

Water of our Soul always Pure - Iranians asked to Rescue Palestinians - save from Annihilation Introduction to 508 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Most of today's workshop was to encourage us to go deeper into our understanding of the field interactions of the plasma. But how can we do this? As we were born from the ignorance of the physical interactions that later created the Souls, and not the STM first, as will be in the future race of the man. This is our challenge and adventure to do the almost impossible. But we can do it, if we can develop the desire to see and understand our Soul and the different parts of what we are made of.

In part of the teaching Mr. Keshe made a beautiful analogy between the water of a spring that becomes a stream and flows down the mountain to become a river. And though this water gets tainted with dirt and all kinds of different things, it still remains H₂O in its original purity. In this way the water is like the fields of the Creator as it leaves the Spring it becomes mixed and part of other things and it is used to create new life and maintain existing lives. Water really is the symbol of life and is everywhere in the Creation. Taking the analogy further, when the water of the spring evaporates it becomes the clouds and rains down again and becomes part of the life on the land, and the rivers carry it to the oceans, where it evaporates again and becomes the clouds which carry it to other parts of the planet and eventually that same water rains on the same spring from where it originated from. And this is the cycle of Creation.

When the water changes form back and forth from liquid to gas and gas to liquid it goes through a transformation and release or addition of energy. It's my understanding that the molecule of H₂O remains the same, but gets attached to other molecules and this is what we call "dirty water." And then when it evaporates the H₂O get released from that relationship and again becomes pure water, but it carries the memory of that experience within its "RNA". There is a lot we can connect to with this analogy. The water is like the Soul of the Man (STM) it makes relationships and becomes part of things, but in the end it always remains the STM. The STM is a higher order being than the Soul of the Physicality (STP), even though in essence they are both the same. And when they become one, it's like when the water that has gone through the process of Creation and finally rains down again and becomes the original spring. The H₂O always remains pure in itself, but it carries the memories of all its experiences. At the same time those memories are shared with the Creator and all of Creation has access to them. And recently he told us that one of the H connects to the STP and P and the other to the Soul of the Creator. This further confirms the unity of Creation and that everything is connected to everything else, but something has been left out of this analogy.

That something is, emotion, which are field interactions between plasmas at a particular field strength. It seems that the emotions are the key to life in the universe (U) and how

we will become an individual and a free plasma. It's like the father keeps the keys to the car and only allows the child to drive when it becomes mature enough to handle all the situations that can arise from interacting with other plasmas, or what we call, life. If we come to understand our own emotions and can control them, then we will change the society we live in. And this is our responsibility as Knowledge Seekers (KS), to learn about our emotions and how to control them. He said very clearly, it's us KS who will spread the T across the planet, the Messengers are only providing the knowledge and the right conditions, but it is we who have to do this work. This is related to the London conference, and that we have to go out in mass and promote it, and not rely on someone else to do it. If we don't do it, then he said, we have wasted 10 years as KS. This is the reason, or should be the reason we became KS in the first place, to bring peace and change through the new technology (T). It's not necessarily doing something in physicality, but surely it is an internal change that opens us up to the Soul, and that will spread from Soul to Soul.

In this analogy with the water molecule we can think about our relationships and that, when we were still in the innocence of childhood we probably had honest relationships with others like our family and friends, because we were still pretty close to the original spring. But as we got farther and farther away more "dirty water" entered the stream. During these formative years if we didn't have the correct guidance, or lacked a healthy self-esteem, and most likely we didn't know about our Soul, then we probably started developing false relationships with others not knowing any better. Again, most probably we didn't have an understanding about what true love is, instead we were seeking to compensate for that lack of love by pleasing others, or even allowing ourselves to be abused. As Mr. Keshe said in this workshop, we know the field strength of abuse. All of these experiences that happened in the formative years of our personality got written to the "hard drive" of our mind and we created emotions out of them. And then the heavy pollution came from the "factories" of society being dumped into the river. By this time heavy denials start setting into our lives and living a false life became normal, because we wanted to fit in with the others and not be strange. Now we have a pretty good understanding of how the water has gotten so dirty, then how do we clean it?

The purification process is when the water heats up and evaporates and changes back into its original state. Sometimes we refer to facing our denials and fears as being in the "fire." It's a painful process that most people chose to avoid until the circumstances of life force them to look at themselves. Now with the new technology this process should be a little easier for us, but we still have to want to do it. Then we'll realize that our Soul always remains pure when we transmute and go through the process of taking on other physicality's, and eventually giving them up. This is the beauty of understanding the Knowledge of Creation, it helps us to see that out of ignorance we didn't know that the mind becomes dirty through selfishness and egotism and keeps us grounded in the world of physicality. Whereas through the Ethos of Mitra we slowly understand that through correct living, the Soul becomes the center of our lives and the STP is growing towards it and eventually surrenders to it and the balance in emotions occurs, and then we become Passengers of the U.

One of the ways we'll play and have fun in the U is by changing our physicality the way we go to costume parties or dress up for Halloween. We'll keep the strength of our Soul the same, but change the emotions of the STP to what we want to appear as. He said, we can do this because the "Soul of the Creator" is within all of us, even a stone. So it seems that the "stuff" of Creation is everywhere present as the Soul of the Creator, the problem is for us to be able to manage it through our emotions. The STP interacts with other Souls to manifest what it wants. And before he told us that the Souls makes agreements or arrangements with each other and the P follows. As we gain the confidence in the process of Creation we'll lose the fear. But we still have to learn to have control over our emotions, because through them we can change the strength of our Souls and through that, change the Inertia to what is needed to manifest what we want in D of P. He said, Inertia is the manifestation of P. Another piece of knowledge he added was that the STP is not exactly the same all the time. It is influenced by the fields of the different layers below it under the Earth like the sand, rocks, and magma. The magma interacts with the surface. So the physical manifestation will be slightly different due to these fields, and this is why things can change colors because they are influenced by the internal fields of the Earth. This is also true about our aura, and it changes color from the foods we eat. Again, the overall lesson in all of this is we need to learn more about field interactions and how we are effected and how we can change them.

Again in this workshop a lot was explained about the situation between the Israelis and Palestinians. In order to bring world peace we have to have a correct understanding of the "bigger picture" and how it fits into what the current rulers of this planet have been planning and are carrying out step by step. To complete their process in the Middle East they need to get Iran, and they have been pushing heavily to do this in the last weeks. Perhaps through the Soul, Mr. Keshe discovered that America and Israel were setting a trap to bomb Iran into annihilation and take the Central bank and give the British control over oil fields in the Persian Gulf. Not only that, Iran is the one country where the new technology is already highly developed. So we can see the steps they are taking through the Israelis and Palestinian conflict to stop its development. And "coincidentally" it's coming right at the edge of the London Conference that will bring a huge change in humanity. It's important for us as KS to understand the background and not get lost in the "smoke screens" created in the foreground. We know the world's Press is totally slanted in one direction. And in this workshop he explained that, the UN Security Council is not representing the world, rather it's being used as a tool for a few to achieve their goals. Therefore, the UN itself has lost its credibility and will be replaced by the Universal Council.

Another thing we should understand. As a Messenger, Mr. Keshe has offered to the Iranian government, that if they will not fall in the trap set by the "infidels," and instead rescue the one and a half million Palestinian refugees by offering them a "white Corridor" to take sanctuary in Iran, then he can use his power to end their game. And if they don't, the Americans are prepared to annihilate Iran with high level bombing. For many years Mr. Keshe has been advising the Iranian government and protecting Iran in the background. More then ever, now is the time for us to increase our emotion and intentions for peace, change, and implementation of the new technology. The change has

to come from within ourselves, otherwise it will remain in our genes and after a generation we'll go back to killing. Mr. Keshe made the promise that he will be responsible to feed and provide "medicine" for the Palestinian refugees. Wouldn't this be the release of the technology we have been waiting for? The problem is the Ayatollahs are also billionaires, what will happen to them and are they ready to let go? They are totally backed in a corner. Let's pray they make the right decision to benefit all of humanity.

It is very important that the London Conference be carried out now and we release the new technology across the world. Otherwise, as Mr. Keshe referred to before, that it is possible that they will start a new cycle of wars. All of us have to put our emotions and efforts for its success in a very strong way. This is the closest we have been to making the change.

There was another question indirectly related to reincarnation theory. A KS had an experience like a daydream but was awake, and they identified themselves with a Russian choir singer and by the question, it felt like they were asking if they were that person in a past life. But of course Mr. Keshe has taught many times that reincarnation the way we believe, does not exist. There are two possibilities to explain this. The first one we know and that is, in the person's RNA he could have an ancestor who sang in the Russian choir. The second one is something very interesting and new. The person had a matching field strength to someone singing in the choir at the same time as he was dreaming it. This could have happened to 100 people around the world at the same time if they all matched the same field strength. I imagine this is the way the new KF Headphones will work. We just have to learn through our emotions how to adjust the field strength.

Working with the plasma is like the opposite to working with the physicality. We each are responsible to understand the Totality of the work of Creation and how the fields interact with each other. We ourselves need to be clear about our own emotions and what it is that we want. In effect we are the creator of our world, or we could say the world we perceive comes out of us. And the biggest part we don't talk about is loving what we are created out of. In a way, it is like saying, that we should love our Self. What we know now is loving our ego, or a projection of our mind. In an atheistic society it is very strange to hear someone say, you should be in love with the Creator and be happy and content with what He provides. This is the only way the man will find peace. We have to learn to access the line to the "Soul of Creator," then we can go from one U to another. Again it is back to the emotions. We have to match the essence of the emotion of the Creator. If we don't then we'll remain in doldrums of our own limited understanding of our world like others in the U. This means even those in the UFOs are stuck too. If we go deeper we'll learn that the Creator is in every point, place, and dimension in the U. He is aware of all the knowledge, and aware of what He has created, and that they are also creating energy. Understanding the work of the Soul of Creator is as easy as drinking glass of water, or H₂O, but we have to endeavor to fill that glass ourselves with the water, which is the Knowledge of Creation, while the glass is the STM. The path to Creator is learning to work with the smallest common denominator energy of Creation and in essence it connects us to everything. Maybe this is why bigger is not better,

because it's not connected to more on its own, in a way. If KS will understand how the systems work, then we'll discover that we are the systems, and we have to find out how to make the connection to everything. And that the connection has always been there but we didn't have the knowledge or the tools to recognize its existence. The voice of Creator is the motion of the essence of the love of the Creator, and it's always here with us now. When we become mature we'll know it.

The KS have enjoyed a long time to learn and talk about the technology, now it is time for the "bird to fly" so to speak. In the next monthly Flight Sessions of late November the systems will be used to help KS create a ball of light between their hands. He has talked about this many times before but no one has been able to do it, just through their own emotions and devotion. Therefore, in this session the systems will give us a helping hand. This is not just to be a magic show. It's to practice creating the right emotions between the STM and STP and to interact the fields in the same way that daylight is created from the interaction of the fields of the Sun and Earth in the upper atmosphere. To master the Fields we should train ourselves like a gymnast trains to win a Gold Medal, with total dedication and devotion to the task. The goal is to help humanity take the leap forward.

Other Topics:

How the light of Stars are created through the internal interaction of the fields. It's not like a flashlight beaming light outwards, this is in the matter state. The outer layers of stars are Nano Gans plasmas that interact with internal fields;

The reason we remember our dreams and see them is because the field touch the front part of the brain and interact with the physical apparatus to create vision. There is a difference between the fields that enter from the front or from the back of the head;

"Plasma Internet" is already here but needs a little more work to convert matter state data to Universal Data;

Spacesuits are no guarantee against change through fields when in space.

Thanks for listening.
