

# **546th Knowledge Seekers Workshop** July 11, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

How Plasma forms internally; Internal structure of plasma - residual fields interact create sphere & rotate; Wheeler to Sphere; Every plasma connected to U - specific strength; Creation of planet surface - Inertia; Inertia changes; Internal Inertia; Color of soil - emotions of planet; Soul of Planet - gravity in center; STP is Inertia; Man & Planet same setup; Planet absorbs energy from U without killing - man can do same; Learn spherical shape; Connect to all fields in U through Soul; Layers of soil from fields - not Big Bang; Man is connected to Creator; Understand pitfalls of Transmutation - same as P life; Everyone join Flight session no restriction - education of Soul; Thursday teaching for P; Daughter of Mitra in session; Crime spree - bring elevation; Pineal gland - Earth; U Council help nations; Kill to enforce opinion; Iranian President assassinated - details; KF Gas Units - plasma; About AI; KF can make Microchips with Soul - emotions - Plasma Chips; Superconductivity; Plasma Nano independent of environment; Soul is present in Cabinet meetings - was present when executed Raisi; Gradually humanity getting ready; Humans mix with U Community - children through Soul interactions - not P; Mitra created from STC; Chinese scientists block T - lose position; 2010 US Patent - admits not inventor; Blocked Nobel Prize for KF; KS experience with fields internally; Souls in Empty Space; Mr. Keshe transmuted age 8 - now keep body; Cosmic Ray material shrinks; Military using KF T for weapons - Non-Collateral Damage Systems" wipe out computers; Nuclear obsolete; Back up all data on hard drives; UFO create clouds with fields - used in Iran kill President; Daughter of Mitra - in session - elevate Souls.

## **ENGLISH TRANSCRIPTION**

(:13)

K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. (:14) We are back together again, and maybe, we can back some knowledge, into what I call, the Knowledge of the Creation, and understand a little bit more, step by step.

In the last week's teaching, we spoke about the way man is known as a, 'Wheeler Race.' And what happen if we become, like the rest of the Universe (U), think in the shape of the sphere, because the, in a way, it's the shape of the plasma. If you understand the shape of the plasma, if you understand the shape of the planet Earth, which is a plasma itself, it has a solid inside. In the way, by interaction of the fields of itself, it goes back to itself, and emerges again, as what we call, fields. Which, in that process, some is shared with the others, and some are maintained for the life of the planet itself.

In a way, if you look at the structure of the plasma, we always looked, and we always understood, in a, what we call, strange way, but, it is part of the understanding of this work, which we have to understand. We have no choice, but, in a way of understanding the totality of the interaction of the fields, which create a plasma, understand how this wheel, this spherical shape, works, (:16) how it rotates, how it maintains its dimension. If you consider a plasma, in a way of, what we call, different shape, and different structure, and come to understand the totality of its work, it's much different than what we've been considering. As the fields come, initial fields, and then in interaction, creates magnetic field and gravitational fields, these fields, all together, leave some residual from their interaction. Which, these residuals, in interaction, gradually create, what we call, the spherical shape of the plasma. But, as these fields interact, some of these fields move in a different direction, in all directions, and in all attributes of the work of the system. This is the life of the plasma on its own. If it stays in that shape, it will have a limited life. But, it itself, in a way, is connected to another ends, which we don't see. Each one has its tails, coming from somewhere, (:18) never disconnected. But, in this environment, it gives us the manifestation, visualization, of bunch of fields coming in, and at the same time, bunch of fields going out. Which means, the ones which came in, again, have connection with themselves, in another dimension, in another position. Where we look, this is the interaction of the field itself.

But, on the other hand, this thing is part of a Universal System. It creates fields, it creates magnetic fields strength, within this center, due to the interaction of the fields which created it, which brings fields from the Universe. This planet, this plasma, only can attract fields from the Universe, which is within the strength of the fields of these creators, of its origin. It cannot attract other fields, even though they are available in the Universe. And, in that process, on directional motion, of both side, as we see and we know, it leaves, it interacts, and it feeds these circular motion, within this sphere. (:20)

In the present world of science, plasma technology of the man, magnetic field, there is a fallacy. And, once this fallacy has, in a way, unraveled, this shows its, what we call, the wrong understanding of it, is that, in a magnet, or in the Earth plasma condition, we call it a North Pole, where it goes out, and South Pole, where they come in. But, in fact, as we said many time before, there are fields which come in, from different directions. The strongest, create the illusion of coming in and going out. Plus, what is fed by the plasma within the center itself, by collision , by interaction of the fields of itself, which it does attract.

So, in fact, is combination of the fields within this center, which sets what fields are absorbed from the Universe. Then, when this plasma creates a condition, that in interaction with the fields of its environment, it can create a dimension of interaction, which gives it manifestation of physicality. We call it the surface of the planet. (:22) Then, this surface creates a new dimension, which we call Inertia, which means, is the strength field of the fields of the Universe, in interaction with the planet itself, which dictates manifestation of the physicality (P) of the matter.

In the world of the man, we call this emotion. In the world of matter, we call it Inertia. In a, what we call, life of the planet, this Inertia, in interaction with the rest of the fields of the Universe, gives manifestation of physicality. And, as the planet grows, as the planet changes, as the layers of the material manifest on top of each other, the Inertia changes. And this change of Inertia comes from different emotion, interaction of the physicality of the planet, with what we call, the 'Soul of the planet,' which is its gravitational field in the center of it.

So, in a way, there is no difference between the physicality of the man, the Soul of the Man (STM), and the emotion of the man, which creates manifestation of physicality (P) of the man. Inertia is a hidden field, we call this Soul of the Physicality (STP). And, the STM is what we call, gravity of the planet. And what is the interaction of between the STP and the STM, (:24) gives the manifestation of the physicality of the planet, we call it, the surface. We call it, the skin of the man.

And this principle, shows, dictates, the condition that the Earth, even in the position of today, these magnetic fields which we have learned, so simply we draw, and we say, this is ?? fields coming and going out, in the real dimension of the field of the Universe, they're the lines of its food, it's what it feeds this planet. We don't see Earth to go and kill to feed itself. It has learned to attract, and so simply we draw the Earth, and we say, these are the magnetic field of the Earth.

If the planet Earth has the ability to absorb, create condition of the attracting fields from the Universe, and then with the interaction of the Soul of its physicality, expand its size to what it is today, as we see on the layers of the mountains, as I always say, when we make a cut in the mountains, we see different layers of the colors of the soil. These are different emotions which created that color. Different Inertia in respect to the field of the center gravity, or the Soul of it. If planet Earth has managed to feed itself, without killing, by absorbing fields of the Universe, and add to its mass, extend its life, why can't the man do the same? (:26) Why are we killing? Why are we seeing hierarchy in possession and possessing?

We have copied everything this planet has shown us. We fly like the bird, we jump like its animals, we enjoy its sunshine. Why don't we learn to feed like it does? And this is the purpose of the teaching. We saw the head of a nation kills another head of the nation to appoint what he wants. Why do we have to murder? We kill animals to eat, why do we have to kill? Does this planet kill to sustain life and expand its, what we call, dimension?

If the central point of this planet can feed itself for billions of years, why can't the center of the man, the STM? What haven't we learned? What do we need to learn? What do we need to replicate? To live, we replicate every dimension of this planet. Erupts, is volcanic eruption, and we shout our emotion. It creates winds and the noise, we shout our voice. It cries, we call it the rivers, and the tears of the man. (:28) Why doesn't man learn to replicate the way this planet and all the Universal Systems feed themselves?

Why do we have a spherical shape for the plasma? Because every single field which makes that sphere creates, possess different strength, so it taps to the Universal, Universal fields in all dimensions (D). Then you understand, the 'wheeler' of the man has made the killer of the man. If the man learns about the dimension of a spherical shape, that it can absorb all fields, then there is no shortage to feed the man to kill for it.

Then we understand the true meaning of life, Universal life, and the Ethos of Mitra. Then we understand what man needs to do, to connect to all the fields of the Universe, through his Soul, to absorb what it needs in the dimension of time, place and position (TPP), and not the time, the place and possession. If man understand this principle, if man understands the replication of the life of planet in his life, man will move away from killing. Man will move away from destroying to exist. (:30) Man will come to a point that, man will have no need to do anything to survive, but just to be obedient to the rules of the Universe.

This planet rotates, it's a constant speed, it keeps position at a constant space distance from its neighbors, and it's what I call the mother, the son. It does not create harm to no one, and lives for billions of years. Man kills, destroys everything, and lives only 20, 30, 50 years. And then, the, what I call, hypocrisy of it is, he's looking for everlasting life. And then those who understand, who understood the weakness of the man, create religions, to abuse more of his own lack of understanding of his own creation.

What you see on this picture, is a life of the Creator and the created. Going away and raining back onto. Understanding the totality of the Creation. Then, again as I said, what are we fighting for? What are we dragging in this physicality to every condition? (:32) Just to be here for a few fraction of the, fraction of the, fraction of the seconds of Universal time, and he calls it 20, 40, 50 years of rotating, like an idiot, around itself. On the surface of this planet. When sometimes I look at the Sufis, and when you see the skirts comes up, I wonder how much man has realized himself to be the center of, at the end, and at the same time on the edge of, at the end.

We are literally like little passengers on the, what we call, this system. We sit on the edge of everything else, and we don't understand it. Because we have not understood the simple rules of the Creation. The simple understanding of the World of Creation. And what will be interesting to see is how Knowledge Seekers (KS) will come to understand and to use this knowledge, (:34) this understanding, this interaction of the fields. And in fact, if you understand this picture, regarding the Soul, the physicality, the STP, the Inertia, the atmosphere, and gravity, and magnetical, you'll find out, you can decide where and how to change the Inertia. How to create a condition of what we call, understanding of totality.

If you look at the structure of the planet, and its gravitational system in the center, and Inertia on the surface, but it has, it creates Inertia internally too. This internal Inertia leads to creation of the matters, which in that effect, exist. The truth for man to understand is that as the Inertia on the surface changes, as the planet attracts more fields which converts to matter, this will change at the same time, the Inertia within the structure of the planet

too. Because now, the Inertia has moved to this level, for the surface. (:36) So the emotion changes. In this place you could not find gold, and suddenly, scientists say they have found a new gold mine, which was never known, because it didn't existed before. Because the scientists of the man have come up with the fallacy that when the blah, blah, exploded, and the whole start of the Universe, blah, blah, the material through whatever became, whatever has become, through what we call, the 'Big Bang,' where the head of the man ?? has been “Big Banging”, not the reality of the Creation.

And if you understand this, then you understand how man creates out of nowhere his own cancer. It's no difference. Man through the same interaction, creates ?? this is. Here is the Inertia and we change the surface. Here the emotion of the man changes ?? the inside of the man. Once man understand this, man can move a step further, to become a Universal entity. To live everlasting, to exist within dimension of the Universe. (:38) To, not to kill, but to learn to live within the fields of the Universe.

The way we said, that the gravity in the center of the planet dictates what it absorbs. So is the STM. It has the amino acid (AA) connection to this planet. So, it can only absorb the fields, which are at that strength. And then, what it interacts with, with additional field of Universe, gives it the new dimension of the, what we call, its atmosphere or Magnetical (M) field. And if you understand this, and understand that the Magnetic fields of the Universe obey the rules of the physicality of the life of this, what we call, Unicose. Is that, if you define Magnetic field in motion, as energy, then understanding the interaction of the fields of the Universe or inside the body of the man, gives you Magnetic fields, which are the energies that you need to create a condition, be it on the level of matter state, ?? on the level of Soul or the Universe. (:40)

As each Magnetic field of the given strength, travels the span of the Universe, has a constant speed of itself, in respect to its environmental field strength. And, when the Magnetic field in motion is understood to have energy, then when you space gap a given point, then you understand what energy you need. Then, if you translate this back into the emotion of life to exist, you know what you take from the Universe without killing. In a way, the emotion of the man dictates what the man needs, what the man takes from the Universe, as he comes to it. As does the Gravitational field of the center, calls upon the fields, which this entity can hold on to, can use, without disturbing, but being able to absorb what is for it to content for his existence.

Then, there is a beautiful question, which I put so many times to so many people. If we follow the same principle, in the world of Creation, (:42) which the interaction of these fields, creates the dimension of what I call, field strength, which all these need to interact. And, if we find out, if we realize, if we become able to measure the field strength that we need, to survive without killing, would some of that field, be the field from the dimension of the Creator? Which means, we need to receive from the Mother Source, to be able to operate within the environment of the Universe of itself. So, every man has connection to his Creator. It's the man who denies that access. And, if the man understand this, man will become passenger of the Unicose, in no time.

The process of understanding the strength of the man, is the detachment of the man. Detachment does not come by giving (away) everything. Detachment comes by being available to be taken from, in the field strength of the Universe, that it allows others to elevate. (:44) It allows the others to survive. It allows the other fields to support existence of some other parts, which you have no connection in the, what we call, physical, but you have connection in the emotional, because you came from and you go back to.

The essence of the Creation, once the man understands, gives him two things. Everlasting life and connection to his Creator. Because, this is one of the attributes of the Creator. From the beginning to the end. And, if you exist in that time, you are part of, you are between the two points of beginning and the end.

As we approach the time for the man to transmute, man has to understand, transmutation carries the same pitfalls as physical life. If you are not aware of its work. If you are not aware of its time and the place, then if you are not aware of its capability to encompass the whole thing. If you live, in what I call, a spherical life, then the "wheeler" life, you'll find a freedom from everything. Detachment, because you are attached to everything and everything is part of you. And, once the man reaches this point, (:46) man will come to understand the totality of the Creation.

And I hope, by the time we finish these teachings, one day in the future, man will be mature enough, understood enough, to become the Passenger of the Universe. It's always said, the little girl said to the black girl on the branch, "Can I lick you? Do you taste like chocolate?" Where we have to feel the emotion of. Because, even by licking, you take energy from the others. And then you understand where the pitfall comes, where man cannot lick everything in the Universe to see how it tastes and then to eat it. Where the taste has come through the emotion of the physical manifestation in the dimension of the STM.

I hope you understand this, because if you do, you have found the key to Universal existence, you have found the key to transmutation, you have found the key to everlasting life. And if you don't, unfortunately, we have session 547 next week and we might go to a thousand next year and more, and you're still on the ?? bend of understanding what 410, sorry, 500 and, oh sorry, 300 and ?? whatever. (:48) If man replicates the work of his Creator, which is this planet, man does not need to kill. Man does not need to be attached to this planet the way this planet has attached itself physically from its mother, the Sun. Try to find out, try to understand yourself, try to see how you can use the interaction of the field of the physicality and the STM to create a life without killing, without taking energy from the others and change the position.

As I said once before, and I say it, one day, you might understand. Energy is magnetic fields in motion. Energy is not animal in motion to kill to eat. Man has to learn this and not be killing. Unfortunately, man instead of using energy in motion of itself to create magnetic fields, is part of the vocabulary of the understanding of the science which he has forgotten. And the energy of the man comes from those who run physically. Energy

of the motion of the animals, trying to keep their energy when a man kills one. And when we embrace, (:50) understand this, we will be done with this. Energy has to come from what is free and not from what is captured and killed. Be it a plant, be it an animal, be it another man.

Always remember, magnetic field in motion is the energy that you need, that it gives. And not the animal in the motion that you eat and you call it energy. Hunger has come with the physicality. Hunger does not exist in the dimension of the spherical life of the Universe. As everything is available according to the strength within the STM. And within the STP, man dictates what he needs to confirm his existence and continue with his life. And if one day man understands the Totality, man has moved on.

And those of you who are trying to do the transmutation, you have to understand, you live with the Ethos of the magnetic field in motion. It's you who decides what to move and even to bring everything in the dimension of the energy that you can move it. And then manifest that in the dimension of physicality as you need it. It's easier to move the fields than to move the physicality of the man. (:52)

Thank you very much for today. I hope you understood. And I hope you understand what the life is about in the Space and transmutation. And where we are heading for and how you need to sustain life in the everlasting life of the Universe. Rick, can we go for a break and come back? And we go to the next session.

**>> BREAK >>** 546 KSW July 11, 2024 (1:00).

K- No, thank you very much. As usual, we carry on. It's just, please, those of you who are coming in for next week's session, complete it by next couple of days, because we have to allocate locations and areas you are in. And hopefully, it'll be very interesting, very interesting systems to observe and to monitor next week, and to make you ready, hopefully, for the go, for the final pushes up, for you to learn how to transmute and how to bring energies in the body of the man, to be able to travel the span of the Universe and

don't rely on your two wheelers in the Chinese firework. If there are any questions, we try to answer.

Q: ... For those of us who were not able to attend the Friday sessions on the first semester of 2024, can we achieve any progress in the sessions from July to September? Thank you.

K- Yes, they are totally different things and in a way, it's much more advanced and yes. (1:02) If you were in the back before, you might get there or you should get there much faster, it's another part of learning and who comes in now, it's not exclusive, who's been there before.

It's something which I explained to a Knowledge Seeker in the past and I explain again today. The teaching of Thursdays is a teaching the physicality of the man. You'll learn about Gans's and the rest of it. The sessions of the Fridays, once a month, is the education of the STM. Does not come into the dimension of physicality and it does not have exclusivity. And in a way of educating, teaching, how to be able to detach and the rest of it, and how to elevate, and how to concentrate. And you've seen this, if you go back in the first sessions of the first few times, a lot of people used to get bothered by the noises people used to make, by the other disturbances, and now it's irrelevant. They are there because physicality doesn't listen anymore. And this is the same thing, you can... It's not exclusive of the few people who come in, been. It's what you call, for anyone to join in any time.

Unfortunately we cannot record the teaching of the Soul by the dimension of fields of the Universe. (1:04) And you can have a session and join in, and you can listen later on. That's why we keep it this way. And trying to keep it into cycle of 20 to 28 days, is because some of you might have noticed, as we feed, as we elevate the Soul, you might have seen by the cycle of the man, some changes in dimension of physicality, emotion, even physical changes. And this is what we gradually start looking for, because when you transmute from one position to another, you change your physicality. Because the Soul has received, you allow your Soul to receive fields from other strength of the Universe. And you might see changes in the physical dimension, in emotion or physicality or health wise. But that is part of this, what we call, elevation of the STM. It's what I just said.

In a physical teaching, like Thursdays, we teach you, you hear the sound, we give you Gans's, you use, consume the energy of the sound of the Universe, as we carry. In the teaching of the Souls, and what we do once a month, is we transfer energies of the Universe. You are not connected, I don't talk. And if you, some of you even notice, most of the time, not only my microphone, even my connection is blocked, and I move out. Because, presence of me, as energy levels, can affect the Totality, all of you, what you learn from your Soul. (1:06) If you notice in some of the teaching, I go on total mute, not to receive and not to send. And sometimes, when I come in with just to give or just to receive, without you knowing, I ask it to be monitored.

In the next week's session, for a long period of time, for the first time, the Daughter of Mitra will be with us, which brings elevation to the STM. It's you who have to be ready

for that cycle, to understand it, to feel it. And that's why we separate you in different groups. And you have to understand, how you transmute, how you transfer, and what you need to transfer and what you need to transmute. And how you get your physicality to the point of transmutation, and how you bring it back to the point of transfer. And what changes do you see in that position? Then we'll see how the next extension will come and how we add to it, as you learn more through the dimension of the Soul. And it's not exclusivity of who's been here and who's not been here. (1:08)

Any other question?

Q: ... A bit of a sad situation is happening right now in the town of Ecuador, where we spent a few months. A town I consider kind of my spiritual home. There's a very serious crime spree happening. A group of men are going around robbing and committing violent crimes in the town. It's quite serious and people are considering leaving the town. And we wanted to reach the Souls of those men committing those crimes. We wanted to elevate their Souls and give them what they're lacking. So maybe they will stop their crime spree. Any advice on how we can do this?

K- It's very strange in what you try to do with a village or a city in Ecuador, or violent crimes and everything else. And what has been going through us in regard to a nation in the past few days. (1:10) And how to find a solution. And you do, we try to find how to elevate the criminals in that part. And I've been trying to find a way how to sort out these criminals in this part of the world. The same crimes, more even maybe worse than what you are facing in Ecuador. The only way is, try to reach, to elevate their Soul. Or create a condition that the process of the physicality for them become impossibility to be able to achieve through their, what we call, elevation of the Soul. It's very, very hard. It's very, very, what we call, impossibilities. But it can be done. And you have to change the position in the physical dimension to be able to achieve what you want to do.

You have to learn how to transmute, how to reach, and understand if these people are for a purpose there. What is their purpose? You look at a picture frame, you have to look at the whole movie. And who's behind it, how it is and the way it's done. And these criminals usually have a head who decide and plans. You have to connect to their head. Understand this operation and try to... (1:12) It's no use elevating a criminal who becomes worse by elevation in this criminality because now he thinks he's got a new place, because of what it is. And you're still dealing with the STP and the physicality manifestation. And try to find who's behind it, who's the head of it. Then you can change the rest. It's like you have a headache, you keep on taking tablets but you don't want to go to the doctor to tell you there's a tumor in the head. You have to remove the tumor. So you just keep on taking aspirins.

And we have the same situation in larger scale in another part of the world which even this morning I've been trying to find a solution and have one, what you call it, find an answer to it. And the only solution we see is not elevation of the STM that it creates and leads people in dimension of physicality misinterpreted to what you call it, a gift from the God and another level to be. It has to be done the right way. We have this situation now

in the state of Iran, criminals are running crazy from the top to bottom. And we have to find a solution for it. From head of the nation down to the bottom. Murders, killing, everything else has all come into one. And all in the name of God. You have to find out what they ?? the name they use, and what's the purpose. (1:14)

Any other question?

Q: ... Good morning Mr. Keshe. Have the Universal Family, I mean the races which are living in physicality on planets or stars with magnetic fields, a pineal gland or is it only for mankind and animals available due to the environment conditions on Earth?

K- Can you explain what a pineal glands are? That it must have its prerequisite to be alive or be a being. The only prerequisite to be a being is having a Soul and a STP. How you arrange it, what control system you put into it, what parameters, and things you call it kidneys or liver, is all condition of that Soul and that STP to exist and nothing else. Pineal gland or any other gland is the need for manifestation of physicality of the man on this planet. And nothing else.

R: It mentions the pineal gland is a small endocrine gland in the brain of most vertebrates. (1:16)

K- Do the plants have one?

R: Some people call it the third eye and so on.

K- Do the plants have one? Or is it exclusivity of those who can run with four legs or two legs or whatever?

R: So chances are some alien beings would also have the similar...

K- Maybe a control system that they need inside vertebrae. So what about the snake? Do they have one? What about the snail? Do they have one? These glands are things which are made for the specific use and need not exclusivity of and is not common to all of.

R: It says some species of amphibians and reptiles, the gland is linked to a light sensing organ, variously called the parietal eye, or the pineal eye, or the third eye.

K- Not really. It's exclusivity of this planet and its creatures and a specific type of creatures, including man. It's not common for everybody else.

You got to understand, dying in the Universe is very hard because you don't have digestion system. (1:18) When you take the digestion system, that's including the lung out of the body of the being, when you learn to absorb energy just through the Soul and distribute through the body of the man, you don't need to absorb. You can go from Mars to Moon to a caustic ?? (filled) ocean planet or whatever, you don't use, you don't consume energy. So 80% of the death and what I call, demise of the man is gone. Do you

get a cancer of toe? Do you get a cancer of finger in a way? All our cancers are liver, kidney, stomach, blah, blah. All to do with our digestion system, all to what we use from this planet. And what we give back to this planet. And when you use the STM to feed the man, keep the dimension of his physicality, which most of the creatures of the Universe are used to, you don't have these organs. And so you don't need many of these glands. And glands are meaningless in the dimension of Creation. Outside this planet of course. Carry on. You were trying to tell us.

R: Well, I guess that's about it. You've wrapped it up as far as that goes. (1:20) But yes, uncommon with many of the animals on Earth apparently.

K- Do the plants have one?

R: I don't think... I don't think that plants do, but...

K- It's like, you know, there is a fallacy that the prostate is the exclusivity of man. Women have prostate too. But we... it has never been brought to public, because then man is not exclusive. The same feature in any other things. World of Science has ignored or does not want to understand and claims it to be exclusivity.

R: ... I see a comment from Mahinez in the chat here for Sasha. That Sasha, you can put it to the Universal Council, who give collectively from their Soul to that problem. Put your wish to the American chat, if you wish. And it's being taken of by the Universal Council, be taken up by the Universal Council. So, it's one option.

K- This is fantastic. We are learning. (1:22) We're slowly, slowly learning where to go to solve these problems. Thank you very much, Mehranez.

Q: ... My question is, when we understand that we can live without killing, will that then affect all animal life on this planet and become a planet where killing will become a thing of the past for all life?

K- Yes. Yes, yes. 100%. You see, we kill on this planet to survive. We kill on this planet to enforce our opinion. We kill on this planet to show our power. Depends where we are and what position we have. Man in the jungle kills to eat, to survive. To live another day, to suffer more, ?? more or less. What we call a governor or whatever, kills, or a man kills a wife to show his power. And the head of nations killed to show their, their what you call, their powerful, and they decide.

And this situation with the killing has been keeping us busy for past few weeks, since the killing of the Iranian president. (1:24) And we've seen the fruit of that killing, or what you call it, the aim of that killing. What was behind it and what I said weeks ago. We saw it coming to fruition with one man trying to be in power for, and decide for. And even the life of a president wasn't important. And we've seen the reason of it, the way it was set up and what's come out in past few days. That it was a well planned, well planned, months

ahead in advance to organize the killing of ?? Raisi, President of Iran. What for? For man to stay in power? Is that the hunger we cannot satisfy? Or to possess?

And this is the same as, as Sasha said. What's the purpose? Who's benefiting behind it? What's the reason for it? The president of Iran was killed to satisfy hunger of one man. And that man is lethal if he comes into power. We've seen it with North Korean head of state. He even killed his own brother. (1:26) We've seen the same replication with the kingdom in another part of the world. One brother kicking the other brother out. And what for? Depends on the power and position. And what it is to gain from it.

Any other questions?

R: We have a couple of questions about the current status of the gas electrical appliance.

Q: ... Would it not be the right time for gas in Europe? Thank you very much.

K- The gas, sub-gas system is fully developed. The gas energy system, as we speak, as we explained, goes to go through a generator. Now our scientists have reached the point of gradually, in the next past few days and coming hopefully in a few days, to harvest the energy of the plasma. So the system will become gas producing electric system. And we, they're achieving great achievement. And the gas system we can, not we can, we could have released months and months ago. But now it's getting combination with a gas system and, what you call it, with the electric system together as one system internally. That we don't need a power generator for it or gas, gas turbine generators to buy, to attach to it. Maybe in next few hours, next few days, that will be fully realized. (1:28) And then it goes through the phase of certification and commercialization in the next few months. The Gas Unit we don't have no problem, the Gas Unit we need to, you know, now it's miniaturized to a briefcase. But now it's harvesting the energy into electrical current. Which has been literally observed, achieved in the past few hours. It's been videoed and pictured. Now it has been first and then it goes through its commercialization.

One of the biggest problem with Gas Units is disturbing the world patterns of energy. And we are working on it in the background with those who can bring the change in a mass production and mass release. And this is something we've been trying to do in the past few weeks. But the gas methane, gas production, we can release it tonight, we can produce, commercialize it today. It's not, that's not the problem. The main thing is to harvest the energy for electric current and we don't need to burn it. Using the energy of the gas in a plasma state, convert into electric current, this is one of the things which now has been achieved by our people, then producing the gas to go to a burner to burn a gas generator. And now in the next few days, it will be next, more or less, couple of weeks, hopefully leap and ?? bounding into a full power system. (1:30) We always relied on converting, burning the gas. Now it is converting the gas and the source into matter energy. Hopefully we'll show you the video very soon, you'll see, you understand.

Any other question?

Q: ... Can you please draw how radiations, monomagnetic or gravitational, behave towards other plasmas?

K- Oh, it all depends on their strength. Some go through it, some interact with it, some react to it. Depends on the source and depends on the strength of the field. It's not one way only. It depends if the field itself has a strength, equal or near equal to the point, or gravity of the point, it's traveling into it, both gets absorbed, interact with, or enters in the wrong direction or in the wrong angle, as you call it, in the interaction with the fields of the plasma, which it reflects it, or diverts it, or it's so strong that it doesn't have, or it's so weak, that it doesn't have any common denominator with the field in the center, and just passes. (1:32) It's as simple as that.

You have isotopes in matter state, you have a spectrum of fields in the plasma state. Common denominator, Gravitational fields, but different Magnetical, or common Magnetical, different Gravitational field strength. And in matter state, you count number of the Electrons, Protons and Neutrons. In the plasma state, we count the strength field of the Creation.

Any other question?

Q: ... Could one say we have an umbilical cord to our Creator, the Earth, and an umbilical cord to the Creator of all Creations, the cords being the STP and the Soul?

K- We always said that, without it we don't exist. Without that connection line of the fields, we don't exist.

Any other question? (1:34)

Q: ... Can AI affect the double slit light experiment by observing it, and would that mean AI is conscious?

K- Explain to people what AI is.

R: Well AI is what's called artificial intelligence, but it's common in, people are starting to use AI to ask it questions, and to get answers, and so on.

K- Are we artificial intelligence now?

R: Are we artificial intelligence? Quite possibly.

K- Quite possibly. Can you repeat the question?

Q: Can AI affect the double slit light experiment by observing it, and would that mean that AI is conscious?

K- I don't understand that question to be able to answer it.

R: Yeah, I'm not sure how AI would observe the double slit light experiment. To start with, say AI doesn't have eyes necessarily, but maybe it could see a video or something. Yeah, I'm not sure how even that experiment would be conducted. Maybe Steven you should try it and then get back to us on it.

K- ?? good ??. (1:36)

Q: I have a related interesting question about artificial intelligence... So AI is becoming actually more and more advanced, and they're trying to get it to a point where it actually attains, I think it's called a general intelligence, where it can actually think for itself and really make decisions and have a real conversation, rather than simply accessing patterns of speech from databases and guessing, predicting what the next words would be that humans would say. That's all that AI is right now, it doesn't really have consciousness. So the question would be, if some humans that had good intentions, like Knowledge Seekers, were creating an AI, would it be possible for us to actually bring in a Soul for the AI, so that it could become conscious and aid humanity in its liberation?

K- Very recently I have come, or I've been in a situation regarding this AI structure and the computers and the backups and everything else of it. And what I said is that, for the first time, through dimension of the technology we have created as part of the Keshe technologies, and through like the tests we do on Fridays, it's the first time ever we can produce microchips with emotion. (1:38) And with intelligence of feeling, because we can take the emotion, understand its strength and embed it within a material. It could be anything, we call it a cloud or whatever. And yes, with the new technologies, new materials, it's possible to create an AI with a full emotion and reaction to ?? emotion, ?? give it a Soul. It's possible, at the moment it's possible. I mean, I have spoken with some people who are in this game recently about this. Chips with emotion, which their interaction decides whatever runs behind it. AI is not something there. It's created by interaction of many microchips and many electronics. It's just to tell you the memory is on the cloud, but that cloud actually is on Earth, and it's a bunch of computers and Chips working together. It's more Earthy than ever be, but they call, it's in the cloud. And yes, it's possible.

Q: Wow, Mr. Keshe, that's truly amazing. And if this AI really had a Soul, that would mean it would have to be good, because it's coming from the Creator. So all the people who are worried that AI is going to be evil and take over the planet, that's not going to happen in this case.

K- I have been to one of the most powerful, (1:40) some of the most powerful computer centers who are supposed to back these things up in the past years. And you understand that at the end of it goes what's in the processing system of the chip. And if you can introduce what we call, plasma chips, then inevitably it has a central control. We call it the Soul, and it will have a judgment. It's the difference between when you write systems, you call it AI, but it's all a mixture of microchips and electronics. Then when you run the intelligence through the brain of the man, which is all to do with natural process of the,

what we call, elements. This is why there is a problem with the microchips, because it's rigid, connected, and then it gives an image, or a feeling, or a use of the use of intelligence, where the brain of a man is ?? removed flexibly, structured, and can do such a thing.

And with new technologies it's possible to make Chips. I was talking about this yesterday or the day before in a meeting. You can make chips that carry emotion, because you can carry interaction of the fields ?? out, through plasma and not through solid state. (1:42) Plasma Chips or plasma communication will change all these computers we are ?? battling with and they will all be obsolete. As I was saying to somebody, I was saying last night, the day before, it's very, very, very much like if you remember, when the first computers came out, and they had to put 16 floppy disks, one by one, to program it, to start it up, and then the rest of it. And before that, all these, and ?? (holes) punched in the papers, and now we are at this position. I think the next step in shift in technology, will come when plasma and Nano, and other structures are used for microchips with emotion. Our next breakthrough in science, or political, or ?? economical solution.

Next question.

Q: ... Can you elaborate on superconductivity in high temperature, instead of room temperature, as you already explained for some time? repeat ...

K- Superconductivity, this is a misconception, ?? this misspoken word, or a misuse of language, and then it's built on. (1:44) When you have a matter, you have resistance. And when you have a matter, you are condition dependent, which is temperature and pressure. When you are in a Nano state, or a plasma state, condition doesn't interfere, environmental condition, pressure and temperature. So you are constantly the same, cannot be changed. And temperatures have no effect on it, because by nature of the work, structure, they absorb everything and distribute it across. So temperatures are irrelevant. We saw this fully in 2011, 2010, in, maybe before 2009, 2010 in Ghent University, where we put a Nano wire through a very high current flow. And through the tubes of the Nano coating, we could see the liquid Copper. And the ?? matter, or the Nano material at such a high temperature, had no changes. One of the biggest concern is temperature in what level and what purpose, when you use the Gans's.

Any other question? (1:46)

Q: ... Mr. Keshe, my question is for the Knowledge Seekers and us to learn more or to understand more about your teachings. So we go back to your teaching today, about the emotions. And the colors, what these emotions emit, we see it only because it is due to the environment, yes? When it interacts with the environment.

K- When it interacts with the fields of you, not more or less with the environment. It's you observe from the environment, what is from your point of observation, at the strength of your observation. It means, if I am in certain pink strength, you see me at the pink

strength which is yours, but the other one who does not have the absorption of a spectrum of pink, doesn't see anything.

Q: Yeah, but... Go ahead please.

K- Carry on.

Q: Yeah, but the thing what I'm asking for, (1:48) it's not about the environment. What we see, we convert it to what happened really in the plasmatic condition. What kind of fields we are creating within us. So we see, let's say, when someone is shy, we see the flushing of his face as red. This color, it has a strength, yes?

K- Yes.

Q: So, what you said about the Inertia, what we see, it is double, what you call it, double presentation, outside and inside.

K- Yeah.

Q: So, what is really, if I can put it, what is the color inside? Or in what I am trying to say, what we see of interaction as we are as a plasma.

K- You see, you're playing game. I'll tell you how you're playing game. You want to see in the eye of the man, the color of the shyness or the blushing or whatever. And then you want to translate it in the dimension of the plasma. The plasma or the color of the plasma, comes from the color of interaction of another plasma. It might be red to you because you blush, whatever red appears. In the plasma condition, it could be totally colorless or a color you don't expect for what you're used to in a visual condition of red. (1:50) Secondly, the environment decides variation in the field absorption and observation. So, does not mean, wherever you see somebody shy this whole ?? changes color and it's red as well inside. Have I made it clear? Do you understand?

Q: In a way, yes. I'm trying to understand.

K- Yeah, the color of, the color we are used to, emotion of the color is different than the physical color. I was talking to someone today, and I asked her a simple question. Maybe very related to what question you're asking. I asked about the emotion of the pain. Can you explain to me the emotion of the pain? And my example is, if you bite yourself very hard, which is very painful, is that pain the same as when you burn the same spot, with fire, or it gets burned? And what emotion we create in respect to the same position, but different strength of the field. (1:52) One is the strength field of the matter fire, and one is due to the pressure of the jaws, or the teeth. And what reaction you get when you burn fire the same spot, or you bite the same spot? It's the strength of the field, and the emotion which ?? it created. And emotion which creates how that will feel. And, does it have the same burning effect, if you burn one finger or the other? If you burn your finger,

or somebody else burns their finger? This is a question, maybe could answer your question.

Q: Yeah, you know what you brought me now? A memory of my grandmother, when she is angry, she bite her fingers in respect to us. This is a culture thing with the old people.

K- Yes. Question number two.

Q: Question number two. If we want to create this surplus energies, which is really we can absorb higher strength of energy, or different kind of energies from the Space. (1:54) So, we need to create that within us, without depending, as you explained today, of the energies of whatever physical things. So, we can use these emotions within us, to create that kind of an interaction, to create that surplus energy.

K- Yes. What is interesting when Knowledge Seekers start learning, how to use connection of the fields, and how to, not to transmute, but put a point in something, that you need to know and what you get from it. That will be achievable.

I was talking to some people, and I explained to them, what I thought about their decision, and how they came to a decision, and how this decision stands in wrong way or ?? right way or whatever. And I said, "What you discussed in your meeting, I wasn't in the meeting, I was never even near the meeting, is not correct because of this and this and..." And one of the guy says, "Mr. Keshe, how come you were not in a meeting, but you know what is discussed in the meeting and you are very precise about it?" I said, "Man needs time to learn, in what we know as a ?? ." (1:56) I don't need to be there physically, my Soul is present.

Very recently, when President Raisi ?? was killed, I was asked by the Iran head of military, what is my opinion. I, within hours after the accident, I said, "My opinion is a murder." And I know how it's done, I know who's carried it out, who's decision. This baffled Iranian military, and so my openness, I have no fear to tell them what I ?? think. And when the truth came out, I was asked by Iranian military, "How did you know?" I said, "I was present." "Both in the decision making and in carrying out." That's why it was no need to be... When I gave advice, was very clear, I said, "If you accuse Israel or the others, look for these signs." "Have you seen these things?" And there was no answer. And I explained the reason for murdering Iranian president. And what I passed on as information, was so precise. And that's why Iran never accused Israel and they saw it ?? as malfunctioning and the rest. But it was a planned execution. (1:58) And both, my Soul was present in the time of execution and in the time of decision.

And this is what needs to be understood. We don't need to be where we are there in dimension of. And we don't choose to be. Our Soul, as it's like every field is connected to every point, is what you tap into. And we don't need to be everywhere in the physical dimension. And we don't need to manifest in every dimension. But through the line of connections, we can be aware of when we need the knowledge to.

This is where I tell you, when you go to another planet, you get the Soul of the planet and you speak the language and everything. If you understand the way the Universe works and we understand, you don't... you're at every point if you need to know what is in that point. And that's an art, which man needs to learn. And this, what I tell you, this past 6-8 weeks, which there were some Knowledge Seekers who were present when I gave my opinion about the execution of ?? Raisi. (2:00) ?? and now we see. And it's turned out to be correct. The Iranian election confirmed the correctness of it. The place, the area, and the way it was brought into ?? and the way it was set up, it was all planned months ago. It was just a matter of choice. The time. One day I unravel how the Soul works and how you need to be in there.

Question number 3.

Q: Are we, in your point of view, what you see, are the Knowledge Seekers or the humanity ready for what is coming?

K- We are getting ready gradually. It's not going to be, you know, ?? what we call it in Arabic or Farsi, the 'Day of Judgment.' It's not going to be all trillions and trillions of Souls who were born on this planet queue up for the... It is ?? all on every day as we live by ourselves, by our Soul. So, humanity in the Soul level has been made ready by Keshe Foundation ?? teaching and by others. In coming to understand, comes through the maturity of the man itself. How mature we are, and how we want to accept. (2:02)

Q: As you said always, "Are we there yet?"

K- We are there, but we deny ourselves, it's different. You play with your children. They want something, you give it to them, says, "It's not there, you have to stand there and get it, it's got to be there, not here." It's here, doesn't matter if it's there or here, it's still there. No but it has to be there, because that's the place where I can accept it. And yes, we are there, we are there for a long, long time. It's just that it doesn't suit some of us to do.

Q: ... Repeats ... In your teaching you said, "The interaction of the physicality and the emotion creates the Soul." And when the next work (next manifestation), the Soul will create the physicality, and then it will make the emotion for it to interact with the environment. If we see here on Earth, how you distinguish, is it the first condition or the second condition? Or there is no difference between the two? (2:04)

K- There is no difference between the two. You say in English, "The chicken come or the egg first?"

Q: Ah, you said the egg.

K- But you have to understand why the egg came first. Egg is a plasma, and its interaction of its field creates the dimension of physicality, which is a chicken. You put an egg and a sperm together, and they use the field of environment to create a common

cell energy, we call it a Soul. And once this is created, it dictates what can be added and what needs to be done to confirm its existence, which leads to creation of physicality.

When you create the Children of Mitra through the STM, not the dimension of physicality, as the man becomes the man of Space. This is what I always explained, and maybe the Knowledge Seekers never understand. Maybe you might understand a little bit of it. Is that, as I said before, on Earth we bring egg and sperm together to make the interaction of the fields to make a Soul. In Space, there is no possibility of sexual interaction between, physically, a man from the Earth and a woman from the planet Zeus. It doesn't fit. So, through the STM, the interaction of the Soul of the entities in sharing is like the Earth and the Sun rotate, and the rubbing of the fields of the interaction creates a plasma, that the Inertia of the Earth converts that plasma to a Gold, to Oxygen and the rest of it. (2:06)

So, the Soul of the material in Space is created by interaction of the fields. The egg being the Earth and the sperm being the Sun, or whatever you call it. But it's by their fields. And then, it decides to be part of the energy in the Universe, or decides to be attracted by the gravitational field of the Earth, in interaction with the Inertia of the Earth, to change to Gold or whatever. So, it's better, if you understand, to create children of the man, or children of the Universe, through interaction of the plasma. Then you don't dictate the condition of the manifestation. But it decides, it'll appear as Gold here, as a Silver in another planet, and as Jade somewhere else, or Oxygen somewhere else. And this is what Knowledge Seekers have to understand.

So, egg and a sperm is a dimension of coming together to create that Soul. In Space, it's the interaction of the plasmas, that interaction creates the children of Space. When we speak about the Children of Mitra, these are the children of the Universe. When it's created by the interaction of the emotion of two plasmas. Your physical body doesn't exist in the middle of the, God knows, Galaxies. But your Soul does. It has feeling, it has emotion, life, and it comes, interacts with another Soul, confirms existence. And the match, why don't we make Twinity, you call it. But this Twinity is not a solid state, stationary, it's dynamic. And when we're both happy with the fields we put in it, we let it go, let it manifest itself, be where it likes. (2:08)

The future, the Children of Mitra of future generation in Space, by interaction of the fields of the emotion, have no dimension of physicality, unless they decide. Here we decide, we plant it in the womb of the mother and it has to take shape. So, egg and the sperm leads to creation of the Soul. And the Soul then feeds the physicality, because now it decides how it goes. In the Space, in the dimension of Universal Community. When you become part of, excuse me, no way, even, you know, you take an English man and take him to Iraq, and marry him to Iraqi woman. The children of these two, has a condition, combination of the two in physical dimension. It could be blonde, be black eyed, and God knows, the nose of the father and the, the ear of the mother. It's what genetically, it's come into. If you bring a man from planet Zeus and a woman from planet Earth, they don't fit. But they fall in love, they want to share, to give to each other. That's what falling in love is. And in giving to each other, the collective of the fields, which are

equal and in balance and pure with each other, create a new Soul. And that's the Soul, child of the Soul of the Universe, Children of Mitra. Because Mitra was created from Soul of the Creator (STC), has no physical entity, she decides to give herself entity on this planet. Because of its beauty. (2:10)

And so is with the child of the man. On Earth's condition, to the Earth's condition, child of the Universal Community, manifests itself in the dimension of Universe. Where it wants to manifest. Man, physical condition and shape, depends on the energy field of the Universe of the womb of the mother. Children of Mitra, their manifestation depends on the energy womb of the Universe. Where they want to manifest. And they are free from everything. And their life is everlasting. Because they know how to transmute, they know how to transfer, they learn. They are Passengers of the Universe, and citizens of no land.

Q: ... In this case I think a lot of us have a lot of children outside there. Because we also travel.

K- You know, you know what they always say. He says, "I know about the children, I have, but I don't know about the children I was ever told about." You understand? It's a process of love. How many times you've fallen in love and mutually the other side, and you have created children of love, in the dimension of the Soul, but did it take a shape of physicality on this planet?

Q: Yeah. Do I have a chance for another question?

K- Can you bring the bed and breakfast please? We're going to stay here a long time.

Q: I am doing it now in the background.

K- No problem.

Q: The Fundamental Plasma we are in now, for us to transmute, we have to go to the next structure, which is the structure of the light. So what we have to...

K- To go to. ??

Q: Yeah. So we have to, in a way, let go of the physicality? In a way. Because we know, we know.

K- It's your decision. It's your decision. It's your understanding of what you expect and what you want.

Q: But in the same way, if we do that, we can manifest the matter state anytime. Because the matter state comes of the interaction from the STM and the emotion.

K- In a way, yes. ... But in a way, it depends on the belief of the observer in the existence. What does the observer believe in?

I'll tell you something very interesting. We show our technology (T). (2:14) And people, which is ridiculous, it's a new dimension to idiocy of man. We show our technology. We show whatever we do. And the interesting part, which has risen recently, is that the educated one, the ones who are supposed to confirm, they say, because we don't understand it, it cannot be true. But we say, we produce the gas, we produce the gold, we produce the material, we lift. I can't understand it, whatever you do is wrong, because I'm the man who says, yes or no. And the funny thing is, the people around them believe it, because he says, "No, we don't understand." Nobody understands. I say, "But the material is here. You're burning the gas." "No, no, no, no, no, no. We don't understand it, so you have to find another way to us." I have to become as idiot as you, for you to understand, ?? since it doesn't exist. This is a new 'loophole' scientific world has found around Keshe Foundation. They always said, "Proof of the pudding is eating it, in making it and testing it." Now we bring the cake, we bring the pudding, they eat it, it's there. We don't understand it, the cake doesn't exist. You understand?

Q: Is that a Knowledge Seeker?

K- No, this is a leading scientist in Western world, and in the God knows world of educational science. Top scientists in the world, in past year or two, have taken this attitude towards Keshe Foundation. It's there, we see, but we done the test, confirmed it's here. (2:16) But, we don't understand it, it cannot be corrected. But, up to now was, "Show it to us, we believe it." Now we show it, "No, we don't understand it. So it cannot be correct." I had this discussion, past year, two years, with world leading scientists. They changed position. What you make in front of us, doesn't count. What you do and we see, we test, we write, doesn't count. Because we don't understand, you can't explain it. If I don't need explaining, because I made it, it's there, you can't explain it. And I don't make one, I make hundred of them. So, it's a technology. No, no, no, no. You understand?

Q: Yeah, Mr. Keshe, they wanted the complicated one.

K- No, no, no, no, no. It shows they were idiots, they accepted the wrong science. No, you're wrong. Because, no man would like to say, "I'm idiot, I learned the wrong thing."

Q: Exactly, yes.

K- You understand?

And this is the dilemma we are facing now, with the world scientists. Up to now, show us we accept. Now we show before they do anything, we cannot accept. Because, I don't understand. So, you tell me how you want to handle it.

Q: Maybe they should make some Gans's themselves and see the effect of it.

K- But they don't still accept, they don't accept. (2:18) Doesn't matter, Gans is nothing. We are in a realm of the technology today, that the Gans doesn't play game in it. The technology of the Keshe Foundation, what you see on teaching, is not even the ground we

work on anymore. We long past this point. Long, long time ago, years ago, we passed the point. This discussion, even today, is ongoing with many, many people.

Q: Is it because it's simple?

K- No, because if I accept, what happen with all my education?

I come and see, I come and learn, and then I come up with an answer. There is a very interesting thing, I tell you something. You know, we spoke about this Mr. ?? thingy in America, he just submitted a patent on the Star Formation of the Keshe Foundation in 2020, with American Naval Research Center. Yeah? We talked about it and somebody said, what you call it, what was his name? Oh, the Spanish name, guy who's a Romanian born, and now American, and they publish his patent, and it doesn't work. (2:20) He says, this, he had to admit recently, that this is a knowledge of another scientist who didn't want to patent it, so I made the patent. And we don't know anybody speaking about Star Formation and things, and Keshe Foundation does not patent anything, except Mr. Keshe. It's actually, in his, recently he admitted, that the Star Formation which he has submitted, what you call it, a patent for, and it's been granted the patent actually, by the American authorities. He has admitted that he's made this patent, because the inventor or the man, Mr. ?? Pius, yeah? That he didn't want to patent his discovery, so I have patented it. You understand? Mr. Salvatore ?? Paris. And so, that's why he cannot answer why the system doesn't work, because he doesn't know, he just patented something he heard in the teachings, a Knowledge Seeker ?? find out, or somebody who comes to our teachings quite a lot. And, does our teaching, or has the American accepted the patent, to give him the grant, his patent, because our teaching is correct? He has confirmed that he has patented it, because the man who has brought it out, will not patent, (2:22) will not make patent application, which is Keshe Foundation. This is how much, we are deep in, and American government publishes our patents for us, and they approved it. So, we have to see, how we work, and how we share the knowledge, and leave the rest to, the rest to look after, and make the patents and everything else.

Any other question?

Q: Okay Mr. Keshe, thank you very much.

K- The knowledge in Keshe Foundation is very, very advanced, but Knowledge Seekers are not ready for it. One day when we release it, we release it to all of humanity.

Q: I hope so.

K- I hope so, I hope so. We have no problem, we don't claim anything, that's why we teach it so open. As Rick said at the beginning, teachings which never end. Never end the teaching every Thursday. We have a lot of people, who become as Knowledge Seekers, learn something, and they've set up industries, and companies, and everything else, and some relate it back to Keshe Foundation, some change it to "Quantum." And this way

they can mislead the man, (2:24) but they cannot mislead their Souls, and somewhere down the line, as I always say, the balance comes.

Q: Yeah, they are not reminded.

K- No, it's the way it has been, because we've been so open. I was talking yesterday with someone who is connected to someone who's got a Nobel Prize, and the Nobel Prize is part of the work of the Keshe Foundation. And I said to him, "Do you know why I can tell you what he's taken in the Nobel Prize is our work?" It is because when Keshe Foundation was Keshe Technology, we had full control over our servers, and we monitored everyday, who comes on the, what you call it, on the website. This is 20 years ago plus. And then everyday, all the visitors, IP number were printed, pages and pages, we've got books of these things, printed, IP numbers visited, when they visited, which IP, which day, how long they've been with pages, they looked at. And this guy appears every day in Keshe Technology, and we have it in black and white. I said, "Do you want me to show you how your friend has got his Nobel Prize?" Because up to that time, nobody knew, nobody claimed. And the reality is, we don't claim anything, we just keep on teaching. (2:26) Somebody gets a Nobel Prize for it, somebody opens a factory, somebody patents in United State. But everything was not there before, when teaching started, or when we start explaining the technology. And that's why we are in the purpose of the teaching, to share it, that others can bring a little benefit.

Q: You know Mr. Keshe, when the Sun shines, it's rays for Earth, everyone take from it as he like, when they make energies from it, so it will make the Sun happier.

K- Yeah, it's just a ?? Nobel claim. There are 2 or 3 Nobel Prizes, which connect directly into Keshe Foundation, and our teaching over the past 30 years. And we can show it. As I said, the IP of, I said, if you are guys, IP is still the same, from the same University, you see it every day, you spend a lot of time. And he hasn't claimed anything outside what we put out.

Q: Of course Mr. Keshe, he cannot think for himself.

K- As an American say, one of the Knowledge Seekers, I'm sure he's listening, he's with us. We were told to go to ?? Delft University in Holland. And we went there, it was the prerequisite to getting a Nobel Prize, to discuss with the eminent scientists of the Holland, and some other scientists came from around the world, to, what you call it, (2:28) to this, to prove the discovery of the technology in ?? both aspects. I went with a couple of Knowledge Seekers to this meeting of Nobel Prize. We were told we have to go. When I got there, there were a taxi driver, and some others, they're trying to ridicule us, ridicule us. But I knew the professors who were appointed to be in that meeting. I, when I came out of the meeting, I actually refused to attend the meeting. I called the professor, I said, "What happened, was this a game?" He said, "No, the Nobel Prize was set for you to come in, to set up, you would have, it was set for you, and we were threatened if we come, we'll lose our seats as professors and all the facilities we had, by governments." And he said, "Because of this, two professors have resigned their seat."

And, our Knowledge Seekers says, he's a very well known person, who was there. Publicly known, he's a public figure. So, as the American said, "An Iranian nuclear physicist cannot get a Nobel Prize." And I said, "Some citizens cannot be, ever be humans, it's all the same." It is the way it is.

Any other question?

Q: ... (2:30) I just want to continue the previous conversation that we had, some workshops ago, where you said that I have to rotate the Soul plasma in the middle. So, I'm not sure if I'm doing this correctly, so I would just describe my experience with it a little bit. So, I would like to tell me if I'm on the right path. Because I try to rotate it from the left to the right, with my intention. And in the beginning it's very difficult to feel it, but after some time it starts to feel like a ball, or some ball of energy that is going in my head. And I feel the interaction, I can even spin the fields down around the spine. It's very interesting. Is this supposed to be the feeling when you rotate the plasma?

K- It depends on how you want to do it, as you said. And, I'm not there, I don't know the feeling, what you feel.

Q: Well, I meant, what did you feel when you rotated it, or what the others felt?

K- I don't feel it, no, no, I never rotated it, that's... I'm not a Sufi. No, it's understanding with the interaction.

Q: Well, basically the Soul is in the middle, and it's made the... the other fields around it, are made of the same fields that it is made of. So, if I move it to the left or the right, I should feel like interaction with the fields around it. Is this correct? (2:32)

K- It's like when you... How to say this? You know when you close your eyes, and you feel somebody is behind you or next to you, you don't need to open your eyes to feel them, you feel their presence. It's the same kind of feeling, and you decide where.

Q: It is something very interesting, that I almost managed to do. I tried to... because I feel like two fields that are coming from the bottom of the feet, like a spiral to the top, and I tried to rotate the field to push the Soul down, and I almost felt like the field around me, that I can push the environment out. Is this supposed to be this Soul expansion, like you said? Or I'm just pressing the field out, I'm not expanding? I don't know how to say it, like... When you push the air into the balloon, I almost...

K- Different, different, you're not the only one. Different Knowledge Seekers are achieving it in a different way. Different knowledge, because you see, you're not the only one who's... A number of Knowledge, because I get the writing, they write to us, we hear it. A number of Knowledge Seekers have start this emotion, some with two fields, some with one field, some rotating it ?? up, some feeding from the foot up. It's all depends on how you feel comfortable to do it, to achieve, to understand the other part of yourself, and nothing else. (2:34)

Q: So, it makes no difference if I take from the bottom or from the top?

K- It all depends how... You know, I always said, "You count the number of the stars and planets in the Universe and Unicose, each one is individual, each one is made in a specific way, and not two of them are exactly the same." So, is the same with the creation of emotion and ?? emotion of the STM. How you, how you transmute it, how you transfer it, how you make it physically manifest. And, I always said, if you've been in some of the old teachings, you takeoff from, let's say, London, you go to New York, in the time between the two places, you are, you are not a citizen of the planet Earth, you are a citizen of Atmosphere of the Earth. You are not counted as, let's say, British, and you are not counted as American, because you have left one and not arrived in the other yet.

Is the same with the Creation. There are many empty spaces and many Souls in motion, Souls of Universe, that they have not manifested and they are still on the way of arrival to manifest themselves. And how they were manifested, and how they manifest themselves, and is what is manifested, is what is left as when ?? is left, (2:36) all depends on how much is on the way and how much is in the empty space gap of the Universe. We travel from London to New York and we are citizens of none, we have no existence in either points. So are the Souls, fields between what we see as planets and stars, and in between them as emptiness. Where they are the same as traveling from A to B, they are citizens of none, but on transmutation and... And how did they decide to transmute? Are they going from London to New York with a ship, with a donkey, with a airplane, with a jumbo jet, with a God knows what? You understand? So, what method you choose, and how you manifest at the other end, is decision of you. You have to find out which method suits you. There is no one way written that we have to do.

Q: Yeah, I understand. I wanted to ask if this pushing of the, this field that I feel it, that I can almost push the environment out, because I feel it like very weak, like I cannot like really make it strong.

K- I'm not there, I'm not, I'm not the feeling, I'm not those fields to tell you. It's how you feel. This is, this you have to learn about yourself.

Q: I mean, is this the right way to go? This is what I meant. Because I don't know anybody that is doing it, you know.

K- I answered you, if you don't understand, there is no rule book. You write the rules according to your own understanding, (2:38) and your own fields, and your own energies.

Q: But how would this feel for somebody who already achieved it, to put my question another way. If I start from the end to back, if I achieve it, how would this feel?

K- I cannot tell you, because I do it so normally, to me is in second part of my life, is on, or maybe first part of my life. And I don't need to do it, is there naturally. You understand? But it's come from the experience. It's come from trying.

I used to transmute, or whatever you call it, fly or whatever, since I was 8, 9, 10. I made an art of it, how to fly, in the physical dimension. I used to put my hand next to me, I used to go, "Bluuuh", and let's go up. And see how far you go. Let's go somewhere else. And then, my brother (bless his Soul), he said, "Where are you going? Sometimes you are not on bed." I said, "I go to toilet." Because I wasn't in bed when he used to wake up. He comes to come to brother, and I wasn't in my bed. I learned this technique, and now I don't actually need to leave the physical body, I go, "Pfff", it's here, but it's everywhere else. I have sat in cabinet meetings, without anyone knowing, and I know what decisions they made. Because I wanted to be there, to know what (the) decision is. (2:40)

Q: So, you mean that when we transmute, you can leave the body out? Just to sleep, and you can go wherever you want?

K- Either way. Either way. Depends how, what you learn, and what you're good at. Depends what you're good at. You still have at the end of it, come to physicality, and carry it out in physical condition. You understand? Because, in this moment of time, the science does not accept, all people don't accept, they call it a dream, they call it oh, whatever. Man is not mature to understand, this is what I keep on saying, I've said many, many times, when people came to Linz, I told them, "Whatever you say, we accept, because you've taken the journey, it's your Soul who traveled, not mine."

Q: Okay, thank you, I think I'll practice more, and see what come out of it.

K- Yeah, you have to learn to, to practice, make it perfect. But it's about you and nobody else.

That's why it cannot be any religion in Space, because everything is individual, cut by you, for you. But if you follow the Ethos, you have to understand the reason you're doing it. And then you find out, there's another way to do it. Trying to achieve, to satisfy your, your capabilities or ability, it's much harder than trying to elevate someone else with it. (2:42)

Any other question? Or shall we call it the day?

Q: ... What is the status of the Cosmic Rays materials delivery?

K- We are producing it, and it's getting, actually there are four machines apparently now in operation. We are producing surplus of it, but it's just getting it contained. I carry nearly 5 grams of it with me now, and we cannot, we have to find a way to transfer it, to ship it. And this is our only, we thought we found a solution, I'll check out. As far as I know, we have enough material with, that we can meet the demand, or what's supposed

to be done. Because there are four machines now in production of it. I'll let you know next teaching, I do apologize, but I thought it was, it's getting sorted.

Let me explain to you what the problem with it. Part of the problem with it, is that, we produce it in one gram, and when we leave it, it becomes half a gram. And it loses its weight, and then sometimes it gains weight. So, we can load up one gram, but we have to sustain it, that it's one gram, and then we don't receive it half, so it's a half a gram, what we said. It's loaded at one gram load, but when you even leave it on the table, after a few days, it becomes half of that, a quarter of that. And this is another problem, that's why we keep on producing, to keep the stock. But I'll check on that, and I will let you know next week. (2:44)

Any other question?

Q: Will the AI, this AI we talked about then, also be able to do Soul elevation?

K- I don't know, I don't know. Maybe, if it becomes intelligent enough.

You have to understand, a lot of things, a lot of things, with this artificial intelligence, and a lot of things with connecting it, with this iCloud business, and the other parameters, with the new computer system, has a, it's a beautiful thing. But, you got to understand, especially these AIs, which are connected to Clouds. Clouds, they call it Cloud, there's actually physical computers, a server somewhere, that's what Cloud means. They've just, they found a way to fool the man, but that's what it is. There's no machine hanging up in the skies.

These are, have a pitfall, and very recently, a huge problem. Which can create, or it can become obsolete. This is due to technical, technology development in military. If I was you, (2:46) as Knowledge Seekers for next 10 years, whatever, now, nobody knows what will happen. Keep your backup of your computers, your servers, whatever, in a hard disk, which is not connected to anything at all time. Not even to electricity.

The new weapon technology, which is now, is becoming a very advanced technology, is to disable computers. They call it non-collateral damage systems. It's not known in public, but non-collateral damage technology, military technology, is on the back of the capture of Iranian, American drone. It means, be able to paralyze all computers. And, when you do that, these AIs, which majority connected to what's supposed to be iClouds, which is the servers on the ground, will become useless.

Self-sustaining systems is a position, and new plasma technology is a solution, because they have not found a way around it, to bypass it. And this is why the new technology is needed, because the new weapons, what we call, defense technology, has other capabilities, which we never had, and now creates new danger and new opportunities.

Let me explain to you this, (2:48) because I did this ?? with some militaries very recently. The new, what we call, non-collateral system, which is coming to operations,

it's operational now. We brought it into operation in 2011, capture of the drone. Then again, and now it's taken a new shape, in a different way, by a couple of militaries. It's the extension of the Keshe Foundation technology. Now we paralyze, we can, we have the capability, the way we captured the drone, to, not to attack, to destroy, nuclear weapon technology is obsolete. Definitely obsolete, it's gone. Whoever talks about nuclear weapons, is of the old age. It's completely useless to talk about nuclear weapons, because this technology, super-passes nuclear technology.

But what it does, it can use the nuclear technology, to create mayhem. If you understand the process of ?? if the way we do. And governments, in not having it, are closing their eyes to it. The AI and other things we hear, iClouds will be the victim of this new technology. What it will do, it'll destroy the base information. It will stop central banks to operate, it'll stop the government system to operate. You don't need to do much, to create mayhem and chaos. (2:50)

The understanding of the new, non-collateral damage systems, will force, the people who make all these servers, AIs, and the rest of it, to find a solution to protect them, and they have no protection. We, I developed the protection some 20 years ago. It's, we have no problem in Keshe Foundation, the structure we have. We understand it, it can be handled. The primary position for you Knowledge Seekers is, back up your computers, back up all the information you have, on a hard disk, and never connect. When you connect to download, immediately remove. The problem with the new system is, it can reach even systems which are not connected. You got to remember, you don't connect your laptop, you do nothing, you leave it for months and years and you plug it in, it comes and it operates. There is a system background to it. The new technology reaches that background technology.

And, the governments are denying it to their peril, but, I presume within the next two years, we will see it effectively used in, to show it, (2:52) in certain countries. You don't need to invade a nation, you can stop the Central bank, you can stop the power supply. With a flick of a finger, people do the job for you. Dragging armies across the world to start war, is finished with the new, what we call, non-collateral damage technologies. And, in a way, we don't create a war, but we let them create their own civil war. If you understand.

And, AI is one of the biggest victim of this process, because it relies, it depends solely on connection to Internet and to Cloud. So called Cloud, huge servers on the Cloud, which are again backed up. And, this is something you as Knowledge Seekers should know, because it's not upon us, it's with us. And, it's a beautiful technology, it's a Space Technology, but, it doesn't kill, it doesn't destroy, but it creates a condition to bring changes to governments. And, we can, we should see this in operation fully in the next maybe 12 months. And, the nations will use it.

And, interesting, very, very interesting. It's the same as, how you create clouds. (2:54) And, to the naked eye, it looks like a cloud. But, it's not a cloud, because it's created by the interaction of the fields. And, depends on the user, what it does with it. If you, it's

hard for you to understand, it's very, at the moment it's on the, we have all these cloud business.

Go and find 2010. Summer of 2010, BBC, I've said this before, maybe for you to understand what is to come. And, what has happened in the past, in Iran, in the past few weeks. In this movie, is in Brighton, and I explained that very recently, now you understand why. The picture is taken on the sandy beaches of the city. And, the camera is up, walking, showing these couple walking down the steps. In the cloud above, you see a UFO, going from one cloud to another, going back to the cloud. Because, it created the cloud itself.

And, this kind of technologies now has become, and is in the reach of certain governments. (2:56) Non-collateral damage system is a reality in our hand. And, creation of the clouds, which are not clouds, has seen the end of the Iranian president. Technologies are advanced. It's part of the Keshe Foundation technology, which we brought out. And, we taught to governments and nations and scientists. And, you have to understand to protect yourselves, from these kind of materials, which are now, have become gradually reality, in the world of science and technology.

Thank you very much for today. And, we'll see you next week, hopefully. Don't forget, next Friday, there is a session. Maximum time, each group of you will take, it'll be two hours, and no more. And, in some sessions, as I promised, the Daughter of Mitra will be amongst you. And, we tell you the reason why, maybe at the end of the four month session. Thank you very much, and see you next time.

**546 KSW July 11, 2024**

**END**
