

# **Understanding the M Fields - Mixing Energies not Fusion - Ca Holds Together - True Love – China Accepts Introduction to 509 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

This workshop started out by going over again the importance of understanding the M fields and how to work with them. And that even after studying them for 10,000 years we will still just be in our infancy. This is all so that we can understand transmutation and transportation, as these are the cornerstone of the teachings. We know that transportation is just moving the physical body from point A to point B, we get in the car and get out. But with transmutation it is a totally different way of thinking, being, and living. It's not just moving around, it's knowing that we are the essence of Creation and part of everything. If we want to go from A to B then we just feel it and with our emotion we appear there. But how do we think about this, since our own experience at the moment is completely opposite? If we are an adult then there is always the constant fear of how to survive and get enough energy to continually live for some years. Mr. Keshe said today that life on Earth is one of the most miserable existences in the universe (U). And it's all because we don't understand the Knowledge of Creation, and that we are plasmas with M and G fields, that continually interact within itself and its environment. Even though we think we are matter state beings, we are still plasmas and our fields are constantly interacting.

One of the hardest things with studying plasma is that we want to see something happen. Okay we saw the Gans suddenly appear in the saltwater and that was amazing. But we didn't know what to do next. He had to "spoon feed" us by saying, put the Gans in balls and rotate them. Well that's just like the planets and the Sun. But why didn't we make that step on our own. Why didn't we ponder about how the planetary systems work? Nevertheless, we discovered that there are fields inside the Gans and that we can learn how to use them. Later we discovered that our bodies are actually made of Gans and that we are a walking, talking universe unto ourselves. Like a good father he has been slowly revealing the mysteries of the U to his children. Now that we are getting closer to the London Conference we need to make some steps on our own, so that this really can be the opening of the new technology to mankind. Maybe that's why he was encouraging us to take that jump into the unknown. Because at first we may be a little bit scared to be on our own, and it might be a little painful, but if we use our will to go forward then the maturity will start in us and it will be wonderful and beyond what we could have ever imagined. He is trying hard to help us make this step, and this is what the November monthly Flight Session is about. We will use the energies of our Soul of the Man (STM), and Soul of Physicality (STP) to create light between our hands. And if we can't do it on our own, then the systems will be set to help us. By having this personal experience we

should be able to ignite the process inside ourselves of accessing our own plasma anytime we want to.

As with all new inventions and discoveries we will have to go through a learning curve where there will be a lot of accidents and the plasma science will be no different. This is the reason we have to learn how to control our emotions, so that if we end up transmuting into a stone by mistake we will be able to get ourselves out. And we can even mix modes of travel. Part of the way we can go with UFO's and then switch to the dimension (D) of the Soul if we get bored. He went over a lot of wonderful things we have to look forward to in the not too distant future. This is why we should try our best to contact our leaders and scientists to take part in the London Conference. It's up to us to push it as much as we can.

Let's talk about the mixing of the fields and energy packs. Our scientists wrongly think that if they smash two atoms together they will fuse and make a new entity. Mr. Keshe said, this will never happen in the matter state and it's the wrong way of thinking. However, you can combine energies together where they can amalgamate with each other and become a new entity, then we can manifest them in the matter state. This shows we have taken the science to a higher level of understanding. This will be a huge benefit for making alloys, where we simply mix the energies together and then manifest them in what he called, a box, where they will take the shape we want to have and we don't have to create a form. Maybe it will be like the "3D printers." While talking about mixing energies he started referring to converting mass into its energy form, and then back into mass again. But this is what we do when we transmute with the Vertical Enhancement Units. Maybe there is a relationship here with mixing energies during transmutation that he wants us to think more about, and consider different possibilities of working with the fields.

Something that I am wondering about is that, if we can mix energies of plasmas, then we should be able to do the same with the mixing of the Souls, and how Souls join to each other. Maybe Souls can join just part of their energy, or imprint their energy on to another Soul. And would they have to do that before the birth to get like an "alloy" of a Soul? There must be a whole science of how to mix the energies of Souls that one day he will open up. Because when the sages or prophets talked about the growth of the Soul, it was understood by the followers as reincarnation in the physical dimension. But we know this cannot happen that way. We'll have to wait to carry this discussion further when we mature more in the science of plasma.

Then Mr. Keshe went into a big teaching on the importance of Calcium (Ca) and why it's the seed of every cell in our body. It needs to be listened to many times and then try to tie it into what has already been taught in the past. What I understood is that we should think of Ca in terms of its M field strength and not the matter state hard stuff like bone and teeth for example. It is those things, but only in the matter state. As a M field strength Ca is the common denominator strength that holds everything together, the muscles, organs, and it is the dynamic plasma in the blood, all of this together gets gravitationally attracted to the bone and in a way, holds the whole body together in its shape. This is done

plasmatically, and the first thing we'll compare it to is the Earth and then wonder why we are not sphere shaped. Maybe it's like for example, each bone section of the leg gravitationally pulls everything in that section to itself. So like all the different bones in the foot pulls all the muscles and veins towards itself and holds that in place. And if the foot gets cut off it still remains intact as a foot. At the same time the foot acts independently from say the thigh bone. That way there is no conflict in the fields. Also keep in mind that the Ca is in every single cell and holding them in place. This makes sense and gives life to the words that we are like walking universes. We have the equivalent of galaxies, stars and planets within us and they all work from the same universal pattern of Creation. What we see in the stars is also how our body works. And if we learn how our body works we'll be able to travel and live in the U.

He also compared the bones to Black Holes in the sense that they pull everything to it. Our scientists don't know that Black Holes also provide energy like Nano materials. So now we understand why we are being held together as a body, it is all done by M fields, and he gave the hint when he said, if he makes a magnet of Ca and places it next to us, we would all turn into jelly on the floor. This is like a key that opens a door of understanding how we exist and how we will exist when we travel throughout the U. The first thing we have to do when we land somewhere is to find out what the "Ca" M field strength of that planet is, because most likely it won't be Ca. What if it is Sodium (Na), then what will we do, and how do we manifest ourselves with that knowledge? We will do it the same way our Soul did it here on Earth, but at that time we were not conscious of it. It was done automatically for us. The implication is that when we consciously travel somewhere we'll have to do it through our emotion and our wish to exist on that planet. Our Soul will match the field strength of Na and take that as the seed for replication of all the cells needed to create a body in that environment.

So there must be much more to Calcium than the word and some white powder we call Ca. The M field strength of Ca is used for our body because it has a spectrum of fields in it. It's not just something simple, there are more dimensions to Ca that allows it to do all these amazing things. For example, the Ca in the bone structure of our ribcage is really like a M field chamber that controls the function of our lungs and heart. We never could have guessed this without the knowledge Mr. Keshe has shared with us. The proof is that there are no muscles in our lungs, they are all outside it. And then we just travel a little farther down the spine and we come to a zone where there are no bone structures. The power of the Ca inside the vertebra is strong enough to hold all the abdominal organs in their proper place. It's like the abdominal cavity is its own planetary system equipped with gravity and everything else it needs to survive and at the same time be in communication and cooperation with the rest of the body

If you think deeply about this, there is no way any "modern" doctor can accept this. Because it looks like something magical to them and not scientific. And yet they themselves cannot explain what holds the organs in place. They might say, well you can't prove that, because we cannot measure those types of M fields. This is where a lot of us KS have problems working with our MaGravs and Gans's, how to become sensitive enough to feel the fields. Or at least we have to have enough faith that the fields are there,

and then begin to work with them. And then he'll say something like, if we can control the Ca strength in the vertebra there will be no diseases, nor cancer. This is interesting because in Acupuncture the strongest treatment are the points on the back along the spine that connect to the organs. Those Masters shared part of this knowledge with us, and if we follow what they say we'll get the benefit. But now we have to go a step further, we have to try to understand the meaning of what we do, and connect our emotions to it. The emotions again are the key to working with plasma.

While we are on the topic of emotions Mr. Keshe tried to give us more understanding of the different kinds of love we experience as humans. It's very difficult to talk about this subject with Western people because of the unknown conditioning in the background and the constant bombardment of images and ideas in the foreground. In general, what society regards as love is the physical love between man and woman and the superficial love between family members and friends. And yet it is very rare to find one of these relationships that are in balance. He called the physical love "hunger" and if you go deep into it, there is a lot of meaning behind these words. When I am hungry I want to satisfy my needs and desires at all costs. In relationships people of physicality (P) start to become sentimental and the relationship becomes more of a projection from un-dealt with childhood wounds, and when a little pressure is put on the relationship it tends to fall apart. So Mr. Keshe used the example of loving his child. He explained it in a very skilful way, because loving our children can also come from "hunger," and maybe that's why he said it was tricky to understand. The key phrase was loving just to love. There is no hunger in that. But again it requires experience and maturity to deeply understand this, and if we do experience true love it changes our lives. And then he said most people never experience true love in the whole of their lives. We talked about this further in previous teachings where you can study more about it.

In the West we are way behind in the release of the technology, because we are still waiting for it to be shown on CNN. While in China it has been demonstrated again and again to the leaders and top scientists so much, that now they have accepted that the new science has arrived. And even though some scientists see it, they cannot wrap their brain around what they are seeing. It goes against everything they worship in the books they studied and the degrees they gave their lives to achieve. The Chinese have brilliantly decided that they have to train their own academicians to confirm the technology. They are in this process now, and we hope KF will be assisting them with this.

This is a crucial moment and we need to pay attention to it carefully, because if they chose the wrong people to confirm the technology we will end up with the same mess we have now. The "wrong people" means those who see the world through the eyes of the P and don't know the Soul exists, or that life is created from the energy of the M fields. We will have the same problem in China, because since Chairman Mao the government has brought up everyone to be atheists. Unfortunately, people don't understand that so called religious people are also trained in the background to be atheists. By "atheist" we mean people who believe there is no "Being-ness," and we can never be the Being-ness. Then we have the potential of corruption with the huge sums of money being transferred through industrialization of the technology. We have to hope and pray that Mr. Keshe

will continue to have a say in how the technology will be implemented. Right now in China they are planning for implementation of the plasma technology over the next 2 to 3 years. In a way, the London Conference is a crucial moment in that, if the West will open up and also accept the new T then it will create a balance with the developments in China. But unfortunately, he said there are pressures being put on KF not to show the T in London. Therefore, we as KS through our Souls have to increase our intentions and wishes for the release of the technology on November 11th. He has referred to the power we have as Souls many times, and that we don't need to go on the streets to use it, we can do right from our homes and where we are now. The call goes out for KS to be aware of the crucial moment that is upon us, and to use the power of the plasma that we have been generating in ourselves and with each other over the past 10 years. Now is the time to join together and bring the change. This a job also for the Universal Council, but we cannot wait for them, we have to act on our own and join through the Souls. We have a little more than a week left to prepare. China has also agreed to attend the London Conference.

Last week Mr. Keshe received insider information that the Vatican and Illuminati's through the Americans were going mass murder the Iranians and rob their Central Bank, like they did in Libya and Iraq and attempted in other Middle Eastern countries. The time has passed and we are grateful, but we are not out of danger because it was all kept secret from the public. It appears that they took Mr. Keshe's warning seriously, but we'll have to wait and see. Last week two interesting videos appeared on social media. The first was from CNN and they didn't know it, but in the background sky they showed 3 lights in the sky that intercepted or absorbed a missile being fired by Israel. Then later another video appeared on Tik Tok showing the same lights but from a different angle. In this video one can clearly see three lights in the sky turn on, and I counted the missiles, there was a barrage of about 50 missiles that the "craft" absorbed. It was amazing to watch. That was probably \$50 million in missiles, intended to kill hundreds of people, and destroy millions in property, and it was all absorbed into fields. This was a beautiful demonstration of the T that was also on CNN. If you listen to the man who presented this, he got so excited and understood that a shift was happening. And he said, if you are not spiritual, you might want to think about becoming spiritual. That man had no understanding of KF plasma technology and yet his Soul knows what is coming. This is a good feeling in which to start the following workshop.

Thank you for listening.
