

2024 Start of Change - Power of Myths - Still Pagans - Remaining Tribal - Souls "Flat - Lining" Introduction to 518 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

The best news yet is that the change has been set to start by our forefather's Soul for 2024. He called it an evolution in science and the beginnings of mankind being able to transmute first his Soul and hopefully later this year, transmutation of the physicality (P) from one position to another. It doesn't matter what the Maya Calendar said, or any of the other calendars, the decision for it has already been made. Mr. Keshe did not make the decision, and if you have to blame someone, you can blame the Soul and not the man. So in other words the current humans have not been able to make the decision, or maybe it would have happened sooner. He said, somehow all the different parts have become ready for the change like the energies in the environment and the fields of the universe (U) in the coming weeks will be reaching the point of maturity that the man can go through the evolution. The technology (T) as well as the nations and religious leaders are all ready for the change. 2024 will be the "Year of Judgment" and perhaps this means we will "judge," or come to understand the truth about our own creation and learn how to release the Soul of the Man (STM) from the cage of P. And as the humans mature to it the rest of the beings will follow, and I believe it will spread throughout the U.

This means we'll become part of the Universal Community (UC) consciously, instead having to wait until death when the Soul separates from the P and is then free. Anyone can be part of the UC and you don't need a P to communicate with each other. So we don't need all this stuff we've been expecting through the movies such as UFO's and aliens and that kind of thing. We'll communicate through the feelings of the Soul. And now we can choose not to die, but travel with a fresh Soul across the U for thousands of years. But why would we need a fresh Soul, since we'll manifest a new P according to the place we go to? I understood we always keep the same Soul throughout eternity until the field strength eventually reaches the point we can dissolve back into the Creator, and the rest of the fields go to the others. He said, there is a way to measure the field strength of a Soul that shows how long it has been traveling. Because Souls don't age, their life goes by the strength of their fields, and the giving and receiving. And they may reach a point of devotion when they want to merge with the Creator, or another Soul and give up their own individuality, and live through the fields of the others.

For this change to happen mankind has to understand the truth about religions so that he finds the God within himself rather than outside in a statue or in concepts. Today, Mr. Keshe spent a lot of time explaining the evolution of man's thinking that eventually led to the creation of religions, and the symbols we still use today indicate subconsciously that we are still back in the tribal understanding, and have not moved ahead into understanding the Knowledge of Creation. We had the time of living in caves and what

they call, "hunting and gathering." During this time man felt weak inside and looked for something bigger than himself to believe in and worship, and he also started copying the forces of nature like the fire and the wind. Later, he discovered agriculture and started worshipping the "Devi" or the Goddess. There is a lot more to be understood and if you want to study it closer you can look for the end of the last Ice Age of about 10,000 years ago. This is generally when scholars say the agriculture started and people started gathering in villages and towns and then cities. With agriculture you could stay in one place year after year instead of always moving around gathering food. They say agriculture started in the Levant, or Middle East, this is also where all the Western religions started. The earliest known written history started with the Greek Herodotus and he recorded some of the early Pagan cultures. We are taught some of this in school, but the narrative has more or less been controlled by the British colonialist and other Europeans who understood that the power lies in controlling what people believe about themselves. When you do your own research you have to be careful about the interpretation of the so called "facts." Joseph Campbell in his "Power of Myth" uncovered a lot of the intellectual meaning of the myths in different cultures. I say "intellectual" because he didn't have a spiritual background, which unlocks a much deeper understanding. This is where Mr. Keshe is pointing us to, but it is up to us to fill in the missing knowledge. Joseph Campbell studied the work of the great Swiss anthropologist Johann Jakob Bachofen. Bachofen was ostracized by the European academia, because he would not stay within their own narrative. Joseph Campbell was picked up by the New Age movement, otherwise he had similar problems, but as he became famous they let him be, and he was careful not to go too far.

It's very shocking to breakthrough certain cultural barriers, especially when we have full faith in our education system, we not only build our identity around it, but subconsciously we believe it is true. This is where the P and the Soul of the Physicality (STP) have their control over the STM. The flow of the blood around the brain is not only a M field barrier, and as the emotions are carried in the blood, that feeling of being secure and belonging to the tribe is also a barrier to living by the Soul. Mr. Keshe is pointing to this as the next step to prepare for transmutation, because we have to detach from the P to become a free Soul. Therefore, we need to understand how our mental prison has been built and how we ourselves give it the power to encage the Soul. This is all due to a lack of awareness and not having much knowledge, but also not having a foundation in our life of having the love of the Creator within us. We are still in that survival mode that keeps us glued to the tribe.

How can he say, we are still Pagans and what does this mean? If you want to experience how the Pagan culture used to be, go to India, it is still alive there. But if you are just tourists taking pictures you won't understand it. You have to experience it with your Soul and get the true knowledge of it. I was fortunate that some of my teachers actually penetrated the truth of what Mr. Keshe is trying to explain in this workshop. But the problem is how are people with the brainwashing of American culture and controlled by Google going to be able to fill in the gaps of his teachings. He is leaving it up to us to fill in the missing knowledge of the history of our cultures. I will try to share from my limited understanding.

Perhaps it was due to the conditions, but society got structured into two parts. There were the Ruling class on one side and all the others on the other side. In India you can see it in the caste system, the Brahmins priests were on top, along with the Kshatriyas who were the warrior kings, and these two groups ruled the rest, and the religious scriptures were setup that way to promote it and enforce it. In essence, the same structure is in the West, but it is covered up by the fake democracies, so the people don't realize this is how it is done. This division was not only setup economically and politically, but also religiously. The upper class could read the scriptures and learn about the Transcendental and mediation, while the lower classes could only worship the Devi, or the Tribal Goddess. This is a fundamental structure of society that almost nobody understands.

Transcendental means that which transcends the mind, and the only way to go beyond the mind is through devotion or Silence, that's why the mediation was taught. Everything else we experience through our mind, which are the thoughts, feelings, and all the senses of sight, taste, touch, smell, etc. This is the Devi or the Goddess, or they call it Shakti, the Energy. These are the two aspects of our life. Worshipping the Devi is the Pagan religion, and when you want something for yourself you pray to the Devi to give you wealth, love, or whatever. And the Transcendental, or understanding the Creator was what each of the Prophets like Christ and Mohammad tried to bring to humanity through Western culture. But in India the two aspects are allowed to live together. In the West, it is one or the other, we don't have the knowledge or love for the two to coexist. That's why the Church killed millions of witches who could control the Shakti, or energy. This is the fundamental understanding that none of us are given. We have to go out and search for the truth ourselves and then bring it back.

It is very interesting to see how these two aspects operate. For example, when we go into a church, mosque, or temple do we pray to get something for ourselves? That's an example of worshipping the Devi. Where we give our field strength through our thoughts and feelings to the Devi, and then expect her to give us what we want. Or do we go into the church because we love the Creator and want to serve His Creation? Because we already know that we are complete and whole inside and are loved and are able to love. This is a basic understanding of where we have come to as humanity. Then it is for us to make the next step.

How would we consider this in plasma science? Maybe the Transcendental would be the original M field that makes up the Unicose. The radiation of His fields through interactions with each other becomes plasmas, and has a Soul, and they call it the Devi. The Goddess is a conscious Soul of a plasma, and people's belief's and worship are the M and G fields that interact with each other to form creation, which is really just more plasmas.

Today Mr. Keshe reminded us many times that we are created from the fields of the Creator, which is the love of the Creator. We are complete and whole and have everything we need inside us. If we truly understand this we don't need to worship the Pagan energies anymore. The churches and mosques are inside us. By Mr. Keshe doing

the research to discover the truth about religions, it can help us break our brainwashing from the priest class. But that is only if we want to find the love of God within ourselves. If they lied about Mohammad's birthplace being at Mecca, because it gave them power, that means the scripture were written by men and can be changed. If it is possible in one religion it is possible in all religions. Then there is no need for religions anymore. The STM is us, we contain the true scriptures within, they don't need to be written down. The essence of all the religions are Think, Speak, and Act Good.

Since the last Flight session Mr. Keshe has noticed a change in Knowledge Seekers (KS) in that they are getting ready for the change in 2024. He has given us a chance to be more committed to understanding the teachings and explained that the Thursday teachings are for theory and knowledge of Creation, and the Monthly Friday Flight Sessions are for us to put these teachings into practice and experience our Soul and its power within us. It seemed he was very happy with the results of the last session and he wants to try to repeat it again on the 12th of January, not only to confirm what was achieved, but to take it even further. What was achieved is that all 100 participants were able to join their Souls together and leave the P. This was revealed as "flat lining" on the graph. So it's all scientifically recorded. What does this mean? It's very similar to when a person on a life saving machine in an Emergency Room of a hospital suddenly goes into a long beep. They call it, "flat lining" and it means the heart has stopped and they usually die. This is very symbolic. But in plasma science we don't die, instead our Soul takes flight into the U. There is nothing to worry about, because the Soul is still connected to the P. People reported saying they felt nothing. Then he said, it's that nothingness, that is the peace and freedom. The reason they felt nothing was because the Soul disconnected from the P, so it was not aware of what was going on. The Soul took over, but the P still felt the peace, and to the P it's as if nothing happened. So we have the graphs to show that something indeed did happen. It occurred for around 2 minutes and it lines up with when the KS reported feeling that emptiness and peace. When it happened the third time he said the people become frightened and wanted to stop. He must have sensed it or saw it on the graph, because we don't think anybody consciously thought, they don't want to do this. Because first of all the P wasn't aware, so it was all happening on the Soul level. We are entering the new Dimension even before 2024.

This is a very new experience for a lot of people, and the question we have to ask ourselves is how will we handle it? This is why he spends a lot of time explaining what we are experiencing in these sessions, so that we lose our fear and ignorance and find an appreciation to be part of it. And also not to think that we are going crazy, rather it's a normal process that everyone on this planet will eventually go through as we start adding more and more plasma science into our lives. It's a little strange to think that all this is happening without our awareness. But that's not entirely true. If we think deeply about it, we know that something is happening, it seems like the Soul puts this veil of peace and silence over the P, and then goes out and does its things. But we still feel good about it, and one day as we get more and more enlightened we'll be conscious of it. Or maybe that's not even necessary, we don't know. And then he gave the example of the lady with almost no brain left, and they videoed her walking. When she saw it, she said that's not me, I can't walk. The Soul walked the P. This leads into the part where the Soul will also

be able to change the P. When we reach that level of awareness, there won't be any room for diseases. So if we fall asleep during the sessions it's not a problem, our Soul is still doing what it needs to do. What is also interesting is that the Soul thinks, talks, and does things. This helps to explain how it can takeover the P. There was a strong feeling in this teaching that we are reaching the "critical mass" of Souls being ready for the change and he has carefully been preparing everything needed for it over the years. The Satellite Souls will provide a network of Souls on this planet to assist other Souls to transmute. And the Souls of the Universal Council members are setup to be able to hear and assist other Souls in the U. The Satellite Souls are for Earth and the U Council are for helping the U. It's the Souls themselves that have decided to join, and the P follows. Even if the P resists the Souls bring them around to help.

Other Topics:

We have proven that where there is no Soul, the physicality cannot survive;

There are ways to absorb radiation fields that they become food and are not harmful. It's done through expanding the Soul and creating a net. Soul is dynamic can bend them away from the body;

The London Conference was published in 500 publications, but in the last week the American government blocked it. Work is still going on in what was achieved and more officials are taking part, but we cannot talk about it publicly;

Until 2012 KF was daily in different publications, since then not allowed;

He was referring to free Souls as like nomads wandering in the desert and they pitch a tent here and there. Then he related it to himself being here on Earth for thousands of years. When they pick a STM they setup a tent and call it the time of Moses. After that pack it up and later setup a tent called Christ and so forth;

In regards to Mitra being physical. All D of the work have both Soul & P dimensions.

Thanks for listening.
