

537th Knowledge Seekers Workshop May 9, 2024

(Quick Index 20 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Vacuum of body Cosmos - transfers energies; At death STM Supernova - spread energy across U; All life Supernova - even ant; Capture energies as Cosmic Rays (CR); Astronauts flash light - enlightened; Neutrinos are CR - capture photon depths Earth - too many names for same thing; Organs absorb CR; KF testing how CR made; Fish present in Earth's atmosphere - create Man same; Science doesn't understand M fields; CR - plasma or matter; Brought fish back to life transmuted; First transmutation; Turn CR into matter; CR entangled - create motion; Create need - secret eternal life - replicate Creation; Most important - we're part of Creation; Books 1-3 understand Creator - energy to matter etc; 2 types Transmutation - Matter - Plasma; Manifest clothes Matter Transmutation; 3 types cancer - Evolution - Accident - Emotions - T works all 3 - end of cancer; Evolutionary cancer - humanity part of U; T can rebalance energies; KF Wellness start new trials; Mother transfers Ca plasma from hips to womb for pregnancy - not use send to breast for milk - remain - if hit on breasts - Ca convert to matter state - cancer; 3-D Mammogram - allow T forward - all cancers; Elevate STM - spread correct beings in U; Intelligence not by PhD - STM enlightened; Shepard's have time to enlighten about Creation - observe how field interact; Ancient civilization had time to enlighten; Man lost connection through modern civilization; Soul connects fields to other fields; KS responsible to understand Knowledge; Star in sky could be lover - STC; field absorption within skin - eternal life; Soul goes from body to body - didn't transfer knowledge; build system to train; Be driver - flight session - immerse in CR; Entanglement - M fields - motion; Meteorite plasma & matter; Light from rubbing fields; All about pancreas; Tells what fields to absorb; Material production in Intestine; Cells exchange energy through blood; How to study Plasma Science; Understand about self; Start at beginning; Knowledge needs maturity of Soul - not intelligence; Housewife & Professor; Mario start KF Shop; Have T ready to use; Body Cosmos - change to different taste; Have to find own path to enlightenment; When mature - teach to transmute anytime; Iranian Nuclear Conference; KS experience Soul in waking state - body lights up dark; Hold apple transfer energy; T transfers metal out of body; Soul of Emotion - interaction of fields; Plants can have multiple Souls.

Topic Index

Body is like Cosmos - another U - transfer energies of Cosmos in vacuum of body to operate; STM gathers energy in lifetime - Supernova - death - start new lives; All plasmas go through same process; Star explodes - Supernova - releases energy - creation of other lives in galaxy; Problems of using too many names for same thing; Every death is Supernova - ant - human - dog - destruction of a stone - cutting of a tree - release energies that hold entity together; Only looks like stone or whatever; Process for it to evolve; Can we capture these energies; We capture energy of a Cosmic Ray (CR) on its path to another point - deny it; Astronauts see flashes of light in eyes - CR converts to photons - 'Ray of Creator' - would it bring enlightenment; Through ignorance calls it

neutrinos; Trap neutrinos in water tanks in deep mines; Water tank is every cell in body; Part of 80% of energy we absorb from environment - CR; KF could show in minutes how to capture photons - they'll be puzzled; Don't understand truth about conversion of matter - energies - fields - CR - M field rays and how to tell difference; Science needs to understand process; KF laboratories testing how CR are created; Creating fields in matter state is different than created in the environment of body; With knowledge can dictate own life; KF Wellness Center will start trials on unsolvable health conditions; Our team is ready to create life - how done in U; Fields of fish already present in Earth's atmosphere - just create right conditions to manifest P; Create fish where never been - seeds of fish left millions years ago when covered with water; M field environment for fish within seed; Man has left semen all over planet past millions years - can manifest man like manifest fish (don't need womb); Distinguish M fields in matter - plasma state - environment of U; Our Science doesn't understand M fields; Determine if M field is a CR - plasma or matter state M field - or connected between both; Learn how to manifest CR M field into matter state; Make it into magnet; Create life anywhere - even barren place; KF lab fish died - back to life - transmuted to non-physical D; Our scientists baffled by first transmutation; Understand how each CR transfers - interacts - amalgamates - coordinates - each M line operates; How CR & CF get entangled - pass through body get entangled; Entangled with another field on other side of U; Create need - CR gives to you - not grabbing - gives and goes; This is secret to eternal life - understand truth about Creation - replicate it; Eternal life not exclusivity of Creator; We are part of Creation; Most important part of teaching - understand when and how we manifest ourselves - understand about Creator - Books 1, 2, 3; Matter to energy - manifest fields - transmutation; Teach about transmutation of Plasma & Matter - big difference; Merge two together - create both; Need both to transmute with clothes on; Matter state transfer and transmutation; London to New York in wedding dress - transmute body & matter state things on it; Soul of Emotion transmute appropriately dressed for environment; Pharmaceuticals have big problem using chemotherapy - don't understand tumor created through emotions of Soul - why cancer comes back; Impossible for it to metastasize; Sort out emotion - goes away; Types of cancer - evolutionary is connected to Universal fields - evolving to become part of other races in U - helps mature - 10% of cancers; Develop test what kind of cancer from blood and P - distinguish if cancer is evolutionary - accidental - emotional cancer; Understand its origin - reverse it with CR - digest the experience (free emotion); Rebalance energies - converted by accident into cancer cells - solution for all; KF Wellness Center - start trials - to distinguish different fields - understand CR; Materials are made through interaction of fields - reverse process - convert back into fields - energies - back to CR; Process not known by Science; End to cancer; Material conversion occurs in womb of mother; Ca taken from hips for possible birth of child to become part of its bone structure; Conversion of plasma of Ca into its CR - enters womb convert to skin of child; If no pregnancy transfers to breasts - Ca seeds always ready in case child is born; If mother goes through an emotion converts into milk - really a Gans; If get hit on breasts Ca can convert to matter - tumor - breast cancer; Transfer Ca back to energy - within seconds cancer gone; KF & partners release new system to convert Ca energy; KF involved in manufacture; Physically watch Ca seed being dissolved; 3-dimensional mammography will allow T to come forward - for all cancers; Death by cancer will come to an end; Elevation of STM - create more intelligent

beings - live correctly - just Souls will spread across U; This is purpose of teachings and sharing knowledge; Connection between CR as M field of U - M fields of solid magnet; There is another Science of the Creation of Unicoise - can't imagine; Still battling - in name of fake religions; Man's life - speck of dust in U; Grain of sand in desert - convert to life - or create blindness - can give or take life; Man's science and T has become confused; Governments claiming emergence of a new T - KF T - they're ignorant to it - how it should be until we mature enough Souls - then open it - becomes tool of peace; Governments want possess T - show their power; Understand Totality of Creation and process; Doesn't matter at what level you're at - it's your power of understanding it; Take from this T according to intelligence; Intelligence is not PhD - but whether STM is enlightened - open to Knowledge of Creation; Easier for farmer in remote village - shepherd - time to go within himself - find out truth about Creation; Observes animals behavior - learns about fields - more enlightened than all Einstein's - because understands process of Creation - has time to observe; Prophets were shepherd - enlightenment came from having time to think - analyze truth about Creation - not filled with all the fallacies - didn't read books - read book of truth about Creation - how the fields interact; Old women in Africa know about different seeds - effects of seasons - understand process of Creation; Enlightenment comes without degrees - Prophets; We lack this knowledge - lost it when became civilized; Just an animal that has lost all connection to his own creation; Advanced ancient civilizations - because had time to analyze life; We lost that realization; It's simple to become more enlightened - understand process of your own creation; All fields of U - some originated from Creator - are within you - they don't exist without you - your Soul connects each field to the other fields - without you they lose their connection; Our knowledge adds to Universal Knowledge; Responsibility of all KS to understand knowledge - why we showed you Nano and rest; For you to interact with your own Creator; Share knowledge with all beings; Mature enough to understand how it works; Star you see could be Soul of your lover - or Soul of Creator - depends what you understand from its interaction; Distinguish connection between fields - conversion between fields of CR & matter state rays - unravel process of Creation - reach everlasting life; This knowledge - structure - field absorption sits within skin of every human - learn how to use it - or move out when time comes; Like snakes shedding their skin; Changing skin is physical - understanding Knowledge of Creation is through STM - it's the change; Absorb higher and lower strength fields - increase intelligence of Man - how life can be eternal; Sea animals go from one shell to another - you can go from one Soul to another - add knowledge to that Soul - create more intelligence in next cycle of life; Maybe your Soul was a shepherd at one time - but never managed to transfer Knowledge - development stopped there; Messengers know how to transfer - move on- add to another Soul so they understand more about Creation; If can't understand connections of Soul - someone will build a system for you to train - but you still have to make that progress.

Part 2

Get yourself ready to understand emotions in next Friday's Monthly Flight Session; Analyze purpose - first time in 'drivers seat'; Nothing will be coincidental; Create a direct 'clarity of connection' between STM & STP - pre-determine where you want to go; We'll immerse you in CR; Take 'flight of fancy'; Let us know what happened; Leave rose on

friends bed; Bring rose back - manifest it; We have rope tied to you - you can't get lost; It's not a dream - it's reality - have to face; KF Wellness Centers to begin trials - 20 cases; Teaching on working with light rays - use Entanglement; Entanglement - attributes of M fields - can be light, CR, matter state M field; Light we see is from field interactions; All M fields work with operation of "Entanglement" - plasma - matter state - a transition point; They are in motion because entangled; Give off energy - cut through M fields of atmosphere - creates resistance - see light; Daylight is plasmatic field interaction; Meteorites - both plasmatic and matter M field interactions - cuts through; Can change into different matters and states; Analyze Cosmic lights - what materials they contain; To be in motion - fields have to get entangled - otherwise no motion; Light is part of a spectrum - 2 fields going to 2 different points in U - rub shoulders in middle - created light as a residual field - sometimes targeting each other; Pancreas directly influences conversion of matter into an energy lymph can absorb - feed cells; Enzymes creates bandwidth - tells brain and liver what body needs to absorb; Pancreas tells stomach and intestines what to release into lymph; Can change field strength of Ca to another; Specific field strength materials made at specific points along digestive track; Highest strength Ca absorbed - at beginning of stomach for bones - further down intestines - other things - energy for blood cells - another position; Different section of stomach respond to plasmatic environment created by Pancreas - to release energy into digestive tract- if no need for materials - goes out as waste; Pancreas is like factory for creating materials body needs - pre-determines energy transfers; If pancreas gets damaged - those materials don't get made; Intestines like filter - if take part out - will lack certain materials - even though pancreas still produces its enzymes; Test which parts of intestine damaged with B12 - stops being produced - reverse direction instead of anus - comes out mouth - very rare disease - he worked with 1 case; Pancreas job to create certain environmental conditions along digestive tract to create fields for material creation; Compare intestine fields to planets of solar system; Why pancreas cancer leads to liver cancer simultaneously - because wrong materials are absorbed - deposited - both share same energy base; Mr. Keshe was poisoned to kill - damaged pancreas - uses T to create conditions of work of pancreas; Pancreas & liver problems - stool changes color; Final stages of pancreas during liver cancer - stool to orange, cream, or white; Pancreas operates through enzymes, - creates certain M field conditions for intestine to absorb certain fields - like reactor; Science not understand how pancreas effects creation of red blood cells - transparent - contact with O₂; Blood - common denominator mixture that every cell of body can exchange energy with; Blood circulation - energy transfer of cells; If take pancreas out - body's field interactions change; Stomach and intestines create M fields for absorption; About where to start studying teachings; Up to you - could be enlightened in today's teaching - cover last 10 years - or not; Start from beginning with KSW & Books - build solid base to be enlightened; Depends how much you have educated yourself during your lifetime - what prejudices you carry about what you have learned - if remain open; Not like our normal education system - Knowledge of Creation has no point of beginning - it's a point of understanding - have you understood your life and can you add to it; Not evolution in science - an addition to science; First understand how much you know - then add to it - don't have prejudices (preferences) about what you have learned before - be open to discover - this is best advice; It's up to you in what you want to learn and how you want to approach it; KF not a religious organization - totally

scientific based - teach you how to understand the science yourself; If touch ethics of use of science - becomes theology; When you understand - gets ingrained in your Soul - carry it across U - always an asset to learn; Also good to start at beginning to make Nano and Gans - direct experience removes doubts - believe in fields - can't see - see effects; If Soul matures in womb - doesn't need to take birth or P; Or may live 100 years not mature - depends what you take with you - add to your Soul; Use knowledge when need it; No beginning or end in this education; If you can understand essence of teachings - can understand today's teachings - interacting with fields and energies of U - create and control them; Understanding does not need intelligence - needs maturity of Soul; Intelligence belongs to matter state P of man; How much you understand - apply - matures the Man; Depends on who and how they receive knowledge - what they do with it; Don't teach you to do things anymore - instead we teach you the knowledge - depends how you apply it - understand essence of truth behind it; When get enlightened - knowledge is not yours anymore - point of teaching; Story of housewife explaining T to her husband - a PhD - later he became dedicated KS; Knowledge of Creation doesn't have degrees - need clarity of understanding process of Creation - that's all; Understanding of Knowledge can come to you at anytime - middle of the night - then take from it what & when you need - not all time; Have Gans's ready for energy transfer when need it; Mario open up 'KF Shop' - teach May 25th - beginning of a new phase in spreading T - wish them success - you can do the same; Not fully understand Knowledge - Gans's are creator of CR - we are made of CR - so is everything else - all part of the same thing; Body is like a Cosmos; If slightly change composition - apple will taste like a pear - perceptions with energy fields; Everything is made from Cosmic Rays - no difference - Gans - stone; Traveling in package called 'Earth' or 'body of man' - same time through Cosmos; If field strength of observation not same - invisible to them; We don't need to be evolved to be Enlightened - have to find path to it yourself; Sometimes have to experience directly to believe it is real - children licking salt cave; Experiment with 2 year olds - taste sugar and salt - have to program perceptions; Now man will have choice of being in Soul or P - right next to each other; Thoughts aren't positive or negative in themselves - relative to your point of view - negative can be positive to someone else; Soon teach how to create a condition of transmutation (Soul or physical) for yourself automatically - available anytime - KS not yet mature enough to understand; Need to understand own physical and energy structure; We all know it already - ignore it; Take too much Soul (cancer of Soul) means holding onto energy pack that we don't need - doesn't mean tumor - but can lead to demise by changing strength of fields - could also be advantageous; Don't have exact words in English; To see graph of STC - need maturity - see it with system - have shown it - don't understand it; Principle of teaching sits, in essence, with the seed of the STC; Iran starts hosting International Nuclear Science Conferences in Isfahan after Mr. Keshe announces about Plasma conference in Isfahan - not related - but shows government is listening to Mr. Keshe; KS tells experience after Monthly Flight session - sees dead mother while awake - means he is accepting conditions of both Soul and P; Will become normal part of life - but also we shouldn't mix them up; Means don't need to sleep to be in Soul; Not going crazy; KS has light coming out of eyes - body - can see in dark; Means have expanded energy field beyond body - humans used to do hundreds of thousands of years ago - not abnormal; Internal energy interacts with the fields of environment - Cosmos - creates a light outside

body; One by one KS will start having these experiences - then explain more; Same as how daylight is created; Hold CO2 Gans in hands - can feel and taste it; Will do with apple and put apple back - received what needed; Can transfer metals and objects outside body with T instead of surgery; Time of heart & brain surgery over; Have to teach and develop enough to implement on larger scale; Calcification; Is there 'Soul of emotion' - No - it has a Soul, but it's the interaction of the fields; Plants can decide to have several Souls; Sharing through Soul and voice.

Introduction to 537 KSW - Everything is Made of CR - Understanding Entanglement - Body Cosmos - Pancreas - Enlightenment not Intelligence - How to Approach KF Teachings

The main theme of today's teaching is understanding more about M fields and how they interact and a lot of little bits and pieces of information. For example, because our body is in a vacuum state and has its own internal condition of MG fields it can be considered as a 'Cosmos' unto itself and by understanding how the fields in the Cosmos work we can understand how our body works, and vice versa. In effect we are a plasma inside another plasma all the way back to the Creator, and we are trying to figure out how to transfer energy from the Creator, which is really just the Cosmos to feed our Soul of the Man (STM) which will then feed our physicality (P). Even just reading this we can understand that we are all created out of the same thing, which is the love of the Creator, or another term for it is the Cosmic Rays (CR). We created all these different terms to explain what we observed and then started making up theories about how the Universe (U) works, and then we started believing our theories and made them into 'facts.' And so now we are stuck with all these terms and fixed ideas and our science has knotted itself into a lot of confusion. Everything is pointing to the CR as the fundamental structure of Creation, and the source of the CR is the Creator. We have come full circle back to where we started from, and after trillions of years we had a lot of fun doing it.

Just saying everything is God is not going to help us much. We have a lot of people who go around saying, everything is God, or Emptiness, or love but then nothing ever changes. And that's because we are just repeating a concept from somebody else. The true understanding of Creation is when we know it inside ourselves, feel it, are fed by it, and can apply it in our life. Each of us has a unique story, that is who we have become and we can use the Plasma Science to understand ourselves, how we were created, and how Creation works, and then we use that knowledge to create the kind of life we want to live. Then we go from our present state of ignorance and being a victim of other peoples power, to the realization that we misunderstood life, and actually everything does come from inside us, and then our life turns around and we become like a shining star in the sky. This is the beauty of the Knowledge of Creation and why we want to share it with others, so that slowly we transform the darkness into light. This brings us right back to why we are studying all the little bits and pieces of knowledge, because they all fit together and make up the Totality of the Knowledge. This is why Mr. Keshe is teaching us all these different aspects of Cosmic Rays, so that we can learn how to absorb and use them. And then when we understand them, they become automatic. Or we could say they operate within us automatically.

It is my understanding that the fundamental M field of Creation is the Cosmic Ray, but then the CR itself is made up of all these different dimensions (D), levels, and layers, and all the magical functions they have. We already learned that the CR have the C14 in them and that 'piggy backs' on top of the H, which are pretty fundamental to organic life, where we see everything made of chains of C and H. He explained further today that human science has already had contact with CR but we didn't understand it and started calling it other things. For example, the light flashes that astronauts see when re-entering the Earth's atmosphere are really CR, and if one of them happens to be directly from the Creator that astronaut could get enlightened. Another example is what they call neutrinos, these are really CR. We have all heard about those experiments they do, where they take water tanks deep down inside mines and capture neutrinos. If we think about it the Earth is being showered constantly with CR or 'neutrinos.' Then the ones that have to pass through the matter state of the Earth must have to slow down enough, and interact with the fields of the Earth, that a few of them when they hit the water convert to matter state energy or photons that the scientists pick up on their instruments. Mr. Keshe said, that if they would allow him to use their instruments he would show them so many 'neutrinos' that they would wonder where they went wrong in their thinking. Of course, we as KS now understand the principle of Creation, that everything is created out of the interaction of fields. But the scientists don't even understand that part.

The word 'Entanglement' came up a couple times today in explaining how the fields work. He said, for a M field to be in motion it needs to be entangled. He started talking about this concept of Entanglement very recent. I don't remember many teachings about it. It must be in the 'Books.' Obviously, the word itself means to mix yourself up with, or attach yourself with somebody else. But it does not necessarily mean that entanglement will be permanent. Maybe it's just be a temporary situation, and you keep your independence. In this context of plasma fields it would imply that M fields somehow get mixed up with other M fields and that creates motion and energy. But what's the difference between that and plasma? With plasma it's described as two fields rotating around each other and they find a balance together and then start emitting other fields. Perhaps Entanglement can lead to creation of plasma?

There is a lot to understand about M fields and we have only just 'scratched the surface.' For example, we say the words 'Cosmic Rays' but maybe each CR is a copy of all the M fields of the Cosmos, they are all inside it, or somehow connected to everything. This just doesn't fit into our brain, because of our limited education system. In his Books he talks about part of the M fields as 'pmtics', which I think just means plasmatic magnetic fields for short. He said there is a big difference between plasma M fields and matter M fields. The force we feel when holding a solid state Fe magnet on Earth is a matter state M field. If we were to make a Gans out of the Fe, then it would become a pmtics or plasma M field. When we transmute since the body is a Gans we use Plasma Transmutation, but for the coins in our pockets and clothes on our backs we use Matter Transmutation, but the nice thing is they can be combined in the same transfer. When we transmute without a machine we'll have to learn the knowledge so that our emotion can create the right conditions.

This idea of our body being a Cosmos took on a deeper meaning early this morning as I was in a state between sleep and waking, which I consider to be closer to the Soul. Knowledge of Creation seemed so easy to understand. And for some reason I felt I understood it. I reminded myself to pay attention and repeat it in the physical mind so that later in the waking state I could remember it. I was thinking about the pmtics as divisions of M fields and there must be countless numbers of them, if we are connected to everything in the U. And I was thinking about what Mr. Keshe said, that a CR, which is just a M field, on the other side of the U can feed us if we have a need, and we must also be entangled or connected with it in some way. Somehow we have to be open and don't grab it, then it gives and continues on its way. It doesn't matter if it is trillions of 'light years' away, there is no time and distance with the Soul. It's a matter of our emotion, need, and openness to receive that counts. If the body is a Cosmos it must be the same way. Then a cell in the Liver could give to a cell in the toe if it needs it, and the energy transfer will be by M fields and not by the blood. The pmtics would have to match in some way. Maybe this is happening without our knowing it.

Then I thought about my condition where the Liver is not feeding the muscles tissues mostly in my legs and I get pain and cramping. I thought why can't those cells receive energy by bypassing the blood circulation and just transfer the energy directly because there is a need? I think even a superficial thought like, 'oh, my muscle hurts, please feed me now,' will cause the Liver to act. But then it remembers in the childhood when the abuse was so much that the Soul wanted to leave the body. Perhaps it created a block to the muscle tissues, and the power of that thought, even though it was made 30 years ago is still in effect, because that emotion has never been fully satisfied. And a few weeks ago he taught us that if abuse occurs during the switching time of the brain function it can embed that emotion into the physical structure of the brain. And we might live with these embedded emotions our whole life, and not understand and blame it on something else. This is where the new technology is going to be a 'savior' to a lot of us. Especially if our heart and mind are not strong enough to reverse these conditions on our own. During the time when the Soul was aware I thought it would be easy to reverse, because now I understand it, but then in the waking state all old mental habits became stronger and life became heavier again. So we do need help to make the life of the Soul our 'real' condition.

This made me realize that thoughts and emotions from experiences throughout our life can remain hidden within us. And even though we thought we dealt with them, their energy can still be embedded within us. And we are either in denial of them or just plain ignorant of how life works. I also realized it is not our fault because of the society we were born into. But at the same time we have the responsibility to reverse it, and especially now with the knowledge we are being given. Another thing I realized is that the body is not responsible for what happens. It is created out of emotions, and has to carry out the emotions and field forces that the STM and STP put on it. And this gets combined with all the thoughts and emotions from our environment that we allow into ourselves. And these emotional forces are acting inside our bodies and unfortunately most of it we are not aware of. This is a huge cause of the suffering we go through in

physical life. I want to close this topic with something positive. This knowledge is indeed the start of the change for ourselves. But we have to understand the knowledge correctly and be open to whatever energies want to be released. Then we will find balance in our Souls and our emotions will become stable and powerful. This Technology is a grace we all have been blessed with.

In physicality when a star goes through Supernova we see a huge explosion and huge release of energy. Mr. Keshe is telling us that all living beings go through 'Supernova' at the point of separation from P or what we call, death. Even an ant releases huge amounts of energy or when we break a stone, or cut a tree. Some sensitive people may be able to feel it, or like owl's are known to feel when someone dies, but we don't feel it in P, so this is an indication that it occurs in another dimension, or another field strength, or a different channel on the television. In a way, it helps us understand our limitations.

He explained further today why when we create the right conditions in a fish tank we can create a fish out of the atmosphere. He said the fish is present in the atmosphere and that every part of the land on Earth has been covered at one time or another with water and so fish have left their 'seeds' everywhere. He said it's the same with humans, over time we have left semen everywhere on the planet. I understand it to mean that the MG fields in the semen remain active even though the P part of it is dried up and gone. Then by creating the right conditions we could create a human being the same way as a fish. Does this mean a human can be created without a womb, or the atmosphere of the Earth becomes the womb? Then the Earth would be its mother and the father the one who left the semen millions of years ago. And would this mean that even when we destroy something physically its energy fingerprint will remain? Is that fingerprint all we need to create a new life?

The Medical people and Scientists have been raising millions and millions of dollars over years to find a solution to cancer. Now what are they going to do if KF releases a system that can resolve cancer through balancing the fields? The main reason they can't solve cancer is because they don't understand that emotions are part of the cause, so the Soul recreates the cancer after they remove it. There are 3 types of cancer, and evolutionary cancer makes up about 10%. This results from humans receiving fields from its connection to other races in the U and we are trying to mature to become part of them. We receive energies through Cosmic Rays which include information and knowledge that are of a higher order. Our fields are entangled with these other races and we receive fields that are too much for our body to process, and they become a point of conversion to matter state and developing of a cancer. Other types are accidental and emotional cancer which have similar processes of higher energies converting into matter state.

An example of accidental cancer is breast cancer that can develop if a woman is hit on the breasts. The whole process starts in the hips. Remember the hips are like a Cosmos in the Cosmos of the body and every month a woman has the potential to become a mother, so the Cosmos of the Hips converts Ca into Cosmic Ray plasma which gets transferred to the womb to potentially create the bone structure of the fetus. If there is no pregnancy the Ca CR plasma is transferred to the breast to be used for milk production. It remains in the

breasts and if the breast is hit, through the compression of the fields, the Ca plasma can convert to matter state and if the breast isn't producing milk then there is no way to release the matter state conversion, and thereby it can create cancer that has Ca as its seed. Soon systems should come into the market that can convert the matter state cancer back into energy. Again this is the basic pattern of Creation that is missing from the knowledge of doctors. They don't know that through field interactions the plasma fields become matter state and then matter state can be converted back to energy with the right understanding. In the future, cancer will be 100% reversible if the emotion of the person wants it.

For those KS who attend this month's Flight Session, you will be in the drivers seat of transmutation. He said, he will load you up with Cosmic Rays so that you can do and go wherever you want, as long as you can use your emotions to navigate through the U. By emotions he does not mean superficial and sentimental emotions that we are used to. We don't really have a better word for it. Maybe we could say it is a deep feeling of certitude of knowing who and what you are and from this point you direct the energy of your Soul to expand over the STP and that will put you in the position of not needing to be in the P. From that place I would imagine that if you surrender to the Soul it will know where and what you really want to do. But he asked that you use this time before the session to plan out, or deeply think about what your purpose is and what you want to do. Let's hope that soon more and more KS will start transmuting, both in the Soul and also fully with the physicality.

The pancreas through its enzymes controls what MG fields the stomach and intestines will add to the lymph for creating materials that are needed by the body. It wasn't clear, but it seems that the brain receives the signals from the different parts of the body as to what materials they need, and then that information is somehow given to the pancreas to produce the enzymes that are released into the digestive tract, which cause the stomach and intestine to produce those field strengths, which is then added to the lymph and 'taxi destination' to the cells that need them. If the pancreas is damaged then the intestines won't receive the signals to create those materials. And if the intestines are removed then even if the pancreas releases the signals, the MG fields won't be created and the body will lack those materials. The pancreas and liver work on the same energy base, so if one is damaged it effects the other. We see this when there is cancer of the liver it usually goes into the pancreas as well. This is an example of how matter is created from the MG fields, just like when the fields of the Sun interact with the fields of the Earth and create the matter of Earth.

There are a lot of documentaries on the Internet of how ancient civilizations had advanced technologies and scientists of today can't understand how they were able to do things like move monolithic stones as an example, or the classic one is how the Egyptians built the pyramids. They took the time to analyze life and go deep within themselves. And just by taking the time and setting a different priority in their life they were able to access more Knowledge of Creation through the Soul. A good example of this are Shepard's whose only responsibility is to watch their sheep all day long. If they don't distract themselves then they have time to go inwards and in that process they can

connect with the Soul. When humanity started becoming civilized, at least in this era, all his time was taken to do things that kept him from going within. The priorities became different and we lost our connection to life and the Knowledge of Creation. With the dawning of the new technology that time will again become available to humanity, if we will use it in the right way with the right intention.

When new people find out about KF technology and they go into the websites the knowledge is so massive they get overwhelmed and don't know where to start. It may be that there are different kinds of Knowledge Seekers (KS). The ones who are truly looking to discover the truth about life and have been searching for it, and when they discover KF they don't have this problem, because in their Soul they know they have found what they have been looking for all their life. Of course, they can still be overwhelmed by all the knowledge, and people don't like to go back and start at the beginning. A true KS will realize that to understand the knowledge they need to give their life to it, and build a solid base to understand and apply it. And other people who are totally fascinated by it, and they will give a little bit of their life to it, but not too much. They mainly keep on with their life and add little bits in. This type of KS generally will fall away after a year or two when they don't get stimulated anymore, or they find something that fits to their own idea. Whatever the case may be, it really doesn't matter. As Mr. Keshe said, everyone will take from this T according to their intelligence. And it doesn't matter if the number of people in KF falls down to 1 or 2 people, the knowledge is here to stay, and at the right time it will come out. He mentioned today that it should not come out into public until enough Souls mature so that it will become a tool of peace. Otherwise, like what we have seen from the governments is that they want to use it to have power over the others. So in a way, everything is developing as it should.

One thing to keep in mind is that the enlightenment of Soul to the Knowledge of Creation does not come by the intelligence of the Man. It's not by reading books, copying other people, or having big degrees. He said, it comes by understanding about our life and how we can add to it. But what does this really mean? Maybe the place we can start is to look at our life in such an honest way that we'll be able to admit to ourselves what do we really know about our life and the world we were born into, and how does the Creation work and why am I alive. Unfortunately, in today's world I have met very few people who can do this, even. If this is difficult to understand, there is one thing you can do. And that is to observe yourself on a daily basis, and recognize what do you think about all day long, and what are you actually doing with your life. This will tell you exactly where you are, and you can compare it to the saints and sages who have given their lives as examples of how to live if you want to find the Truth. And then you start adding to your education. You can start to study and watch things that you love and see how they operate and function. You will gain direct experience of life like the old woman in Africa who understood about her seeds. This is the path where your progress and enlightenment depend on you and how much you give yourself to accomplishing it.

Other Topics:

The star you are attracted to in the night sky could be your lover, child, or the Soul of the Creator, in which case you may have access to Enlightenment;

KS have started experiencing their Souls directly even in the waking state. And others have interacted their Soul with their environment so that the fields have extended outside the body to light the darkness.

Thanks for listening.

Quick Index

(We hope to understand more about our own creation, how we are created, where and how we operate. The body of the man is like a Cosmos in itself. It's another Universe (U) and it's for us to understand how it works and how we can transfer the energies of the Cosmos or Unicose in the vacuum of the body allowing it to operate).

(In the same way every star will reach the point of opening up all the energies it has gathered over its lifetime to become a Supernova, the Soul of the Man (STM) by gathering energy during its lifetime in physicality (P) will release those fields upon separation and create new life. What we call death is just like a star going Supernova. It's a massive release of energy. We call those rays of energy, the STM when it's released from the body of the man. (The next processes the star goes through have been given different names like 'white dwarfs', 'black dwarfs' and the rest of it. But in fact, (all these plasmas we see in the Cosmos are going through the same process, there is no difference).

(When a star explodes we see the physical dimension (D) of it and it becomes a huge energy and this energy is released in dimensions, and leads to creation of other lives in the space of that galaxy. Or when the galaxies hit each other and come to the point of (becoming a ?? galaxial Supernova. These are all the same thing, but we made up a lot of different names for them). We have chosen too many terminologies for the same effect. A 'Supernova' is what the man calls, death. It's the same. We see some white bits leftover afterwards, we call it bones. But in essence (it comes to a point of a separation and explosion). For example, when the energy of a star increases to such a point, then it releases itself into the atmosphere and into the environment of the solar system (SS) and the U. It's the same with the Soul. One day man will understand that every death is a 'Supernova,' it doesn't matter if it's an ant, a human, dog, or the destruction of a stone, or the cutting of a tree. We release the energies that hold that entity together and allows it to operate and look like a stone, human, dog, or a tree. (When the Soul reaches maturity then it goes to 'Supernova,' or the death, and it separates from the P). It was the process for it to evolve). (We don't see the energy release because it's on a different field strength than the MG fields of the Earth and the AA in our eyes).

(A big mystery for the World of Science (is how we can capture these energies that are released. And if we can capture the energy of a Cosmic Ray (CR) on its path to another point that it is attracted to. (We actually do capture ?? the energy but we deny it. And

those CR that become part of us we deliberately ignore. In the past I have talked about the astronauts seeing flashing lights in their eyes. Those are Cosmic Rays, which in balance with the salinity of the liquid of the eyes converts to photons, (and energies). (Most probably in one of them they captured a 'Ray of the Creator.') And would that bring enlightenment to the one who captured it, accidentally or deliberately?)

(Through Man's ignorance he calls these neutrinos, (because he likes to pretend that he is more intelligent). Through the same ignorance he has taken it further by going into mines deep inside the earth and created different facilities (?? like water tanks) to capture these so-called neutrinos. And they still have not understood that, that 'water tank' is actually in the body of the man, in the brain, and in every cell of the body. (Your liver and kidney's are also like one of those water tanks. We haven't understood that we absorb 80% of the energy we need to live through the Cosmic Rays). It's part of the energy from the environment. And this has become the biggest, what I call, (?? misfortunes) that I've seen in the World of Science. We deny that the astronauts are seeing these photons. Then we build facilities in the deepest part of the Earth (and record ?? ??) a pure light. When these photons go through the Earth they can be seen).

(If these scientists would give KF a chance to use their facilities, we would show them within minutes many photons in the depths of the Earth in these water tanks, that they will be puzzled and wonder where they made their mistake (in their understanding). It's not that they made a mistake. They simply don't understand the truth about conversion of matter, energies, fields, Cosmic Rays, Magnetic field rays and their (differences). Science will continue to suffer until they come to understand this process).

(What we heard coincidentally in the Intro video about how Cosmic Rays are created in the U is getting tested today in KF laboratories. Our scientists are observing them being created and how the game is played in Creation. (How fields are created in the matter state, is different than how they are created in the environment of the body of the man. When we understand this, then we will reach a point that we can dictate our own life. This week the KF Wellness Center (have started the process of testing all conditions for unsolvable health conditions or Wellness conditions of the man)).

(Our team is ready to move into the next stage of creating life. Our team is ready to create life the way it's done in the Universe. The fields of the energies of a fish (are already present) in the atmosphere of the Earth. When we create the right conditions, at the right depth, and with the right environment of the water, we will see fish in a place where fish never existed before. (They will always (be created) the same, because now we understand the process. We understand why fish appear suddenly in water wells, or in the middle of nowhere, where nothing exists. It's because in the past the 'seeds' or the eggs of the fish (existed) on every corner of this planet. It's because all the land on this planet at sometime or another was under water. The magnetic (M) field environment for that ?? life is within (?? seed). (It's not clear).

If man understand this and creates the right conditions, and with the amount of interactions the man has had (during his existence on the planet), and with all the 'seeds' and sperms he left all around the planet, and in the depths of the Soul of this planet, like

in these water wells, then if we create the right conditions, the man can be created in the same way that the fish is created. (It's not clear). (?? Because our knowledge has been extended to this point, and we understand the process, we (can create a man out of the environment of this planet (?? and do not need the womb))). (It's up to us to understand it).

(We have to understand how to separate the M fields in the matter state, plasma state, and in the environment of the U. Again we have chosen the same words, to describe 3 or 4 different conditions of life. (I gave an example of this in one of my Farsi teachings, where I explained how the same symbol on the Iranian flag can mean lion or milk. But it is for us to understand how it's used).

(Our Science does not understand about the M fields or how to distinguish between them, or to apply them to a specific work, or how to work with ?? the need, and how to achieve an outcome. We need to be able to determine if a M field is a CR, a (plasma) M field, or a matter state M field. Or is it a M field that in essence is connected between the two? And to what extent can we understand these distinctions?)

(Now Knowledge Seekers (KS) have to understand the distinction between CR as a M fields, but in different conditions and environment. And how to change the CR M field into matter state, so that it can manifest itself as a matter. (And how to create conditions of some of these MG fields to create (a Gravitational field) so that (it becomes a) magnet. When the scientists understand this, then the connection, distinction, and in a way, application of it will change the World of Science. (With this knowledge you'll be able to create life (any place even where there is nothing). You'll be able to change life into fields, (that will) go 'nowhere.' (He gave the example, of how before Christmas, ?? one of the fish died and they brought it back to life. (When they put the fish back in the original tank it transmuted. Because it went back to the source of the essence of 'no physical condition.') (Does he mean the fish went back to living in the Soul?)

(When we achieved the first transmutation our scientists who are so advanced, were baffled and could not believe it. It's like when some people say, they took a Gans that changed their condition. But then a minute later they say, it could have been something else, because I still don't believe in what I've done. And later when they repeated it, then they start to believe it).

(Science needs to understand the transfer, interaction, amalgamation, coordination, and the condition of how each field, Ray, and each M line operates and works. And (how they get entangled). A CR and Cosmic Field (CF) cannot pass through my body if they don't get entangled with the fields of my body. (But you could also) be entangled with another field on the other side of the U. (It could be traveling through and get captured somewhere. Or a part of your energy could create a need and (the CR gives to you). It's not a condition of grabbing. (It gives and goes). (If you need some of its energy, then you take it, and it continues on its way))).

(If our KS and scientists understand this point, then we'll find eternal life. The eternal life comes from understanding the truth about Creation and to be able to replicate it. Eternal life is not the exclusivity of the Creator. We are part of (the Creation). But we have to understand when and how we manifest ourselves, or are we in transition from one to the other. This is the most important part of the teaching. Partly because it brings man back to understand about his Creator, his creation and his manifestation. It's Book 1, 2, 3 and again Book 2 back to Book 1. It is matter state to energy transfer to manifestation of their fields, and manifestation of the field back to transmutation, to become a matter. This is what we call transmutation).

(In the future, I will teach you about transmutation of the Plasma, and transmutation of Matter. There's a big difference between the two. You can merge the two together, and work together to create both. Transmutation of the Plasma is transferring you and your body from A to B. The transfer of matter means the clothes on your back and the coin in your pocket when we transmuted you. The knowledge needs to be combined together into 'matter state transfer,' the 'matter state transmutation,' and 'matter state transfer and transmutation.')

(In the past we said, when we take you from London to New York for a wedding you have to be fully dressed for the wedding. This means we have to be able to transmute your body as well as the matter state things on it. If we transmute you to a hot beach you can't be dressed with a winter coat. Because the 'Soul of the emotion' will create the appropriate clothes, the colors you like, and everything else to befit you at the point of manifestation. Understanding this brings us to a new dimension (D) of science. It's a science that man has never known, but has always been here. It's part of our creation and our daily operation).

(The present World of Pharmaceuticals has a big problem when it uses chemotherapy to try to sort out a tumor. Because it has not understood that the tumor was created through the emotions of the Soul, and the brain. This is why the cancer comes back, and then they say it has metastasized. It doesn't metastasize, it's impossible for it to do so. If you sort out the emotion, (then it goes away). (But if it is connected to Universal fields and part of what we call, 'evolutionary' cancer, (then it is different). (In evolutionary cancer is part of us wanting to evolve to become part of the other races of the U. It helps us mature to get to that position). We are connected to that point of reference, and we are evolving to reach that point, be it in (?? ever) lasting life, or maturing to understand the World of Creation, what we call science. Or maybe we want to be part of the dynamic structure of the Creation).

(We'll try to open the subject about (how Creation comes from) Cosmic Rays, so that you understand the why and how. (?? We are evolving in the U and that leads to some 10% of our cancers. It comes from trying not to grow in one direction, but to match to another line which we have received as an information, as a knowledge, through Cosmic Rays. This is entangling us with the other, and we try to match it. We are getting fed, and we are also feeding back something. The body cannot process it, so it gathers that energy in one position, which becomes a cancer point).

(In the future through testing the blood and P our doctors will be able to say right from the start if the cancer is from evolution, accidental, or emotional cancer. And by identifying it through the composition of the fields within the body, and through the emotion, they can tell the patient what they can and cannot do and what possibilities there are for helping them).

(Our knowledge will reach to the point that we will be able to 100% tell what kind of cancer the person has. We can understand its origin and reverse it by knowing where to apply the CR and bring in the information which you cannot digest. We can help untangle the energy balance if it is evolutionary cancer, and (rebalance) what energies have been converted by accident into cancer cell in the matter state, and do the same where you have created your cancer through your own emotion. (We can understand which fields are involved and use a combination of Cosmic Rays for all three. We can find the solution to all of them).

(KF Wellness Center are researching and developing this and we are ready to start the trails to test it. We think our scientists are able to deliver it. (They are able to distinguish between the different fields, and understand CR, and the interaction and conversion of CR, and the position of the matter state of CR. We understand how the fields of the Sun and Earth interact to create plasma and then through the Inertia of the Earth, convert it to the matter state, which then comes down as matter particles like rain on Earth. Then we can reverse the process by taking the matter state and converting it back into fields and energies and then back to Cosmic Rays).

(This process is not known by the World of Science of today. We are teaching our scientists to gradually be able to understand each (process) separately, and how they convert and are connected. I presume in the near future, because of KF knowledge and through the trials that have been announced this week, we'll see an end to the cycle of creation of these energy centers, which then convert into matter and (can become cancers). By understanding the Totality we can convert these matters back into the energy state).

(A similar conversion occurs in the womb of the mother. It takes Calcium (Ca) from the hip area to be ready for the possibility of a child to be born, which will then become part of its bone structure. (The Ca crosses the skin of the child and creates the bone structure of the child. It's a conversion of the plasma state of the Ca into its Cosmic Rays, which then enters the womb of the mother. The CR convert to the skin of the child, and then field forces convert it to the right strength needed for the bones of the child).

(If the mother doesn't get pregnant then what was taken from the hips as Ca CR energy is transferred to the breast. These Ca seeds are always ready in case a child is born. If the mother goes through an emotion, then this Ca will be converted into milk, the milk is really a Gans to feed the child. But if the mother does not bear a child, then this Ca field will stay within the breast and doesn't convert (into milk). However, if by accident the mother gets hit on the breast, and that changes the fields, then she can develop cancer

there. It's because the impact of the hit can compact the fields and change them. This will create the conditions for the transfer of the Cosmic Rays of the fields of Ca into matter state. It becomes a seed of Ca which has nowhere to go, because there's no child. There is no way to (get rid of) this solid state conversion that is in the matter state. Then it can become a seed for cancer. The CR get converted into matter state and the cancer starts growing).

(When our scientists understand this, then they will be able to transfer this calcification within the breast back to energy, and within seconds there should be no Ca seeds left to form cancer. Very soon through our collaboration with our partners we'll show you a system that can do this. This T should be available to every woman on this planet within a handful of months. At the moment you have to go for a mammogram and take a picture of your breast. In the coming time, the doctors will be able to see the Ca seed forming the cancer and can change the fields with the new T. KF will be involved in the production and manufacture of these systems very soon. You will be able to physically watch the seed being dissolved. We have reached that point of knowledge and in collaboration with the organizations who have these systems. They will be marketed very soon).

(By changing the environment we change the manifestation. In a way, we create the same conditions as the emotion of giving birth to a child. We send the message to the womb of the mother to create hormones to convert the Ca in the hip to energy (of Cosmic Rays. The hip is like a mini Cosmos with the womb in it). Now we understand this technology fully and it's time to release it in a correct way, so that others can understand it).

(It's the three dimensional mammography that will allow this T to come forward. (The 3-dimensional systems will allow us to eradicate all the cancers and it won't matter if it's in the breasts, lungs, liver or wherever. Death by cancer will come to an end)).

(The emergence of the new technology will bring new conditions for life. But will it add to the STM? Will it bring it to the point of creating the 'Supernova' and the release of the energy? Would the maturity reach the point of (the Soul) creating more intelligent beings that live correctly and are just Souls, that will spread across the Universe? This is the purpose of these teachings and sharing the knowledge. (It's not for making better weapons to kill more and pretend to be superior)).

(In the coming time, man will understand the connection between Cosmic Rays, as the M field of the U, and M field of a solid magnet that he holds in his hands. (We have to understand about the conversion and interaction of their fields, and then be able to detect them through the totality of the Knowledge of Creation. (?? It's not the other Knowledge of Creation, which man cannot even imagine). Once we understand this Knowledge, our eyes will open to the new Science of the Creation of the Unicoise. At the moment this knowledge is beyond our understanding. We are still battling with it, (in the name of the fake religions). How can we bring it peace to the U in the name of the man?)

(Man should understand that his life is but a speck of dust in the operation of the Universe. It's like a grain of sand in the desert. (If we understand this, then this grain of

sand can convert and become life, or this grain of sand can hit the eye and create blindness. (It can give life, or take life. To what extent can we convert this? And what is the tool for conversion?) Man created confusion for himself by creating so many names for the same process. His science and technology has become confused).

(All the governments are claiming the emergence of a new technology, and it's now in their hands. They are talking about KF Technology, but they're ignorant to it, and this is how it should be until we mature enough Souls. Once we mature enough Souls and when they become open to it, then it will become a tool of peace. (Because presently the governments are only thinking how to possess the T so they can show their power)).

(In understanding this, you come to understand more about the Totality of the Creation and how you have to understand the totality of the process. (It does not matter at what level, condition, position, or what ?? field strength one is at. What matters is your power of understanding it. As I always say, every man will take from this T according to his intelligence. (And by intelligence we do not mean what job a person has, or whether he has a PhD, professorship, engineer, road sweeper, or a president. We mean whether the STM is enlightened and open to the Knowledge of Creation and nothing else. It doesn't come from being a priest or a teacher. It can come to a peasant farmer living in a tiny village).

(Most probably (it can come easier) to a farmer who lives alone in a remote village, or a shepherd whose only job is to walk with his sheep for days on end. Since he has nothing else to do, he goes more within himself, and finds out more truth about the Creation. He starts to understand how his life works, he observes how his animals behave, and learns that their behavior depends on what kinds of grass they eat. Then we understand that the shepherd is more enlightened than all the 'Einstein's' of this time, because he understands the process of Creation. He has the time (to observe and be present). This is why some of our prophets were shepherds. (And their enlightenment came from having the time to think and be with things). They had the time to analyze the truth about Creation. And they were not filled with all the fallacies (about life that we have been fed). Because they didn't read books, instead they read the 'books' of the truth about Creation, through (observing how the fields interact). This is why some of our farmers and shepherds are more knowledgeable about the World of Creation, than our professors, heads of universities, and our leaders). (They came to understand the process of the interaction of the fields).

(I had the privilege to meet people like this in Africa. Some of the old women know about the different seeds they plant and how to use them under certain conditions. At the start of spring they remember how the winter was, and can say how the spring and summer will be. Based on these conditions they decide which seeds to sow for that year. but they never went to University. They can't read or write but they understand the process of Creation. They know about the interaction of the fields which creates a winter, and how they will interact with the fields of the atmosphere to create the next season and the season after. The enlightenment comes without degrees, professorships, and without Prophets).

(This is the knowledge we lack, and what we lost when we decided to change and become a civilization. We actually lost all the realization of the truth about Creation. (Man didn't really become civilized. Instead, by becoming so-called civilized, he is just an animal that has lost all of his connection to his own creation). (This is why we find artifacts of ancient civilizations we can't understand how they did things, and it becomes a big mystery to us). Those who made those civilizations had time to understand the process of Creation, (and that's where their knowledge came from). On the other hands we who say we are civilized, actually lost that realization. And that's where we are today. And to prove that we are more civilized, we create better weapons to kill more).

(Now you understand how simple it is for any of you to become more enlightened. You only need to understand the process of your own creation, how you were created and nothing else. All the fields of the Universe, some of which originated from the Creator, are within you, and you are connected to them, and they don't exist without you. Because your Soul connects (each fields to the other fields), and if you are not there, they lose their connection. (?? The knowledge we have of the matter state is added to the Universal Knowledge)).

(It's the responsibility of all the Knowledge Seekers to understand this. (This is why) we showed you the Nano material, Gans's, interaction of the fields, and explained about your source of energy. Now it's for you to interact with your own Creator. (And it's for you to understand how you will observe it, connect to it, and share the knowledge with all beings within the cycle of life). It's for you to mature enough to understand how it works. It's like when you look into the sky at night and see nothing, and then suddenly you see a star. That star is connected to you, and you make a connection with it. That star could be the Soul of your lover, your child, or the Soul of the Creator (STC). It depends what you understand from its interaction).

(Try to understand (how to distinguish) between the fields. Try to understand the connection between the fields. Try to understand the conversion between the fields of Cosmic Rays and matter state rays. If you manage to unravel this, then you have unraveled the process of Creation and you will reach the everlasting life. This knowledge, structure, and field absorption, sits within the skin of every human. It's just that we haven't realized how to operate and use it. Or how to move out of it, when the time comes).

(We've seen snakes shedding their skin and emerging with a new, more vibrant structure for their life. The knowledge we have given you, should make you to be like that snake and change your skin. The change of the skin is physical, but the change in the understanding of the Knowledge of Creation is through the STM, and it will become that transition, and that change. (It will be contained within you, but strengthen to understand more about (Creation). You will be able to absorb higher and lower strength fields and to increase the intelligence of the Man. This is how life can be eternal)).

(The way (some sea animals go from one shell to another), you can go from one Soul to another, and add to (?? the knowledge of) that Soul. Then by strengthening the position of that Soul, the next cycle of life you create will be more intelligence and have more understanding. Maybe your Soul was a shepherd at one time, but you never managed to transfer the Knowledge, and so your knowledge stopped there. (But with 'shepherds' like us (Messengers)), we know how to transfer, and how to move on, and how to add to another Soul, so that they become more understanding of the World of Creation).

(I hope you understood today's teaching. We'll try to open the horizon of the knowledge so that you can understand the connections. It's for you to facilitate how you create systems, and how to add to the work of your Soul's knowledge and connections. Otherwise, you'll need someone to build a system for you to train yourself with it. It's all in progress. But it's all for you as Knowledge Seekers to make that progress).

End of Quick Index Part 1 - 537 KSW

(For those of you who are participating in next Friday's Monthly Flight Session try to get yourself ready to understand about your emotions. Try to understand what really you expect from Transmutation. Try to analyze what you came here for and what is your purpose. Because for the first time you will sit in the 'drivers seat' and command the flight from the very beginning of the session. We will create the environments for you to achieve, and wherever you go or don't go, or whatever you do or don't do, it's totally up to you and the clarity of your own Soul, and with your own emotion. This is the first time we'll have nothing to do with (how you make the experience). We are just the operators of the flight system, and (each one of you are the Captains). If you want to sit on your head on the chair, put your seatbelts on, or run up and down the corridor of the flight of life, that is up to you. Nothing will be coincidental. Whatever you go through, see or feel is what your Soul, in interaction with the Soul of Physicality (STP) has decided for you. It may be unknown to you. If you are able to create a direct 'clarity of connection' between your STM & STP then you can pre-determine where you want to go and what you want to do, and how you want to manifest yourself. For the first time we'll let you go on your own. The feeling this time will be totally different than other times. Because this time we'll immerse you in Cosmic Rays. Which means you are already pre-set (??) and it's for you to decide what to do and where to go).

(You have a week or so to determine what you want to do during the session. (Those of you who are ready after the past 6 months will take the 'flight of fancy,' meaning you can go wherever you 'fancy.' And then let us know what happened. Did you go and kiss your friend on the other side of the world, and they said they felt it. Or you left a rose on their bedside and they found the rose, but didn't know where it came from. Try to bring the rose back, but not necessarily in the physical form. But be able to manifest it at the time, place and position (TPP)).

(Next Friday will be the session for your flight of fancy. Let your Soul take you where you want to go, as you've been training for the past months to do it. I hope we'll see many of you enjoying this trip. In a way, we have tied a rope to your toe so you can't go very

far, and we cannot lose you. We know how to do it, and you will understand soon, how it works. This is the first time we have given you this chance to understand it's you who's doing it, and it is not a dream, it's a reality which you have to face, and everyone will be faced with. And if you go somewhere and see something bring it back and see if you (can manifest the energy of it). If you can't, it means you haven't yet learned the conditions of transmutation, and the transfer of the energies of CR to matter state. But it needs practice. Enjoy yourself next week, but start getting ready for it now. It's like when you are going to take a trip somewhere and you start packing your things ahead of time. In this process, we'll come to understand the whole concept of transmutation).

(The KF Wellness Centers (on their own) are set to begin trials to work with new conditions. They'll choose 20 cases of each and start this week. They would like to test how your Wellness changes in respect to (certain) conditions).

Q: I want to know how to work with the light rays. Do we use light entanglement to transmute and transport and for communications?

K- Entanglement is the beauty or attributes of the Magnetic fields. (It doesn't matter if it's a light, CR, or matter state Magnetic field. (The light we see is created when fields interact with each other). So they're already entangled at a given strength. You cannot change this strength, because that it's a visible sign of the light and you see it as a light. (In essence all magnetic fields have the capability, and work through the operation of entanglement, and it does not matter (if they are a plasma, matter state, or a transition point). They're entangled with somebody (or something) and that's why they're in motion. While they are in motion from A to B they release energies of different orders, which we call, Magnetic fields in motion and they give (off) energy (when they cut through some atmosphere). For example, the meteorites we see are cutting through the matter state, and the force of the motion of the Magnetic fields of the Earth. This creates resistance and the light we see them as).

(A big principle for KS to understand is that when we see lights as daylight, we are really seeing plasmatic field interaction (and not a physical light shinning on us from the Sun). The light we see from meteorites as they enter the Earth, is a combination of both plasmatic and matter state M field interactions. They create a light and then they create a condition of matter. It's a combination of the two. The material in the meteorite not only cuts through the matter state of the atmosphere, it also cuts through the M fields of the environment that is created (from) that M field. When the scientists understand this distinction then we'll be able even to tell what material these fields are created out of through its plasma condition, because (they can change into different matter state conditions, and (into) different matters)).

(It's very interesting how in the future our scientists will create this distinction, and understand the variation. Cosmic lights will tell us which part of the U the materials burning in the sky come from and what matter they contain, and what their condition is. They will be able to tell if the meteorite was part of an energy, (that ?? on the boundary of the Solar System (SS) interacted with some Cosmic Rays and what the conditions

those Rays were (made from). But this needs a lot of development in our knowledge and science).

(The fact is, that the fields are entangled, and that's why they are in motion. Otherwise, if there is no entanglement, then there is no motion. The light is part of the spectrum of that structure of the motion of the two fields, going in two different directions, and to two different points in the U. Somewhere in the middle they met and 'rubbed shoulders' and created a residual field, which we call, light. This all comes from entanglement of the two (fields). Sometimes, the fields could be targeting each other, but in a way, the point of interaction is somewhere else).

Q: I simply want to thank you and the entire Universal Community for the knowledge we are receiving and for the happiness of being able to be together with you on this wonderful path to the elevation of our Souls. I wish the Creator is always protecting and blessing you Mr. Keshe. I also wish Mitra's daughter all the best and I hope we can meet her as soon as possible. Thank you very much Mr. Keshe.

K- Thank you very much.

Q: What is the purpose of the pancreas in the body of the man? What psychosomatic conditions can lead to damage it?

K- (The pancreas has a very direct and influential 'game to play' in the conversion of the matter state energy into an energy the lymph can absorb. The enzymes or whatever it produces creates a bandwidth (and tells ?? the liver and the brain tell what the body needs to absorb). The materials that the pancreas releases into the digestion system tells them (what to produce or change the production to). For example, let's say we have too much Calcium (Ca), or rather we don't need it at this particular field strength but at another, which is made at another point in the intestine. (Remember that each little section of the digestive tract makes elements or plasmas at a specific field strength that is needed). (?? So these enzymes give messages of what is needed and where in the intestine to get it from). Different field strengths of elements are absorbed from different positions along the stomach. The highest strength Ca is absorbed at the beginning of the stomach and is used mainly for the bone structure. The Ca absorbed further down the intestines are used for a variety of different things. And the energy for blood cells are absorbed from another position).

(Different section of the stomach responds to the plasmatic environment created by materials from the pancreas, which releases its energy (into the digestive tract). If there is no need for those materials, and no orders come from the brain to produce it, then it simply passes right through the intestine and goes out as waste. The feces go out as excrement. The pancreas is like a factory for creating materials that the body needs. It pre-determines what is going to be digested as an energy transfer and this will come through the walls of the stomach and different positions along intestinal tract).

(If the pancreas gets damaged and part of it doesn't function, then those materials that should be produced through the damaged part won't get made and they won't get absorbed by the body. Or if you take part of the intestines out, then the body will lack certain materials in its structure, even though the pancreas still produces it. It's because the filter for making that material in the intestine is not there).

(There's a very interesting test that doctors (can do to find out which parts of the intestine are damaged, for example if B12 stops being produced. They can find out which part of the intestine is damaged). (And in a certain illness the direction the excrements goes gets reversed and instead of coming out the anus it comes out the mouth. This is a very rare disease that we had the opportunity to physically see some years ago)).

(The job of the pancreas is to create certain environmental conditions ?? along the digestive tract to create the fields for material creation of what the body needs. If we compare that to the solar system part of it would create the condition of Jupiter, another part would create Saturn, where it only absorbs high Helium, and other parts create Mercury and Magnesium. The pancreas creates environmental conditions for the intestines, and it has no other function, but it's the most important function. This is usually why pancreas cancer leads to liver cancer simultaneously in some cases. Because wrong materials are absorbed and then deposited, because the energy has already changed at the liver, which can be considered as also the wrong energy in the pancreas. (One ?? transfers to the other because they have the same energy base)).

(We have understood this fully for years and it's very easy to manipulate it. We can still live with (the limitations). As most of you know 2 people setup up an operation to kill me through poisoning, one of those people died and the other is still alive. They damaged my pancreas and consequently the liver. This was more than 15 years ago. I have managed to create a condition through knowing what to do to change the (work of the) pancreas. It's still working in a normal condition. But I know immediately when certain conditions change its function).

(You can see the operation of pancreas and liver in the color changes in your stool when you go to toilet. In the final stages of (the operation of the) pancreas during liver cancer, you see how the color changes in the stool to orange, cream, or whitish color. This is the very last stages. Because certain chemicals are not being produced by the pancreas, and they are not absorbed by the intestine. But you can live with a pancreas and liver cancer condition for years. I've done it since about 2009 when I was poisoned. When I see the color changes in the stool I know I have touched something which creates that condition. Then I look to see what has created this condition. Then you avoid that food, because if it continues it can create other problems).

(The pancreas operates through enzymes, no matter what World of Science says about it. It creates certain M field conditions of the 'reactor' parts of your intestine to absorb certain fields for certain operations of the body. (It links to a position, or goes through the operation of the bone marrow, absorbing, crossing the wall of the bone, and then going

through the bone marrow, to be delivered in a combination of the things as blood cells and everything else).

(Science has not even understood how the pancreas effects the creation of the red blood cells. Why do we call them red, when they are actually transparent? When they come in contact with Oxygen they change color to white, or the light changes into the color of red. The blood is a common denominator mixture that every cell of the body can exchange energy with, to create an interaction with the information from the neural system, the physicality of the Gans, into the condition of cell. This is why we have a blood circulation. It doesn't just go around for the sake of going around. Its fields interact with every cell in the body for energy transfer. The basis for this is decided by the pancreas. If it doesn't work, it doesn't create the right conditions and you'll have problems. When you take the pancreas out, the field interactions in the body change. The stomach and intestines will try to create M fields for absorption, and after a long time it will become a permanent feature. Sometimes they create condition for ?? extraction, but they can't extract what it needs in the same way as when the enzymes are there).

Q: (A KS came to realize the importance of the teachings and asks Mr. Keshe to specifically tell him where he should start the teachings, at the beginning or where we are today. (Maybe his fear is that there is so much knowledge that he will be afraid that he won't be able to catch up). And he wanted to know what he needs for his personal mission).

K- (It does not matter where you start. You can listen to today's teaching and be enlightened, that it would cover the last 10 years of teaching in an instant. That is if you understood it. Or you can start studying from the first Book (and the first KSW) and start to build (a solid) base to be enlightened. It's really a matter of how much you have educated yourself during your lifetime, and how much prejudices you carry in respect to the knowledge you gain. (In other words when you gain some knowledge do you become proud of what you learned and stop your progress there? Or become humble and understand that there is always more to learn?) (It's not like our normal education system where they have made up a beginning and an end for our education, and you really shouldn't go beyond that). In Knowledge of Creation there is no point of beginning, rather there is a point of understanding. It's about what you have understood about your life and how you can add to it).

It's not evolution in science, it's an addition to the science. (This is where you have to start. (First by understanding how much you already know, and then add to it. And also don't have any prejudices and preferences about what you have learned before. Be open to discover). This is the best advice I can give you. (It's up to you in what you want to learn and how you want to approach it)).

(As I keep on saying, we are not a religious organization. We are totally scientific based and (we teach you how to understand the science yourself). If you touch the ethics of the use of science, then it becomes theology. Then we have the theology of the Plasma, and the theology of your own conduct, and nothing and nobody else's. Once you understand

this, then it gets ingrained into your main structure, or Source of Energy, (or what we call the Soul). Whatever you call it, it's going to carry you across the Universe. (It doesn't matter at what point you are in the knowledge. It's always an asset that you can add to)).

(If you want to go back and learn how to make Gans's, and the rest of it, that's good too. (Because many people have a difficult time to believe in the energies and the fields. Therefore it might be good to start at the beginning and learn step by step. Then you will have first hand experience of Gans's and when the professors tell you that Plasma Science is all nonsense, you will know, because you have made and felt them yourself. And they have not because of their prejudices). It all depends on you and how open minded you are about the Science of Creation, which actually created you. Then you will understand more in depth how to handle it).

(A Soul that matures within the womb of the mother will come out and have no need for physicality. Or another Soul may live on Earth for a hundred years and still not mature leaving it with a dilemma. It all depends on what you want to take and what suits you for which part of your life. (When you learn the knowledge, then it is there when and where you need it)).

(There is no beginning or end in this education. You can read from the beginning and understand it. (Or if you can understand the essence of what all these teachings are about, then you are where we are now). (We are trying to learn about the fields of the U and how they interact, and to develop the capability to interact with them, and to be able to produce them, and have the capability to control them. We are in this stage of the evolution of the science. (Understanding does not need intelligence, it needs maturity (of Soul). Intelligence belongs to the matter state physicality of the man. It's how much you understand, and how much you can apply it, and that matures the Man)).

Q: (A KS was talking a lot but Mr. Keshe didn't understand what he was trying to say).

K- (When you share knowledge it depends on who receives it, and which way (they receive it), and then what they do with it. (People can read the Books and the patents). (We don't teach you to do things anymore like we used to. Instead we teach you the knowledge and it depends what you take from it and how you apply it. And whether or not you understand the essence of the truth behind it, and that's all it is. Once you understand then the knowledge is not yours anymore, because in a way, you have become enlightened). This is the whole point of the teaching, for you to get enlightened to the truth about yourself and Creation).

(I remember a beautiful situation. There was a case of a housewife trying to explain to her husband about Gans's and the fields. And he said to her, "I'm a PhD in physics and what you are saying is all rubbish, it doesn't exist." They used to continue to discuss it and then one day she explained something to him that she herself really understood because she experienced it through the fields. Then something 'clicked' inside him and he said, 'how do you know this? Science has been looking for this understanding for ages. And she said, 'oh, I listen to Mr. Keshe's teaching and it comes in the first few

workshops. Now he's one of those, what I call, Knowledge Seekers who don't miss a teaching.' He said, 'I studied and taught physics and I wasted my life with it.' So the Knowledge of Creation doesn't have degrees, and you don't need degrees, professorships, or whatever to understand it. You just need clarity of understanding the process of Creation and that's all).

(The Knowledge can come to you at anytime. It could be in the middle of the night, or while you are eating something, or in the middle of jogging. It's interesting how each one of us take from this Knowledge according to what we need, and when we need it. It's like those 'French Spanners' (a 'Monkey Wrench' it's adjustable to any size). we carry in our pockets in case we need to loosen a nut of any size. If a need arises then you have something to help yourself with. Or we can call it, a 'Swiss Army Knife' of knowledge, and when you don't need it you put it away in your pocket. If one day you accidentally burn yourself you have the CO2 ready to go and you just apply it when you need it. Your Gans's are sitting there ready for energy transfer when you need it. When you understand the essence of the knowledge then you can use it. But we don't need to use it all the time, only when there is a need).

(We all know Mario who used to be everyday in the Linz KF Exhibition Center and he would guide people through the Center and teach about the T. He will open up one of the 'KF Shops' and there are a number of KS around Europe and the world that will start doing this. Mario will start with doing a teaching about KF Technology on May 25th. This is the beginning of this new phase in spreading the T. We wish them success. And all of you can think about doing the same, because you never know who you will touch with the knowledge, or who's sitting there with you).

Q: How is it that Cosmic Rays come into play with normal plasmas like Gans and other states of plasma?

K- (It seems that there is a slight gap in the knowledge and it has not been fully passed on. Gans's are creator of (CR). They are part of the whole structure of Cosmic Rays. (You are made of CR and so is the coin in your pocket, the apple you are chewing, and the water you drink. They are all part of the same (thing). (Their physicality can be seen and they are tangible to your body, because of the different conditions of field interactions within the Cosmos of your physical body. The body is like a Cosmos in itself). If we even slightly change the composition of the Cosmos of your body, then the apple you eat could change to the taste of a pear, even though you're still chewing an apple. It's because of the perceptions with the field energy. (We associate a particular smell and taste with a particular field energy we know as an apple. But if we make a small change in the environment of your body, that apple could taste like a pear). (All the conditions in the body are dependent on how we create it, (with what field strength)).

(Otherwise, everything is made from Cosmic Rays and there is no difference if it is a Gans, stone, apple or your body, they're all part of the same Cosmic Rays. We are traveling in a package called 'Earth,' or in a package called the 'body of the man,' (while at the same time traveling through the Cosmos. We are just another part of that 'Ray

structure' going through the Cosmos. Somebody who doesn't have the same field strength of the observation point of the matter state as we do, will not be able to see us. It's as if we don't exist to them. They just walk right through you, because our field strength is not part of their interaction).

Q: (Since the Plasma Technology is the expansion of knowledge that is already here through the plasma fields, then can we become aware of the Creator within us, and therefore understand our purpose in life? Or does it depend on whether or not we are ready and have evolved enough to take that first step into our own Divinity?)

K- (Enlightenment doesn't need for you to be evolved. Rather you have to find the path to it yourself). (In other words it's not like getting a degree from the university, where you have to do this and that, and then somebody says you are enlightened. These ideas all come from our conditioning, and they are in our subconscious).

(Mr. Keshe gave an example for enlightenment, as like when each of us make a pizza. We will all make the pizza in our own way. And we'll change it the way it suits us and the way we like it. We choose the path of how we are going to put the pizza together in accordance with our own taste. (?? Would we be happy with it, and our own conduct, and our own expansion? Can we use it to enjoy our time? What does it create inside us? Do we need to test it and prove that it is right for us? Would it bring us to the next step?)

(He gave the example of the children going into the salt cave and they had to lick the walls to be sure it was salty. They didn't believe what they were told or what they saw. They had to experience it themselves and then they believed it. This is how we are as human beings. It depends on the point of maturity of our own acceptance of things. Sometimes we have to test it to believe it is real).

There is an experiment you can do with children of 1 or 2 years of age. Put salt and sugar in front of them and try to explain which is salt and which is sugar, but don't let them touch them. In the brain they know the taste of salt and sugar, but visually they cannot tell the difference. When you ask them to put their finger in them and taste them, for a while they'll be confused between which one is salt, and which one is sugar. (I think he means, that they are confused because before it was a concept of salt and sugar, and now they have it in physicality and so they have to distinguish between the two, because they look very similar to each other. It's the same with understanding the Soul and P. They are very similar, but have a slightly different structure. It depends on what you want to taste, and which dimension you enjoy more. And now man will have the choice of being in the Soul or the P, even though they are right next to each other)).

Q: If my thoughts can be transmuted from negative to positive, how do I attract the Cosmic Rays through my thoughts, using my thoughts as a magnet to attract the fields of the Cosmic Rays or vice versa, the other way around? Is it possible? Where do I turn my thoughts towards to start the process?

K- (The thoughts don't have positive or negative. It's just point of view. This is the way I look at it. What could be negative to you, might be positive to somebody else. We have to understand this process. This is the change we need to understand. And then you can decide which way you want to go, and how you want to interact).

(Nobody can dictate it to you, it all depends how you can extend that position. In the very near future, I will teach you how to actually create a condition of transmutation for yourself automatically, and have it every second you need it. But right now I just don't see Knowledge Seekers as being mature enough to understand it. It can be transmutation of the Soul, or total physical transmutation. You just need to understand about your own physical and energy structure. You can decide to be in the physical state or go through the Energy. We all know it already, we just have ignored it).

Q: You mentioned in the 534 KSW that we take too much Soul, and give ourselves 'cancer of the Soul.' (It's an energy pack that transfers to P but I don't need it). I cannot understand the meaning of these words accurately. Can you explain it further please?

K- (When we say cancer it doesn't mean a tumor like you're used to thinking. It means (that there is an energy that you are holding onto that you don't need). And it can lead to your demise, or it can change the strength of (your) fields. Unfortunately we don't have the exact words in English to explain it any other way. (When you get cancer, it means you're attached to something you don't need. It's not necessarily a tumor or a cancer). In English (we can use the terminology of cancer, and say it's like a cancer, (but it really means it something you don't need that can lead to your demise). (In the same way an interaction of the fields could create a condition that you don't need. It is something extra you have, but it could also be very advantageous to your physicality)).

Q: In the last workshop you showed graphs of the physicality of the STP and of the STM. When is it possible to see the graph of the STC. When she is present?

K- I think you have to learn to walk before you can run. The time will come you'll see it yourself, you don't need the dimension of a system. But within that system we've shown it, if you understood it. (The principle of the teaching sits, in essence, (with) the seed of the STC)).

Q: Isfahan in Iran is to host the first International Nuclear Science Conference, the 30th Iran National Nuclear Conference, and the first International Nuclear Science and Technology Conference. Do these occurrences have anything to do with KF?

K- (This conference was held this week in Isfahan and it's the first time Iran has had an international conference in Isfahan. I raised this question with our Iranian partners. How come since we announced that Isfahan will be a point of showing the first Plasma Technology in Iranian nuclear centers, then suddenly the government jumped on it. It's an intriguing question for me when I first heard about this. But it has nothing to do with the Keshe Foundation).

(Since the 'accidents' we had with Israelis hunting Iranian nuclear physicists, we have kept away from sending scientists to International conferences. There was a nuclear 'something' conference in China and scientists from all over the world attended, except Iran. Then I raised this question with my authorities immediately).

(KF Space Technology will hold a conference in Isfahan later this year. We'll invite heads of states to see breakthrough technology. He mentioned something about IAEA and the '5plus1 negotiations with Iran. We sit in a very peculiar position with the Iranian government and a lot of the things we advise are followed, and we see them being implemented. This is probably one of them).

Q: One day after the Monthly Flight session I had an experience that I never had before. I was at home and at the same time with my mother, who died a long time ago. Until then I only had this experience separately, but now, it was as if two rooms had become one room. It was wonderful. Can you please say something about that?

K- (We hear these kind of things from a number of KS who've been with us in the past sessions. You are not the first one. (This happens when you accept the existence of both the Soul and P together. It's like your physicality is here and the Soul is somewhere else. For example, if you're crossing the street and a car is (about to hit you) and suddenly your body gets pulled back. It's the Soul that pulls you back, with its 'energy hands.' It doesn't want the physicality to be damaged. (Now you can learn this as a normal part of life and you won't go crazy. You are seeing the operation of the Soul and P in their own dimensions). This will become normal. (It's not clear) ...

(We don't need to wait to dream to be with our Soul. We can become fully aware of both the Soul and P, but also we shouldn't mix them up)).

(You're not the first one who has gone through this experience. You have managed to open up the dimension of the fields which connects to your Energy Center, or Soul. And you didn't need to go to sleep and dream, to deal with your mom. You broke that barrier (between the Soul and P, and the Soul is always with you). This is happening to a number of KS who've been (attending the Monthly Flight sessions regularly. They have come to understand the distinction between the Soul and P, and how and what it is. (KS have told Mr. Keshe that they are learning to integrate into their life being able to live with both the Soul and P. We have denied it, but now we are gaining access to this new life through the T. But be very careful, and don't let them tell you, you're crazy. It's for you to understand, and you have the capability to live and confirm the existence of being in both dimensions)).

Q: Thank you for bringing peace on Earth. I have flashes of light coming out of each of my eyes, and they form a half circle of light (and I can see in the dark) to the left and right. For years I have had light coming out of my body at night and it completely illuminates my room, and this light accompanies me to the toilet, without having to turn on the light.

K- (This will become a natural way of living (for all of us in the future). People will be able to expand their energy fields (and be able to see with them). We used to do this as humans hundreds of thousands of years ago. It's nothing abnormal. (It happens when you have control over transferring your energy, or increasing the energy of the environment). Or it can happen because you have reduced the interference of the fields of the blood circulation within the body, and this allows the internal energy to interact with the fields of the Cosmos, or the environment, and it creates a light outside of your body. It allows you to physically see in the dark).

(These things will start to become normal for a lot of Knowledge Seekers. A number of Knowledge Seekers have achieved this. The first time it happens they get shocked. One KS said he hid under his blanket, but the light was also there, so he had to accept what was happening. This knowledge has always been with you but you denied it. Now we will gradually start seeing the beauty of it. One by one KS will start having these experiences. It's like all the new experiences you had while discovering how to make Gans's. Now you'll learn how to interact with your own fields, with your environment, and with the Cosmos. As more of you start experiencing these things, then we'll explain more).

(It's nothing strange. It's the interaction of the fields of your body with its environment. This is the same way the daylight is made from the fields of the Sun & Earth interacting. In this one you'll see different color lights depending on your emotion. You're not the first one. A lot of people have started telling us these kind of things. It's normal because you're learning these things and because many of you are in touch with the Gans's and gradually you'll develop this).

(When I hold CO2 Gans in my hand I can feel and taste it. Soon some of you will tell us that when you hold an orange or an apple in your hand, and you can taste it and feel it. But then you put the orange back where it was, because you have received everything you (needed) from it, (and don't need to kill it). Some of you are on that way, by what we hear and we know what the next steps could be. So don't be scared, it's part of the process of you (interacting) with your environment. (It's not magic. And other people won't see the light you see. Because it's the strength of your vision, and that's why you see it. You can't become a torch for the others to follow. At least not now, but maybe in the future. (At this time you have to learn more yourself how to do it)).

Q: (Is it possible to transmute metals and things out of the body with the T, instead of doing surgery?)

K- Yes, it is possible. (A KS did it a few years ago on a dog in Italy. Shrapnel was taken out of a dog. It is possible. It might take a couple years to develop. It's possible even today, but you have to know how you do it).

(KF Wellness Center has announced that they will take 20 new cases, especially what we call, the 'special seeds.' He means cancer and other things. The time of heart and brain surgery is over. We have to teach enough and develop the physical technologies enough

so they can be implemented in larger scale and we are busy with it). (He said something more about calcification).

Q: Is there the 'Soul of emotion'?

K- No. (It has a Soul, but it's the interaction of the fields)

Q: Are plants capable of having several Souls, like the 'Beautiful People'?

K- Hmm. If they decide to.

K- (I hope you have shared with us through your Soul, and we have shared with you through our Soul and voice).

End of Quick Index - 537 KSW May 09, 2024

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:20)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers program from Keshe Foundation Spaceship Institute. As usual, as is tradition, we welcome you back, and we hope we can share more knowledge, and understand more about our own creation, and how we are created, and where and how we operate.

In a way, as I always said, the body of the man is another Cosmos, is another Universe (U). It's just for us to understand how this Universe work. It's for us to understand how we transfer energies of the Cosmos or Unicose in the vacuum of the body of the man, in allowing it to operate. (:22) And like that every star comes to this step to, in a way, to dissolve, to open up, to lead to creation of fields which he gathered for new life, it's the same with our lives, our physical life. We are one of those star, created, gathers energy, and then it goes through a Supernova, we call it 'death.' And it has some residuals, some physical bits, and in essence, what we call Supernova, that a massive energy is released. That rays of energy, we call it the Soul of the Man (STM), when it's releases from the body of the man. And then, we have created different names for the next steps, 'white dwarfs', 'black dwarfs' and the rest of it. But in fact, there is no difference between the process and the time of what we watch in Cosmos.

When we see in the star explodes a physical dimension (D) of it and it just becomes a huge energy and this energy released in dimensions, lead to creation of other lives in the

space of that Galaxy. Or when the Galaxies hit each other and come to that point of galaxial Supernova. That is again, as I said, we have chosen too many terminologies for the same effect. The Supernova is the man's time of death. It's the same. We see some white bits left, we call it the bone afterwards, but in essence at the point of the separation and the explosion, when the energy increases to such a point, the Soul, the energy of the Star, releases itself into the atmosphere, (:24) into the environment of the Solar System (SS) and the Universe. And if one day man learns this, man would understand that every death is a Supernova, doesn't matter if it's an ant, a man, a dog, destruction of a stone, or cutting of a tree. We release energies which holds that entity together, operates to look like a stone, to look like a man, to look like a dog, to look like a tree. And at a point when physicality (P) reaches the point of maturity of the Central Energy to the Supernova, which is death of the man, we see the separation and one leaves behind what it was age, or was the process for it to evolve.

One of the biggest mysteries for the world of science of today is, can we capture these? How we capture these? And, when a Cosmic Ray (CR) is on the path to another point or position, which is attracted to, can we capture it? Those we capture, we deny. Those which become part of us, we have deliberately ignored. As I said many times before, when of this time, astronauts saw flashing lights in their eyes, those cosmic rays, which in balance with the salt salinity of the liquid of the eye of the man, converted to photons, to energies, be captured a 'Ray of the Creator,' most probably in one of them. (:26) And would that brought enlightenment to the one who captured it, accidentally or deliberately?

Man has tried again as through his ignorance, because it gives it a position of being more intelligent, has called these neutrinos. But, again through the same ignorance, they have gone to the depth of the mines, and to the depth of the earth and in different laboratories, created facilities that try to capture neutrinos. Because they never understood that water tank, that facility they created, is in the body of the man, the brain of the man, every cell of the body of the man, your liver, your kidney, is one of those tanks. Because we never understood that we absorb 80% of our live energy through the Cosmic Rays, through the environmental energy. And this has become the biggest, what I call, ?? I've seen in the world of science. We talk about the astronauts seeing the photons and we deny it. And we go and set facilities in the deepest part of the Earth that'll be a pure light. When this photon goes through the Earth we can capture it and we say we've seen it.

If these scientists give Keshe Foundation facilities, within minutes, I show them so many photons in the depth of the Earth in these tanks, that they'll be puzzled where they made a mistake. They have not made a mistake. (:28) What they don't understand, is the truth about conversion of matters, energies, fields, Cosmic Rays, Magnetic field rays and their separation. And this is where the ?? World of science will suffer, till come to understand.

Coincidentally, accidentally, or what, purposely, by the wish of whatever, as we speak today, as we heard in the Intro, about the creation of the Cosmic Rays, the way it's done in the Universe, creation of energies, today is getting tested in the labs of the Keshe Foundation. And our scientists are observing. How the game is played in the world of

Creation. How, when you create fields in the matter state, it's different when you create fields in the environment of the body of the man. And when we understand this, then we come to a point where we can dictate life. Keshe Foundation, this week through the Wellness Centers, has released the condition, that to, for them to test for all conditions which has been unsolvable for Wellness of the man.

And, because now our team is ready to move to that stage. Our team is ready to create life. Our team is ready to create life the way it's done in the Universe. You, as we said, have the fields of the energies of a fish, in the atmosphere of the Earth. (:30) When you create the right condition, at the right depth, with the right environment of the water, you see fish where there were never fish before. And they're always the same. Now we understand that process. Now we understand, the reason that the fish appears in the water wells, or in middle of nowhere, is not that there was nothing there. It's just because the seed, the eggs of the fish in the past, on every corner of this planet, was seeded. All this land we see, sometime was under the water. And inevitably, the magnetic field environment of the seed, of the life, is within it. If man understand this, and if man creates the right condition, with the amount of interactions the man has had and left, the interaction of the seeds and the sperms, in the depths of the Soul of this planet, in these water wells, if we create the right condition, child of man will be born the same as a fish. Because, we understand the process, we understand the principle, we can create that process and this principle. The knowledge has extended to this level. But it's for man to understand.

To separate the Magnetic field in the matter state, and the Magnetic field in the plasma state, and the Magnetic field in the environment of the Universe. (:32) Again, we have chosen the same words, but for three or four different, what we call, conditions and life. In one of my teachings in Farsi, I explained this in a very simple way. You see on the flag of Iran, the lion. It's called the 'Shir'. But, how you understand the interaction of that word, the sentence, brings you to understand what you're talking about. Because 'Shir' is the milk which we drink, has the same word. And then 'Shir' is the same tap where we open the water to come. It's for us to understand how it's used. If it's a lion, if it's a milk, or is it a tap water.

And, this is what our world of science, our world of knowledge have not understood. The separation and application, and the need and the outcome. To understand which way, what sits where, and how this is applied. Are we talking about the Magnetic field as a Cosmic Ray? Are we talking about Magnetic field and the matter Magnetic field? Are we talking about Magnetic fields in essence of connection between the two? And to what extent we understand this separation? (:34)

Now, it's for you as Knowledge Seekers (KS) to understand the separation between the Cosmic Rays, as a Magnetic fields, but in a different condition environment. The change of this Cosmic Magnetic fields into the matter state, that manifests itself as a matter, and then, conditions of where and how some of these Magnetic Gravitational fields, creation of Gravitational fields, that what you call a magnet. And once the scientists understand this, the connection, the separation, and in a way, application of it, the world of science

will be different. Where you will be able to create life in 'nowhere,' and where you can change life into fields to go 'nowhere.' As I said before, before Christmas, we found one of a ?? school of fishes moving from a tank, back in the tube, where it was before. We put this fish through the cycle, and then we returned it back to the original tank, and within few minutes the fish transmuted. Because it went back to the source of the essence of no physical condition.

In a way, when we achieved the first transmutation, this was, even our scientists are so advanced, baffled, it could not believe. (:36) It's like when we say, Oh, I took this Gans, but it changed my condition. But it could be something else, because I still don't believe in what I've done. And then, when we used it a second time, we see the same stuff. Maybe it could be Gans this time.

And this is what we need in the world of science, to understand the transfer, the interaction, the amalgamation, the coordination, and the condition that each fields, each ray, each magnetic line operates, works. And, as we say, entangled. You cannot be a Cosmic Ray, you cannot be a Cosmic Field. And, come, passing in through my body, if you are not entangled with the field of my body, or you are entangled with another field, could be another side of the Universe, you are on the way there, but you get captured, or part of the energy of you, gets released to set off my body, because I create a condition of need, not a condition of grab. And you give and you go. You need some of this, you take, I have enough, I'm on my way.

If our Knowledge Seekers, if the scientists come to understand this point, then you'll find the eternal life. The eternal life comes from understanding the truth about the Creation. And to be able to replicate it. (:38) Eternal life is not exclusivity of Creator. As we are part of it. But we have to understand when and how we manifest ourselves, or we are in transition from one to another. And this is the most important part of the teaching. In part, because it brings the man back to understand about his Creator, his creation and his manifestation. Book number one, Book number two, Book number three. And again through Book number two, back to Book number one. Matter state to energy transfer to manifestation of their fields, and manifestation of the field back to transmutation, to become a matter. This is what we call transmutation.

Again, in the future, I teach you about transmutation of the Plasma, and transmutation of Matter. There's a big difference between transmutation of the Plasma, than the transmutation of Matter. But you can merge the two together, and you can work together, to create both. Transmutation of the Plasma is transferring you and your body from A to B. Transfer of the matter is the coin in your pocket, when we transmuted you, the clothes on your back, when we transmuted you. (:40) So, the knowledge needs to be combined together. The matter state transfer, the matter state transmutation, the matter state transfer and transmutation.

In the teaching in the past, I said, "When we take you from London to New York, you turn up there for the wedding, but no, with no wedding clothes." Because, we couldn't transmute it. You transfer from one cold place to a hot place, you cannot appear in a fair

coat and the boots. Because, the Soul of the emotion will create the clothes, the color you like, and everything else, to befit you at the point of manifestation. Changing and understanding this, brings us to a new dimension of science. The science that man has never known, but has always been there. It's part of its own creation, it's part of its daily operation.

As I said many times before, the present world of pharmaceuticals has a big problem. It tries with chemotherapy to sort out the tumor. But, it has not understood that tumor here, is created through the emotion of the Soul, the brain of the man. And that's why we see the cancer comes back, we call it metastasis. It doesn't metastasize, impossibility. If you sort out the emotion, which is another part, which is connected to Universal field, (:42) is what we call, evolutionary cancer, part of this. That we want to evolve to become part of the other races in the Universe, we have matured and we are on the way to that position. We have a point of reference, we are connected to that point of reference, and we are evolving to reach that point. Be it in lasting life, being in maturity of understanding the world of Creation, we call it the science, or be it to be part of the dynamic structure of the Creation.

As I said before, we try to open this subject of the Creation to Cosmic Rays, that you understand why and how. Is evolution in our life, which leads to some 10% of the cancers, is that we are trying to match, not to grow in one direction, but to match to another line which we have received as an information, as a knowledge, through Cosmic Rays, that in entangling with the other, we try to match, we are getting fed, but we are feeding back something too. And as the body cannot process it, it gathers that energy in one position, that that position becomes what we call a cancer point.

How would our scientists, our physicians, our doctors, and everything else we have, start to actually, by testing the blood of the man, testing the physicality of the man, to tell the patient from day one, "You have evolutionary cancer, (:44) you have accidental cancer, you have what we call emotional cancer." And by identifying it through the composition of the fields within the body of the man, and through the emotion of the man, tell the patient, "This we can do, this we cannot do, this is possibility."

When the knowledge of man reaches to that point, then you can tell the person, we can 100% reverse your cancer. In a way we understand the origin of it, the cause of it, the reason for it, and where we apply Cosmic Rays, where we bring the information which you cannot digest, to untangle the energy balance you call it the cancer in your body of evolution side, where is converted by accident the energy into the matter condition of the cancer cell, we call it accidental, and where your own emotion has created your cancer. And which fields? Can we use Cosmic Rays for all three? Can we use combination of the all three? And then find answer to all.

This is what the Keshe Foundation Wellness Center is now, are under research and development. And we put out for what we call, trials. Because we think our scientists have reached that point, to be able to deliver. The separation between the fields, understanding the Cosmic Rays, understanding the interaction and conversion of Cosmic

Rays, and understanding the position of the matter state of Cosmic Rays. (:46) The way we saw the interaction of the field of the Sun and the Earth, created a Plasma, then through the Inertia of the Earth, it converted to the matter state which showers on us, and then we saw how we converted that matter state into fields and energies and back to Cosmic Rays.

The process has not been understood by the world of science of today. And we are teaching our scientists to gradually to move into that step. To understand each separately, understand the connection and conversion. I presume, in next near future, Keshe Foundation through its trials which is announced this week, will see an end to the cycle of creation of these energy centers, conversion of the energy to matter. And then conversion of matter back to energy. But by understanding the Totality.

The womb of the mother takes Calcium from the hip of the mother, to have it ready for the child to be born, to become part of the bone structure of it, from crossing the skin of the child, and creating the bone of the child. That goes conversion of the, what we call, plasma state of the Calcium, to its Cosmic Rays, which enters the womb of the mother. Conversion of Cosmic Rays in the skin of the child, (:48) converts to the field forces of the right strength, to the bone of the child.

(If the) mother doesn't get pregnant. But the Cosmic energy of the Calcium from the hip of the mother is available within the womb of the mother. But it doesn't waste what is converted. It transfers this energy to where it's always set to be the seed of the nourishing that child if it would have been born. It transfers this Calcium Cosmic Ray into the breast of the mother. If the mother goes through an emotion, this Calcium will convert into a milk, will be added as a Gans of the milk to the child. If the mother does not bear the child, this Calcium field will stay within the breast of the mother, but never converts. Accidentally, mother gets hit by (on) the breast, (it) changes the field. And, accidentally, she's diagnosed to have a breast cancer. Because that hit, that compact of the field changes in the breast, has created conditions of the transfer of the Cosmic Rays of the fields of the, what we call Calcium, into matter state, becomes the seed of the Calcium. But has nowhere to go, because there's no child, there's no way to leak this solid state out. But don't forget, this is a solid state in the matter condition. Then it becomes the seed of the cancer. (:50) Then, we see the growth and the change of energy, Cosmic Rays, matter state to solid state by change of conversion, and then, creation of cancer.

If our scientists understand this, if our scientists go to the next step of the knowledge, they should be able to transfer this calcification within the breast of the mother, back to the energy, that within seconds there should be no seed of Calcium, there should be no seed of cancer. And, in a very near time, in collaboration with the Keshe Foundation, we will show you the system. I hope in a matter of handful of months, this technology will be available to every woman on this planet. Where now you go for mammography, to take a picture of your breast. In the coming time, when you go for such a thing, when the doctors see the Calcium seed, they see the point, what you call, the breast cancer. By use of this new technology, which the Keshe Foundation will be involved in the production and manufacturing very soon, you will watch physically the seed to dissolve. We have

reached that point of knowledge. And in collaborations with the organizations who have the systems, we will be marketing this very soon.

In a way, we change the environment. We create the same condition as the emotion of giving birth to the child, send the message to the womb of the mother, which created the condition to what you call hormones, to convert the Calcium in the hip of the mother to energy. (:52) Energy of Cosmic Rays, but this Cosmos is in the hip of the mother. And in that hip of the mother, there is a womb of the mother. Now we understand this technology fully. And now it's time to release the technology, in a correct way, that others understand.

In the very near future, we will show the system. Where what we call the three dimensional mammography will allow and bring this new opportunity forward. And this will be the same with others. In this process, we can eradicate death by cancer. Does not matter if it's a breast, if it's lung, if it's liver.

The emergence of the new technology brings new conditions for life. But would it add to the STM? Would it bring the point when that Supernova takes place, the energy release is so mature that it leads to creation of new more intelligent, more correct, more just Souls across the Universe. And then, we understand the purpose of the teaching, the purpose of what we do, and the purpose of the knowledge shared.

In a coming time, man has to understand the connection, between Cosmic Rays, as the Magnetic field of the Universe, and Magnetic field as a solid magnet in the hand of the man. Their conversion, their interaction, and once we understand this, we mature to understand the totality of the Knowledge of the Creation in the detection, (:54) not the other knowledge of the Creation, which is not even imaginable by man. Once we understand this knowledge, our eyes will open to new science. The Science of Creation of the Unicose, which is beyond the understanding of the present man. We are still battling it, for the fake name of religion. How can we bring it peace in the Universe, in the name of the man.

This is where man has to understand. His life is just a speck of dust in the operation of the Universe. It's just that grain of sand in the desert. And now if you understand this, this grain of sand can convert and become life, or this grain of sand can hit the eye and create blindness. To give life, or to take life. And into what extent convert this? And what is the tool of conversion? And how by renaming and multiple naming the same process, man have led to his confusion of life, science and his technology.

The emergence of the new technology (T), which is now claimed by all governments, it's in the hand of governments, in the name of the Keshe Foundation Technology. (:56) But they're ignorant to it. Because, this is how it should be. Till we mature enough Souls, that once they become open to it, it becomes a tool of peace, and not "I have and I use it to show my power."

In understanding this, you come to understand more about the Totality of the Creation. About how you have to understand the totality of the process. It does not matter in one level, does not matter in what condition, does not matter in what position, in which field strength, in which, what we call, power of understanding. As I said always, every man takes from this technology according to his intelligence. And this intelligence does not carry by the PhD, the professor, the engineer, the road sweeper, the president, but by the enlightenment of the STM. And enlightenment is openness to the Knowledge of Creation and nothing else. It doesn't come to become a priest, to become a teacher, to become man as a peasant in the farms, in the villages. (:58)

Most probably a solitude farmer who lives in the remote farm, a shepherd whose job is just to walk with his sheep for days on end, as he has nothing else to do, he goes more within himself, and he finds more the truth about the Creation. How the life work, and how his animals behave, and how the behavior of animal depends on what grass they eat. And then you see the shepherd is more enlightened than the Einstein's of this time. Because he understands the process of Creation. He has time, he made time. This is why some of our prophets, the shepherds, comes from enlightenment. Having time to analyze the truth about the Creation. And not with all the fallacies which they've been fed. They read no books, but they read the books of the truth about the Creation, through the fields of its interaction. And this is why some of our farmers, and some of our shepherds, are more knowledgeable about the world of Creation, than our professors, the head of universities, and hat we call our leaders.

Understanding the process of interaction. I had the privilege to meet people in Africa, that when you speak to them, the old woman says, "I have different grains in my room, but different conditions. And at the spring, I decide, from what I see in the winter, (1:00) what the summer and the spring is going to be, and I decide which seed to sow for that year." She never went to University. She does not have even the power to know what's the difference between A and B on the paper. But she understand the process of Creation. The interaction of the fields which creates a winter and that winter, how will interact with the fields of the atmosphere, to create the next season and the season after. Enlightenment, without degrees and without professorships, and without Prophet.

This is what we lack, this is what we miss, this is what we have diverted to become a civilization which actually has lost all the realization of the truth about the Creation. Man has not civilized, man has just realized he is an animal which has lost the connection to his own creation through civilization. And this is why we find, in many cases, things from the past, that to us today are unanswerable, because those who made it, had the time to understand the process of Creation. And then to us who are civilized, we lost that realization. And that's where we are. And to prove it, we are more civilized, we have created weapons to kill best. (1:02)

Now you understand, how simple any of you can be more enlightened than anyone else, or anybody else, and any other Soul. If you understand the process of your own creation, and nothing else. If you understand how all the fields of the Universe, some being originated from the Creator, is within you, and you are connected to, and does not exist

without you. Because, without your Soul connecting it to the others, it loses the connection. That beauty of the essence of the conversion of the matter information, to be added to the, what we call, Universal knowledge.

It's the responsibility of all Knowledge Seekers to understand this. We showed you the Gans's, we showed you the Nano material, we showed you the interaction of the fields, we explained about your source of energy, and now is for you to interact and understand the process of interaction with your own Creator. And how you will see, how you connect, and how you share knowledge with all within that cycle of life. And if you mature enough to understand how it works, it's very much like, you look into the sky, you see nothing, and you suddenly, you see a star. And that star is connected to you, and you make a connection with it. (1:04) That star could be the Soul of your lover, that star could be the Soul of your child, that star could be the Soul of the Creator (STC). It depends what you understand from its interaction.

Try to understand the separation between the fields. Try to understand the connection between the fields. Try to understand the conversion between the fields of Cosmic Rays and matter state rays. And if you manage to unravel this, you have unraveled the process of Creation, and you reach the everlasting life. Because, that knowledge, that structure, that field absorption, sits within the skin of every man. It's just the man does not realize how to operate it, how to use it. and how to move out of it, when, in a way, the time comes.

We've seen the snakes shedding their skin, and merging with the new, more vibrant, and what we call, new structure for their life. The knowledge we have given you, should make you that snake, change of skin. Where the change of the skin is physical, but the change in the understanding of the Knowledge of the Creation through the STM, will become that transition, that change. Contained, but strengthen to understand more about, absorb higher strength and lower strength, to increase the intelligence of the man. (1:06) And then you understand, life can be eternal.

The way you go one shell to another, you can go one Soul to another, and add to that Soul, and by it, strengthen the position and create the next cycle of life with more intelligence and understanding. Maybe your Soul has been a shepherd once, but you never managed to transfer the knowledge, and that's where it ends. Where with shepherds like us, we know how to transfer and how to move on, and how to add to another Soul, with it they become what we call, more understanding of the world of Creation and ??.

I hope that you understood the part of the teaching of today. As we said, we try to open the horizon of the knowledge that you understand the connections. And it's for you to facilitate how you create systems, you, or add to your work of your Soul knowledge and connections, or you need the system to be built for you to understand how to train it. All is in progress. All is in hand, and it's all for you as Knowledge Seekers, to make that progress. We go for a break, and come back, and then we carry on as usual.

>> **BREAK** >> 537 KSW May 09, 2024 (1:14).

K- Yes, thank you very much. As we are getting ready for the, what we call, test for Transmutation, next Friday. Those of you who are participating in this, and you've been with us, try to get yourself ready to understand about your emotions. Try to understand what really you expect from Transmutation. Try to analyze what you came here for and what is your purpose. Because for the first time in next session, you sit in the seat of command from (the) first second. We create the environments for you to achieve, and wherever you go, wherever you go or you don't go, whatever you do or you don't do, it's totally clarity with your own Soul, with your own emotion. (1:16) And for the first time, we have nothing to do with it. We're just the operator of the flight system, and you're the individual passengers. You want to sit on your head, on your chair, you want to put your seatbelt on, you want to run up and down the corridor of the flight of the life, all depends on you. And nothing of it is coincidental. And whatever you go through, whatever you might see, whatever you might feel, is what your Soul, in interaction with Soul of the Physicality (STP), has decided, may be unknown to you. And if you have created a direct, what we call, clarity of the connection between the two, you can pre-determine where you want to go, what you want to do, how you want to manifest. And for the first time, we give you a free ride from the first second. But you will feel this time is totally different than other times. Because this time, we immerse you in Cosmic Rays. Which means you are already pre-set. It's for you to decide.

So, you need, or you have a week or so, to determine. Those of you who join for this adventure for 6 weeks, 6 months. How you are going to do it? And then, couple of you, the following month, which you manage to reach the more closer point, will take that flight of fancy. And it's for you to let us know. Or, don't let us know. What you did, how you did, you manifested. You kissed your wife or your friend across the world, and they felt the ?? tickle, you left the rose on their bedside, they found the rose, they don't know where it came from, (1:18) and come back. But you have to bring that rose, not necessarily in a physical condition, but to be able to manifest it at a point in the time and the place.

So, next Friday session is the flight of fancy. It's a flight, you fancy where to go, and it's your Soul is ready, you've been trained for it in past months. And I hope, we'll see many

of you enjoying this trip. But, in a way, we have kept the rope to your toe, that you can't go very far, so we cannot lose you. We know how to do it, and you will understand soon, how it works. But this is the first time you get that chance. To understand it's you who's doing it, is not a dream, it's a reality which you have to face with, and you will face with. And, if you go somewhere, you see something, bring it back and see if you still got it. If you don't, it means you haven't learned the condition of the transmutation, transfer of the energies of the Cosmic Rays to matter state, and that needs practice. So, enjoy yourself next week, but start getting ready for it. It's like, you know, you have a flight next time, and you start putting things aside, that it has to go in the suitcase.

<< *Italian translator interrupts the teaching by mistake* >>

As usual.

In this process, we come to understand the whole concept of transmutation. The other which we have, as I said during the teaching, the Keshe Foundation Wellness Centers are set to interact with trials by themselves for new conditions. (1:20) And, they are there, we have been, we choose 20 cases of each and we start from this week. And, they would like to test on, or what we call, see how your Wellness changes, in respect to conditions which previously we did not attempt to support them, now we can support them with. And these will cover many, many aspects of the new development in technology.

Are there any questions?

<< *Problem with the audio of the Knowledge Seeker* >> (1:22)

Q: ... I want to know how to work with the light rays. Do we use light entanglement to transmute and transport and for communications?

K- Entanglement is the beauty or attributes of the Magnetic field. Does not matter, if it's a light, if it's a Cosmic Ray, or it's a matter state Magnetic field. A light is created when fields interact, and you see the light. (1:24) So they're already entangled, at a given strength, which you cannot change, because that's a visible sign of it, because you can see it as a light. But, in essence, all magnetic fields, does not matter in a plasma, or matter or transition point, all have the capability and work through the operation of entanglement. They're entangled with somebody, that's why they're in motion. And in that motion, from A to B, they release all the energies of different order, which we call, the Magnetic field in motion, gives energy. Because they have to cut through, it's just like when you see a meteorite. As they come in, they have to cut through the matter state and motion of the Magnetic fields of the Earth, and that creates resistance and light.

There is a very big principle for Knowledge Seekers to understand. When we see lights as daylight, we see plasmatic field interaction. When we see light like a meteorites when they enter the Earth, is a combination of both Magnetic field interaction and matter state Magnetic field interaction. That is why they create a light and then they create condition of matter. And it's a combination of the two. The material not only cuts through the

matter state of the atmosphere, it cuts through the Magnetic fields of the environment which created that Magnetic field. And once and if the world of science understand this separation, we will be able even to tell which, (1:26) what material these fields are created out through its plasma condition, because they can change into matter state different condition, and different matter.

And it's very interesting how our scientists in the future create this distinction, the variation. Cosmic lights which tells us which part of the Universe, the origin of these materials are, and then the burning of the matter which tells us what matter and what condition as in, are in. Or was this meteorite part of an energy, or the upper, or on the boundary of the Solar System (SS) interacted with some Cosmic Rays and what those Rays were and what their conditions are. But this needs what we call, development of the knowledge and science of the man.

But in fact, the fields are entangled, and that's why they are in motion. Otherwise, there is no motion if there is no entanglement. And the light is part of the spectrum of that structure of the motion of two fields, going to two different directions, two different points in the Universe, and they meet, they rub shoulder, and they create a residual field, which we call the light. It comes from entanglement of the two. And sometimes, if they are fields, they could be targeting each other, but in a way, the point of interaction is somewhere else.

Any other question?

Q: ... (1:28) Today I don't bring questions, simply I want to thank you and the entire Universal Community, for the knowledge we are receiving and for the happiness of being able to be together with you on this wonderful path to the elevation of our Souls. I wish the Creator is always protecting and blessing you Mr. Keshe. I also wish Mitra's daughter all the best and I hope we can meet her as soon as possible. Thank you very much Mr. Keshe.

K- Thank you very much.

Any questions?

Q: ... What is the purpose of the pancreas in the body of the man? What psychosomatic conditions can lead to damage it?

K- Pancreas has a very direct and influential game to play, in the conversion of the matter's energy to energy that the lymph of the body of the man can absorb. And, in a way, the enzymes or whatever is produced by this, creates a bandwidth what the liver and the brain tell the body needs to absorb. In a way, when pancreas releases the material into the digestion system, it tells them, (1:30) okay, we have too much, let's say Calcium, we don't need Calcium at this level to be absorbed, at a certain point in the intestine. But we need the Calcium of a different order, to be produced in another part of the intestine. All the Calcium's we absorb, energy wise, in digestion system, are not of the same strength.

And, as the length of the stomach shows, they are absorbed in different positions, because there are different strengths for different things. Calcium at the highest strength, at the beginning of the stomach absorbed, is used mainly for bone structure. The Calcium's are used, absorbed in lower or further down the, what we call, intestine tubes, are for different things. For blood cells, they have that energy they needed, for another point.

In different section of the stomach, it responds to the, what we call, ?? plasmic environment, which the pancreas material creates for that material to release its energy. If there is no need for it, the brain doesn't order for production of it. So, it just goes through, that's why you have the waste. Pancreas is that mixture material company, as I call it, structure, factory. Where it pre-determines what is going to be digested, as energy transfer through the walls of the stomach, (1:32) in which point of the intestine.

If you damage part of the pancreas work, you will see some materials are not absorbed in the body. And if you take part of the intestines out, you will find out the body will lack certain materials in the structure, even though the pancreas produces it, but that filter for that material is not there.

There's a very interesting test you can do, it was done by some doctors for a specific way, where there is a condition, there is a line of B12 damage, or operation, the doctors who are with us know exactly what I'm talking about. That, to find out the damage to this environment, that B12 absorption is complete, or rejection of B12, coming back, what is not needed, of B12 in a weaker strength. If you give certain material to patients with this condition, the, what is supposed to be, what you call it, as an excrement to come out from the anus, it comes out through the mouth, it reverses it's position. And, this shows the condition of this illness, it's very rare cases.

We had an opportunity to actually, physically see this condition years ago. And, so it's very, not depending what happens to the structure, it depends how you operate or create a condition that pancreas releases certain specific enzyme, that when it goes through the stomach, when it gets to that point, it reverses the work of the whole large intestine. Instead of going forward, it goes backward. It's a very rare condition and you can test it, (1:34) only by creation or release or blockage of certain enzymes in pancreas.

So, pancreas is just the environmental creation, I mean, you can put it this way, part of it creates the condition of the Jupiter, part of it condition creates, when it gets to a certain point in the intestine, creates Saturn, only absorbs high Helium, and then part only accept Mercury, and other parts accept only Magnesium. And this is what its job is. It's an environmental condition creator for the intestine, and it has no other function, but it's the most important function. And this is why, usually, pancreas cancer, we call it, creation and absorption of materials which is not needed, leads to liver cancer simultaneously in some cases. Because the wrong material is absorbed and then deposited, because it's already changed energy into the liver, which is the same as the wrong energy in the pancreas, and it transfers that, and then we say, ?? calling it ?? is pancreas and liver has got the same ?? . For the same energy base.

We understand this fully for years, then it's very easy to manipulate it, and to operate with it, or to live within it. As most of you know, I was poisoned, to be killed, by combination of operation of two people, one dead and one alive still. And this damaged my pancreas, and consequently the liver. And this is over some 15 more, 15, 16 years ago. (1:36) And I managed to create the condition, knowing what is done, to change the pancreas, it still works, is in the normal condition. But certain conditions can change it, and I know it immediately.

You see the operation of pancreas in a very simple way. In how your liver and your pancreas operates, you see it from when you go to ?? a big toilet, you see the color change. The people who go in the final stages of pancreas, when they get liver cancer, we see it changes to orangish, creamish, whitish color in the very last stages. Because, certain chemicals are not produced by the pancreas, and not absorbed by the, what we call, intestine. And you can live with a pancreas cancer condition, a liver cancer condition for years, I've done since 2009, 2010. When I was poison to be killed, came from the poison. And the minute I see a change, I know I have touched something which has created that condition. And I look to see what it is, and how it is, and what creates that condition. And you avoid that food, because then if it extends, it can create other problems.

So, your pancreas, what comes out from it, I call them ?? enzymes, because that's the way they operate, no matter what world of science said to them. It's creation of condition, Magnetic field condition, in certain condition of the reactor parts of your intestine, to absorb certain fields for certain operations of the body. And then it goes through the process of link to the position, (1:38) or it goes through the operation of the bone marrow, absorbing, crossing the bone, wall of the bone, and then going through the bone marrow, to be delivered in a combination of the things as blood cells and everything else.

The world of science has to even understand how pancreas affects the creation of the red blood cells. Why it's what we call, red blood cells, they are actually not white, they're clear, transparent, when it comes to Oxygen they change color to white, or the light changes into the color of red. It's that the blood is a common denominator mixture, that every cell of the body can exchange energy with, to create an interaction with the information from the neural system, the physicality of the Gans into condition of cell. And this is why we have a blood circuit, it's not just going around. It can interact in field interaction with every cell in the body of the man for energy transfer. And the basis of that is decided by the pancreas. If it doesn't work, it doesn't create the right condition, you have problems. You can take the pancreas out, but the field interaction of the body will change. the stomach or intestine, will try to create Magnetic field for absorption, because then for such a long time, it becomes permanent feature on it. They sometime create that condition of extraction, but they can't extract when ?? it needs. The same as when the enzymes are there.

Any other question? (1:40)

Q: ... I had a specific question for Mr. Keshe. I've known about your teachings for a while and I've been learning a little from my friend Nikolai, but recently I've become more serious about it and I've understood it's important for me to learn directly from your teachings, but I feel overwhelmed because you've been teaching for 10 years and there's so much, and there's so much for me to learn. So I was hoping to ask you to tune in specifically to my Soul and tell me where should I start learning with your teachings that would be exactly what I need to learn for my particular mission. Should I start at the beginning? Is there... You know, should I read the books? I mean, there's so much there.

K- We... Does not matter where you start. You can listen to today's teaching and be enlightened for the whole past 10 years, if you understood it. Or you can read from the first book, and start building a base to be enlightened. It's just that how much you have educated yourself, in duration of your life. And how much prejudices you carry in respect to the knowledge you gain, that that's it and that's correct. There's no point of beginning, it's a point of understanding. What you understand, what you understood, about your life and how you can add to it.

It's not evolution in science, it's addition to the science. (1:42) And this is where you have to start. How much more I can add to what I already know, and I have no prejudices about what I learned and what I learned before. And this is the best advice I can give you. You can go, depends where you want to be, how, in what ?? line. As we are not, as I keep on mentioning it, we are not a religious organization. We are totally scientific and in understanding in science. You touch the, what we call, ethics of the use of science, becomes theology. Theology of the Plasma, theology of your own conduct, and nothing else's and nobody else's. And once you understand this, it gets ingrained in your main structure, energy source. You call it a Soul, we call it whatever, and then you can carry that across the Universe. Does not matter where you are. It's an asset added to.

So, if you want to go back and learn how to make Gans's, or understand the Gans's are there, to for man to understand and believe in the energies of the Creation, matter state, and then you are 5 or 6 years ahead, we already started. But if you have to go and test and feel it to believe in it, then it's different. But it all depends on you, how and where and how open minded you are about the Science of Creation. (1:44) Which created you and then you understand more in depth, how to handle it.

A Soul matures within the womb of the mother and comes out with no need for physicality. And a Soul lives here a hundred years and still is in dilemma of not maturing, but I have to ?? leave up ?? added . All depends on what you want to take and what suits you, which part of your life. The knowledge is there, you have to pick it up when you need it, where you need it.

So, there is no beginning or end, you can read from the beginning to understand, or you can understand all this teaching has been about, where we are now. Which is the fields and interaction of the fields of the Universe, but you have the capability to interact with it, you have the capability to produce it, you have the capability to control it. We are in that stage of the evolution of science. It's not the intelligence, it's maturity, does not need

intelligence. Intelligence is a matter state physicality of the man. And, as I always say, "It's how much you understand, then you can apply it, which matures the man."

Any other question? (1:46)

Q: ... I have noticed that there's been some stars whenever I look out that have been like dancing in the night sky unbelievable stars formations that are just glistening. I've never seen anything like it before in my physical eyes it was quite wonderful, and really, really quite amazing shows. But that's not what I'm going to talk about. So in answer to what Sasha was speaking about, and I know you've spoken about it many times, is when we touch the core, when we touch the essence, and then we bring it back to origin, and then it's a bit like peeling away an onion or something, where you peel away the layers. And I've noticed that whether it's a condition that's ... I'm not going into medical, but whether it's an illness, a disease, or whether it's an emotion, whatever it is, once you actually touch the origin and you touch the very center of it, that's why when you said it doesn't matter where you jump in, it peels away the layers and you get back to the reality, the truth, the essence of what everything is. And I think that's what I've been experiencing as well in these moments. So, yeah, it's just a general chat Mr. Keshe. I don't know what you think about that.

K- I don't know. What you're trying to tell us?

Q: Yeah, it's just a feeling that I get at the moment. As I said, I've had some experiences where I've been starting up some reactors, the reactor inside myself, creating emotions or not emotions, (1:48) and then connecting to or not connecting to many different aspects of all sorts of things. And I've noticed that many things happen. If I think something, then I'm getting a direct connection to it very quickly. I have to be very careful what I... how I position myself, with... with anything I do now. I've noticed that. You get closer and closer to... I know what you've been teaching for a very long time. You have to think, speak and act in a certain way. And then things start to manifest correctly.

K- It is a part of... when you share knowledge, depends who receives it, in which way, and then what they do with it. You used to read the book and then read a patent for example ?? and put a new patent in it and say, "Oh, it's my thinking." Now we don't teach in doing things, we teach the knowledge and depends what you take from it and how you apply it and where you see applied and you understand the essence of the truth about it and that's all it is. And, once you do that, it's not yours anymore, because in a way, you have enlightened. And, this is the point.

Q: Yeah, I feel Mr. Keshe, that's, that's what you're saying there. It's a gradual process, and you, even when you first come to this knowledge, it touches you, can touch you very, very deeply. Then you go through that process of magnetically, gravitationally either attaching to it or becoming, you know, repelling from it. And it's that fine filter, that fine field strength where you start to learn to travel the, you know, (1:50) the superhighway of the energy flow of Creation, I suppose. and get into a point where you can actually

accept it, be part of it and understand that it's there to... it's always been there, it's there to help, and to bring you enlightenment, as you say Mr. Keshe.

K- Yeah, I remember a beautiful situation. A wife of a gentleman tries to explain to him, about Gans's, about the fields. And he says, "I'm a PhD, I'm a physics, a physicist, and what you tell is all rubbish, it doesn't exist." And, they had this discussion between the couple, he's being a scientist, a physicist, and lecturing in one of the universities. And they get to a point that, she explains one day something to him, what she understood, being a housewife, about the fields. And he says, "How do you know this? Science have been looking for this understanding." She says, "Oh, you should have listened to Mr. Keshe's teaching, it comes in the first few teachings." And now he's one of the, what I call, Knowledge Seekers which doesn't miss anything. And he says, "I studied, I taught physics and I wasted my life with it." Doesn't have degrees, doesn't need degrees, professorships to understand this knowledge. It needs clarity of understanding Creation. Process of Creation and that's it. (1:52)

It could be night time, it'll come to you, or day time, and whatever. In the middle of eating, or in the middle of running. And it's interesting how each one of us takes according to what we need, when we need it. It's, we call it the French Spanner. We carry it in our pocket, but it depends what screw we come across, and if it is needed and nut, and what size nut, because you adjust it. But you know you got this spanner in your pocket, if it needs be, you're there, you can use it. It's a 'Swiss knife' as you call it. And this is the Swiss knife of knowledge, you got to take it out when you need it, for what you need it, put it away when you don't need it. When you get a burn on your skin, you know you can go to the Gans's, to transfer energy and you go get a CO₂. You get a something else, you have a Corona, you know, Corona you go, you open the other ??, part of the Swiss knife, and you make your Gans's to transfer energy. Because you understood what the essence is. It all depends on us, we don't have to use it all the time, but it's there to use it when we need it at the time.

Q: Thank you Mr. Keshe. Can I just quickly say that I feel that when you first, I was trying to explain something, when you first receive the knowledge, you receive it on through your voice and through your intention and your position here. And it's magnetically, gravitationally, Gravitationally, you're drawn to it. You're drawn to the knowledge. And then you receive part of it, and it touches you in many different ways. (1:54) And what you can be, this can be on a physical level to begin with, which I've noticed with many people that, because I pass the knowledge on, and for many people, I forget how long I've been part of it, and the knowledge that you gather, you don't, you tend to forget how much you've learned or how much you've absorbed and then the new people that come in that and you explain something it's like wow what is this and they need to start a little bit sometimes a little bit more at the beginning again to gather some of the knowledge that you say in the matter state but some of them need this Mr. Keshe not all some as you say are in lined or receive right from the very beginning that you know the get-go and they go to the position you're in right now. But some are, you know, we're all different and we all, you know, we all need to experience what we need to experience for ourselves to be able to get, you know, this knowledge and to be able to

share it. And we all understand it in different ways. It's these emotions and these, these configurations of a thought, you know, that we have compared to the, I don't know, the environmental conditions that we're brought up in, the very essence of our theology teachings that we receive as youngsters, that you have been brilliantly making people aware by opening the books of what the truth of reality is. And it is, for everybody, so different, and there's such a huge aspect. You open the plasma. I remember when I first listened to you, to the voice, I knew straight away that it was an absolute truth and I had to follow this condition, this path. And it opened up and it just, it keeps opening up and opening up. And even when you think, oh, that's changed position or it's not there for me, then the plasma goes to another position and then something completely opens up again. It's never ending. (1:56) It's what you said, it's unlimited, and that is the beauty of it. But once you're touched by it, it's... yeah, it's... yeah, it's a radiant star that is the Soul of the man, that is just quite incredible. So, thank you Mr. Keshe, for all you're doing.

K- Thank you very much.

For those of you who are in Germany, or Austria, or nearby, as we said, the Knowledge Seekers have started their own teaching and processes and their own, what we call, retail shops in conjunction with the teaching. And one of the first ones taking place now, and started is in Austria. You know Mario, and this is what, is one of the first teachings, which will go on, on 25th of May, if you want to join them. And it is one of the first in a number of Knowledge Seekers around Europe, and around the world have started, running what we call, the Keshe Foundation Stores, and this time, this store has added up to it with a, what we call, teachings, and the knowledge about the Keshe Foundation, the work we do. And Mario, as most of you know him, if you went to, what you call, the Keshe Foundation Center in Linz, he was always there. He's the guy who taught you everything about technology in the Center.

So, this is the beginning, as we've said, one of the first ones, if any of you would like to join them. And this is how the knowledge has to be, freely put out and taught, and you take from what you need from it. We wish them success, I think they have five of these set up for this year. And you can do the same across the whole of the... what we call, around the world in teaching. (1:58) And, you never know who you touch, and who's sitting there.

Any other question?

Q: ... How is it that Cosmic Rays come into play with normal plasmas like Gans and other states of plasma?

K- ...

It seems that there is a slight, what you call it, knowledge has not been passed fully. Gans's are creator of, part of, the whole structure of the Cosmic Rays. Even you are. The coin in your pocket, the apple you chew, the water you drink, is all part of the same. It's just that, they are in a state that compared to condition of interaction of the fields within the Cosmos of your physicality, look, tangible, feel, or can be seen. If we change the

composition of the Cosmos of your body, even slightly, the apple you eat can taste a pear, than an apple, even though you're still chewing an apple. (2:00) Because of the perception with the field energy, which has come, we associate this smell, this taste with an apple. A small change in just in the environment of your body, that apple can taste of the pear.

So it's all condition dependent, and how we create that condition, but there is no difference between the Gans, the stone, the apple and your body. They're all part of the same Cosmic Rays. But, we are traveling in a package called Earth, or a package called the body of the man, through that Cosmos. Otherwise, in fact, we are another part of that Ray structure going through. Somebody who has not got matter state observation point of us, to our condition, what we call, field strength, we are invisible to it, we don't exist. They can walk right through you. Because that field strength is not part of their interaction.

Any other question?

Q: ... My question is, that the Plasma Technology is the expansion of knowledge that is already there, through the Plasma fields, can we become aware of that Creator within, and therefore understand our purpose in life? Or does it depend if we are ready or evolved enough, to take that first step into our Divinity? (2:02)

K- It doesn't need for you to evolve, it's enlightenment. It's finding a path for yourself to it. You know it's like making a pizza, we all make pizzas but our own way. And we taste it, we change it the way it suits us and we like it. And it's the same, how we make it, and what path we choose to do it. And is it to our taste, which means, "I'll be happy with it, I'll be happy with our own conduct, I'll be happy with our own expansion." And can we use it to enjoy our time? And what would it give us? And what we get from it? And what does it create inside us? Or do we need to test it to prove it that, "Yes, it is what we wanted." And then, would it give us what we want, then what's the next step? It's how we want to accept and we believe it, if it is.

It's very interesting, I was some time ago in a salt mine. And this area has a facility you can... it's a huge mine they opened up, it's like a fanfare, under the ground, it's huge area. (2:04) And many children actually go and lick the mountain, the cave walls. And they say, "Yes, it is salty." And you see, certain part of the cave has been licked by many children, you can see their height. Where with us, we understand, we saw the salt above the cave, we know this is a cave, but the child still needs to lick the wall of the cave, to actually confirm, "Yes, it's salt." And this is what we are as human being. Depends on the point of maturity of accepting. We still want to test it, and then accept it, or we know it's there, how we use it.

If you have young children, in the very first year or two, do a very nice experiment with them. I've said that before. Put salt and the sugar in front of them, and try to explain to them what is salt and what is sugar, but don't let them touch it. In the brain, they know the salt, in the brain they know the taste of sugar. But visually, they cannot tell the

difference. And then you ask them to put their finger in it and taste it. For a while, they'll have a confusion between the salt, which one is salt and which one is sugar, because to them, it was a taste. Now it's a physicality, they have to distinguish. But it looks very similar to each other, it's the same as the ?? intelligence of man. The life of, in dimension of the Soul and life physicality are very the same. Very similar, slightly different structure. Depends what you want to taste, and which dimension you enjoy more. (2:06) And now man has that choice, even the two sit next to each other.

Any other question?

Q: ... If my thoughts can be transmuted from negative to positive, how do I attract the Cosmic Rays through my thoughts, using my thoughts as a magnet to attract the fields of the Cosmic Rays or vice versa, the other way around? Is it possible? Where do I turn my thoughts towards to start the process?

K- There is no negative and positive in thoughts. It's just point of view. This is the way I look at it. What is could be negative to you, could be a good positive to somebody else. In this is the process we have to understand. And this is a change we need to understand. And, then you decide which way to go, which way you want to go, and how you want to interact.

Nobody can dictate, and it all depends how you can extend that position. As I said, in the very near future, it's just I don't see Knowledge Seekers been mature enough to understand it. I will teach you how to actually create a condition of transmutation for yourself automatically, every second you need it. Be it the transmutation of Soul, or the total physical transmutation. It's just need to understand about your own physical structure and energy structure. (2:08) You want to be in the physical state or you decide to go through the energy, so we'll go ??. We all know it, we just have ignored it.

Any other question?

Q: ... In this time my question is about cancer Soul, which you mentioned in the Knowledge Seekers Workshop 534. In that teaching you say, "You take too much Soul, you give the cancer of the Soul. And that cancer Soul cannot have transferred it to the physicality of the man. It's the energy pack I don't need." I cannot understand the meaning of these words accurately. Can you explain it further please?

K- What, when we say cancer, it doesn't mean the tumor you're used to. It means something energy you hold but you don't need. And can lead to the demise, or change of the strength of the fields. Unfortunately we don't have the exact words in English to explain any other way. When you're a cancer, you're the thing ?? which you're attached, you don't need it. It's not a tumor as you literally does do it as a cancer. This terminology in speaking in English, we say it's like a cancer, just something you don't need, (2:10) but it can create your demise. It is the same as the interaction of the fields, creates a condition which you don't need, is extra to you, but it could be very advantageous to your physicality. And that's what it means.

Any other question?

Q: ... In the last workshop you showed the graphs of the physicality of the STP and of the STM. When is it possible to see the graph of the STC. When she is present?

K- I think you've got to learn to walk before you run. The time will come you'll see it yourself, you don't need the dimension of a system. But within that system we've shown, if you understood, the principle of the teaching sits, in essence, the seed of the STC.

Any other question?

Q: ... Isfahan is to host the first International Nuclear Science Conference. Isfahan in Central Iran will also host the 30th Iran National Nuclear Conference and the first International Nuclear Science and Technology Conference. Do they have anything to do with the Keshe Foundation? (2:12)

K- This conference was held this week, 6, 7, 8 in Isfahan, it's the first time Iran has put an international conference in Isfahan. I raised this question with our Iranian partners. How come since we announced Isfahan as a point of showing the technology first, as Iran nuclear centers, suddenly the government jumped on it, because we put a request to them before, and they understood it long before they announced. And, it's very interesting, this is an intriguing question, was for me when I heard about this. But, it's nothing to do with the Keshe Foundation.

Iran is... Since the accidents we had with Israelis, pet hunting Iranian nuclear physicists, kept away sending scientists to International conferences. And is out of, and stays out of this, even by invitation. And, I raised this question because, a few weeks ago I arrived at a hotel in China, and it was a nuclear something conference, and they were from all over the world, but there were no Iranians. I raised a question with my authorities immediately, "Why are we (not apart of)?" They said, "We don't send any scientists outside, because they'll be at part, and then other things can happen the way it happened during the Ahmadinejad." And, you don't see many Iranian nuclear physicists who are actually active in any of the conferences. In the teaching before, when we were going for the conference in Sanya, when, late last year we explained, we will hold a conference in Iran. And, if the Iranian picked up on this to do what we suggested, (2:14) as they were done, and they made it an International conference, and then now we are in the hand of the Iranian officials, waiting for approval for the Isfahan conference. To do with each other, because it was just announced before Nowruz, and we announced this long time before this, and we... They were aware, that we announced such a conference in Isfahan, and they tried to do one at the same time, before, in the same place. It's something about, what you call it, ?? murky ?? in a way. Because the head of IAEA was there.

And as I said, the conference will take place in Isfahan, with the Keshe Foundation Space Technology. Hopefully, later on this year, we invite heads of states, to see a breakthrough technology. And, now we've seen the, what you call, head of IAEA, which is actually

parallel to part of the 'Iran 5+1 negotiation' in the background. Trying to, what you call, comply, and at the same time show we don't need.

But, do they have something together, to do with each other? Why it's taken place, and when we announced it for the first time, Iran has opened it. Could be, but... We are not aware, or whatever you call it. We don't know who attended these conferences and prefer not to. But Iran will keep his top scientists well secretly kept, as much as we can. And the Isfahan conference will be part of the presentation of the Iran Space Plasma Nuclear Technology. And nuclear, as a Plasma nuclear, nuclear as a weapon technology, which is made obsolete with this technology, if you understand it. (2:16) And we are heading in that direction, and I hope Iran military and government, sends the approval for the conference in Iran, and then we announce it, we're about to be there, and you will visit one of the most beautiful cities of culture in the world.

And not only the conference, give yourself a week at least to spend in Isfahan to see, to enjoy the Iranian hospitality and one of the ancient cities in Iran. But, what you have to do, how it came about, why we announced it for the first time to be in, Isfahan is the center of the knowledge of Iran nuclear Plasma Space Technology. And it has to stand on his own and we put it out. And we've seen Iran government has followed. I explained to you before. We sit in a very peculiar position with Iranian government. A lot of things we advise, we put out, is followed by, and we see it being implemented. And this is probably one of them.

Any other question?

Q: ... Hello Mr. Keshe, one day after the session, I had an experience that I had never had before. I was at home and at the same time with my mother. She died a long time ago. Until then I had only had this experience separately, but now, as if two rooms had become one room. It was wonderful. Can you please say something about that? Thank you very much. (2:18)

K- This we hear from a number of Knowledge Seekers who've been with us in past sessions. You are not the first one. It's when you accept the existence of the two together. This is what I tell you, your physicality is here and the Soul somewhere else, and then, for example, you're crossing the street and car coming, suddenly your body get pulled back, the Soul pulls you back, the energy hands, because it still doesn't want the physicality to be damaged. Now you learned this in a normal life. You don't go crazy, it's just that you see the operation of the Soul and physicality in their own dimensions. And this is... it'll become normality. Because Soul is the guest with Mother, but physicality is cooking in the kitchen. "Mom, physically cooking, can you come here, we stay together, this, I can talk to you." And this is how it should be. We don't need to dream, only the dream. It's a reality that we... but we have to be fully aware of it, we don't mix it up.

You're not the first one who has gone through this experience. You have managed to open up the, what you call, the dimension of the fields which connects to your Energy Center, you call it the Soul. So, you didn't need to go to sleep, to dream, to deal with

mom. You... that barrier is broken, so, it's there with you at the same time. This is happening to a number of Knowledge Seekers, who've been through this process, and they've come to understand the distinction between the two, and how it is, and what it is. And somebody said to me, "I'm learning, because when I don't know something, I ask, and I just told you it this way and that way, and you'll do it, and it's correct, so I'm living one life." (2:20) We denied it, now we have access to confirm it. But you have to be very careful that they don't tell you, you've gone crazy. It's just for you to understand, you have the capability to live, or to confirm the existence and life in both dimensions.

Any other question?

Q: ... Hello Mr. Keshe and thank you for bringing peace on Earth. This is what is happening to me. I have flashes of light coming out of each of my eyes, and which forms a half circle of light to the right and left. I've already lived since years of light coming out of my body at night, to completely illuminate my room, and this light accompanies me to the toilet, without turning on the light. Thank you Mr. Keshe for your explanation.

K- I don't understand it.

R: Well, it's not really a question, it's just a comment, that they are, have these, this light, that illuminates their surroundings, and such that they don't have to turn the light on for the toilet, and they're just thinking...

K- This will be a natural way, I understand, this is a very natural way, people who can expand their energy fields, they will have that. (2:22) It's something we used to do, hundreds of thousands of years ago. It's nothing abnormal. So, it's you having control, in transferring energy of, or increasing the energy of the environment, or because of you, what we call, have reduced the interference of the blood circulation fields with the body of the man, allows the internal energy to interact with the field of the Cosmos or the environment, and creates light outside of your body, or in a way, for you physically to see, in a way, in the dark.

It's... These things will become very normal for a lot of Knowledge Seekers. As I said before, a number of Knowledge Seekers have achieved that. The first time they get shocked actually. There were one of them, saying, "I went even ahead under the blanket", but it was still light under the blanket. And then I had to realize what's going on. So, don't be... this is the knowledge you're learning about yourself, which has been there, we denied. Now you see the beauty of it gradually. Knowledge Seekers, one by one, come out to see how they experience. It's like the way when we taught you how to make Gans's. You came back, "Oh, I said I made Gans's, it does this, I made another Gans, was this color." Now you have learned to interact the fields of your own, with your environment and with the Cosmos. Like what we heard before. You're losing that fear of shyness and maybe I was, what you call it, mistaken or whatever way, and then we start explaining, more and more of you will experience.

It's nothing strange, you can do that , with . (2:24) It's interaction of the fields of your body with its environment, which, the same as daylight, creates a light. And depends on how your emotion is, you can have different color lights. You're not the first ones. We see, you start seeing a lot of people telling us these kind of things. And it's normality because you're learning. And many of you who've been in touch with Gans's, you have developed this gradually out. And you will interact, you...

It's a very, very interesting thing. I'm sure very soon, the way I explained, I can hold the CO₂ in my hand, and I can feel it and taste it. Some of you very soon will tell us, you hold an orange or an apple in your hand, and you taste it, you feel it, and you put the orange back, you received everything you want from it. Some of you are in that way, we hear things and we know what the next steps could be. So don't be scared, it's part of the process. Of you with yourself and your environment. Nobody does magic, it's just you that you are, but you got to learn. I can walk, but other people won't see the light. It's you, because of the strength of your vision, you see it. You can't become a torch for the others to follow. Maybe you can in the future, but at this moment you have to understand how to.

Q: ... And a question directly related to the teaching earlier. (2:26) We learned that the woman had extra calcium in her body, and we were able to transfer that energy. well, transfer it back to energy, therefore, that was a solution. Interestingly, just two days ago, a friend of mine here where I am came up to me, and she told me she had an IUD removed, but she has a bit of copper stuck in her body, and they're trying to get her to do surgery. And I was thinking we could use the plasma fields to create a weaker condition and get the copper out of her body. But I wanted to ask if that should be theoretically possible. There must be a better way.

K- Yes, it is possible. One of the Knowledge Seekers a few years ago did it on a dog in Italy, taking a shrapnel out. It is possible. In the next couple of years, we should be able to do a lot of these things in a very simple way, without open surgery and operations, yes. Even today it's possible, but you have to know how you do it.

This is why we announced the Wellness Center, Keshe Foundation Wellness Center, announcing that they will take 20 cases, especially like, what we call, the special seeds, what we call, that they can be removed, or they can be, not removed, they can be allowed to interact with the body of the man, to dissolve by the body of the man. Cancer and bits of shrapnel and things in the body of the man, it'll be removed, there is no need to open up to do operate. It's been done before by Knowledge Seekers, it isn't the first time. It can be done. (2:28) But now we develop technologies for it to be done. In the very near future, we announce some cases, conjunction with large corporations and governments, doing tests, and we request for them to be open to public, what the data is. And you will see a lot of these things.

The time of heart surgery and brain surgery is over. It's just that we have to teach enough and develop the physical technologies enough to be implemented in larger scale and we are busy with it. We moved the change of the phase in Keshe Foundation, it's gone from

one phase to another, we brought huge changes in, but it takes time, in next few months we gradually start seeing and then you understand the whole process of the changes are about to come.

As much as you can remove, you can convert to. You can change something into a solid state. And it's not imaginary, we've seen it with Corona. You saw how the lung calcification change into Calcium solid, and kill people. We have technology today, that I can change a man to total stone, while it's standing still. The knowledge is in our hand, it's not something is going to happen. (2:30) But, is it my right to do so? Or can I give an opportunity for the Soul to move on, that the physicality can be calcified? It's just like you go to Madame Tussauds and you are there, but this time it's a real man calcification.

We've seen that in South of Italy, if you go to where they had a volcanic eruption, the mother is still feeding, holding the baby in ??, what you call it, turned to stone with ashes. We don't need that now, we know that knowledge in conversion of Plasma Technology, and we've seen it in Corona. There is so much we have, the knowledge from Corona, and it baffles how people haven't seen it. We can turn world leaders who are, what you call it, animals, into statues, on their spot. And these are not fancy, these are reality which now man has... We've seen it happening with us, with our lung, with our liver, with our brain, during the Corona time, now we understand the knowledge, we can replicate.

Any other question?

Q: ... Is there the Soul, I mean, of emotion?

K- No. Has a Soul, but it's the interaction of the field. (2:32)

Any other question?

Q: ... Plants have the capability of having several Souls, like the nice people or beautiful people?

K- What do you mean?

Q: Can plants have... be like the beautiful people, and have several Souls within one plant?

K- Hmm. If they decide to.

R: Well, some plants definitely have two sides to them. Some of them can be very therapeutic, but at the same time, have spikes sticking out that hurt you, if you try to get close to...

K- Yeah, but it depends. Some people like those thorns, it shows how much they love.

Shall we call it the day?

R: Sure.

K- We meet next week, as the old song says, "The same place, the same time." And we'll see where we develop the next stage. Thank you very much for this week. I hope you have shared with us through your Soul, and we share through, with you through our Soul and the voice. And we'll see what comes up next. And as I said, we, past few weeks and coming weeks, we're trying to open up the understanding, it becomes easier to understand, to apply the technology. (2:34) They're showing technology. Understanding is more important, once you understand, you open up to understand, to do it yourself, then when we teach it, you just have to follow some. Thank you very much and see you next week.
