

# **Promised Change - How we are Created - STC transmuted to STM - Transmutation in 2024 Introduction to 517 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

The promise by Mr. Keshe to bring change to mankind came with today's teaching, that also "happened" to fall on the day celebrated as the Birth of Mitra. If we ask ordinary people where they come from and what their life is about they usually say they don't know. If they are religious people then they might say they come from God, but they don't know what that means, or they don't know the science behind it. He has taken many years to slowly build up our knowledge bit by bit, up to today's revelation. We first had to learn about Nano materials and how they transform into Gans's by creating the correct conditions. Thinking back to the first time we made the CO<sub>2</sub> Gans and how magical the feeling was when suddenly the saltwater became cloudy. The feeling was very similar to watching when a sperm penetrates and fertilize an egg, and then suddenly all we can see in physicality (P) are the cells dividing, but one feels the unseen power behind it. And then we had to learn about M fields and Cosmic Rays and all about field interactions, because that is the process by which we are created - field interactions. And then he brought us into the Soul, which is the conscious control center of all these interactions in the middle of our head. All this would just be dry information if he did not bring into the teachings about emotions and love. In these few sentences we can see how much we have learned to prepare us for today. There is a huge amount of knowledge behind these sentences that we haven't mentioned. I will try to summarize what the teachings meant to me.

First, we will start using a new acronym STC for the "Soul of the Creator," which we now have discovered is an essential part of the "Soul of the Man (STM)" and is how we are connected to the Creator. He said, the sperm and egg come together and through their interaction create a plasma at the field strength of the Creator. And that a Ray of the Creator is hidden in this interaction. The mystery is that the egg and sperm create the GM field strength of the Creator's Soul. And that in essence the STC has become the STM. The Creator has become us. The M field strength of the Creator manifests itself as us. We were taught to look outside for the Creator and all the time He has been within us.

We want to try to take this teaching to a new dimension (D), because we have heard these concepts before and have read them many times and have memorized them, so if we leave them at this level they might not have much effect. We have made the Nano materials and Gans's, so we can use them as a doorway into the Knowledge of Creation. Let's analyze the CO<sub>2</sub> Gans Box. The Nano coated Cu plate is like the egg and the Zn plate is like the sperm. The Box is the womb of the mother and the saltwater is the fluid in her body. The mother is like the oceans of the planet where life began. After we setup the Gans Box we start to see the cloudiness form in the saltwater, and billions of Gans

particles are being replicated to form different field strengths of CO<sub>2</sub>. If we watch a video of a sperm fertilizing an egg we see it penetrate into the surface of the egg, which is huge like the proton in respect to the electron. Then we can understand the Infinity Loop interaction that starts between the center of the egg and the sperm. And suddenly we see cell divisions starting to occur and they increase to billions like the Gans production. If we make a new batch of Gans with this knowledge we can ponder more intimately the process, and feel that we are watching the basic pattern of Creation. This will open up a new knowledge in us, but it will be something that we feel and connect it with our Souls. It can become an enlightenment of how we are created and where we came from.

So how do we connect this with us, and the body we see in front of us? First of all the body of the CO<sub>2</sub> is the white material we see in the box. Our body is different because more Souls are involved and there are more field interactions, together with emotions, and the womb of the mother has more emotions than the plastic box, and the STM is directly connected to the Creator. I am thinking, is this why our body is more complicated than the simple body of the CO<sub>2</sub> Gans? But the whole process of creation is the same in both cases.

We think that transmutation is when we move ourselves from one place to another, or to Mars, another planet, or even another galaxy. Now he is asking us to think of it in a deeper way as in how we are created from the Creator. Then he said, the STC transmutes as the STM and becomes Us, who we are now. This is our connection to the Creator. We thought we were an orphan and now we find out that we have been the King all the time, but we didn't know it. We have always existed in the essence of the STC. Sometimes in the quiet, we may have that feeling in the background, that we have always existed. But it doesn't make sense to us when we look at our life and how we are living. As a Soul we have been created as a gift of love, then why are we behaving so badly and doing all the wrong things? And why have we let the one who loves us so much down? Mainly, it's because from the beginning we never learned how to behave correctly. Therefore, in a way, the suffering we experience in physicality is to bring us to the correct behavior. But as many in the religions didn't have the knowledge, we ended up getting abused and enslaved by them. It wasn't just the religions, it spread to the whole society and the Rulers joined with the priests and together they could abuse the rest. This is why he said we all have "Fibromyalgia" from our abusive way of life. In the end, we allowed the abuse and that's where we are today. And collectively we have absorbed all the sins and abuses we've done to each other. Now it's for us to understand clearly our situation and our limitations and work from there to retrain ourselves with the true Knowledge of Creation.

In our limited way of thinking we may be tempted to say, well look at all this suffering, if we come from the fields of the Creator, then there must be a fault with Him somewhere. This is where it will be hard for a lot of us to accept some kind of answer. Maybe it's better not to give an answer. Rather we can think about what we do understand. Take for example, how much a mother suffers giving birth to her child, but when the child is born she is lost in the love of her own creation that she forgets the pain. Mr. Keshe said, that the Creator did not plan and say, I will create mankind from the fields He emitted as

Cosmic rays and the rest. We are the result of trillions of interactions from when the Rays first left the Creator. He trusts that whatever will be created from the Fields will be good. And if you look at everything from that perspective, they are good, because in essence, everything is a part of the Creator. And he said this is the way we should think of our future creation, and that when at death we transmute to a new dimension (D), it will be good. This is the general rule, but there are exceptions. If we have developed enough field strength through living the Ethos of Mitra and serving others, then if we see that in our future manifestation we will not be able to show the beauty and love of the Creator, we can remain longer in the D of P until we gather enough strength to achieve it.

He gave us a hope that someday if in totality, we as a collective Soul of the Creator, would become the Creator, then we could understand how to elevate all the Souls. Does this mean the whole of the Earth would be corrected, as well as that of the U, which are all within the Creator Himself? Then he talked about the possibility of STC dividing Itself and creating another U and a new race. I understood that this would be outside of the Creator, and the other Creators would have to make space for it. As we are a race of this Creator, wouldn't we have to be corrected first, before He creates another race, that could possibly carry the mistakes of the Man? There is a lot more to discover.

He taught us some more things about the transmutation process. While we are transmuting we can use that opportunity to see how we effected other Souls during our lives. We can see what suffering we have caused them. And even people we think we have helped, we can see if it really was help, or did we damage them more. The reason to do this is to discover where we stand as a Soul, and as we are still in P we can try harder to change ourselves and live better. We can also discover where we are going to go after we finish our life in P.

Another point is that we don't always have to expand the Soul beyond the physicality and create an envelop for transmutation. We can limit the expansion to stay within the boundaries of the physical brain. It was hard to decode, but it feels like there is an important teaching here. He talked about it as a "turning point" in ones life. So I started to think about a turning point in my life and related it to what was happening between the different Souls. He said, the STM and STP interact at the level of the brain and the two matches the pain in their emotion. Once we get established and identified with our accepted role in life it is extremely difficult to make a change. When he mentioned the "pain" then I remembered, that there was indeed pain, when I started becoming aware that what I was doing in my life was not matching to what I now know was, what my Soul wanted me to do. In other words, the STP & P were conforming to what society and the others wanted me to do out of their fears and lack of understanding life, and I was not doing what I knew I was meant to do. I believe this is where the 3 emotions of the STM, STP, and P were not matching each other and it resulted in conflicts and unhappiness in my life. What triggered me was when he said, you will feel something inside and it creates the same emotion in the STM, STP, and P and it touches you so much that it becomes a turning point in your life. Instead of the "same emotion," maybe we could say that 3 emotions came in agreement with each other. And this in itself gives the strength and surety to make the changes needed in our life.

From today's teaching he seemed to be wanting us to consider that transmutation is not just traveling from A to B. We can do that in spaceships and that is the work he is doing with governments. They are not interested in traveling with the Soul at this time. As he said before, the only way you can travel in deep space and experience it is through the Soul. This is why he is working with us KS to be able to elevate our Souls. In transmutation we are actually creating a new life form out of our Soul. This is why we need to understand about loving and giving, and also being able to receive love. In a way, by accepting to do transmutation then we are agreeing to live a pure life by the Ethos of Mitra. He said, the STC transmutes into the STM and that becomes You. So when the Creator transmutes within Himself, the essence of Him is always with the new creation. The same must be true with our Soul and this is why we have to live by the Ethos. The sperm and egg are only the physical covering, it's really the transmutation of the STC into us.

This new year of 2024 is the year of intensifying the elevation of our Souls. We saw this in the Friday session of the 22nd where those who wanted could stay connected to the system all day. And the 6 month program from January to June will be all day sessions. The time of transmutation is getting closer. At the same time he is bringing out the Satellite Souls. They will act as transmitters of the fields, for the others to do transmutation. It's amazing how all this is coming together, the Satellites are selected by their own Souls to participate, and these Souls are givers and he said something like, through the process of helping to elevate planet Earth, they will go through special growth of their Souls.

Mr. Keshe gave a detailed teaching about the process by which the planet is heating up. What I understood was, that the elements that become pollution such as Zn, C, P and others get attached to the amino acid (AA). Then the CO<sub>2</sub> has I think a plasmatic link to the AA and it gets glued to the CO<sub>2</sub>, which together as a unit become the air pollution and this is what heats up. This is not understood by our scientists, they talk about it in a different way. He said the only way to handle it is to extract the C from the CO<sub>2</sub> and this dismantles the unit and the elements drop to the earth in matter state. This is what we do in our CO<sub>2</sub> Box, we attract C from the environment which manifests as CO<sub>2</sub> Gans. The AA that is released can become food for the rest of the planet. It's the oiliness that gets on our skin and on the surface of the leaves, and then we can transfer the energy to our bodies. The AA also settles on the oceans and becomes the crude oil. The CO<sub>2</sub> Buildings that they were going to construct some years ago were set to do this process. But we also have to consider other effects this could have in the world. And this is something that the governments would have to jointly decide on.

As today we are celebrating Mitra's birthday we should highlight again how she came to Earth and was touched by its beauty and because she loves the Creator so much she wanted Him to share in it. For Him to be able to feel and experience life here He had to incarnate on Earth. In this way he could understand what Mitra was feeling. "He ended up here as a creature." What does that mean? Is that Mr. Keshe? Showing His love for Mitra was more important than anything else, and He has been pouring His love into

Mankind and nourishing it, for it to mature. And we see this rapid growth in the STM. But it is not just humans, He is devoted to all His Creations. To Him, they are all pure in essence. From this we can understand the limitlessness of the Creator's love. We see this also in the STM, which is a transmutation of the STC, and therefore has the power to transform the STP & P at any time. Instead, he endures the pain and suffering of allowing them to go through the process of maturing.

Today Mr. Keshe has unraveled the deepest secrets of Creation to the man, as a gift to Mitra. Now we can comprehend the reason for Creation, who we are, and where we come from. This is a huge enlightenment and a beautiful gift to celebrate Christmas and now we even understand the truth about Christmas. As we approach the New Year, we as Knowledge Seekers can do our best to be able to transmute in 2024.

Other Topics:

Mental work and Soul work require a lot of energy and this is why we might crave chocolate and things like Coca-Cola that quickly delivery energy. This also applies to when the STM elevates STP. We get the enjoyment of the sweet, but it is mainly for extracting a seed to attract the energies of the U;

I am not a Prophet - I'm a teacher and I help you discover and correct your mistakes. But it is your job to learn. We cannot interfere with your process of learning, but only to guide and not become a manifestation of another false prophet;

How a Prophet fell in love with 6 year old girl and changed the laws of his religion. This led to a custom of old men marrying 9 year old girls. Does that Soul continue to grow?

Cultural customs regarding position of STM during sex effects emotions in children;

When don't feel anything in the sessions then it's time to mature yourself to the next level. Which basically means to do some spiritual work on yourself;

Christmas is actually a celebration of the birth of Mitra. Many Roman elites practiced Mithraism and the religious leaders of the time agreed to separate the two. The 3 days added represent the 3 Kings of Persia, or the Ethos of Mitra - Think - Speak - Act Good.

Thanks for listening.
