

Trapping Energy - History of T development - Heaven and Hell - Loving the STP - Armageddon

Introduction to 510 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today Mr. Keshe opened a very big door into our new life in Space and how we have to be responsible for ourselves if we want to truly be independent and free Soul plasmas in the universe (U). First he went over how we absorb energy on this planet through eating. We always thought we took the energy through the food, but we find out that eating is perhaps for more emotional enjoyment than actually receiving energy. Eating food itself counts for very little of what we take in. Actually, the digestive process creates "field seeds" in our stomach that attracts universal energy fields to our body that we absorb. Today he called the seeds, traps, they trap energy from the entire Cosmos. But the major source of energy comes through the air we breathe. In this process we are somehow able to make a "seed" from the material part of the air, that is similar to how our body makes seeds from the food. There are higher and lower energies we get from the air. But the whole purpose of all of this is to feed the Soul of the Man (STM) so that it gains enough field strength that it can elevate to become an independent Soul. And to be able to survive in Space we have to be able to feed the Soul.

There is a particular pattern as to how he has been sharing the technology (T) on Earth that might be interesting for us to know. Back in 2008 Mr. Keshe went to Iran and at Sharif University they successfully demonstrated lift and motion using the plasma fields. They were the only government willing to work with Mr. Keshe and agree to its peaceful application. But also remember this was matter state flight, or what he refers to as "UFO's." After proving the flight, he turned it over to the scientists to further develop the T in the background. We don't know how far they have gone with it. With this kind of development they have to provide everything for the human the same way the Earth does in space. So the obvious question the Iranian scientists and officials asked was, what do we do next when we arrive on the Moon or a planet? How do we survive in space? We don't know what the Iranians have been doing about this next step, but over the last 15 years Mr. Keshe started teaching humans as Knowledge Seekers (KS) how to make Nano material then Gans, MaGravs and working with the fields in agriculture, health, energy, and all the things needed to live in space. This is what we as KS have been doing all these years, preparing for our life in space. As the governments were not interested in working with the Soul, then he turned to us KS and started teaching us about the Soul. Because with this knowledge we can travel with the Soul anywhere in the U instantly.

Mr. Keshe taught the matter state plasma travel to the Iranians and then he taught the rest of humanity as KS, how to travel with the Soul. Soul travel for us began on 6/6/2022, when KS went to the Moon with their Soul as was promised. For this to happen he had to teach us, that as humans we have a Soul of Physicality (STP), a STM, and a physicality

(P). Some spiritual people on the planet have had certain ideas about these things, but nothing so clear as the way Mr. Keshe has been teaching it. This is knowledge way beyond anything we have ever had before. He gave it reality when he put 3 chairs in the Flight System in Linz representing the P, STP, and STM. We all got to witness what the KS went through and the experiences they had. In these last couple of years we have proven that we can travel with the Soul, but we still have not yet reached the point of transmuting the P. That will be the last stage when humanity is ready. He had a very big job to teach us about the Soul and for many of us it was very strange to relate the Soul with science, but now we understand why it was so important and the key to our life in space. He said we completed the knowledge and are ready to go to the next step. Today's teaching is about that next step and for us to start thinking about it. And he said this step can only be reached by us ourselves, and nobody else.

His teaching of today has brought us into a dilemma, and that is, are we ready to be totally responsible for our thoughts, feelings, and actions and become an individual free Soul plasma that is connected to the Totality and has the freedom of the U? First he taught us that when the Soul separates from the P, the STP transfers all its energy to the STM and the Soul goes on to the new destination. He used the example of a mother and child hanging from a cliff, the mother tells her child to take everything in the backpack and go on with its life, her time was finished. The STM is the child and he takes everything with him to his new destination and the STP dissolves back into fields. But now we have to pay attention carefully. The new destination is determined by the actions of the Soul while alive in P. This means that the amount of field strength the Soul has gathered on Earth by living the Ethos of Mitra determines where it will go in the U. The Soul has no choice, it has to go where it matches the field strength. Once this separation occurs the STM & STP will not be able to interact anymore. If we understand this, then we understand what they were trying to teach us when they taught us about hell. There are other options in life, but it means we have to have the knowledge of those options while we are alive. But first let's clarify this thing about heaven and hell.

The religions taught the "monkey" man about "heaven and hell" to protect him from himself. But then it all got twisted around and the whole thing was thrown out. The result has been that the ego has gotten stronger and stronger. The word "heaven" refers to when we do good things to others and ourselves, then good things happen back to us. We just have to look at our life to see that it's true. When we are thinking of others before ourselves and act on it, then others like to be around us, they like the energy, and they want to do good things for us. It seems to be a natural law of existence and the flow of M and G fields. When we think of ourselves first and force to have our way, then we see the opposite happening in our life. It's a contraction, even though on the surface it looks sweet and we seem to be getting our way, but in reality our world is becoming smaller and smaller. But to see this we have to want to look, otherwise, we make up another interpretation and fool ourselves. In our contracted life we become more and more alone. And remember, the worse punishment in the U is to isolate a Soul.

This is the part we have been denying, and we pretend everything is okay. We can very easily pretend we are not alone, and surround ourselves with people who agree with us.

Therefore, when we hear Mr. Keshe teach this about hell, we really don't believe it inside. For one thing we don't understand what he means when he always says the word "dimension." One of the meanings is, the dimension of our life is the boundary of the thoughts we have created for ourselves. In other words whatever thoughts I allow myself to think becomes the size of my world. So when he refers to "hell" as being in a dimension of life where you can't decide, many people don't understand what's wrong with that. This is because even when I am in my own self-made hell, it doesn't feel that bad to me, because I don't know what is outside of my dimension. This is the meaning of "ignorance is bliss." And this is where the dilemma comes in. If he would have left us alone in our ignorance, then there would not be any dilemma and we would be happy in our small world. Then we would slowly "inch" our way through the stages of life until we finally reach back to our Source, which is the Creator. In a way, we would go so slow that it would be called eternity. This method of transmutation occurs automatically at death, and we don't have control over where we will end up, and it lasts for the life of our Soul. However, even in this method, if we lived our life so pure, we could end up back with the Creator.

From what we just talked about it should be clear that most of us right now are on the track of "hell" and that when death comes we will go to the next dimension according to what we gathered here on Earth. And most of us will have no problem with it. But now with the new knowledge that was given today, there may be some of us who want to do more with our lives. We want to try to be able to transmute with our Souls to any D. This is also what he called, the next step in the process of the teaching. The KS have completed the knowledge of being able to transmute with the Soul, but what is the next step? The next step is being able to use the Soul to feed itself from the Universal Fields to be able to survive in any D eternally, and to be able to create whatever we need to live in the environment we want to live in. This will give us a complete life in the U, not a half life of going somewhere, but not being able to enjoy its existence.

Just transmuting our Soul somewhere is not enough. Because we could make a mistake and end up dissolving our Soul into fields, or accidentally hitting the Moon and if our field strength happened to match with a boulder, we could end up on the Moon for millions of years as a boulder. In other words we can transmute to another planet without having the full knowledge of the Creation and still get stuck somewhere. To fix this problem there is a way that we can create a "seed" that will allow the Soul to always stay together and never disintegrate. What that method is we don't yet know. And we can create another "seed" that will allow us to extract the fields of the U to survive. This is the same process we go through by eating food and breathing air on Earth. But if we learn to put this seed in our Soul directly, then we don't have to worry about eating or breathing ever again. But we still can eat if it is something we enjoy, but then what about the lives we kill to enjoy ourselves?

There is so much knowledge I hope we don't get drown. But we won't if we have devotion for Truth. The next wonderful bit of knowledge is that as humans we have a special case. And that is we have a STP, which now becomes very useful and we should in no way lose this opportunity by forgetting it and letting it die so we can free ourselves.

With this knowledge we don't want to free ourselves from the STP. Instead, we want to train and guide it to follow the Soul, and love it so much that it will want to become part of us forever. He compared this to physics where they found something called a "fundamental atom." This fundamental atom somehow goes through fission, which means it divides, or creates another proton and electron. This is Hydrogen in plasma science and the building block of Creation. Maybe the unknown part of why it divides is what we call, the love of the Creator to exist and want to manifest physicality.

I was wondering why we have to go through the process of loving the STP. Maybe it's because we were created from the P first, and not the Soul first. And now we have to love the STP enough that it will complete the process of becoming part of us. Otherwise, it dissolves back into fields, and our Soul goes on to other dimensions in the U. This is all so amazing. And does the rest of the Universal Community have this knowledge, or did he say that it was our job to spread it across the U? He said, there is no other way to bring the STM and STP together other than the emotions. I take that to mean love.

The reason why having the STP with us is so important is because then we already have 2 plasmas to interact with each other, and that is enough to create life and all the other things we need to enjoy and share life. Isn't that the Oasis system? But in that case he said somewhere, that our own Soul acts as the second plasma to the Oasis system. Having the STP with us is like having a piece of flint in our pockets, we can start a fire whenever we want. So we probably are going to start to have to get used to the idea that we have multiple people inside us. We don't want to frighten anybody, because everybody has it, we just don't know it yet. And it is really quite nice to have this other person. The STP is not bad, he just needs to be recognized by the Soul and the person and to be lovingly trained about his own existence. It's only when we don't have the knowledge and are afraid, that we create problems for ourselves. Recently, I woke up inside the sleep or dream and had a clear experience with the STP, and I discovered that he is not at all bad. He just needs to be recognized and we have to have the knowledge and patience and love. I think this is where we are headed with the teachings.

As far back as I can remember growing up there were always some "street preachers" who used to go around and preach the end of the world was coming and we should repent and return back to God. Last week Mr. Keshe was warning the Americans and Israelis that if they continued with their plans to commit genocide in Iran then their countries would be like living in the Stone Age. He said the Messengers could do that through their own will, they don't need reactors. Then today out of nowhere he said, the Iranians have 100,000 missiles pointed at Tel Aviv and that they said they have more secret weapons that the Israelis don't know about. They know only about the simplest one, I think that was the destruction of the American base in Iraq. And then Jordan expelled the Israelis ambassador and other Arab nations are expected to follow. He clearly hinted that what we understand as Armageddon, is on the verge of manifesting. But that this is good news for those who are waiting for everlasting peace to come. It seems that first all the warmongers have to "slug it out" over the Holy Land. And the biggest warmonger will lose its superiority, and then the new technology and knowledge will be able to come out. He said, definitely peace is going to win, but we don't know how things will take shape.

For me this shows that all the leaders know about the new T, about Mr. Keshe, and all the developments that are going on. They are only playing this game to keep the masses from knowing. It is such an unbelievable game of manipulation. Now what about Armistice Day this Saturday, November 11th in London? Countries can attend the Zoom session without anybody knowing, but how many will be able to go against their masters? He gave us hope in that some very influential person has agreed to attend Saturday, and it felt like he was placing a lot of expectation on this person. So much that suddenly he only wanted not more than 300 people to attend and mainly ambassadors and KS. In addition he said there was huge news from China and other nations that will have a big effect. And that a government, we are assuming China, will testify to the other countries that yes, they have tested the technology and it works. I am assuming they will reveal the results of the tests of the creation of materials from the plasma fields. That should shock all the governments into action. It's important for all of us KS to pray and keep our intention positive that the Souls of the leaders will be brought into the Ambassadors Meeting to bring the change. For myself I am not expecting anything to manifest in physicality, though it could, rather this is about us as KS accepting in ourselves that yes, we want the change, and then spreading it across to the leaders Souls through their ambassadors and beyond. Then if the field strength is enough we should see a shift in the attitude of certain countries, and then a crack, and then a call for more meetings to get the ball rolling. And if this fails then he will have to use the Chinese satellites to raise the field strength of the planet. Either way, we are moving towards the change in a way that it cannot be stopped.

Then the next step for KS is the November Flight Session where we will use the systems to help us create light between our hands. This light will come from the STP and the STM interacting with each other. Then finally the transmutation will start spreading amongst the KS and then others. Also the Head Units will be released to help in this process. It's all coming together in a very beautiful and planned way. It's for us to continue to open our heart and to want to learn and share and change. As Mr. Keshe said, we are the change.

Other Topics:

With your Soul you can change your physicality - with ours (the Messengers) we change humanity - and we know how it will take shape;

(To use the field strength of our Souls to make a change he said, we need to target the other Souls for change. Not to be too general, but have faith in the fields and the correctness of what we are doing. The plasma will have more energy to make change).

The STM is in charge of its own U - the body;

Religious leaders have no intention of changing or recognizing the Messiah or Methi, because it will mean they will lose power not be able to abuse others anymore;

The first of God's children, Moses, went wrong with the knowledge and he infected the other children to go wrong, meaning the Christians and Moslems. Now that has to be corrected.

Everyone who comes in contact with the Knowledge of Creation will be changed - no one will be left untouched;

Peace is going to win.

Thanks for listening.
