

540th Knowledge Seekers Workshop May 30, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Re-explains last weeks teachings; Neural - Blood - P - Emotions - STM; Emotions dynamic fields body; Importance of emotions; Each side body has own emotion M field - have to coordinate for perfect body; Live in Space by controlling manipulating emotions; COHN the N - N14 - C14 links P to STM & U; Air 65% N continual connection to U; Control breath - absorb N - C14 - CR - control emotions - Transmutation; Hypocrisy of religions over - have knowledge; N stores C14 & C12 in M fields of body; Emotions connect C14 through N to every cell; H of COHN connects to Soul of Creator; C60 - C360 body diamond structure connects P to U; Diamond structure on skin - Middle layer - psychosomatic; Solidification of plasma to matter state; Emotion to feed & elevate STM; Trigger internal energy - transmute; Isfahan transmute into flight Room; Creation simple - made up sciences & theology; Loss of Iranian president - Souls balance 0 no Court; Isolation of Soul worst pain; Can't create AA on open surface of planets in space - each P unique; Not wait for death Transmute; Travel in groups - common love; Matter fusion impossible - body fuses fields all day long; Can't sustain life by eating - need CR; Gave golden key - control breathing & emotions; Speak languages; Children of Soul; Why we born with features of parents; First time show T in Isfahan- fulfill promise of 2024; Flying Car; Teaching ingrained in STM; U within STM; Teach breath control; Sun is Soul of SS; No doors in U; Difference between Ray & Plasma - splinter field off Ray - plasma; objects are UFO - fields solidified; Conception birth like transmutation; Deny existence of STM; Graves - reflects Soul; Salty soil Mongolia; Zubeen - Black Hole; Soul chooses name.

ENGLISH TRANSCRIPTION

(:05)

K- Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. (:06) We welcome you back to this series of Knowledge Seekers programs. And we try to keep to the same track and the same process as the teaching has been going.

The Intro today has brought us a knowledge which extends to the knowledge of the past few weeks and especially last week. Some Knowledge Seekers (KS) asked me, "Can you re-explain, it was too much, too complicated to understand, last week's session?" It's not that complicated, it's very simple. You have a physical body, which is your neural system, connected. Without the neural system, doesn't matter if it's a blood, the system doesn't work. But this neural system, in conjunction with the blood, gives the dimension of physicality. But, the whole dimension (D) of the control of the body of the man, is a field control. Which is the emotion. Neural system connects the physical part. The emotion in the dynamic field, creates that interaction, which how each one connects to the structure and to the Soul.

In a way our physical body created out of interaction of the blood flow and the neural system cannot operate if he has no emotion. If the line of creation of emotion is touched and disturbed, or it does not in a way collaborate with the totality of the fields of the body of the man. And then you understand how emotion is important. And at the same time each side of the body of the man creates magnetic field emotion in its own half, (:08) because our body is in two halves. But the neural system connection, it comes from the other side. So the two sides of the emotion and the physicality (P) have to coordinate, have to be one for the physicality to work perfectly. And then at the same time in the two halves, two emotion sides, to interact with each other, they interact with the Soul of the Man (STM).

In a way, in trying to communicate the left side of the emotion to the right side of the emotion, as it's field dimension, it interacts with the field dimension which is the STM itself. Now you understand how your Soul is connected to your emotion, and how you have emotion the same in the STM. That's the only way it can interact. If he possesses the same, if it is of the same value, if it's the same strength. And then you understand how our Soul is dictated, the strength of our Soul is dictated, the life of our Soul dictated by the interaction of the emotion. And how man, life in the Space, can be controlled, can be, in a way, manipulated by the field strength of the emotion of the physicality, or emotion of the Soul. Because that is what it gives the dimension of the manifestation of the end of the transmutation when you arrive. You arrive, the field of the Soul interacts with the environment, but has no control over the physicality side. So that emotion comes, gives a dimension, and dimension of physicality. (:10) So your emotion in your Soul, by extending to the physicality, dictates the interaction of the physicality with this environment. And this is what we need to understand.

But the other point, as I referred to in the end of the teaching of last week, in the more or less, was that what we see as the Nitrogen (N), which is N14, and what we see as a Carbon (C), as a Carbon 14 (C14), is the link of the amino acid (AA), the dimension of physicality to the STM, to the Cosmic Rays, to the Universe (U). And at the point of life, when we separate the energy pack from the physicality, the STM finds his way through that C14 connection to where to go to. It's not that accidentally it finds his way. It's already predestined where to go. Where the C14 energy level as a Nitrogen of the Amino Acid has no interaction anymore, it's a physical dimension energy. In a matter state of the gravitational magnetic (GM) field and the Inertia of the planet.

And then now, if you understand this, you understand your Soul, at a point of departure, through the connection, through Cosmic Rays (CR), through the C14, where you receive the energies from to elevate the Soul, finds its path to the point where it finds its position. In a way, you travel back to where you came in, but with a new position of the balance of the fields of your Soul. As I always said, 80% of the food of the man, energy of the man, comes from his environment, (:12) which the environment is not only the gravitational magnetic field of this planet, partially it's connected to Universal Cosmic Rays, which we absorb. And now we understand where we got it from, we go back to.

What links up, what strengthens up to the C14 and the Amino Acid of the body of the man, which is the Nitrogen on the same level, which in interaction with the Carbon itself, as we know in the body of the man in a plasmatic condition, creates the condition of life. Not only on this planet, but the position of the STM, in another dimension, when the physicality cannot nourish, cannot give anymore to the whole structure.

And then this finishes with what we call, the hypocrisy of prophecy, the hypocrisy of religions, and the hypocrisy of what we call, the theology. Because there is no theory, there is no theology in it, because that was the theory of life, which found its way to the world of theology. Because now we know the root, there is reality, and theology has no room. Because there is no theory, now we know the facts, the process, we can transmute ourselves, and manifest ourselves, at a point, at a time and a place, we do it in the time of sleep.

When I was listening to this Intro, and many time I've listened to this Intro, it comes to me, we make a disclaimer about the health and the wellness. Would we soon have to put a second disclaimer about theology and the religions? That the religious people, what we say is there, it doesn't touch you, it's for man to investigate. As Bahá'u'lláh said, "Independent investigation of the truth." We deny the truth, (:14) but it's upon us, it's with us. Is there a room for any more theory of life of the Creator, we call it theology? Or, now we know the facts, we live by the rules of what we know. Up to now was a myth, now is a fact. We know how we connect to the Universe, how we connect to our Creator. And how the whole process comes. Do we need intermediaries? Or, having an intermediary, in whatever condition, we change it when we go to planet Zeus, to another Prophet on the Zeus, and then another Prophet on another planet, and we have many religions, depends where we are, which planet we are in. But unfortunately, there are no Prophets in those dimensions.

Now you understand, how the emotion of the man, through the Amino Acid connection to the Universal energy, through C14, converts itself back to feed, to connect to the physicality of the man in C12 and Amino Acid. In a way, the Nitrogen in the body of the man, is a connector of the man, a physical dimension, storer of the fields of the C14 and C12 at the same time, is the 'liver' of the Amino Acid. But, it gets, as the liver does, Vitamin C, Vitamin D, Calcium, everything is stored in it. In the dimension of Magnetic (M) fields, and in the Plasma condition of the body of the man, the Nitrogen is the same, it stores the energy which is needed for Amino Acid, which goes, connects through C12, and at the same time, it stores the energy from C14, which connects to the Universal energy.

Now you understand, how important the Nitrogen is, (:16) and why even in agriculture, we have problems with it. Because the scientists have not understood the concept, have not understood the principle of the working of the Universe. Is that transformer, is that translator, is that system, which allows one to the other and stores when is needed. If the scientists of the man understand the process, understand the systematic work of the body of the man, then man understands it's very easy to live in both dimensions. You have the both reserves, in the Nitrogen, in the Amino Acid of the man, in every single cell, to

transmute between the physical side, through C12, or through the Universal energy, through C14. Because this is the principle, the fundamental operation of the Universal life. Where consciousness exists, where emotion exists, and that emotion is connected through that C14 strength, through the, what we call the Nitrogen, to create every cell of the body of the man, and at the same time connect to the STM, which in essence itself carries the Hydrogen (H) and the C14 connection. Which the Hydrogen connects it to the, what we call, the Creator line of Creation, and the C14 connects it to the Universal, where the Soul of the Creator is accommodated, lives in, lives within.

Then, we understand there is no room for theology. Because now, is what I call, 'fact-ology'. We got the facts, we know, we understand the principle of the Creation. (:18) The biggest problem is, how long, decades, centuries, or in one instance, man becomes enlightened to the knowledge, to the understanding of the process of the Creation. And now, as I said, step by step, we open the dimension of the connection to the Cosmic Rays, Cosmic world, and then you understand, if you bring in that dimension of what we call Carbon 60, the Carbon 360, and the rest of it, Then you understand, the body of the man is that diamond structure. Created by the interaction of the fields of the Carbons. One connects to the physical dimension of the body of the man, and one connects to the physical dimension of the Universe.

And this is why when you look at your skin, you see that diamond structure on the skin. You see those hexagonal, you see those pentagons, you see those... every shape which allows different fields from the Universe to be absorbed into the middle layer of the body of the man. The middle layer of the man is the separation, connection between the outside world and the inner layer with the inside world. And this is why we see so much problem with psychosomatic situations where that middle layer gets touched. Solid state created in the dimension of the emotion, which gives you cirrhosis, it gives you skin irritation, it gives you (other) conditions, and then if you go further, it goes into your lungs, creates you cancer, and everything else.

Now you understand, the process of the creation of the man, is not the dimension of physicality of this planet. The man, at the point of birth, is connected to Universe. (:20) It's just he has denied it himself. Just because the, what you call, 'pheasant puts his head under the snow and he's got his tail back.' He thinks, 'I don't see, everything else doesn't exist because I'm under the snow', does not work. We've done that for thousands of years. We've done that for millions of years. Now we understand. And it's our job to use the emotion to feed, to elevate the STM, that man becomes a star at the point of the separation, when it takes off to become that star, the seed, through the line of communication of C14, to connect to the Universal Community.

In this process, we learned a lot. In this process, we understand a lot. In this process, even our scientists in laboratories are setting up the system to match the STM. This is what I said, by coming up in the June session and there on, we connect you directly to the Soul of the Universe. We have replicated it, we have the knowledge to do it, we have the understanding to achieve it and it's been achieved. Where we create the condition for everything else which connects man to the Universe, connects man to the Soul of its

Creator, is in the hand of the man to tap into. You killed to find energy to elevate your Soul. Now, you can tap into these systems that they give you that energy. You don't need to kill with, you don't need to kill for. And then you understand, once you trigger this energy level, Magnetic field, Plasmatic fields, (:22) in the dimension of Plasma within you, you can transmute anywhere.

In the upcoming international conferences, we bring this one forth. In China, in Sanya, we brought the room, in the process of the, what we call, the conferences in Tehran and Washington and Iran and United States, we'll bring that energy, that the fields can be felt. You can feel the emotion, once you enter the room, which it brings you to be part of. I wonder, how many of those who'll attend Iran conference, Washington conference, will stop coming into the room, because they know, exactly, where they stand and what they need to change to bring themselves into that point.

As I said many years ago, many world leaders will not walk into these systems, because the Soul knows there's too much wrongdoing. Then we know, who will stay to be on this, and who has been elevated to go on to the next. The whole process of the Creation is very simple. Man has not understood the whole process, so he has created many things, false sciences, theology, and everything else to go with it, to cover his ignorance, to cover his lack of knowledge, and then those who understood you are ignorant, have abused it to their benefit.

As we said before, last week with the incident which happened in Iran, many people, it's easy to say, "It was a cloud." (:24) And it disappeared in a cloud, but the reaction was different. In Iran we shown how the cloud was created, and how was used, and how you do. Then it comes to the Soul of those who created the condition of the murder. Those Souls were connected, are connected, to the suffering of the children of those who have been the victim. And then you understand how life will change for them. It's the same with those who create wars. We all are connected through that Nitrogen, through the dimension of the C14, to the storage of Nitrogen, to find balance. Then you understand how things work. There is no Den Haag Court of Justice. The balance of the fields is the Den Haag of man. There is no court for the Souls. And through the interaction, the way you put the magnet on the table and you see how it finds its position, according to the strength it absorbed, it finds its position. The weaker you are, the further out you stand to the center. The less you have, the less connection you have. And in a way, that is a point of suffering, emotion of the Soul, to understand where it sits. If you think you suffer with today's physical condition, if they don't let you somewhere, or they isolate you. The isolation, and what I call, distance from the source, in the dimension of the Soul, (:26) is more torturous than the physical pain of the man today.

Then you understand, how even the Amino Acid was created. Define the connection between the, what we call, Universal Energy and the physical dimension of the local energy, what we call the Earth's Gravitational Magnetic field. You cannot create Amino Acid on the surface of the Moon, impossibilities. In the open span of it, not in laboratories. You cannot create the Amino Acid of the man on Mars, or anywhere else. The field for it does not exist. Then you understand. life of the man, the structure of the

physicality of the man, is unique to this planet. And it has found a way to feed itself both through the physical dimension of this planet, and feed itself at a higher order and lower order through the Universal. Because it lives in both dimensions. It'll travel through to become, after it leaves the physicality behind.

The only thing we are teaching you, the only thing you should be making aware of is, through emotion you can control this dimension of physicality, that it does not need to come to the point of total separation. You can understand the emotion of the physicality, how it's connected to the emotion of the Soul, and create that transmutation for yourself and manifests in another dimension. To you in the eye of you, when you see yourself in the body of the man maybe, but you see the others in different shape, because that's dictated, what is dictated by the environment of the place and the position. You are not dreaming, (:28) you actually live both in the dimension of physical life on this planet, and the Soul lives its life through dimension of the energies of the Universe.

And then you understand why when we allow, we create condition in the systems and you use the headphones, you call it dreaming, "I went there, I did that." You actually did, but in dimension of the energy of the Soul, not on the dimension of physicality. And when you learn to balance these two emotions, between the two half sides of the brain of the man, physical condition, and the STM, then you can transmute, you can transfer.

A number of Knowledge Seekers in the past weeks testing have achieved that. And they're gradually processing to do it without, because now they are connected to the system continuously, and they can connect and move. In the coming time, in the next session of the June, we try to bring you to a full transmutation for those who are ready for it to do. We asked a number of you to start testing, and you're testing every day. And you say you're getting better at it, and you understand more. But even those of you who are in that process, you have to understand, you have to bring the emotion of the physicality in control, and subordination of the emotion of the Soul. And then, if you travel with your partner, if you travel with your children, you have to understand that balance has to exist in all four hemisphere, of the brain of the partners. This is what we call 'Twinity'. (:30)

This is what we call, 'The Twin Lovers'. And if you achieve that, you can go a thousand of you together in one place. Because we are all, what you call, "greenies." So, we believe in this, so we have one common denominator, physical interest to keep this planet clean, and we become greenies. Now you have to find one common denominator in the strength of the Soul. We are a peaceful people, we want to be the ambassadors of the peace in the Universe. And, because you are truthful, there cannot be no lie. Because it's not a lie, it's a field strength. If it's not there, you cannot create it in your Soul. Then, you come to travel as groups, with the same understanding.

You cannot lie. This is why the Knowledge Seekers, I keep on teaching, I keep on explaining to you. In the dimension of the Soul, there is no lie. Because, if the field doesn't exist, you cannot connect to it. Because you haven't nourished it. You haven't brought the emotional field strength to share with your, what we call the Nitrogen, to gather the strength of the fields of peace in you. I'm a peaceful man, but underneath I

damage and kill as much as possible. It doesn't work because you haven't stored it in the Nitrogen bank of the both physicality and Universal link, within your Soul.

Now you understand how every link with your Soul of the Physicality (STP), connects you to your Soul, which is connected both to the Hydrogen, and to what we call C14. In the world of physicality, you need the air, you need the water, to maintain the physicality. In the world of dimension of the creation, in the Universal dimension, (:32) you need the connection to the Soul of the Creator through Hydrogen, and the STP of the Universe, communication line of it through C14. It's the same process, it's no difference.

We try to push the understanding of the process of the Creation, the connection between, because we are heading towards transmutation. The knowledge, the technology, the systems are gathering very rapidly, to bring that process. to bring that change, to bring a new dimension in science and technology. This, what happens in our body. As I said many times before, fusion with the present technology is a dream which could not come true. But if you do fusion in the dimension of the fields, it's happening in your body in every second. You add, you fuse energies, you make Calcium, you add, you fuse energy from the same energy, you make Iron. How difficult is to create fusion? It happens in your body billions of times every second. A man still works in dimension of what we see, billions of dollars, Magnetic fields which don't work in the matter state, and they want to create a condition in the physical state. Does not work.

So, the knowledge is all connected to each other. And now we understand, in one side we are connected to dimension of physicality, through C12, and through our liver, and we, in dimension of the Nitrogen, (:34) we are connected to the Universal energy lines we call Cosmic Rays through C14, through the same liver. This is how, as I always said, the food we eat is 20%, it's the seed for attracting energy through the dimension of the Nitrogen, which converts to become the energy of the physicality, or converts to become the line of communication, the source of energy for the Soul, through C14.

Anywhere in the Universe, you find life which has emotion, you find life which has motion, you find in one way or another, in combination of the fields of its environment, that field strength, which is a bank connection to the dimension of the field of the environment, and connection to the field of the Universe. Life cannot exist on a pattern of the physical energy of the environment. It's impossibilities, it's not sufficient enough, you have to eat a mountain every day, possibly to be able to keep one cell going. One life going. Without the connection of the Universal Energy System Bank, which we call on this planet to be at the level of C14, which is at the level of Nitrogen, because it's available on this planet, to create life.

This is why, when you even measure the environmental gases, the air you breathe is 60-65% Nitrogen. It's only 15-16% Oxygen. And man has not ever understood. "Oh, you breathe, you breathe Oxygen." (:36) Yes, you breathe, you breathe Oxygen, which you never understood, but you breathe that Nitrogen, which continuously connects you to the environment of the Earth, and the environment of the Universe, at the same time. Without bringing in that 65% Nitrogen, you cannot exist. Man never understood the science of

Creation and stuck itself to the Oxygen. Because it's only connected to the dimension of physicality of the man.

When you go to sleep, that balance between the rate of breathing, Oxygen level, field strength come to match, be near enough to the isotope fields of the Nitrogen, and then you connect to Universal Community. That's why you go to sleep and you dream. You don't dream, you bring the level of the fields of the, what we call, the two together, to the dimension of physical life on this planet and Universe, and then you connect. Now you understand why even you dream. What's the process of dreaming.

Now it should be clear for most of you how to go to that field of transmutation. When you're going to do this test, not only control your mind, control your breathing, that you bring the energy of the physical life and the Universal life, energy lines near each other, then you can transmute, then it is instantaneous.

Why we see number of the Knowledge Seekers who join us in these sessions when they are asleep and they say, I went there because you are already there. We just create the fields for you to do whatever you like. (:38) This is why in these sessions we switch your microphones off and we leave our system on, because we are feeding you that energy which you are short, to find that elevation, to find that connection between the Oxygen and what we call, Nitrogen. Connection to this planet and connection to the Universal Community, Universal fields, what we call Cosmic Rays.

Next time you people, join us in these sessions. Not only try to think, try to control your breathing, then you bring the physical dimension in line with what we call, Universal line and see how fast you travel the span of the Universe. And then you find out it's not a dream. Then it goes back to all the teaching, how many times in other teachings I've explained, you control the rhythm of your breathing, you control what you take, you don't need food. I've given the example of that, what we call Guru who came to the San Sano. And I told him, "I know your trick." Now you know the trick. When you control the field connections through the Oxygen, through your lung, you bring the Universal energies to feed you. Through the Nitrogen, through the Nitrogen, or the Amino Acid, and connection through the C14 connection to the STM.

Then you understand, there is no end to life. There's no 'Day of Judgment,' you judge yourself. And when you come to that point, you find you have to have a, what we call, pure heart. Which means, the physicality does not carry no stains of killing, destruction, division, and the rest. (:40) Then you understand, is you who decides when you connect to the Soul, through the emotion, or you're still connected to the emotion of physicality.

Today's session, today's teaching, must be a, what we call, 'breath of fresh air,' for those of you who were trying to find out how you travel, how you can transmute, and how you need to understand this process. I have given you the golden key, to live in both dimensions of physicality and the Universal Community. It's you who has decided. I change my breathing, I stay in the physical dimension. I change my breathing, I bring the physical dimension close to the energy of the, what we call, Universal link with the C14

through Nitrogen, and I travel the span of the Universe, and then, through emotion I control everything.

Now you understand, how simple life is, in the Universe. It's man who has not understood it, has made it so difficult for himself, and he allowed abuses of the physicality and what we call, science of the Creation, which this does not need much, it's understanding the fact. Then, when you travel the span of the Universe, when you travel within the structure of this planet, understanding how you change the, what we call, the control of the emotion and the dimension of connection through breathing on this planet, which actually you control the Nitrogen level, not the Oxygen level, then you can control, you can learn the language instantaneously, you speak Chinese the minute you learn, you go to France, you learn French, and the rest of it. The emotion of the love, the emotion of the belonging to the position, brings you that. (:42)

And if you understand this in a deeper way, you understand you need the essence of the fields of the Universe, even to create yourself a cancer. And then you understand what we call it psychosomatic, because the fields of the Universal energies and the fields of the matter state of this planet, Inertia, and this gravitational field don't match through the emotion and the star, the seed of the cancer, illnesses, emotional disruptions, and the rest of it.

Now, it should be clear for most of you as Knowledge Seekers, in how to connect, how to be, and those of you who are practicing to start Transmutation, where you could not link up. Change your breathing pattern, and with that change your emotion, and then you can transmute. Same time, you can have a cancer this second, and no cancers next second. You can be Alzheimer's this minute, and no Alzheimer's next, because you use the energy of the Universal fields, through Cosmic Rays, through the Nitrogen of the body of the man, through the emotion which is connected to that field, to change, to repair, to balance, to dust, what we call, the energy field blockages, in the Universal Community of the body of the man.

I hope you Knowledge Seekers who are in that process, understand, (:44) don't sit and think. Control the physicality through breathing. That you have to bring the energy level of the Nitrogen you take from the environment in balance with the Nitrogen C14 of the Universe. And you transmute instantaneously. And because you're still in dimension of the emotion, you decide. We go next door, I go to the garden, you join me. I go to the other planet, you join me. I go to another planet, I come back. Because I still have the anchor of the field energy of the Nitrogen of this planet. The Amino Acid level is my anchorage.

Try to understand. Then there is no theology. And then, in the same process, if you manage to go through the Nitrogen, and the same time, using the same process as a Hydrogen of the Amino Acid, and find the matching strength in it, you can connect to the Soul of Creator. Now you know the secret of reaching your own Creator on your own. Needs no intermediary. Because the Hydrogen in the Amino Acid of the body of the man, in the Magnetic field Cosmic structure of the body of the man, is the same in essence, in

strength, in part, the same as the Soul, the same as the Creator. This is how some Souls not even need the birth to reach the Creator, and never take dimension of physicality of the life on this planet. This is why I've been teaching you, creating the Children of the Soul. That do not get involved with the dimension of the physicality, because they can communicate, (:46) commute directly through the both dimensions.

As I've said many time, now you might understand. In the sexual interaction of the man in two dimensions of the egg and the sperm, we lead to the creation of the Soul, that that Soul then interaction with the energy created, received by Universal lines of connections, create the physicality of the man, in interaction with the physical dimension of the womb of the mother, which gives it the shape and the color and the ancestral shape of the man when it's born. And then when it comes out, and while it's in, with the interaction of the field of the environment of the Earth, gives the man the two legs and two arms. The shape of the physical shape of the child, comes from the fields of the emotion of the mother, and the field of the father which came through the other. And then, you create that dimension of physicality.

The Soul of the children of the man, when they are created through the Soul, will be totally different. And they look to you, the way you want it, and they look to another one, the way they want it, and they can transmute very easy, because they are created from the Soul energies of the Universe first, then the dimension of the fields of the planetary System through Amino Acid.

Now you understand a lot of mysteries, which could not be explained. It'll take the scientists of the man hundreds of years even to understand the teaching of today. If they ever understand. And some of you Knowledge Seekers understood and reached the position to meet with your Creator at your own will, does not need no Prophets. That's what I said, Keshe Foundation is not a religious, it's a scientific, which shows you the science of the Creation. How you decide to connect to whom, to your lover, to your Creator, to your dog, (:48) to another system, to another position in the Universe. As Muhammad said, bless his name, << speaks in Farsi >> We have given you the whole gift, the ?? barricade of the life of the Creator to you. It's your ignorance which bars you from to reach the understanding of the Totality.

We go through a break, we come back and I hope, some of you have enlightened to reach the position and dimension. And understand what you breathe, you need that Nitrogen, not the Oxygen. If you gather enough of it, you connect to the field of the C14 of the Universe and through your Soul, you become travelers. And now, how man travels, through transmutation. Rick, you can take us to a break.

>> **BREAK** >> 540 KSW May 30, 2024 (:54).

K- Yes, we never change our pattern do we? Yes, there are a number of announcements to be made. As we promised you about the Iran conference. As we have to declare to the Iranian officials, as we had the same thing with China, who is coming and what, and start the program planning. If you go on the Keshe Foundation website, Keshe Foundation website, as of yesterday, has released the preliminary date of the conference in Isfahan, as the 16th of November, in Iran. If you go on the website, it's there. We will close this in a very short time, because we have to give the names, people, come how many, whatever, to the, what we call, the officials, for receiving the certification and license to go. And this will follow with a conference in Washington in 2025. In the Tehran conference, we, those of you who come from out of Iran, we meet all in Vienna. And we are planning, and the process has already started, in flying to Isfahan direct, bypassing Tehran. (:56) There are two ways we can do. One is by chartering a plane, or using Turkish airline through Istanbul to Isfahan. From the point of Vienna to Isfahan, and return back to Vienna, we allowed 14 days. Which means the session starts on the 16th, finishes 17, 18, 19. And then, it's five days, by Wednesday we finish. Saturday, Sunday, Monday, Tuesday, Wednesday. Because Thursday, Friday is an Iranian weekend holidays. So we leave Vienna around about 14th, 15th, we start 16th. And return back to Vienna will be on the 28th. This is a responsibility we accept, and we collaborate with Iran Foreign Office and the military and everything else to get this fully done. So when you register, we have put this date of 16th of November preliminary to be. We will stick to it, unless something changes, and we all meet in Vienna. And from Vienna, we go to Iran, to Isfahan. After the, what we call, five day session, we leave a week for you to visit the historical parts of Iran. You want to stay in Isfahan, you want to go to Shiraz, maybe you want to travel to beautiful places of Iran, and we come back all to Isfahan, same day, same flight, we all depart. This way we can control from our security wise and everything else. All the expenses of flight and the stay for the session of, until Wednesday or Thursday, is covered through this, (:58) what we call, donation. If you decide to stay in Isfahan for the rest of the time, or travel to near the city of Shiraz, which is the most of the beautiful part of, historical part of Iran is, then you are free. It has to be said, those of you who come, please go to your embassies, get your visas, don't run into problem which most of you ran before. You can apply it online and get it, and everything else can be done.

We have... we will organize with the Iranian officials, that the process of the lift and motion, what we call, Space Program, will be shown in conjunction with the Iranian officials. We'll invite dignitaries from around the world. It'll be the first time such a technology will be shown. They'll be present like, as we said, with China, people from

Iran, scientific, government and others, present in this session. So, understand the dress code. Ladies who don't, you haven't to be worried. As long as you carry a scarf, you cover your head in a decent way, there is no problem, there is no restriction, in unless you break the code. Which is, what I call, unacceptable conduct. We try to make it, and the place for the conference has already been decided, is in one of the most beautiful, what we call, hotels in Iran, in Isfahan, in a 5 Star hotel, 4 Star hotel, And the session of the flight and the demonstration of the flight and the rest, (1:00) will be done in conjunction with Iran government and outside the premises. So you'll be taken most probably to a position destination, where dignitaries and you as Knowledge Seekers will be there, to see for the first time in public, the process of the lift and motion, by using what we call, Plasma Technology. No more burning of the fuel, no magnets running around.

And, at the same time we know many governments are processing this system, trying to achieve that point, as a gift from the Iranian nation, we share knowledge. You don't need to guess anymore, if UFOs are, do, you will be part of that system. You will see it as a progressive development of the knowledge of humanity. We have a few more surprises for you in that demonstration. Surprises which changes the world of science. Surprises in a way of next step in science and technology. Will change the whole course of humanity.

This we need to arrange with the Iranian officials, that to what extent Keshe Foundation can. And as we said, we bring the technology from the Keshe Foundation in to Iran, and as we did with China, we take it out of Iran. If the Iranian officials would like to add, to share additional technologies, which they have achieved through the same process, it's their decision. We invite world leaders, military, of every command, to be in Tehran for that demonstration. (1:02) That has to be arranged through the channels of diplomacy and military. That has nothing to do with the Keshe Foundation.

But as we said, we share the knowledge with you and with the government. And this time, we are both there to be witness to change in evolution of the science and technology. We might show you the flying car, that you will see the end to the fossil fuel, to the abuses. The flying car you think we created for changing the structure on this planet? No. The, what you call a flying car, a miniature version of your spaceship, it's for Space development. You need to move along the surface of a planet. Sorry, there are no roads, there's dust and everything else. You hover over. We choose the Gravitational Magnetic field of the planet and distance gap.

So when we show the new, what we call, Plasma Cars, it's not to change the car industry on this planet, is to show the new method, then traveling and exploring the Space. At the same time, we will show new technologies in Iran. And if we extend to it, as you've seen the Keshe Foundation conferences, those of you who attended in the past, there is no speaker, there is no speech, you are part of the technology, you are involved in every second of the discussion and the technology.

Please book and complete with your full name, details given to us. We need a passport number, we need everything else. When you book on the link, (1:04) you send a message to the Keshe Foundation, this is my reservation, booking number, and these are my

details. Passport, nationality, and everything else which is needed, for Iranian security to check, background check on you. Which is normal. We did that with the, what you call it, with the Chinese too. It's not something just to Iran. Certain governments want to know who comes in, and the reason they come in. We have put the price for Iran conference at 7,500 for Knowledge Seekers. The corporate rate is at 20,000. Then we will separate the two, we know who comes and what they come and the way they come. Then, what we call, you cannot transfer it to somebody else. Because we know the space is very limited for Iran, and people might think, "Oh, I buy it cheap and maybe I sell it later." It's the first time we ever shown, man ever sees, clearly, openly, what we call, Plasma lift and motion. So, there will be a lot of people interested, it's not somebody to buy. Who would pay, makes the donation, has to be there. You cannot transfer it to your son or somebody's, my cousin. Iran security will not allow us to do.

So, you have to understand, 2024 is what we promised, we try to keep and everything goes okay. We travel together to Iran and we leave together Iran. Knowledge Seekers have to understand, please follow the rules of the Keshe Foundation. Think good, do good, and speak good. That will bring you a new dimension. You will feel the beauty of the hospitality of Iran, the Iranian nation. (1:06)

At the same time, if time permits and situation changes, we invite all the scientists from all the nations to go to understand, to be there. That it's a gift to humanity. It's a gift, what we brought the knowledge for. And most probably, part of the transmutation control through ?? mind of the spacecraft will be demonstrated in Iran, and it will be completed, for completion, in United States. You have to understand, the technology has reached the point of the delivery. And if this time, we don't have the same problem as we had in Eindhoven, we already asked the Iranian authorities to issue us a license of flight before we arrive. The permission to be able to deliver and to show that there are no restrictions.

In a way, we keep to our promise. And hopefully, if everything goes smoothly and nothing changes, we all meet on the 16th of November in the beautiful city of Isfahan, where my ancestors come from. And hopefully, we'll be able to see the knowledge of man, progressive development to the next step. And we, I'm sure, will show you more things to see. The hall, the hotel, is a place of the presentation in a scientific way. (1:08) And a place to be appointed by the Iranian government military will be where we will show the physical structure. And I hope you all enjoy to join us. And we have to close the reservation in a way that we have enough time to give all the details to the Iranian government, for through foreign office, allowing which country you come from, to inform the embassy to issue your visas and the rest of it.

I think we all been waiting for this, and hopefully we can complete it. And as I said, there is much more to see, to learn in the Tehran conference. And I'm sure the Washington conference brings humanity together in a different way.

The other announcement we have is that those of you who are organizing these teachings, be very careful who is organizing it and who's attending it, as apparently the Italian community has faced a huge problem in trying, Knowledge Seekers trying to teach, but

their system is being abused by others. And if it infiltrated by different organizations for that purpose. If there are any questions we answer and we go forward.

R: ... (1:10) We have Michael in the Q&A who's impatient about the Head Units and is wondering when they're being shipped. Says he doesn't have even the first part yet, let alone the second.

K- Which head units? The Cosmic bundles?

R: I'm assuming that...

K- Yeah, I think about a bunch will be shipped this week, next week. Because, they are already there, there is a problem we have with development, and the same time as delivery, the new systems always gets ?? updated. But, we should complete this by hopefully June, July, we should be completely done. If you have a... I know a few people received this week, some of the Head Units, some people I heard that this week they are collecting it. And it's in the process, as it comes, by what we call it, who came first, gets served first. So, I think about 10 or 15 Units will leave in June, maybe more, to complete. These are very laborious system to make.

We think we have found a solution for those who you bought the Material, that it can be, what you call it, can be delivered, starting once we do the test this week, complete everything, we have found a solution for your Cosmic (Ray) Materials to be shipped as well. It's not easy, but it's all been done, the Cosmic Bundles are all getting, literally, there are people, that's the only thing they do in Keshe Foundation Laboratory, just making these Cosmic Bundles, they don't do anything else. (1:12) And every time I go there, they're sitting there, busy with making it. It just takes time, and I know some went out this week, and I know some is getting collected this week, from somewhere else. So, it's going on how, who come first, your turn comes, you get it, we deliver it.

But you have to remember, we, or I shouldn't say, we, I pinch some of these Units, maybe let's say, there is 10 Units to go out this week, I pinch one or two of them, or three of them for research. So, it goes back delaying some three people to be later time. And I've pinched quite a few numbers of these in the past 2 or 3 months for development. I think, must be about 6, 7, 8 of them. So, you... this should have gone to the Knowledge Seekers, but for research, I picked up, or demonstration to, what we call, governments and others, we pick up the latest one, we leave the ones we had before, because the latest one carries more. So, every month, two or three, disappears in my hand. I do apologize for that, but it's part of the research. But, more or less, we have people continuously just producing Cosmic Bundles and whatever is the lot. They're getting delivered according to as they are ready and when they are ready.

R: So is that the Cosmic Ray Material that you're speaking of?

K- Both of them, both of them. Materials we produce... Materials

R: There was a question about that from... Sorry go ahead.

K- We have plenty of Materials, actually I've pinched some of it this week again, for research, but we couldn't, what you call it, house it. The housing was a problem and I think our people have found the Materials arrived in past couple of days, to create that housing. (1:14) And once it's done, it will go out, because you got to understand this is a very delicate material. And we had to secure it, correct way, and now we think we found it in the resin, which we found the resin, they had bubbles in it, but now they have found the material which is clear, and when you receive it, it's no field disturb, what we call disturbances. Because these things create fields, so it has to be clear, in what they, what they call it, emit, and you can use. We have the Material, as I said, I pinched some of it today, but we produce between 5 and 10 grams a week. And a lot of you, suddenly once this housing is completed, we're hoping this is the final solution. We will send about ... very rapidly. This energy disintegrates the housing, this is the problem with this system. If it's not done the right way, in due course of time, the interaction of the fields inside can disturb the fields around it. So, it's not a simple material to carry.

Any other question?

Q: ... You told us that this is the update of the information, the whole Universe. So, you talk about Nitrogen, (1:16) I think Nitrogen is because of the specificity of the planet Earth, right?

K- In a way, yes.

Q: In a way. So, I wanted to know how far do we remember of these teachings, when we don't have this physicality anymore.

K- It's ingrained in the STM, as an information. As a field information. The same as you will carry the rest of the knowledge of the Universe, when you arrive you have it. Nothing is missed. RNA keeps the recording of the man's life. DNA keeps the recording of the physicality of the man changes on life, from the beginning, from the first man ever created. In the dimension of the Soul it's the same. Everything which is in the Universe is within the STM. Because it's a Universal, is not the Earth structure.

You have to decide how to tap into it, how you create that emotion. So, in a way, you have the same RNA structure, recording of all the events of the Universe, plus the knowledge ?? which (we) shared. And what is learned by everything else, and every creatures in the Universe you are connected to. You just need to tap into when you want to know it, through emotion.

Q: ... So that 'Judgment Day' is when the RNA would be revealed? (1:18)

K- RNA. The Judgment Day is when you decide to judge yourself. Does not need to come at the end of a life.

Q: Well, we do it every day almost.

K- Yeah, but it depends how, what and the way we do it. And we judge ourselves, I'm going to be cruel today, I'm going to be lovely today, it's a nice day, I'm going to be happy. You judge that, so at the same time you judge when today I'm going to be nasty, what is going to happen to my Soul, how much of it I'm going to lose. And this is what we decide on daily basis.

Q: In a way that would be fun to have a Judgment Day for those who do wrong and we can do nothing about it.

K- We judge ourselves, other people judge us, and then we come to the point that we judge our own conduct and our own Soul. It's the same all the time. And we decide on that judgment. And some people think they are above that judgment, and they can get away with it because they can hide it. But if you're aware of it, how it affects you, you don't need to have education. Because you know the decision you make is going to bring changes with it. We do it in our personal life. We see it in the international arena. We see it then at a point of death, which means, we haven't made the judgment. The judgment is made by us, by our Soul in the fields it absorbed. But we are aware, we are a witness to it, but we have, we can't do anything, because it's too late. (1:20) And we all know how it is.

I am quite aware, I've always been aware of this, and I explained this before, I knew, at a young age, where that my destiny is, and I could not accept it. It was impossible to accept it. Because, as we say, "I was green, I had no experience." But I knew how to break the code, I knew how to delay the process. And I did. Again, for the second time, ten years later it came the same, but I wasn't ready, I didn't have enough experience. And, I knew how to break the code. I did. But the third time I couldn't get away with it. And we know what is the consequence of our acts.

We've seen this week in the international arena, in the past few days, how people we elected have judged us. And judged the people who create mayhem for us, through the conduct is not correct through ICC (International Court of Justice). But the people think they can get away with it. But the Judgment Day will come.

And on the other hand, it comes to the point of death or physical separation. That point, our STP agrees with the STM. It's a hand over time. And it's too late to judge, because the judgment is made by us over the span of the life, or the energy transfer. Each direction, each dimension connects to another. (1:22) So we judge every day, every step of it.

... Any other question?

Q: ... During the last Friday session, I returned a few times, and I didn't know where I was anymore. It just remained a nice feeling. What can I do so that I don't lose the visual impressions, so that I can pass them on to other Knowledge Seekers?

K- A lot of you Knowledge Seekers who were in last week's session was set up deliberately to create a position of us, how to elevate your STP, how to elevate your Soul, and then the last session was to bring the two together, as the Soul and the STP as one entity. We have a system which can do this, we built it up for doing this. If you were in the session of last week, at the beginning you saw two of the lines were on. And then, later on, two different numbers came on. But the first two were switched off. (1:24) And then, in the last session where you, actually all of you, those of you who were in that position, whatever, you saw all four lines were connected.

We control the elevation of the STP, we control the elevation of the STM, in... on its own, and then we bring in for the Soul and STP to work together as one entity, as part, because you are physically here and your Soul is here, or Central Energy. And each one has given you a different feeling, or different emotion, or different vision of whatever you decided.

So, in the June session, is much more, much more complex structure, which will directly target the elevation of the Soul, In a way, not elevation, but connection to the point of destination. And you control how to, not necessarily ever manifest in physical dimension, but seeing yourself and seeing the environment around you, in a dimension that your brain, physical dimension, translates it to a physical manifestation of a person, aliens, a cat, a furniture.

You got to understand something which we never discussed before but maybe it's time to bring it up. When you are connected to the dimension of the physical brain structure you still see things, you hear things. When you move to understanding of the connection, transmutation through the Soul, (1:26) you feel things. And the feeling manifestation is different than feeling visual manifestation. Your Soul does not have the eye of the man to see dimension of physicality, it sees the man in the dimension strength of his Soul. Which means, .. this guy is kind, this guy is giving, this guy is communicating, this guy is loving and the rest. Feel its interaction. With physicality, because you have not learned to transmute, you still see things. The time when you feel things and to you becomes the emotion of the feeling, then it's the time when you transmute, the emotion comes into it. And it's a very fine line.

You won't remember anything, but you go through the whole cycle, because then you can always go back to memory. "I want to go back where I was." And you see you go instantaneously there. We tried that even with those of you who came to Linz, we instantaneously transferred you. Because it's in dimension of the fields. This is why we, in the ?? Vision Units you came in, we controlled the fields. There were reactors hanging all over the place with you. In your home you don't have this. So now we tell you in the June session to bring with you four headphones, two headphones with four, what you call it, had what you call, the ear attachments. Because we take you to connect you with Soul and your emotion. And we set the system that way. (1:28)

Don't come to the June session, if you don't have two headphones connected. You can come with two mobile phone, you can come in one mobile phone with the double split connection with the headphone and a speaker, because it has to have both microphone and the earphone, that we can connect and disconnect. And, you will see how transmutation become much easier. We teach you at the beginning of the session, this month, how to control your breathing, how to control your, what you call, emotion, and how to go to the phase of transmutation. And then July, August, September, those of you who join us, will be continuous development towards the transmutation.

It'll be interesting when we reach Iran, those of you who are in the sessions and join us in Iran, we don't need to open a door for you to go to a space environment of travel. You transmute yourself in, there are no doors, there are no gates, there are no hatches to get in. It'll be interesting how you manifest yourself inside. And these are a part of the development which slowly, slowly has to be learned, that we take the fear and the magic out of it, it becomes the reality of science. Nowhere in the Universe there are doors, front doors, locks and intercoms. You walk through the energy understanding, you walk through the wall, because you know the transfer of energy, what is the use of the door. And you find out in the construction of the materials, which is actually, these are in patents, it's not something new, you create, what we call, (1:30) gaps in the structures that you can go through, without change of physicality or needing to understand. You need to bring the changes in.

Any other question?

Q: ... Are the massive sunspots hitting the Earth trying to help the lunatics not start World War III by sending us good energy?

K- You can take it the way you like. Don't forget, the Sun has a Soul for its Solar System, and he knows what to do. We attract some of these fields because we create the condition for it.

R: Perhaps we'll have Sunspot worshippers now, instead of Sun worshippers.

K- Oh, they'll find anything, anywhere, to do what they want to do. Any excuse.

Any other question?

Q: ... Has Mr. Keshe ever heard of Walter Russell? And what do you think of his work on light, matter, and motion?

K- Not really. No. I might have heard, but I don't know about this job, but not really, I can't recall.

R: His work has come up recently with the Table of Elements in particular. He has a sort of a spiral or ascending and descending, different way of describing the Table of Elements. (1:32) Perhaps we can get into that at some point.

Q: ... During transmutation the Earth was in my awareness, but I got the impression the Earth stopped running. How does this relate to no time and space?

K- As I always say, I wasn't there to see the whole lot, to explain. This is something you went through, and you'll find the answer and share it with us. Because you create a condition to be there.

In a very last conference we had in Vienna before Corona, we had a Knowledge Seeker who came in and sat in the chair. The very first systems we showed in controlling fields. And he set out to stop the systems rotating. And he managed to do it. Everybody else sat there. He came in to show he can physically create condition which can stop the system and he did. There were Knowledge Seekers, they were watching him. We create that state of mind to be at the level of matter to interact with and how we want to interact. It can be by choice, or it can be by accident, or it can be by creation of deliberate conditions.

(1:34)

Any other question?

R: In the Plasma Group yesterday, we had some interaction and Gail has a question that came up and I think it's ongoing for many people actually. About the difference between a Ray and a Plasma. And are the Rays Plasmas themselves? And can a single Ray create a Plasma?

K- In a way it does, single Ray of the Creator creates the Plasma of the Unicose. Yes. If you go into the back of book number 3, it shows the little splinters, and these splinters interact with each other. A Ray, a Plasmatic Ray, travels in the media of the Universe. And this media of the Universe has always different strength of fields, because that's the interaction of fields, keeps the structure of it. Doesn't matter how strong and how weak it is. And, so, yes.

Start with a Ray, interacting with the environment, you create a field, and interacting with the environment of the Rays and the fields, you create a Plasma. Because it's more of. And this is how we became to be part of the essence of the Creation from the Creator. It started with the Ray, and interacting with the environment. It's like creating that little spark, which you know, you, as I say, when you put a knife on the grinder, one of these interacts with the other, interact with the other thing, (1:36) and gradually creates the fields and the field interaction with the environment and itself creates the Plasma. That's dependent, that's on the size and the strength and the shape of the fields.

R: So, we were looking at that video that is a kind of a old classic now, it's... I figured I was almost 10 years old, on the Plasma animation. And I'm wondering if we could play it through, and you could comment whether it's accurate or not. As far as the Magnetic Rays turning into Plasma, and that kind of idea.

K- You see, what is missing from these Rays, to show they interact as they go. And those interactions interact. Now they interact with each other. And in that process, is not this clean, straight line. There are bits interacting with other bits. It's a beautiful animation in the creation of the Plasma, the way it should be. But, you have to show this is the ideal condition. But, in fact, when you see those Rays coming from the beginning, what you see here is the final interaction. Many of those interactions happens in the path of, from the start, till this Plasma is created, and they create their own Plasma, their own interaction. It comes as a single Ray, but it creates a field of itself. (1:38) Because now when these Plasmas are created around it, they themselves interact energy from the environment of the other Plasmas, and they create a field in the dimension of the creation of Universe.

R: Okay. I had a modified version where after that star is formed, you can see it here, just a second... After the stars formed, or the Plasma is formed. It, that could be a Proton or Electron, it could be a Star, Sun. So, then we have the other field coming in, and then the field forces between them...

K- Oh, I've never seen this before.

R: This is something I put together, from the other ones, just sort of playing with it. And then we have the free Plasma between those two entities, or three entities, or more entities.

K- You know, when you show this image, it's very interesting. In the creation of the lift and motion in Space Units, we don't have reactors. We create these fields and then we call the space gap between them according to their fields, makes one of them the feeder, and then the position. And the central field force of this collective interaction interacts with the field of the Earth and creates dimension and direction. (1:40)

Very strange thing, or what you see, we have seen in some materials which is found on this planet. We find objects in different shapes or forms, which looks like could be human, could be spaceship, it could be material we do not understand, but the shape comes from, whatever, which actually has happened from people, from the lives who transferred or transported or traveled (to) Earth. When you have these two lights, as you show here, two Plasmas, If coincidentally, accidentally, the field interaction between these two, or the, what we call, the central field of the reactors, matches the Inertia of the material .. strength of the planet, the whole craft instantaneously changes to a solid matter. Which means we can find, we most probably have found, we never understood, we have seen that certain objects, which we find, the material is not from this planet, because they just happen to create a field, which matched one of the element fields of the Earth, the matter state, and they solidify, they manifest as a matter state, could be with all the lives in it. We know this technology, we understand this, we saw it in past few years. (1:42)

The same thing, change of the condition, the air we breathe, the Nitrogen and the structure of the lung structure became equal to Magnetic field of the Plasma of the

Calcium, and we saw calcification in the lung, in the brain, we call it Corona. Because it has a field strength of the Calcium, so we saw calcification. This happens in the space travel. I'm sure in the future, many of those who travel in a Space dimension, even those who travel in the dimension of the Soul, will hit this balance fields, Inertia matter state, in the space and in their position, they turn to what you call solid state, let's say stone ice or whatever you might call it.

So these are the things which in the future man will learn in certain environments, what is the strength of the conversion that we don't touch it. I've seen a few example of this on the, what you call it, social media. And I laugh, I say people don't understand what they are looking at. But in fact, 99% is a life, it could be even our human life, where the STP and the STM touches at the strength, which is the Inertia of the time, place and the position (TPP). And we turn into a stone. It's happened. This is the process which happens. We create that field strength of that Inertia of the matter, and because we do it, we achieve the strength, we become. (1:44) And if it was theoretically we couldn't ?? , we've seen it directly during the Corona, how we saw calcification in the brain, in the lung, because the field strength of the environment was of Calcium, and so we saw calcification.

This is how life starts in so many places. This is how even the egg and the sperm lead to creation of life in the womb of the mother. Because it does ?? it. That womb is on its own, it's got its own Magnetic fields. And that Magnetic fields dictates according to the way it's been structured through the memory of the RNA, creates to create condition of life for a child. And in that position, and the strength which it has, allows solidification to the level of the Calcium to become the bone, allows the calcification to become the skin, allows calcification to become the lung, the liver and everything else, but in interaction with other fields, creating tissues. This is why we have Calcium in every cell of the man. That's the solid seed base, which the field strength in different part, dictates if you become the cell of the heart and liver or whatever. And where you become a bone, but now the environment of the mother womb dictate this, and then when we come out, because the mother has the same structure connection to the Earth, we can carry on living on this planet, and we don't die, at point of birth. Because, partially it's connected to the Calcium, and then we carry the same bone structure when we are born, and we carry the same tissues as we are born, because it's preset, plus the emotion comes from the mother, The field strength comes from the environment of the Earth, which has dictated what womb of the mother can create. (1:46)

And then, if you understand this in a deeper way, we can even say how the feature of the man is, why we look like our mother, why we look like our father, what is the connection between our feature and our ancestors. Because that womb has created the field. DNA has nothing to do with it, of what life we create. RNA has nothing to do at that stage. It's the mother's womb, with the field interaction of the father, or the creator, and the society of what life has come through that body to be there, gives the feature of the child in the womb of the mother.

If you take a womb of a Chinese woman out, and bring a womb of a European woman, and can transmute it, or transfer it, and you make the woman to give birth, even with a Chinese father, you will see a different structure in the Chinese, you see the European shape in the birth of the child. Even though the mother and the father, they're both Chinese. Because that womb has created a condition for life in the environment of the, in the Inertia of the Europe, and the emotion of the environment. And, it can carry with the field of the emotion of the womb itself. And we'll see this, science will prove us correct, because we've seen it.

We have seen this, they call it with the RNA, but there is no RNA. Now we go surrogacy through giving an egg to some woman. (1:48) Now, if man develops the next stage and transfer the womb, And the same egg and sperm of the Chinese, you get the European child. Because, it dictated that way. It is field strength connection in manifestation. When you look at the birth of a child, conception of the child, in the womb of the mother, it's a way of transmutation. We're transferring the energy of the emotion of the mother to the child, through other factors which connects to the environment.

Then we understand how we are created, we are created out of transmutation, and then we forget about it, because it's part of the same. It's amazing you. I'm sure many of you have been parents, and it's one of the biggest, what you call it, beauties of the Creation. A mother breastfeeds a child for one year, two years, and then she detaches, and she never comes back to it, to ask for a breastfeed. And when you tell her at a young age that this is where you were feeding, you've been fed for some, they deny it because it's wiped out, it's not needed. No information needs to be carried. Till later on, when they are 5, 6, 7, then they see others and say, "Oh, this is how I was born." And children get to know this.

We do the same. We deny our own existence of our own Soul. It's the same as a child denies the breast which fed it. (1:50) We chose in this way, but we have to become aware and awaken to the truth of what it is.

Any other question?

Q: ... Lately for most people who do One Cup One Life, the Gans that forms is almost all light blue in color. Why? Has anything changed on the planet or in the air? Could these Gans's be used as if they were a normal One Cup One Life?"

K- Yes, it's your emotion, you created it. Secondly, we have become aware of the strength of the fields of the why these things were produced and we don't see no need for it. So, that transfers the energy because you are connected to it, you used it, or you're using it, or you're connected through the energy fields.

Any other question? (1:52)

Q: ... Can you elaborate on the breathing process for transmutation? Or did you say this would be taught later?

K- We try to teach it on this month session. Because a lot of you have been through it. Because some of you, when you went through transmutation, you felt the emotion, the heartbeat change, the feeling was different. And now you have to understand how. Because we'll see this on our instrument when we do it. Because this way, you all harmonize to one. And it'll be much easier to go through the transmutation. And many of you will feel a full transmutation this time, I hope, because you have the both. It's time to move into that position. But don't forget, your Soul does not breathe. So a breathing is just to match your physicality to the Soul. But Soul has a heartbeat, the same as a man. So you need to understand how you connect that to it as well.

Q: ... Sometimes you put the tears to our eyes, (1:54) and a lot of times you put a smile to face... Mr. Keshe you prepared to what you said about the Soul a long, long time ago in your teaching, when you said, you go to the cemetery and you look near where this people buried, and look what kind of stones you will see in the neighborhood of this people. And then you will understand what kind of Soul this man have, in a way.

K- Yes?

Q: Secondly, this is the only question I have.

K- Oh, this is strange. I had an occasion, or a pleasure, or opportunity, to go to a cemetery in past few weeks. I haven't been there for a long time. What was strange with this cemetery is that I saw a gap under the stone, the top stone. And all these stones had hinges that could be lifted. And I said, why is the gap? They put like a piece of stone between the top stone and the frame of the grave. Oh, they said these are empty. People have bought it that when they die, they can bury it here so they can lift it and put them in there. And I thought, what a strange way. People buy the graves to be buried in. (1:56) And this grave was originally owned by somebody else. They take it out or whatever, or they're there, they add to it. And it was very strange to see how the emotion of the graveyard has been. Because we are used to, we go to a graveyard, maybe buried in the one or two, husband and wives are buried with each other, or whatever, in the same plot. But I've never seen an empty grave, bought waiting for the bodies to be added to it. In the middle of a very, very jammed cemetery. What do we see? Do we see in the Soul the structure of the people who've been there before? Or is about to come, we don't know how he's going to end up on the time of what we call, their own Soul judgment with themselves? And it's very strange you bringing this subject up. But in a way, usually is. We feel the emotion of the time and space of the STP, and how it sees itself.

Q: Maybe, maybe this kind of energies which created that kind of stones, what you call, different kind of, you know, colors.

K- Possible, it's how we interact with it, but as I said, if you, what you call it, enter in this dimension of the graveyard, and how you feel, and how you see. (1:58) I attended a graveyard last year, when I was in Manchester. I went to see the grave of my parents and my brother. And nearby, there was one grave, maybe 20, 30 meters away, maybe less or more. And this grave, I walked around the cemetery looking everywhere. This grave was

the only grave with the white mushrooms. Little, little, tiny white mushrooms covered the environment area of the grave. Not to the next grave, just to this grave. And it shows what the Soul carries underneath. I know whose grave was, it wasn't some stranger. And when I looked at it, understanding the essence of the mushrooms and everything else, I said, this befits. What's underneath brings this poison on top. It's a poisonous mushroom. And I walked maybe 300, 400, 500 graves. I looked at everywhere. This is the only grave. And I know the person buried there. Extremely devious, extremely harmful. And even in their death, they create poison mushrooms. And that's the only grave. So it reflects what's on there.

I was in a meeting with, when I was in China with Chinese officials, very high ranking officials in a discussion about agriculture in China, and how scientists don't understand. They try to change the soil, or they try chemicals, or biological to create condition of agriculture. (2:00) But what they don't understand, and I've explained this before, is the simplicity of it, which is, in a way, when you look at the structure of a... I show it here because it's very interesting. It's some of you as Knowledge Seekers if you learn this, you understand what to do with it. (Let me see if my pen works. No. No. No. Let me see if my finger works. Yes, it is.)

When you look at the landscape, you see they tell you this land is alkaline and salty or acidic. And they do everything to change this. But in fact, what they don't realize, this acidic, this alkaline, created because of the layers below. These layers below, in interaction with the environment above, allow this, what you call, condition to be created. No salt, I mean, so much salt. And the interesting point is, we had this, and we have this dilemma now in Inner Mongolia. It's a very big project going on in Inner Mongolia. Keshe Foundation was involved, as you know, years ago with this. Is that here, in Inner Mongolia, we have 30 centimeter of salt and alkaline, which they cannot grow. It's very hard to grow things out. And the strangest thing is, immediately below 30, 40 centimeter is a sweet water. (2:02) And I said to them, this will not change, unless we cannot change this parameter underneath. This parameter underneath was created long ago, which is interaction with the above and other layers underneath, allows the planet only to capture salt and calcium, or calc. And if you understand this, you understand what can grow on top of it.

So simply is, you put the wrong Soul, very 30 centimeter, you get the mushroom on the top. Then the environment tells you what's buried underneath of it. So when we look at the graves, when we look at these structures and what's above it, collectively you see what Soul is carried, what can be carried with. And what and how will it change the environment above.

In the International Agriculture we're talking hectares, thousands of hectares of land, and they try to change the salinity. I explained to the officials, you need to change the environment above. Because you cannot do anything (with what is below), this is built and it's part of the structure for millions of years. And you will see this land, even in a salt, will cultivate the most sweetest fruit. And some of you who made Gans's, you

already have seen this, but you don't realize it, because you, you were too service working. (2:04) You see this principle in teaching of the Keshe Foundation.

So, this is your Soul, instead of the ?? weather on top. Let me change the color that you understand, this is your Soul on the top. This is this Soul on the bottom, and it sees it, it feels, it knows what it has to. Does not matter what ?? train has been created, because the Soul underneath, does not change. And then you understand what graveyard ?? need to.

Q: ... Speak to the window for the door to listen.

K- Yeah. But this is what it is and that's how it is. And that's how it takes shape. ...

Q: ... In the paper which has been submitted to the Royal Astronomical Society of UK, Mr. Keshe mentioned that black holes should not be called a black hole. An appropriate name should be 'Zubeen', which is an old Aryan name, means an arrow with two heads. My question is, does that mean the word 'Zubeen' or does the word 'Zubeen' have any other meanings, (2:06) other than the name of arrow? Does it have the meaning of bringing new life? Thank you.

K- It depends how you interpret it. In the old understanding, the two were the sign of balance. And the two arrowhead created two different characters, characteristics. And it has a different meaning. And amazing enough, you... people with this name, you see them, they have these characteristics with them. It's very strange how we choose our names. Very, very strange. But maybe the Soul knows, that's how it's going to be, so I give it this name, that it matches.

Thank you very much for today. Please, those of you who want to come to Iran, register as soon as we can with your details given to us by email separately, not on the, what you call it, your information, your name, your details, the place, which embassy you will ask for the visa. And most probably we ask for a copy of your passport in the due course, and everything else will be done, all we try to do, that it makes the passage easy for you. And your point of takeoff and landing, as your part is, is Vienna. And we do the rest, to take you into Iran and bring you back out, and we cover your first 8-9 days of stay. And I'm sure you're going to have one of the most beautiful time. Not only seeing the beautiful nation of Iran, but seeing the change in the world of science and technology. And that's what we promised and we deliver. Thank you very much Rick, and see you next week.

R: Yes and ... I hope I'm not late for that one. Thanks for holding everything together and...

K- It had to happen one day.

R: Yeah, it was a good practice round for... I won't be here forever.

K- We are never ?? here forever. We just go as far as we can, to share as much as we can. And as we've seen today, the new generation will take over, then we'll carry on. Thank you very much and see you next week.

540 KSW May 30 , 2024
