

# 535th Knowledge Seekers Workshop April 25, 2024

(Quick Index 18 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Where STM ends up after being propelled into Space - dust attracted back to Earth meteorite (Hell) - join STC; Cosmic objects can be STM left millions years ago; 2 halves of brain - STP - creates Third Eye - elevate STM - same as KF systems; Understand control emotion - not sentimental; STM & STP are neural system & blood flow - how create body; Neural or blood can run body - how re-grow leg; Create Electron - expand STM through neural system - feed without killing; Billions stars in galaxy- some made from STM; Soul gifted elevation; Children of Mitra - U; Control Electron with emotion; When STM & STP remain separate create body; Emotion from STM & STP; Emotion is Mass - P is Weight; Why different Weight - different P on other planets; Brain is 2 halves reactor - Single sphere reactor; The STC is born with P; Body temple of Creator - Promised Day; I made man in the image of Myself; STC embedded within body; Death or transmutation create new life; U created from emotion of Creator; Field interactions in brain create emotions - create Electron - Transmute & feed P through neural system; He is within Us - we are within Him; Books full of fallacies; Have to understand yourself; Show Flight system in Iran - Transmutation in Washington - or Moscow; KS open KF shops in businesses; Psychosomatic illnesses created during switching time of brain - if abuse happens emotion gets embedded in P of brain; KF system balance emotions during rest time; Don't share Plasma Products; New Vision Units - see energy Soul of object; Update on Iran - tried to pull Russians in failed; US using part KF - disable computers; Stone has Soul - asteroids - elevate; Give T equally to nations; Vatican loans for war - capture China's gold; Tesla cars for \$1 - can't supply batteries - burning toxins; If Musk works correct; Millions die in Congo - owned by Belgium King - for mineral wealth; Create mineral with T effect nations; Of sort America - bring fairness to rest - last defeated president; KF Food App few years; When see KF T in Frig & gas cookers in market - The Change has come.

## Topic Index

STM becomes a creator - itself created out of field interactions; Energy to 18 Hiroshima bombs when separates from physicality (P) - propelled through Space by field strength inside itself - not jet fuel; Clarify more where Soul will end up; Uses universal M fields of C14 and others - determine where goes - what shape; Not all Souls end up same place - some pass Unicoise become part of Soul of Creator (STC) - itself created from; Soul is propelled by law of the physics - by strength of fields gathered in D of P - and according to field strength of environment Earth, Solar System (SS), Galaxy, U, or Unicoise - then take its own position; Some Souls will become dust - 'rain' back on Earth; What religions call Hell - dust in U - separated not part of anything; Soul fields can become dust in SS - seeds for meteorites & asteroids - maybe planet; If strong enough become part of Galaxy - maybe another planet; Meteorites in upper atmosphere may come from SS - or are Cosmos "droids" from Cosmos - on way to Sun release energy in Earth; Future determine where meteorites come from - SS - galaxy or U - can cross galaxy interact with fields of

Earth; Man has collected cosmic objects - doesn't understand what they are; Can be created from a STM who left millions of years ago - have matching M field strength get attracted back to Earth; Galaxy has hundreds of billions of stars - some created from STM as seeds; This is what was meant - humans are seeds of Creation - earth is a greenhouse to replenish, recollect, divert, divide fields of galaxy, U, Unicose, back into itself; Regenerates its own fields; Deeper understanding; We don't need to die to release field strength of STM - to create another life in U; Through our intelligence control this process - create matching field strength - transmute anywhere in U by wish and will; In physicality use steering wheel to navigate - in transmutation of STM use field strengths of Soul of Physicality (STP) in brain; Interact 2 halves of brain create Third Eye - Electron of Soul - use it to navigate transmutation; (Chakra is name given to interaction of M fields); We control Electron to go beyond skull; Those who cannot control Third Eye with KF Headphones - don't go anywhere; Learn to control through emotion; If can make Electron in skull - will become a visionary; Brain material is Gans plasma - fields interact with other fields; This is what happens when fall asleep and dream - interacting with other plasmas using your own Gans's; Transmutation by interacting 2 halves of brain creating Third Eye or Electron - interaction based on strength of STM and STP of the brain - then control position of Electron to transmute - create whatever we need - feed P; To go to Moon - strengthen fields of Electron to match gravitational fields Moon - pulls us in; If emotions match field strength of specific position on the Moon - precise landing; Emotions 'steering wheel' of Soul; Some Knowledge Seekers (KS) emotions cannot reach control over Electron using KF Headphones - result is - no interaction with environment; Other KS understand emotions of P - create Third Eye; Do not mean sentimental or superficial emotions - deeper emotions can control fields of body in D of Soul; If can control emotions create Electron - bring it inside brain - absorb energies from U; Brain on top of spinal cord & neural system - feed energy to whole body through neural system; Blood flow brings oxygen throughout body - matches structure of neural system - this is how we feed body with energy from U; Structure of neural system interacts with fields of STM - how body is created; Fields of STM interact with blood flowing through body - creates the body; Means STM interacts with STP (which is blood) and with fields of environment to create physical body; We exist because of neural system & blood circulation; If only one is cut off can still exist - the other system can communicate with body - convert energies - build cells; This why we can re-grow amputated leg - reproduce whole structure of leg - not magic - comes through STM & neural system: Physical information from neural system - Energy of U from Soul; Feed man through neural system; Neural system that reproduce amputated limb is same that connects to STM; When expand Soul feed P through neural system - don't need to kill; Don't need 'seeds' to attract stronger fields of U - Create the Electron and feed Energy through neural system; This new understanding - only need to keep Soul within structure of the brain - don't even need brain - can create this controlling system anywhere in U - by understanding release and interaction of fields of Soul; Bring people out of Coma - heal paralysis - reconstruct neural system; But need to understand basics of this structure; Billions of Souls floating within U - give and receive - can become receiver at strength field of comprehension - mature Soul; When mature can connect to all fields of U - at death become Passenger of Unicose; Soul can be gifted elevation - become part of STC - even as infant or within womb - or might not be achieved after 100 years suffering in P; It has no time & position

- strength field of Creation; Don't need languages; Don't need to take birth in P; 'Children of Mitra' created this way - don't need to come through physical birth; Lover like to create 'Children of U'; Past half hour - secret to Creation in physical D of U, Unicoise, Creator; Have no choice but to mature to this knowledge - because intellect will reach understanding - 'second nature'; Push people to reach this in tomorrow's Flight session - feel what it's like; Try to control emotion to create Electron; We create environment - you have to take step - understand emotion needed to create it - feel and control it; Bring Electron close to STM to feed P - or feel Creator; Your advancement is your responsibility - we are just teachers; If feel nothing - can't control fields of emotion; 10 years ago in Health - referred to emotions - need for transmutation; Emotion in '3 layers of skin'; Emotion comes from interaction between STM & STP - and it's the control system between the two; Expand energy of STM beyond STP - don't need P; When STM & STP remain separate - create a field that interacts with environment - leads to the creation of P; Understand and travel U in one instance; Through emotion manifest P anywhere in U; Materialistic way - emotion is the Mass - when interacts with fields of Earth becomes the Weight; Weight is P; Interaction of emotion of STP & STM creates the Mass and interaction with fields of Earth creates body P; Mass of an object; In D of fields of man - we call it emotion - when it interacts with environment creates Weight; If weigh 60 kg on Earth - 10 on Moon - 6 on Sun; Same way weight changed on Moon - so too our physical shape changes - create physical emotion; Body look different on Moon; Understand use of our P; On Earth our brain is split in 2 halves therefore we can create Third Eye; How to do if only single brain lobe; Physical D of emotion single unit; Answer in structure of Earth - single sphere; How do planetary systems create their Soul & STP - in D of SS; No difference between emotion of man and Mass of system - and P they create - from interaction with fields of their environment; One makes body of man - other makes the planet; This is key to traveling U; I made man in the image of Myself; How is image of Creator made; Creator is created within you - His fields interact with fields of environment of P of the man; Body created from interaction of emotions with fields of planet; P of STC is created within P of the man - STC is born within the man; Body of man is temple of Creator - when understand - 'Promised Day' - mature to understand Totality of Creation; All systems in U work same way; Man's lack of understanding; Interaction of STM with STP leads to creation of kidneys, liver and organs; Interaction with environment creates body; Without a doubt - same fields in environment of body interact with fields of Creator - embed STC within it - manifests itself as body (I made man in image of Myself); (At death or transmutation STC interacts with ?? something to create the new life); Hope you understand today's teaching - enlightened to understand - man does not need to eat - doesn't need any structure all made same way; Depends how you want to manifest yourself - I made man in the image of Myself; The interaction of 'Me' within the structure of man's emotion leads to creation of 'Me'; This U is created by the emotion of the Creator; Man gives his own dimension to it; This has been the riddle in the books of the man - today is the answer; If don't understand still in doldrums of 'Weight & Mass' - a big mess; I'm the creator of that image through my own emotion; My emotions are created through interaction of the fields in my brain; Next step is to create Third Eye - use it to feed P and transmute; Burden of learning is on you - not for others to teach you; If haven't understood - carry on with P; We have given you the key to Universal existence; Wherever we go He is within us, and we are within

Him; Our existence allows the love for Him to manifest; I hope you all get enlightened - otherwise you'll still be reading the books that are full of fallacies - they are trying to keep you away from understanding the truth about yourself.

## Part 2

Write down experiences in Flight sessions; Ultimate goal is transmutation - show in Washington - Isfahan show physical flight system; Need license from Iranian authorities; Flight system will interact with Iranian Military Defense system; Isfahan center of Iranian nuclear industry - Space Defense Center; Will not make Iran vulnerable during conference; Will show first Gravitational Flight system ever; Many world scientists will attend conference; Sat with leading scientists and military officers in China - normally forbidden - exception for KF T - built trust; KF protect Iranian scientists - not like former president Ahmadinejad - names to Israelis; Show the change in Iran conference - turning point for science and T; If new US government early next year not agree to conference - show T in Moscow; KS are showing & selling KF products in existing business - little showcases - extend to 30,000 new products by collaborators/partners in China; Products will all have KF Plasma T embedded within them; Brain is always activated - since time of inception; Find some answers to your problems - through dreams; Enlightened during sleep - can happen in daytime; Happens when 2 halves of brain switch over operation to other - 'flash' during hand over; Happens both day and night; Memory or work of left side gets switched to right - creates emotion - vice versa; Also switching happens with organ pairs - heart chambers & lobes of lungs; Switching time can transfer emotion to P - main cause of cancer - psychosomatic diseases. Energy - field strength of emotion touches field strength of STP & P; Main switching point in brain - where psychosomatic diseases manifest - emotions gets embedded in P; Hundred percent correct - seen with Fibromyalgia - sexual or physical abuse happens at switching time - emotion gets embedded in P - becomes pain in body; This is first time I explained this - unknown in Medicine; When abused people show no sign of Fibromyalgia - because they enjoyed it - another form pleasure; Those who emotionally can't accept get diseases such as Fibromyalgia, Chronic Fatigue Syndrome, MS and others - manifest later when understand what was done - was wrong; New T can remedy all psychosomatic diseases - correct emotion shift when brain is resting stage; Why KF T so effective - Headphones and Wellness Units; Emotional side gets balanced with physical side; Understands every intricacy about creation of man and his emotions, physicality, Soul; A Master in what he does - can restructure brain; Our systems can overcome your depression, FMS, Fibromyalgia - but it's you who blocks yourself from receiving; Ones who could not accept abuse make body fat and ugly so no one will touch them; It's a fight between STP, emotion, P; When Son obese - father abusive; If 2 sisters abused - one who doesn't accept gets fat - one who enjoys becomes slim - prostitute - found way to control men through emotion; Case where Soul and emotion do not match; If science understands heal 90% psychosomatic illnesses - aging would stop; Forced retirement at 65 death sentence for many men; If government implements new T - don't worry about hunger - all needs met - stay active as long as like - have longer better life; New KF systems use Headphones - receive fields - balance psychosomatic conditions - brain restored to normal operation; KF systems very effective - but some people don't want to let go of the

abuse or too much attached to P; KF is no good to pharmaceutical companies; Don't share plasma products like Pain Pen - exchange your energy with it - give to somebody else - psychosomatic disease can be exchanged; Clean energy from devices - zero out - dissipates to Universal Energy; KF Power Units - Electric and Gas are being processed; Commercialization soon; Partners part of a larger structure; New fridge and freezer part of KF T - don't need power supply; Online payment take time to correct - KS messed it up - now only use professionals; About plasma body and angle of Moon - illusion of being seen that way; New Vision Units see energy fields of its Soul; Help with cataracts and eye problems; It's not aura - interaction of its fields; See energies of entities; Transfer emotion of object through vision; What we see - interaction of fields of inner sanctums of object creates color; Can identify composition of central structure of planet; If end up as dust or stone - Hell - very hard to get out; Even a stone has a Soul - where did that Soul come from; Having unconditional love for Creation creates a seed within in heart or physical structure - that's 20% and Creators love is 80% - attract love of Creator; Man still denying receiving love of Creator; Long discussion about Iran and Israel - reported Israelis tried to use nuclear bombs on Iran but Russians intercepted; Pre-planned by Americans to draw Russians into war - didn't work; Americans want to dismantle Russian radar technology - leave Iran, Iraq, and Syria undefended; Iranians paying Russian to defend nuclear centers for years; Israeli agents launched drones from inside Iran; Iran is not responding - stalemate; Attack showed weakness in Iran National Security Space Zone - being remedied; Using new T is possible; Americans have developed part of KF T - tested in Nevada - Lockheed Martin - to paralyze all electronics & computers - but requires huge electric power; All of these are matter state technologies - plasma T stronger than matter state - planes drop like flies; Developed Defense technology for deep Space; Even a stone has a Soul - asteroids have Souls - elevate Soul of asteroids - point of satisfaction; Don't nuke asteroids like Americans tried; Matter state weapons lower field strength - easy for plasma to handle; Worry that countries we give T to will become arrogant - try to be superior - want to give to all at same time - negotiating; Chinese Military can paralyze any ship on East Coast of China - neutralize whole atmosphere of US; American financial structure does not allow for sharing & peace - nor does Chinese military structure - Iran in-between - problems is they think themselves 'guardians of God's will'; Have to get 3 devils on table - become angels; Americans want world as Empire; IMF will move US to control spending; Vatican loans Americans money - hope to capture China - steal all gold and assets; They create war to get money to pay for the war they created; We're trying to put an end to it - best person - last defeated American president; China could shut down American economy in months - setup that way; Enough Cosmic Ray materials - start delivering - need right container; Value will increase over years; No comment on breathing exercises; About Musk and Tesla cars become a lot cheaper; Offer Musk \$1 for Tesla cars; Delivery T Plasma cars without batteries - show a few breakthrough technologies in Iran - put an end to electric cars; Forcing electric cars on people - don't have enough raw materials to keep supplying all the batteries; Problem with cars burning on streets of London - world hiding problem; British policy - let cars burn - release toxins - cancer causing chemicals; Have to replace street where burned; Musk constantly tracks KF work step by step; Musk released a small unit based on KF MaGrav system - failed; If he starts working correctly with KF will see progress; Give \$1 - respect for scientist; Explains 18 millions of deaths in Congo - world

silent; Congo is larger than Western Europe - huge mineral wealth; Dictatorship of Congo controlled by King of Belgium - owner of Congo and not nation of Belgium; King has say in everything - incalculable wealth goes to Belgium; Different nations arming different groups to take mineral wealth; Not civil war - guerrilla war to control wealth; Europeans took copper out of Congo - left huge toxic lake; Chinese cleaned up and developed Cu and helped people; KF creation of materials from MG Fields is part of solution - negotiations going on; Will end mining but China influences countries by exporting minerals; Material Enhancement Unit (EU) can produce a ton of copper a day - 10 dollars a ton; Release of T will effect economy of nations; Bring peaceful position to Congo; Shipping industry effected; Become part of United Nation's structure very soon - new problems for governments in controlling - financing; To run civilization fairly with new T have sort out these problems - job falls on my shoulders; Don't see Iran using KF Energy Defense T against Israel; We play fair - but can't give everything to one nation - become arrogant want to beat others; First we have to sort out America - bring fairness to the rest - KF work; Peace process going bad because very bad world leaders - have to tame to succeed; People making a lot of money out of war - no business more profitable than the 'killing business' - Churches encourage - ones making guns; Have to elevate Souls - teach to apply; 2 to 3 years to - when KF releases its App - peace will start; If want food press an App on the KF communication system - no one can control - Plasmatic Cosmic Rays system - receive energy and emotion of an apple - fulfill the hunger - nobody can control you over food - same with everything else; Take 2 or 3 years; Longer because of man's greed - we already have knowledge & T; Let's see how our partners will do in developing and sharing T; New plasma refrigerators and gas cookers - when see in market - know the time has come; It's not very far away; Thank you for being here, your existence allows the Foundation and our work to exist.

## **Introduction to 535 KSW - Pattern of Creation - Hell is Back - Create Emotion to Transmute - 'Electron' - Commercialization**

There is a lot to decipher in this workshop and I will try as best I can. Mr. Keshe started the teaching by saying that the Soul of the Man (STM) becomes a creator who was himself created out of the interaction of the fields. We could say right here, "I made Man in the image of Myself." Which basically means that there is a pattern by which Creation is created, and it's the same pattern throughout all of Creation. All the countless variety of Creation has been created the same way. Nothing is created different, it only looks different in physicality (P). Once we learn this basic pattern, then we become enlightened, or co-creators, or whatever we want to call it.

Since humanity is ignorant of its origins or even understanding how Creation happens, then the idea of 'eternal Hell' becomes important in the background of everyone's mind. Originally, the religions may have had a good intention to teach about Hell, as a way for people to work on themselves and become good to each other. But then the leaders and especially of religions understood that it was good for their own business to keep everyone afraid of going to Hell, as a way of controlling and having power over them, and they wrote their scriptures in a way that they would have a special power to keep us from Hell. If we understand the essence, it includes both the religions of West and East,

but in the East there was a little more knowledge. The modern day intellectuals started making a difference between being religious and being spiritual, and the so-called 'spiritual' people simply said, we don't believe in Hell anymore it's all a lie, but they had no knowledge with which to replace it, and they just started living the way they wanted. Now with the KF Plasma Science we have been gifted the knowledge of how Creation actually works and the problem of Hell has come back with it. But this time we understand that Hell is when we separate ourselves from the Totality of Life and our Creator. If we think about it, what is a dust? They are little separate particles that gather around the house and become dirt, or useless to us. We sweep them up and throw them out. We always thought that all the dust particles came from the clothe in the house because they look like the lint we take out after drying our clothes in a machine. But mostly they are created out of field interactions in our house just like the dust in the Cosmos. I think Mr. Keshe once said, dust particles are like UFOs if we understood it, we could travel the U.

So now our fear is how not to become a 'dust.' One Knowledge Seeker (KS) asked if it was possible to change that condition, and he said, yes, but it was very difficult. So it would be wise of us to start paying attention to our lives and take serious the fact that we are responsible for what we do, and even if we are following someone else's idea about life, it is us who will have to experience the consequences of how we live. Living the "Ethos of Mitra" is not just repeating a few words like 'Think, Speak, and Act Good.' It has a very deep meaning that will take our lifetime to explore. So if you think that the World Leaders are enjoying the billions that they have stolen from humanity as a reward for keeping us suffering our slavery, think again. The next time you see a meteorite in the night sky, you can think, 'oh, there goes President Bush or Pope John Paul II all alone as a dust floating through the Cosmos.' Where if, they would have had the courage to stand up for Truth and truly give their lives to serving others, then we would look at a bright star in the sky and admire how it is sharing its beauty and adding to Creation.

Mr. Keshe reminds us often that, 'even a stone has a Soul,' and today he has deepened our understanding of what that means. At the time of death they say the Soul releases energy equivalent to 18 Hiroshima bombs. Obviously they mean plasmatic energy. This energy propels us through the U to reach our next destination and begin a new life, that is if we have gathered enough field strength to start a planet, star, or whatever. But if, as we are propelling through Space, and for whatever reason, start interacting with the fields in the solar system (SS), galaxy, or U then we can become a dust and that dust can accumulate into a stone, or a meteorite, or asteroid. This may sound strange to us as our scientists say that meteorites and whatever are parts of planets that have broken apart. Scientists are ignorant to the fact that meteorites are created out of the interaction of fields like the dust in our house. Or how minerals and metals are created through interaction of the fields in the KF Materials Enhancement Units. He said, some of the cosmic objects we have found over the years could have been from a STM that left the Earth millions of years ago. It's a fascinating thought. Maybe one of our ancestors from millions of years ago wasn't a very good fellow, and when he died his Soul became a dust way out in the U and then was able to gather enough other particles to himself that he became a small meteorite and then got attracted back to Earth crossing all the galaxies to get here. And then he ends up back

where he started from. I guess that would be pretty close to eternal Hell. But now he is in the hands of scientist who don't know how to release his Soul and think he is just a 'stone.' This reminds me of a story in the Ramayana of India. One time a sage's wife didn't recognize her husband's Soul and ended up being unfaithful, and it says he turned her into a stone. Centuries later Ram touched the stone with his foot and she got released. In one of the early Star Trek episodes they portrayed a rock that was actually a mother that gave birth to baby rocks and had great powers. So the next time we pick up a stone to throw it somewhere, we should be conscious that maybe it's one of our ancestors.

The scientists say there are hundreds of billions of stars in the Galaxy and some are created from the STM as a seed. This is what is meant by the Earth as being a greenhouse for seeding the Galaxy and U. Originally I thought of this 'seeding of stars' in a kind of mystical way and when he explained it this way, it became something very practical. It's all about interaction of the fields and when they interact they become a plasma, which creates gravity and starts attracting other particles to itself and grows into a star. But it's a very different thing to emotionally connect to our mundane life as a body on Earth with the majestic life as a star in the U. But in the end it's really just the difference between ignorance and knowledge. We are so grateful for this knowledge but now we have the responsibility to integrate into our lives through the transmutation.

The basic pattern of Creation is that 2 plasmas interact and between them they create an emotion that then interacts with the fields of the environment to create the P. This is true with the 3 layers of the skin where the emotion is created in-between the outer and inner layers, which then manifests the skin. In the human body the STM is connected to the neural system and the STP to the blood flow and network of blood vessels, and both systems match each other. Therefore, we have the same pattern, the emotion is created in-between the neural system and the blood flow, then it interacts with the environment to create our body. He also said we only need one of the systems to continue to exist. And this is the reason we can re-grow an amputated leg. As far as what I understand is that, the dimension of the STM is still there where the physical leg was, and the information for all the cells are in the brain and through the technology the RNA is activated to re-grow the limb. We will use the same pattern and the same neural system to feed the body from the fields. The whole of Creation constantly repeats this same pattern to create life. Even the Creator is created out of this pattern. Once we mature to understand this, then we can survive anywhere in the U.

Let's discuss further how we can create the Third Eye or what we call the 'Electron.' First of all remember that the STM is a separate plasma inside the head somewhere between the 2 brain lobes. And the 2 halves of the brain are in the Gans plasma state and not the matter state as we were taught to believe and are dynamic. The way I understand it is that, we use our mind to become part of this Infinity Loop interaction that is already going on between the 2 halves, which he calls the STP of the brain. (Remember that the STP is made up of the totality of all the STP of the organs, body parts and blood). Again between the 2 plasmas of the 2 halves of the brain we create an emotion, and this is what we call the Third Eye, or the 'Electron.' And through the strength of the emotion between the STM & STP we can control the Electron of this second plasma that we have created.

If we bring it closer to the STM then we can access the Universal Energies to feed the body through the neural system, because remember the brain is on top of the spinal column and can feed all the cells of the body through the connection it already has. And if we make the Electron go further away then we can connect to the Soul of the Creator (STC). This was discussed last week in the 534 KSW. The KF technology uses this same pattern to help KS transmute. However, as Mr. Keshe was pointing out, that they have left Knowledge Seekers in the system into the next day and still they were not able to create that Electron. We have to be able to create that emotion to expand the STM and we will navigate the transmutation through the emotion, like the steering wheel of a car.

Before we go more into the emotions there was one thing that I was thinking about. When for example, our skin is caressed what is the scientific process? Does the emotion between the 2 layers react to the touch? In a way, that middle layer would be a separate plasma because it creates emotion. Then does it communicate with the Central Plasma of the STM, and then where does it start making up the stories about what that caress means? Is it a loving caress or something else? These are areas we haven't explored yet.

He went deeper into the emotions but we have to listen to it many times to catch the feeling of it. First of all when we use the word emotion in Plasma Science we are not talking about the "I want to feel good" sentimental type of emotions we are used to considering. Mr. Keshe talks about emotions in a very different way. He called it a materialistic way, that the emotions are the Mass and when it interacts with the fields of the Earth becomes the Weight or P. Years ago we did several teachings on Mass and Weight. Mass is really a plasma and it's determined by the MG field interactions with the plasma it is inside of. So the emotions we are talking about are a plasma and not something mystical that we don't know. Of course we still don't know what they are, but we can try to consider them as something practical and something real and something that we can create and control. Another hint is that, there is no difference between the emotions of the man, and the Mass of a system. How do we use this information to deepen our understanding?

He taught many times before about psychosomatic illnesses, like Fibromyalgia, but today was the first time he revealed the cause in a deeper way. Like all paired organs in the body, the brain also switches between pairs when one side rests and repairs itself while the other side handles all the functions. If the abuse, whether it is physical, sexual, or whatever occurs during the switching time, then that emotion gets embedded into the physicality of the brain. And later on when the person matures to discover that what happened to them was wrong, then the pains in the body happen. However, if the person accepts the abuse they usually don't show symptoms. The KF Headphones are able to balance out the emotional side with the physical side during the rest time of the brain function. This is why the KF systems are so effective. He is a Master in what he does because he understands the intricacies of the how the brain works and he can restructure the brain. If the doctors understood and accepted this reality, 90% of the psychosomatic illnesses would be a thing of the past.

The update on the situation in the Middle east is that the attacks by Israel we heard about in the Press was not really aimed at Iran. Instead, first they wanted to pull the Russians into the war which failed, and second they made simultaneous attack in 3 different countries to discover more about the Russian defenses, and then they want to take them out leaving all 3 countries undefended. America used this same strategy in Yugoslavia, Iraq, and elsewhere. The drones were launched inside Iran by Israeli agents.

We have the knowledge and technology to release the KF App right now, but due to the greed of the man it might take another 2 to 3 years. This means we only have to connect to our phone and by tapping the App we can feed ourselves or get whatever else we need. And this cannot be shut down because it has already been successfully used in Gaza to feed the Palestinians, because we don't need a phone line. We can do it through the plasma of the Cosmic Rays. When we see the KF App we'll know that the peace has started. And with the release of the Gas Cooker and Refrigerator that don't require energy we'll know 'the time has come.' These appliances should have the Keshe Foundation name on it along with the name of the collaborating company, which will be a well known worldwide company. He thanked us all for being here, because it is due to the Knowledge Seekers that the work of the KF can exist. We are the humans on planet Earth that are allowing the change to come forward and not be buried. It's an amazing time to be living and to be a part of.

Other Topics:

The P of STC is created within P of the man. The STC is born within the man. The body of the man is the temple of the Creator. And when we understand this it is called, the 'Promised Day' when man matures to understand the Totality of Creation;

The new Vision Units that are getting developed will allow us to see the energy of the Soul of an entity. They will help with cataracts and other eye problems. They will also be able to transfer the emotion of the object through vision. They do not work with the aura, rather it's the interaction of the M fields of the entity. And they can tell the composition, for example of a planet;

Thanks for listening.

## **Quick Index**

(The Intro video spoke about the creation of the Central Forces which holds the body of the man together. (The Soul of the Man (STM) itself becomes a creator, where it was itself, created out of interaction of the fields. Some scientists did some calculations and they figure that the Soul or the Central Energy releases the equivalent of 18 to 20 Hiroshima bombs worth of energy when it separates from physicality (P). (The Soul is propelled through the space of the Universe (U) with the force of this field strength it has created inside itself, and not by jet fuel)).

(Now we can clarify more about where the Soul will end up. It doesn't burn fuel, instead it's what we call an Energy Pack and it uses universal Magnetic (M) fields through Carbon 14 and other M field elements. These energies will determine where it will 'end up' and what shape it will have. Do all the Souls end up in the same place, or do some end up in a specific position? Will some pass the boundary of the Unicose and become part of the structure of the Soul of the Creator (STC), which it was itself created from?)

(In understanding the law of the physics, we know that the fields of the plasma will be expelled into Space according to the strength of the fields of the body of the man at the point of the release of the Soul, or Central Energy, and according to the field strength of the environment whether it is the Earth, the Solar System (SS), Galaxy, U, or the Unicose, and that Energy will take its own dimension (D) and position. Some (Souls) will become a dust that 'rains' back on Earth. (In other words, as the energy is leaving Earth some of it will get caught by the Earth's Gravitational fields and fall back on Earth and get absorbed in it, and become another dust on the Earth). The religions call this the state of Hell, because (you are separated) and become part of nothing. While other fields will become part of the 'dust' in the SS. In the SS they can become seeds for meteorites and asteroids, and maybe become a center of a future planet. Some, due to the speed and strength of the fields which created that Soul, will become part of the Galaxy. They can become a dust in the Galaxy or a seed for another Soul of another structure like Earth).

(All the meteorites and the lights we see as materials burning in the upper layers of the Earth's atmosphere do not only come from the SS itself. They are Cosmos "droids," what we call, cosmic rays, cosmic dust, that have penetrated through the SS. They are on their way to the Sun and as they are passing Earth they release their energy (we see as lights in the night sky)).

(In the coming time, scientists will understand how to tell where these meteorites and lights we see burning out in the sky come from. They will be able to tell if they came from our SS, or entered our SS from the galaxy. In rare cases, if you live on the outer boundary of a galaxy they may come in from the U. They can cross a galaxy and enter a SS and interact with the fields of a planetary system like Earth, and create meteorites).

(The lights we see above us do not all come from our SS. Some are from galaxies or the U. Man has some of these materials in his possession. He has collected cosmic objects, but doesn't understand them. These cosmic objects could have been created by a STM who left this planetary system millions of years ago. Then because they had a matching M field strength get attracted and then pulled in through the galaxy and then to Earth, back to its point of origin. The cosmologists say the SS (?? does he mean galaxy) has hundreds of billions of stars in it. (We know that (Souls coming from) planet Earth created some of the seeds of those stars. It might also be that some of the dust in these galaxies and solar systems originated from the STM)).

(This is what we meant when we said that human beings are the seeds of the Creation. This is a greenhouse that is needed to replenish, recollect, divert, and divide the fields of the galaxy, U, and Unicose, back into itself. It regenerates its own fields. Now we

understand this process in a deeper way. (And if we understand this process, then we do not need to die, to release the field strength of the STM for it to travel to another point and dimension, and to create another life and P in that time, place, and position (TPP))).

(If we understand how to control this process and through our intelligence create the correct matching field strength, then we can transmute to anywhere in the U by our wish and will).

(When we sit in a car in the D of physicality we turn the steering wheel to decide where to go and whether to turn left or right. In the D of the STM through transmutation, we have to learn how to play with the field strengths of the Soul of Physicality (STP) in the brain of the man (to determine where to go). (In the last workshop we taught you about interacting the 2 halves of the brain to create the Third Eye, or what some call the 6th Chakra. We call it an electron of the STM and (we can navigate with that). The man gave this energy many different names but never understood that it was in reality, the interaction of the two halves of our brain)).

(Some of us can (?? make this electron go outside and see beyond the skull). And others cannot get control over the strength of this Third Eye, and then when they put the KF Headphones on them, they don't go anywhere. Because the two halves of the brain (?? contains the M field strength of the physical structure) within the center (it creates, or the Third Eye). If man learns how to control this through his emotion, and then how to produce it in the skull, or even in the brain structure, then he'll become a visionary. Because (the material that makes up the brain is in the Gans plasma state and has a field strength that can interact with other fields. This is literally what happens when you fall asleep and dream, (you are interacting with other plasmas using your own Gans's of your brain, like when you spin reactors))).

((Last week we said that the position of the STM is fixed in the skull and acts like a proton to the Third Eye which becomes an Electron that we can control). If we learn how to control the position and field strength of this atomic structure of the STM and the field strength of the STP of the brain, then we can travel and create whatever we need. We can even feed the physicality through the same process. If we understand this we can use it in transmutation. If we want to go to the Moon, then we strengthen the fields of the Electron of this atom to (match) the gravitational field forces of the Moon (and it will pull us in). (If we can match the field strength of our emotion to a specific field strength of a specific position on the Moon, then we will land exactly on that spot on the Moon. This is done automatically). It's kind of like having a 'steering wheel' for our Soul. (We use our emotions to navigate through Space and dictate (the conditions of how we will transmute))).

(Unfortunately, some Knowledge Seekers (KS) cannot reach this point of control using the KF Headphones. Once we let a KS stay in the system for a whole night and the next day, but still he couldn't go anywhere. It's because (he could not reach the emotional field strength to create that 'Electron.' When the 2 halves of the brain interact to create that Electron, then the 2 parts of the STP can interact and expand beyond the brain). (If we

don't achieve this then there is no interaction with the environment, and we cannot decide where to go or what we want. Some KS (are so in tune with their emotions) and they understand the emotions of the physicality and can create the Third Eye. We are not talking about being emotional as when you say something to a lady and immediately she becomes emotional and starts to cry. It's not that (kind of) emotion. We're talking about the emotions that can control the fields of the body in the D of the Soul)).

(If you understand how to control the emotions, then you can use the same process to reverse this. You can interact the STM with this Electron (that you create) and bring it within the inner physical structure of the brain. Then you can dictate what energies you will absorb from the environment and the U. (As the brain) is on top of the spinal cord and the neural system, it (feeds the (whole of) the body through the neural system). (Observe the structure of the neural system, and then look at how the blood flows through the body. This brings oxygen to the whole structure of the body in the D of P. (Then you will see that they both match))).

(Does Mr. Keshe mean that the Universal Energy the body receives through the neural system matches to how the blood flows in the body? This is important for visualization for receiving Cosmic Energy).

(The structure of our neural system, which is (also) the interaction of the fields of the STM, (is also how the body is created). (The fields of the STM interact with the blood (flowing through the body to actually create the body). (Another way to say it, is that the Soul interacts with the STP, and (the fields of) their environment, to create the physical body). (Our neural system and blood circulation system are part of this interaction. They are the reason we exist in this dimension. If you cut off one system, the other system can still (communicate with the rest of the body), convert (energies), (and build cells))).

(Does Mr. Keshe mean that we can still live even if we lose the blood circulation, or if we cut the neural system? All we need is to have one of the systems to continue with life).

(This makes clear how we can re-grow an amputated leg. The system by which we can reproduce the whole structure of a leg is not done by magic, rather it comes through the STM, and through the neural system, or what we call the neural pulses. Part of the information that comes through the neural system is physical information, and the other part is Soul information, or the energy of the U. It's a combination of the extraction of the fields, which leads to being able to feed the man. At that point, our neural system becomes the provider of the energy for the production of cells of the bone, nerves, tissues, and all the rest of the body).

(The neural system that can reproduce an amputated limb is the same neural system that connects to the STM. (When we interact the 2 halves of the brain to make that "Electron" and expand the STM), then we can also feed the physicality so that the man does not need to kill. (Instead of eating food to create a weaker field to pull stronger fields from the U, now we can use the energy from the Soul (by creating the Electron, between the brain),

and then feeding the energy through the neural system, which will create the physicality by interaction of the neural and blood systems with the fields of the environment)).

(With this new understanding you only need to keep (??) the Soul within the structure of the brain, you don't even need the brain. Man can create (this) controlling system anywhere in the U, simply by understanding the structure of the release and interaction of the fields of the Soul. (In other words, we just have to interact the 2 halves of the brain and create that Electron or Third Eye. This interaction is actually the STP of the physical structure of the man). We can even bring people out of Coma, (?? and heal paralysis). We can reconstruct the structure of the neural system. But we need to understand the basics of this structure. (?? If you follow it and come back (around) to the (place) then you get the same structure)).

(Billions of Souls are floating within the structure of this U, and they give and receive. Man can become a receiver of those who are at the strength field of comprehension, and understanding, (and have achieved the) maturity of the Soul. In the future man will understand, and this maturity will reach a point that the STM can connect to as many fields as there are in the U. (At the point of death man will become a Passenger of the Unicose). (If a Soul is gifted the elevation of being able to understand the work of the U, then it will become part of the STC). This maturity can be in the structure of the infant, it can also be achieved within the womb of the mother. Or it might not even be achieved after a 100 years in the physical dimension. It has no time and position, but it has the strength field of the Creation. (If you touch it, and if you become mature enough in understanding the field strengths of the Creation, then you do not need languages, and you do not need to serve, to give, to get, to receive, or to elevate. You are elevated to understand the World of Creation in the womb of the mother, and (it) does not need a physical birth. This is how the 'Children of Mitra' will (be created), and most probably they will never need to touch the D of physical birth. And then we understand).

(In a coming time, when this process is understood more, then those who love to be, and would like to create 'Children of the Universe,' they will become part of this process. If the scientists of the man's could understand the teaching of the past half hour, then they would have opened the secret to the World of Creation (in the physical dimension of the U, Unicose, or even the Creator Himself). We have to understand, that in the long run we will have no choice but to mature to this knowledge. We will have to open our understanding to this knowledge. We will have no choice, because our intellect will reach a point of understanding, and then it will become 'second nature' to understand).

(In tomorrow's Monthly Flight session we will push some of you to reach that point. Or at least feel (what that point is like). Or even to try to understand what that point is, where you will be able to control part of (your) emotional feeling of creating that Electron. Third Eye, or Chakra. We'll push you through your own structure. We'll create the environment for it (to happen), but it's for you to take that step (forward). It's for you to cross that line, to not only cross it, but understand the emotion you need to create it, and the emotion you need to feel it, and the emotion you have to have to be able to control and manage it, and to reach to what you want. Maybe you will bring that Electron as

close as possible to the STM, so that it feeds the physicality. Or maybe you will expand it out to feel the fields of the Creator).

(Your advancement is your responsibility. We are just like the teachers in the driving school and we have brought the car for you to use. But it's you who has to learn how to drive it. You have to learn how much pressure to put on the accelerator, and when to apply the brakes, and how to keep yourself within the mesh of the Universal Energy Fields, to get where and what you want. This is a school for beginners in how to transmute with the STM in the D of the energy of the man. Unfortunately it's up to you whether you pass or fail. Those of you who say, "I felt nothing." It's because you haven't managed to control the fields of the emotion of it).

(In the Health teachings of 10 years ago, we always referred to the emotions. Understanding the emotions are needed not only for D of P, but they are the key for transmutation in the U. For the 10 to 15 years we've been explaining this again and again, that emotion is even between the '3 layers of the skin,' and in the structure of the physicality of the kidneys, and the rest of it).

(Emotion comes from the interaction between the STM and the STP, and it's the control system between the two. If you manage to expand the energy of the STM beyond the strength of the STP, then man will not need the D of physicality. As long as these two remain separate they create a field that interacts with the environment of the man and leads to the creation of the P of the man. If you understand this, you can use the STM and the essence of the fields of the U, and the emotion between the two halves of the brain, what we call, the essence of the STP and you will become the Passengers of the U in one instance. Then you decide where to position it, in respect to the emotion, so that it leads to the manifestation of the P at the time, place and the point in the U).

(The emotion is the outcome of the interaction between the STP and the 'Soul of the Mass.' We can also put it in a materialistic way and say, the emotion is the Mass. And when this Mass interacts with the fields of the Earth it becomes the Weight. Another word for Weight is the physicality of the man. The interaction of the emotion of the STP and the STM, creates the Mass, and that emotion, in interaction with the fields of the Earth, leads to the physicality of the man. We call it the mass of an object. In the dimension of the fields of the man, we call it the emotion. When it interacts with the environment it creates weight. If you weigh 60 kilograms on Earth, then maybe only 10 on the Moon, and 6 kilograms on the Sun. On the Moon the weight changed. In the same way when we travel there our physicality will change to create a physical emotion, an interaction between the STM and the STP. The emotion they create will be in respect to the environment they are in. This is why our body will look different on the Moon and the Sun. Man has chosen too many words for the same process, because he never understood the process in the first place. As long as he doesn't understand this, he will suffer in this dimension of physicality).

(We have to understand how to use our physicality. On this planet our brain is split in 2 halves therefore we can create that Third Eye. But how would we create that emotion,

and interaction with the STM that leads to creation of the physicality, if we would only have a single lobe brain? Then the whole physical dimension of the emotion would be one and not in two halves. This will be a dilemma. But, if you think slightly deeper and look at the structure of planet Earth, you'll find your answer).

(How do planetary systems create their Soul, the STP, which ends up in the dimension of the Solar System, to the shape, the color, the moon, the mountains and the rest of what they contain? There is no difference between the emotion of the man and the Mass of the system and the structure of the physicality which they create in interaction with the fields of their environment. One makes the body of the man, one makes the planetary system structure, and one makes the Earth).

(The sooner the man become knowledgeable about this, the sooner he will become Passenger of the U. 'I made man in the image of Myself.' So, how is the image of the Creator created, when itself follows the same principle? Then you'll understand how the Creator is within you, where His fields interact with the field strength of the environment of the physicality of the man. Then you'll understand, 'I made man in the image of Myself,' in interaction with the STP and the STM. Your physical dimension was created through the interaction of the emotion with the fields of this planet. (In the same way, the structure of the P of the STC is created within the P of the man, and that creates the essence of the birth of the STC within the man). The body of the man is the temple of Creator. One day, man will understand this and that day, is the 'Promised Day.' It's the day when man matures to understand the Totality of Creation).

(All systems in the U work the same way. It's only man's lack of understanding, which has brought division and separation through his own misunderstanding. The interaction of the STM with the STP leads to creation of the kidneys, liver and the rest of the organs. And then through interaction with the environment, leads to creation of the body. Then without a doubt, the same fields in the environment of the body of the man, through interacting with the fields of the Creator, will embed within it, the STC, which manifests itself in the dimension of physicality of the man. (But there is still a separation). (At the point of death, or during transmutation the P is taken away, then with what does that STC interact to create a new life? (?? How does it interact with the fields of that atom?)))

(I hope you understand the meaning of the teachings today. And I hope you've been enlightened to understand that man does not need to eat and create mayhem. Man does not need any structure, as every structure is different and it depends on how you want to manifest yourself. Then you will understand the true meaning of, 'I made man in the image of Myself,' as the interaction of 'Me' within the structure of the emotion of the man leads to the creation of 'Me.' Then man will become mature and become part of the Universal Community. This Universe itself is created by the essence of the emotion of the Creator. Man only creates the dimension of the fields for it to manifest itself. And he gives his own dimension to it).

(This is the riddle in the books of the man, and he has always been looking for the answer. Maybe today you have found the answer. If not, then you're still in the doldrums

of the 'Weight and Mass,' and you are in a big mess. The Totality of knowledge in, 'I made man in the image of Myself,' is that I'm creator of that image, (through my own emotion). (?? And my emotions are created (through the interaction of the fields in my brain))).

(The next step for KS is to find that point or Third Eye and use it to feed the physicality, and at the same time to transmute and become part of the Universal Community. This is the next step in the evolution of science and technology, and of understanding the World of Creation. The burden of (learning) is on you, for you to learn yourself and not for others to teach you. If you haven't understood the essence of the teaching of today, then carry on with your own physical dimension of life. But we have given you the key to Universal existence. (Wherever we go, He is within us, and we are within Him. And our existence allows the love for Him to manifest). I hope you all understand the light of the knowledge and get enlightened. Otherwise, you will still be reading the books, which are full of fallacies, and they are trying to keep you away from understanding the truth about yourself).

### **End of Quick Index Part 1 - 535 KSW**

(For those who participate in tomorrow's session write down your experiences since last time. You can join and leave anytime. There are two more sessions left in this cycle. In the new cycle starting in July we'll prepare for the ultimate goal, the transmutation, which will be shown in Washington. In Isfahan we'll show the physical dimension of transportation in Iran. Registration for Iran will begin once we reach agreements and they approve a license from the Iranian authorities to hold the session in Isfahan. Then we'll make the announcement. In Iran we need to receive permission first from Iranian military because we will be displaying a flight system, which will interact with Iranian Military Defense system. And Isfahan is the center of Iranian nuclear (industry), or Space Defense Center, we do not want to make Iran vulnerable during the conference. It's much more complicated than you understand. It's not a normal conference. We are setting out to show the first flight through a Gravitational system (ever shown)).

(Many scientists from around the world will be in this conference. In China, you were sitting amongst leading scientists and military officers of China. Normally it's forbidden for these kind of things to happen. It only happens when KF shows technology, because we have built the trust and many laws are changed for military people to be amongst normal scientists).

(Many of the scientists you'll meet in Iran will not introduce themselves as who they are. They will be given a protective identity, to protect the national interests of Iran. We won't play the game of the former president Ahmadinejad, giving the names (and fingerprints) of our scientist to (Israelis for them to do something). We protect our scientists and military officers. We are here to show the change, but at the same time to protect the nation. The conference in Iran will be a turning point for science and technology).

(We might have to increase the price, but at the moment the conference is set at 12,500 for KS and others and government officials, and scientists from outside Iran, will be charged a minimum 25 to 50,000. There are a lot of expenses for security and the rest. Iranian nationals who wish to attend will abide by the same rules).

(We hope to do the transmutation early next year in Washington, once the new government gets settled into Washington. If we don't achieve agreement with the Washington authorities, then we'll show the technology (T) in Moscow. We have no hesitation, and it's time to show transmutation. In Russia we have a solid background of support).

(When we announced the closure of the KF structure many KS have asked not to be distributors, but to have like little displays or shops in their existing businesses. They would become a point of sales for KF products. Essentially, we would move our shops to your existing businesses. This would extend to the coming 30,000 new products of KF (being produced commercially through our agreement and collaboration (in China). You could apply to become distributors of these new items. These Household, White Ware, and Agricultural Goods will appear as part of the KF products in the coming time. We are in the process of negotiating and developing what will come out as retail products. Then automatically you would become part of the much bigger structure with some of the major companies of the world. These products will all have KF Plasma Technology embedded within them). (In the very near future, all the tickets for transmutation, health programs, and everything else will become part of this).

Q: What happens when my brain has been activated? What happens to the Soul? Where is it taken?

K- (I wonder when you considered that your brain was activated. And what do you call being activated. Your brain is activated from the time of inception. Your brain has already been activated. (It was created that way and that's how it maintains itself. Some of you know this process and are aware of the interaction). Some of you have felt and used it, and have received some answers to your problems. Some of you come (to understand things because of this interaction)).

(Many of you, during your lifetime will find answers to things, and then you say you dreamt something. You say you got enlightened during your sleep, or it can also happen during the daytime. This happens primarily when the two halves of the brain switch over operation and there is a 'flash' during the hand over of the operation. And if for example, the part of the structure of the memory or the work you were analyzing on the left side, matches to the right side which it is switching to, then by the interaction of those two fields, it creates the emotion, the knowledge).

(The brain switches over its operation not only during the sleep time, but also during the waking state in the daytime. During the waking state when you are aware and part of the brain shuts off, and the other part takes over the operation of the brain's function, and one side has less control than the other. (?? it's not clear) (Does what you were working on

the left side get put into the right and somehow gets locked in there and that's what causes a disharmony or disease??) (We know how it functions and we have understand when to control it)).

(There are a combination of fields between transformation and switching (between lobes), and between the organs as well, like between the kidneys, ovaries, different chambers of the heart, between left and right lobes of the lungs, and the rest of it. When the operation of running the organ is switched between the pairs from one side to the other, the emotion of that organ gets switched as well. The switching time becomes a crossing point for the emotion to get transferred into the physical condition, and this is the main cause of cancer, and psychosomatic diseases. Because, one physicality is handing over to another physicality, and the emotion is being transferred at the same time with it. So, the energy, (or) the field strength of the emotion, touches the field strength of the STP and the physicality. (?? The main switching point is in the brain, and is ?? where most of the psychosomatic diseases manifest themselves). When the emotion is switched over it touches the line of the physicality of the body and gets embedded in it).

(We know this is a hundred percent correct, because we've seen it in the operation of Fibromyalgia. The sexual or physical abuse happens at the time when the two halves of the brain are switching over. The emotion is switching over at the same time as the physicality is switching and the emotion gets embedded into it, and then it becomes a pain in the body. We understand the (cause) and the way psychosomatic illnesses come about. This is the first time that I have explained this, and it's unknown to the world of medicine. The reason people who get abused physically or sexually and they show no sign of Fibromyalgia, is because they enjoy it. It's those who didn't want to be part of it, because emotionally it was unacceptable for them to be touched at such a young age. The emotion they were brought up in does not accept it. And when the abuse happens at the same time as the switch over time of the brain function, which come in 4 to 5 hour cycles, then it embeds into the physical body. The pain will show itself at a later stage. The diseases such as Fibromyalgia, Chronic Fatigue Syndrome, MS and the others start to manifest themselves when you mature and understand that what was done to you was wrong, and you cannot accept it in the dimension of physicality, then it hits you).

(If our scientists would understand this, then we can remedy all the psychosomatic diseases of the man. They come from a position shift of the emotion, when one side of the brain goes for rest. If we understand this then we can enter a new dimension of science. This is why the KF Technology is so effective. We have done this using the Headphones, and I did this in the past when I would build health Units for people. (?? It's unclear) (He makes systems that allow the emotional side to balance out with the physical side). (He can bring the brain back to the state it was before the emotion switched to the P). (We don't just give you the Headphones. I understand every intricacy about the creation of the man in the dimension of the emotion, physicality, and the Soul. I'm a master in what I do, because I understand every part of it. And this is why we can deliver a system that can restructure the brain)).

(We put you on the systems which can overcome your depression, FMS, or Fibromyalgia, but it's you who blocks yourself (from receiving it). (The ones who could not accept the psychological, physical, or sexual abuse are the ones who get fat, and make their bodies big so no one will try to do something to them, are the ones who could not accept abuse. Psychosomatically you make yourself bigger, then you think the guy won't touch you, because now you have become fat and ugly. The chickens do this during the 'cock fights,' they puff up their feathers to make themselves look bigger than their opponents so he gets frightened. This is cock fight between the STP, the emotion, and the physicality).

(When you see a son and father together on the street and the son has made himself massive compared to the father, then you know the father is abusive. The son grows bigger to show that he is somebody. And with women, the ones who enjoyed the sexual abuse become prostitutes, and they keep themselves slim and attractive, because to them it wasn't abuse, it was another way to have pleasure. If there happens to be another sister in the family who didn't accept the abuse, then she will be in psychosomatic depression, and make herself fat so they will leave her alone. The slim one enjoyed the abuse and discovered she could control men through their emotion. I've seen many sisters like this).

(This is where the Soul and the emotion do not match. And if the World of Science would understand this about psychosomatic diseases, then they could balance it out within the structure of the brain during the time when each lobe rests, then 90% of the psychosomatic illnesses would disappear on this planet. Even aging would stop. Aging is a battle between what I can and cannot do, or what I'm restricted to do. Men generally stay healthy and active until the retirement age of 65 and the law says they have to retire. (Our body doesn't like to be shut down suddenly with nothing to do, and the men go home and die within years. Because he cannot accept that such an intelligence and physically active body now has to become part of the 'scrap' and just wait to die. So he dies faster. The pension laws and making men redundant at the age of 65 is 90% of the cause of the suffering of the man at this age).

(Once the government understands this and start using the new T we won't have to worry about the hunger, disposing of dead physical bodies, because the man will be allowed to live as long as he likes, and remain active. Pensioning men at 65 creates its own psychosomatic death sentence for a man. With the T he will live longer and have a better life. And he will participate in the structure of the life in a deeper way and gather more experience. This will help nations that are burdened with paying pensions. Pensions should be an addition to what a person can already do, and not a condition that they have to live under. It will change a lot of things).

(The new systems developed by KF where you put on a pair of Headphones and receive the fields can balance these psychosomatic conditions out. The brain can be restored to a normal operation. Even using the Headphones for 1 hour a week is enough to correct these conditions).

(Because we understand the cause of these conditions the KF systems are very effective. But then we have those people who come in, but inside they don't want to let go of the abuse, and then they say the systems don't work, because nothing happened to them. Or others who say, everybody else feels something, but nothing happens to me. It's because you have lowered the position of the field to the center. And secondly, you are too much attached to the physical dimension. In a way you don't allow your emotion (?? to come through and you keep your problems in the physical dimension)).

(It's very easy to help mankind once you understand the knowledge. And this is why we are no good to pharmaceutical companies, because we understand the structure of the illness (and how it is cause through psychosomatic processes)).

Q: Why in the description on many products sold in the online store, it says that the product should only be used by one person, and not to share it. What is the technical reason for not sharing the product?

K- (I explained this before. When you buy a product (its fields) becomes a part of you. They are not like matter state products. With plasma products you exchange your energy with it. And if you give it to somebody else, then they also receive your energy with it. So if you have a cancer or some problem you don't know about, that energy will go to the other person. Even psychosomatic disease can be exchanged. These are not medical systems, they are Wellness systems that transfer energy).

(We have always recommended that you don't share these products like Pain Pens. If you understand the principle of the plasma, then your body is one half of the 'Yin and Yang' and the product is the other. This is the reason. It isn't that the pain magically goes away. You exchange your energy with it. It doesn't give you energy. (?? It's like the energy you don't need that causes the pain goes to it).

(When you use the KF UBESUS (Universal Body Enhancement Spaceship Units) we always clean the energy, before the next person uses it. You should do the same when you use the ones you buy. Put it back on the system and it will clean it, or 'zero out' the energy. The energy dissipates and becomes part of the Universal Energy in the system).

Q: Is there any news on the delivery of the Power Unit, that is the Electric and Gas Unit?

K- (They are being processed, but we don't want to go into details about it. They are all on the way. Most of the products that are part of the patents will appear in the market in the next few months to a couple of years, like the free standing gas cooker and all that. The commercialization will start in the next few months. Our partners are a part of a larger structure, they have to do a lot of things before it comes out).

(When you buy a new fridge and freezer that are part of the KF Technology, then you won't need to connect it to any power supply. These will be part of the KF products. They will be totally different than rectangular boxes you use today. (It's not clear how or if KF

name will be up front on the product. Our collaborators are one of the largest organizations in the world).

(There was a question about making the online payment easier because many people give up on it. Mr. Keshe explained that a KS who was working on it before created a mess and it will take some time to clean up. That's why they don't hire KS anymore unless they are professionals in what needs to be done).

Q: Is there an angle in which the Moon can be located, in which it can appear transparent to us, due to the radiation or field, and or can we only see the plasma body?

K- (We see it partially that way, sometimes. Or it gives the illusion of being seen that way. It's like when you can see the Moon during the daytime. It's kind of translucent through interaction of the different strength fields in the upper atmosphere. Yes, it can be done and there are points that you do not see it).

(We will release some Glasses that you will be able to see through the structure of the P of the entity. You will see the energy fields of its Soul). (The 'Vision Unit' will be completed soon and come out through our partners in China. It will be part of the new eye development, or change of vision, for replacing cataract operations, and that kind of thing. It'll come through our medical application with our partners who are a well-known registered medical company in the world. You will be able to see the vision field strength of a planet or object. It's not the aura, but the interaction of its fields. We'll extend the vision beyond the lens of the eyes and that will allow the eye to restore its energy, and the neural system to repair itself). (We envisage you should be able to see the energies of entities. If I put an apple in front of you, you will see the energy structure of the apple. (In the emotion level you will see it, and through your vision transfer it (to ??) yourself).

Q: When I look at the star Sirius it is a single star but several appear to us in different colors. Actually the whole rainbow, and more rarely red. Does this have to do with the angle of the radiation? Or is it more a kind of refraction of light?

K- (It's the inner system construction of the material. The material can be a planet, apple, or solar system. It's the composition of the interaction of the fields of the inner sanctums that create this (color). (In the physical condition if I separate it, I can create a ring, like the rings of Saturn). In the field strength, you get the interaction of the colors, as you call it. And then it gives you the identity of the composition of the central structure of the planet or solar system).

Q: For the Souls that end up in Hell, or as dust or stone, is there a chance that they can come out of that Hell state, into a sort of heaven state and I am assuming that heaven is where the Soul continues its creation.

K- (Yes, but it's a long journey with a lot of accidents and coincidences. When I say, even a stone has a Soul, it has a lot of meaning, if you understand it. Where did the Soul come from, that created that stone?)

Q: Last week you spoke of putting the seed of love within the STM to attract the love of the Creator, and to understand the process of Creation. Could you speak more about putting that seed of love within the STM?

K- (The first part of today's teaching was related to last week and a couple of weeks ago. We said that if you eat an apple, the energies from the apple only make up 20% of the actual energy you absorb, the other 80% comes from the environment. In the same way if you create love within the heart, which is within the physical structure of the man, that would make up that 20%. Then where would the other 80% come from? Man would attract that as the love of his Creator. (But man is still denying that he is receiving the love of the Creator. Nevertheless, we receive it because we have created the strength of it in our D of physicality. Even though we are ignorant of it. As I always say, ignorance is bliss. We haven't matured to understand the love of the Creation. But still we can tap into it, because we trap it with the 20%, and then we can abuse it).

Q: (There was a long question from Dr. Gatua about the situation between Iran and Israel. It was reported that the Israelis used planes loaded with nuclear bombs on Iran but the Russians intercepted it and shot them down. And then he wanted to know how safe the world is from nuclear attacks in the future?

K- (There are a lot of claims, and counterclaims, and then there are a lot of facts. These attacks last week were actually not targeted at Iran, instead they were trying to draw the Russians into the conflict. This was pre-planned by the Americans to pull the Russians into the war. The reason is because Russia is providing the defense technology with anti-aircraft missiles and radar technology. The Americans want to dismantle this radar technology and leave Iran, Iraq, and Syria without any defenses).

(The Iranians are paying the Russian to defend their nuclear centers for years. Others are using American systems for defense. And then some of the attacks on Iran were actually done by Israeli agents inside Iran with small remote drones. When the Russians took down the Israeli planes they were simply doing the job they were paid for. The Americans plan to draw the Russians in, did not work. They will repair the damaged radar within 6 weeks. The Israeli jets were reloaded in mid-air by American fuel tankers).

(At the moment it's a stalemate, because Iran is not responding. The Americans are using the same tactics they did in Yugoslavia, Iraq, and Syria to try to destroy the defensive radar systems to then attack an undefended region. This attack showed a very big weakness in the Iran National Security Space Zone, and it'll be remedied very soon. Using new technologies is on the cards. Then we would see a new defense system (that doesn't ?? use electronics). This is because the Americans have been using part of the KF T to develop systems (that can take out electronics, like what we talked about years ago when we said the aircraft carriers will become like floating bathtubs). A few days ago, for the first time the Americans tested a new system in Nevada through Lockheed Martin. Their systems can paralyze all electronics, computers, and everything else in the building. There will be no collateral damage or (human deaths). But what they have is very limited,

because it requires huge amount of (electricity). Very soon we'll show the counterpart T we have that will bring peace, and not another defense).

(I explained to our partners in Defense, that it does not matter what they make whether it's F-16, F-35, or F-1000, or laser fusion beams, or whatever they make. These are all in the matter state and they require huge amounts of electrical power. Whereas with the new Plasma Technology we can build whatever we like at whatever speed we like and do it with the flick of a switch. Plasma is much stronger than matter state, and (their planes and whatever else will drop like flies (from the skies). We developed this for Defense technology in deep Space. As we said, even a stone has a Soul. In Deep Space, when we come across asteroids, which are high speed stones or whatever, coming towards us, we elevate the Soul of the stone, or asteroid, in the expansion and dimension of the point of satisfaction. We don't hit it like the Americans tried a few months ago, with nuclear warheads trying to derail an asteroid coming towards Earth. Our T is very different).

(We don't have to worry about any man-made lasers, or whatever, because it is so low in field strength and structure that (plasma can easily handle it). However, one of our biggest worries is that, whoever we give this technology will try to use it to become a superior power over the others in the world. The Chinese, Americans, Iranians, or whomever. We are negotiating for all to receive it at the same time. The Iranians are a few steps ahead. The Chinese and Americans are testing. The Chinese Military has reached the point that they ?? can paralyze any ship on the East Coast of China. Even if the Americans can launch a thousand B-52's, with the flip of a switch they can neutralize the whole atmosphere and environment within the United States. These B-52 planes will drop like flies. When we give and discuss technologies with governments we are aware of the superiority it brings and also the arrogance).

(This is part of the problem we have, especially with the Americans and Iranians. When we collaborate with them, then they become arrogant and want to beat the others. We cannot get the Chinese and Americans on the same table, for them to understand that collaboration will bring prosperity. The American financial structure does not allow this. Nor does the Chinese military structure. Iran sits in-between the two. We are trying. Then the Iranians come with another arrogant point, and that is that they will use it in name of whatever (God), and make false claim to be the 'guardians of God's will,' and this creates a problem).

(This is my dilemma at the moment, as I am talking to all three forces for past few months. The problems is how to bring these three 'devils' on the table, so that they all become angels. We used to have the Persian Empire, then the British Empire, now the Americans are playing the game to become the empire of the world. This is one of our problems. We have the power to do, as we just heard recently in past few days. It's very possible that the IMF will move on the US to control its spending. Because they just keep printing paper that has nothing to back it. If any other nation does this, then as we've seen, the IMF comes down on the to cut this and that spending. But the Americans do whatever they like, because they control the IMF. Now the IMF speaking for the first time).

(If we can curtail their unlimited spending it would help. But Vatican pays for the Americans in the form of loans, with the hope that when they capture China, all the Chinese assets will become the Vatican's. If they can bring their 'democracy' to China then they'll get hold of all their gold reserves and assets. So they are creating war to get the money to pay for the war they created. The Americans have been doing this since World War I. We are trying to divert this).

We're trying to put an end into it. And the best person to bring an end to it is, what you call it, the last defeated American president, because he'll walk into this policy. You will understand in the future what I mean.

(So they tried to bring the Russians in but failed. Then they received a warning from the Chinese. If you touch Iran, China is in. If you touch Russia, China is in. And the 'almighty American' cannot stand this (when another country stands up for itself). It would take less than two months of a boycott of materials into America, and stopping exports from America, to freeze the American economy. The Chinese have set this up through different structures. You have to look at the bigger picture and understand what is happening).

(We were expecting the Russians to get hit in this process. It was planned by the Americans, and delivered by their proxy, Israel. The small drones could not have traveled all the way from Israel. They were launched inside Iran by Israeli agents. (It was a decoy, that showed the weaknesses in the structure of the Iranian National Security, which is getting remedied very fast).

(The Russians are paid to protect Iranian nuclear facilities. Just like how the Saudis paid 100 million to the Israelis to provide them with scud missiles, but they couldn't protect them against the Houthis of the South, so the Saudi's sent them back. Iranian scientists are good at making rockets and the rest, but very weak in defense technology. They never developed it, which was a big mistake in their Military structure. The Russians have proven to be more effective. They played it in Iraq, Syria and Iran, to target the Russian defense radar system, and not on Iran itself. It was just to pull the Russians in, but it didn't work. It was a massive failure by the Americans and Israelis for the next game. Now we have to see what the next game will be).

(Enough Cosmic Ray materials have been produced to start delivering, but they have to find the right packaging for it, so that it remains sealed for years and cannot be touched. It will increase in value over years. They have produced about 25 grams).

Q: (A KS asked about doing special breathing exercises (like pranayana) and whether it was useful to practice)

K- (You can practice whatever you like, it depends what works for you).

Q: Are the Glasses made with Dicyanin? It's a forbidden chemical?

K- Yeah. I don't know, no comment.

Q: Recently Elon Musk stated that the next generation of Tesla cars will be a lot cheaper. Are plasma reactors part of this development?

K- I don't know. (We put an offer of \$1 to Elon Musk for Tesla cars. It's very serious. We are moving to delivery cars without batteries. The T will be delivered. We'll try to show this in Iran. I'm planning to show a few breakthrough technologies in Iran and this will be part of it. It will put an end to electric cars).

(They are forcing the electric cars on people, but the biggest problem will come from the batteries. They don't have enough raw materials to keep supplying all the batteries, once everybody gets switched over. Another problem is that we've seen these cars burning on the streets of London, but the rest of the world is hiding this problem. The British policy is to just let the cars burn instead of trying to put the fire out. They don't know how much toxins and cancer causing chemicals they produce when they burn. But the British know it's a huge health hazard. The other problem is that the chemicals penetrate below the pavement. So now they have to remove the pavement, and this becomes a big problem for the insurance companies).

(Now we hear that the Tesla cars are going to be a lot cheaper. You have to understand who's behind all these things. Musk constantly tracks KF work step by step. Americans are heavily studying KF technologies. (But only in regards to the matter state). Musk released a small unit based on the KF MaGrav system, but it became a failure. However, when he starts working in a correct way with Keshe Foundation, then he will see (some progress in the development of some of these technologies he's working on). Very soon we'll offer one dollar for Tesla cars, just for the name of the most beautiful man on this planet as a scientist, to give him respect. You will see it). (In Iran we want to show the plasma car system. It's also part of the same technology we use in the flight system).

Q: Why is the media flooded with the problems in Palestine, when there are 18 millions of deaths in the Congo, which occurred less than 30 years ago and is more deaths than in the Holocaust. And why doesn't anybody doing anything to stop it?

K- (Mr. Keshe talked about the Congo before. Congo is larger than all of Western Europe put together and has huge mineral wealth that the world wants. The dictatorship of Congo is controlled by the King of Belgium. No policy is passed nor is anything done in Congo without the say of the King of Belgium. Congo is owned by the King of Belgium, and not the nation of Belgium. It's a big difference. And the amount of money that comes out of Congo into Belgium is incalculable. Most of the wealth of Belgium comes from the minerals of Congo. The ambassador of Congo to Belgium is decided by the Belgians. They choose the most corrupt people for the position).

(It's a complicated bunch of factors that cause this situation like different religions fighting each other, Nations wanting the minerals and arming the people to fight each other. Nobody knows how many millions of people are killed internally by different factions trying to rule the country. Different groups get the latest weapons from

Americans, Russians, Chinese, and everybody else to use to try to takeover the mining areas. It's not a (?? civil war), it's guerrilla warfare inside the nation to control its wealth).

(He tells again the story of how the Europeans didn't want to clean up the pollution they made mining for copper so they flooded the mine with water and it became a huge toxic lake. They left with their money and the people were left suffering. The Chinese came in and developed, and cleaned it up, and built hospitals and schools and tried to help the local people while at the same time making profit from what they cleaned up).

R: (Will the implementation of the transmutation process eliminate this mining operations?)

K- (The creation of the material from the MG Fields is part of the solution. But the negotiations going on have broader implications.

The Material Enhancement Unit (EU) can produce a ton of copper a day at about 10 dollars a ton. But then China controls other countries through the economy and things like mining. If you don't need to buy copper then you lose influence over a nation as well. The release of the T will also affect the economy of nations. Suddenly, gold and copper mines will have no value. (It will also bring a peaceful position (to countries like Congo)). But China is in a dilemma about releasing the T. There are more things that will have to be worked out. I tried to discuss this with the governments, and they understand the implications of it. The shipping industry will also be effected. We'll become part of the United Nation's structure very soon, because the delivery of this new technology will bring new problems for governments in controlling, financing, and a lot of other things).

(If we want to run a civilization that is fair with everyone with the new technology, then all these things have to be sorted out, and that job falls on my shoulders).

(We don't see Iran using the KF Energy Defense T against Israel, do we? We play fair, but if I give everything into Iran, then they'll want to beat Israel, then who's next? The state of fairness is not yet there. The most ridiculous thing we saw was that Americans were dropping food for the Palestinians, (and killing some in the process), but then when the rest of the world voted for an independent state of Palestine in the UN, the Americans were the only country to veto it. Because if they become a nation, then they will have to take sides in a war. The way it is now, is that they are one side (Israel) and they do what they like. First we have to sort out America, and then bring fairness to the rest. This is part of another structure of the Keshe Foundation work).

Q: How are we doing with the peace process?

K- (Very bad, we got bad world leaders, and until we don't tame them, we won't succeed. But we're working on it. It's not easy. All these wars and 'situations' are making a lot of money for a lot of people. There is no business more profitable than the 'killing business' from the Churches, who encourage (the killing on religious grounds), to the ones who

make the guns. It's just to elevate the Souls, and teach people to become independent with it).

(We'll reach that position in maybe 2 to 3 years, when the KF releases its App. This is the time when the peace will start. You'll understand very soon what I mean. If you want an apple, then you just touch the App on the KF communication system. No one will be able to control it because it will come through Plasmatic Cosmic Rays, and you'll receive the energy and emotion of an apple. It will fulfill the hunger. Then nobody can control you over food, and the same with everything else. It will take 2 or 3 years. It takes longer because of the greed of the man, and not because of a lack of knowledge or technology. Let's see how our partners will do in developing and sharing the T. When you see the new refrigerators and gas cookers with the KF (name on it) together with the collaborating company, then you'll know the time has come. It's not very far away).

(Thank you for being here, your existence allows the Foundation and our work to exist. We are part of all and we are part of some. And we are there collectively every day, to change something new).

**End of Quick Index - 535 KSW Apr 25, 2024**

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:12)

K- Yes, good morning, thank you very much. Good morning to you as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We are back here again, as usual, as we've done for 534 other sessions, to see what we know, what we get to know, and how much we know, and what we need to know more, to be able to become man of Space.

In the Intro, we heard about the creation of the central forces, which holds the body of the man together. And in a way, then it becomes a creator, where itself was created, out of interaction of the fields, we call it the Soul of the Man (STM). In the structure of the, what we call the Central Energy, now we know, some calculations done by some scientists, they sell us, that at the point of separation of the physicality and the STM, something like 18 to 20 Hiroshima bomb energy will be released. (:14) Which in that, what we call, portion of the separation between the energy of the central body of the man we call the Soul, and the physicality (P), this Soul, this time, is not get propelled by field forces of the propulsion or jet fuel, but it gets propelled into the Space according to the strength of a field which has created inside, which holds within.

But, there comes the position to clarify more, where does it end? Where does this pack of energy, which is not burning fuel anymore, but using the Universal Magnetic (M) fields through the, what we call the Carbon 14 and the, what you call, the other Magnetic field elements, ends up to, what shape it will take? Do all end up in the same place, or do some end up in a specific position, and with some reach the point that they pass the Unicose, and become part of the structure of the Soul of the Creator (STC) which self is created by.

In understanding the law of the physics, in respect to interaction of the fields of the Plasma, according to the strength field of the body of the man, at the point of the release of the central energy, which in a way gets expelled into the Space. (:16) And according to the field strength of the environment, be it the Solar System, be it the Earth, be it the Galaxy, the Universe (U) or the Unicose, that energy will take its own dimension (D) and position. Some will become that dust which rains on, back on Earth. Because, through Gravitational fields and dimension, they, in the fact, get absorbed, attracted and rain back on Earth. They become another dust. This is what we call, in the world of religion, the hell. The end, which become part of nothing. Some become what we call, 'the dust' in the Solar System. Then, as a point of reference, they become, or they become the seed of what, what we call possible, meteorites and asteroids and, maybe the center of the future planetary system and the Solar System. Some, due to the strength and the speed and strength of the fields, which created that Soul, become part of the Galaxy. They become the seed for another Soul of another structure, like Earth. Or they become dust of Galaxies.

All the meteorites and the lights we see, a material burning on the upper layers of the atmosphere of Earth, do not come from the Solar System itself. They are Cosmos "droids," which what we call, Cosmic Rays, Cosmic dust, which have penetrated through the Solar System, (:18) all the way and reach on their way to go to the Sun, passing the Earth, they release their energy.

In the coming time, the scientists, in understanding this, will bring that separation to us. They tell us which of these meteorites, which of these lights we see in the sky burning out, is in essence from the Solar System, and which one has entered the Solar System through, what we call, our Galaxy. And in some rare cases, if you are more on the outer boundary of a Galaxy, what you receive from the Universe, enters into the Galaxy, then it crosses the Galaxy into the Solar Systems, and then the Solar System can interact with a field of planetary system like Earth, and create that meteorite.

So, what we see above us, is not all what is of our Solar System. Some is from Galaxies and some from Universe. There are materials of this in the hand of man. In some of the materials we have collected, we have Cosmic objects, but we do not understand it. So, that Cosmic object could have been created by a STM who left his Planetary System, millions of years ago. And in having the matching strength, has been attracted and then pulled in through the Galaxy and then to the Earth, to the mother point. But, when you listen to the, what we call, cosmologists, they tell us that the Solar System has hundreds of billions of stars. (:20) Planet Earth and create some of those Stars, the seed of those

Stars. Maybe then the seed of some planetary system in them. Maybe some dust in these Galaxies and in the Solar Systems, has their origin as in the STM.

Then you understand how us as human being, as we said many time before, we are the seeds of the Creation. This is a greenhouse. And this greenhouse is needed to be able to replenish, recollect, divert, divide the fields of the Galaxy and the Universe and Unicose, back in itself, regeneration of the fields. In that process, now we understand in a deeper way, how, if we understand the creation of this process, we do not need to die, to release the field strength of the STM, for the STM to travel to another point, dimension, to create another life and physicality in that place, time and position.

Then, if we understand this, how to control which strength, and according to our intelligence, to what strength, to what to match to, we will be able to transmute anywhere in the Universe by the wish of the man, by the will of the man.

In the world of physicality, when you sit in a car, you have a steering wheel. (:22) You turn it left, you turn it right. It turns right or left, decides where you want to go. In the dimension of the STM, in transmutation, we have to learn how to play with the strength of fields of the Soul of the Physicality (STP) of the brain of the man. What we call last time as electron. You call it the Third Eye, and somebody else call it the Sixth Chakra, and all the names we have created, as we never understood, for interaction of the two halves of our brain, with each other.

Some of us can allow this to be outside. We can create a position to see further than its skull. Some of us, we cannot bring this Third Eye out to control the strength of it. And, when we put you on these Headphones, you will go nowhere. Because, the strength of the physical structure of the brain of the man, the two halves, holds this dimension within the center. If man learns how to control this through the emotion of the man, and then how to produce it through the skull of the man, or even the brain structure of the man, then we become visionaries. Because now this material, fields strength, not being in a matter state, but being in a plasma state, interacts with the other fields. It's literally like when you fall asleep and you dream.

How to control the position and the strength of this, what we call, (:24) atom structure of the STM and the field strength of the STP of the brain, then you can travel, you can do everything you need, you can feed the physicality of the man through the same process. Understanding this, when it comes to the point of transmutation, you want to go to the Moon, you strengthen the fields of what you call, the electron of this atom to the gravitational field forces of the, what we call, the Moon. Then, at the same time as you add it up and automatically is done, adjusted to a given specific field strength of the emotion, on a specific point on the Moon, you will land on that space and the spot. That's your steering wheel. That's the way through the interaction of the emotion, designed to travel which creates another dimension of emotion, you dictate your own transmutation.

And when this cannot be reached, this is what I always say, we have you Knowledge Seekers (KS) using the Headphones, and some of us, as I said in another teaching, we

give the whole system to a Knowledge Seeker, give him the whole night and the next day and he can't go anywhere. It's because the emotion field strength of that atom, which the controlling part of it is, is the electron, (:26) which is the interaction between two part of the STP of the brain of the man, cannot expand beyond. So, there is no interaction with its environment, to decide where to go, to decide what you want. And some of you are Knowledge Seekers, because you are so emotional, you understand the emotion of the physicality, not the emotion that we see, we talk to the lady, and the minute you say something, she's emotional. Get the handkerchief out, not that emotion. We're talking about emotion of the control of the fields of the body of the man, in the dimension of the Soul.

Then, you understand how to control. If you understood this, you can reverse this in the same process, that as the STM interacts with this electron, to bring it within the inner physical structure of the physicality of the brain of the man. You dictate what energies you absorb from the environment, from the Universe, that being close, on top of the neural system, on top of the spinal cord, feeds through the neural system energy control, that it feeds the body of the man. If you look at the structure of the neural system of the body of the man, and the blood flow structure of the body of the man, which brings that Oxygen to the structure of the body of the man, the dimension of physicality, you will see they match.

Now you understand, that the structure of your neural system, which is the dimension of the interaction of the fields of the STM, through the interaction of dimension of the physicality of the man, which comes through the blood of the man, creates the dimension of the physicality of the man. (:28) Where the interaction of the Soul, and the interaction of the STP of the man, with their environment, and the dimension of the fields of the Soul, creates, leads to the creation of physicality of the man. So, your neural system and your blood circulation system, are part of the interaction, the reason you exist in this dimension. If you cut one, the other one can still convey the message through, to convert, to build.

And if you understand this, now it makes clear, that how I can re-grow the amputated leg. The system, the structure behind reproduction of the whole structure of the leg of the man, does not come by magic, it comes through the STM, through the neural system, what you call the neural pulses. Part of the information going through the neural system of the man, is to do with the physical information, and the other part is the Soul information, energy of the Universe, combination of the extraction of the fields, which leads to the feed of the man. At that point, your neural system become the provider of the energy, for production of the cells, the bone, the nerves, and the tissues, and the rest.

If neural system can feed the body to reproduce, to replace what's amputated, now you understand the same neural system, the same connection to the STM, the same connection to the atomic structure of the Soul, and the STP of the brain of the man, (:30) can feed the physicality of the man, that the man does not need to kill. We put the food in the mouth of the man, to create the weaker structure, to pull the fields, but we bring that energy through the Soul, through the neural system, that the interaction of what the

physicality pulls, with the energy of the STM, leads to creation of the physicality of the man, in interaction with his environment.

If you understand this, then you understand you only need to keep that structure within the Soul, within the brain of the man, that you don't even need the brain of the man. So man can create controlling position, controlling system, anywhere in the Universe, by understanding the structure of the release and interaction of the fields of the center point we call the neutron and the what we call the electron, STP of the physical structure of the man. If man understand this then you understand how we even bring people out of coma and how we let the paralysis to heal. How we build, we reconstruct the structure of the neural system of the man. Now you understand, that you need to understand the basic of the structure. And if you follow it, it comes back to the same, you can circle to the same structure.

But, you got to understand, (:32) billions of Souls are floating within the structure of this Universe, and they give and they receive, and man can in a way become the receiver of those who are at strength field of the comprehension, understanding maturity of the Soul. In the future man will understand. When this maturity reaches a point that the STM can connect to as many as the fields of the Universe, is when the man who will be able, as was born from the womb of the mother to this Earth, and from separation of this Earth into what we call the Cosmos, become at that point the Passenger of the Unicose. And if that elevation of the understanding of the work of the Universe is gifted to the Soul, then it becomes part of the STC. This maturity can be in the structure of the infant, it can be achieved in the, within the womb of the mother, or not even at the age of 100 in the physical dimension. Has no position and time, but has a strength field of the Creation, and you've touched that, if you achieve, if you become mature enough ?? in the fields strength of understanding of the Creation, you do not need no languages and you do not need to serve, to give, to get, to receive, to elevate, but you are elevated in understanding the World of Creation, in the womb of the mother, does not need a physical birth. (:34) Then you understand how the 'Children of Mitra' will, and most probably never need, to touch the dimension of the physical birth. And then we understand.

In a coming time, as this process understood more, how those who love to be, to create the 'Children of the Universe,' will become part of that process. Now, if one day, as I always say, the man's scientists understand the teaching of past half an hour, they have opened the secret to the World of Creation. Be it in the physical dimension, be it in the dimension of the, what we call, physicality of the Universe, in the Unicose, or even the Creator himself. We have to understand, in the long run, we have no choice, but to mature to this knowledge. But to open our understanding to this knowledge. And we have no choice, in a way, we are intellected, we reach a point of understanding, and that becomes what we call, the 'second nature' of the man.

In tomorrow's session, we push some of you to reach that point. Or at least feel that point. Or try to understand the position of that point, where you will be able to control part of the emotional feeling, (:36) of the, what we call that third point, that electron. What you call the Third Eye, what you call the Chakra, or number what and what. We push you

through your own structure, we create the environment for it, and then it's for you to take that step. To cross that line, to not only cross it, but understand the emotion you need to create, the emotion you need to feel, the emotion you have to be able to control and manage, to reach to what you want. Do you want to bring that electron as close as possible to the STM, that it feeds the physicality, or you want to put it so out, that it feels the fields of the Creator?

Now, it all become your responsibility. We are (like) a driving school and we have brought you the car. It's you who has to learn which and to how much you can push the accelerator, where you have to apply the brake, how to stay your way in the mesh of the Universal energy fields, to get where you want. So, in a way we have a school of the learners, for the transmutation of the STM, dimension of the energy of the man. And, unfortunately it's you who passes, (:38) turns the wrong turn, or you fails and you takes the wrong turn, and you goes back to and you say, "I felt nothing." Because you haven't managed to control the fields of emotion of it.

Go back, 10 years ago, when we started this teaching, when we did the, what we call, the health and that section with Dr. Elyia Kostova. There wasn't a single session of the teachings, that it was not referred to the emotion. Now you understand, after 10 years, how important that emotion is. It's not only for your dimension of physicality, but is the key for man to become the Transmuters of the Universe. Now you understand, why for past 10 or 15 years, we've been explaining again and again, emotion, even between the 3 layers of the skin of the man, the structure of the physicality of the kidney of the man and the rest of it.

Emotion comes from the interaction between dimension of the STP and the STM, it's the control system between the two. If you manage to pass the energy of the STM beyond the strength of the STP of the man, man will does not, will not need dimension of physicality. As long as these two stay separate. They create a field that, that field interacts with the environment of the man and leads to the creation of physicality of the man. (:40) Now, if you understand this, you use the STM and the essence of the dimension of the field of Universe, you use that emotion between the two halves of the brain of the man as what we call the essence of the STP and you become the Passenger of the Universe in one instance. And then you decide where to position it, in respect to the emotion that leads to manifestation of the physicality at the time, place and the point in the Universe.

The emotion is the outcome of the interaction between the STP and the 'Soul of the Mass.' Another word, if you are so materialistic for emotion, is the Mass. And when this Mass interacts with the dimension of the fields of the Planetary System, gains weight, becomes weight. The other word for the Weight is the physicality of the man. Where the interaction of the emotion of the STP and the STM, which creates that Mass, that emotion, in interaction with the field of the Earth, leads to the physicality of the man. In the dimension of physicality, we call it the mass of object. In the dimension of the, what we call, the field of the man, we call it the emotion. And the interaction of these with the environment, creates us that weight. You weigh 60 kilogram on Earth and 6 kilogram on the Sun. Or 10 kilogram on the Moon. (:42) So on Earth, you look like this. On Moon,

the way the weight changed, your physicality will change to create that physical emotion, interaction between the STM, the STP of the man, and the emotion they create in respect to the environment they are, then you understand the physicality of the man, how we look on the Moon, and how we look on the Sun. Now you understand more, what it means. And as I always say, man has chosen too many words for the same process, because he never understood. He never understands, until he doesn't understand this, man will suffer in this dimension of physicality.

You got to understand how to use the point of physicality. One interesting point for you will come. We have a split brain on this planet, we create that third position. How do you create that emotion, that in interaction with the STM, will lead to the creation of the physicality, when you have one system? The whole physical dimension of the emotion is one, and not in two halves. That's your dilemma, at this point. But, if you think slightly deeper, you look at the structure of the planetary Earth, you'll find your answer. (:44)

How do Planetary System create their Soul, the STP, which ends up in the dimension of the Solar System, to the shape, the color, the moon, the mountains and the rest which they contain? There is no difference between the emotion of the man and the Mass of the system and the structure of the physicality which they create in interaction with the fields of their environment. One makes the body of the man, one makes the planetary system structure and one makes the Earth.

The sooner the man become knowledgeable to this point, the sooner man will become the Passenger of the Universe. 'I made man in the image of Myself.' So, how is the image of the Creator created, when itself follows the same principle? Then, you understand how the Creator is within you, where His fields interact with the field strength of the environment of the physicality of the man. Then you understand, 'I made man in the image of Myself,' in interaction with the STP and the STM. The way you created your physical dimension, in the interaction of the emotion with the, what we call, the field of this planet. The same way, the structure of the physicality of the STC, within the physicality of the man, creates the essence of the birth of the STC within the man. The body of the man is the temple of Creator. And one day, man will understand. (:46) And that day, is the 'Promised Day.' When the man himself matures to understand the Totality of the Creation.

There is no difference in any working of the systems of the Universe. It's only man's lack of understanding, which has divided, brought division, separation and in so many ways, misunderstanding by himself for himself. If the STM, the STP of the man, within the dimension and direction of interaction, leads to the creation of the kidneys, and the liver and the rest. And then, in the interaction with the environment, leads to the physical structure of the physicality of the man. Then there is no doubt, that the same fields in the environment of the body of the man, with the interaction of the fields of the Creator, will embed within it, the STC, which manifests itself in the dimension of physicality of the man. But, still is that separation. And when we take the dimension of physicality of the man away at the point of death, or the transmutation, where does that STC interact with,

that leads to the creation of the new life, with the interaction of the fields of that ?? (atom) ?

I hope you understand the meaning of the teachings. And I hope you've been enlightened to understand man does not need to eat, man does not need to create mayhem, (:48) man does not need any structure, as every structure is different and it depends how you want to manifest yourself. And then you understand the true meaning of, 'I made man in the image of Myself,' as the interaction of 'Me' within the structure of the emotion of the man leads to the creation of 'Me.' Then, man will become mature to become part of the Universal Community, which this Universe itself is created by the essence of the emotion of the Creator. Man only creates the dimension of the fields for it to manifest itself. And he gives his own dimension to it.

And this is the riddle that the books of the man always been looking for. And maybe today you have found the answer. And if not, you're still in the doldrums of the Weight and the Mass, and you are in a big mess. Now you understand. The Totality of knowledge, 'I made man in the image of Myself.' As I'm creator of that image, in the dimension of the emotion of the man, which is created in the dimension of the physicality and the Soul strength of the field of the man, which man controls through the strength of his own structure in the field of the emotion of his own brain.

For you as Knowledge Seekers, finding that point, and how to use it to feed the physicality, and at the same time, (:50) move it out to become part of the Universal Community for you to transmute, will become the next step of the evolution of science and technology, of the understanding of the World of Creation. And the burden of teaching is on you, for yourself, not others to teach you. And if you haven't understood the essence of the teaching of today, carry on with your own physical dimension of life. As we gave you the key to Universal existence. As you understand where I go, He is within me, as I am within Him. And the existence of me, allows manifestation of the love of Him. I hope, as Knowledge Seekers, you understand the light of the knowledge and enlightened. Otherwise, you'll still be reading the books, which is full of fallacy, and trying to keep you away from understanding the truth about yourself. We go for a break and we come back. And we answer any questions.

>> **BREAK** >> 535 KSW April 25, 2024 (:58).

K- Yes. Nope. There are a couple of announcements, usually we do in the second half. One is that tomorrow's session will be held at 9 o'clock. And, don't forget to have (written down) your experiences since last time. during the session or after the session or during the time between then and now, to put up on the chat, if you feel like it. If you felt anything or you understood or you felt changes. And tomorrow's experiment is a further development of this. Again, it's 9 to 5, with this session. You can join anytime and leave anytime, it's not like last time, we kept you in for the whole session. And we take step by step, we got two more sessions left of this cycle, to complete, or what we call, the next step. From the July onward sessions, is the preparation for the ultimate goal, which will be shown in Washington, the transmutation. Where we show the physical dimension of transportation in Iran, in Isfahan. Many of you asking, you want to register for Isfahan. Once we have the agreements and approval and what we call, license from the Iranian authorities, in holding the session in Isfahan and completed, we'll make the announcement. And please tell them, because many of you are making a lot of comments, you want to come, you want to join. (1:00) We understand that, but Iran is the same as China. We can, it's not like in Europe that you can hold conferences, wherever, whatever, whenever you want to do. We need to receive the permission from first Iranian military. As we will displaying a flight system, which will interact with Iran, with what we call, military defense system.

We have to create a condition where by showing the flight system in Isfahan, which is the center of Iran nuclear, what we call, Space Defense Center, we do not make Iran vulnerable during the conference. Or, we provide the supporting facilities to cover for the military while the conference goes on in Space Defense over the city of Isfahan. It's much more complicated than you understand. It's not a normal conference. We are setting out to show the first flight system through Gravitational system. And, we have to make sure that security of national integrity of the Space of Iran is kept. Not just because we want to show something.

So, Iranian military, more or less, it's aware of this presentation. Our documents, I think, has been handed over for approval, it'll take some time. Then, we have to get approval, I'm sure, of the Office of the Iranian Leadership. Then, it's allowing so many people to attend the conference. We have a target, and we know many scientists from around the world will be in this conference. In China, those of you who were present, (1:02) met and sat next to some of the leading scientists of China and military officers. These things does not happen, and it happens only when Keshe Foundation displays, shows technology, because the trust has been built and understood, and many laws is changed for the military people to be amongst the normal scientists.

At the same time, many of the scientists you'll meet in Iran, they will not introduce themselves as who they are. They will be given, what we call, protective identity, being on the military rank, or the scientist, that we protect the National interests of Iran. So, you

have to understand, we don't play the game of Ahmadinejad to give the name of our scientist to you, and the others who are there, to fingerprint for their future. We protect our scientists and our military officers. We are there to show the change, but at the same time we are there to protect the nation. And to that effect, and you understand, the conference Iran is a turning point for science and technology, but at the same time, as Isfahan is the center of Iran nuclear, and defense center, and some of the most, what we call, research centers are around the city, we have to protect and achieve, and reach agreement with the Iranian Ministry of Defense. And all this done, is getting done by our people in Iran, to arrange such a facility.

The price will not change, we might actually increase the price, because of the other factors which comes into it. But at the moment for that conference sets at 12,500 for Knowledge Seekers. Government officials, scientists from outside Iran, will be charged a minimum 25 to 50,000 to have a seat in that conference. (1:04) You have to understand, all these expenses, goes as part of the security and the rest, which brings into play. Iranian nationals, who will attend this conference, will abide by the same rules, and we follow how, and we can get clearance for them to attend. We need, we announce all of those who will attend the conference in Iran, to supply full details of their background, nationality and the rest, that Iran National Security can check in detail, before allowing for us to accept you to be part of the conference. It's not, it's much harder than what we call the conference in Sanya. Security is tighter and every avenue will be reached to make secure, but show the technology.

Then we follow with the transmutation in Washington. Hopefully, in the early next year, once the new, what we call, government is settled in Washington, and if we don't achieve agreement with the Washington authorities, we'll show the technology in Moscow. We have no hesitation, it's time to show transmutation. And if we do not achieve agreement with the American authorities, for the display of the transmutation, we'll move the conference into Moscow. Which we have a solid ground background support.

The other point to mention, since we announced the closure of the Keshe Foundation structure and selling of all our materials, many of you Knowledge Seekers have asked to become like the shops, not distributors on the line, but you're offering your premises, (1:06) part of your premises, to become the distribution and the sale point of the Keshe Foundation goods. Which means we move our shops to your shop. With this, as I announced before, in the coming months and years, some 30,000 products of the Keshe Foundation, through collaboration with the commercials, will be coming into display, and coming forth. Those of you who take these kind of agreements with us, you'll become, and you can apply to become the distributors of these 30, 50,000 new items, which will appear as part of the products of the Keshe Foundation in coming time. Household goods, ?? white ware goods, agricultural goods, all in a way your distribution, agreement sale with Keshe Foundation, will allow you to become distributor for these new products. It could be anything which now we are in the process of negotiation, development and will come out as a retail product. So automatically, you'll become part of the much, much bigger structure, with some of the major, what we call, companies in the world, in the background, and in a way you become another branch of their branch. But, all is Keshe

Foundation Technology embedded within it, it's not something that you sell from their product. It's something which uses the Plasma Technology and the technology of the Keshe Foundation.

And then in the future, very near future, all the tickets is, what we call, transmutation, health programs, everything else, is part of the package which you take. We have a number of, Knowledge Seekers, especially those who attended Sanya conference and others are asking for opening shops of the Keshe Foundation in their structure of the shops and restaurants and the others. (1:08) We welcome it, we're supporting it, but you've got to understand, this is the beginning of, for you to do, but if you wish, you can become part of the biggest structure of the products, which now, with the partnership with our, what we call, 'associates,' will come into the market. All we need, we just ask them to add you into the, into their list of retailers.

Are there any questions?

R: Oh yes, we've got some questions lined up here. We've got several...

K- We're not answering.

R: Okay. Then we'll just have a session of only questions and no answers. Silence.

Maybe that's the way to do it. It works with the system.

K- Teaching through the Soul.

R: Yes.

K- Okay. Let's see.

Q: ... What happens when my brain has been activated? What happens to the Soul? Where is it taken?

K- I wonder when did you consider your brain was activated. And when, what you call as activated brain. Your brain from the time of inception is activated. So, which part you like to know? When you say, "When my brain is activated", your brain's always been active. That's how it was created and how it maintains itself. (1:10) You're aware of this process and some of you know this process of interaction. Some of you have felt it. Some of you have used it, some of you have received some answers to your problems. Some of you come to a position of the conclusion of understanding, due to this fact of the interaction.

Many of you, during your lifetime, reach or find an answer to something, and you call it in your dreams. You call it enlightenment when you're asleep, or it happens during the daytime. This happens primarily through where the two halves of your brain switch over operation and in that 'flash of hand over,' if the part of the structure of the memory or work which you were analyzing on the left side, matches to the right side which is taking over the operation of the body control, interaction of those two fields, creates the emotion, the knowledge.

You don't switch operation of the brain, only during the sleep time, it happens during the day, in your awake-ness as well. Because, even during the awake-ness, part of the brain

takes off, the other part takes on. (1:12) And one is less control of the other, everything else on the other, and when one side wakes up, he wakes the other side, we have to all respond. So, we know this, and it's for us to understand when to control it.

And then you have this combination of the fields, between transformation and switching, between the organs as well. Between the kidneys, between the ovaries, between the different chambers of the heart, between different chambers of the lung, left and right, and the rest of it. And this switch of emotion, if you understand, due to the operation of the switching of the left to the right side, is where the emotion in crossing the point of physicality transfers the emotion into physical condition, which is the main cause of the cancer, psychosomatic. Because, one physicality is handing over to another physicality, where the emotion is transferring at the same time with it. So, the energy, the field strength of the emotion, touches the field strength of the STP and physicality of the man, and this is the main point, this switching point of the brain, in operation, is where most of the psychosomatic diseases manifest themselves. Where the emotion is switching over, touches the line of the physicality of the body of the man, and embeds in it. (1:14)

We know this, 100% correct, because we've seen it in the operation of Fibromyalgia. The point of abuse, sexual, physical, happens at the time when the two half of the brain are switching. The emotion is there, physicality is switching at the same time as the emotion, and it embeds into it, and it becomes the pain in the body of the man. We understand the source, the way, the, what we call, psychosomatic comes. It's the first time I explain this, and it's unknown to the world of medicine. The reason you get people who get abused physically and they show no Fibromyalgia, because they enjoy it. Those who don't want to be part of it, emotion is acceptable for a man to touch them physically at a young age, emotion what they've been brought up, does not accept. And it comes the time of the switch, of the 4 hour switch, 5 hour switch, at the same time, this embeds into the physical body. And then it shows itself as a pain, later stage. When you mature and you know what was done is wrong, and you cannot accept the dimension of physicality, it hits you, become Fibromyalgia, become CVS (?? Chronic Fatigue Syndrome – CFS) and MS and the rest of it.

If our scientists understand this, we can remedy all diseases of the man which is psychosomatic. Position of the shift of the emotion, rest time we call it, (1:16) between the physical side, two sides of the brain of the man. Then we enter a new dimension of science. This is why the technology of the Keshe Foundation is so effective, with the Headphones, with the Units which I used to build in the past. Because we make one from the brain of the man, there is no switch time. So, that allows the physical side to emotional side to balance each other out. It's not just we give you a headphone. I understand every intricacy about the creation of the man in the dimension of the emotion, physicality and the Soul. I'm a master in what I do, because I understand every part of it. And this is why we can deliver a system which can restructure a brain.

We put you on the machine. We give you systems to overcome your depression, your FMS, or Fibromyalgia. But it's you who blocks it. Because ?? (kissing me) is part of it. Look at the people who are psychologically abused. Look at the people who are

physically abused. Look at the people who are sexually abused. The one who gets fat, big bodies, are the ones who could not accept. Psychosomatically, if I'm bigger, the guy can't touch me. (1:18) So I become fat, I become ugly, I become, I can do. You know the 'cock fights,' they blow themselves up? (make themselves look physically bigger) That's a cock fight between STP, emotion of the man and physicality of the man. And you get.

You look at, you go into a restaurant, you go walk on the street, find a father and a son, and you see the son is massive compared to the father. That's an abusive father. And because he is abusive, the son grows to show, I'm somebody. Doesn't matter you're older. Walk with women who are sexually abused. Those who enjoy it become prostitutes, slim and thin, because to them it wasn't an abuse. It's another way of pleasure. You put another sister in the family which does not accept abuse, psychosomatic depression, big body, fat, abused by the same men, but two states of physicality, emotion. The one who enjoys it, become part of it, (stays) as a 'slim pencil.' Because it's what I enjoy, I control man through their emotion. The one who (was) abused and cannot accept, you see it, massive (body). I've seen many sisters like this.

And you see them next to each other, and when I speak to them, they say, "How do you know?" (1:20) The one who enjoys it, the one who became part of it, finding she can control men, or whatever with it, that's the pleasure they get, they stay very slim. The other sister is massive. You can put four or five of the other sister in it (her body).

This is where the Soul and the emotion cannot match. And if the world of science understand the balancing of the psychosomatic comes within the structure of the brain of the man during the two rest times, 90% of the illnesses on this planet will disappear. Even aging. That's a battle between what I cannot do and what I can do, what I'm restricted to do. Men stay healthy, active, till age of 65. At age of 65, the law says, pencil mark. This body cannot do. Man goes home within years, dies. Because he cannot accept that such an intelligence, such a physical body now has become part of the 'scrap' here waiting to die. So he dies faster. This law of pension and making men through redundancy age of 65 is 90% of the cause of the suffering of the man at this age.

Once the government understand, using the new technology, (1:22) don't have to worry about the hunger, looking after physical dead bodies, more or less running around, and allowing a man to live as long as he likes, active, will decrease most of the illnesses of the what we see, what we call, 'old age policy' of the West. Psychosomatically, we sentence a man to death by aging at 65. Those men who stay active because they don't need pension, they don't need to look forward to stay home to get something to eat, they are active into their 80's and 90's. Physically active, mentally active and being part of the structure. Look at all the politicians, 70's, 80's, they are still there, they are still participating in running of a structure. Businessmen who are self-employed and they don't need to rely on the government to give them a pension, that they have to pension themselves at 65, work into their 80's and 90's. Because this psychosomatic condition is not forced on them. Pension at age of 60 creates its own psychosomatic death sentence for a man.

If government understand this. And if we extend the freedom of the age, to the point of the man ability to physically do, man will live better life, man will live longer life, man will participate in the structure of the life in a deeper way, where they gathered more experience. And it will change the health policy from nations who are burdened with a pension. Pension should be an addition to what they can do, not a condition that they can live under. (1:24) Then, it'll change a lot of policies, it will change a lot of things. And, we see this now, with the development of the new technology systems, which we put on, and will increase in what we call development, like the Headset you see, we take that barrier out, we open the dimension of the Soul, the energy within the body of the man, that the psychosomatic 4 hour session, 5 hour session between left and right, will disappear. Brain finds a balance, body finds a balance, and the transition will not come to touch the physical dimension. And one hour a week is enough to create that condition.

And this is how, now you understand, Keshe Foundation systems are so effective. Those who come on it, and they don't want to let the abuse to go, they come and say, "Nothing happened to me." The ones which we give you the sessions ??, "Everybody else feels something, but nothing happens to me." Because, you have lowered the position of the field to the center. Secondly, you are too physical dimension, in a way you don't allow your emotion, and then you end up with a physical dimension of problems in the time to come.

It's very easy, once you understand the knowledge, how to use the knowledge for betterment of mankind. And this is why we are no good to pharmaceutical, because we understand the structure of the illness through psychosomatic.

Any other question?

Q: ... Good morning Mr. Keshe, I wanted to ask why many products that are purchased in the online store, (1:26) in their description it is said that the use of the product is personal. Why can't it be shared with other people? What is the technical reason?

K- It's exactly what I explained, part of the teachings you got today, and other parts. You... the pieces you buy, it becomes part of you. It's not an arm patch or a face patch you put on, you exchange energy between you and it. Now you give it to somebody else that, they exchange energy on top of you with it. Next time when you use it, you take part of the energy which they have. They have a cancer, they have something else, psychosomatic, they exchange energy. These are not medical system, these are Wellness system, these are structure of the energy transfer.

It's not a heat patch you put on to heat it up. We always recommended, Pain Pen, keep it to yourself. And if you understand the principle of the Plasma, your body is one half of the 'Yin and Yang' and the patch is another. So, this is the reason. It is not something you just put in and the pain goes. You exchange energy with it. It doesn't give you energy from the patch. You take from it, but what you don't need, it goes in there. (1:28) And if you understand this, you understand why we advise you not to.

Any other question?

You have to, those of you who use, work with us with UBESUS (Universal Body Enhancement Spaceship Units), you understand, we always tell you when you finish using it, put it on the system back to bring it to zero, to bring it balanced. Because it exchanges everything with the center automatically. And energy dissipates in, become part of the Universal energy in the system. It's the same with, when you join us on the Wellness Centers. Every time we switch off from the line, we go back to zero. We cannot transfer one condition to another.

Any other question?

Q: ... Is there any news on the delivery of the Power Unit, that is the Electric and Gas Unit?

K- Yes, we are in the process, we don't want to go into detail what we tell. Yes, it's all on the way. Most of the products, which is part of the patent, not only this, of the Keshe Foundation, will appear in the market in the next few months and couple of years. What we explained, if you go to the, as I said last week, when you go to the patent you see, free standing, free field standing, gas cooker, all that. (1:30) Now we... the commercialization of it will start in the next few months. Actually, maybe sooner than that. But our partners are a part of a larger structure, they have to do a lot of things before it comes out.

That's why in the opening of the second part I explained, those of you who become shops or become distribution point for the Keshe Foundation product. These products all become added as part of the product, you can, what you call it, deliver. Very soon you will see the gas cookers which come out, which you use in the house, as a self unit, one free standing unit. Which means, once you buy a cooker from this new development, you never need to look for a gas supply. It's 'free standing' for the life of the system of 10 years, 20 years.

Once you buy the new fridge freezers, which comes as a part of the Keshe Foundation technology, you don't need to connect it to any power supply. And the new generation of the fridge freezers you will see in the market, coming as part of the KF products, is totally different than the fridge, freezer systems you are used to today. Square boxes and rectangular boxes will become a thing of the past. And the technology will be introduced as a KF Plasma systems. And it will be right across all the products. You'll see the KF and then our, what we call, our partners will be, because that'll be the sign of Keshe Foundation Plasma Technology, which is used in these new systems. (1:32) And, we are on the way. We are far deep into it, and you'll know, our collaborators are also the largest organizations in the world.

Any other question?

Q: ... Is it possible to make the payment phase on the online store easier? Because it often happens that many people give up. Thank you.

K- I have to ask those IT guys who put it up. We have a problem on our shop. We know the problem. And now that we are becoming part of the biggest structure, most probably we implement their structure in ours. It comes out of trust of the Knowledge Seekers and we were thinking Knowledge Seekers will come to help us, know what they are doing, and then we hit the ground. The history why the online shop is in two, three parts in a mess, is we tried for ten, eight years to sort it out. And it has cost us maybe, hundreds of thousands, not tens of thousands up to now. It's taken us five years to sort this mess.

A few years ago, a Knowledge Seeker supposedly came to us and said, he rewrites the whole shop and the structure of the Keshe Foundation. And at that time the webmaster brought him in, and we always follow the advice of our webmasters, and this guy was absolutely useless. And he's created so much mess, we ended up with 15 servers in Holland. (1:34) Different part of the shop and the things in different servers, they wouldn't match. And it took our webmasters, what we call IT people, now 5 years, just to transfer and close half of this. He created such a mess, that we still haven't managed to sort out. And we have to change totally to another, we lose part of our, what you call it, information. And I think it'll be another 2 or 3 years. This is why we took everything out of the Knowledge Seekers. I don't... it's not trust, but I don't, we don't accept any more Knowledge Seekers in the operation of the many things of the Keshe Foundation. They don't carry the expertise, they're just good Knowledge Seekers, and they don't understand what they do, and we pay so much, and then it has created this mess. We are aware of this problem, and we're trying, we sorted out most of it. But it's different programs overlapping onto each other to clean up the mess this guy started it 10 years ago, what was his name? And he left, he found out he can't do it, it was just... I think he spent most of his time on being 'high,' and actually doing something. And when we changed the webmaster we realized the extents of damage has been done.

Our present IT team has been 4 years now, 5 years now. They are immigrating the servers from the mess was created to this and sales is part of it. We cannot solve it but soon should be solved. We are aware of it. I'm aware of it because we keep on writing, paying these bills for servers, programs to bring in and the rest of it. But the head of the Keshe Foundation, we were talking very recently about it, it has to be sorted. (1:36) She has decided to bring it to an end, all this mess. And soon, one way or another with the collaboration of our new partners. We merge our system into their system, or we take their system to add to us. It's a decision will be made by the IT and the head of the Keshe Foundation.

Q: ... Is there an angle in which the Moon can be located, in which it can appear transparent to us, due to the radiation or field, and or can, we can only see the Plasma body?

K- We see it in a way, partially that way sometimes. Or it gives the illusion of being seen that way. It's like when you can see the Moon during the daytime. I'm sure most of us have seen this in the sky, we look and say, "Oh, that's the moon in the middle of the lunch time." That kind of translucent through interaction of the different strength fields on the

upper atmosphere, gives us that invisibility, but visibility of the object. And yes, it can be done. And there are points that you do not see.

You can wear or... I have to tell you something. (1:38) If you remember, few 2 or 3 years ago we released the Glasses, that many of you bought and you gave us information, feedback, that led to the part of the UBESUS development. In the near future, we will release another set of Glasses, the same structure of Glasses, where you will see through the structure of the physicality of the entity. Or in a way you see the energy fields of, or what you call the Soul of.

This, the material for this we are producing. It's in the process, actually this morning, early this morning, I was putting the request for additional material for this, what you call, 'Vision Unit' to be completed in next, maybe, two months. This vision unit will come out of our partners in China, as part of the new eye development, or change of vision, for replacing cataracts, operation and that kind of thing. It'll come through our medical application with our partners who are a registered, a well-known medical company in the world. And this will be part of that process. And in using this new systems, you will see through, vision field strength of the Planet or object. It's not aura, but is interaction of the fields of. In a way we extend the vision beyond the lens, that allows in restoring energy back for the lens and the eye and the neural system to repair themselves. (1:40)

It's a very advanced technology, extremely advanced technology. And, in, as I said, part of the new product range will be this Unit. Will be an Eyeglass Unit, very much like a skiing glasses, but with the potential to remedy through certified systems, which come from a medical company structure, which Keshe Foundation will operate through. Which means, we provide the technology, we provide the 'know-how,' and the tests will be done in hospitals, licensed hospitals of the company, we are into partnership with the company. And we use their facilities of the hospitals across the nation, and the structures they have, and the laboratories, and the systems they have, to test these systems out, which changes the no need for operation.

These are medical systems, which is the Keshe Foundation Medical, it's part of the UBESUS section, which will come in conjunction with the medical companies, major medical company or corporations, which now become part of the Keshe Foundation, the structure of the delivery of technology. And then, as part of this we envisage you should be able to see the energies of the units, of entities. If I put an apple in front of you, you see the energy structure of the apple. In a vision, not in the... in the emotion level, you can see it and in the vision you can transfer it yourself. (1:42) I reckon this, within next two years, one, two years, will be in the market, through the collaboration of our collaborators, which are one of the major medical system producers in the world.

Any other question?

Q: ... When I look at Sirius, the star, it is the only star... actually several that appears to be to us in different colors. Actually the whole rainbow, and more rarely red. Does this have to do with the angle of the radiation? Or is it more a kind of refraction of light?

K- It's the inner system construction of the material. Be it the planet, be it the apple, be it the Solar System. It's the composition of the interaction of the fields of the inner sanctums that creates this. In a matter of physical condition, this, if I separate it, create the ring, like the ring of Saturn. In the field strength, you get the interaction of the colors, as you call it. And then it gives you the identity of the composition of the central structure of the planetary or a Solar System.

Any other question?

Q: ... (1:44) That Soul that ended up in hell, basically as dust or stone, is there a chance that it could come out of that hell state, into a sort of heaven state and I am assuming that heaven is where the Soul continues its creation.

K- Yes, but a long journey and a lot of accidents, coincidences. You got to understand, I refer to this a lot, because it has a lot of meaning if you understand it. It says, "Even the stone has a Soul." Where did that Soul come from, that created that stone?

Any other question?

Q: ... Last week you spoke of putting the seed of love within the STM, to attract the love of the Creator, to understand the process of Creation. Could you speak more about putting that seed of love within the STM?

K- If you understood the first part of teaching of today, was part of the teaching of last week, and part of the teachings of couple of weeks ago. You take an apple. (1:46) And the energies within that apple is that 20% which absorbs the energy, 80%, from the environment. You create that love within the heart of the man, within the physical structure of the man, to be that 20%. Where do you think the other 80% will come from? And part of that energy, which is energy level in the strength of the love within heart of the man, which is 20%, you can imagine how much love man receives from his Creator. And he's still ignorant. And yes, we do accept. We receive it because we create the strength of it in our dimension of physicality. We eat an apple to create that 20%. We create the emotion of love, which is that 20% to absorb the emotion of the essence of the emotion of Creator, the balance of the 80%. And we are still denying it and ignorant of it. As I always say, "Ignorance is a bliss." And this is a bliss. Because then, we don't mature to understand the love of the Creation. But we just tap into it, because we trapped that twenty, then we can abuse it.

Any other question?

Q: ... I'm sending my questions in two parts due to size. Part one, good morning Mr. Keshe, thank you for all your enlightening teachings over the last 10 plus years, (1:48) and for your freely giving your Plasma Science and technology to the world in exchange for global peace. Now a few questions. Background, reports by a highly respected geopolitical journalist claim that the Israeli's IDF recently sent an F-35 plane loaded with

a nuclear bomb for an EMP attack on Iran, but the plane was shot down by the Russian Air Force as it left Jordanian airspace. Other subsequent reports claim that the Russian Air Force actually shot down four Israeli planes that were headed for Iran's EMP nuke attack. The said Israeli intended attack was in response to the Iranian retaliatory attack on the 13th of April against Israelis, earlier illegal attack on Iranian consulate building in Damascus that killed the seven IRGC officers on the 1st of April. Okay. And, part two. Other reports from India indicate that Iran recently unveiled a scalar Plasma based weapon that can shoot down stealth jets, including F-35s. All the above reports have caused some confusion, as some political analysts agree, while others disagree with the claims of the Israeli IDF having sent the nuclear bombs against Iran. And the loaded F-35s downing by the Russian Air Force. (1:50) My questions, what really happened? And if the F-35 jet or jets were shot down as claimed, how safe are the nuclear bombs that went down with them? And how safe is the world from nuclear attacks in the future?

K- There is a lot of claims, and there are a lot of counterclaims, and there are a lot of facts. You have to understand, if you listen to wider news last week about these attacks. These attacks on Iran, we saw in Isfahan, we saw in Iraq, and we saw in Syria, were not targeted on Iran. These were targeted to bring the Russians into a bigger game. Israel was just pre-planned by the Americans to pull the Russians into the war. The reason, the defense technology and defense mechanism for all the three sides hit were provided by Russian anti-aircraft missiles and radar technology. They wanted to dismantle this radar technology that on the secondary attacks which Iran will retaliate, will hit Iran, Iraq, and Syria without any defenses. (1:52) The target of these simultaneous attack on three sides was the Russian radar system and defense, which has been made responsible for these areas. And Russians have responded accordingly.

It's not that the Russian hit the Israeli aircrafts, but the systems to defend Isfahan nuclear centers, to defend the Iraq section and the Syria, was part of the defense technology was paid for years ago. So intercepting these aircrafts was part of the design of the system, this defense system of Iran. It's a certain system for these locations, which is like Israelis buy scud missiles from America and the Saudis. Iranians and in these locations, these were bought from the Russians. So it's ultimately Russian technology, which is paid for, for defense and these are ?? used. There are a lot of claims in what we saw. We have different understanding.

Some of these attacks were done with the small remote drones, which the Israeli agents launched from nearby Isfahan. They did not come over land. The size of these drones does not allow long flight from Israel to Iran. So these are the Israeli agents which they work within Iran. And they flew and they created this diversion. At the same time, they're agents delivering these things. (1:54) But in essence, what was, and then Iranian claimed they brought down a few drones, was in a way, internally, they have infiltrated Iran territory by their agents. And that's why they could not be detected, over wide range of the crossing. And those who flew to, for these as decoy, were intercepted, delivered, as we're supposed to do.

So the game of you would say, Russians' missiles brought down these planes, is part of the scud missiles of Russian defense technology, which is sold to Iran, and its job is to do what it did. But Israelis, with the cooperation with the Americans, chose the weapons and the places to hit, to bring the Russians into game and it didn't work. Because Russia and China and Iran have... were aware of such a thing possible. And we're sitting now with some damaged radar system which will be repaired in next 3 to 6 weeks by the... in all the locations. But the damage is... these small rockets, these small drones within Iran was supposed to engage the Iranian defense system, that the rest will come from far distance, reloaded by Americans and then Israeli, with fuel tankers, got intercepted and we see what we see.

We have come to a stalemate at the moment, since this attack. Iran is not responding. We, 'they have made their marks.' Israelis and Americans got to a stalemate, we have to see the next step. Where we saw destroying first alarm system and defense and radars, (1:56) has been part of the operation of the Americans. We saw it the first time in Yugoslavia, we saw it in Iraq, we saw it in Syria. They go to eliminate the, what we call, the alarm systems, the defense system. And then, once they get over this, the 'belly is up' (undefended), they can do whatever they like. This time, they have not, they cannot manage to do it. This was a joint venture by both American and Israelis, fueling overhead, the Americans were aware of it, they knew what's going to be carrying out, and intercepted (by Russians).

But, it showed a very big weakness in Iran National Security Space Zone, and it'll be remedied very soon. Using what we call, new technologies, is on the card. We will see new defense systems, electronic systems will come into operation. American, for the first time, a few days ago, showed what Keshe Foundation announced years ago, this part of our technology they use, but it's actually at its infancy, where we said the ships will be bathtubs and whatever. Americans tested a new system in Nevada, very recently, in past week, through Lockheed Martin. Where they can paralyze all the electronics, what you call it, computers and everything else in the building. There is no collateral damage, no man damage. But this is limited, because it needs huge amount of energy, where we will show the counterpart of this very soon. Where it brings peace, not another defense.

Where... there is something I explained to our partners in defense, very recently, past few weeks and days. (1:58) And that is, does not matter what they make. F16, F35, F1000, B12 with this and that in it. Delivering laser beam, laser fusion beams, whatever they call it. These are all matter state. And to be able to deliver even this, what we call, multiple point disabling the system, like computers or whatever, needs a huge electronic system, huge system, instead of B20, B, what you call it, B-bombers, they replace it with these things, B-52s.

With the new Plasma technology, you build whatever you like, at what speed you like. With a flick of a button, Plasma is much stronger than matter state, and they fly, they drop like flies. This is important to us, as a defense technology in Space, as you call it, as we mentioned just a few minutes ago, "even a stone has a Soul." In the Deep Space, when we have a, this what we call, asteroid, whatever, high speed stone, whatever, coming

towards us, we don't hit it like the American tried a few months ago, with a nuclear trying to, a nuclear warhead or a bomb, to derail the asteroids to coming towards the Earth. We elevate the Soul of the stone, in the expansion and dimension of the point of satisfaction. It's a different technology.

And any man-made, B-52, laser beam, whatever, (2:00) is so low in field strength and structure that it's not a worry. One of our biggest worry is, and it's a strong point for our work, is whoever we give this technology to will become superior power point anywhere in the world. Chinese, Americans, Iranians, or whatever. We are negotiating for all to receive it at the same time. Iranian are a few steps ahead. They are testing, Chinese are testing, Americans are testing. In my meeting with the Chinese military, I explained to them, with this test last week you're 'belly up.' They can deliver on any ship in the East Coast of China, paralyzing. But, understanding the new technology coming in, you launch a thousand B-52's with these machines on it. Flip of a finger, the whole atmosphere, environment, within United States can be neutralized. These planes will fly, will drop like flies. We give technologies, we discuss technologies with governments, but we are aware of superiority of one brings arrogance to them too.

And this is part of the problem we have, especially sitting in Iran, especially sitting in Washington. The collaboration with them brings them an arrogance that they can beat the other. We cannot get the Chinese and the Americans on the same table, that collaboration brings prosperity. American financial structure does not allow this. Chinese military structure doesn't allow this, and there is a conflict in that point. (2:02) Iran sits between the two. And we're trying to, but Iran becomes another arrogant point, in that point when they carry it, they use it in name of whatever, false claim to be the 'guardians of God's will,' and then that creates a problem.

At the moment, for me sitting in this position, talking to all three forces, has been a dilemma for past few months. How to bring these three 'devils' on the table, that they all become angels? America sees, we used to have an empire of Persia. Then we had the British empire. Now America is playing the game to become the world empire and all the nations. This is one of our problems. And we have the power to do, as we just heard recently in past few days, it's possible, very possible that IMF moves on United States to control their spending. Because they're just printing papers and nothing to back it. If any other nation in the world does this, we've seen if IMF comes, you cut this, you cut that. Americans do whatever they like. IMF is under their control. Now IMF speaks for the first time. We saw it very recently.

If we can curtail this part of unlimited spending, because we are America, we're going to be a superpower. Whatever we spend, Vatican pays for, when we capture China, the asset become ours, we pay. When the result comes. (Vatican gives money now, then China belongs to them later). It's very much like, as I said before, (2:04) you know, you're running a new development, new technology, and say, when it's marketed, we'll pay for it. We put all the money into research, it's ?? developed and marketed. Americans, they call it, 'when our democracy reaches China, we'll get hold of their gold reserves and all their assets. That will pay the debts to whatever we borrowed from.' We are creating the

war to get the money to pay for the war we created. This is the pattern of the Americans since World War I. And we're trying to divert this.

We're trying to put an end into it. And the best person to bring an end to this is, what you call it, the last defeated American president, because he'll walk into this policy. You will understand in the future what I mean.

So it's not who and what was hit, it was what was the target of. They didn't go and hit Iranian centers somewhere, or like we saw in Syria, whatever. The attacks of last week by the Israelis was directed directly to the Russians, to bring them into play, and they failed to do so. And, they received a warning from Chinese. Iran touched, China is in. Russia touched, China is in. And the 'almighty American' cannot stand this. It takes less than two months, boycott of material into America and receiving goods from America, that economy of United States freezes. And the Chinese have set that up through different structures. You have to look at the bigger picture and understand what happened. (2:06)

We were expecting that the Russians would get hit in this process. It was planned by the American, delivered by their proxy, Israel. And the hitting of what we saw, small, what we call, drones, which don't have the capability to travel all the way from Israel. They were launched just inside Iran by their agents. As a decoy, it was responded back. But it opened a lot of weaknesses in the structure of Iran National Security, which is getting remedied very fast.

But, Russians were paid to do this, as part of the scud missiles. When the Saudis paid 100 million to the Israelis, to provide them with the scud missiles, and could not protect them from the attack from Houthis from the South, in Saudi they gave it back. Iran paid for this defense technology to the Russians. They were, they paid for, they bought this defense system, and it was delivered. So now you understand where it comes from. It's not that the Russians gift. They were paid, they were repaid years ago. And the whole of Iran nuclear defense. Iran is good in making scientists, their rockets and the rest. But Iran is very weak in defense technology. They never developed it, which was, there was a big mistake in the structure of Iran military. And they gave this to the Russians, because they're proven to be more effective. And what you say, it's been hit, it shows its effectiveness. But it was played, all three spots, Iraq, Syria and Iran, was targeted on the Russian radar system, and not on Iran, or whatever. It was just to pull them in and it didn't work. (2:08) It was a massive failure from the American and Israelis for the next game. Now we have to see what will be the next game.

Any other question?

R: We have a question about the delivery status of the Cosmic Rays materials.

K- We have enough to start delivery. I was talking to one of the Knowledge Seekers on Monday. We are looking for the right container. We are looking, our team, when even I was in China, I asked you if you, those of you who were in China, saw the Chinese gave dry Gans's in a beautiful containers. We are looking only for the containment, it's... the

material is ready. We have to contain it in a way and seal it, that it cannot be touched. And this has a value. You... if you hold it and it comes in two, these values more and more increases in value. We have, I think, round about 20, 25 grams. It's a slow production to start delivery, but it's just our containers and I hope that our team can resolve this in next week or two. One of the ways to do it is to seal it in a resin, they've come up with. And this has a value, you can give it to your grandchildren to sell it for much more in the future. It's not just for research. We produce between 5 and 7 grams, that's all we can do a week. It's not a simple system. We have enough and once they resolve the containment, it'll be shipped out and you'll receive it.

Any other question? (2:10)

Q: ... Could moving Oxygen in and out through the nose, differ from the mouth? And the same with the left and right nostril breathing? Can it function as a switch, as moving the air above, under, to the left and right of the medulla, ?? *ambigua*, is a useful thing to practice?

K- You can practice whatever you like, depends what works on you. And, you got to understand, it's a misconception... I have to accept this call, please, as I explained to you. Can you take over please?

<< *Mr. Keshe answers a call* >> (2:12)

K- I'm back, sorry about that. I had to accept this call, it could be another one, but I explained to you earlier on. I needed to accept this call. Come on, give me the question, what was the question? (2:14)

Q: ... Could moving Oxygen in and out through the nose, differ from the mouth? And the same with the left and right nostril breathing? Can it function as a switch, as moving the air above, under, to the left and right of the medulla, ?? *ambigua*, is a useful thing to practice?

R: And you mentioned, you can do whatever practice works for you, basically.

K- Yeah. This is how it is.

Anything else?

Q: Are the Glasses with Dicyanin? Did the Glass, the special glasses have Dicyanin in it?... The chemical's forbidden for years, but that you could see something like Plasma or energy with this. It was invented by the Russians.

R: Apparently, you put it between two lenses and it's able to alter the fields that you can see.

K- Yeah. I don't know, I can't say anything, no comments.

Q: ... (2:16) Recently Elon Musk stated that the next generation of Tesla cars will be a lot cheaper. Is this the Plasma reactors being part of this development?

K- I don't know. We put an offer of \$1 for Elon Musk. Which will offer the \$1 for the whole of Tesla cars. Most probably it'll be... It's very serious. As part of our cooperation and with the, what we call, which we're moving on with, is delivery of the cars without batteries. And the technology is, what you call it, will be delivered. We try to show this in Iran. I'm planning a few breakthrough technologies to be shown in Iran and this will be part of it. Putting an end to what we call, electric cars.

It's huge, you got to understand the implication of the... as I said a few weeks ago, 3-4 weeks ago. Just to make the batteries. The biggest problem will come, they are forcing electric cars, and the problem will come, once we switch, there will not be enough supply, to supply the batteries. There is not material enough to do, they are pushing it, the reserves have been calculated, we can do so many, then they go for recycling. (2:18) But, another biggest problem we've seen on the streets of London, and in England, the rest of the world is keeping it very, very quiet, is that a number of electric cars are burning down.

In the British policy, fire brigades has become, that when there used to be a fire with a petrol, you've seen them, they come and they put water and everything. The policy, the new British policy regarding electric cars, is let it burn where it is. But, it has risen another concern, that the toxics produced by burning of these cars on the streets of London and England, creates a huge health hazard. Which they do not know, how many cancer agents were released, or has been released by it. The British press were very open about this, till a few weeks ago. When one of these electric cars burned somewhere, they went on, and they showed, fire brigade doesn't even go near it. They just stand off, keep people as far, distance again, till the battery burns out.

And they have found a bigger problem, now insurance companies in England are facing it, is that the penetration of the chemicals, after they burn, on the streets of England, is deep in, and now they're not asking anymore for, you know, you had a claim to change the asphalt. The insurance companies are now facing in England, for a full in-depth repair of the street. Till the point which the chemicals are removed. These are not pushed into the front, but now is part of the problems we see, for example, with these electric cars. And secondly, it's the supply of.

And now we hear, they're going to be very cheaper, (2:20) you have to understand, as we said last week, who's behind these things... Musk is tracking Keshe Foundation step by step. And, becoming cheaper is not just the batteries, they are testing the same thing, as I said earlier on, Americans now have come up with this, paralyzing electronics, computers and the rest. Americans are heavily studying Keshe Foundation Technologies, step by step. Elon Musk released the Keshe Foundation MaGrav system in a small system. We saw it, but it became a failure, he didn't pick up. When he starts working correct with Keshe Foundation, he will see the development of some of the technologies he's working

with. And, as I said, very soon we offer one dollar for Tesla cars, just for the name of the most beautiful man on this planet as a scientist, to ?? give his respect. And you will see it. We have.

There's a history. In 1980s, the Americans got involved in Titanium, and the price of the Titanium went to the sky. And a lot of people went to buy in Titanium that they make a lot of money. And then a collaboration between the Americans and the Russians released thousands of tons into the market, and the market overnight collapsed. And all the people who were hoping to become rich with Titanium went bankrupt. They lost everything they had. Electric cars are of that way, but you will see the emergence of the new Plasma cars with Keshe Foundation collaborators very soon. And Tesla cars won't worth more than a dollar. (2:22) You'll have a problem to get rid of the batteries which these cars carry to be able to put the Plasma systems in them. That's how bad it is, it's better not to buy, and to pay for the change, than buy a system which is already converted.

We'll showed this system in Iran, for sure, part of the Iran exhibition will be, the, what you call, the KF Plasma car systems. And on top of, it's part of the same technology with the flight system. So, you can do, but those of you who are very enthusiastic about electric cars, you've got to understand very soon, you have to pay a lot of money to get them out of your cars. And the other thing is, these have a cycle life, the car with the battery will go to the dumps. That, because you will not be able to buy the batteries, if we carry on the same way. The production is not there, the raw material for them does not exist, economically and figure wise, we know the production of the raw material, and the raw material will not match. If you are buying electric car, my advice to you is, please keep your old car in the garage, because it'll do better than the electric cars.

Any other question?

R: Let me see here

K- Yes, I can go home.

R: We're almost there Mr. Keshe.

Q: ... (2:24) Why is the media flooded with Palestine problem, when nobody is talking about the 18 millions of deaths in the Congo, which occurred in less than 30 years, and which is beyond the Holocaust, and nobody is doing nothing to stop it? Thank you.

K- Have you ever been to Congo? And, have you seen the wealth of the nation in minerals? And have you seen the size of the country? And have you seen the dictatorship in the country? And how... If you understand, you... I used to have an office in Kinshasa, I used to travel quite frequently to Kinshasa, before 2000, when I ?? practiced the whole business with Keshe Foundation, start of Keshe Foundation. If you live in Kinshasa, and you happen accidentally, because of the wealth you have, position you have, near the presidential palace, when the president goes to sleep, lunchtime, they close the road that there is no noise, that the President can sleep. Two, three kilometers around the palace, there is no traffic, that his Excellency might wake up with the noise of the car. Then you look at the size of the nation. You can fit the whole of Western Europe into Congo, and

you still have land surplus left. France, Germany, the whole of the Western Europe, you can fit into it. (2:26) It's the largest nation in Central Africa.

Controlled by dictatorship of the kingship of Belgium. No policy is passed, nothing is done, if the King of Belgium, because it's not owned by Belgium as a nation. Congo is owned by the King. It's a big difference. And, the amount of funds which come out of Congo into Belgium is incalculable. The wealth of Belgium, most of it comes from the minerals from Congo. The ambassador of Congo into Belgium is decided by the Belgians. And most of them are the most corrupt people in there. You don't want to know, I used to work in that embassy.

Then, you have the minerals, with this, within this nation. It's the most richest mineral nation in the world. And everybody is fighting for part of these minerals. And most of the war is on those bases. And then in part is mixed with religion, Christians, different sect of Christians, Muslims and the rest of... Whatever you see in the war, it's a civil war for the wealth by... The same thing happened to Sudan, they split Sudan North and South, Christians one side, Muslims one side. And the biggest ?? apartheid took off and we see which nations taken more. The one which is on the coastline, came to agreement rapidly with the Chinese and they became very wealthy. You see the Paris of Africa in Sudan.

Congo doesn't have that, they cannot sort it out, (2:28) because it's landlocked, centralized, it has only one pipeline landlocked, which is the other side of the river, of the Congo river, on the other side is the Congo, Brazzaville. And, so everything goes through a bottleneck, into the port. When you are in Kinshasa, and you see trucks coming to go through Kinshasa sometime to go to the port, from the color of the wheel, the dirt on the car, you can tell which side of the country they're coming in. Coming from the gold area, coming from diamond area, coming from the copper area. And we used to sit in the hotel in center of Kinshasa, sometimes going to Expat restaurants, we could say, you know, we say, "Oh, this is coming from there, somebody's brought a lot of gold in, it's on the way to out."

And this is the problem with this nation. And nobody knows how many millions are killed internally by people trying to rule this country. And this guy sitting in the center gets weaponed, the latest in the world, by the Americans, by the Russians, by the Chinese, everybody else, for these mining areas. It's not a national, it's a guerrilla attack inside for the wealth of the nation.

In 1990's, actually earlier than... sometime started earlier than that, there was a mine in Congo. Anglo-French company cleaned up this mine to the point, dug the ground, it's an open mine, and to call the Copper out, which was financially worth it. (2:30) Those times Copper was 4 or 5 hundred dollars a ton. And when they finish with this, they give it back to Congo, they give it back to the village people, because they took everything out over decades. The water filled this mine with water, it became a lake. And because of the chemicals released by the mining, it creates a lot of death in the area and a lot of, very much chemical warfare between the nature and the rest. It's a huge lake.

At that time, Chinese came in. They gave to Congo, with the agreement, to empty this lake to the ground. For it, they will build a 1,500 kilometer fast track road from the mine to the port. With it, they gave 50% of whatever they dig out of the gold, what they call it, copper, to the Kinshasa government. 50% in cash that the President could put in his pocket, 50% in industrial collaboration, civil programs. Which this was 1,000, if I remember correctly, schools to be built by the Chinese to teach the, what you call it, the Africans, for educating Africans. At 100 latest hospitals, modernized hospitals in Africa, was built another 50%. And for every one Chinese worker they bring from China to empty, (2:32) to develop and extract the copper from when the Anglo-British left, four African workers will be employed and pay the fair wages. And the price of the copper went from 400, 500 ton to 5,000 and 6,000 dollars a ton. Chinese won. Because they literally got the gold, the copper, more or less, at the price of the, less than the \$200, \$300 a ton. and became one of the main supply of copper to Chinese economy since mid 90's.

A lot of people fought for this mine. And a lot of people, hundreds of thousands died because of it. And this is part of that, millions dead. It's economical working. We used to operate in deep mining area of this country. That's why I used to go there quite a lot. I used to have the minister of, one of the ministers and his wife were running my businesses in Africa for me. And I never, I think one night if I stayed in a hotel, I always, by order of the president, had to stay with the family in their homes, secure homes, the minister's home. And we used to have a lot of contacts with these, that's why I used to work through a lot through the embassy in Brussels. And we studied this with the, what you call it, Congolese government, and how the opinion of the government it's nothing to do with us, (2:34) it's just local killing each other for the wealth of the nation. And then they're getting armed by different people, but it's internally, it's an internal grid of war for the assets. It's very much like ?? cartels of South America. And the benefit of it is, what we call, minerals, which they get hold of and they sell to this, what they call, 'blood diamond.' Comes mainly, it comes metal diamond, mineral blood, is one of the ?? braces used in Africa in Congo. Whoever controls these mines of Copper, Zinc, Rare Earth materials, has advantage, got more advantage outside in the world. And this is how they kill each other. Is not a war of dividing a country, is a war on the mineral resources.

I spent a long time in Kinshasa, I know the structure, and cannot be stopped as long as the West is looking for cheap minerals, in control of minerals, a lot of Chinese rare Earth material comes from Congo. And these people are brutal, it's just taking over, in the name of then Christians and the Muslims and then gold mines and then silver mines and everything else ?? . It's not considered as a war, it's a war of thugs with each other. And they change side, this is one of the biggest problem I was talking to them, that time, mid 1990's I was very active in Kinshasa. The problem hasn't changed, it's just these heads of these groups, what you call, thugs, change a side overnight. (2:36) Americans pay them 100 dollar more per ton, they go to the Americans. And then the British arm them, and then the French arm them, and then the Chinese arm them, and then for another 100, they move across to the other side. It's crazy, because 100 dollar a ton, when you ship 10,000 ton, is a lot of money. And they shift, they switch, and they kill each other. It is a guerrilla killing, not a... it's not even a civil war. It's a guerrilla war for resources of the nation, they're killing each other. And they take slaves from all over Central Africa.

Central Africa, nation of Central Africa, poverty of it comes, because a lot of children from there are stolen to feed these, to run these mines. It was a huge drain on African nations there. A lot of children stolen, kidnapped to go, taken into these areas of Congo. And then these children are fed back partially into the pedophiles groups in Central what do you call Europe.

R: So Mr. Keshe, will the implementation of the transmutation process essentially eliminate that sector of ...

K- The creation of the material production is part of the solution. But has other, because I discussed this with some military people recently. We have to monitor in how we release technology, especially for material production, into the world. (2:38) And this is one of the main concerns in my negotiation, and my thinking in the background is. We can deliver as much Copper as a company needs.

If you look at this material enhancement unit, we just need to put a conveyor belt on the bottom, and you can take a ton of Copper a day out of the system. Cost maybe 10 dollars a ton. You put this into Huawei, you put this into cities where Chinese produce raw material for electronics. This means, there is no need for water on the material ?? at all. This brings an economical situation for China, which controls through economy, the countries it operates with. Because now they don't need to buy Copper, they don't pay the nation, because they don't need their Copper, they lose their influence.

But at the same time, once it's implemented for certain sectors, this will affect the economy of the nation inside. Suddenly, Gold mines have no value, Copper mines have no value. So, these wars, these fighting with no customers, it won't exist. It brings a peaceful position. But, China is in a dilemma. I know this because it's on the table of understanding from day one. Once they produce more raw material, then there's no need to import. Then they lose the financial control over the countries. Then we see new kinds of anarchy, because there is no food to feed the nation, because these rebels, these bandits, still feed their people. From the money they receive, part of it goes feeding the people, not to die, just enough to mine. (2:40)

The change in the technology we brought, has a lot of implications, and I tried to discuss this with the governments, that they understand what's the implication of it. When you produce the materials, you just ask, "Well, when is it going to be delivered?" We can change this in a different way to production of, what you call, Copper. You don't need to import. It changes the shipping, because a lot of freight is not needed anymore. This is why I even discussed before, we become part of the United Nations structure very soon, because the delivery of this new technology, it brings new problems for governments. Controlling, financing, and a lot of other things.

And this is what I keep on telling you. It's not easy to wear these suits and sit on these chairs, of the Keshe Foundation. Unless we become totally money-centered, we get as much money as we can, and I live in palaces, and how do you say in English, 'screw the rest,' then it's a different way. But if you're going to run a fair civilization with the new

technology, these are the jobs which is on my shoulder. And I keep on reminding governments. And I put them against each other, be it military-wise, being economical-wise, being technological-wise. And these are part of... I just explained in a very simple way.

In the next few months, you will get a free standing gas cooker, which you don't need to pay. (2:42) You give this to an African, you give to anyone who has no... burns wood and has no fire, now they have fire to cook, to feed themselves. In a physical state, what's going to happen to the state of Qatar? What's going to happen to 400 billion, whatever, million cooperation between Iran and China for gas export? There are implications and a huge financial application for the technology we are delivering. And, you can't be a 'bull in a China shop,' just because you have it, go and stamp everywhere. It has to be negotiated step, and you show it, implication of it is there, next step.

Why don't we see the Keshe Foundation energy defense to be used by Iran against Israel? We play fair, if I give everything into Iran, you won't have a peaceful time with these guys. We beat Israel, who's next? The state of fairness is not there yet. And the most ridiculous one which is passed under your nose without you knowing, Americans dropping food for the Palestinians, pushing for Palestinians, and the rest of the world, and when he came to United Nations last week to vote for independent state of Palestine, that they could help, they are the only country who vetoed it. Because if they become a nation, then there's a war between two nations, and they have to take sides. This way, we are on one side, we do what we like. (2:44) How can you help a nation, a people, you sell the bombs to be bombed and then feed them and then ignore them, their own nation. We have first to sort out America, then we bring fairness to the rest. And this is part of another structure of the Keshe Foundation work.

Any other question?

R: Even their dropping of the aid killed people. You can do that right without killing.

K- Yeah, I'll be looking at the feeding station of the Palestinians next ... very soon. And then I will tell you how we see it in Keshe Foundation Research Center.

Any other question?

R: Well, I think you've might have answered, I think the last question which is...

K- Thank you very much. And, I hope we'll be here next week to still learn a little bit, teach a little bit and share a little bit.

Q: ... How are we doing with the peace process?

R: And I think you've answered that on several levels, but maybe you have a, just one final thing you could say about that? How are we doing in the peace process?

K- Very bad, we got bad world of world leaders, until we don't tame them, we still won't succeed. But we're working on it. It's not easy, it's not easy at all. All these wars, all these situations, making a lot of money for a lot of people. (2:46) There is no business more profitable than killing business from the church, which encourages it to the man who makes the gun. And, it's just to elevate the Soul, teach, and people to become independent with it.

We'll reach the position of, maybe in next two years, three years, when the Keshe Foundation become an App, this is the time when the peace start. And you understand very soon what I mean. You want an apple, you touch an App on the Keshe Foundation communication system, which no one can control, and through Cosmic Plasmatic Rays, you receive the apple, energy, the emotion and the... fulfilling the hunger. Then nobody can control to feed you, the same with every other things. And then we are on the path, but in two, three years. It's the greed of the man, it's not the lack of knowledge or technology. And we'll see how we do with our partners in developing and sharing it. When you see the new, like, fridge and gas cookers with KF as a brand, plus the collaborating company, then you know the time has come. And that's not very far.

Thank you very much for today.

R: Is there any last thing you'd like to say about the presentation tomorrow? Any instructions or things you'd like to...

K- Yeah, the instruction is, please be there on time. We try to be on time, as usual. (2:48)

R: Just 9 AM?

K- 9 AM Central European time. We set you off and we disappear. The system will be running, we monitor everything in the background, and we take it from there. And see what we can do, and we go step by step. Thank you very much, and see you some tomorrow and some next week.

And thank you for being there, your existence allows the Foundation and the work of us to exist. We are part of all and we are part of some. And we are there collectively every day, to change something new. Thank you very much, and see you next week.
