

Transmutation Accomplished - Transportation/Transmutation Compared - KF Shops - Breathing

Introduction to 536 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

This workshop is mainly about preparing us for the full transmutation of physicality (P) and what our responsibilities are and to get us ready for the changes that are coming very soon. The feeling was very different in today's workshop, it was one of certainty and he told Rick before the start of the teachings that the full transmutation has been done, it was successfully accomplished. I am assuming that means a person, a physical body appeared in front of them. We trust what he is saying, and he has never said it like this before and this is why he is going to show it in Washington, because they have already done it. Now it is for our team of Knowledge Seekers (KS) to understand it and build a system for it, which he said is months away or sooner. This is very encouraging and the beautiful thing is, that when one humans can understand and do it, then it will get imprinted on the Soul of the Man (STM) and the knowledge will be available to the whole of humanity.

In brief summary, there is a big difference between what Mr. Keshe calls Transportation and Transmutation. He said it was important that we understand what they mean. So Transportation is in the physical dimension (D) like UFOs or spaceships and they require physical reactors that use Magnetic and Gravitational (MG) fields of plasma or some kind of fuel. The passengers will remain in their original physical bodies but the spaceship has to maintain the MG field environment of the origin of that P, and for us that would mean the MG fields of planet Earth. Using Transportation on this planet is basically the same as traveling in an airplane, but instead of hours it takes only minutes. It seems that there is no interaction with the Central Energy of the body or what we call the Soul, in this form of travel. This is one of the reasons the governments are only interested in developing a UFO, because then nothing on the planet will change and they can continue controlling the population. Physical Transportation has already been accomplished in Iran when Mr. Keshe went there in 2008. They have tested and used it many times and it will hopefully be shown publicly in the Iran conference later this year. Keep in mind that UFO technology as we understand it, is transportation in physicality and is at the same level as traveling with a donkey, only instead of feeding grass, we use the physical side of the MG fields of a plasma. This is the reason he was wondering why we were praising the people in UFOs as being so advanced, when in fact they are still in the matter state. But also remember we can use both forms of travel and switch back and forth.

Transmutation on the other hand is a totally different form of travel. First we should understand that we are made up of different types of Energies or Souls. We have the STM in the center of the brain, and the Soul of the Physicality (STP) whose center is mainly in the heart area, and a P. The STM interacts with the STP and creates an

emotion, and through interaction with the fields of the environment and other fields creates the P. In Transmutation, through our emotion we reverse that process and the STM expands over the STP and the P is transmuted back into its original energy. It's a more detailed process but basically the Souls go to the destination and interacts with the fields of the environment and re-manifests a new P. Remember that we have had many teachings on C12/C14 and how they are part of the amino acid (AA) structure or what we call 'Mr. COHN,' and the Cosmic Rays (CR) and Cosmic Fields (CF), these are all part of the Transmutation process and they provide the energy needed to do this, as they are also part of how life is created. All of this is part of the understanding of Transmutation.

There are many advantages to understanding and using Transmutation. First of all we will accomplish world peace and Man will evolve to a higher order being and will live from the STM instead of from the P as we do now. Just by using Transmutation nuclear and all weapons will become obsolete. Humanity will begin living an honest and transparent life and we will not be able to lie, cheat, steal, and kill anymore, because everybody will be equal and will have the same knowledge and can freely develop their lives through the dimension of the Soul. We will discover what is the true love of the Soul, or what we call 'unconditional love,' which is something that very few humans at this time have experienced or really understand what it is. We will live for thousands and millions of years, but during that time it will not be a dull state of boredom. We will be actively learning new knowledge, experiencing new dimensions, sharing knowledge with others, serving the Creation with our whole being, experiencing love, and it is beyond what we could ever imagine. But in that whole process we'll be journeying towards the Creator, which is the Source of all love. At any point along the way if we can totally give of ourselves, then we can dissolve back into the Creator, from which we came. Nothing is ever permanently lost. We came from and we go back to.

So if people truly understand what Transmutation means, then who would not want to go that way, or at least to have it as an option for living. But living the life of a physical body on Earth where we feel we don't have enough energy to live and have to kill to survive, and not understanding how we are made or who we are, and full of fears of something new or what could happen, these are all the things we are struggling with. Showing Transportation in Iran and the Transmutation in Washington or Moscow if needed, will start this process of change. We have to get this process started somewhere. First through a few KS and then it will spread out. And releasing the KF Plasma Products will help breakthrough into the public. However, I believe that breaking through into the public will be the last step, after we have developed the technology far enough, and enough KS are able to integrate it into their life. And 2024 is the year for the release of the technology and it's the 5th month of the year and we have made huge progress. This workshop clearly shows the path we are on, how far we have come, and what we still have to do. As Mr. Keshe said, there are exciting times ahead.

In the beginning, before we get used to transmuting to another part of this planet where the M fields and culture are different, he said it will be very shocking for us. For example, if we transmute from Africa to New York, when we manifest our P in New York we will change from black skin to white skin. We will still have our emotions,

memories and understanding of our origin, but when we look in the mirror we will see ourselves as a different physical body. Our outer look would change from black African to white American, but inside we will feel the same as we did before we transmuted. A question comes to mind that has never been answered. He implied that we could go back to our original form, but my question is, would we really be the same? Because when the African left Africa and evolved into a Caucasian field strength and changed his appearance, he went through a lot of miseries in the evolution. Does the Soul that transmutes into the new environment pickup all the qualities of the new culture? We know that we gain all the knowledge to live in that culture, but do we change to their mentality also, or do we keep our original mentality, and just add the new emotions as an option to feel? Because he also said, that if your African daughter is living in New York, when you go to see her she will not recognize you. But you can reflect to her, I am assuming he means to her Soul, your original form that she is used to, and she will see you as her black African father, and not the white version of you that came with the transmutation. It's the same as we do in our dreams, when we visit our grandmother, who is now in another dimension, we see her in her original form, the one we knew her as on Earth. These are very interesting things to think about.

Mr. Keshe has transmuted many times and he said it's an amazing experience. When you appear in the new body you observe your fingers, you know they are your fingers, but they feel foreign to you, until you get used to them. It's much deeper then just changing into a costume and playing the part of somebody else. Maybe because when you are just pretending to be somebody else, all your emotions are still the same. But with transmutation you still keep your emotions and memories, but now you add to them the new emotions and feelings of the culture you transmute into, and maybe they become the main feelings and ways of being? That's why he said it is difficult to explain. These are all the things we will get used to as we go along. And now there is no turning back. We have no choice but to go forward as the human race into the new way of living.

As part of the process of releasing the new Technology many KS have expressed interest in opening little "KF side shops" within their existing businesses. For example, let's say you go out to a restaurant and the owner happens to be a KS, then as you are leaving in the lobby you might happen to see a little display of KF Plasma Products, like Pain Pens or whatever and you would be able to buy them right on the spot. This a brilliant way to spread the T. This option will extend over into the 30,000 new products that will come out of the China cooperation. For people who are interested you can contact KF.

A lot of us are wondering how this T is going to get out into public with the way the governments have been blocking KF especially with teaching the public in the Media. Mr. Keshe planned out years in advance and slowly the new Cosmic Ray UBESUS (Universal Body Enhancement Spaceship Units) Head Units are being distributed around the world to trusted KS, and this process will continue. KF has different types of technologies. If you remember the large egg shaped spaceships that were built years ago were called UBESUS. I understand that unit as a learning tool, because we needed to see something to believe it, and the T had to start somewhere. We have to remember that the whole pattern of the T is based on how the Creation works, and so the T is really a copy

of the U. And as the depth of understanding increases then the units change shape. It's kind of like how we change our P in transmutation. So after years of learning now that huge UBESUS egg shaped spaceship is the size of a pair of headphones. For some of us this may be hard to imagine what has happened that it can be so small. Actually we see the same thing happening in matter state technologies like computers for example. As the understanding of the essence of the knowledge increases, then we find very easy ways to generate the same fields. When our knowledge was little we had to make a lot more Nano coated Cu coils and arrange them in certain configurations to do the same thing we can do with the Headphones, but perhaps relying more on the energy of the MG fields that already exists in the environment. Or have they found a way to create a tiny "seed" of the fields, which then attracts the larger Energies in the U known as Cosmic Rays (CR)? At the time the original UBESUS were made we didn't have the knowledge of how we attract the 80% of the energy from the environment when we eat. This is how the T has advanced slowly to the point it is at today.

Mr. Keshe has something special planned for Washington but we'll have to wait and see how it unfolds. Basically, he has trusted us KS to be the guardians for humanity in bringing out the new T. The CR Communication Bundle is a little bit different technology but it can easily be adapted to be used together with the UBESUS in this process. More and more of these units will be shipped around the world and it will form a network. And at the right time he will teach us how to use them and we'll start communicating with each other through the Soul, and with the Universal Community, and with those in the UFOs. It is my understanding that when he demonstrates the Transmutation in Washington, and as the 'men in black' will be trying to figure out how to shut the whole thing down, Mr. Keshe will somehow bring all these KS with the Units into operation, and the governments will understand that the technology is already spread too far to be shut down. Hopefully, somebody will be courageous enough to stand up for Truth and lead the way to change the position of the government to finally accept that the change is here. It's our responsibility as KS to safeguard these Headphones with our life and be strong enough to bring it out together when the time is right.

It's no use getting involved in the controversy about whether or not NASA has really been to the Moon, because now all the Space Agencies have moved on from rocket propulsion into what they call, 'zero-gravity' technology, and what we call, MaGrav Positioning using Plasma Technology. Unfortunately, they are keeping it secret from the public, but they listen to the teachings every week to see what they can take for themselves and convert it into matter state, twist it a little and call it their own, like what we have seen with Tesla and the US government. And very soon either KF or one of the countries using Plasma T will visit the Apollo site and we'll find out if there is anything there. During this discussion a KS was praising Mr. Keshe and happy that finally the 'big shots' at NASA are following his work. However, Mr. Keshe in true humility is not accepting the 'knowledge' as his own. He said, the knowledge isn't ours, it's a gift. And it doesn't matter if they have been against our work for all these years. What matters is that the knowledge is now being used to benefit Mankind and advancing our understanding of Creation. We clearly see, and the scientists he talks to say, that the change came in 2012 when the governments received the patents on the USB Key and asked their leading

scientists to analyze it and see if they can replicate it. This was the turning point when we started seeing advances in Plasma, Nano Technology, which they call Quantum Physics and the other things. The beauty of it is they cannot patent these things because it all came after KF released its patents. So in a way, Mr. Keshe's dream is coming true when he said he wanted that patents on this planet will have no value. And all the future plasma developments will be based on KF Plasma Science, and therefore they won't be able to patent them. This will clear the way for faster development of the new Science for the whole planet. Another way to understand it is, that from this point on people can still patent things, but it will be 'old technology.' Going forward with the new T nobody will be able to patent it. So in effect, there will be no more patents.

He explained that feeding the Soul is different than feeding the physicality and elevation of the Soul comes from breathing in CR and not from Zn and Cu Gans. Part of the air we breath has CR and it is literally shot into the Soul through the back of the throat when we breath. And with food, the small part that contains CR is absorbed right away as it passes the back of the throat and the rest of the matter goes into the stomach to create the seeds that make up the 20% of the energy to attract the other 80% from the environment. If we calculate the average number of breaths a person breathes in their lifetime, this would be the amount of energy we need to elevate the Soul to leave the P. This sounds like a very mechanical way to elevate the Soul and it's simply a matter of having enough field strength. But of course, there are many things we don't know about, that also goes into our elevation. And the process we go through becomes part of our uniqueness as a Soul in the U.

I understood him to say that actually we don't even need to eat food because we already absorb what we need from the environment through our breathing. But what was not clear to me, was whether we create seeds from the matter state gases we breath in to absorb energy from the environment, in the same way we do with the food. It wasn't clear whether he was referring to the food or to the air. But now we know the importance of breathing. There are schools of Buddhism that use awareness of the breathe as a practice. I am wondering scientifically if being aware of the breath will increase the absorption of Cosmic Rays.

It's important to know why even the Americans cannot use the Plasma Science as given to humanity by Mr. Keshe for killing and controlling others. It's because he is the one who is introducing the knowledge to humanity and his intention is for peaceful purposes. And as he always say, 'my wish is my command.' The same thing must apply to the Soul that gave the knowledge of nuclear energy to humanity. Perhaps his intention was not very high and that's why it can be used for killing. In the past Mr. Keshe said something like that they have to elevate that Soul to allow the next stage to be brought in, but that was the responsibility of the Messengers. This is also why we allow everyone to use the technology because in the end it will bring the peace.

Other Topics:

Especially we as KS have to understand the responsibility of having a knowledge like Transmutation in our hands and the gravity of what it will bring to humanity. We are responsible for it and it will come out as soon as the team understands and can build a system for it. His biggest wish is that no one dares to abuse this knowledge.

The offer for the whole Tesla Company for \$1 is still on the table;

Ormus has nothing to do with KF Technology it was started in 2012 by a KS to create mayhem for KF work (and to mislead people);

Translators have the responsibility to inform the people if they don't understand the language well enough or understand the technology enough to translate. Keep trying to find a proper translator, because misrepresenting the technology creates a lot of damages. The T has to be brought out correctly.

Thanks for listening.
