

541st Knowledge Seekers Workshop June 6, 2024

(Quick Index 20 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Every structure in U has 'DNA' - stones - galaxies - hidden - for replicating; Everything has Soul - move Soul of cup to please; Genetically modified - cloning; Don't need machines to move objects - with Soul; DNA & emotion stays same when transmute on Earth; Made U in My image; Soul of Emotion provides everything when transmute; Transmute back to Fundamental Plasma (FP) - everything created again from FP at destination; FP collection of fields & Rays - have emotions; All elements made from H; Genes & hormones only on Earth; Instantly mutate into new environment; Each star own atmosphere; Show beauty of Creator - make children - of ourselves like Creator does; Empty gaps between M fields G - back to Creator; Rays within STM carry emotions; Fields go both ways; Why STM on top of head; Live only to feed STM elevate; Can keep STM hungry eternal life in P; N converts C12 to C14 vice versa; Creation only uses own fields; Move object in Transmutation - not moved - have to move Soul; Transfer Soul of money; Grow more carrot - through emotion of Soul; If T doesn't work - not understand; Not Gans - fields; Separate out fields you need; Creator created condensed fields inside you - see beauty of own Cosmos; FP is our Soul; Where comes FP; All comes from Rays of Creator; Detachment - we are fields in transition; KS blame others for own failure; Prepare KS for transmutation in Iran Washington - honest with self; Love of Creator from heart; KS backbone to peace - 20 KS have to show transmutation - bring change - 2024 promised time; Cuddle Kiss is fantasy - all wants satisfied; Emotion of Jealously cause; Soul absorbs higher strength - pure - feed P; Satisfy all emotions - won't kill; All emotions in FP; Emotion is reacting to environment; When satisfied - negativity doesn't arise; People transmute - kings won't - attached to wealth; Be cuddled by Creator; Serve with detachment - comes from Creator; 70 years serve Creator - lost by 1 action - must be perfect; Chinese society explained - Media misrepresents - also Syrian president - Romanian Ceaucescu; STM works by correct living; Invested millions in China - stopped - mismanagement; Soul of handicap closer to Creator - judge P; Stillborn - direct to Creator; Not water - flow of fields creates life in U; Teaching on Hormones - connected to Soul - H based U Energy; Animals can't use other womb - different emotion - strength; Omega 3.

Topic Index

Every structure in Creation has DNA - stone - galaxies - is building blocks of creating bigger structure; Every living thing in U has DNA; Repetitive copying of its own structure; Galaxies have same structure DNA as body of man - rhythm of Creation; Connection to DNA is a hidden one - communicate - know how to place each other; Genetically modify some DNA and RNA - plants; In animals called cloning - different names for same process; Genetic modification or cloning forces changes in process - for repetition; Same thing in Matter State mass produce cups - forks - cars to all look same; Structure of object has "DNA" to keep itself together; It has a Soul - point of balance - communication - confirmation; About KS who tried to move cup with thoughts - man-

made cup actually "genetically modified" structure with a Soul - connect to Soul - move Soul of cup to please; Don't need to create matter state field forces to move an object; On Earth move body from A to B - DNA stays about same - emotions stay same - because we're within same atmospheric conditions; STM with DNA - RNA is combination of STP structured to fit environment; When transmute keep objects - create common denominator position - keys & clothes arrive with in New York; Also means - "I made the U in image of Myself" - everything has a Soul in image of Creator; It's the essence of His Creation - not the manifestation; Transmute to hot place 'Soul of emotion' will provide appropriate clothing - to please us - same way move Soul of cup; Soul of cup moves to please us - it gets happy to please; In transmutation transfer totality of emotion - transfer Soul of objects with us; Stone from Earth not exist in another planet with different isotopes - field strength; Basics of Transmutation - understand fundamental elements of Creation - Fundamental Plasma (FP) - everything created from; Embed totality of our essence of existence on Earth - all we gained in field strength and knowledge into a single structure - a FP; It's a collection of fields; Fields have emotions - intelligence - DNA - happy or sad; Rays carry 'Soul of Creator' - Creator of Totality - they are FP - divides becomes H - continues to divide - amalgamates - receives radiation from own fields - creates all other elements; Other elements made up of H; STM operates same way - made up of fields; Our genes - hormones - only effective on this planet; Hormone creates an emotion - makes you do something; Transmute with whole body don't leave kidneys behind; All parts organs of body convert back to fields as a single plasma to transmute - not as individual plasmas inside body; Travel systems for Space create conditions for feeding - breathing - replicates life conditions on Earth; Mutate into new environment instantly at destination - carries essence of Creator starts new life; Convert all memories, emotions, DNA, RNA, everything into one FP - manifest according to environment & fields at destination; We are different parts of a Single Plasma - each has a function - sense of emotion and being part of fields of Creator; Even fields and rays inside FP carry a Soul - they understand and participate in whole structure; Rays within FP carry emotions, genetic coding, whatever you understood, all your assumptions - they interact with new environment - determine manifestation of P; Why each star has own atmosphere and structure; First seeds of star are emotions you have gathered - manifest planetary system of your own - reflects who you are; Everything we possess - all that we created comes from original fields - we go back to them; Create new life cycle in new place - from what we have gathered on Earth - might not create human life; You transmute back into a FP - go to destination - take any shape according to your emotion - to satisfaction of your Soul; Guiding you back to essence of Creation - teaching of Mitra; Job is to show beauty of Creator - have to regenerate - create children of ourselves - show essence of Creator; Fields and Rays of Creator led to our creation - we will create children of ourselves (like Creator); Rays within STM - carry all emotions - ready to travel span of U; Man can reach Creator because came from; Iron dust shows gaps of M fields for solid magnet - physical line M fields - empty gaps are G fields back to Creator - can't see; Fields exiting North Pole - 'Eddy Currents' - fields circulate both ways - leads to creation; Why STM positioned on top of head - absorb energy from U Community - elevate STM on top; Totality of man's life - only to feed & strengthen Soul for elevation - feed Soul through physical condition of planet; Elevation means to absorb enough energy - to separate from P; If keep STM hungry to keep absorbing fields - then

can live everlasting in D of P; Never allow STM to reach maturity - keep it expanding; Or transmute from one position to another without P - but must feed Soul - embed part of P fields to feed Soul; Through Nitrogen (N) convert C14 to C12, vice versa - keep it nourished; 9 months in womb - switch to womb of planet - process of Creation; Why point of reproduction of all animals - on other end of body; Transfer of energy between two confirms reproduction - takes what need from environment; STM in head - STP surrounds it as a plasma - feeds STM to elevate it; Soul can feed body - don't need to kill; Reproduce energies of U - Cosmos within himself - transmute; Even though I created the field - it has become stronger than me - I can receive from it; Live forever and feed from own creation - this is how Creator does it; No computers Creation only uses its own fields; Take long time for man to achieve; In transmutation you moved object in house - but when checked in P it did not move; Have to learn to move Soul for pleasure of pleasing you; Testing KS to go home and move objects - cannot mix 2 D - have to move Soul; Transfer Soul of money; Realize D of P is not what it appears to be; No interest to be successful - transfer knowledge to humanity - change; Agriculture, health, transportation all same process of working with fields; Why produce more carrots - carry essence of energy - fields of emotion - that carrot wants to show it's best; If T doesn't work for you - haven't understood essence; Not Gans - it's the fields; Everything created through different combinations of fields; Learn how to separate fields you need; Today's teaching - understand exactly what is what - what you have to do; Feed the plasma; Take a lifetime to understand today's teachings; Understand energies and fields that created you - essence of fields came from Creator - by division fields have become you; How did they arrange themselves to become your organs and everything else; You created a condition inside yourself to condense (fields) into different forms; This is exactly what Creator has done with Himself; He created Himself within you - condensed the fields; Through one egg you were able to create beautiful child; Imagine what you received from Creator - transfer it to create a child of yourself; Same with Creator - sees beauty of his own Cosmos and Unicose; Every structure has a point of infinity & affinity; Understand origin of life - original FP which is our Soul - (Creation out of divisions); Whole process of Creation started with one Ray - it interacts with self and environment - creates all of Creation; As single Ray travels through Space it interacts with itself - makes splinter rays - creates fields and plasmas; Soul of Creator is part of a bigger structure; Question - what led to creation of FP; What will we create next - uses same process of FP; Does the STM become part of Totality of life in U; Body is a Unicose unto itself - organs are universes - Milky Way could be kidneys; We are the replication of the structure of life - division of fields working within each other; All come from Rays of Creator - that field can repeat itself again and again; Depends on maturity to understand Creation; Now maybe you understand how to transmute; Knowledge should become ingrained; The Soul gives to keep and create a connection - move objects; Through N convert C14 to C12 and back; When too much energy neutron divides - creates new plasma - can create any element in U; Gold will have no value; I don't own a car in my name - detachment - we are fields in transition - our work is to get the job done; Always help KS with plasma projects - but comes to the point - they have to stand up on their own - then they blame Mr. Keshe - not because they didn't understand essence of Knowledge of Creation; You are responsible for why you failed - got stuck in P; Monthly Flight Session of June - August prepare for presentation in Iran - teach you to transmute - I'll be in there physically with you; Have to

reach emotion of Soul; Transmutation is about being honest with yourself - cannot lie with Soul; Love of Creator has to come from heart of man - not talk - why KS have not managed to transmute - fool yourself then blame everybody else; It's for you to understand yourself and transmute.

Part 2

Iran conference KS should quickly register - KS Price will close; Offsite demonstration - Plasma flying system by Iranian Government and Military; Flight sessions July - September - bring many of you to transmutation - private sessions intense; Demonstrate in Washington - have to already be able to transmute; Please collaborate with us - open the T; Always keep these KSW going; KS are backbone for world peace; Show you transmuting without limitations in Iran and Washington - ambassadors of peace; Show governments borders have no meaning - wealth and robbing each other's banks - no meaning; You are 'assets of peace' - tools to create world peace; The more KS who can Transmute - better to show governments - wars will have no meaning; Have to show - not just a theory; We'll ask you to show Transmutation in Iran and Washington - need 10 to 20 of you; Bring consciousness to world leaders & governments through T; New systems getting developed to bring it; 2024 is promised time of delivery of unification of man - world peace - end of old structure; Thinking everybody needs to cuddle and kiss is a fantasy world; Mother of peace is understanding we don't need to destroy anymore; Emotion of jealousy - instigator of problems; Man can have whatever he needs through fields of U - become peaceful; Today's teaching - how to feed your Soul through fields - Soul feeds P; Soul absorbs higher strength fields - purest form - essence of food - don't eat; STM feeds all cells only from pure H; P takes what it needs - doesn't have fear for survival; No need for emotions to be part of physical life - don't need to kill to satisfy a hunger; fields feed emotion of hunger immediately; Feed man through Soul; Satisfy all emotional needs - no impurities - really satisfied; FP has field strength of every emotion U - we know only a few; Emotion means reacting to environment - why we need that emotion; Show love to someone - not everyone on street; Work through Soul - all these hungers & emotions are fed; Fundamental Principle - when you feel satisfied - negative thoughts don't exist anymore; Haven't reached that point; Iran & Washington - show - every man can have everything he needs - all Souls equal; Ordinary people will transmute - Kings & Queens won't be able - attachments to me and mine - wealth - remain anchored to P; Gradually see it all happening; Don't need to hug everybody - already hugged by Creator; Emotion satisfied - won't think about bad things; Poem - 70 years served Creator - lost it by falsely accusing neighbor - truth not in heart; Essence of Creation - have to get everything right; Detachment; I never ask for - nor take what belongs to someone else - serve humanity; Essence of life for Creation and Creator; Serve with detachment; Detachment comes from Creator; Have everything you need; Whatever happens in life - doesn't change mission of our life; Otherwise live the past; Live by Creator's law; Story about living in China - China is like an open prison; Others don't understand China; Government puts so many restrictions - people don't have opportunity to do crimes; Opposite in West - need guns and prisons; Western Media misrepresents China - judge by their own narrow conceptions; Harder to buy kitchen knife in China than machine gun in America (kids go to school kill classmates); Drunkenness & fights on streets normal in

West - doesn't happen in China; Handle with kindness of a mother - 'iron fists' of father - people follow; Everyone has agreed to live a correct life; This is how STM works; Create so much good within - bad won't exist; Those who don't get own way - create problems for others - distract from their own bad behavior; Invested millions with Chinese - couldn't manage it - had to stop - they started blaming KF - not want to see their own incompetence; Same with Creator - gave Man so much - man's incompetence - has to solve own problems; If lose your phone on the streets - get back in 1 hour - know you live in safe country - only happens in China; We create our own conditions for how we want to live; After 7 long years - gave up on Chinese structure - failing themselves then blaming others; People with disabilities - only looking at physical side - don't see what Soul is doing; Handicapped person's Soul could be a thousand time closer to Creator; Suffering makes the man wise .; No defect - depends on perspective; There is no disorder - order in disorder - nourishes within; Story about working in Romania time of Ceausescu - richest country in Europe everybody satisfied - West took it down like Libya - Syria - Western Media turned world against them; After 10 years President of Syria flies to Beijing - other help keep safe - lies in Media about shoes; P tries to be special and different from the others - purposely creates wrong ideas for others to believe in; Souls never get humiliated - only serves; Dynamic reactors takes what it needs; KF systems provide everything your body needs - come out a different person; Old systems were loud - new ones silent - only absorb what you need - balance between P and STP - emotions; Create FP at strength of Creator - have access to everything - we can do; Not within structure of the man - otherwise everyone reach purity of Creator; Sometimes Soul goes directly to Creator - stillborn; Completed process of Creation in womb of mother; Reach Soul of Creator's love - no need for physical life; If I tell you how beautiful it is on the other side - all commit suicide - but essence is maturity of the Soul - then that Soul leads to creation of others; On Earth everything needs water to live; But it's not water - needs a dynamic flow of fields - not necessarily matter state; Create life in U out of dynamic flow of fields; O and H in combination - lead to creation of C14 - connects to Universal Fields; Life without water; Even stone needs connection to energies of Cosmos; No physicality can manifest without connection to Universal Fields - local fields cannot sustain life; Teaching on Hormones; All hormones carry H base in field strength - connected to Soul - convert to P through C14 & N; In transmutation have to know which element is connected to Energy Bank of U - on Earth it is N; More steps after hormones; Operates between fields of U and body; Always shedding skin to remove old skin - new skin to absorb new fields of U - also to give fields we don't need away; Hormones - step down energy of fields to strengths we can use - part of creation of emotions - they come through Soul in interaction with fields of STP; Hormones make emotions - create fields needed for brain; Why can't produce some hormones outside of body - connected to emotion; If create fields of that emotion in a machine - can create any hormone; Cannot put egg of elephant into another animal - doesn't create emotion and field of womb of elephant; Don't use hormones to transmute; N is in every cell of body - COHN - stores and converts energy; N converts C12 to C14 and vice versa; How we are connected to Universal Energy through C12 - C14; Liver transforms one element into another; C12 to C14 mechanism creates dynamic motion - runs AA; To store - also have to attract (N); Vitamins stored only in certain places in Liver with M fields - transforms Vit C into Vit A - others; Transformation process lubricated by the Omega 3 - helps N keep AA going;

Omega 3 is a H based element - connects to Universal Energy - any deviation have problems - lubricant and catalyzer for conversion of C12 to C14 in N;

Introduction to 541 KSW - Fundamental Plasma - Everything in U has DNA - N Dynamo - Hormones - Extending Life in P

We have reached the point that the change in 2024 will come through the Knowledge Seekers (KS) being able to demonstrate the full physical transmutation in Iran in November and later next year in Washington. Mr. Keshe said, that the more KS who can transmute the better, but he is hoping that at least 10 to 20 humans can do it. Maybe this is why in the past few weeks he has intensified and deepened the teachings. What KS have to do, is to be able to transmute their physical body back into a single what he called, Fundamental Plasma (FP). We came from the FP and now we are going back to it, but we will carry with it all that we have gathered as field strength through our life in physicality (P), emotions, knowledge, even our assumptions we have in our life. Everything will be contained as fields inside the FP. And these fields have a separate identity and they have a soul and emotions. It is my understanding that the organs and all the body parts which make up the Soul of the Physicality (STP) will go back to energy information, that then can re-manifest if we transmute somewhere on this planet. But if we go to another planet or dimension (D) then they won't be needed but remain as stored information. I don't think anything of our experience is lost. It can always be recalled through our emotions of wanting to manifest ourselves again in physicality.

It seems that the importance of everything being gathered under as single structure is so that we remain as an 'individual' who is evolving back to his origin, which we understand as the Creator. And recently he hinted that when we feel we have gathered and served our Creator enough, there is yet another new life beyond that. But that is part of the 'never - ending story of Creation,' and the knowledge of that will come later. For now the individual becomes divine, meaning it is connected to the Totality, but at the same time remains an individual. And the only way that could happen is if we can keep all our fields, experiences, feelings, knowledge and everything that makes up who we are together and growing. In other words, we don't get lost in the ocean of the Creators fields, if we don't want to, but remain 'self-conscious.' He said at one time that we do have the option to give all our field strength to another plasma and we would continue as part of that plasma, but not as an individual Soul. But what would that experience be like? Does the cell-soul on my toe know that he is part of my body? These are dimensions we haven't even glimpsed into yet.

The deeper we go into the knowledge of transmutation, the more it appears that every single thing in the Universe (U) has a soul and it has to be respected and considered. He went further to say that everything in the U has "DNA," even a stone, galaxies, and Unicose. I don't believe it is the same as what we think of as DNA or deoxyribonucleic acid, which is a kind of spiraling molecule that contains all the genetic codes that make up our body. Basically it is a 'construction plan' of how we are put together. We think of the physical molecule as the DNA. Whereas in Plasma Science we understand that to be only its physical manifestation. And that its origin is actually in the unseen world of the

Soul and plasmatic M fields. To say that a stone has DNA, and if it is parallel to our DNA, then we should be able to find a physical manifestation somewhere. Maybe it is hidden in a dimension of the Silicone molecule that we don't know about. Or it is totally contained in its soul. But we don't even know what that means, 'a stone has a soul.' But we are learning very quickly. The DNA allows us to repeat the same structure over and over again and this must be a fundamental principle of creation of the U. So in our body we continually reproduce cells according to the plan of the DNA. Then the U must also continually replicate plasmas for whatever it needs. At this point it is probably sufficient to know that "DNA" is the way Creation replicates itself and these codes are contained within the M fields along with all the other knowledge it needs for Creation.

What is the purpose of knowing about the DNA or the Soul of objects? He gave the example of the Italian boy trying to move a cup with his thoughts, but only trying to do it with his physicality and his physical understanding of energy. If we understand that even manmade objects have a soul and DNA then by connecting to the soul we can ask it to move and it will move to please us. Just hearing the words is not going to be enough. We have to understand about our emotions and how to connect to other plasmas. First of all we have to sort out this idea of 'pleasing' from our egotistical idea of it. It's not pleasing someone to get our own way, which is the unconscious understanding of the modern Internet culture. In Eastern philosophy they say, God created Creation out of the joy of it. It's just the happiness of existing, or the 'bliss of Being.' But as we are programmed with 'slave mentality' we wouldn't really understand what this means. We don't need a reason to exist, and existing in itself is blissful. In India they call God, "Sat - Chit - Ananda," which means Consciousness - Being - Bliss. You don't have to prove your worth to anyone, just yourself. With this in mind, the soul of a stone would not be programmed with 'human slavery mentality.' In the U it seems that Souls love to give to other Souls, just for the joy of giving. So if we connect to the soul of the stone, through our fields and not through words, and create the emotion of the Joy of Existence, it would move itself just to please us. It's not like paying somebody to do something for us. Out of the love and joy of Existence it would move for us.

I would like to share something interesting. This knowledge about objects having a soul was hidden in the Indian scriptures and only today I realized its meaning. In the Ramayana, the condition for Sita's marriage was that the king who could lift 'Shiva's Bow' and string it would be the chosen one. All the most powerful Kings could not even budge it. What you realize later is that all of them considered the Bow only as a dead physical object. Then Ram came and he folded his hands and bowed with respect to the Bow and he lifted it with ease. He connected to the Soul of the Bow and it responded. However, I don't think the Indians would like to hear this, because they all accept that the Bow was endowed with Shiva's consciousness, which in a way is also true. But a further understanding is that the object itself also has its own consciousness.

We need to do this when we transmute, so that we don't land in the middle of a crowded street in New York naked. Because the 'soul of our clothes' decided not to join us in the transmutation. As Mr. Keshe said, this will sound very strange to us, but it is the reality of how life in the U works. This may be one way, but there also seems to be another way.

And that's what he called the "Soul of Emotion," which will automatically make sure we have the appropriate clothes on for the environment we land in. The beautiful thing about Transmutation is that when we connect to our Soul and know it, then it will take care of all these technical things.

The teaching on hormones is not conclusive but today he gave us more information. First of all, when you look up hormones in Wikipedia they say they are molecules that signal or tell a part of the body to do something. Then look carefully at their chemical composition. They are essentially C and H connected together in hexagon and pentagon formations. Where have we seen this before? The skin is made up of hexagons and pentagons and through this crystal structure communicate and interact with the environment, which means not only the Earth's environment but also the Cosmos. This again points to the C isotopes of C12 and C14 and of course H which connects directly to the Creator. We are in the same structure of how the U works.

As science is atheistic and cannot admit that there is a consciousness, or Central Intelligence controlling the body, then they completely ignore this part and discuss the process as mechanical in nature and then go into so much details of this and that, that we get lost in the maze of terminology. Maybe this is what Mr. Keshe was referring to when he said that hormones were a step-down in field strength from the STM. I understand this to mean that hormones are a lower order of plasma that carry out the work of the Soul. In a way, the Soul is the boss and the hormones carry out the tasks, but they are not just ordinary plasma 'chemicals.' And this is why some of the hormones cannot be created in a machine, unless that machine can create the field strength of its emotion. This may indicate that the hormone may have a certain level of consciousness.

He said that hormones as a base, have a H field strength, and through this H they are connected directly to the Soul. Maybe this is how they receive the orders to carry out their tasks of informing the different body parts to do things. The way I think of it is the hormones have to convert the emotions of the Soul into the actions of the body, and this is done through the N in the COHN and the C14. On Earth the N is what he called the 'Universal Energy Bank,' but this really means that through N in the COHN, is how we receive Universal Energies through the C14 which converts to C12 to be used in the physical functions of the body. Basically this is how we get the energy to function as a body and a Soul, but we are not conscious of this process. We believe we are getting everything from the food we eat. So when we transmute to another planet our Soul will have to discover what is the "COHN" and the "N" for that planet, then the C14 will come through that specific element. Other than that he didn't mention anything about the hormones and transmutation.

Earlier he taught us that emotions are created from the interaction of the STM with the STP in the brain. Hormones are part of this process of their creation and cannot be left out. Hormones are not just chemicals as we may think. They are connected with the Soul, but we don't have much more information than that. But he told us that it is because of the hormones that we have to constantly shed our skin. If we didn't shed our skin then the process of receiving Cosmic Fields to run the body would get blocked up and we would

die of a lack of energy. In summary, in order for the Soul to tell the organs what to do, it requires some kind of intelligence. Could the hormones also have some level of intelligence to help fulfill its role as a messenger from the Soul to the body parts?

This process of how we take energy from the U is very important and Mr. Keshe keeps coming back to it and going deeper. My understanding is that the C - O - H - N forms a Star Formation with N as the converter and transformer of energies especially through the C12 - C14 process. And the N also has isotopes that connects to Universal Energy through N14 and is the Energy Bank on Earth to the Universe. And this back and forth conversion of the C12 to C14 and back to C12 is what makes the COHN a dynamic field generator and as it is in every cell of the body we must appear as glowing from the dimension of the Soul. He said that throughout the U the energy received from the local environment, in our case the Earth is not enough to power the physical body and feed the Soul. With this knowledge we can visualize every single cell as a field generator through the N and that we are receiving the Love of the Creator, the Cosmic Rays and Fields through this process, and it has the power to feed the Soul without our having to eat food.

In the past he told us about the Earth's M field flow pattern where the M fields go out through the North Pole and the G fields come in through the South Pole. There are gaps in-between the flow line where the fields flow in the opposite direction, but we can't see them. So fields are flowing back into the Earth through the North Pole in the gaps. However, this is just a basic understanding because the fields also flow everywhere else, but for our discussion we only pay attention to this flow. The same occurs in the body where the North Pole I guess would be on top of the head and the South Pole at the feet. The STP would have this major flow, but then the STM would also have a flow where it would receive from the STP at its South Pole and circulate around. This is how the STP feeds the STM. Then he said the fields of the Soul of the Creator (STC) come into the body through the gaps at the "South Pole" end, and this also connects us to the Creator. Thus it gives us a way back to the Creator if we know how to use it. The Souls of Children who are stillborn have matured in the womb and travel directly back to the Creator without having to go through P.

It sounds like the energy from eating and absorbing Cosmic Rays, builds up inside the STP and creates a pressure that radiates out to the physicality and feeds it. Then the P in turn feeds the STM at the top to reach elevation and leave the P at death. However, if we can keep this process of feeding the STM going, by continually keeping the STM hungry then we can keep living in P forever. The STM will keep expanding, but it is never allowed to reach maturity. I wonder if this is part of the process used by what is called Bodhisattvas in Tibetan Buddhism. These beings have vowed to remain connected to help beings suffering in the world, and maybe this is a way their Soul is fed. There is an interesting story of Milarepa, who after dying and in front of a crowd of disciples slowly shrank his body down until it would turn back into light. But his disciples stopped the process when he was at the size of an 8 year old boy and they cremated the body so they could remain connected to him. It's not exactly the same, but in general, they found a way to continue to feed the Soul so it could remain connected to the physical dimension. There is another method of embedding part of the physicality fields which feeds the Soul,

into the Soul itself and this would keep it going. But he did not clarify how the Soul will be connected to the physical dimension. Another interesting thing is that he said that, what we create can become greater than us, and then we can find a way to feed from it. And this is what the Creator Himself does with His Creation. But we still need more information to understand it more clearly. And feeding from your own creation is not necessarily a negative thing.

The Transmutation training is coming along in a very good way. KS are able to transmute to their home and move a cup. That's a huge progress. But when they go home in physicality the cup has not moved. And now they have to learn how to connect to the Soul and create the fields of satisfaction within the soul of the cup that it will want to move to please them. If we want to see the change this year we have to get more KS able to transmute. Hopefully, more Souls will come forward that can transmute. The wonderful surprise is that Mr. Keshe is going to transmute with them, 'holding their hand' step by step until they get it. What an honor and a responsibility. And if they all want to transmute to a place together then they need to create the field strength of satisfaction in the Soul. It's not by words or superficial thoughts. The satisfaction in the Soul is most likely related to the sense of Being. And if we contemplate life and realize everything we see out there is coming from inside us, and then if a sense of detachment arises the transmutation will go easier. Detachment is not depriving oneself, that attitude will create a block. He gave a hint that the Creator is detachment. Since He knows all the things come from within Himself including the love, then He shares it equally with all. He belongs to everyone. Mr. Keshe gives us this example in how he teaches the Knowledge of Creation to everyone freely and equally. Detachment is being free within oneself and is a positive quality. If we KS understand this then transmutation will become easier. But still, it is up to us to drink the water of Life and be nourished by the Knowledge of Creation.

Other Topics:

Very soon Man will be able to reproduce the energies of the U and the Cosmos within himself. Then he will learn how to use it to transmute;

Thanks for listening.

Quick Index

(Over the past few weeks we have talked about the DNA and what we call, the transformation of our energies through the Nitrogen (N) to Cosmic Rays (CR) and our connection to other points of conversion inside the body of the man. An essential point we have to realize is that every structure (in Creation) has a DNA whether it is a body of the man, a stone, and even the trees carry different combinations of fields and energies. And then the stars and galaxies have a combination of (their formation, which is like the DNA in the human body). All universal structures have the same. It's the building blocks of (creating) a bigger structure).

(With our eyes we can see the stars and the galaxies, and these are all part of the structure of the bigger DNA of building the Unicose. Our Universe (U) has a specific combination of DNA that lead to different combinations of life. The DNA structure in our body is a small scale structure of a given pattern, but this structure applies to every living thing in the U. Humans have only concentrated on trying to understand about the structure of their own life and not the others. Because a stone has the same structure of having DNA. The same with the Solar System (SS), because it leads to production of the same things repetitively, and it can be replicated inside its own structure. We see bigger stars within the boundaries, and smaller stars in the outer most boundary ?? of galaxies and sometimes they have a smaller compact structure inside the center. But they are all placed in the same position).

(All the galaxies have the same structure DNA as the body of the man, because (it's part of the rhythm (of Creation)) and there is a structure to it. The connection to DNA is a hidden one. (?? They communicate with each other and know how to place each other. This becomes important (when we genetically modify some DNA, and some RNA. For example, we say we genetically modify plants, but when we modify animals then we call it, cloning. But it is actually the same as genetic modification in wheat, rice or whatever. We have just chosen different names for the same process).

(When we genetically modify or clone animals we are forcing a process to create (new characteristics) in animals. We make the characteristic to repeat itself in the animals and we don't know which is the original one, because they all look the same. We do the same thing in matter state too, but in a different way. For example, we can factory produce cups, forks, and cars all to look the same. We can enforce the same change on all of them. We can make one million pieces of one type of cup. That structure has a "DNA" that keeps itself together. It has a Soul. In a way, it has a point of balance, communication, and a point of confirmation).

(Mr. Keshe refers back to the Italian couple of some years ago when he tried to teach Knowledge Seekers (KS) to move objects with their thoughts. The guy was trying so hard and forcing his face into different gestures trying to move the cup. If he would have realized that the man-made cup was actually a "genetically modified" structure with a Soul, and if he could have got in touch with its Soul and have connected with it, he could have moved it. Then you understand that you don't need to create matter state field forces to move an object, like with motors and the rest of it).

(This is important when it comes to moving our body in transmutation. On the Earth, when we move our body from A to B our DNA stays about the same. And our emotion also stays the same, because we're within the same conditions, and same atmospheric conditions. Our Soul along with the DNA and RNA, is a combination of creation of the Soul of Physicality (STP) and it is structured to fit this environment. If we transmute from London to New York we want the key to our house to still be there in our pocket when we arrive).

(In the process of transmutation we have to create a common denominator position, so that the key will arrive with us in New York, and the same with the clothes on our back. (Now we have to think about if we live in a cold place and transmute to a hot place that we have the right type of clothes on when we arrive). KS have to start to understand the process of what we call, 'common denominator.' (This relates to when we say, "I made man in the image of Myself." The truth is, "I made the Universe in the image of Myself." Because everything has a Soul in the image of the Creator. It is the essence of His Creation, and not the manifestation of His Creation. If we understand this, then we'll understand, that when we arrive in a hot place, the 'Soul of emotion' will know what we need for appropriate clothes at the point of manifestation. It will manifest to please us. The same way we can move a cup if we connect to the Soul of the cup).

(We say to the Soul of the cup, I want to be pleased by pleasing you, if you would move for me. It basically comes to the same thing when we enter the dimension (D) of transmutation. (All the things necessary will come together). (We have to learn to transfer the totality of the emotion, (about what we will need when we transmute). (We have to learn how to transfer the Soul of the objects with us. This may seem strange to you but this has always been the teaching of the KF. In time you understand more and more. This is the reality of (how it works in Creation)).

(However, when you go to another planet our shirt, clothing, or swimwear will be no use to us there, because there's no water. What if it is a desert condition, and has no air? The conditions of the environment won't allow you to sunbathe unless you're a stone. But it has to be a stone that can live in that environment, and not one from the Earth's environment. A lot of the materials we see as stones on this planet, cannot exist in other environments. (They are not of the same 'isotopes,' (Their field strength doesn't match)).

(We have to learn the basics as we enter the first stages of transmutation. We have to understand the fundamental elements of Creation. Which is the Fundamental Plasma. (It means to embed the totality of our need. And to embed the totality of the essence of (all that the Man has gained (in field strength and knowledge)) into a single structure. A plasma is created by interaction of the fields, (it's a) collection of fields. And (it's time to understand), that even the fields can have emotions, intelligence, DNA, and the strength, and the narrowness of it. This is the strength of the field of the emotion of happiness, or sadness. Even the Rays carry the 'Soul of the Creator,' because in essence, they become the Creator of the Totality of that (Fundamental Plasma). When the Fundamental Plasma divides it becomes Hydrogen (H), and it divides, amalgamates, and it receives radiation from its own fields, as a ray, or a field, and this can lead to creation of the heavier elements. These are basically just bigger plasmas, that's all it is. We call it H, He, O, and all the other elements. (But they are really just more packages of H). (It's the same ?? in the Soul of the Man (STM), where you have stronger fields. ?? But one becomes stronger than the others and leaves the Fundamental Plasma, and create what we call, the essence of the Totality. And this contains everything (of the STM inside it)). (It sounds like he is saying that one of the fields inside the STM becomes the leader or the main field we recognize as the STM. All are part of it, but one takes the responsibility of being the STM).

(Our genes, or hormones, are only effective on this planet. (Because a hormone ?? that makes you do something, or be something, or creates an emotion, or creates a certain part of our body, are all under the conditions of this planet. When we move, everything moves with us, we move as a totality. When we go from London to New York we don't leave the kidneys behind ... << *audio cut* >>)).

(When we transmute everything and all the attributes of the creation of that entity, moves with it as an energy field. (?? If you want to manifest the same in another part of the U then you have to learn how to create and live in that same condition at the new place. You have to learn how to keep the workings of the systems constant)).

(It's like when you go to those special Amusement Parks where they can create the environmental conditions of the North Pole, or the conditions of the Equator. This is what we do when we travel in Space with these systems. (We ?? create the conditions for feeding, and breathing and keeping life going like we are on Earth. We create the conditions the Solar System ??)).

(When we go to another planet in another solar system it will have a different structure and we'll have to fit into that environment, otherwise we won't exist, (we'll be dead, because if there is no Oxygen we won't be able to breathe. Then what's the use of having a lung, or 2 legs when you're in a liquid environment? In our world we say we have to mutate like with 'Darwin's Theory of Evolution.' But in this case we'll have to evolve instantaneously, when we arrive in the new destination, in the time, place, and position (TPP) in the U. (?? Man can only do this because he carries within himself the essence of his life, his creation, that original line, or what we call, the essence of the Creator. The essence of the fields of the energy of the Creator. (?? In this Essence all will confirm and convert to become (a new life) at the point of manifestation. (?? The manifestation will be in the dimension of the observation and the observer. This will be very hard for many Knowledge Seekers to understand).

(When we Transmute we'll convert all the forces inside the body, including all the memories, emotions, the DNA and RNA, and everything else into one Fundamental Plasma. It will be one variation of the different fields. (Then at the point of (arrival), according to its collection and divisions, it can manifest as a human body, or an alien body in another position, or a dog, cat, or a stone). (Technologically we are reaching the point of understanding, and we are pushing the man to that frontier, to understand what is next. That he can recreate himself. And that he can create a perfect condition when he manifests on the Moon, Mars, planet Zeus, or anywhere else in the U. Man, the STM, the combination of creation of the life of the man cannot end just because the physicality (P) ends. The STM, in essence, is connected to the Soul of Creator (STC), and to the Rays, the field of essence of the motion, and the division of it. This has led to creation of the man in the atmospheric condition of the Earth, (and he has evolved to what he is now). (This is what befits him today)).

(It's like if you have a herd of animals in the Sahara of Africa. One animal eats the top of the grass, another eats the middle of the grass, and another eats the short grass, and they all live together. Because each one creates a condition for the other one to live. In essence they're all connected to each other, because if one animal doesn't eat the top of the grass, then the one who eats the bottom it will not get it and it will die. They all serve each other to survive. (They each have a different manifestation in their shapes and sizes, and they mutate and evolve (together). The Darwinians call it (?? mutual ??) evolution). (But we understand it in a different way. There is a sense of emotion to it, and the sense of (being part of) the fields of the Creator, and being within the structure of a single plasma. We call it, a Fundamental Plasma, and it's in Book 1. (We call it a Fundamental Plasma, because the essence of the Soul of the Creator, in the strength of his Creation, is within it))). (Maybe he is referring to that when we Transmute the Soul automatically takes care of all the things we need to survive and to satisfy our emotion. This is done automatically because our STM is directly connected to the STC, and it is conscious of everything that needs to be done. It's not like our thinking mind where we worry about everything).

(When you arrive as a Soul at a destination, you are a new structure in another galaxy, or U. You are that single plasma. And all that you earned and learned on this planet, and all your emotions are part of the fields, as rays in this plasma of you. (You don't carry your arm and the leg, or whatever emotions you gathered inside this plasma as pieces. Understand that even the fields and rays inside this plasma, carry a Soul. (This means they understand and participate, and know their position in keeping the whole structure together))).

(When you (convert yourself back to) a Fundamental Plasma, which is the essence of a single Soul, then everything (is carried within it (?? as fields or information), you don't carry arms, legs and hearts in it). (Within the structure of the rays of that Fundamental Plasma you carry the emotions, genetic coding, whatever you understood, and all your assumptions). And how those rays interact with the new environment, will determine the manifestation of your P at that time, place, and position. This is why we always have stars and they each have their own atmosphere and structure. We call it a solar system. When you are a star, you create your own structure, and this is what you are. And the first seeds of that star are the emotion you have gathered, and then you'll (manifest a) planetary system of your own. (It will reflect who you are)).

(We see planetary system that are on certain points and are close to the edge of galaxies and universes. (?? Some are compact because of the strength they hold). But in essence everything we possess, and all that we create comes from the original fields. And this is where we go back to. (We can become a star and start dividing according to the strength we carry in our STM. If we are in Space where there is no D of P, then we become a seed of (a new) star. (By the field strength we have gathered, and by what we give and absorb in that environment, and according to the conditions of the TPP, will lead to the creation of the next cycle of life. It doesn't necessarily have to be a human, but it will carry the emotions, and everything else within it).

(You have to understand this, because when you transmute, you go back to that Fundamental Plasma, and that's what you become. And (from there) you can transmute instantly to any TPP and take any shape according to the emotion you carry inside yourself. If you have the feeling and emotion for New York then you'll end up there. If you want to be on the Moon, you'll land there. We have repeatedly shown this in all the flight tests we did. When we asked people to go to the Moon, then they all ended up on the Moon. (We gave the instruction and the emotion of the Soul satisfied it. However, some of you didn't want to go to the Moon, so you went where you wanted to go). (In the ?? Flight trials you go back to the Fundamental Plasma and then from there you transmute to where you have the strength to go. (You have to be coded for that condition)).

(We are pointing the way for you to go back to the essence of the Creation, the teaching of Mitra. (Not clear ??) ... To show the beauty of the Creator we have to be able to regenerate, to create children of ourselves, to show that we have the essence of the Creator. The fields and rays of the Creator led to our creation. And we will create children of ourselves).

(Even the rays within the structure of the plasma of the STM, carry all the emotions according to their own field strengths. If man understands this he is ready to travel the span of the U. (If man understand this in Totality, and if he can go back to the Fundamental Plasma, go back to the Fundamental Ray, which created that plasma, then Man can reach the Creator. Because in its initial state, it is the Ray of the Creator, the essence of His Creation)).

(When you put iron dust on solid magnet you see the gaps between the lines of the iron dust. But our science only recognize the lines of iron dust as indicating the magnetic fields of the magnet and not the gaps in-between. (In the gaps are the G fields), which go back to our Creator. (The strength in those gaps are so much that the 'matter state' lines of iron dust become irrelevant. Those high energy strength fields carry us through Space to the center). (It wasn't clear... He said something about the North Pole and the gaps come out the South Pole. They are the same as what we call in electrical theory, 'Eddy Currents.' The circulation of fields goes both ways, (or what they call positive and negative). How these two (fields) interact, leads to creation of the manifestation of physicality at the TPP)).

(I have started teaching more and more about the gaps in-between the lines that you don't see. These gap lines are the direction to the center, to the Creator. What you see in the North Pole has already passed through the Creator. As you have a center in the structure of the P of the man called the STM. You have the same. Why is the STM positioned on top of the head instead of at the feet? Because you eat, and absorb energy from the Universal Community at the strength of the fields of the U, and as it goes out through the North (Pole) of the man, it becomes the entry to elevate the STM on the top).

(In a very simple way, the Totality of the man's life is about nothing but to feed his Soul. It's all about strengthening the Soul. This is all we do. We eat and live from this planetary

system, and without knowing it, we feed our Soul through the physical condition. (?? By absorbing the fields we elevate the STM. This leads to man understanding the Totality. Then our STP creates a dimension like a pressure cooker for what has been absorbed. The body being digested from the physical life and other rays of the U, in radiating out, reaches the physicality of the man. And from within the physicality it transfers its energy to the top to the STM to create his elevation)).

(Elevation means to absorb enough energy. This is different than the matter state creation of the fields which created it. When elevation is reached the physical life dies. But if you can keep the STM hungry enough to keep on absorbing more fields, then you can keep the body working to feed it, and you can live everlastingly in the D of physicality. You do this by never allowing the STM to reach the point of maturity. You let it keep on expanding more and more, so that it can absorb more. This way it will stay longer in the D of P of the man. Or, you can transmute it, and transfer it from one position to another, without the D of P, but you have to find a way to feed the Soul. You can embed part of the D of P fields which feeds the Soul into it. You create a position for it, by embedding it.

(This is where we can use the C12 and C14 as what we explained last week about the Nitrogen (N) coming into play. You convert the C14 to C12, to the physical life. (Then whatever you have leftover you convert back to C14 and feed the STM. You bring in extra fields to nourish it. We said many times before, that the womb of the mother is created to create, to hold the physicality of the man with the Soul inside it. (Nine months is maximum to what the womb can supply. Then when you come out of the mother's womb you switch over to the womb of the planet. But still the STM is in within the womb of the physicality of body of the man). This is the process of Creation).

(Why is the point of reproduction of all the animals and everything else, at a further distance from the STM or the Soul? (It's true for every animal and even the plants). It doesn't matter if it is above or below the ground. (The apple is up on the tree, while the Soul of the tree is down in the roots in the 'Space' of the Earth. The transfer of energy between the two confirms the process of reproduction, and confirms that it takes what it needs from the environment)).

(Another way to look at it is, the STM is on the head and the STP surrounds it as a plasma. And what is absorbed in the physicality by converting energies (from the environment) feeds the STM to elevate it. It receives from over and under. (And the Soul feeds the body to survive). This is why I tell you, that the STM (can feed the P, then the man doesn't need to kill. It's a very simple process)).

(The STM sits on top. The Soul of the fields of the man, what it digests, sits on the bottom. (?? It doesn't matter how it sits, you still absorb from the environment. The physicality feeds the STM. (But the fields are reversed). In the gap between the M fields going out is where the energy comes back into the physicality from the U and Unicose. (?? This energy goes inside the STP and feeds the man, then it can absorb more from outside)).

(Very soon when Man understands the Totality of the process of Creation, he will be able to reproduce the energies of the U and the Cosmos within himself. Then he will learn how to use it to transmute. (Even though I created the field, has it become stronger than me, that ?? I can receive from it? Am I a stronger field, am I a stronger plasma than what I have created? (In the same way I can live within my own creation and feed from it. When we discover this it means we can live forever in the dimension of the fields of the U, the way the Creator does)).

(In time, man will reach to this level of understanding of his own creation. But we need to learn it step by step. (First) we need to learn how to transmute, and then we become part of the process and structure ourselves. (Sometimes our Soul will be a giver and sometimes a feeder. We have to learn how to activate it during the transmutation, (so we can use it when we arrive at the destination))).

(Sooner or later man will understand this in a very simple way as he develops new knowledge and understanding of the process of Creation. The Creation doesn't use computers and it has never known any other process except the interaction of the fields of the Creation. Understanding this process will take a long time for man to achieve. It will not happen just because he manages to transmute today. Or if he just transmutes one time. (In the beginning as you start to transmute you'll find out that you can go somewhere and move things, but it is only in the fields, because when you go back and check in physicality then you discover it has not moved. It's because you have forgotten, that even in the D of Soul transmutation, the entity you want to move has its own Soul)).

(I have tested this with many KS, especially those who we are now closely working with to do the transmutation. I ask them to go home and move something in their house. But when they actually go home and check, it hasn't moved. It's because they haven't understood they are mixing the two (dimensions). It like with electricity, you cannot use AC with a DC appliance and vice versa. It doesn't work. When you transmute to your house and you hold an apple which is in the house, you have to communicate with the Soul of the apple, that you want to move it to a new position, so that when you come back in P it will be moved. (In P we just move things without asking their Soul or even understanding they have a Soul. We have to learn to communicate with the Soul of objects or what we call things)).

(People who can move things understand how to move the Soul of the thing and not just in the D of P. And because you moved the Soul, then everybody else will see the physicality (has also moved), because they're observers of it. How many times you have won the lottery in your dreams, but when you wake up you're still a pauper in the physical life? It's because you have not learned how to transfer the Soul of the money you won in lottery back to the dimension of physicality to give you the pleasure of it. (When you get that treasure it's because you brought the pleasure of it to the dimension of the Soul)).

(The KS have to understand these things. (When you understand more, then you realize the D of P is not much. But people look at the KF and wonder why it's not successful. Because it's not my interest. I am trying to bring the knowledge so that everybody understands the essence of Creation, whether it's with agriculture, health, transportation and the rest of it. In the end it's all the same. (It's understanding that they are all different workings of the fields of the plasma). (Some wonder why when I work with agriculture I can produce more carrots. It's because I carry the essence of the energy of the fields of that emotion, in which the carrot wants to show it's best)).

(When the technology doesn't work for you, it's because you haven't understood the essence. You are too busy making this and that Gans. As I always say, it's not the Gans's, it's the fields. I keep on repeating this to you, but you keep looking for a MaGrav, or what I call the 'crumbs.' I gave you the (fundamental) structure of the technology of Creation, which are the fields. (Everything is created through the fields, through different combinations, and you have to learn how to separate out the ones you need. And then learn how to use them to achieve what you want)).

(From today's teaching you have to understand exactly what is what, and what and how you carry what you have. And you have to understand how to feed it, and what is the Totality. When you leave, you leave this physical body as a single plasma of you. You don't leave with one plasma of your arm and another of your leg, and all of them together making up you. (No, you become one plasma of you). You become a Fundamental Plasma, which is connected to ?? the Creator, because it came from the Creator. (?? But which field strength or ray in that plasma (of the Creator) became you? Or is it connected to the strength of the Creator, and therefore it can take you back?))

(If as KS you understand this, then you'll be able to comprehend the totality of today's teaching and you will have learned how to live in the U. (Even to fully understand the last 45 minutes of teaching, will take a lifetime of the man on this planet. And not just your ?? life. You're happy to use a mobile phone, but it hasn't made you into an engineer to be able to manufacture and create it)).

(It's time to understand the energies and fields which created you. (The essence of the fields came from the Creator, but which division of the totality of the fields has become you?) Then how did the fields arrange themselves and became your kidney, brain, hormones, vitamins, and all the other things in your body? And then how did they all find a way to function together to keep the manifestation of you operating? Because you have been able to create such a condition inside yourself and have managed to condense it into different forms. This is exactly (what the Creator has done with Himself). He has created Himself within you, and He has condensed it to a field strength of the Totality. And if you understand this, then you are one step closer to understand the process of Creation. (Through one egg you were able to create such a handsome and beautiful child). Now you can imagine what you have received from the Creator, which led to your creation, and that you were able to transfer it to create a child of yourself. If you (recognize) the beauty of what you see as your child, then you can imagine what the Creator sees when He looks at the beauty of his own Cosmos and Unicose).

(Every structure has a point of infinity, (and also) has a point of affinity. Which means we have to understand the origin of life, of the original Fundamental Plasma which is our Soul. And in its division, and in the fields it radiates, it leads to creation of another cycle of life. It leads to creation of another dimension, from a plasma to an atom of Hydrogen, and then from division of the fields inside, and in the environment, to Helium and the rest).

(The whole process of Creation started with one Ray, but remember that, that Ray has interacted with its environment, which has led to creation of an atom and then molecules, or we can say combinations of plasmas, and to the whole of creation. And then it goes back to one fundamental point, that, that single Ray travels through Space and as it does, it interacts with itself and environment and divides, which leads to creation of other fields and plasmas. It becomes H, Helium and the rest of it. Then we understand that the Soul of Creator, is part of a bigger structure, (which He is created out of).

(This leads us to the next point, which is the confirmation and creation of another structure, in another TPP. (In other words, what is the next creation for us, or does it stop with us? How do we change and evolve? It all goes back to the same process, which is the Fundamental Plasma. But then the question is what led to the creation of the Fundamental Plasma? And will this Fundamental Plasma lead to creation of the next step, the next generation of life, and the next understanding of the Totality? And to what extent can we understand the whole process of Creation?))

(Do the fields of the STM become the man? And (do they become) another cycle of creation? (Does the STM become part of the Totality of the life in the U? In a way, the body of the man is a Unicose unto itself. It has many Universes within it that we have given different names to. For example, the Milky Way could be like the kidneys, and the lymph something else or another galaxy within us. We are the replication of the structure of life and the division of the fields, and the organization of them working within each other. We just call it the body of the man. And the ones in the sky we call the galaxies or Unicose. (But man himself is (a) Unicose. And just like the Unicose he has a P, and a brain and all the organs, emotions, and a control system. And they all come from the Rays of the Creator. And that field can repeat itself again and again. It can replicate itself again and again. The extent to which the man can understand this will depends on his maturity in understanding the process of Creation. The Man is learning step by step, and the knowledge is becoming part of his structure. In this process, we will become the essence, the Totality of the structure and we remain as part of that structure))).

(After all of this teaching today, maybe you have understood how to transmute. Understanding the Totality has to become what we call, 'a second skin of the man.' In other words, we won't have to think about it, the knowledge will be with us ingrained. Then we'll go to the next step. (We need to connect the whole structure of Man's knowledge with the Knowledge of Creation and Creator. They have to come together as one for man to be able to transmute. Otherwise you'll remain like the KS who transmuted to his house but couldn't move the Soul of the apple. You have to learn how to

communicate with the apple that it would give you pleasure for it to move to a new position, and you want to give it pleasure too. Then the apple will move to satisfy that pleasure. Always remember that the Soul gives to keep and create a connection. (?? My movement is giving life for you to exist). This part of the teaching we are pushing now).

(Last week we talked about how the C14 converts through Nitrogen (N) to C12, and then we can add energy to C12 within the N to convert it back to C14. Because the fields of the U always (?? comes to a balance) but there's a limitation as to how much you can carry. When it's too much the neutron divides. Because it receives so much that it leads to creation of a new atom (plasma)). (Understanding this process you can create any element in the U).

(Then gold will have no value, because you can create as much as you like. When we say this, it bothers those who are stuck in the material world, because of the greed for things. I have lived on this planet for so long, but I don't own a car in my name, or a house. I don't have a thing in my name. I have only what I carry on my back. Because I know when the time comes, it won't be mine (anymore). Because in essence, we are fields in transition. (And our work is to do the job and get it done, that is what counts)).

(As you have seen, I always give to KS from anywhere in the world if they want to start some (plasma project). (But then it comes to the point that you have to stand up on your own with what you have learned and not always expect a handout from me. But when they fail then they blame Mr. Keshe, and not because they didn't understand the essence of the Knowledge of Creation. We are here to provide you with seeds, but it's up to you to nourish them to grow. If you get entangled with the physical dimension, then suddenly everything is wrong with Mr. Keshe. (That way you don't have to look inside yourself to see what you are responsible for and why you failed. It's because you never understood what was the purpose and got stuck to the physical dimension)).

(This is the same process when you try to move a cup in the physical D, but you have transmuted into the fields of the U. You have to satisfy the Soul of the cup for it to move out of the pleasure of pleasing you).

(In upcoming Monthly Flight Session of June, July, and August we will build up our abilities for the presentation in Iran. I will explain to you how to transmute. I'll be in there physically with you, to teach you. I will be holding your hand step by step. (?? I will transmute with you). (When we all go together to a place you have to understand, (?? whether or not your Soul is satisfied and that you are happy to be there. (It's not about saying if you are satisfied. It's about creating the field strength of satisfaction in the Soul. You have to reach the emotion of the Soul)).

(When you transmute it's about being honest with yourself. You cannot lie with the Soul. The love of the Creator has to come from the heart of the man, and not from his talk. This is why KS have not managed to transmute. In the end you only fool yourself. Then you blame everybody else for your own situation, instead of realizing the cause is with your own conduct. You have brought yourself to this point in the TPP. If you understand this

you'll be able to transmute. If you don't understand it, then all the work is for nothing, because you won't be able to show anything. It's you who have not understood which field of your own Soul to use, nor have you understood the process of Creation).

(I hope you learned a few things today and can apply it, and that you will start becoming 'Passengers of the U.' I can take you to the Universal Community, but it's up to you to understand and become part of them. I can take you to the source of the river where the water springs out of the ground. But I cannot teach you how to drink it, if you don't want to drink. Even though you put your mouth and lips on it, it's you who have to swallow the truth, of the Knowledge of Creation).

End of Quick Index Part 1 - 541 KSW

(In regards to the Iran conference KS should quickly register because the KS Price will close and tickets will go up to 20,000 Euros. The presentation in Iran will be in collaboration and in other facilities provided by the Iranian government. It will not all be shown inside a hotel like in Sanya. There will be an offsite demonstration of, I am assuming the Plasma flying system by the Iranian Government and Military. In conjunction with the Iranian government we will invite world leaders, Ambassadors, and those involved with advanced technologies around the world, and leading companies to be present in Iran).

(During the Flight sessions in July, August and September we'll bring many of you to be able to transmute and understand the process of transmutation. There will be some private sessions of a very intense nature. Because when we go to Washington we have to be able to demonstrate we can transmute, otherwise it's no point to go. And we can't go there and start from the beginning. People have to already be able to transmute. And this will bring the next step into play. So please collaborate with us as we open the technology (T) in conjunction with the governments. We will always keep these Knowledge Seekers teaching going. There is no way we will stop these teachings, even after demonstrations in Iran and Washington. There is a possibility that we might give two (demonstrations) in Iran but it depends what agreements we come up with the Iranian government. We have to delay this until we know who will be the next president).

(You have to understand that we have been teaching KS for years, and you are the backbone for creation of peace on the planet. When we show you transmuting and traveling without limitations in Iran and Washington, then you'll become the ambassadors of peace. You will show the governments that the borders have no meaning. And that having wealth and robbing each other's banks will have no meaning, because now the banks can produce as much gold as they like. In a way, I have brought you up to be the 'assets of peace.' All you KS who attend these teachings and all the sessions, you have to understand that you have become the tool for creation of world peace).

(The more of you we can get into Iran and Washington the better it will be for showing the governments that we can now transmute. Then wars will have no meaning. It will break down the barriers and bring true peace. We have to show them that it is not just a

theory, and that it can be done. That's why we have started teaching more and more of you in public and private. The more people that can transmute the better it will be for setting the scene for world peace. The time for it has started and you are the backbone for it to succeed).

(Try to attend the Iran and Washington Conferences, because there we will ask you to show it. It's better if 10 to 20 of you can do it. Then the passport in your pocket will be worth nothing, because you can be anywhere you like to be. If they put you in prison for entering the country illegally it won't matter, you can move out of the prison instantly).

(We have to bring this consciousness to the world leaders and the governments through the delivery of the technology. This is the essence of what it is. We are building systems to back this up. New systems are getting developed to bring this into that position. Please understand how important these sessions of the next three months are, and how they are connected to what we are going to deliver. In 2024 it was the promised time of delivery of the unification of man, world peace, and end of the old structure).

Q: (There was a long talk from a KS. Mr. Keshe asked her to simplify her question. How can we change the strength of emotional part of the brain of the man, so that everybody cuddles and kisses?

K- (Thinking everybody needs to cuddle and kiss is a fantasy world. Let me put it to you this way... Need is the mother of invention. We start inventing things when there is a need and we have a purpose for something. I say that the mother of peace is when we understand that we don't need to destroy anymore. The place where man has gone wrong is with the emotion of jealousy, and that has been the instigator of a lot of problems).

(When man understands that he can have whatever he needs through the fields of the U then he'll become peaceful. Today's teaching was about how to feed your Soul through the fields, and then the Soul feeds the physicality. (The Soul is much stronger than the P and can absorb higher strength fields in their purest form. (Whereas, when you eat a food you have to (break it down and separate) the Vitamins, Iron, and everything else in the food and then it gets absorbed. The STM only takes (pure) Hydrogen level and can feed all the cells from that. It doesn't need to go through the digestion process to get the specific energies). The P can take from it what it needs then it doesn't have the fear for survival, which causes it to do bad things).

(Then there is no need for emotions to be part of the physical life and you don't need to kill to satisfy a hunger. The field you receive connect (directly) to the emotion that causes the hunger, and it is fed immediately. When we don't understand this part of the Totality, then we have questions about the different parts of the process).

((We can feed the man through the Soul, then he doesn't need to worry about his (likes and dislikes) and the rest of things that develop from not being fed. When you satisfy all the emotional needs and when there is no impurities in it, (then you are really satisfied). This was part of today's teaching we need to understand. In that Fundamental Plasma sits

the essence of the field strength of every emotion in the U, of which, we know only a few. Emotion means reacting to the environment. That's why we need that emotion. When we love someone then we show our emotion. But we don't show that same emotion to every person on the street. You don't go hugging everyone you see on the street).

(When you work through the Soul, then all these hungers and emotions are fed. A fundamental principle to understand is that when you feel satisfied then the negative thoughts don't exist anymore. But we haven't managed yet to reach that point).

(In Iran and Washington we'll show you that every man can have everything that he needs, and no Soul is more important than another. Would the Kings and Queens of this planet start putting their hats down? It will be that the simple people like farmers and street cleaners who know the knowledge of KF will publicly be able to transmute, but the Kings and Queens won't be able to. Then who will be jealous of being a King? Nobody will want to carry the Kingship, because it comes with a lot of attachments, and they think only of "Me and mine." And when you carry physical things like power and properties, you're too heavy to let the Soul go out and fly. You'll remain anchored to your P and won't be able to transmute).

(The jealousy will switch to those world leaders who stole so much, that now they cannot transmute like the common people with a pure heart. Very soon the time will come that the richest people in the world will give everything to have what the KS can do by transmuting, that they themselves won't be able to do. They won't be able to transmute because they'll be afraid they won't be able to get back to their wealth. Their problem will be attachment to wealth. Gradually as KS you will see (it all happening). So you don't need to hug everybody (to show others you can love). Instead learn that you are already hugged by the Creator. What matters is how much of it you want to feel).

(No where in the Holy books do they ever write bad things about the God. Even in the Koran it talks about the hundred names of God, which are His attributes, and they are all good. (?? Once your emotion is satisfied then you won't think about bad things).

(He talks about a poem in Farsi, where a man complains that for 70 years he prayed to and served the Creator, and now he ended up in Hell. He wanted to know what wrong he has committed. And it was because he falsely accused his neighbor and that ruined his 70 years of doing good deeds (through his physicality).

(The essence of Creation is that we have to get everything right. We cannot have even one thing wrong. And to get everything right you need to be detached. This is the essence of Creation. (You should be conscious of what you ask for, and what you get, (and know how to use it for the right purpose)).

(All my life, I never asked for, nor have I taken anything which belongs to someone else. But when I did (take something) it was for serving humanity. This is the essence of life for the Creation and the Creator. I could have lived a beautiful life without going through all these hassles (of helping humanity). (But at the end of it, it is to serve with

detachment). Detachment comes from the Creator. (So it is meaningless (to chase after your likes and avoid your dislikes), because when you live in the D of the fields of the U, everything you need is there)).

(I would just like to comment on this idea of doing good for 70 years and losing everything in a single act. This is because the 70 years were lived by controlling the physicality in the hope of gaining "heaven." It's okay for "religious" people and it helps maintain order in society. But for people interested in finding the essence of their Being, it is not enough to mentally follow an idea. In the true spiritual journey we have to go through the purification of all our wrong thinking. And when the Soul becomes the center of our life, and not just a hobby spinning around on the outer edge of the Mandala, then life is totally different. One would never even think that they have been serving God for 70 years, and each moment is alive and new and serving others is the same as breathing. There is no difference. The only way you would falsely accuse your neighbor is by accident, and then immediately you would correct yourself. Maybe this is the difference between living a physical life and a life in the Soul).

(It's the essence of the work. ?? Whatever happens while we are in Austria, Tehran, or wherever doesn't change the mission of our life. But as long as we don't understand this, then we'll live the past. But once we understand, then we live by the laws of the future, which is a Universal law, which is the Creator's law).

(When everything is giving, then negativity never arises. Mr. Keshe then tells a story about living in China. Someone said to him that China is like an open prison. And he replied that they don't understand China. I will just summarize my understanding of his talk. The Chinese government puts so many restrictions on people so that they don't have the opportunity to do crimes and bad things, and then have to be punished for it later. Everybody outside China has a misconception of how China functions and they judge it by their own narrow conceptions).

(In the West it's handled on the other end. They give everybody the opportunity to have guns and drugs and do all the bad things, and then they make up courts and prisons and punishment to handle people when they do the bad things. In a way, they tempt them with all the opportunity and fight them when they do it).

(For example, if you want to buy a kitchen knife in China you have to show your ID and they register the knife to you in case it is used in a crime later. So you already know not to use it for a bad purpose. It's harder to buy a kitchen knife in China than a machine gun in America. In China you never see drunkenness or fights on the street. Compare that with Manchester or any city in Europe, where fights and drunkenness are common. The Chinese structure takes a different approach. They handle you with the kindness of a mother, and the 'iron fists' of the father, and the people follow the path. Then you don't need to do anything wrong, and you don't need to hug everyone (to pretend everything is okay). Everyone on the street will feel loved without being hugged, because everyone has agreed to live a correct life, and this also allows everyone to live correctly if they want to).

(It's the same with the STM. We have to create so much good within us, that the bad won't exist. And then there are those who, when they don't get their own way, try to create problems for the others, so they can distract the others from their own bad behavior. We've also seen this in China where we invested millions with the Chinese to develop the T. But when they couldn't manage it, then they started blaming KF for not doing this or that. We tried our best investing so much in China, but we reached a point we could not keep paying for the incompetence. When we drew the line, now they blame us. They don't say it's their fault they couldn't manage it).

(It's the same with the Creator, He gave Man so much, but due to the man's incompetence he created his own problems and now he has to solve them himself. Those who fail the others, then try to blame someone else for their failure, rather than admit their own incompetence. We see this now heavily in the Chinese community with two or three people going (around ?? writing bad things about KF. But they don't say that they themselves were responsible for their own mismanagement and incompetence. We see the same in the other structures around the world not just in China)).

(When you can lose your phone on the streets of New York, London, Paris, or wherever and get it back in one hour, then you'll know you live in a safe society. And that society lives by its laws. This happens (only) in China. I left my phone on the streets in China, and within one hour it was back in my hands. Then you understand the difference of how we create our own conditions for (how we want to live)).

(I worked for seven long years and then I gave up on the Chinese structure because the Chinese were failing themselves, but then blaming the others for it. It's because we don't want to accept, that we ourselves are the cause of our own failure).

Q: In the Universe can there be creations like humans that are genetically defective? How does the U take care of disorders when planets crash into each other?

K- (When we see people with disabilities we think of it as a defect or a failure. But we are only looking at the physical side, we don't see the Soul. That so called handicapped person's Soul could be a thousand time closer to the Creator than the man who wears beautiful clothes and runs a perfect marathon. This is where the difference comes in. Because the man who's handicapped has suffered, and like the Chinese proverb says, "suffering makes the man wise, and the wisdom makes the man rich." But richness is not necessarily money, it could be in reaching the Soul of the Creator and understanding the process of Creation. (This is the way we should look at it. Through interaction of the fields certain conditions might look like a defect to us, but it could be a beauty within its own structure. So, there is no defect. A defect depends on which side of the fence you are sitting (and from what perspective you are judging)).

Q: So there is nothing that creates disorder, in the order.

K- There is no disorder. There is order in disorder. It just depends what that disorder nourishes within, not how it looks from the outside.

(Mr. Keshe tells a story how he had the privilege to work with the Ceausescu government in Romania prior to when he was taken out. (Remember the Western Media started turning everybody against Ceausescu and then he was over thrown, almost exactly how they did it in Libya). During Ceausescu rule Romania was one of the richest countries in Europe, and that's why they went after (him and rapidly took him down). They wanted to get rid of Ceausescu. But during his time the people had plenty to eat and everything they wanted, and the nation had no debts, and was exporting more than importing. They didn't live like with the fake luxuries of the West, but the nation was solid. And now after they got rid of him, the Romanians can't afford anything, because they put everything on West European prices. It's the same situation with Poland, Czech Republic, and all the former Eastern Bloc countries. (The Western leaders had a problem with him and they made him out to be wrong, because in reality they had everything the Westerners didn't have. So they took him down, and they did the same in Libya and Syria)).

(It's amazing how our misinformation creates a wrong image in us about what we see, and then we take action upon it. Then he tells about the Syrian president being invited to Beijing. It was the first time in 10 years that the President of Syria was able to travel out of Syria, because he stayed there to keep his nation together. He fought with them bunker to bunker and in every way to keep his nation, and not to let the (others take his) Central Bank (like they did in Libya)). What was interesting is how the other nations helped the Syrian President reach Beijing safely. The Chinese painted a Chinese flag on the aircraft indicating that it is carrying a President, and it is the same as 'Chinese territory' in the air, that way nobody could touch it. Then the Iranian and Egyptian air forces supported his flight with security and even India helped escort him safely to China).

(What the Western Media made out to be so wrong, ended up being so perfect to the others who were present on the other side. But then the European commentators had to try and ruin the occasion by falsely saying he was so poor that he was wearing second hand shoes. Obviously it was a lie to damage, because nobody can tell that about his shoes, especially when he and his wife were immaculately dressed).

(We always look at the P and try to be special and different from the others and we (purposely) create wrong ideas for others to believe in. This goes for ourselves and our governments and nations. (We do it even to the animals and the trees). This is where we have to change and try to understand the Soul and not what a person wears, or how he looks and sits).

Q: I have a feeling that the humility of Soul is different from STP.

K- Souls never get humiliated. (They are here to serve. There is no humiliation at the level of the Soul).

(There was a scientific question about dynamic reactors. He said that they take only what they need, but everything is available. Everything is available for you on a miniature scale in the systems we use for you).

(You can read more about it, but when people use the KF systems everything they need is provided for and they come out a different person than when they went in. (Instead of having to eat all of that food to get energy, the system provides it directly. In the old system there were so many reactors that it was very loud when it ran. Now the new systems are silent. And you only absorb what you need. A balance comes between the P and within the STP, and within the emotions, and it will ?? part of the system).

(The whole essence is to produce the fields of the U and then to try to produce the fundamental field (?? Fundamental Plasma), which is at the strength of the Creator, then you will have access to everything. Some of our reactors have that. But we ?? don't have that within the structure of the man, that string is not strong enough to match this system. Otherwise, every single person would reach the purity of the Creator's level).

(It's been divided and decoded so many times through its divisions ?? across the Unicoise. But still we can reach part of it. (Sometimes if a Soul is at the right strength (it goes directly to the Creator. This is why some children are 'stillborn,' or physically dead at the point of birth, because they have already reached that point. They completed the process of Creation in the womb of the mother. In reaching the Soul of the Creator's love, there's no need for the physical life. One day you'll understand what this means. It's said, that if I tell you how beautiful it is on the other side, then you all will commit suicide. But, that's not the essence of it. The essence is the maturity of the Soul, because that Soul has to lead to creation of the others)).

Q: (What are the mystery properties of water in our Universe?)

K- (?? We say that everything needs water to live. But actually it's not water. Everything in the U needs a dynamic flow (of fields). And it does not need to be in the matter state of it. If you can create a dynamic flow in the fields of the U, then you can create life. In the body of the man, and in the structure of this planet, it just happens to be Hydrogen in conjunction with extension of the Nitrogen itself, (or what) we call Oxygen. A lot of the Oxygen and Nitrogen isotopes match each other. This is where we connect to the Universal fields. Oxygen and Hydrogen in combination, in a certain level can lead to creation of C14, which is connected to the Universal Fields. And the matter state connects to the C12 which is a matter state connection fields).

(We have to understand how certain fields behave. Water may be necessary for human life on Earth, but in other places in the U there is life without water. But they have a dynamic connection to both the Universal Fields and the localized fields that are created through interaction of the fields themselves).

(Wherever we find life, even in a stone, there has to be a connection to feed and sustain it from energies of the Cosmos, from the 'mother,' local atmosphere of the Earth, and the

condition of the Gravitational fields of the Earth. (But you still have the G fields of the U, which are from the interaction of the fields of the Creator. No life and no physicality can manifest without a connection to the Universal Fields. Because local fields are not enough to sustain life).

Q: In the 376 KSW you spoke about hormones being one of the first substations, which comes from the interaction of the STM's physicality with the STM itself. It's where the body in the center of the brain creates what you call hormones. Hormones are the center of the first, one of the first step down from the strength of the STM. And in Space, mankind will live through hormones.

So, that was a quote, my question is, what is the correlation between the hormones and our emotions, and between the C14, and how the hormones behave during the transmutation process?

K- (All the hormones carry Hydrogen (H) base in field strength. All of them do. And this is how they're connected to the Soul. And (when they convert) to physicality, they connect through C14 or through a N. In transmutation you have to understand at the point of manifestation what element will be the bank for the conversion. (Remember the bank of Universal Energy is N on Earth). We have to know what field strength of which Plasma. It's like a transformer, and a converter. It operates through the difference between what it receives from the environment and what it receives from the body. We need to understand the next step after the hormones).

(The reason we shed our skin all the time is because of the hormones. The same with the animals. It's because (they have to remove the ?? old skin so new fields can be absorbed. We have to constantly renew the skin otherwise it becomes a barrier to the fields of the U. This is the only reason we shed skin all the time. Otherwise, we won't be able to give away the fields we don't need. The skin automatically regenerates itself to keep the operations going by constantly absorbing fields)).

(The hormones are part of the process of stepping down field (strengths to what we can use). Part of the hormones participate in the creation of emotions. They come through the Soul, and the interaction of the fields of the STP in different parts of the body. They cannot be left out, they are part of the process).

(At certain levels they interact and create hormones which make us happy or other emotions. Because it's part of the stepping down process, and they create the fields which are needed in the brain. In previous teachings I said that we can't produce some of the hormones outside (the body). This is because part of the structure of the hormone is connected by the fields to an emotion. If you can create the field of that emotion in a machine then you can create any hormone).

(A couple of weeks ago I showed the circles of how the emotion create fields. A machine doesn't carry the emotion so it cannot produce the hormone. Present science doesn't understand this. When an emotion feeds a field, then the hormone picks it up, so it's

connected to that emotion. The strength field allows this condition to be created and go forward. Without it doesn't exist).

(I said you cannot put an egg of an elephant into another animal and expect it to grow. Because it doesn't feel, and it doesn't create the emotion and field of the womb of an elephant inside that other animal).

Q: How do we use Isotopes related to Hormones to transmute across the Universe? What role does the N14 play?

K- We don't. The Nitrogen 14 plays its role in the matter state of physicality of the man in this condition... (N is in every cell of the body and you cannot create a cell if you don't have a N, it's impossible. The amino acid is Mr. COHN, and N is part of it. It stores and converts energy).

(The N is a converter (of the C12 to C14 and vice versa). The C14 comes from one side of the Universal Energy, and connects us to the C12, which comes from our physical part, that is part of the matter state of this planet. (The C12 gets converted to C14). When we say that the C14 is in the liver, at the same time it's a transformer. It transfers energy from C14 to C12, and C12 to C14, and creates a dynamic motion which runs the AA).

(It's the same in different creations, we need that potential difference in field strength to create a dynamic structure within it. This is the purpose of the N, we call it the liver. It's all the same. It's one way to store fields. But to store you (also) have to attract. So, it creates a transformer condition as well. For example, Vitamin C is not stored everywhere in the Liver, only at certain points. It's stored where the Liver can create the M field conditions for it. It can also transform that Vitamin C into Vitamin A, using fields in the (?? Lymph). It does a dual job. It's not just (a) Liver, but also a transformer at the same time, and it does it in both directions between the C12 and C14).

(Part of this process is lubricated and made easy by the Omega 3. That's why Omega 3 is so important in the operation of the body of the man. It helps the Nitrogen to keep the amino acid structure going, and through the amount it gives, it allows it to survive. The Omega 3 is a Hydrogen based element that connects to Universal Energy, which is so important in life of the man. Any deviation (in its supply will) create all sorts of problems. It's a lubricant, and a catalyzer for the operation of conversion of the C12 and C14 in the Nitrogen, or in the structure of life on this planet).

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:12)

K- Yes, thank you very much. Good morning, good day to you as usual. Wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We are back with hopes of learning more and sharing more and hopefully to understand a little bit more about our own world of Creation.

In the past few weeks as we talked about the DNA and what we call, transformation of our energies through, what we call the Nitrogen (N) to Cosmic Rays and our connection to other points and in a way, conversion inside the body of the man. We have to realize an essential point. Every structure has a DNA, a stone, body of the man, as we know with the trees as they carry different combinations of fields and energies, the stars, the Galaxies, what we call, they have a formation combination. In the human body we call it DNA. In a Universal structure, it's the same. It's a building blocks of a bigger structure.

We see with our eyes, the Galaxies. We see with our eyes, the stars in the Galaxies. These are all part of the structure of the bigger DNA of building that Unicoise. Because our Universe again has a DNA, it has a specific combination, that, that combination leads to a life. So DNA, what we call as a DNA structure of body of the man, (:14) is a small scale structure, in a given pattern, that applies to every living things in the Universe (U). Man only has concentrated to understand about his life, his structure of. Stone has the same. This Solar System (SS) has its own structure of DNA, because it leads to production of the same things repetitively, and can be replicated inside it. We see bigger stars with the boundaries, smaller stars in the outer, outer boundaries, and sometime inside, smaller compact structure in the center. But they are all placed in the same position.

If the world of the science start looking at galaxies, they'll see the same structure. All galaxies have the same structure. The same as body of the man, because there is a rhythm, there is a structure to it. And then you have a connection, hidden connection, what we call it, the DNA. It's the same, how they communicate with each other, how they place each other. This becomes important in structure of some DNA, some RNA, is we call it, genetically modified. We modify plants, we modify, we call it, cloning in the world of animal, which is actually the same as genetic modification in the wheat or the rice. We just chose the same or different names for the same process.

We've got to realize, the same process exist when it's forced, we modify, we created, (:16) what you call it, cloning a new animal, but we can repeat itself the same, and you don't know which one is the original one, because they're all the same. But we do it in a different way, in the matter state too. We create a cup, we create a fork, we create a car. All these is the same modification but we enforce the change. We make one million of one cup, or hundred millions of spoon. But, that structure has again DNA, and again the structure to keep itself together, has a Soul. In a way, has a point of balance and communication, has a point of confirmation.

And this goes back again, if you remember, a few times I have referred to it, to the couple in Italy, where the guy was trying, forcing his face, trying to move the cup in front of him. In fact, if he could have realized this is a man-made, genetically modified structure, which has a Soul, if I could get in touch with that point, if I could connect with it, I could move the cup. Then you understand you don't need to create field forces of matter state to move.

This is important, because when it comes to moving you in transmutation, when it comes for you to move in transmutation, (:18) Earth, you want to go from A to B, on this planet, your DNA stays about the same. Your emotion stays, because you're within the same condition, atmospheric condition. You have known this atmospheric condition. Your DNA, your RNA, your Soul, a combination of creation of your Soul of the Physicality (STP), is structured to fit this environment. So, you have to remember, in that process, "Oh, you left a pen in your pocket, the key of the house in New York is in your pocket, it better be there, because when you manifest yourself in New York, you need it, living in London, we usually put it in a wallet, we put it in our suitcase, that when we get there, the keys will be with me."

Now, in that process of transmutation, you have to create a common denominator position, that the key when you arrive in New York is with you. When you get there, the shirt and the clothes is on you. You bought summer clothes when you get to position where you are now, it's a winter time, .. so you don't want to manifest yourself in the hot place with a fur coat. Then this comes to a lot of things, that you as Knowledge Seekers (KS), who start this process, go back to 'common denominator.' The same says, "I made man in the image of Myself." The truth is, "I made the Universe in the image of Myself." Because, everything has a Soul in the image of the Creator, is the essence of his Creation, not the manifestation of His Creation. And, if you understand this, if man reaches to that point, (:20) then you understand, when you arrive in the hot place, the Soul of emotion, knowing that you need, the temperature will be warm there, what is in your suit case, which is needed for that point of manifestation, would manifest to please you, the same as the way the guy was moving the cup, with the forces which wasn't there, but he could get in touch with that, through the Soul of the entity.

And I said, and I mentioned many times before, you say, "I want you, I want to be pleased by pleasing you, that you move." It comes to the same point. Because, as we enter the dimension of transmutation, all these things come together, it's no use me, you having a beautiful fur coat in a warm, in a cold place, and you turn up in a warm place, with no clothing. Where you actually, you already packed the swimwear, and the bikini, and the summer shirt, in the suitcase. Because, you haven't learned to transfer the totality of the emotion that, "These are the things I want, next time I pack a suitcase to go for transmutation." I say, "Oh, this is what I need to be, because it's warm, this is what I need." So, you transfer the Soul of the object with you. Which is, .. but found to you, looks a bit strange, but that has been the teaching of the Keshe Foundation. In time you understand more and more. What it is to you, is strange, is the reality of what it is.

But when you go to another planet, this shirt, this clothing, this swimwear, is no good to you, because there's no water. It's a desert condition, and has no air, and there is no way you can go sunbathing, (:22) because the object of physicality there, in the condition of the environment, does not allow sunbathing, unless you're a stone. And a stone which can live in that environment, not a stone which is on our environment. A lot of materials we see as a stone on this planet, cannot exist in other environments. Cannot exist in the condition, or is a variation of, not necessarily the same of, we call it the 'isotopes' of it.

This becomes important for us in the first stage, in the process of the transmutation. And it's essential for us to learn that we have to go to the basic. We have to go to the fundamental element of Creation. Which in a way, is that Fundamental Plasma. To embed the totality of the need, the totality of the essence of what man has gained, in that single structure. As we said, as we always explained, a plasma is created by interaction of the fields, collection of the fields. And then you understand, even the fields bear emotion. Even the fields, bear the intelligence, DNA, the strength, the narrowness of it, this is, this strength of the field is the emotion of happiness, this strength of field is the emotion of sadness. Then you understand, even the rays carry the Soul of the Creator, because in essence, they become the Creator of the Totality of that fundamental element, which in its division then become what we call, Hydrogen, and it's division and amalgamation and it's receiving radiation from its field of its own, (:24) as a ray, or as a field lead to creation of the, what we call, heavier elements, bigger plasmas, that's all it is. We call it Hydrogen, Helium and Oxygen and the rest of it, because it has more of packages in it, it's the same in the Soul of the Man (STM), you have a stronger fields and one is strengthened, leaves that Fundamental Plasma, create that essence of the Totality. Which contains everything.

In a way, whatever you call it, your genes, whatever you call it, your hormones, is only effective to this planet. Because, the hormone which makes something of you, to be whatever, creator of emotion, creator of certain part of your body, is all under the condition of this planet. And as totality, when you move, everything moves with you. You don't move from London to New York and leave the kidney behind, and therefore ..

<< *audio cut* >>

K- ... Sorry about that. (:26) We are losing line because we are traveling... just let me see...

Then what we see is no use traveling without your kidney missing, or your pancreas missing. When you transmute everything and all that attributes of creation of that entity, moves as an energy field. And if you learn, or live and create a condition of the same, in another position in the Universe and keep that constant, you'll manifest the same, what we call, working of the systems.

In a way, if you go to, what we call, these beautiful parks, where you see they create the humidity, the condition, the rainfall condition of the equator in the North Pole, and you go there and say, "Oh, this is like being in what we call equator." That's what we do when we travel in Space. When we travel with these systems, we travel with the conditions of

feeding, creating Oxygen and keeping it going, as long as we are on Earth, with that condition, and within the condition of what we call the Solar System, which supports this life, we stay more or less the same.

When we go to another planet, another structure of the Solar System, all has to fit into the environment, otherwise you don't exist, you're finished. There are no Oxygen, so what you going to do? You cannot breathe, what's the use of the lung? What's the use of two legs when you're in a liquid environment? (:28) In the world of the man, we call it mutation, Darwin theory, evolution. You have to evolve instantly, when you arrive in a new position, in a new destination of the time and place and the space in the Universe. And the only way man will realize that he will carry the essence of his life, his creation, is that original line. The essence of the Creator. The essence of the fields of the energy of the Creator. Where all will confirm and convert to become at a point of manifestation, what will be in the dimension of the observation and observer. And this will be very hard for many Knowledge Seekers to understand.

In a way, we convert all this forces in the body of the man, all the memories, all the emotions, all the DNA and RNA, and everything else, into one Fundamental Plasma, into one variation of the different fields, which creates in its collection and its division, according to the point of manifestation, to a human body, to an alien body in another position, which he or she lives in that environment, and to a dog, to a cat or a stone. We always misunderstood, and once... Now we have no choice, because now the fact is there. The technological development, understanding of the man, is pushing man to that frontier, to understand that, what is next? How can I recreate myself? How can I be in a perfect condition when I manifest myself on the Moon, (:30) on the Mars, or in whatever, in planet Zeus, or anywhere else in the Universe? Man, the STM, combination of creation of the life of the man, cannot end, just because the physicality ends. In a way, if you understand it, as I said before, the STM, in essence, is a connection to the Soul of Creator (STC). The Soul of Creator, the rays, the fields of essence of the motion, and the division of it, in a condition, atmospheric condition of the Earth, has led to creation of man, through evolution to what it is now. Because it befits it, today.

It's like, when you have a herd of animals in Sahara, or you have a herd of animals in Africa. One animal eats the top grass, one animal eats the middle grass, one animal eats the short grass, and they all live, and live together. Because each one creates a condition for the other one to be, but in essence they're all connected to each other, because if the top one doesn't eat the top, the one who's used to the bottom cannot and dies. But in essence they all serve each other, and they all come to the same point. Point of manifestation in different shape and sizes or whatever, to be able to survive, to mutate, to evolve. And Darwinians, they call it, to go through whatever they call. The ?? sense of evolution. But now we have to understand, this is a sense of emotion, the sense of the fields of the Creator, within a structure of one Plasma. We call it, the Fundamental Plasma. And it's been there in the Book 1. This is, now you understand what it means, why is it Fundamental. (:32) Because the essence of the Soul of the Creator, in the dimension of the strength of his creation, is within it.

When you arrive as a Soul in a destination, you are the new structure in another Galaxy, in another Universe. You are that single plasma. And every part of emotion of what you earned, learned, and, what they were achieved on this planet, is as fields, as rays in this plasma. So you don't carry your arm and the leg inside, and you don't carry your, whatever other emotions inside, as pieces. So we understand, even the fields, even the rays inside the plasma, carry a Soul. Carry Soul in a way, it means they understand the participation, and they understand their position in keeping the whole structure together.

And when you manifest yourself as a Fundamental Plasma, as the essence of one Soul, everything else is carried in there, there is no arms and legs and hearts in it. Even emotions, even your genetic coding, whatever you assume, assumption and understood, is within the structure of the rays of that Fundamental Plasma. And how those rays interact with their environment, leads to creation and manifestation of your physicality (P) at that point and place. This is why we always have stars. And this is why each star has his own atmosphere, his own structure, we call it the solar system. When you are a star, you create your structure, this is what you are. And the emotion of what you gathered, what you started with, as the first seed of that star, (:34) shows in your planetary system. Shows in the structure of how many planets and dust and everything else in the Universe.

And then you understand why, as I said many times, we see planetary system on a certain points structured, what we call, closeness to the edge of the Galaxies and Universes. Then inside, because of their compactness, because of the strength which holds. But in essence everything we have, everything we possess, everything we have created, comes from that point of the original fields. And this is where we go back to, and we become and we divide into, and according to the strength we carried, in the STM, in Space, when there is no dimension of physicality, then become the seed of that star. And what we gathered in the strength of the field inside, it takes what we absorb, what we release, in that area, in that environment, in that condition, position and time, to lead to the creation of the next cycle of life, and not necessarily life of man. But, carries the emotion, carries everything else within it.

And as Knowledge Seekers, you have to understand this. Because, when it comes to the point of transmutation, you go back to that Fundamental Plasma, that's what you become. And then you can transmute instantly to any position, and take shape, place, time, and what ?? it... according to the emotion you carry inside. "I want to be in New York, I end up in New York, but (because) New York has a feeling and emotion and place for me." "I want to be on the Moon." You land on the Moon. And we have shown this by repetition, in all the tests we did. (:36) That we ask people to go to the Moon and they all end up in the Moon, because that's the instruction we ?? gave, the emotion of the Soul, to satisfy that I am, I want to, and I'm listening to what I've been told. And some of those who don't want to, they go where they want. As I said, one of the Knowledge Seekers, maybe three or four of them, came, "I have no interest to go to the Moon, I don't want to go anywhere. I want to go to do this, I've come here to do this."

And this is for that purpose, that in the ?? Flight trials, which will carry on with us, we start to narrow in you, your condition to become that Fundamental Plasma. And even as

totality, all of those Souls who participate, to accept one, to transfer the plasma into, to be released on the point and time and place, and the position they want to go. I'm going as a plane from London to New York, who wants to go to New York, I can carry. If you want to go to Texas, I can't carry you, if you want to Beijing, I can't carry you. Because, I'm not planned, I don't carry that strength, I don't, I'm not coded for that condition.

And then you understand, we choose and we pointing to that way, and we go back to the essence of the Creation, the teaching of Mitra. You want a perfect Fundamental Plasma to be. It doesn't talk on the other side, that it talks good. It doesn't act good, it doesn't do good, it lives good. Because, if not, will have no position and place to manifest itself, at a time, place and position in the Universe, where it lands. And, this is what I always said, (:38) "The beauty is to be able to create." Show the beauty of the Creator to be able to regenerate. We create children of ourselves, to show that we have the essence of the Creator. Creator led its fields, its rays to our creation. And we call ourselves, creator of our children.

And if Knowledge Seekers understand this, that how you transmute, and what it means, and now further you understand, even the rays within the structure of the plasma of the STM, carries all emotions, according to their own strength fields, then man is ready to travel. Then man is ready to move on, to travel the span of the Universe. And if man understand this in Totality, and goes back to the Fundamental Plasma, and goes back to the Fundamental Ray, which created that plasma, in initial state, which is the Ray of the Creator, the essence of His Creation, then man has achieved, man will be able to reach his Creator.

In so many ways, as I said, when you look at the magnets, the space gaps when you put Iron dust on it, there is a lines, you say, "These are a line of Magnetic field." Our science has not taught us, that the gap between the lines, is the fields are going in, when you look at the North Pole. And, and that's how we go back to our Creator. Within strength enough, that the matter state manifestation of the line are irrelevant, as we are going through the Space, by high energy fields of strength of the fields, to go to the center, to reach. And again, once we reach, we come out of the bottom of the line, (:40) which now in the present physics, they call it, is where the fields goes, the South Pole. The same is with the South Pole, where the fields go in, you see the dust lines of the Iron, where is the gap in between, is where they come out. It's the same as electric current and eddy current. There is not only one way of circulation of the fields, it's both way. And how these two interact, leads to creation of the manifestation of physicality as time, place and position (TPP).

And then, in time, you understand. I have started teaching more and more about the gaps between the lines you don't see, that the gap, the lines you see in the Magnetic (M) fields. Those gaps you don't see, is the gap, is the line direction and position to the center, to the Creator. Where, what you see in the North Pole has already passed through the Creator. As you have a center in the, what we call, structure of the physicality of the man, you call the STM, you have the same. But what do we do? Why is the STM positioned on top of the head of the man and not on his foot? Because you eat, you feed, you absorb energy

from the Universal Community of strength of the fields of the Universe, and as it goes out through the North side of the man, it becomes the entry to elevate the STM on the top.

It's very simple, in a way, if you look at it, the Totality of the life of the man, it's nothing but to feed his Soul, nothing but to stand, to strengthen that Soul. And this is all we do. (:42) We eat from this planetary system, we live in this planetary system and in that process, we actually, without knowing, through our physical condition, feed our Soul. So, in the dimension of the life, the physical, the gap which we

<< *audio cut* >>

in the fields at the bottom of what we call the South Pole of our Soul, is the feed and energy comes up from the physical absorption of the more fields of the Universe, in what we call, 80% from Cosmic Rays (CR) and 20% from the physical matter of the planet, that what is radiated out, is absorbed by the STM on the ?? body. And, leads to elevation of him. Leads to understanding of the man in his totality. And then, our STP creates a dimension, creates like a pressure cooker, for what is been absorbed, body being digested from the physical life and the dimension of the other rays of the Universe, in radiating out, reaches the physicality of the man. And then, stayed within the physicality of the man, that it can transfer its energy on the top, to the STM, to create his elevation.

Elevation means to absorb enough energy, that is different than the matter state creation of the field which created it. And when that point reached, man, we call it in the physical life, dies. (:44) But, if you can keep the STM so hungry, to absorb more fields, you'll keep the body of the man working to feed it, you can live a everlasting life in the dimension of physicality. In a way, never allowing the top to reach the point of maturity, expand it to more, and more and more, that it can absorb more, to stay longer in the dimension of physicality of the man. Or, you transmute it, you transfer it from one position to another, without the dimension of physicality. But you find a way for the Soul to be fed. You embed part of that dimension of the physicality fields which feeds the Soul into it, that it can create that position, embed that position. And it's where, what we call the Carbon 12, the Carbon 14, and what we explained last time, last week, the Nitrogen comes into play. In a way, converter of 14 to 12, to the physical life, and what you gather more, you put it back in, to converter of 14, to feed back into what you don't need, or, feed back to the STM. To bring that extra fields to the nourishment of it. In a way, I always said, if you understood, as we said before many times, the womb of the mother is created to create, to hold the physicality of the man with the Soul inside it. I cannot supply much more, nine months maximum. And then when you come out, now the womb of the mother is changed with the womb of the planet. (:46) But still, the STM is in within the womb of the physicality of body of the man.

And then, you understand the process of Creation. And then, as I explained many times before, why the reproduction point of all the animals and everything else, is in a further distance than (from) the STM. And the STP of every animal, even the plants. Doesn't matter, is above the ground or below the ground. You need that apple on the tree, with the Soul of the tree, and the roots of the space of the Earth, that the transfer of energy

between the two, confirms the process of reproduction, and confirms that it takes what it needs from the environment.

In a way, if you look at it, the STM is on the head. And the STP is surrounding it as a plasma. And what is absorbed in the physicality, in converting the energy, feeds the STM to elevate from, as you call, under and over. And what the Soul feeds the body of the man, to survive. And if you understood this, you understand what I tell you, the STM is the feeder of the physicality. And it can be, then the man does not kill. You have to look, in a very simple... (:48)

The STM sits on the top. The Soul of the fields of the man, what digest sits on the bottom. Whatever you absorb from the environment, even though sits that way, at the end of it, will go in the directions, out, as it comes in. So in a way, your body, your physicality, feeds the STM. (?? we have Internet problem, and we lose pictures very easily). But you understand. And the fields is in reverse back. (Rick, you have to do your screen, please. We've lost the network). And then you understand, in that invisible part, that is the gap between the lines in the bottom, is where the energy comes back into the physicality of the man from the Universe, from the Unicoise. That again goes inside the STP of the man, that it feeds the man to absorb more from outside.

In so many ways, man will understand very, very soon, how he, in understanding the Totality of the process of the Creation, he can reproduce the energies of the Universe within himself. How he can reproduce the energies of the Cosmos within himself. (:50) And then how to use it to transmute. Am I a stronger field, am I a stronger plasma than what I have created? Or has it become stronger than me, as I have created? The same as I am the origin of that. I live within it, the essence of my creation. And this means, man finding out, analyzing this process, can live forever, in the dimension of the fields, in dimension of the fields of the Universe, the way the Creator has.

And in turn, in time, this will bring man forward, to another understanding of his own creation. But, we need to learn this step by step. We learn to need, we learn to need, ?? we need to learn how to transmute. We learn to need to do this, because in time, we become part of the process ourselves. We become part of the structure ourselves. At some points our Soul is the feeder, and at some sorts, at some points our Soul is a giver. And then we have to find, we have to understand how we process this knowledge, how we come to activate it, and how we can activate it, at what position, in the time of the transmutation, (:52) in the time of what we call, arriving at a given point, and what we call, a destination.

And soon or later, man will understand this in a very simple way, as man develops new knowledge, understanding the process of the Creation. And the process of Creation has no computers, has no ever known any other processes, except the interaction of the fields of the Creation. And this process will take a long time for man to achieve. It will not happen just because you managed to transmute today. It will not happen just because you managed to do it once. You'll find out as you go through the transmutation. I went there, I did something, but I couldn't move the thing. I went back in physicality and it wasn't

there. Because you have forgotten, even in the dimension of the Soul transmutation, to understand the entity you want to move has a Soul.

I've tested this with many Knowledge Seekers, especially those who are now, we are working in a structure of what we call, transmutation ?? systems, is, I tell them, "Go home and move something." They go home and they physically, in transmutation, get a cup, move the food of the cat, and they go home and it doesn't happen. Because, you have not understood, you are mixing the two, it's a AC and DC. AC does not work with the DC and DC does not work with the system which are AC. You plug it but it's nothing there. (:54) When you move, when you go to the point of transmutation, you hold an apple which is in the house, you see, you communicate to the Soul of the apple, "I want you to move to the new position, that when I come I see you there." And the Soul of the apple moves. Not, "I went home, I moved the key and I went home and it wasn't there, I went home, I moved the chair and it wasn't there." Because, again in the dimension of physicality as you are used to, you took the apple and moved it. You haven't learned, you have to communicate with the Soul of the apple, for it to move. The story of the Italian boy in Barletta. Then, when you go home, the apple has moved and it's where it is, and the cat food will be in the position you left it, not the way, you left it in the physical dimension.

And then you say, "I can move things." Those who can move things, understand it's not the dimension of physicality. And because you move the Soul, everybody else will see the physicality, because they're observers of it. How many times you have won lottery in your dreams and you come back you're still pauper in the physical life? Because you have not learned how to transfer the Soul of the money you won in lottery back to the dimension of physicality to give you the pleasure of it. And then you say, "I found the treasure." Because you brought the pleasure in the dimension of the Soul.

These are the things you Knowledge Seekers have to understand. And then you come to the point to understand more, (:56) that in reality, the dimension of physicality is not much. But those who especially look at seeing the Keshe Foundation dimension of all being successful here and there, is not my interest. It's trying to bring the knowledge that everybody understands the essence of the Creation, doesn't matter with agriculture, with health, with transportation and the rest of it. Because at the end it's the same. How can you produce more carrots from the same, what I do? Because I carry the essence of the energy of the fields of that emotion that the carrot wants to show it's best.

And those who << *audio cut* >. It doesn't work in it, because you haven't understood the essence. You were too busy, "Oh, I make Gans's and that." Because it's not the Gans's, it's the fields. How many times, I keep on repeating to you as Knowledge Seekers, you look for a MaGrav for crumbs, I gave you the structure of the technology of the Creation in the fields. The fields it creates, the combination, how to separate them, the one you need. And then, how you use it, when you achieve it.

In essence, from today's teaching you have to understand exactly, what is what, and what you carry, how you carry, how you feed it, and what is the Totality. In a way, when you

leave this physical body of the man, it's one plasma of you, it's not one plasma of your arm, one Plasma of your leg, making you, it's one Plasma of you. You become that Fundamental Plasma, and every Fundamental Plasma has a connection, because it came from the source to the Creator. (:58) Which line, which field, which strength of the ray in that Plasma, was the Creator? Or it's connected to the strength of the Creator, that it can take you back?

And if, as Knowledge Seekers you understand this, if as Knowledge Seekers you come to that position, to be able to comprehend the totality of the teaching of today, you have learned to live in the Universe. And it take you even past half an hour, 45 minutes of teaching, lifetime of man on this planet, to understand fully what it is. And not just your ?? life. So, you're happy because you can use a mobile phone, it hasn't made you the engineer to manufacture it and to create it.

Now you have to understand the energies, the fields which created you, in the division of the Totality has become you, is from the essence of the Creator itself. And how they arrange themselves became your kidney, your brain, your hormones, your other things in your body, the vitamins and everything else. But they have found a way to operate to keep your manifestation. And because you have created such a condition inside the physicality of the man, and you have managed to condense it in different form, it's exactly the position of the Creator, which has created Himself within you, and He has condensed to that point, field strength of Totality. And if you understand this, you are one step further to understand the process of Creation. (1:00) You gave one egg to lead to creation of such a handsome and beautiful child. Now you can imagine what you received from the Creator, which led to creation of you, that you could manage to transfer, to create such a thing. And then if you understand the beauty of what you see as your child, you can imagine what the Creator sees, that's the beauty of his own Cosmos. and then its own Unicose.

Then you understand, every structure has a point of infinity, but has a point of affinity. Which means, we have to become, we have to understand the origin of life, the original Fundamental Plasma which is our Soul. And it's in division, and in the field it radiates, it leads to creation of another cycle of life. It leads to creation of another dimension, from a plasma to an atom of Hydrogen, and then from division of the fields inside, and in the environment, to Helium and the rest.

The whole process of Creation has started with one ray, but understand, think how that ray has, in interaction with its environment, has led to the creation of the atom and the combination of the plasmas, which call them different atoms and the molecules and the creation. And then, it goes back to one fundamental point. If that ray needed to travel in a Space that in its division with .. itself, with the interaction of the environment itself, leads to creation of other plasmas, (1:02) to become Helium and the rest. Then, the Soul of Creator, which led to the creation of Totality of the Unicose of the humanity or life, needed and has an environment given to it by a bigger structure. Which that structure, in essence, is the structure, the creation and the creator of us as man, as humans.

And in that process, it leads us to the next point. It lead us to the confirmation and creation of what we call, another structure. another position, time and place. How we, what we call, change, how we evolve, how we come to be part of, all goes back to the same process. What is the Fundamental Plasma? And what led to the creation of the Fundamental Plasma? And to what extent this Fundamental Plasma can, will, and will be leading to creation of the next step, next generation of life, next understanding of the Totality? And to what extent we can understand the whole process of the Creation?

Does the fields of the STM become the man? And another cycle of creation? (1:04) Or would it become part of the process of Totality in creation and in dimension of life of the, what we call, Universe. And in a way, the body of the man is a Unicose in itself, with many Universes, which we have chosen different name for it. Milky Way, let's say, is the kidney of the man, and another one is another lymph, and another Galaxy is another point. In a way, we are replication of the life, the structure, the division of the fields, and the organization of them working within each other. We just have chosen the body of the man, as a body of the man. And we call the other one Galaxies, and we call it a Unicose, when the man itself is the Unicose. With the brain and everything else, has an emotion, has a physicality, has a control system, and so is with the Unicose, which comes from the Rays of the Creator.

And that field can repeat itself again and again. That fields can replicate itself again and again. To what extent man will come to understand this, depends on the maturity of the man in understanding the process of Creation. And sooner or later, as you understand more, as you have understood it in past year, then you see, "I can teach this, I can teach up to now, because I understood this part." And then we'll see the process of you, step by step, becoming what we call, the structure of the man itself. And, in that process, (1:06) we become the essence, the Totality of the structure. And in essence, we stay as part of that structure.

But at the end, maybe today you understood how you have to transmute. What has to be a second, what we call, 'skin of the man,' to understand the Totality. And then, we go to the next step. And in teaching, we understand more, why we need to, in a way, to connect the whole structure of the knowledge of the man, knowledge of the Creation, knowledge of the Creator, to come together as one, for man to be able to transmute. Otherwise you'll be the same as our Knowledge Seekers of today. I can transmute, I can go, but I cannot manifest myself. Because you haven't learned how to do. I can go home and move the apple, but when I go, the apple is in ?? same position, because up to now you moved the physicality of it, you're no different than that knowledge, than the boy ten years ago in Barletta. You don't move the cup. You give a pleasure to the cup, to the Soul of the cup, that, "You give me pleasure to see you in that position." And for that point, for that purpose, the cup will move to satisfy the pleasure. Always remember, the Soul gives. To keep the connection, and to create a connection, that you do not move, as my movement is giving life to you to exist. (1:08) And this is part of the teaching, this is what we push.

And as I said last week, the same. We have to understand which part of it comes to convert from Carbon 14 (C14) through Nitrogen (N) to Carbon 12, and we charge the

energy of the Carbon 12, converts into, within what you call Nitrogen, to go back to Carbon 14. Because, the balance of fields of the Universe always stay, and there's a limitation how much you can carry. And it's, when it's too much to carry, that neutron divides. And once the neutron divides, it means I receive so much, that in its division, leads to creation of a new atom.

If man one day understands even the process of the creation of atoms, you are easy to say, "This is Copper, this is Zinc, this is this, this is that." But in fact, if you understand the, what I call, let's put it, theology of the creation of the elements, then you understand that neutron, which absorbed more energy, or that atom which absorbed more energy in the process of the creation of the environment, that energy in life of the man, we call it a child, in the life of atom, becomes that neutron and he has a dimension of cycle to hold. And in that atmospheric condition within the nucleus, when it gets to a position, it splits because it cannot hold, exactly the same as the cell happens in the womb of the mother, they split. And so, that combination creates that element. You give it a certain condition, you create that element. And if you bring all the fields together, you can create any condition, any element, anywhere in the Universe.

Then you understand, material things has no value. (1:10) Because you can create as much Gold and Silver and everything else, what's the use? And those who stuck and get stuck with the material world, always, the greed of the material world bothers them. As I said, "I lived on this planet for so long, I carry not a car in my name, not a house in my name, not a thing, what is on my back is what I carry." Because I know, even if it comes, when the time comes, it's not mine. Because in essence, we are fields in transition. And all our job is to give, to point to that to be done. And the ?? left is done, it's what they do counts.

As you've seen, I gave many nourishment, many steps to all Knowledge Seekers. Anywhere in the world, if you want to start something, we ?? saw. But, then it comes to the point, what did you learn, what have you gathered from it, that allows you to do the job, not me to be there to always to provide. And when they fail, it's Mr. Keshe that fails. Because I understand the essence of the Creation. We are there to keep the seeds, it's for you to nourish the seed. Because, you still are entangled in physical dimension, everything is wrong with Mr. Keshe, except you're looking inside, why it failed? I am responsible for it, because I never understood what was the purpose. I stuck with the physical dimension.

Then you understand. That process is the same as you trying to move a cup in a physical dimension, where you are in the realm of fields of the Universe, when you transmute. This is when I started the talk, you end up in New York, (1:12) with no key in your pocket to get into the apartment, because you did not manage to satisfy the Soul of the key in the house. You don't need to go to New York, because there is a problem there, I stay, you go. Then you understand, the process of the Creation. And how many of you have problems with your transmutation.

And if you understood this, in the upcoming month of June, and then in July and August sessions, as we build up to Iran, I'll explain to you, how to transmute. I'll be in there physically, to teach you, holding your hand, step by step. Every five minutes, every half an hour, every two minutes, putting you in the next step. We go into New York, you're sitting in Switzerland, you're sitting in Germany, you're sitting in Africa, you're sitting in United State, as a Knowledge Seekers, you put your Soul in it. You have to understand, when you go all together, to one point with me, you have to understand, "Have I satisfied the Soul of my partner, that if I go, he's happy to be?" "Have I satisfied the Soul of the key, I want to bring the orange suit with me?" Is it there? You don't need to talk to it, you need to create the fields of the satisfaction. Talking is for the man. Understanding the field strength is the job of the Soul. And this is the emotion of the Soul which you have to get.

And then you understand, when you transmute, you don't need to go in the toilet of the aircraft, to change your clothes from the fur skin to the bikini, to land up in a warm place. (1:14) It's very strange, if you don't understand it. I explain to you in a very simple way. Anywhere you go in the embassies, in the governments, you go with the same clothes, you come back out with the same clothes. except in the Iranian Republic embassies, anywhere in the world. Women come with the high heels, with the big... everything else, make up and everything, they put a scarf around their head, and they become Muslim, they go in there, they get their passports, they get their work done, they come out, they take it out, and they're again back to European, with the 'minis' (mini skirts) and the rest of it.

You cannot do that with your Soul. As I said, "The love of the Creator has come from the heart of the man, and not from the talk of the man." And this is where Knowledge Seekers have not managed to transmute. The others are not fooled, that you came in the Embassy, just with a scarf to get your job done. Because, they know what's under that scarf, and how you live outside. And you cannot do the same with your Creator. Wrap it in the body of the man, blame everybody else for it, except knowing it's your own conduct which has brought you to the point, the time and place and position. And this is where you can transmute, if you understand this. If you don't understand, all the work is nothing, because it cannot show anything, because it's you who have not understood which field of your own Soul to use, to understand the process of the Creation.

I hope you learned a few things today, and I hope you can apply it, to start becoming, what I call, the Passengers of the Universe. (1:16) As I said many times, I always said, I take you to Universal Community. But it doesn't mean that you can become part of it, if you have not understood. I can take you to the source, to the spring of the water, but I cannot teach you how to drink it, if you don't want to drink. Even though you put your mouth and lips on it, but you don't swallow the truth, of what is inside, the Knowledge of the Creation.

Thank you very much. We go for a break and we come back. And I hope we can answer, or share more knowledge. Rick, would you able to take us for a small break, and we come back out?

>> **BREAK** >> 541 KSW June 6, 2024 (1:23).

K- Yes, thank you very much. If there are any questions we try to answer. And as usual, before we start answering the questions, the today's session will be short. But, in regard to Iran conference, I have to, as I said before, explain that we close the part for the Knowledge Seekers very shortly, because Keshe Foundation will go out to announce the demonstration of the Flight Unit, and all the part which goes with it, separately, into the public domain. (1:24) And a lot of people then become Knowledge Seekers to use the advantages of which we gave to the Knowledge Seekers. And once we go public, the fee which is put in for the Knowledge Seekers will end. Doesn't matter if you are Knowledge Seekers, been Knowledge Seekers for a long time. Once we close that gap, the fees will go to 20,000 Euro, as it goes for the governments and the scientific organization to partake in such an important, what we call, presentation. So, those of you who are already applied, or planning to apply, please complete it at least before end of June, because we'll make announcements very soon, that it goes public, and we'll take that bracket off the Knowledge Seekers. It does not matter what it is, because then you can't say, "We've been the Knowledge Seekers for 200 years." It doesn't count. We open this door till that time, and we close it, and there on, it'll become a public presentation, and we move the fees to such a bracket.

It has to be understood that the presentation in Iran is, it will be in collaboration and close presentation of facilities provided by the Iranian government. Which means, as I said before, we will not be able to show the whole demonstration inside a hotel. It has to be done in a place, public, and at the same time, safe and secure. For many reasons. So, it has to be understood, part of the presentation, somewhere in between the five days, you will be transferred, or you'll be traveling to a destination appointed by the government officials, where the presentation of technology will take place. And many nations, many scientists wants to see the change in the parameters of the science to the next step. (1:26) And we, as I said before, you Knowledge Seekers, you ?? didn't let us know, and you gave it to the governments, and now we let you know in advance by, within next few, couple of two or three weeks, we close the entry for the, what we call, for the conference

in Iran. And it'll be the same for the Washington. Knowledge Seekers, you have this advantage. After the date we announce, the fee put for the Knowledge Seekers demolishes, it's gone. Because we have, we will entertain, governments and scientific organization which is 20,000 to be a part of this, is nothing for them. It's a knowledge which they're after and they'll be looking for.

And meanwhile, in next few weeks, we'll extend the presentation of the development of this technology, in so many ways. And, what does mean, is that... the demonstration of technology, and the fringes of knowledge which will be developed around it, will be supported through a very big structure. And, we are there as a guest of the Iranian, what we call, nation, and Iranian government. In, at a certain point, the technology to be shown, will be outside the parameters of the hand of the, what we call, the Keshe Foundation. This is where, in conjunction with the Iranian government, we will invite the world leaders, world Ambassadors, advanced technologies around the world, leading companies, to be present in our presentation.

Because, it is not a conference which is kept in one hotel, it is a conference, (1:28) which then will transfer into showing the virtue of the technology developed and delivered. It cannot be done as you saw in China in the room. We cannot fly a system in a closed environment. And to be outside, we need, and our team are collaborating with the Iranian officials and the Military, to accommodate such a facility for demonstration in Iran.

So, please, whatever you're doing, you're planning to come, whatever, complete it within next few days, a couple of, two or three weeks, because we will go public, as we have asked, we will ask our officials in Iran, to send invitation to the, all the embassies in Iran, and the scientific organizations to attend this presentation.

In the near future, and in the sessions we'll start in July and August, well bring many of you into the position of understanding and being able to transmute and understand the process of ?? transmutation, as we teach some of it in public, in the private sessions, they will be very intense teachings to go. So, we announced the three events, July, August, September, three sessions coming up, which will be announced in the next few days, by the Keshe Foundation, and this is to prepare to teach directly, to bring it to that point of transmutation. This is important for us as part of the structure of technology, and part of what is to come for presentations around the world.

It's no use going to Washington and say we can transmute, where we have to start from new to understand. Knowledge Seekers are already trained, and they can show how it's done, (1:30) that it brings the next step into the game-play and into the structure. So please, collaborate with us as we open the technology in conjunction with governments. And as Knowledge Seekers we always keep our teaching going. There'll be no way the teaching will stop, even after demonstrations in Tehran, or in Iran, or in Washington. There is a possibility that again in Iran we'll have two presentations, one in Isfahan and one in Iran, depends on the, what we call, agreements with the Iranian governments and Iranian, what we call, structure of the setting, which is. We have to delay this till we know who's the next president, how the structure will set for a second presentation.

You have to understand, Knowledge Seekers, we have taught for years, are the backbone of the creation of the peace. And when we can show, in Iran, we can travel without limitation, with Washington and Iran, show we can do transmute, you become the ambassadors of peace. You show to governments that borders have no meaning. You show to governments that having wealth and robbing each other's banks has no meaning, because now the banks can produce as much as they like. And in that process, in a way, I have brought you up to be the 'assets of peace.' All you Knowledge Seekers, all of you who attended all these teachings and all the sessions, you have to understand, you become the tool of the creation of peace.

The more of you we get in Iran, the more of you we get in Washington, which can show the governments, how we can be transmuted ?? wars will have no meaning. (1:32) It breaks the barrier and brings the peace. And it cannot be done, it's not just a theory. That's why we start teaching more and more of you, in public and private, that it'll become... it's not just one or two, tens of you, hundreds of you, can do the same. And this will set the scene for world peace, as the governments have no borders to fight for, all these naval forces, all these limitation with the landmarks of imagery in the head of the man, will go to the wall. And the time for it has started. And you're the backbones to it.

Try to attend Tehran, Iran Conference, the Washington, because there and then we ask you to show, because you've been taught to show. It's not just a few. And when ten to twenty of you can do, then the whole nations can do, no barriers, no borders. Passport in my pocket worth nothing, because I can be anywhere I like to be. You cannot put me in prison because I entered your country illegally, because I can move out of the prison instantly.

We have to bring that consciousness to the world leaders and to the governments through delivery of the technology, in essence of the, what it is. And we are building systems to back this up. The new systems, which are now developed and getting developed, will bring us to that position. Please, understand how these sessions of next three months are connected to what is to be delivered. And 2024 was the premise of delivery of what we call, the ?? unification of man, the world peace, and end of the old structure. (1:34)

Let me know if there are any questions we can answer.

Q: ... I have few questions regarding the old teaching and because you know in old teaching we didn't know as much as we know now, because we are (getting the new) teaching. So one thing was, you know, there was a question you brought up that what's the purpose of life here? We come here, we live, we eat, we do all these things and then after that we die. And then it was interesting when you talk about the womb of mother as if you read my mind, you see you said when a mother carries a child and take care of a child for nine months and give birth to a child. And once the child is born, her job is done because she gave life to a life. So, then, so we are the incubator for our Soul to deliver that Soul at the end of our life to the universe. It means my body as a physicality is an incubator. Now at the end when I die, my body's gone and the Soul goes to the universe

and does what it needs to do, I delivered the baby. But now with the transmutation, until now we all died. Now you came along and you say, "Okay, you don't have to die." This incubator, this physicality can be used or not used, (1:36) you can stay in many different ways. ?? we can have this in another place as it suits according to the field of the space. So now instead of we allow the Soul to take care of this incubator the way it wants, or in a way we, if I want to understand correctly, we kind of make it not to destroy this incubator. If I understand it correctly, that's one thing I want to understand.

The second thing was, when you talk about, you talk about somebody else about feeling and emotion. Feeling and emotion, in a way you said is almost the same, but then what you brought up, you said, okay, the emotional part of the brain is a size of bigger than a peanut, bigger than a peanut, smaller than a walnut. And that part is not your physicality that can want to cuddle and kiss and kill. That part, which is emotional part of the brain that is bigger than a peanut and smaller than a walnut, carries the field with it. That field, when it gets to the physicality, it makes you cuddle and kiss or want to kill. So my question is, so if you, now this emotion that we talk about, now you bring it into the new teaching, you're talking about this emotion is a connection between the physical Soul and the Soul that make you transmute. Now, if my physicality is not responsible for my action, color, and cuddle or kill, so that emotional part of the brain that has a field, that field of it, the way it shrinks that field causes me that, (1:38) say I want to cuddle and kiss and you want to argue. So how can I change the emotional part of your brain that when I cuddle, I want to kill or argue to cuddle and kiss and make it like mine that want to do the same? Or, how can we change that to, for all humanity, that emotional part, to cuddle and kiss, and not to kill? That's one thing, and then, how that emotional part, that we talk about, can put the physical Soul and Soul connect and then transmute? I don't know if I got it correctly.

K- So, can you simplify this to understand what you're asking? And then we'll see what we can answer. Or we can all find the solution.

Q: So, so I'm thinking, so how is this, how can you change that strength of emotional part of the brain of the man, that everybody cuddles and kiss?

K- That is a fantasy world, everybody cuddles and kiss. I put it to you this way...

Q: ... But you say it has a strength, but how can you change the strength? We were born with that strength?

K- Nothing is. The thing is, the only strength you... The only thing which man has to understand, there are two points. Is that... They say, "The mother of invention is the need." We start inventing things, when we start looking we need something for a purpose. The mother of peace is what I call, understanding that you don't need to destroy. (1:40) And this is where man has gone wrong. And, one of the main problems or instigators of it, has been jealousy.

If man understand, that it needs to understand that he can have whatever he needs, through the fields of the Universe, if you understood the part of the teaching of today. How you feel, how you feed the Soul, and that Soul feeds the physicality, the way I was explaining, and the line got disconnected on the whiteboard. You'll see the Soul is much stronger, it can absorb higher strength fields, in the purest form, when you eat a food you have Vitamin A, Vitamin D, Iron, everything else in the food you absorb. The STM only... << Just one second. >>

The STM only takes Hydrogen level. (Just one second please).

Then, you understand how pure the energy you receive from the Soul, feeds everything. (1:42) And you don't need to be afraid of, if everything we need in the physical dimension is supplied, because it takes what it needs from it.

And this is the part, then it has no emotion, there is no need for emotion to be part of the physical life. You don't need to kill to satisfy a hunger. The field you receive, connects to the emotion, which creates that condition of the hunger, that it is already fed. And this is part of the whole part, which, because we don't understand, we don't see the Totality, we have questions about bits of it. Because, in a way, it's a singularity, but it's Totality.

Through the Soul, we can feed the man. It doesn't need to love, and it doesn't need to stop hating and the rest, because it's not fed, you satisfy all the emotional need, that there is no impurity in it. And this is what we have to understand, and part of the teaching of today was this. In that Fundamental Plasma there is the essence of the strength of every emotion which the Universe carries, which we know few of it. Emotion means reacting to the environment. That's why we need that emotion. We show emotion, when ... we love someone. We don't show that emotion to every person on the street. Do you go hugging from one person to another? (1:42)

Q: Yeah, but you know Mr. Keshe the emotion...

K- So, this has to be understood. You see, when you work through the Soul, these hungers, these emotions are all fed. << *audio cut* >>

This is just... this is very fundamental. When you are satisfied the negatives don't exist. And we haven't managed to reach that point. It's with everything else.

This is what I was talking to this morning, and yesterday, to, in a way of conversation, that when we bring in Iran, when we bring in Washington, show that every man can have everything, and no Soul is more important than the other. Would we have the Kings and the Queens of this planet putting their hats down? How come a farmer, street cleaner, a doctor, who knows the knowledge of the Keshe Foundation and will be public, can do the transmutation, but a King and a Queen can't? You will see this coming up. And then, who's jealous of being a King? Who's jealous of a King will put the hat down, nobody wants to carry the Kingship, because with that comes a lot of attachment, "Me, me, I have to have everything." (1:46) And when you carry the physical things, like the power, the properties, you're too heavy to let the Soul go, you cannot fly, you're anchored.

The jealousy will be those who stole so much and world leaders, who cannot do what you can do with a pure heart to transmute. Very soon the time comes that the richest people in the world, the Kings and the world leaders, will give everything to have, that a single Knowledge Seekers can do by transmuting, seeing the world, knowing how to do it, and they can't. Because, in doing, they're not sure if they come back, their wealth will be here for them. Attachment to detachment (wealth), that'll be their problem. So, don't worry about, "What can we do with that?" We'll learn gradually as Knowledge Seekers, you will see. You don't need to hug. You have to learn that you're hugged by the Creator, is how much of it you want to feel. That's what it counts.

Q: Mr. Keshe, when we talk about the... Those two thing here, when we talk about the... I... you know, this is my understanding, I mean, this is what I felt, I don't know. We can have control over emotion, I give you example. For example, you want to take me for a Chelow Kebab, And, I like Chelow Kebab and ??.

K- Don't start with that, don't start with that at all.

Q: No, no, I'm for, I'm your example. You want to take me for Chelow Kebab, you said you want a Chelow Kebab, and I like both Chelow Kebab and Gholmeh Sabzi. And I said, "No, I want to have Gholmeh Sabzi." So, either I can say, I have two Ch... I, I can create a mayhem with you, and I say, "No, I don't want Chelow Kebab, I want Gholmeh Sabzi." And you say, "No, I want to take you for Chelow Kebab." And I say, "No, I want Gholmeh Sabzi." So I didn't make an argument. (1:48) Like, okay, you want to take me for Chelow Kebab? I'd love to have a Chelow Kebab, and I just go with you and have a good time. But then I choose what kind of emotion, what kind of environment I want to create with you, because this is in my control. So the emotion is in my control.

Another thing I want to talk about, the feeling of emotion, like for example, joy. For example, you give me Chelow Kebab, I've become happy, yes? That's one thing I noticed that I've, that I experienced. So another thing is sometimes you wake up or you're sitting, suddenly this joy like a fountain bubbles in you and you don't know what's going on. So there's a different kind of a joy that's come one from somebody gives you something, something has happened inside of you which has no reason. So, and another thing you said today, you said, when you ask the cup to move, when you make a connection with the Soul of the cup, the cup moves, or any other thing. So, isn't it the same thing, instead of trying to connect with every single thing on this planet, when Jesus says, "Seek the kingdom of God first, everything else is added to it." So, if I connect to the Creator, everything else is going to be moved by the Creator.

K- It doesn't, you see, when you... listen Azarjan, it's very simple. We have never. I have never ever seen, anywhere, in any of the, whatever books, to write about the bad things about the God. Even in Koran the hundred names of God is attributes. Yeah? The beauties of it, what it gives. So, the opposite things what we talk about in life of man, to what we give as attributes of God, and part of it is emotion, of the names are emotion, (1:50) does not exist once you are satisfied, once you have it (what you want). You understand? And what we give.

You sent me a beautiful poetry today, I've listened to it maybe twenty times, because it has a meaning in the essence of the Soul. That poem, the way she sings it, I admire, I love the way she sings, I know her very well, the way she's recite the poetry of Iran. But it has a meaning. In that poem, it says, you can say it better than me with my Farsi. It says, "A guy goes to hell, and he tells the keeper of the Hell, "Why am I here? I prayed for 70 years, day and night, I did everything correct. What have I done wrong, that I'm in this hell, after having 70 years serving the Creator?" It says because you're in hell, because you, in a way, what you call it, falsified, or accused your neighbor of a wrong thing....

Q: Gossip.

K- Yeah. That you ruined 70 years of a good man's life with your wrong accusation. And that wrong accusation has brought you to hell. Forget about your (service) for 70 years. This is the essence of Creation, we have to get everything right. Not even one thing wrong. And to get everything right, it goes back to the essence of the Creation. Detach it. And knowing what you asked for, what you get, what is the purpose of it. (1:52)

All my life, I never asked and I never went for anything which belonged to the others. But when I did, (it) was because to serve the humanity. For what it comes to me. And this is the Creation and the Creator, is the essence of life. We don't need to. I can live a beautiful life, without going through all these hassles of life. But, at the end is what we detach ourselves from. And what we attach ourselves to, because detachment comes from the Creator. So, whatever you talk about, is meaningless when you live in the dimension of the fields of the Universe, because it's there, whatever you need is there.

Q: Thank you Mr. Keshe.

K- You're welcome. It's the essence of the work is, we don't go for, we don't sit for, we live to serve for, and this is the way I look at it. Sitting here in Austria's, or sitting here in Tehran, or sitting in... whatever, doesn't change the mission of life. As long as we don't understand, we'll live the past. Once we understand, we have to live by the laws of the future, which is a Universal law, which is the Creator's law.

And, there is no negativity in it, because everything is giving, the negativity never arises. It's like when I was in China, I always say, I wrote to one of our dearest Knowledge Seekers, very recently. They say, "Oh, China is an open prison." (1:54) I said, "No, you never understand." The Chinese government puts so much things out, that people don't commit wrong, to make prison for them, to get them to correct when it's wrong, after they've done. And it's a misconception of everybody else, outside China. China is a closed society, it's like a prison, and people can't do it, they get their things done.

In the West we build, that's all the guns and everything to create man to do wrong, to kill and to rob and things, and we create a huge class differences, that ?? the guns. The Chinese government doesn't do that. The Chinese government says, "You do this, this is your punishment, it's straight away, and it's done." You are isolated from society. People

don't do it, not to get to that point. Then they don't need to build prisons and put all the guns.

In China, it's very interesting. If you go to a shop to buy a knife, they want your license, cutting knife, for the kitchen. I went to buy a knife once, they said, "Do you have your ID? We need your ID to know who's buying the knife." In the West we walk into shops and we buy any kind of knives. And I was walking the streets of Vienna a few days ago, there are knife shops with all sorts of knives behind the window. Does anybody ask for a certificate or license? Or why are you buying it? No, Chinese do that because when you bought a knife and they registered it to you, then you are responsible, you know the consequences of it, you don't use a knife to do whatever.

There is much more restriction in buying a cutting knife, than going to a shop in America, buying a machine gun. (1:56) So, our life has come to a point that we don't create the condition to do wrong, than being afraid of punishment, not to do wrong. I lived in China for so long. Hardly see accidents. There's a lot of accidents. ?? Hardly see it. You never see drunkenness, you never see fights on the street. You go out one night in Manchester city, or any cities in Europe, fights and drunkenness and everything else. The society has brought so many direct eventuality, that does not allow it to happen. And this is what people don't understand.

And this is the same with the STM. We have to create so much good within us, that the bad doesn't exist. And those who want, because they don't get their way, they try to create everything bad, that it doesn't show what they've done bad to. We've seen that in China. We did so much, we invested so much in China. And those who could not manage it, then they blame Foundation for not doing it. Millions was put into China. With the goodwill that the Chinese will grow it. You cannot keep on feeding, till it comes. You have to draw a line. Their incompetence now is our fault. And they go to Knowledge Seekers, write everywhere, that... They don't say, "Mr. Keshe spent so much money for us, we couldn't manage it. We failed the Nation, we failed the Chinese, it's Mr. Keshe's problem." No, blind man can see. Their incompetence has created a condition, we can't be on top of everything.

It's the same with the Creator, man's incompetence, is man's problem, he has to solve for himself. (1:58) Those who failed the others, blame the others for their failure. Because it's their own incompetence. And then they accuse. We see this now in the Chinese community, heavily. With two or three people going. But they don't say we mismanage. We were incompetent. We see the same in other structures. And it's the same all over the world.

And then they go and accuse what is wrong, what is... They don't say, "I am the one who caused this problem, I stand for it." They accuse them, they did this to me. But the Chinese structure doesn't allow that to come. They handle with the kindness of the mother, with the iron fist of the father. And the man follows the path. Then you don't need to do anything wrong, you don't need to hug everyone. You'll love everyone that's

on the street without hugging, because the way you live correct, allows them to live correct.

When you, as Knowledge Seekers, and those people around you, who talk, when you can lose your phone on the streets of New York, on the streets of London, in Paris, or in Beijing, or in China, and you can get it back in one hour, then you live in a safe society. Then the society lives by its law. And this happens in China, it doesn't happen outside. I got my phones broken, the car broken to steal a phone, I left my phone on the streets in China, within one hour was back in my hand. Then you understand the difference, how we create that condition for ourselves.

And then you understand why I worked so long, for seven years, till I gave up with the Chinese structure. (2:00) Because of the Chinese failing themselves and blaming the others for it. But the Chinese structure has allowed the growth for it. Our own failure causes us blaming for others for it. Because we don't want to accept, "I failed, that caused the failure."

Any other question?

Q: ... Thank you for enlightenment, and what you always do. And my question is, in the Universe, could we have the creation, like the humans which are genetically defected? Can we have creations of planets that clash other planets, and they create disorder, and how could Universe take care of this?

K- We always look at disability or failure in, what you say, people with a defect. But, you have to understand, you look at the physical side, you don't look at the Soul, the STM who's handicapped, could be thousand time closer to the Creator than the man who wears a beautiful frock and runs like a marathon, in perfection. (2:02) And this is where the difference comes. Because the man who's handicapped, has suffered, and the whole Chinese proverb says, "Suffering makes the man wise, and the wisdom makes the man rich." Not necessarily in the pocket, in reaching the Soul of the Creator. Understanding the process of Creation. And this is the way we look at it, and there's always, through interaction of the fields, conditions that it looks defect to us, But it's beautiful within the structure itself. So, there is no defect, depends on which side of the fence you sit. .. so it depends ...

Q: ... There is nothing who creates disorder, in the order.

K- What do you mean?

Q: Disorder means...

K- There is no disorder, there is order in disorder. It just depends what that disorder nourishes within, not how it looks from outside.

Q: Yes, thank you. So it's always the order.

K- It's always ... I always go back... I had the privilege to work with Ceausescu government, prior or after in a way, during the time. Romania was one of the richest countries in Europe. And that's why they went for it so rapidly, to get rid of Ceausescu. People had everything to eat, and the nation had no debts, and was exporting more than importing. And more or less, people had enough. They didn't live in the luxuries of fake luxuries of the West, but the nation was solid. And now in Romania, you have the problem, (2:04) the people who were happy living the life, having everything, now they can't afford anything, because the prices are European prices, which are ?? Ceausescu ?? prices. It's the same with most of the Poland, Czech Republic, all the Eastern Bloc, they call them. The West had a problem, because it looked there was something wrong with them. They had everything we didn't have. And we had to do it, to create, ?? the fault with the ??. The same with Libya. The same with Syria.

And, it's amazing how our misinformation creates a wrong image in us, regarding to what we see, and then we act upon it. It was very interesting listening to a part of news in past few weeks. Many of you, what have listened to it, must have heard of it. The President of Syria was invited to be in Beijing for a... whatever they had, about the Olympic, or whatever. And, it's the first time the President of Syria traveled out of Syria in ten years, because he was stayed in to keep his nation together. And he fought with them, he (went) bunker to bunker, in every way, to keep his nation. Not to let the Central Bank go. And now, after ten years, he felt safe enough to travel to China for the first time. And on the return, he traveled back through Iran to see the Iranian leadership, and back to Syria, which they supported and backed each other so heavily ?? .

But the interesting part of this was, that two points, in traveling from Syria to China, three different nations supported his plane, (2:06) and China for the first time, wrote the Chinese flag on the aircraft that it carries a President, it's the Chinese territory on air, that nobody could touch. From Damascus to Iranian Middle East, the plane was supported by Egyptian air force. Iran supported it all the way with Iranian military air force, escorting through to the third nation, which with the help of India and the others, was safely landed in Beijing.

What is made to be so wrong, is so perfect to the others who see on the other side. But the second comment was, that the European commentator says, "After 10 years this President comes, but he's wearing like a second hand shoe, that he cannot afford it." And it was the same, so ridiculous, that a man, a president, presenting so immaculately with his wife, had still to be, what you call, demeaned by a broadcaster about the shoe, which wasn't true. It's just because you cannot show (see) it, you (they) can talk what you (they) like, and what you believe, and what you perceive.

And this is what we are, we always look to, not to be part of totality, we try to be separate and something special and different. And we create all these wrong things for the others about what we do, and what we believe, and it goes from our governments, to our nations, to our everything else. Even comes to the animals and the trees. And this is

where we have to change, we have to understand the STM, and not what the man wears, how he looks and how he sits. (2:08)

Any other question?

Q: ... I have a feeling that the humility of Soul is different from STP.

K- Souls never get humiliated. Souls never get humiliated. Souls are there to serve. There is no humiliation in the level of the Soul.

Q: But the problem is sometimes in occasions, unexpected, because we can see the humiliation goes out of the window and then we regret by lack of understanding of situation. So how can we have all...

K- ... This comes from our upbringing in Iran.

Q: Exactly.

K- It's the culture, it doesn't exist in reality.

Q: We have to fight it, because it always bring regret and not feeling good.

K- Yeah, this is 'force fed' in our culture.

Q: ... In one word, what do you advise to keep the humility of... humbleness of the STP?

K- No, it's just live the life as it is. Live the life as it is, with no pretenses, with nothing. And it's a different way of living, but it's the way which you live you don't need pretenses.

Q: Thank you very much. God bless you.

K- Thank you very much. Thanks for all your support.

Q: You're welcome. It's an honor.

K- Thank you very much. Any other question? (2:10)

Q: ... Mr. Keshe said that we absorb 80% of our energy from the Universe, and in the third book it's written that less than 20% of the total mass of the Universe consists of 5% of the matter mafs and 15% of transition mafs. My question is, how should we interpret this in a dynamic Gans reactor?

K- It's the same. In the dynamic reactors you only take what you need, but everything is available. Instead of waiting for the whole Universe for you to connect, in these systems we have provided everything in a miniature scale.

It's very interesting. In these dynamic systems, we... I was present in the lab, two, three days ago, when we opened one of them. And, when you look at it, the structure is like a plaster thing inside, and I thought, "How much did we put in there, that we gain so much mass in?" And, so much mass in these small reactors, it's like a paste inside it. It has created a paste, and these reactors run very, very short time. Maybe, couple of hours they've been tested. And, you see the same mixture, even though they have different mixtures, the same structure color in them. And, so we have provided balanced fields in these systems. (2:12) You take only what you need, not more. But, what you get from all the fields of Universe, is in one UBESU (Universal Body Enhancement Spaceship Unit). You can't over eat, we don't put people inside size 6 and they come out size 16 out of the machine. If you could measure the fields of the man, from hunger to his thirst, to his greed. You go in the machine, you come out different man. Because it's satisfy, it creates all the fields you need. And, it's still the same.

Instead of you eating every day, you get all of it. One of the reasons we stop the UBESUS, because they make so much noise. There's so many motors running. You have to understand, 32, 34 motors run at the same time, in a 2, 3 cubic meter, and it's deafening. With the new system, it's silent. Most of you, when you go on the headphones, it's UBESUS in a static condition. And then you understand, you don't need to. You absorb inside what you need, and that's all it is. You don't absorb anymore, till the balance comes within the physicality, within the STP and within the emotion of the man, and it will ?? part of the system.

The whole essence is, to produce the fields of the Universe. And, try to produce the fundamental field, which is the strength of the Creator, then you have access to all of it. And some of the reactors we produce have that, but you have not, within the structure of the man, that string is not strong enough to be able to match to this system. (2:14) Otherwise, every single person reach the purity of reaching the Creator's level.

It's been divided and decoded so many times through its division ?? across the Unicose. But still there's a side of it, still you can reach part of it. And if somebody has the right strength of it, that's why some children are born, what we call, physically dead at the point of birth. Because they already reached that point. In the process of the womb of the mother, the beauty of the Creation has completed. In reaching the Soul of the Creator's love. There's no need for the manifestation of extension of the physical life. One day you'll understand what this means. It's said, if I tell you how beautiful it is, on the other side, you all commit suicide. But, that's not the essence, it's the maturity of the Soul, which comes, because that Soul has to lead creation of the others.

Any other question?

Q: ... Mr. Keshe, you spoke about last week Hydrogen and Carbon 14. My question is, the mystery of water, which I still am discovering, has Hydrogen, and in my mind must be significant. Would you be so kind as to expand on your understanding of the properties of water in our Universe? (2:16)

K- The water, the way we have it, is not the living essence of the Creation, which means that every created thing needs water. Everything, everything in the Universe needs a dynamic flow. Does not need to be matter state of it. If you can create a dynamic flow in the field of the Universe, you create life. And, in the body of the man, in the structure of this planet, happen to be Hydrogen in conjunction with extension of the Nitrogen itself, we call Oxygen. If you take Oxygen isotopes and you take Nitrogen isotopes, you see a lot of them match. And that level is where we connect to Universal fields. Oxygen, Hydrogen in combination, in a certain level, and in a way, lead to creation that are created out of the Carbon 14 which is connected to Universal fields. And the matter state connects to the matter state connection fields, which is Carbon 12.

We always look at one, but this is the limitation of the science. But if as a Nuclear Physicist and Plasma Physics, you understand that certain fields behave, look, but in essence are of the other. And this is what life is, what the extension of water is in the human life, on the other planet, other position in the Universe there is still life, but there is no water. But the dynamic connection to both the Universal fields and the localized fields are created through interaction of the fields themselves.

Wherever, in wherever you find life, (2:18) even a stone, you have to have a connection to feed, to sustain energies from Cosmos, from the mother, and local atmosphere of the Earth, condition of the Gravitational field of the Earth. But you still are ?? doing the Gravitational field of the Universe, which is from the interaction field of the Creator. No life, no physicality can conclude, can manifest, without a connection to the Universal field. Because local field of it cannot sustain life... (interruption) ?? local field cannot sustain life.

Pardon? (Internet dropping)

Q: ... Let me tie in a question from Claudia that goes along with what you're saying here and I wanted to get your question in. She says, "Well, first of all, thank you for your explanation about the breathing, because it opened a new window of knowledge, thank you." And she says, "Yesterday we were talking with other Knowledge Seekers about hormones, and then the teaching of the 376 Knowledge Seekers Workshop, you told us the hormones is one of the first substations, which comes from the interaction of the STM's physicality with the STM itself. It's where the body in the center of the brain creates what you call hormones. (2:20) Hormones are the center of the first, one of the first step down from the strength of the STM. And in Space, mankind will live through hormones.

So, that was a quote, my question is, what is the correlation between the hormones and our emotions, and between the C14, and how the hormones behave during the transmutation process?

K- The hormones, all hormones carry Hydrogen base, in field strength, all of them do. And this is how they're connected to the Soul. And in the dimension of conversion to

physicality, they connect through Carbon 14 or through a Nitrogen. And in transmutation, you have to understand, what element at the point of manifestation, will be that bank of conversion? What field strength of which Plasma? On Earth is Nitrogen. It's like a transformer, it's a converter. And the difference between what it receives from the environment and what it receives from the body allows it to operate.

And if you even understand this process, in the step after the hormones. And what the hormones do, is why you shed skin all the time. Why you change your skin every day. Why animals change their skin all the time. Because without converting or ?? producing oil in certain animals to remove the skin away from what it is, (2:22) we will not be able to absorb constantly the fields we need from the Universe, or what we need to give out to Universe. That becomes a barrier. This is the only reason we shed skin all the time. Because, we will not be able, if we keep the same skin from the day we were born, within days we die, because we don't receive the fields. And we can't give what we don't need. So the skin automatically regenerates to keep the operations, that we can absorb fields.

It's the same process, the same procedure. We need the hormones are part of the structure of stepping down fields. And even part of the hormones, because they come through the Soul, and the interaction of the fields of the STP in different part of the body, they participate in the creation of emotion. That's their job. You cannot jump it, it's part of the process.

At certain levels, they interact and then they create hormones which they say, "makes you happy" or "this is responsible for this or that." Because, it's part of the step going down, creates the fields which, in the brain of the man, is needed. But you have to understand, hormones as I said before, in some of the teaching, this is why we can't produce some of the hormones outside, Because it has part of the structure of hormone, if you had understood what I just said, is connected to emotion, which is a field wise. (2:24) If you manage to create the field of the part of the brain, as emotion in a machine, you can create any hormone. If you talk to the people who are expert in these things, they say, "Some of the hormones is produced in ?? that."

Because, the... if you remember a couple of weeks ago, when I showed the circles, that the emotion creates the fields, it's not in the machine, machine doesn't carry the emotion. So, you cannot produce it. If we can create field strength of the emotion, our machine will produce the hormones. And, this is what at the present science we don't understand. And once we go through this process of understanding this, then you understand how hormones are connected to emotion, because emotion... and then, when the emotion feeds these fields, the hormone picks it up, so it's connected, this hormone connected to that emotion, because that strength field allows this condition of the fields to be created, go forwards. Without it doesn't exist.

R: Okay Mr. Keshe we're only...

K- That's ?? of an elephant... Pardon?

R: Go ahead, sorry.

K- What do you mean go ahead?

R: Continue your egg and elephant story there.

K- Yeah, I said you cannot put the egg of an elephant into another animal and expect it to grow. Because it doesn't feel, it doesn't create the emotion and a field of the womb of the elephant inside that animal.

R: Okay Mr. Keshe, we have like two minutes left before you have to go. (2:26) Can you entertain Gail's question, who I'd like to tie in with Claudia here. Gail's interested in the Nitrogen 14 and the storage of C12 and C14 energy related to DNA and RNA. And how do we use Isotopes related to Hormones to transmute in the Universe? What role does the Nitrogen 14 play?

K- We don't ... The Nitrogen 14 plays its role in the matter state of physicality of the man in this condition...

R: You mentioned that it's in every cell of the body, which is part of her question.

K- Every cell of the body of the man. You cannot create a cell if you don't have a Nitrogen. It's impossibility. Amino Acid is Mr. COHN, Nitrogen is part of it. The storage and conversion is at the same time, in the same structure.

R: Now can you clarify that in the 540th Knowledge Seekers Workshop, the last one, we heard that Nitrogen 14 acts like the liver in storing the C12 and C14 energy? Or did you mean that it, the C12 and C14 energy is stored in the liver? Like literally?

K- It's a converter, it's a converter. The Carbon 14 comes from one side of the Universal energy, the Carbon. To connect us to. And the Carbon 12 comes from our physical part of the matter state of this planet. And, in that process, what can be changed from 14 to 12, and what 14 creates, which fits into residual of the field of the Carbon 14 to attract out, work. So. When we talk about the Carbon 14 to be the liver, at the same time it's a transformer. (2:28) It transfers energy, and this energy change in, from energy of the Plasma of the 14 to 12, and 12 to 14, creates a dynamic motion which runs the, what we call, the Amino Acid.

And it's the same in different creation, we need that potential difference in field strength to create the dynamic structure within it. And that's the purpose of the Nitrogen, we call it the liver. It's all the same. It's one way storer, and another the same. To store you have to attract. So, it creates that transformer condition as well. When you go through a liver, at certain points all the, let's say, Vitamin C is not stored everywhere. It's stored where the liver creates the condition Magnetic fields of the, what you call, Vitamin C. And then, it has another process within the same structure, which transfers it and transforms that Vitamin C to Vitamin A, using fields in limbs. It does dual job, it's not just the liver, but

it's a transformer at the same time, in both directions. And that goes through the strength field difference between 14 and 12.

And part of this, in the body of the man, is lubricated, made easy through Omega 3. That's why Omega 3 is so important in the operation of the body of the man. It helps Nitrogen to keep the Amino Acid structure going, and the amount it gives, it allows it to survive. And this is one of the reasons, what you call it, Omega 3 we call it, because again it's a Hydrogen based element connected to, what we call, (2:30) Universal Energy, which is so important in life of the man, and any deviation from it can create all sorts of problems. It's a lubricant, it's a catalyzer for the operation of conversion of the Carbon 12 and Carbon 14 in the Nitrogen, or in the structure of the life on this planet.

Thank you very much for today. And, sorry about this, I have to stop. And we'll hopefully gather together again next week and see what we can learn more. Thank you very much Rick.
