

# **'Shahanshah' - Our Space Origin - CR & CF Like Lymph - T proven in Gaza - Vatican's New War Introduction to 532 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

The teachings are going deeper into how we are created, which is a knowledge that is missing in the Man's understanding of himself. Last week we discussed how the Creator is like a huge womb and we are inside it. And that makes a lot of sense when we look at the overall structure of Creation. The learning process is such, that we start out with an idea and then develop it into a concept and hopefully we start to ponder it. And when we feel an emotional connection to it, it becomes our knowledge. And this happened to me this week. The idea of the Unicose being the Creator hadn't quite made it inside my feeling. It was just a concept I accepted. And then this week while I was listening to the Introduction video in the background, which was a clip from an older teaching, something 'clicked' inside and I felt the truth of it. And I would like to share it with you.

When Mr. Keshe said that the Persians already knew about the Creator when they gave the name 'Shahanshah' to their ruler, I went down a different track, because the scholars always claimed that the King was a divine ruler. They meant that he was given by God to rule over us, and this has become a point for them to abuse humanity. In a way, the Persians did the same thing as the other cultures did, so that nobody would question the King's authority. But the Knowledge of Creation is hidden behind this symbol that the leaders abused. The words "King of kings" is how the Unicose is structured. While I was listening to the Introduction and he said, the center of the Unicose is the Creator and all the Universes rotate around it, that's when I felt the image. The "Creator of the creators" is what we call, "God." He is the big God, not the little gods that were created out of Him, that also have the power to create. So the Universes, Galaxies, and Solar Systems all are creators with a small 'c'. Because we can create with our fields, we are also creators. We were created out of the 'gods' of our parents. And then the lineage goes on and on through all our ancestors back to the original Creator.

Then what about who created our Creator? And so Creation continues on and on. I think he said, it goes on and on until it comes back to us. Remember that we are only talking about the matter state physicality (P) structure of what we see outside ourselves as the Creation. It's not the absolute final truth. And he already taught us that we cannot trust our eyes and what we see in Space. And a higher truth is that we have never really fallen out of who we are. We only think that we have, and that is why we suffer. When we realize our Soul then this physical structure of Creation will not be as important. We manifest physicality to experience love. So in another way it is very important, because otherwise we'll only exist as fields. This is why we need to know both dimensions (D) of P and the Soul, or Energy.

I pondered this more. So everything rotates around the Creator. I wonder what this means? Without knowing it, here we are rotating around our Creator. We are always inside His body, whether we know it or not we are part of Him. If I pretend that my eyes are directed towards the center of the circle, then I am looking at the Creator. Even though I only 'see' the wall of the room, I am really seeing the Creator. I believe this is the Reality and the Totality of the Knowledge of Creation. It is so simple. Like Mr. Keshe said, Creation is so simple everybody can understand it if they want to. And then I say to myself, wait a minute, but you are a body, your name is 'such and such' and today you have to do all these different things. Thus goes our life in physicality, but all the time we are inside the Womb of the Creator, which is Mitra.

Another aspect of the technology (T) that is very difficult for us to understand, is the fact that we are created out of the fields. We see our parents and we see the sperm and egg as physical entities, and they tell us we came from there. This is where our understanding is, as humanity. And this is where the scientists are stuck at the level of matter state existence. Mr. Keshe has been teaching us for years that we are made from the fields. We made the Nano materials, the Gans's, and then we spun them in reactors and we came to see the results of the fields interacting. But can we make the next leap in the knowledge and accept that we ourselves are actually made out of the fields. Maybe we can think of the physical entities of our parents as representations of plasmas and visualize that the interaction of their plasmatic fields created a STP and then a STM which interacted to create our P. If we can accept this basic part of our creation, then we can move into today's teaching and get more out of it. Because then he asked us to think about where did all these fields come from and what is the reason for our creation. As usual he didn't answer them, but led us down the path of thinking about our life. What he did say was, that our fields did not originate here on Earth.

Over the past few months he has gone deeper and deeper into the Cosmic Rays (CR) in what they are and how they function. The T is advancing so far that we can actually trace the origin of the CR that led to our creation and discover where we have come from in the U. This is pretty amazing and gives us a whole new feeling and sense to our existence on Earth, and that it is just a transition point in our life in the U. And that our ancestors in Space are still back there and their fields are still feeding us. In other words, not all of the fields from our origin came to planet Earth, some stayed behind, and most likely some fields went to other places. So not only do we have 'grandparents' in another part of the U, but also cousins everywhere else wandering around the U. What point in evolution have they reached?

Part of the RNA we carry in us is connected to the RNA of the U, and that's how we are connected to everything in the U and why the Knowledge of the Universe is transparent to all beings. It's part of how we are constructed and in this way everybody is equal in that we all have equal access to the knowledge. Of course, we have to be able to use it, and he will teach us that in time. I forgot, this is the RNA of the Unicose, not just our U. Then he gave us this hint, that the man has discovered the codes in the DNA and RNA, which have all the information about how to construct our body, and that it is like a U

unto itself. All the other information that exists in the RNA have not yet been discovered by our scientists.

The Creator used the same basic pattern to create the Creation out of Himself. Therefore, by understanding how the Lymph System in our body works we can also understand how the Creation works. We can study the whole Unicoise right here at home through our own body. Our scientists don't accept the Lymph system as a feeder like how Mr. Keshe has taught us. First of all it is not directly connected to the heart muscle that pumps the blood around the body like a dynamic reactor. They say the lymph is only for the immune system and the lymph nodes, which are located throughout the muscles tissues acts like a pump when we move our muscles and this moves the lymph around the body. This is interesting because when we are stationary we don't need as much food. And when we are active the lymph automatically starts flowing strongly feeding the cells. Just to review a little, when we eat food the fields transfer into the lymph at the point of the digestive track. No physical substance like chemicals cross the digestive track into the lymph. It is like a big soup of the fields of everything we eat and then it flows around the body and the cells that need certain fields will take it from the lymph. The lymph also contains radioactive fields from the B-Vitamins, as was discussed previously in the teachings. The lymph contains all the fields needed to feed, maintain, and connect all the cells and the Souls of the cells together. Therefore, he said the lymph is like the Cosmic Rays. If we are having trouble understanding the CR then we can think of the lymph system of our body. The colors of the aura of the body tells us which CR are interacting and feeding us. Also the colors come from the interaction of the CR with the MG fields of the Earth. But he will teach more about this later.

There is another important aspect to the technology that is getting developed. If Earth is a nursery of Souls to seed the U, then the seeds need to be perfected before they are spread throughout the U otherwise there will be future problems. He told us they will create a system that can show us where we are destined to go after our separation from the physicality (P). And if we don't like where we will end up we still have time to change our conduct in P before it is too late. He alluded to that some KS experienced this in the Enhancement Units when they went to oceans of others planets or even deserts. And that we may experience our future home, but say it was only a dream, and then ignore it. And if we still fail to perfect our lives, then they can create a system that perfects the Soul before it departs P.

The breakthrough in technology that we all have been waiting for occurred during the 10 day conference in Sanya. KF already had made connection and had been feeding Palestinians with the system. But the system was always turned on, which means they were dependent on the matter state communication system. But during the 10 days that the lab was closed the Souls of the Palestinians were able to take the energy of the system as food even though they were turned off. Their Souls could feed themselves and the P was either consciously aware, or it occurred subconsciously. The importance of this confirmation is beyond words. Mr. Keshe simply said, "we achieved what we came here for." Of course, it will be denied and covered up by the Controllers of the planet. It also means it will be available for the next disaster. And that the T is advancing so fast there is

no way they can stop it. Nevertheless, I think we are all a little impatient to see the T come out somewhere in the world publicly. But of course if it does that, then the whole fake society will collapse. We have to maintain our determination and perseverance that one day the change will come in the physicality.

Mr. Keshe explained to us a year ago that the Vatican would lose in Ukraine in their attempt to steal the gold from the Russian Orthodox Church. Now they have abandoned their Ukrainian allies and have shifted all their funds over to the Middle East to destroy Iran and also try to take their gold, land, and new technology. I understood from his talk that the Vatican has promised to fund the billions in bombs the Americans are sending to the Israelis, but only if they totally annihilate Iran. Also, unknown to the American public, is that they have directed their nuclear warheads towards Iranian cities and under the cover of an Israelis launch they will secretly launch their own. The Americans are ignoring the power of the new technology Iran has already demonstrated, it's called 'return to sender.' Nevertheless, the Intelligence Mr. Keshe is receiving indicates that they are proceeding with their plans. For years now the Americans and Israelis have been trying to bait Iran into a trap, but with Mr. Keshe's work in the background they have been unsuccessful. This may be hard for many of us to believe, because the World Press tells the exact opposite. It seems to me that his purpose is to inform the Souls of what is being planned in the secret rooms of world governance, where they believe nobody knows what they are planning. It is important for us to know what is going on, and through our Souls, intentions, and emotions help to break the delusions the men in power are denying to themselves. It's also important that we don't deny or neglect the responsibility of the power we hold within ourselves. These leaders may think that we all are a docile people with 'slave mentality' and they can do what they want. Now with the help of Mr. Keshe and the new T we are proving them to be wrong.

However, there is a special purpose to this conflict, because these 3 are the worst warmongering religions in the world, and they are an obstacle to world peace. In summary, the Jews have lured the old Roman Christians into a conflict with the Moslems, whom they want to get rid of, who happen to be the remnants of the old Persian Empire. And through this war they will end their reign and abuse over the Soul of the Man. Is this the Armageddon or 'Day of Judgment' foretold in their scriptures? Mr. Keshe called it a 'day of foolishness.' But what did he mean? Maybe it's that now with the new technology being totally confirmed in Gaza, they don't need to go down this path of war and if they would open up and let go of their power, the change will come in a beautiful and peaceful way. Otherwise, they will all destroy themselves in the process. But we have to wait and see what will happen.

The question was asked how do the emotions create the Inertia to absorb the Cosmic Rays. And it was answered that we need a little more teaching to understand it, and maybe by the end of the year he will be able to explain it to us. He said, we already do it but we don't understand the principle of it. We do this when we create a tumor in our body. First we create an emotion around some experience and then we manifest it in P. And what I remember from the teachings on Inertia is, that it is the MG fields that cause an entity, which is also a plasma to manifest in P. But it is still not clear and feels like

some magical thing happens that we don't understand. Mr. Keshe said in this teaching, when we take our understanding of Inertia, Salt, CR, and emotions to another level we'll be able to transmute. It seems to me, that Inertia is what controls how something can manifest in a particular environment. It also has M and G fields that interact with the MG fields of the plasma that wants to enter its environment or be created in its environment. And it is also related to how gravity of a plasma created. Does it have to do with the potential and the desire to exist? I am trying to get deeper into its essence. And when I go in that direction I realize how little we know of our own existence. Sometimes it feels like we can create an emotion, but mostly it feels as though they just happen to us and then we can influence and intensify them. Somehow we will have to learn how to gain more control over ourselves if we want to be able to transmute. There is an old TV program from the 1950s called "One Step Beyond." It's clear that the people who made the program didn't understand what was happening, but they were good at presenting each case scenario. Now with the plasma science we can understand that many of these people were transmuting themselves through their emotions, but they didn't have control over their emotions. It happened like an odd occurrence, and not a science. Somehow they were able to intensify their emotion and then they disappeared without leaving a body behind. Like Mr. Keshe said, it is familiar to us, but we need to have more knowledge about it.

Other Topics:

A Soul can be extracted from an environment where it is in danger;

The STM already knows how to feed itself while in the womb. But when it is born the mother immediately suckles it at her breast and doesn't give it a chance to feed itself with the energies of the U. This will change in the future;

We can make ourselves into a stone, and we can create a man out of a stone. And the same with a single Fe nail;

Elevation means understanding more and not growing to size of a U;

Large amounts of energy are released at the time of birth and death;

They are preparing for a KS to manifest the Soul of Christ.

Thanks for listening.
