

MaGrav is You - Body filled with MaGravs - Clean RNA - Vatican Deal Palestine - True Love Session Introduction to 513 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

In this workshop Mr. Keshe "turned the tables" on us. Just when we were getting comfortable working with the Nano, Gans, and MaGrav systems, he is now saying that we are the MaGrav. The systems we have been looking for outside to save us, have actually been inside us all the time. We simply overlooked it, and now we have become mature enough to understand it. After he said, 'there have been billions of prototype's for the human body,' it made me think that indeed the Soul of the Man (STM) is one unit, one consciousness, that we each are a part of it, instead of thinking we are separate and alone and doing all of this evolution on our own. And once a Sage said to me, 'it took millions of Germans to produce a Goethe.' There is a lot of wisdom and truth about the Creation in these words. We are part of the STM and we have matured enough to begin testing our different Souls and physicality (P). The whole teaching of today is constantly pointing inwards towards our Soul and the Soul of Physicality (STP) and it is for us to start to become aware of what we have inside us.

One thing we may never have thought of before is how the MaGrav is mirrored in our body. He reminded us that the tubes in certain organs like in the digestive system are like the turns and hollowness in the coils. It's easier to imagine that with the brain structure. But we always thought that those tubes were only for pushing and transporting food, blood and other things through them. Now we can think of them as having energy absorbing properties, but more than energy, they also transmute fields into what the STM requires to fulfill its emotions. We put Gans's on the coils to get specific fields and as the body is a big mixture of different Gans's its doing the same thing. It's creating field interactions throughout the whole body. Some of us never really thought about it this way before, and now it opens up new ponderations about when Mr. Keshe constantly asks us to think about the fields and how they interact. But we can not see the rotation of the fields, because this is occurring invisibly by the STM and STP as 2 reactors in our body. We can also think about the blood flowing around the brain as a rotation, and around the whole body. It's more easy to get the sense that the blood is creating M fields because of the Fe in it. As we don't have the basic training in what fields are and how they interact we can only imagine that there must be countless field interactions going on in our body that we don't yet have knowledge of. When the scientists finally open up and accept the new technology, discovering these fields will keep the whole planet busy for a long time. Maybe this will be our work, to first discover the field interactions in our body and then reflect it out into our planet, and then to the solar system, galaxy, U, and the Unicose.

What if each fold of the intestine is like a ring in the MaGrav coils that energetically creates a sphere? In a way, it would be like its own reactor. That would mean we have a lot of reactors going on inside us at the same time. I think Mr. Keshe once said that each little section of the intestine creates something specific the body needs, for example, Vitamin A. Then in the next set of cells would make up another sphere of their own and maybe produce Vitamin B. I mean the field strength of Vitamin B, and maybe through interaction with Inertia, certain fields, and emotions it becomes matter state manifestation of Vitamin B. The simple words 'the body is a MaGrav' now becomes alive. We think we need to have a ball, put Gans in it, and then find a motor to rotate it to get the fields to interact. Our stomach and intestines are doing the same thing, but through fields that we cannot physically see. But how do we fit in the fact that he said, the 2 Souls are the dynamic reactors? Maybe they create the overall environment of the body that is directed by the emotions, and then the cells as reactors interact in that environment, as plasmas within plasmas. There is a lot to understand and we have to open our thinking to the new way of plasma science. Since our scientists couldn't figure out that the body is a Gans, they made up the matter state ideas of only what they could see. But their knowledge stops there. They can't go further with it, because they have limited their understanding to their own narrow interpretation. Whereas, now we have been given the knowledge of how our body is actually made, and that use is limited to our own thinking. In plasma science we can change our body's function through our emotion to meet the needs of the environment. This is absolutely amazing and exactly what we need to travel in Space.

This made me think of what happens when people get their intestine replaced with plastic tubing, or if that really happens. It would be totally dead and unable to react with the body to produce what it needs. Then those functions would have to be switched to other organs. Or since we don't need to eat food anyway, maybe our Souls would partially utilize Cosmic fields without our knowing.

And when we put our hands for example, on our stomach and we feel a lot of heat. Nowadays, many of us say, 'oh that's the Qi or whatever.' But maybe that heat is coming from the interactions of all these MaGravs and Gans's we have inside us. This opens up a whole new dimension of understanding and the body starts to become intimate to us. We become part of what we call, 'ourselves' and this is where we start to take control over our own experience instead of being a victim of circumstances. This is the meaning of "last man standing" and today's teaching is making a big push for us to take control of our inner lives. Because everything we just discussed comes through the emotions. So this is why we are a MaGrav, the "coils" are inside us in different shapes and forms and our Souls make it all dynamic.

Man is getting ready to join the Universal Community (UC), but before that he has to cleanup his RNA and get the false emotions out of it. What does this mean? First we were taught that DNA is the physical manifestation of RNA. All of our past experiences as Man and of this planet are recorded in the RNA. When people think that they are a reincarnation of a past person, it is the information in the RNA that they are accessing. I think he said, that it takes about 15 years of experiencing something before it changes and gets written to the DNA, and that gets passed on to the next generations through the

RNA. So it must be the same with the emotions that after a period of time, or maybe the intensity of the experience causes it to be written on the RNA. We can also think of RNA as something that is more plasmatic and the source of the replication of the cells, and DNA as more physicality (P) and the physical replication of RNA. There is one thing I want to add, because I don't believe the "human monkey" on his own could have come up with the understanding of DNA/RNA, I think a member of the UC in the form of a human gave it to humanity as a gift to prepare us to join the U. The reason I say this is because humanity doesn't ever take the knowledge further towards its Source, which is the Knowledge of Creation. We just seem to copy the idea and use it. Today he mentioned that the UC has already given humanity huge amounts of knowledge, but humanity thinks that it came from itself.

So how do we cleanup the RNA? By following the Ethos of Mitra - Think, Speak, and Act Good. Someday we have to explore this Ethos in a much deeper way. But we already said, that how we live our life effects our DNA. If the Ethos becomes a natural part of our life then it will get written to the DNA and go back to the RNA and we'll see the beautiful result in our children and the next generations. Another way is to touch the "Love of the Creator" and that will change the RNA. The next Flight Session on the 22nd of Dec is all about experiencing the love of the Creator. He said, the session will be up to 5 hours long, because they want to shower us with love that it will change us. The "Love of the Creation" is something we have never felt before and once it becomes part of us we'll never violate the Ethos of Mitra. He is determined that humanity stops killing and said, 'one way or another, we'll bring the love to this planet to stop the killing.' Remember also that they are Universal Teachers, which means they come directly from the fields of the Creator, and not through recycled fields like us. So they must be able to share their field strength with us. It is my understanding, and especially after the last Flight Session, that Mr. Keshe has the power to gift enlightenment to any Soul. But they usually don't do this until the Soul is mature. He said he doesn't want many people in that session, so those Souls who have the true longing for God will be there, and nothing will stop them from attending. We wish all of them a great success.

It's not surprising then that the U has its own RNA, which would then be a record of the Totality of Creation. And that our DNA is only a partial manifestation of the Universe's DNA. This is the secret of how the Creation is made by the Creator. It's the micro inside the Macro. But then there must be something beyond our Creator. This is where the mind seems to stop. It cannot comprehend anything further, for now.

We all remember the fat we collected on top of the CO2 Gans Box. Now there is a top scientist, most probably in China in one of the most advanced technology research centers who with the help of Mr. Keshe has made amino acid (AA) directly from CO2. From the pictures you can understand what is happening. In one the scientist is rubbing his finger in it and tasting it, because he can't believe it. Whether or not they allow it to come forward is another question. What this means is that the CO2 will be converted directly to AA and then the whole planet will feed from it. In effect, Global Warming now becomes a blessing because we can feed the whole planet including the fish, birds and beast, and man without having to kill. We all can absorb it directly from the

environment plus breathing it in through the atmosphere. He mentioned that they are developing Space Cities in China and the plasma T will be used for feeding and everything else. They will be exact replications of life in Space and not the pretend space cities that they are building in the Middle East using solar energy and that kind of thing. The cities made in collaboration with KF will be true Space Cities.

Mr. Keshe went into a lot of detail about the recent developments in the Middle East conflict. The religious leaders of Vatican - Tel Aviv - Tehran met secretly and Iran agreed for the first time in 40 years to the 2 state system in Israel. But he gave a strong warning to Iran, that Vatican still has its eyes on taking over Iran, and don't be fooled. And the British are setting themselves up as rulers of Palestine to eventually get the oil fields for British Petroleum. Mr. Keshe advised the Ayatollahs to take in the Palestinians temporarily, so that they could keep their land. But now agreements have been made in the background for the Israelis to take over part of Gaza. The Vatican wants it this way so they can continue the wars in the future. There was added information and that is the 4 countries of China, Russia, North Korea and Iran have made agreements to help if Iran gets attacked. If that happens North Korea will attack South Korea and Japan. America is moving its naval forces around but won't be able to handle 5 war fronts. Mr. Keshe said that this is part of a bigger game, and the "end game." He wanted to stop it, but it seems it will have to be allowed to go ahead. After the warmongers "slug it out," the peace through new technology will hopefully be able to come forward.

This leads us to a very interesting topic. Mankind has created itself a philosophy that we can't know what love is, unless we first experience its opposite. He himself has often quoted the Chinese proverb that 'suffering makes you wise.' He then said, that he never accepted this and believes it is a wrong philosophy and that at that time, this was the only thing the man could understand. But now on Dec 22nd KS will have the chance to experience true love through the use of the T. To better understand this we should make the distinction between what we call happiness and sometimes we refer to it as joy. And that is when we are getting our way, and feel the pleasure of the body, then we say we are happy and joyful. We are not aware that this experience is in isolation and in the physicality. Whereas the "joy" of the Soul is like a plasma, it's universal. It's very similar to physical joy, but if you look deeply, it is very different. It takes maturity and experience to understand, and an innocent heart, and then it unlocks the inner door to the Soul.

At the end of the workshop Mr. Keshe told a story about a woman who found love. But first she had to understand that she herself was blocking the love. When she let go of her wrong idea about love and she gave her love to the others it opened everything up. Mr. Keshe is a true Master and understands the essence of love and the Knowledge of Creation therefore he can guide the others, if they will have the faith to listen and follow, and then discover for themselves the truth of what he was pointing to.

In the future our children will be taught about true love right from the onset of life from their parents and at school. That is quite the opposite of today. All these teachings have been recorded and will become the foundation of the education system. The children will

be taught how to control the Soul and the M fields from the first grade. But first they will have to know that the Soul exists, and this is the fundamental basis that is missing from our education, or should we call it indoctrination instead of education. The saddest part is that we don't know that this is the cause of why we have so many problems in ourselves and society and whatever the Rulers put forward as a solution will never work, because it is fundamentally flawed. We just have to be a little more patient as the fields are building up to the point of breakthrough. Let's pray that the 'glorious achievement' of the London Conference will go forward protected and with the great power of our Souls for change.

Other Topics:

Living on Earth as a body is hell. And living as a free Soul in the U is heaven;

Day of Judgment is when we decide (to put the love of the Creator at the center of our life and live from that point). The time of the judgment is through the maturity of the Soul and not by death;

When people get married, but have never been taught about true love, then they become adulterous;

Many of the health, mental and psychological problems in children today are because the parents are confused and following fashions and not understanding how to provide the proper nourishment for a DNA that is programmed for meat;

We don't know what our emotions are, nor that they are controlling us.

Thanks for listening.
