10 years old into the mills, just enough food to eat a day to run the mill. And the slavery carried on. And they used the same slaves to push the Finnish cotton back into British empire. So the whole slavery was set around running this city, and it was part of it. Manchester is one of the most slave centers of the world. We don't know so much of, because we always see as part of the picture. Most of the slaves went to America. Grow the cotton was to run the factories in Manchester. Without them, these factories were closed. And they are not very far from us. And when you walk out of this place, maybe less than 200 yards, you see the mills.

In a fortunate or unfortunate way, we have the usual "last supper" in one of these old mills in the basement of it. And sometimes you hear the noise of it. You feel the Souls in it. It's very, very indicative, or in so many ways, very amazing. We have two people here from Nuremberg, Germans from Nuremberg. Every time I go to Nuremberg, a city I don't like to go to, I feel the marching of German soldiers. It gives you that feeling. Parts of Belgium gives you that feeling. You feel the Soul of the people. You feel the pain. You feel the same in Linz. In Linz, part of Linz, you actually feel the Soul, the emotion of the people in the city. (1:24). And this is part of our life. We are part of it. It affects us and brings us back. And then are we still aliens to ourselves, which we are. Most of us are. If you go through places like Nuremberg just as a tourist to see and you don't feel it. If you go to Linz and you don't feel it, it means you're still in the matter of state of matter state. You came to see. You have to feel. And then you move with the nation.

Any other question?

The problem with me is I've traveled to too many places around the world.

Q: ... Does the mixed race Soul work on the same principle as genetics, where it's 50/50, equally from the mother and the father?

K- Not really. It depends. It takes the best. That's the beauty with the Souls. It takes the best. We don't find defunct Souls. We don't find the Souls, one leg missing, or one arm missing. They take the best. And in a way, everything stays in, because we don't know which part might need it and what's connected to what.

No more questions?

Q: Is there anybody from South Africa in Manchester, (1:26). that could come home to teach more of us here?

K- No, not as far as I know.

Q: Good morning Mr. Keshe, I have a question. What is aether energy in plasma technology? And is the aetheric body energy, is the field of the STP in the physical body, or the fields of the human Spirit?

K- Can you, can somebody tell us what this thing is?

R: Aether you mean?

K- Yep. Go to your friend, Wikipedia.

R: ... Okay we'll get the so called official version. ...

K- You are the official reader of the official thing

R: It's not giving me. It just says organic compounds .. ether, ethernet ... (1:28).

Okay, here we go. So, in physics for example. Well, there's a number of different definitions for aether, but according to ancient and medieval science, aether is also known as the 5th element or quintessence. It's the material that fills the region of the universe, beyond the terrestrial sphere. The concept of aether was used in several theories, to explain several natural phenomena, such as the propagation of light and gravity.

K- The question to ask is, does such a thing exist? Or we made it up and the rest accepted? If you look at, or go for some scientific papers speaking about aether. They say, "it's what we are made of, or what is part of our structure of life." But nobody can tell us what it is. It's a made up thing, does not exist. In a way, I call the aether, when it came to a discussion some time ago, is the field of the universe. Do you want to call it the human, or part of it, you want to add to be, what you want to explain to, but you cannot find answer for, or try to create a, what we call, fabrication.

But aether, as we call it, environment or the material, whatever, (1:30). it's easier when you put it as part of the magnetic field of the universe. So, it's all the same. It does not exist, or we call it, a cat or a dog. It's a collection of the fields. And, nobody has ever actually confirmed its existence. But we call it something which is there, we can't say what it is, and then we call it this, because then nobody will ask the question.

Any other question?

And secondly, whatever you call it, is part of us, it's part of the magnetic field of the universe. ...

R: Sorry, you broke up there, is part of the magnetic field of...

K- Of the Universe.

R: Of the U. ... One sentence is kind of interesting here, is a theory that was originally put out by this Bernoulli. In his theory, all space is permeated by aether, containing excessively small whirlpools. So, in other words, it's all magnetic whirlpools. And that's essentially what you were talking about in your book, and so on, that the fields of the

universe, you know, can be exceptionally small whirlpools, and then larger magnetic fields, and all interacting and so on.

Q: << Speaking in Italian >> (1:32). ....

Q: Okay (1:34). Mr. Keshe, Giancarlo is asking you, you just spoke about that you were listening, you were feeling in Linz and in Nuremberg, you were feeling this Soul. And his question is, the Soul you were feeling and listening, they're are STP or they're are Souls ... He just wanted to know if you can go deeper on what you felt, which type of Soul did you felt? STP or STM, or both?

K- Thank you very much. It's usually the STM, the emotion of the Soul. It's not the physicality that you can hear or see things. You feel the emotion of the environment. You feel the same thing when I went to Vatican, here in Italy. That you feel the emotion, that how it feels and how it is. It's usually the feeling of those who lost life, and still connected in a dimension to the place. You usually feel the injustice, that the Soul is not at peace. And there is a specific place in Belgium, (1:36). wherever I go, I hear marching soldiers. The way, nowhere else happens, except in this place in Belgium. Wherever I go I hear marching soldiers. You can hear them. And for a long time I was trying to understand why, and I haven't found out why I hear marching. You can actually hear the marching of the soldiers on the road. One day I'll find out and then I'll let you know.

Any other question?

Q: ... Regarding these Souls, how can we bring peace to them?

K- Oh, you always make it available. You don't make a peace. You don't bring them peace. It is for them to take if they are. This is what I always said many times before. We are not there to force to take them. We make it available for them to take if they want.

Any other question?

Q: ... After watching the 500th Knowledge Seekers Workshop, especially when it was discussed how conventional medicine, especially in open surgery, is lagging behind in repairing or transplanting organs. (1:38). Whereas, according to Mr. Keshe, it is already perfectly possible to create physiological conditions and environments, so that the body itself can repair all of our organs naturally, and much more safely. I would like to take the opportunity to ask Mr. Keshe the following question. ... I use the 8 essential amino acids daily, so I'd like to know if instead of mineral water I could dissolve them in Gans water from the Cup of Life 1 or 2, which would be more beneficial to our health?

K- If you use any of the, what you call, amino acids, you just need to put them in a Gans water once, and just use the Gans water. You don't need to every time to put them in the Gans water. And then you have to understand, you cannot take a cup full of it or whatever, a few drops of it will do the same. You have to understand the propagation of the field strength. And if you use a Gans water, use a few drops of the Gans itself.

Usually the amino acids connect to the CO<sub>2</sub>, Zn, and CuO. Try not to use the CuO unless on a specific ways. But if you use this, you make the, what you call, the mixture once, and you take a few drops, one or two drops. Usually it'll be as effective as everything else. And usually take it on the tongue. (1:40). And you'll find out it does work. You'll find it's too much to take the amino acids, which you mixed with the Gans's in a cup full.

Any other question?

Q: ... Are they first generation travelers of the universe? And do they realize who they are?

K- It's a continuous "refugee center," as I call it. They always come and they always go. You know we had the Iranian refugees in the eighties and then we had the others and they're still coming in different names. It's the same with the passengers of the universe. Some of them are not refugees, some of them are travelers. And they come and go.

It will be very interesting in a coming time, how they explain to us, they arrived here, how some of them come and go, and they take us back. In a way, it's a very good thing, because it's just like, you know, you have the Jamaicans, a lot of them in London. They come and then they tell you how beautiful the place is, and say, oh, next holiday I'm going to Jamaica. It'll be the same with all of us. This is where we go. They explain to us. They show us, actually, the beauty of their place. Those of who are "tourists," I call them. And then we go back to see. (1:42). It's the nature of the man and the nature of the Soul, to travel, to be in dimension and motion. But man at the moment travels the village of the Earth to see new things. Now we learn the new things.

Any other question? We're nearly running into two hours.

Q: ... So is service to the Creation one way to create the Inertia within, to elevate the Soul? And could you become like a second Sun, to be a feeder to others?"

K- Can you repeat?

Q: So is service to the Creation one way to create the Inertia within, to elevate the Soul. And could you become like a second Sun, to be a feeder to others?

K- In a way, yes. It's easily done, if you know the way. Easily done. It's a difference between a ?? mercenary (missionary) and charity worker, I always said. If you, when you are a missionary, you steal from the others, to go somewhere to change something else, the way you want. But, when you are there as a "charity worker," it doesn't matter what it is, you do it because, comes out of the sense of obligation to change somebody's life. And this is how the Soul works. And that's why actually we call ourselves a foundation. (1:44).

There is something else, I was explaining this to one of Knowledge Seekers very recent. And something was brought up here. Years ago I wrote to an international organization

which was claiming peace. I said, if you want to claim peace, has to have the color of the planet Earth, which is blue, because they have a stupid structure in their system, and the... it has to be in writing of gold, where blue represents the man from the Earth, and then, the gold is the greed of the man. When you can bring the two together, to work in perfection, then you'll find out, you'll find a man of peace. And it's carried by the flag of the organization. And it's how it should be.

We don't carry a flag on our Souls. But we carry the color of our greed. And where we come from, in the color of blue of the STM, as you call it. So, if you work, you understand, as somebody who wants to elevate, the elevation of what you give, as a man from this planet, as a color, they know who has given, and how it's been given, and if I want to take it.

This is what we say, you have to perfect the man, to live by the Ethos of Mitra, because then, What you give has no taint on it, there is no death, what you call, killing, and there's nothing else to it. One day man will understand these teachings.

Any other question? (1:46).

Q: ... How can we feed with our thumbs? Is there something about feeding with thumbs?

K- I think the babies usually feed themselves with a thumb, don't they?

R: That's what I was going to say, that at least gets your salivation going, and that would be one way to create water perhaps. Stick your thumb in your mouth.

K- I don't know, yeah. Maybe.

Do you have any other question? Or shall we call it the day.

Q: ... In spiritual terms the aetheric body is used. Aetheric body and energy is the field of STP in the physical body. Oh he is asking. Is the aetheric body energy, is it the field of the STP in the physical body, or the fields of the human Spirit?

K- We haven't, we don't understand what aetheric is, to say what it is. Does it exist, and if it doesn't, it doesn't come into, how can we place it? (1:48).

R: Yeah, it's difficult without some defining and it's a... it's kind of a... it's a word that different people use differently, so we'd have to get into that in more detail.

K- Yeah. You have no more questions?

Q: ... Is the August session finished? They say they paid for the ticket for the August session. Can they join the 8th of September?

K- August session will be next Wednesday and the following Wednesday. It will be set, we wanted to do the conference first before we do it. Next Wednesday and the following

Wednesday, people who registered will be given time to be on live with it, for the fingerprint of the Soul. And then on a Friday 8th and Friday 15th, we go through what I call, the two sessions for September. We didn't want to complete the session till we do the conference first, and now that we do the fingerprint of the Soul afterwards. It was something we had to learn with our systems, that it gives us a more clear understanding of the fingerprint. Because then in the picture we can analyze the fingerprints exactly what it needs.

R: Okay, how about one last question from Jalal here in the...

K- Two questions you mean?

R: Okay, sorry. Jalal, would you like to go ahead?

Q: Thank you Rick. Hi Mr. Keshe. Good day.

K- Hi Jalal, good day to you. Can we have the second question first? (1:50).

Q: Okay. I have no question Mr. Keshe. As always I would like to ask the Knowledge Seekers, which is near you. We didn't hear what they are, what they experienced, what they done, what happened? So...

K- Can I answer you Jalal? You have enough spies in this room that they'll report to you, don't worry.

You, you have put enough roots everywhere to find out what it is.

Q: Okay, then I will not...

K- Thank you very much.

If there are no questions, we bring the sessions, it's nearly two hours, to an end.

R: Yes, that sounds good.

K- Thank you very much. But please listen to the first 5 or 10 minutes of the teaching of today. If you understand it, I gave you the key to become traveler of the space. But again, it needs the wisdom to understand it.

Thank you very much, and see you next time.

R: Ok, very good. Thank you Mr. Keshe.

Q: KS who is near Mr. Keshe, make it worth it. take care of ?? Thank you.

R: I think he's got a good batch there, so I'm sure...

K- The phone was on silence, they answered. Do you want to answer him again? Nope. They said, we'll try hard Jalal. That's from Ekmar.

Thank you very much. See you next time. (1:52).

Q: ... We are sending to you all who are participating in these experiences in Manchester, the most wonderful fields from our wishes and love. Take care and enjoy. Thank you all.

R: I think we all have those feelings as well.

K- See you next week.
