

# 543rd Knowledge Seekers Workshop June 20, 2024

(Quick Index 17 pp, Introduction, Topic Index, Proofing done ; Need to do; Key Phrases, Words) (Auto transcription from Elias)

Ask Light for Enlightenment; During Transmutation light of P - Light of Enlightenment - interact with ask for Knowledge of Creation; Don't jump into Light - remain conscious; Speak languages; Switching point to access Knowledge; Break through barrier - to Soul; Man's knowledge imaginary - fake; Knowledge of Unicose at fingertips; Light gives knowledge of how to live at destination; Be humble - follow Ethos Mitra; Enter Sun on going & coming back - twice; Iran conference; N convert to C14 (plasma) & C12 (matter); Behavior not emotion - more teaching; Show T in Iran change humanity - industries finished - shipping - auto - communication - government have to accept change - quick transition; 2nd conference in Tehran - world governments; Keshe coin; 2024 year Change; If try to kill Mr. Keshe T released immediately worldwide - worse condition; Show hidden T; Planet tilted variety life - seasons; Angle fields - X-ray machines - nuclear; Similar AA in solar system; Beautiful People - gender - through Soul - sex change; Hormone change psychosomatic; Give birth 120; Adam & Eve; Next Messenger woman - daughter of Mitra; First Messengers women; Jewish Lobby controls White House; Middle East discussion; Steven Greer; Mercury in brain - negative; Loss of Mother at 5 years - Prince William; start advanced T.

## Topic Index

Daylight created from Sun & Earth - part of physical dimension (D) of Solar System (SS); Science says there is a Black Hole in center of galaxy; Paper on Black Holes - recycling systems - any matter goes in - releases some light; Outside our SS - would we see light in center of our Galaxy - center of U; We'll be in space between SS and galaxies - directly interact with light of center; Would it enlighten us - process of Creation; No intermediaries when see Light; Interact with fields Light of Creator - get enlightened; When we travel in Space we'll face the Light of Creator; Is light from center of U - Light of Creator; It doesn't matter where we are - we'll still receive enlightenment from interaction of fields of Soul - with Soul of Creator (STC); Through transmutation you'll see this Light - give you ability to travel U; Soul cannot be confined to Earth or SS; Receive energy directly from Source; Will you like what you see yourself as; What is normal to us could be enlightenment to another; Many getting close to transmutation - some have achieved it; You will see this Light - at first deny it - become guideline - Light of Knowledge; Some have seen the Sun - went into it; Can be P dimension or 'Sun of Reality' - Knowledge - Enlightenment; In Transmutation try to remain conscious - Light will enlighten you; When see - ask enlightenment from it - understand what you can do with it; Many have told us they have been to Sun - either physical light - or light of enlightenment; Test yourself - answer from Soul; With enlightenment - don't need to talk - or be talked to; Tomorrow's Flight session - see according to enlightenment of Soul - knowledge of time, place & position (TPP); When see Light ask for Enlightenment; Communicate with it - get what need - don't ask for 'pot of Gold'; Maybe to speak a language - understand new emotion - more about transmutation - Knowledge of U is

there; It's how you interpret it - apply it - bring back to physical D; When came to Linz Center - traveled to Sun - now master it; Practice it over & over - go to it immediately - switching point; When transmute from France to China - speak Chinese know culture; Return back to France - Frenchman again; Travel again through same enlightenment process; We know this process - like Near Death Experience - cross over - see the Light - light of enlightenment - not light of death - do this when you transmute: But the Light for enlightenment - access Knowledge of U; Like passing through Sound Barrier - but here see the Light; Ask it to learn French, German, history of U; Switching point to access Knowledge; Don't just stand there in front of Light - remember to ask it for enlightenment - knowledge - it will be given; Have to break through this barrier - didn't know how - just went to center of Sun - now can ask for something; Still connected to physical D of STP - will hear & feel emotions like physical D; Go through barrier - receive gifts - beauty of Creation - travel to other places; At speed of STM; Light of Creation - gold color; Get used to switching point - elevate Soul - increase knowledge - enlighten yourself - learn whatever you want & bring knowledge back to P; Soul will understand gibberish - translated to human thought; Ask for Knowledge of Creation; Call them 'enlightenment sessions' of transmutation; Start doing this in tomorrow's session; If want to speak Chinese can do in transmutation; If wanted to be a physicist - ask the Light; U becomes encyclopedia - go to the Light for knowledge - how man will progress in knowledge; Train yourself how to switch into the Light - receive Knowledge - knowledge of Unicose - at fingertips; Don't need to study 'imaginary knowledge' of man - all fake; Learn from Knowledge of Creation - you become an observer; Not just going to sleep & traveling - learning how to behave - become servant to those who need to learn; Arrogance takes backwards; Ask the Light questions during the transmutation - build new future for mankind; To comprehend it - much harder than anything else; If fortunate enough to see Light - do not jump into it - interact with it; Connect to Light will give knowledge of how to live at destination; STM interacts with Soul of U - receive knowledge; Tap into light of citizens at that TPP - Beings don't need to be tangible - fields and energies; Had to teach this today - tomorrow you will go through - be prepared; Understand Knowledge of U through your own Soul - not baffled when see light of Sun - Sun of knowledge - ask for Knowledge of Creation; Key - never ask for everything - get nothing; Always be humble - obedient - then you'll be followed; Follow Ethos of Mitra; Never use knowledge to harm others - opens beyond imagination; Chose how want to see Sun - Light as physical or 'light of enlightenment'; Ready to become travelers of U - with this be able to survive in U; First time frightening - get used to; How you navigate U; July through September sessions only small groups - tap into this Light; Need to know what to bring forth from Soul - how to interact with environment - correct and safe way to manifest; KS have seen this Sun and Light - but went into it; Try to ask it questions and for Knowledge; Be humble to receive; This will change mankind; Transmutation & physical Transfer will become a joint venture in every D of Creation; Enter two Suns - when enter and return; Like buying a "Return Ticket" on Earth; Can also make excursions during that travel; This is how the game is played; You had to see the Sun to understand it - now communicate with it - be enlightened by it - through enlightenment take manifestation of P; The way to travel U through STM - without aircraft - UFO; You always looked at Sun as physical light - now look at same Sun through Soul; Sun of Enlightenment - know how to handle - become true citizens of U - transmute through it -

transfer through it - manifest - live & return back home through it; I hope many achieve it tomorrow - able to control it - then bring rest of humanity.

## Part 2

KF Store - click on cancel instead of 'sign in'; About Iran conference and procedure; Do not be worried by what you hear in news about Iran - welcome 'home'; Stay with KF team during travel; Nitrogen (N) converts between C14 & C12; N exists in dimensions; Collaborate physical life with internal energy; Go beyond Gans's - got stuck there; Easier to transmute and transfer; Emotion comes from a non-dimensional; Behavior comes from a dimension; How react physically in respect to STP; STP is a collection of all fields - all parts of body; Show behavior through physical response - shouting etc; Emotionally cry, laugh etc; When emotion interacts with behavior - with STP - could get a kick; Translates an action into a physical manifestation - different form than emotion; STM & STP interact to create emotions; Behavior comes from STP & P; Behavior can be controlled because it's an entity outside STM; Behavior creates a field strength - then STM & STP create an emotion for it; Easy to isolate the behavior; Child doesn't get what he wants shows 'temper tantrum' - this is a behavior - comes from P & STP - has no emotion in it; But emotions can trigger it - STP & P manifest it; Behavior is connected with physical life; Emotion has a feedback input from 'back door'; Our behavior can have no emotion; Translate back into STP interacts with STM manifest emotion; ADHD is categorized as behavior - no emotion behind it; Talks about how showing new Transportation in Isfahan lead to permanent peace deals with nations; No choice but to revolutionize Transportation with new T - because T advancing rapidly; Man known as 4 wheeler race - never understood motion and emotion; Show lift & motion in Isfahan - change course of humanity - rely on Universal Energy - won't need P; Show new T to force change; Transport packages in minutes across planet - industries finished - automobile - shipping - communication; How will governments accept change - have to start transition period; Won't be able to control you - appear anywhere on planet; Start 'One Nation One Planet' structure; People with wealth - property want to block; Live on remote island - London in minutes; Our problem - how they will try to block T; Respond by end of this year; A second conference in Tehran just for world governments - Iranian government have to invite; T will force change - next year start end of shipping industry; KF to become center for putting it all together; End of aircraft & car industries; Communication industry next 5 to 10 years; Have to bring new political situation around the world; No more Dollar; Keshe Coin will have same value for all citizens of planet; Not have people getting 150,000 as doctor and cleaner at 15,000; Value according to what joy bring to others; First few years - mayhem - then accepted; Leaders try to make 'whites only' club - won't work this time; Travel with Soul - don't need transportation systems; Go inside brain of president - change it; Year 2024 will bring change; Shut down industries - governments have to act quickly bring transition; It's too late to stop; If they try to kill Mr. Keshe T automatically released around world - special arrangements made; They will not be able to shelve or block T; Will be worse - come out faster; Ending of borders; Empire of humanity - all equal; New generation below 25 years - embrace T quickly - fly skies - test everything - new inventions; No more wars; Never run out of money; People set up to hold credit - live peaceful life - not communism - live in universal structure of peace -

have everything we need - no child go hungry - all work towards good life for everyone; Not a dream; Show T hidden from public in Iran; One package to supply all needs; Release of T will not damage structure of life on this planet - brings order; No batteries for cars - no CO2 burning systems; Takes time to transition; Control of society through petroleum gone; Not dreamers - built systems to implement - take 10 to 20 years to balance out; C12 is matter state - C14 is Space Energy Transportation connection - plasma state; C14 is connection between Cosmic Rays (CR) & Matter State Rays - C12 - communication lines to everything; H can travel span of U on its own; Use C14 as a field of plasma - properties of H - important for transmutation & transportation; All planets work on 90 degree vertical angle - if tilted - get 4 seasons - life of Earth; The angle allows fields to interact absorb energy create plasmas; He worked with X-ray machines age of 8 - observed how angles of plates created new rays energies; Intensity of X-Rays created by angle of plates - created conditions; Same with nuclear reactor fuel rods; KF nuclear Space Reactors - safe - no damages; Share with IAEA; Change in Sunrise; Amino acid (AA) for whole SS is similar - has common denominator energy field of Sun; Emotional part of brain connected to STM; STP is fixed by physical structure - cannot change; STM has different strength fields; Strength of STM interacts with strength of STP dictates position where emotion in skull will be; Cannot destroy field - even if take brain out - different strength; Beautiful People or schizophrenia - why different genders - field strength of Soul - how it manifests itself in interaction with STP; About behavior of a woman or man - different field strength interacting with STP; Same way Soul taps into different knowledge - tap into Universal Energy - access knowledge - poetry, geography of the Universe - through interaction with STP - manifests in P; Population changing their sex - could be change in fields; Hormone changes - not understood related to Soul; Get menstruation back after 30 years; No limitation in strength of field of STM; Hormone change is really psychosomatic; Can give birth at 120; Hormones come from interaction of fields of STM; Nowadays through stresses - menopause at age 22; Soul cannot handle - goes to behavior; Story about Adam and Eve; Public statistics - women are more adulterous than men; Women Messengers - covered by male dominated society - winner writes history; Next Teacher - not Messenger - will be a woman - Mitra's daughter - she is among us; Need to multitask to be part of Universal Community; Very first Prophets were women - Iranians worship wives - Goddesses; Woman will take humanity through the Passage; Near Death Experience - saw a light deep peace - same emotion - held her mother's hand during her death - light of enlightenment; Do same in our systems; Ask questions of Light; Learn how to work with Light; Talk about Palestine - Lebanon - Yemen; Mess by one bunch of people; Warrants for Prime Minister of Israel - still allowed to rule; Spread to Lebanon; Jewish Lobby ruling White House - Presidents marry daughter to J Lobby - control WH through backdoor; Who Rothschild family decides to support - to be in W House; Iranian elections - family of Iranian rulers; Ayatollahs connected Lebanon - not Iranian - decision to share 'loot'; Dr. Steven Greer; Angels - your belief; Narcissism - selfishness; Mercury, Lead, and Aluminum add energy fields create negative emotions - problems; If in body - brain can find matching field strength - goes to brain - depends on person; Have knowledge to get rid of mercury etc; Very hard to explain death of mother to five-year-old child - best to elevate Soul; Go through transmutation - help a lot; Prince William - loss of mother Dianna; Next month start more advanced T.

## **Introduction to 543 KSW - Seeing Light in Transmutation - Physical or Light of Enlightenment - Behavior & Emotions - Metals in the Body - Field Angles - Matriarch to Return - Protect Mr. Keshe**

The main focus in this workshop is to prepare people about what to do when they see the Sun or a light when they go through Transmutation, what it means and what to do. But first we should discuss about light and what it is. As we are living and fully identified with our physical body, then the only light we know about is the light we see through our eyes in the physical dimension (D) and we call these photons, and we have been taught to believe that the light from our Sun is a physical light and it takes 8 seconds to reach the Earth. Mr. Keshe taught about the light in many workshops you can refresh your memory there. But briefly, magnetic (M) fields are transparent and are emitted from the Sun and when they interact with the fields of the Earth they create the daylight. We see the daylight because of the field strength of the amino acid (AA) in the liquid in our eyes matches the field strength emitted by the Sun, and also because the M fields pass over the optic nerve and the visual apparatus in the front of our head and it converts the M fields into visual images in the brain. It seems that our whole life is pretty much built around what we see with our physical eyes, it's like, it's our only reality. If for some reason we lose our sight then we quickly become aware of this fact. And we always say, 'I will believe it when I see it.'

What I understand is that we can go anywhere in our solar system (SS) and we will still see the physicality of the light of our Sun because we have the matching field strength, but we won't see the shining of daylight, because that comes from the interaction of the Sun's M fields with the Earth's. If for example we are in the space between Earth and Jupiter, the AA strength field in our eyes will be able only to recognize the Sun, but it won't 'shine' for us because there is no interaction of the fields in Space. Our science doesn't understand, nor do they accept the M fields to be able to explain this.

Then what would happen if we go outside of the SS, will we be able to see the sun at the center of the galaxy? It seems like they're taking pictures of galaxies and different things so the field strength must not be totally out of our range. But would our eyes be able to receive different field strengths? This I don't know. Maybe this is why scientists think the center of the galaxy is a Black Hole, because the recording instruments from the space probes are made of the field strength of materials on Earth. The other thing we have to consider is that our Earth bodies would probably dissolve when they cross the Coulomb's barrier of the SS, because it's of a different field strength. It's the same when we go from 'breathing' the liquid in the womb of the Mother into the air of Earth's atmosphere. There is a transition to a new field strength that occurs. If we were able to physically pass from our SS into the galaxy, then our body would have to go through a transformation into the new D. This is the same that occurs in Transmutation. And if we go into the galaxy, we would have to be in a spaceship that can shield us from the outside fields and maintain our Earth fields inside the craft. This is very interesting to ponder. The same scenario would occur when we go from the galaxy to the universe (U), but most likely there are other things that we don't know about that may happen, because we would be in a

completely different D. This all shows that we are a plasma inside of a plasma, on and on. We don't ever get away from this Principle of Creation. Sometimes we casually talk about traveling in the galaxy and U as if it is nothing. Now we know that there is a lot to understand and fortunately we are being given this knowledge so that we can begin to consider the reality of it.

Just suppose that we were able to cross into the galaxy and U, then if we were to see the light emitting from those centers, or would it just be M fields passing through us, and would they enlighten us? That's the question Mr. Keshe is asking us to ponder because now the Transmutation process has reached the level where more and more people are going to see the light. In fact, since they started this process 2 years ago many Knowledge Seekers (KS) have reported seeing the Sun, or a light and they don't know what it means or what to do. Some say they go into it. Mr. Keshe said to himself, I wonder if they know what this really means. From this comment I understand that even to see the Sun or the Light is a huge step. He said he had to give this teaching today, because in tomorrow's Monthly Flight session he is going to create the fields that many will be able to see the Light.

First of all we have to decide within ourselves whether the light we are seeing is a physical light of the Sun that shines, or is it the 'Light of Enlightenment' in the Soul dimension. If it is just a physical light then I am sure we would have a very nice experience but it ends there. And if it is the Light of Enlightenment and if we can remember what to do, then we can ask it for things like enlightenment, knowledge about languages or science or something that interests us. We can also ask it for the Knowledge of Creation. He gave some guidelines for asking. We shouldn't ask for everything, or to get rich. If we ask in a greedy way like that, we will end up with nothing. Rather we should be humble and want knowledge to share with others and to help others learn. At first when we see it we might get scared of it, but as we repeat it again and again we'll get used to it.

During the Transmutation it is important to remain conscious and try to develop a relationship with the Light. It's important that we understand that this Light has the power to enlighten us and change our lives and that of humanity. And we need to ask for it. Then we have to understand what to do with what we achieve and then learn how to bring it back into the physical dimension. If we keep practicing with it over and over then it will become easy and a part of our nature. Then any time we want to learn something like physics for example we can go the Light and learn the true Knowledge of Creation and not the fake knowledge man has created for himself. It's amazing that we will have access to the whole Knowledge of Creation and all the time we are carrying it within us. This is also where we are going to get the knowledge of how to begin our new life anywhere in the U when we transmute there. When we arrive we go to the Light to learn what to do to survive and live in the new environment.

He spoke about this relationship with the Light as similar to breaking the "Sound Barrier" like when they fly jets. But in this case we are breaking through into our Soul, and then we'll have access to it all the time. So again, what is important is that if we see a light that

we shouldn't get baffled, freeze up, or get distracted by other things. Instead, first we should determine if it is a physical light or the Light of Enlightenment, and he said, don't jump into it. Maybe this is because if you jump into it then you might fall asleep, go into a trance, or end your time in physicality. We want to become aware of the Light, remain conscious and then use its power to help ourselves and humanity to live better lives. If we remain conscious of the Light and get enlightened we'll be free to help humanity and travel the U. Remember he said, we have started the completion phase of the teachings. But maybe it is more like the beginning of being able to understand the Knowledge and then it goes on forever.

The discussion about behavior not coming from emotions went a little further but it is still difficult to sort out. A common definition of behavior is how a person responds to a given situation. So this matches with what Mr. Keshe said about behavior, that it is how we react with our physicality in respect to the STP. This in some way feels like it might be a little bit mechanical, where we react to a given set of conditions and that reaction is standard for humans. He said behavior comes from a dimension, which in a way, could mean a given set of thought patterns and conditions that control an environment. For example, if we are starving to death, then humans will react in pretty much the same way. They will do whatever it takes to get food, even if it goes against their belief system and what they feel is right and wrong. So I think of behavior as how the fields of the P and STP interact in a given set of conditions or circumstances, and it tends to be more mechanical.

Where it gets difficult to comprehend is when the emotions get mixed up with the behavior and it takes a lot of insight to untangle them and sort out which one comes from where. We know that emotions are created from the field interactions of the STM with the STP. And when an emotion gets created and if it interacts with the STP it could result in making the P behave in a certain way. This is where he said we could get a kick or something from the body reacting. This is where the fields of that emotion got translated into an action, but it came in a form that is different than the emotion. Maybe this is when somebody's action is considered not normal, and an emotion broke through and got translated into action.

He said, behavior can be controlled because it's an entity outside of the STM. This is interesting to consider it as an entity. Is it an entity made out of the fields of the STP and P? When the STM is the dominant force in a person then they have control over their behavior and emotion. So if they are starving to death they would have the power to choose how to behave, and whether or not they would violate their own Ethos.

Another interesting point is that where emotions and behavior get foggy, is when the STM and STP interact with the fields of a behavior and then create an emotion for it. And when we gain enough awareness to watch this happen in ourselves, this is the time when we really start to have control over our own lives. Emotions can also trigger certain behaviors. When a child starts shouting in a temper tantrum, that action in itself is coming from the interaction of the fields of the STP and P and has no emotion in it. But the emotions can trigger the temper tantrum and also get mixed up with it. If the parents

have a lot of awareness they can separate out the different parts and guide the child to gain more control over himself. But this is very difficult and the parents would have had to correctly dealt with their past. This is where we can see how the repetitive patterns of behavior pass from parents to children.

This is also part of where the emotions can create a 'feedback input' into the behavior and add to it. He gave the example of someone who is nasty all the time or tells jokes all the time. This behavior in itself has no emotion in it, it's just the way a person is. I am sure we have all known people like that. And sometimes the behavior of being nasty can satisfy an emotion they have. So in other words, sometimes the person really is being nasty. They have put their emotions into that 'nastiness.' This takes a lot of awareness to sort these kinds of things out in ourselves. This is part of the spiritual work that takes us inside to discover who we are, then we can choose to be who we want to be. When I think of my own process, what gave me the strength to do this inner work was because I loved someone so much that I was willing to go through that 'fire' of looking in the mirror and feeling the pain of when my actions would hurt someone I loved. And the only solution is to find the root cause of the behavior and the emotions linked to it, then we can change and take control over our lives. Mr. Keshe ended this teachings by saying, once we understand this then we'll know if we are in the dimension of P or in the D of the STM. And now we know that this is needed when we see the Light during the transmutation.

At a very early age of around 8 years old Mr. Keshe started noticing that the 'angle of incidence' at which X-Rays reflected off of surfaces made a difference in the intensity of the voltage and current. If a ray hits a surface at 90 degrees or straight on, then most of its energy is absorbed by the object and we don't get much interaction of the fields. Most of the planets work on a vertical 90 degree angle which is straight up and down. On these planets we don't see much variety of life forms. In this regard, the Earth is unique in that it rotates on a slight tilt which goes back and forth throughout the year. This gives us the 4 seasons and all the variety of life on this planet. The angle causes the fields to interact more and eventually create more plasmas. The important thing to learn from this is how the fields interact with each other and the more interactions the more complex the life form, because more plasmas are created to interact with each other. Whether or not we can control the angle at which the STM and STP interact with each other has not been discussed much. But he has referred to it over the years. For instance, when we lie down horizontally in relation to the Earth's fields it effects us differently than when we stand up vertically and move about. I think there is a huge science that has to do with the angle which fields interact that will be opened up in the future.

He talked more about what effect showing of the technology (T) in Iran will have on humanity. If they successfully show 'Lift and Motion' in Iran then it will be the start of the change for mankind. We can be pretty certain that since Iran was given the T in 2008, along with the rest of the world, that they have developed and use a UFO. Mr. Keshe has hinted at this many times, but it is not out in public yet, and the Iranian public doesn't even know about it. But all the governments know it and keep it secret. This is the importance of this conference, because the T just has to be shown somewhere to at least a

few humans for the shift in consciousness to occur. It will be the signal to humanity that the time of change has come and all the industries like shipping, auto, and everything else will change. The loss of jobs will be huge and this is why the governments have to accept the change now so that the transition will be smoother. During the transition time we can be developing the matter-plasma state of the T, like plasma cars for example. This is where we come into problems with the ones who are in power and don't want to share it. Let's hope and pray that they don't try to assassinate Mr. Keshe again. We have to be vigilante with our Intentions. He said, if they try to kill him before the Iran conference to block it from coming out, then the T will be released automatically worldwide. In other words, we'll be shown how to use the T in mass and the mayhem will be worse for the rulers. If they work together with Mr. Keshe then the transition will be gradual and smoother. I think one of the excuses the Elites are presenting to Mr. Keshe is that the release of the T will damage the structure of life on this planet. And his reply is, it will not, instead it bring order to our life. And remember that our innocent and pure hearted Souls have more power than all of their machine guns and lies.

My understanding of the teaching on heavy metals in the body is that mercury, aluminum, lead and materials like this when they get into the body they add energy fields that take the emotions into a negative direction. They have the affinity towards the field strength of depression and their characteristics are like the inert gases. An inert gas is considered very stable and doesn't change easily. So this is why they are difficult to get out of the body. Under normal circumstances the body would expel these materials, but it doesn't do it in this case, because there happens to be a matching field strength for it in the brain. So in other words, if the person is already depressed then they have that field strength in the brain, and if something like aluminum gets into the body it finds a matching field strength with the fields of that emotion. Since those fields are active, the body doesn't expel the aluminum. The way I understand it is, the aluminum doesn't physically travel to the brain, instead the fields interact in an Infinity Loop, and are brought there. Then the Soul decides to manifest them in the matter state in the brain. This makes sense if the person is already depressed, then the Soul adds these fields to what's already there. Then the doctors will find matter state aluminum in the brain and think that is the cause. Remember also that behavior is a field strength between the STP and P and it can draw the fields of the aluminum into itself. This is all about field interactions, and it is the same process as when we transmute. In this case, the Soul manifests the fields of these materials into the matter state. Mr. Keshe said, we don't take out the aluminum, instead we convert it into something positive. This will depend on the knowledge we have of converting plasmas into other plasmas that are useful. Another reason I can think of as to why we wouldn't want to extract the aluminum out, is because these fields have become part of the person and their personality, and how their Soul is manifesting P. Therefore, it has to be done in such a way that the Soul and the STP accept the change. Plasma Science does not work under the attitude of, "oh, that aluminum is bad, let's get rid of it." Instead we have to work with the totality of the Knowledge of Creation, and understand the broader effects an action will have.

The first Messengers were women and there were a lot of women Messengers, but the male dominated society erased them from history. Aryan cultures like Iran and India

worship the Mother and women hold a very high position. We talked about this a long time ago, and I said, that some scholars like Johann Bachofen believed society started out as a matriarch. After Mr. Keshe, the Daughter of Mitra will lead humanity through what he called, 'the passage.' And society will again have a true feminine influence, and not the abusive situation we have today.

Other Topics:

A second conference might be held in Tehran to show T to world leaders;

The amino acid, or COHN is basically the same throughout the solar system except for deviations in the different isotopes. It's because they all have the same common denominator through the Sun;

He talks about how Jewish influence is controlling the White House;

The loss of the Mother in the earlier years is hard to recover from and can affect the person their whole life. The only thing we can do is to elevate the Soul and transmutation can help.

Thanks for listening.

## Quick Index

(Today we'll share knowledge about the reality of the daylight, as it is part of the structure of our life in the physical dimension (D) of the Solar System (SS). Have any of our scientists or other knowledgeable people ever looked to see where is the 'Sun' of our Galaxy? Or have we accepted the assumption that the center of every Galaxy and Universe (U) is a 'Black Hole'? Does that Black Hole still shine light out, the way our Sun does? And if it does, what color would it be? What (kind of) light does it create?)

(In the first paper we wrote about Black Holes we opened the knowledge on how they are created, and that Black Holes are actually recycling systems. And also that when any matter goes into them, due to the interaction of the fields, they release some lights. Then the question comes, that if light is shining out, will we see it when go outside of our SS? (The SS have many planets with moons. When we rotate we see the Sun and our daylight becomes the confirmation of our interaction with the Sun. If we go outside of our SS would we be able to see the light in the center of our Galaxy? And if we go outside our Milky Way galaxy would we see lights from the center of the U?))

(If we can elaborate on the knowledge of interactions of magnetic (M) fields, then a new horizon of knowledge will open up to us because we have seen it here on Earth when the fields of the Earth and Sun interact to create the daylight. But this time we are not on a planetary system, instead we are in the space between the SS and galaxies, and the light of the center has to interact with us directly. How would the energy of this light change

and effect us? Would it enlighten us to (understand) the whole the process of Creation in the galaxy and Universe?)

(?? With this light there are no intermediaries, no SS or galaxy to cover us, to be inside it. If we go out of the SS into the galaxy, there would be no light to interact with, as we would be outside of the system, and would we see a light in the center of the galaxy? Would we feel the fields which come directly from its center? Last week we were talking about going outside of the galaxy, then would we see the light shining from the center, which is from the Creator? If we are traveling in the body of the man would it interact with our vision? Or would our Soul interact with this field? Would we get enlightened? What would it do to us?)

(This is one of the dilemmas that Knowledge Seekers (KS) who go through Transmutation and Transportation in the open span of the U will face. Even if we consider the center of the U as a Black Hole, it still inherits its fields that also create light. Is the light that comes from the center of our U, the light of the Creator?)

(Does it matter if we are within the physicality (P) of the man? (Or does it matter if we are on the Earth, or outside it? Or if we are outside of the SS, galaxy, or maybe outside of the U and the Unicose, would we still be able to see the light, (receive) the information or enlightenment, from the interaction of the fields of our Souls, with the Soul of the Creator (STC)? What effect will this have on us as a knowledge, or enlightenment, or whatever we call it?)

(Many KS who start going through the transmutation will see this light. As a simple Soul, as a single structure you will have the ability to travel the span of the U and maybe the Unicose. As a Soul or an energy in the process of transmutation you cannot be confined to the planet Earth or the SS. Your Soul is not confined to the span of this galaxy and the U. Then, what would you see? What will you observe about yourself? And how would you see the enlightenment, the energy you receive directly from the Source?)

(The biggest question will be if you like what you see (yourself as). Is this what you were expecting? (Is this the total process?) And when we go through the whole process of translating and transferring this field, would this field be normal to us, but enlightenment to another?)

(Many KS are getting close to the phase of transmutation and some of you have already managed to achieve it. You will see this light. During the first times that you see it you will deny it. But as you start understanding the process, then you'll take it as your guideline. It will be for you, the 'light of Knowledge.' Some have said that they have seen the Sun and went into it. (But that is the physical Sun. But the other aspect of the Sun is that of Reality, Knowledge, and the "Sun" of enlightenment. By interacting with this Sun it will light you up, or enlighten you. When you go through the Transmutation system you have to try to remain conscious, so that when you see the light you can ask yourself, "Do I see the light of the Creator? Does it enlighten me to the knowledge of the Creator?" And what do you expect from it and what can you do with it?))

(Over the past two years many of you who have been going through the Monthly Flight sessions have told us that you've been to the Sun. But knowing how you travel, was it just the physical light of the Sun? Or was it the light of enlightenment? It is for you to test this yourself and receive the answer from your own Soul. (A verbal answer is through P. Whereas with enlightenment you don't need to talk). You don't need to talk to be enlightened).

(In tomorrow's Flight session many of you will go through this same process again. In this process we'll ask you to do many things, and to choose a position in respect to what you consider to be physical, or to consider something to be your thoughts. None of you will be wrong, because it is what you saw, and you saw according to the enlightenment of your Soul, which is a knowledge of the time, place and position (TPP). (When you see the light, don't look at it as if it is the light of the Sun. You have to ask (it) for the light of enlightenment. At that moment you can ask it for what you want. Because you will be seeing the True Light)).

(If you receive and understand that light, and if you can communicate with it you will get what you need, and what will serve you. (It's not for you to ask for a 'pot of Gold' and you are given the Gold). Maybe it's something like you want to speak a certain language, or understand a new emotion, or want to understand more about transmutation. (These are the things to ask for). And then wait and see if by seeing that light, you receive the enlightenment of the Knowledge of the U). (Then it is how you interpret it. And how you can apply it in the D of the Soul of which you are traveling in). And then for you to apply it when you come back to the physical D of Earth)).

(Many of you who have gone through the Linz Center and these Monthly Flight sessions for transmutation have traveled to the Sun. But now it's time to master how to do it, (and how to receive the enlightenment from the light of the Sun that you see). When you repeat it over and over again you will find the switching point (and immediately go into the enlightenment. Then if you go from France to China through this point of enlightenment, you will be able to speak Chinese and know the Chinese culture like a native Chinese, because you've been enlightened through that light of the Knowledge. But you have to know how to switch (over to it). You have to know how to bring it in and to use it)).

(And when you go back to France you'll be a Frenchman again. Then when you decide to travel again you go through the same enlightenment process and then go to the new place to visit. When you leave China you revert back to being a Frenchman).

(We know this process. We have heard many people talk about their Near Death Experience when they cross over the line and see a light. That light is the light of enlightenment, not the light of death. (And you will do this when you transmute. But when you see this Light (you have to ask it for enlightenment). And know that it is a sign for you to (access the Knowledge of the U)). It's like passing through the Sound Barrier when flying in a jet. But in your case you have to go through it and see the light. (Then

you can ask it to learn French, German, the history of the Universe, and whatever else you are interested in, because all the Knowledge is there)). (This is a switching point (to access the Knowledge)).

(In the last few Friday sessions a large number of KS have been trying to do this. They tell us they go to the Sun, but then they just stand there and don't ask for enlightenment. You have to ask for the knowledge, and it will be given to you. When you went to the Moon and played with the sand, or went to see your uncle, that's all in the dimension of the Soul. (But we are talking about something different now. When you see the Light then you can remember to ask it for enlightenment. Because it's the Sun of Knowledge, and this is the enlightenment)).

(This is the barrier you have to break through. Up to now you were not aware of it and didn't know what to do. You just went into the center of the light of the Sun. But now you know that you can ask it for something. For example, you can ask to learn the language of the entity that itself lives within the Sun. (Or the language of any planet anywhere in the U and you will understand that language and culture to be able to communicate with them in their language). As you are still connected to your physical D of the Soul of the Physicality (STP), you will hear and feel the emotions as you do when you are in the physical dimension).

(You have to get used to what it means to get this enlightenment from the light of what you see. You have to understand what it means to go through that barrier. It means you have received the gift, and the beauty of Creation, and now you can (travel to other places). It's like passing the 'Sound Barrier' in the world of the physics. But when we pass this barrier we hear and we see ?? God. But in terms of the speed of the light of the STM. The light of Creation is usually a goldish color. (?? When you become used to this switching point then you can elevate your Soul, increase your knowledge, and enlighten yourself. You can learn whatever you want to know, and take that knowledge back with you to the D of physicality). (?? It's not just the memory of seeing the Sun, but you will remember languages. At least you will understand in human thought what sounds like gibberish to the P).

(When you go through this enlightenment of seeing the Light, you can ask for the Knowledge of Creation. It's not just to see your uncle who dies, or your mother and father, or the two donkeys down the hill grazing on the grass. Those who join in the upcoming Monthly Flight sessions, or what we call 'enlightenment sessions' of the transmutation, will go through this. We will also do this in tomorrow's sessions and you will start to become very used to it).

(When you come back for transmutation you will be able to speak Chinese, even though you never spoke it before. It was because (in the light) of enlightenment, you wanted to speak Chinese and it happened. Or you wanted to be a physicist, understand one part of the physics that you never understood before. As you do it more and more you will become good at it. In a way, the Universe becomes your encyclopedia and instead of looking things up on Google, you can go to the Light to get the knowledge. This is how

the man will progress in knowledge. Those of you who understand the process of transmutation will gain the Knowledge of the U. You will be able to tap into the Light of the Knowledge of Creation).

(When many KS told me that they had been to the Sun, I wondered many times if they really knew the extent of what that meant. They didn't understand that they had been touched by the Light of Creation. They received the knowledge and understanding of it. The next time you want to understand how a structure in the U works you can go through the phase of Transmutation and ask the Light for the knowledge. Because you will have trained yourself how to switch into the Light and receive the Knowledge. You can ask the Light to give you the knowledge. Then you will start learning how to use the vast knowledge of the U and Unicose, and it will be at your fingertips).

(You don't need to study the 'imaginary knowledge' of the man, which is all fake. Instead you can learn from the Knowledge of Creation. You become an observer. Those who join us now will go through this and the others will do it later in the future. You'll all learn about the Light. You'll all learn about the enlightenment. (It's not just going to sleep and going somewhere. It's also learning how to behave, that you become a servant to those who need to learn. And you won't be arrogant thinking that you can do this and that. If you think like this it will take you backwards)).

(Come with 2 sets of headphones to tomorrow's session. It can be 2 headphones connected to 1 mobile phone, or with 2 headphones connected to 2 different mobile phones. We'll tell you how to connect them. We'll try to take you through the emotion, so you can understand the work of enlightenment. Then you won't need to talk, but you can transfer the emotion. (You can go through the transmutation at the point you are aware of the emotion, and it can take you to the D of understanding the energies of the U).

(When you see the Light during the transmutation understand that it is the light of enlightenment. And try to ask it questions. Try to live with it, to see how it lives, and build a new future for mankind, and for yourself).

(The ability to comprehend it is much more harder and harsher than anything else. From now on when you go through the systems and if you become fortunate enough to see the Light, please do not jump into it. Instead, understand how to interact with it, that Light will bring you directly to enlightenment. (Do not wait for a day or two to see what else will come with it) (He might actually mean to wait and see what comes with it)).

(When you learn how to connect to the Light, then in the future when you transmute somewhere you can receive knowledge at the point of your destination. (?? You can connect to the 'Light of Enlightenment,' and with the STM interact with the Soul of the Universe and receive knowledge of how to survive and live at that destination). (You will be able to tap into the light of the citizens at that TPP. Those Beings don't need to be tangible, they might just be fields and energies, or a combination of the interaction of fields)).

(I had to teach this today, because many of you in tomorrow's session will go through this. You have to be prepared. We'll ask you to tap into the knowledge, and see what (you can learn). And just like when the first time you came to Linz, we said, we'll accept whatever you tell us. Because you are the one who is there to interact with whatever you have experienced).

(Tomorrow and in the coming weeks, we'll try to bring you to understand the Knowledge of the Universe through your own Soul. (So that you are not baffled by seeing the light of the Sun, and that you understand it is the Sun of knowledge and you can ask it for Knowledge of the Creation).

(A key thing to remember is to never ask for everything, then you'll receive nothing. Always be humble and then you can receive. Always be obedient, and then you (will) be followed. And always follow the Ethos of Mitra. Never use the knowledge to harm others and then the Knowledge of Creation will be open to you beyond imagination).

(The next time you see the Sun or the Light (during transmutation) ask yourself two questions. Is this (a physical manifestation of the Sun to me)? Or is this Sun (appearing to my Soul) as the Knowledge of Creation? Am I seeing it with the eyes of the Man, or do I see it as the enlightenment of my Soul? And if you can interact these two emotions, then you'll be ready to become travelers of the U, because now you will know how to survive in the U. The very first time you do it, it will be frightening. In a way, very frightening, and unbelievable. Some people get scared and they say it happened to me, but I couldn't handle it. Nevertheless, gradually you will get used to it. It will become your source of (navigating the U), or like Google Maps. It will become your Sun and your life map, and how you will travel the span of the Universe).

(During the July, through September sessions we'll only take small groups to teach how to tap into this Light. Because when you transmute to another TPP in the U you will need this knowledge of what to do and how to survive and live in that environment. You need to know what to bring forth from your Soul, and how to interact with the environment that will lead to correct and safe way to manifest your physicality there. Then you'll understand how to transmute. This was the purpose of all these sessions for you to slowly learn).

(A number of KS have seen the Sun and this Light, and because you are still a human you went into it, instead of asking it questions and for Knowledge. You did not (express a desire to receive Knowledge. This would have opened the Knowledge to you). (?? Ask and you will receive. But be humble to receive, and you'll receive). This will change mankind and Transmutation and the physical Transfer will become a joint venture for the Man in every dimension of Creation. Because then you will recognize that you have Transmuted and Transferred. (You will receive the Light you asked for. You will receive the light of the knowledge of how to live on that planet. (?? And as that planet has a different Sun, you will be able to see the physical light of that place)). So, you enter two Suns, one when you leave, and one when you return, as you have to return back to the TPP. (It's like when you travel on Earth, you buy a "return ticket" to go and come back.

But sometimes you buy an excursion ticket to take you somewhere else during that travel. And at the end you return back home)).

(This is how the game is played and how we had to take you step by step so you could understand the knowledge. Many of you had to see the Sun, to understand it. And now that you have seen it, you can communicate with it, and be enlightened by it, and then through that enlightenment take manifestation of physicality).

(In a way, it's a ticket to travel the span of the Universe through the STM, and not with an aircraft, UFO, and all the hullabaloo that humans got used to doing. It's not a rocket science, it's the science of how the Universe works. Up to now, you always looked at the Sun as a physical light, now you have to look at the same Sun in the dimension of interaction with your Soul. Now it's the 'Sun of Enlightenment,' and you have to know how to handle it. And when you get used to it you'll become true citizens of the Universe, because you can (transmute through it), transfer through it, manifest through it, live through it, and the return back (home) through it).

I hope you KS understand what is here, and that many of you will achieve this tomorrow. And that you will be able to control it, (then in the next few months as you develop it, we'll bring it to the point (that the rest can do it)).

**End of Quick Index Part 1 - 543 KSW** June 20, 2024

(On KF Store problems with seeing products - click on cancel instead of 'sign in'. About Iran conference and procedure. Do not be worried or baffled by what you hear in the news about Iran, you are welcome 'home' and everything else is fairly open. You can stay with the KF team during your travel).

(The Nitrogen (N) converts between the Carbon 14 (C14) and Carbon 12 (C12). The N exists in dimensions. You have to learn this. This is how you collaborate your physical life with your internal energy. It's important for us to bring you to this point, so that you will try to walk away from the Gans's we showed you. We did that to show you that matter has energy, but a lot of you have gotten stuck there. It's time to move forward to the fields, then it will become very easy to transmute and transfer and the rest of it).

Q: In the last teaching you said that, "The behavior doesn't come from emotions, it comes from the interaction of the physical dimension and the field interactions within the structure of the STM." If possible, could you please expand on this?

K- (The emotion comes from a non-dimensional. Behavior comes from a dimension, which means how we react or move physically in respect to the STP. And the STP is a collection of all the fields of all the parts of the body including the lungs, liver, kidneys, etc. (We show our behavior through kicking, shouting or some kind of physical response)).

(It's not that the heart and lungs kicks, rather is that the (behavior shows itself) through the physical body. Emotionally we cry, shiver, laugh, shout, or do whatever. (When our emotion interacts with behavior, with the STP, then we could get a kick or whatever. It translates an action into a physical manifestation, which is in a different form than the emotion)).

(The emotions come from the interaction of the STM and the STP. But the behavior comes from the STP and the P of the man. Behavior can be controlled because it's (an) entity that is outside of the STM. (Then behavior creates a field strength that STM & STP create an emotion for. When you understand this, then it is very easy to (isolate the behavior). When a child doesn't get something he wants and shows a 'temper tantrum' by shouting and kicking or whatever, that is a behavior. It comes from the P and the STP and has no emotion to it. But emotions can trigger it. And then the STP and P manifest it)).

(Behavior is very much connected with the physical life, where emotion has a feedback input from what I call, the 'back door.' (We can be nasty or telling jokes all the time. This is our behavior and it has no emotion. But sometimes nastiness satisfies a certain emotion. Because now it translates back into the STP, which interacts with the STM and manifests itself as an emotion of it. It is as simple as that. (This is why ADHD is (categorized as) a behavior, and has no emotion behind it, except (to control ?? it). Wanting to have "kingship" over the others in the family is a behavior. It has no emotion behind it. Once we understand this, then we'll know if we are in the dimension of P or in the D of the STM).

Q: To what extent do you see transportation changing the way people view Space traveling? And could these changes potentially lead to permanent peace deals with nations?

K- (In my recent meetings it becomes more evident that there is no choice but to revolutionize Transportation with the new technology. The reason for this is that the T is advancing so rapidly and becoming mature and we are pushing to show how advanced it is in the Iran conference. In 2008 we released the knowledge to the Iranian scientists, as well as the 'USB stick' with the patents on it to all the governments (and they have had time to work on it). In Isfahan we'll show for the first time the principle of motion without "wheels" to the public. Remember that in the U the Man is known as the '4 wheeler's' or the 'wheeler race' because we never understood how the process of motion and emotion in the U works. He stuck himself to the 4 wheels of P. When we show lift and motion in Isfahan it will change the course of humanity. Then we won't be dependent on staying on this planet, nor to the fuel or surface of this planet. We'll rely on the Universal Energy and depend on the environment of the U without physical surfaces and without having to touch something).

(The new Transportation systems whether for automobile, or the shipping industry where package will take only a few minutes anywhere in the world. We are showing the technology to force this matter. And then it's how the governments will accept this change and how they will start handling it. When you can manifest yourself instantly

anywhere on the planet they won't be able to control you. Then we have to start a 'One Nation One Planet' structure. The whole planet will be everyone's 'oyster' to enjoy. Then those who have properties worth millions will want to protect their own power and wealth. They will lose their value as you can travel from a remote island to London in minutes).

(How they will try to block the T will become our problem. By the end of this year the governments will have to respond to what will be shown in Isfahan. We still have to get our KS to understand the other parts of the Transmutation and Transportation so we can show it to them. With the Tehran conference the whole system will change. Let me explain why I keep saying Isfahan and Tehran. It's because we are planning to hold a second conference in Tehran just for world governments to attend. The Iranian government will have to invite them to attend. This is why I keep on thinking and talking about Tehran).

(This is how the technology will force the change. By the beginning of next year it will mark the start of the end of the shipping industry. The whole structure will change and we have to become the center for putting all of this together. It will also be the end of the aircraft and car industries. And the communication industry will change over the next 5 to 10 years. We will not even recognize anymore what we have been using today. Therefore, we have to bring in a new political situation around the world. And what currency will we accept? Or will we adopt the Keshe Coin as acceptable worldwide. There won't be any BRICS, Common Market, or Dollar. The Keshe Coin will have the same value for all citizens of this planet. There won't be people getting paid 150,000 because they are a doctor, and the guy who cleans that doctor's office only gets 15,000. The value will be according to what joy we bring to other peoples life. It's obvious that the first few years will bring a mayhem, but then it will settle down and be accepted. However, I'm sure our leaders and people who like to feel important will find a way to make a 'whites only' club (of what we have had for centuries, but this time it won't work)).

(We have given you the key to the travel with the Soul, which means you can forget about transportation systems. You can even go inside the brain of a president and sit in there and do whatever you like with his brain. That is, if you know how to get in there. So the problem is not the transportation. The year 2024 will (bring the) change and an end to this dilemma. The biggest dilemma will start when all these industries will shut down. By what we do in Isfahan the governments will have to act very rapidly to bring in the transition to the change).

(The 'cat is out of the bag.' And if anything happens to me before the Isfahan conference that prevents us from showing the technology, then I have made (special arrangements) that the technology will be simultaneously released in a number of places. This means that by killing me they will not be able to shelve the technology. They will not be able to block the technology from coming out. In fact, it will be worse for them because it will come out much more rapidly then we are planning. We'll load up computer programs that will instantaneously release the technology worldwide. You will be shown exactly what

you need to do to use it. And it will make the planet peaceful through the development of the new technologies).

(The Isfahan conference will be a cornerstone especially for the ending of borders. The Persian Empire covered more land than any empire in the history of the Man. This new way will become like an empire of humanity. We will all be equal with each other across this entire planet. We will show this in Isfahan. (The current industries will have to be revised and this will take maybe 5 years. Since many people are used to cars they will still be available for them. We expect the new generation of ages below 25 years old to be the fastest ones to embrace the new T. They will love to fly in the skies and they will test everything with this technology and they'll come up with a new ways and new inventions. And best of all wars will have no more meaning).

(With the new systems you will never run out of money. Your credit will be made by other (men who have collectively made it possible) for us to live a peaceful life. It is not communism, it is understanding that we can live on the universal structure of peace and still have everything we need. No child will go hungry because he cannot pay the supermarket, because we all will work towards (a world where everyone can live a good life)).

(This is not a dream. You will see the changes. It's not a border in Gaza that can be closed and then they bomb you inside. People will live anywhere and everywhere across the whole planet to enjoy it. There will be no limitations of TPP. Most probably you will see in the Iran conference new technologies of the KF that have been hidden from you. We'll deliver a T that will supply all the needs of the Man in one package. I'll explain this when we come to it in Iran).

(This release of T does not damage the structure of life on this planet, instead it brings order to our life. This is the way we look at it. It'll take years for systems to be built and adapted for all the cars. There will be no batteries and we won't use CO2 burning systems and the rest of it. The whole thing won't change overnight once we show it, it will take time to bring it in. All the jobs at Airbus, Boeing, and everywhere else will be gone. The same with producing these electric batteries. And the control of society through the petroleum will be gone. Then we won't have to work so hard for the Saudi Princes to enjoy their luxurious lives. Everyone will be treated the same. We will see this process take shape).

(We are not the dreamers. We are scientific organization and we have built the systems that can and will do the job. It will take about 10 to 20 years to balance this out. But the revolution and evolution of science and technology will be made public in Isfahan and it will change every one of our lives).

Q: You talked about Nitrogen 14 on Earth, and then C14 in Space, but how does the N change to C14 and what's the role of C12 in it?

K- (C12 is in the matter state and C14 is a Space Energy Transportation connection. One is for the matter state and the other for the plasma state. That's all it is).

(C14 releases energy and can store energy at the time of release. C14 is the interconnection between Cosmic Rays (CR) and the Matter State Rays which is C12 and also the communication lines (to everything). (It connects everything together). There is another thing to understand and that is the Hydrogen (H), and it can travel the span of U on its own. But we use C14 as a field of the plasma state. As a ray, we still see the properties of H. It's important to understand this because when we go deeper into the process of transmutation and transportation, we'll step down into matter state. (?? This is one of the attributes of the energy level of H Rays, and not the matter state of H or C. One is a field interaction, which is a collection of the Ray strength .... ).

Q: In the 442nd KSW you said, "If we twist it a little bit, to a slightly different angle, we'll get Deuterium, or is this Deuterium, (what becomes H). Different angles and collective plasma dictates the seasons, the field radiation." I am trying to relate this to Fundamental Plasma. Could you please explain the relationship of the angle between our Souls, and the radiation created, so that we can transform our energy into a Fundamental Plasma?

K- (We have to understand it correctly. All the planetary systems work on a 90 degree vertical angle. And when you twist it and give it a little angle you get the 4 seasons and (all the variety of life we have on this planet). (It's still the same fields, nothing has changed within the structure of the Earth). (The difference is now M fields and rays interact at an angle to the environment and it changes what it can absorb, and what it gives and receives from the environment. This should answer your question)).

(This question about angles of fields is one of the very first questions I had to answer at the age of 8 or 9 when I understood, or not understood, I observed the work of X-ray machines. I saw how the intensity of the voltage and current effected the flows and created (different things) and just the reflection of (the fields) on little surfaces released rays. And if it turned (the plate a little then it disappeared). I used to discuss it with my dad, and this started all his commotion with (?? me getting educated in nuclear science)).

(I wondered what would happen by changing the angle of the plate. But his argument was that it has to be fixed, otherwise he wouldn't get what he wanted from it. I still remember his words, the KV has to be correct. And I said to him, what's a KV, or who is KV? And of course, he said, kilovolt. (I started looking for the answer to why the angle mattered, and how the rays are created and interact. And if it is not right the X-ray machines won't work. I was wondering how we absorb fields on the way)). (He explains and draws how the X-rays tubes used to be made). The intensity of the X-Rays were created by the angle of the plates. The angle on the fields brings (certain) properties and conditions, that decides how the environment and how (it) goes through the environment. We have the same situation with the nuclear reactor fuel rods and how they are angled).

(With the new technology by KF the possibility of nuclear Space Reactors going out of control, or leaking radiation would be more or less zero. We will unravel this technology to IAEA very soon. It will replace the present industry of having to cool the fuel rods and neutron reflectors).

Q: There's a lot of talk about the angle or tilt of Earth has changed and the Sun is rising very early. What's really going on?

K- I don't know, ask the ones who are looking at it. I don't have time to watch the sunrise. (The Earth is a dynamic system and it's controlled by the fields of other planetary systems, the Sun, and the rest of it. So it's bound to change, it's not constant).

Q: Which amino acid (AA) prevails on Mars? For Earth it is COHN.

K- (It's not very different than the Earth's AA. (The deviation of the AA is dictated by the Sun. It's pretty much the same throughout the solar system (SS) because we are all in the 'same pot' together. The deviation cannot be much. Outside the SS it is different. Inside the SS we all have a common denominator energy field of the Sun and so our AA has a common denominator and that's why transmutation is very easy (to do on this planet and inside the SS). They have different strengths of the same, isotopes of the same, and the rest of it).

Q: (You said, if we took the emotional part of the brain and placed it anywhere in the U it would still function without our physicality). So is this emotional part independent of the STM?

K- (?? It's connected to the STM. The STP cannot change). It's fixed by the physical structure of the man. The STM has different dimensions in strength. It can show itself, (and through) interaction with the ?? STM, not necessarily within the structure of physical body of the man. Not necessarily.

Q: So it's about the STM, and not about the (emotional) part of the brain, because that part of the brain is useless without the Soul.

K- Yes, (but the strength of the STM interacts with the strength of the STP and dictates the position for the emotion in that particular position in the skull. You can still take the part of the brain that is connected to the emotions out. (?? It will be there but it will have a different strength. You cannot destroy it, the field (has been) created, (and the dimension has already taken shape)).

Q: If the Soul doesn't have a gender, meaning it's not a male or female, then why is it that in 'Beautiful People' or schizophrenia, who have 2 or 3 Souls, that one is female, and another male, what decides that?

K- It all has to do with the inside operation field strength of the Soul itself. How it manifests itself, and with the interaction of the STP.

(Mr. Keshe talks about how the field strength of one's Soul interacts with the STP and manifests the feature and behavior of a woman. And another Soul with different field strength interacting with the STP, will create the behavior of a man. Each Soul has its own field strength characteristics, and when it interacts with the STP it will create different emotions and behavior. In the same way your Soul can tap into different knowledge and manifest it as understanding).

(The Soul can tap into Universal Energy and access knowledge, poetry, geography of the Universe, and whatever else. Then through interaction with the STP it manifests in physicality).

Q: Is this the same reason half of the population is changing their sex, because of the change of the field within them?

K- (It could be. Mr. Keshe worked with older women in their seventies and he saw that the fields can reverse what we call, 'hormone changes,' and they get their menstruation back after 30 years without it).

(There is no limitation in the strength of the field of the STM. (And what science calls 'hormone change' is really psychosomatic, you control it through the state of your mind. If you elevate the Soul, then the physicality never ages. You can even give birth at the age of 120, if you can physically carry it). (Hormones come from the interaction of the fields of the STM)).

Q: I've seen some people going through menopause at the age of 35.

K- Nowadays, through the stresses we see quite frequently menopause in the age of 22 - 24. The stress condition in physical dimension of the STP, and the Soul cannot handle it and it goes to the behavior. Then the physicality changes. We see this quite a lot. Nowadays we see breast and other cancers in girls as young as 17).

(They talk about the story of Adam and Eve in the Bible. More women are tempted than men. According to the public statistics more women are adulterous than men. The men get blamed for it to cover the behavior of the women).

(There are women Messengers, but it has been covered by a male dominated society. The one who wins writes the history. Mr. Keshe says, that the next Teacher, and not Messenger, will be a woman. It will be 'Mitra's daughter' and she is among us. There is no doubt about it. It's because men can only do a single task at a time and women can multitask. To become part of the Universal Community we have to be able to handle many tasks at the same time. And this will come through the energy of the woman as a creator. Blesses her name).

(The very first Prophets were women. As Iranians we worship our wives, our female part. We made them into Goddesses. And we'll end up with the same blood, as the daughter of

Mitra. As citizen's of the U we have to be aware of our physical D and the D of the Universal strength. After me, the daughter of Mitra will teach you this, because she has the capability and has been trained for it). (Many Messengers were women. A woman will take humanity through the Passage. (Now the men rule and they changed the history (to hide this part) and benefit themselves))).

Q: A KS says she had a Near Death Experience and saw a light and felt wonderful emotions of love, deep peace, and bliss. She had the same emotion, as she held her mother's hand during her death. Was that the light of enlightenment?

K- It is possible. (The time when people say they 'cross over,' or whatever, is when they're in physical pain or whatever. We do this with you in our systems. The blood pressure and flow diminish, and this is the STP. Then the STM can expand and you go through the same phenomena, and the same process as what we do in our systems with you).

(When you see the light, or a Sun, then you want to go into it. But some people don't and they try to understand it. They can ask it questions and request what they want from it. We call it the 'Sun,' the Mother, the Creator. What kind of things do you ask from your mother, your creator? Can I have food, knowledge, or whatever? We can ask this in the D of the Soul. (When your mother went through that phase her Soul expanded and it reached your Soul, and you felt what she felt. It's not strange. We understand it now).

Q: I've seen a light like the Sun during the Flight Sessions, but I've never been able to interact with it. How do I interact in these moments?

K- (Try to understand whether you see it as a physical light, or as the light of the Soul, as enlightenment. Then you'll know how to handle it. Many people go inside the Sun. (At that time you are traveling in the Soul, but carrying the STP, then you are dealing the Sun as something physical. But did you get enlightened by the knowledge of it, by the fields which carries it? That's all it is. Next time try to ask it the right questions, and listen to what answers it gives you)).

Q: Could you please talk about what's happening in Palestine, and Lebanon, and Yemen?

K- (It's a lot of mess and it's all being done by one bunch of people. This is a struggle of a dead man, and the support of another dead man who walks).

(I am trying to restrain myself from talking about this. It's going to create a lot of problems for us. But let me unravel some knowledge).

(From my perspective this is the last fledging of the battered and beaten body of the State of Israel. And we shall see. (Because of the warrant, the war cabinet is trying to get another bunch who (will basically do the same thing but won't have all the press after them). The PM has 2,500 cases of perjury and everything else, and now the warrant from the International Court, but the Israelis Constitution says, the man who sits in the chair

can do whatever he likes. However, the President has the power to dissolve the Parliament and ask the Prime Minister to step down, but nothing's happening. And this is an end ?? from inside).

(What is happening in Palestine might spread over into Lebanon. It's very different today than in the 1970's, 1990's, and early 2000. Half of the State of Israel are Palestinians and a lot of them are connected to Lebanon. There could be a problem in every part of Israel. The Palestinians work in the Israeli homes, run their hospitals, are part of their police force, and the rest of it. To them Gaza is different than Lebanon, and if it goes, it'll be internal, but we hope not. But it's much deeper and there are more political pressures).

(There are two factions or two sides of Israel fighting (to control) the same White House. The present President is a 'lame duck' and can't do much. We don't even know if he's still alive. The White House is run as we said before by the Vice-President. The President (with Alzheimer's and Dementia) he doesn't remember what he had for breakfast let alone being capable to run the White House. (The lady married a Jew (into the Jewish Lobby) for the Vice Presidency, so he basically runs the White House through the 'backdoor.' And then the last President, again married his daughter to the second richest family in Israel, to have the support to get elected. (Again we have the Jewish Lobby). So we have two Jewish sides running the White House. And the decisions sit with the Rothschild family. (During the last election they changed position and brought the 'crazy man' into power. And then again they decided to put the 'elderly pensioner' into power. Who and how the Rothschild family decides to support this upcoming election will decide which side of the Jewish families will run the White House. And then we'll see how it will reflect in how Tel Aviv is run and everything else). They ?? are running the White House by 'remote control' and have sealed themselves in through marriage (like the European Royalty do). This will dictate what happens in Israel, and how this dilemma in Israel will go and the rest of it). (Note: President Nixon was recorded on video saying how afraid American Presidents are of the Jewish Lobby).

(From what we hear there is a possibility that a lot of things that could change and we are waiting to see how the Iranian elections will take shape at the end of this month. Again we have to see how the structure within the family of the Iranian rulers will go. The Prime Minister is the son-in-law of Ayatollah Khamenei and his other son runs the Foreign Office, and another son is running the 'business.' We have to see how they decide. They are connected by blood to the Lebanese as we told earlier. The Ayatollahs were setup up by the British from Lebanon into Iran to (divide and rule). When you hear the word Ayatollah, it means Lebanese blood on the religious side. The name doesn't exist in the Farsi vocabulary for the Iranian religion. They've chosen this name for themselves because they're all Lebanese. We have to see how they will make the decision to share the 'loot' or whatever).

But, either way, we'll see how these things will take shape in a bigger way, in a different direction.

Q: Dr. Steven Greer talks about this technology, and knows who wants to put money on it. Do you ever talk to him?

K- No. I don't know who it is, and which technology we are talking about. I hear his name a lot. (In a talk he gave around 2015 when he was openly asked about the KF he totally ignored it, like he was afraid to even mention the name).

Q: Many people talk about angelic entities or angels. Who are these entities, really?

K- I don't know. There are a lot of angels, and there are a lot of princesses. (But they exist to those who call their names). I haven't seen one, so to me it's just a word.

Q: What is narcissism, and how can it be fixed?

R: Wikipedia says, Narcissism is a self-centered personality style characterized as having an excessive preoccupation with oneself and one's own needs, often at the expense of others."

K- (Isn't that what selfishness means).

Q: In the last workshop you explained that toxins are not eliminated from the body with the Keshe technology, instead they are transformed and used positively. How does mercury in the brain have a positive effect, and how exactly does this manifest positively?

K- (Mercury, Lead, and Aluminum add energy fields and play havoc with the brain. The energy takes the emotions into a negative direction, and that's the problem. That's why we see problems with mercury, aluminum, and lead. They have an affinity towards the field strength of depression. And (what they create is like inert gases). Many materials have inert gas characteristics and for that reason the brain holds on to energy levels of it. Some depressions create that field strength, and when this material is in the body it finds a match to it. And the match of it is in the brain. That's why we find them in the brain and we see all other problem with it).

(For example, let's say mercury create the problem of the depression and if mercury is in the body our brain will create a field strength at the level of mercury, and find a balance with it. It's like (if you have a Yin of something, it will create the Yang of it). Then they'll find mercury in the brain, and see all the behavior problems. (The behavior is (already) there, but with the mercury added to the body it finds a matching field strength and becomes active). It becomes like a 'twin star,' the fields travel from one to the other. (?? A certain field strength creates certain behaviors, like depression and many other things)).

(The world of science doesn't understand this and looks at it in a different way, but this is how it is. We have it within our body, and it's part of our emotion. (But each of us will respond differently to it). Maybe my body can handle 10 kilos of mercury and nothing happens to me. But if you get 1 gram inside you will have all the problems. Because the

field strength of the emotion in my brain is not the same as yours. (?? It already exists in our body and when we find a matching field strength of it, then we store it). ??

(The knowledge to get rid of mercury and those kinds of things is to change the strength of the fields of the emotions. (?? With aluminum you get forgetfulness as in Alzheimer's. There are things you don't want to remember. Some people lose appetite, or certain characteristics because of the aluminum or mercury. These symptoms show that there is a balanced field strength equal to it, in the brain. Otherwise it won't be there. It (would get rejected by the body). (When we have it in our body then (it gets) encouraged to manifest in the matter state. Then the problems start)).

Q: How can we explain the death of the mother to a five-year-old child?

K- (It's very hard. But you can explain that the connection to her Soul has not been lost. The impressions that are made at this young age will carry on throughout the life. Another way is to elevate the Soul of the child. It doesn't come by prayer, it comes by detachment of the one who is the guardian, or is part of the structure (?? of the child's life). To what extent it will haunt the child will depend on how the environment around the (child) changes and how he is taken care of by those responsible for his care. If it occurs at little bit of an older age then it will carry on through the life, if it is a little earlier then the child will never remember it. The age of 5 to 7 is very critical. The Soul should be elevated in a very direct way).

(By elevating the Soul you'll move the dimension of the emotion of P that it can handle the transition. And then it depends what the family and how the father (handles) this relationship (with the child). It's not easy to handle. It's just by elevating the Soul. We would have to know more about the whole situation. If you could go through transmutation and reach that point you could do a lot).

(He talks about Prince William, the Crown Prince of United Kingdom and how he lost his mother Dianna. It's not easy to handle these things, but you have to know all the circumstance and conditions around it. ?? )

Next month we'll start a totally different process in a much more advanced way as our technology has developed to be able to deliver that.

**SUMMARY:**

**ENGLISH TRANSCRIPTION**

(:11)

K- Thank you very much. Good morning, good day to you as usual, whenever, wherever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute.

Today's knowledge sharing is much as the reality about the life of the man that is the, what we call it, daylight. It is part of our life if we live within the structure of the Solar System (SS). We have a physical dimension in the Solar System. (:12) But has, or, any of our scientists or knowledgeable people, have looked to see where is the Sun of this Galaxy? Or, as we always assume, we were told there is a, what we call, a 'Black Hole' in the center of every Galaxy and Universe (U), does this entity shine lights on the rest of it, the way our star does in our Solar System? And if it does, what color would that be? What light does it create? And as we said in the very first paper, when we opened this knowledge about the creation of Black Hole, that the Black Holes actually are the recycling system and at the same time when any matter goes in, due to interaction of the fields, releases some lights, then it comes a question to ask, how and if there is a light shining, that if we go out of the Solar System, we'll see it? There are many moons and many planetary systems in this Solar System, but somewhere when we look or somehow when we rotate, we see the Sun, we see the day light, confirmation of its interaction with our system, we call Earth. But, does or would we be able to see the light in the center of our Galaxy, (:14) if we go outside the Solar System? And what about if we actually, instead of looking into the Universe, looking from outside the Milky Way, would we see lights from the center of the Universe?

If we understand this and if we can elaborate on the knowledge of interaction of magnetic (M) fields, then a new horizon of knowledge opens up, totally unknown, but known to us because we have seen it on Earth, when the fields of the Earth and the Sun interact, we get the daylight. So, this time we are not on a planetary system, this time we are in the space between the Solar Systems, between the Galaxies, and the light of the center has to interact with us direct. And how would that light, how would that energy, will change us, will affect us? Would it enlighten us to see the whole of the process of the Creation in the Galaxy or the process of the Creation in the Universe?

As there is no intermediaries, there is no Sun to have a Solar System to cover us, there is no Galaxy to cover us, that we are within it, then when we go out of the Solar System into the, our Galaxy, where we have no light to interact with, (:16) as we are outside the system, and would we see a light in the center of the Galaxy? Would we feel fields which come directly from the center? And, as of the last week we were talking, would we, if we go up out of the Galaxy, the light shining from the center, which is from the Creator, would we be able to see it? Would it interact in the vision of the man, if we are traveling in a body of the man? Or would our Soul will interact with this field? Would we be enlightened? And what would it do to us?

This is one of the conditions, one of the dilemmas, that the Knowledge Seekers (KS), who go through transmutation and through the same as transportation, in the coming time, in the open span of the Universe will face. We consider the center of the Universe

as a Black Hole, but that Black Hole, by inheriting of its fields, creates a light too. So, is that the light of the Creator? Because it comes from the center of our Universe.

Then it comes, the question to ask from us, does it matter if we are within the physicality (P) of the man? If you are on the planet Earth, if you are outside the Earth, if you are outside the Solar System, if you are outside the Galaxy, or maybe in outside the Universe, in the Unicose, would we be able to see the light, the information or enlightenment, (:18) from interaction in the field of our Souls, with the Soul of the Creator (STC)? And what effect will have this on us, as a knowledge, enlightenment, or whatever we call it?

Many of you Knowledge Seekers, which start going through, what we call, transmutation, we will see the light. Because you can, and you have the ability as a simple Soul, as a single structure, to travel the span of the Universe, and maybe Unicose. So, in that process of transmutation, as an energy, as a Soul, you cannot be confined to the planet Earth, you cannot be confined to the Solar System, your Soul is not confined to the span of this Galaxy and the Universe. Then, what would you see? What will you observe about yourself? And how would you see the enlightenment, the energy you receive directly from the Source?

The biggest question is, do you like what you see? Is this what you were expecting? Is this the process of Totality? (Rick, your microphone is open). (:20) And then going through the whole process, we have to understand, the process of translating this field, transferring this field, would this field to us be normal, but enlightenment to another?

We're getting very close to the phase of transmutation, for many of you Knowledge Seekers in the next few weeks. And some of you have already managed to achieve it. And you will see this light. The first times you deny it, and as you start understanding the process, you'll take it as your guideline, as your, what I call, 'light of the knowledge.' You will see the Sun. You tell us, "I've seen the Sun, I've been in the Sun." But is this the Sun of reality, the Sun of the knowledge, is it the Sun of enlightenment? Or is it just merely the Sun as a Sun? And through this interaction, are you lit up or are you enlightened? And many of you, which go through this transmutation system, through the transmission structure, have to be conscious, to ask yourself, "Do I see the light of the Creator?" (:22) Or, "Do I see the light of a star?" Or, "Do I get enlightened by the knowledge of the Creator?" And, "What do I expect from it and what can I do with it?"

Many of you, in the past two years, this June, this month, it's two years since we started these processes with the systems, tell us you've been to the Sun. But, knowing the way you travel, does the Sun, the light you see as a Sun, is it the light of enlightenment? Or is it just the light in a physical matter? Then, once you see that, for you to test, you will understand if you receive the answer through the Soul, or you receive the answer verbally. In a way, you don't need to talk to be enlightened. You don't need to be talked to be enlightened.

In the next 24 hours, many of you will go through the same process again. And, in that process, we will ask you to do many things, and choose position, in respect to what you

consider is physical, and something you consider is in my thoughts. None of you will be wrong. You're all correcting what you see, because you see according to enlightenment of your Soul, as the knowledge of the time, space and place. (:24) In a way, the light you see, you don't look at the light as the light of the Sun. You have to ask for the light of enlightenment. Means, you can ask in that moment, what you want? Because you see the true light.

If you receive that light, if you understand that light, if you can communicate with that light, you will get what you need, you will get what will serve you. It's not that, "I want a pot of Gold", and you are given a Gold. "I want to speak such a language, I want to understand a new emotion, I want to understand more about the transmutation." And then, you see, by seeing that light, if the enlightenment of the knowledge of the Universe opens up to you. And how do you interpret it? What's the interpretation of it? How can you apply it in the dimension of the Soul which you travel? And would you be able to apply it, when you convert, when you land, when you take back in the shape of physicality?

Now you know, many of you have traveled to the Sun. many of you have seen the Sun, the time of these transmutation sessions, or when you went through the system in Linz. But now comes to understand what is there that you see. And if you master this point, over next times, again and again, you will find this is a switching point. (:26) Where you go from France to China, and you go through this point of enlightenment, and you speak Chinese. You understand the whole culture, because you've been enlightened by the light of the knowledge. But you have to know how to switch. You have to know how to bring it in, and you have to know how to use it.

So, when you go back and you become a Frenchman again, in a few days or hours or weeks, you go through the same enlightenment. You don't turn up as a Frenchman in middle of Paris, but speaking Chinese, because you just departed from China through transmutation. And we will see this. We know this. Many of us, we heard many people, talk about when they go over, or they cross the line, they see a light. This light is a light of enlightenment, not light of death. And you, we see that and you understand this in a different way when you're transmuting. You don't see that as the 'end of the line' that you change and you die and it was so peaceful. You know this is a sign of me to get, to be able to achieve, to have the possibility of going through. It's like a sound barrier. You have to go through it. You see the light. I learn French. I want to learn German. I want to learn about the history of the Universe, because it's all there.

This is a switching point. Now, especially in the last few sessions, last couple of months, on the Friday sessions, a large number of Knowledge Seekers have been battling with this. (:28) They go to the Sun. I went to the Sun, but did you stand still that Sun when you go, you can ask for enlightenment, you can ask for the knowledge, and it'll be given to you? I went to the Moon, played with the sand, I went to see my uncle. That's all in the dimension of the Soul. But when you wish, when you go through that point of enlightenment, when you see that Sun, it's not the Sun as what's on the Earth you are used to. That's the Sun of knowledge, that's the enlightenment.

This is the barrier you break, but as you don't know what you do, you are not aware of it. Oh, I went in the center of the Sun, sunlight. But did you ask to learn the language of the 'man,' the entity which lives within that Sun? Could be any planetary system, could be anywhere in the Universe, and you will understand, that you understand the language, and maybe understand the culture, and ?? long enough, be able, or do translate it to, and communicate with them in their language. As you still connected your physical dimension (D) of Soul of the Physicality (STP), you still hear and feel the emotion, as you were in a physical matter.

This reaching, this ?? switching, light, this enlightenment, this Sun you go to, you have to get used to what it means. It means you are going through that barrier. It means you are, you have received the gift, the beauty of the Creation, that, how you can go to somewhere else. (:30) As I said, in the world of the physics of today, we call it the Sound barrier. It breaks and we hear it, we see the ?? God. But in the terms of the speed of the light of the STM, with the light of the Creation, you still see that light. It's usually goldish color. And, if you become used to, at that point, you raise, you elevate your Soul, you raise the knowledge, you enlighten yourself, that this is a switching point. What do I want to know, and what I want to take back with me, in my dimension of physicality? Not just the memory of seeing the Sun, but remembering, I dare, I speak in human's thoughts, but the voice comes out different, and these different things the Universe understand me. And they still go gibberish to me, but I understand translation of it, back to me, in the language of the man.

And to what extent, you Knowledge Seekers, in the coming time, when you go through this enlightenment, how many of you learn to ask for? How many of you learn to be with? How many of you will come out of it, enlightened with you, Knowledge of the Creation? Not just seeing the uncle, the dad, the mom, and two donkeys down the hill, grazing on the grass. This is what many of you Knowledge Seekers, in the coming weeks, in the coming time, as we go through this, what we call, 'enlightenment sessions' of transmutation, you come across. (:32) Those of you who go on through it, tomorrow, and those of you who go through it, in the following months, you'll become very used to it.

When you come back, maybe you tell to the partner, this is what it means in Chinese, where you never spoke in the word of Chinese. Because, in the lines of enlightenment, you wanted to speak Chinese. And, in the lines of enlightenment, you wanted to be a physicist, understand one part of the physics which never been understood. And then, if you become good at it, you do it quite often. In a way, Universe becomes your encyclopedia. And, instead of going on the mobile phone, and going to Google, and Google it, in a way, you plasma pattern, work it, you go to the light. And, this is how man will progress. Those of you who understand the process of transmutation, will gain the knowledge of the Universe. You tap in, into the light of the Knowledge of the Creation.

And, many of you Knowledge Seekers in past two years we've been with you, you have said to me, "I went to the Sun." many a time I said, "Do they know what they're talking about?" Do they know they've been touched with the light of the Creation? The

knowledge of it, the understanding of it. And, next time, when you want to understand, how a structure works in the Universe, you read something in a newspaper, or you hear something in the news, that there is such a structure in the Universe, you go through your transmutation phase, which you have trained yourself, and you see, (:34) you can go to that point of the light, to see the light. And, you ask the light, "How does this work? Show me." And, then you start learning, how to use the vast knowledge of the Universe, and Unicose, to be at your fingertip.

Don't need to read imaginary knowledge of the man, which is all fake, but you learn from the Knowledge of the Creation. You become observer. And, so, many of you, which join us in these sessions, and many of you will go through transmutation in years and years to come, you'll learn about the light. You'll learn about the enlightenment, you'll learn about, it's not just, "I can go there and sleep, or I go and go to the Moon." It's to learn how to behave, that you become servant to those who need to learn, and not arrogant that, "I can do" and become again, going backwards.

Many of you will come to do this, and many of you will come to understand this. In tomorrow's session, we ask all the participants to come in with 2 headphones, and possibly connected to 1 mobile phone, or with 2 headphones connected to 2 mobile phones. And, we'll tell you how to connect it, and then we try to take you through this, that through emotion, you can understand the work of the enlightenment. That you don't need to talk, but you transfer the emotion, the point that you are aware of the emotion, (:36) and that emotion, being aware of, and taking yourself to the dimension of understanding the energies of the Universe, you can go through transmutation.

So, those of you who've been there, those of you, maybe by training, or by accident, or whatever, come to see this light, the 'enlightenment light.' Just don't call it lit, and don't consider it to be the Sun you are used to, and going inside it. Try to ask question of it, try to live with it, to see how it lives, and build a new future for mankind, and for yourself.

The ability to comprehend, is far, far more harder and harsher than anything else. In the coming time, many of you as Knowledge Seekers, from now on, when you go through this system, and you go through to see the light, if you become fortunate enough to do, please do not jump in, understand how to interact with it, that the light brings you enlightenment direct. Not waiting for a day or two, see what else comes with it.

And when, in the future, mankind learns this, they know how to transmute, and at what point, even arriving at the point of destination, (:38) can go back to the 'light of enlightenment,' the Soul of the Man (STM), the interaction with the Soul of Universe, and receive the knowledge. How to survive, how to live, and what shape you will be, what shape you are, and what are the things you need to survive, as your true interaction with this light, you tap into the enlightenment of the light of the citizens, of that space, time and place. And they do not need to be tangible for you to see, they could be just fields and energies, a combination of interaction of fields.

I had to teach this today, because I know many of you, Knowledge Seekers in the session tomorrow, will go through this. And you have to be prepared, and we'll ask you to tap into the knowledge, and see what is the knowledge. And this is the way, as if you remember the first times, as I said, last couple of weeks as well, when you went into the UBESUS (Universal Body Enhancement Spaceship Units) in Linz, when you came, we said, "Whatever you say, we accept." Whatever you say, because you are there to interact with it, you've been present.

In the session of tomorrow and in coming weeks, we try to bring you to understand the knowledge of Universe through your own Soul. To not just being baffled by a seeing of the Sun, that I went to the Sun, that Sun is the Sun of knowledge. How can I click to it, how can I touch it that I receive the knowledge, the Knowledge of Creation, in what I want to do. And one key thing is, never ask for all, that's the time when you receive none. Always be humble, then you can receive. Always be obedient, then you can be followed. And always follow the Ethos of Mitra. (:40) Never use the knowledge to harm, and you understand the Knowledge of Creation will be open to you, beyond imagination.

So, when you see the Sun next time, ask yourself two questions. Is this the Sun to me, as a physical dimension of my life? Or is this the Sun to me, as the Knowledge of the Creation to my Soul? Do I see it with the eye of the man, or do I see it to the understanding of the enlightenment of my Soul? And then, if you can interact these two emotions, you will be fit to become the traveler of the Universe, because you know how to survive. The very first time you do it, it's frightening. Very frightening in a way, unbelievable. Some people will get scared. I did and it happened, but I couldn't handle it. And gradually you'll get used to it. As I said, it becomes your Google map. It becomes your Sun, it becomes your life map. It becomes the way you travel the span of the Universe.

As I said, in the session of July, August, September, we take a small groups to, especially deliberately, to elaborate and expand this point, for you how to tap. You land here, as I always said, when we took off, we have the taking off, the question was, "So what, what's next, what we're going to do when we go on the Moon?" You go, you learn to transmute, when you get there, to a new dimension, "How am I going to speak the language?" "How am I going to live in this environment?" (:42) "What do I need to bring forth in my Soul, that interaction with the environment of the place, leads to manifestation of my physicality in a correct way and a safe way?" And then you understand how to transmute. Then you understand what is the purpose of all these, what we call, sessions we put, for you to slowly, slowly come in.

Because a number of you Knowledge Seekers have seen the Sun, and you are still in the process of being a man, you went in it, you didn't ask a question from it. You did not manifest your desire to receive, that the knowledge opens to you. You ask, you'll not be given. Be humble to receive, you'll be receiving. And then you understand, how mankind will change in the future, and how transmutation and the physical transfer, will become a joint venture for man in every dimension of Creation. Because then you recognize, "I have transmuted, I transferred, this was the light I asked for, the light of the knowledge to

stay on this planet, and now through interaction of being a planet with another Sun, another Star, I see the physical light of the place." So, you enter two Suns, one when you leave, and one when you return, as you have to return back to the position and time and the place. As this time, as is usual, you buy a return ticket, but sometimes some of us buys extra ticket in the middle, and going to New York, I better go and see, Dallas too and then come back, to New York to come back home.

Then you see, then you understand, how the game is played, how we had to take you step by step to understand the knowledge, (:44) how so many of you had to see the Sun, to understand it, that now by seeing it, you can communicate with it, you can be enlightened by it, and then through that enlightenment, take manifestation of physicality.

In a way, it's the ticket to the Universe, it's the ticket to travel the span of Universe through the STM, and not with the aircraft, UFOs and all the hullabaloo and it's got used to and doing it. It's not a rocket science, it's the science of how the Universe works. And up to now, you always looked at the Sun as the light, now you have to look at that Sun in the dimension of interaction with your Soul, it's a light of the 'Sun of enlightenment,' and you have to know how to handle it. And then if you know, you'll get used to it, then you can become true citizens of the Universe, because you can go to it, transfer through it, manifest through it, live through it, and return back from it, to (through) it.

I hope your Knowledge Seekers understand, what is there, and I hope many of you will achieve this tomorrow. And many of you will achieve, to be able to control it, in the next few months as it comes, and we bring it to the point, that many of you can concentrate.

We go for a break, we come back, and we try to talk a little bit more deeper in this, and others, and hopefully be able to answer some of your questions. Rick, would you like to take us for a break?

**>> BREAK >>** 543 KSW June 20, 2024 (:52).

K- ...

Thank you very much. There is a couple of points we have to mention. Knowledge Seekers who go to the Store, you see a page comes up, we're asking for password. Just click to cancel and the page goes away. You can, you go back to the same, what we call, the Store pages. Number of people get this, this is a default on the system, we can not clear it out, it started a few weeks ago. So when you go on the Store, if you see asking for a, what you call, password, just click on it and it disappears and you can carry on.

The other point is regarding the conference in Iran. As we asked you, please make your booking online and just send us the... Don't say it's booking for Iran, just put your reference number. We check it and it'll be done. There is a concern regarding the visa. Once you fill in the forms, we organize through our people in Iran, the time and invitation, when we get your details, for you go to the Embassy. So you don't need to do anything. We do everything with Iran Foreign Office and everything else. We do most of the work for you. Those who come from America and Canada, you have to submit and complete your form by end of this month, 100%, because the North American citizens take a slightly longer to get their visa sorted out than the rest of the world and we know the reason. And for all the Europeans, fill in the form, complete the process and leave the rest to us. (:54) In next month or two, you will receive an invitation of a date to go to the embassy to what you call, submit your application. We try to do most of the work for application for you through Iran. It'll be organized through Foreign Office. So you don't need to go and get a visa before you apply to come. There is a lot of people tell us, there is no such a thing. Fill in the forms and complete your registration and the payments, and we do the rest and we organize, we get the embassy that you have to go to, doesn't matter which country, to get the visa stamped or you send it by post and the rest of it. This will be done, it has to be done through a specific website in Tehran and we'll organize for you. It'll be a lot of jumping around for our team, but that's the only way we can sort it out.

The conference for Iran, after end of June, will move to 20,000 because we are asking and inviting a lot of companies, a lot of space organizations to attend because there are other dimensions into the work. And please don't come back, I filled the application form but I'm too late. We have to stick to it because then it's going to cause us problems on the other end. Complete your application form before the end of the month. We are going through a structure that we can support you all the way through and we try to see how everything else can be done to make everything easy for you. When you make the payment, don't put for Iran conference, just put the reference number and that's important and then send us, this is my reference number or you fill in the form, we see it as usual as a sales, a donation sale through the Keshe Foundation system and we handle it ourselves. (:56)

The meeting for next July, August, September and October is already been set up on the Keshe Foundation websites, I think from late last week or early this week. You can book for these sessions, the Monthly Sessions, still will be on the third, what you call, Friday of each month and you have to state where you are in that week. Some of you might be traveling, it's a summer time, you won't be home on that day, we give you an alternative time, two or three of you, but you could be on holiday, you want to be on it, but you were in, let's say, London, now you are in Los Angeles. You want that week to be with a group

from United States, not a group with Europe. We try to keep this to very small groups, that as I said in the first part, to start teaching you for the process of transmutation and everything else and to be ready. It will be very exhausting time for us, it will be very time consuming, but we have to go through this in the next three or four months that we are ready and then when we meet in Iran, most of you I'm sure, then you go back getting ready for a full transmutation and the rest of it on a frequent basis, till we meet in Washington in United States, sometime in 2025.

You got to remember, do not be worried or baffled by what you hear in the news about Iran, you are welcome home and everything else is fairly open. (:58) The position and the process is very simple, you stay with the Keshe Foundation team because you are there and if you travel we try to create you with some Knowledge Seekers to be able to travel around Iran, they'll be pleased to be with you, to guide you if you want to go to Shiraz or Tehran or whatever, that you have another Knowledge Seeker with you and connection of their love with the knowledge. We won't leave you in Iran, you're on your own for seven days, Knowledge Seekers try with the Iranian Knowledge Seekers, try to show you the hospitality and the beauty of Iran. But please complete it before end of this month, for your application and everything else. I called, I sent an email, does not count. Application form has to be filled in, you have to fill in that we have a number, we can track and coordinate, and then you get your emails which come to us, all the correspondence about your visas, your tickets and where to meet and the rest of it.

Again, many people ask me, why do we have to meet in Vienna? Because a lot of people who came to China got stuck, some people had to buy four or five tickets, couldn't get in and all sorts of problem. This way, if anything happens we are in with the Iranian officials, we can sort everything out straight away in Vienna, that becomes a smooth flight back and forth.

One important point for you as Knowledge Seekers is, try to move, try to understand the work of the Keshe Foundation through Plasma, through magnetic fields, because from now on and forward, we will move in the dimension of the fields, understanding of the fields, (1:00) and collaboration and cooperation between the field of the matter state and the Universal state. The way as we explained, Nitrogen converts between the Carbon 14 (C14) and Carbon 12 (C12), and what lives in both dimensions is Nitrogen. This is what you have to learn. This is how you collaborate in understanding of your physical life and the life of the energy within. And it's important for us that we bring you to that point, try to walk away from these Gans's we showed you, because we wanted to show matter has energy, but a lot of you have got stuck with it. Move on, move forward, and then it become very easy to transmute and transfer and the rest.

Any question?

Q: ... (1:02) Mr. Keshe, good morning. In the last teaching you said that, "The behavior doesn't come from emotions, it comes from the interaction of the physical dimension and the field interactions within the structure of the STM." If possible, could you expand on this, please? Thank you.

K- We... emotion comes from a non-dimensional. Behavior comes from the dimension, which means how we react physically, or we move physically, in respect to the STP. And this STP is a collection of fields of the whole, all parts of the man, the lung, the liver, the kidney, but we show our behavior with kicking, with shouting.

It's not that the heart kicks, it's not that the, (1:04) what you call it, the lung kicks, but the physically that body, that behavior shows itself. We shout, we do whatever. Emotionally we cry, emotionally we shiver, emotionally we laugh. When we interact our emotion with behavior, with the physical STP, then we get a kick. We translate it into a dimension of physical manifestation, in a different form than the emotion.

Emotion come from interaction of the STM and the STP. Behavior comes from the STP and the physicality of the man. Behavior can be controlled because it's outside entity of the Soul. But it creates a field strength that the STP, in interacting with the Soul, creates an emotion for it. And if you understand this, it becomes very easy to be able to separate it. A child which shows tantrum, shouting and kicking and whatever, when he doesn't get something, that's a behavior. Comes from the physicality and the STP. Has no emotion to it. Maybe the emotion triggers it. And then the STP and P manifest it.

And in a way, (1:06) it's very much connected with the physical life behavior, where emotion has a feedback input from what I call, the 'back door.' We are nasty all the time, or we are joking all the time. There is no emotion, this is our behavior. But sometimes nastiness satisfies certain emotion. Because now it translates back into the STP, which STP interacts with the Soul and manifests itself in emotion of it. It's as simple as that. And it's very much like ADHD. ADHD is a behavior, has no emotion behind it, except control. Kingship is a behavior, has no emotion behind it. And once we understand this, we know if we are even in the dimension of the physicality or the dimension of the Soul.

Any other question?

Q: ... (1:08) To what extent do you see transportation changing the way people view Space traveling? And could these changes potentially lead to permanent peace deals with nations?

K- I was in a meeting in past few days, a number of meetings, and this is very prominent and I'm sure in next few weeks will become more prominent in our ?? work. That transportation, the way we know it, has no choice, no other way, but to revolution... be revolutionized with the new technology. The reason for it is the technology advancement is so rapid and is so mature and we are pushing it to its limit for its other type of manifestation in Tehran, in Iran conference. You have to understand, we released the knowledge to the Iranian people, what you call it, scientists, what you call it, in 2008. The same as we did with the 'USB stick,' we gave it to the governments.

In Isfahan we'll show to public for the first time the principle of the motion without what we call, wheels. As I always said, man in the Universe knows us as the 'four wheeler's,'

it's the wheeler nation, what do we call it, race. Because we never understood the process of the motion and emotion in the Universe, as I spoke last week about it. When we bring, when we show the, what we call, the process of lift and motion, in Isfahan, this will change the course of humanity. (1:10) Because we are not dependent on being on this planet, we are not dependent on fuel of this planet, we are not dependent on the surface of this planet, we become part of depending on the Universal energy. We depend on the environment of the Universe, without the surface, without touch.

And this will change, as I said in one of my meetings very, very recently, the problem to bring transportation, doesn't matter a car, a container, a ship, to the, let's say a few minutes, when it takes weeks and months with the new technology. It's not that the technology is not here, we're showing the technology to force this matter. It's how the governments accept this point.

At the moment you travel, more or less, from Gibraltar to Poland, Romania, you have no borders. You go through Spain, you go through France, you go through Germany, you go through Italy, you go through a number of border countries, you go to Austria and you go to Czech Republic, there is no border. We have accepted, normality that there is everything the same. Now, with this position, with this technology (T), there is no road map. You don't need a road to go through customs, you can go, there is no barbed wire, even the old way of Berlin blockage, which was mined on the floor and everything else, doesn't work anymore because you're flying over it. So, our biggest problem is how governments will start governing, handling this. (1:12) How we, how governments literally allow you to manifest yourself, they are worried about transportation, transmutation creates a bigger problem for governments.

And we go back to One Nation structure, because then everybody, you have a birth place card and the planet is your oyster, wherever you want to go. And this has limitation through the wealth, people who are trying to protect their wealth and their properties, where property has no value. Why should I pay 10 million for apartment in the middle of London, where I can have the most beautiful scenery on the coast of, God knows, an island and come to London in 5 minutes and do my job and go.

This is our problem. How the governments from end of this year will start ?? responding. We have to still complete, for our Knowledge Seekers to understand, the other parts of transportation and transmutation, that you, they can, we can show, the way we brought the system to London and we put it on the panel above, you could see how masses were changing. Now in Tehran conference, the whole system is changing.

In conference in, let me explain something to you. There is a possibility, I keep on going, Isfahan or Tehran, we will have two presentations in Iran. In Isfahan is for the Knowledge Seekers and citizens of Iran. Most probably we have a second conference after the Isfahan conference in Tehran for the world governments, (1:14) with the invitation of Iranian government to attend. This is why I keep on thinking of talking about Tehran. There is possibility that, for security reasons, we separate the Iranian

scientists and the world, what we call, political world, from the Knowledge Seekers in Isfahan and another part, maybe in Tehran, the following week.

Then you understand, how the technology will force the change. The reality is, from end of this year, beginning of next year, when this technology is shown, as I said many times, container ship is finished. Today, we ship a container from China, from middle of China, has to go to Shanghai or to another port, 6 to 8 weeks. There is a straight, God knows, problem, I call it, in end of the Suez Canal, and then going up, getting to the port, let's say Hamburg, and then coming off, and then going on the road, to be delivered in Frankfurt. With this technology, with this delivery, you pick up in middle of China, half an hour later, you're in Frankfurt. What happens to all these ships?

We're discussing it, this is what has been my daily battle for past few weeks. We are changing the whole structure, and we have to become the center for (putting) all this together. The container ship will go through the wall. The aircraft industry will hit the wall. (1:16) The car industry will change. The communication, transportation will change in next 5-10 years. We will not even recognize, in a way, what we have today. So, this needs to bring a new political situation around the world. What currency do we accept? Or do we go back to the time when we traveled in Europe, we went from France, we had one pocket full of French Franc, and then you go to Germany, you have German Mark, and then you go to London, you have Pounds, and you had 10 different pockets for the different currencies.

Or we go back to Keshe Coin, and one coin acceptable worldwide. Does not matter where you are. There is no BRICS, there is no common market, there is no dollar. A coin which you can cash anywhere. Value the same for all citizens of this planet. There is nobody who gets paid because I am a doctor 150,000, and a guy who cleans that doctor, to be a doctor, gets 15,000. Value according to what we bring to the others to enjoy life. First few weeks, first few years will be mayhem, but then it settles. That's obvious. I'm sure our leaders and people who like to feel important, they'll find a way to make it 'white club' only, and God knows what, we had centuries ago. But that will not wash.

Then we see, at the same time, we have given you key to the travel by Soul, which means you can forget about this, and then you can go in the brain of a president, sit in there and do whatever you like with his brain, if you know how to get in there. (1:18) So, the problem is not the transportation. 2024 will change, will bring an end to this dilemma. The biggest dilemma starts when the shipping lines, hundreds of years we relied on ships. For past decades we relied on aircrafts, for a little bit longer we relied on cars and fuels and the rest of it. A lot of things will change.

And governments, very rapidly, through the action of what we do in Isfahan, have to change very rapidly. The 'cat is out of the bag.' And I have made sure, if anything happens to me, before Isfahan conference, that we cannot show, a number of places will show simultaneously this technology. Which means it can not be shelved. Killing me, blocking the technology, will not happen. It will become worse, it will become more rapid. We'll load up programs that instantaneously will release, show you exactly needs

to be done by all of you, to bring a peaceful planet, with development of the new technologies.

So, conference in Isfahan will be a cornerstone for this especially, end of borders. The Persian Empire, covered more land than any empire in the life of man. This has become humanity empire. We all live across the same planet, the same way, equal. And Isfahan conference will show this. (1:20) Systems has to be revised. It'll take maybe 5 years for aircraft industry to replace enough material, and systems are built to replace the present system. Many people don't like to fly, many people don't like to be in the hovering car, they like to be in the box and sit on the ground and change gearbox. We'll still have that. But the new generation, the ones below 40, 45, especially the ones below 30 and worse below 25, will take into the skies. They will test everything with this technology. They'll come up with a new ways. Hopping and jumping, wars will have no more meaning.

And we see that this will come to the point that literally, you carry not the control, but the system method, that wherever you go, like now we have this, all the countries around the world have this machine, credit card reading. We have a reading of the card, of our ID, where we are from. And the beauty of it will come maybe in later time, that you are never out of cash, you are never out of money. Your credit is made by other man who have made a ?? credit that collectively we live a peaceful life. It is not communism, it is understanding that we can still live on the universal structure of peace and have everything we need. No child will go hungry because he cannot pay at the supermarket, because we all work toward that end that we all receive and live a good life.

This is not a dream. You will see the changes. It's not a border in Gaza, (1:22) that you can close and bomb the people in. You'll find out, people will live right across the whole of the structure. This will bring in distances which, places which, man loved to live but he couldn't because of the time, space, dimension. Too far, there is no water, there is no electricity. Where, most probably you will see in Iran conference, the new technology which Keshe Foundation has hidden from you. In supplying, delivering a collective, what we call, need of the man in one package. I'll explain this in Iran. When we come to it, you'll understand.

It's not damaging the order of the life, it's bringing order to life. This is the way we look at it. It'll take years for systems to be built, to be adapted for all the cars, not to have batteries, not to use CO2 burning systems and the rest. It won't be, once we show the whole thing to kick in. You have to understand, all the jobs in Airbus, Boeing, is going to the wall. All these jobs of producing electric batteries and all this, will go to the wall. And all this petroleum control, we work hard that suddenly the Prince of so and so buys one more Jumbo Jet for 400 million, he raises the price by one or two or three dollars, we all pay for his pleasures. All this will go. And we'll see the process. (1:24)

We are not the dreamers because we are scientific organization and we have built the systems to do the job. And it will do the job. So, how will it affect the transport? You will see. How many of you will be on your skating boards and change some of the car bits and you cross the border instead of going through customs across the other way? There's

always a 'back door' to everything. And what would it be in a position, this, what we call, human smuggling? Would it be existing anymore? Not really, because the way you smuggle them in, ?? they'll smuggle themselves back home. And the life will be different.

It takes about maybe 10, 20 years to balance this out. But the revolution, evolution of science and technology, being in public in Isfahan will change every one of our lives. Because it is not a screwdriver. In essence, it's a system which our lives depend on it and we are used to it. But now we do it a slightly better. We used to be living on the back of a donkey and now we drive cars and we fly. And now it's the time to move from the donkey up a jumbo jet into systems which have no damages and no waste. It will have a huge effect. I see more or less every day nowadays. I'm battling with it and handling it and talking with people who try to understand, (1:26) but they still don't understand the ?? technology.

Any other question? ...

Q: ... Thank you for all these beauties. You're taking us little by little where we are supposed to be. Thank you, Rick. Mr. Keshe, you talked about Nitrogen 14 on Earth and then C14 on Space and how Nitrogen changes to C14 and what's the role of C12 in here then?

K- C12 is a matter state. C14 is Space Energy Transportation connection. One is for the matter state and one is for the plasma state. That's all. And in C14 with its affinity to releasing energy and storing at the time of release is interconnection between the, what you call, the Cosmic Rays and the matter state Rays or communication lines, which is C12. (1:28) It's a line of connection. But there is something, let me explain this a little bit. Hydrogen (H) on its own travels the span of Universe. But in a plasma state as a field, we use C14. As a ray, we still see the properties of Hydrogen. And it's important to understand this because then, in so many ways in the future, when we go deeper in understanding the process of transmutation and transportation, we step down to, and step into matter state. One is attributes of what we call the rays in energy level, not in matter state as Hydrogen or Carbon. And one is the field interaction, which is a collection of the ray strength. ....

Any other question?

Q: ... Hello Mr. Keshe, in the 442nd Knowledge Seekers Workshop, you said, "If we twist it a little bit, so if we twist it to, slightly to a different angle, you get the Deuterium, (1:30) or is this Deuterium, this becomes your, what we call the Hydrogen. Different angle and collective plasma dictates the seasons, the field radiation." And with this information, I was trying to co-relate this knowledge with the Fundamental Plasma. Could you please explain the relationship of the angle between our Souls, and the radiation created, so that we can transform our energy into a Fundamental Plasma?

K- It's, to understand it correctly, is, all the planetary systems work in what we call, 90 degree vertical. When you twist it a little bit in the angle, you get the 4 seasons and you get the life on this planet. How the field, it's the same fields, nothing has changed with the structure of the Earth. But how it interacts as a ray, as a field, magnetic field, with its environment, the direction, the angle of it, changes what is absorbed, what is given to the environment, and what it receives from the environment. If you understand this, it should answer your question.

If you look at it, this is one of the very first questions I had to answer at the age of 8, 9 years old, when I understood, or not understood, I observed, the work of X-ray machines. How the intensity of the voltage and the current, flowing and creating whatever, (1:32) and the reflection of it on a little surface, releases rays. What happen if I turn it a little bit, it's not there. I had this discussion with my dad, and that's what's part of the beginning of his commotion with the knowledge of the nuclear and my education. That, how come this angle of this plate gives me this, what about if I do that, if I change it? And his argument was, "It has to be fixed, otherwise you won't get it." You can change the speed of the ?? head, or the, what you call it, the flow, and I always remember this word, "The KV has to be correct." I said, "What's KV, who's KV?" Of course, kilovolt. And, the angle mattered, and this had to be answered, why the angle mattered, and how the rays are created, and how rays interact, otherwise X-ray machines don't work. And, how we can absorb them on the way.

In the world of ... you don't see it nowadays, but those days, years ago, if you went to the X-ray departments, in the hospitals, when you had the X-ray machine, X-ray tube, used to be like this, what you call it, like a tube, had two brackets here, and this bracket here, had pieces added to it, which was conical, or different shapes, in how the radiation, and they used to slot this, into this part. So, this is, (1:34) or this material, was made of pure lead, that it could absorb every energy, except the energy which comes through this. This little hole, or they spread the hole for like liver, and that kind of thing, they open, they use an open one, it doesn't damage the liver, the rays are spread and soft. And then they used to change, the what you call it, the angle of the plate, always was there, the field current flow in this point, which we created the angles, was, what we call it, important how the angle is hit, that's one intensity.

And so, in the world of the rays, how you create them, the angle you put them, is very, very important. And the interaction, if they hit this conical lead, they get absorbed to it, or they release very little energy and they come out. They don't use these systems anymore, it used to be ?? too laborious ?? and they get damaged because it was soft. So, angle on the fields, brings properties and conditions, that decides how the environment and how you go through the environment.

We have this in nuclear industry in a different form, we call it reflectors. Where we take the neutron rods, what we call fuel rods, and then we put the reflectors and put absorbers, and every structure behind it, (1:36) how we can reflect the neutrons back in an angle, even as a particles, as out of it. It depends how it is now, with the proposed new technology, all this nuclear reactor. The possibility of nuclear reactors going out of

control, leaking radiation, with the new development of the Keshe Foundation, in the nuclear space technology, has become more or less zero. We will unravel this technology into IAEA very soon, in the coming months. It replaces the present industry of cooling rods, what you call it, cooling fuels, and the control rods and the neutron reflectors.

Any other question?

Q: ... There's a lot of talk about the angle or tilt of Earth has changed and the Sun is rising very early. What's really going on? Thanks.

K- I don't know, ask the ones who are looking at it, I don't have time to watch the sunrise.

R: Okay...

K- I said everything ?? here .. Earth is a dynamic system. And it's dynamism controlled by fields of other planetary system and the Sun and the rest of it. So it's bound to change, it's not constant, the same as we are used to, or we think it is. Carry on. (1:38)

Q: ... I'd be interested to know which amino acids (AA) prevail on Mars. For us on Earth it is COHN. Thank you very much. Any ideas on that one Mr. Keshe?

K- It's not far from Earth amino acid. Our amino acid partially and in a way with a bit of deviation, is dictated by the Sun. Not more or less by planet system. But most of it, life in another form or shape, always exists in all the planetary system, on the moons of them and the rest. We are in the same pot. Deviation cannot be much. Outside Solar System, yes. Inside Solar System we all have a common denominator energy field of the Sun and so our amino acid in one way or another, has a common denominator and that's why transmutation is very easy on this planet, on this Solar System. Different strength of the same, isotopes of the same, and the rest of it.

Any other question?

Q: ... (1:40) I have few questions, some of them is from the Knowledge Farsi speaking. And few is mine. I try to make it in two weeks, not all of them in one week, so I don't want to take much of your time. The first question is, I go back to the same emotional part of the brain that is smaller than a walnut. It's a little bit unclear about it. You said again that this emotional part, whatever emotion it is, from a beating or kissing, or anything else, this emotional part, if it needs anything, even if it's at the edge of the Universe, it makes sure to get, go again, get it. And if you take this part of the brain and put it anywhere in the Universe, it would function without your physicality. So is this emotional part independent of the STM?

K- It's a part connected to. The STP cannot change. It's fixed by the physical structure of the man. The STM has different dimensions in strength. And in that process can show itself, interaction with the ?? STM, not necessarily within the structure of physical body of the man. Not necessarily.

Q: So it's about the STM, it's not about the part of the brain, because the part of the brain is useless without the Soul.

K- Yes, but that strength of the Soul, with that strength of the STP, dictates a position about the emotion, in that particular position of the skull of the man, (1:42) and what you call the brain of the man. You can still take the piece of the part of the brain, which is connected to the emotions, cut it out, you still have that, but in a different strength. You cannot destroy it, the field is created, the dimension is taken shape.

Q: Okay, a question about, someone was asking, when you have .. the Soul doesn't have any gender, like it's not a male or female, why is it that in people who have two or three Souls, in them, it's schizophrenia, people, one comes as a female, one comes as a male, what decides on that?

K- It's all to do with inside operation field strength of the Soul itself. How it manifests itself, with the interaction of the STP.

If you look, very interesting, if you observed, I'm sure you have observed, many of you, those who are supposedly to be men, supposedly to be homosexual, they call it, or transvestite, or women, who are supposed to be men, without being schizophrenic, the body language, the body behavior is different. You see a man with the softness and walking of a woman, or you see a woman with the macho man of the man. If the emotion inside can dictate physical behavior, (1:44) why not the existence of the Soul? If one's Soul is a slightly different in energy field, interacting with the STP, manifests the feature of a woman, behavior of a woman. Another Soul, with different field strength, with the STP, behaves as a man.

Even in knowledge, this field strength interacts, this is what, in the teaching of this week and last week I explained, you can tap into different knowledge's in the Soul. And maybe it's a good question you ask, you can understand. We see this, people with what we call, the 'beautiful people,' one is within the same physical dimension, behaves like a man, and he is interested in physics. The other one, still a man, with a different strength, he is interested in literature. He taps into the knowledge of, but the physicality shows he's a poet. And the other one shows, Souls of physical, what we call, physics problems. They are not the same, but physicality is the same. Each Soul has its own field strength characteristics, and interacting with the STP, which is the same for both of them, creates a different emotion and different behavior.

In the world of beautiful people, some of them turn up in a way, one is, one Soul is at the strength, which physically turns to be a man, very macho, wears suits, and then you have the other one character, (1:46) field strength of the extremely feminine body. And then you see the person, you consider as to be a woman, and then it turns out to be a man, and everything else which goes with it.

This is what I explained last week and this week. What does the Soul tap into, in the Universal energy? The knowledge, poetry, geography of the Universe, and then physicality just there to show, it's manifestation, interaction with the STP. There may be, we more or less understand more about, interaction of the Souls within the one physical body, and different behavior, different intelligence, different knowledge. As you know, one of the best, what we call, 'beautiful people,' was been advisor to American government for many presidents. He has, I think, 9 or 11 different Souls within him, and each one is excellent in his work. Because that's ...

Q: Mr. Keshe, is it the same reason half of the population is changing their sex, because of the change of the field within them?

K- Could be. Could be. Now, where does, what you call, you call it in English, change of hormone, and women go through menopause. What happen if we look at it in a different way, (1:48) the strength and the Soul, and with that change, the field effects and women never go through menopause? Yes, it has happened with the development of the science in Keshe technology, and I've seen many of them with my own eyes. Women at seventies go through their period and they just get frightened. I lost it 30 years ago, what happened today.

When the first time happened in Belgium, I was panicking. But, came the next woman, and came the next woman, and we found out we have changed not the hormones, but the emotion of the Soul, and has created different condition of physicality. And I used to say, if you used to come to, what you call this, in office in Belgium, I said to many, many couples who came to me in their sixties. I said, "Be careful that not becoming a father as you are a grandfather already."

There is no limitation in the strength of the field of the STM, and within the egg and the sperm of the man, can dictate age. It's the mentality cycle, it's literally psychosomatic, if you understand what they call hormone, and what you call menopause, or the same with a man, it's a state of mind. If you elevate the Soul, the physicality never ages. (1:50) You can even give birth at the age of 120, if physically you can carry it.

But they don't understand, they say, "Oh, it's a change of hormone." Where did the hormone come from? Hormone comes from the interaction of the field of the STM. When the first couple of people came to me and says, "Mr. Keshe, we have a problem." Explain the problem. "We are in the sixties, seventies." I was on a panic streak, what have I done? But then it became understood, we understood the process. And so, if you can change the Soul, if you see the change in the Soul of beautiful people, they create different behavior. What happen when the female part comes into fifties and sixties, goes through menopause, when the, what you call it, the female part of the beautiful people, at this forties, they just start playing. But it's the same body.

Q: Mr. Keshe, I've seen some people going through menopause at the age of 35 even. So it definitely is the interaction of the...

K- Nowadays, through the stresses we see in the world of science, we see quite frequently nowadays, menopause in the age of 22, 24.

Q: Yeah. My next question is this...

K- The stress condition in physical dimension of the STP, (1:52) and the Soul cannot handle and it goes to the, what we call, behavior. Then the physicality changes. We see this quite a lot. Nowadays we see cancer in girls as young as 18, 17, breast cancers. We see cancer of womb, ovaries, very young age. So, where does the Soul comes in and how things take shape? Carry on.

Q: You know, I got my hands on a... Somebody gifted us a Bible which is, they say, is very original. So I started reading from the first page. It says, God created the... He started creating the world one by one, everything in it, from the day, from the light to the night, and all the plants and animals. And then he took the Soul of the Earth and then made the man, and then blow into his nostril, and then created the man, and then he called it Adam. And then he said, he put him, the God put him to sleep, and then took one of his ribs and then made the woman Eve out of it. So, because my husband was born Christian, so I went to my husband, I said, "Aren't you supposed to have one rib less than I do?" He said, "No, no, because this is a metaphor."

K- Yeah, but you know what happened?

Q: Because it makes sense Mr. Keshe, because you see, if it...

K- No, let me tell you, you know, I said, just wait. Do you know what happened when Adam and Eve had a fight?

Q: No.

K- The first fight they had, Eve took off, (1:54) she was angry and she went away for a few hours and a couple of days or whatever, and she ran back as fast as she could back to Adam. And you know what she did the first thing? She start counting the ribs, if Adam has not made another one from another spare ribs.

Q: Is it true story?

K- You are a woman, you have to decide.

Q: ... Then I came to my mind, you see, because first of all, it was Eve who tempted Adam to eat the apple. So, when I look at the history of the man, there's two thing I realize, one is, women always were, with the temptation for men, men had weakness about the women, so even Jesus got the weakness from women. So, the temptation came from women, even some wars in the world, the most vicious wars was created, women was behind it. Secondly ..

K- Excuse me Azar, stop. More women are tempted than men. According to the statistics, public, more women are adulterous than men. Men just got blamed for it to cover the behavior of women.

Q: No, no, I'm not talking about adulterous, I'm talking about women...

K- Doesn't matter, it's all the same, you put different word to it. The temptation, women temptation is more than for men's temptation. You said, men get tempted easier, women are tempted much easier than men. And believe in me, I know, I have two of them as marriage. So, I'll ?? give more.

Q: Second thing is, I never seen God chose a woman as a Messenger. Why? (1:56)  
Because for me...

K- I'm going to create a lot of problem for myself, if I answer this question, so I prefer to stay silent.

Q: I'm going to say the last thing, because, because, because I think woman... ?? because Eve came from women ..

K- We, we, we, no, no, no, no, no, no. We have had women Messengers. It's just that, it's been covered, destroyed or looked over, to show the power of men. It's not that we never had, we have, we've had and we will have. It's just that, just because men have power, they manage to... You know when you win a war, the one who wins writes the history, you're in that position.

For sure, and I said that long before Keshe Foundation starts, long, long before, the next, the next man, the next, what I call Teacher, not Messenger, is a woman, Mitra's daughter, she's among us. And there is no doubt about it. It's not that it's going, it's time for, it is understanding of the duality of the, what we call, you know men are single taskers and women are double taskers, they can do many tasks at the same time. Becoming part of the Universal Community, it is not single tasking of being a man, a human. We have to be able to handle many tasks. And that comes through the energy of the woman as a creator. Blesses her name. (1:58)

It's not that never been. We came the very first Prophets, where was a woman. We worshipped our wives, we worshipped as Iranians, our female part. We made them Gods and Goddesses. And we'll end up with the same blood, as daughter of Mitra. In a way, they're multi-tasking, as a man, we are focused in one thing. You give a child, washing the dishes and talking about anything else, man get lost, the child goes in the washing machine and the clothes goes on the table. A woman, multi-tasker. And, becoming a Passenger (of the U), becoming a citizen of the Universe, we have to be multi-tasking, aware of our physical dimension, and the dimension of the Universal strength. And that's how, I always said, after me, the daughter of Mitra will teach you this, because it's there as a woman, she has the capability, been trained for it.

So, we had the first Prophet, we had many, many, many Messengers as women. And, we'll not end up, we'll be go through a passage, that will be a woman. Men, single tasker, can not take us through. So, never talk about, we never had a Prophet. Because men ruled, they scrapped everything off and changed some things, to be in their benefit.  
(2:00)

Any other question?

Q: ... I've had a so-called near-death experience, 30 years ago, when I gave birth to my child by Caesarean section. I had seen the light, felt it, perceived it, and very strong, wonderful emotions of love, deep peace and bliss. I had the same emotion, as I held my mother's hand during the transition, which was a very, very nice gift for me. So, the question is, was that the light of enlightenment? Can you say something about that? Thank you very much. ...

K- It is possible. You see, you have to understand, when you go to the point of what you call, crossing over or whatever, and say, "I came back," or whatever, it's the time when you're in a physical pain or whatever, and what we do with you in the systems. The STP, the pressures of the blood flow, diminishes, so the Soul expands. You go through the same phenomena, the same process, as what we do in our systems with you.

As I said, with Knowledge Seekers, see the light, or they see a Sun and they go in it, (2:02) but some don't, and they try to understand it, but they forget to ask the question of it, what they want. And we call it the Sun, the mother, the creator. So, what do you ask your mother, your creator, "Mom, can I have food?" "Mom, can I have knowledge?" "Mom, can I..." We have forgotten to ask that question, but in the dimension of the Soul. So, when you went through that, or maybe even your mother went through the same phase, her Soul expanded, and as there was no physical emotion, dimension, the STP, you touched the same point. In a way, her expansion of Soul reached your Soul, and you felt what she felt, or both the same. This we understand now, there is nothing strange about it, and you should be able to analyze in a very, very simple way.

Any other question?

Q: ... Good morning Mr. Keshe, in some sessions I've attended, I've seen a light like the Sun, and I've had other visions, but I've never been able to interact with them. How do I interact in these moments?

K- Try to understand, you see as a physical light, you see it as enlightenment, the light of the Soul. Then, you'll know how to handle it. Many people go inside, they went, "I went inside the Sun, I went on the Sun." So, you're still traveling in the Soul, but carrying the STP, because you still deal with the physical side of the Sun. ?? Did you get enlightened by the knowledge of it, by the fields which carries it. (2:04) That's all. Next time try to see if you ask the right question, from it, and if the question is answered.

Any other question? Or shall I call it the day?

Q: ... Could you please talk about what's happening in Palestine, and Lebanon, and Yemen? ... repeats ...

K- A lot of mess. A lot of mess. Huge amount of mess, and all done by one bunch. This is a struggle of a dead man, and the support of another dead man who walks. I tried to restrain, (2:06) to unravel some knowledge, which is going to create a lot of problem, but... The truth about ?? my line of it is, this is the last fledging battered, beaten body of the State of Israel. And we shall see. We've seen the solution of the war cabinet, trying to get another bunch who will come with them to another. You have a warrant for arrest for 25,000... 2,500 cases of perjury, and everything else, and now a warrant on the International Court. But, the Constitution says the man who sits there can do what he likes. And the strangest thing is, the President has the power to dissolve the Parliament. The President has the power to ask the Prime Minister to step down, as President of Israel, and nothing's happening. And this is an end ?? inside.

What we've seen in Palestine, what we've seen might happen in what you call it, in Lebanon. It's very different than 1970's and 1990's and early 2000. You got to understand, half of the State of Israel are Palestinians. (2:08) And a lot of these Palestinians are connected to Lebanon, and if they... you hear in the news, you've seen the news, that they say that there will be a problem in every part of Israel. These people work in their homes, run their hospitals, they're part of the police force, and the rest of it. To them Gaza is different than Lebanon, and to them if it goes, it'll be internal, but we hope not. But, it's much, much deeper and much more political pressures, and in the ?? signs of actions in Washington, does not bring that much work for them.

You got to understand, I was explaining this to somebody very recently. We have two fractions, two sides of Israel, fighting for the same White House. You have the present president, which is what I call, a 'lame duck.' We don't know if he's still alive, or whatever to it. And the White House is run, as we said, by the Vice President. The President does not have the capability to run office as such. He can't even remember what he had for breakfast in some cases we were told. But, the lady married a Jew, through a different class or side of the Jewish connections in Washington to be elected, and he runs the White House in the back door. We have a problem with your possible return of the last president, (2:10) which he got his daughter married to second richest family in Israel, to get elected and to have the support. The only game changer in the middle, which of the two Jewish sides will run the White House, sits with the decision in Rothschild family. And last time, one of them changed position and brought the crazy man into power. Last time, the other one changed position and brought the elderly pensioner into power. Who and how the Rothschild family decides to support this election in the coming time, decides which of the side of the Jewish families will run the White House. And then we'll see how will reflect in the running of the Tel Aviv and everything else.

It's remote control within the White House and run both married (by marriage), one married to become, what you call it, vice president, and one got the daughter married to

become the president. And without these two, there would have been no position for any of these two guys to be in, in the presidency. And that dictates what happens in Israel, and how we are in this dilemma with Israel and the rest.

There is a possibility from what we hear, a lot of things can change. We are waiting to see how the Iranian election takes shape by the end of this month. (2:12) Who is going to take shape, to be, and what will be the outcome of political decisions in Tehran, within the structure of the family of the Iranian rulers. Are, what we call, prime minister, so be it is the son-in-law Ayatollah Khamenei of foreign office, present ?? Foreign Office, is another son of Ayatollah Khamenei, and the family is running the 'business.' So we have to see how they decide, and then that would reflect. As they are connected by blood to Lebanese, they come from a Lebanese origin, how they support the situation in Lebanon, what will affect us, in and through the Palestinians and the rest of it.

And, as I said before, Ayatollah, when you hear Ayatollah, it means Lebanese blood, religious side. Does not exist in the vocabulary of Farsi for Iranian religion. They've chosen this name for themselves, and they're all Lebanese. When you hear Ayatollah, they're connected by blood to Lebanon. And we have to see how they make a decision in how they share the 'loot' or whatever, and what will happen between the two sides.

But, either way, we'll see how these things will take shape in a bigger way, in a different direction.

Any other question?

R: Well, they do go on, Mr. Keshe, (2:14) and I sense maybe you're coming toward the end of what you would like to engage in here.

K- One or two questions, and then we go.

Q: ... Dr. Steven Greer talks about this technology, and knows who wants to put money on it. Do you ever talk to him?

K- Nope. I don't know who it is, and which technology we're talking about... I hear a lot about his name, but no.

R: Well, perhaps one day. One day you'll meet, who knows.

K- One day will be Sunday. Carry on.

Q: ... Many people talk about angelic entities or angels. Who are these entities, really?

K- I don't know. I don't. There are a lot of angels, and there are a lot of princesses, but there are to those who call them. I haven't seen one, so to me it's just a word.

Q: What is narcissism, and how can it be fixed?

K- Can you go to your beloved dictionary, or what you call it, Wikipedia. (2:16)

...

R: ... Let's see. "Narcissism is a self-centered personality style characterized as having an excessive preoccupation with oneself and one's own needs, often at the expense of others."

K- Isn't that word selfish?

R: Right. So it depends on how obsessive or excessive it is. As many psychologists believe that a moderate degree of narcissism is normal and healthy in humans, but there are also more extreme forms. Probably they're talking about the narcissistic personality disorder, a lifelong pattern of exaggerated feelings of self-importance, an excessive need for admiration, (2:18) and diminished ability to empathize with other people's feelings. Here's a narcissist himself, or at least according to this artist. "The man in love with his own reflection."

K- I think you answered the question.

What's next?

Q: ... As you explained in the last workshop, the toxins in the body are not eliminated with the Keshe technology, but transformed and used positively. How does mercury in the brain have a positive effect, and how exactly does this manifest positively? Thank you.

K- Oh, mercury and lead and aluminum add energy fields ?? are playing havoc with the brain. The energy is in a negative direction of the emotion. That's the problem. That's why we see problems with mercury and aluminum and lead. They have an affinity towards field strength of the depression. And they create that kind of... It's like inert gases. So many materials have inert gas characteristics, (2:20) and there's two or three more elements which have these characteristics. And for that reason, brain holds on to energy levels of it. Because some depressions create that field strength, and when this material is in the body or troubles, finds a match of it, and the match of it is in the brain. That's why we find it in brain, and we see all other problem with it.

It's not that the... Let's say mercury is the problem of the depression. Our brain creates a field strength in the level of mercury, that if mercury is within the body, will find the balancing of it, Yin and Yang of it. And they say they find mercury in the brain, and they see this behavior. The behavior is there, but now that the mercury manifests itself or finds its match in a way, in the field strength, now it becomes active. Now it's like a 'twin star,' fields travel from one to another. And this is the strength of a set of behaviors, like depression and many other things.

The world of science doesn't understand it, looks at it a different way, but this is how it is. We have it within our body, it's part of our emotion. And not all of us. I can take 10 kilos of mercury, nothing happens to me. I can take one gram of mercury and create havoc. Because in my brain, field strength of emotion is not the same as yours. And we already have it, when we find matching of it, we store it. And then we see, they say mercury or lead sits in the brain and causes damage, (2:22) because we have it.

To get rid of mercury and that kind of thing, the knowledge is to change the strength of the fields of the emotion, and then you will see it. What does it bring? Forgiveness. You forgetness, not forgiveness. You forget things, Alzheimer's. The things you don't want to do. Some people lose appetite, some people lose certain characteristics because of the aluminum or mercury. And that shows there's a balanced field equal to it in the brain for it, otherwise it won't be there. It gets rejected. We have it and then this encourages it and it brings a matter of state, field elements to it and then the problem starts. Self-centering inside.

Any other question?

R: Well, if you insist, we can go for a couple more.

K- ... I'll give you the last one. You got three minutes before. 17, 19, 20. I'll give you the last time was 18 minutes, now it's 27 minutes. So you got three minutes.

Q: ... How can we explain the death of the mother to a five-year-old child?

K- Very hard. (2:24) Very hard. It's not losing connection with the Soul of the mother. And understanding that impression is made at that age and it will carry on. Another way is elevating the Soul of the child. Elevation of the Soul. It doesn't come by pray, it comes by detachment of the one who is guardian, or is part of the structure. And to what extent will haunt it or will be with it, it depends how the environment around it has changed and how will be taken care of by those who are responsible. And little bit older will carry it with the life, little earlier will never remember. But this age is very critical, 6, 7, 5, and it's just by elevating the Soul, in a very direct way.

In a way by elevating the Soul you move the dimension of the emotion of physicality. That it can handle the transition. (2:26) And then depends what the family brings around and what the father brings around in this relationship. It's not easy to handle but it's in a way, it's just by elevating the Soul. The older you get the harder it gets but that's when a certain age becomes acceptable and some later on ages become ?? at least. But this age is very hard and how you elevate the Soul, it's the only way you can do. There is nothing we can do without understanding these things. If you could go through transmutation and reach that point you can do a lot.

Anyhow, shall we call it the day?

R: It's your tendency to want to continue but we have to cut off.

K- No, it's, it's, this subject is very touchy. I was listening to the very recent talks by Prince William, the Crown Prince of United Kingdom. How he said goodbye on the phone, tried to go and play sports, didn't have time for mom and that was the last call because in the evening the mother got involved in an accident. And he wishes he knew what would have said to her on the phone, even at his age, he was much older in teens. (2:28) And being even destined to become a king of a nation, is haunted by the loss of the mother at that young age and it's affected everything in his life. So it's not easy when you talk about these things and there's a lot of other things around you here and you see, and you witness to.

Call it the day, we'll see you next week. And Knowledge Seekers who join us tomorrow, please come with two headsets. Knowledge Seekers who join us for the July, August, September, October session, we're going to close this bracket fairly early because with this Friday sessions, people come in the last minutes because it is geographically decided. We're going to close things very soon because at the same time, we're going to break you up into small teams, one or two hours each free session on Friday. And so if you're joining any of these sessions, complete your sessions and come with two headsets from now on. You'll see what we want to do, and what we see this week it'll be completion of one part, and next month we'll start a different process totally in a much more advanced way as our technology has developed to be able to deliver that.

And please, those of you planning to come to Iran, complete the application form as fast as possible and then we can get your visa sorted. You don't need to do anything for your visa till we tell you. Your visa, it doesn't depend on you, it will be sorted that way. Thank you very much and see you tomorrow and some of you next week. Thank you very much Rick. (2:30)
