

529th Knowledge Seekers Workshop March 14, 2024

(Quick Index 19 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Plasma has 2 states Matter & Energy - learn difference - go between; Neutron is a plasma; Neutron divides into 2 plasmas proton & electron manifest atom (Adam) - same as STM and STP manifest P; Same knowledge different interpretation; Matter energy is potential difference - in plasma its M fields in motion; Creation through M field strength; Light - single Ray doesn't bend from Creator - photon is plasma bends; Plasma inside another creates Crystal Structure - STP inside STM - fusion - transmutation; Star created from H plasma - STM - create gravity - keeping adding plasmas; Light of Enlightenment; Problem with Einstein; Mehran - matter & energy; Environment is emotion - affects Mass; Penetrate through Pentagon; 2 plasmas rotating create pentagon - North Pole; Today essence of teaching; Nothing more powerful than emotions; Sanya - systems to discover Soul - Creator; Top of MaGrav; Basis for next 10 years; CRPm - create fields; Gaza - systems running 24/7 - no Headphones; Vatican accepts defeat in Ukraine; Leave rest to Daughter of Mitra; Satellite Souls - create connection - Gaza - deep Space; Final Act - new beginning; Important new brain research - liquid flush cleans cells - transmutation;

Topic Index

Understanding science of matter and energy state; Neutron divides into Proton & Electron - H atom doesn't have neutron; Neutron actually fundamental plasma divides into 2 plasmas proton & electron within itself - larger environment to gather energy is atom of H; Play 'name' game - don't understand knowledge; (Neutron in nucleus provided energy); Matter science defines energy as 'potential difference' - measure in Joules - burn coal has energy inside can't see - same as plasma different interpretation; Neutron creates own atmosphere of MG fields - single energy pack - within MG fields of Earth call it neutron - in Space it's a plasma; Too many names for same thing - confusion; Same plasma manifests both energy and matter state - not different; Neutron in U - manifests differently in different MG field environment - still a plasma; Create M field conditions on this planet - "control" plasma - even if not tangible - observe field strength; Burn coal - heat - measure energy - can't see - has both matter & energy state; Plasma operates same way - can feel & measure fields; Single plasma in matter state of man is a neutron - take into different D in Space - field strength changes - still a plasma; Summary of light - single rays - join to become fields; Photon has MG fields of plasma - in matter state is a particle - bends near other MG fields - positioning; Light is a ray or a particle; Photon has 2 plasmas like H - proton & electron - why it bends; Single light ray doesn't bend because has common denominator of Rays of Creator; Understand more than Einstein & scientists - should have stayed bookkeeper led others into ignorance; Can bend light 90 and 180 degrees; Change in environmental M field dictates size - shape - strength of plasma - interacts within that environment; Simple to create gravity; Mystery of existence is how fields & plasmas make a separation - magnetosphere; Teach children true science at start - difference between matter state & Energy - feel fields; Both states coexist and always

have existed within each other and together; How do we create Carbon - C14, C60, C760, etc; Amalgamation of 2 fields - one within other - creates crystal structure in P - needed to understand plasma; In matter state atoms together make molecules - then alloys of metals - but cannot put one inside the other- in plasma we can do; Putting one plasma inside another creates crystal structure - means one field can exist within another field - like electron around proton - also called fusion or transmutation; Using different words for same thing - energy is the Soul - 2 plasmas merging is fusion - STM & STP merging transmutation; Problem is ignorant to Science of Creation; Not magicians - when plasma interacts with Inertia of planet becomes matter state; Mystery KF 'liquid' in Coke bottle - same plasma inside bottle was Gans - outside bottle was Cu wire - one is matter & other is energy state; People call us crazy because they are ignorant of Creation; We define energy as M fields in motion; Same energy in matter called 'potential difference' measured in Joules - same thing; Single H atom leads to creation of star - interaction with another plasma creates gravity; Single plasma can be STM born on Earth - after death finds position in U - creates own atom; STP embedded in STM create crystal structure - pentagon or hexagon; Teach children we live in matter state of Inertia of Earth - but change field strength becomes energy or plasma; Neutron inside bigger plasma of U behaves like a ray - if it interacts with another plasma MG fields - behaves like a particle - like putting clothes on it; MG field systems to travel U in first patents - same knowledge after 20 years; Used He & injected radioactive material to overcome Earth; How simple to create gravity; Don't use Cu to create star - use H and keep adding more H plasmas - later become Zn & Cu; U creates one million stars a day - not difficult to understand; Understand secret of Creation - replicate it; They want to keep man ignorant to abuse; Only change combination of fields - get star, Moon, orange juice, beef, whatever; Took 20 years to open your eyes; Like drop of water in a room - change conditions - temperature - ice or steam; Change conditions in environment - change states of matter to solid, liquid, gas; Change MG fields of environment - get a plasma - change field strength do other things with plasma; You understand more than advanced scientists; They make fun of you to cover their ignorance; We are not a religious group - only understand Creation; Plasma in different environments becomes Moon - Mars - body of man; Soul in center of body - in Space it's called the Sun; NASA leader - Von Braun ex-Nazi - hero of American Space Technology - deny; Einstein - biggest criminal in world of science - acceptable because a Jew - same way accepting genocide in Palestinian - blood has to be taken off that land to have world peace - they'll do it themselves; Science has to be knowledgeable - have respect for each Soul; Sanya - humanity will receive watershed of knowledge in science - will change; Understand difference between matter and energy - then not magic; We'll create environment for you to transmute - but you have to create emotion to interact; Been doing this in Monthly Flight sessions; Find field strength to Creator - don't need to see light - 'burning bush'; The light is 'light of enlightenment' - don't understand - have to battle with religions; Creation from interaction of 2 plasmas at time & place - fields create environment of (atom); STM is proton - STP is electron - atom is P - who you are; Come to Earth enjoy beauty of P - feel and taste - can't do in Soul; Soul is too energetic - has no D; Mehran first to teach about Creator - same word in Arabic 'Ibrahim' copied from past; Symbol of killing Bull - 2 fires - kill prejudices or ignorance - understand 2 D of life matter & energy; Not to merge - understand - travel between P & Soul - change from one to other; Become Passenger of U - not kill - go back

and forth from matter to energy; Don't behave right - get sick; Most of our problems from emotions; No sickness in Soul D; 2 fields against each other - Mass; Bring into other environment - Weight; Environmental condition is emotion; Emotion effects how Mass shows itself; Understand Creation - not abused by science and religion; C12 is physical D of man - C14 is Universal; One plasma inside another - create crystal structure - fields dictate conditions of environment - pentagon & hexagon; Pictures show pentagon on Pole of planet - created by 2 plasmas rotating inside; Penetrate planet where pentagon is; Other way around - educate yourself to understand T; Won't allow ignorance to rule anymore; What 'Einstein' is in Farsi; Getting close to understanding plasma; We'll shock the whole world of science; World leaders know it's about to come; Inside the plasma it's just fields and emotions; First time understood essence of teachings - maybe I should have taught this first day; In Sanya change course of science; Become Passengers of U in Isfahan; Your emotions control what you see - fields of body interact with environment; Nothing more powerful than emotions; Emotion of trying to prove something blocks from seeing; Your emotion control field flow plasma energy - STM; We have to battle with 'idiots of science'; Eve of change in history; Massive amounts of systems have been shipped into Sanya; Can bring man close to his own Creator; Creation goes from H to Supernovas; Don't come to Sanya to see physical system - feel energy of it - whole purpose of Sanya Conference; Understand emotion of Soul - observe feelings before & after Conference; MaGrav - most powerful system to convert matter into field state - fields coming out of top; Open your 'Soul's eyes' and feel fields of system - purpose of Sanya conference; We'll fly in Iran conference; Next few months to mature; Impossible to understand if try to force matter state conditions of emotion onto field condition of emotion; Both are really the same; There are 4 different experiments in Sanya - to feel fields - to become mature; If only looking for physical systems - still as ignorant when came from womb; Nothing has changed - only make some noises of your language; Feel fields and mature to transmutation; I hope I have enlightened you to the truth about Creation; Today is basis for next 10 years of teaching.

Part 2

Brazilian team hosts support intention during Sanya; KS having difficulty getting to Sanya - determined; Cosmic Ray Plasma material (CRPm) - hard to produce - elusive - Space currency; Place in specific formation - create an environment; Plasmas inside plasmas; Change conditions of environment - change feeling; CRPm opens fields of body - expand - interact with inner fields & fields of Creator; Never touch CRPm; Key to both D matter & field energy; Beautiful gifts given to humanity; Change environment of room - observe emotion changes; Not made or taught outside KF - precious; MaGrav to feel the fields around - CRPm to feel inside fields; Bring new D to life - emotions - how you create yourself; Objective is you become center of fields - not mass produce; Bring Cups to Sanya - drink from fields of U; Learn to interact and live with fields - know difference between matter & field state; Be able to change from one to the other; Use fields - don't need to kill another being for their energy; Update on Gaza; Cannot talk much Israelis on lines; Running our system 24/7 - soon we'll explain; Huge number of Palestinians know about us - setup systems in a totally different way; Borders around Gaza sealed - but Iranian military forces landed inside Gaza without arms - feeding the nation; Risking

their lives; Americans dropping food - but actually killing more people; Iranians doing 'white flag' operation - has shaken Israelis - cannot understand how Iranians appearing inside Gaza; We know how to appear & feed; Vatican accepted defeat in Ukraine - Pope told Ukrainians make peace with Russians - we cannot afford war anymore; Vatican lost its fight against Russian Orthodox Church - might try again after time; Pressure from European farmers - European politicians made money on stolen grain from Ukraine - stocked up silos; Russia asking for compensation for war - Americans, Europeans, Vatican have to pay; Ukrainians will farm - Russians will dictate price - control export; Souls make a sound when traveling - like dog whistle; As it goes through body fields interact makes sound; Owls can hear departure STM from P; Sound of Soul like fingerprints - 'Soul print' - can find anywhere in U - criminals can't hide; Travel through amalgamating Souls into single Soul - teach later; When finish his work leave rest to 'Daughter of Mitra'; Soul of Daughter of Mitra will take man with a new light into Space - a new beginning; Not today or tomorrow - collectively all parameters have to change; I created condition for man to enter new D of the fields of U - She will guide not only humanity - but whole U into new D; Pope met head of Russian Orthodox Church in Cuba years ago - staked land in Antarctica - joke about converting penguins; Explain mobile phone transmutation like energy packages of voice transmitted over phone lines - same with Soul as energy; Show new system shown in Sanya - never seen before; Plasma package everything intact - no fingers missing; Used this new T in Gaza - plasma communication - not for public; Feed people in Gaza without headphones; Israelis trying to intercept; I've played these games thousands of years ago - still think it's time of Moses; They target KF - but don't have the T; Added new materials to support Gaza - developed a totally new system; Telephone lines are just used to locate the person; Once Souls are connected - find each other; Won't need mobile phone anymore - use energy state; Need to use atmosphere of Earth to connect - in U use Cosmic Rays (CR) - never outside communication line; Now instead of satellites - use Universal lines and CR - I have knowledge; Find you in center of star; Not distance - it's understanding field interactions; I come from Middle East - have both Jewish & Islamic blood - my Soul - being - connected to Soul of that area - become Satellite Soul; We ask you to become Satellites; Possible - return to Iran - develop new T; First complete work in China; Many people are not from this planet - they are aware of operation of their Soul - become Satellite Souls for races in deep Space; Everything in right time; This is the 'final act' - before new life for man starts; Final curtain is not the end - what learned from show goes on; It's not because of the end of an age - it has to be new understanding in the man and use of knowledge for betterment of our lives in both matter and plasma states; Anybody who came to harm KF - ended up harming themselves; Brought understanding of both matter and energy states for you today; Because much easier to transmute - live in both dimensions; All of our Souls know when things will happen to us even death - we deny it; Human body knows when it's about to die; New research about brain helps explain plasma; During sleep each half of brain flushes old energies and things it doesn't need through the liquid in the brain; The brain deflates and dries and then refills with fresh liquid; Don't know yet where the liquid drains to; This information important for when to use the Headphones and transmute; During dry time proteins stick to brain - Alzheimer's - cancer - other diseases; Need minimum 6 hours sleep - otherwise emotional problems; Opens up lot of things for KF Research & Development - decide best time to use

Headphones - KS fall asleep; During dry time no interaction between cells - liquid is a connector; With systems we are just channeling the fields to you; It's very interesting science.

Introduction to 529 KSW - Matter & Energy both Plasma - Neutron Divides into P & E Adam - Purpose of Sanya - Gaza/Ukraine

The knowledge given today was to prepare Knowledge Seekers (KS) to understand what they will be receiving in the Sanya Conference in China which happened over the weekend. This Conference was a unique opportunity to be in an environment where the fields were being generated by a technology (T) that uses Cosmic Rays (CR) and is directly linked to the Creator. The first important thing to know is that the plasma manifests itself both as matter and energy state. In other words, the same fields that become our body and we recognize as ourselves, and the objects in our environment, can return back to energy and behave as a plasma, simply by changing the conditions of the environment. The example he gave was like what happens to a drop of water in a room when we change the conditions and raise the temperature? It becomes steam, and if we lower the temperature enough it will become ice. It's the same H₂O but manifests differently under different environmental conditions. This is such a simple concept, that we may ask why don't our scientists understand this. Or is it that they don't want to? You may be asking yourself, what's the 'big deal' about this? The 'big deal' is that the scientific dogma is setup one-sided. It says, that only matter state exists, and what we call 'energy' or 'plasma' does not exist, and then to protect themselves they claim that it is a religious concept. Mr. Keshe is constantly running up against this problem, where the top scientists, especially in China refuse to accept the Universal Knowledge of Plasma, because Einstein and others said, that it doesn't exist and the fallacy of $E=MC^2$ is true. Recently, the authorities released a paper by Tesla that was banned for something like 120 years. In this paper he did not accept Einstein's theory.

So what's the difference between the 'energy' Mr. Keshe talks about, and what so called, scientists talk about. They measure stored energy in the matter state only as a 'Potential Difference' between one position and another. We'll just keep it simplified. So an object that moves has potential energy stored in it that can be converted to other types of energy. They measure this energy only in relation to its movement. And they do recognize magnetic, gravitational, electric and elastic energies. So the knowledge is really the same, but they have limited their interpretation only to the matter state. The same goes for when we burn coal or gas they can measure how many Joules is released. In Plasma Science we approach it from a different way, and we say energy is M fields in motion, but it's not limited to an object moving from A to B. The knowledge of Energy is fundamental to Creation and the Creator, and how Creation unfolds itself. We are just starting to learn about the different energies, for example the energy in our emotions and thoughts. And that all plasmas are connected to the Creator and there is energy in that and many other ways plasmas interact with each other like when plasmas are inside of each other. It's important for KS to understand that the knowledge is far beyond moving an object from A to B, or burning something to access its energy. A good example of this is that we don't really use the energy in nuclear materials. Instead we use it to boil water and kill others

through bombs. Many times Mr. Keshe brought our attention to the stupidity of our scientists and when we remain ignorant then they can control and abuse us. Plasma energy is always balancing itself between plasmas, whereas as with matter state energy you use it up and have to always find a new source.

He summarized about the light and that it is really M fields and when it's singular it's a ray that only travels in a straight line and is connected to the Creator. And when it's seen as a particle or a photon, then it's a plasma and has M and G fields that are influenced by other MG fields such as a star it might be passing and that causes it to bend. The bending is due to MG field positioning of the 2 different plasmas. And you can bend the light 90 and even 180 degrees if you now how to use other plasmas to do it.

In school we all learned that the neutron splits into a proton and an electron and we call it an atom. Now they say a neutron can last about 15 minutes on its own before it splits. These are terms they use, and then they say, that this is the matter state of our universe (U). But what does all this mean to us? Mr. Keshe gave us the opportunity to go deep into the experience of what a neutron really is during the Sanya conference. A couple days before he told us that a neutron actually is a plasma. This was a huge realization. We were being taught Plasma Science all the time, but we didn't know it, and we didn't know how to unlock the secret to it. Our scientists told us that inside a neutron are 'Up Quarks' and 'Down Quarks' but these are just words they made up to describe the energy of the M and G fields of a plasma. Then Mr. Keshe said, a neutron divides into 2 plasmas, a proton and an electron and then we call it a hydrogen (H) atom. So wait a minute! Normally they say that a nucleus of an atom contains neutrons, protons, and electrons spinning around them. The fundamental plasma of matter state is the H atom, but where is the neutron? In Plasma Science the H plasma field strength is the building block of Creation. Then they start this funny way of accounting for neutrons from what they observed. They go to Deuterium which has 1 neutron, P & E, and then to Tritium which has 2 neutrons P & E. And then the second atom in the Periodic Table He has 2 N, 2 P and 2 E. But then the 3rd element Li has 4 N, 3 P, and 3E. And they cannot explain what this means because they have not accepted that plasma exists, nor how the U works through plasma. We cannot see these atoms and protons and things with our eyes. We only see the resulting matter state, and then we go backwards to make up a theory about it. The only way all this can make sense is if you accept that both Matter and Plasma states exist together and that there is a way to understand them and work with them to create our own world. The scientists are already brainwashed with a very narrow view of matter state concepts and even if you show them the plasma they refuse to believe it. This is why Mr. Keshe stressed that we have to teach our children right from the start of their education to understand that what they are experiencing through their body is the matter state plasma due to the Inertia field strength of this planet. And that this same state when we change the MG fields of its environment will manifest as energy, and that we exist both as matter and energy. With this knowledge we'll be able to understand our own existence and interact with the rest of the U.

Now back to the Sanya Conference. He said the whole purpose of Sanya was for us to feel the fields of our energy directly. It's exactly like what he tried to do by introducing

the MaGray, which was for us to feel the fields coming out of the top of the system, but instead we plugged in the bottom to try to save money on electricity. This time he increased the field strength to the level of the Creator, and created an environment for us to walk in, so that nobody would be left out. Everybody was equally showered with the Love of the Creator, but still it is up to us to open up to it. So all the conditions were set for us to experience our Soul directly, which is also linked to the Creator. But what do we do with the experience of the energy? Do we just 'get high' on the fields for awhile, and then say, 'oh, wow, what a great trip we had.' Or do we use that same energy to focus it on opening up to the Knowledge of Creation, which is done through our intention and feelings? This is why I think he told us that the neutron is a plasma and it divides into 2 plasmas of the proton and electron and becomes what we call an atom, or 'Adam.' If in the silence of the fields of the Creator and Its Presence we contemplate this with a sincere desire to understand, then suddenly the question might come, 'but where did that neutron come from?' And the realization might come, 'oh, it's the Soul of the Creator (STC) and the neutron has become the Creation or the Adam. It's all from the same Thing. Right now I am the atom that the STC became.' But it is not fixed and solid like we think matter is. It's a flow of fields and conditions that are controlled by emotions. Then the years of confusion and ignorance blows away like smoke, and a peace and contentment fills our being. In the dimension of the Soul there are no problems. We may be tempted to want to 'make something' out of this experience or to hold on to it. But it won't be possible. It's the road that takes us home and we have to bring the knowledge into our physical life so that we don't misguide ourselves and others. When we have the correct understanding about life then it becomes beautiful, harmonious, and everyone can coexist peacefully and happily with each other. This is the whole point of KF and its teachings. We hope that the participants in Sanya were able to connect with their own Souls and even some with the Creator to help bring this change to humanity.

He gave a very interesting knowledge about emotions today, by saying, 'there is nothing more powerful than emotions.' And that our emotions control what we see. Our emotions allow our body to interact with our environment. Through our emotions we interact with the fields and go to see our dead family members or travel anywhere in the U. Our emotions control the field flows of the energy of the plasma, which is the STM. He gave the example, that the emotion of trying to prove something, can actually blocks us from seeing. The STP and P can change the conditions of the environment that it ?? can keep the Soul from expanding. One thing we know is that the STP does use fear to hold back the STM from leaving the cage it has created for it. And another thing is that sometimes we think we see something, and we are very sure about it, but when we look closer we find out it wasn't true. And then we say to ourselves, 'I just imagined it.' With what Mr. Keshe said here, maybe the emotions caused us to see that something we thought was imagined, but it wasn't strong enough to maintain that vision. Let's hope he will take us deeper into understanding the emotions, and also in a practical way we can apply.

There were a couple of other pieces about emotions. One is that when our emotions are in balance then we don't get sick. We create most of our diseases through emotions, whereas in the Soul there is no sickness. The next one is hard to unravel. Some years ago we talked about Mass and Weight. He said it in a very simple way, when 2 fields interact we

get Mass, and when we bring one field into the environmental condition of the other we get the Weight, and that the environmental condition is an emotion, and how it's created affects how the Mass shows itself. But what does it mean? Is the environment really alive that it can effect the weight of matter? Is the Earth really a living entity? Our science treats all the material objects on the planet as a constant weight determined by gravity and other things. If what Mr. Keshe says is right, then if we change our emotion we should also be able to change our weight. Actually, there are Qigong Masters who have demonstrated this. While suspended independently on a rope they can make their weight go up and down. We all thought it was the 'power of the Qi' but now we understand it is the true science and the force of the emotion is included in this science.

In this same line he said about the creation of Carbon. If we only accept the physical dimension then only C12 works on us. But if we accept the truth about the Universal Energy then we can work with C14, because we accept ourselves as a bigger strength plasma and not just the matter state as an atom. This is very interesting and explains why some people go into the systems and it has no effect on them. With this knowledge how could we possibly accept Matter State Science as the absolute truth, because we can change the conditions of any experiment with our emotions. Now we understand why today he kept stressing the stupidity and arrogance of scientists like Einstein and the rest. And because they lose the power and control they don't want to understand, and call it magic or just ignore it.

In Plasma Science we hear a lot about crystalline structure, but it is a little difficult to imagine what this really means. If we are sensitive and hold a crystal stone we can feel the energy of it, but it has always been a kind of mystery about what exactly we are feeling. We also were taught about C60 and the Buckyball, or the soccer ball made of hexagons with a few pentagons added to give it a sphere shape. Today he said, when we put one plasma inside another we'll created an environment of its containment as a crystal structure. We don't find much information about crystals except that they are stable and refract light. The C60 is important for travel in the U. Then he added, that if you rotate one plasma inside another you get these hexagon shapes at the North Pole of planets. Some NASA photos were shown of this phenomena. Inside the planet it is like 2 reactors rotating together with the center core and interact to give the hexagon shape. And if you find the pentagon shape, then you can penetrate the planet that way. The hexagon shape is a crystal structure. When the STP is inside the STM, it forms a crystal structure and we can transmute. And when 2 plasmas join together, this is the real fusion that the scientists have been looking for.

The update on Gaza is that he cannot talk about it, but with the systems running 24/7 it means they are serving the people. Mr. Keshe used the word "appearing." The Iranian military forces have started appearing in Gaza where the border is sealed off, without weapons and are setting up feeding centers at great risk to their lives. The Iranians must have developed the plasma technology way beyond what we can imagine. He told us clearly last time that the UFO over Jerusalem was Iranian. And I am assuming the UFO that was videoed some weeks ago and could absorb around 50 American and Israelis missiles headed for Gaza was also Iranian. Without them knowing it showed up in the

background image on CNN, so we got our "CNN" announcement after all. Maybe they are giving the food with headphones and without, because it will be easier for some people to believe if they can put headphones on. Here is the power of the emotion again.

Mr. Keshe seemed very happy about the new research that has come out where they discovered that the brain actually washes itself while we sleep. I am sure he will teach more about this in the future. They created a telescope that can look inside the brain and then they had people fall asleep sitting upright. First of all it's known that the brain sits in liquid and not blood. During particular cycles the liquid in one half of the brain flushes down and washes away all the old energies in the cells and then that half becomes dry for awhile and then refills with fresh liquid. He calls these 'dry times' and maybe they are related to why people fall asleep when using the KF systems. And during the dry times there is little communication between the cells because that was the function of the liquid. It must be a very subtle flow of liquid because they never detected it before and they still don't know where it drains to. During the flushing if proteins (don't get flushed properly) then they can stick to the cells and cause Alzheimer's, cancer and the rest of the brain diseases. So now we are learning how the brain cleans itself.

Other Topics:

Plasma is just fields and emotion. We come to experience love in physicality to touch and feel. We can't do that in the dimension of the Soul.

It's the other way around, we don't have to prove anything to you. You have to educate yourself to be able to understand what we are talking about. We have allowed ignorance to rule for too long;

The Vatican has accepted defeat in Ukraine and has failed to takeover the Russian Orthodox Church. Ukrainians were told to comes to an agreement with the Russians.

When Mr. Keshe has transferred the knowledge to humanity the daughter of Mitra will come in and finish carrying the Man into the Universe.

Thanks for listening.

Quick Index

(We'll look and see how the technology (T) is developing and the man is understanding more and more. In the past few weeks we have been building it up for you to understand both the science of the physicality and of the energy state. We taught about the Cosmic Fields and Cosmic Rays (CR) and what's the difference and how to work with one in respect to the other).

(In physics they talk about the neutron as being neutral without any charge, and has a mass slightly bigger than a proton, which makes sense because it splits into a proton and an electron. So the neutron is defined as a separate entity. And then they say a proton and

electron make up a hydrogen (H) and they call it an atom. If you look up what a neutron is they complicate it by talking about Quarks. Then Deuterium contains a neutron, proton and electron, but they call it an isotope of H. And the same with Tritium, it has 2 neutrons, proton and an electron. This is the background information for how Mr. Keshe will explain it in terms of plasma).

(In Plasma Science we say the neutron is a plasma, or a fundamental plasma. Some weeks ago it was said, that when a neutron cannot hold onto its energy then it divides into two plasmas, which allows it to hold onto its energy by creating a bigger environment from which to gather energy. This is the same as what science calls an atom, or a H. The neutron splits into a proton and an electron, which is the same as a H atom. It has 2 plasmas within it. Then they start playing all kinds of games with names, because they don't understand that it is a simple plasma. By adding another plasma to H, they call it Deuterium, which is a neutron, proton and electron. And then if you add 2 neutrons they call it Tritium. But because the Deuterium and Tritium both have an electron in them, they decided to start calling them isotopes of H, that have their own characteristics and properties. This is how we can understand matter state science in terms of plasma, and the two actually match, because it's all the same Creation, but different interpretations).

(Mr. Keshe gave a kind of summary how the man developed his thinking scientifically. But that understanding is based on the matter state, even when they speak about energy. So when something falls they discovered there is a 'potential difference' in the energy state. And then they used the term 'Joules' to measure it. The same was when they burned materials they found it releases energy and it could supply power, like in burning coal, oil, and gas. Later they developed more understanding through the brain of the man, and discovered nuclear physics. But all this is in the matter state).

(In terms of plasma we talk about the same thing differently. Instead we talk about its magnetic and gravitational (MG) fields. A single plasma or neutron shows itself through the MG field atmosphere it creates for itself. A neutron is an entity, a single pack of energy. (It exists with the MG field atmosphere of the Earth, and shows itself as a neutron under these conditions). But if you take those conditions away, then it will be just an energy. It doesn't have a name, but we know it as a plasma. The confusion comes because we use too many names for the same thing. (What I think he is trying to say, is that, all the things are made out of the same plasma, and when it's in the plasma state we can't see it, so our scientists think it doesn't exist. And when the same plasma manifests as matter state, it exists for them and they start giving it different names, and create more confusion. In summary the same plasma manifests both as energy and matter, and they are not different. The essence of the Creation is from the same fundamental plasma, but looks different in matter state because of the different conditions it manifests in). Knowledge Seekers (KS) and future scientists need to understand this to stop spreading the confusion).

(A neutron in the universe (U), where the M fields of the environment are different, will manifest differently, but it is still a plasma. We can also create different M field conditions on this planet, or anywhere else to cause it to manifest differently. Even if the

plasma isn't tangible, we can observe the strength of its M fields. For example, when we burn coal we get heat and can measure the energy of the coal. The coal has energy within it even though we can't see it. So in effect, we are experiencing the 2 different states within the coal, the visual matter state and the energy state of the heat it produces. In the same way we have to learn this with the plasma. It has both an energy state we can't see and a matter state that under certain conditions we can cause it to manifest itself. A single plasma in the matter state of the man is a neutron. But when we take it into different dimensions (D) in the open spaces of the U (its field strength will change). It's still a plasma, but its fields can become weaker so that it expands, or it can become contracted depending on the conditions that effect its field strength. But it always remains a plasma).

(Now we will try to clarify about the light, the way we did about the neutrons and atoms as plasma. For the light we have single rays, which can join to become fields. A photon is when the light acts like a plasma and its matter state can be recognized as a particle. As a photon is a plasma, its MG fields are effected when it goes near a star and the light bends, because its MG fields are positioning themselves in respect to the star. They always say, is light a ray or a particle?)

(?? Now that we know the neutron divides into 2 plasmas and we call it a H atom. If these 2 are now considered a photon, because it's a plasma, then they also have their own MG fields that can interact with other things, while still being a photon. Sometimes the light behaves as a ray and goes straight and sometimes as a photon and bends. For the first time in the world of physics we understand why).

(When the light goes on its own, it doesn't bend because it's dynamically itself, and it interacts with Totality and is a ray. But when there's a combination of the two, then the photon which is a plasma of an atom, creates MG field positioning in respect to any other MG field. This is why the scientists say, sometimes the light bends and sometimes it doesn't. They never understood that they're dealing with an atom of a plasma, and not a ray, or single plasma. A single plasma is a ray and it acts like a sponge, it dictates its motion and keeps to its own direction).

(Today you as KS by understanding this difference, understand more than Einstein or any other scientist understands. A single plasma as a ray doesn't bend due to its speed, position, and M field strength, and it follows the same path and cannot be changed. It's because its light has the common denominator of the Rays of the Creator. But when the light is made up of two, meaning a photon (?? which is 2 plasma together), it can twist and turn to find its MG positioning when coming close to another plasma like the M fields of a Star, Galaxy, or another atom. Now you can tell the scientists how the light bend. You can even bend it 90 degrees or 180 degrees. And you can explain it scientifically. If our scientists and KS understand this, then we have entered into the world of plasma physics. Then you will understand how scientists like Einstein, who had no clue about plasma would have been better off remaining as a bookkeeper. Then they would never have flamed the fire of ignorance among the other scientists, so they could become great through their own ignorance).

(The change in the environmental M field dictates the size, shape, and strength by which part of a plasma will interact within that environment. This is how simply it is to create gravity. The mystery of existence is how fields are created to make a separation (between plasmas ??), or what is known as a magnetosphere. (A magnetosphere is the M field region around a planet). (Man has to teach his children the true science from the time the child begins to understand things. Children should be taught the difference between matter state and how it feels to feel the energy fields. And that the two states coexist and always have existed within each other and together)).

(Another point of ignorance due to the stupidity of the scientists who never understood, is how do we create Carbon? How do we create C14, C60, C760, and the rest of them? If man would understand about the amalgamation of two fields, and that one can exist within the other, and this creates the condition of manifestation of the physicality (P) in a crystal structure, then the whole world of science will change in understanding the conditions of the plasma).

(In the world of Creation when we put atoms together, we call them molecules, and different molecules of different strengths create alloys. But we cannot put one inside the other. In the world of plasma we can. And the interaction of one inside the other, creates a condition of manifestation of one in respect to the other, or to the environment, which you call crystalline structure. This means one field can exist within another field. How and where these fields are positioned dictates its manifestation and interaction. When the weaker field is outside it manifests an atom of a proton and an electron. And when it's inside, it becomes the life of the fields within each other. It's a crystal structure of energy. This can be the size of one energy of a plasma of an electron, within the plasma of a proton. This is called, fusion and has been the dream of scientists. But to us we call it, transmutation. When the little pack of energy is outside in the condition of the environment, it becomes an atom. We call it the body of the man. (The Soul will be within, and the physicality outside)).

(We are using the same language, but due to our lack of understanding we have created a mayhem between the matter and the energy states. Then they say, Mr. Keshe calls it a Soul. But your ignorant scientist call it fusion, or a plasma, or everything else, because they could never explain the truth and they could never understand the reality of physics or how it operates. (Then because Mr. Keshe knows about this he can transmute us, or feed us, or help travel beyond the speed of light).

(Just because your scientists are ignorant, don't make us into magicians. It's about understanding the two states of the same plasmatic M field, one is energy, and the other created out of the matter state Inertia of this planet and we call it matter state).

(For years the KF 'liquid' in the Coke bottle was the mystery of the Internet. But now we know that it (converts) matter into energy, what we call a Gans. Because you can see the Gans, it means it's still in the matter state. When the 'liquid' is in the bottle it's in another condition, but it is the same stuff when it's outside the bottle, only then you call it Cu.

Inside the bottle you are dealing with the energy state of it). (The same field that is the Cu wire outside is also the Gans on the inside of the bottle).

(The strange thing is when we show you this, then you think we are crazy, because you can't understand it. But we are not the crazy ones, it's you who are ignorant to the Knowledge of Creation. It's as simple as that. You talk about the matter state of it, and we talk about the energy state, or plasma of it. Our definition of energy is M fields in motion. But energy in the man's understanding is position dependent, has a 'potential difference' in energy, and the rest of it. And then you have to burn it and talk about 'Mr. Joules.' But the fact is, it's the same thing we are talking about).

(This is how in the world of Creation a single atom of H leads to creation of a star. And how the positioning of another plasma, in respect to the plasma which started it, leads to creation of gravity, that dictates the condition and position. And that single plasma that starts it, is the Soul of the Man (STM) who was born on this planet and he's found his own position in the U. However, on this planet, you are the physicality of man, but the minute you die and leave the P, then the STM, finds its position in Space and starts interacting with the fields of that environment and creates its own atom. The field strength you gathered while living in the D of P through correct behavior will amalgamate into the central energy of the body, or what we call the Soul. (The Soul of the Physicality (STP) ?? while it embeds into the STM creates a crystal structure of the energy within it)). How much strength does it carry? And what's the ratio of the strength between the plasma within it and the plasma outside it? Does it give you a 5 or 6 sided crystal, or any number of sided crystals you like? Man made up a terminology for him to show one could be more clever than another. But you all are actually talking about the same thing. One thinks he is a magician, so he made up some names and made himself a professor. But if you don't understand it, then you go to him for answers, but he himself never understood it. (We given power) to the most stupid people in the world).

(We have to teach our children from 'day one,' that we are living in the matter state of this planet in the Inertia condition of Earth, but the field strength of the same matter in a different field strength environment is a plasma, or what we call a neutron. And the plasma or the neutron in interaction with the fields of the U, which itself is just a bigger plasma field, behaves like a ray. And if it interacts with another plasma, together with the MG fields of the environment behaves like a particle. Because now there are 2 plasmas in one atom, a proton and an electron. In plasma physics we call it M field positioning of its energy. (When it's a plasma in space it stays as just energy and we can say, it has no 'clothing' on it). But when it finds Inertia, or comes into the field forces of an environment it becomes a particle and it's like we put a 'jacket' (for the matter state). In Space it stays as an energy).

(This is how simple the world of Creation is. In the coming time man will easily create M field and G field systems that will travel beyond the speed of light, because they will be connected to the fields of the U in an open plasma, and one will be in the matter state. This was already written in the first few lines of the very first patent. We talked about

gases, radiation, and then we created a gravitational system). The biggest company in Belgium called it, "The first energy generating magnetic field gravitational system."

(The knowledge hasn't changed since we released the patent 20 years ago. (As we said, we put Helium in, and then injected radioactive material into it to change the conditions of the environment, so that it would not be under the conditions of Earth's Inertia. Then you can understand how gravity is created. This is the essence of creation in the U. We don't bring in Copper and Zinc to create the first seed of a star. Instead we use hydrogen (H), and keep adding more and more H field strength plasmas to interact with each other. In finding their position in respect to each other, they create a motion that (attracts ?? more fields) and they can become a Zinc (and other elements). Then after a few billion years of the 'man's time' they become a Supernova or whatever else you want to call it).

(If God, or the nature of the U is creating one million stars a day, it can't be that difficult to understand. It's so simple that man has become ignorant to it. We can understand the secret of the Creation and replicate it. This doesn't make me a magician that I need to be killed by the King of Belgium, and the rest of the idiots, in the name of religions. I understood the science of Creation as a nuclear physicist. And those who could not understand are ignorant and they play every game to abuse the man).

(When you understand this, then all you have to do is to change the combination of the fields, and instead of becoming a star, it's becomes a Moon, orange juice, beef, banana, or whatever else you want it to be. Now you understand how correct the science has been, even from the first patent of 20 years ago. It is a valid science and it took 20 years to open your eyes to the truth about what we wrote. In those days, I could not explain it this way. It took me 20 years to teach you how to understand the science. Now many of you can understand that there are two states of the interaction of the fields of the U. One is in the energy state we call a plasma. And when this same plasma interacts with the Earth's GM fields it becomes the matter state of whatever it creates).

(It's like if you have a drop of water and you put it in a room, then if you freeze the room that drop becomes ice, and if you heat it then it becomes steam on the windows. (When we change the conditions in the environment, then the matter state changes states between solid, liquid, and gas). (And now we learned that if we take the same atom of water and change the MG fields of its environment we'll get a plasma. It's the same fields but in one condition it is matter state and in another it is a plasma). (Depending on the strength of the fields the plasma can expand to take the shape of the whole room or be reduced to the size of a speck of dust. Then if you introduce another plasma into the room it has to interact with it. It can go towards it faster to the speed of light, or ?? go away from it).

(With this knowledge you as KS understand more than the most advanced scientists in the world. Nevertheless, your families and friends ridicule you because they haven't understood. As we say, 'ignorance is bliss,' and those who are ignorant make fun of the ones who know to cover-up their own stupidity and ignorance. We are not Messengers of

whatever, nor are we a religious group, we are simply those who understand the essence of the science of Creation).

(When you put the plasma in different environments then it becomes Mars, or in Earth conditions it becomes the body of the man. In the center of the body you have the Soul, but when it is in the middle of the Space we call it the Sun. You can choose any name you like for it. The truth does not change because now you have understood the Science of Creation. All the people around you ridicule you, because they were taught by the same ignorant people like Einstein, who should have stayed a bookkeeper and left the job to the scientists of physics to explain).

(The Americans are doing their best to wipe out any connection with Van Braun who they put as the former head of NASA. The ex-Nazi SS is the hero of the American Space Technology, and has become a zero, as he is one of the biggest killers in the world of the science. He killed many Jews for the Nazis. Now they are trying to wipe his name from everywhere. When man understands he will do the same with Einstein, who is the biggest criminal in the world of science. If he wouldn't have been a Jew, this ridiculous position would not have been acceptable to sensible people. It's the same way we are accepting what the state of Israel is doing to the Palestinians. (You have one idiot in the leadership, and the rest have to suffer with it). This blood has to be taken off of that land, so that man can start living in peace with the true science, technology and life. But they have to do it with their own hands. (The science has to be knowledgeable and have respect for each Soul no matter what conditions arise). When we have no respect, then we destroy everything. (We have to have respect for the STM, his intellect, and the rest of it)).

(On the beautiful island of Sanya, in Hainan Province humanity will receive a watershed of knowledge in the world of science. The history of man in science and technology will change in the next 4 or 5 days. Unfortunately, some of you will leave the same way you came, because you never understood the knowledge. And some of you will understand and it will change the course of your life. It's because you understand the difference between a matter state atom and a plasma. When you understand this, then nothing will be magic to you anymore. Then you (will be able to) decide the state of the plasma of your Soul, in respect to the plasma of the environment we create. Then you will be able to instantaneously find a new position, whether it's to New York, Mars, or anywhere else in the U. You will do it through your emotion, which is a field interaction, and then you decide the time, place, and space. Many of you have already been doing this over the past year and a half with the new technology when you joined us for the Monthly Flight sessions).

(This is how simple the Science of Creation is. If one day man goes to the next step, then he will find the field strength of the first line of the fields of the Creation, what we call the Creator. Then you don't need to see a light, or a "burning bush on a mountain," or whatever else the Prophets claim they saw. The light will come from understanding the truth about the Creation and the Creator. The more ignorant you are, the bigger the fire has to be, and the more stupid is the man who comes back and tells you what he saw, and you being so ignorant, accept all of it).

(Any of you who have understood the teachings this morning or before, understand the reality of the light. That light is the 'light of enlightenment,' and not 'burning bush,' or whatever they want it to be. And those who don't understand will have to battle with the 'bush fire,' and the rest of it till they do understand. (The simple truth is that Creation is made from the interaction of 2 plasmas at the time, place and position. When the fields of the proton and electron interact with each other they create an environment, which shows that they are in touch with each other, and are working together as an atom). (It's the same with the STM and the P, they are like the 2 plasmas of the proton and electron, called an atom. How hard is this for you lot to understand? The proton is the STM, and electron is the STP, and your own P is the atom. This is who you are)).

(The Arabs have a saying that means, 'how stupid you are, that you don't even want to accept the truth.' We have understood that a H atom is a proton and an electron. It's the same as the Soul and the STP, which make up the man, or an atom. Then some complain that, 'Mr. Keshe is going into religion .. God forbid.' You can call it whatever you like, but it doesn't change the fact. (Through the Soul you can live in the U and nobody can abuse you)).

(Somebody asked me why we come to Earth? I said, for the beauty and pleasure of physicality, which sometimes is so good, that we would like to taste it. Even so we still remain connected to the Universal Energy, which is the Soul, which is the dimension of the fields without D of P. Who doesn't like to touch the most beautiful and gentle body? Who doesn't like to kiss the most beautiful lips of a child, to understand the love. When you kiss your child, the love you receive, how can you feel that in the D of the Soul? When you hold your lover then you understand, and you want to give the whole of what's inside you to them. This you can't feel that in the D of the Soul. The Soul is too energetic and has no dimension. This is why we choose to come to the D of P. Here you can put a word on something, and put an emotion into it. You can also explain what it is).

(Wasn't this the essence of the creation of Mitra? For man to understand the dimension of interaction in the emotion of physicality. In man's history Mehran was created as the first god. Then they changed the word into Arabic, and it became (Abraham) 'Ibrahim.' The 'brahim' at the end, is the same as 'Mehran.' This is how much everything is copied from the original belief. That's all it was. They just copied it and made it into something. He was alone and lonely, then he created the condition of two children, or two fires. This shows the interaction (of the fields), the separation (duality), and it's the difference that leads to creation of life and love. About the killing, which one does he have to kill, the physicality, or the energy, to confirm his existence? It wasn't a son, or a cow that he killed. (In Mithraism they show a statue of him killing a bull (cow), and Abraham was to kill his son). The meaning was to kill the prejudices that the man has in respect to confirming the two dimensions of life, physicality or energy).

(Now the time has come, not to merge them together, but to understand and be able to travel between the two dimensions of P and Soul. They always change from one to the other. But man never understood this. The next process in the understanding is to bring in

the knowledge of the interactions and (transmute) to time, place, and position (TPP). Man will become a 'Passenger of the U.' Then he shall not kill, because he doesn't need to kill. When he travels in the D of energy he takes what he wants and then goes back to the physical life. As he is already fed he doesn't need to kill. Do you eat when you are already full? And when you get it wrong the physicality becomes sick. Then you go for chemotherapy and every other thing, except to look inside to the dimension of the fields, and find the matter state of it, to itself. This is why we emotionally create most of our problems in the physical life. Where in the Soul D there is no sickness).

(When you put two fields against each other, then you get a 'Mass.' When you bring it into the condition of the environment of the other, then you get 'Weight.' In that environmental condition, you call it emotion. Then how do you interact with it to create that emotion, which affects how the Mass will show itself. On Earth it's heavier and on the Moon it's lighter. You have to understand the principle of Creation. (All the God forsaken people like Einstein and ones who talked to fire are themselves laughing because they are so stupid. In the Soul D you call it Christ, Moses, and the rest of them. The 'Einstein's' used your physicality and made you into idiots, the others used your Soul and made you into idiots also. Now try to understand how the Creation works)).

(Life in the world of the Creation and Creator is so simple. This is why I started teaching you about Cosmic Rays (CR) and Cosmic Fields. What is C14 and C60? And why do we have a C12? C12 is for the physical dimension of the man. Sorry, if you accept the physicality, then only matter state of Carbon (C12) works in you. But if you accept the conditions of the U then you work with C14, which means you are a bigger strength plasma as an individual, and not in the matter state as an atom).

(If you put one field inside another, then you'll create an environment or a containment, that is of a crystal structure. This means the fields are dictating conditions of (the environment). If you rotate one plasma inside another at specific fields and dimensions then you will get a crystal structure of a pentagon, hexagon, and the rest of it. If you don't believe me go on the Internet and look at pictures taken from the North Pole and the South Pole of some of the planets. You will find a hexagon at the Pole. This is created by the 2 plasmas inside (the planet) like 2 reactors create this condition. It's the combination of the energy fields of the center of the core of the planet that interact to give the hexagon (?? pentagon) at the North Pole. But ignorant people say, "Oh, these are fields but we don't know why and nobody does either." Now you know why).

(When you see the hexagon you know you're on the North Pole. The crystal structure of the fields covers the planet as an atmosphere. If you look at it far enough away from the side, then you'll see the same hexagon as a crystal structure. When you find the pentagon that will confirm the existence of Totality. (This is where you can penetrate the sphere). This was in the 'football teaching' I gave you some weeks ago. Nothing changes in my teachings, it's just that you do not understand the principle of Creation. But now you understand and all those professors will have to deny you, because then they won't exist anymore. Why do we need people like this to confirm what we can know ourselves? We

are able to do what they cannot do. We achieve things they cannot achieve. But we also have to confirm (what we are saying)).

(They say, "You have to prove it to me and then I will accept it." No, it's the other way around, you have to educate yourself to understand what we are talking about. We have allowed ignorance to (rule). We allowed thieves like Stephen Hawkins to steal other people's ideas and then he kept it to himself until he realized his own stupidity. Rick found the ?? pentagon photos of the North Pole. This is from 2 plasmas inside each other, with a crystal structure. (These photos prove the science of physicality and energy are plasmas)).

(Mr. Keshe understood this when he was 8 years old. He has been trying to teach this to man for 60 years, how he has been fooled. One day, I will use the word 'Einstein' in Farsi and tell you what it means. It's very simple and it's worthy of that man).

(You have to understand the world of Creation. We are getting so close to being able to understand the free dimension of motion of the fields of the plasma, to what we know in the matter state. This will shock and shake the whole world of the science of today. World leaders know it's about to come, because they all started talking about a new technology and a new science. The science is here and it's in the hands of you as KS, because you understand how simple it is. This will bring the change. When we use the energy, we don't need to rely on the matter state. But still we can change it back to matter when we want. It's like if you want ice, you just reduce the temperature till the water freezes. It's the same water drop, and the same knowledge. To make a plasma show itself in an environment you simply change the fields).

(It's not difficult, but we need to teach our children from the first day they set foot in the school. We'll show them that man lives in the matter state from the Inertia of the planet , and in the energy state as a plasma. And that it is the same fields under different conditions. We define energy as M fields in motion. Fields move according to how the environmental fields allows them to move. They will go faster or slower depending on the field strength of the environment. (We can also dictate the speed of the fields inside our plasma). The world of physics is as sweet as honey and the world of Creation is also physical. We can come in and out of the D of P to enjoy its beauty. Inside the plasma is just fields and emotion).

(Now for the first time you have understood (the essence of the teachings). Maybe I should have taught this the first day I started the teaching and not have waited for 20 years or 10 years of the public teachings. We showed you how to change matter state into a Gans, the Nano materials, and the energy fields. In Sanya, I will change the course of history of the man in science and technology. And by the conference in Isfahan, in the beautiful land of Iran we can start to become Passengers of the U. Some of you will come into the conference as a 'donkey' and leave as a donkey, because you never understood what kind of hay was put in front of you to chew. And some of you will come in as a man and leave as a Messenger of the U, who understand the process of Creation. For those of

you who will say, "Nothing happened to me, this thing doesn't work," it's because ignorance is bliss).

(Your emotions control what you see, (and this allows the fields of your body to interact with your environment). There is nothing more powerful than emotions. And the emotion of trying to prove something blocks you from seeing. Some of you will come in because you have understood and can interact with the fields, then you can go to all positions from Moon to Mars, to the uncle and aunt, and everywhere else. Your emotion controls the D of the field flow of the energy of the plasma, which is the STM. Or you can create the condition that the plasma of the P, the STP, controls and can change the environment. (?? The Soul or central energy cannot expand)).

(We as KS have to battle these what I call, 'idiots of the science' who are actually ignorant of the true science. They don't want to understand, or they just call it 'Yin and Yang.' But when we talk about the Science of Creation, then they can't handle it and go back to saying the Yin and Yang don't exist. In China, we have to handle the 'idiots of the science and technology' who have become the experts. They want to deny they are ignorant of the Knowledge of Creation).

(We are on the eve of the change in the history of man. Massive amounts of systems have been shipped into Sanya, China today. Even the people who are putting them together haven't even understood 5% of their capability. They don't know that they can bring man close to his own Creator. In time this knowledge will become part of the essence of the teaching of the man from the first day of school. In this way no prejudices or ignorance will be created. Plasma Science will not be a controversial word that it is today. Our children have to be taught right from the beginning about the fields being in the matter state as on this planet, and in the energy state of the plasma. This way it will become part of his life and it will be shared with the rest of humanity).

(I hope I opened your eyes today to the true essence of physics and Creation. By not understanding Creation man has 'shot himself in the foot and wants to run a marathon.' From now on we are going to bring that change. We'll show how the fundamental plasma leads to creation of the Supernovas, and the foundation of that plasma leads to Black Holes. (Which is in the brain of the man for not understanding of his own creation)).

(In Sanya, we'll show T in such a way that you won't see it as a system, but you'll feel the energy, the plasma of it. This is the whole purpose of the Sanya Conference. We have not brought you to China to see physical systems. We have brought you here to feel the energy and understand the emotion of your Soul. It's for you to observe how your feeling was before you entered the Conference zone and after. What was your wish before, and what was your wish while you were in the zone. This is the change man has to understand. Otherwise, you will go in as a donkey, and come out as donkey, because your only wish was to come and see how green the grass is. Or what kind of machine is here and what does it do).

(This is the exact situation we had when I gave you the MaGravs. You plugged it in to get 10% power reduction. But you never understood, that I gave you the most powerful system to convert matter into the field state. You plugged yourself to the bottom of it, and you ignored all the fields coming out of the top of it).

(Now it's the time to bring that change. When you come to Sanya close your eyes to the things you want to see around you, and open your 'Soul's eyes,' and feel the fields of the system. This is the purpose of the Sanya conference and the reason we have brought you to this point. Because in the Isfahan conference in Iran, you'll fly with the Soul and then you'll understand it. Man needs the next few months to reach maturity and complete the cycle).

(It's very easy, once you understand it. But it's impossible, if you try to force the matter state conditions of emotion, onto the field condition of emotion. When you understand that the two really are the same, and how you play with it decides which one manifests, then you'll become the true man of Space. I hope you understand why sometimes the light goes straight and why sometimes it bends. The difference is when the plasma is singularity and when it become a 'polarity,' (like with a photon)).

(I hope you can see what I should have taught you 20 years ago. But in a way, it was fun to see when one of you would breakthrough and understand the knowledge. But for the most part many of you have not understood, and hopefully today's teaching will bring you that knowledge of the matter and plasma state. If any of you walks into the experimental room in Sanya, and you still want to see a physical system, then please walk right out, because you are as ignorant as when you came in. And for those of you who have come here to feel the fields in the 4 different experiments that we have setup, you will become mature to the next step in the evolution of man's science).

(As long as you're looking for what this system or that system does, then you're as ignorant as when you came in from the womb of the mother. Nothing has changed, you just learned to make some noises and call it Arabic, English, Chinese, and the others. And if you walk in and look for the fields and observe how you feel in this or that position, and what emotion it creates for you, then you are maturing to understanding the process of transmutation).

(Let's see how many of you are still making MaGravs in your brain and your physicality by the time you leave Sanya. I hope I have enlightened you to the truth about the Creation. Some of you already understood, but you couldn't put it in the (right words) of the why and how. Maybe today we start the basis for the teaching of the next 10 years, as we already have passed the first 10 years of teaching this week).

End of Quick Index Part 1 - 529 KSW

(The Brazilian team announces that it will host a support intention during the time the conference in Sanya will take place on the Brazil Telegram on Friday March 15th through Monday).

(I would like to thank all the KS who are on the way to Sanya, but have run into all sorts of obstacles and they still found a way to be here for this beautiful meeting. It's the first time the KS from China will meet with other KS from the rest of the world. I visited the conference hall today and it is beautifully setup to share knowledge and bring things to humanity). (The purpose of this conference is to literally bring an end to the matter state understanding and move to the next generation of life on this planet. And then we'll demonstrate it in Iran).

(The new Cosmic Ray Plasma material (CRPm) is very hard to produce and it's an elusive material. First this material will be a Space currency. You'll understand in the future what that means and what it will bring. Secondly, as it's a Cosmic Ray, by placing them in a specific formation you will create an environment, like what I was teaching in the first part. You can create a new condition of the plasma, and for other plasmas to be inside and manifest themselves).

(Like with the central heating in your house you change the temperature in your environment according to how you feel physically. With the CRPm you open the spans of the D of the fields of the body of the man. You expand, and interact with the inner fields of the man, (?? and the fields of the Creator). Because it's a Cosmic condition you directly connect to your containment, and that is part of the U. You never touch these materials. They are a key to both dimensions of matter and field energy. You'll see them as matter, but (you'll feel them as energy). We don't have these kind of conditions. And in the future mankind will understand that this is one of the most beautiful gifts I have given to humanity).

(Try not to look at these as matter state, understand its position in respect to your fields and energies. Put these in a room to change its environment and then observe how your emotions change when you enter and leave the room. These new materials will not be made or taught outside the KF. In the very near future some of you will give your life savings to hold a gram of these materials. Because they will create a condition of interaction with the Cosmic Rays).

(Just like we always said, don't look at the MaGrav, look at the fields which it creates. See what combinations of fields you can create from these CR plasmas. I gave you the MaGrav to feel the fields around them. I am giving this material for you to feel inside the fields. We'll explain more and more about this material as time goes along. It will take us a few months to get it precisely the way we want it to be. It will bring a new dimension to life, emotions, and to how you create yourself).

(The process is not easy and the objective is not to mass produce them. The objective is to create a condition for many of you in the future to become a center for the fields. Try to distinguish between how you feel in the matter state, and in the energy state, when you are inside the area where you build up the fields).

(I hope you brought your Cups with you to Sanya. Then you will drink from the fields of the U. We have organized three tables for you to put your Cups on. And if you don't feel anything from it, God bless your Soul. Try to watch and see what comes (into your life). Then you'll understand the process of the transition).

(The whole process of work from now on is for you to interact with the fields, understand them, live with them, and learn what is the difference between the matter state and the field state. And how you can change one to the other. If you can learn to use the fields you won't need to kill another being for their energy).

(It's like when you are married and you go to your mom's house and she says, she has cooked your favorite dish and you say, no mom, I'm going to eat at home. In a way, 'home' is to eat from the fields of the U. Then you don't have eat from your mother's table, which killed the lamb, or the broccoli to feed you. Soon you'll understand what is on the table, and what needs to be done on that table. Bring your Cups to Sanya and see how much you have understood).

Q: How are the people in Gaza responding to the plasma solution? And are many beginning to use it to feed themselves? Or are the Israelis trying to block it still?

K- We will not talk about this. (But we are running our system 24/7. Soon you'll hear about how we are working around it. A huge number of Palestinians know about this and the system is set up in a totally different way. We will explain to you very soon, because we don't want to run into a problem with those who think they can control everything).

(We know how to get in and we are letting you know that the Iranian military forces have landed inside Gaza without arms and are feeding the nation. Soon you will hear more about this operation. (Nobody could get through the borders, but they managed to get in and have opened feeding centers all over Gaza. They are feeding the Palestinians. They are risking their lives to do this, because they are bombing the transportation system. The Americans have been dropping food, but they are actually killing more (people) than they are feeding. I'm sure you've heard that the Iranian armed forces are within Gaza, and they have opened feeding centers. This is what I call, a 'white flag' operation, which has shaken the Israelis. They cannot figure out how they are getting through because they have bombed everything, and yet the Iranians are appearing inside (Gaza). We know how to appear, and we know how to work, and we know how to feed. And you'll hear more about this in the coming time).

(If you remember what we said before about the Ukrainian war, and very soon we'll see the end of it. The Vatican has accepted defeat in Ukraine. They have 'thrown the towel in.' The Vatican, through the Pope has instructed the Ukrainians to find a solution for peace with the Russians, because they cannot afford supporting the war anymore. They used up everything the Vatican had to give them. We'll see it in the news. We were aware of this, some 6 weeks ago. The Vatican has accepted defeat in fighting the Russian Orthodox Church to try to take it over. For the first time they are defeated. But, we have

to see how they will gather themselves together and try to come back in a few years time, to do another coup d'état).

(The Pope has instructed the Ukrainians to accept the conclusion very fast with the Russians. Partially this is due to a lot of pressure from European farmers (who want the import of grains to be stopped). All the European nations have been filling their reserves with cheap grain stolen from Ukraine. The farmers have gone on the streets to protest and bring everything down. The only people who made money from the cheap Ukrainian grains have been the European politicians and nobody else. They have robbed both (the Ukrainians and their farmers). But when the Russians do it, it's a criminal act. The European countries secretly stocked up their grain silos and nobody knows about it).

(In negotiations going on in the background, Russia is asking for compensation for the war. The Americans, Europeans, and Vatican have to come up with the money for Russia to stop. It's a very big package, and we'll have to see how they will try not to pay it. The European and Vatican losses are too heavy to keep sustaining this fight against the Church of Russia. It should be settled in 3 months or so. Russia will control the grain going out of Ukraine, as that was the whole objective. The Ukrainians will do the farming and grow the seeds, and the Russians will dictate the price of it and control it through export. The Ukrainian war is over because the Vatican accepted defeat and now it's in public).

Q: Last week you spoke of connecting with the collective Soul for Space travel. During transmutation while in Space, that encouragement you hear, can be our collective connection, yes?

K- What? Encouragement? What is the encouragement?

R: I'm not sure what encouragement means, maybe have been with other Souls?

K- You have to understand something very simple, and I have spoken about this a number of times over the past years. (There is a noise when traveling with the Soul. We know this and it like a 'dog whistle.' When you blow the whistle only the dog can hear it, and they go crazy with it. The owls hear this noise when the Soul departs. (The Soul goes through a physical body and the fields interact and it makes that sound). The owls are sensitive to this interaction and hear the departure of the STM from P).

(In the future man will be able to detect the sounds of the Souls when they interact, and when collective Souls interact. The way we look for fingerprints nowadays, we'll look for a 'Soul print.' Then it will not be very easy to kidnap a child or whatever, because we'll be able to locate that Soul. Even if criminals try to hide under 10 tons of rock, or on another planet we'll still be able to pick up their fields. This is why I said, no man will do a crime, because there will be nowhere to hide).

(There is another way to travel and that is through amalgamation of the Souls as a single Soul. But that's another teaching for later. One Soul can accept many other Souls (into

itself). It's about understanding who are the passengers of this containment. Maybe we'll teach it in 5 to 10 years time, if we are still here).

(Mr. Keshe talked about something and maybe it has to do with his finishing his work and leaving the rest to the 'Daughter of Mitra.' Let's hope he will continue to remain on Earth with us to complete this work. But he said, part of the message he sent to a KS was, 'maybe I have achieved to save mankind. And then (I'll) leave the rest to Mitra's daughter (to finish and) take man into deep Space, as an energy of the Universe and not the body of the man, with all its faults and problems.' In a way, we are setting up the scene and completing man's education to understand. Then that angel, which is the Soul of the Daughter of Mitra, will take man with a new light into Space. It will be a new beginning. We have set the scene for this beginning of a new course, and end of the past. But we'll see how things will take shape. (It won't be changed today or tomorrow. It has to be that collectively all the parameters have to be changed)).

(It's like what we said in today's teaching about changing the M field environment of a room, like its temperature to see steam or ice on the windows. (We have to change the environmental M field of the plasma to show its new dimension and strength and condition. I created the condition for man to enter a new dimension of the fields of the U. Then it will be handed over to the most beautiful Soul. She will guide not only humanity, but the whole Universe into the new dimension. We'll see what the next step will be for humanity to go through this transition. As I said, (when I complete (my teaching) to take man into Space, then I'll hand it over to her. She is amongst you now, and it's time for it. You will know how and where to take that next step).

Q: Why did the Pope meet with the head of the Russian Orthodox Church in Cuba years ago? They never met before? And after that, the Orthodox head went over to Antarctica with 90 Russian ships, to construct a church in the 'little Argentina' ?? here in Antarctica?

K- Ask them why?

(Mr. Keshe talked some things about Ukraine, Vatican, Gaza, Israel, etc. And then about tunnels.)

(Mr. Keshe advised a KS to explain the T in a simple way. The mobile phone is used mainly for locating the person. There will be a new system shown in Sanya that nobody has seen before).

(An easy way to explain how we transfer energy for the mobile phone transmutation, is to consider how we transfer our voice as energy over mobile phones. We can make packages of energy and transfer the sound through them. If we do transmutation over the matter state mobile phones we might lose a little bit going through all the connections. Maybe you would end up without a finger or missing other bits. Therefore, we have developed the new Plasma Communication system so that everything will be intact. (We transfer the object like inside an envelop, and everything stays completely intact, without anything missing).

(In Gaza we have moved this new dimension of (plasma communication). But we won't make it public now. We have brought in a new technology to establish the feeding of people in Gaza without using headphones. I'm monitoring what is happening and how and who we have to collaborate with. The Israelis are sitting on all our lines so they know what we are doing. They try to intercept and do a lot of other funny things. But I know how to play with these children. I've played these games thousands of years ago, and they still think it's the time of Moses. (They have changed their dress but their mentality has stayed the same)).

(They have been targeting KF, but we still keep to our way of doing things. They don't have the T so (they can't respond to whatever changes we make). These things are developed for Space, and not just for Gaza. We have added new materials and dimensions to our central core to support Gaza. Actually, our team has developed a totally new system for it and we'll see the change).

(The telephone lines are just used to locate the person. (Once you establish connection with our system then it's easy to connect again). It's like the Souls are connected. The matter state phone is just a locator. But like in the teaching today, we learn how to use both the matter and energy states. As we fine tune the system, then you won't need the mobile phone anymore. You can use the energy state).

(To connect on Earth we have to rely on its atmosphere. But outside in the span of the U we have the Cosmic Rays, and we are never outside of this communication line. On Earth we have the satellites connecting us to New York or wherever, and we have our system in Austria. Everyone picks it up through the satellites. Instead of using satellites, now we can use the Universal lines and Cosmic Rays. I have the knowledge and 'know how' to connect to them and it doesn't matter where you are. I can even find you in the center of a star).

Q: Is that because there's no distance?

K- No, it's a matter of science and understanding the field interactions.

(I come from the Middle East and have both Jewish and Islamic blood. My Soul, and my being is connected to the dimension of the Soul of that area, because it comes from it. Therefore, do I need a satellite? By blood I'm connected to the land. I have become a 'Satellite Soul.' And this is why we ask you to become Satellite Souls to bring the connection). (Man dies physically, but the Soul stays).

Q: We are just waiting for the world to catch up to you and change. Then the change will come.

K- We have to do it. (We have to do it in the right way, but at the same time, the others should not abuse 'our right way' to do something).

(It's very possible that I will return to Iran in a very short time. Then we'll see the development of new technologies. But it depends how we understand it. Then we'll

prepare the ground for the presentation in Isfahan. First we have to complete the work in China. And move on to the next step. Part of the next step is this. This is why I explained to you in the past teachings, that many of those who walk on this planet are not from here, they are aware of the operation of their Soul, then they become Satellite Souls for the races in deep Space. This is how it works, if you understand the process).

(Everything needs to be done in its own time. It cannot be, just because we started 10 years ago (that we can do it). This is the 'final act,' the final show, before the curtain comes down, and before the new life starts for the man).

(I used to explain this to my children in a very beautiful way, because a child can understand. When the final curtain comes down at a show, we say the show is finished. But actually, it has just started. Because the message we got from the show becomes part of us, and our way of living. It becomes part of our memory, which affects and changes our life, and it brings change to our lives. So when the final curtain comes down, it's not the end. It's the beginning of something new. Only one curtain comes down, but there are 1,000 people watching it in the auditorium).

Q: It's like the end of one age and the beginning of a new age.

K- It's not one. It's understanding. (We have to put aside our prejudices and ignorance. And how will we use the knowledge we gained for the betterment of our lives in both dimensions of matter and energy, and for the people around us. Strangely, anybody who came to harm the KF, ended up harming themselves, by themselves, and through themselves. There are many people with many regrets. One day it should be completed. And then one day it should start again. "The show must go on." But this time the show will go on by understanding the totality, not remaining in the one-sidedness of ignorance).

(Today I tried to make it as easy as possible for you to understand how to bring both the matter and energy states together. Because once you understand this, it's much easier to transmute. It's much easier to live in both dimensions. Then you don't need to explain it).

Q: Do animals perceive both the Soul and matter state? And sometimes they can foretell what's about to happen. Do they know when they are going to die or transmute?

K- We all know. It's just that we try to ignore it, or say, "Oh, it's not going to happen." (?? We know when accidents will happen). The human body knows when it's about to die, and what it's about to do, and how little it needs to take before it goes. We are all aware, without a shadow of a doubt. It's just that we call it something else. We say it's old age, instead of preparing to die and we have to gather the right amount of energy for the Soul. When it's time to go, no 'fountain of youth' can help). (It's not just animals we also know. It's the understanding of Totality. ?? Our brain identifies the strength of the field of the Soul. When it's more clogged up, and more separation we call it, the STP).

(There's an amazing new research that has come out about the brain and it opens up a new D to be able to explain the work of the plasma. While scientists were researching about Alzheimer's and the protein it produces in the brain they came across this new discovery. First they had to build a very complex kind of telescope to look into the brain while the person is asleep and under Live conditions. They had the people fall asleep while sitting upright and used the telescope to observe what was happening in the brain).

(There is no blood in our brain, instead it sits in a liquid. But they never understood how the brain cleans itself, or how it actually works. Or how do we get brain cancer and other things. They just ignored those questions. What they found out was that the moment we go to sleep the circulation of the blood changes and becomes weaker. We know this as a weakening of the M fields of the blood that allows the Soul to expand out. This is what we're implementing with the new headphones in KF. The important discovery is that as we fall asleep the liquid in the brain, in the half which is not working, flows out. It's like opening the drain at the bottom of a sink and the water flows out. This liquid flows out of the brain when we sleep. That half of the brain literally goes dry and the brain cells shrink, because the liquid drains off and it deflates like a balloon. The process of draining the liquid cleans the brain by washing all the energy out of the cells that is not needed).

(Now we understand how brain cleans itself and gets rid of what it doesn't need. And when you do not have enough liquid to thoroughly flush the cells then little bits gets stuck. During this dry time, these proteins stick to the brain and start the process of Alzheimer's, brain cancer, and the other diseases. It's amazing how much information this research has been able to gather. I'm sure leading Universities will now start researching this themselves. Because we never knew these things about our brain, that it deflates during sleep and washes itself. All the veins become like a sieve, and the liquid goes right through them and washes all the surplus things, and energies, and everything that is not needed out).

(There is an important question the world of science has to answer, where does this liquid go? Because they haven't managed to find out where the liquid drains into. After it drains then it gets filled up with fresh liquid until you go to sleep the next time. This research has shown us how crucial sleep is. It's not so much to refresh your body, it's more about washing the brain and cleaning it up from the days work. The washing is done in a synchronized matter, so if you don't get a minimum of 6 hours but up to 8 hours of sleep, then you start getting all the emotional problems and everything else).

(This has opened up a lot of things in the KF Research and Development. We understand what this means and for us it helps us decide when the best time to use the headphones is, because of the washing and shrinking of the brain. I noticed that many KS when they come to these sessions they fall asleep. In a way, we are hitting the dry time when the liquid has been drained and there's no water in the brain).

(We have to see how much the Soul is affected and how it behaves during the dry and wet times. Also what kind of dreams become reality during that time. If they are doing a 4 hour session then in the middle of it the liquid in the brain is at its minimum. During

this time there is no interaction between the cells, because the liquid is a communicator, and connector for part of the brain).

(This research has brought a lot of interest for me to determine the right time and way to put people in the machine, and how much does the intention of the emotion have to do with it. We are filling you continuously with fields. And how do you tap into our system to take what you need from it? And how our system is setup to tap into the Universal ?? Energies. With these energies we can feed every living thing on this planet, so it doesn't matter how much you take from it would still be just a little bucket. We are just channeling the fields to you. (For example, if you want 2 tomatoes, then we just connect you to the Sun where all the energy comes from)).

(There are more questions to answer like when is the most vulnerable time? Is it when there is no interaction between the liquid and the brain? Does the Soul rapidly expand when the brain is at its driest point? Is this why when some of you connect, you immediately respond because the brain has already gone through its cleansing process? Is this why it doesn't matter what we do, we cannot get through to you, because that liquid is too thick?)

(We are developing a system that can handle this and it's actually in operation. Some of you in Sanya will go through it. We were testing this during the flight sessions, when we switched the microphones off and then back on. I've been trying to understand about your sleep time and your behavior, by how you talk after the sessions).

(This new research is bringing a lot of things to the Space Technology, and is clarifying how and where we can use it. And when is the best or the worst time to do the transmutation. Would you like to do a transmutation during a 'Tsunami' when the brain is getting filled up with liquid and the energy is all over? It's very interesting science).

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute. And as usual, we welcome you back. Today we are considering and looking back at how technology develops and how man understands more and more. And how we become to understand more of the science of the

physicality. But, at the same time, we teach, we understand the science of, not only matter state, but the energy state.

In the teachings of the past few weeks, we're building it up, for you to understand more and more. We spoke about what we call, Cosmic Fields and Cosmic Rays (CR). And what's the difference, how do we understand which one is which, and how do we associate our work with, in respect to the other? (:18) In a way, if we as Knowledge Seekers (KS) understood, and as good students of the school of the man studied, the world of physics, we talk about the neutron and we talk about then Hydrogen (H). Which means neutron is just individuality and then Hydrogen, which is the split nuclear decay, the, what we call, the fundamental .. division of the fundamental elements of the energy pack, into two, to sustain its existence. And we call it Hydrogen, which is one neutron splitting into electron and a proton. Now we change the name of it to an atom, because now it's two pieces. Then we play all sorts of games with it, we put another neutron with it, we call it Deuterium, and then we push in another neutron, and we call the same Deuterium, because it's got one electron in it, it must be Hydrogen. But, different isotopes, different shape of it, different characteristics of it.

So, let's go back and see where and how we match. That we bring the two knowledge's together. Don't forget, the life of the man today is a matter state. And, energy state is considered when something falls, we call it potential difference energy, when something does ?? something else becomes a jewels and become crowns, we burn it, we find only material that we can burn and release the energy, to be the power supply, like a coal, like everything else, (:20) like whatever you call it, and then we call it the oil and gas we burn it, and then we got a little bit wiser, we found out we can stop some of these things moving the way they want, and we can gather the energy, and we became the brain of the humanity, we called nuclear physicist. Nothing but a hole in the head, man needed.

But, it's all matter state. What happens, when we consider now, parallel to this, the energy state of the same behavior? A neutron shows as a neutron, as an entity, as a man would like to call it, matter state of, because it's conditioned by and forced through magnetic gravitational (MG) atmosphere of itself, to show itself as a single pack energy. And we call it a neutron. But, when you take the conditions of the magnetic (M) field, or what we call, atmospheric condition of this planet, from that energy pack we call neutron, now it's energy. Does not have a name, now it becomes a plasma. So, goes back to how many times in past ten years I explained, we choose too many words for the same thing. It's the same now, we have one name for two states of condition of the environment. (:22) Different magnetic field strength. And this is weird, our scientists, Knowledge Seekers, all are baffled. This is plasma and this doesn't make sense, but it's similar to the other one, but what's new? And what is the difference? Now we become energy people and not matter state people.

So, if our Knowledge Seekers understand, that in matter state we call it a neutron. In the environment of Universe (U), where the condition of the environment, magnetic field is different, we call it a plasma. Or, we create that different condition of magnetic fields on this planet, or anywhere else. So, we don't have the tangibility of the matter to touch, but

we observe the strength of the field of. In a way, when we burn the coal and we get the heat, we observe the energy of the coal, but we just talk about the heat of it. But in fact, is the energy, is that coal which is heating, We see, we state the same matter in two different conditions. Now we have to learn the same. We call a single plasma in the matter state of the man, a neutron. But, when we bring it in a different dimension (D), open spaces of the Universe, where the fields are weaker, so it can expand or it can narrow, or decides the condition of strength, we call it a plasma.

Then, we come to the point of ray and photons, or fields, or whatever you want to call it, which is the characteristics of the light, we call it. Then, use the name of the Hydrogen, (:24) for the other one, particles, they call it, photon. Or, is it a ray or is it a particle? Because now, you had a single field, or single plasma, with a division of the neutron, or two packets of plasma, you call it a matter state atom, now you have a magnetic gravitational field of two, making it a new one, which now it gives you the bigger dimension. Variety of the strength interactions, and then you call it, and you say, it's a photon, it can, it can create, it bends with the light. Because which one is, sometime light behaves as a ray, sometimes as a particle. Now for the first time in the world of physics, we understand why.

When it goes on its own, when it doesn't bend, because it's dynamically itself, and it interacts with Totality, is a ray. And then, when it's a combination of two, as a plasma of an atom, it creates magnetic gravitational positioning, in respect to any magnetic gravity. So, it has to find a position and the scientists say, "Oh, light sometimes bends and sometimes doesn't." My God, you scientists never understood you're dealing with the atom of a plasma, and not with a plasma singularity. Because, when it's singularity, it finds itself, it's like a sponge, it dictates its motion, and it can keep to its direction of motion, and it's called a ray.

So, for you as Knowledge Seekers today understand more than Einstein did, (:26) more than any other scientist in the world of science understands, what's the difference. Why the light sometime bends and sometime it doesn't. Because when it's the singularity of a plasma interacting, due to its speed, due to its position, due to its magnetic field strength, it follows the same path, it cannot be changed, because it has common denominator of the light, the Rays of the Creator. But, when it's two, they have to twist and turn to find a position, then, now they find a third thing, which is the magnetic field of the Star, or a Galaxy, or another atom, and they find a position in it. Now, you tell those scientists who tell you, how can you bend the light? How can you bend the light even 90 degrees and 180 degrees? Now you can explain scientifically, what is the difference. And if our scientists, our Knowledge Seekers understand this, we have entered into the world of the, what we call, plasma physics. Matter state of the plasma, or a plasma in, on it's own, in respect and interaction with its environment. Once you, Knowledge Seekers understand this, once the world of science understands how much mistake he has made, and scientists like Einstein, who had no clue, but were bookkeepers, would have never, what we call, 'flamed the fire of ignorance' of the other scientists and become great, to the ignorance of their own.

Once you understand this, once you understand the change in the environmental magnetic field, dictates the size, the shape, (:28) the strength of which part of a plasma to interact within its environment, then you understand in a simple way, how gravity is created. The mystery of existence, how the creation of the fields comes to create separation, or what you call, magnetosphere. If man's scientist, the knowledge of man, is taught at the outset, at the beginning of the time when the child understands, 'what is what,' and explain, "My dear, my loved one, my existence with you. When you see something, this is the matter state. When you feel it, is the energy state. And the two exist, coexist and always have existed within each other and together."

Then, it comes to the point of another ignorance, another, what I call, stupidity of the scientists who never understood, how do we create Carbon? How do we create Carbon 14 (C14) and how we create C60 and how we create C760 and the rest of it? If man understood the amalgamation of the two fields, one existing within the other, creates the condition of manifestation of the physicality (P) in a crystal structure, then man understands the whole world of science has changed, in understanding the condition of the plasma.

In the world of Creation, when we put Atoms together, we call them molecules, and different molecules of different strengths, create alloys. We cannot put one inside the other. (:30) In the world of plasma we can. And the interaction of one inside the other, creates a condition of manifestation of one in respect to each other, or the environment, which you call crystalline structure. Which means, existence of a field within another field. And then how and where these are positioned, dictates manifestation and interaction, once the weaker is outside, and once the weaker is inside. When the weaker is outside, it's a manifestation of electron, and a proton, and atom. And, when it's inside, it becomes what you call, life of fields within each other, and then a crystal structure of energy. This can be size of one energy of the plasma of the electron, within the plasma of a proton, and what is known as, what we call, the dream of the scientist, a fusion. Or, on the other hand, in the world of us, life, we call it transmutation. And then, when the little pack of energy is outside, and it's in the condition of environment, it becomes an atom. We call it the body of the man. When the Soul is within, and the physicality outside.

So you understand, we are using the same language. But due to the lack of our understanding, we have created a mayhem between the matter state, and Mr. Keshe call it, a Soul. Your ignorant scientist call it a plasma, they call it fusion, they call it everything else, because they could never explain the truth, (:32) and they could never understand the reality of the physics. How it operates. And then it doesn't become baffled, Mr. Keshe does feed this and do that, and he wants to transmute us, and he wants to travel with the speed of light and beyond. Because that's all it is.

Just because man's scientists are ignorant, we do not become whatever name you want to put it, magicians, it doesn't work with the law of physics and everything else to reject it. Except rejecting their own ignorance of understanding the two states of the same plasmatic magnetic field, one in the dimension of man creation of environment, we call

it, whatever reactors, and one in the condition of the matter state Inertia of this planet, we call it, matter.

Then, if you understand what we told you from the beginning, How the 'magic liquid' was done, the KF liquid became the mystery of the Internet for years. What is this liquid and the rest of it? Which you Knowledge Seekers now, it creates matter into energy. You call it a Gans. And then you ask Knowledge Seekers, because you can't see it, you are still in the doldrums of the same problem as before, When you had the matter, now because you can see the Gans, it's still matter state. My friend and my dear students, this is not the case. You have put it in a liquid, which shows itself in another atmospheric condition of inside the bottle, but it's the same 'guy' outside called Copper. (:34) Now you deal with the energy of it.

And this is where this science, where this technology, shows to be something strange and people say, "You're mad because you're following and talking about this." Because I'm not mad, you're ignorant to the Knowledge of the Creation. As simple as that, you talk about the matter state of it, I talk about the energy, plasma, matter energy. What we call in definition, 'energy is magnetic field in motion.' In the plasma science. Energy in the dimension of man is position dependent, potential difference and the rest of it, and burning it, 'Mr. Jules' and Mr. Stupid and the rest of it. But, in fact, it's the same.

And, once you understand this, then you understand how in the world of Creation, a single atom of Hydrogen leads to creation of Stars. How the positioning of another plasma, in respect to the plasma which started it, leads to creation of gravity, dictating the condition and position. And that single plasma which starts, is the Soul of the Man (STM) who was born on this planet and he's found his known position. On this planet, you are the physicality of man as you are. The minute you die, the minute you leave the physicality, the STM, which is the dimension of strength of the fields of his existence, in dimension of physicality, amalgamating into the central energy of the body of the man, you call it the Soul, and whatever name you want to put it, finds its position in Space, and in that position, you start interacting with the environments and the fields of it, and creates its own atom. When, while you are within it as a Soul of the Physicality (STP), (:36) creating the crystal structure, the dimension of the energy of it, within it.

How strength? What's the ratio of the strength between the plasma within and plasma outside? It gives you five sides, six sides, and every other crystal sides you like. You made the terminology for a man to show him, "I'm more clever than you." But we are talking about the same thing, I'm a magician, so I change the name, you don't understand. (So you) study, to understand, if you understand what I never understood myself, then I become professor and the rest of the names we've given to our most stupid people in the world.

Now you understand. If we teach our children, if we teach our Knowledge Seekers, from 'day one,' that this is the matter state, in the Inertia condition of the Earth, and this is the same matter, but in the field strength of itself, but in a different field strength environment, then a neutron is what you call a plasma. In the interaction with the field of

the Universe, which itself is a bigger plasma field, it behaves like a ray. And if you allow it to interact with another one, and in interaction with the environment and the other gravitational magnetic fields, it behaves like a particle. Because, one is two pieces, electron and proton you call it, In the plasma physics, it's the magnetic field positioning of the energy of. It has no clothing on it. When it finds Inertia, field forces of the environment, we put a jacket on it, we call it a winter. In the environment of the Space, (:38) we don't need any jacket, it stays as an energy.

And then we understand how simple the world of Creation is. And how easily man in the coming time will create magnetic field systems, gravitational field systems, which travel beyond the speed of light, because one is connected to the fields of the Universe in an open plasma, and one is in a matter state. And if you're clever enough, go back to the first patent we ever put in. Read the first few inputs, entries of the first patent. We brought gases, we brought radiation, and then we created gravitational system. As the biggest company in Belgium called it, "The first energy generating magnetic field gravitational system."

Now you understand. The knowledge hasn't changed. Now you understand what was released 20 years ago, as a patent. In the world of matter, we put the Helium in, but in other hand, we inject the radioactive material as whatever, to change the condition of the environment, that that matter state does, is not under the condition of the Earth's Inertia. And now you understand how gravity is created. This is the essence of the creation in the Universe. We don't bring Copper and Zinc and create the first seed of a Star. We bring Hydrogen and Hydrogen and Hydrogen, (:40) and more Hydrogen field strength plasmas, that interaction with each other, in finding position, in respect to each other, they create a motion, that they bring more in, they become a Zinc, and then, after a few billion years of man's life, Superstar, Supernova and whatever else you want to call it.

And as I always said, "If God is creating, if the nature of the Universe creating one million stars a day, it must be so simple." It's so simple that man has become ignorant to it. So, I can do the same. Now I understand the secret of the creation of these. Does not make me a magician, and doesn't need for me to be killed by the King of Belgium, and the rest of the idiots, in the name of religions. I understood the science of Creation as a nuclear physicist. And those who are ignorant, could not understand it, do every game to play to abuse the man.

If you understand this, you change the combination of the fields, instead of becoming a Star, it's becoming a Moon, it's becoming whatever else, it becomes orange juice, the beef meat and the banana. Now you understand, how much, how correct, how the science from the first patent put out 20 years ago, is valid. It took 20 years to open your eyes to the truth about what is written. Those days, I could not explain this, it took me 20 years to teach. So many of you to understand the two states of the interaction of the field of the Universe. (:42) One in a different environmental condition called the plasma, and the same thing in a Earth gravitational magnetic field called matter state, of whatever.

In a way, as I explained many times, if you keep a drop of water in the room, freeze the room, you see the water ice on the glass. Heat the room, you feel the steam in the room. Keep the temperature in the order of the outside, you see a drop. Take the same water atom, change the environment of its magnetic field, its environment magnetic field, not matter state condition, you'll get a plasma. If you reduce it enough, this plasma will take the shape of the whole room which it is in, and you change and choose another dimension of field of environment with it, it'll become a speck of dust size of the plasma. Then, in this position, if you introduce another position of the fields within the room, it has to interact with it. Attracted to it, will come faster to the speed of light to reach it. Distracted, it becomes worse.

Now you understand as Knowledge Seekers, you are all the most advanced scientists in the world, and all your families and the friends, they ridicule you, because they haven't understood. 'Ignorance is a bliss,' and those who are ignorant make fun of the others because this way covers their stupidity and their ignorance. We are no Messengers of the blah, blah, we are no religious group, but those who understand the essence of the science of Creation. (:44)

And then, you put it in different environments, you call it, this is the Mars, this is Earth condition, this is the body of the man, you call it the Soul, this is the middle of the Space, you call it the Sun. Choose any name you like for it. The truth does not change, because you never understood the science of Creation, now you become the ridicule of all the people around you, because they were taught by the same idiots, by the same ignorant people like Einstein. A bookkeeper should have stayed a bookkeeper and left the job to the scientists of physics to explain.

I always said, the Americans doing their best to wipe out any connection with Van Braun (Head of NASA former Nazi SS). The hero of the American Space Technology became zero of the biggest killer man in the world of the science, who killed as many Jews in Switzerland. They are trying to wipe his name from everywhere. Soon man will come to that point. Einstein should not be anything anywhere, because he's the biggest criminal in the world of science, and if he wasn't a Jew, this ridiculous position would not become acceptable. The same we accept what the state of Israel is doing to the Palestinians. One idiot, and the rest, we are suffering with it. This blood has to be taken off this land, that man start living peace in science, technology and life. They have to do it in their own hands, and we always look at it. The science has to be knowledgeable, respect of the Soul has to be, does not matter what. When you have no respect, you destroy anything. (:46) The STM, the intellect of the man, and the rest of it.

Now you have to understand, we're coming to a watershed in the world of science. We are in the beautiful island of Sanya, in Hainan. And in the next 4 or 5 days, we change the history of man, in science and technology. Some of you will come, as I call, the same as you went out, because never understood. And some of you will understand, will change the course of your life. Because you understand the difference between what you call, atom and what you call, a plasma. And then, nothing will be magic. And then, you decide the state of the plasma of your Soul, in respect to the plasma of the environment we

create, and then you find a new position, New York, Mars, or anywhere else in the Universe, instantaneously. But, through what we call the emotion, which is the field interaction, you decide the place, the time and the space, and that's what many of you have done in past year and a half, with the new technology, when you join us.

Now you understand, how simple the science of the life Creation is, and how, if one day man goes to the next step, will find itself in the field strength of the first line of the fields of the Creation, what we call the Creator. Then, you don't need to see a light, and you don't need to see a fire on the wall, and in the woods, and in the bushes, and God knows what in the mountain. (:48) As the light comes from understanding the truth about the Creation and the Creator. The more ignorant you are, the bigger mountain and bigger fire, and more stupid man, you need to go and get lost in it, to come back to say what I saw, and as you are ignorant, you accept it.

Any of you, who understand and understood the teaching, even this morning, you understand the reality of the light. That light is the light of enlightenment, not the bush fire, and God knows what, to whatever you want. And those who don't understand it, have to battle with the bush fire, and the mountain fire, and the rest. And those who understand, understand the truth about the interaction of the plasma of the Creation at the time, place and point, in essence of the Creation of the man, the two fields of the interaction, one is the neutron and one is the electron, and the interaction of the two in respect to each other, creates an environment which shows that we are in touch with each other, we are working together, we are an atom. And the same thing, we are the Soul and we are the physicality of the man. Two plasma of an electron and a proton, you call it an atom. And how hard is for you lot to understand, you call a plasma of a proton the STM, you call the electron the Soul of the physicality of the man, and you accepted that, that atom, but you can't accept your own physicality, "This is me."

As Arabs have a good say in it, << speaks in Arabic >>, which means, how stupid you are, that you don't even want to accept the truth. (:50) You accepted the atom. There is an electron and a proton, we call it the Hydrogen. "Oh, it's a sacrosanct of it." But, my dear, it's called the Soul and STP makes that man. 'Mr. Keshe is going into religion, God forbid.' You call it whatever you like. It hasn't changed the fact. Only those who see you, you putting a stop to the abuse of you, understanding the interaction of Soul, which one you need to energize more, which one you need to become closer to live in the dimension of the Universe, you call it the STM, you live in the dimension of the physicality, you go to the STP of the man, because it's both ?? has ?? .

Somebody asked me, that, "If it's this, why do you come to Earth?" I said, "The beauty and the pleasure of physicality, sometime is so good, that we would like to taste it." But we are still connected to the Universal Energy, which is the Soul, which is the dimension of the fields, without dimension of physicality. Who doesn't like to touch the most beautiful, gentle body? Who doesn't like to kiss the most beautiful lips of a child, to understand the love. When you kiss your child, the love you receive, how can you feel it in dimension of the Soul? When you hold your lover and understand, what you want to give the whole of what's inside you to it, you can't feel that in the dimension of the Soul.

It's too energetic with no dimension. Then you understand why we choose the dimension of physicality. (:52) Because then you can put a word into it, you can put the emotion into it, and you can explain it, what it is.

Isn't this, wasn't this the essence of the creation of Mitra? For man to understand the dimension of interaction in the emotion of physicality. When Mehran was created as the first god, go back to the history of man. And if you change it into the Arabic, which you call it 'Abraham.' the 'brahim' at the end, is the same as 'Mehran.' That's why you understand how much everything is copied from the origin of the belief. Then that's all it was. He was alone and lonely. Then he created the condition of the two children, two fires, to show the interaction, the separation, the difference that leads to creation of life and love. And which one does he have to kill, the physicality, or the energy, that confirms its existence? It wasn't to be the son you kill, it wasn't to kill a cow. It was to kill the prejudices of man in respect to confirmation of the two dimension of life, physicality or energy.

And now the time has come that to merge, to understand, to not to merge it, because they travel between the two. They always change from one to another. Man never understood. Then we come to the next process of understanding. Then we come to the position and the time and the place, where we will bring in the knowledge of the interactions, and man become a 'Passenger of Universe.' (:54) Then, man shall not kill, because man does not need to kill. I travel in dimension of energy, I take what I want, and then, I go back to the dimension of the matter state Inertia, I am in physical life, okay, I don't need to kill because I already fed myself. Do you eat when you are full? And when you get it wrong, the physicality becomes sick. And then you do not know how to sort it out, you make it a chemotherapy and you do every other thing, except if you look inside to the dimension of fields, and then you find the matter state of it to itself. And then, if you understand this, then you understand why, emotionally, we create most of our problems in physical life. Where in the Soul dimension, there is no sickness.

When you put two fields against each other, you have a 'Mass.' When you bring it in condition of environment of the other, you get 'Weight.' In that environment condition, you call it emotion. And then, how do you interact it, how you create that emotion, affects what Mass show itself. On Earth is lighter, on Moon is heavier, on the Moon is lighter, on Earth is heavier. Which way you want to do it, it doesn't make any difference. Because you haven't understood the principle of Creation. Everything else is a hassle and what I call, God forsaken people like the Einstein, create the fire and laugh themselves. (:56) They are stupid, (so) we do it. Call it Christ, Moses and the rest of it, the same in the Soul dimension. Einstein used your physicality as idiots, the rest use your Soul as idiots.

Now you understand, how simple the life of existence in the world of the Creation of the Creator is. Now you understand why I start teaching you about Cosmic Rays. And we call Cosmic Fields. And what is C14? What is C60? And why do we have a C12? C12 is for physical dimension of the man. Sorry you accept the physicality, only matter state of Carbon works in you. If you accept another condition, which is in a dimension of the

Solar System, and in a dimension of Universe, you call it C14, which means you are a bigger strength plasma as an individual, not in a matter state as an atom.

And then, if you immerse this field, this whatever, inside another, you create an environment, because it's a containment, you call it crystal structure, which means, it's the fields dictating condition of. And if you rotate one plasma, inside another plasma, in a given specific dimension and fields, you will get that pentagon, the crystal structure, hexagon, and the rest of it. You don't believe me? (:58) Ask your scientists, go on the Internet and see why, in some of the pictures taken from the North Pole and the South Pole of some of the planets, we see hexagonal shape. Because the plasma of the two entity inside the two reactors, create this condition. You see by the shape of the hexagonal shape on the North Pole of the planet, the energy fields, the combination of the fields of the center of the core of the planet is. But you are ignorant, "Oh, these are fields we don't know, nobody does." Now you know.

Now you know you're on the North Pole, and how this crystal structure, fields, and covers the planet as an atmosphere. If you go far enough and you look at it from the side, you see the same crystal structure, the same hexagon. And then, if you find in a position, the condition of the pentagon, which is the confirmation of existences of Totality, then you find how you can penetrate. That football I was teaching you. You understand, nothing has changed in my teaching, it's just that you do not understand the principle of the Creation. Now you understand. And all those professors have to deny you, because then they don't exist. And why do we need people like this to confirm what we know? Because we do what they cannot do. We achieve things they cannot achieve. And even us have to confirm our own subjects.

They say, "You have to prove it to me to accept it." No, you have to educate yourself to understand what I'm talking about. It's the other way around. And we allowed ignorance to run. We allowed thieves like Stephen Hawking to steal everything, (1:00) to keep itself to itself, till he came to understand his stupidity. You see on the screen, within seconds Rick has found it for you. These are the, most of the North side planets of the systems. Two Plasmas inside each other, Crystal structure. Now the science of physicality, now you understand the science of energy, what we call plasma, fits.

This fitted on to me when I was 8 years old, I understood this. In 60 years I'm trying to teach man, how you've been fooled. One day, I used the terminology of the name of Einstein in Farsi. I gave that name to him that day. Go in the alphabetical Farsi and find out what Einstein means. It's very simple and that's worthy of that man.

You have to understand, the world of Creation, We are getting so close to understand the free dimension of motion of the fields of what we call plasma, to what we know in the matter state, that will shock and shake the whole world of the science of the man today. World leaders knew and know it's about to come. (1:02) They all talk about the new technology, new science. The science is here, it's in the hand of you as Knowledge Seekers, because you understand it's so simply. And it will bring the change. Because, when you use the energy, you don't need to rely on the matter state. When you want it,

you change it to matter. When you want ice, you turn the temperature down, you collect your ice on the window. You want to warm it up, you make a steam and the same water appears as the mist on the window. It's the same water drop, it's the same knowledge. You want to change the field of the environment, you bring it to show itself as a matter, if you change the environment of it, the way you want to behave as a field, as a ray, because it shows in that dimension.

It's not hard to teach that from day one to our children in the school? To show them that man lives in the dimension of the Inertia, condition of the matter state, or lives, can live in the dimension of the fields, where this matter Inertia, behaves as a fields. But it's the same. Do you want ice or do you want a steam? But it's the same drop (of water). It's the same amount of fields, magnetic fields. In the matter state, you call it potential difference, whatever energy, and an idiot calls it MC^2 , which is nonsense. It never worked that way. It'll never work this way. But we are stupid, we accept it, (1:04) because it shows we don't want to show we're stupid.

But, on the other one, you define energy as magnetic field in motion. Because, fields cannot have a different, or a constant motion, in different and constant magnetic field environment. They move according to what environmental fields allows them to. And if it's working on the lower field strength or higher field strength environment, I go faster or slower. I dictate how fast the speed of the fields inside my plasma are. Am I squeezed or am I released to expand? Then you understand, the world of physics is as sweet as honey. The world of Creation is physical. Does not matter in what direction and dimension. And you understand why we come, manifest in dimension of physicality, to enjoy its beauty, because when we go in the plasma, it just fields and emotion.

Now you Knowledge Seekers, understood for the first time. Maybe I should have taught this the first day I started the teaching, not keeping you going for 20 years and now the 10th anniversary of the public teaching. The reality is that we came in, we showed you how your matter changed to Gans's, to Nano material, and the energy fields. In Sanya, in next 5 days, I change the course of history of man in science and technology. (1:06) That we start to become the Passengers of Universe, by the conference in Isfahan, in beautiful land of Iran. Some of you will come, as we say in English, you come in as a donkey, and you go out as a donkey, because you never understood what kind of hay was put in front of you to chew. And some of you come as a man and leave as Messengers of the Universe, understand the process of the Creation. And those who do not, they say, "Nothing happened to me, this thing doesn't work." Because ignorance is a bliss.

And now you understand how your emotion controls you seeing, allowing the fields of your interaction of the body of the man with his environment. There is nothing more powerful than emotion. And that emotion trying to prove, blocks you to see. And some of you come in because you understand, you understood, you have interacted with the fields, go to all positions from Moon to Mars, uncle and auntie, and everywhere else, and they understand and look at you. The guy's crazy, this can not happen because it doesn't happen. Because your emotion is controlling the dimension of the field flow of the energy of the plasma which is the STM. Or, you create the condition that the plasma of

the physicality, the STP, controls, changes the environment, that the Soul cannot expand, the central energy cannot expand.

Then, you come to understand, (1:08) how much we as Knowledge Seekers have to battle these, what I call, idiots of the science, ignorance of science, because, they don't want to understand, they call it 'Yin and Yang.' But when it comes to the science of Creation, no, no, no, no. We stick to Yin, Yang doesn't exist. And we are in China, and we have to handle so called, idiots of the science and technology as experts, for them to show their ignorance. And no man like to be ignorant, or to be told he's ignorant.

Now you understand, that we are on the verge, we are on the eve of change of the history of man. Massive amounts of systems have been shipped into China, into Sanya today. That even the people who brought it and put it together, have not even understood 5% of the capability of what they have created, to bring man close to their own Creator. And in time, this knowledge will become part of the essence of the teaching of man, from the first day in the school of the education of the man. That no prejudices and no ignorance can be created. You do not to make it the controversial word of today. You cannot be this and you cannot be that, because there is something wrong and then you become racist and the other. The science of the man in the dimension of matter and the energy, (1:10) or plasma, or whatever you call it, has to be taught in the first day of the school of the man. That man becomes, as part of his life, to understand which and what, and bring with its interaction, the Knowledge of the Creation for the rest of the humanity.

I hope today I open your eyes, to the true essence of the physics, to the essence of the Creation, and how man, delivered by itself, has shot itself in the foot, and wants to run a marathon of the Knowledge of the Creation, where one foot doesn't exist, which is one side of the science, is not accepted. Not understood, due to the ignorance. And from now on, we bring that change. And from now on, we show how that fundamental plasma leads to creation of the Supernovas, and the foundation of that plasma leads to what you call the Black Holes in the brain of the man understanding of his own creation.

In Sanya, in the next 4 days, 5 days, we show technology in a way, nothing to see as a system, but to feel the energy, the plasma. And that's the whole purpose of Sanya Conference. We have not brought you here to see systems. We have brought you here to feel the energy, to understand the emotion of your Soul. How, what feeling I have, which I didn't have before I entered the zone. What was my wish, and what is my wish while I'm in the zone now. (1:12) And that is the change man has to understand. Otherwise, as I said, you come in as a donkey, and you go out as donkey, because you came to see, how green is the grass. What is the machine, and what does the system.

It's exactly the same situation as when I gave you the MaGravs. You plugged it in, 10% reduction, Mr. Keshe You never understood, I gave you the most powerful conversion of the matter state into the field state. You plugged yourself to the bottom of it, and you ignored yourself, the fields above it.

And now, it's time to bring that change. And now, in the system, those of you who are in Sanya, and you come across the system in the next few days, close your eyes to what is, what you see. Open your eyes, what you feel, with the fields of the system. That is the purpose of the conference in Sanya. And this is the reason we have brought this point. Because in Tehran, and when you go to Isfahan in the conference of Iran, you'll fly with the Soul. And then you understand it. And man needs that time of maturity in the next few months to complete the cycle.

It's very easy, once you understand it. And it's very hard and impossible, when you want to force matter state conditions of emotion, to fields condition of emotion. (1:14) And once you understand the two are the same, how you play with it, decides which one, then you become true man of the Space. Now, as Knowledge Seekers, I hope you understand why sometimes the light can be straight line and sometimes, as we said, you can 'bend it like Beckham.' Because you understood the difference between the plasma singularity and the plasma as a, what we call, 'polarity,' which is two of them. And now you understand what all those top scientists measured, and saw refraction and the bending of the light near a Star, because that light is made of the matter state of the Star itself. But, once it's the same, and the other one is the, what I call, amalgamation of two. And this is the difference. The scientists of today have not understood the difference between the plasma as 'fields in motion' as energy, or what we call, as a field, which is a combination of.

I hope I have made you to see what I should have done in the first days of teaching, some 20 years ago. But in a way, it was fun to see when one of you will 'jump the gun' and understand it. But not many of you have jumped the gun, and not many of you have found the gun to jump it. So I gave you the 'gun' today. And any of you walks into the, what I call, experimental room in Sanya, and you still want to see the system, (1:16) please walk out, because you are as ignorant as you came in. And those of you who come in to feel the fields in four different experiments we setup, then you have become mature to the next step of evolution.

As long as you're looking what this system does and what that system does, you're as ignorant as when you came in from the womb of the mother. Nothing has changed, just you've learned some noises to make, to call it Arabic, English, God knows Chinese and the rest of it. And if you walk in and you feel, you look for the fields, how do I feel in this position of the fields, how do I feel in that position, and what emotion it creates to me in different position in the room, then you are maturing to understanding the process of the transmutation.

Let's see how many of you are still making MaGravs in your brain and your physicality by the time you leave Sanya. Thank you very much. And I hope I have enlightened you to the truth about the Creation of .. And some of you already understood, but you couldn't put it in .. to perspective ?? and see and understand what it means and why it means. Maybe today we start the basis for the teaching of the next 10 years, as this week we already passed 10 years of teaching. Thank you very much Rick, if you can take us to a break and we come back.

>> **BREAK** >> 529 KSW March 14, 2024 (1:24).

R: Okay, hello everyone, we are back again at the 529th Knowledge Seekers Workshop. And because it's the second half, we do have a question and answer period, but usually Mr. Keshe has something he would like to say before that. And we do have something we would like to present briefly from the Brazilian Keshe Foundation. How would you like to begin Mr. Keshe?

K- Oh, let the Brazilians have their say.

R: ... So, this is a message from Rafael from the Brazilian team. And, it's regarding the Sanya Conference. And, what's happening is the Brazil Knowledge Team and others who wish to participate are meeting in the Brazil Telegram group, at the same times as the Sanya Conference. So, on Friday March 15th, that'll be tomorrow, and Saturday and Sunday, at certain times, according to where you are, they will be getting together in the Telegram group. And the idea is to show support through intention, at the same time that the conference is being held in China. So, people around the World will participate by helping support it, in their intentions. (1:26) It was also done for the London conference apparently. And he says, "Many Knowledge Seekers from around the world had very meaningful experiences and that all are welcome to join." So, you can see the days and times there. It's also on Monday, I understand as well. Monday from 8 PM to 9 PM New York time, and from 1 AM to 2 AM Central European time. Besides those other times.

K- Where is the link they have to go to?

R:... Okay, yes the link is in the chat here, in the Telegram chat. And I'll put that also, thank you Rafael for that. And I'll put that in the YouTube as well. That's the link to the Telegram group, the Brazilian Telegram group, yeah.

K- Thank you very much. I would like to thank all the Knowledge Seekers who are on the way, got a stop on the way, or have seen all sorts of obstacles, but they found a way around it to be in Sanya. And I hope we all gather together on time to be in this beautiful meeting. It's the first time the world meets China in such a way. We... it's the first time we encounter direct interaction between Knowledge Seekers of the Keshe Foundation

worldwide, and Chinese Knowledge Seekers. And the organization done by the Keshe Foundation team, is so beautiful, I was in the conference hall today, (1:28) and it's getting ready for the Saturday opening. And, it's beautiful to see how much work is done, and is there, just to share knowledge and bring things to humanity.

But the more baffling thing for us has been, you hear the Keshe Foundation in conference in Sanya, but you have to understand what some of the Knowledge Seekers have done to be here. It's been a challenge and the, what you call, the message from the Chinese authorities has not reached the airlines. And those who are determined to be here, have bought two or three different tickets. They have moved to different airports, they've traveled half way around the world, changed everything else, just to be here for the conference. Because the Americans thought, and the others that, what we call, 'Visa Free', is what it says, and apparently it does when you follow the rules. But, the airlines don't listen, they have the head of their own, don't want to pay heavy penalties to the Chinese government for bringing foreigners in. And, some of our Knowledge Seekers had to buy two, some three, some never got to the airport, they had to go back and buy another ticket, but they're all making it to here. It's a near equal balance of the Knowledge Seekers from outside, than inside China, Chinese are more of this time. And, it'll be a wonderful, what we call, test of time.

The purpose of this week, coming week conference, is literally bringing an end to the matter state understanding, and moving on to what we call, the next generation of life. And hopefully in Iran, demonstration will show what this means, (1:30) and how it'll be. And we hope to see in the end of what we call, the amalgamation of the two sciences of the matter and energy in this, what we call, conference is coming up.

Any questions?

K- ... There is something, sorry, something just came to my mind. A lot of Knowledge Seekers are asking, sending messages or whatever, regarding this material (CRPm) which we have put out, and it's very hard to produce it, it's an elusive material. And, what is it good (for), what we do? First of all, this material has been put in, as what we call, a Space currency. You'll understand in the future what it means, what it brings in. Secondly, as it's a Cosmic Ray, those of you who bought a combination of them, in placing them in a specific form or formation, which you should have known by now, you create in that environment, as I was teaching in the first part. You create a new condition of the plasma, for the other plasmas inside, to show and manifest themselves.

With the central heating in your room, you change the temperature, the environment of how you feel physically. With these, you open the spans of the dimension of the fields of the body of the man. You expand, or you, what you call, (1:32) interact with the fields of the inner, fields of the Creator, what is inside the man. And because it's a Cosmic condition, you directly connect, or you are connected to your containment, it's part of the Universe. These materials, once you understand how to use it, you never touch it. Because, you understand, it's a key to both dimensions of the matter and what we call, field energy. You'll see them as the matter, but the fields of them is as important ??

seeing it. We don't have such condition. And this is one of the most beautiful things that Knowledge Seekers, and in the future mankind will find out, I have ever given as a gift to humanity.

Try not to look at its matter state, understand its position in respect to your dimension of the fields and energies. Walk out of the room with whatever intention or whatever, and walk back in the room where you put a few of these and you change the environment. See how your emotion even changes and how then you can connect to the position ?? inside. These new materials are not and will not be taught outside the Foundation to be made. And some of you will give your life saving to hold a gram of it in a very near future. Because it's made and it'll be made in the position and dimension that creates that condition of interaction of the Cosmic Rays. (1:34)

Try and go back to what I always said, don't look at the MaGrav, look the fields which it creates. Now with a combination of these, see what field you move into. I gave you the MaGrav to feel the field around them. I gave you this material for you to feel inside the fields. We'll explain more and more about this material and it will take us next two or three months for those orders which come in to be manufactured to be precisely what I want it to be. And then you will understand a new dimension in life, a new dimension in emotion, new dimension in what we call, creation of yourself.

The process is not easy and the object is not mass production. Object is creating condition for so many of your holding that in the future you become the center of the what we call, fields which you're working on in the coming time. Try to understand how you feel in the man matter state, and how you feel as a man in the energy state when you go inside it, when you are in, within it. And, as I said in the first part, if you don't feel it, you don't understand it, you go in as a donkey, come out as a donkey, the donkey doesn't still understand, as long as there is some hay. And hay is, but hay is this, I don't get it. (1:36) But some of you will get, will interact it, you'll understand.

I hope those of you who come to Sanya brought your Cups with you. And then you will drink from the, what we call, the field of the Universe. We have organized three tables for you, that you can leave it, you decide when that Cup is ready for you to drink from the Cup of the Universe. And if you don't feel anything with it, God bless your Soul, and watch what's come. And if you do, then you understand the process of the transition.

The whole process of work from now on, is for you as Knowledge Seekers, to interact with the fields, understand them, live with them, and know how the differences between the matter state and the field state. And how you can use it to change one to another, and use it that you don't need to kill another.

It's very much is, you go to mom's house and she says, "I have a beautiful dinner, what do you like? I cooked for you." Says, "No mom, I'm married, I'm going to my wife, I eat at home." In a way, home is to eat from the dimension of the fields of the Universe, that you do not eat from the table of the mom, which killed the lamb, or sheep, or whatever, to feed. You understand soon, what is on the table. And then you understand soon, what

needs to be done on that table. Bring your Cups and see how much you understand, and how much you understood.

Any other question?

Q: ... (1:38) Mr. Keshe, just wondering how the people in Gaza are responding to the plasma solution? And are many beginning to use it to feed themselves? Or are the Israelis trying to block it still?

K- We will not talk about this, we work on it, the system is running 24/7. And we keep it in that way, and you will hear soon about how it's done, and how we are working around it. The process, more or less, majority of huge number of Palestinians know about this. and the system is set up totally different way. And we will explain to you very soon, because we don't want to run into a problem with those who thinks they can control everything.

This is, as I said, we know our way how to get in, and as some of you know, or you did not know, you know today, the Iranian military forces have landed inside Gaza and are feeding the nation, without arms. And, soon you will hear more about this operation, as we hear, we see, that they are in, as even though nobody could get in, they managed to get in and they have open feeding centers all over Gaza, feeding the Palestinians. They put their lives on their hand, because they even bombed, what we call, the transportation, and they dropping food, they killed more than actually they fed, Americans. And now we've seen, (1:40) and I'm sure you've heard, that the Iranian armed forces are within Gaza, and they have opened feeding centers. And this is what I call, the 'white flags,' which has shaken the Israelis, how these ?? , we blocked everything, we bombed everything, have appeared inside. We know how to appear, and we know how to work, and we know how to feed. And you'll hear more about this in the coming time.

There is something interesting which some of you have heard or not. If you remember, we will see very soon the end of the Ukrainian war. The reason for it is that the Vatican accepted the defeat and has thrown the towel in, as we call it in the world of games. The Vatican, the Pope has instructed the Ukrainians to find a solution for peace with the Russians, as Vatican cannot afford supporting the war anymore, you used everything we had. And we'll see, as is in the news, and as we were aware of this, some six weeks ago, that Vatican has accepted defeating, fighting the, what we call, the Russian Orthodox Church. And, for the first time they are defeated. But, we have to see how they gather together and come back in a few years time, trying to do another, what we call, 'Coup De Tat.'

But, the good news is, as you, mostly all of you know, the Pope has thrown in the towel of peace, and instructed the Ukrainians to accept the conclusion very fast with the Russians, that what we call, "we can't afford sustaining this anymore." (1:42) And we'll see an end to it, and it had partially to do a lot with the pressure from the European farmers who stopped the grains to be imported as they ?? moved all the Europeans nations literally filled up all their reserves as much as they could with the cheap, what we

call, grain stolen from Ukraine. And we saw the farmers going on the streets and brought everything down, that you cannot do this. Because, the only people who make money from what we call, Ukrainian cheap rice or grains, has been the politicians in the European countries, and nobody else. And they robbed both. And when the Russians do it, it's a criminal act. When the European countries stacked up their grains silos, is nobody should know. But, we saw the reaction of the farmers and we'll see how this comes up and what the penalties needs to be paid by who, in dimension of what we call, the things ?? have taken shape.

There is a negotiation going on in the background, that Russia is asking for a compensation. And this compensation is what the Americans, Europeans, and Vatican have to come up with, are prepared to pay to Russia, for Russia to stop. And this is a very big package, and we have to see how, how successfully they will go around it, to bring this package down. Because, in a way, the losses are too heavy for Europeans and Vatican's to sustain against the Church of Russia. It's just how much they agree to pay damages, what terms of condition will be, in less than three months or so, we think, to settle, and then we'll see the end of it. (1:44) But till they don't compensate for the war to Russia damages, and the whole thing which that they wanted is done, The Russia will control the grain out of Ukraine and that was the whole objective. Then the Ukrainians do the farming, grow the seeds, and the Russians dictate the price of it and they control it through, what we call, export. And we'll see the change, the Ukrainian war is over, as the Vatican accepted defeat, as it's in ?? Minsk and now it's in public.

Any other question?

Q: ... Last week you spoke of connecting with the collective Soul for Space travel. during transmutation while in Space, that encouragement you hear, can be our collective connection, yes?

K- What?

R: I'm not quite clear on that. During transmutation while in Space, that encouragement you hear, can be our collective connection, yes?

K- Encouragement? What is the encouragement?

R: I'm not sure what encouragement means, maybe have been with other Souls?

K- You have to understand, you have to understand something very simple, and I was spoken about this a number of time over past years. Soul travel has and does make noise. We know this and we call it 'dog whistle,' when you blow a whistle nobody can hear it, but the dog goes crazy with it. (1:46) The owls hear this, what you call it, departure of the Soul. Because it has to go through a physical body, it's the interaction of the fields, it makes that field. And owls are sensitive to this interaction of departure of the STM from the physicality. So, it makes a noise.

So, your Soul, interaction of Soul and interaction of the collective Souls, when man become knowledgeable, will detect this noise. And, in a way, we look for a fingerprint nowadays, we'll look for a Soul print. It'll not be easy, it will not be very easy to, you know, kidnap a child or whatever. Because we become wise to it, science will become to understand this. We will use it as a fingerprint. You want a criminal, he can hide under ten tons of rock and in another planet. It's there, you pick it up through his fields. That's why I said, no man will do the crime, because it's not worth it. There's nowhere to hide.

And so, when we travel, when we go through amalgamation of the Souls, as one Soul, because of... that's another teaching, how one Soul can accept so many other Souls. Then I'll teach you more exactly how it's done, the way it's done, how you recognize, nobody can fake it, as we call it. It's a process of understanding, who are the passengers of this containment. And that's another topic, maybe in 5 or 10 years time we can teach, if we are still here.

Any other question?

I wrote something very interesting to one of our Knowledge Seekers in the past few days, (1:48) and it's what the truth is, and what in time, you as Knowledge Seekers and the humanity will come to understand. And one day, one day, it'll get to that point, that we'll reach this point, that mankind will be, what I call, collectively understand this. And not just for mankind. And, we've come to the point, that you as Knowledge Seekers, have to face what I call, the truth. Have to understand that what is and what it will make, and how the future of humanity sits in this one paragraph. One day, we'll, what you call, you as Knowledge Seekers, will come to understand how things work, how things are set up to be. And, a brief of it. I read it to you if you understand it. The Knowledge Seeker, because I know he's listening, but it's a purpose, it's a totality of what we are waiting for, and what will happen. (1:50) It's what you, as Knowledge Seekers, it's not foretold, it's planned to be.

This is part of the message. It says, "And then, maybe, I have achieved to save mankind. And then leave the rest to Mitra's daughter, to take man to deep Space, as an energy of Universe and not the body of the man, and with all its faults and problems." In a way, we are setting up the scene, we are completing educating the man, to understand and then that angel, which is the Soul of the daughter of Mitra, will take man with a new light into Space. And a new beginning. And, in a way, we have set the scene for a beginning of a new course, and end of the past. And, we'll see how things will take shape. But, it's not a matter of today and tomorrow, will be changed. It has to be collectively changing every parameters.

In a way, if you understand it, as the teaching of today, as I said, we change the magnetic field of the room, (1:52) or temperature of the room to be steam or ice on the window, and we change the environmental magnetic field of the plasma, to show its new dimension and strength or condition. I create that condition for man to enter a new dimensions of the fields of Universe. Then, it's handed over to the most beautiful Soul. To guide, not just humanity, but the whole of the Universe, into that dimension. And,

we'll see what will be the next step, for how the humanity will go through this transition. And, as I said, once I'm complete, to take man to Space. It'll be left in her hand. And she's amongst you. And it's time for it, you will know where and how, to take that next step.

Any other question?

Q: ... It's very interesting Mr. Keshe, what you've said about the Vatican. And why did they have the meeting between the Pope and the head of the Orthodox Church in Cuba years ago, after never having met beforehand? And after that, the Orthodox head went over to Antarctica with 90 ships, (1:54) Russian ships, to construct a church here in the little Argentina, here in Antarctica.

K- Ask them why? You heard now, America has claimed it to be their 52nd state, I think. And, in return the Iranian leadership has called, they're claiming it too, in a different way. And so, this is what I call, part of the work of... Depends how you look at it. They're building a church and everything else for what, penguins? Now they want to make the penguins religious too? Or as Al Gore said, he forgot that the bears are from the North Pole. So, this is part of the game of claiming properties. In the future to be. And, it's more or less... Now, this is the situation with Vatican, it's more or less... The Ukraine war has bankrupted Vatican. You will see, you'll understand, because they were so sure, they go with it. And they're more or less, now losing. It's the first time Vatican has lost, since the German time of Vatican. And how they... how much more they're going to, what you call it... (1:56) They're going to sell, or in a way, put pressure on the churches to collect money to recuperate these losses. Americans and the support of the Americans and the Europeans, French and German, wasn't there. We are there to support Ukraine, they were paid for everything.

Remember one point. And some of you, I think, a few nations still are under that position. Americans, when they sent soldiers to Europe in the Second World War, every chewing gum, every shoelace, every socks, every shoe, every tank was valued, registered, to which country it's gone, and who used it, and what happened to it, and it became inventory of war, and they charged the nation for it. British till 1980s were paying, still Americans, for the chewing gums American soldiers had in Somerset. Till we saw, sold the oil and gas companies and water companies, and from that, paid the Americans off. All these rockets, blah, blah, blah, you see in Ukraine, coming from America, it's all inventory. And Vatican has signed a check. And this is where the wealth will go into the part of the American structure, but not the American nation. So, the Europeans will, or Vatican's and all the Christians, will pay for this, for years to come.

And it's the same with Israel. You will see very soon, the Jewish communities around the world, will start paying the American government, the debts, (1:58) the guns and the ?? battles (bombs) they gave to use in Gaza. America is an industrial nation, and industry runs on money. And no thing is done without paying money, because then it becomes very funny. So, you got to understand, the Jewish community and the wealthy Jewish people in the background, have written and underwritten what goes to Israel, and you see they're bombing their way out, because they're hoping all these villages got to be built

again in Gaza, and they'll get their money back. And this time it's not going to happen that way, because you will soon understand why, in the next few weeks.

And both the Vatican and the Jewish, what we call the... and even the rest of who is behind it, will ?? Russia, probably will lose a lot of it. Because they wrote the check, because they thought they're going to make a lot of money out of it. But this time it's not going to pay back. So, how Vatican spends money is trying maybe to find some gold in the South Pole, that they can, what you call it, compensate for the losses they received in the North Pole. And what they will do, how many penguins they can make to believe in their way, and that's another way. And as ?? children always say, "Vatican might have to learn how to bubble, like penguins, for a long time, for what they've done." Let's see.

Q: I'm told there's a tunnel from Vatican over to Israel. And they've had an enormous golden bullion there, which has been taken away now.

K- I don't know. Maybe one day we know. They had 2,000 years to build that tunnel, haven't they? (2:00)

Q: Yeah, it's a thousand, one hundred kilometers long.

K- Yeah, but if they have found a way. They built that tunnel. They must have been much more advanced than the, what we call, the British going under the (English) channel. But it's possible, they know the way to God, so he teaches them a lot of things to do.

Q: Yeah, well, there are many of those tunnels going underground, that we don't know about, especially the ones that start there in Area 51.

K- Oh, there's plenty of them between Tijuana and LA. There's also everywhere. Depends on who wants to put their neck in it and do something with it. I'll tell you one day a story. You're welcome. I'll tell you one day a story, not a story, a fact, about these tunnels in Mexico. You'll be shocked. But we'll see. At the moment, we don't want to touch the, what you call it, the white guys, in the shape of the powder ?? (cocaine) on the skin. The time will come.

Any other question?

Q: ... I'm trying to explain to people how this technology works, with the mobile phone, headset. And really that, should I be telling them that this is only a location device, that you wear by having a phone? (2:02)

K- It's a ... This week in Sanya, we show a beautiful system. Nobody has seen it, it is just been put together in the past week. And I want to know how some of you, we haven't, we don't allow anybody to sit in it or play, but a few people will be allowed to go through it, because we know what the test result will be.

Explain to the people in a simple way. That's what I do, is that, if you can transfer my voice to you as an energy, and it changes to you and you understand it, we can make package of energy and transfer the same as a sound. You might lose a little bit in exchange, keys, whatever, you might end up on the other end. If I use your communication line as what you call it, a finger missing, a little bit damaged. But, with the use of the new communications systems, which we have developed, what you call, the Plasma Communication, everything will be intact. So, if you accept, you can send my voice as an energy pack, and the code 01, now we have developed a technology where we do the transfer of the energy fields. Your headphone, as you said, is just the establishing the location. It's easy.

In Gaza we have moved this to a new dimension. (2:04) We try to keep it away that does not come public. We have brought in a new technology to establish the feeding of people in Gaza without, or with headphones. And I'm monitoring what is happening and how we collaborate, who we collaborate with. The way it is, we... The Israelis have found, I mean, they didn't need to find out, we announced it, they are sitting in all our lines. They try to intercept and do a lot of other funny things. But, as I say, I know how to play with these children. I've played these games thousands of years ago, so, they think it's still time of Moses, they only wear... You know, it's like wearing your... You go to ?? Yves Saint Laurent , and you buy the most beautiful dress, and you put on a monkey, doesn't change anything, it's still a monkey inside, you understand? These people are in that state of mind.

So, we don't... they've been sitting around, they're targeting Keshe Foundation, and we have our own ways of doing things. And, they don't have the technology, so, it's what you call it, it's a 'dead end' for them. And as they cannot see, they can't even, ?? ignorance. But, we will... this is developed for a Space, not just for Gaza, but, we are putting a new dimension in a new materials have been added to the central core of the support for Gaza. Actually, our team has developed a new system totally for it, to support it. And, we'll see the change.

But, telephone lines is just a locator. And the rest, once we establish it. (2:06) One of our Knowledge Seekers, I'm more or less in touch with him frequently, daily, and using, going through the system. Say, the first day it was hard, now I just sit in and I connect immediately. It's just like the Souls are connected. And it's just a locator, because we're running different tests in the background, And it is very interesting how .. We have to understand this, it's what the teaching of today was about. We have developed the material side, why should we ignore it? It's the same knowledge, in... one in matter state, one is in energy state. Mankind has ?? one Soul how hard ?? can it be to bring these mobile phones, communication lines in. So, now we use and connect immediately. And then, it just needs to fine tune itself, and you don't need the mobile phone anymore, you need, if you're thinking on the matter state, or you can use the energy state, which is now available.

Q: When you're in Space, how do you connect?

K- Oh, that's so easy, that's easy. Here we have to ?? rely on the atmosphere of the Earth. Outside we are in a span of the Universe on what I call, Cosmic Rays, and no man is anywhere outside this communication line. It's not just here because we have the satellites, we go from New York to Washington, or we have our system in Austria, and you people in Germany, or Australia pick it up. Now, instead of using satellites, we use Universal lines and Cosmic Rays. (2:08) And I have the knowledge to know how to connect, it doesn't matter where you are. I can find you in the center of a star.

Q: Is that because there's no distance?

K- No, no... It's a science, it's a matter of science, of understanding the field interaction.

I come from Middle East. I run a blood on one side from Jewish side, and one side on the Islamic side. And my Soul, my being is connected to the dimension of the Soul of the area. And it comes from it. Do I need a satellite? By blood I'm connected to the land. You understand? We ask you to become Satellites. I have become a Satellite.

Q: That was your purpose for the Satellite system, for people to become Satellites?

K- Yeah.

Q: ... I did come in and then I went out again, and to come back in again as a Satellite, is that still open?

K- Still, always is... man dies physically, the Soul needs to stay. We opened a new channels of support in... I don't want to talk too much, because this literally screws up the head of the Israeli government, but we are deep in it, (2:10) and we are in a deep heap of it.

Q: We are just waiting for the world to catch up to you and change. Then the change will come.

K- We have to do it. We have to do it in the right way, but at the same time, our right way should not become advantage to others to abuse.

It's possible, very, very possible. I return to Iran in a very short time. And we'll see the development of new technologies. And depends how we understand it. And then we prepare the ground ready for what we call, the presentation in Isfahan. And we have to have the work in China completed. And then we move on to the next step. And part of it is this. And then you understand when I explain to many of you in the past teachings, that many of those who walk on this planet are not from here, they are aware of the operation of their Soul, they become Satellites for the races in the deep Space. That's how it works. if you understand the process.

So it's not just a ?? satellite for the ?? one , but because the knowledge is there, it goes across the whole. This is the way we're working on it, and this is the way it's going, but

what you call it... Everything needs its time, and it cannot be just because we started 10 years ago. (2:12) This is the, what we call, the final act, the final show, before the curtain comes down, before the new life starts for man.

I used to explain this to my children in a very beautiful way, because a child can understand. When we go into a show, and when the curtain comes down, we say the show is finished. But actually, if you think of it, the show has just started. Because what message did we get from that show? That becomes part of us, become part of the way of our living, or part of our memory, which affects our life, or changes our life, or bring changes into our lives. So, and when the curtain comes down, it's not the end. It's the beginning of a new, but with more people watching that curtain. It's one curtain comes down, but there are 1,000 people sitting in the auditorium.

Q: It's like the end of one age and the beginning of a new.

K- It's not one, it's understanding. Understanding that... it's not prejudices, it's the ignorance we have to put aside. And how we, what you call it, how we use this, to betterment of our lives in both dimensions and the ones around us. Strange enough, anybody who came to harm the Foundation, they got harmed themselves, by themselves, through themselves. And there are many regrets in this, many, many regrets. (2:14) And one day it should complete. And then one day it should start again. And this, as Freddy Mercury said, show must go on. But this time the show will go on by understanding the totality, not just ignorance and what you call it, one-sidedness.

In today's teaching, I tried to make it as easiest to be understood and bringing the two sides together, that Knowledge Seekers understand. Because once you understand this, it's much easier to transmute. It's much easier to live in both dimensions and understand it. Then you don't need to explain it. You don't need to explain it. Thank you very much.

R: Okay, are you ready for some more questions Mr. Keshe?

K- As the song said, "Are you ready for this?" Are you ready? Yes, one more question or so, we call it the day, we are nearly three and a half hours, are we? No, two and a half hours. I have to be somewhere at seven o'clock, 18, 20 it takes me half an hour to get there. Okay, give me the question and I try to answer the last one.

Q: ... Mr. Keshe, regarding Soul and animals, (2:16) an Egyptian doctor Abraham Karim, mentioned the animals perceive both worlds, and sometimes foretell what's to come. Do they know when they are going to die or transmute?

K- We all know. We all know. It's just that we try to, to ignore it, or say, "Oh, it's not going to happen." We accept accidents, even accidents, how it is set to be, whatever part of the whole scene. But, as a human life, in normal natural life, Our body knows when it's about to go, and what it's about to do, and how little it needs to take before it goes. We are all aware, without the shadow of a doubt. It's just that we call it to the old age, and cannot walk, cannot do this... It's just all preparing, gradually cutting the legs and arms

off, that's, you know, just give me enough, the last bit, that I charge up to where I need to go. And no fountain of youth can help.

And I always said, if you know, .. not a destiny, but you know you, you have to do something. It goes step by step, and it's a process we all know. It's not just the animals. (2:18) The understanding of Totality is, and how it is, and how our brain is done to identify the strength of the field of the Soul. The more it clogged up, the more separation with the, what you call it, the STP, the more bits are stuck.

There's a new research which has come out, it's amazing this research. and it's opened up a new dimension, and even in... for us to be able to explain the work of the plasma. The scientists in trying to do another research, they have, in a way, punned on a new discovery, which was never known, and now I'm sure billions of dollars will go into this research. One of the research scientists has been trying to look at the behavior of the brain during the sleep, physically. We never done that, they build a system, it's like a telescope, but you look inside the brain, live. It's a lot of gadgets to it. But, in a way, they... you know, the way you go to a dentist, they sit you up. But you go to sleep, sitting up, upright. And they have developed this telescope which looks in the brain. Actually, exactly live.

And what they discovered is that, they want to know, they wanted to see the protein which produces Alzheimer's. They were looking for that, but they just fell on this new discovery. And it explains a lot of things. That, our brain carries a liquid in it, that our brain sits. And we say our brain has no veins, if you cut the brain is white, you don't see any blood, so it doesn't bleed. (2:20) But, there always was a... We ignored it, because we couldn't understand it, how this thing works. How this thing gets rid of its bits, and how we create a brain cancer, and the rest of it. Now we understand a little bit of it, but it's fascinating what they found out.

At a moment when you go to sleep, which we call the circulation of the blood changes, becomes weaker, even though it creates a... That's a weakening of the magnetic field of the blood. Not only it allows the Soul to be more freely expanding out, and now we understand and we're implementing this into work of the Keshe Foundation with the new headsets. That, the... as you fall asleep, your... the liquid in the brain, in the half which is not working, is supposed to be on repairs, like opening a sink at the bottom of a bath, loses all its liquid. It goes literally dry. And the brain cells literally shrink, like they've been inflamed in the liquid, like a balloon in the water. They shrink. And in that process of shrinking, as this liquid going through the brain down, like a sink, it washes all the energy, whatever the cell of the brain didn't need.

Now we understand how brain cleans itself, gets rid of it. And when you do not have enough liquid or rapid flow, bits gets stuck. (2:22) And certain protein in that dry time is like a ?? leach, it sticks to the brain. And this protein start the process of the Alzheimer's, brain cancer and the rest. This research is amazing, how much information we gathered about this research. And I'm sure leading Universities now will go for this to find out. Because we never knew that our brain, literally like a balloon, deflates. All the veins

become like a sieve, and the liquid goes right through it, washes all the energy, all the surplus, what's not needed, out.

There are two questions now the world of science needs to answer, is where does this liquid go? Because they haven't managed to find out the sinkhole yet. And then it gets filled up with fresh water till you sleep next time. Then we have understood with this research and others which are following in it that how crucial sleep is. Sleep is not so crucial as you need to, what you call, refresh your body, is how much your brain gets washed and cleans up this mess of the day work. And if you don't cover it with... it takes to do this, because it's done in a synchronized matter, if you don't get 6 hours of sleep, minimum to 8 hours, you get all the problems of emotional and everything else.

And this has opened a lot of things in the work of the Keshe Foundation Research and Development. And we understand this change. (2:24) And the point for us is that the shrinking of or washing of the brain, at which point is the best time to put the headphones on you. I noticed this a few weeks ago, in past 3-4 months, many of the Knowledge Seekers who come on these sessions, they fall asleep. And, in a way, we're hitting a dry land. There's no water in the brain, depends on which part of the... It's mainly because we run our sessions, many Canadians and Americans are in their sleep phase. And we hear them snoring. And we put them on the silence. But some of these sessions goes for six or eight hours. We start looking at the behavior of the Americans, because we always catch them asleep. And some Europeans fall asleep too.

But how much the Soul is affected or behave during the dry time and the wet time? And how much and what kind of dreams become to reality for these people, in that time. If it's the four hour session, we're looking for that four hours. Are they in the middle of two hours, is when it's absolute ?? minimum liquid in the brain. And with that, there is no interaction between the cells. But that liquid is a communicator, connector, ?? for part of the system of the brain. And this research has risen a lot of interest for me, to find the right time to put people in the machine, the right way. (2:26) And how much the intention of the emotion has to do with it. We are filling you continuously with the fields. Does not matter if you're in Australia, in Palestine, in America. But, how do you, how can you tap into our system to take what you need from it? And how our system is set to tap into the Universal ?? servers. Which means, doesn't matter how much you get, we can feed every living thing on this planet, and it'll still be that little bucket. Because we're just channeling the fields to you. You want energy for two tomatoes, I don't have any, but because I'm connecting you to the Sun, that's where all the energy comes, it gets tapped in. I never lose, I never become one tomato, I'm ?? still energy of two tomatoes in my system.

This is the way the new understanding of technology is taking shape. When is the most vulnerable? When there is no interaction between the liquid and the brain, it's at the driest point that the Soul rapidly expands. And is this why some of you click on and you're on it, because you're so tired at the point, and the brain has gone through draining system. And this is why some of you, doesn't matter what we do, cannot get through you, because

that liquid is so thick. It doesn't matter how we do it, how we play with you. And have you learned minutes of sleep than four hours?

These are the things which will come up. Now we're developing system to handle this. It's actually in operation. Some of you in Sanya will go through this. (2:28) Because... it was interesting. This is why in the test, in what you call it, past few months, those of you been with us, we switched the microphone off, we switched the microphone on. And I've been trying to understand how many of you sleep time are there, if we can see the behavior of those, how they feel and how they behave, what they talk afterwards.

It's very interesting, this, this new research which has come up is, it brings a lot of things into Space Technology, clarified and how we can use it, where we can use it. When is the best time to get a transmutation done. When is the worst time to do it. Would you like to do a transmutation in Tsunami, when the brain is getting filled up with liquid and you're all over with the energy? It's very interesting science.

I call it the day today, thank you very much for being here, being with us. And we'll see how things start shaping in the coming time. Thank you very much Rick. Hopefully we'll meet each other next week after the conference.

R: So there won't be any broadcasting or information coming out of the conference really for the next few days? It's a sealed situation?

K- No, no, no. I know some of the Brazilian ask, "Can you send us some pictures of the place?" Whatever, I told Knowledge Seekers... We'd like to keep it as it is, the way it is, and as usual, I know we ask Knowledge Seekers to not send any pictures, or anywhere from the conferences. But, primarily it's for security, and a lot of things that the people do with, whatever they get in their hand. (2:30) Thank you very much for today, and see you next week. I have to go, I have a meeting at 7 o'clock. Thank you.
