

Special Session with Headphones - Summary of T - Unblock Fear - Satellites Souls - Enlightenment

Introduction to 516 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today we got a taste of what is to come in the near future, when hundreds of Knowledge Seekers (KS) from around the world connected to KF systems to receive plasma energy. The session took the whole second half of the teachings, where we remained in silence receiving the energy. For many people it was an amazing experience that is preparing us for the next step in this process of awakening to our own Soul. In the first half of the teachings Mr. Keshe summarized the work of the KF over the past 40 years. Of those 40 years only about 15 years have involved KS. It's important for us to understand the evolution of the technology (T) and how quickly it has evolved into what it is today.

Basically he started out teaching in physicality (P) because that is what we humans understand at the moment. First were the rotating gas reactors with motors and all of that. Then he went to Iran and proved the theory by creating "lift and motion." It was a huge step that needed to be done with a government, so the others could accept it, at least secretly. He went back to Europe and started teaching KS about Nano materials and Gans's and started demonstrating that the M fields indeed do exist, and how to use them to create matter, food, medicine, and other things we will need to survive in Space. These two parts of the T had to be done first because humanity denies the existence of the Soul. With the development of the lift and motion and use of the M fields to create whatever we needed and wanted, we reached a level that we could travel to the Moon for example, and live inside a plasma dome, but not have contact with the environment of the Moon. We would have to remain at the field strength level of the Earth. Without understanding of the Soul Space travel we would remain limited to this level of development.

For mankind to travel into deep Space he has no choice but to recognize the existence of his own Soul, what we call, the Soul of the Man (STM) and how to use its power to create and sustain life anywhere in the universe (U). It's not a matter of theology, as we have been fooled by the clergy to believe, rather it's a matter of the true science of Creation and how Creation works. By teaching us about the Soul Mr. Keshe pushed us "over the edge" and carried us to a new level of understanding. Even though many KS left because they could not accept the fact that we have a Soul, which is also the key to our freedom and space travel. And because of this move, the T has reached the point of releasing new systems where the STM becomes the center of the system and can carry both the P and the Soul to the new destination. Not only that, it can also feed and sustain both the Soul and P, while at the same time the Soul remains independent and can separate from the system to go and do what it wants. So for example, it can carry both our

Soul and P to the Moon and we can live there in the spaceship for as long as we like. However, we cannot leave the spaceship as a physical body. This is because the M field strength of the Moon cannot sustain our body the way it is. The only way to enjoy the environment of the Moon is to transmute with our Soul into the dimension of the Moon.

This is the next step he took us to, which is the transmutation of the Soul to a new destination and creation of a new physical body that is suited to that environment. The process of transmutation involves converting the P of the man back into energy (together with the Soul of Physicality (STP)) and embedding it into the Soul, then going to the destination and re-manifesting a new P according the MG field strengths of the various parts, such as the Inertia of the destination, the strength of the environment, and our emotion of how we want to present ourselves. So in effect, we create a new body suitable to experience the new environment. The problem we face now is the fear of going through the transmutation process for whatever reason.

He gave a nice analogy of one of us KS going with a spaceship to the Moon but being afraid to transmute and go outside and enjoy the Moon's environment with our friends. We may sit there for 10 years in the spaceship watching our friends through the window enjoying themselves. One is moving around as a stone, another is a Moon Tree, and another looks like a lizard, because that's how Suzy could manifest herself on the Moon. And then we sit and wonder what we would look like if we go out there. He ended it by saying we could actually change from one form to another based on our emotions and desire. This story gave such a nice feeling of how free we actually are. And this was only the Moon, we have the endless expanse of the U to explore.

Then he spent a lot of time trying to convince us to trust ourselves and to gain confidence and in a way, to look in the mirror and see how foolish we are to be afraid. And that he can even develop systems, which he will do next year to help us connect to our Soul. But even then we still have to overcome the wrong thinking we have about ourselves. Mainly the ones who say, 'I don't feel anything,' this idea comes from denial of the Soul's existence. And this makes a huge sense since we are brought up in an atheistic society where we are taught from the beginning spoken and unspoken, that there is no Soul. The strange thing is, that as a child we most likely feel our own energy inside us, but then we are beaten into submission and deny its existence to get that physical love from our family and friends. Basically, it's that feeling of wanting to fit in and to belong somewhere. But it's really the love that we want, and we want to share it so that it grows. As a child we are open and are sharing that love, and then the others don't want to receive it so they try to shut us down. And this creates a wound on our hearts. And maybe this is what is blocking us to feel the love from the systems. Mr. Keshe is on one side pulling and helping us to come forward, but we have to do our part on our side and become aware what blocks us, and then want to get free. This is how far we have come with the T. We have reached the point of today where hundreds of us from around the world are connected through our headphones to feel the love of the Creator. This was only the start. It will continue to grow and get better and better from here.

During the Session of next Friday on the 22nd of December we will have the ability to give this love we experience to anybody we want. Of course, they have to want to receive it. The D of the Soul does not lie and is transparent. We may want to give it to our partner, but we might find out that our partner is not with us in the D of the Soul, or for whatever other reason is not wanting to receive it. This love we will receive has the power to bring enlightenment. The practice for us will be to learn both how to receive the love and also give it. And then we'll understand why the Creator loves His Creations so much, because the more He gives love, the more He receives love, and then He continues to give more love, and this grows into the Unicose. In a similar way, as more KS get enlightened it will grow into a spark that will cover the humanity.

On Friday you can give the love to whom you want, it could be a dog, a child, or a stone. It's for you to decide. He said, next Friday will bring a new D for those who participate, because in giving you'll learn to receive unconditionally. This receiving unconditionally will be the key to becoming a "Satellite Soul," which was started some years ago. By giving the KS will open a channel to the unconditional love of the Creator, and then they will spread it across the planet to all Souls. We say all Souls because now we understand that even stones have a Soul. I am sure this includes metals and all the elements. This would then open the entire mass of the planet to receive the love of the Creator. And the Satellites Souls, through their enlightenment will know how to distribute the fields to everything.

One last thing in this workshop before the period of Silence started was that we have 2 guards imprisoning our STM, besides the M fields of the blood flow around the brain. First is the religions, which we have solved because now we understand that we are directly connected to the Creator and no longer need to be abused by the false intermediaries such as the Popes and Ayatollahs. And secondly, is the subtle and close guard of the STP, which doesn't feel connected to the STM. We have to learn how to work with the STP, as it is the key to our freedom and ability to travel the U. With the two plasmas of the STM & STP we'll be able to travel and create whatever we need to sustain our existence anywhere in the U.

Thanks for listening.
