

542nd Knowledge Seekers Workshop June 13, 2024

(Quick Index 20 pp, Introduction, Topic Index , Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

M fields & M Rays separate existence within plasma; Like brain has different sections for different functions; STM is Fundamental Plasma (FP) - everything inside it; All types of brains work same - gaseous; Converts emotion into physicality (P); Transmutation like dream - smell & taste food; All plasmas same strength; Don't need P to enjoy U All contained in plasma; Earth only few emotions of total in U; Cannot replicate Earth - make new plasma; Break magnet into pieces - all have same field strength - STM piece of STC; STM carries knowledge of Creator; Potential to be abusive; Behavior not from emotions - interaction P with STM; In Space feel other's needs; Measure emotions - field strength of Soul; No superiority; MaGrav positioning - find balance in community; How to move plasma; Why planets rotate without motors - own condition to rotate; Creator rotates; Mass never changes - connects STM with Creator; Weight manifestation on Earth; Perpetual motion system - show in Iran; Gravitational and power system - power within fields of gravity - creates own emotion & motion; No control system - use emotion & thought - Soul of system; Replicates life of Creator - moves Soul of an entity - most advanced T; T can touch strength of STC; Need World peace to share rest of T - or destroy oneself and U; Every being capable to understand; Environment of womb; Rapid advancement of Mankind; Children of Mitra; Take thousands of years to understand today; KS shares experience working with fields; STM fixed - STP dynamic; Go deeper in knowledge practice easier; Rotation of STM inside different rotation STP; Sufis; rebuild brain minutes; Recreate from skull; Children of Soul; Children with Space Beings; Animals give body to others migration; Giraffe sleep time; Few seconds sleep; Creation of current; Palestinians balance fields - blood money; Far Right Europe Ukraine; Souls in toxic place; Brazil transcriptions summaries; Meditation with body - go direct with Soul; Pandora's Box; Lupus; Flying Carpet.

Topic Index

M fields & M Rays (separate existence) within plasma; Like brain has different sections for different functions; Part of brain continuous regeneration of cells of body; STM is the Fundamental Plasma (FP); Rays in fields responsible for dynamism - positioning of plasmas within FP - they create its motion - direction - what to absorb - reject; STM creates emotion - confirmed in P - laughter; Doesn't matter what type of brain structure - jelly type - gaseous - converts emotion into P; Doesn't matter where transmute to - will carry emotions - can manifest; Transmutation is just like when you dream - dream of your grandma - remember her jokes - smell and taste of food - plasma converts it for you to experience; All plasmas have same strength - can laugh cry etc; It's same with other creatures in U; We do not need to exist in P to enjoy life in U - all is contained in plasma; Field strength of Earth only allow few emotions and senses - much more at other fields strengths in U; Field strengths & emotions satisfy life conversion on this planet; Another planet is different - other things to enjoy; Cannot create what we have here on another planet; Embedded - active within Soul of FP; Can break plasma apart into smaller pieces

- create amalgamations - still have same field strength of original plasma inside; Test by breaking solid magnet into pieces - each piece same plasmatic field strength; But matter state weight of attraction can be different - different sizes; M fields of STM - another piece of Soul of Creator (STC) - access to all fields of STC; Means 'I made man in the image of Myself' - STM carries all information - knowledge of Creator; Man himself decides which part to take from; Each Soul contains true Essence - whether infant - road sweeper - King - all have same attributes - we decide which ones to develop more; Kings & leaders encourage to be abusive - ruthless; A just King lives attributes of Creator; You decide what knowledge to tap into - have potential to be abusive; But Soul lives in own D does not change - tap into different fields; Can't tell difference in Souls from outside planet - see light; (Take from fields to operate body); Later mix fields in different ways - get abusive & other kinds of behavior; Behavior not from emotions - from interaction of physicality and field interactions within STM; Recognize different field strengths exists within plasma & STM; No D of physicality in plasma; In Space interact as plasmas determine what field strength emanates from each plasma - what needs are; Feel each other's needs; In future measure emotions - see where in brain operate; Measure field strength of Soul - which fields create & carry - through essence of emotions; Need to communicate with other plasmas about needs; Felt Soul of ATM machine - tested it; A mechanical system has Soul - all objects in U have Soul even manmade ones; Open a line of communication with all physical structures; Knew horse - not time to take life - his Soul has a mission; We have to learn how to communicate with objects; He allows - people to show their own weaknesses and problems; Recognition of the emotion irrespective of TPP and the entity - become part of Man's nature; As you feel their emotion - they also feel yours; There is no superiority; Use your emotion to be somewhere in transmutation; (Wait till other Soul wants to meet); Have to connect to right field strength of mother; In Space you need to connect to the fields and understand them - feel their existence - know if it is going to take or give to you; Take your place through MaGrav positioning - find balance within the community; When Man understand this - he'll understand how to move the plasma; No scientist has ever explain how Earth rotates scientifically; Man need motors to create rotation - not in U; Not understood mechanism of motion in World of Creation; At certain strength motor stops - reactor still rotates; Sun is plasma - no motor; Plasma has own condition to rotate; Not understood essence of field strength within plasma - creates emotion - which is the motion; Does the Creator rotate the same way a plasma rotates; Related to Mass and Weight; Mass never changes - connects STM with Creator; Weight is manifestation of that plasma on Earth - shape of man - fish - whatever; Manifestation of P - same as weight of man; Mass never changes - essence of Soul - like piece of magnet - cut from STC - never changes in field strength - attributes - beauty; Have to find out how to create rotation; Make perpetual motion system to produce energy; Show this T in Iran - first time - how perpetual motion created in U; Can create lift - weightlessness according TPP - creates as much energy as possible; First system KF called - gravitational and power system; Power sits within the gravity - within fields - creates its own emotion and motion; KF developing system with no control system - controlled by the emotion - move craft with thoughts - interact with 'Soul of system'; Work with Soul and emotion - not Gans's; Principle of rotation and life in U - replicates life of Creator; Create system that attracts fields of Creator - moves Soul of an entity; Most advanced technologies - ever imagine existed - bring all fields of

Creation to create Soul of that system; It's a replication of STC - otherwise it could not exist; Have to understand Universal motion - T of the Creation; Reason Man doesn't understand - he created Prophets for himself - (lost his power to abusers); Technological advancement so great - can touch strength of STC; Will feel the beauty within - don't need to die to do it; No "Day of Judgment" - 'day of maturity'; This T now available in KF; KS have to understand - then transfer to governments - but need to have World peace; 20 years ago this would only be magic - we taught man to understand about fields & Gans's; When we get World Peace - easy for man to learn rest of T; World leaders have to agree to peace - can be no more war; If T falls into wrong hands - no life left on this planet and U - man is too greedy - wants everything; Belgium King begged for T - then did all crooked things; It's T of Creation - not the KF; We are teachers - not 'Messengers'; When understand and replicate - don't need systems; Needs maturity of understanding - process of Creation; Every man and animal capable to understand - and in U; Energy of Creator - manifests as man at TPP - depends on environmental conditions; Environment of womb - determines color of child; Structure of womb same for all races; It depends on what field strength - put into womb; In different positions and conditions - humans manifest differently - but in essence - are the same; Color depends on conditions of environment to survive; Womb of white woman give black child - ancestral line - sperm changes field strength; Doesn't go by chromosomes, genes - don't understand T of Creation; Will show how fields of womb work with T; Engaged in large scale distribution of knowledge and T - mankind will leap rapidly in coming months and years; Today's teaching contains secrets of Creation - freedom of your Soul - attain everlasting life; Test it - become black child in womb of white woman - do it without sperm and egg - transfer energy of Soul - same way we create matter; How Children of Mitra will be born - independent of emotion of P - have awareness and control - understand field instruction of U - Unicose - Creator; Right now we are living in glorious days on this planet - presence of 'Children of Mitra'; Create Children of the Soul; Technology of Creation is right of every living thing in U; Man so arrogant thinks he is exclusivity of Creator - is really further from Him; Principle of conversion from field strength of Ray to physical matter - this is transmutation; Today's teaching short - deep - take thousands of years to unravel; If understand you have found a way to your Creator - even today.

Part 2

How to pay for Isfahan conference; Things are moving positively - most successful conferences; Show 'Gravitational and Energy' system in full working condition; The moment we show in public - will change things; Hope KS can be there to witness - been loyal with us every step of the way - pleasure to share with many governments; Good if KS can come to Iran - celebrate achievement - process for peace with new T; KS shares experience with working with fields within himself - uses intention to move fields; Felt body split in two - new heartbeat under liver; Everybody feels this in different ways - depends on condition of body - how you position it; STM is in a fixed position - STP is dynamic - can move around; STP not necessarily in heart - can be in another part of body; Have to control fields; Create different conditions for Soul to expand into; You decide how you want to use it - interact with it; KF uses a technique; Our people don't

understand; Create strength fields for Soul; Have not understood this part of T - for creation of rotation - expand & move strength of Soul; Controlling STP is biggest hurdles - have to interact with it - can be at throat, lungs, heart, stomach; Try harder to go deeper in knowledge - you decide the pattern; Speed of rotation of STM - not physical rotation - some relation - Sufi Whirling Dervishes - knew only a little; Rotation between brain lobes - different than rotation of STM inside center; Whirling Dervishes can create a change in structure of Soul - emotion and everything else; M fields around STM - like Tokomak; Speed of rotation of Soul has different purposes; Understand how you create it - unlock universal languages; Try to go deeper and understand the principles instead of just doing something - when you understand the principle - practice becomes easy; This is part of the way; He rebuilt Naomi's brain over months; Can build a brain of any condition within hours; I can make body move without any brain inside - field interactions still there; Shape of skull decides emotions, interactions, features; Through skull can show true man - how he physically looked - continue to carry specific M field strengths; Skull of man dictates position of Soul; Chinese skull dictates position of their eyes - interacts with Soul creates certain behaviors - features; Can understand archeology through skull; Same as creating a Soul in womb of mother; Take away pain in body using energy - but Souls still have to balance fields - are you causing or preventing (through emotions); KF scientists have not understood how headphones & systems work - big problem - can't go ahead; Can only go as fast as people understand; Right now can use system to create perfect P; Soul can feed P - but then dictate STP's performance (behavior); This would be problem for KF; Can show flight system today - but becomes a magic; T has to be understood - future generations will keep the understanding of totality; Showed lady walking without brain 2011 - created the fields body behaved as if brain inside; Flight sessions July to September - most pleasurable time of life; Expand Souls rapidly - use very high fields - make KS ready for conferences; Can already show flight - has to be understood; Systems are shortcut to transmutation - train Soul - it will be done; Plasma Cars - not really mini UFOs - miniature systems - localized; Our fish go straight up not diagonal; We'll know when Soul is ready for transmutation; Children of Soul - shorter time in womb - perfect in every way - Soul matures at conception; If mother has an accident - can maintain Soul; When man falls in love in Space - children can decide if want P; Man is a lover - emotion within STM - because of love of Mitra; Find field strength of love - benefit whole of Creation; He can create expansion for KS to feel; Create new person out of everyone in session - have a lot of detachment - understanding Creation - transmute to conferences; Balance fields when transfer to specific environment - how to define environment; Environment of planet decides color, shape, size of man; STM interacts with skull and Ca - twists and turns of brain; Have to consider all Souls of living things on planet interact with you - collective Soul; Souls interact in social structure like animals - decide numbers that can survive - 'Soul of environment'; Souls of Salmon give lives for other species to live in another part of planet - they know; Man's concept says - Christ gave his Soul for humanity - fish already do this; There is a collective work and awareness on planet - not sentimental - each agrees; Comes back years later to complete teaching - not spoon feed; Understanding that brings maturity; Only few minutes of sleep spent dreaming - don't know where so goes - unconscious; Giraffe sleeps 30 minutes a day in 20 - 1.5 minute segments; Lion's Soul aware of gap to hunt; We don't need 8 hours sleep - recuperate within seconds - Soul instantaneously

recovers whole body; Understanding process of Creation; Soul witness to work of U; Is reading fantasy book - type of transmutation - depends how it is done; Once learn Transmutation - achieve a lot - tap Knowledge of U; Need this Knowledge when arrive at destination; Knowledge of Soul of that planet - transferred to you - like birth in a womb; Create motion without motors - through interaction of fields; Creation of current - creates that flow; Re-translate 'current' - direction of motion of fields - not condition of speed & position; Why some Neutron Stars rotate so fast - some planetary so slow; Knowledge confirmed in Iran 2008 - KS have to understand - unravel secrets of Creation - transmutation become easy; Governments won't be able to govern you - with new systems - governed through STM - function of KF; Use Love policy instead of Gun policy; Far Right winning in European Parliament - situation like WWII - happened to the Jews - we don't need to get to that point; Use Ukraine situation as excuse to control through bullying - not national consensus; Soul of Palestine to be healed - more complicated - getting back what they did in Iranian Revolution - killing Iranians; Could have been resolved in 1970s - leaders made decisions; Warrant for the Israeli Prime Minister - what about supplier of bombs - Biden; Nations pay for their behavior - comes through a 'school of thoughts'; Souls will balance things; Will US remain as one country - letter from higher ranking people; KF part of political scene as advisors; China spends to put special markings on streets to help blind people - West is backward in comparison; Soul of Nation should be at peace - creates liberation; Expand your Soul without going anywhere - have contact with other Souls - not Transmutation - when you physically go somewhere; Daydreaming; Souls that work in toxic places can take it on - depends how receive and perceive things; KS who deliberately created trouble at KF; More about Palestine - took blood money - go through balancing; In the end it's Divine Justice - a lot of things mixed up together; Thousand Military vehicles moving in Upper Austria - exercises or to Ukraine; Use your Soul & emotion with Gans to wish for peace; Appreciation for teams in Linz and Brazil - KS benefiting from transcripts and summaries - revealing so much more than thought - great resource of knowledge for everyone; Meditation has to do with physical body - easier to go through Soul - work with fields and energies within body; Save time go directly to Soul; Meditation is 'back door' through P; It's not lower fields - might be stronger field; Every time have to open that 'Pandora's box' - find own key; Haven't yet shown secret how to reach Soul - mankind not ready - creation of motion of Soul; 'static-dynamic' system - next step is 'dynamic-dynamic' system; Showed it but didn't see; All have capability to expand Soul instantaneously - don't know technique; I'll change course of humanity in reaching Soul - soon; KS shares method - uses intention feel fields; T does not eliminate toxins from body - it changes fields into useable energy for body - still detect on instruments; Plants do this with Nitrogen - natural process; Tested it in Fukushima; Will still look same when come back from transmutation; Explain Lupus disease in women - 'butterfly' on face - get attention - ADHD; Flight demonstration in Iran not recorded only for attendees; Iranian government & Military decide what can be shown publicly; Reactor on 'flying carpet'; Reignite bathhouse with candle in Iran; STM works like reactor - but very long twisted way.

Introduction to 542 KSW - Fields Have Soul - U Uses Brain - STM is Piece of STC - Machines Alive - Perpetual Rotation - Behavior not from Emotion - Fields not Meditation - Children of Mitra Here

This workshop goes into more detail about the Fundamental Plasma (FP), which Mr. Keshe has been teaching us recently. We know that our Soul of the Man (STM) is a FP that is directly connected to the Creator. Today he said we can think of all the magnetic (M) fields and M Rays inside the FP, as each one having its own separate existence within the plasma. It's not just a 'mish mash' of everything and then we call it a plasma. Each of these fields has a function, and then he compared it to how the brain works. Each little section or area in the brain has its own function. The scientists have mapped the brain out and can tell us which point controls the arms, legs, and all the different parts of the body, as well as the emotions and other functions. This analogy helps us to think of the plasma as something alive, conscious, intelligent, and actually, it does everything for us. In a way, we are kind of just a witness to it. And now we are learning to become aware of it and have control over ourselves. So M fields are not just represented by lines drawn on a paper coming out of a magnet. They are the essence of life itself and we are learning how they specifically function so that we can control and manipulate the plasma. And as he said recently, we are M fields in transition. And this workshop brings us more intimate with our own creation.

As the brain is the physical controller of the body that converts the feelings and wishes of the STM into manifestation in the physical dimension (D), it's very important, but only to our physical existence. I understood him to say that all types of brains in the Universe (U) work the same way even if they are in the gaseous condition. This gives us a lot to think about. How can a brain be in a gas state? Well we could think of the gaseous planets like Jupiter and that it has a brain. If they all work the same, then that would mean the pattern for converting the wishes and feelings of a Soul into the physicality (P) is the same as what we are doing within ourselves. Therefore, we now have the method of how to interact with other entities in the U that we will come in contact with. I also understood that for example, the M field strength that we experience as sadness, the other entities will also experience as sadness. But I am not totally clear on this. It makes sense, because it allows every being in the U to be able to relate to each other. Perhaps he is talking about the essence of the M field strength for sadness, and not the environmental conditions for manifesting itself, which will be different all over the U depending on the environment. In other words the M field strength we feel as sadness they will also feel as sadness, but their kind of 'sadness' according to their environment.

When there is too much information to handle all at once it starts getting confusing. So let's simplify. There is the FP of the Creator and all of the Creation is a little piece of that FP. We all have our own FP and this FP is made up of fields and rays, all of which have the same characteristics in all of Creation. The essence of all our fields are the same no matter who we are or where we are from. All the fields keep their original characteristic of where they came from. Basically, everything is made out of the same Fields. This is what it means we are made in the image of the Creator and that we are all one. The difference comes in when we manifest P according to the interactions of the

environmental fields and other things, and how we use our individual fields. But in essence they are all the same. We can prove this to ourselves if we break a solid magnet into many pieces and no matter what size they are, they all have the same fundamental field strength. When we play with magnets we feel that pull between the magnets, which is the magnetic field. That field strength is always the same whether it is tiny or a huge entity. And if you place a tiny magnet on a table full of big magnets, and move that tiny one amongst them, they all will have to change position. In that way they are all the same. But in the matter state the size of the magnet makes a difference due to the weight and the attraction. This was taught when we spoke about the Mass and Weight many times before. Another proof of this is when you drop a huge stone and a tiny stick, they both fall at the same speed to the Earth. This knowledge is a big relief for all of us on planet Earth where we are born to be slaves and our differences are constantly being reinforced. This knowledge means that nobody can enslave us if we don't let them, because all the field strengths are the same.

Another important fact for us to understand is that we don't need to manifest physicality to live in the U. We can remain in the plasmatic state of the Soul and still enjoy the matter state experience. We do this when we dream at night. First we transmute into our Soul and leave the body but remain connected to it. When we dream of our grandmother and experience the taste and smell of her cooking or remember her jokes we don't convert that plasma into P to experience it. We remain in the plasma state. Therefore, we can live in the U as a plasma without having to become a physicality. And all the attributes of physicality are contained within the structure of the plasma. And we relive our past experience just through our thinking, we don't re-manifest the P of it.

There are different 'schools of thought' about the causes of behavior. In the East they tend towards believing that everything is predetermined, and in the West we think we have a 'free will' to decide to behave in a good way or a bad way, and based on our feelings we think we can just decide to behave in a certain way. It's much more complicated than this, but it's a good place to start. Today Mr. Keshe said that behavior does not come from the emotions, it comes from interaction of the physical dimension, and the interaction of the fields within the STM. I understand the physical D to be how the society we live in is setup to exist in P, including our family and friends. It is setup with a certain mentality of how to behave.

Regardless of how the persons behave the Soul remains perfect. Like that cut piece of magnet, the Soul itself is a piece of the Soul of the Creator (STC) and it is perfect. Remember he said, we have the same field strength, attributes, and beauty of the STC, from which we came. He gave the example of, if we are born in the society of Kings then we are 'encouraged' or trained to be abusive and ruthless to rule the others. Nevertheless, the Soul remains perfect in its attributes. It's what we decide to identify with and focus our awareness on becoming that creates that behavior. However, this is in the physical D and doesn't effect the essence of our Soul. This is a scientific way of describing how the religions try to train us to live a good life. It's not just I wake up one day and I decide I am going to be a good person. Well, yes it can be like that. But it really depends on how we interact with the physical D we live in, and how we connect to our Soul in living that

way. It happens sometimes that the ones who are born to be a King have such a strong Soul that they choose to interact with their physical D in a different way. They decide they don't want to be ruthless and they leave their royalty behind. But even a person who trains themselves in a path of knowledge like science can still be ruthless, if they encourage those kind of interactions with their Soul. If you have ever lived with alcoholics you believe that they can never change their behavior. Sometimes the suffering becomes so great that you can't understand why they behave that way. And then suddenly like a miracle they change their life. Now we know how they changed. The interaction of their Soul with their physical D changed, and their Soul was never damaged by years of bad behavior. Nevertheless, they still have to balance all the fields they created during that time. I think the point he is trying to make is that the Soul itself is perfect and remains perfect, no matter how much we mix the fields up with physicality. In the end it's how we decide to live and we can change that at any time by understanding the Knowledge of Creation and connecting to our Soul.

The next big challenge for us is to accept that every single object in the U has a Soul even manmade machines. This reminds me of watching the Disney film as a kid called the "Love Bug" it was a Volkswagen car that could talk to its owner and even make the car do things to protect him, if my memory is correct. Mr. Keshe explained how he communicates with machines like the ATM. He said, he knew it was going to take his credit card, and he continually tests this with machines. And in the future we have to learn how to do this ourselves. Maybe we can start by just even thinking the object we are holding has a consciousness, or a soul. What level of soul is it? This will have to be taught in the future. Even thinking about the computer we are using right now, is it aware and communicating with our Soul?

He brought up again the understanding, that the Earth and Sun and all the celestial objects in the U don't use motors to rotate. When we understand more about the plasma we'll understand how it rotates and be able to create perpetual motion machines that will in fact generate billions of Watts of electricity, or what we like to call 'free energy.' He didn't go into any details of how it works. He just wants us to think about it. When we try to feel the interactions of the STM and STP don't we imagine that they rotate around each other in an Infinity Loop? If we look at some of the drawings on the KF website they show how inside the plasma the fields rotate in different directions. This must be part of it and also that they rotate in relation to other plasmas of the planet around them. But the bigger thing is that creation of emotion and motion go together. In the KF patents they called their machine a 'gravitational and power system.' He said it was because the power sits within the gravity, and within the fields that create their own emotion and motion. What is very interesting is that the reactors where KS used motors to get them going, when they reached a point of balance then the motors stopped but the reactor balls kept spinning. And then does the STC rotate like a Sufi dancer? In general, he said, the Sufis are using the P to connect to the Creator, but they don't understand about the plasma. Nevertheless, they are connecting to the Soul in some ways and somehow they can create a change in the structure of the Soul, emotion, and everything else. But I couldn't understand the depth of what he was trying to tell us.

The problems we are running into as Mr. Keshe advances the T is the belief system we have created for ourselves to substitute for the true knowledge. In other words, humanity needed to believe in something and created a false Ego of pretending to know something. The false sense of security created an 'arrogance of his ignorance,' and his refusal to allow new thinking to enter into peoples minds. Instead of understanding Creation ourselves we created Prophets and believed in them, and then books were written and it was said that they are the absolute words of God and no one can dispute them. So even if the Soul of the Prophet comes back and tries to explain the truth they won't believe it. Even open minded scientists are afraid of the religious leaders and what they can do to them, so they secretly do their research and don't make it public. Then how will the KF say that we have created a system that replicates the Soul of the Creator, and that we can experience the beauty of the Creator without having to wait to die, and that the system itself has a Soul? The society the way it is now won't be able to accept it. We have technologies beyond our imagination that are within our grasp, but we have this problem in the West, which controls the opinions in the worldwide Media, with our limited concepts about God and Creation. This is why he has been teaching publicly for so many years. Otherwise, we would not have been able even to understand today's teaching. Even that we can understand today's teaching shows that the elevation of the STM is going on.

Mr. Keshe ended the first part in a very positive way by saying, if man only knew what glorious days he is living in right now on this planet, with the presence of the 'Children of Mitra,' then he would understand that the time of peace has come for his physical condition. The way I think of this is, that the Children of Mitra have already been created in the Soul D and are with us now even though we can't see them. They don't have to live in the physical D if they don't want to. If you remember in the original Star Trek series sometimes they would land on a planet that appeared to be uninhabited, but then suddenly someone would appear to them. Maybe it will be like that. And when humanity learns how to create Children of the Soul they too will have the option to take P if they want to. Then we'll understand how severe the punishment will be for bad behavior. The divine beings won't appear in our physical dimension, and the pain of separation from them will be too great. And this is the way it was around a thousand years ago in the Northern Buddhist Kingdoms of India. They were ruled by Sage Kings, and separation was the most painful punishment. These Kingdoms disappeared and there is hardly any trace of them. It's hard for us to understand because we were born into a world where divine love is very rare. But we are living in such an amazing time even though it may not seem that way. We could try to connect with these beings through our Soul and receive more help. It's also interesting that about a hundred years ago Sri Aurobindo foretold that if man was unable to evolve into a higher consciousness then a new species would be born on Earth and were what he called, 'Supra-mental Beings,' and maybe these are the Children of Mitra, and the Children of the Soul will be the Man's evolution of himself.

It is very nice when KS share their experience working with the plasma fields inside the body. This KS said he could feel the movement of the fields and he could pull energy into them and he did it with his intention and imagination, which creates the feeling and then you believe you are experiencing it. I guess this is the same way we create our body. Mr.

Keshe responded that everyone will feel it in a different way depending on the condition of the body and how they position the (fields). But the way he was talking about it was that the STM and the STP are like the 2 reactors he used to demonstrate flight in Iran. In this case the STM is the fixed reactor because it is encaged in the center of the brain, and the STP is a dynamic reactor that can move around where it wants. We can think about it as a moveable Chakra. The STP is a plasma made from all the cells and parts of the body contributing their energy to it and was usually thought to be in the heart area. Now we understand that it can be moved anywhere in relation to the STM in the center. By being able to move the STP around we will create different fields and conditions for the body. And why couldn't the same reactors be used for flight of the body? This is just the beginning stage. When the two plasma find balance with each other and get "turned on" is when the emotion, or new plasma is formed in-between the two. Then I believe we'll have access to the power of the Soul and can transmute, or even heal our bodies. He said there is a technique that they use in the Flight sessions, but the KS haven't understood it yet. As usual we have to keep working on ourselves until we are mature enough to handle it. And this was the advice he gave to the KS, to go deeper in his understanding of the principle of the knowledge. It's not just doing it, we also have to understand how it works. And this goes back to the Ethos of Mitra and correct living. Then the next step is for the KS to understand and then they can transfer it to governments. But they first have to agree to world peace, and then the rest of the knowledge will be easy for us to learn. With this T there cannot be anymore war on this planet, otherwise we'll end up destroying all of humanity, and it will spread over into the U. Because as we learned in this workshop we are all connected to each other. So the greed of the man for more power has to be transformed. This is the process we are in right now, and why the T cannot be just given out to anybody. Even though Mr. Keshe speaks like we can, he is responsible for what happens to this planet.

The subject of Meditation for Western people is a bit of a touchy subject and Mr. Keshe handled it in a very nice way. What takes people 1 to 3 hours to reach in meditation can be done using the systems in a very short time, as was experienced by many people who attended the Monthly Flight sessions and said they practice meditation regularly and some even claimed to be experts at it. The way I understand it, is that in the Flight sessions, as soon as people can expand their Soul over the STP they can go 'straight to the fields' and work with them for transmutation or whatever they want to achieve. The whole key is expansion of the Soul, this is the doorway into the life of the Soul. Meditation on the other hands uses the physical body to calm it down, and tries to bring the internal energy into balance, and whatever else is needed for the Soul to be released like what happens in the dream state. Remember the dream state is when the M fields created by the blood around the brain reduce enough that it can go out and travel the U. In a way, we are entering the Soul through the 'back door.' Whereas, in the future KF will teach the technique to expand the Soul and immediately have access to it. However, he feels humanity is not yet ready for this. The secret to it has not yet been shown.

All this sounds relatively easy to understand and straight forward. Then Mr. Keshe threw in a "Catch22" when he said, each time you have to open the "Pandora's Box" and you have to find the 'Key' or method that works for you. What is a Pandora's Box? It means

when unexpected things arise and creates new problems. But maybe in this case it is really the old problems that we have been living in denial of. Maybe we have to face the childhood wounds, how we were conditioned to live in the world, selling our Soul to our friends and family for the false love and false sense of security in the physical D, the lies we have built around our life to uphold our identity, and things like this. These are all hidden in the background that keep us from truly Thinking, Speaking, and Acting Good. There is no 'short-cut' to facing ourselves and growing up. Forgive me for bringing this up and I know this is very hard for a lot of people to hear. When Mr. Keshe says, 'it requires a lot of understanding.' Maybe this is what he is referring to.

He also said, it needs a lot of understanding of how meditation works to bring you to that position. When I ask people what meditation is or why they do it, the only answer they can give is, 'it feels good.' This is the same answer you get if you ask a Christian what his religion is about and he says he wants to go to Heaven and stay away from Hell. Where does meditation come from? It comes from the Aryans and was written about in the Vedas and adopted by the Dravidians and became part of the practices of Hinduism. Buddha was a Warrior and reformed Hinduism by creating Buddhism. Buddhism died out in India and many centuries later the Russian Occultist named Madame Blavatski brought Buddhism back into mainstream society. One of the main sources of mediation is attributed to Buddhism, but in the writings of the Buddha he only briefly mentioned it in a few lines, and it was recommended for those suffering from neurosis. Western people get bored to read Buddha's teaching because he only talks about morality and living a correct life. And to Western people it sounds like Christianity, which they want to escape from. So the writers of spiritual books only use Buddha's name and then write other things. I am sorry to inform you this, but the people who write the books and sell the workshops don't really know the true essence of meditation, and they have created a lot of terminology to cover their ignorance.

The truth is the mediation practices that householders are doing are meant for monks and people who have detached from the world. It's impossible to be achieved by those who are attached to the world. The procedure developed known as Zen Meditation is to keep the body still to the point of going beyond the body. But where do you go? They say, you go to your Buddha Nature, but it depends on who is writing the books. Mr. Keshe has explained that you enter the Soul through the 'backdoor' of the physicality. If you enter this dimension but don't have the knowledge, it will just be a 'beautiful meditation experience.' But if you understand the Soul and know how to work with the fields it will open up a new dimension of life.

If you are going to use meditation to reach the Soul you should be aware of some of the pitfalls. I have listened to people talk about there 'most wonderful' experiences after spending a week retreat only meditating. Then I understood that they were in a trance and not meditation. For householders who do these kind of meditations their own mind will attack them heavily, because for the most part they are living a false life. To escape, their mind creates a concentrated thought form for them to be in. They think they are in the 'thoughtless state' they read about because the mind feels quiet. There is also another state of what I call, 'unconscious thinking.' Both of these states are not the meditation. There is

a way you can test if you are in a trance or not. All you have to do is to sincerely ask yourself, 'who am I.' Or 'who is feeling this.' And it will break the trance, but your Ego will be very unhappy, because then you will have all of your 'stuff' in front of you. The goal of the meditation is to enter the state of Samadhi. This means you transcend the body. It's just like when you sleep and are unaware of your body. This happens sometimes during meditation when you disappear and suddenly an hour goes by, but you were unconscious of it. The other type of Samadhi is to be fully aware that you are asleep. And then if you have the knowledge you can expand the Soul to achieve what you want. I am assuming that this is what Mr. Keshe meant when he said, you achieve the same goal as you do in meditation. This is where the two methods merge together. I went through all of this because Mr. Keshe said, that if we have the understanding about how meditation works it can help us to transmute.

He said, I will change the course of humanity, in reaching his Soul in the next few months, and then you'll understand.

Other Topics:

In Space we have to learn how to communicate through the Soul and our feelings because many entities don't take P. We have to understand how to give and receive fields and this is part of MaGrav positioning. We'll find out how to live in a community of plasmas and some will be animate, inanimate, and others only in D of fields;

KF has developed a system that is controlled through emotion and thoughts and interacts with Soul of System;

Today's teaching contains the secret of Creation try to unravel it; It will take thousands of years;

We only need a few seconds sleep

Thanks for listening.

Quick Index

(Today's teaching is a continuation of what we discussed last week about the magnetic (M) fields, and magnetic rays within the plasma itself. Up to now we considered the brain functions of the man to be divided into different sections in the brain. One section is responsible for decision making, another for the physicality (P), and all the other things. And then there is a section that creates movement in the fingers, heart, and all the rest of it. And then there is another part of the system that is responsible to create the continuous regeneration of the cells. All these (functions) exist within the plasma, which is the Fundamental Plasma (FP) of the Soul of the Man (STM), or the Central Energy or whatever you want to call it).

(There are rays in the fields that are responsible for the dynamism, and positioning of certain plasmas within the structure of the FP. (They have to create) its motion, and the direction of its motion, and what to absorb, or reject, and which fields to take from the environment. (The ?? fields get converted into the part of the brain that is responsible for moving the hands, or for feeding the body, or getting rid of what it doesn't need in every shape or form, or for creating the emotion of laughter). (?? For example, if the fields of the emotion of laughter get created in the plasma as a direction of the STM, ?? it will take confirmation of its existence on the matter state side as (?? showing laughter)). (?? The same thing occurs whether it's in the brain of a man, or is a jelly type (type ?? entity), or is in a gaseous state structure). (It will convert that emotion into the physical dimension (D). If for example, it has the emotion of happiness, then that will be represented in its structure, ?? and can absorb (fields), and can identify the happiness and confirm it in the physical dimension)). (It's very difficult to understand what is being said here, but it seems like the fields and rays are themselves conscious and make decisions, and when emotions get created in the STM and STP the fields carry them out to be seen in the body).

(So that ray which is at the strength of happiness in the plasma of the STM, will convert into the brain and change into the physicality by showing happiness through the sound of laughter, or by changing the facial features. If it's another emotion it may be tears, crying, or maybe rolling on the ground from the joy and laughter. (It doesn't matter where you go through transmutation you will still carry the characteristics (?? of the emotions with you. When you arrive the (emotions can manifest themselves, as part of the structure of the control)).

(The FP is made up of a combination of fields and rays and they have the same characteristics as what we see created in the brain of the man through the body. (?? When the body gets converted in the transmutation it knows what to do (and you experience the same things). Transmutation is just like when you dream, (?? but it doesn't convert it to physicality (P). (For example, if you dream of your grandma. You remember her jokes, and the smell and taste of the food she feeds you. The plasma converts it to the matter state for you to feel and taste. And you say I dreamt of grandma last night and I remember the taste and smell of the food she served me. (The rays of the plasma converted it into the D of physicality (for you to experience))).

(This is an example of how all the plasmas have the same strength. It doesn't matter if it becomes the strength of your physical reaction to emotion such as laughter by tickling, or giggling, or shouting and crying from joy. (It's the same with another creature from another part of Universe (U), ?? they will feel the same joy (if they experience the same field strength. And it will mean the same to them)).

(This shows us that we do not need to exist in P to enjoy life in the U, because we experience as an attribute of P such as sight, sound, and smell, (and it is all contained) with the structure of the plasma. (The conditions and field strength of the Earth have only allowed the creation of very few emotions and senses. There are much more senses and emotions at other fields strengths (in the U) then what is created on Earth).

(We have the (field strengths and emotions) to satisfy the life conversion on this planet. On another planet they don't have cows to eat, or grass to lie on, or sunrises and sunsets to enjoy while sitting on the beach, because there is no water. But they have other things to enjoy that we don't have. (We cannot create what we have on another planet). On other planets there are different joys at different fields strengths that we do not know about on this planet. (And if we are on other planets, even if we don't have the conditions and field strengths of it there, (?? it is still embedded and active within the Soul of the Fundamental Plasma of that man (or being))).

(The beauty of it is, that it doesn't matter how many times you (break apart a plasma into smaller pieces), or create different amalgamations of a plasma, you still get the same field strength of the same plasma inside. This may be difficult for you to understand, but it's very easy to test it. All you have to do is to break apart a solid magnet into pieces and you will find that the (plasmatic) field strength is still the same in all the pieces. (Remember he is talking about plasmatic field strength). Each piece has the same behavior. It doesn't matter if you cut it into halves, thirds, or whatever the field strength interaction is always the same. (The matter state weight of attraction can be different because of different sizes), but the field strength of the magnet does not change. This is the key to understanding about the original Fundamental Plasma. The M fields which make up the STM is just like another piece of the magnet, but in this case the STM is a piece of the Soul of the Creator (STC). (It has access to all the fields of the STC). It has the potential to interact with all the fields of the Creator. Once the Man and his scientists understand this, then he will become a true citizen of the Unicoise. This is what it means, 'I made man in the image of Myself,' because the STM is part of Me and he carries all the information and knowledge (that I have). It's the man himself who has decided which part he wants to take from, and how to benefit himself from it).

(This is what it means when we say each Soul contains the true Essence and it doesn't matter if it's an infant, road sweeper, a King, a President, or a scientist. The Soul of each is the same and all have the same attributes. It's we who decides which ones we'll develop more, and which ones we encourage more).

(When we encourage ourselves to be abusive, ruthless, then we call ourselves a King, and a leader. (Because a just King cannot exist unless he chooses the path of being correct and just in every condition and situation, (and that he tries to live) the attributes of the Creator). (If you decide to tap into the knowledge you can become a scientist and other professions). (But still you have the potential in your structure to become abusive and become like (how a King lives)). This is (how you convert the fields) in the matter state of the physical life). (But the Soul in its own dimension (D) does not change, you just tap into (a different) part (of the fields). (What you are doing is to tap into the part of the fields that you think you can, or you have been encouraged to tap into), and you may be monitored to be encouraged (to do so)).

(Years ago I said that when you look at (human Souls from outside the planet), you can't tell if it a Soul of a sweeper, King, farmer, or a scientist. Because in essence they are all

the same. (What matters is) what you take from the fields to create the part of your brain that becomes the physical manifestation and control of your arms, legs, and physical movement. Man encourages that part of the fields which is within (himself to manifest as himself). (Later), when he mixes it in different ways with the physical condition, then he gets the abusive behavior, or other kinds of behaviors. Because behavior does not come from the emotions, it comes from interaction of the physical dimension and the field interactions within the structure of the STM. (It comes ?? purely from the fields). Then man uses the physical dimension (to mix the fields up and) to abuse (the others)).

(It's important that we move to the next step and recognize these different field strengths within the structure of the plasma, (and) the STM. (And that there is no D of physicality in (?? the plasma). When you are in Space as a plasma, and you come across another plasma. (This ?? plasma needs fields to survive and so do you). (The other plasma has a kind of "SOS" written on it of what fields it needs to survive. There is a field strength that emanates from it, and this creates its need. (And you as the other plasma won't have a physical dimension and shape). But you both will feel the fields, and feel what each other needs. (And you'll be able know the field strength levels both of you can handle)). Then you'll understand how it works.

(In the future the scientific world will be able to measure these kind of emotions and see where in the brain they operate. It will be similar to how it is now where we have partially developed technologies to do these kind of things. We will be able to measure the field strength of the Soul, (and which fields they create and carry with them). It won't be with meters, but it will be through the essence of the emotions. (It will be through how that feeling is). And you'll be able to communicate with the system, and the person, and discover what ?? options you have for the fields. And then you can test yourself).

((Mr. Keshe tells his experience with this kind of thing in his encounter with an ATM machine. He had a sense before he put his Card into the machine that it wouldn't accept it and keep the Card. But he did it anyway because he wanted to know more about how the Soul of that machine was communicating with him and he with it. And the ATM did take his Card. He could feel the essence of the emotion in the machine. It's a mechanical system, which everybody says doesn't have a no Soul. But he was aware of its Soul. Then he went to another machine and he felt the same thing before hand, that it would not accept his Card. And it did not. (Every kind of structure has a Soul). This was the teaching of last week, where we said that even though the cup was mass produced in millions it still has a Soul. It's the same with these ATM machines, they have a Soul).

(We have to try to understand and open a line of communications with all the physical structures. He referred to this years ago, when he went in front of a horse and 'knew' that horse. He said to the horse, 'I know you are here to take my life, but not this time. I'm not ready for it yet.' (The horse threw him and he broke a lot of bones. He did it because he just wanted to prove that he knew (what that horse was going to do). And that his Soul has a mission, and has a way to (stay) alive to complete it)).

(The horse incident happened around 2010, and a few days ago he encountered the ATM. (In both incidences he communicated with the Souls, and this is how we should (learn to do also). Some people ask me why I allow people do (different things even though I know about it)? It's because I know they have to show their own weaknesses and problems, (it has nothing to do with me). (For me it is recognition of the emotion, irrespective of the time, place, and position (TPP) and the entity. And this has to become part of the Man's nature). But don't forget, as you feel their emotion, they also feel yours. It's a "two-way traffic." There is no superiority. It's about knowing and understanding the ?? priority in the whole structure. And then we'll move to the next step).

(?? In transmutation you use your emotion to be somewhere, whether in a warm place, or near the love of your child whose in another part of the world, then you feel and touch it, but you don't need to physically manifest yourself to your child. (But ?? when they are ready to see you manifesting physically then you can do it). It's like when you have been waiting 20 years since your mother died to dream of her. And now today, because you can create that field, and you can touch the strength field, and connect to your mother. Before you were playing around with everything else, except the true fields of your mother).

(In Space you need to be able to connect to the fields and understand them, because they don't have arms and legs. You have to feel their existence, and also know if it is going to take from you, or give to you. (You have to have something to give, and know how to indicate what you want to take. You have to know what your needs are. We call this 'MaGrav positioning.' (In this way you get a certain position by what you give to the community, and by what they need from you. (And then you find a balance within the community)).

(When the Man understand this he'll come to the next step of the knowledge and technology (T). He'll understand how to move the plasma. Up to today, no scientist has ever been able to explain how the Earth rotates scientifically. Why does the Man need motors to create rotation, where in the U we don't need them? Is there a motor rotating the Earth, Sun, whole galaxies, and universes? Man has not understood the mechanism of motion in the World of Creation. I said many times to KS that as long as you are happy with motors, I give you motors. But at a certain strength the motor stops, but the reactor still rotates, that is if the motor's own friction doesn't stop it. Because it's in the matter state, it's limited by the fields and the mechanical strength).

(The Sun is in the plasma state and doesn't need a motor. How do we create motion through the condition of the plasma (itself)? Why do we need to use a huge amount of magnets to create speed in the plasma in CERN and to accelerate it to neutron stars? The fields of the U go millions of times faster, but we don't see them using any motors. It's because man has not understood the essence of the field strength within the plasma, which creates that emotion, which is the motion. It's a forward motion, and a rotational motion. Why do all the planetary systems rotate?)

(If we say we are made in the image of the Creator, or a man, dog, star or whatever, then does the Creator rotate the same? Is the Soul of the Creator a Sufi? It's for us to understand how. What is the cause of the rotation? What is the speed, angle, and strength of rotation that gives us a certain directional motion, and emotion in a given TPP? (If one of them is the Mass, then what is the Weight? The Mass never changes, because it is the connection of the STM with the Creator. The Weight is the manifestation of that plasma on Earth in the shape of a man, or in the water in the shape of a fish, or on a mountain in the shape of whatever. And if it is on another planet what shape will it have? So manifestation of the physicality is the same as the Weight of the man. Where in the essence of the Soul, the Mass never changes. Because it's like that magnet which has been cut from the same piece of the 'Soul of the Creator' and never changes in (field) strength, attributes ??, and beauty).

(Now our scientists have to find out how to create rotation. We asked in the very first teachings of 10 years ago, if anyone has ever seen rocket propulsion, or wings, or turbine engines on the Earth making it rotate. Our knowledge has advanced enough that we can take a picture of the Earth from space. How does it rotate at 1,600 kilometers an hour? If Man would have discovered this principle, then he would have made a perpetual system to produce energy, instead of using turbines in dams, or wind generators. One day Man will understand the power of the plasma, rotation of the plasma, and dimension and direction of the plasma. Then he will create such a plasma of turbines that it will generate billions of kilowatts. Then you don't need to stick a matchbox in the middle of the sea and put a fan on top of it and call it whatever. Or create a black patch on the ground and call it a solar cell).

(We will show this T in the Iran conference. For the first time we'll show how perpetual motion is created in the U, which leads to motion. And depending on how you angle it, it can create lift, and weightlessness according to the position and time, and it creates as much energy as possible. Don't forget, the first system ever registered by the company in Belgium with the support of the Keshe Foundation around the year 2000, was called a gravitational and power system. Because the power sits within the gravity, within the fields and that field creates its (own) emotion and motion).

(KF is developing a system which will have no control system, instead it will be controlled by the emotion. If you want to move the craft, you have to think about moving it, and you interact with the 'Soul of the system,' and the system will move, reduce or increase weight. It plays the game of the Soul and the emotion. KS have to understand this. The time of playing with Gans's and all that is finished, but we'll still play with them because it's nice. (But we need to understand the principle of rotation and life in the Universe, which replicates the life of the Creator)).

(We are in the position of attracting the fields of the Creator to create within it, an attraction for the Soul of an entity. (In other words we can move the Soul of an entity by using the fields of the Creator). This is one of the most advanced technologies that the man could never imagine existed. And now it's within our grasp. We'll bring all fields of the Creation to create the Soul of that system, which is a replication of the Soul of the

Creator. Otherwise it could not exist, because it wouldn't have the strength and (field) combinations to exist in the environment we created, which is controlled, (created), and looked after by the 'Soul of the Creator').

(This is how much the technology has moved ahead into understanding Universal motion. (It's a T of the Creation). (?? Today Man has a problem to understand this because he doesn't understand, that it was he himself who has created the Prophets and all the prophecies. And that those who call themselves Prophets by whatever name, are there only to abuse)).

(The technological advancement are so great that the Man is now able to reach a point where he can understand how to get in touch at the strength of the 'Soul of the Creator.' It's where one will feel the beauty within, and you don't need to die to do it. There is no "Day of Judgment." It's really a 'day of maturity' of understanding the process and the technology of Creation. This T is today in the hands of the Man and it is within the structure of the Keshe Foundation. (It's for our Knowledge Seekers (KS) to understand this, and then they have to transfer it to the governments, but it has to be within the structure of World peace. This is now within the Man's grasp)).

(If we would have shown this technology 10, 20, or even 40 years ago, man would have said "oh, he's a magician, he's this or that." Now that we have taught and shown you the strength of the fields of the Gans's and the rest, it is easier for you to learn the rest of it. But before we can release the technology and also learn the rest of it, the cornerstone of world peace has to be completed. The World leaders have to agree to peace. There can be no more war. Because if this technology falls into the hands of the wrong man, there shall be no life for humanity on this planet and in the rest of the Universe. Because man is too greedy and he wants everything).

(As we saw how the Belgium King put on his trousers and came to beg for it in around 2013. And then he did every crooked thing to try to get his hands on the T. Because they knew what power it has. It's the technology of Creation, and not the Keshe Foundation. We are teachers and not 'Messengers.' When you can understand and replicate it, then you don't need systems. But it needs the maturity of understanding the process of Creation. And every man and every animal has the capability to understand it. And (everybody from anywhere in the U can have it)).

(Now you understand how the essence of the confirmation works, and how the energies of the Creator transfers to, and how the words 'I made man in the image of Myself,' converts the energy of the Creator into the manifestation of the man in the TPP, where the manifestation depends on the environmental conditions. In the environment of the womb of a black woman in Africa, the child will be black. But in the environment of the womb of a white Swedish woman of the North it will be white. But the physical structure of the womb is the same in both women. Because the womb of the Swedish woman will not create a child without kidneys. It all depends on what (field) strength is put into it. If it's for a shorter time with high energy, then the baby comes out with a burnt color,

because it was "roasted." There is no difference why it turns black or white. But in essence, we all have the same structure).

(In different positions and conditions we manifest ourselves differently. But in essence, it's the same. It's the same whether the child is in the womb of the mother in Africa or Sweden. One becomes black and the other white. Because the blonde woman with white skin has different needs and conditions to survive. It's a different environment like on the Moon or in another Universe. The black child in Africa needs that color to survive).

(We look, but we don't understand. (In essence, we are seeing the transmutation. We are seeing the conversion. We see the evolution, but we never understood it. Is there any difference in the physical structure of the womb of a woman from Sweden as opposed to a woman from Africa? The only difference is the field strength with which they produce, and according to the environment they live in. And according to the way it has been structured to do it. There is no difference in the (essence of) life, whether you are on Earth, or are another creature in another position and dimension in the U. It's just different fields, the different wombs have different fields for creation in that planetary system).

(If our scientists understand this and they know how to create the right conditions, then a woman in Sweden can give birth to a black child. (We've seen this happen, because there was an ancestral thing. And there even was a blonde and blue eyed child born in Africa, in the womb of a black woman. It was because that tiny single egg of the partner, came from the field strength of a white man. It created a different field strength. That little tiny sperm has the strength to change the field strength of the womb of the black woman in Africa, and create a white child. And it can also change the fields in a white woman in Sweden, to create a black child. This is because the field strength in the ancestral line was black. (This is not clear). Man has not understood the process of Creation and how the fields interact. Instead we call it our chromosomes, genes, and the rest of it. (It's not admitting that we don't understand of the technology of Creation)).

(Soon we will show this (about the fields of the wombs) as we progress rapidly towards the confirmation and delivery of the technologies. We are now engaged in large scale distribution of the knowledge and T and mankind will leap (ahead at such a rapid speed) in the coming months and years, that we will not recognize what man has achieved in past thousands of years. I wonder if we will marvel at how stupid we've been to create such a mayhem for ourselves).

(Try to understand a few pieces of today's teaching and if you unravel it, you'll unravel the secrets of Creation, and the freedom of your Soul, and attain everlasting life. Then you can test it to see if you can become a black child in the womb of a Swedish white woman, or vice versa, but do it without a sperm and egg, through transferring the energy of the Soul. (You can transfer the energy, the same way we create matter, but you create the fields in the structure. This is the same way the Children of Mitra will be born. They will be independent of the emotion of the physicality of belonging, but they will have

awareness and control, and understand the process of the field instruction of the Universe, Unicoise, and the Creator.

(If man only knew what glorious days he is living in right now on this planet, with the presence of the 'Children of Mitra,' then he would understand that the time of peace has come for his physical condition).

(I wonder how many of your offspring's will gain the knowledge of how to create the Children of the Soul, and how those children will turn out to be. What features and behavior will they have? How would you recognize your child as a 'child of the Soul' in the womb of the mother before the birth, or without a birth? The technology of the Creation is the right of every living thing in the Universe, and it is not the exclusivity of the Man. Or is the Man so arrogant that he treats himself as the exclusivity of the Creator, which means he has become further from, rather than closer to Him).

(If you understand the principle of the conversion from the field strength (of the ray) to physical matter condition strength, then you have understood the transmutation, and the process of transmission by the field strength, and conversion to the matter state by the physical matter manifestation).

(Today's teaching is short, but so deep, that it'll take you thousands of years to unravel. Hundreds of years is not enough, because it's so deep, that is if you understand it. And if any of you understand it, then in the essence of its truth, you have found a way to your Creator, even today).

End of Quick Index Part 1 - 542 KSW

(It was discussed how to pay for the Isfahan conference in Iran. There are a lot of things on the move and it is moving positively for this to be one of the most successful conferences. It will be the first time a 'Gravitational and Energy' system will be shown in full working condition. From the moment we show this in public it will change things (for humanity). I hope KS will be there to witness it, as you've been loyal and with us every step of the way through its development. It will be a pleasure to share it with many governments. It will be good if KS can come to Iran to celebrate this achievement of the man and the process for peace with the new technology).

Q: (Three workshops ago we spoke about the fields in the body field. I was practicing what you suggested I do and would like to share some of my experiences with everybody. In the last workshop you said that I needed to accumulate a field of a lower state in order to achieve a higher position, and to spend "zero-time" in the field. I understood what you said about meditation being a matter state level interaction. So this time I jumped straight into the field instead of going through meditation and the nervous system of the body to get there. And it really worked. It saved me a lot of time in not having to concentrate. It's much better to go directly into the field. I wasn't sure where to find that lower state, so I decided that maybe it was on the outer side just over the skin of the body. When I went there strangely I found memories there of when I was a kid. Then I realized I was

exploring and not manipulating as you said to do. I remembered what you said 10 years ago with the gravitational systems to achieve lift, that the fields need time to accumulate in the system. So I decided to go directly to the brain, to the Soul and increase the gravitational fields of the Soul and strangely enough it goes in a cycle and I was able to pull the fields. I felt energy waves through the body in periods. After around 3 hours and 40 minutes I felt a huge impulse within the center of the body from the left side to the right side. It was like my body was split in two and I felt a new heartbeat just under my liver. It was a huge heartbeat and it started pulsating like crazy, and it was connected with the right side of my brain, palm and my leg. Now when I go to the fields I feel it much more intensely than I did before. My question is if I want to achieve transmutation, should I feel that same impulse and the new heartbeat in my chest area?)

K- (Everybody feels this in different ways. It depends on the condition of the body and how you ?? position it. The STM is in a fixed position, because it's trapped in the cage of the brain. But the STP is dynamic (and can move around). It depends on how you bring the (central force of the STP) to where and what you want to create from and with it. The position is not necessarily the heart. You can bring it to be in another part of the body. There are a lot of indications that the STP energy is somewhere between head, neck, and upper chest. Sometimes depends on what strength it has. It can be near the heart but not necessarily in the heart. (It's up to you to control it). In the matter state P of the man we create different emotions. And it can create different conditions for the Soul to expand into, or to confine the Soul within the P. You decide what to do with it. In a way, we could call it a Chakra that doesn't have a fixed position. You can decide on the position and how you want to use it, interact with it, and how you want to take advantage of it).

(There is a technique we use (for it with the headphone sessions and the new medical structure that is coming up), but I think even our people don't understand it. It can create dynamism and strength fields for the Soul. A lot of KS and our scientists have not understood this part of the T, and for the creation of rotation. And (with the rotation we can expand or move the strength of the Soul). (Controlling the STP is one of the biggest hurdles, and after that you decide where you're going to interact with it. It can be at the throat, lungs, heart, stomach, ?? or wherever). There is no fixed position, ?? nor a fixed strength. And anyone can achieve this. So you have to (try harder to go deeper in the knowledge). Then you'll understand there is no pattern to it. Rather you decide what pattern you want and the place and position).

(There was a discussion about rotation and speed of rotation of the STM. But not the physical rotation, though there is some relation and the "Whirling Dervishes" of Sufis knew a little of it but not much. You can feel the rotation between the brain lobes but that is different than the rotation of the STM inside the center. The Whirling Dervishes can create a change in the structure of the Soul. In the emotion and everything else. (They are moving the M fields around the STM, like what they do in Tokomak)).

(The speed of the rotation of the Soul has different purposes. (Interruption ...). You have to understand how you create it, once you do then you have cracked into the process of... And you can unlock the universal languages as I call it).

(Try and go deeper and understand the principles, instead of just doing something. When you understand the principle it will become very easy. This is part of the way... (He talks about rebuilding Naomi's brain over months. You can actually build a brain of any condition and it doesn't matter which part is missing, within hours if you understand the process you can rebuild it).

(If you take the whole brain structure out of somebody, I can (make the body) move without any brain inside. Because the field interactions are still there. The shape of our skull decides our emotions, interactions, and features. I've talked about this before. Once a skull is produced then you can manifest the emotion and feature of that man, but not necessarily (create a) physical manifestation).

(The scientific developments have reached the point where if you give them a skull, using computer programs or whatever, they can recreate what the shape and face will look like. (They add the different muscles one by one to the skull). If you give me the same skull I can create a Soul which will show the true man and how he physically looked. Because once the skull is created it continues to carry specific M field strengths. It's like when you mix two kinds of soft drinks together you'll always get the same taste. Because they have created that condition (and keep it the same). The skull of the man dictates the position of Soul, how the physicality is).

(We clearly see this with the shape of the Chinese skull, it totally dictates the position of their eyes. It then interacts with the Soul and creates certain behaviors, and features. By studying skull the archeologists have dug up from thousands of years ago we can see the different features and why this race took over other ones. We can see this in the skull. If we understand this process then we can replicate anything. If you give me a skull I can give you the shape of (how the man will look). (It's the same as creating a Soul in the womb of the mother and then giving birth to it. (?? But once the skull is formed that sets up the fields of how it will look when it manifests in P)).

Q: (When I have a chronic pain somewhere in the leg. I don't look to the leg, but rather to where in the Soul the pain is coming from. So if I put enough energy and pull into the Soul and fix the condition, then the leg pain should disappear because it's directly connected to it).

K- (Yes, but we don't want to ... On the other hand we have to remember that there is a balance of energy (going on in the bigger picture). What are the causes of the pain? (Is what we are doing) preventing it (from balancing)? Or are we doing something to cause the pain to manifest?)

(One of the biggest problem we have in KF with using the headphones is that our team has not understood how it works and then it becomes a magic. We can (only) go as fast as people can understand. (Right now we have the T to move the position of the STP to create a perfect physical condition). And through the Soul we can feed the P, but when you feed the P you dictate the STP's performance too. Right now we cannot to that phase

because everybody would come out with perfect physicality's. And then this would become the biggest problem for the KF. We need (to allow) our scientists to understand. I can show you the flight system today, but then it becomes a magic, and just 'copycatting.' It has to be understood so that the future generations will keep the understanding of the totality. (?? by the STM)).

(It takes only one minute to regenerate a lost part of the brain, because the fields are (still) there. If you take the brain out totally, I can (make the person do all the actions of the body even without a brain). We showed this in around 2011 in Belgium. A woman with literally no brain, because the surgeons removed it, was made to walk. She didn't believe it and we had to show her the video of herself walking). (The hair on top of the head is not a limitation for the fields. We then created a dome of fields above the head because the brain was removed and we created the field strength of the brain, and the body behaved as if there was a brain inside. Through the Soul we confirmed the energy of the Soul in the D of physicality to get the physical body moving)). When the lady came to me her only wish was to walk. And I granted her wish.

(Those who join with us in the Monthly Flight session of July, August and September will have the most pleasurable time of their lives. We will only accept very limited people because there's too much noise. Then we can expand the Souls very rapidly. This time we'll use very advanced technologies and the fields will be very high). We have to make the KS ready for the conference in Iran. We can show flight but our scientists are not yet ready to understand to do it. Using the systems are a shortcut to transmutation, because you have to train the Soul. It will be done. We have to show tens of people being able to transmute at the conferences).

Q: Are Plasma Cars mini UFOs? If so, will they come in different shapes and models when it comes to the sales of transportation?

K- Not really. They are little miniature systems, localized, in a way.

(Normally fish swim to the surface of the water in a diagonal motion. But our fish go straight up to the top).

(We'll know when the Soul is mature and ready for transmutation).

(Do we need to keep a child in the womb of the mother for 9 months? Would Children of the Soul need that long for their P to mature? Another advancement is if the mother has an accident while pregnant since the Soul is developed we can ?? keep it alive. We can maintain the Soul. Children of the Soul will be perfect in every shape or form. Their Soul matures at the point of conception).

(In the depth of Space when the man falls in love with other entities of the U, the children they create will themselves decide if they want to take a physical form. They can manifest in any D in the U. Man is a lover and that emotion is within the structure of the STM, because of the love of Mitra. (?? She showed that love was an essence, an emotion

that has to be created to show what love means. (We need to find ?? what field strength within the Soul is love)). And once it's created it will benefit of the whole of Creation).

(In the sessions he doesn't have to wait for the KS to go through the process, he can create it for us to feel it. And those who say, you felt nothing, God help you, how much you can block. We'll create a new person out of everyone who goes through these sessions. They will have a lot of detachment, and understanding of the process of Creation. Will you need to buy an airline ticket to attend the conferences?)

Q: Is the transfer from the energy state into the matter state simply a matter of the balance of the fields that is specific to a certain environment?

K- (99% of it is that. But there is a different way of explaining what environment (means). As we saw the skull of the man creates that environment for the shape, size, and dimension of the brain. The environment of this planet decides on the color, shape, and size of the man. (?? We have to know what environment you are talking about). The STM in interaction with the skull and the Calcium, creates the complicated structure of the Soul, which manifests itself in physicality, and you see (all the twists and turns) in the shape of the brain)).

(The same Soul in interaction with different strengths with the environment, decides the shape of the man, (whether he is) tall, short, brown, yellow, or whatever. (?? The same will happen if you change (to) another dimension, it'll decide the Soul of humanity, because then it's all the Souls interacting together). (And then you have to consider all the Souls of living things on this planet interacting with you, because they have a collective Soul)). We have seen and understood this. (But the Man has not fully comprehended it). Think about how the fish decide their numbers, because of a lack of food, and how birds decide how many eggs to lay collectively, so that there is enough food to support the life, or if there is too much food. How animals move to a different position. All of this comes from an interaction of the (Souls in the) social structure, and the 'Soul of the environment,' which collectively they live).

(We see fish grow from an egg at one place on the planet and then move across to the other side of the planet to give their Souls and physicality to other animals to survive. We just say, the salmon migrated and the birds are waiting to eat them. But this only looks at the physical condition. In reality, the Soul of that animal knows that it will become the continuation of life for other species. We glorify these kind of things by saying Christ gave his Soul for humanity and for blah, blah. But that fish in the South Atlantic ended up in the North Atlantic gave its life through (its) cycle. It all depends on what scale you are looking at).

Q: Would it be possible for that fish to stay in the same place if it (made) changes instead of moving? Or is it just a decision of the Soul?

K- It depends. We have different explanations for this, depending on our point of view. (But from a scientific point of view, no. (Because it is done as part of a collective

awareness, and a collective work)). (Does he mean the Soul of the different animals have made an agreement with each other to exist in certain places?)

(When the KS don't understand what Mr. Keshe is teaching he sometimes leaves it and comes back to it years later for them to understand. Because 'spoon feeding' does not work. It is understanding that brings maturity. And we're in that process).

Q: You indicated that only a few minutes of our sleep time is spent dreaming. And at one point you asked us to consider what the Soul is doing during the balance of the sleep time, is it visiting near to the Creator? Is there any more of this puzzle you'd like to share with us?

K- A giraffe sleeps 30 minutes a day. (And that 30 minutes is divided into 20 segments, which means he only sleeps one and a half minute at a time. The rest of his time is spent being aware of his environment. Somehow the lions and the other animals who hunt the giraffe know about this 'one and a half minutes' through the strength of their Soul. They know when the giraffe is vulnerable for attack).

(Man does not need 8 hours of sleep, he can recuperate within seconds. (?? Are those few seconds when the man dreams? During this time do the fields of the Soul switch on for instantaneous recovery of the whole body? (?? During the 8 hours you select which part you (want to) remember the interaction of the fields)).

(Just because you are sitting in the car driving, you're not really (?? moving your body anywhere). (?? But your car is on the way somewhere). It's the same with sleeping and dreaming. (You say you had this little dream, or you didn't dream at all, and the rest of the time there was nothing, (because you don't remember anything). (You are not aware at that strength of your dream time. And you don't know where your Soul has been or is going to be). (This is all part of what I call, "understanding the process of Creation."))

(Maybe out of 8 hours, the 7 hours 59 minutes you were somewhere but you don't know about it? The Soul doesn't need to always be somewhere to confirm it's going somewhere, or doing something. This is part of the process of Creation. And the sooner we understand this, the sooner we can move on. We don't have to all the time be doing something or going somewhere. The Soul is a witness to the dimension of the work of the Universe. (?? The conscious mind doesn't need to be involved in things every second)).

Q: When we read a novel or a fantasy book, is that (kind of imagination) a type of transmutation?

K- I don't know.

(It all depends how you read the book, doesn't it? Do you (deeply involve your mind in) become part of the story, or are you just reading something to take up the time? It all depends on the individual and how he reads, etc).

(Transmutation is a very strange and strong position, because once you learn it, you can achieve a lot with it. You can tap into the Knowledge of the U if you know how to handle it. You will need this Knowledge when you arrive at the point of destination in the U. The Knowledge of the essence of the Soul of that planet, or position in the U, will be transferred to you (through the ?? fields of your Soul). In a way, it's like being in a womb, and you will receive the whole knowledge of that womb. (You will need it to start your own creation there). In a way, you have no choice. (Because you have to go through the process of creating a new body to live in that D. We will make these decisions, and become part of that environment).

(The biggest problem for our people in KF Research and the others is to understand how motion is created without (motors), but by interaction of the fields. When they understand this they will understand about the creation of current, which creates that flow. (You could re-translate 'current' as the direction of motion of the fields, and not as a condition of the position, and not the speed of the motion. This would change the whole world of the Science of Plasma, and it would become a reality of how the U really works. Then people would understand why some Neutron Stars rotate so fast, and some planetary systems rotate so slow. What causes it? We confirmed this knowledge in Iran in 2008. But our present KS have to understand it. This will unravel the secrets of Creation. Then transmutation and transportation will become so easy. And you can even decide when you want to dream, or transmute. When KF delivers these systems, transmutation will be as fast as you can 'flick your finger.' And this is why I said that the governments will have a problem with this technology, because then there will be no governing you. You will be governed through the STM, and this is the function of the Keshe Foundation. Because we know this kind of structure, and not the one with borders and 'gun policy.' 'Love policy' will be much easier than gun policy. We'll be governed by love policy).

(This situation will open up in the next few months. You'll understand very soon. I mean the world will realize how things will turn upside down. Mr. Keshe talks about the situation in Europe now with the 'Far Right' winning a huge majority in the Parliament. If they carry on with their policies we'll see a situation like in the Second World War (but it will be 'under the ground,' what happened to the Jews and the rest of it. But we don't need to get to that point. But if the Far Right would have taken the elections it would open a huge part (for the love policy to come in). (Then the gun policy would be turning their guns back on themselves). The Ukraine situation has brought this about in the (West, and in Europe. They have found the (excuse for what they have been wanting to do for decades. And that is controlling through bullying, and not through national consensus of the people)). We'll see this very soon.

Q: You mentioned the Soul of Nations recently. Can the Soul of Palestine be healed collectively, as well as the Soul of Israel and USA, and how?

K- This is part of another structure which the man will learn. (These kind of things are going on all the time, not just now. We have always had these situations. I have a different point of view about Palestine and the world. Even though I'm ?? part of the Palestinians. (If you look at the whole picture and the history you will see they have

brought this on themselves). This situation in Palestine should have been resolved in the 1970s, but now 50 years later we're in a bigger mess than before. In the 1970s it could have been resolved, but then it reversed by the late seventies. (Some call this "bad Karma" when you hurt a lot of Souls (as the Palestinians did in Iran), then it comes back to you. (Mr. Keshe explained years ago how during the Iranian Revolution in 1979 the Iranian soldiers would not fire on their own people, so they hired the Palestinians to kill Iranian civilians and this is part of that process)).

(He talks about that they issued a warrant for the Israeli Prime Minister, and the Minister defense. But who is feeding this fire? The Israelis don't have enough bombs to do this. They are being given the weapons. So what will happen to Biden? He said, he will keep the killing going until they release the hostages. There are 100 hostages, but nobody talks about the 20,000 or so hostages in Israelis prisons. We will see how the nations pay for their behavior. Each nation's behavior comes through a 'school of thoughts.' (They have that right by birth. The Souls will balance things)). We create the conditions we experience ourselves. (There are problems in the US whether or not it will remain as one country. He reads a letter from higher ranking people in the American administration).

(It's not easy to sit where I sit in the KF and have to become part of the political scene as an advisors\ . We see things from different angles, and how and what we want to promote).

(He talks about how in China they have put special markings on the streets to help blind people from losing their way and preventing accidents. But no other government in the world cares enough about their people to spend money on such things. He said he is 99% sure none of us have heard about this. In the end it is about how we build our society and how we allow the 'Soul of the Nation' to be at peace, and this creates a ?? liberation. This is how backwards the West is in truly serving their nation, as compared to China).

(You can expand your Soul without going somewhere, then with an expanded Soul you can create a condition of interacting or having contact with another Soul. We do this all the time. This is not Transmutation. Transmutation is when you physically go somewhere. You can expand your Soul, or just increase the strength of the Soul and you can come in touch with another Soul, or another field, and show a reaction to it. Sometimes we call it daydreaming. (When you daydream you can feel the fields)).

Q: (Sometimes Souls have to work in places that are "toxic" emotionally with other people. Can the Souls be affected?)

K- (Yes they can because it works on what you receive, or (how) you perceive things, or how they make you perceive things. He gave an example of a KS who deliberately created trouble at KF. But what they actually did brought more benefit to us, because in a way, the Soul serves the work of the humanity. One day I'll explain this, and I might even give you the name so you can understand).

(He talks more about Palestine. You see the Palestinians came into such a disaster condition after they started taking blood money. You have to follow the leaders and how they made decisions over time. Many Palestinians benefited from the blood money and now they are going through the (balancing) process of what they did some years ago. It's the way we see it, and it's the way it has taken shape. One day we'll explain). The KS said in the end Divine Justice will prevail. Mr. Keshe said, a lot of things are mixed up together. We don't see or understand about how the things have developed). (The Souls balance things out, but P doesn't like to understand it or see the truth of it).

(A KS in Austria has been witnessing the movement of thousands of Military vehicles in Upper Austria and many are newly made. She wants Mr. Keshe to tell her what Gans to spray so they don't use them for wrong things).

K- (It's not which Gans to use, rather it is about the Soul and the emotion and the wish you put into it. You can choose any (Gans). He thinks that the new vehicles are headed to Ukraine, but also this is the time for Armies around Europe to do military exercises. So if it's for exercises we wish them all the best, but if it's for killing more people, then maybe your vision, and these Gans's will bring a change to the soldiers).

Q: (A special thanks to those working in KF Linz. And also there is amazing work coming from the team in Brazil and a special thanks to Rafael for the transcripts they are putting out. I hope other Knowledge Seekers around the world are receiving this work because some of the summaries there are revealing so much more than what I thought I understood from these teachings every week. It's a great resource for knowledge for everyone).

(The KS was very interested in the conversation with Ivan earlier. He understood that to work with the fields that meditation is not the way to do it. Rather it is connecting to the fields in the way you advised. He said it leaves him in a difficult situation (because he became dependent on meditation and believes in it. How do we reach the lower fields if we don't use meditation?)

K- (Meditation has to do with the physical body, so it's easier to go through the Soul. Meditation is only related to the physical dimension. If you understand how to work with the fields and energies within the center of the body, then you don't need to push the physical body).

(Many people who have been through the KF systems in Linz or whatever, say, that what used to take them 1 to 3 hours to reach in meditation, now they get through the systems very fast. We have heard this from a lot of people who do a lot of meditation and some are expert in it. They say in the systems they just naturally go to that point very quickly).

(It goes back to the process of whether you 'move the mountain or Mohammed.' It's much easier to move the 'Man' than the mountain. Because the Soul is so powerful, you don't need to go through the physical position to allow its fields to be shown, if you know how to go into it. You don't need to do meditation. But humans are used to going in through

the physical D, or what we call the 'back door.' (When you use the body you have to bring in a lot of physical conditions to reach the meditation point. But when you expand the Soul you immediately get there. And this is where the difference is. You get to the same point but in a different way. Instead of going from the bottom up, we go from the top down).

Q: (Is there a way to 'hack' this point, maybe as we drift off to sleep, and as our Soul starts to activate during deep sleep, is there some way to reach the 'lower strength fields' you were talking about?)

K- (It's not lower fields, maybe it could be a stronger field. We go by the field strength. Then every time you have to open that 'Pandora's box.' You have to figure out what 'key' or method you will use. But every time it's always the same Pandora's Box you have to open. It needs (a lot of understanding about how meditation works to bring you to that position). (?? You actually reach that position when you dream during sleep. Your Soul gets free from the P. But what we are trying to do is to help you have control over it. And also so that you can reach it anytime you like, and do whatever you like whether it's to feel the comfort, pleasure, (or just the emptiness), or whatever you like. When you understand how to enter the D of your Inner Energy, or what we call the Soul, you can achieve it immediately)).

(However, we have not yet shown this secret or how to reach it. I don't think mankind is ready for it. It is the creation of the motion of the Soul. Up to now you have only had access to a 'static-dynamic' system, and the next step is to use a 'dynamic-dynamic' system. If you understand both in the physical and field motions, this is where the beauty starts. This where the World of Creation comes in. (I have not yet put this piece into our (systems). However, if you look at the old videos especially from the weight reduction experiments we did in Belgium you will see it. At that time we reduced the weight from about 9 to 3 kilos. I showed it in there, but you didn't have the knowledge or understanding to see it. I laughed many times wondering if you would see it. It was like when people used to call the caustic in the 'Coca-Cola bottle' the 'Keshe magic liquid')).

(All of us have the capability to expand our Soul instantaneously. But we don't know the way to do it or the technique. (?? In a way, it's part of how we created ourselves). But we've forgotten how to do it. (Some people can do it and they hide it in different dimensions of physicality so the others don't see it. Or it just happens and they don't understand how)).

(Whether you get to that point through the Soul or meditation it's a place where you feel safe and where you want to be. Actually you can create it within the cocoon of the STM, expansion of the STP. (Does he mean you can feel it while the STM is cocooned inside the STP ?? Normally he says for us to expand the STM over the STP). It makes you feel protected and good and like you are where you want to be. And when you get to that point, then you come in touch with the openness of the U).

(In July and August we'll bring this to the front. And most probably we'll open the channels for it in next week's (?? Flight session). You still can register for it. But we'll do it in small groups. They won't be long sessions, because it can bring a lot of you into a fast transmutation. And even in the Soul D. It's a very, very... It's just that we have to prepare our lab for it. Most probably we'll divide the groups into time zones for Chinese, Central Europe, and American, so that everybody is awake. Because you need to be awake to go through this position, you can't be half asleep. And you'll see the beauty of it).

I'll change the course of humanity, in reaching his Soul in the next few months, and then you'll understand.

(The KS from earlier wants to share more about his technique of feeling the fields. He just uses his intention to what he calls enter the fields. He makes a direct communication with each part of his body. And that body part moves because your intention moves it, and so you move the field. The only reason that you are not able to move the fields around you is because you don't know that they are there. Then he pulls the fields inside his brain. And he uses his breath to move the fields and each time he breathes in he takes the fields deeper into his body. He uses his imagination and believes in it. He said he was in deep sleep for 2 hours but during that time he was aware and trying to control the fields. His heartbeat got very slow. He tries not to block himself with his own thinking but remains open and accepts whatever happens. That's all he does).

Q: When KF doctors transmit Cosmic Rays to the headset, to balance the fields of people with Parkinson's, Alzheimer's, or other neurological illness, what happens to the causative toxins like Lead, Mercury, Aluminum and Spike proteins that have built up in various parts of the brain? How are they eradicated?

K- (We don't touch those things).

Q: Does transmutation (help to get rid of accumulated toxins in the body)?

K- (Let me explain it in a different way. In the Plasma World (we don't call anything contamination. (Everything is created from fields according to conditions)). We do not destroy a radiation source. Instead we use it as a "good" energy for another purpose. This is a very big difference. It's the same with materials that can contaminate the brain. We don't get rid of Aluminum, or whatever they say is in the brain. Instead we use the energy of it (for another purpose). (We don't interfere with the current flow in the brain that creates energies for the rest of the body)).

(This is a totally different understanding of things. Because in a lot of cases when we go into a high level nuclear (material), especially in radiation contamination, the detectors will still detect the radioactive material. But we don't see any signs of the radiation or radiation damage. (This is a knowledge the man doesn't have yet. However, the plants do this with Nitrogen. It's a natural process if you understand how to trigger it)).

(For example, for aluminum or whatever in the brain we don't destroy it. But it will still show up on the detectors, but the brain doesn't have the connection to it that caused the damage before. (It's now harmless). So we don't expel it out of the body. Our knowledge and technology is altogether different. We saw this when our KS Yukoko went and did tests in the Fukushima fire station during the (accident)).

(These so called contaminants are used as a source of energy for something else. It's like when you use fertilizers, they don't give us all their energy in one go. They slowly release it into the ground. (Radioactive materials or contaminated material in the body are changed to become a source of energy, but they don't harm the body and you decide where they go).

Q: (When we go through transmutation and come back home will we still look the same as our original body did before we left?) Will my family still recognize me?

K- Yes, yes, you won't change.

Q: How can Plasma Technology explain Lupus disease in women? Can it be reversed?

K- (Is Lupus disease the one that creates a butterfly shape on the face? They call it the "butterfly" disease. It can be helped, but it's very hard. It's a very drastic and extreme ADHD, (Attention-Deficit/Hyperactivity Disorder), but it tends to be more hyperactive. (Just like when people put tattoos on their body to get more attention, the disease creates this butterfly shape on the face to do the same). If I'm correct and we are talking about the same condition. When you have this mark on your face, then people notice you).

(?? This usually shows up in an abusive relationship with the partner. And once they get hooked on it, they will not let it go. And it's always everybody else's fault except their own, and they're always the victim. They convince their partner and their family that they are the victim. This disease then moves on to get attention. Lupus doesn't need, because the action sits right in front of it. ?? There is no solution for it, because they keep on changing the 'goalposts, ' which means when you solve the problem they create a new problem further out, the goal posts keeps getting farther away).

Q: If we cannot attend the Iranian conference, will we still be able to see the flight system later, or is this only for the people who attend?

K- It's only for those who attend. (It will depend on what the Iranian government and the Military decides as to what can be shown publicly. This is an international conference with a lot of implications worldwide. Nothing will be allow to be transmitted out of the conferences, and we don't record any of the conferences. We are going to Iran to show technology, and it's for world population to see it. (But I'm sure our KS will share some things after it's over. Lift and motion will be the primary show)).

(One of Mr. Keshe's friends in Iran was asked to bring a Persian Carpet, and they can put a plasma system on the carpet, then everybody can see a 'flying carpet.' (It is interesting because the origin of the "Flying Carpet" comes from Persia)).

(Mr. Keshe explained before about a bathhouse in Iran that could heat huge amounts of water with a single candle and the British came in and destroyed it trying to find out the secret. He might re-light that bathhouse again during the conference. The scientists who made that bathhouse long ago understood the Knowledge of Creation. Now we have access to it again and might show it).

Q: Does the STM work like the reactor described on the KF website page about the simple guide for producing Gans's of Tritium? It shows a reactor setup displayed with H2 Gans in the center, which changes to H1 or H3 Gans, depending on the Magnetic field configurations around it. (?? Each one changes a neutron). Does a small change in fields have a similar effect on the STM? Is each neutron created by the STM, a child of the STM? Are the headphones an analogy of this reactor setup?

K- In a way, yes. (But it is a very long twisted and bent way to go. But yes. But it needs understanding).

(Hopefully some of you in the first session will be able to start transmuting in a different way. But we still control everything (in the background)).

End of Quick Index - 542 KSW June 13, 2024

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:16)

K- Yes, thank you very much. Good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers program from Keshe Foundation Spaceship Institute.

The topic of the teaching of today is a continuation of what we discussed last week about the magnetic (M) field, magnetic rays within the plasma. Where up to now we considered the brain of the man in one section is responsible for emotions and one section responsible for decision making, some in one section regarding the physicality (P) and the rest of it. Which section of the brain creates a movement in a finger and which part of the brain is responsible for moving the heart and the rest of it. And which part of the system of the body of the man is responsible to create continuous regeneration of the cells. (:18) In a way as is all these things exist within the plasma. Within the plasma

which is the Fundamental Plasma of what you call, the Soul of the Man (STM) or whatever you want to call it is the same characteristic.

When for example the rays in the fields which are responsible for dynamism, for positioning certain plasmas within the structure of the what we call Fundamental Plasma (FP) motion of, direction of motion of what to absorb, what to reject, which field to take from the environment. In the body of the man is converted into what we call the part of the brain which is responsible for moving hands. The part of the brain which is responsible for feeding you. The part of the brain which is responsible to get rid of what it doesn't need in every shape or formation. Part of the brain which is for emotion of laughter. So when the fields of the emotion of laughter let's say in the plasma as a direction of the STM comes to become to materialistic side to find itself in a matter state confirmation of existence. It doesn't matter if it's a brain of the man, or is a jelly type, or is a gaseous structure. At the end of it converts that line as an emotion of let's say happiness to a structure that can represent, can absorb, can identify and can confirm happiness in physical dimension.

So that ray which is strength of the happiness in the plasma of the structure of the STM, (:20) when it comes in conversion into the brain of the man to change into physicality to show the happiness of the man converts to a sound of laughter. Change of facial structure. Tears and crying. Maybe rolling on the ground from laughter and joy. Then we understand that does not matter where you go. This characteristics as a joy it'll be carried, and in that position of transmutation when you arrive manifests itself as part of the structure of the control.

So we understand that within the plasma, within the structure of the Fundamental Plasma where combination of the fields and rays make that plasma they have the same characteristics structure as what we see in the body of the man in the brain of the man. So the body of the man in conversion knows where to go. You see in your dreams, or when you transmute, but not convert to change of physicality, your grandma. She tells you a joke. She gives you food with the aroma and the odor which you like. Remember her cooking for you? Then this when it comes through the dimension (D) of the plasma fields and converts into the matter state you feel, you taste and say, oh, I had a dream of the grandma last night, and I had this soup, and that taste and that odor. In fact you use the conversion of the rays in the dimension of physicality.

For this reason man will find out that all plasmas have the same strength. Does not matter if in the strength of your physical condition it becomes laughter by tickling, giggling, (:22) shouting and crying from joy, and another creature from another part of Universe (U) will feel the same joy through the same field of strength. It means the same. Then we understand how we do not need the physical matter to exist to enjoy the existence in the Universe, because whatever we see as the attribute of the physicality we enjoy the sight, the sound, the smell, everything else is within the structure of the plasma. And if this planetary system, this condition of the Earth would have allowed and had creation in the condition of the other field strength we would have known other emotions, other senses,

because they are more into emotions and senses and condition of understanding than what is available to the man today on this planet.

This planet needs this to satisfy the life conversion. On another planet there are no cows to eat, there is no grass to lie on, there is no sunrise and sunset that we can sit on the beach because there is no water and then, but there are other joys. You cannot create this on another planet. But on that planet there are other joys with a different strength that we do not know on this planet, because we don't have the conditions of it, we don't have the field strength of it but it's embedded, it's active within the Soul of the Plasma of that man, the Fundamental Plasma. The beauty of it is, (:24) does not matter how many times you create a smaller or different or amalgamation of a plasma, you come to the same.

If this is hard for you to understand it's very easy for you to test because it's more or less on a magnetic field strength, it's not on something else. Get a piece of magnet and cut it into pieces. The field strength does not change. Each piece has the behavior of the same. You cut it in two halves, one third and two third, in ten pieces of equal amount, in ten pieces of half and ten pieces of double, the field strength interaction is always the same. In matter state condition as the weight you get attracted because you are lighter, but the field strength of the magnet does not change. And if we understand this, we understand the original Plasma, the fields which now creates the STM is another piece of magnet, which is cut from the bigger piece of magnet, which is the Soul of the Creator (STC). It has the potential, it has all the fields within it to be, to create, to have interaction as the field of the Creator. And once the scientists, once the man understand this, man has become the true citizens of the Unicose. 'I've made man in the image of Myself,' because the STM is part of me, carries all the information and all the knowledge. It's the man who has decided which part he wants to take to, or for his benefit.

Then you understand what it means in true essence that each Soul, (:26) does not matter of infant, does not matter of the road sweeper, a king, a president, a scientist, in the size of the Soul, all have all the attributes the same. Is which one we develop more, which one we encourage more. We encourage the abusive, we encourage to be ruthless and to be as abusive as we are and we call ourselves a King, a leader. Because a just King has, cannot exist if he's just and correct, unless he chooses the path that in every condition and situation meets the attributes of the Creator. If you want to be that, to show the strength of the knowledge, you tap in and you become a scientist and the other part. But you still have the potential, you still have the, what we call, structure to become abusive and become a King. But that's what you convert in the matter state, in the physical life. But the Soul does not change, you just tap into that part. That is the strength that you think you can and you're encouraged and monitored to be encouraged.

Then we understand, all of us. This is what I said years and years ago. When you look from outside, no one knows if this is a Soul of the sweeper, or a King, or a farmer or a scientist. Because in essence it's the same. In what you take, the way you took from the fields to create the part of the brain, which became the physical manifestation and control of your arms, your legs, physical movement, (:28) man encourages that part of the fields which is within it to become. And then when he mixes it in the different way with the

physical condition, you get the behavior of abusive, you get different kind of behaviors. Because the behavior does not come from emotion, it comes from interaction of the physical dimension and the field interaction within the structure of the STM. It comes as perfection. Then man uses the physical dimension how to abuse this with the others. Or how to use to abuse the others.

Then we understand. And it's become important for us to move to the next step. To recognize these field strengths within the structure of the Plasma, the STM. That the physicality has no dimension in it. You are in Space as a plasma, you come across another plasma. This Plasma needs, it's like has got the SOS on it, I need this field to survive. It's the field strength which emanates it, which creates for need. And you are the other plasma, you don't have physical dimension and shape. But as a fields you feel, this I have, I don't need, or I have too much of as a higher strength that you give. Then you understand how it work.

In the scientific world in the coming time, the way partially we have developed technologies, we can measure these kind of emotions and see which part and where in the brain of the man operates in. In the coming time we'll measure the field strength of the Soul which creates and carries these. (:30) And with these measurements is not anymore by some meters, it's the by essence of the emotion. How you feel. And how that feeling is. And can you communicate with the system, and can you communicate with the person. And can you read the option. And then you test yourself.

In the past few days something very strange happened, but not as strange as normal, I just keep on testing. I was walking to ATM machine, outside the building. As I was going into the building to go to the machine, I knew, I had a sense that the machine is going to take my card. I said, but I'm going to try it. I know it's going to happen. I want to know that the Soul of this structure tells me. I walked in, I put the card in, 'bleep' I had the card dropping in the box (the machine took his card). And I said, I knew. It means I felt the emotion of even the machine, compared to a human Soul. I said this to somebody who was with me, I said, I knew. He said, why you keep on doing this? You knew, why did you do this? I wanted to see, I can feel the emotion, the essence of the machine, the mechanical system, which everybody says, has no Soul. But I was aware of it.

I went to another machine, the same thing happened before I go. I said, I knew this was going to happen again. And it happened again. Because we do not need the emotion, the Soul of living things. We have to understand the Soul of the structure of anything. (:32) This is why in the teaching of last week, I referred, even the cup we produce in a million, it still has that Soul. These ATM machines are produced in hundreds of thousands nowadays. It wasn't something special.

This is where we have to understand that we open the line of communications with the structure, the physicality, and we understand this. I referred to this years ago, when I went in front of a horse, and I knew the horse. I said to the horse, I know you are here to take my life, but not this time. I'm not ready for it yet. And I know I fell off the horse, and everybody says, you were stupid you knew it, why did you get on the horse? I just

wanted to prove that I know what's in the horse. My Soul has a mission, has a way to live to complete.

In 2010 - 11 was a horse. A few days ago was a, what we call, computerized electronic system, ATM machine. And this is how we should become. This is why people tell me, you do, why do you let people do this? Because I say, I know they have to show their own weaknesses. They have to show their own problem, not me. Recognition of the emotion, irrespective of the time, place, position (TPP) and entity, has to become part of the nature of the man. And don't forget, as you feel emotion, they feel yours. It's not a one way traffic. (:34) There is no superiority, it's just knowing to understand the ?? priority in the whole structure. Then we move to the next step.

In understanding, in transmutation, I want to go, this is my emotion, I want to be in a warm place, I want to be at this position, I want to be near to the love of my child. I'm in London, he's in another part of the world, I move, I feel, I touch, I don't need to physically manifest myself to the child. But at points you decide, I have to be there, out, till they decide they want to be in. It's the same as 20 years, you never had a dream of the mother who died 20 years ago. But you do today, because you create that field, you touch the strength field, that the mother field has been, up to now you've been messing around with everything else, except the true fields, which connects to the mother.

You need this, as I said, in the Space, to know, this field has no arms, no legs, but I know, I feel its existence, is it going to take from me, or is it going to give to me? What have I created to give, and what indication I showed that I want to take, because this is what I need? In the scientific world of today, we call it 'MaGrav positioning.' Why do you get a position in a certain position? Because you give enough to what the community needs from you, and you take what you need from the community of the fields which are your within, and that gives you the balance.

And once man understand this, man comes to the next step of knowledge and technology, which means, how do I move this plasma? (:36) Up to today, no scientist has ever explained how the Earth rotates scientifically. Why in the world of the man, we create motors to create rotation, where we don't need to? Is there a motor rotating the Earth? Is there a motor rotating the Sun? Is there a motor rotating the whole galaxies? Is there a motor rotating the Universe? Man has not understood the mechanism of the motion in the existence of the Creation. As I said many times to Knowledge Seekers, so as long as you are happy with a motor, I give you a motor, and we get, tell me to make as many as you like. .. But it doesn't answer if you, any of you worked with these motors, you understand at a certain strength the motor stops, and the motor, the ball still goes, if the motor's friction doesn't stop it. There's a limitation of the fields and the mechanical strength, because that's a matter state.

In the plasma state, like the Sun, you don't need a motor. How does the creation of the motion in essence through condition of the plasma is created? Why do we need huge amount of magnets to create a speed of the plasma in CERN to accelerate it to Neutron Stars? Fields of ?? the Universe go millions of times faster, but we don't see any motors.

Because man has not understood the essence, the field strength within the Plasma, which creates that emotion, which is the motion, (:38) a forward motion, a rotational motion. Why do all planetary systems rotate?

And if we say we are made in the image of man, in the image of Creator, in the image of a dog, or a whatever, or a star, does the Creator rotate the same? Is the Soul of the Creator a Sufi? And then we have to understand how. What is the cause of the rotation? And what rotation, and what speed in which angle, and in what strength gives you certain directional motion and emotion in a given time, place and position? One is the Mass and what is the Weight? The Mass, which is the connection of the STM with the Creator, never changes. The Weight is the manifestation of that Plasma on Earth in the shape of a man, in the water in the shape of a fish, on a mountain in the shape of whatever, and in another planet, another. So manifestation of physicality is the same as the Weight of the man. Where in essence the Soul, the Mass, never changes. Because it's that magnet which is the same cut from a piece of the Soul of the Creator and never changes in strength, attribute ?? and beauty.

Now our scientists have to find out how to create that rotation. As I said, we go back to the very first teachings, 10 years ago. Has anyone seen a rocket propulsion? (:40) Has anyone seen wings? Has anyone seen turbine engines on Earth? I think we have moved far enough to take a picture of it. None. But how does it rotate 1,600 kilometers an hour? Man has not found this (out). Because if man would have found this principle, man would have made a perpetual system to produce energy as you do with dams, and wind, and everything else to run the turbine. If man one day understands the power of the plasma, rotation of the plasma and dimension and direction of the plasma, man will create such a plasma of turbines that creates billions of kilowatts. You don't need to stick a matchbox in the middle of the sea and put a fan on top of it and call it whatever. Or to create a black patch on the ground and call it a solar cell.

We will show this technology (T) in Iran. In the conference in Iran, we show for the first time the motion created perpetually in the Universe, which leads to the motion. And depending on how you angle it, depends, creates lift, it creates weightlessness according to the position and time, and it creates as much energy as possible. Don't forget, the first system ever registered by the company in Belgium with the support of the Keshe Foundation at that time in 2000 and whatever, it says gravitational and power system, the power sits within the gravity, within the fields. And that field creates its emotion and motion. (:42)

In the coming time, and the system which is getting developed by the Keshe Foundation, we have no control system, but by the emotion. You want to move a craft, you think about moving it, you interact with the Soul of the system, and the system moves, reduces weight, increases weight. It plays the game of the Soul, it plays the game of emotion. And this is what as Knowledge Seekers (KS). You have to understand. Now you understand, when I tell you, the time of playing with Gans's and all that is finished, we still play with it because it's nice. But does it stand? Does it in any shape or form? Brings us to the point

that we have not understood the principle of the rotation and life in the Universe which replicates the life of the Creator.

Now we have managed, we have gained knowledge to bring that position of attracting the fields of the Creator to create within the attraction of it, the Soul of the entity. This is one of the most advanced technologies the man can never and could never imagine. And now it's within the grasp of the man. We bring all fields of the creation to create the Soul of that system which is the replication of the Soul of the Creator. Otherwise it cannot exist. Otherwise it doesn't have the strength ?? and combination to exist in this environment which is controlled, given, looked after by the Soul of the Creator. (:44).

Then we understand how much the technology has moved. The technology of understanding the technique of the Universal motion. Technology of the creation. Technology of the science that man today has a problem to understand and because he doesn't understand he's created Prophets and all the prophecies that those who call themselves the whatever of the prophets are there to abuse. Technological advance, the technological advancements for the man today, if man understands, has reached a point to understand how to get in touch to be at the strength of the Soul of the Creator that one feels the beauty within. And you don't need to die to do. There is no Day of Judgment. It's the 'day of the maturity' of understanding the process, the technology of the creation. And that technology today is in the hand of the man and within the structure of the Keshe Foundation. How our Knowledge Seekers understand is how they will transfer this back to governments and within the structure of the World peace within that grasp of the man.

If we would have shown this technology 10 years ago, 20 years ago, 40 years ago, man would have said "Oh, he's a magician, he's this, he's that." Now that we have taught, we've shown you the strength of the fields of the matter state in Gans's and the rest, now you understand how easy it is to learn the rest. But to release the technology, to learn the rest, needs, is the cornerstone of its, what I call, deliverance, completion, is the World leaders' agree to peace. No more war. (:46). Because if this technology falls in the hand of the wrong man, there shall be no life for humanity and no life on this planet and the rest of it in the Universe. Because man is too greedy and he wants everything.

As I said, even he makes a King to go on a ?? King trousers and God knows what, to come to beg for it. As we saw with the King of Belgium in 2013 and 12, in Belgium. And does every crooked things to get the hands on it. Because they knew, they understood what is the power of this technology. It's the technology of the Creation, not Keshe Foundation. We are teachers and not 'Messengers.' And once you understand, you can replicate it. It does not need systems. It needs the maturity of understanding the process of Creation. And every man, every animal has the capability to understand it. Does not matter from this planet or anywhere else.

Now you understand how the essence of the confirmation comes to. How the energies of the Creator transfers to, and how the words 'I made man in the image of Myself,' converts the energy of the Creator to manifestation of the man in time and position, depending on the environmental condition. In the environment of the womb of a black woman in

Africa, the child becomes black. In the condition of the womb of the mother in Australia becomes another. And in the North, in Swedish, becomes blonde. (:48). But the structure of the physicality within it, is all the same. A woman in Sweden does not create a child with no kidneys. It's just as they say, how long you keep it in the oven, depends how color and how much it gets cooked. And what strength you put on it. Short term, high energy, you burn the color, you have it roasted. You keep it low, it's the same. It's no difference why we turn black and white. But in essence, we all have the same structure.

As I said, in different position and conditions, we manifest ourselves different. But in essence, it's the same. The same as the child in the womb of the mother in Africa, and the same the one in Sweden. One is black and one is blonde. Because the blonde woman with the white skin, needs that to survive. It's a difference, it's on the Moon, it's another Universe. And the one in the black, needs that, because in Africa it needs it to survive.

We look, but we don't understand. But in essence, we see the transmutation. We see the conversion. We see the evolution, but we never understood. Is there any difference in the physical structure of the womb of a woman in Sweden, than a woman in Africa? Except the field strength which they produce, according to the environment they live. And according the way it has been structured to do. So, is there any difference in the life, if you were on Earth, or another creature in another position and dimension? It's just a different fields, (:50) different womb of the fields of the creation of the planetary system.

And if our scientists understand this, and if our scientists create a condition of it, the woman in Sweden can give birth to a black child, as we've seen can happen, because there is an ancestral thing, and a blonde, blue eyes in Africa, in a womb of a black woman. Because that tiny single egg of the partner, came from the field strength of the white man. Created a different field strength. If that little tiny sperm, has the strength, to change the field strength of the woman in Africa, and create a blonde child, and a white woman in Sweden, to create a black child, because in this ancestral line, field strength was a black. Then you understand, man has not even understood the process of the Creation, and how the fields interact. And we call it our chromosomes, genes, and the rest of it. You wear the 'Jeans' on your legs, not on your brain. Not on understanding of the technology of the Creation.

Soon we will show this, in the coming time. As we progress rapidly, for the confirmation and delivery of the technologies, now that we have engaged in the, what we call, in the large scale of distribution of the knowledge and technology, mankind will leap and hype in such a speed, in the coming months and years, that will not recognize what man has achieved in past thousands of years. (:52) And I wonder, if they marvel how stupid we've been, to create such a mayhem.

Try to understand a few pieces of the teaching of today, and if you unravel it, you'll unravel the secrets of the Creation, and the freedom of your Soul, and for everlasting life. Then you can test, if you can become that black child, in a woman, what we call, Swedish woman, and a white child, in the womb ?? of a black woman, without the egg, without the sperm, by transfer of the Soul of the energy, by transfer the way we create matters,

you create the fields in the structure. And if you understand this, then you understand how the Children of Mitra shall be born. As they are independent of the emotion of the physicality of belonging, but they are aware and control and understand the process of the field instruction of the Universe, and Unicose, and the Creator. If man knew, in what and such a glorious day he lives today on this planet, with the presence of the Children of Mitra, man will understand, the time of peace has come for his physical condition.

I wonder how many of you and your offspring's, gain the knowledge to create children of the Soul, and then how those children shall be. What features will they have? What behavior will they have? How would you recognize your child is a 'child of the Soul' in the womb of the mother, without and before the birth? (:54) The technology of the Creation is the right of every living things in the Universe, and is not exclusivity of man. Unless man is so arrogant, and he treats himself as exclusivity of the Creator, which means he has become further from it, than closer to it.

If you understood the principle of the conversion, from the field strength, the ray strength, to physical matter condition strength, then you have understood the transmutation, the process of transmission by the field strength, and conversion to the matter state by the physical matter manifestation.

Teaching of today is short, but so deep, that I hope, it'll take you, as Knowledge Seekers, and the rest of the man, for thousands of years to unravel. Hundreds of years is not enough, because it's so deep, if you understood, and if any of you understand it, in the essence of its truth, you have found a way to your path to your Creator, even today.

We go for a break, and we come back, and we can ask any question and discuss to understand more, about the depth of the knowledge today has been shared with you. Rick, if you like to take us to a break, and we come back.

>> BREAK >> 542 KSW June 13, 2024 (1:02).

K- Oh, yes, thank you very much. There's one thing, we just go back. Regarding the Iranian conference, the conference in Isfahan, some of you have found problems in transferring the money to pay for it. The only way to do it is when you go on the website, make the booking, and just send us the reference number for the booking and the

payment for it. You don't need to do anything else. Usually it's like you buy a product, we receive an email, and you put the reference number, pay, whatever, whatever, and you don't need to state anything else. That, it does not create you problems, because some Knowledge Seekers had a problem to do this. So, you don't need to mention, just go on the booking, and you just reference, purchase number or donation number, or whatever, blah, blah, blah, which is given to you on, what you call that, on your order. Doesn't matter what you pay though, PayPal, banking system, electronic system, just put reference, that, and then we know it's for the conference in Iran. Please complete this by the end of this month, as I said, we will close. And, the situation we are in, that we have to, soon later, stop any registration with the Keshe Foundation for the conference in Iran. (1:04) There's a lot of things on move, and a lot of things are moving positively for this, to be one of the most successful conferences in Iran, even in the history of science of Iran and technology. Not just because it's the Keshe Foundation, it's just because new science will be shown. And as we saw, and I referred to it in a part of the teaching, the first time Gravitational and Energy system will be shown, in a full working condition, and this will change things, from the day we'll show in public. And, I hope Knowledge Seekers are there to be witness to it, as you've been around with us, seeing every steps of its development and understanding by us. It is, and it will be a pleasure to share it with many governments. Part of this technology, in the coming hours will be shown, in the coming days and weeks will be shown, to some of the world leading scientists, that we prepare the condition for Iran conference. And we wish you as Knowledge Seekers to be with us, for such a long time to be with us in Iran, to celebrate the, what we call, achievement of man and process of peace, by new technology.

On the other hand, as we said in the past few weeks, we are ready to move with a full transportation and transportation system, maybe partially both, in conjunction with the other in Isfahan and then following in Washington, and try to show the rapid growth in structure of the science and technology. If there are any questions we answer and we'll see where we go. (1:06)

Q: ... We spoke like three workshops before, regarding the body field and the tantra field. I was doing some practicing, as you said that I need to practice. And I have very specific question, but I think it would be better if I share some experience for everybody on the call to understand. Otherwise, it will be like in the dark and it will be just between me and you. So, can I go in a little bit details?

K- Depends what you want to tell us.

Q: I can share some experience in what I found in the fields and then what I was able to achieve. And then I wish to ask you how to go a little bit further.

K- Carry on.

Q: So, in the last workshop you said that I need to accumulate a field of lower state in order to achieve higher position. And that I need zero time to go in the field and not spend my time. So, I decided that you said that meditation, this is like very matter level

interaction. So, when I went into the field the next time I decided to jump straight to the field, (1:08) and not go through the meditation and the nervous system. And it really worked. So, thank you for that. It saved me a lot of time to try to concentrate. It's much better to go directly in the field. So, at first I didn't understand what you said. And I was not sure where to find this lower state. So, I decided that maybe it is in the outer side just over the skin of my body because I was thinking that there is the lower state. So, I went in that field and very strangely there I find memories. Like it was exploration. I find memories that when I was a kid and they were just there sitting and just came to me when I went into that field. And in this thing I understand that I'm in a wrong place and I'm actually doing exploration and not manipulation. Because you said that I have to manipulate the field. And it makes a lot of sense because I cannot control it. It has certain position within the body according to the field ?? state that it is. So, I can observe it if I go in the nervous system and the matter level but I cannot order it what to do because it is there because there is the position. So, in order to move I have to create a different state in a different place. So, it came to me 10 years ago. You showed the gravitational system where you achieved the gravitational lift. And you said that the fields need time to accumulate in the system. So, I decided to go directly to the brain, to the Soul and increase the gravitational field of the Soul because a general is not a general without an army. (1:10) And even if I try to scream if the fields are not near they will not hear me even if they want to listen to me. So, I went directly to the brain and I decided to increase the gravitational field. And strangely enough it goes in a cycle. So, I am able to pull, pull, pull and then suddenly I don't feel the pull anymore but it continues pulling. And it is like energy waves through the body like in periods. So, after around 3 hours and 40 minutes something like that something very strange happened. Like I felt like very huge impulse within the center of the body from the left side to the right side. And it was like my body split in two and I felt a new heartbeat just where my liver is under it. Like a huge heartbeat. Like it started pulsating like crazy. And it was connected with the right side of my brain, my palm and my leg. So, now when I go to the fields I feel it much more intense than I did before. And my question is if I want to achieve this transmutation because in the gravitational system you showed that the new plasma is actually in the middle so it should be around the chest area. Should I feel that same impulse and the new heartbeat within my chest area if I am on a way to transmute and achieve higher position like you said it?

K- Each one of us feels this in different ways. And depends on the, what you call it, condition of the body. And how you ?? position ... (1:12) the beauty with what we call, Soul of the Physicality (STP) which you need for this is that the STM position is fixed. That cannot change. It's in the center of the brain and it's trapped in that cage. But the STP is dynamic. And it depends on how you bring this central force to where and what you expect and you want to create from it or with it. The position is not necessarily the heart. You can bring it to be on the condition of the, what we call, another part of the body of the man. There is a lot of indication that we carry that energy somewhere between our head and neck or upper chest. Sometimes depends on the strength. You call it near the heart but not necessarily in the heart. And how you control this? In the matter state of physicality of man we create different emotions, it create different conditions for the Soul to expand, or the Soul to be confined within the physicality. You have to decide.

In a way if you call it, this Chakra hasn't got a fixed position. You can take any position, which is the STP. And then how you use it, you interact with it and how you apply it or take advantage of it. (1:14)

Q: In a way I was doing it on a random. I just increased the gravitational fields, gravitational state of the brain and with the hope that I will collect enough fields so it can position itself somewhere where it is needed in the body. So I am not sure should I increase the gravitational field around...

K- There is a technique which we use it, but even I think our people don't understand it in our headphone sessions and the new medical structure of the technologies which will come in the future. Which creates dynamism and strength fields for the Soul. A lot of Knowledge Seekers, scientists have not understood this part of technology, creation of the rotation. And then the rotation how to expand or move the strength of the Soul. This is one of the biggest hurdles and then it's you who decide where you're going to interact with it, with the STP. At the throat, at the lung, at the heart, at the stomach. There is no fixed position and a fixed strength. And anyone can achieve this. So you have to dig a bit deeper to understand the knowledge. Then you understand there is no pattern to it. You decide a pattern place and position. (1:16)

Q: I can rotate it. I can do the rotation. It's just...

K- You mean the rotation of the Soul or expansion of the Soul?

Q: Because the two part of the brains they are doing kind of rotation. I can rotate the field in whatever way I want to rotate them. And it is different feeling of interaction in the body. It's just that I'm not sure how I should interact. And because when I collect I don't rotate them. I just pull from the environment. And if I rotate them I have different interaction within.

K- Yeah but we're talking about the rotation of the speed of the Soul. And not the STP. Because that will dictate in so many ways the rotation of the fields outside.

Q: So it's not the brain. It's in the middle. It's the Soul.

K- It's the Soul. Yeah. Otherwise people who go dizzy can do it. It is indirectly but in a way Sufis have understood... have not understood, but they feel part of it. Yeah? There is a scientifically reason. If you understand why the STM is within the brain of the man. Sufis by rotating, the dance they do, can create a change in the structure of the Soul. (1:18) In emotion and everything else. You don't... In a way Soul is physically standing but it's like Tokomak. You move the magnetic fields around it. You understand?

Q: It's exactly how it felt when I...

K- The speed of the rotation of the Soul has different purposes. Yeah. Carry on.

Q: This moving of the field is exactly what I felt after 3 hours when I achieved this strong impulse from the left to the right. It was almost like a separation that it went from the left side to the right side and I felt this heartbeat in the liver area just down. It's exactly the moving of the field it was. Mostly like separation like a system got...

K- You have to understand how you create it. You have to understand. You have to understand how you do it. Once you understand it you have cracked the process of... Then you can lock into the universal languages as I call it.

Q: I think I just put enough fields so they... they create like you said when they're enough they come in circle and they create a new field like it stays for itself and have a heartbeat. Like when two rays are interacting with each other and create a circle. I was thinking that I did this when I pulled with the brain more fields in and then just the environment got very dense and it was nowhere to go but to create a new position. I was thinking that I did that. But now I'm not sure.

K- Try and go deeper. Try to understand the principle. (1:20) Try to understand the principle, not just trying to do it. Understand the principle then doing it becomes very easy...

This is part of the way... Partially let's say for example with Naomi we saw the building of the brain over months. You can actually build a brain of any condition doesn't matter what part is missing within hours if you understand the process. Do you understand?

You take the whole brain structure of the man out and I can move the man without any brain. Because the field interaction is there. The shape of our skull decides our emotion and our interaction. And then our features. And I've said that many times before. But once that skull is produced you can manifest the emotion and a feature of the man and not necessarily physical manifestation.

When I see this scientific developments that they give a skull to the scientists and with computer programs or whatever, they say what shape and how the man look or would have looked. (1:22) You give me the same skull I'll create a Soul which shows the true man how he looked in physical condition. Because that skull once it was created carries a specific field strength which... It is like you, you mix two kind of drink you always get the same taste. Because you have created a condition for it. If you mix Coca-Cola with Fanta each different time the same amount you don't get God knows a pineapple taste. You get the same taste all the time. And the skull of the man dictates that. How the Soul, the position of Soul, how the physicality is.

We see that with the Chinese, the position of their eyes is totally contributed the shape of their skull. Which then interacts with the Soul and that creates certain behavior, certain features. When we look at the skull of the different what we call, type of men in past tens of thousands of years that we see there this and that, and this has succeeded to where to take the other one. Why have they? What does that shape of skull gives advantage that can, or have found a solution to overcome the others? We have not under... We just look at the physicality. But if you understand this process we can replicate anything. You give

me a skull I'll give you the shape of a man and even the man. (1:24) Because we can create the same as the creating the Soul in the womb of the mother to give birth to a child. This time when we create a Soul in the center of the skull the shape is already taken that the bone structure is already set. It's not magic. Then it's the same. How you take shape.

Q: This was partly of what I was thinking that if I actually have like a pain somewhere in the leg that is on the chronic. It is not the pain in the leg but should be somewhere in the Soul. So if I put enough energy and I pull into the Soul and fix the condition there the pain in the leg should disappear directly because it's connected.

K- Yes, but we don't want to, on the other hand remember there is a balance of energy. Why is there and what causes it? Are we preventing it? ... Are we creating it?

Q: In the past this comes to what you said in the previous workshop that if the world leaders go in their Soul they should find some. It will be very difficult for them because when I created that condition I thought in the magnetic field that gave me like a huge sadness or something that I had experienced and I had to deal with that magnetic field before I can go further.

K- You see if you came to Linz and you went into the UBESUS (Universal Body Enhancement Spaceship Units) or use any of our systems. Our Knowledge Seekers have not even understood this. In one of the systems in the UBESUS which were in Linz we had a left side and a right side, (1:26) originally, which mimicked the left side and right side of the brain. But if you, and then I knew in which system you could, what you could ask and what you could create. In the system on the left you could not do the things you could do on the right. And this process if it's understood even by our Knowledge Seekers will bring in a new game.

The biggest problem we have for example in Keshe Foundation in use of the headphones is that our team have not understood the work and when we do it will be magic. We can go as fast as people understand, and this is part of what you just mentioned. We can create a dimension in the strength of the Soul with the headphones that it moves the position of the STP to create a perfect physical condition. If you understand what this means.

This is what I said for the years. Through the Soul you can feed the physicality but when you feed the physicality you dictate the STP's performance too. We cannot go to that phase in the Keshe Foundation Wellness Centers because everybody will go in will come out perfect, and then that will become the biggest problem for the Keshe Foundation. We let our scientists to understand why they cannot achieve. I can show you the flight system today with what we have, (1:28) but then it becomes a magic, then it's just 'copycatting.' But it has to be understood that in the future generation man understands the totality by the STM.

It takes one minute to regenerate a lost part of the brain, because the fields are there. How long does it take you depending on the temperature of the freezer to make an ice cube out

of the water? Not much if you have the right temperature. Instantaneous. Manifestation of physicality in the solid state. It's the same with the brain of man. It takes one minute. You take the brain out totally, I give you all the actions of the man with the full brain. We've done this. It was done in 2011 - 2012 in Belgium. A woman with no brain literally cut off due to cancer tumors flat from above the eyebrows, was flat as anything. The whole skin was pulled because not only the skull but the brain was taken out. ?? But doctors didn't understand at that time. They didn't touch the Soul, otherwise the lady would have died, and she was in bed. She was brought to us in a wheelchair and within a few days I got her to walk and we videoed it. It's not a miracle.

It's understanding that hair on top of the what you call, the head, is not limitation for the fields. We still created dome above on top of the head as there was no brain, (1:30) but we created the field strength as the brain was there. So, through that direction and dimension through the Soul we could create the confirmation of the energy of the Soul in dimension of physicality to get the physical body moving. When the lady went back on the bed she says, I wish I move. I said, you already moved. We had to show her the video, that she went for a walk. When she came to me she said, my only wish before she ?? came to me was to walk. And I granted her wish. Then she walked. And it is videoed.

Q: You know I'm waiting for the July transformation workshop so I will come to Italy to join it.

K- We go through a different process. Those who come in July, August and September session they'll have a most pleasurable time of their lives. We're going to accept very limited people because there's too much noise or we break up the groups in the small groups that it can be done. That we can achieve. The small sessions, small groups, not so much noise that we can get the Souls, we can get the expansion done and then we can expand the Souls very rapidly. In this time because we'll use very advanced technologies the what you call it, the fields will be very high. It has to meet and we have to deliver.

Q: I really wish to join this group. Maybe all of them.

K- When we announce it, when we announce it, session by session you can join in. Because we realize with this group of 70, 80 people is too many, (1:32) too many people will fall asleep, too many. We try to segment it for a shorter time, maybe one or two days. And we do in a small group that people can achieve transmutation. We have to finish the June session. We'll have amazing sessions in the next three months. But we have to make the Knowledge Seekers ready for the conference in Iran. Our flight system to zero. Our magnetic field is ready. I can show it to you tomorrow. But our scientists are not ready to understand to do it.

Q: I'm more interested in the transmutation. This system is not really.

K- It's a shortcut. But you have to train the Soul. But it will be done. In the July, August, September sessions will be one of the most amazing sessions Keshe Foundation run. We prepare, because when we come to Iran, when we come to Washington we have to show

tens of tens of people the capability to do. And this is important. It's not one or two anymore.

Any other question? I wish you all the luck.

Q: ... Are Plasma Cars mini UFOs? If so, will they come in different shapes and models when it comes to the sales of transportation? (1:34)

K- Not really. There are little miniature systems in localized, in a way. We saw that as I said before, as we have tested, as I said to you, we are testing with live what you call, conditions. We've seen that already with the Soul of a fish. As I said before, this shows us actually completion of the transmutation and how things will take shape in the coming time, especially for those of you who go through these fields of the transmutation. And that is in the near future, once partially our Knowledge Seekers, our scientists have to understand this to expand it further, is that we have reached the point and we have shown it, and it has come to what you call. How can I put it up? How can I explain? Give me one second. I'll explain and maybe some of you understand. Just one minute. (1:36)

Sorry about that. It's taking just a few more seconds...

If our people understand and Knowledge Seekers understand what this means. A lot of you will move in a different direction. Trying to... I cannot do it in this system unfortunately. Let me see if we can establish ?? on the other line.

Because it's understanding the process of Creation and control of the fields, even at the Soul level. It is important for the future what we call, (1:38) expansion of what we call, the STM. And this will create new dimensions in what we call, the process of transmutation and transportation. And how we assess our works and we develop our technologies. (Somehow I cannot log in to the system, that I can show you something to explain this. Our system does not allow certain things. Okay, maybe I can get in now).

What is important, this is what I was trying to explain and I mentioned this before. Is that ...

If you had an animal like a fish, you notice that the fishes to go from the bottom of a tank or bottom of the sea up, they travel that way (diagonally). When a fish is converted, the fishes we tried and the ones we already keep and are in that kind of environment, our fishes go up in a lift (?? straight up). (1:40) Which means the edge of the physicality does not count anymore.

We'll see this as part of the characteristics of the children in the womb of the mother and we see the Soul, children who are created by the Soul of the mother. And this characteristic will, in so many ways, will manifest itself in these kind of processes. These kind of understanding of a system, of what we call, development of the Soul. To our scientists is amazing how can... but if you understood how you have managed to teach a Soul to be in control, these kind of processes, these kind of achieving the Soul should be absolutely no problem. Should be absolutely not a single problem to do. Which means in

a way, we know when the Soul is ready for transmutation. When it's mature, when the, what we call, the point of manifestation. And then we can assess the next step. (1:42) We can decide on our system...

R: We lost the white board there. Did you want to keep that up please?

K- (Yes, it was the Internet. No, no, it's okay. I cannot reach it. I have a problem in reaching it, so we left it. But that's what I wanted to show).

In a way, our parameters in the future is, what you call it, is the Soul ready? And what I showed you as a, what I call, graph, it shows to us, yes, the Soul is ready to go. The Soul is ready to transmute because we've seen it. We have watched it. We have monitored it. And it's capable to. And we see this in a time to come.

It's the question mark for many of man, scientists, in the future will be, do we need to keep a child within the womb of the mother 9 months when children of the Soul are created? Would the physicality take that long to mature? Or can we have the ?? sale, can we have the, what you call, the mother, even let's say in a time mother dies by accident, you have a Soul of a child within the womb of the mother, would the child survive? (1:44) Because we have created a Soul and we can maintain the Soul. And the answer is yes.

And if you understand this in a coming time, you will understand, as the 'children of the Soul' are created, they are perfect in every shape or form. And we won't have children of man created in the dimension of the Soul with any imperfection. They'll all be perfect in every sense. Because then they use the dimension and direction of the field strength of the brains and the fields within the plasma of the Soul of to create a perfect physicality. And this is what we need to understand.

And this is where we come to the point to be able to mature, to understand the knowledge and point of Creation. Because if you understand this, this is how you transmute, you are that Soul, infant Soul in the Soul in the womb of the mother, but you're in the womb of the Universe. How do you give yourself physicality? At what point? But the Soul of a created Soul in the womb of the mother needs to gather maturity, but is mature in its infancy, in its point of conception, irrespective of how long it'll take to confirm the physicality.

And this is what I said, the children of the man born in the depth of the Universe, in the interaction of the fields by other entities we fall in love with, will not have a physical shape unless they decide. (1:46) And they can manifest in any dimension in the Universe. Man will see this in the coming time. This is part of the inevitability of development of the man's knowledge to become man of Universe and man of Space.

We saw man went to Africa and he went to America and he fell in love with the Red Indians and we saw the children of the white man and the Red Indians and the black man and the Red Indians. It will be the same for man in Space, we are lovers. We love to love and that emotion is within the structure of the STM because of the love of the Mitra

which shown that it was an essence, it was an emotion, which had to be created to show what love means. What field strength within the structure of the Soul is love. And once it's created it's the benefit of the whole Creation. And part of the structure of transmutation is like, in a way, what I said with the fish, we had to train a fish to be able to, we have. Part of you Knowledge Seekers who come into these Monthly sessions are reaching that point, that vertical position, that's how you travel out of your body. And its part of the teaching and it will come very, very fast.

As I said before to other Knowledge Seekers, those of you who go through the process of June, July, August, September, I won't wait in there for you to feel, I create the conditions that you feel and those of you say, "I felt nothing." God help you how much you can block. (1:48) And we create a new man out of every man who goes through these processes and you will understand what that new means. A lot of detachment, a lot of understanding of the process of the Creation. Do we need by September or by next ?? in Washington transmute you, or do we transfer you, or you need an air ticket?

Any other question?

Q: ... I would just like to ask back to your teaching this morning, the transfer from the energy state into the matter state. Is it simply a matter of the balance of the fields that is specific to a certain environment?

K- 99%, but environment is different way of explaining it. As I said, the skull of the man creates that environment for the shape and the size and dimension of the brain. The environment of this planet decides on color, the shape and the size of the man. You understand? (1:50) What environment? Of course it does. The STM in interaction with the skull, with the Calcium, creates a complicated structure of the Soul, and which manifests itself in physicality, and you see with a turn and twist in the shape of the brain.

The same Soul in interaction with the fields, in the different strength with the environment, decides the shape of the man, tall, short, brown, yellow, whatever. The same, you change another dimension, it'll decide the Soul of the humanity, because then it's all the Souls interacting together. And then the same is all the Souls of the living things on this planet, with the interaction with ?? you, they have a collective Soul. We know this, we understand this, we've seen it, but never comprehended it fully. How the fishes decide their numbers because of the lack of the food, how birds decide how to lay eggs collectively, that they can support the life, because there is a lack of food, or too much of food. How animals move to different position. This all comes from interaction of the social structure, Soul of the environment, which collectively they live.

How do the fishes move from one point of the planet, they grow from egg to, what you call it, a fish, and move across the other side of the planet, to give their Souls and physicality to other animals to survive. (1:52) But we say, "Oh, when it comes to the immigration, the birds are ready for the salmon to come." This is looking at the physical condition, but the Soul of that animal knows this is it, and it'll become continuation of life for the others. We, what we call it, glorify it, when Christ gave his Soul for humanity and

for blah, blah, blah. That fish, which is in South Atlantic, ends up in North Atlantic, and it ends up in other places, for salmon fish in Canada, or whatever, has already made that sacrifice through the cycle. But we always look at the physical condition of it. So it is. It's just depends on what scale you want to look at it. ...

Q: ... Well I was... in the course of your answer, it took me, it kind of dealt with a different aspect of this. But like you say, the environment changes, and the fish has to move from one place to another, and that's part of the interaction, and the fish understands, and it does. But is it possible that the fish could have stayed in the same place if it had changed instead of moved? Was that just a decision of the Soul?

K- It depends. (1:54) We have a different explanations for this, depending on our point of view. But looking at it as a scientific point of view, no. It has done, it's part of collective awareness, collective work.

Any other question?

R: There's a viral story going around about a doctor in the UK, who found a fish lying in the grass in his backyard, a live goldfish, and there are no ponds anywhere near, apparently. And this story has gone viral in the last couple of days, and he took it inside, he thought it was dead at first, but it started flapping, he took it inside, and brought it back to life, or whatever. And he thinks it was like seconds from death, and it started to swim around, and he's going to keep it as a pet. Called it Alice. So, not sure where it came from, still.

K- Depends where it came from. Exactly where did it come from?

R: Yeah, it's still a mystery.

K- The fish we transmuted, it wasn't a goldfish. The fish we transmuted, it wasn't a goldfish. So, it can't be ours.

R: You mentioned that, before, that if you had a drop of water, you could create the fish.

K- Pardon? (1:56)

R: Didn't you say that if you had a drop of water, you could create the fish? Something like that. Didn't you say that?

K- Yes, we are still in that path. We're still, we have, we have created a condition, and it's just developing the technology. Our people have to understand. I have a very bad habit. I leave, I show, or I leave till I understood to the next step. I don't sit there and just, "Oh, this is it, that's the next step." Two, three years ago, I explained the process, and we spent time on it for it to be understood, but, seen, but not comprehended. And after two years, we come back to it. This is what we did, now you see the result. A spoon feeding does not work. Understanding brings the maturity. And we're in that process.

Any other question?

Q: ... I'd like to get a question in from Mark from last week. He had a couple of questions. One of them is that you indicated that only a few minutes of our sleep time is spent dreaming. And at one point you asked us to consider what the Soul is doing during the balance of the sleep time, visiting near to the Creator. Is there any more of this puzzle you'd like to share with us?

K- A giraffe sleeps 30 minutes a day. (1:58) And some time in this 30 minutes is in 20 segments. Which means he only sleeps one and a half minute at a time. And stays the rest of his time aware of his environment. If you capture a giraffe in that one and a half minute, is a lion, you've got him. And somehow the lions and other animals who hunt giraffe, know this 'one and a half minutes' through the strength of the Soul. They become aware what this 'one and a half minutes' looks like, in the physical condition, that the animal is vulnerable for attack.

So, man does not need the 8 hours of sleep. man can recuperate within seconds. And then, that few seconds, would it allow the man to dream? Or is it going to be used for instantaneous switch on recovery of the whole body of the man with the fields of the Soul? Then, if you understood this, I think you have found the answer in your question. And if you're not, you still sleep for 8 hours. And you select which part you remember of the interaction of the fields.

There is something very interesting for Knowledge Seekers to understand. And that is, (2:00) just because you sit in the car and you're driving, you're not going nowhere. You're on the way to somewhere. It's the same as with the sleep and the dream. Just because you say, "I didn't dream, but I had this dream, but the rest of the time I had nothing." You do not know the strength of your dream. You're not aware of the strength of, or where your Soul has been or is going to be. And this is part of what I call, if understood, the process of the Creation.

You think you are aware of what you call, a dream. But where has the other, let's say, out of 8 hours, the 7 hours 59 minutes been? Are you on the way to somewhere? Or Soul doesn't need to be always somewhere to confirm it's going somewhere or doing something. And this is the, what I call, part of the process of the Creation. And the sooner we understand this, the sooner we can move on. We don't have all the time to be doing, going somewhere, being, remembering things. The Soul is a witness to the dimension of the work of the Universe. (2:02) It does not need to be every second involved, partaking in something.

Any other question?

Q: ... When we read a novel or a fantasy book, .. is that practice a sort of a type of transmutation? (repeats)

K- I don't know.

R: Well, we kind of imagine ourselves or visualize ourselves being in a different place through the words that we're reading. So he's thinking that's a type of transmutation.

K- It all depends how you read the book, doesn't it? Do you become part of the book, or do you actually read the book because somebody's written it? Do you see yourself as part of the play, as we call it? Then you create a role for yourself, or you see yourself as one of the ones which is in? I don't think so, but it all depends on the individual, doesn't it?

Transmutation is a very, very strange and strong position, because once you learn it, you can achieve a lot with it. You can tap into the Knowledge of the Universe, (2:04) if you know how to handle it, because you need it. You arrive at the point of destination in the Universe. Sorry, there are no Universities, there are no colleges, but in the essence of the Soul of the planet, or a position in the Universe, will be transferred to you, through the dimension of the fields, because that's your, that's your womb. You get the whole knowledge of the ?? womb, ?? because that's your point of position. In a way, you have no choice. It's you who's going to decide which ?? body you're going to take. And then we make these decisions, and we become part of the scenery. This is why, and I said this before, many times, I said, those who go into the UBESUS Unit, whatever they tell us, we accept. Because we were not the traveler of the Soul, maybe you understand now why. Two, three years down the line, now you understand why we said that at that time.

The biggest problem for our people, research and the others, is to understand how motion is created, without systems, but by fields. And once the scientists understand this, they understand the creation of current, which creates that flow. If you re-translate or explain in the motion of the fields, current as a direction of motion, not condition of the position, and not the speed of the, what you call it, motion, (2:06) then the whole world of the science of Plasma Technology changes, and it becomes a reality of how it is in the Universe. Then people understand why some Neutron Stars rotate so fast, and some planetary system are so slow. What causes it? This knowledge we've had, and we confirmed it in Iran in 2008.

But, our present Knowledge Seekers have to understand it, that it unravels the secrets of Creation. And then, transmutation and transportation and even deciding when you dream, or when you transmute, becomes as easy as ABC. Systems to help man to transmute, once delivered by Keshe Foundation, will be as fast as you 'flick of a finger.' And this is why I said the governments will have a problem with this technology, because then they have ?? no. There is no governing. You govern this through the STM, and that's the function of the Keshe Foundation. Because we know that structure, we don't know this structure of borders and 'gun policy.' 'Love policy' is much easier than gun policy, and we use that way.

Any other question?

R: Did you say glove policy, instead of gun policy? Is that what you said?

K- Love policy.

R: Oh, Love.

K- Love, Love. It's easier. Loving and sharing and giving is much easier than killing.

R: It should be a mandatory policy with all the governments. (2:08) Love policy.

K- The situation now will open up in next few months. You'll understand this very, very, very fully. I mean the world will realize how things will turn upside down, and what's going to be the situation with the elections of the European Community last Saturday. It'll be amazing what will come out in next few weeks, and what tensions we see, and who stands on the grounds of the love, the care, the race and the rest of it. The 'Far Right' has won huge majority in the Parliament, and they will carry on. If they carry on their policies, we'll see, not very far, but 'under the ground,' or under the fire, types of the third, second war. What happened to the Jews and the rest of it. And we don't need to get to that point, but if the Far Right would have taken in the elections, will open huge part of this where the love policy comes, then the gun policy, because they're turning the gun inside back on themselves. And you'll understand it. Ukraine situation has brought this about in the West, Europe. And now they have found the ground to do what they wanted to do for decades. Controlling through ?? bullying, and not through national consensus. We'll see this very soon.

Q: ... You mentioned the Soul of Nations recently. Can the Soul of Palestine be healed collectively, (2:10) as well as the Soul of Israel and USA, and how?

K- This is part of another structure which a man will learn. We have to. We had this all the time, it's not just now. We always had this. And now we see, step by step, unraveling of these things. And step by step, how nation looks at. I have a different point of view about the Palestine and ?? world. Even though I'm ?? part of the Palestinians, but as in Palestine wise, in this position, they brought it down to themselves, in so many ways. If you look at the other side of the coin.

If you go back to the history, situation with Palestine would have been resolved in the 1970s, but now 50 years down the line, we're still in a bigger mess than before. There was a point in the early seventies that this situation would have been resolved. But late seventies, it reversed. And this, that, you call it in the language, 'bad omen.' What you do, you receive, because you created so much hurt to so many Souls. Palestinians did it for themselves. And that has to come, and then now we see it in the reversal of Israel. And I'm sure in the next few months we'll see some of this in Western Europe. Tightening of the immigration policies will bring worse condition than situation in Palestine, for millions of people in Europe, (2:12) in the next few months. We have to watch and see how it will come about.

And yes, the Soul of Nations, it'll become the STM, and how you interact with it, will change. I was in a talk with some politicians in the past few hours, and I explained very simply. They issued a warrant for, what you call it, Israeli Prime Minister, and then by game, later on for the Minister defense. But who's ?? feeding this ?? fire? Israelis don't have enough bombs to do, they are given. So what happens to Biden? Then we've seen in

past few hours, which actually, Biden has said, "I will not stop supporting killing till the, what you call it, hostages, ?? called are released." A hundred hostages, compared to nearly 10, 15, 20 thousand hostages in prisons in Israel. But we don't talk about it. And we see how the nations pay for their behavior. Each nation comes through the school of thoughts, not by the birth of their right. But by the birth of their rights, some people pay for the conduct that the other Souls collect.

I had a very interesting experience recently. I was in the environment, that a Jewish family had been near to me, in a confined space. And we looking, whatever, Middle East and whatever, because I heard them speaking Hebrew, (2:14) they did not know how to handle themselves, if this guy's a Palestinian Arab, was going to do something or whatever. And when I left, I said to them, "Shalom." And you should have seen the shame in their face. We create that condition for ourselves. And with it, those who are within it, when it suits them, they show their color.

What will happen to Palestine, what will happen to Israel? And most of all, would there be in the state of the United States? Even the people running it, are in question at the moment. Those people who are running, are very much in a deep problem with it. I read you and you'll understand this very, very clearly. This is from one of those who will run, or set up to run. It reads, this is from the higher ranking people from American administration: "There is an expected political meltdown here, and there may be a ?? caretaker ?? pickup, a government with committees. I have been appointed to oversee the transition of the division of the United States." This is what the communication reads.

Would we have, if this process goes through, (2:16) a United States? And would it be the Soul of the Nations, or say, from the Soul of the States? Would we see the division of what we call, what we saw within India and Pakistan? People moving across the nation to be in one part of it. And why the leaders of a nation have already started the process of setting up structures, committees and groups to run their nation. And this comes from people who are right on top of the American government. Then, where is the Soul? Is the Soul splitting to what it is, or what it is? Or is the same with ?? Israel?

As I said many times before, when you sit in our position, the information from all angles of governments comes in, and we see different angles than the people see. Would there be a state of Palestine? Would there be a state of Israel? Would there be a state of United State? And the others. ?? And we all become one state on the planet Earth, on one condition. It's how we look after, and how we set up things. And how it's perceived to be set up. And how we promote some to benefit ourselves, and some we cover, some to, not to be there. It's part of the... It's not easy to sit where I sit as the Keshe Foundation. Science and use it, ?? by having the science and technology you become part of the political scene, (2:18) as advisors, and those who they consult with you. And what you see, and what takes shape. And sometimes you see different things in different angles, and how we want to promote, what we want to promote. And you see different policies, and different things.

It's like when we spoke about China, and how people, the government takes a steps, for people not to do the crime, than building the prisons, to put the criminals in it, which is a pattern of the West. In the West we fight for governments and drivers fight to create bicycle lane, as if you've been to Europe. Any street they get, and now we have more, what you call it, roads, which are bicycle roads, and even they cut from other pieces, they put cyclists in more danger, just because to follow the order. Okay, we have bicycle lanes.

But how many of you know, that in China, there's a blind line? Have you ever heard of it? And do you know how much it serves? But never spoken, and if the Western Europe, European, American governments, try to implement this, what difference will make to the blind or disabled? You never heard of it, I'm sure 99% of you don't even know exists. If you walk on the streets of Beijing, or wherever, on the pavements, you see, even in the airport, when you land in China, you see on the tiles, on the street, a straight line pavement, (2:20) the pavement as if it's five bricks, or five tiles, two tile, is got continuous pieces of like 20 centimeter, straight line next to each other, in two bricks, most of it is two bricks. And when it comes to junction, or when it comes to bus stop, this changes to like 20 or 25 dots. This is for the blind. The blinds don't need to ask anyone where they are going, and if they're straight, it's come to a junction and waiting for help. The government has foreseen this, and has built over decades, blind, what you call it, pavements, for all the cities. You don't need to ask anybody, you don't need to be in danger, you don't need to become in danger for somebody to kill you, to go to prison, because nobody was there to help you. The government has foreseen this. You walk on the streets of Beijing on the pavement, and just watch. You see, continuously, strips of 20 centimeter tiles, straight line, five, what you call it, tile. A blind just sticks, knows this is still going straight. When it comes to a junction, when it comes to a bus stop, or you have to go around the tree, because if you are a blind, you can walk into a tree, or a lamp post, they change it to these little dots, which means you have to follow the dots, there is a change. You never heard of it. Try to ask our Chinese friends to post it, because when I was in Beijing, and travel around China, it brought me this puzzle, if you go to, you enter, what you call it, airports in China, (2:22) you see that in front of every lift, there is a tile with all the dots on it, or the strips on it. Stop, there is a door, there is a point you have to go, and understand what's going on. We don't have this for the blind. And never, ever been promoted anywhere, as one of the beautiful things in China. And we're still fighting for the bicycles, where the blind, they run over, have to beg people to carry them. A blind man can stop from one end of Beijing to another, just following the dots, and the straight lines on the pavement. And tiles built for it, is not something they attach. They build tiles as part of the structure of the road, airports, everything, that a blind man doesn't need help, and cannot create accident with other people's involved.

It's how we build the society. And how we prevent, to allow the Soul of the Nation to be at peace, and then that creates a ?? liberation. You go and ask your council in London, "We want a blind line on the street", they tell you, "Get lost". Show them the pictures from the streets of Beijing, Shanghai and the rest, and then you understand how far backwards, in serving a nation, we are in the West.

Any other question?

Q: ... (2:24) So, my question is, when in some conditions, some hours, we can, or by practice later on, we can, by the emotion, affinity, desire of the Soul, being in contact of another entity. In a way, it's emotion and Soul expansion, I'm right, I'm reading it. So, you may call it instant communication, zero communication, but in fact, in a way, it's the, it's kind of transmutation of the Soul's fields. Because, so is it kind of transmutation, that we can bring other entities with ourselves?

K- I cannot hear you clearly, can you repeat? (problem with Internet)

Q: ... With, like during years, I've noticed, I can, at first with some practices or some conditions, or physical or time conditions, we can be in constant, instant connection with some fields, and it shows in my face, in my smile, in my, I cry, I think, I mean, I feel it when the person, entity is here. So, in a way, (2:26) because Ivan was talking about brain and things like that, in a way, it's kind of transmutation maybe, or a zero time communication, because in a way, it's created by the love desire of communicating to that person, to that entity which it's there with us. So, it's again Soul, Soul expansion. Is it kind of transmutation also?

K- It is, I mean, it's part of it, depends, you don't need to go somewhere. You can expand the Soul and where you are, create that condition of contact or interaction. We do that all the time. Yeah, this is not... Transmutation is when you go somewhere, physically you go, but if you expand the Soul, or dimension of even not expanding the Soul, but at the strength of the Soul, you come in touch with another Soul, another field, to show a reaction. You don't need to. Sometimes we call it a daydreaming.

Q: No, it's not daydreaming, it's... it's directed.

K- No, no, no, no, no, it's just some people give a name of daydreaming, because this is what it is. It looks like dream, but in a way, something makes you smile. You feel the field. It's just like we dream, but in a dream, our Soul is in contact.

Q: Yes. So, the second question, it's finished, is I just thought about the Soul. You said the Soul, there are some Souls who have trust. (2:28) Wherever they are, they know how to manage. And, sometimes these Souls, these bodies are in a places which are toxic. They are asked to be in places to help, which is toxic. And, in toxic places, the STP is affected. They make wrong decisions, they make sabotage action. So, I wanted to ask, when the person comes out of that situation, does this Soul is affected also, that trusting Soul can be affected, and in the Space makes wrong decisions?

K- Yes, because you work on what you receive, or what you perceive. And, how they make you to perceive. Yes, it's very well, I can give you an example, in the past few months we've seen this. In past year, I've seen it three or four times, by one person. But, it's not the way that we see it, and we, there's not a way that, what their action. It is actually to the benefit of the Foundation. We've seen this by one person especially in past

12 months, maybe less, three or four times. And, they go and touch other Knowledge Seekers deliberately, they've been in toxic environment themselves, to change them, to their benefit. But, what they did actually brought more benefit to us, because in a way, the Soul serves the work of the humanity. One day I explain this, one day I explain this. (2:30) How action of certain Knowledge Seekers deliberately, being in a position to be toxic, or themselves, or they create that condition, has brought so much, in a way, growth to, to the Foundation. You come back with this question in 12 months time, I might even give you the name, you understand.

Q: So, this matter of Palestine is a, is ?? lost already? Because they have been too much...

K- In so many ways. You see, you go, you go back on Palestine. Palestinians were not in such a disaster condition, till they started taking blood money. And, many Palestinians, because they benefited by it, were, are going through the process of what they did some years ago. It's the way we see it, and it's the way it has taken shape. One day, one day we have to explain, how Palestinians got to this (point), even before and after. We see a lot suffering, but you have to understand how, how they followed leaders who set up for these devious actions. One day.

Q: But, at the end, the justice of God.

K- It looks like a problem, but on the other hand, it's a lot of things mixed up together to be what it is.

Q: In a way, at the end, the justice of God, Divine justice will prevail?

K- It has prevailed, we just don't see it. We have seen it. (2:32) And, I can go back to 1979, and tell you exactly how Palestinian changed everything for themselves.

Q: Yes, yes, yes, I know what you mean. Yeah, it's kind of their own, their own thing, which returns back to them.

K- Yeah, balance of the Souls.

Q: Thank you.

K- ... For those of you who do not know the history of Palestine, prior to 1979, Iran, revolution uprising. And, after and during, and the year after, and the following, one day I will tell you the story of the why, the Palestinians have turned the Souls back, themselves, by their conduct, and the rest pay for it.

Any other question?

<< Knowledge Seeker speaks in German Language >> (2:34)

Q: ... (2:36) Maybe I can try in English.

K- (I lost you with a thousand cars) Go ahead.

Q: I'm in a little town in Austria, and there is a big, big park, parking place, and on this parking place there are maybe one thousand cars... A thousand cars, what's the name? Trucks? Not cars, it's trucks for military. They will go in the, I think, in the whole of Europe. And so, first I think I'm very sad for this. And then I think I must good send, good energy to this place, or you will know we need some Gans. Can I spray Gans on this parking place, or to this door, (2:38) when the, what's the name, trucks go out, then they must go to, to this Gans "door." Maybe you have an answer for me, Mr. Keshe.

K- Why not? Why not?

Q: And which one of Gans can I spray?

K- It is not which one, it is the Soul and the emotion and the wish you put into it. You understand? You choose any. Are these one thousand already parked in, or is it the empty car park?

Q: Yes, all, yes.

K- All full?

Q: It's parked only, and then they go to Germany. The next days, all days come new, and all days go to Germany. It's stop only here for parking for a few days, and then they go to the next place. But it's one thousand cars, new, I don't know what this is, military cars, military trucks. (This lady has noticed that a thousand military trucks are coming almost daily to this parking place and then going out to Europe. She wants to spray Gans. She doesn't know the reason for all this Military movement but feels it is not good).

K- There are two things. Military usually have a summer exercises in Europe, mainly in Germany, and on the other hand, there is huge amount of hardware is moving into Ukraine through Germany. It can be any (thing), but there is usually summertime, this time June, July, large scale military exercises are put on. (2:40) Especially coming, starting in July, and they all meet from all over the world, all over Europe. In July, is this year, is very much locked in for one of the biggest exercises, military. In, it could be possible, but the size, there's a lot of hardware that's going into Ukraine from different sides. Very recently I was in one of the Eastern Bloc countries, few weeks ago, and we see a continuous military line going into Ukraine. So, it's, if it's for exercise, wish them all the best, and if it's there to kill more people, maybe your vision, these Gans's will bring that change to the soldiers.

Q: Hmm, I wish all people will hear this, they can send also the good energy to this.

K- Which part of Austria are they in?

Q: Upper Austria.

K- Where? I live in Upper Austria, where?

Q: ?? Feuerbach, it's near Wels, near Linz, near Linz, it's... So, a lot of cars, a lot of military trucks, and they're absolutely new, they're new make this.

K- These new vehicles are majority going into Ukraine. But, on the other hand, July is, this year July is for a very large military exercise in Germany, always is. (2:42) Usually, July is a time for this. But not to this scale, because I know huge number of military hardware moves even from England into Germany this time, every year around July, June, July. But not at this scale, we're talking 50, 100 vehicles. Thank you very much, and I hope, I hope it's for good purposes. I hope it keeps some young people busy for the summer time. And it's not for anything else.

Any other question?

Q: ... A special shout out to the 'Legends of Linz.' Amazing the work coming from the team there. (2:44) And, I've just got to say hello to Rafael, and the transcripts he's putting out. I hope Knowledge Seekers are subscribing to that work that's being put out, because some of the summaries there are, reveal so much more than what I think I understand from these teachings every week. So, it's great that those resources are there.

Mr. Keshe, I am really interested in your conversation with Ivan, recently. He's been asking some good questions. And, I'm kind of going back to the last time I spoke to you, and coming. It sounded like Ivan's actually been on the Friday session, something that I'm not fortunate enough to be involved in. But, coming from someone outside of the Cosmic Ray connections, you said last time that the way to connect with your Soul is to move down the fields, is easier to do that. And, when you were talking with Ivan, he sort of summarized that meditation's not the way to do that. Connecting in with the fields is what you've advised. So, that leaves people in my sort of situation in a difficult place, because for me, meditation has been incredible in terms of activating my pineal gland and trying to connect in with the energies that's around. So, from that perspective, how do you try and connect in with the fields and connect to the lower levels? For me, I was thinking it would be going into an alpha state of meditation.

K- Meditation is to do with the physical body, and it's easier to go through the Soul. The meditation is all to do with the physical dimension. If you understand how to work with the fields, energies within the center of the body, you don't need to push the physical body.

Many people who have been through the processes with the Keshe Foundation in Linz or whatever, they say, "What it used to take me 2, 3 hours or an hour to get to this point in meditation, I just get so fast." And we have had (heard) tens of times from people who are expert and do a lot of meditation, when they go through the system, they say, "That it

takes me so long to get to this point in my meditation, with this I go just naturally, very fast."

Again, goes back to, do you move the mountain or do you move Mohammed? And it's easier to move the man than a mountain. And the Soul is so powerful, that you don't need to go through the physical position to allow its field to be shown, if you know how to go into it. You don't need meditation to do... We are used to it because we go through the back door, through the physical dimension. But if, let's say, meditation brings you to a certain point, you have to bring a lot of physical condition to a position to get to it. If you expand the Soul, you're immediately where you wanted to get to the... by the physical condition. And that's where the difference is. (2:48)

And those many hundreds of maybe people I've spoken with over years, they say, with this, the process we show, it's easier to get to the point where they try to do it for half an hour, an hour, whatever in meditation. So it's the same, but in a different way. Instead of going from the bottom up, we go from the top to bottom.

Q: So is a way to 'hack' this, to meditate as we drift off to sleep, and as our Soul starts to activate during deep sleep, some way to forge our way to, towards the lower fields you're talking about?

K- It's not lower fields, maybe it's a stronger field. We go by the strength. It's how you open that 'Pandora box,' every time. What 'key' you use and what method you use, but it's the same thing, the same Pandora box all the time. And this is how... It needs understanding, that how meditation brings you in the dimension of the position, where you get actually in the sleep time, in dream time, prior, or around that time, gives you that freedom. But this time you think you have control of it, at least you can get to the point of whatever you like to be at that point, comfort, pleasure, nowhere, whatever. You can do that with the dimension of the inner energy, what we call, the Soul, immediately. With the understanding how to do it. (2:50)

The secret we have not shown, the position we have not shown, and I don't think mankind is ready for it, is the creation of motion of the Soul. Up to now, what we dealt with you with all the systems we use, the headphones and everything else, you more or less, you're living or you've been using or you have access to a static dynamic system, where we need to use a dynamic system, if you understand both in physical motion and field motion. And then that's where the beauty starts. That's where the world of Creation comes in. And that's a piece I have not put in to the structure and some of you, if you look at the videos I released years ago, from weight reduction, in Belgium, where we start, I think it's about 9 kilo, we come to 3 kilos, whatever. I show it in there, but because you're not knowledgeable, you don't see it, you don't understand it. And I laughed many times, I used to look at it, they couldn't see. It's like that liquid in the, what you call it, the Coca-Cola bottle, they call it the Keshe Gans, what you call it, magic liquid or whatever.

And all of us have that capability to expand the Soul instantaneously. But we don't know the technique, we don't know the way, the way we are created is part of our creation.

We've forgotten how to do it. And those who can, create different dimension of physicality to hide it, not to show it, or they don't understand it, but it happens. (2:52) It's the same with the Soul, it's the same with meditation. What you take point to get to that point of meditation, where you feel safe, you're there where you want to be, it can be created actually within the cocoon of the STM, expansion of the physicality. Expansion of STP, it brings so much protection, you feel good with it and you're there where you want to be. And when you get that point, you come in touch with the openness of the Universe.

We will, as I said, in July, August, we will bring this to the front. We'll most probably open the channels for it next week, or next Thursday. That you can register for it. But it'll be in small groups, we tell you what groups, what hour, and how long, it won't be long sessions, because it can bring a lot of, what you call it, it can bring a lot of you into a fast transmutation, and even what you do as a Soul. It's a very, very... It's just that we have to prepare our lab for it, and the environment for it, that you all can come in, and can have as many people, as few as possible, but manageable team together. We most probably divide it into Chinese timeline, Central European timeline, and then American line time, that we catch everybody awake. Because you need to be awake to go through this position, you can't be that you're half asleep. And you'll see the beauty of it.

I'll change the course of humanity, in reaching his Soul in the next few months, and then you understand. Thank you very much. (2:54)

Any other questions?

R: I think Ivan has a hand up again here, that he mentioned he has... He says he can share how he does it. The key is your intention to do so, nothing more. You control and go where the intention goes. Is that... Did you want to speak Ivan?

Q: ... It was just a question, so I can share some light, what I do. So, you know I have this ?? device on my hand, that is a watch. So, the first time when I did it, it's just your intention to do so. You have to understand that, at least I understand it, that when I move my hand, the only reason that my hand is moving, because I have the intention to move my hand. And it's a direct communication from each part of the body. It moves because your intention is there to move, so you move the field. And the only reason that you are not able to move the fields around you, because you don't know that they are there.

So, once you, like example, decide to pay to the intention, okay, pull the fields inside my brain and just pull. So, I even think that I understood the process of breathing a little bit different, because when I breathe in, I'm actually taking the fields in my body. (2:56) And when I breathe out, I do not breathe them out, I take them deeper. So, it pushes the field to go from inside out. So, I imagine that in my head, that I'm just pulling the things deeper and deeper. And once you understand that this is real, and it's actually happening, and you're not imagining it, you can do whatever you want with your intention. At least, it's what I do. And it's very interesting, this ?? device, the watch on my hand, actually showed me that I was in two hours of deep sleep, and I was not sleeping. I was very

concentrated to control, to try to control and go in the different field strength. But just because the body is not moving and the heartbeat is very down, or I don't know how exactly to measure it, it showed deep sleep, but I was not sleeping at all. So, the key that I do it is with my intention to do it, nothing more. I just have to concentrate and keep the intention on what I want to go, or what I want to do. And to experience it with knowing that whatever I experience, it's okay not to put a block, because in the previous workshop Mr. Keshe told me that it's me who is blocking it. So, I try not to block it and just accept whatever it comes. And that's it...

K- Thank you very much. Those of you who join us in July, August and September session, make sure your phone is exactly the way we tell you on the left or the right. We had this before, we took it out. But in the sessions of June, July, August, make sure your headphone is exactly connected the way we tell you, (2:58) left to the left, right to the right, and which one is our left and which one is your left. And then we go through the process.

Any other question?

Q: ... When doctors transmit Cosmic Rays to the headsets, to balance the fields of people with Parkinson's or Alzheimer's or other neurological illness, what happens to the causative toxins like Lead, Mercury, Aluminum and Spike proteins that have built up in various parts of the brain? How are they eradicated?

K- We don't touch those. We don't touch those.

Q: ... Does transmutation provide an opportunity for the body to let go of accumulated toxins?

K- .. Maybe I can explain to you something in a different way. In the Plasma world of what you call, contamination, we always said, I had a long discussion with the Italian scientists from Nuclear Center and Contamination Center, years ago. We do not destroy the radiation source. We use the radiation to become the energy for use. This is a very big difference. It's the same with the material contaminating the brain. We don't get rid of the Aluminum, whatever they say is in the brain, but we use the energy of it. (3:00) Instead of interfering with the current flow in the brain to create energies for the rest of the body.

And this is a totally different thing, the understanding, different thing. Because in a lot of cases, when we go into the high level nuclear, specially in radiation contamination, the detectors detect the radioactive material, but we don't see the signs of the radiation or radiation damage. It's a knowledge which we don't have. The plants do this with Nitrogen. It's a natural process if you understand how to trigger it.

So, these contaminations in the brain, they say, comes because of the Aluminum and whatever. You don't destroy, you still see it, but it doesn't have the connection which it had, which caused the damage. And we don't expel it out of the body. If you understand this, you understand it's a different knowledge and technology altogether. We saw this, I

mean, the test we did in Fukushima fire station, in Fukushima during the... when Yukako went there, and we were doing the test, because you are looking at other things, we are looking at other things, as if ?? this is nuclear structure.

You can use these materials as a source of energy. It's like you put a fertilizer. The fertilizer doesn't give us all energy in one go to the ground. Slowly releases it. You use a radioactive material or the contaminated material in the body, has become a source of energy, but it's isolated. You decide where it goes. And so, yes, it can be done. (3:02)

Any other question?

Q: ... In the process of transmutation, the man transmutes from his country of origin, or to another galaxy, for example, from Brazil to China. I appear there as a Chinese man, my physiognomy has totally changed, but when I return to Brazil, will I have the same physiognomy as I've had before, so that my family will still recognize me?

K- What does that mean?

R: When he goes to China and comes back, will he be the same, so that everybody will still recognize who he is?

K- Yes, yes, you won't change.

Q: ... How can Plasma Technology explain Lupus disease in women? Can it be reversed?

K- Lupus disease is the one which creates a butterfly in the face, (3:04) usually they call it the butterfly disease. It can be helped, but it's very hard. It's a very, very drastic, very extreme ADHD, but more HD, attention deficiency. People put tattoos to get (more) attention. If I'm correct, if you're talking about the same condition, which we see like a butterfly is known on their forehead, on their eye area. This is why you do this, to get attention. I need attention, when I have it there marked in my face, you can't miss me.

And this usually works with the partners, abusive relationship. And once they get hooked on it, they will not let it go. And it's always everybody else's fault except theirs, and it's always they're a victim. And they convince their partner that they are the victim, they convince their family they are the victim. Very interesting, very, very interesting condition. ADHD is active, it moves to get attention. Lupus doesn't need, because the action sits right in front of it. If you go on the Internet, you can dig it out, you can see what I mean. (3:06) It's known, if I'm talking about the same disease, it's known as a butterfly disease by a psychologist... If you go on the Internet and look for it, if you're talking about the same disease, the same condition, it's known as a butterfly, they create a shape of a butterfly between the nose and the eyes and the upper cheek.

R: So you meant Lupus?

K- Yeah, if you bring it, it's one of the signs of it, if you're talking about the same disease. And yes, there is a solution for it, but no, there is no solution for it, because they keep on changing the 'goalposts.' (Means when you solve the problem they create a new problem further out, the goal posts keeps getting farther away).

Any other question?

Q: ... My question is, if we cannot attend the Iranian conference, will we still see the flight system later, or is this for the people who attend only?]

K- It's for those who attend only, (3:08) and it depends what the Iranian government and military decides to be shown. This is an international conference with a lot of implication worldwide. It depends what will be decided. As you know, we don't let nothing to be transmitted out of the conferences, we don't allow nobody to use cell phones or mobile phones, and we don't record any of the conferences. And Iran will be no difference. But again, we are going to Iran to show technology, and it's for world population to see. But then, I'm sure our Knowledge Seekers will expand on it, when they go and what they see and what they've seen. It's still in the process of setting it out and developing it, and we've got plenty of time. But, we have to see what is the... what's the directions from Iran, and how much is going to be shown, and what's going to be shown, and to what extent. But lift and motion will be the primary show.

I actually talked to one of my friends in Iran, said, if they don't mind bringing a 1 meter 20 by 1 meter 60 Iranian handmade carpet, that we can put a system and then you see a, what you call a flying ??, a 'flying carpet.' It will be very interesting. But we'll see how we show it.

There is a... in Iran, some decades ago, half a century plus ago, (3:10) we had a public bath, which was running... It's been going on for centuries, with one candle. And it was always hot boiling water with one candle. And nobody knew how this was made. And the British got in there, few decades ago, as usually being in those days, and they destroyed it, trying to find out. We might unravel that in Iran during our stay, to reignite that, what we call, public bath, it's a swimming pool. They call it a public bath. With one candle we can switch on and heat up a swimming pool. The scientists who made it, understood the Knowledge of the Creation. And now we have access to it, we might show it.

Any other question?

Q: ... If it is not the essence of emotion responsible for bad behavior, but rather the interactions of physicality, so in this action of bad behavior, there is no movement of the man's Soul, since motion is emotion?

K- Come again?

R: Doesn't make sense to me either. There's something not right with the translation there.

K- Yeah, it's a riddle. (3:12) Okay, give me one more question and then we call it the day. ...

Q: ... Does the STM work like the reactor described on the Keshe Wiki on the page about the simple guide for producing Gans's of Tritium? There is a reactor setup displayed with H2 Gans in the center, which changes to H1 or H3 Gans, depending on the Magnetic field configurations around it. The change is each one neutron. Does a small change in fields have a similar effect on the STM? Is each neutron created by the STM, a child of the STM? Are the headphones an analogy of this reactor setup?

K- In a way, yes. In a way, in a very long, long twisted, bended way, yes. But it needs understanding of it.

Shall we call it the day?

R: Yes, I think we've done double, triple over time today. So, thank you Mr. Keshe.

K- Yeah, thank you very much. We'll see you next week. And hopefully, we'll be there. We try to post up the sessions for July. And as I said, it's going to be very, very limited, because we need to give people an hour to 2 hours maximum. And they can't spend a whole week doing it. (3:14) But it will be bracketed into small groups, that they can time zone it, that they are in it fully fresh to do. It's going to be time consuming and very heavy on us, but we can sort it out and then by September session, hopefully some of you in the first session will be able to start the process of understanding how to transmute in a different way. But we still control everything, it's not that you're going to run away with it. But it basically gives you the process of understanding and doing it. And while we are there, you can attempt it and direct it and we tell you what to do with it.

And those of you going for the Iran conference, please go through the way we said. That's the only way we're going to accept. There's no use you going through and sending money or doing anything. So register on the Keshe Foundation website. Get the code number, we'll tell you, KF whatever. Send it as a donation, this is the reference. Nothing else and then we accept it. Thank you very much for today and see you next week.

R: Would you be able to get Jalal's hand in? Did I just get jammed in at the last minute here?

K- Yeah, just come in. We have to, don't we?

Q: ... Okay. I think I know how to live a thousand years now.

K- You think you know what?

Q: I think I know how to live a thousand years.

K- Congratulations.

Q: I will ask Rick if he wants to jump with me. (3:16)

K- Congratulations.

Q: Thank you very much Mr. Keshe. We need to learn how to... We need to learn how to learn to need. And I think we're going to live one thousand years. Thank you very much Mr. Keshe.

K- Thank you very much Jalal. It's good he didn't ask three questions. Thank you very much... Thank you Rick. See you next time.

542 KSW June 13, 2024
