

KS ambassadors for T - Plasma Cars - Changing Environment - 2 Fields Interact – Direction & Dimension Introduction to 505 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This workshop was again about preparing us for the changes that will come through the London Ambassadorial Meeting on Saturday November 11th, 2023. This meeting will not be just talking about the technology (T), but it will also be felt and experienced directly just like it was shown to the Chinese military and the Generals were covered in the dust of the materials produced by the fields of the plasma. So much so, that they had to convince the "super-scientists" that it was real. We still have about 6 weeks to prepare ourselves and wonder what really will happen in that conference, and will it bring the change we have been waiting for?

A lot of time was spent trying to prepare Knowledge Seekers (KS) for the conference and to behave in a proper way. For years we as KS have been studying the T and have used it, so we already know that it is real. But the ambassadors, Media, and other space scientists don't know about it, because it has been blocked. Therefore, the KS will be the ambassadors and representatives of KF and the plasma science by KF. We have to be mature and understand how big a responsibility this is and behave in a correct way. Also the KS will be there to explain to the others what they are experiencing. The people will start to wonder, that if other humans know about this amazing technology, why has it been kept from them? This conference is different than the other times, because now we have the Chinese government standing behind, and already planning for its mass production. In a way this will be the first time we are coming out into public. All of us should focus our Soul's through our intention for its success. After the Beijing conference he said he will continue with his tour around the world bringing the T to the people, as what he started before it got stopped by the Corona.

Mr. Keshe said, that the Chinese announced somewhere that they want to share the technology. And then he said that we are going to release the plasma car which will have no engine and will be based on MaGrav positioning. In 2011 the Belgians blocked the showing of this same car, but this time it will be explained in a way people can better understand. The MaGravs create a Soul and if a child appears on the road the two Souls will position themselves that no one is hurt. It seems obvious that the Chinese will manufacture these cars and it will be on the market within a couple of years. This will make electric cars obsolete by 2026. In the next part he said, he will personally invite Mr. Musk to the London Meeting. You might think, why would Musk come to hear about his own lost. Actually, it's an opportunity for him to embrace the eminent change and be willing to switch his manufacturing facilities over to also produce these new cars. The

question is, is his spirit free enough to be able to make this genius decision, or has it been bought out by other powers, and they will fight and be afraid to leave a sinking ship? In the next 10 to 20 years all the cities will have to be rebuilt to accommodate the new T.

This conference will bring the balancing of the two parts of society, the government and the citizens. Years ago the T was first given to the government as the "USB Key," but the western governments didn't do anything with it. Then it was given to us KS and we built the MaGravs but didn't go any further with it. Now both the governments and the citizens will be together in this conference and experience its power at the same time. This is the ultimate release of the T in exchange for peace as the citizens know what the government has and we all have to demand they take the new course. The governments will be made to understand that if they don't move on it, then the citizens can use it without them. Let's hope they understand this and someone is brave enough to get it moving. Also they all know the Chinese have tested the T and are getting ready to mass produce it. It's important that the Soul of the Universal Council is there to be part of this process. My feeling is that, it cannot just be the shock of what will be shown that will bring the change, because again they can block the Media. But rather, us as KS have to really want this change and if it is strong enough it will be the spark that will cause it to spread. And I believe this is at the level of our Souls so we all can add to the field strength of the change. Mr. Keshe mentioned we were not ready. But I take that as a point of awareness, and that we should use these 6 weeks to get ready by increasing our wishes and intentions, and start to feel the power we have inside us through our Souls and act on it. There are a lot of deep subtle Soul teachings today that can help us in this process.

As plasma scientists we have to understand about what it means to change the environment. In physicality when we change things like temperature and pressure we get a change in the materials in that environment. For example, if our bodies are in a room and we keep increasing the temperature then we'll burn up and turn to ashes. We change from a body to ash, simply by changing the temperature in the environment. In plasma science we do it differently, by changing the M field strength in that environment it changes what can manifest there. So for instance if we are in the London Conference room and we change the field strength in that room, depending on what strength we change it to, we might become invisible, or change to a dog, or just go back to our plasma fields. This is the simplicity and beauty of this T. But for us to remain who we are, then it is important that our Soul of the Man (STM) and Soul of the Physicality (STP) stay connected to each other as an entity and not dissolve back into basic energy fields. Because remember, as long as we stay together as a plasma, then we can manifest a new physicality (P) in a new environment according to our emotion, Inertia and the MG fields of that place. We can also just stay in the dimension (D) of the Soul or energy.

The famous fish tank is the environment and the drop of water is the plasma. But in that drop of water there must be the amino acid (AA) of the fish and the Soul of the fish has to want to manifest in the tank. The AA means Mr. COHN or C-O-H-N, this is a triangular Star Formation (SF) and through interaction creates a Soul. Mr. Keshe said they will try to manifest a fish in the Saturday night London Meeting. But the question he put to us is, what if the fish wants to manifest as a man, will we recognize it?

Recently, he told us a story about a fatal car accident he had when he lived in Manchester. What happened to him? In P he should have been dead. But he was standing outside his car and he didn't know how he got there. Did his Soul transmute back into its plasma fields, and then after the accident re-manifest his physical body? It seems that his Soul did it automatically because of his mission in life, but now we are going to learn how to do it consciously.

For us to be able to transmute we have to be able to expand our Soul over the P. If we think back to 6-6-2022 when Knowledge Seekers (KS) went to the Moon through the Linz Enhancement Unit, the first thing they did was to expand their Soul over the P. Once the Soul was out of its cage, then they could go where they wanted. It's no different for us now, only we are going to learn how to do it without the systems. He said it is so easy and we do it all the time. Everyday millions of Souls on this planet transmute, or what we call death, and we also transmute when we dream, so it cannot be that difficult. He said there is a technique and a T for doing it. It does not require 30 years of meditating in a cave, or doing Yoga, or through religions and all of that. But what it is, he has not yet revealed to us. Otherwise, the planet might empty overnight. It's something that we know and because we do it all the time we ignore it. Maybe this mystery is more than a strong emotion, which is difficult to generate. We'll have to keep wondering about this in the background.

When we can expand our Soul over the P we'll be able to absorb energy from the Cosmos and that will help us to elevate the Soul to be able to transmute. It's really for us to relax and ponder these things. There is a little trick to do this, that one day he will reveal to us. And then he described it like starting a fire. First we gather the kindling and light it and gently blow the hot coals until the fire takes root and begins to burn the wood. Maybe this is like the love of God taking hold of our hearts and igniting into the fire of wanting to serve the others that they will experience their Souls. Sometimes this happens when we experience a "little" act of kindness from somebody else. How to say? It's like feeling the love from that person and that they recognized that we are loveable. It sounds crazy and insignificant, but if you think about the society we live in, then it makes sense. Is a small act of love enough to initiate the transmutation? This doesn't have to be outside with another Soul, it can also be between our STM & STP. He did say, we have to learn how to interact the STM with the STP to initiate that spark to start the fire that leads to transmutation.

The new Monthly Flight Sessions have allowed us to gather more data about the interactions of the STM, STP, and P. Mr. Keshe has been spending more time explaining what the graphs mean to us. When a person is being lead by the Soul then the line representing the STM appears above the line for the STP and P. People can easily switch back and forth. For instance, during the session when he sees something is wrong because suddenly for a period of time the P line comes on top and the STM underneath, then he will ask the person what they were doing. And in one case the person said that they had received a phone call or were busy with something else during that time that was reflected on the graph. It's an amazing discovery that now we can monitor the Souls and

how they interact, and that it is scientific. There is a parallel for this in our lives when the Soul is in charge and when the P takes over. For example, if you do intense spiritual practice you can feel that you are aware of yourself and what is happening around. Then suddenly a thought comes and you get totally distracted in that thought then you lose awareness of everything else. And when you come back to awareness is the time you realize that you were completely absorbed in that thought and were unaware of what was going on around you. This is the same as when the Soul is in charge and when the STM or P take charge. These graphs are showing us much more about the reality we live in. This will help us become more and more aware of the existence and behavior of the STM and STP. With the awareness of these two fields will come control, and then the ability to transmute.

This leads us into the basis of the plasma science and the Knowledge of Creation, which is the "interaction of two fields." We are constantly reminded of the interaction of two fields like the Sun and Earth, mother and father, and Creator and Mitra, etc. The two fields interact to create rays, fields, and plasmas. When our Earth spins around itself in relation to the Sun it has a sunrise and sunset, meaning that when the two fields interact with each other we have the "daylight." It's my understanding that the daylight is caused not by the physical rays of the Sun, like most of us believe, but by the interaction of the two fields of Earth and Sun. Sunlight is actually transparent you cannot physically see it unless it shines on something, like a dust particle or a tree. But that shine or what looks like an aura is again the interaction of two fields.

Today he told us that not only does the Earth have a sunrise and sunset, but also the solar system, galaxy and every galaxy, and U. To me this means that each one is spinning on its own axis in relation to the next plasma, like the Earth to the Sun. The Sun then spins on its axis in relation to the galaxy and so forth. It's again a plasma inside a plasma, and on and on. The same basic pattern repeating itself throughout Creation. Then he said the dawn is the start of the interaction of the two fields of the Earth and Sun. Inside me a bell went off. Oh, this is also happening between the STM & the STP. If we are spinning then the time we face each other is the time our fields are interacting. But I don't know where to go from here. I feel it has something to do with the energy for transmutation and that we are receiving this energy without our being aware of it. Maybe during the time when the STM & STP face each other we can transmute.

I also feel this may have something to do with the Chakras, that they are a diagram of Creation like the Unicose, and are plasmas within plasmas like the organs inside the body, or the planets in the solar system. We go from one to the other until we include all of them. Like going from the Earth to Sun to galaxy to universe to the Creator - and the Creator includes all of them. It brings up a lot to ponder about.

Then he said, feel and understand the D of Creation, we travel from the Earth into the Sun, into the galaxy, into the U, and then into the Creator of the Unicose. It seems like we are going the reverse of the Creation time and following the plasma back to its Source. We can spend billions of years and never get there, or get there in 1 second. It depends on

which field strength the man decides to manifest itself in the inner sanctums of his own energy.

In the last months or year Mr. Keshe started to add direction to the dimension. Before he used to only say, "the dimension." Now he says, "direction and dimension." Today he taught us the importance of the direction. We can physically see the direction of our Sun, but not the direction the Sun of our Galaxy shines or the Sun of the U, or the Creator. But if we know the direction, then we can travel that way back to the Creator. We are deep inside all of these plasmas and each one has a center. For example, if we are standing on Earth and the Sun is shining to our left then we know the direction to the center of the Sun. So where is the center of the galaxy? Maybe that is above our head. And the center of the U is off to our right. We are a 3-dimensional plasma. And maybe the Creator is behind us, we don't know? First we have to learn how to see its light or its fields. The hint he gave us was to look for the side that is brightest.

There is another way to get back to the Creator. Every plasma has both M fields going out and G fields coming in, it's like the Yin and Yang. It's the same with every breathe, we breathe in and out. What if we could jump on the fields that are going back to the Creator, would that be the same as realizing Him in 1 second?

Do you ever wonder why Mr. Keshe doesn't show the T the way we want to see it in physicality? Of course he doesn't want it to become a magic show like what the Christ did. Instead we should learn ourselves the Knowledge of Creation so that we can become free Souls in the U. But there is another reason and that is, we have to discover what the M field strength of the things we want to change are, and then find a matching field strength to interact with it. This is how simple and easy the T is. For example, many years ago while he was living in Belgium he helped lots of people with their health conditions. He made "Health" Cups with magnets on the bottom and you either breathed through them, or filled them with water and drank and washed with the water. He said it took him years to discover how to match the fields of the magnets with that of the body so they could interact and he could achieve what he wanted to achieve. How he changed the fields of the solid magnets we don't know. This is the new work the Man will be engaged in once he finally accepts the new T. As he said the man will be so busy discovering these field strengths and how to use them that he will have no time for war. He gave us a hint today, and that was to take a bone biopsy of the damaged bone and match the Ca fields above the damaged area and it will correct itself.

Another way of finding M field strengths is through the power of the Souls. By positioning the STM & STP in relation to each other we can create the different field strengths we need to manifest ourselves the way we want in a certain environment. And this is controlled by the emotions. We don't have knowledge of this kind of positioning, but it sounds like it is something we do automatically and are not aware of it. Because he said, that as we don't accept this, he has to make these systems to show us.

Finally, he briefly mentioned that just as the scientists have discovered and can map out the brain and which parts of the body each part of the brain handles. The STM does a

very similar thing. There are specific energies as part of the Soul and they get transferred to the STP, which in turn feeds the P. We can use this knowledge to instantly feed ourselves.

Last week there was a comment by a KS about making a commitment to study the plasma science regularly and not just for entertainment, but to really try to go deeper in understanding. And then one day when she wasn't feeling good and was tired she decided to skip it and take rest. But then something changed in her mind and she kept true to her commitment. Surprisingly while she was studying her energy came back and she was feeling good. This is a very good example for all of us because in today's society it is very hard for people to keep true to their commitments. This is also a symbol of sincerity and devotion to the Knowledge and with these emotions we can go deeper and understand more. Thank you to the KS for showing us the meaning of the "Ethos of Mitra."

Other Topics

If don't see light it means our Soul has not expanded;
Your Soul knows your conduct;
The frock of Mohammad is the same example of fish in fish tank;
Billions will go bankrupt in matter state, but governments don't need to fear because the energy and food will be provided by the plasma systems;
The aftermath of Corona is the Ca disappearing from teeth - re-grow with plasma fields;
Mono-atomic gold becomes invisible - it's in Nano plasma state, field strength based;

Robert Kennedy - have to look at the family history and what they are part of. But if we put him in the system maybe he says he hates war, but the Soul is showing a bigger war being planned in the background.

Thanks for listening.
