

"Half a Brain" - Brain is copy of Earth - Headphones Complete Sphere - Palestine Hidden Holocaust Introduction to 507 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

The essence of today's teaching is how we have had no choice to become what we have become as a human race, because of how we were created in the first place. Call it an accident of the fields or whatever, but we ended up literally, with half a brain. It's funny because when somebody is not very smart we say they have "half a brain." And now we find out after millions of years that we were created that way, not only humans but all the animals on this planet. Obviously there is much more to it than just having half a brain. It's not really half a brain, it's half a sphere of physical dimension (D) of the brain. Because the Soul as a plasma is a sphere inside. We are talking about half a sphere in physicality (P) not in the MG fields of the Soul. As we'll find out, the M fields of the sphere can be completed, even if the "sphere" is not circular. The long shape of our body together with the blood flow actually does complete the sphere, but it doesn't fit with our thinking of being a circle.

Before we go any further it's important to clarify something about our thinking, because sure enough a Knowledge Seeker (KS) is going to say, that this half sphere is a flaw. It's not a flaw, rather it is the result of how the fields interact and come together to manifest something in P. A "flaw" is when something doesn't fit into the conceptual thinking of what humans expect things to be like. And most of our concepts are based on the ignorance of not knowing the Knowledge of Creation. Mr. Keshe said many times that the beauty of the "accidental" coming together of the fields to create Earth, has also by chance, created the human race, which has the unique ability in the universe (U) to love. Of course, all of this came out of millions of years of suffering and killing. But in the time of the U that's just a few flashes, and already the Creator has felt our suffering and has sent Mr. Keshe here to "correct" the half sphere brain, into a full sphere human, who will then have full unconditional love for all Creation and the Soul of the Man (STM) will spread that love around the Unicose. So we can't really say it's a flaw or a correction, but this is how we as humans communicate and understand at the moment. Maybe we could say it's the adventure of life unfolding in the Creation and not knowing what the fields will create in the future. Those who say they can tell the future will be out of business, because we don't want somebody else putting their own limited concepts into our thinking, and thus changing it. All these teachings are here to help us become a "free plasma" so that we can share the joy and love of the Creator with other plasmas to become free as well.

Maybe this is why Mr. Keshe made a half sphere space reactor in Iran, to show us the essence of flight and that a half sphere brain doesn't have to be a limitation. He gave us a big hint when he said, we are all flying objects. And in that half sphere reactor he said, he

created a Soul of Physicality (STP) in the center of it and it could takeoff. My understanding of this teaching is that the essence of flight or movement in Creation is that we need to have a double core reactor. For movement in time and space we need to have a reference point to go away from, and come towards. When he demonstrated flight in Iran he used two spherical reactors a larger one and a smaller one, and one remained stationary while the other one moved wherever it wanted. We have double core reactors inside called the STM and STP of the man, and they can change places with each other and do all sorts of things we haven't yet learned about. If the STP stays stationary, then the STM expands out to where we want to travel to. I think the STM has the ability to expand and cover the entire U.

Today the teachings started out by talking about the few degrees tilt of the Earth that has caused all the different field interactions and has led to the 4 seasons and variety of life and experiences on this planet. It's more than just a tilt, it's that the tilt goes back and forth throughout the year. Whereas planets that just have a vertical tilt do not have the 4 seasons. Again this points to the importance of understanding M fields and how they interact with each other, and this is really the basis of plasma science. He didn't say it directly, but all these field interactions must have led to the creation of different types of topography we have on Earth such as the mountains, rivers, deserts, and all the different field flows that make up the Earth. This then is reflected in the topography of the brain, which we can see in the MRI scans. When the field forces in the brain become too much it will also start to tilt, just like the Earth does. The teaching constantly refers us to the similarities of what we see on the Earth is also what we see in the brain, and later he said it's the same relationship between the solar system and the galaxy, and the galaxy with the U. I will try to summarize a little bit more about this.

What would it be like if we as humans become spheres instead of these elongated bodies? He said in the future our brain will change and become spherical, but we can keep our body shape the way it is now and manage the M fields to become spherical. In fact, the new Headphones are set to correct the M fields and complete the sphere. It's not yet clear what this means, because don't we do that now when we expand our Soul over the P? It seems that he said the STP gets pulled down by the MG fields of the Earth and that gives us the body we have below the half sphere brain.

The emotions of the Earth are expressed through the rain, thunder, wind, earthquakes and other such phenomenon. And as the macro is in the micro, then the same thing should occur in the brain of the man. And this is what Mr. Keshe discovered when he was studying the topography of MRI scans. He saw that the brain tilts in scans of MS patients and then he started putting the pieces to the puzzle together about what really is happening in the P of the man. The teachings have to be studied further and more information gathered, but at this point this is what I have understood. When we are not happy in our environment and this he defined as our family, friends, working and living situation, and all the conditions that make up an emotionally satisfied person, then we start creating emotions inside us like the wind, rain and thunder of Earth. Even if we are pretending to be satisfied outwardly, the inward feeling of the Soul will always be true. This process starts changing the structure of our brain, which is the command center for

all the cells in the body. When these field interactions get off, then the brain starts tilting and this starts changing how our body functions. After 9 years, then these changes will be seen as Parkinson's, MS, Alzheimer's and all these kinds of illnesses. It's the same way that Earth and all of Creation works, by the interactions of the M & G fields of the different plasmas. Understanding of how fields interact leads to understanding of the Totality.

Another thing he taught us was to look at the M fields from the Sun and how they effect the Earth. We see the tailwinds of the M Fields blowing out the back of the Earth and coming to a point. This tells us the direction from where they originate. We know the Sun is in the front. We can use the same pattern to find out which direction the central Sun of the Galaxy is, and eventually where the Creator is. This is also the shape of the eye, and the STM is on the center line of the fields, and it is related to the dreams. But when it comes to the brain the STM is in the center and the fields that are pushing against our face are also pushing out the back of the head. The tailwind is at the back of the head, and the brain has built that tailwind into its own physical structure. The significance here is that the Cosmic Rays we receive in the front of the head are different than at the back of the head. He has been doing tests in the Flight Sessions to understand how different they are and what we can do with this knowledge. When our energy is too far in the back of our head then we can't get the Soul to expand over the front. When this happens people say they didn't feel anything when they were in the Flight Systems.

These teachings are given so that we understand what we are doing when we put the KF Headphones on our head. We can relate what we are doing to how the solar system, galaxy and U are working through the M field interactions. The Headphones will change the environment around the brain and give the opportunity to the Soul to change the tilting if it wants. In the end, everything depends on our emotions, and as he said, it is all about love. Do we want to understand the different levels and depths of love? Now together with our feeling we can understand what we are seeing in the physical dimension. We will no longer be victims of the outer conditions, and will have realized the power of our experience is within ourselves. This is the beauty of what this workshop is opening up for us. Again it depends on us and what we are willing to give to receive the knowledge. Finally, he said we have to learn to work with the smallest and weakest fields in the U, like the stars and galaxies do. We'll survive in the U on the weakest fields. It's like the soft caress of the Mother transmits so much love to our hearts. These tiny experiences we never forget and they change our lives.

Today Mr. Keshe spoke a long time about the problems between Israel and Palestine and his understanding of it is so opposite to what we hear in the controlled world media. We as KS have to understand this in the correct way if we want to truly solve the conflict and bring about world peace. This is probably one of the most important conflicts that is an obstacle to a peaceful world. The Middle east is a huge source of income for countries that produce weapons, which most of the western nations do. Even a supposedly neutral and liberal country like Sweden gets huge incomes from manufacturing weapons. But the biggest culprit in the Middle east is the US who has been making wars there for decades to create jobs for its war industry and to take control of the oil supply.

It's a complicated subject that involves false information in the Media, religion, business, politics, and racial sentiments. For example, Mr. Keshe can speak strongly, truthfully, and openly about it because he has the knowledge and background information, and because he is Jewish. If a non-Jew speaks this way then they are automatically labeled a Nazi sympathizer. The interesting part is that the modern day "Auschwitz," is in the West Bank and Gaza. One thing this teaches us is that, when we hate something so much, we become that which we hate. The same is also true that if we love something so much, then we can become that love.

Regardless of how we feel sentimentally, emotionally, religiously or whatever else covers our vision, we have to recognize the facts Mr. Keshe brought to us. And that is every 10 years or so, under any excuse the Israelis destroy the buildings the Palestinians live in. It's not all done by bombing. In some cases the Israelis army goes into Palestinian areas and place explosives in the buildings in a specific way that the buildings come straight down into a perfect pile of rubble. And it looks just like how the 9/11 Towers came down in New York. This makes it very easy for the Israelis construction companies to come in and remove the rubble and start building the homes again. Millions of dollars that the Palestinians slave for overseas have to be given to the Israelis companies. This is never told in the media. And this is what we as KS and the future leaders of the new world have to understand if we want to bring a true peace to the world. This is why we have to put all of our intention for the success of the London Conference and the release of the new technology. Then these kind of conditions won't be able to exist anymore.

A question was asked about how to stop the terrorists. And this gave Mr. Keshe an opportunity to teach us to think deeper before we label what the world media tells us about who the terrorists are. That the governments themselves act like terrorists when they force people and groups to do what they want, while in the background officials are making money off of these decisions. But it is covered up in the media and interpreted for us in a different way. So the governments and war industries benefit by the ignorance of the public. As he says many times, "ignorance is bliss." And then he gave an example of how the Canadian government under orders from Hillary Clinton took him illegally off of the airplane he was on while passing through Toronto airport and interrogated and terrorized him for 11 days. We live in the sweet safety of our bliss, because we say to ourselves, well it wasn't on CNN so it didn't happen. But the Canadian government left documents somehow in his briefcase, which he then published on the Internet for all to see. But still we find it hard to believe. Nevertheless, the change will come when we stop being afraid to educate ourselves and have enough emotional strength to stand with the truth. If enough of us do this, then it will help the technology to be released.

People are clamoring around the world about saving the environment, but when Mr. Keshe offers them a car that doesn't use energy and is more or less pollution free and costs very little to produce, then they ignore it. The new plasma cars will have 4 MaGrav systems placed where the current shock absorbers are. They will form a Star Formation and thus create a soul or energy center. As the car will have emotion it will not run over any children wandering into the road, nor will it crash into other plasma cars, because

MaGrav positioning will be in effect. This is such a wonderful development, but the problem is the Chinese car manufacturers have already invested billions into producing batteries for electric cars, that will now become obsolete. Let's hope the wisdom of Chinese leaders will at least allow a certain portion of the market for the new plasma cars to enter.

Other Topics:

A summary of what we learned about how the Gans plasma system of our body with the half sphere brain and spinal column hanging down works. It is not equipped to handle heavy emotions, like what we have in our society. This means generally when people are unhappy with their life in any shape or form, it causes an overload in the brain, which becomes tilted and changes the brain structure, which in turn changes the body functions and after about 9 years into illnesses like Parkinson's and the rest. Up to now man never understood how his body, brain, emotions, and nervous system worked.

How our fields interact in the digestive system determines what illnesses we get;

We have to learn how to absorb the weakest fields in the U to survive and not the strongest. Vegetation contains much weaker fields and feeds more to the STM than eating meat. If man would have known this he would never have gone into eating meat. It's not easy to change over without damaging the health and the next generations.

Make available the knowledge of the freedom of the Soul to those we did injustice to. The Souls has no use for material compensations of this planet. Do not live with guilt - instead live with joy of giving or making available for others to take.

Oasis system has been tested - baffled the governments;

During Flight Session everyone could have transmuted (by the Soul).

Thanks for listening.
